- 14.8 In line with the United Nations Disability Inclusion Strategy, UNEP will be attentive and responsive to the inclusion of persons with disabilities, including by raising awareness of their needs and concerns in its programme and project design and implementation and tailoring its projects to fit the conditions and needs of local communities. For example, addressing the concerns and needs of persons with disabilities will be emphasized when supporting climate change-related early warning systems or in projects that deal with environmental disasters and conflicts. UNEP will continue to reinforce the promotion and protection of the rights of persons with disabilities through its safeguard risk screening and mitigation procedure.

Impact of the pandemic and lessons learned

- 14.9 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular, under subprogramme 5, owing to limited travel and in-person meetings, which had an impact on the subprogramme's support to address waste and wastewater issues.
- 14.10 In order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives progress was made towards improved low-emission investment by leveraging climate strategies as the guide for COVID-19 recovery investment; lowering the risk of future pandemics and health crises by strengthening environmental considerations of human and animal health; and enabling a more resilient and sustainable post-pandemic tourism under subprogrammes 1, 3 and 6.

- 14.11 UNEP continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including the more flexible use of workspace and strengthening procedures, within existing overall capacities, for virtual and hybrid meetings to meet Member States' requests for such modalities.

Legislative mandates

- 14.12 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

2997 (XXVII)	Institutional and financial arrangements for international environmental cooperation	74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
47/190	Report of the United Nations Conference on Environment and Development		
S-19/2	Programme for the Further Implementation of Agenda 21	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
53/242	Report of the Secretary-General on environment and human settlements	75/271	Nature knows no borders: transboundary cooperation – a key factor for biodiversity conservation, restoration and sustainable use
65/2	Outcome document of the High-level Review Meeting on the Implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	75/322	New Partnership for Africa's Development: progress in implementation and international support
66/288	The future we want	76/128	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
67/213	Report of the Governing Council of the United Nations Environment Programme on its twelfth special session and the implementation of section IV.C, entitled "Environmental pillar in the context of sustainable development", of the outcome document of the United Nations Conference on Sustainable Development	76/129	International Year of Sustainable Mountain Development, 2022
		76/137	Policies and programmes involving youth
		76/201	Sustainable tourism and sustainable development in Central America
67/251	Change of the designation of the Governing Council of the United Nations Environment Programme	76/212	Strengthening cooperation for integrated coastal zone management for achieving sustainable development
68/99	Strengthening of international cooperation and coordination of efforts to study, mitigate and minimize the consequences of the Chernobyl disaster	76/213	Science, technology and innovation for sustainable development
		76/214	Culture and sustainable development
		76/224	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
68/215	Report of the Governing Council of the United Nations Environment Programme on its first universal session and the implementation of section IV.C, entitled "Environmental pillar in the context of sustainable development", of the outcome document of the United Nations Conference on Sustainable Development	76/298	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	77/28	Strengthening of the coordination of emergency humanitarian assistance of the United Nations
73/238	The role of the international community in the prevention of the radiation threat in Central Asia	77/44	Observance of environmental norms in the drafting and implementation of agreements on disarmament and arms control
74/213	Cooperative measures to assess and increase awareness of environmental effects related to waste originating from chemical munitions dumped at sea	77/119	Effects of atomic radiation
		77/150	Information and communications technologies for sustainable development

Section 14 Environment

77/151	International trade and development	77/164	Disaster risk reduction
77/152	International financial system and development	77/166	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa
77/153	External debt sustainability and development		
77/154	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development	77/168	Report of the United Nations Environment Assembly of the United Nations Environment Programme
77/155	Promoting investments for sustainable development	77/171	Combating sand and dust storms
77/156	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development	77/217	The right to food
		77/242	2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development
77/157	Oil slick on Lebanese shores		
77/158	International Year of Glaciers' Preservation, 2025		
77/159	Enhancing the role of parliaments in accelerating the achievement of the Sustainable Development Goals	77/245	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
77/160	Entrepreneurship for sustainable development		
77/161	Promoting zero-waste initiatives to advance the 2030 Agenda for Sustainable Development	77/246	Follow-up to the second United Nations Conference on Landlocked Developing Countries
77/162	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21		

Governing Council of the United Nations Environment Programme decisions

SS.VIII/1, sect. II, 25/1, sect. II	Implementation of decision SS.VII/1 on international environmental governance: strengthening the scientific base of the United Nations Environment Programme	23/11	Gender equality in the field of the environment
		24/11	Intensified environmental education for achieving sustainable development
SS.XI/2	United Nations Environment Programme support for Haiti: strengthening environmental response in Haiti	26/15	Strengthening international cooperation on the environmental aspects of emergency response and preparedness
19/1	Nairobi Declaration on the Role and Mandate of the United Nations Environment Programme	27/2	Implementation of paragraph 88 of the outcome document of the United Nations Conference on Sustainable Development
23/7	Strengthening environmental emergency response and developing disaster prevention, preparedness, mitigation and early-warning systems in the aftermath of the Indian Ocean tsunami disaster	27/11	State of the environment and contribution of the United Nations Environment Programme to meeting substantive environmental challenges

United Nations Environment Assembly resolutions and decisions

1/1	Ministerial outcome document of the first session of the United Nations Environment Assembly of the United Nations Environment Programme	1/11	Coordination across the United Nations system in the field of the environment, including the Environment Management Group
1/4	Science-policy interface	1/12	Relationship between the United Nations Environment Programme and multilateral environmental agreements
1/8	Ecosystems-based adaptation		
1/10	Different visions, approaches, models and tools to achieve environmental sustainability in the context of sustainable development and poverty eradication	1/13	Implementation of Principle 10 of the Rio Declaration on Environment and Development
		1/16	Management of trust funds and earmarked contributions

Part IV International cooperation for development

1/17	Amendments to the Instrument for the Establishment of the Restructured Global Environment Facility	3/8	Preventing and reducing air pollution to improve air quality globally
2/2	Role and functions of the regional forums of ministers of the environment and environment authorities	3/9	Eliminating exposure to lead paint and promoting environmentally sound management of waste lead-acid batteries
2/3	Investing in human capacity for sustainable development through environmental education and training	3/10	Addressing water pollution to protect and restore water-related ecosystems
2/4	Role, functions and modalities for United Nations Environment Programme implementation of the SAMOA Pathway as a means of facilitating achievement of the Sustainable Development Goals	3/11	Implementation of paragraph 88 (a)–(h) of the outcome document of the United Nations Conference on Sustainable Development, entitled “The future we want”
2/5	Delivering on the 2030 Agenda for Sustainable Development	4/3	Sustainable mobility
2/6	Supporting the Paris Agreement	4/17	Promote gender equality, and the human rights and empowerment of women and girls in environmental governance
2/13	Sustainable management of natural capital for sustainable development and poverty eradication	4/18	Poverty-environment nexus
2/15	Protection of the environment in areas affected by armed conflict	4/20	Fifth Programme for the Development and Periodic Review of Environmental Law (Montevideo V): delivering for people and the planet
2/16	Mainstreaming of biodiversity for well-being	4/21	Implementation plan “Towards a pollution-free planet”
2/17	Enhancing the work of the United Nations Environment Programme in facilitating cooperation, collaboration and synergies among biodiversity-related conventions	4/22	Implementation and follow up of United Nations Environment Assembly resolutions
2/18	Relationship between the United Nations Environment Programme and the multilateral environmental agreements for which it provides the secretariat	4/23	Keeping the world environment under review: enhancing the United Nations Environment Programme science-policy interface and endorsement of the Global Environment Outlook
2/19	Midterm review of the fourth Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme IV)	5/1	Animal welfare–environment–sustainable development nexus
2/20	Proposed medium-term strategy for 2018–2021 and programme of work and budget for 2018–2019	5/2	Sustainable nitrogen management
2/24	Combating desertification, land degradation and drought and promoting sustainable pastoralism and rangelands	5/3	Future of the Global Environment Outlook
2/25	Application of Principle 10 of the Rio Declaration on Environment and Development in the Latin America and Caribbean Region	5/4	Sustainable lake management
3/1	Pollution mitigation and control in areas affected by armed conflict or terrorism	5/5	Nature-based solutions for supporting sustainable development
3/2	Pollution mitigation by mainstreaming biodiversity into key sectors	5/6	Biodiversity and health
3/3	Contributions of the United Nations Environment Assembly to the high-level political forum on sustainable development	5/7	Sound management of chemicals and waste
3/4	Environment and health	5/8	Science-policy panel to contribute further to the sound management of chemicals and waste and to prevent pollution
3/5	Investing in innovative environmental solutions for accelerating the implementation of the Sustainable Development Goals	5/9	Sustainable and resilient infrastructure
3/6	Managing soil pollution to achieve sustainable development	5/10	The environmental dimension of a sustainable, resilient and inclusive post-COVID-19 recovery
		5/11	Enhancing circular economy as a contribution to achieving sustainable consumption and production
		5/12	Environmental aspects of minerals and metals management
		5/13	Due regard to the principle of equitable geographical distribution, in accordance with paragraph 3 of Article 101 of the Charter of the United Nations
		5/14	End plastic pollution: towards an international legally binding instrument

**Subprogramme 1
Climate action**

General Assembly resolutions

69/225	Promotion of new and renewable sources of energy	77/165	Protection of global climate for present and future generations of humankind
73/230	Effective global response to address the impacts of the El Niño phenomenon	77/170	Ensuring access to affordable, reliable, sustainable and modern energy for all

Governing Council of the United Nations Environment Programme decision

27/10	Climate Technology Centre and Network
-------	---------------------------------------

**Subprogramme 2
Digital transformation in supporting environmental action**

Governing Council of the United Nations Environment Programme decision

23/1, sect. I	Implementation of decision SS.VII/1 on international environmental governance: Bali Strategic Plan for Technology Support and Capacity-building
---------------	---

**Subprogramme 3
Nature action**

General Assembly resolutions

65/161	Convention on Biological Diversity	77/163	Towards the sustainable development of the Caribbean Sea for present and future generations
68/205	World Wildlife Day		
68/232	World Soil Day and International Year of Soils	77/167	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
72/306	Implementation of the United Nations Decade of Action on Nutrition (2016–2025)		
73/251	World Pulses Day	77/169	Harmony with Nature
75/311	Tackling illicit trafficking in wildlife	77/172	Sustainable mountain development
76/200	Agricultural technology for sustainable development	77/186	Agriculture development, food security and nutrition
77/118	Sustainable fisheries, including through the 1995 Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments	77/248	Oceans and the law of the sea

Governing Council of the United Nations Environment Programme decisions

26/14	Global Environment Monitoring System/Water Programme	27/4	Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services
26/16	Promoting South-South cooperation on biodiversity for development	27/6	Oceans
27/3	International water quality guidelines for ecosystems		

United Nations Environment Assembly resolutions

1/9	Global Environment Monitoring System/Water Programme (GEMS/Water)	4/12	Sustainable management for global health of mangroves
2/10	Oceans and seas	4/13	Sustainable coral reefs management
2/14	Illegal trade in wildlife and wildlife products	4/15	Innovations in sustainable rangelands and pastoralism
4/10	Innovation on biodiversity and land degradation	4/16	Conservation and sustainable management of peatlands

Subprogramme 4
Environmental governance

Governing Council of the United Nations Environment Programme ministerial declarations and decisions

SS.VI/1	Malmö Ministerial Declaration	25/11	Environmental law
SS.VII/4	Compliance with and enforcement of multilateral environmental agreements	27/5	Coordination across the United Nations system, including the Environment Management Group
SS.XI/5	Environmental law	27/9	Advancing justice, governance and law for environmental sustainability
SS.XII/3	International environmental governance		

United Nations Environment Assembly resolution

1/3	Illegal trade in wildlife

Subprogramme 5
Chemicals and pollution action

General Assembly resolution

74/212	International Day of Clean Air for blue skies		
--------	---	--	--

Governing Council of the United Nations Environment Programme decisions

SS.IX/1	Strategic Approach to International Chemicals Management	24/4	Prevention of illegal international trade
SS.XII/4	Consultative process on financing options for chemicals and wastes	25/5	Chemicals management, including mercury
SS.XII/5	Enhancing cooperation and coordination within the chemicals and wastes cluster	27/12	Chemicals and waste management

United Nations Environment Assembly resolutions

1/5	Chemicals and waste	3/7	Marine litter and microplastics
1/6	Marine plastic debris and microplastics	2/11, 4/6	Marine plastic litter and microplastics
1/7	Strengthening the role of the United Nations Environment Programme in promoting air quality	4/7	Environmentally sound management of waste
		4/9	Addressing single-use plastic products pollution

Subprogramme 6
Finance and economic transformations

General Assembly resolutions

74/209	International Day of Awareness of Food Loss and Waste	77/178	Promotion of sustainable and resilient tourism, including ecotourism, for poverty eradication and environment protection
74/214	Sustainable tourism and sustainable development in Central Asia		

Governing Council of the United Nations Environment Programme decisions

27/7	Work by the United Nations Environment Programme on sustainable consumption and production	27/8	Green economy in the context of sustainable development and poverty eradication
------	--	------	---

United Nations Environment Assembly resolutions

2/8	Sustainable consumption and production	4/2	Promoting sustainable practices and innovative solutions for curbing food loss and waste
2/9	Prevention, reduction and reuse of food waste	4/4	Addressing environmental challenges through sustainable business practices
4/1	Innovative pathways to achieve sustainable consumption and production	4/5	Sustainable infrastructure

**Subprogramme 7
Science policy**

General Assembly resolution

71/313 Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development

Governing Council of the United Nations Environment Programme decisions

SS.X/5 Global Environment Outlook: environment for development SS.XII/6 World environmental situation

United Nations Environment Assembly ministerial declarations and decisions

Decision 3/1 Extension of the delivery date for the sixth Global Environment Outlook report UNEP/EA.4/HLS.1 Ministerial declaration of the United Nations Environment Assembly at its fourth session: innovative solutions for environmental challenges and sustainable consumption and production

Deliverables

14.13 Table 14.1 lists all cross-cutting deliverables of the programme.

Table 14.1
Cross-cutting deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	4	4	3	4
Meetings of:				
1. The United Nations Environment Assembly	1	1	–	1
2. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. The Committee for Programme and Coordination	1	1	1	1
4. The Fifth Committee	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	4	2	2
5. To assess environmental risks from disasters and conflicts	1	3	1	1
6. On institutional and legal frameworks to improve national and local preparedness to mitigate environmental risks from disasters and conflicts	1	1	1	1
Publications (number of publications)	3	4	2	2
7. On disaster risk reduction, preparedness assessments and road maps	2	3	2	1
8. UNEP annual report	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to humanitarian and military actors on environmental footprint reduction; advice to 20 Member States and approximately 20 international partners, upon request, on the monitoring and implementation of strategies to enhance environmental risk reduction, environmental emergency response and environmental recovery and to make progress towards the achievement of the Sustainable Development Goals.				

Evaluation activities

- 14.14 The evaluation of the inquiry model into the design of a sustainable financial system, completed in 2022, has guided the proposed programme plan for 2024.
- 14.15 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. For example, the evaluation provided lessons and insights into the value of the “inquiry model”, to advance options to improve the financial system’s effectiveness in mobilizing capital towards a sustainable and inclusive economy. A key lesson drawn from this evaluation is that such approaches, when used in combination with the convening power of the United Nations, can catalyse substantial transformative change. The inquiry model has application in the continuing work of UNEP on sustainable finance and for other challenges and opportunities of issues under the UNEP mandate. For example, subprogramme 5 has incorporated lessons from the evaluation of the inquiry model into its work on plastic pollution, through the “One UNEP plastics project on accelerating a global circular plastic economy to reduce plastic pollution and its impacts”. By joining an all-UNEP effort with partners and informed by the most recent scientific assessments, the initiative will enable concerted action by key stakeholders across the plastics life cycle to accelerate the transition towards a circular economy of plastics and reduce plastic pollution.
- 14.16 The following evaluations, to be conducted by UNEP, are planned for 2024:
- (a) Evaluation of subprogramme 1, Climate action;
 - (b) Formative evaluation of the UNEP delivery model approved in late 2022.

Programme of work

Subprogramme 1 Climate action

Objective

- 14.17 The objective, to which this subprogramme contributes, is to advance the transition of countries to low-emission economic development and increase their adaptation and resilience to climate change.

Strategy

- 14.18 To contribute to the objective, the subprogramme will:
- (a) Support Member States in the development of policies and standards to promote low-emission development plans and investment in clean energy and improve the global rate of energy efficiency;
 - (b) Support Member States in implementing gender-sensitive policies that achieve quantifiable social and environmental benefits, including through the reduction of greenhouse gas emissions from deforestation and forest degradation;
 - (c) Build the technical capacity of Member States to integrate ecosystem-based management into their national adaptation plans, put in place institutional arrangements to coordinate such plans and gain access to climate change adaptation finance for implementing such plans;
 - (d) Collaborate with the private sector in constructive and results-oriented partnerships that leverage climate finance and scale up the ambitions and impacts of climate action globally;
 - (e) Advocate and provide evidence and technical support for the use of climate strategies, such as a fiscal stimulus, in the context of sustainable COVID-19 recovery;
 - (f) Support Member States in making progress towards the achievement of Sustainable Development Goals 5, 7, 15 and 17.

- 14.19 The above-mentioned work is expected to result in:
- (a) Member States lowering their emissions of greenhouse gases and other pollutants by reducing energy intensity and demand in sectors such as lighting, appliances, equipment, buildings and transport;
 - (b) Member States increasingly capitalizing on investment opportunities that reduce greenhouse emissions from deforestation and forest degradation with adequate social and environmental safeguards;
 - (c) Member States increasingly capable of better institutionalizing, implementing and monitoring their national adaptation plans alongside efforts to deliver sustainable development;
 - (d) Member States making use of innovative models to enhance financing for sustainable investment and the dissemination of low-emission technologies that help to significantly reduce greenhouse gas emissions, promote access to energy and enhance productive energy use;
 - (e) Increased low-emission investment as a result of countries using climate strategies to guide COVID-19 recovery investment.

Programme performance in 2022

Strengthened international commitment for the protection of forests as an effective way to reduce emissions and address climate change

- 14.20 The launch of the Forest and Climate Leaders’ Partnership in 2022 was an important milestone at the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, held in Sharm el-Sheikh, Egypt. Forests play an important role in mitigating the effects of climate change, and as a key component of sustainable forest management and conservation the Partnership is intended to unite action by Governments, businesses and community leaders. This initiative builds on the “Green Gigaton Challenge”, which is aimed at mobilizing funds to pay for the equivalent of one gigaton of high-quality emissions reductions from forests between 2020 and 2025 and annually thereafter. The subprogramme integrated lessons learned from that experience to accelerate momentum among the international community, helping countries to secure finance and seize innovative opportunities to reduce greenhouse gas emissions from deforestation and forest degradation.
- 14.21 Progress towards the objective is presented in the performance measure below (see table 14.2).

Table 14.2
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Restoration Seed Capital Facility established with initial capitalization of 25 million euros, which is intended to boost the contribution of private finance to forest restoration	144 countries endorsed the Glasgow Leaders’ Declaration on Forests and Land Use and committed themselves to working collectively to halt and reverse forest loss and land degradation by 2030 while delivering sustainable development and promoting inclusive rural transformation	26 countries and the European Union launched the Forest and Climate Leaders’ Partnership, which strengthened the implementation of the commitments made by more than 140 countries at the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change

Planned results for 2024

Result 1: improved low-emission investment by leveraging climate strategies as the guide for COVID-19 recovery investments

Programme performance in 2022 and target for 2024

- 14.22 The subprogramme’s work contributed to \$253 billion in financial assets invested in the low-emission mandate, which exceeded the planned target of \$250 billion.
- 14.23 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.I).

Figure 14.I

Performance measure: financial assets invested in the low-emission mandate (cumulative)

(Billions of United States dollars)

Result 2: country reporting under the enhanced transparency framework of the Paris Agreement

Programme performance in 2022 and target for 2024

- 14.24 The subprogramme’s work contributed to 91 countries reporting under the enhanced transparency framework of the Paris Agreement, which exceeded the planned target of 76 countries.
- 14.25 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.II).

Figure 14.II

Performance measure: number of countries reporting under the enhanced transparency framework of the Paris Agreement (cumulative)

Result 3: enhanced national early warning systems

Proposed programme plan for 2024

14.26 During the 2022 World Meteorological Day, the Secretary-General launched the Early Warnings for All executive action plan, which sets the goal of ensuring that every person on Earth will be protected by early warning systems within five years. The subprogramme supported the effort through the provision of science and policy guidance that addresses gaps in the global climate observing system, in particular in developing countries.

Lessons learned and planned change

14.27 The lesson for the subprogramme was the need for UNEP to increase advocacy and create more partnerships with a range of stakeholders within the public and private sectors to promote leadership and ownership of action on early warning systems and deliver cross-cutting benefits to nearly all the Sustainable Development Goals. In applying the lesson, the subprogramme will strengthen its support to countries to enable them to lead the discourse on establishing and operationalizing early warning systems. It will also further the collaborative efforts undertaken through the Systematic Observations Financing Facility to strengthen climate adaptation and resilient development through data collection, processing and availability that will improve weather forecasts, early warning systems and climate information services.

14.28 Expected progress towards the objective is presented in the performance measure below (see figure 14.III).

Figure 14.III

Performance measure: number of countries that have established early warning systems (cumulative)

Deliverables

14.29 Table 14.3 lists all deliverables of the subprogramme.

Table 14.3
Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	3	4	3	3
1. On mitigation and adaptation technologies through the Climate Technology Centre and Network	3	4	3	3
Publications (number of publications)	6	9	6	6
2. On renewable energy, energy efficiency and the energy sector	3	4	3	3
3. On adaptation and resilience (assessments and tools)	3	5	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: advice to some 20 countries on climate matters, including South-South cooperation, ecosystem-based adaptation, climate financing, the United Nations Framework Convention on Climate Change, short-lived climate pollutants, low-emission development, sustainable energy and energy efficiency, and the Warsaw Framework for REDD-plus.				
D. Communication deliverables				
Outreach programmes, special events and information materials: side events; goodwill ambassador outreach on adaptation to and mitigation of climate change, and the benefits of reducing emissions from deforestation and forest degradation, reaching an audience in excess of 1 million.				
Digital platforms and multimedia platforms: content on social media platforms and web pages.				

Subprogramme 2 Digital transformations in supporting environmental action

Objective

- 14.30 The objective, to which this subprogramme contributes, is to advance the use of data and analytics on environmental issues to allow more effective policies, decisions, actions and investments by Member States and the private sector towards the achievement of the targets of the Sustainable Development Goals related to climate, nature and pollution, and of relevant multilateral environmental agreements.

Strategy

- 14.31 To contribute to the objective, the subprogramme will support and scale up access to environmental information through an effectively governed and inclusive data architecture and digital ecosystem for the planet. Specifically, the subprogramme will:
- (a) Through its enabling role, digitize scientific knowledge and democratize its availability across the thematic subprogrammes of UNEP, using digital tools to enable, accelerate and amplify impact, as well as to bring more transparency to knowledge about the state of the planet;
 - (b) Initiate partnerships with public and private sector actors to harness data, digital technologies and computational sustainability, in order to help Member States to amplify and accelerate deeper structural transformations, with a view to driving markets, value chains, consumer behaviours and decision-making towards the achievement of environmental sustainability outcomes;
 - (c) Use integrated data sets and analysis, based on digital norms and governance frameworks, to produce actionable, real-time and predictive insights, enabling the automatic monitoring of global, national and local progress towards key targets of the Sustainable Development Goals related to climate, biodiversity and pollution and relevant internationally agreed frameworks, including multilateral environmental agreements;

- (d) Work with Member States, the private sector and civil society to improve digital literacy and use digital platforms to enable further public participation in decision-making, open innovation and citizen science, helping to make progress towards achievement of the targets under Sustainable Development Goals 9, 16 and 17;
- (e) Provide normative support, upon request, on closing the digital divide through the use of information and communications technologies procured in accordance with sustainability standards.

14.32 The above-mentioned work is expected to result in:

- (a) Increased capacity of Member States to monitor the world environmental situation through the adoption of a global data architecture, governance frameworks, safeguards and standards for environmental and climate data and related digital public goods;
- (b) Improved ability of Member States to predict and address future environment-related risks through the development of big data platforms that can measure the increasing convergence of environmental and climate stress and disaster vulnerability over space and time and to provide predictive analytics and an early warning system;
- (c) Accelerated adoption of low-carbon and low-emission behaviours, lifestyles and products by consumers and citizens, through increased greenhouse gas emissions transparency, digital eco-labelling and digital nudging, including through e-commerce platforms and digital games;
- (d) Identification and scaled adoption of digital technologies by Member States to support the conservation, sustainable use and equitable benefit-sharing of biodiversity;
- (e) Reduced environmental impacts, e-waste and greenhouse gas emissions arising from the procurement and installation of digital infrastructure used to bridge the digital divide.

Programme performance in 2022

Strengthened policy environment for the sound management of e-waste

14.33 It is estimated that only 40 per cent of all countries are covered by e-waste policy, legislation or regulation. Furthermore, only 17 per cent of e-waste is documented as formally collected and recycled.¹ To address the management of e-waste, the subprogramme created a partnership with the International Telecommunication Union to support countries in developing e-waste regulatory frameworks to create an enabling environment for the sound management of e-waste and the implementation of extended producer responsibility. The subprogramme supported nine pilot countries in the development and implementation of national e-waste management strategies, policies and regulations through the development of situation assessments, e-waste inventories and advice on extended producer responsibility.

14.34 Progress towards the objective is presented in the performance measure below (see table 14.4).

Table 14.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	National e-waste management strategies, policies and regulations are implemented in Botswana, Burundi, the Dominican Republic, the Gambia, Malawi, Namibia, the Niger, Rwanda and Uzbekistan

¹ See International Telecommunication Union, *The Global E-waste Monitor 2020* (2020).

Planned results for 2024

Result 1: use of data and data analytics to amplify and accelerate contributions to achieving the Sustainable Development Goals

Programme performance in 2022 and target for 2024

- 14.35 The subprogramme’s work contributed to progress towards the universal availability of consolidated planetary data, to facilitate effective decision-making and policy development for Member States and the private sector, with five flagship partnerships established with digital platforms, which met the planned target.
- 14.36 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 14.5).

Table 14.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	5 flagship partnerships established with digital platforms	Increased public participation in environmental monitoring, consensus-building, decision-making and digital transformation	At least 1 national use case identified by Member States, civil society or private sector stakeholders for each of the 5 flagship digital platforms delivered in 2022

Result 2: increased multi-stakeholder engagement on digital environmental sustainability

Programme performance in 2022 and target for 2024

- 14.37 The subprogramme’s work contributed to the development of an action plan on digital environmental sustainability by the Coalition for Digital Environmental Sustainability, outlining core investment priorities to harness digital technologies that address climate action, nature protection and pollution prevention, which met the planned target.
- 14.38 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 14.6).

Table 14.6
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Development of an action plan on digital environmental sustainability by the Coalition for Digital Environmental Sustainability	Adoption of the action plan on digital environmental sustainability by the Coalition for Digital Environmental Sustainability stakeholders	Adoption of 9 impact initiatives by stakeholders of the Coalition for Digital Environmental Sustainability based on the action plan

Result 3: increased effectiveness of data platforms

Proposed programme plan for 2024

14.39 The development of regional knowledge and data hubs are important for coordinating knowledge production and dissemination. These hubs can help Member States to receive integrated policy support, expertise, knowledge, information and environmental data, including through use by resident coordinators and United Nations country teams. The subprogramme coordinated the connection of two knowledge and data hubs: the World Environment Situation Room and Manara, the regional knowledge and data hub for the Economic and Social Commission for Western Asia. This enhanced the interoperability of the World Environment Situation Room and facilitated the management of geospatial data on natural resources and the availability of scientific environmental data for the region. Through engagement with resident coordinators and United Nations country teams in more than 38 pilot countries, the subprogramme further enhanced the World Environment Situation Room through a series of environmental analytics and dashboards, tailored to national needs and priorities in support of the United Nations common country assessments and the United Nations Sustainable Development Cooperation Frameworks.

Lessons learned and planned change

14.40 The lesson for the subprogramme was that regional cooperation and coordination could increase the accessibility of data and knowledge products by countries. The availability of national information systems and the work being conducted by the regional economic commissions and the resident coordinator system contributed to the development and effectiveness of the World Environment Situation Room. In applying the lesson, the subprogramme will coordinate the interoperability of the World Environment Situation Room with other digital regional knowledge and data hubs, thereby ensuring integrated policy support, expertise, knowledge, information and data to Member States.

14.41 Expected progress towards the objective is presented in the performance measure below (see figure 14.IV).

Figure 14.IV
Performance measure: number of digital regional platforms integrated with the World Environment Situation Room (cumulative)

Deliverables

14.42 Table 14.7 lists all deliverables of the subprogramme.

Table 14.7
Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	2	2
1. Using the World Environment Situation Room at the global, regional or national levels	1	1	2	2
Seminars, workshops and training events (number of days)	17	15	24	24
2. Training events on digital transformation for environmental sustainability – national training	4	6	6	6
3. Seminars and workshops on development of a global environmental data strategy and digital cooperation framework	6	1	6	6
4. Seminars and workshops on development of the World Environment Situation Room and identification of transformative applications	6	4	6	6
5. Seminars and workshops on development and implementation of the environmental action plan for the Secretary-General’s Road Map for Digital Cooperation	1	4	6	6
Publications (number of publications)	1	1	4	4
6. On digital technologies to achieve climate neutrality and pollution-reduction	1	1	4	4
Technical materials (number of materials)	1	1	2	2
7. On minimizing the environmental, climate and e-waste footprint of the information and communications technology sector	1	1	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: consultation with at least 50 Member States and other entities on the global environmental data strategy and on integration methods for environmental data and analytics to support digital platforms, files and algorithms; advice to some 10 Member States and stakeholders on strengthening the adoption of data and digital transformation to achieve national climate, nature and pollution targets; advice to more than 10 Member States and stakeholders on using digital platforms and tools to enhance public participation in decision-making, open innovation and citizen science; and advocacy through two business alliance partnerships and networks leveraging environmental data and digital transformation approaches to influence sustainable consumer behaviours.				
D. Communication deliverables				
Digital platforms and multimedia content: 2 digital platforms to support transparency, predictive analytics and risk identification; and thematic web page, social media, multimedia video and audio content.				
E. Enabling deliverables				
Information and communications technology: 2 digital applications and engagement platforms to support e-governance and enhance public participation in environmental monitoring, consensus-building, decision-making and digital transformation.				

Subprogramme 3 Nature action

Objective

- 14.43 The objective, to which this subprogramme contributes, is to strengthen the capacity of countries to manage marine, freshwater and terrestrial ecosystems through an integrated approach for maintaining and restoring their biodiversity and long-term functioning and ensuring the supply of ecosystem goods and services.

Strategy

- 14.44 To contribute to the objective, the subprogramme will:
- (a) Advance cooperation with Member States, regional entities and other partners, including the United Nations Educational, Scientific and Cultural Organization and the Food and Agriculture

Organization of the United Nations, to support education on sustainability by engaging with formal and non-formal education activities that shift knowledge, attitudes, behaviours and norms;

- (b) Promote knowledge-sharing among countries and other non-governmental sectoral partners within the scope of existing transboundary cooperation frameworks, including the uptake and use of knowledge products, such as scenarios, spatial plans, trade-off analyses and ecosystem-based sectoral monitoring systems, disseminating publications and conducting normative work;
- (c) Raise awareness on how to take into consideration nature and the ecosystem approach in public and private economic decision-making and provide technical advice, policy support and capacity-building to Member States on sustainable approaches to natural resource management and on biodiversity and health linkages among different sectors. In doing so, the subprogramme will support Member States in making progress towards the achievement of Sustainable Development Goals 2, 3, 6, 12–15 and 17.

14.45 The above-mentioned work is expected to result in:

- (a) More coherent and cross-sectoral participation and cooperation among countries worldwide, including at the transboundary level, for the management and effective monitoring of nature;
- (b) Youth-led action that addresses the indirect drivers of biodiversity loss and the degradation of nature;
- (c) An enabling environment for embedding nature considerations into the financial and economic decision-making of public and private sector entities at multiple levels (global, regional, subregional and national) using a well-coordinated, whole-of-government approach that balances the demands of different sectors;
- (d) Development of updated national plans for natural capital accounting by Member States;
- (e) Enhanced capacity of Member States to manage and reduce risks to both human and ecosystem health and to integrate nature into national and international public health decision-making through science-based approaches.

Programme performance in 2022

Enhanced capacity of countries to enable sustainable, resilient and inclusive use of ocean resources

14.46 A healthy ocean is key for a sustainable future both for people and the planet. The sustainable use of ocean resources for economic growth, improved livelihoods and jobs while preserving the health of ocean ecosystems brings social and environmental benefits within the planetary boundaries of oceans and coasts. The subprogramme launched an initiative with the aim of supporting the development of sustainable ocean-based economies. Within this initiative, the subprogramme developed an operational transition framework for policymaking and implementation, supporting countries in developing and implementing transition pathways towards the sustainable, resilient and equitable use of ocean resources. The subprogramme provided support to the Governments of Antigua and Barbuda, Indonesia, Kenya, Trinidad and Tobago and Viet Nam in the development and pilot application of their national action plans. This included technical support for the pilot testing of the operational transition framework and support for interministerial training and cross-sectoral coordination for the development of road maps for national master plans on the ocean economy. The development process included multi-stakeholder participatory workshops and webinars for national and regional knowledge-sharing and learning. The subprogramme also supported the Association of Southeast Asian Nations in preparing and operationalizing the ASEAN Leaders' Declaration on the Blue Economy.

14.47 Progress towards the objective is presented in the performance measure below (see figure 14.V).

Figure 14.V
Performance measure: number of countries implementing sustainable, resilient and inclusive strategies for the use of ocean resources (cumulative)

Planned results for 2024

Result 1: lowering the risk of future pandemics and health crises by strengthening environmental considerations of human and animal health

Programme performance in 2022 and target for 2024

- 14.48 The subprogramme’s work contributed to 14 subnational, national and international entities that committed to incorporating environmental considerations into the One Health approach, taking into consideration that the conception of the One Health approach needs further discussion, which exceeded the planned target of 11 entities.
- 14.49 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.VI).

Figure 14.VI
Performance measure: number of subnational, national and international entities that committed to incorporating environmental considerations into the One Health approach (cumulative)

Result 2: enhanced conservation and restoration efforts of critical marine habitats

Programme performance in 2022 and target for 2024

- 14.50 The subprogramme’s work contributed to eight countries that enhanced restoration and conservation of critical coastal ecosystems, which exceeded the planned target of six countries.
- 14.51 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.VII).

Figure 14.VII
Performance measure: number of countries that enhanced restoration and conservation of critical coastal ecosystems (cumulative)

Result 3: finance sector commits itself to biodiversity target-setting

Proposed programme plan for 2024

- 14.52 As part of its support for the development of the post-2020 global biodiversity framework and its subsequent implementation, the subprogramme has been collaborating with financial sector institutions to set an enabling environment for the alignment of finance to nature and for financing for conservation and the sustainable use of biodiversity. The subprogramme, through the UNEP Finance Initiative, continued its work to create a harmonized framework for identifying and managing ecosystem-related negative risks and impacts on nature. Furthermore, the subprogramme provided technical support for the development of the guidance on biodiversity target-setting designed for Principles for Responsible Banking signatories. Following that support, a number of banks made commitments to setting and achieving portfolio-wide biodiversity targets.

Lessons learned and planned change

- 14.53 The lesson for the subprogramme, building on the experience in the post-2020 global biodiversity framework development process, was the need to facilitate further engagement of financial institutions in the implementation of the framework. As result of the subprogramme’s engagement with financial institutions in the post-2020 global biodiversity framework process, more than 1,000 representatives of financial institutions participated in the fifteenth session of the Conference of the Parties to the Convention on Biological Diversity. In applying the lesson, the subprogramme will strengthen its outreach to build more partnerships with financial institutions while assisting them in implementing the framework for identifying and managing ecosystem-related negative risks and impacts on nature.
- 14.54 Expected progress towards the objective is presented in the performance measure below (see figure 14.VIII).

Figure 14.VIII
Performance measure: number of financial institutions that signed a commitment to set biodiversity targets to reduce their impacts on nature (cumulative)

Deliverables

14.55 Table 14.8 lists all deliverables of the subprogramme.

Table 14.8
Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	5	7	4	5
1. Meetings of the governing bodies for multilateral environmental agreements	5	7	4	5
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	3
2. On ecosystem services	2	2	2	3
Seminars, workshops and training events (number of days)	6	6	6	6
3. Seminars and training events on ecosystems management	6	6	6	6
Publications (number of publications)	11	11	10	7
4. On mainstreaming biodiversity in production sectors	2	2	2	2
5. On the knowledge, networks and funding available to influence public and private financial flows for ecosystem-based approaches and nature-based solutions to be implemented in a manner consistent with the relevant mandate	3	3	2	2
6. On marine and terrestrial ecosystems	4	4	4	2
7. On biodiversity and wildlife	2	2	2	1
Technical materials (number of materials)	3	4	4	4
8. On integrated ecosystem management (tools and methodologies)	2	2	2	2
9. On investing in nature (assessments, tools and methodologies)	1	2	2	2
C. Substantive deliverables				

Consultation, advice and advocacy: consultations with Member States to fast-track readiness and early action to implement the post-2020 global biodiversity framework, supporting 138 countries participating in the early action support project for the framework.

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: outreach campaigns on ecosystem-based approaches and sustainable management and use of natural resources and on the United Nations Decade on Ecosystem Restoration, intended for Member States, private companies, civil society organizations and the public.

**Subprogramme 4
Environmental governance**

Objective

- 14.56 The objective, to which this subprogramme contributes, is to ensure that countries achieve environmental policy coherence and abide by strong legal and institutional frameworks that increasingly implement environmental goals in the context of sustainable development at the global, regional and national levels.

Strategy

- 14.57 To contribute to the objective, the subprogramme will:
- (a) Facilitate relevant meetings and intergovernmental processes at the global, regional and national levels involving Governments, other United Nations entities, inter-agency mechanisms and regional ministerial forums through information management products, technical support and advisory services on environmental law and policy;
 - (b) Support the coherent implementation of the multilateral environmental agreements operating in similar clusters by strengthening national efforts to achieve global environmental targets and supporting parties in national reporting to related conventions, including to ease the national reporting load by promoting effective knowledge management across ministries and administrative units;
 - (c) Develop and disseminate innovative knowledge management tools and initiatives such as the United Nations Information Portal on Multilateral Environmental Agreements and the Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme), supported by training, technical assistance and communication activities, including mainstreaming a gender perspective and in the context of COVID-19;
 - (d) Promote the uptake of environmentally sound practices across the United Nations system through the provision of policy advice and cooperate with United Nations country teams to mainstream lessons learned through the implementation of programmes, including replicating and scaling up interventions;
 - (e) In doing so, support Member States in making progress towards the achievement of Sustainable Development Goals, 1, 5, 16 and 17.
- 14.58 The above-mentioned work is expected to result in:
- (a) Increased efficiency and effectiveness of environmental policymaking processes leading to coherent and science-based policies, including through Member States' concerted action on international environmental issues;
 - (b) Improved governance and partnerships with major groups and stakeholders in the development of synergistic national programmes, as well as increased integration of the environment into national and subnational planning and budgeting processes on sustainable development.

Programme performance in 2022

Coherent implementation of and reporting on the 2030 Agenda

- 14.59 Action to implement the 2030 Agenda is not advancing at the speed or scale required. To further the implementation of the environmental dimension of the 2030 Agenda, the subprogramme supported four countries through technical support in developing policies or strategies and providing support for interministerial training and cross-sectoral coordination, and national and regional multi-stakeholder workshops to share lessons learned. This support resulted in improved integration of global environmental objectives into voluntary national reviews, national development and sectoral strategies, and policies and legislation relevant to the achievement of and reporting on the Sustainable Development Goals. In addition, those four countries revised Goal monitoring and evaluation frameworks, which improved capacity for environmental data collection for policy support and alignment across government levels.
- 14.60 Progress towards the objective is presented in the performance measure below (see table 14.9).

Table 14.9

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Guyana enhanced its environmental statistics department and created a governmental biodiversity task team to mainstream biodiversity data across agency support for national Sustainable Development Goal achievement	On the basis of an environmental policy gap assessment that analysed the impact of sectoral policies on the integration of environmental issues into national plans, Burkina Faso mainstreamed a consolidated environmental approach for its national sustainable development plans, including the voluntary national reviews	Bangladesh and Colombia disseminated a methodology for monitoring the Sustainable Development Goal indicator 17.14.1 among national stakeholders, which resulted in strengthened policy coherence for sustainable development

Planned results for 2024

Result 1: improved coherence of environmental policies by building environmental law capacity

Programme performance in 2022 and target for 2024

- 14.61 The subprogramme's work contributed to 900 digital resources on environmental law being accessed by Member States, which met the planned target.
- 14.62 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.IX).

Figure 14.IX

Performance measure: access of Member States to digital resources on environmental law (cumulative)

(Number of digital resources)

Result 2: strengthened capacity to disrupt illegal waste trafficking in the Asia-Pacific region

Programme performance in 2022 and target for 2024

14.63 The subprogramme’s work contributed to 1,060 Member State representatives in the Asia-Pacific region being equipped with enhanced capacities to address the international trafficking of illegal waste, which exceeded the planned target of 1,050 Member State representatives.

14.64 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.X).

Figure 14.X

Performance measure: number of Member State representatives in the Asia-Pacific region with enhanced capacities to address international trafficking of illegal waste (cumulative)

Result 3: strengthened development and implementation of environmental law at the international and national levels

Proposed programme plan for 2024

14.65 Montevideo Programme I, adopted in 1982, was created as a strategic guidance plan to develop international agreements, principles, guidelines and standards for environmental law. Subsequently Montevideo Programmes II, III and IV implemented environmental law action resulting from global multilateral initiatives such as Agenda 21 and addressed issues that included the effectiveness of environmental law, conservation and management and their relationship with other fields. The subprogramme supported Member States in the development of Montevideo Programme V by

supporting countries in developing, strengthening and implementing appropriate laws and institutions, and building related capacity to prevent, control and manage pollution and waste, address climate change and reduce biodiversity and nature loss, in line with relevant resolutions and conventions.

Lessons learned and planned change

- 14.66 Recognizing that national focal points are key actors in the delivery and success of the Montevideo Programme, the lesson for the subprogramme was the need to enhance its support for national focal points to enable them to identify strategic and programmatic priorities for strengthening environmental rule of law. In applying the lesson, the subprogramme will strengthen the systematic collection of predetermined data on the implementation and uptake of environmental law to provide analytics and insight for improved planning and decision-making among national focal points, towards the development of adequate and effective environmental legislation and the effective implementation of environmental law at the national level.
- 14.67 Expected progress towards the objective is presented in the performance measure below (see figure 14.XI).

Figure 14.XI
Performance measure: number of countries that drafted environmental legislation to address environmental goals (cumulative)

Deliverables

- 14.68 Table 14.10 lists all deliverables of the subprogramme.

Table 14.10
Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	30	30	40	40
1. Meetings of the Committee of Permanent Representatives on environmental law and governance	30	30	40	40
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	8	8	10	6
2. On environmental law development and support to mainstream environmental issues, the implementation of multilateral environmental agreements and the linkages between poverty and the environment	8	8	10	6

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
Seminars, workshops and training events (number of days)	15	15	30	15
3. Train-the-trainer events on environmental governance	15	15	30	15
Publications (number of publications)	8	8	10	8
4. On environmental law (global)	8	8	10	8

C. Substantive deliverables

Consultation, advice and advocacy: advice to approximately 25 Member States, upon request, on the monitoring and implementation of multilateral environmental agreements, legislative strategies and frameworks to counter environmental degradation resulting from climate change and environmental crime.

Databases and substantive digital materials: 20 free online courses introducing different multilateral environmental agreements.

Subprogramme 5 Chemicals and pollution action

Objective

- 14.69 The objective, to which this subprogramme contributes, is to advance the sound management of chemicals and waste and improve air quality at all levels in order to achieve a healthier environment and better health for all.

Strategy

- 14.70 To contribute to the objective, the subprogramme will:
- (a) Provide technical advice, policy support and capacity-building to Member States, the private sector and civil society, within the framework of relevant multilateral environmental agreements and the broader international chemicals and waste agenda, for enabling the development and implementation of policies, strategies, legislation and action plans on sound chemicals and waste management, including, but not limited to, mercury, persistent organic pollutants, ozone-depleting substances and lead, as well as on waste prevention and the sound management of electronic and other forms of waste;
 - (b) Provide technical and advisory support to Member States regarding the development and implementation of policies, strategies and mechanisms on the prevention and reduction of waste, and environmentally sound waste treatment and disposal of the waste, including in the context of disaster or conflict-related environmental emergencies;
 - (c) Support the reduction of pollution release, building institutional capacity for the development and use of air quality assessments with publicly accessible monitoring data and for the development of policies and legal, regulatory, financial and technical measures to reduce air, water, soil and ocean pollutants;
 - (d) In doing so, the subprogramme will help Member States to make progress towards the achievement of targets 6.3, 12.3, 12.4 and 14.1 of the Sustainable Development Goals.
- 14.71 The above-mentioned work is expected to result in:
- (a) An increased number of Member States developing or implementing policies strategies legislation or action plans that promote sound chemical and waste management and/or the implementation of multilateral environmental agreements and the existing framework on chemicals and waste;

- (b) An increased number of Member States developing or implementing policies, strategies and mechanisms to prevent or reduce waste and ensure environmentally sound waste treatment or disposal, including in the context of disaster or conflict-related environmental emergencies;
- (c) An increased number of policy, regulatory, financial and technical measures developed to reduce pollution in air, water, soil and the ocean;
- (d) A reduction in the release of pollutants to the environment;
- (e) Enhanced action by the private sector and civil society on pollution prevention and control.

Programme performance in 2022

Enhanced waste and debris management in disaster and conflict-affected areas

- 14.72 If current trends continue, the rate of waste generated globally will reach 3.88 billion metric tons annually by 2050. The subprogramme supports national and local authorities and local communities in enhancing their waste management. For example, in 2020 the subprogramme supported local communities in Iraq in the recovery and recycling of conflict debris and the provision of emergency livelihood employment through cash-for-work debris removal and processing schemes. In 2021, the subprogramme provided technical assistance to national authorities in Sri Lanka on the measures to be taken to prevent, respond to and mitigate risks from the maritime disaster of May 2021. Assistance included environmental assessments and the shoreline clean-up of plastic pellets and other debris. As a result, the Government has enhanced its own assessment process and clean-up procedures to help to ensure that it complies with international standards. In 2022, the subprogramme supported the establishment of a debris recycling centre in Mosul, Iraq. This has enabled the sound management of conflict debris and has created jobs through cash-for-work schemes targeting vulnerable persons. In July 2022, the facility was handed over to Mosul municipality for its continued, sustainable operation.
- 14.73 Progress towards the objective is presented in the performance measure below (see table 14.11).

Table 14.11
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
<ul style="list-style-type: none"> • Recovery of an approximate total of 3,500 metric tons of debris from destroyed households in Buwaytir village in Kirkuk, Iraq Governorate • Emergency livelihood employment for 55 individuals to recover debris from destroyed house plots • Approximately 900 metric tons of recovered debris reused by the local community and 250 metric tons of recycled crushed aggregate reused by community residents to pave communal roads and improve access to residential areas 	<p>National authorities established an oil spill early warning system and developed a maritime disaster plan following the May 2021 maritime disaster in Sri Lanka. Emergency oil spill response equipment was deployed during the incident, salvage operations of the shipwreck were expedited to reduce potential pollution risks, and clean-up procedures in alignment with international standards were implemented</p>	<ul style="list-style-type: none"> • Sound management of conflict debris by Mosul municipality through the establishment and management of a debris recycling centre, with nearly 26,000 metric tons being recovered and sorted and 11,000 metric tons of it processed into recycled aggregate • Cash-for-work debris removal and processing scheme providing employment for 240 vulnerable persons, including 40 women

Planned results for 2024

Result 1: strengthened waste and wastewater management systems to prevent and minimize waste and pollution associated with COVID-19

Programme performance in 2022 and target for 2024

- 14.74 The subprogramme’s work contributed to 2 countries strengthening their medical and household waste and wastewater management systems, which did not meet the planned target of 10 countries. The target was not met owing mainly to operational challenges posed by the COVID-19 pandemic and measures enacted to limit its spread, which limited in-person engagement.
- 14.75 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.XII).

Figure 14.XII
Performance measure: number of countries that strengthened their medical and household waste and wastewater management systems (cumulative)

Result 2: reduced release of pollutants to the environment

Programme performance in 2022 and target for 2024

- 14.76 The subprogramme’s work contributed to a reduction of 1,245 metric tons of pollutants released to the environment, which exceeded the planned target of 1,200 metric tons.
- 14.77 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.XIII).

Figure 14.XIII
Performance measure: reduction in releases of pollutants to the environment (cumulative)
 (Metric tons of persistent organic pollutants and mercury)

Result 3: policies and regulatory, financial and technical measures developed to reduce pollution**Proposed programme plan for 2024**

14.78 Pollution poses a risk to human health and sustainable development. In that context, UNEP identified continued support to reduce pollution in air, water, soil and the ocean as a critical success factor. The subprogramme assisted Governments, civil society groups and businesses in the development and implementation of 15 policies and regulatory, financial and technical measures on the sound management of chemicals and waste to reduce air pollution and land-based pollution sources, including plastics.

Lessons learned and planned change

14.79 The lesson for the subprogramme was the need to increase engagement with its stakeholders, especially those along value chains in the sectors with significant chemical and pollution impacts, namely, agriculture and food, transport and mobility, building and construction, electronics, textiles and mining, to promote sustainable consumption and production patterns, halt the global pollution crisis and protect human health and well-being. In applying the lesson, the subprogramme will accelerate its efforts to increase commitments and action from stakeholders, especially from businesses and industries, to reduce their pollution footprint, and prioritize the sound management of chemicals and waste and pollution reduction, especially in the light of General Assembly resolution [76/300](#) on the right to a clean, healthy and sustainable environment.

14.80 Expected progress towards the objective is presented in the performance measure below (see figure 14.XIV).

Figure 14.XIV

Performance measure: number of policies and regulatory, financial and technical measures developed to reduce pollution in air, water, soil and the ocean (cumulative)

**Deliverables**

14.81 Table 14.12 lists all deliverables of the subprogramme.

Table 14.12

Subprogramme 5: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	4	4	8	8
1. On the development of policies and legal, institutional or fiscal strategies and mechanisms for sound chemicals management	4	4	8	8
Seminars, workshops and training events (number of days)	4	4	8	8
2. Seminars and training events on the sound management of chemicals and waste	4	4	8	8
Publications (number of publications)	1	1	1	1
3. Global assessment of the state of and trends in laws, regulations and fiscal policies for sound chemicals and waste management	1	1	1	1
Technical materials (number of materials)	4	4	4	4
4. On status, trends and related risks and improvements in chemicals and waste management at various scales	2	2	2	2
5. On action plans related to air quality at various scales, in particular at the subnational, national and regional levels	2	2	2	2
Fact-finding, monitoring and investigation missions (number of missions)	4	4	4	4
6. Monitoring missions on the status and trends relating to chemicals management, waste management and air quality, including on marine litter and other forms of pollution	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: advice to 3 countries on environmental practices and waste management and to advice to 9 countries and stakeholders on policymaking, standards and strategy development.				
D. Communication deliverables				
Outreach programmes, special events and information materials: outreach programmes, campaigns and information materials for Governments, private companies, civil society organizations and the public to increase awareness on the significance of pollution prevention and reduction in achieving the Sustainable Development Goals.				

Subprogramme 6

Finance and economic transformations

Objective

- 14.82 The objective, to which this subprogramme contributes, is to advance the transition by countries and businesses to sustainable development through multiple pathways, including the uptake of green economy in the context of sustainable development and poverty eradication, the adoption of sustainable consumption and production patterns and the decoupling of economic activity from unsustainable resource use and environmental impact, while improving human well-being.

Strategy

- 14.83 To contribute to the objective, the subprogramme will:
- Deliver country assessments, promote the uptake of policy planning and implementation tools and convene knowledge platforms that will enable policymakers and businesses to actively pursue sustainable pathways;
 - Generate and disseminate knowledge through its extensive network of partners in the public and private sectors, including the financial sector, as well as civil society and academia;

- (c) Promote sustainable patterns of consumption and production through policy recommendations on the green economy in the context of sustainable development and poverty eradication, on sustainable finance and on business practices and tools and knowledge that allow consumers to make informed choices, while considering issues related to generational and gender equality;
- (d) Catalyse the alignment of finance and investment with sustainability objectives and policy priorities by developing or contributing to the norms for sustainable finance, providing the basis for standard-setting and promoting the role of private sustainable finance in complementing public finance;
- (e) Support Governments and subnational governments in strengthening institutional capacities and implementing national development plans, policies and/or action plans; and support businesses adopting and implementing sustainable management and cleaner production practices, across value chains, helping Member States to make progress towards the achievement of targets under Sustainable Development Goals 1, 4, 5, 7–9, 11–13 and 17;
- (f) Strengthen the capacities of Member States and other stakeholders to integrate environmental sustainability and sustainable patterns of consumption and production into their decision-making approaches, including on sustainable finance, trade and infrastructure.

14.84 The above-mentioned work is expected to result in:

- (a) Integrated sustainable development pathways, including policies and frameworks on the green economy in the context of sustainable development and poverty eradication or on sustainable consumption and production, for improved resource efficiency and human well-being and reduced ecological and material footprints;
- (b) Improved environmental sustainability of private sector actors, including in the financial sector, in their core business practices and across their value chains, such as through sustainable investment and resource extraction, transformation and use, to create sustainable and more inclusive markets and economies;
- (c) Public, private and individual consumers having access to, and increasingly demanding and consuming sustainable goods and services.

Programme performance in 2022

More resilient and sustainable post-COVID-19 pandemic tourism

14.85 The tourism sector has been one of the hardest-hit sectors as a result of the COVID-19 pandemic and related travel restrictions. The subprogramme provided policy advisory services on resource efficiency and environmental sustainability to countries. Engaging with more than 350 tourism experts from various regions, the subprogramme led the review of environmental impacts and shaped key recommendations on the recovery of the tourism sector. The subprogramme also collaborated with the presidency of the General Assembly on a high-level thematic debate on tourism, under the theme of “putting sustainable and resilient tourism at the heart of an inclusive recovery”.

14.86 Progress towards the objective is presented in the performance measure below (see table 14.13).

Table 14.13
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Mauritius approved a climate change bill in Parliament to establish a more sustainable economy and address the negative impacts of climate change. The bill specifies the integration of tourism as a key priority sector and emphasizes coordination with the Ministry of Tourism	The Dominican Republic, Mauritius, the Philippines and Saint Lucia endorsed a net-zero road map for travel and tourism to provide guidance and assistance to sustainability experts and private sector entities in the tourism industry	The Dominican Republic developed a practical and user-friendly manual of sustainable gastronomy to facilitate a shift from traditional gastronomy towards a sustainable and regenerative gastronomy that prioritizes the preservation of local biodiversity in the food and beverage industry

Planned results for 2024

Result 1: making finance and economies more inclusive, sustainable and resilient

Programme performance in 2022 and target for 2024

- 14.87 The subprogramme’s work contributed to 55 outcome-level sustainable consumption and production activities reported by countries in reporting on Sustainable Development Goal 12 in their voluntary national reports, which exceeded the planned target of 50 activities.
- 14.88 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.XV).

Figure 14.XV

Performance measure: number of outcome-level sustainable consumption and production activities reported by countries in reporting on Sustainable Development Goal 12 in their voluntary national reports (annual)

Result 2: enabling policies to advance environmental sustainability

Programme performance in 2022 and target for 2024

- 14.89 The subprogramme’s work contributed to 74 economic, finance, industry and trade policies adopted by Member States to enable sustainable transitions, which did not meet the planned target of 77 policies. The target was not met because some countries required more time to move from policy development to policy adoption for comparatively newer and more complex workstreams, such as on sustainable public procurement.

14.90 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.XVI).

Figure 14.XVI

Performance measure: number of economic, finance, industry and trade policies adopted by Member States to enable sustainable transitions (cumulative)

Result 3: increased availability of sustainable insurance

Proposed programme plan for 2024

14.91 Through the UNEP Finance Initiative, the subprogramme has been working with the insurance industry worldwide to mainstream environmental sustainability into its operations, through adoption of the Principles for Sustainable Insurance since its launch in 2012 at the United Nations Conference on Sustainable Development. A decade later, the Principles now cover approximately one third of world premiums and \$15 trillion in assets under management. Through the 2022 global study on environmental pollution liability insurance, the subprogramme highlighted the fundamental importance of appropriate legal and regulatory frameworks, the proper enforcement of environmental protection laws and regulations, strong loss prevention and risk reduction measures by companies, and environmental pollution data availability, accessibility and quality as essential measures to support the development and expansion of environmental pollution liability insurance markets worldwide.

Lessons learned and planned change

14.92 The lesson for the subprogramme was the need to further promote the active engagement of the insurance sector in the UNEP Finance Initiative-coordinated Net-Zero Insurance Alliance and enable them to contribute to transformational shifts towards low-carbon and low-emission economies. In applying the lesson, the subprogramme will work to foster leadership and improve enabling policies and sustainable industry practices, by leveraging the ability of the insurance sector to address pollution generated by greenhouse gases emissions, thereby supporting the development and expansion of environmental pollution liability insurance markets worldwide.

14.93 Expected progress towards the objective is presented in the performance measure below (see figure 14.XVII).

Figure 14.XVII

Performance measure: number of insurance companies that adopted the Principles for Sustainable Insurance (cumulative)

Deliverables

14.94 Table 14.14 lists all deliverables of the subprogramme.

Table 14.14

Subprogramme 6: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	20	20	20	15
1. On finance and economic transformations	20	20	20	15
Seminars, workshops and training events (number of days)	15	15	15	15
2. Seminars and training events on finance and economic transformation approaches	15	15	15	15
Publications (number of publications)	3	3	3	4
3. On finance and economic transformation approaches	3	3	3	4
Technical materials (number of materials)	10	10	10	8
4. On finance and economic transformations approaches	10	10	10	8
C. Substantive deliverables				
Consultation, advice and advocacy: advice on sustainable lifestyles, resource efficiency, the green economy in the context of sustainable development and poverty eradication, sustainable consumption and production, and finance and economic transformations to 20 Member States; and meetings of the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns/One Planet network.				
Databases and substantive digital materials: global material flows database covering, since 1970, more than 200 countries and more than 300 different materials, aggregated into 13 categories of material flows; life cycle database hosting 9,068 open data sets; sustainable consumption and production clearinghouse known as the SDG12 Hub; and Green Growth Knowledge Platform with dedicated platforms on policy, industry and sustainable finance.				
D. Communication deliverables				
Outreach programmes, special events and information materials: side event of One Planet network at the 2024 high-level political forum on sustainable development; the Act Now: Speak Up campaign on sustainable lifestyles; and outreach targeting economists of resident coordinator offices on the green economy in the context of sustainable development and poverty eradication.				

Subprogramme 7

Science policy

Objective

- 14.95 The objective, to which this subprogramme contributes, is to strengthen the capacity of Governments and non-government actors to access, generate and use quality environmental data and analysis and to sustain a strengthened science-policy interface that generates evidence-based environmental assessments, identifies emerging environmental issues and fosters relevant policy action at the global, regional and national levels, including for the achievement of the environment-related Sustainable Development Goals.

Strategy

- 14.96 To contribute to the objective, the subprogramme will:
- (a) Review the world environmental situation and strengthen the interface between science and policymaking across the sustainable development agenda, including through collaboration with the Statistical Commission and the five regional commissions;
 - (b) Develop scientifically credible and unbiased data, information and knowledge and provide policy-relevant analysis and policy recommendations to catalyse and accelerate solutions and action for the environment, based on a continuous review of the global status of the environment and trends;
 - (c) Catalyse systematic and transformative shifts that can drive progress towards the aspirations of achieving the environmental dimension of the 2030 Agenda, through gender-sensitive partnerships across all geographical areas, involving Governments and non-governmental organizations, the business and scientific communities, and citizens;
 - (d) Pursue broad stakeholder engagement as a critical step in enhancing societal understanding, acceptance and uptake of its scientific analysis and serve as a knowledge broker that builds consensus on existing and emerging environmental issues through platforms and networks, such as the Science-Policy-Business Forum on the Environment, the International Resource Panel, the World Adaption Science Programme and the One Planet network;
 - (e) Provide analytical research, increase awareness on the environmental dimension of sustainable development and build capacity to measure, monitor and report on progress, helping Member States to integrate common methods for tracking and measuring the environment-related Sustainable Development Goals, including in their national processes, in particular, Goals 6, 12–15 and 17.
- 14.97 The above-mentioned work is expected to result in:
- (a) Increased production and use of scientific environmental data by Member States and other stakeholders;
 - (b) A more coherent approach to harmonizing country data, tracking progress and science-based environmental policymaking within and among countries;
 - (c) Increased capacity of Member States to measure progress towards achieving the Sustainable Development Goals and to increase policy coherence for the integration of national sustainable development plans and other internationally agreed environmental goals.

Programme performance in 2022

Tuvalu uses new tools to demonstrate the urgency of climate action

- 14.98 Country-led voluntary national reviews are intended to strengthen the policies and institutions of Governments, mobilize multi-stakeholder support and partnerships, and facilitate the sharing of experiences, including successes, challenges and lessons learned, with a view to accelerating the implementation of the 2030 Agenda. Since 2016, the subprogramme has supported the production of 50 voluntary national reviews, incorporating an environmental dimension, in 36 Asia-Pacific countries and their presentation at the high-level political forum on sustainable development. In 2022, the subprogramme supported Tuvalu in capacity development and the formulation of an environmental dimension indicator framework for and contributions to its first voluntary national review submitted to the high-level political forum. Through this strengthened capacity, Tuvalu presented an inclusive, comprehensive and evidence-based experience, highlighting the perspective of small island developing States and the urgency of climate action.
- 14.99 Progress towards the objective is presented in the performance measure below (see table 14.15).

Table 14.15
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Bangladesh, through its National Planning Commission, produced the voluntary national review titled “Accelerated action and transformative pathways”	Indonesia and the Lao People’s Democratic Republic submitted their voluntary national reviews, highlighting environmental dimensions of the 2030 Agenda	Tuvalu formulated an environmental dimension indicator framework and submitted its voluntary national review, highlighting the perspective of small island developing States and the urgency of climate action

Planned results for 2024

Result 1: scientific knowledge harnessed to address interlinked environmental challenges and their impact on socioeconomic well-being

Programme performance in 2022 and target for 2024

- 14.100 The subprogramme’s work contributed to 26 decisions in the United Nations Environment Assembly that were influenced by science-based policymaking, which met the planned target.
- 14.101 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.XVIII).

Figure 14.XVIII
Performance measure: number of decisions in the United Nations Environment Assembly influenced by science-based policymaking (cumulative)

Result 2: increased use of environmental data and statistics for policy formulation

Programme performance in 2022 and target for 2024

- 14.102 The subprogramme’s work contributed to 38 countries using data and statistics on environmental trends and assessments for policy formulation, which exceeded the planned target of 35 countries.
- 14.103 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 14.XIX).

Figure 14.XIX
Performance measure: number of countries using data and statistics on environmental trends and assessments for policy formulation (cumulative)

Result 3: improved country-level monitoring of water quality

Proposed programme plan for 2024

- 14.104 Comprehensive and up-to-date monitoring data on water quality are a prerequisite to provide decision makers with the information that they require to ensure the availability and sustainable management of water resources for both human uses and maintaining aquatic ecosystems. The subprogramme enhanced the collection of monitoring data on surface and groundwater quality through the Global Environment Monitoring System for Water (GEMS/Water) network and the Global Freshwater Quality Database. The subprogramme also supported the production and dissemination of information at the local, regional and international levels to build the technical capacity of national focal points for the collection of data on water quality and designing water quality monitoring initiatives.

Lessons learned and planned change

14.105 The lesson for the subprogramme was that expanding coordination and collaboration in the provision of capacity development related to water quality monitoring and management to additional countries, especially developing countries, and to additional stakeholders could contribute to greater global awareness and an improved monitoring of water quality. In applying the lesson, the subprogramme will strengthen capacity development around water quality monitoring and assessment by identifying and engaging with a wide variety of potential partners, providers and stakeholders across a range of different platforms, and through communication, networking and outreach activities.

14.106 Expected progress towards the objective is presented in the performance measure below (see figure 14.XX).

Figure 14.XX

Performance measure: number of countries that submit quality-assured data on surface and groundwater quality to the Global Freshwater Quality Database (cumulative)

Deliverables

14.107 Table 14.16 lists all deliverables of the subprogramme.

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: meetings of the International Resource Panel, enabling the participation of steering committee members from 20 Member States; consultation with some 25 Member States and other entities and stakeholders on methodology development and capacity development in the area of data collection methodologies relating to the Sustainable Development Goals; and advice to at least 20 Member States and stakeholders on strengthening the science-policy interface and on implementing a national environmental information system.

D. Communication deliverables

Digital platforms and multimedia content: web pages, multimedia material and audio, video and social media content on the scientific work of UNEP utilized by Member States, stakeholders and the public on open data platforms, including the World Environment Situation Room and the Global Freshwater Quality Database.

B. Proposed post and non-post resource requirements for 2024

Overview

14.108 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 14.17 to 14.19.

Table 14.17

14.109 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 14.20 to 14.22 and figure 14.XXI.

14.110 As reflected in tables 14.20 (1) and 14.21 (1), the overall resources proposed for 2024 amount to \$21,944,700 before recosting, reflecting a net increase of \$911,100 (or 4.3 per cent) compared with the appropriation for 2023. Resource changes result from new and expanded mandates, technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 14.XXI
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

- 14.111 As reflected in table 14.20 (1), resource changes reflect an increase of \$282,400 related to the delayed impact of the reassignment of posts in 2023, which were subject to a 50 per cent vacancy rate in accordance with the established practice for reassigned posts, as follows:

Subprogramme 2, Digital transformations in supporting environmental action. In 2023, three posts of Humanitarian Officer (P-4) were reassigned as Data Specialist (\$202,600). In addition, one post of Coordinator Programme Management (P-3) was reassigned as Data Analyst (P-3) (\$79,800).

New and expanded mandates

- 14.112 As reflected in table 14.20 (1), resource changes reflect an increase of \$628,700, as follows:

- (a) **Policymaking organs.** An increase of \$450,000 relating to additional requirements in support of the sixth session of the United Nations Environment Assembly, in 2024, pursuant to General Assembly resolutions [67/260](#) and [73/260](#) and Environment Assembly decision 5/4. The requirements consist of other staff costs (\$197,400), hospitality (\$19,200) and general operating expenditure (\$233,400);
- (b) **Executive direction and management.** An increase of \$178,700 for the United Nations Scientific Committee on the Effects of Atomic Radiation pursuant to General Assembly resolution [77/119](#), to strengthen support for the secretariat in order to adequately and efficiently provide service to the Scientific Committee by providing for: (a) one post of Data Analyst (P-3) (\$83,900) for data collection and management and outreach and one post of Programme Management Assistant (General Service (Other level)) (\$48,100) to support the office management (see annex III to the present report); and (b) consultants with special expertise in radiation science (\$46,700). The increased resources for consultants are required for adequate,

efficient and timely conduct of the Scientific Committee’s evaluations and to ensure the continued independence of the evaluations.

Extrabudgetary resources

- 14.113 As reflected in tables 14.20 (2) and 14.21 (2), extrabudgetary resources amount to \$413,096,900. The estimate is in line with the priorities and deliverables approved by the United Nations Environment Assembly for the programme of work for the biennium 2023–2024.
- 14.114 The extrabudgetary resources under the present section are subject to the oversight of the United Nations Environment Assembly.

Polymaking organs

- 14.115 The resources proposed under this component would provide for requirements relating to the United Nations Environment Assembly, and the Open-ended Committee of Permanent Representatives and the annual subcommittee of the Committee of Permanent Representatives. In its decision 5/4, the Environment Assembly, which normally holds a biennial session in odd years, decided to hold the sixth session in 2024. Table 14.23 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 14.23
Polymaking organs
 (Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
United Nations Environment Assembly	The United Nations Environment Assembly is the governing body of UNEP and has the mandate to take strategic decisions, provide political guidance for the work of UNEP and promote a strong science-policy interface. It holds biennial sessions The United Nations Environment Assembly, in its resolution 2/22, decided to hold its regular sessions in odd-numbered years. Owing to the COVID-19 pandemic, the fifth session was held in two parts, in 2021 and 2020. The sixth session is to be held in 2024	Mandate: General Assembly resolutions 67/213 and 67/251 and Governing Council decision 27/2 Membership: 193 government officials Number of sessions in 2024: 1	–	346.3
Committee of Permanent Representatives	The Committee of Permanent Representatives, as a subsidiary body of the United Nations Environment Assembly, provides policy advice to the Environment Assembly, contributes to the preparation of the agendas for its sessions and the draft decisions that it will consider, oversees the implementation of resolutions and the programme of work once they are adopted and prepares the forthcoming programme of work for adoption by it. The Committee holds its regular one-day meetings on a quarterly basis and meets in open-ended format every two years, prior to the Environment Assembly session	Mandate: Governing Council decision 27/2 Membership: 126 accredited government officials Number of sessions in 2024: 4	–	103.7

Part IV International cooperation for development

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Subcommittee of the Committee of Permanent Representatives	The subcommittee meets annually for five days to review the medium-term strategy, programme of work and budget and to prepare the forthcoming programme of work for adoption by the United Nations Environment Assembly. In addition, one- or half-day subcommittee meetings are held once or twice a month to consider specific issues in depth, as needed and upon request	Mandate: Governing Council decision 27/2 Membership: 126 government officials Number of sessions in 2024: 1	8.8	8.8
Total			8.8	458.8

14.116 The proposed regular budget resources for 2024 amount to \$458,800 and reflect an increase of \$450,000 in the resource level compared with the appropriation for 2023. The proposed increase is explained in paragraph 14.112 (a) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.24 and figure 14.XXII.

Table 14.24

Figure 14.XXII

Policymaking organs: distribution of proposed resources for 2024 (before recosting)

(Thousands of United States dollars)

Extrabudgetary resources

14.117 Extrabudgetary resources for this component amount to \$2,260,000. The resources would complement regular budget resources and would be used mainly for activities that strengthen engagement with the governing bodies of UNEP to enhance their visibility, authority and impact on delivery of the organization’s mandate.

Executive direction and management

14.118 The executive direction and management component comprises the Office of the Executive Director and the United Nations Scientific Committee on the Effects of Atomic Radiation. The proposed regular budget resources for 2024 amount to \$3,930,400 and reflect an increase of \$178,800 in the resource level compared with the appropriation for 2023. The proposed increase is explained in paragraph 14.112 (b) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.25 and figure 14.XXIII.

Figure 14.XXIII
Executive direction and management: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Office of the Executive Director

- 14.119 The executive direction and management of UNEP is carried out by the Executive Office, the Governance Affairs Office and an independent Evaluation Office. The Executive Office provides executive and support services to the Executive Director, the Deputy Executive Director and other members of the UNEP senior management team. It provides guidance and policy clearance on all programmatic and administrative matters. The Executive Director, with the support of the Deputy Executive Director, provides the vision and direction for the work of UNEP in accordance with its legislative mandates and has overall responsibility for the management of UNEP resources.
- 14.120 The Executive Office also has overall responsibility for providing leadership and direction for UNEP to provide guidance on environmental issues within the United Nations system. That guidance will consider assessments of the causes and effects of environmental challenges, as well as emerging issues of global and regional significance. The Executive Office will catalyse international action to bring about a coordinated response both within the United Nations system and between the United Nations and its partners. This will be executed through inter-agency mechanisms such as the United Nations Environment Management Group and the United Nations System Chief Executives Board for Coordination and its subsidiary bodies. In addition, UNEP will integrate the priorities of the multilateral environmental agreements into those processes to enable the United Nations system to respond to environmental issues in a coordinated manner.
- 14.121 The Evaluation Office is an independent unit reporting directly to the Executive Director. It is responsible for implementing the evaluation workplan by conducting and managing independent evaluations. It also provides analysis of findings and lessons for management.
- 14.122 The Programme’s transformation process, launched in 2019, increased its internal capacity to deliver more impactful results. On the basis of this process and on lessons learned, UNEP formulated a results-oriented and streamlined medium-term strategy for the period 2023–2025 and a programme of work for 2023–2024 that uses data as a critical tool for decision-making. Focusing on indicators that are aligned with organizational objectives, the Sustainable Development Goals and/or internationally agreed environmental indicators to reflect true transformational change, UNEP strives to monitor change over a term longer than a single biennium or the four years of its strategy. This will be done by

employing impact metrics with project performance dashboards and cross-project leader boards to gauge effectiveness and assess the level of uptake of its products and services.

- 14.123 With regard to inter-agency mechanisms, UNEP will continue to provide a “clear line of sight” for its delivery of the 2030 Agenda. Working with the wider United Nations is one of the levers of change for improved delivery of the Programme’s medium-term strategy for the period 2023–2025 and its programmes. UNEP will continue to enhance its guiding role on the environmental dimension of sustainable development and influence global environmental policymaking under the global intergovernmental processes and deliberations of the General Assembly, the Economic and Social Council, the Human Rights Council and the Security Council. UNEP will pursue the global aspirations of the Sustainable Development Goals while delivering support in response to national needs and realities and taking account of differing regional integration processes, capacities and levels of development.
- 14.124 During 2022, in order to expand the UNEP environmental management system focal points were appointed across 20 duty stations and data were collected in line with the new environmental risk assessment approach and the UNEP annual environmental inventory. In addition, an online training programme was launched at the corporate academy to improve environmental sustainability management. The five-part course included insights on implementing an environmental management system, with 15 focal points trained. The updated Greening the Blue tutorial was also incorporated into the smart course platform (weCollaborate) to enable access for all personnel, with more than 300 participants across UNEP.
- 14.125 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), and further to the ban on single-use plastics effective since 2018, UNEP is continuing to integrate environmental management practices into its operations. In 2024, UNEP will continue to look at waste problems, including hazardous waste and waste associated with the COVID-19 pandemic.
- 14.126 In 2024, UNEP will continue to measure its climate emissions, mitigate them where possible and offset greenhouse gas emissions by means of certificates of emission reduction managed by the carbon offset platform of the United Nations Framework Convention on Climate Change.
- 14.127 Information on the timely submission of documentation and advance booking for air travel is reflected in table 14.26. The low travel compliance rate is due mainly to the continuation of COVID-19 pandemic-related travel restrictions and uncertainties in 2022. However, UNEP continues to streamline its processes following the issuance of internal guidelines to all staff and continuous improvements in the travel dashboard to assist in the monitoring of and reporting on the compliance rate.

Table 14.26
Compliance rate
 (Percentage)

	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Actual 2022</i>	<i>Planned 2023</i>	<i>Planned 2024</i>
Timely submission of documentation	85	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	53	42	50	100	100

- 14.128 The proposed regular budget resources for 2024 amount to \$2,969,900 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.27 and figure 14.XXIV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.129 Extrabudgetary resources for this component amount to \$4,700,000. The resources complement regular budget resources and would be used mainly by the Executive Office, with support from the Evaluation Office, to provide executive direction and management, including on strategic, programmatic and administrative matters, as well as to strengthen accountability for the delivery of the medium-term strategy and its related programmes of work, as mandated by the United Nations Environment Assembly and as set out in the compact between the Executive Director and the Secretary-General. The estimated resource level for 2024 reflects no change compared with the estimates for 2023.

United Nations Scientific Committee on the Effects of Atomic Radiation

- 14.130 The General Assembly, by its resolution [913 \(X\)](#), established the United Nations Scientific Committee on the Effects of Atomic Radiation to undertake broad scientific evaluations on developing knowledge on sources of ionizing radiation and its effects on human health and the environment. Since 1955, the Committee has played an important role in improving international scientific understanding of levels of exposure to ionizing radiation and its health and environmental effects and setting the scientific basis for radiation protection worldwide. In its resolution [77/119](#), the Assembly reaffirmed its decision to maintain the present functions and independent role of the Committee.
- 14.131 In the context of the 2030 Agenda, the work of the Scientific Committee contributes to the achievement of Sustainable Development Goal 3. Evaluations by the Committee are conducted on behalf of all States Members of the United Nations and are used to assess the levels and trends of exposure from using radiation in medicine, research, education, agriculture and industry, including nuclear power production. The Committee's scientific synthesis of the most up-to-date radiobiological and epidemiological knowledge is fundamental for the international radiation safety regime and underpins international safety standards for protecting workers, patients and the public against ionizing radiation. The findings of the Committee also contribute to the achievement of Goals 14 and 15. This was particularly evident through the 2020/2021 report to the General Assembly (annex B) titled "Levels and effects of radiation exposure due to the 2011 accident at the Fukushima Daiichi nuclear power station in Japan". Through its work, the Committee also contributes to the achievement of Goal 17 by collaborating and maintaining long-term partnerships with national and international organizations such as the International Atomic Energy Agency, the World Health Organization, the Comprehensive Test Ban Treaty Organization, the Information System on Occupational Exposure and, more recently, the International Labour Organization, the European Commission and the Nuclear Energy Agency.
- 14.132 The secretariat, located in Vienna, convenes and services the annual sessions of the Scientific Committee. In 2022, the General Assembly welcomed Committee's annual report ([A/77/46](#)) from its sixty-ninth session, held in Vienna from 9 to 13 May 2022.
- 14.133 In line with General Assembly resolution [77/119](#), the Scientific Committee secretariat continues to maintain and foster the online platform for the collection public exposure data from Member States, enabling the Committee to regularly evaluate and monitor trends in such exposure. By the end of 2022, 98 Member States had nominated national contact persons to participate in the Committee's global survey on public exposure, launched in March 2021. The Committee's ad hoc working group on sources of and exposure to ionizing radiation is also evaluating lessons learned from recently completed surveys on occupational and medical exposures in dialogue with the national contact persons.
- 14.134 In 2024, the Scientific Committee is planning to approve: (a) a scientific report on the evaluation of second primary cancer after radiotherapy that is expected to provide the scientific basis for the development of international safety standards in this field; (b) a scientific report on the evaluation of public exposure to ionizing radiation, which will provide the first updated information on this topic since 2007; (c) its future programme of work, for the period 2025–2029; and (d) a new public and outreach strategy. These will contribute to the achievement of Sustainable Development Goals 3, 14, 15 and 17 and the long-term planning of the scientific work of the Committee.
- 14.135 The General Assembly, in its resolution [77/119](#), welcomed the ongoing development by the Scientific Committee secretariat of an online platform for collecting data on the exposure of patients, workers and the public, and urged Member States to take part in the Committee's global survey of public exposure.
- 14.136 The proposed regular budget resources for 2024 amount to \$960,400 and reflect an increase of \$178,700 in the resource level compared with the appropriation for 2023. The proposed increase is

Part IV International cooperation for development

explained in paragraphs 14.111 and 14.112 (b) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.28 and figure 14.XXV.

Figure 14.XXV
United Nations Scientific Committee on the Effects of Atomic Radiation: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.137 Extrabudgetary resources for the component amount to \$186,900. The resources would complement regular budget resources and would be used mainly to support scientific evaluations and to increase the outreach and awareness of the Scientific Committee’s findings. Resources would also provide for additional support to modernize, strengthen and expedite the implementation of the Committee’s programme of work within its mandate. The estimated resource level for 2024 reflects a decrease of \$163,100 in the resource level compared with estimated resources for 2023, attributable primarily to the conclusion of one cooperation project.

Programme of work

14.138 The proposed regular budget resources for 2024 amount to \$16,530,100 and reflect a net increase of \$282,400 in the resource level compared with the appropriation for 2023. The proposed increase is explained in paragraph 14.111 above.

**Subprogramme 1
Climate action**

14.139 The proposed regular budget resources for 2024 amount to \$1,976,400 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.29 and figure 14.XXVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.140 Extrabudgetary resources for this subprogramme amount to \$112,850,000. The resources would complement regular budget resources and would be used mainly in activities that would accelerate the adoption of low-emission technologies and climate-resilient development. The estimated resource level for 2024 reflects no change compared with the estimates for 2023.

**Subprogramme 2
Digital transformations in supporting environmental action**

14.141 The proposed regular budget resources for 2024 amount to \$1,443,500 and reflect an increase of \$282,400 in the resource level compared with the appropriation for 2023. The proposed increase is explained in paragraph 14.111 above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.30 and figure 14.XXVII.

 (Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.142 Extrabudgetary resources for the subprogramme amount to \$21,350,000. The resources would complement regular budget resources and would be used mainly for the establishment of the global digital standards, architecture and governance framework needed to integrate data sets and analysis on the environment, as well as to leverage data and data analytics to amplify and accelerate contributions to the achievement of the Sustainable Development Goals. The estimated resource level for 2024 reflects no change compared with the estimates for 2023.

**Subprogramme 3
 Nature action**

14.143 The proposed regular budget resources for 2024 amount to \$2,470,500 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.31 and figure 14.XXVIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.144 Extrabudgetary resources for the subprogramme amount to \$101,100,000. The resources would complement regular budget resources and would be used mainly to support the delivery of science-based solutions for nature across sectors and levels of governance to halt and reverse the loss of biodiversity and ecosystem integrity, which are key to many economic activities and the provision of goods and services critical for human welfare. The estimated resource level for 2024 reflects no change compared with the estimates for 2023.

Subprogramme 4 Environmental governance

14.145 The proposed regular budget resources for 2024 amount to \$4,188,000 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.32 and figure 14.XXIX.

Figure 14.XXIX
Subprogramme 4: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.146 Extrabudgetary resources for this subprogramme amount to \$27,600,000. The resources would complement regular budget resources and would be used mainly to support institutional

strengthening and the development and effective implementation of appropriate legal frameworks and policies to enhance delivery on the environmental dimension of the 2030 Agenda. The estimated resource level for 2024 reflects no change compared with the estimates for 2023.

Subprogramme 5 Chemicals and pollution action

14.147 The proposed regular budget resources for 2024 amount to \$1,615,900 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.33 and figure 14.XXX.

Extrabudgetary resources

14.148 Extrabudgetary resources for this subprogramme amount to \$61,550,000. The resources would complement regular budget resources and would be used mainly to support the scaling-up of efforts to improve waste management and strengthen collaboration with countries and stakeholders towards a pollution-free planet. The estimated resource level for 2024 reflects no change compared with the estimates for 2023.

**Subprogramme 6
Finance and economic transformations**

14.149 The proposed regular budget resources for 2024 amount to \$1,841,200 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.34 and figure 14.XXXI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

14.150 Extrabudgetary resources for the subprogramme amount to \$39,600,000. The resources would complement regular budget resources and would be used mainly to support countries and other stakeholders in increasing advocacy of sustainable economies, including trade policies, to accelerate the shift to more sustainable and equitable patterns of consumption, production and investment. In addition, the resources would support the enhancement of economic principles and standards enabling private finance and business, and associated value chains, to improve their environmental sustainability. The estimated resource level for 2024 reflects no change compared with the estimates for 2023.

**Subprogramme 7
Science policy**

14.151 The proposed regular budget resources for 2024 amount to \$2,994,600 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.35 and figure 14.XXXII.

Extrabudgetary resources

14.152 Extrabudgetary resources for the subprogramme amount to \$22,000,000. The resources would complement regular budget resources and would be used mainly to strengthen the capacity of Governments and non-governmental actors to gain access to, generate and use quality environmental data and analysis and to sustain a strengthened science-policy interface that generates evidence-based environmental assessments, identifies emerging environmental issues and fosters relevant policy action at the global, regional and national levels, including for the achievement of the environment-related Sustainable Development Goals. The estimated resource level for 2024 reflects no change compared with the estimates for 2023.

Programme support

14.153 The programme support component comprises services provided mainly by the Corporate Services and Programme and Policy Divisions. It aims to ensure efficient and effective development and delivery of the programmatic priorities of the medium-term strategy, underpinned by sound management and leadership practices with a reinforced accountability framework that clarifies roles and responsibilities. Programme management and support provide guidance on programme and project design, delivery and closure; governance of resources; corporate policy development and oversight; programme monitoring and reporting; building of staff knowledge and capacity; and the development of programme and resource management tools that support decision-making.

Part IV International cooperation for development

- 14.154 The Corporate Services and Programme and Policy Divisions are responsible for the strategic management of UNEP financial, human and information technology resources, ensuring alignment of the resources with programmatic needs and strategic objectives, such as gender balance in the workplace. They work in close collaboration and coordination with the United Nations Office at Nairobi and its other United Nations service providers, including the United Nations Office at Geneva, in respect of accounting, payroll and payments, recruitment and staff services, staff development, network and other systems administration, information and communications technology, procurement and inventory management. They also interact with the United Nations Office at Nairobi in the areas of host country relations, buildings management, conference management, medical services, and security and safety.
- 14.155 In 2024, the component will continue with its strong engagement and support for the United Nations reforms and with its role in contributing towards the development of United Nations system-wide strategies on the environment.
- 14.156 The proposed regular budget resources for 2024 amount to \$1,025,500 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 14.36 and figure 14.XXXIII.

(Number of posts/thousands of United States dollars)

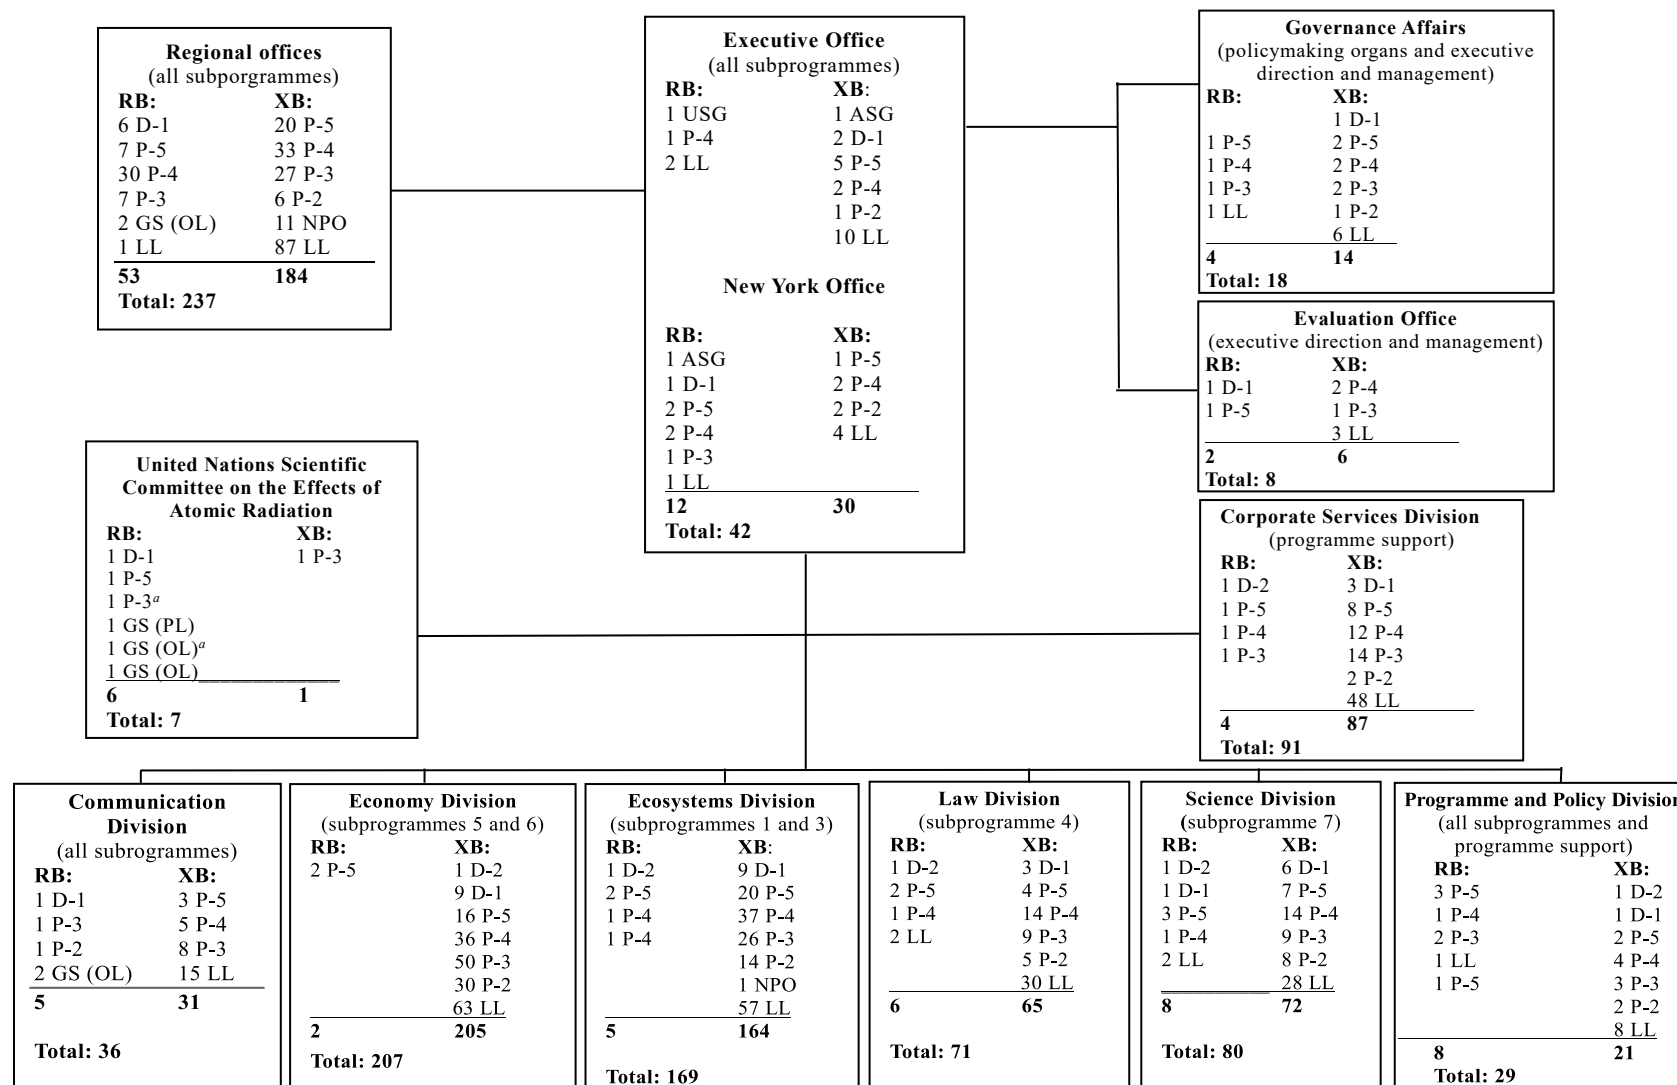

Extrabudgetary resources

14.157 Extrabudgetary resources for the component amount to \$19,900,000. The resources would complement regular budget resources and would be used mainly to support effective programme delivery; governance of resources; corporate policy development and oversight; enhanced risk management; programme monitoring and reporting; building of staff knowledge and capacity; enhanced resource mobilization; and the development of programme and resource management tools that support decision-making. The estimated resource level for 2024 reflects no change compared with the estimates for 2023.

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee trusts that UNEP will continue with its efforts to mobilize extrabudgetary resources and provide disaggregated information on extrabudgetary contributions in the context of the next budget proposal (para. IV.120).

Taking into account the efficiencies from the use of common services provided by ESCWA, the Advisory Committee trusts that UNEP will provide updates and lessons learned from this experience in the next budget submission (see para. IV.122).

Disaggregated information related to extrabudgetary contributions of UNEP is contained in its biennial programme of work. The 2022–2023 programme of work was extended for two years at the fifth resumed session of the United Nations Environment Assembly; accordingly, the information for 2024 on UNEP extrabudgetary resources remains the same.

Office space and related facilities. The UNEP regional office (among 14 United Nations agencies) is assigned a dedicated office space on the same floor in the United Nations House. UNEP also has access to free designated common meeting rooms with standard information and communications technology (ICT) equipment. There are also common printing rooms and quiet rooms available for use by all United Nations agencies.

All building management-related services of the United Nations House are undertaken by ESCWA and cost-shared among the 14 United Nations agencies, resulting in lower overall administrative costs. In addition, staff of the UNEP regional office have had the advantage of meeting and interacting with staff of other United Nations entities on professional and social levels, offering many opportunities for collaboration and coordination.

Security. UNEP is benefiting from the standard and professional security services of the Department of Safety and Security, thereby eliminating the need for dedicated security personnel and reducing costs.

Venue and training facilities. In 2022, UNEP used the conference facilities at United Nations House on several occasions to conduct its training and workshop events at a standard lower price. The services provided included use of the ESCWA cashier services to disburse daily subsistence allowances to participants.

Other services. In 2022, ESCWA also provided small-scale procurement services and conducted the Global General Service Test. UNEP is part of the ICT network of ESCWA and enjoys all ICT-related services and protocols in accordance with United Nations Secretariat standards and policies.

UNEP continues to utilize the host country services, including the privileges and immunities under the host country agreement of ESCWA.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Level</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction management, United Nations Scientific Committee on the Effects of Atomic Radiation	1	P-3	Establishment of 1 Data Analyst	The proposed establishment is pursuant to General Assembly resolution 77/119 and would provide for improved data collection, management and dissemination of findings, while at the same time enhancing the capacity of the secretariat and overall support provided to the Scientific Committee.
Executive direction management, United Nations Scientific Committee on the Effects of Atomic Radiation	1	GS (OL)	Establishment of 1 Programme Management Assistant	The proposed establishment is pursuant to General Assembly resolution 77/119 and would support office management and the engagement of consultants, while at the same time enhancing the capacity of the secretariat and overall support provided to the Scientific Committee.

Foreword

Over the course of 2024, the United Nations Human Settlements Programme (UN-Habitat) will continue to promote urbanization as a positive transformative force for people and communities, reducing inequality, discrimination and poverty and strengthening climate action. The second session of the UN-Habitat Assembly, with the theme “A sustainable urban future through inclusive and effective multilateralism: achieving the Sustainable Development Goals in times of global crises”, sets the stage for accelerating the implementation of the global agendas through sustainable urbanization, including towards several targets of Sustainable Development Goal 11 on making cities and human settlements inclusive, safe, resilient and sustainable.

Urgent action is needed to accelerate implementation and to translate goals into concrete pathways for bold, transformative action. The coronavirus disease (COVID-19) pandemic and current global crises have clearly shown that adequate housing for all and prosperous, just and sustainable urban futures cannot be realized without inclusive and effective multilateralism that acknowledges human rights and gender equality and complements and reinforces national and local efforts towards sustainable development.

Across the subprogrammes, UN-Habitat will aim to strengthen the transformative nature of its work and contribute to an enhanced role of local and regional governments in implementing global agreements. Access to adequate housing, localizing the Sustainable Development Goals, climate action and urban crisis prevention and response remain key priorities.

The proposed programme budget for 2024 positions UN-Habitat to effectively deliver on its mandates and to efficiently respond to emerging situations across its programme of work.

(Signed) Maimunah **Mohd Sharif**
Executive Director, United Nations Human Settlements Programme

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 15.1 The United Nations Human Settlements Programme (UN-Habitat) is a focal point for sustainable urbanization and human settlements in the United Nations system. It supports Member States in the development of sustainable cities and human settlements through its normative and operational work at the global, regional, national and local levels. UN-Habitat leads and coordinates the monitoring of and reporting on global progress in the implementation of the New Urban Agenda and Sustainable Development Goal 11. The mandate derives from priorities established by General Assembly resolutions and decisions, including resolution 3327 (XXIX), by which the Assembly established the United Nations Habitat and Human Settlements Foundation, and resolution 32/162, by which the Assembly established the United Nations Centre for Human Settlements (Habitat). The Assembly, through its resolution 56/206, transformed it to the United Nations Human Settlements Programme (UN-Habitat), effective 1 January 2002. The Assembly, through its resolution 73/239, established a new governance structure for the Programme, consisting of the universal UN-Habitat Assembly, the 36-member Executive Board and the Committee of Permanent Representatives.
- 15.2 The Programme's support is aimed at developing the capacity at all levels of government and other key stakeholders to formulate and implement policies, plans and concrete activities for sustainable urban development. Such support is also provided through the implementation of projects under the regular programme of technical cooperation and the United Nations Development Account.

Strategy and external factors for 2024

- 15.3 We are witnessing a world that will continue to urbanize over the next three decades – from 56 per cent in 2021 to 68 per cent in 2050. This translates into an increase of 2.2 billion urban residents.¹ Some 90 per cent of urban growth is taking place in less developed regions,² where unplanned growth is fuelling the expansion of informal settlements and slums, resulting in an increase in urban poverty, inequality and lack of adequate and affordable housing. In other parts of the world many cities are experiencing negative growth and shrinking populations. Globally, more than 1.6 billion people live in inadequate housing and more than 1 billion live in slums and informal settlements.³ Of significance to the programme of work are the 281 million international migrants, most of whom live in urban areas, and the 55 million internally displaced persons, according to recent estimates from 2020.⁴ The World Bank estimates that 216 million people could be forced to migrate within their own countries by 2050 owing to climate change if immediate action is not taken.⁵
- 15.4 Climate change and biodiversity loss, pandemics, armed conflicts, growing inequalities and other natural and human-made disasters often converge in cities and surrounding territories. Being prepared for and overcoming these challenges is critical to transformation towards a better urban future. UN-Habitat will focus on pathways to transformative change and will investigate and elevate examples of cities that reached a tipping point and turned the corner by instituting innovative and progressive policies and planning regimes. COVID-19 has shown that substantial change is possible in the short term, such as the repurposing of public space towards soft forms of mobility such as walking and cycling, but the challenge in delivering long-term and sustainable change remains.

¹ United Nations Human Settlements Programme (UN-Habitat), *World Cities Report 2022: Envisaging the Future of Cities* (Nairobi, 2022).

² Ibid.

³ UN-Habitat, Global Urban Indicators database (2022).

⁴ M. McAuliffe and A. Triandafyllidou (eds.), *World Migration Report 2022* (International Organization for Migration (IOM), Geneva, 2021).

⁵ World Bank, *Groundswell: Acting on Internal Climate Migration*, Part II (2021).

- 15.5 Cities are hotspots for environmental and energy challenges, accounting for 60 to 80 per cent of global energy consumption, 70 per cent of global greenhouse gas emissions and more than 70 per cent of resource use.⁶ The urban poor, living in risk-prone and underserved areas, suffer the worst consequences of climate change-related disasters and natural and human-made crises. UN-Habitat will support cities in reshaping urban planning solutions that are more sustainable and integrated, help overcome inequalities and are supported by innovation and technology to become healthier, more resilient and inclusive.
- 15.6 The deterioration of progress towards the Sustainable Development Goals and the Paris Agreement in the context of interrelated global crises calls for more transformative action. UN-Habitat will continue to build on its experience of implementing large-scale programmes and projects at the local, national and regional levels to guide technical cooperation work with a demonstrable impact on the lives of beneficiaries. Through its flagship programmes, UN-Habitat will continue to fast-track integration between its normative and operational work, scaling up and accelerating the impact of the organization. In 2024, UN-Habitat will further advance the following flagship programmes:
- (a) “Sustainable Development Goals Cities”, which is aimed at advancing the overall implementation of the Goals at the local level by supporting cities in developing reliable data, undertaking evidence-based planning and implementing transformative projects (contributing to all subprogrammes);
 - (b) “RISE-UP: resilient settlements for the urban poor”, which works to leverage large-scale investment to build urban adaptation and climate resilience in global hotspots of vulnerability and address issues of spatial inequality (contributing mainly to subprogrammes 1 and 3);
 - (c) “Inclusive cities: enhancing the positive impacts of urban migration”, which supports local and national authorities in creating inclusive and urban environments for all people (contributing mainly to subprogrammes 1 and 4);
 - (d) “Inclusive, vibrant neighbourhoods and communities”, which supports urban regeneration of towns and cities with a view to addressing spatial inequality (contributing mainly to subprogrammes 1 and 3);
 - (e) “People-centred smart cities”, which supports digital transformation for sustainable urbanization (contributing mainly to subprogrammes 1 and 2).
- 15.7 To better meet the needs of Member States and to engage a wider audience, UN-Habitat will continue to strengthen capacity-building initiatives, the digitization of tools and virtual e-learning programmes. In line with its capacity-building strategy for the implementation of the Sustainable Development Goals and the New Urban Agenda, UN-Habitat will focus on localizing the Goals, by identifying and addressing gaps in capacity.
- 15.8 In its catalytic role as a knowledge hub and partner convenor, UN-Habitat will carry out advocacy, communication and outreach activities and mobilize broad-based support for the implementation of the New Urban Agenda. It will continue to leverage advocacy and knowledge platforms, including the Urban Agenda Platform and key global events such as the World Urban Forum, World Cities Day and World Habitat Day and regional ministerial conferences.
- 15.9 As a focal point for sustainable urbanization and human settlements, UN-Habitat will continue to monitor and report on global trends and provide evidence for policymaking, including through the enhanced use of technologies for data collection and analysis, visualization and management of information. It will expand the roll-out of the Global Urban Monitoring Framework and continue to support Member States and other stakeholders in monitoring and reporting on the implementation of the New Urban Agenda, including as part of the reporting on the Sustainable Development Goals (voluntary national and local reviews) and towards other global agendas.

⁶ International Energy Agency, *Empowering Cities for a Net Zero Future: Unlocking Resilient, Smart, Sustainable Urban Energy Systems* (2021).

- 15.10 With regard to cooperation with other entities at the global, regional, national and local levels, UN-Habitat will continue its close cooperation with international and regional organizations, such as the Organisation for Economic Co-operation and Development (on national urban policies), the World Bank and the European Union (on urban recovery frameworks), as well as regional development banks. UN-Habitat will maintain its focus on partnerships with local authorities, their associations and city networks, as well as on partnerships with grass-roots organizations, foundations, international financial institutions, the private sector and academia to support municipal efforts in the localization of the Sustainable Development Goals. It will continue to serve as the secretariat and co-Chair of the Local2030 coalition to mobilize the support of national and local governments, as well as the private sector and civil society, together with the United Nations system, for coordinated action at the local level to accelerate the achievement of the Goals.
- 15.11 With regard to inter-agency coordination and liaison, UN-Habitat will continue to collaborate with the Department of Economic and Social Affairs, the United Nations regional economic and social commissions and the Office of the Special Adviser on Solutions to Internal Displacement and strengthen its strategic partnerships with other United Nations agencies, building on the United Nations system-wide strategy on sustainable urban development and agency-specific collaborative frameworks. Regional focus will be articulated through the regional development cooperation platforms and issue-based coalitions. UN-Habitat will also collaborate with the resident coordinator system to improve the integration of urban issues and territorial approaches through the common country assessments and the formulation of the United Nations Sustainable Development Cooperation Frameworks.
- 15.12 To pursue stronger integration of environmental sustainability and the protection of biodiversity into urban development, UN-Habitat will continue to strengthen its collaboration with the United Nations Environment Programme. It will collaborate with the Office of the United Nations High Commissioner for Refugees (UNHCR), the United Nations Development Programme, the International Organization for Migration (IOM), the United Nations Office for Disaster Risk Reduction, the World Food Programme, the Mayors Migration Council and the Resilient Cities Network to integrate sustainable urban development into resilience, humanitarian response and urban recovery. UN-Habitat will collaborate with the World Health Organization and the United Nations Children's Fund on the monitoring of water and sanitation and the integration of health considerations into its planning work. It will reinforce its partnership with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) to strengthen gender equality and the empowerment of women in its work and initiatives.
- 15.13 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Adequate unearmarked extrabudgetary resources are available to implement the planned work and produce the deliverables;
 - (b) Countries remain committed to the New Urban Agenda and the 2030 Agenda for Sustainable Development;
 - (c) Ongoing requests are received from national and local governments for policy advice and technical assistance from UN-Habitat in the development and implementation of their urban policies, plans and strategies;
 - (d) Urban indicators, data and information are used to formulate policies, with adequate mechanisms available for impact monitoring and performance assessments;
 - (e) Countries in which UN-Habitat delivers large programmes will maintain political, economic and social conditions that allow for the implementation of programmes and projects.
- 15.14 UN-Habitat integrates a gender perspective in its operational activities, deliverables and results, as appropriate, including through its strategic results framework, gender policy and action plan. Furthermore, the Advisory Group on Gender Issues advises the Executive Director on how best to promote gender equality and women's empowerment in sustainable urban development through its flagship programmes. UN-Habitat, in collaboration with UN-Women, will continue to support

Member States with policy, legislation, planning and financing instruments to achieve integrated, inclusive and participatory results. For example, UN-Habitat will continue to promote land and housing policies that incorporate a gender perspective, improve tenure security for all, in particular women, and address the intersecting areas of Sustainable Development Goals 5 and 11.

- 15.15 In line with the United Nations Disability Inclusion Strategy, UN-Habitat will continue to work with its partners, including the World Blind Union and World Enabled, to integrate disability inclusion into its programmatic work. It will implement an action plan that ensures that disability inclusion is mainstreamed throughout the organization's work, highlight good practices and identify key areas that require capacity development, technical resources and assistance. The action plan will strengthen the established environmental and social safeguards framework that is applied to all projects, and disability inclusion will be further mainstreamed as an integral part of each project submitted for approval.
- 15.16 The Programme will continue to mainstream social inclusion as a process and outcome to address cross-cutting issues relating to women and girls, older persons, persons with disabilities, children and young people. UN-Habitat will also continue to develop platforms and mechanisms to engage youth, such as the UN-Habitat Youth Advisory Board and the one-stop youth resource centres, and develop critical programmes in the areas of livelihoods, public space and climate change. In 2024, UN-Habitat will also renew its youth strategy. The Programme will continue to strengthen its approach to leaving no one behind by focusing on the spatial dimension of exclusion across its activities with full respect to human rights. This will include support to Member States with relevant UN-Habitat tools, mechanisms and normative materials. Moreover, thematic areas of resilience and urban safety will continue to be incorporated across the Programme's activities.

Impact of the pandemic and lessons learned

- 15.17 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular in dealing with delays, carrying over from 2021, in technical assistance to support progress towards the Sustainable Development Goals in all subprogrammes. The Programme continued its focus on raising awareness of the New Urban Agenda and the further development of related online courses available in all official languages of the United Nations, in order to scale up outreach and awareness regarding the transformative potential of sustainable urbanization, which in return could facilitate more sustainable recovery from the pandemic and help accelerate progress towards the Goals.
- 15.18 In order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, the Programme, through its Global Urban Indicators database, tracks city-level COVID-19 data, which also contains mapping of basic infrastructure and services that have been made available to communities living in slums and informal settlement communities, as well as a tracker to help cities assess their COVID-19 readiness and response. Moreover, in the *World Cities Report* published in 2022, UN-Habitat highlighted key findings for improving public health and building resilient urban economies. UN-Habitat also implemented projects focused on, for instance, regaining confidence in the use of public space, as well enhancing COVID-19 prevention measures, in particular in informal settlements.
- 15.19 The Programme continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the Programme owing to the COVID-19 pandemic, including the continuation of virtual meeting modalities for expert group meetings, upon Member States' request and within existing capacities, enabling broader participation. The Programme will also develop digital learning materials complementing the existing tools of UN-Habitat, to expand its outreach.

Legislative mandates

- 15.20 The list below provides all mandates entrusted to the Programme.

General Assembly resolutions

3327 (XXIX)	Establishment of the United Nations Habitat and Human Settlements Foundation	74/237	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
34/114	Global report on human settlements and periodic reports on international cooperation and assistance on human settlements	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
42/146	Realization of the right to adequate housing	76/136	Promoting social integration through social inclusion
53/242	Report of the Secretary-General on environment and human settlements	76/137	Policies and programmes involving youth
S-25/2	Declaration on Cities and Other Human Settlements in the New Millennium	76/140	Improvement of the situation of women and girls in rural areas
56/206	Strengthening the mandate and status of the Commission on Human Settlements and the status, role and functions of the United Nations Centre for Human Settlements (Habitat)	76/141	Violence against women migrant workers
		76/183	Integrating sport into youth crime prevention and criminal justice strategies
		77/170	Ensuring access to affordable, reliable, sustainable and modern energy for all
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	77/173	Implementation of the outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
71/256	New Urban Agenda		
71/327	The United Nations in global economic governance		
72/234	Women in development	77/212	The right to development

UN-Habitat Assembly resolutions and decisions

1/1	United Nations Human Settlements Programme strategic plan for the period 2020–2023	1/4	Achieving gender equality through the work of the United Nations Human Settlements Programme to support inclusive, safe, resilient and sustainable cities and human settlements
1/2	United Nations System-Wide Guidelines on Safer Cities and Human Settlements		
1/3	Enhancing capacity-building for the implementation of the New Urban Agenda and the urban dimension of the 2030 Agenda for Sustainable Development	Decision 1/3	Arrangements for the transition towards the new governance structure of the United Nations Human Settlements Programme

Executive Board decisions

2021/6	Work programme and budget, implementation of the strategic plan for the period 2020–2023, and alignment of the planning cycles of the United Nations Human Settlements Programme with the quadrennial comprehensive policy review process	2022/5	Implementation of the strategic plan for the period 2020–2023; financial, budgetary and administrative matters of the United Nations Human Settlements Programme (UN-Habitat); report of the Joint Inspection Unit on the findings of its review of the management and administration of UN-Habitat; and draft work programme and budget for 2023
2022/1	Status of the draft work programme of the United Nations Human Settlements Programme and the draft budget of the United Nations Habitat and Human Settlements Foundation for 2023, and financial, budgetary and administrative matters of the United Nations Human Settlements Programme	2022/6	Implementation of the normative and operational activities of UN-Habitat; reporting on the programmatic activities of the Programme in 2022; implementation of subprogrammes, flagship programmes and technical cooperation activities
2022/2	Implementation of the normative and operational activities of the United Nations Human Settlements Programme		

Committee of Permanent Representatives recommendations

1/1	Implementation of the resolutions adopted by the United Nations Habitat Assembly at its first session, in May 2019	1/3	Quadrennial report of the Secretary-General on the implementation of the New Urban Agenda, the high-level meeting of the General Assembly to assess progress in the implementation of the New Urban Agenda, and the eleventh session of the World Urban Forum
1/2	Implementation of resolution 1/1 on the United Nations Human Settlements strategic plan for the period 2020–2023		

Governing Council resolutions

**Subprogramme 4
Effective urban crisis prevention and response**

General Assembly resolutions

69/280	Strengthening emergency relief, rehabilitation and reconstruction in response to the devastating effects of the earthquake in Nepal	74/118	Strengthening of the coordination of emergency humanitarian assistance of the United Nations
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	76/144	Assistance to refugees, returnees and displaced persons in Africa
73/230	Effective global response to address the impacts of the El Niño phenomenon	76/167	Protection of and assistance to internally displaced persons
74/115	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development	76/214	Culture and sustainable development
		77/176	International migration and development
		77/199	Assistance to refugees, returnees and displaced persons in Africa

Governing Council resolutions

20/17	Post-conflict, natural and human-made disaster assessment and reconstruction	26/2	Enhancing the role of UN-Habitat in urban crisis response
23/18	Natural disaster risk reduction, preparedness, prevention and mitigation as a contribution to sustainable urban development		

Deliverables

15.21 Table 15.1 lists all cross-cutting deliverables of the programme.

**Table 15.1
Cross-cutting deliverables for the period 2022–2024, by category and subcategory**

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	–	1	1
1. Implementation of the outcome of the United Nations Conference on Housing and Sustainable Urban Development (Habitat III) and strengthening of the United Nations Human Settlements Programme (UN-Habitat): report of the Secretary-General	1	–	1	1
Substantive services for meetings (number of three-hour meetings)	17	17	29	15
Meetings of:				
2. The governing bodies (UN-Habitat Assembly, Executive Board and Committee of Permanent Representatives)	12	12	26	12
3. The Committee for Programme and Coordination	1	1	1	1

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
5. The Fifth Committee	1	1	1	1
6. The General Assembly on the review of the implementation of the New Urban Agenda	2	2	–	–
B. Generation and transfer of knowledge				
Publications (number of publications)	5	3	2	2
7. UN-Habitat flagship reports	2	–	–	–
8. <i>World Cities Report</i>	1	1	1	1
9. Second quadrennial report on the implementation of the New Urban Agenda	1	1	–	–
10. UN-Habitat annual report	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with all Member States on resolutions of the General Assembly and of the Economic and Social Council; briefings to all Member States on sustainable development issues and processes.				
Databases and substantive digital materials: Global Urban Indicators database with approximately 2,700 users and hosting 114 urban-related indicators; Global Urban Monitoring Framework, indicator framework to monitor the implementation of the quadrennial comprehensive policy review used by all Member States.				
D. Communication deliverables				
Outreach programmes, special events and information materials: materials and flyers about the New Urban Agenda, World Urban Forum, World Habitat Day and World Cities Day.				
External and media relations: interviews and commentaries about UN-Habitat flagship reports, <i>World Cities Report</i> ; <i>SDG 11 Synthesis report</i> ; articles and blogs about implementing the New Urban Agenda and localizing the Sustainable Development Goals.				
Digital platforms and multimedia content: Urban Agenda Platform (www.urbanagendaplatform.org); social media materials about the New Urban Agenda and the <i>New Urban Agenda Illustrated</i> , social media materials for the <i>World Cities Report</i> and the UN-Habitat annual report.				

Evaluation activities

- 15.22 The following evaluations completed in 2022 have guided the proposed programme plan for 2024:
- (a) Evaluations conducted by the Joint Inspection Unit:
 - Review of management and administration in the United Nations Human Settlements Programme (UN-Habitat) ([JIU/REP/2022/1](#));
 - (b) Evaluations conducted by UN-Habitat
 - (i) Evaluation of the UN-Habitat National Urban Policy Programme;
 - (ii) Evaluation of the World Urban Forum Programme 2018–2023.
- 15.23 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, based on the recommendations from the evaluation of the National Urban Policy Programme, UN-Habitat has strengthened results-based management of the National Urban Policy Programme: developing national urban policies and smart city strategies in three selected countries (Islamic Republic of Iran, Myanmar and Nigeria), with improved indicators and appropriate baselines and targets to measure impact and outcomes. The results and recommendations from the evaluation of the tenth session of the World Urban Forum feed into the programming of the eleventh session and are being used for the programming of the next six-year programme cycle of the Forum. The results and recommendations from the Joint Inspection Unit review of management and administration in UN-Habitat will continue to be used to further strengthen the efficiency and effectiveness of UN-Habitat. The report was presented to the Executive Board, which expressed willingness to support the implementation of recommendations from the review.

- 15.24 The following evaluations to be conducted by UN-Habitat are planned for 2024:
- (a) Final evaluation of UN-Habitat's Global Water Operators' Partnerships Alliance strategy;
 - (b) Two thematic evaluations on issues related to gender equality and youth;
 - (c) Evaluation of the twelfth session of the World Urban Forum.

Programme of work

Subprogramme 1

Reduced spatial inequality and poverty in communities across the urban-rural continuum

Objective

- 15.25 The objective, to which this subprogramme contributes, is to reduce inequality between and within communities and to reduce poverty in communities across the urban-rural continuum through increased and equal access to basic services, sustainable mobility, accessible and safe public space, increased and secure access to land, adequate and affordable housing and effective human settlements growth and regeneration.

Strategy

- 15.26 To contribute to the objective, the subprogramme will:
- (a) Develop and disseminate toolkits, standards and technical guidelines to Member States and engage partner cities and local governments in policy dialogues, peer-to-peer support, sharing of best practices, training sessions and other capacity-building initiatives in the areas of water, sanitation and energy, localizing the Sustainable Development Goals and designing low-emission and climate-resilient actions;
 - (b) Provide technical assistance, build institutional capacity and mobilize national, local and regional governments to develop their waste management practices and resource efficiency by rethinking, reducing, reusing and recycling materials and waste before and after usage or consumption;
 - (c) Provide technical support to Member States with policy, legislation, strategic planning and financing instruments to implement integrated, inclusive, low-emission, climate resilient and gender-sensitive land and housing policies;
 - (d) Advocate for adequate, safe and affordable housing, the prevention of unlawful forced evictions, and the implementation of sustainable building codes, regulations and sustainability certification tools for the housing sector;
 - (e) Provide technical assistance to national and local governments and cities seeking to develop urban interventions for urban transformation, expansion and regeneration, and support partner cities in institutionalizing different sustainable approaches on urban regeneration through the development of specific plans, policies, diverse adequate and affordable housing solutions, technical guidelines and toolkits, in line with the International Guidelines on Urban and Territorial Planning and principles of sustainable urbanization;
 - (f) Support national and local governments in addressing structural inequalities exposed by the pandemic, and scale up access to basic and social services, sustainable mobility and safe public spaces, in particular in transformative actions targeting homelessness, urban slums and informal settlements, and putting the most vulnerable people first, by disseminating toolkits, best practices and technical guidelines.

- 15.27 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 2, 5, 6, 7, 10, 11, 12, 14 and 15.
- 15.28 The above-mentioned work is expected to result in:
- (a) Safer, more accessible and inclusive public spaces integrated into national and local urban policies and sectorial plans, with the engagement of a wide range of stakeholders that support the localization of transformative actions in urban areas, in particular for the most vulnerable populations;
 - (b) Increased accessibility to low-emission, adequate and affordable housing in urban areas, and strengthened capacities of policymakers, in particular in local and regional governments to implement sustainable transformative actions, including land governance systems;
 - (c) Sustainable, integrated transformation and regeneration of urban areas into socially and economically inclusive and climate resilient neighbourhoods that offer improved quality of life to all, including improved access to basic services.

Programme performance in 2022

Improved access to land and property rights, urban regeneration, basic services and public spaces in Afghanistan

- 15.29 In Afghanistan, progress has been made towards increasing access to basic services, safer public spaces, effective human settlement growth and regeneration. The majority of the population still lacks access to public infrastructure necessary to support provision of equitable quality basic services. The subprogramme has contributed expertise and implemented projects under a range of United Nations initiatives and programmes, including the ‘Emergency Support to Afghanistan Settlements and Communities’ initiative. Under this initiative, communities have been supported with participatory land use mapping, risk and vulnerability mapping, infrastructure assessments and community action planning. The subprogramme has constructed and rehabilitated community roads, retaining walls, culverts and bridges, irrigation canals, health facilities, water supply systems and solar street lights. These actions have created access to equitable basic services, including health services, potable water, electricity and livelihoods, while also strengthening communal land and property rights, providing more equal access to land and sustainable settlements for Afghan communities.
- 15.30 Progress towards the objective is presented in the performance measure below (see figure 15.I).

Figure 15.I

Performance measure: number of people in Afghanistan accessing equitable basic services as a result of improved infrastructure (cumulative)

Planned results for 2024

Result 1: increased access to basic services, sustainable mobility and slum upgrading programmes to strengthen community resilience to pandemics such as COVID-19 in slums and informal settlements

Programme performance in 2022 and target for 2024

- 15.31 The subprogramme’s work contributed to 3.4 million people in slums and informal settlements in 45 countries with access to basic services, which exceeded the planned target of 3.1 million people.
- 15.32 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 15.II).

Figure 15.II
Performance measure: number of people in slums and informal settlements in 45 countries with access to basic services (cumulative)
 (Millions of people)

Result 2: enhanced and expanded service delivery by local water and sanitation service providers

Programme performance in 2022 and target for 2024

- 15.33 The subprogramme’s work contributed to supporting 30 local sanitation operators providing more inclusive sanitation services through water operator partnerships, training, workshops and exposure visits, which met the planned target.
- 15.34 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 15.III).

Figure 15.III
Performance measure: number of local sanitation operators providing more inclusive sanitation services (cumulative)

Result 3: inclusive cities and communities through urban regeneration

Proposed programme plan for 2024

- 15.35 Many cities and towns have areas where multiple deprivations overlap, and where socioeconomic and spatial exclusion is concentrated, with higher levels of poverty, unemployment and crime and at greater risk of environmental hazards and shocks. Inclusive and sustainable urban regeneration is a powerful planning tool for social value creation, shared economic prosperity and environmental resilience. A key aspect is to preserve, protect and strengthen the local assets (ecological features, historical buildings, traditions and culture) by adapting the existing structures to new uses and dynamics. The subprogramme supported cities in developing strategic urban regeneration planning processes, inclusive urban design plans and local economic development activities, including as related to creative industries and heritage, community and stakeholder engagement, resource mobilization for inclusive urban regeneration, public spaces and services, housing, mobility networks, gender and age inclusive neighbourhoods, energy efficiency and climate resilience.

Lessons learned and planned change

- 15.36 The lesson for the subprogramme was that the involvement of communities in all phases of urban regeneration processes has helped improve both the relevance and ownership of the outcomes. In applying the lesson, the subprogramme will contribute to the adoption and implementation of urban regeneration initiatives in partnership with 50 cities, with targeted support for community-led and community-informed initiatives, such as inclusive projects, policies and knowledge products. The subprogramme will develop urban regeneration guidelines, which will include tools applied by community-led organizations to increase their agency and skills to design, fund and manage neighbourhood regeneration initiatives.
- 15.37 Expected progress towards the objective is presented in the performance measure below (see figure 15.IV).

Figure 15.IV

Performance measure: number of partner cities that have implemented urban and territorial regeneration initiatives (cumulative)

Deliverables

15.38 Table 15.2 lists all deliverables for the subprogramme.

Table 15.2

Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	–	–	1	–
Report of the Secretary-General on inclusive social development policies and programmes to address homelessness	–	–	1	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	36	36	36	38
1. Projects on urban basic services: mobility, water and sanitation, energy and solid waste management and safe, inclusive and accessible public space	12	12	12	14
2. Projects on development of national and local policies on urban heritage, historical landscape and culture	1	1	1	1
3. Projects on housing, slum upgrading, innovative financing for housing and land readjustment and on integrated urban and territorial renewal and regeneration	8	8	8	9
4. Projects on land tenure security, land-based financing and implementation of the Secretary-General's guidance note on land and conflict	7	7	7	7
5. Projects on integrated urban and territorial planning and effective planning laws	6	6	6	5
6. Projects on urban monitoring, evidence-based policies for crime prevention and community safety and social cohesion in cities and human settlements	2	2	2	2
Seminars, workshops and training events (number of days)	49	49	53	58
7. Workshops and training sessions on urban basic services: mobility, water and sanitation, energy and solid waste management	20	20	20	23
8. Workshops and training sessions on slum upgrading, housing, heritage in urban development, regeneration and urban growth, urban design governance, public space, Global Network of Urban Planning and Design Labs and crime prevention and urban safety	12	12	12	13
9. Global and regional training workshops on land, housing, slum upgrading, housing studios and practitioner labs	5	5	5	6

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
10. Technical workshops on monitoring the Sustainable Development Goals and the New Urban Agenda	1	1	5	5
11. Training sessions on policy, planning and design, governance, legislation and finance and data collection	8	8	8	7
12. Training sessions on land and conflict and on land tenure, governance and financing; and expert group meetings on urban land governance in the Arab States region	3	3	3	3
Publications (number of publications)	3	3	1	3
13. Publication on land tenure and land degradation	1	1	–	1
14. Publication on land governance	1	1	–	1
15. Publication on affordable and sustainable housing, including homelessness	1	1	1	1
Technical materials (number of materials)	11	12	11	13
16. Compendium of policies, plans, good practices and experiences on city planning, urban regeneration, heritage conservation and extension	1	1	1	1
17. Best practices, guides, standards and case studies on increased and equal access to basic services, sustainable mobility and public space	2	2	2	3
18. Guide for land management and spatial plans for poverty reduction and spatial equality	1	1	1	1
19. Guidelines on the right to adequate housing and prevention of homelessness among those in vulnerable situations, including migrants	1	1	1	1
20. Guide series for innovative land, legal and financial mechanisms in relation to conservation and regeneration	1	1	1	1
21. Toolkits, housing profiles and technical guides for city leaders on planning, on managing and implementing affordable and sustainable housing and on slum upgrading programmes	2	2	2	2
22. Series of guides and tools to improve land management and tenure security	1	1	1	1
23. Guidelines and handbooks on slum upgrading solutions	2	2	2	2
24. Neighbourhood planning guidelines on participation and inclusive regeneration	–	1	–	1

C. Substantive deliverables

Consultation, advice and advocacy: technical advice to requesting Member States on implementation, monitoring and implementation of the New Urban Agenda and the Sustainable Development Goals; advisory services for 45 Member States on urban basic services and integrated inclusive slum upgrading; advisory services on the right to housing and tenure security for all, urban law reform and effective urban regeneration and growth management, urban land administration and management to different stakeholders (national and local governments, civil society, private sector and academia).

Databases and substantive digital materials: UrbanLex database on urban law; digital materials on global commitments related to land, housing, urban basic services, mobility, energy, water and sanitation, solid waste management, air quality, climate change mitigation and adaptation and cultural heritage.

D. Communication deliverables

Outreach programmes, special events and information materials: networks including Global Network of Public Space; Best Practices Awards; global action plan for transforming informal settlements and slums by 2030, events with approximately 500 participants, brochures, leaflets and spotlights on slum upgrading, urban regeneration, public space and housing, urban land governance and management.

External and media relations: media kits, press releases, web stories and social media content on inclusive cities.

Digital platforms and multimedia content: video documentaries, infographics, presentations and webinars and 2 open digital platforms on urban safety, heritage, regeneration and urban growth.

Subprogramme 2

Enhanced shared prosperity of cities and regions

Objective

- 15.39 The objective, to which this subprogramme contributes, is to enhance the shared prosperity of cities and regions through improved spatial connectivity and productivity, increased and equitably distributed locally generated revenue and expanded deployment of frontier technologies and innovation.

Strategy

- 15.40 To contribute to the objective, the subprogramme will:
- (a) Support Member States and other partners through the formulation of national urban policies and related legal, financial and implementation frameworks integrated into whole-of-government planning, policy and financing frameworks; knowledge transfer; capacity-building; and the development of tools on urban and rural territorial planning and design;
 - (b) Provide technical assistance, capacity-building and advisory services to cities with regard to:
 - (i) Developing participatory and accountable budgeting approaches, optimizing local revenue systems through data collection, digitization and the development of municipal databases, and leveraging private sources of capital for sustainable urban development;
 - (ii) Effectively procuring, testing and implementing people-centred frontier technologies and innovations such as sensor networks, machine-to-machine communication, artificial intelligence, virtual and augmented reality, geographic information systems, remote sensing and big data processing and visualization;
 - (c) Build on the lessons learned from challenges to local revenue generation exposed by the pandemic to develop tailored policies and technical assistance, with a focus on the recovery of locally generated revenue, including land-based financing, and effective local public financial management.
- 15.41 In doing so, the subprogramme will assist Member States in making progress towards Sustainable Development Goals 1, 8, 9, 10 and 11.
- 15.42 The above-mentioned work is expected to result in:
- (a) Balanced territorial development and better-connected human settlements, while contributing to improved social inclusion, poverty reduction and climate action;
 - (b) Enactment by local authorities of institutional and legal reforms conducive to the generation of additional financial resources, including through public-private partnerships, land-based revenue and financing tools;
 - (c) Strengthened urban-level action to address inequalities and bridge social, spatial and digital divides.

Programme performance in 2022

Increased commitment by local governments to regional development across cities and territories in the North-East Region of Brazil

- 15.43 Planning for an integrated and inclusive development is a challenge in a highly populous country such as Brazil. Urbanized at 85 per cent,⁷ with an estimated population of over 210 million, and 5,570 municipalities, its size, complexity and level of decentralization make it challenging for cities to establish and define priorities and governance models, as well as finance and implement urban

⁷ UN-Habitat, *World Cities Report 2022* (see footnote 1), Statistical Annex.

infrastructure and services. In response to these challenges, and upon request by the Member State, UN-Habitat provided support to increase government capacities in global development agendas, urban and regional planning, digital government, people-centred smart cities and metropolitan management, to establish or strengthen mechanisms and structures for municipalities towards collaborative solutions for territorial development, and to promote urban development and cooperation across subnational boundaries and areas of competence. These efforts led to strengthened capacities of 31 municipalities in the North-East Region of Brazil to work in an integrated manner towards their regional development, aligned with global development agendas and UN-Habitat frameworks. It also led to 17 municipalities pledging to work as a network to address inequalities and bridge social and spatial divides by signing the G52 (network of hub cities to promote sustainable regional development) letter of commitment.

15.44 Progress towards the objective is presented in the performance measure below (see figure 15.V).

Figure 15.V

Performance measure: number of subnational authorities in the north-east of Brazil that formally committed to sustainable regional development

Planned results for 2024

Result 1: a people-centred approach to urban innovation, digital technologies, smart cities and urbanization processes adopted by cities

Programme performance in 2022 and target for 2024

15.45 The subprogramme’s work contributed to 30 local governments adopting people-centred smart city strategies and benefiting from innovations addressing the digital divide, which exceeded the planned target of 20 local authorities.

15.46 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 15.3).

Table 15.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
10 cities benefit from a flagship programme on people-centred smart cities	5 local governments adopt people-centred digital transformation and smart city strategies that address digital divide 10 countries implement urban innovation challenges	30 local governments adopt people-centred smart city strategies and benefit from innovations addressing the digital divide	25 local authorities implement digital transformation and smart city strategies and benefit from innovations addressing the digital divide	25 local authorities implement people-centred smart city strategies, address digital inclusion, implement innovative tools or use data, innovative tools and digital solutions more effectively for urban sustainability

Result 2: regional spatial development plans in Ethiopia for improved prosperity and balanced socioeconomic development

Programme performance in 2022 and target for 2024

- 15.47 The subprogramme's work contributed to enhanced capacity of planning and economic development institutions in 10 regional states in Ethiopia on formulating and implementing regional spatial development plans which did not meet the planned target. The target was not met owing to delays in logistical arrangements and inaccessibility of areas, which slowed the implementation of the project activities at the situation analysis phase.
- 15.48 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 15.4).

Table 15.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Regional authorities in Ethiopia support the conduct of local economic and spatial studies in 10 regions	Enhanced capacity of planning and economic development institutions in 10 regional states in Ethiopia on formulating and implementing regional spatial development plans	Regional authorities endorse 10 regional spatial development plans	Regional authorities endorse 10 regional spatial development plans

Result 3: voluntary local reviews to enhance the shared prosperity of cities and regions globally through Sustainable Development Goal localization

Proposed programme plan for 2024

- 15.49 Voluntary local reviews are the instrument of choice by local and regional governments to report on their progress towards the 2030 Agenda. The subprogramme enables the achievement of enhanced

inclusive economic development by guiding the local and regional governments in the voluntary local review process and contributes to catalysing the localization of the Sustainable Development Goals. New cities are regularly expressing their interest in joining this global movement. UN-Habitat has been providing assistance through technical cooperation, strategic partnership, knowledge development, learning and capacity-building and global advocacy.

Lessons learned and planned change

- 15.50 The lesson for the subprogramme was that there was growing demand to help cities strengthen the voluntary local review methodology and increase availability of harmonized data at the local level. Without adequate disaggregated data, cities are unable to monitor progress and formulate and adjust their plans and policies accordingly. Moreover, poor harmonization of the data across countries and regions limits the coherence and comparability of the voluntary local reviews. In applying the lesson, the subprogramme will pilot the Global Urban Monitoring Framework to guide local and regional governments through the formulation of voluntary local reviews, as the means to support the development of data ecosystems at the local level, including data collection and disaggregation. The subprogramme, through the voluntary local review process, will also provide targeted policy analysis and capacity-building to cities to harness the potential of voluntary local reviews to inform and drive urban planning and policy processes.
- 15.51 Expected progress towards the objective is presented in the performance measure below (see figure 15.VI).

Figure 15.VI
Performance measure: number of voluntary local reviews prepared by local and regional governments (annual)

Deliverables

15.52 Table 15.5 lists all deliverables for the subprogramme.

Table 15.5

Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	29	29	29	27
1. Projects on spatial connectivity, urban policies and spatial frameworks, urban planning and design, urban-rural linkages and integrated territorial development, city planning, extension and design	14	14	14	13
2. Projects on spatial productivity, local economic development, urban and municipal finance, financing urban basic services and infrastructure	7	7	7	6
3. Projects on best practices, centres of excellence, university partnerships, prosperity indices, frontier technologies and legal and governance frameworks for sustainable, inclusive and innovative development of cities and regions	8	8	8	8
Seminars, workshops and training events (number of days)	39	39	39	41
4. Policy dialogues, seminars, workshops and training events on spatial connectivity, urban planning and design, metropolitan planning, urban and rural linkages, action planning, urban and territorial planning and national urban policies	25	25	25	26
5. Training events and workshops on use of information and communications technology, innovation, frontier technologies, best practices, legal and governance frameworks and prosperity indices for sustainable urban development and implementation of the New Urban Agenda and the Sustainable Development Goals	6	6	6	6
6. Training events and workshops on urban productivity, local economic development, urban and municipal finance, public financial management and local governance	8	8	8	9
Publications (number of publications)	2	2	2	2
7. National cities reports	2	2	2	2
Technical materials (number of materials)	11	11	11	12
8. Technical materials on spatial connectivity, urban planning and design, metropolitan planning, urban and rural linkages, action planning, urban and territorial planning, national urban policies and people-centred smart cities.	5	5	5	6
9. Technical materials on spatial productivity, local economic development, urban and municipal finance, financing urban basic services and infrastructure	3	3	3	3
10. Technical materials on frontier technologies and innovation, best practices, legal and governance frameworks and prosperity indices for sustainable urban development and implementation of the New Urban Agenda and the Sustainable Development Goals	3	3	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services to 20 Member States on national urban policy, urban-rural linkages, metropolitan development, territorial development, urban monitoring financing sustainable urban development, smart cities and private-sector focused engagement frameworks.				
Databases and substantive digital materials: national urban policy database comprising approximately 160 countries; compendium of urban-rural linkages case studies; global municipal database, comprising 50 countries and approximately 110 cities.				
D. Communication deliverables				
Outreach programmes, special events and information materials: brochures, leaflets, profiles and events on national urban policy, urban-rural linkages, metropolitan development, territorial development, urban monitoring financing sustainable urban development, smart cities and private-sector focused engagement frameworks.				
Digital platforms and multi-media content: content for social media.				

Subprogramme 3

Strengthened climate action and improved urban environment

Objective

- 15.53 The objective, to which this subprogramme contributes, is strengthened climate action and improved urban environments through reducing greenhouse gas emissions and improving air quality, improving resource efficiency and protecting ecological assets, and the effective adaptation of communities and infrastructure to climate change.

Strategy

- 15.54 To contribute to the objective, the subprogramme will:
- (a) Provide technical support for the development of low-emission city development that addresses emerging climate risks, adaptation investments, basic service provision and the integration of low-emission development and air quality strategies into urban mobility, public space and urban development strategies;
 - (b) Provide assistance on sustainable approaches to urban climate action to requesting Member States through innovative technologies, knowledge transfer, capacity-building, data and development of an evidence base, policy advice and peer-to-peer engagement in global and regional networks;
 - (c) Provide assistance to Member States on the integration of the urban dimension in nationally determined contributions, national adaptation plans and other national climate changes policies, strategies and plans and support their implementation across all levels of governments;
 - (d) Promote solutions to climate action for urban and peri-urban environmental protection, renovation and restoration and open public spaces, as well as integrated solid waste management and marine plastic litter reduction through the development of tools, guidelines and field projects;
 - (e) Support Member States in the development of energy- and resource-efficient technologies and standards for buildings and urban basic services, as well as the integration of energy and resource efficiency principles into country-specific building and planning codes;
 - (f) Provide assistance in the formulation of policy and legislation, urban planning and design, multilevel governance and financing instruments, including through its flagship programme entitled “RISE-UP: resilient settlements for the urban poor”, which focuses on mobilizing investments to address climate resilience issues affecting urban communities in vulnerable situations;
 - (g) Support the implementation of global adaptation initiatives, such as the National Adaptation Plan Global Support Programme and the Nationally Determined Contributions Partnership;
 - (h) Promote an integrated approach to socioeconomic development, climate and health resilience through the provision of technical advice on technologies, processes and investment opportunities.
- 15.55 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14 and 15.
- 15.56 The above-mentioned work is expected to result in:
- (a) Multidimensional climate action and urban environment planning by Member States and partner cities that reduces greenhouse gas emissions, builds climate resilience of urban systems and communities, preserves, regenerates and restores urban biodiversity and reduces air and water pollution;
 - (b) Mobilization of additional financial resources for adaptation to climate change at the national and subnational levels;

- (c) Member States’ nationally determined contributions and national climate adaptation plans incorporating urban dimensions;
- (d) More climate- and pandemic-resilient cities, human settlements and communities.

Programme performance in 2022

Strengthened commitment towards multilevel and cross-sectoral climate action

15.57 National Governments play a pivotal role in accelerating subnational climate action and in providing an enabling environment for urban and local stakeholders to develop and implement new climate commitments. In March 2022, Member States requested the Executive Director to explore with the presidency of the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change (COP27) the possibility of convening of a housing and urban development ministerial meeting on cities and climate change. The subprogramme, in close collaboration with the United Nations Environment Programme (UNEP), the United Nations Framework Convention on Climate Change and the Intergovernmental Panel on Climate Change, as well as local governments and civil society organizations, supported the presidency of the Conference of the Parties in organizing the first ministerial meeting on urbanization and climate change, held on 17 November 2022. This meeting brought together 48 high-level national government delegations and more than 40 mayors and city leaders, as well as United Nations agencies, local government networks and civil society organizations. The meeting launched the COP27 presidency Sustainable Urban Resilience for the Next Generation (SURGe) initiative, coordinated by UN-Habitat and facilitated by ICLEI – Local Governments for Sustainability.⁸ The aim of the initiative is to enhance and accelerate local and urban climate action through multi-level governance, engagement, and delivery through five integrated tracks, contributing to achieving the Paris Climate Goals and the 2030 Agenda.

15.58 Progress towards the objective is presented in the performance measure below (see figure 15.VII).

Figure 15.VII
Performance measure: national Governments committed to multilevel and cross-sectoral climate action under the Sustainable Urban Resilience for the Next Generation (SURGe) initiative

⁸ ICLEI-Local Governments for Sustainability provides the secretariat for the Local Government and Municipal Authorities Constituency for the United Nations Framework Convention on Climate Change.

Planned results for 2024

Result 1: participatory urban resilience action in sub-Saharan Africa

Programme performance in 2022 and target for 2024

- 15.59 The subprogramme’s work contributed to local authorities’ responses to specific risks and vulnerabilities such as drought, flooding and increased urban-rural migration, with 19 distinct resilience action frameworks developed in sub-Saharan Africa, which exceeded the planned target of 18 frameworks.
- 15.60 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 15.VIII).

Figure 15.VIII
Performance measure: number of distinct resilience action frameworks developed in sub-Saharan Africa (cumulative)

Result 2: increased climate resilience of urban communities in Jordan and Lebanon

Programme performance in 2022 and target for 2024

- 15.61 The subprogramme’s work contributed to 550 people in Jordan, Lebanon and the Syrian Arab Republic benefiting from climate change adaptation actions, which did not meet the planned target of 900 people. The target was not met owing to logistical challenges associated with implementing project activities.
- 15.62 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 15.IX).

Figure 15.IX
Performance measure: number of people in Jordan, Lebanon and the Syrian Arab Republic who have benefited from climate change adaptation actions identified through the master planning process (cumulative)

Result 3: Nature-based solutions to improve livelihoods and resilience of urban poor communities

Proposed programme plan for 2024

- 15.63 A key challenge for climate change adaptation is how to build resilience for the more than 3 billion people highly vulnerable to climate change and over 1 billion dwellers in informal settlements.⁹ The subprogramme has supported 20 cities in the development of nature-based solutions¹⁰ for building climate change resilience, restoring and protecting biodiversity and contributing to sustainable livelihoods and food security. Actions include mangrove forests rehabilitation measures in Morondava, Madagascar; slope stabilization and riverbank rehabilitation in Lilongwe, Malawi, and Honiara, Solomon Islands; and urban flood protection through natural infiltration in Amman, Jordan. The subprogramme also developed a training package on urban ecosystem-based adaptation with a view to extending its services to additional national and local governments.

Lessons learned and planned change

- 15.64 The lesson for the subprogramme was that nature-based solutions can contribute to building resilience of the most vulnerable urban communities and should be incorporated into the Programme's policy and technical support. In applying the lesson, the subprogramme will strengthen collaboration with other subprogrammes to incorporate nature-based solutions into their activities, with a view to supporting local governments including in planning, public space development, urban services and infrastructure, slum upgrading and climate change resilience.
- 15.65 Expected progress towards the objective is presented in the performance measure below (see figure 15.X).

Figure 15.X

Performance measure: number of towns and cities implementing nature-based solutions (cumulative)

⁹ Intergovernmental Panel on Climate Change, *Climate Change 2022: Impacts, Adaptation and Vulnerability, Contribution of Working Group II to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change* (Cambridge University Press, Cambridge, United Kingdom, and New York, United States, 2022).

Deliverables

15.66 Table 15.6 lists all deliverables of the subprogramme.

Table 15.6

Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	15	15	22	28
1. Projects on improving urban air quality, the urban environment, climate change mitigation, and increased access to low-emission basic services, more sustainable infrastructure and buildings	2	2	2	4
2. Projects on policies, legal instruments, plans and strategies for better urban air quality, the urban environment, climate change mitigation and low-emission basic services and sustainable infrastructure and buildings	1	1	1	2
3. Projects on resilience-building and adaptation of communities and infrastructure to climate change, and disaster risk reduction	6	6	10	–
4. Projects on effective adaptation of communities and infrastructure to climate change, informed by participatory processes, assessments of local vulnerabilities and innovative data collection (i.e., remote sensing) and processing	3	3	6	16
5. Projects on policies, legal instruments, plans and strategies for strengthened resilience and effective adaptation of communities and infrastructure to climate change	–	–	–	4
6. Projects on urban environmental management and restoration, biodiversity protection, circular economy and ecosystem services	1	1	1	2
7. Projects on urban resource management and efficiency, including circular economy, efficient use of urban land, service provision and sustainable water and waste management, and promotion of cleaner energy and energy efficiency	2	2	2	2
Seminars, workshops and training events (number of days)	38	38	43	47
8. Seminars, workshops and training events for partners and those in vulnerable situations (e.g., in informal settlements) on climate change mitigation, air quality and low-emission basic services	10	10	10	12
9. Seminars, workshops and training events on effective adaptation of communities and infrastructure to climate change	25	25	25	30
10. Seminars, workshops and training events on sustainable city models and their application, sustainable infrastructure and urban planning	–	–	5	–
11. Training on environment and climate dimensions and Sustainable Development Goal monitoring in urban areas	3	3	3	–
12. Seminars, workshops and training events for national and local government partners and other urban stakeholders on urban environmental management, restoration and renovation, biodiversity protection, circular economy and ecosystem services.	–	–	–	5
Publications (number of publications)	3	3	3	4
13. Publication on climate change mitigation and air quality	1	1	1	2
14. Publication on effective adaptation of communities of slums and other urban communities in vulnerable situations in urban neighbourhoods, and infrastructure, to climate change	1	1	1	1
15. Publication on improved low-emission urban services and resource efficiency (e.g. focusing on technological innovation)	1	1	1	1
Technical materials (number of materials)	5	5	5	8
16. Technical materials on improved resource efficiency and protection of ecological assets, including sectoral materials	1	1	1	2
17. Technical materials on climate change mitigation and air quality	1	1	1	2

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
18. Technical materials on climate action, basic services or environment in human settlements	1	1	1	2
19. Technical materials on national, regional and local guidelines, plans, coordination mechanisms and strategies on climate action, the urban environment, ecosystems and biodiversity, ecological assets and ecosystem services	1	1	1	1
20. Technical materials on improved low-emission urban services, resource efficiency and (electric) mobility solutions and infrastructure (including monitoring)	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to 16 Member States on reducing urban greenhouse gas emissions to achieve climate change mitigation and adaptation, improving air quality and low-emission urban services, improving resource efficiency and protecting ecological assets.

Databases and substantive digital materials: databases on urban climate- or environment-relevant subjects, and simulations, including a database on climate initiatives in Rwanda, risk and vulnerability analysis in the Lao People's Democratic Republic and a solutions toolbox for electromobility.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures, campaign and events on greenhouse gas emissions and air quality, resource efficiency, protection of ecological assets and effective adaptation of communities and infrastructure to climate change.

External and media relations: press articles on climate action and the urban environment.

Digital platforms and multimedia content: websites and content for social media accounts; multimedia content on urban climate- or environment-relevant subjects.

Subprogramme 4 Effective urban crisis prevention and response

Objective

- 15.67 The objective, to which this subprogramme contributes, is to enhance urban crisis prevention and response and advance social integration and inclusive communities as well as improved living standards and the inclusion of migrants, refugees, internally displaced persons and returnees.

Strategy

- 15.68 To contribute to the objective, the subprogramme will:
- (a) Engage in-country comprehensive, participatory and inclusive operational programmes to respond to crises affecting all members of the community, including those in vulnerable situations; and implement fit-for-purpose land administration towards the achievement of tenure security for all in crisis-affected areas, while supporting measures for national urban frameworks that adopt inclusive urban governance and planning approaches;
 - (b) Support implementation by Member States of inclusive, evidence-based, sustainable recovery approaches, such as the urban recovery framework for post-conflict and post-disaster situations to support urban resilience recovery, applying area-based approaches and community inclusive participatory and bottom-up processes, while ensuring age, gender and diversity representation;
 - (c) Build the capacity of national, regional and local actors, through technical assistance and training, to increase social cohesion between communities, reducing discrimination and xenophobia with full respect for human rights in urban crisis situations;
 - (d) Prioritize improved living standards and the inclusion of migrants, refugees, internally displaced persons and returnees by providing urban crisis-response expertise and supporting

- integrated urban development strategies that address the needs of both host communities and the displaced;
- (e) Enhance UN-Habitat normative guidance and operational support in urban and rural displacement contexts on the evidence-based impact of migration and displacement on urbanization;
 - (f) Develop evidence-based local disaster risk reduction and resilience strategies in line with the Sendai Framework for Disaster Risk Reduction 2015–2030, provide support to national and local governments to implement such strategies in target cities and territories, and develop further normative guidance for a broad range of threats, including climate and health emergencies.
- 15.69 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 5, 8, 9, 10, 11, 13 and 16.
- 15.70 The above-mentioned work is expected to result in:
- (a) An increased proportion of the population in crisis-affected communities engaging in local decision-making with regard to reconstruction projects and improved social inclusion, strengthened land tenure and improved access to adequate housing and basic services;
 - (b) An increased number of cities where refugees, migrants, internally displaced persons, returnees and host communities have access to secure tenure, sustainable basic services and social services, adequate housing, safety and security;
 - (c) The reduction of multidimensional risks and increased protection for those in vulnerable situations in cities;
 - (d) Strengthened systems for analysis and decision-making concerning resilient infrastructure at the city level, in particular in crisis settings.

Programme performance in 2022

Improved social integration for enhanced prosperity in Latin America and the Caribbean

- 15.71 In recent years, 5.98 million refugees and migrants from Venezuela¹¹ have been seeking shelter in cities across Latin America and the Caribbean. Despite the strong commitment of national and local governments to assist this population in reducing their vulnerabilities and addressing their immediate needs, challenges persist to supporting their integration. If well managed, integration can turn migration into an engine for prosperity, enhancing the opportunities brought about by diversity, productive population, multiculturalism and innovation. The subprogramme has been promoting social cohesion and integration through inclusive and evidence-based approaches to urban planning. The subprogramme supported the establishment of community centres which provide a space for all in the population, including refugees and migrants, to engage in intercultural dialogue and contribute to urban planning processes. In addition, the subprogramme supported local authorities in identifying challenges to and opportunities for strengthening inclusion, through data instruments such as the urban inclusion marker, a georeferenced index which measures the level of inclusion of a city and its potential for spatial, social, economic and cultural integration of its inhabitants; and provided technical assistance to develop specialized development strategies to enhance integration and boost socioeconomic opportunities for the population as a whole.
- 15.72 Progress towards the objective is presented in the performance measure below (see figure 15. XI).

¹¹ Inter-agency Coordination Platform for Refugees and Migrants from Venezuela (www.r4v.info/en/home), 2022.

Figure 15.XI
Performance measure: number of centres facilitating participatory and cocreation processes towards enhanced integration (cumulative)

Planned results for 2024

Result 1: a new approach to strengthening city resilience

Programme performance in 2022 and target for 2024

- 15.73 The subprogramme’s work contributed to 11 cities implementing the City Resilience Global Programme, which met the planned target.
- 15.74 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 15.XII).

Figure 15.XII
Performance measure: number of cities implementing the City Resilience Global Programme (cumulative)

Result 2: strengthened urban recovery and resilience and improved access to basic services in the Syrian Arab Republic

Programme performance in 2022 and target for 2024

- 15.75 The subprogramme’s work contributed to improved physical access to seven neighbourhoods in four cities in the Syrian Arab Republic and development of 50 neighbourhood action plans for the rehabilitation of water, sanitation and waste management services by municipal authorities and local communities, which exceeded the planned target of improved physical access to four

neighbourhoods in two cities in the Syrian Arab Republic and plans developed for the rehabilitation of water, sanitation and waste management services.

- 15.76 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 15.7).

Table 15.7
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Municipal authorities and local communities supported to develop neighbourhood action plans for nine neighbourhoods in two cities in the Syrian Arab Republic through joint participatory area-based planning	Improved physical access to seven neighbourhoods in four cities in the Syrian Arab Republic and 50 neighbourhood action plans developed by municipal authorities and local communities for the rehabilitation of water, sanitation and waste management services	Nine rehabilitated neighbourhoods and improved access to basic services in two cities in the Syrian Arab Republic	Neighbourhood action plans developed or updated in two cities. Five rehabilitated neighbourhoods and improved access to basic services in two cities in the Syrian Arab Republic

Result 3: enhanced sustainable solutions to migration

Proposed programme plan for 2024

- 15.77 Conflicts, food insecurity, the climate crisis and other emergencies forced more than 100 million people to leave their homes in 2022.¹² With the crises becoming increasingly protracted, migrants remain displaced for longer periods of time, increasing the pressure on cities to facilitate their social and economic inclusion, as well as their access to services, in a durable and sustainable way. The subprogramme has been focusing on designing and implementing programmatic solutions specific to country and regional contexts, promoting a more coherent system-wide response to migrants’ needs, from humanitarian assistance to sustainable development solutions, ensuring peaceful integration with host communities.

Lessons learned and planned change

- 15.78 The lesson for the subprogramme was that its activities could more holistically address urban migration issues, including through preventive measures to address root causes, given that urban migration is often addressed through more humanitarian and siloed interventions. In applying the lesson, the subprogramme will work at both the national and local levels to ensure the sustainability of the interventions, through participatory processes bringing together the migrants, host communities, local governments and other partners, including other United Nations agencies. The interventions will contribute to improved living conditions in cities and sustainable urban development.
- 15.79 Expected progress towards the objective is presented in the performance measure below (see figure 15.XIII).

¹² Office of the United Nations High Commissioner for Refugees (UNHCR) “Global trends report 2021” (2022).

C. Substantive deliverables

Consultation, advice and advocacy: advisory services provided to five Member States on urban crisis mitigation and response and on enhancing urban resilience to multi-hazard threats, including impacts from ongoing conflicts, climate change and crises related to migration and displacement.

Databases and substantive digital materials: urban migration indicators in the UN-Habitat Global Urban Monitoring Framework, used by three entities either at the country or the global level.

D. Communication deliverables

Outreach programmes, special events and information materials: global and regional information materials, brochures, leaflets and online awareness-raising and digital learning materials focusing on social inclusion and the response to migration and displacement.

Digital platforms and multimedia content: content for social media accounts, blogs and websites related to the social and economic inclusion of migrants, refugees, internally displaced persons and returnees in urban crisis contexts.

B. Proposed post and non-post resource requirements for 2024

Overview

15.81 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 15.9 to 15.11.

Table 15.9

Total	75	82	–	–	–	–	82

15.82 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 15.12 to 15.14 and figure 15.XIV.

15.83 As reflected in tables 15.12 (1) and 15.13 (1), the overall net resources proposed for 2024 amount to \$13,465,100 before recosting, reflecting a net increase of \$80,000 compared with the appropriation for 2023. Resource changes result from technical adjustments, new and expanded mandates and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

15.84 As reflected in table 15.12 (1), resource changes amount to a decrease of \$73,800 under Subprogramme 1, Reduced spatial inequality and poverty in communities across the urban-rural continuum with respect to the removal of non-recurrent provisions to produce a report on inclusive social development policies and programmes to address homelessness, prepared in collaboration with the Department of Economic and Social Affairs, pursuant to General Assembly resolution 76/133.

New and expanded mandates

- 15.85 As reflected in table 15.12 (1), resource changes amount to an increase of \$153,800, relating to the annualization of the budgetary provision for the quadrennial report of the Secretary-General on progress in the implementation of the New Urban Agenda in accordance with General Assembly resolution 71/235. This requirement, which was previously provided every fourth year, aligned to the year in which the quadrennial report is published, is being proposed to be in line with the annual activities required to produce the report.
- 15.86 The additional resources of \$153,800 would be used largely to hire general temporary assistants to collect and process spatial data and support synthesis of national reports based on the guidelines for reporting on the implementation of the New Urban Agenda, in preparation for the quadrennial report; consultants to provide technical support for data collection and production of non-traditional data, and contractual services to support actual production and dissemination of related information. The details by subprogramme are as follows:
- (a) **Subprogramme 1, Reduced spatial inequality and poverty in communities across the urban-rural continuum.** The increase of \$46,000 is reflected under other staff costs (\$18,600), experts (\$2,600), consultants (\$9,400), travel of representatives (\$3,500), travel of staff (\$2,700) and contractual services (\$9,200);
 - (b) **Subprogramme 2, Enhanced shared prosperity of cities and regions.** The increase of \$46,000 is reflected under other staff costs (\$18,600), experts (\$2,600), consultants (\$9,400), travel of representatives (\$3,500), travel of staff (\$2,700) and contractual services (\$9,200);
 - (c) **Subprogramme 3, Strengthened climate action and improved urban environment.** The increase of \$30,900 is reflected under other staff costs (\$12,100), experts (\$1,800), consultants (\$6,300), travel of representatives (\$2,100), travel of staff (\$2,600) and contractual services (\$6,000);
 - (d) **Subprogramme 4, Effective urban crisis prevention and response.** The increase of \$30,900 is reflected under other staff costs (\$12,100), experts (\$1,800), consultants (\$6,300), travel of representatives (\$2,100), travel of staff (\$2,600) and contractual services (\$6,000).

Other changes

- 15.87 As reflected in table 15.12 (1), the proposed cost-neutral changes relate mainly to adjustments to the estimated travel plan.

Extrabudgetary resources

- 15.88 As reflected in tables 15.12 (2) and 15.13 (2), extrabudgetary resources amount to \$162,681,100. UN-Habitat expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources.
- 15.89 These resources will be used mainly to carry out technical cooperation projects at the request of Member States. Examples of such projects include, under subprogramme 1, technical cooperation for inclusive urban development that benefits all, supporting inclusive urban regeneration in at least five cities and on-the-job capacity development, training and enhanced evidence-based decision-making for local government officials to better manage urban development and transformations. Under subprogramme 2, technical cooperation projects will facilitate the localization of the Sustainable Development Goals through the Sustainable Development Goals Cities programme in at least two countries to localize the United Nations Sustainable Development Cooperation Framework. Under subprogramme 3, extrabudgetary resources will be used to implement technical cooperation projects with requesting Member States to combat climate change at the national and local levels. Lastly, under subprogramme 4, extrabudgetary resources will be used to carry out technical cooperation projects to deploy durable solutions to urban displacement in at least three countries. These efforts are in response to the Secretary-General's Action Agenda on Internal Displacement and include strategic partnerships with UNHCR and IOM. The demand for technical cooperation projects is estimated to continue to increase, as exemplified by the increase in demand for programmes related to strengthened climate action and improved urban environments, as well as urban crisis prevention and response.

Section 15 Human settlements

15.90 The extrabudgetary resources are subject to the oversight of the Executive Board, which has delegated authority from the UN-Habitat Assembly.

Policymaking organs

15.91 The resources proposed under this component will be used mainly to provide support to the policymaking organs of UN-Habitat. These resources will complement the regular budget resources and enhance the capacity of the Governing Bodies Secretariat to support the governance structure of UN-Habitat.

15.92 Table 15.15 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

**Table 15.15
Policymaking organs**

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional info</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
UN-Habitat Assembly	Provides policy guidance on human settlements and sustainable urbanization and strategic oversight of UN-Habitat. It approves the UN-Habitat four-year strategic plan. It reports every four years on its work to the General Assembly through the Economic and Social Council at its substantive session. It meets every four years for five days. Its first session was held in May 2019. Its most recent session took place in June 2023.	Mandate: General Assembly resolution 73/239 and note by the Secretary-General (A/73/726) UN-Habitat Assembly rules of procedure Membership: 193 government officials Number of sessions in 2024: 0	–	–
Committee of Permanent Representatives	Permanent intersessional subsidiary body of the UN-Habitat Assembly. It is responsible for a high-level midterm review of the implementation of UN-Habitat Assembly decisions and resolutions and of the UN-Habitat strategic plan, and for preparing for the next session of the UN-Habitat Assembly. It meets twice every four years: once prior to the UN-Habitat Assembly session, in preparation for that session, and a second time for a high-level midterm review. The second open-ended meeting of the Committee in preparation for the second session of the UN-Habitat Assembly was held in May and June 2023.	Mandate: General Assembly resolutions 73/239 and 56/206 and note by the Secretary-General (A/73/726) UN-Habitat Assembly rules of procedure Membership: 193 government officials Number of sessions in 2024: 0	–	–
Executive Board	Permanent intersessional subsidiary body of the UN-Habitat Assembly. It is responsible for strengthening the oversight of UN-Habitat operations and enhancing the accountability, transparency, efficiency and effectiveness of UN-Habitat. It oversees the preparation of the draft strategic plan before its approval by the UN-Habitat Assembly and is responsible for the review and approval of the annual programme of work and budget and the resource mobilization strategy, in accordance with the strategic plan and guidance provided by the UN-Habitat Assembly. The Executive Board meets two to three times a year as provided in the rules of procedure. The sessions of the Executive Board in 2024 are scheduled to be held in late March–early April, and late October–early November.	Mandate: General Assembly resolution 73/239 and note by the Secretary-General (A/73/726) UN-Habitat Assembly resolution 1/1, adopted by the Assembly at its first session in May 2019 UN-Habitat Assembly rules of procedure Rules of procedure of the Executive Board Membership: 36 Number of sessions in 2024: 2	718.4	718.4
Total			718.4	718.4

Part IV International cooperation for development

15.93 The proposed regular budget resources for 2024 amount to \$718,400 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 15.16 and figure 15.XV.

Table 15.16

Figure 15.XV
Policymaking organs: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

15.94 Extrabudgetary resources for policymaking organs are estimated at \$273,100 and would be used mainly to support the policymaking organs of UN-Habitat. These resources would complement the regular budget resources and provide support for the new governance structure of UN-Habitat, including the co-financing of sessions of the Executive Board.

15.95 The estimated decrease of \$34,300 is attributable to decreasing volume of voluntary contributions by Member States pledged in support of the participation of the least developed countries in activities of the policymaking organs.

Executive direction and management

- 15.96 The executive direction and management component comprises the Office of the Executive Director, the Office of the Deputy Executive Director, the Office of the Chief of Staff, liaison offices in New York, Brussels, Bangkok and Geneva, the Governing Bodies Secretariat, the Legal Unit and the Independent Evaluation Unit. The Executive Director is also supported by the Office of the Special Adviser, which undertakes special assignments.
- 15.97 The overall responsibilities of the executive direction and management component include the following functions:
- (a) To provide overall direction, translating the vision of the Executive Director and the guidance from the Executive Board into the Programme's work priorities;
 - (b) To foster relationships with Member States and keep abreast of the needs of the Executive Board, the Committee of Permanent Representatives, the UN-Habitat Assembly and stakeholders affiliated with the Economic and Social Council;
 - (c) To coordinate the planning and ensure the implementation of the UN-Habitat strategic plan by ensuring the overall effectiveness of the Programme's organizational structure. It provides direction and alignment through the Executive Committee, which is chaired by the Executive Director, whom it assists in providing policy direction in order to ensure the effectiveness of the Programme;
 - (d) To contribute, in close cooperation with other United Nations agencies, to discussions on, and the implementation of, United Nations reforms, in particular in relation to improving system-wide coherence in United Nations development work, with a special focus on sustainable urbanization;
 - (e) To foster the mainstreaming of gender and disability inclusion into the four subprogrammes of UN-Habitat.
- 15.98 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, organizations are encouraged to integrate sustainability information into their reporting cycles, and, in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), UN-Habitat continues to incrementally improve the environmental management performance of its operations and facilities management in a number of ways. In 2022, in partnership with the Secretariat and in accordance with the United Nations Framework Convention on Climate Change, UN-Habitat offset all its greenhouse gas emissions. Regarding the "Greening the Blue Report 2022", and according to the "Greening the Blue Report 2021", UN-Habitat expanded for the first time the facilities-related assessment beyond Nairobi to now 70 offices. This assessment will serve as the institutional baseline going forward for more systematic operational improvements for emission and environmental footprint reduction. Furthermore, UN-Habitat continues to participate in the zero-plastic and recycling programme at the United Nations Office at Nairobi. UN-Habitat also partakes in a comprehensive waste management and recycling scheme whereby waste is sorted at source in offices. In addition, the main UN-Habitat office building in Nairobi is powered partially by a solar photovoltaic electricity system. Lastly, UN-Habitat complies with the principles of paperless intergovernmental meetings, whereby all Executive Board and UN-Habitat Assembly meetings are paper-free and conference materials are shared by USB drive, electronically or, increasingly, through event-specific applications. In addition to its efforts in relation to operational matters, and in alignment with the expanded scope of the Strategy for Sustainability Management in the United Nations System, 2020-2030, UN-Habitat has rolled out a significantly enhanced Environmental and Social Safeguards System in order to minimize and mitigate the environmental and social impact of its programmes and projects.
- 15.99 Information on the timely submission of documentation and advance booking for air travel is reflected in table 15.17. In 2022, UN-Habitat continued its internal procedure whereby any travel request not in compliance with the United Nations advance booking policy has to be cleared by the

Part IV International cooperation for development

Office of the Executive Director. However, the percentage of air tickets purchased at least two weeks before the commencement of travel dropped slightly from 36 per cent in 2021 to 34 per cent in 2022. In the post-pandemic turn towards normalcy in 2022 when countries were gradually lifting travel restrictions and safety measures, dates and formats of events and meetings would change constantly, and, in many cases, travel could not be confirmed sufficiently in advance. In 2023, UN-Habitat began applying stricter measures to ensure proper planning. Furthermore, more regular monitoring was implemented in addition to the quarterly review mechanism that was put in place in 2021.

Table 15.17
Compliance rate

(Percentage)

15.100 The proposed regular budget resources for 2024 amount to \$1,840,200 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 15.18 and figure 15.XVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

15.101 Extrabudgetary resources for executive direction and management are estimated at \$4,505,600 and would be used to assist in the overall executive direction and management of UN-Habitat, including the planning, coordination, management, and assessment of the programme of work and strategic plan of the Programme.

15.102 The estimated decrease of \$493,500 is attributable mainly to continuing alignment of extrabudgetary estimates with the levels of pledged voluntary contributions received to support this component.

Programme of work

Subprogramme 1

Reduced spatial inequality and poverty in communities across the urban-rural continuum

15.103 The proposed regular budget resources for 2024 amount to \$2,222,400 and reflect a net decrease of \$16,900 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 15.84 to 15.87. Additional details on the distribution of the proposed resources for 2024 are reflected in table 15.19 and figure 15.XVII.

Figure 15.XVII

Subprogramme 1: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 15.104 Extrabudgetary resources for the subprogramme are estimated at \$39,764,100 and would be used mainly for technical cooperation projects with requesting Member States in the areas of urban development, digital transformation strategies, inclusive urban regeneration and on-the-job capacity development, training and enhanced evidence-based decision-making for local government officials to better manage inclusive urban development at the national, city-wide and community levels. Technical cooperation projects will focus on access to adequate housing and promote transformative shifts towards more inclusive, resilient, sustainable and healthy neighbourhoods and cities in the context of global crises converging in cities and a continuous rapid urbanization process in developing countries. Under the subprogramme, extrabudgetary resources would also be used to promote and stimulate the engagement of the private sector in people-centred public-private partnerships that take into consideration the economic, social and environmental dimensions of sustainable urban development.
- 15.105 The expected increase of \$4,451,900 is attributable mainly to the anticipated growth in demand for technical cooperation support related to the focus area of access to adequate housing and the promotion of transformative shifts towards more inclusive, resilient, sustainable and healthy neighbourhoods and cities in the context of global crises converging in cities and a continuous rapid urbanization process in developing countries.

Subprogramme 2 Enhanced shared prosperity of cities and regions

15.106 The proposed regular budget resources for 2024 amount to \$2,485,400 and reflect a net increase of \$42,900 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 15.86 and 15.87. Additional details on the distribution of the proposed resources for 2024 are reflected in table 15.20 and figure 15.XVIII.

Figure 15.XVIII
Subprogramme 2: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

15.107 Extrabudgetary resources for the subprogramme are estimated at \$41,168,700 and would be used mainly to implement technical cooperation projects with requesting countries to develop innovative solutions to address key urban challenges, to help localize the Sustainable Development Goals and to prepare people-centred, “smart city” strategies aimed at reducing the digital divide and improving

Part IV International cooperation for development

the quality of life of urban dwellers. Under the subprogramme, UN-Habitat will continue to support cities in their efforts to strengthen own-source revenue generation and to support regions in their efforts to strengthen urban-rural linkages in order to enhance local economic recovery and increase basic infrastructure provision.

- 15.108 The expected increase of \$3,365,900 is attributable mainly to the anticipated growth in demand for technical support to countries and regions in developing innovative solutions to address key urban challenges, to help localize the Sustainable Development Goals and to prepare people-centred “smart city” strategies aimed at reducing the digital divide, as well as improving the quality of life of urban dwellers.

**Subprogramme 3
Strengthened climate action and improved urban environment**

- 15.109 The proposed regular budget resources for 2024 amount to \$2,412,200 and reflect a net increase of \$31,400 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 15.86 and 15.87. Additional details on the distribution of the proposed resources for 2024 are reflected in table 15.21 and figure 15.XIX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 15.110 Extrabudgetary resources for the subprogramme are estimated at \$33,942,300 and would be used mainly to carry out technical cooperation projects with requesting Member States to combat climate change at the national, city-wide and community levels. Under the subprogramme, policy support will be provided to Member States to analyse and improve urban and climate change-related policies to enhance local climate action. Under the subprogramme, support will be expanded for low-emission development strategies at the city and building scale which facilitate job creation and the transition to sustainable energy solutions. The subprogramme will further support urban climate change adaptation and resilience, with an emphasis on the urban poor and resilient infrastructure development planning and implementation. Furthermore, under the subprogramme, UN-Habitat intends to use extrabudgetary resources to advance urban climate change innovation and its deployment in cities. The subprogramme will further develop urban climate finance tools suitable for cities in the least developed countries and small island developing States.
- 15.111 The expected increase of \$1,649,500 is attributable mainly to the planned expanded support for low-emission development strategies at the city and building scale which facilitate job creation and the transition to sustainable energy solutions.

**Subprogramme 4
 Effective urban crisis prevention and response**

- 15.112 The proposed regular budget resources for 2024 amount to \$2,444,700 and reflect a net increase of \$22,600 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 15.86 and 15.87. Additional details on the distribution of the proposed resources for 2024 are reflected in table 15.22 and figure 15.XX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

15.113 Extrabudgetary resources for the subprogramme are estimated at \$38,035,500 and would be used mainly to implement technical cooperation projects with requesting Member States aimed at ensuring sustainable solutions for internally displaced persons through secure tenure, the integration of migration and displacement into urban development strategies, the provision of basic services and the improvement of living conditions, with a focus on vocational training and job creation. Under the subprogramme, UN-Habitat intends to roll out programmes and tools aimed at supporting cities in their efforts to gather and analyse resilience data, understand risks and create realistic action plans that will improve the lives of urban populations affected by both natural and human-made crises.

15.114 The expected increase of \$4,131,200 is attributable mainly to the planned technical cooperation support to requesting Member States aimed at ensuring sustainable solutions for internally displaced persons through secure tenure, integration into urban development strategies, provision of basic services and improvement of living conditions, with a focus on vocational training and job creation.

Programme support

15.115 The proposed regular budget resources for 2024 amount to \$1,341,800 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 15.23 and figure 15.XXI.

Extrabudgetary resources

15.116 Extrabudgetary resources for the subprogramme are estimated at \$4,991,800 and would be used to support the Programme in the areas of human resources, finance and general administration.

15.117 The expected increase of \$772,700 is attributable mainly to the strengthened support to the Programme in the areas of human resources, finance and general administration.

Cooperation with the resident coordinator system

The Advisory Committee encourages UN-Habitat to continue to cooperate closely with the resident coordinator system and to explore opportunities for increased cooperation with other entities, in order to leverage shared expertise and capacity to consolidate system-wide efforts to implement programmatic activities in support of Member States. The Committee also trusts that such a collaborative approach will facilitate the sharing of lessons learned and best practices across the United Nations system, and that such information will be included in the next budget submission.

Standard operating procedures have been developed to facilitate collaboration across the entity in support of UN-Habitat engagement in common country analyses and United Nations Sustainable Development Cooperation Framework processes. In addition, an agreement was reached with the Development Coordination Office in New York, which oversees the resident coordinator system, to follow closely the integration of urbanization-related matters focusing on 29 countries and territories and 2 multi-country offices. A webinar was organized with resident coordinators on how sustainable urbanization can help achieve other global agendas at the local level. Resident coordinators participated in a special session at the World Urban Forum in 2022 on the same subject. Some 29 countries/territories and two multi-country offices will engage. These selected countries were identified through consultation between UN-Habitat and the Development Coordination Office as they are offering high potential for urban programming.

Foreword

The United Nations Office on Drugs and Crime (UNODC) is committed to achieving peace, security, human rights and sustainable development for all by assisting Member States in addressing the evolving challenges posed by drugs, crime, terrorism and corruption.

Guided by its strategy for the period 2021–2025 and working through its network of field offices and headquarters in Vienna, UNODC provides normative, research and technical support to Member States through comprehensive and innovative approaches, with particular attention to gender equality, non-discrimination, respect for human rights and the empowerment of women and youth. In 2022, the Office sharpened its focus on multifaceted threats hindering the achievement of the Sustainable Development Goals by 2030, including crimes that affect the environment and their interlinkages with the triple crisis of biodiversity loss, climate change and pollution. To address the use of information and communications technologies for criminal purposes, the Office has continued its secretariat services to the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes, for the development of the convention, expected to be finalized in 2024.

The Office's proposed programme budget for 2024, supported by nine subprogrammes and aligned with the 2030 Agenda for Sustainable Development, is aimed at accelerating the effectiveness and efficiency of responses to the challenges posed by drugs, crime, corruption and terrorism. It reflects the commitment of UNODC to strengthening multilateral solutions through strategic partnerships and enhanced cooperation.

In 2024, UNODC will continue to support Member States in addressing issues within its mandates, to maximize impact and better serve the people at greatest risk of being left behind.

(Signed) Ghada Fathi **Waly**
Executive Director, United Nations Office on Drugs and Crime

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 16.1 The United Nations Office on Drugs and Crime (UNODC) is responsible for supporting Member States in making the world safer from drugs, crime, corruption and terrorism, with a view to promoting security and justice for all. The mandate derives from the priorities established in relevant United Nations conventions and General Assembly resolutions, including Assembly resolutions [45/179](#), [46/152](#) and [46/185 C](#). The work of the Office is grounded in a series of international instruments for which the Office acts as guardian and advocate. They include the three international drug control conventions, the United Nations Convention against Corruption, the United Nations Convention against Transnational Organized Crime and the Protocols thereto, the 19 international conventions and protocols against terrorism and the United Nations standards and norms in crime prevention and criminal justice. The thematic focus areas of the Office include addressing and countering the world drug problem, preventing and countering crime, preventing and countering corruption and economic crime, preventing and countering terrorism, and crime prevention and criminal justice reform. UNODC support to Member States is undertaken by facilitating multilateral cooperation and partnerships, by expanding the evidence base and by developing the capacity of Governments to formulate and implement coherent policies to address these issues.

Strategy and external factors for 2024

- 16.2 As a United Nations entity whose mandate contributes to the three pillars of the United Nations, namely peace and security, development and human rights, the Office supports Member States in promoting justice and the rule of law and assists them in their fight against crime in all its dimensions, preventing and combating transnational organized crime, corruption and international terrorism and countering the world drug problem.
- 16.3 UNODC does so through three broad, interconnected and mutually supportive work streams:
- (a) Normative work, including policy, advocacy and legislative assistance to promote the ratification and implementation of the relevant international treaties and the provision of secretariat and substantive services to the treaty-based, governing and other Member State-driven bodies that help to identify priorities, challenges, responses and commitments in relevant mandate areas relating to drugs, crime, corruption and terrorism;
 - (b) Research and policy support work to expand the evidence base and inform policymaking processes at the national, regional and global levels, through increased knowledge and understanding of drug and crime issues;
 - (c) Technical cooperation to enhance the capacity of Member States and other stakeholders to prevent and counter illicit drugs, crime, corruption and terrorism at the local, national, regional and global levels through the Office's specialized assistance, expertise and extensive field presence.
- 16.4 In line with the 2030 Agenda for Sustainable Development, the Office will address the relationship between sustainable development and the fight against drugs, crime, corruption and terrorism. The Ministerial Declaration on Strengthening Our Actions at the National, Regional and International Levels to Accelerate the Implementation of Our Joint Commitments to Address and Counter the World Drug Problem, adopted in 2019, the outcome document of the special session of the General Assembly on the world drug problem, held in 2016, the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem of 2009, the Joint Ministerial Statement of the 2014 high-level review by the Commission

on Narcotic Drugs of the implementation by Member States of the Political Declaration and Plan of Action, the political declaration adopted at the special session of the General Assembly against corruption, held in 2021, and the Kyoto Declaration on Advancing Crime Prevention, Criminal Justice and the Rule of Law: Towards the Achievement of the 2030 Agenda for Sustainable Development, adopted in 2021, highlight the importance of the Office's mandate areas. In addition, the Commission on Crime Prevention and Criminal Justice and the Commission on Narcotic Drugs provide a platform for dialogue and sharing expertise and experiences in the areas of crime prevention and criminal justice and of drug control.

- 16.5 In 2024, the work of the Office will continue to be guided by the UNODC Strategy 2021–2025, which positions UNODC as facilitator and impartial knowledge broker to help Member States to identify comprehensive and innovative solutions to respond to drug and crime challenges, while addressing interlinkages, strengthening good governance and building inclusive, equitable and resilient societies. The Office will do so through an integrated and people-centred approach that is particularly sensitive to the needs of the most vulnerable and is founded on the principle of leaving no one behind. UNODC will continue to make use of its strong field presence and thematic expertise to deepen cross-sectoral partnerships, promote cross-border cooperation and ensure systematic coordination across its mandates. The implementation of targeted interventions sensitive to distinct challenges will continue to be guided by specific thematic and geographic strategies and programmes. Moreover, the strengthening of UNODC capacity in key cross-cutting areas, including promoting human rights, mainstreaming a gender perspective and empowering youth in all its work, will contribute to addressing the integration of UNODC mandates and the 2030 Agenda.
- 16.6 The Office will continue to enhance its capacity and impact through a revisited fundraising strategy, a reinvigorated communication action plan and effective planning based on results-based management, risk management and recommendations of independent evaluations. Evaluation and oversight results will enable improved decision-making in the Office's mandated areas of work as well as cross-cutting functions. Research and analysis will play a fundamental role in ensuring that UNODC programmes and technical advice are evidence-based. The Office will foster innovation and improve relevance, reliability, accessibility and usability of data and analysis, including by strengthening capacities of Member States and by combining data from traditional data sources with big and smart data, using innovative solutions.
- 16.7 In 2024, UNODC will continue to strengthen Member States' capacity in preventing and combating crimes that affect the environment, in line with the increased commitment of the international community, as reaffirmed in the 2021 Kyoto Declaration on Advancing Crime Prevention, Criminal Justice and the Rule of Law. A focus will be placed on, inter alia, combating trafficking of waste as a criminal activity with severe implications for the environment, the economy and human health, including through technical assistance, upon request, for law enforcement and customs officers to better detect and report waste trafficking cases, the publication of legislative guides on combating waste trafficking, and follow-up initiatives aimed at increasing knowledge and awareness on the links between crimes that affect the environment and climate.
- 16.8 Furthermore, acknowledging the increasing impact of criminal activities related to the use of information and communications technologies (ICT), to which individuals and institutions alike are highly vulnerable, the Office will continue to provide secretariat services to the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes throughout the two-year process, expected to conclude in the first quarter of 2024 with the finalization and approval of the draft convention by the Ad Hoc Committee for consideration by the General Assembly at its seventy-eighth session.
- 16.9 With regard to cooperation with other entities, UNODC will continue to work closely with a large number of international and regional organizations, including the International Criminal Police Organization, the World Customs Organization, the African Union, the Association of Southeast Asian Nations, the Economic Community of West African States, the Organization of American States, the Organization for Security and Cooperation in Europe, the Shanghai Cooperation Organization and the Southern African Development Community, to enhance common approaches.

UNODC will strengthen cooperation with parliamentary groups, including the Inter-Parliamentary Union, and promote systematic South-South cooperation, enabling information exchange and expertise between countries that share similar challenges. In addition, the Office will facilitate multi-stakeholder engagement to see the systematic mainstreaming of partnerships with civil society across all UNODC workstreams. Within these partnerships, particularly with academia, UNODC will promote an evidence-based analysis and understanding of the nature of the challenges faced by Member States and design coherent programmes and policies to make progress towards the implementation of the 2030 Agenda. Finally, system-wide and joint evaluations across entities will offer aggregate results at the system-wide policy level.

- 16.10 With regard to inter-agency coordination and liaison, UNODC will continue to coordinate and participate in all relevant groups linked to its mandate areas, including the Global Focal Point for the Rule of Law, the Inter-Agency Coordination Group against Trafficking in Persons, the United Nations Network on Migration, the United Nations Global Counter-Terrorism Coordination Compact and the Global Task Force on Corruption. It will continue to jointly implement projects on women's empowerment (United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women)); drug prevention, treatment and rehabilitation (World Health Organization (WHO)); corruption (United Nations Development Programme); terrorism prevention (Office of Counter-Terrorism of the Secretariat); access to justice for children (United Nations Children's Fund); and measuring illicit financial flows (United Nations Conference on Trade and Development). The Office remains an active co-sponsor of the Joint United Nations Programme on HIV/AIDS (UNAIDS).
- 16.11 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Member States recognize, in their strategies, policies, programmes and budgets, that challenges related to security, justice, governance and the rule of law must be addressed as part of an integrated, nationally owned effort to implement the 2030 Agenda;
 - (b) The United Nations system, international financial institutions and other multilateral organizations highlight the importance of addressing issues under the UNODC mandate, to implement the 2030 Agenda and other multilateral commitments in a holistic manner;
 - (c) Member States share real-time statistical and operational data with the UNODC Research and Trend Analysis Branch and with their counterparts across borders;
 - (d) Extrabudgetary resources, including more funding for core functions, continue to be available.
- 16.12 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. It will do so through the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and the Empowerment of Women (2022–2026), which will continue to provide a framework to guide the Office's support to Member States for the achievement of the 2030 Agenda, with a particular emphasis on Sustainable Development Goal 5. The Office will work with Member States to integrate a gender perspective throughout UNODC mandate areas, as well as supporting women's inclusion at the decision-making levels in all its programmatic work and promoting the collection of sex-disaggregated data. A dedicated Gender Team is located in the Office of the Executive Director to coordinate the implementation of the Strategy and is supported by an organization-wide network of gender strategy focal points across headquarters and field offices.
- 16.13 In line with commitments in the UNODC Strategy 2021–2025, in 2022 the Office launched the Youth Empowerment Accelerator (YEA!) Framework. Expanding upon key principles in the United Nations Youth Strategy, the YEA! Framework will act as an umbrella for ongoing youth initiatives, mainstream meaningful youth engagement activities and promote existing and new youth-led actions across the Office.
- 16.14 In line with the United Nations Disability Inclusion Strategy, UNODC will continue to promote the inclusion of persons with disabilities throughout its work. Through the implementation of the second iteration of the disability inclusion action plan (2023–2024), the incorporation of disability inclusion into United Nations Office at Vienna/UNODC policies, planning, programmes and operations will

be improved while integrating learnings from 2021 and 2022. In 2024, an intensive webinar will be offered to all UNODC staff working on programming, which aims to share best practices and explore ways to better integrate disability inclusion in the project cycle. The United Nations Office on Drugs and Crime will also strengthen the twin-track approach on disability inclusion in technical assistance provided to Member States, including by consulting organizations of persons with disabilities to develop mainstreaming strategies and provide more targeted support to address their specific needs. Moreover, the Office plans to continue to implement all disability-inclusive evaluation guidance to ensure that disability inclusion is mainstreamed into all UNODC evaluations.

Impact of the pandemic and lessons learned

- 16.15 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular on the Office's capacity-building activities, of which implementation, under subprogramme 5, had to be postponed owing to pandemic-related restrictions.
- 16.16 In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, the Office provided technical assistance and capacity-building, under subprogramme 1, to support requesting Member States in mitigating the risks associated with the misuse of ICT, and under subprogramme 4, to respond to emerging terrorism threats associated with exacerbated inequalities.
- 16.17 UNODC continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including by offering events in a hybrid format, at Member States' request, to ensure broader participation of a wide range of stakeholders. For example, the Office continued to organize meetings with both in-person and online components on matters related to drugs and crime, including within the framework of the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice and their subsidiary bodies.

Legislative mandates

- 16.18 The list below provides all mandates entrusted to the programme.

Conventions and protocols

- Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol
- Convention on Psychotropic Substances of 1971
- United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988
- United Nations Convention against Transnational Organized Crime and the Protocols thereto
- Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the United Nations Convention against Transnational Organized Crime
- Protocol against the Smuggling of Migrants by Land, Sea and Air, supplementing the United Nations Convention against Transnational Organized Crime
- Protocol against the Illicit Manufacturing of and Trafficking in Firearms, Their Parts and Components and Ammunition, supplementing the United Nations Convention against Transnational Organized Crime
- United Nations Convention against Corruption

General Assembly resolutions

S-20/2	Political Declaration	71/256	New Urban Agenda
S-20/4	Measures to enhance international cooperation to counter the world drug problem	72/197	Promoting the implementation of the United Nations Guiding Principles on Alternative Development and related commitments on alternative development and regional, interregional and international cooperation on development-oriented, balanced drug control policy addressing socioeconomic issues
S-32/1	Our common commitment to effectively addressing challenges and implementing measures to prevent and combat corruption and strengthen international cooperation		
34/180	Convention on the Elimination of All Forms of Discrimination against Women	73/142	Inclusive development for and with persons with disabilities

C. Substantive deliverables

Consultation, advice and advocacy: advisory services for multilateral efforts in the fields of drug control, crime prevention, anti-corruption and terrorism prevention and cooperation with Member States, intergovernmental organizations and civil society, as applicable, including at the regional level; advocacy of drug control, crime prevention, anti-corruption and terrorism prevention issues with Member States and civil society.

Databases and substantive digital materials: UNODC web-based evaluation application (Unite Evaluations).

D. Communication deliverables

Outreach programmes, special events and information materials: evaluation briefs (approximately 4); evaluation capacity webinars; speaking engagements with internal and external stakeholders, conferences, information dissemination and public awareness activities and representation of the Secretary-General at international events and forums, as appropriate, for advocacy purposes.

Digital platforms and multimedia content: UNODC website and social media accounts with updated content.

Evaluation activities

16.20 The following independent evaluations completed in 2022 have guided the proposed programme plan for 2024:

- (a) Office of Internal Oversight Services evaluations: a biennial study of evaluation functions in the United Nations Secretariat for 2020–2021 and a thematic evaluation of Secretariat support to Member States on the Sustainable Development Goals;
- (b) Evaluations conducted by the UNODC Independent Evaluation Section, including the first strategic evaluation on the work of the United Nations Office at Vienna/UNODC to promote gender equality and the empowerment of women; two in-depth evaluations, on the work of UNODC on drug dependence and treatment, and the response to drugs and related organized crime in Nigeria; 11 project evaluations, on synthetic drugs in Latin America and the Caribbean, urban safety governance, counter-terrorism in Sri Lanka, criminal procedure reform in Panama, criminal justice and prison reforms in Malawi, criminal justice and integrity in Ethiopia, and five evaluations in Mexico on the national security strategy, the standards of the penitentiary system, the smuggling of migrants, trafficking in persons and data collection on eradication activities relating to illicit crops; and a meta-analysis of UNODC evaluations in the period 2019–2021.

16.21 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, in 2024, in recognition of Commission on Narcotic Drugs resolution 64/7 and Commission on Crime Prevention and Criminal Justice resolution 30/3, in which the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC was requested to invite the Independent Evaluation Section to continue providing information on conducted strategic evaluations and on the integration of the results of those evaluations at all stages of programme planning, development and implementation, UNODC will strengthen the capacity within the Section and invest in the design of normative tools and stronger communication instruments. This will also ensure the operationalization of the administrative instruction on evaluation in the United Nations Secretariat ([ST/AI/2021/3](#)), which demands evaluation at the subprogramme level, and will further ensure that evaluation and evaluation results are considered in all decision-making forums and high-level UNODC efforts. Such action would also ensure that findings from strategic and subprogramme evaluations are more widely disseminated and leveraged to strengthen a culture of accountability and change, as demanded by the UNODC Strategy 2021–2025 and the UNODC evaluation policy of 2022.

- 16.22 The following evaluations are planned for 2024 (themes will be determined in consultation with Member States, UNODC senior management and project and programme staff to ensure utilization-focused evaluations):
- (a) Strategic and subprogramme evaluations;
 - (b) Evaluations at the programmatic, country, regional and project levels.

Programme of work

Subprogramme 1 Countering transnational organized crime

Objective

- 16.23 The objective, to which this subprogramme contributes, is to prevent and combat transnational organized crime and illicit trafficking.

Strategy

- 16.24 To contribute to the objective, the subprogramme will:
- (a) Promote adherence to and implementation of the international drug control conventions and the United Nations Convention against Transnational Organized Crime and the Protocols thereto, including by developing tools and providing targeted assistance to policymakers, legislators and criminal justice practitioners, as well as collecting and disseminating knowledge on organized crime;
 - (b) Support the Conference of the Parties to the United Nations Convention against Transnational Organized Crime, including the Mechanism for the Review of the Implementation of the Convention and the Protocols thereto, by assisting States parties to participate successfully in the review process, both as countries under review and reviewers;
 - (c) Work, both normatively and operationally, in preventing and countering transnational organized crime and illicit trafficking, including emerging and evolving forms, such as the use of ICT for criminal purposes, trafficking in cultural property, wildlife crime and crimes that affect the environment, and address money-laundering in relation to such crimes;
 - (d) Serve as the secretariat for the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes and support Member States in preparation for its sessions;
 - (e) Provide tailored technical assistance to Member States, building the capacities of central authorities and other criminal justice actors in international cooperation in criminal matters and acting as a facilitator of mutual legal assistance requests through its support to international judicial cooperation networks and to individual Member States, particularly in trafficking cases;
 - (f) Provide support to Member States to interdict contraband and develop post-seizure criminal justice cooperation along drug trafficking routes aimed at disrupting the organized crime groups behind them, involving, as appropriate, relevant international organizations, civil society, the private sector and other actors, and actively promote the use of special investigative techniques against drug trafficking and in related organized crime investigations, including through tailored capacity-building activities.

16.25 The above-mentioned work is expected to result in:

- (a) Active and effective participation of States parties to the United Nations Convention against Transnational Organized Crime in the Mechanism for the Review of the Implementation of the Convention and the Protocols thereto and strengthened legislative and strategic frameworks to prevent and counter organized crime;
- (b) Increased international cooperation and strengthened institutional and legislative capacity of Member States to detect, prevent, investigate and prosecute transnational organized crime and new and emerging crimes;
- (c) Reduced trafficking in persons and smuggling of migrants, and trafficking in drugs, firearms and other contraband, through the dismantling of greater numbers of organized criminal groups.

Programme performance in 2022

Increased awareness of children and youth in Central America on the safe use of the Internet

16.26 Preventing and combating the use of ICT for criminal purposes is essential, especially to ensure the protection of vulnerable groups such as children and youth. Increasing Internet connectivity rates linked to restrictions related to the COVID-19 pandemic were associated with a growing number of children and youth being exposed to crimes facilitated by the misuse of ICT. The subprogramme worked with ministries of education in El Salvador, Guatemala and Honduras in developing large-scale campaigns on the prevention of the use of ICT for criminal purposes, including by supporting strategy development and creating tailored content. Under the “Gira Vive” campaign, the subprogramme organized a number of awareness-raising events on the use of ICT for criminal purposes, including drug trafficking, trafficking in persons, smuggling of migrants and online child sexual abuse and exploitation. In 2022, the subprogramme expanded the campaign’s outreach by increasingly engaging the private sector in social responsibility initiatives linked to the prevention of ICT-related crimes, attracting a growing audience.

16.27 Progress towards the objective is presented in the performance measure below (see figure 16.I).

Figure 16.I

Performance measure: number of children and youth with increased awareness on safe use of the Internet through outreach events (annual)

Planned results for 2024

Result 1: harmonized legislative and institutional frameworks and enhanced international cooperation and evidence-based approaches in line with the Firearms Protocol

Programme performance in 2022 and target for 2024

- 16.28 The subprogramme's work contributed to enhanced direct cross-border cooperation and information exchange among around 1,937 practitioners to prevent and counter firearms trafficking and one additional Member State (Jamaica) adopting legislative and institutional frameworks in line with the Firearms Protocol and relevant instruments, for a total of 14 Member States, which did not meet the planned target of 20 Member States. The target was not met as national legislative processes in six countries are still ongoing.
- 16.29 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.II).

Figure 16.II

Performance measure: number of Member States that have adopted legislative and institutional frameworks in line with the Firearms Protocol and relevant instruments (cumulative)

Result 2: strengthened implementation of the United Nations Convention against Transnational Organized Crime through participation in its Implementation Review Mechanism and enhancement of normative frameworks against organized crime

Programme performance in 2022 and target for 2024

- 16.30 The subprogramme's work contributed to the active engagement of 154 parties in the review process for the Convention and 126 States enhancing their capacity to develop legislative and strategic frameworks against organized crime, including strategies to prevent and counter organized crime, which exceeded the planned targets of 125 and 100 States, respectively.
- 16.31 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.III).

Figure 16.III
Performance measure: number of States engaged in the Implementation Review Mechanism and with enhanced capacity to implement the United Nations Convention against Transnational Organized Crime (cumulative)

Result 3: increased cooperation between countries along human trafficking and migrant smuggling routes, especially countries of origin and transit countries, including through South-South cooperation

16.32 Trafficking in persons and smuggling of migrants can span over several countries and continents, requiring international cooperation not only between origin and destination countries, but also among countries along the routes to dismantle the organized criminal groups behind these crimes. The subprogramme facilitates bilateral and transregional meetings and South-South cooperation between investigators, immigration officials and prosecutors from States along those routes, enabling them to share information about crime trends and patterns and to explore, with technical advice from UNODC experts, how they can support each other in their investigations.

Lessons learned and planned change

16.33 The lesson for the subprogramme was that increasing effective cooperation between countries along routes requires more than developing the capacities of individual States and connecting countries of origin and of destination. As countries affected by the same routes across continents very often do not have any legal basis for cooperation other than the United Nations Convention against Transnational Organized Crime and the Protocols thereto, the subprogramme has identified the need to expand engagement with transit countries and to foster active exchanges between countries that are along the same route. In applying the lesson, the subprogramme will enhance its efforts to connect countries along human trafficking and migrant smuggling routes, including by increasing its engagement with transit countries and strengthening active operational exchanges between them.

16.34 Expected progress towards the objective is presented in the performance measure below (see figure 16.IV).

Figure 16.IV
Performance measure: legal and operational cooperation instances among two or more beneficiary countries (annual)

Deliverables

16.35 Table 16.2 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: advisory services on accession to the United Nations Convention against Transnational Organized Crime and the Protocols thereto for 15 remaining non-parties to those instruments; advisory services on legislative implementation of the instruments for 20 States parties; advocacy on the implementation of the instruments for all 191 States parties; advisory services for five Member States and the International Narcotics Control Board in relation to the three drug control conventions.

Databases and substantive digital materials: Sharing Electronic Resources and Laws on Crime (SHERLOC) platform, containing over 11,000 annotated legislative excerpts and more than 3,200 case summaries covering 15 crime types; e-learning course on cryptocurrencies.

Subprogramme 2 A comprehensive and balanced approach to counter the world drug problem

Objective

- 16.36 The objective, to which this subprogramme contributes, is to ensure comprehensive and balanced responses to the world drug problem through integrated demand reduction and related measures, supply reduction and related measures, and enhanced international cooperation.

Strategy

- 16.37 To contribute to the objective, the subprogramme will:
- (a) Promote comprehensive and balanced approaches to countering the world drug problem in full conformity with the purposes and principles of the Charter of the United Nations and the three international drug control conventions and in line with scientific evidence, and assist Member States, upon request, in:
 - (i) Implementing the three international drug control conventions and all the international drug policy commitments to address and counter the world drug problem;
 - (ii) Establishing and/or expanding drug use prevention approaches and services, as well as drug dependence treatment, care and rehabilitation services and systems for people with drug use disorders;
 - (iii) Establishing and/or expanding HIV/AIDS prevention, treatment and care and support services for people who use drugs, including people in prison and other custodial settings;
 - (iv) Establishing and/or expanding access to and availability of controlled substances for medical and scientific use;
 - (b) Support Member States' progress in each of the above-mentioned areas through advocacy, the provision of technical assistance, capacity-building, regional strategic planning sessions, support for policy development, expert group consultations and conferences, the provision of standards and operational guidelines based on science and evidence, and the development and dissemination of manuals, toolkits, reports and issue papers based on science and evidence;
 - (c) Assist Member States, upon request, by promoting sustainable livelihoods to reduce the illicit cultivation of drug crops through alternative development, including, where appropriate, preventive alternative development;
 - (d) In coordination with subprogramme 1, promote the exchange of criminal intelligence and encourage multilateral operations targeting transnational criminal organizations involved in

- drug trafficking, and provide enhanced technical assistance in accordance with the principle of shared responsibility;
- (e) Build the capacity of national counterparts, at the request of Member States, to detect, interdict, investigate and prosecute drug-related offences;
 - (f) Facilitate the exchange of best practices and training curricula, methodologies and materials through the network of law enforcement training institutions, in coordination with subprogramme 1, helping Member States to make progress towards the achievement of Sustainable Development Goals 3, 4, 5, 10 and 16.
- 16.38 The above-mentioned work is expected to result in:
- (a) Increased access to quality health-care services that include scientific evidence-based interventions in the areas of drug abuse prevention, drug dependence treatment, HIV/AIDS prevention, treatment and care, and access to controlled substances, for medical and scientific use;
 - (b) Increased resilience and quality of life of and diversified, licit, sustainable income for families in rural areas affected by or at risk of illicit cultivation and production of and trafficking in narcotic drugs and psychotropic substances;
 - (c) Reduced illicit supply of drugs through joint and coordinated work by law enforcement authorities to strengthen maritime, air and land border control and to track and dismantle networks engaging in drug production, trafficking and distribution.

Programme performance in 2022

Better drug and HIV/AIDS prevention, treatment, care and rehabilitation interventions in Eastern Europe and Central Asia

- 16.39 Opioid use disorders remain the leading reason for people to be in drug treatment in Eastern Europe and Central Asia, with injecting drug use being two to five times the global average.⁶ In the majority of countries in these regions, the proportion of people with drug use disorders receiving treatment is lower than the global average (1 in 8).⁷ The subprogramme supported a range of initiatives to strengthen drug and HIV/AIDS prevention, treatment, care and rehabilitation in Eastern Europe and in Central Asia, including among populations displaced by the humanitarian crises in Ukraine and Afghanistan. Interventions comprised skills training for parents and caregivers; social and emotional learning for students; youth participation forums on drug prevention; development of quality assurance mechanisms for drug treatment; provision of family therapy for adolescents with drug use disorders; training of police officers by community-led organizations on the role of the police in the national HIV response; and strengthening of the capacity of community-led organizations in advocating for addressing barriers to HIV/AIDS services both at the community level and in prison and other custodial settings.
- 16.40 Progress towards the objective is presented in the performance measure below (see figure 16.V).

⁶ *World Drug Report 2021* (United Nations publication, 2021).

⁷ *World Drug Report 2022* (United Nations publication, 2022).

Figure 16.V
Performance measure: number of strengthened interventions on drugs and HIV/AIDS prevention, treatment, care and rehabilitation by Member States in Eastern Europe and Central Asia (annual)

Planned results for 2024

Result 1: national drug demand reduction programmes follow quality standards

Programme performance in 2022 and target for 2024

- 16.41 The subprogramme’s work contributed to seven countries developing or implementing quality assurance mechanisms for drug treatment services or systems, ensuring that services and systems are based on scientific evidence, including by launching Review of Prevention Systems (RePS), a new tool to assess national drug prevention systems, in one country, which exceeded the planned target of three countries.
- 16.42 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.VI).

Figure 16.VI
Performance measure: number of countries initiating programmes to develop or implement national quality standards (annual)

Result 2: sustainable livelihoods through alternative development

Programme performance in 2022 and target for 2024

- 16.43 The subprogramme’s work contributed to the signature of a long-term agreement for the export of coffee in Colombia and increased policy dialogue on environmentally sound practices in the provision of economic and environmentally sustainable livelihoods, which met the planned target.
- 16.44 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 16.3).

Table 16.3
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Vanmai Cooperative formally established in the Lao People’s Democratic Republic The programme in the Plurinational State of Bolivia exports its first shipment of coffee	Malongo signs long-term agreement with Vanmai Cooperative and issues the first payment to coffee growers in the Plurinational State of Bolivia and the Lao People’s Democratic Republic	Malongo signs long-term agreement with a Colombian cooperative to export high-quality coffee to Europe Increased policy dialogue on environmentally sound practices in the provision of economic and environmentally sustainable livelihoods	Communities implement alternative development initiatives that consider the environment and climate change	2 additional countries affected by illicit crops design pilot alternative development projects New communities implement alternative development initiatives, with due consideration to addressing environmental issues and climate change The partnership model with Malongo is replicated with other Fair Trade-certified companies for the export of products

Result 3: Member States in South-East Asia implement stronger health and development interventions in the context of addressing the drug problem in the region

Proposed programme plan for 2024

- 16.45 South-East Asia is experiencing increasing prevalence of use of amphetamine-type stimulants, with limited access to treatment, especially for women who use drugs and women with drug use disorders. Moreover, countries in the region still contribute to about 7 per cent of global illicit opium production.⁸ Despite significant progress made in some countries, access to opioids for the management of pain remains at an estimated 10 per cent of need in the region.⁹ To address this situation, the subprogramme has expanded its interventions to strengthen Member States’ health and development responses by including family and school-based prevention and youth participation forums on drug prevention; HIV/AIDS prevention, treatment, care and rehabilitation for people who

⁸ Ibid.

⁹ *Progress in Ensuring Adequate Access to Internationally Controlled Substances for Medical and Scientific Purposes (E/INCB/2018/Supp.1)*.

use drugs, as well as for people in prison and other custodial settings, including by supporting community-led organizations and addressing legislative and other barriers, such as stigmatization; alternative development; and access to controlled substances for medical and scientific purposes, especially for the management of pain and palliative care, while preventing diversion and illicit use.

Lessons learned and planned change

- 16.46 The lesson for the subprogramme was that interventions are more effective if sustained over more than one year. In applying the lesson, the subprogramme will strive to maintain initiatives active over more than one year, including by continuing to advocate for more sustained initiatives beyond the one-year cycle and to work closely with national stakeholders to ensure the sustainability of programme results and activities beyond the direct involvement of the subprogramme.
- 16.47 Expected progress towards the objective is presented in the performance measure below (see figure 16.VII).

Figure 16.VII
Performance measure: number of strengthened interventions on drugs and HIV/AIDS prevention, treatment, care and rehabilitation by Member States in South-East Asia (annual)

Deliverables

- 16.48 Table 16.4 lists all deliverables of the subprogramme.

Table 16.4
Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	10	10	10	10
1. Reports to the Commission on Narcotic Drugs on progress made by Member States in fulfilling the commitments in the 2009 Political Declaration and Plan of Action, and resolutions pertaining to drug demand reduction and related matters, HIV/AIDS, drug supply reduction and related matters and alternative development	3	3	3	3
2. Reports to the Commission on Narcotic Drugs on regional drug trafficking trends	5	5	5	5
3. Note to the Commission on Narcotic Drugs on coordination and alignment between the Commission and the Programme Coordinating Board of the Joint United Nations Programme on HIV/AIDS	2	2	2	2

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
Substantive services for meetings (number of three-hour meetings)	39	39	42	42
Meetings of:				
4. The Commission on Narcotic Drugs on issues related to drug demand reduction and related matters, HIV/AIDS, drug supply reduction and related matters and alternative development	21	21	21	21
5. The subsidiary bodies of the Commission on Narcotic Drugs (Heads of National Drug Law Enforcement Agencies and the Subcommittee on Illicit Drug Traffic and Related Matters in the Near and Middle East)	12	12	15	15
6. The Commission on Crime Prevention and Criminal Justice on issues related to drug demand reduction, HIV/AIDS prevention, treatment and care, and sustainable livelihoods	1	1	1	1
7. Expert groups on drug demand reduction, HIV/AIDS and alternative development	5	5	5	5
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	11	11	11	11
8. On drug use prevention, treatment and rehabilitation, including access to controlled substances for medical purposes	5	5	5	5
9. On HIV/AIDS prevention, treatment and care	5	5	5	5
10. On alternative development and sustainable livelihoods	1	1	1	1
Seminars, workshops and training events (number of days)	24	24	24	24
11. Training courses on drug control conventions and drug supply reduction	15	15	15	15
12. Training on drug demand reduction, HIV/AIDS and alternative development	9	9	9	9
Publications (number of publications)	3	3	3	3
13. On drug use prevention and treatment, and access to controlled substances	2	2	2	2
14. On HIV/AIDS prevention, treatment and care	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services on law enforcement and the implementation of the drug control conventions; substantive and technical advice on evidence-based drug prevention, treatment and care, HIV/AIDS prevention, treatment and care, access to controlled substances for medical and scientific use, and alternative development and sustainable livelihoods.				
D. Communication deliverables				
Outreach programmes, special events and information materials: social media campaigns and events on the International Day against Drug Abuse and Illicit Trafficking, World Mental Health Day and World AIDS Day.				

Subprogramme 3 Countering corruption

Objective

- 16.49 The objective, to which this subprogramme contributes, is to prevent and counter corruption through the effective implementation of the United Nations Convention against Corruption.

Strategy

- 16.50 To contribute to the objective, the subprogramme will:
- (a) Provide policy and legislative advice, build the capacities of relevant actors and facilitate the transfer of expertise in the areas of prevention, international cooperation, asset recovery, criminalization and law enforcement;

- (b) Assist Member States, upon request, in strengthening public sector institutions and the role of civil society, parliamentarians, the private sector, academia, youth and the general public in the prevention of corruption, including by providing technical assistance to States in the follow-up to country reviews conducted under the Mechanism for the Review of Implementation of the United Nations Convention against Corruption, as well as other types of technical assistance;
- (c) Implement the mandates given by policymaking and treaty bodies, in particular the Conference of the States Parties to the Convention, its subsidiary bodies and other governing organs, and support related intergovernmental processes, including the follow-up to the special session of the General Assembly against corruption, held in 2021;
- (d) Promote international cooperation regarding the investigation, prosecution and adjudication of corruption and related offences and provide technical assistance on the recovery of stolen assets, including through the Global Operational Network of Anti-Corruption Law Enforcement Authorities (GlobE Network) and the convening of expert group meetings;
- (e) Develop and disseminate knowledge products on the implementation of the Convention and assist States, upon request, in producing data and conducting statistical and analytical studies and research into corruption, including in collaboration with academia and other stakeholders, and further emphasize South-South cooperation and encourage the sharing of knowledge and good practices at the national and regional levels.

16.51 The above-mentioned work is expected to result in:

- (a) States parties participating actively and effectively in the Mechanism for the Review of Implementation of the United Nations Convention against Corruption;
- (b) States' legal, policy and institutional frameworks addressing corruption risks in line with the Convention;
- (c) States being able to systematically and in a timely manner trace, seize, freeze, confiscate and return assets stolen by officials through acts of corruption, within the framework of the Convention;
- (d) Anti-corruption practitioners and other stakeholders having and using the capacity to prevent and counter corruption;
- (e) Policymakers, practitioners and other stakeholders using evidence-based knowledge and tools on anti-corruption to inform decision-making;
- (f) Partners actively supporting and promoting implementation of the Convention in a coordinated effort.

Programme performance in 2022

Enhanced protection of whistle-blowers

16.52 States have recognized whistle-blower protection as one of the key elements to better detect, investigate and prosecute corruption and it is one of the thematic areas where States parties to the United Nations Convention against Corruption have reported many challenges and technical assistance needs. Under the Implementation Review Mechanism, 70 per cent of States parties received a recommendation on article 33, which is the Convention's most relevant article for whistle-blower protection. In 2022, the subprogramme assisted 20 countries to enhance whistle-blower protection through the provision of legal and policy advice and technical expertise in elaborating standard operating procedures. In addition, the subprogramme organized two regional workshops addressing whistle-blower protection in Southern Africa and South America and Mexico.

16.53 Progress towards the objective is presented in the performance measure below (see figure 16.VIII).

Figure 16.VIII
Performance measure: number of countries better equipped to enhance whistle-blower protection (annual)

Planned results for 2024

Result 1: renewed political commitment to the fight against corruption

Programme performance in 2022 and target for 2024

- 16.54 The subprogramme’s work contributed to States translating the political declaration adopted at the special session of the General Assembly against corruption in 2021 (see Assembly resolution [S-32/1](#), annex) into actionable and practical measures to advance the global fight against corruption, which met the planned target. Inter alia, States actively engaged and exchanged good practices and challenges in fighting corruption at an intersessional meeting of the Conference of the States Parties to the Convention dedicated to follow-up to the special session. In addition, States asked UNODC to set up an online repository in which they could share good practices on the implementation of the political declaration and the Convention.
- 16.55 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 16.5).

Table 16.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Adoption by the General Assembly of resolution 74/276 and decision 74/568 on the special session of the General Assembly against corruption	Adoption of a concise and action-oriented political declaration at the special session of the General Assembly against corruption in 2021	States take actionable and practical measures to implement the political declaration	States implement the political declaration adopted at the special session of the General Assembly against corruption in 2021	States continue to implement the political declaration adopted at the special session of the General Assembly against corruption in 2021

Result 2: enhanced cross-border cooperation between anti-corruption law enforcement authorities

Programme performance in 2022 and target for 2024

- 16.56 The subprogramme’s work contributed to the fostering of informal cross-border cooperation through information exchange between anti-corruption authorities and access to knowledge, resources and

tools to track, investigate and prosecute cross-border corruption through the GlobE Network, with 130 new members from 70 countries, which exceeded the planned target of 50 countries.

16.57 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.IX).

Figure 16.IX

Performance measure: number of countries joining the Global Operational Network of Anti-Corruption Law Enforcement Authorities (cumulative)

Result 3: national anti-corruption institutions are strengthened

Proposed programme plan for 2024

16.58 The combination of weak institutions and fragile governance structures provides significant opportunities for corruption, with relatively low risk of detection through independent investigation and prosecution. Supporting national institutions to reinforce integrity, transparency and accountability is an enabler of the 2030 Agenda with an emphasis on Sustainable Development Goal 16. The subprogramme strengthens the capacity of States to prevent and counter corruption by supporting the development of transparent, effective, inclusive and accountable institutions. In addition, the subprogramme assists States parties by facilitating knowledge-sharing among practitioners, providing training as well as legal and policy advice to build the capacities of national counterparts and conducting risk assessments to proactively mitigate corruption risks.

Lessons learned and planned change

16.59 The lesson for the subprogramme was the need to address the growing demand for strengthening the capacities of institutions to further enhance their accountability and transparency. In applying the lesson, the subprogramme will improve coordination and collaboration efforts with other technical assistance providers by using regional anti-corruption platforms to further harness synergies, facilitate the exchange of good practices, strengthen coordination and build partnerships.

16.60 Expected progress towards the objective is presented in the performance measure below (see figure 16.X).

Figure 16.X
Performance measure: number of countries with strengthened anti-corruption institutions (annual)

Deliverables

16.61 Table 16.6 lists all deliverables of the subprogramme.

Table 16.6

Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	80	80	80	80
1. Reports on the sessions of the Conference of the States Parties and its subsidiary bodies	6	6	7	6
2. Thematic reports on the Mechanism for the Review of Implementation of the United Nations Convention against Corruption	2	2	2	2
3. Regional reports on the Implementation Review Mechanism and other background documents	16	16	8	16
4. Background documents for the sessions of the Conference of the States Parties and for the subsidiary bodies of the Conference (including executive summaries of country review reports for the consideration of the Implementation Review Group)	56	56	63	56
Substantive services for meetings (number of three-hour meetings)	42	42	58	42
Meetings of:

9. To prevent and combat corruption through effective implementation of the United Nations Convention against Corruption in support of Sustainable Development Goal 16	1	1	1	1

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
Seminars, workshops and training events (number of days)	5	5	5	5
10. Expert group seminars on developing guidance or tools for specific areas of the United Nations Convention against Corruption, including based on the needs identified through the Implementation Review Mechanism	5	5	5	5
Publications (number of publications)	3	3	3	3
11. On anti-corruption	3	3	3	3
Technical materials (number of materials)	4	4	6	6
12. On anti-corruption	4	4	4	6
13. E-learning modules	–	–	2	–

C. Substantive deliverables

Consultation, advice and advocacy: advisory services throughout the process of operating the Implementation Review Mechanism with regard to, inter alia, preparing the governmental experts for conducting country reviews, facilitating the completion and analysis of self-assessment checklist responses, conduct of 20 country visits and drafting of country review reports and executive summaries.

Databases and substantive digital materials: database of laws and jurisprudence, as well as other knowledge relevant to implementation of the United Nations Convention against Corruption, including for issues related to asset recovery; database of competent authorities, asset recovery focal points and central authorities; the online anti-corruption portal “Tools and Resources for Anti-Corruption Knowledge” (TRACK); the GlobE Network portal; electronic tools and training materials on standards, policies, operational procedures and good practices in the implementation of the Convention by States parties.

Subprogramme 4 Terrorism prevention

Objective

- 16.62 The objective, to which this subprogramme contributes, is to strengthen a criminal justice regime against terrorism that is effective and is implemented by Member States in line with internationally agreed rule of law and human rights standards, the United Nations Global Counter-Terrorism Strategy and relevant United Nations conventions and resolutions.

Strategy

- 16.63 To contribute to the objective, the subprogramme will:
- Provide normative and capacity-building support to prevent terrorism and violent extremism as and when conducive to terrorism, at the request of Member States, by initiating and supporting the development of cooperation frameworks with Member States at the national, regional and global levels, based on the strategic objectives of Member States and in line with internationally agreed rule of law and human rights standards and relevant United Nations conventions and resolutions;
 - Implement projects, in coordination with and through integrated planning with partners, that support Governments with terrorism prevention, in particular the United Nations Global Counter-Terrorism Coordination Compact and its working groups, helping Member States to make progress towards Sustainable Development Goals 5 and 16;
 - Deliver counter-terrorism technical assistance tools and training activities to requesting Member States, in accordance with its mandate under resolutions of the General Assembly¹⁰

¹⁰ See General Assembly resolutions [72/194](#), [72/284](#) and [74/175](#).

and the Security Council,¹¹ as well as the United Nations Global Counter-Terrorism Strategy, adopted by the Assembly in 2006 in its resolution 60/288, and the biennial reviews of the Strategy.

16.64 The above-mentioned work is expected to result in:

- (a) Ratification by Member States of an increased number of international legal instruments against terrorism, and enactment and revision of domestic counter-terrorism legislation;
- (b) Development by Member States of strategies, policies and action plans for preventing and combating terrorism;
- (c) Effective criminal justice investigation, prosecution and adjudication of terrorism offences in line with the relevant international legal instruments and norms, human rights standards and good practices;
- (d) Increased national, regional and international cooperation to prevent and counter terrorism;
- (e) Advanced implementation by Member States of the United Nations Global Counter-Terrorism Strategy and relevant United Nations conventions and resolutions, through structural changes in their legal and criminal justice measures and internal functioning that are sustainable over time.

Programme performance in 2022

Member States access information on the International Convention for the Suppression of Acts of Nuclear Terrorism for the effective implementation thereof

16.65 The risk of nuclear and other radioactive material being used for terrorist or other criminal purposes remains a threat to global peace and security. The International Convention for the Suppression of Acts of Nuclear Terrorism is an essential tool for Member States to strengthen their legislative frameworks and criminal justice systems and effectively prevent and combat nuclear terrorism. The subprogramme has developed a website (www.unodc.org/icsant) that acts as a repository of information and resources on the Convention, including its procedural history, status of adherence, analytical articles, a collection of national implementing legislation, capacity-building tools and related UNODC technical and legislative assistance. The website is available in all official languages of the United Nations and aims to raise the awareness of Member States on all elements of the Convention and benefits of adherence to it, as well as of the related work of UNODC.

16.66 Progress towards the objective is presented in the performance measure below (see figure 16.XI).

¹¹ See Security Council resolution 2482 (2019) and previous related Council resolutions.

Figure 16.XI
Performance measure: number of users of the International Convention for the Suppression of Acts of Nuclear Terrorism repository (annual)

Planned results for 2024

Result 1: terrorists are brought to justice in line with internationally agreed rule of law and human rights standards

Programme performance in 2022 and target for 2024

16.67 The subprogramme’s work contributed to facilitating the processing of terrorism cases in the Lake Chad basin countries through the training of 1,549 criminal justice officials on the investigation, prosecution and adjudication of terrorism cases, which did not meet the planned target of 1,750. The target was not met as training was delivered to smaller groups of specialized personnel to provide more in-depth and tailored support.

16.68 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.XII).

Figure 16.XII
Performance measure: number of criminal justice officials trained on the investigation, prosecution and adjudication of terrorism cases (annual)

Result 2: strengthened response to growing terrorism challenges in Central, West and South Asia

Programme performance in 2022 and target for 2024

- 16.69 The subprogramme’s work contributed to identifying needs and developing a tailored technical assistance programme in the area of border management related to responding to terrorism in Central Asia at the request of Tajikistan and Uzbekistan, which met the planned target.
- 16.70 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 16.7).

Table 16.7
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	Member States reassess their counter-terrorism technical assistance needs following the Taliban takeover	Member States in Central Asia request and receive support to develop criminal justice measures and mechanisms to prevent and counter terrorism	Member States and relevant institutions adopt measures and mechanisms to prevent and counter terrorism	Member States report improved measures and mechanisms to prevent and counter terrorism

Result 3: increased institutional capacity of Member States to prevent and counter terrorism

- 16.71 The COVID-19 pandemic has created emerging terrorism threats, further exacerbated by conflict and instability across the globe. To support requesting Member States in building the normative frameworks, policies and institutional capacity to strengthen their criminal justice responses to terrorism, in line with international norms and human rights standards, the subprogramme has developed a new global project on preventing and countering terrorism.

Lessons learned and planned change

- 16.72 The lesson for the subprogramme was the importance of renewing efforts within the framework of its technical assistance to focus on people-centred initiatives to prevent and counter terrorism at its root and address its underlying conditions. In applying the lesson, the subprogramme will support Member States to develop and implement terrorism prevention measures that are rule-of-law based, partnership-based, gender-sensitive and youth-empowering by enhancing collaboration with relevant stakeholders for more sustainable outcomes to prevent and counter terrorism.
- 16.73 Expected progress towards the objective is presented in the performance measure below (see figure 16.XIII).

Figure 16.XIII

Performance measure: criminal justice officials developing the skills and knowledge to prevent and counter terrorism (annual)**Deliverables**

16.74 Table 16.8 lists all deliverables of the subprogramme.

Table 16.8

Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies

D. Communication deliverables

Outreach programmes, special events and information materials: information kits in legal, criminal justice and related areas.

Digital platforms and multimedia content: website and social media accounts; video on the launch of the new Global Programme on Preventing and Countering Terrorism; Twitter communication campaign for the International Day of Remembrance of and Tribute to the Victims of Terrorism.

**Subprogramme 5
Justice**

Objective

- 16.75 The objective, to which this subprogramme contributes, is to prevent crime and ensure more effective, fair, humane and accountable criminal justice systems as a basis for the rule of law and sustainable development.

Strategy

- 16.76 To contribute to the objective, the subprogramme will:
- (a) Promote the application and facilitate the development of United Nations standards and norms in crime prevention and criminal justice through support to criminal justice reform and coordination with all relevant sectors in national criminal justice systems and all crime prevention and criminal justice reform actors;
 - (b) Provide assistance, upon request, to Member States' crime prevention and criminal justice actors by supporting Member States, upon request, with institution-building and providing capacity-building and technical advice in cooperation with other sectors, including education, health and social services, in the areas of: community and knowledge-based crime prevention to address risk factors and root causes of offending and reoffending; access to justice, including through policing with full respect for human rights, access to legal aid, alternatives to imprisonment and restorative justice; preparation for, response to and recovery from crisis; violence against women; violence against children; and penal and prison reform, including related to treatment of violent extremist¹² prisoners, radicalization and social reintegration upon release;
 - (c) Develop and disseminate practical tools, such as guidance notes, handbooks, training curricula and model legislation, and support crime prevention and criminal justice actors in applying these tools, and share studies, good practices and online resources;
 - (d) Incorporate cross-cutting issues related to: developments in the delivery of justice through the use of new technology; victims and witnesses; gender equality in the criminal justice system; and children in the criminal justice system.
- 16.77 In doing so, the subprogramme will help Member States to make progress towards achievement of the Sustainable Development Goals, in particular Goals 5, 11 and 16.
- 16.78 The above-mentioned work is expected to result in:
- (a) Improved frequency and quality in application of alternatives to imprisonment in appropriate cases, effective and efficient prison management and humane treatment of prisoners and enhanced capacity of and coordination between justice actors to address excessive and arbitrary police and pretrial detention;

¹² The terms "violent extremist" and "violent extremism" refer to violent extremism as and when conducive to terrorism (see General Assembly resolution 77/237).

- (b) Improved prosecution and adjudication of cases of violence against women and girls and improved prevention of and responses to violence against children;
- (c) Increased equal access to justice for the vulnerable segments of the population and increased public trust in the justice system, including through nationwide legal aid services that are accessible to all and are tailored to the rights and needs of the population;
- (d) Enhanced support for social reintegration of prisoners and prevention of recidivism, including for violent extremist prisoners;
- (e) Prevention of victimization and creation of safer communities;
- (f) Empowerment of women and girls within crime prevention and criminal justice programmes and systems;
- (g) Continued functioning of criminal justice systems during health and other crises and reduced risk of violations of the rights of those affected disproportionately, in particular detainees, prisoners and victims of crime.

Programme performance in 2022

Improved police-community relations and public trust in the police in Kazakhstan

16.79 Improved police-community relations and increased public trust in the police are enablers to ensure equal access to justice for all, ensure the protection of rights and maintain peace and security. The subprogramme delivered a series of evidence-based capacity-building activities at the request of and tailored to the needs of the human resources services of the Ministry of Internal Affairs of Kazakhstan, as well as the law enforcement academies in the country. The training workshops, expert meetings, round-table discussions and study visits focused on: good practices in human resources policy and professional development; building and maintaining trust in modern policing; strengthening curricula and faculty skills at national police training institutions; and open and competitive recruitment and performance management processes for police, and electronic human resources management systems. In June 2022, the subprogramme received requests from national authorities to provide further assistance in the area of police modernization, including community-oriented policing.

16.80 Progress towards the objective is presented in the performance measure below (see figure 16.XIV).

Figure 16.XIV

Performance measure: number of national officials equipped to improve police-community relations and public trust in the police in Kazakhstan (cumulative)

Planned results for 2024

Result 1: people in contact with the criminal justice system have increased access to justice services

Programme performance in 2022 and target for 2024

- 16.81 The subprogramme's work contributed to 25 Member States implementing activities to increase equal access to justice for all, including with a focus on policing with full respect for human rights, enhancing access to legal aid services for pretrial detainees and women victims of violence, and services addressing violence against children, which met the planned target.
- 16.82 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.XV).

Figure 16.XV

Performance measure: number of Member States in which the United Nations Office on Drugs and Crime implemented one or more activities to increase equal access to justice for all (cumulative)

Result 2: criminal justice systems mainstream a gender perspective in crime prevention and criminal justice reform

Programme performance in 2022 and target for 2024

- 16.83 The subprogramme's work contributed to the mainstreaming of a gender perspective in crime prevention and criminal justice reform in 70 per cent of all countries supported under the subprogramme during the reporting period, with specific attention to gender disparities and the empowerment of women and youth in judicial and prison reform, which met the planned target.
- 16.84 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.XVI).

Figure 16.XVI
Performance measure: Member States mainstreaming a gender perspective in crime prevention and criminal justice reform

(Percentage of Member States supported under the subprogramme)

Result 3: criminal justice institutions are effective and accessible

16.85 The subprogramme’s work aims at ensuring the operation of fair, effective, representative, transparent and accountable criminal justice institutions, and to promote equal access to justice for all, with a specific focus on those who are the most at risk of being left behind.

Lessons learned and planned change

16.86 The lesson for the subprogramme was that a consistent, evidence-based and people-centred approach to criminal justice, grounded on the normative foundation of the United Nations standards and norms agreed upon by Member States, is essential to improve the lives of people in contact with the criminal justice system and ensure their fair treatment. In applying the lesson, the subprogramme will build on its specialized expertise and enhanced partnerships with national and international actors, including those representing communities most affected, to provide assistance at the national and local levels under a new programmatic structure which consolidates various global programmes on crime prevention and criminal justice under one unified programme and strives towards a more people-centred approach.

16.87 Expected progress towards the objective is presented in the performance measure below (see figure 16.XVII).

Figure 16.XVII
Performance measure: criminal justice actors with strengthened capacities to provide more people-centred justice services (cumulative)

Deliverables

16.88 Table 16.9 lists all deliverables of the subprogramme.

Technical materials (number of materials)	–	20	20	20
6. E-learning modules	–	20	20	20
C. Substantive deliverables				
Consultation, advice and advocacy: substantive and technical advice on crime prevention and criminal justice to 60 Member States, relevant organizations and agencies and 15 national and regional programmes; advice on best practices in crime prevention and criminal justice reform.				
D. Communication deliverables				
Outreach programmes, special events and information materials: campaigns to observe Nelson Mandela International Day; promotional materials on UNODC mandate areas in crime prevention and criminal justice; fundraising initiatives and strategic partnerships with international organizations and civil society organizations.				

Subprogramme 6 Research, trend analysis and forensics

Objective

16.89 The objective, to which this subprogramme contributes, is to ensure that Member States have enhanced knowledge of trends on drugs and crime for effective scientific and evidence-based policy formulation, and access to and use of quality forensic science data, information and tools in their efforts against drugs, crime and terrorism.

Strategy

16.90 To contribute to the objective, the subprogramme will:

- (a) Provide timely and accurate statistics and analyses of world drug and crime problems, with particular attention to specific manifestations of crime and its transnational dimensions through the production of global and thematic reports, an online monitoring platform and a data-sharing portal;

- (b) Generate high-quality and relevant evidence through strengthened research capacity in the field and technical oversight at headquarters, including in coordination with the regional Centres of Excellence in Mexico and the Republic of Korea and the national Centre of Excellence for Illicit Drug Supply Reduction in Brazil;
- (c) Support countries, through workshops, trainings, the provision of guidelines and other capacity-building efforts, in the collection of and reporting on data regarding drugs and crime, as required, to monitor progress against certain Sustainable Development Goals and targets, in particular Goals 3, 15 and 16, as they relate to drug use, trafficking, illicit financial flows, justice, crime and crime-related violence;
- (d) Build capacity of national statistical offices and other relevant national institutions, upon request, to produce, disseminate and analyse drug and crime data and statistics, and assist Member States, upon request, in identifying trends, emerging issues and priorities in drugs, crime and corruption;
- (e) Provide technical assistance and expert advice to drug-testing laboratories, forensic institutions and Member States on forensics standard setting, early warning systems and the exchange of quality forensic data and services for policymaking and decision-making;
- (f) Develop and disseminate forensic best practices guidelines and scientific-technical publications on drugs and crime;
- (g) Provide scientific support to the three treaty bodies under the international drug conventions, namely the Commission on Narcotic Drugs, the International Narcotics Control Board and WHO.

16.91 The above-mentioned work is expected to result in:

- (a) Enhanced knowledge among Member States, the international community and other relevant stakeholders on formulating strategic responses to existing and emerging drugs and crime issues;
- (b) Production and analysis of statistical data on trends by Member States, including trends in specific and emerging drugs and crime issues;
- (c) Enhanced scientific and forensic capacity of law enforcement personnel, national drug testing and toxicology laboratories and forensic service providers in line with internationally accepted standards of performance.

Programme performance in 2022

Improved skills of forensic personnel and law enforcement officers on crime scene investigation, safe handling of synthetic opioids and identification of drugs and chemicals used in their illicit manufacture

16.92 The availability and use of quality forensic science services, data and information is an essential component of law enforcement operations to combat the manufacture and trafficking of illicit drugs. The subprogramme provides support to Member States to enhance national forensic capacity to meet internationally accepted standards and promotes the use of scientific and forensic data in strategic operations, policymaking and decision-making processes. The subprogramme provided in-person training to law enforcement and forensic personnel on the use of UNODC drug and precursor testing kits and handheld devices for the field identification of drugs and precursor chemicals, on the safe handling of synthetic opioids and the correct use and removal of personnel protective equipment and on crime scene investigation.

16.93 Progress towards the objective is presented in the performance measure below (see figure 16.XVIII).

Figure 16.XVIII
Performance measure: number of countries and personnel with enhanced knowledge and skills in forensics (annual)

Planned results for 2024

Result 1: more timely responses by Member States to drug trends and emerging issues through an expanded monitoring platform

Programme performance in 2022 and target for 2024

- 16.94 The subprogramme's work contributed to the provision of timely and accurate statistics and analyses of world drug and crime problems and the generation of prompt responses based on improved detection, processing and visualization of drug trafficking trends and threats by 90 entities using the online monitoring platform, which exceeded the planned target of 50.
- 16.95 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.XIX).

Figure 16.XIX
Performance measure: number of entities using the monitoring platform for timely information on drugs (cumulative)

Result 2: timely information and evidence to prevent and combat smuggling of migrants and related crimes, and to protect the rights of people who are smuggled

Programme performance in 2022 and target for 2024

- 16.96 The subprogramme's work contributed to the provision of up-to-date evidence on the modus operandi of migrant smugglers, smuggling routes, financial aspects and abuses suffered in the context of migrant smuggling by collecting data from 15 countries and attracting 8,500 visits on the web-based platform, which exceeded the planned target of 14 countries and 8,000 platform visits.
- 16.97 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.XX).

Figure 16.XX

Performance measure: number of countries covered by the United Nations Office on Drugs and Crime Observatory on Smuggling of Migrants (cumulative) and visits to the web-based platform (annual)

Result 3: safe handling and disposal of drugs and the precursor chemicals used in their illicit manufacture by Member States

- 16.98 The handling and disposal of chemicals or waste related to illicit drug manufacture have an environmental impact that not only damages our ecosystems, but also can have serious health-related consequences. The subprogramme supported priority countries in South and Central America in the development of national inter-agency disposal plans through the development and use of a disposal capacity assessment tool and provided training to national experts on the procedures for the disposal of drugs and precursor chemicals in a safe, sustainable and environmentally friendly manner.

Lessons learned and planned change

- 16.99 The lesson for the subprogramme was the need for greater knowledge of and interaction with all national stakeholders to ensure that effective sustainable national disposal plans are developed. In applying the lesson, the subprogramme will enhance efforts to understand the needs of Member States in future chemical handling and disposal-related activities and adapt its capacity assessment tool and technical assistance capacity-building activities to meet the individual needs of Member States.
- 16.100 Expected progress towards the objective is presented in the performance measure below (see figure 16.XXI).

Figure 16.XXI

Performance measure: number of countries with national disposal plans and personnel with enhanced knowledge on the disposal of drugs and precursor chemicals (annual)

Deliverables

16.101 Table 16.10 lists all deliverables of the subprogramme.

Table 16.10

Subprogramme 6: deliverables for the period of 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Report to the Commission on Narcotic Drugs on world drug abuse	1	1	1	1
2. Report to the Commission on Crime Prevention and Criminal Justice on world crime trends	1	1	1	1

9. On the monitoring of illicit drug crops	5	5	5	5
10. On drug control and crime prevention	9	9	9	9
C. Substantive deliverables				

Consultation, advice and advocacy: consultation, advice and advocacy to Governments, international, regional and national organizations, institutions and laboratories on drugs and crime statistics and on forensics (35 events annually, including briefings, and dissemination events).

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Databases and substantive digital materials: international statistics on crime, based on responses to the annual crime trend survey; international statistics on illicit drugs; online database of individual drug seizures for 40,000 users; approximately 30 early warning advisories on new psychoactive substances; United Nations Toolkit on Synthetic Drugs; UNODC Observatory on Smuggling of Migrants.

Subprogramme 7 Policy support

Objective

- 16.102 The objective, to which this subprogramme contributes, is to advance institutional reform and strengthen policy and operational responses by Member States on drug control, crime prevention and criminal justice.

Strategy

- 16.103 To contribute to the objective, the subprogramme will:
- (a) Conduct dialogues with Member States, international organizations and private sector entities to mobilize resources and carry out targeted advocacy and communication activities in substantive areas, such as combating transnational organized crime, trafficking in drugs and corruption;
 - (b) Provide assistance to headquarters and field-based offices related to supporting institutional reforms and ensuring policy coherence through strengthening policy dialogue and enhancing interdivisional coordination;
 - (c) Further institutionalize a results-based management culture across UNODC by providing technical advice and quality oversight with a view to further strengthening transparency and accountability in UNODC interventions;
 - (d) Undertake policy analysis and coordinate with other United Nations agencies on emerging and cross-cutting issues related to drugs, crime, corruption and terrorism, in particular in promoting the Sustainable Development Goals and the empowerment of youth;
 - (e) Strengthen the strategic engagement of non-governmental stakeholders in assisting Member States to prevent and combat corruption, crime, terrorism and the illegal use of drugs in support of the Sustainable Development Goals, as appropriate and as determined in relevant treaties.
- 16.104 The above-mentioned work is expected to result in:
- (a) Increased awareness and capacity of Member States to address the interlinked issues of drugs, crime, corruption and terrorism at the global, regional, national and local levels and these issues being reflected within broader national development efforts;
 - (b) The protection of civic space and the meaningful participation of civil society on issues related to drugs, crime and corruption and strengthened collaboration between civil society, academia, the private sector and Member States in the implementation of relevant conventions and policy instruments;
 - (c) Greater public awareness of issues related to drugs, crime, corruption and terrorism.

Programme performance in 2022

Enhanced participation of civil society in the implementation of the United Nations Convention against Corruption and its Implementation Review Mechanism

16.105 Article 13 of the United Nations Convention against Corruption recognizes the role of civil society in promoting good governance and calls upon States to promote the active participation of civil society, non-governmental organizations and community-based organizations in preventing and combating corruption. In 2022, the subprogramme provided training to civil society organizations to improve their understanding of the Convention and its Implementation Review Mechanism and equip them with the necessary tools to work constructively with their Governments and the private sector on implementation of the Convention. The subprogramme has also supported research and public awareness initiatives on specific thematic areas of the Convention and has created platforms for dialogue between Governments and civil society to generate mutual understanding of their respective roles in the Mechanism. The increased participation and exposure of civil society has led to a growing recognition of the mutual benefits rather than the mere box-ticking requirement for their involvement, with civil society contributing to the recommendations agreed by Governments to fast-track implementation of the Convention.

16.106 Progress towards the objective is presented in the performance measure below (see figure 16.XXII).

Figure 16.XXII

Performance measure: percentage of States parties under review that involved non-governmental stakeholders in the review process (annual)

Planned results for 2024

Result 1: increased stakeholder engagement in the implementation of the United Nations Convention against Transnational Organized Crime

Programme performance in 2022 and target for 2024

16.107 The subprogramme's work contributed to 17 additional countries volunteering to host dialogues on organized crime between non-governmental stakeholders and national authorities, bringing the total number of volunteering countries to 24, which exceeded the planned target of a total of eight countries.

16.108 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.XXIII).

Figure 16.XXIII
Performance measure: number of countries volunteering to host dialogues on organized crime between non-governmental stakeholders and national authorities (cumulative)

Result 2: improved public awareness of issues surrounding drugs, crime, corruption and terrorism

Programme performance in 2022 and target for 2024

- 16.109 The subprogramme’s work contributed to attracting a total number of 763,870 annual followers on UNODC social media channels, which exceeded the planned target of 677,000 annual followers.
- 16.110 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.XXIV).

Figure 16.XXIV
Performance measure: number of followers on the United Nations Office on Drugs and Crime social media channels (annual)

Result 3: victims of trafficking in persons receive critical assistance for their social, physical and psychological recovery

Proposed programme plan for 2024

- 16.111 The subprogramme provides humanitarian, legal and financial aid to victims of trafficking through established in situ civil society organizations that are on the front line of tackling trafficking in persons. Through a small grants programme, the subprogramme supports actions by specialized organizations that provide direct assistance to victims, including shelter, health services, education,

vocational training and psychosocial, legal and economic support. In 2022, 9,740 beneficiaries received critical assistance.

Lessons learned and planned change

16.112 The lesson for the subprogramme was that strengthened advocacy efforts can lead to higher visibility and interest in the calls for proposals and, in turn, reach more survivors of trafficking. In applying the lesson, the subprogramme will focus on strengthening its internal and external communication and outreach and increasing its engagement (in-person and virtual) with Member States, civil society and the private sector.

16.113 Expected progress towards the objective is presented in the performance measure below (see figure 16.XXV).

Figure 16.XXV

Performance measure: number of direct beneficiaries that have received legal and financial assistance through specialized organizations (annual)

Deliverables

16.114 Table 16.11 lists all deliverables of the subprogramme.

Table 16.11

D. Communication deliverables

Outreach programmes, special events and information materials: global campaigns to observe the International Day against Drug Abuse and Illicit Trafficking, World Day against Trafficking in Persons and International Anti-Corruption Day; promotional materials on UNODC mandate areas, including on the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice; fundraising initiatives and strategic partnerships with international financial institutions, international organizations and the private sector in support of the United Nations voluntary trust fund for victims of trafficking in persons, especially women and children

External and media relations: press releases and events.

Digital platforms and multimedia content: UNODC website and social media channels.

Subprogramme 8 Technical cooperation and field support

Objective

- 16.115 The objective, to which this subprogramme contributes, is to strengthen Member State-owned programmes countering drugs, crime and terrorism.

Strategy

- 16.116 To contribute to the objective, the subprogramme will:
- (a) Provide policy advice, strategic guidance and coordination to all UNODC field offices for the development and implementation of integrated operational programmes and ensure their full implementation;
 - (b) Ensure operational accountability and programmatic efficiency, including by engaging in the development of business operational strategies and common back offices, monitoring risks and ensuring the inclusion of results-based management in the planning, monitoring and reporting of all UNODC field presences;
 - (c) Provide substantive, technical and policy advice through its field offices, according to their mandates and at the request of Member States, and ensure the inclusion of governance, security and preventing and countering drugs, crime and terrorism with full respect for human rights in the implementation of joint United Nations programmes through technical assistance;
 - (d) Support the development of regional strategies and operational programmes promoting the joint pursuit of justice, public security and development that build on the normative and technical assistance of the Office, through policy dialogue and coordination, and by serving as a common platform for joint efforts with United Nations partners, international financial institutions, other multilateral bodies and civil society;
 - (e) Provide technical and legislative assistance among partner countries designed to foster full ownership by regional entities to support the establishment of South-South cooperation and interregional cooperation;
 - (f) Provide targeted capacity-building to Member States to support the achievement of the Sustainable Development Goals, including through North-South, South-South and triangular cooperation.

16.117 This work is expected to result in:

- (a) Improved legal and policy responses and strengthened capacity of Member States to address the world drug problem, prevent and counter transnational organized crime, corruption and terrorism and promote justice and the rule of law, and participate more effectively in joint initiatives and cross-border and transnational cooperation;
- (b) Member States advancing in evidence-based and tailored programmes in priority areas of UNODC mandates to support relevant Sustainable Development Goals based on contextual needs assessments;
- (c) Renewed cooperation and coherence with offices of the United Nations resident coordinators, other United Nations entities, including for South-South and triangular cooperation, and regional Development Coordination Office desks under both development system and business operations reforms, thus enhancing the efficiency of support to Member States.

Programme performance in 2022

Enhanced social reintegration and job opportunities for people in prison in Mexico

16.118 In addition to discrimination and stigmatization, the social reintegration of offenders is hindered by a lack of employment skills and job opportunities, leading to further isolation and increased likelihood of recidivism. The subprogramme provides people in prison with tools to tackle biases and prejudices as well as vocational training and job search support. For instance, in Mexico City, UNODC offered job-qualifying training and certification on rainwater harvesting systems and solar panel installation as part of a wider public-private partnership re-entry effort. In 2022, 59 inmates (39 male and 20 female) were certified as qualified installers, which enhanced their chances of employability upon release. A further 30 women inmates were given complementary financial education.

16.119 Progress towards the objective is presented in the performance measure below (see figure 16.XXVI).

Figure 16.XXVI

Performance measure: number of detained women and men in Mexico City with vocational certification and increased employability (annual)

Planned results for 2024

Result 1: regional strategic vision for Latin America and the Caribbean to address crime, drugs and terrorism threats

Programme performance in 2022 and target for 2024

- 16.120 The subprogramme's work contributed to nine joint initiatives and programmes launched through the multi-partner trust fund in Latin America, which exceeded the planned target of eight.
- 16.121 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.XXVII).

Figure 16.XXVII

Performance measure: number of joint initiatives and programmes launched through the multi-partner trust fund in Latin America (cumulative)

Result 2: strengthened rule of law and protection of those who are vulnerable in small island developing States in the Pacific

Programme performance in 2022 and target for 2024

- 16.122 The subprogramme's work contributed to improved data collection systems on human trafficking in six small island developing States in the Pacific and enhanced South-South cooperation on anti-corruption between 14 small island developing States in the Pacific, which met the planned target.
- 16.123 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 16.12).

Table 16.12

Result 3: drug production and use are addressed through alternative livelihood and health services

16.124 The subprogramme supports UNODC alignment with the annual United Nations Transitional Engagement Framework for Afghanistan and it aims at supporting humanitarian intervention. In particular, it aims at reducing the dependence on opium cultivation and addressing food insecurity through alternative livelihoods. The subprogramme addresses illicit drug cultivation within the framework of poverty reduction and sustainable development, along with other support services for the prevention and treatment of drug use and drug use disorders.

Lessons learned and planned change

16.125 There were two lessons for the subprogramme. First, evaluation results in April 2022 supported the short- and medium-term diversification of production of off-season farming products. Second, they highlighted the need to reinforce advocacy to ensure an evidence- and community-based approach to treatment of drug use. In applying the lessons, the subprogramme will support farmers through comprehensive and integral short and medium-term programmes for the most vulnerable families that will include a standard package of agricultural inputs and technical assistance, and access to basic logistical facilities to enable them to market their products with added value and increase their awareness on counter-narcotics, resulting in an increased income and a reduction in illicit crop cultivation. Furthermore, the subprogramme will reinforce advocacy to ensure an evidence-based approach for treatment of drug use and drug use disorders through community engagement.

16.126 Expected progress towards the objective is presented in the performance measure below (see figure 16.XXVIII).

Figure 16.XXVIII

Performance measure: beneficiaries in Afghanistan of United Nations Office on Drugs and Crime programmes on alternative development and prevention and treatment of drug use and drug use disorders (cumulative)

Deliverables

16.127 Table 16.13 lists all deliverables of the subprogramme.

Table 16.13

Subprogramme 8: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	20	15	13	13
1. Regional and country programmes on UNODC mandate areas	20	15	13	13
Technical materials (number of materials)	–	7	2	2

4. Seminars on programme development and the 2030 Agenda	–	–	13	13
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services through field office network for approximately 150 Member States and stakeholders on policies, strategies and cooperation frameworks, consultations with Member States and partners on UNODC strategic and programme priorities, new programme initiatives and options, including partnerships; strategic and operational field support and substantive oversight services in UNODC mandate areas.				
D. Communication deliverables				
Outreach programmes, special events and information materials: national campaigns to observe the International Day against Drug Abuse and Illicit Trafficking, World Day against Trafficking in Persons and the International Anti-Corruption Day; and fundraising initiatives and strategic partnerships with international financial institutions, international organizations and the private sector specifically focused on country or regional contexts.				
Digital platforms and multimedia content: UNODC field offices websites.				
E. Enabling deliverables				
Safety and security: safety and security services to approximately 130 physical field office locations globally in 97 countries.				

Subprogramme 9**Component 1, Provision of secretariat services and substantive support to the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice and the United Nations Congress on Crime Prevention and Criminal Justice****Objective**

- 16.128 The objective, to which component 1 of this subprogramme contributes, is to ensure the effective and efficient functioning of the United Nations intergovernmental bodies dealing with issues relating to drugs, crime and terrorism, as well as the effective and efficient functioning of the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC and of the United Nations Congress on Crime Prevention and Criminal Justice in fulfilling their advisory roles.

Strategy

- 16.129 To contribute to the objective, the component will:
- (a) Provide substantive, technical and organizational services to the Commission on Narcotic Drugs and its five subsidiary bodies, to the Commission on Crime Prevention and Criminal Justice and to the United Nations congresses on crime prevention and criminal justice, including the follow-up to the Fourteenth Congress and the implementation of the provisions of its outcome document;
 - (b) Provide support to the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC by facilitating the preparations for and the organization of the formal and informal meetings of the working group.
- 16.130 The above-mentioned work is expected to result in:
- (a) Enhanced cooperation among Member States in accelerating the implementation of international drug policy commitments as well as comprehensive strategies for crime prevention towards social and economic development and integrated approaches to challenges faced by criminal justice systems;
 - (b) Enhanced understanding of Member States of governance and financial matters relating to UNODC;
 - (c) Increased participation by a broad and inclusive group of representatives.

Programme performance in 2022**Strengthened international cooperation to effectively prevent and combat crimes that affect the environment**

- 16.131 In follow-up to the outcome of the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice, the Kyoto Declaration, the Commission on Crime Prevention and Criminal Justice negotiated, at its thirtieth session, the resolution entitled “Preventing and combating crimes that affect the environment”, which was adopted by the General Assembly as resolution [76/185](#). In that resolution, the Assembly called upon the Commission to hold, during the intersessional period, expert discussions on preventing and combating crimes that affect the environment with a view to discussing concrete ways to improve strategies and responses to effectively prevent and combat those crimes and to strengthen international cooperation at the operational level.
- 16.132 In 2022, the component supported the Commission in organizing the expert discussions on crimes that affect the environment, which brought together over 800 participants representing Member

States, United Nations entities, other intergovernmental and international organizations and civil society. The component also coordinated six side events on topics such as illicit financial flows, environmental criminal law, the link between climate change and trafficking in persons and smuggling of migrants, and the prevention and mitigation of illicit financial transactions using blockchain technology.

16.133 Progress towards the objective is presented in the performance measure below (see figure 16.XXIX).

Figure 16.XXIX

Performance measure: Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies

(Percentage)

Planned results for 2024

Result 1: strengthened support to the implementation of international drug policy commitments towards the achievement of the 2030 Agenda

Programme performance in 2022 and target for 2024

16.134 The component’s work contributed to 98 per cent of Member States participating in the meetings of the Commission on Narcotic Drugs expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies, which exceeded the planned target of 80 per cent.

16.135 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.XXX).

Figure 16.XXX

Performance measure: Member States participating in the meetings of the Commission on Narcotic Drugs expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies

(Percentage)

Result 2: strengthened crime prevention, criminal justice and rule of law towards the achievement of the 2030 Agenda through the effective follow-up to the Kyoto Declaration

Programme performance in 2022 and target for 2024

16.136 The component’s work contributed to 98 per cent of Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies, which exceeded the planned target of 75 per cent.

16.137 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 16.XXXI).

Figure 16.XXXI

Performance measure: Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies

(Percentage)

Result 3: accelerated implementation of international drug policy commitments to effectively address and counter the world drug problem

16.138 In 2019, the Commission on Narcotic Drugs adopted the Ministerial Declaration on Strengthening Our Actions at the National, Regional and International Levels to Accelerate the Implementation of Our Joint Commitments to Address and Counter the World Drug Problem, taking stock of the implementation of the commitments made over the past decade to jointly address and counter the world drug problem. In the Ministerial Declaration, Member States resolved to review the progress in implementing all international drug policy commitments, in the Commission on Narcotic Drugs in 2029, with a midterm review in 2024. It is expected that, subject to decisions by Member States, the review will feature a high-level segment and a negotiated outcome document. The component supports the preparatory process for the meeting and its outcome to contribute to the acceleration of the implementation of all international drug policy commitments.

Lessons learned and planned change

16.139 The lesson for the subprogramme, based on feedback from Member States, was that effective implementation of international drug policy commitments requires comprehensive and inclusive participation in the meetings by all delegations and other relevant stakeholders and that hybrid formats may be helpful to this end, including in the lead-up to the midterm review, for which modalities will be defined by Member States. In applying the lesson, the subprogramme will work to provide formats to enable comprehensive participation and meet the needs of Member States.

16.140 Expected progress towards the objective is presented in the performance measure below (see figure 16.XXXII).

Figure 16.XXXII

Subprogramme 9, component 1: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	65	75	66	69
1. Reports to the General Assembly on international cooperation to counter the world drug problem and on crime prevention and criminal justice, including reports on the United Nations congresses on crime prevention and criminal justice	5	6	5	5
2. Notes to the Economic and Social Council on the contribution of the Commission on Narcotic Drugs and of the Commission on Crime Prevention and Criminal Justice to the annual high-level political forum on sustainable development	2	2	2	2
3. Annual reports to the Economic and Social Council on the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice	4	4	4	4
4. Annual reports to the Commission on Crime Prevention and Criminal Justice	12	15	13	14
5. Reports to the Commission on Narcotic Drugs	14	15	14	14
6. Reports and notes by the Secretariat to subsidiary bodies of the Commission on Narcotic Drugs	24	31	24	28
7. Notes by the Secretariat to the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice	2	2	2	2
8. Documentation for ad hoc expert group meetings related to the Commission on Narcotic Drugs	2	–	2	–
Substantive services for meetings (number of three-hour meetings)	154	146	158	154
Meetings of:				
9. The Economic and Social Council	6	6	6	6
10. The Commission on Crime Prevention and Criminal Justice	46	38	46	46
11. The Commission on Narcotic Drugs	46	45	46	46
12. The subsidiary bodies of the Commission on Narcotic Drugs	40	40	40	40
13. The standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC	12	17	16	16
14. Ad hoc expert groups related to the Commission on Narcotic Drugs	4	–	4	–
B. Generation and transfer of knowledge				
Publications (number of publications)	5	5	5	5
15. On the manufacture of narcotic drugs and psychotropic substances and their precursors	1	1	1	1
16. Directory of competent national authorities under the international drug control treaties	1	1	1	1
17. Schedules and tables of the international drug control conventions	3	3	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: substantive and technical advice to the Vienna-based Commissions, representatives of Member States, permanent missions in Vienna and other relevant stakeholders relating to the work of the Commissions; notes verbales as notifications under the international drug control treaties; advice on the follow-up to the mandates contained in the relevant resolutions and decisions adopted by the Commissions.				
Databases and substantive digital materials: database on the manufacture of narcotic drugs and psychotropic substances and their precursors; database on resolutions and decisions by the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice.				
D. Communication deliverables				
Outreach programmes, special events and information materials: special events of the Commissions, including the launch of the annual <i>World Drug Report</i> .				

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Digital platforms and multimedia content: websites for the Commissions, the United Nations congresses on crime prevention and criminal justice and the follow-up to the 2019 ministerial segment of the Commission on Narcotic Drugs; secure web pages for use by the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice and the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC; web stories and social media accounts highlighting key developments in the work of the Commissions.

Component 2, Provision of secretariat services and substantive support to the International Narcotics Control Board

Objective

- 16.142 The objective, to which component 2 of this subprogramme contributes, is to ensure the effective and efficient functioning of the International Narcotics Control Board in fulfilling its treaty-based mandate, through such measures as monitoring and promoting the full implementation of and full compliance with the three international drug control treaties and supporting Member States in implementing their treaty obligations.

Strategy

- 16.143 To contribute to the objective, the component will:
- (a) Provide independent secretariat services and substantive support to the International Narcotics Control Board, including ensuring that the Board is provided with advice on treaty implementation;
 - (b) Raise awareness of Governments and the international community about the implementation of the international drug control conventions, particularly through the publication and dissemination of the treaty-mandated reports of the Board and on the need to develop and implement national drug control policies and regulatory control systems for narcotic drugs, psychotropic substances and precursor chemicals, helping Member States to make progress towards Sustainable Development Goals 3, 10, 11 and 16;
 - (c) Support Governments in meeting their treaty-based obligations for reporting to the Board, in monitoring the international movement of precursors and the illicit use of internationally controlled and non-scheduled precursors as well as equipment, and in promoting cooperation and the exchange of import and export authorizations, including through the INCB Learning programme and the International Import and Export Authorization System (I2ES), as well as information on licit and illicit activity, through electronic means such as the Pre-Export Notification Online (PEN Online) system and the Precursors Incident Communication System (PICS), projects Prism and Cohesion and task force efforts; and support Governments in enhancing cooperation with relevant private sector entities, helping Member States to make progress towards Goals 3, 11, 16 and 17;
 - (d) Provide technical advice to the Board in assessing substances for scheduling recommendations under the 1988 Convention;
 - (e) Build the capacity of and enhance cooperation among law enforcement, customs, postal and other national agencies to ensure the availability of controlled substances for licit purposes and to safely detect and interdict controlled substances, new psychoactive substances and non-medical synthetic opioids, through the Global Rapid Interdiction of Dangerous Substances (GRIDS) Programme, helping Member States to make progress towards Goals 3, 16 and 17;
 - (f) Enhance preparedness for and responses to emergency situations by raising awareness and training competent national authorities on identifying and responding to changing patterns in

trafficking in and abuse of controlled substances, new psychoactive substances and non-medical synthetic opioids that may take place owing to emergency situations and on the implementation of the simplified control measures during emergency situations.

16.144 The above-mentioned work is expected to result in:

- (a) Advancement of the Board's dialogue with Governments to promote the implementation of the drug control conventions and the Board's recommendations and engagement on treaty-related matters;
- (b) Effective functioning of the international system for licit trade in controlled substances;
- (c) More accurate identification and reporting by Governments on their needs for and consumption of narcotic drugs and psychotropic substances for medical and scientific purposes;
- (d) Increased availability of and access to controlled substances, with improved cooperation among Member States to ensure a steady balance between the supply of and demand for controlled substances;
- (e) Decreased availability of precursor chemicals and essential equipment for the illicit manufacture of drugs;
- (f) Reduction in the trafficking in and misuse of internationally controlled substances and new psychoactive substances;
- (g) Improved response of Member States to changes related to emergency situations and their impacts on the demand for and trafficking of new psychoactive substances and non-medical synthetic opioids;
- (h) Improved response by Member States to emergency situations requiring expedited trade in and humanitarian supply of controlled substances for medical purposes.

Programme performance in 2022

Broadened knowledge base on adequate use of narcotic drugs and psychotropic substances for medical and scientific purposes, while preventing their diversion

16.145 The component supports the International Narcotics Control Board in maintaining ongoing dialogue with Member States, in providing guidance, in particular through the work of the Board's Standing Committee on Estimates, and in seeking inputs from independent external experts, with the aim of managing the system of estimates and assessments and facilitating the forecasting of countries' annual licit needs for narcotic drugs and psychotropic substances. In 2022, the component organized an expert group meeting on opioid availability and an expert group meeting on the use of cannabis for medical purposes. Through the INCB Learning programme, the component developed an e-learning module that builds the knowledge of Governments on how to overcome obstacles to adequate availability. Furthermore, the component collected and analysed data from Member States on the situation concerning the availability of controlled substances. On that topic, the component drafted a supplement to the Board's 2022 annual report and supported the President of the Board in special events of the Commission on Narcotic Drugs.

16.146 Progress towards the objective is presented in the performance measure below (see figure 16.XXXIII).

Figure 16.XXXIII
Performance measure: number of countries and territories enrolled in International Narcotics Control Board e-learning modules (cumulative)

Planned results for 2024

Result 1: uninterrupted trade in internationally controlled drugs during emergencies and other urgent situations

Programme performance in 2022 and target for 2024

16.147 The component’s work contributed to facilitating the supply of controlled substances to sites of emergencies by aligning its communication strategy on emergency situations with the Global Disaster Alert and Response Coordination System of the Office for the Coordination of Humanitarian Affairs and issuing notifications to all competent authorities in the case of red alerts, which did not meet the planned target of Member States adopting updated guidelines for the international provision of controlled medicines for emergency medical care. The target was not met owing to external constraints faced by partners.

16.148 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 16.15).

Table 16.15
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Recognition that the WHO/INCB model guidelines should be updated to better guide Member States in ensuring provision of controlled drugs during emergency situations such as COVID-19	INCB guidance ^a developed and INCB/WHO/UNODC joint statement issued	Notifications issued to Member States to help facilitate the supply of controlled substances to emergency sites	Awareness-raising on the use of the INCB guidance and WHO/INCB model guidelines	Reviews of the implementation of simplified control measures during emergency situations conducted by INCB and other relevant international bodies

Abbreviation: INCB, International Narcotics Control Board.

^a International Narcotics Control Board, “Lessons from countries and humanitarian aid organizations in facilitating the timely supply of controlled substances during emergency situations”, August 2021.

Result 2: reduced availability of non-scheduled chemicals, designer precursors, material and equipment used in the manufacture of illicit drugs

Programme performance in 2022 and target for 2024

- 16.149 The subprogramme’s work contributed to the efforts of Member States in monitoring movements of precursors and the use of new non-scheduled chemicals for the illicit manufacture of drugs by making a catalogue of measures available to Member States, publishing a guidance document on article 13 and equipment, and raising awareness through a Commission on Narcotic Drugs side event, which met the planned target.
- 16.150 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 16.16).

Table 16.16
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Enhanced knowledge of Member States on prevention and investigation of the diversion of materials and equipment essential for illicit drug manufacture through INCB guidelines	2 global consultative meetings and side event of the Commission on Narcotic Drugs on non-scheduled chemicals Guidelines to Prevent and Investigate the Diversion of Materials and Equipment Essential for Illicit Drug Manufacture in the context of article 13 of the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988 available in all official languages of the United Nations	Catalogue of measures addressing non-scheduled chemicals available to Member States INCB guidance document on article 13 and equipment available to policymakers at the Commission on Narcotic Drugs Member States have increased awareness of various options and approaches to prevent equipment from being used in illicit drug manufacture and to increase operational use of article 13	Member States are able to address the proliferation of non-scheduled chemicals and apply article 13 and the technical documents, including through cooperation with industry	Member States make progress in engaging industry in preventing the proliferation of non-scheduled chemicals and the use of equipment for illicit drug manufacture

Result 3: relevant national industrial sectors proactively cooperate with competent national authorities in reducing the risk of the industrial sector being exploited by drug traffickers

- 16.151 Drug traffickers are substituting controlled substances with emerging non-controlled substances that are licitly available on national and international markets. This applies to both precursor chemicals, where alternative and substitute chemicals are emerging in the illicit manufacture of drugs, and end products where controlled drugs are being replaced by new psychoactive substances. The component has developed awareness-raising and guidance materials for use by competent authorities to engage with their respective national industrial sectors on non-controlled substances. It has held events with

the participation of both public and private sector partners and has also facilitated the twinning of countries with an established industry cooperation framework with countries interested in developing such a framework.

Lessons learned and planned change

16.152 The lesson for the component was the importance of voluntary measures taken by an extended range of relevant industrial sectors and the need to give greater attention to supporting Governments in engaging with these sectors as well as in mapping national industry landscapes. In applying the lesson, the component will support the development of sustainable national preventive public-private partnerships involving the industrial sectors most at risk, and to that end will engage in national mapping exercises. With the technical knowledge and partnerships of the subprogramme, the mapping will be leveraged to support national industrial sectors in identifying suspicious orders of substances, including those that have no current industrial or pharmaceutical use, and progressively developing a preventive “know your customer” approach to their business.

16.153 Expected progress towards the objective is presented in the performance measure below (see figure 16.XXXIV).

Figure 16.XXXIV

Performance measure: number of countries that have conducted national industry mapping exercises (annual)

Deliverables

16.154 Table 16.17 lists all deliverables of the component.

Table 16.17

Subprogramme 9, component 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	52	39	52	52
1. Annual report of the International Narcotics Control Board	1	1	1	1
2. Report of the International Narcotics Control Board on the implementation of article 12 of the 1988 Convention, on narcotic drugs and on psychotropic substances	3	4	3	3
3. Reports on the supervision of the movement of narcotic drugs, psychotropic substances and precursor chemicals for licit purposes and on the supply of opiate raw materials and demand for opiates for medical and scientific purposes	8	8	8	8

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
4. Report on intersessional developments, report of the Committee on Finance and Administration, report of the Standing Committee on Estimates and report on the implementation of decisions taken at its previous session, and reports on matters examined and decisions taken by the International Narcotics Control Board	11	12	11	11
5. Estimated requirements for narcotic drugs, assessments of requirements for psychotropic substances, and assessments of licit requirements for amphetamine-type stimulant precursors	6	6	6	6
6. Evaluation of overall treaty compliance by Governments, report on measures to ensure the execution of the international drug control treaties, reports on missions conducted by the International Narcotics Control Board, and specific studies on and evaluation of implementation by Member States of recommendations made by the Board	23	8	23	23
Substantive services for meetings (number of three-hour meetings)	98	98	98	98
Meetings of:				
7. The International Narcotics Control Board and its Standing Committee on Estimates	60	58	60	60
8. Ad hoc expert groups to advise the International Narcotics Control Board	18	14	18	18
9. The International Narcotics Control Board with Member States, international and regional organizations, the private sector and academia, as appropriate, on the Board's global projects	20	26	20	20
Conference and secretariat services for meetings (number of three-hour meetings)	98	98	98	98
Meetings of:				
10. The International Narcotics Control Board and its Standing Committee on Estimates	60	58	60	60
11. Ad hoc expert groups to advise the International Narcotics Control Board	18	14	18	18
12. The International Narcotics Control Board with Member States, international and regional organizations, the private sector and academia, as appropriate, on the Board's global projects	20	26	20	20
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	3	3	3	3
13. To support government compliance with the international drug control conventions	3	3	3	3
Seminars, workshops and training events (number of days)	4	39	4	4
14. Training courses on compliance with drug control treaties and availability of internationally controlled substances for licit purposes while preventing diversion and abuse	4	39	4	4
Technical materials (number of materials)	96	92	96	96
15. Estimates and assessments of medical and scientific requirements for narcotic drugs and psychotropic substances	64	64	64	64
16. Forms for treaty-mandated reporting by Member States on narcotic drugs, psychotropic substances and precursor chemicals under the 1961, 1971 and 1988 Conventions and related Economic and Social Council resolutions, and annual update of the lists of narcotic drugs, psychotropic substances and precursor chemicals controlled under the three conventions	12	12	12	12
17. Tables of countries that require authorizations for the import of substances listed in Schedules III and IV of the 1971 Convention, and the special international surveillance list of non-scheduled chemicals	5	5	5	5
18. Training materials for national authorities on implementing the provisions of the three drug-control conventions	15	10	15	15
19. E-learning modules	–	1	–	–

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: substantive support to country missions of the International Narcotics Control Board to review implementation of the conventions and to make recommendations to Governments aimed at improving treaty adherence and implementation, with a view to ensuring the availability of internationally controlled substances while preventing diversion, trafficking and abuse; consultations with Member States on the control of narcotic drugs, psychotropic substances and precursor chemicals, as well as on issues relating to non-scheduled chemicals, including designer precursors, equipment and materials used in illicit drug manufacture, and new psychoactive substances and synthetic opioids.

Databases and substantive digital materials: International Drug Control System Database used by the International Narcotics Control Board secretariat; International Import and Export Authorization System (I2ES), used by over 70 Governments; Pre-Export Notification Online (PEN Online) system, used by 167 Governments; Precursors Incident Communication System (PICS), used by approximately 130 Governments; Project Ion Incident Communication System (IONICS), operating under the Global Rapid Interdiction of Dangerous Substances (GRIDS) Programme, used by around 157 Governments.

D. Communication deliverables

Outreach programmes, special events and information materials: side events during intergovernmental meetings and meetings of the International Narcotics Control Board with Member States and civil society.

External and media relations: press releases and press conferences on activities of the International Narcotics Control Board; responses to media requests; statements by members of the Board at intergovernmental meetings; newsletters for Governments; dissemination of recommendations and positions of the Board to decision makers and the general public.

Digital platforms and multimedia content: website of the International Narcotics Control Board and institutional social media accounts; secure web pages for Board members and competent national authorities.

B. Proposed post and non-post resource requirements for 2024

Overview

16.155 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 16.18 to 16.20.

Table 16.18

16.156 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 16.21 to 16.23 and figure 16.XXXV.

16.157 As reflected in tables 16.21 (1) and 16.22 (1), the overall resources proposed for 2024 amount to \$22,704,000 before recosting, reflecting a net decrease of \$406,500 (or 1.8 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 16.XXXV
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

16.158 As reflected in table 16.21 (1), resource changes reflect a net decrease of \$406,500 under subprogramme 1, related to the removal of one-time provisions under other staff costs (\$371,200), travel of staff (\$31,300) and contractual services (\$4,000) related to the non-recurrent resource requirements for the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes, approved pursuant to General Assembly resolution [75/282](#).

Other changes

16.159 As reflected in table 16.21 (1), the net effect of the proposed changes is cost-neutral and relates mainly to the operational requirements projected for 2024.

Extrabudgetary resources

16.160 As reflected in tables 16.21 (2) and 16.22 (2), UNODC receives both cash and in-kind contributions, which complement regular budget resources and continue to be vital for the delivery of its mandates. In 2024, projected extrabudgetary resources (cash contributions) amount to \$387,824,300.

16.161 The resources will be used mainly to carry out technical cooperation projects, at the request of Member States.

16.162 The extrabudgetary resources under the present section are subject to the oversight of the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice, pursuant to General Assembly resolutions [46/185 C](#) and [61/252](#), section XI.

16.163 Anticipated in-kind contributions will provide for donated right of use for 16 premises at the following locations: Brasília; Libreville; Rome; Turin, Italy; Tripoli; Mexico City; Abuja; Lagos, Nigeria; Islamabad; Panama City; Lima; Manila; Dakar; Belgrade; Ashgabat; and Abu Dhabi, with

an estimated value of \$1,500,000, and other services such as expert advice, use of training facilities and provision of supplies and equipment, with an estimated value of \$100,000.

Polymaking organs

16.164 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies, and intergovernmental processes the servicing of which is the responsibility of UNODC. The provisions for experts serving on committees in their individual capacity are in accordance with General Assembly resolution 2491 (XXIII), as amended by resolutions 41/176, 42/25, section VI, and 43/217, section IX, while the provisions for members of the functional commissions are in accordance with Assembly resolutions 1798 (XVII), 2128 (XX) and 2245 (XXI). Table 16.24 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 16.24

(Thousands of United States dollars)

<i>Polymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
United Nations congresses on crime prevention and criminal justice	A forum for: (a) the exchange of views among States, intergovernmental organizations, non-governmental organizations and individual experts representing various professions and disciplines; (b) the exchange of experience in research, law and policy development; (c) the identification of emerging trends and issues in crime prevention and criminal justice; (d) the provision of advice and comments on selected matters submitted to it by the Commission on Crime Prevention and Criminal Justice; and (e) the submission of suggestions for the consideration of the Commission regarding possible subjects for the programme of work.	Mandate: General Assembly resolutions 46/152, 56/119 and 74/171 and decision 74/550 B Membership: 193 government officials Number of sessions in 2024: –	–	–
Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes	Established to elaborate a comprehensive international convention on countering the use of ICT for criminal purposes, taking into full consideration existing international instruments and efforts at the national, regional and international levels on combating the use of ICT for criminal purposes, in particular the work and outcomes of the Expert Group to Conduct a Comprehensive Study on Cybercrime.	Mandate: General Assembly resolutions 74/247 and 75/282 Membership: 193 government officials Number of sessions in 2024: 1	–	–
Commission on Crime Prevention and Criminal Justice	Functional commission of the Economic and Social Council. It is the principal polymaking body of the United Nations with respect to crime prevention and criminal justice. It is entrusted with the functions of a preparatory body for the United Nations congresses on crime prevention and criminal justice. The Commission is the governing body of the UNODC crime programme and is authorized to approve the budget of the United Nations Crime Prevention and Criminal Justice Fund.	Mandate: Economic and Social Council resolution 1992/1 Membership: 40 government officials Number of sessions in 2024: 2	62.4	62.4

Section 16 International drug control, crime and terrorism prevention and criminal justice

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Commission on Narcotic Drugs and its subsidiary bodies	<p>Functional commission of the Economic and Social Council. It is the principal policymaking body of the United Nations with respect to international drug control and has specific mandates deriving from international drug control treaties. The Commission is the governing body of the UNODC drug programme, and is authorized to approve the budget of the Fund of the United Nations International Drug Control Programme.</p> <p>It has two subsidiary bodies established by the Council: (a) the Subcommission on Illicit Drug Traffic and Related Matters in the Near and Middle East, with 23 members; and (b) meetings of the heads of national drug law enforcement agencies, Africa, Asia and the Pacific, Europe, and Latin America and the Caribbean, whose membership is based on that of the relevant regional commission.</p>	<p>Mandate: Economic and Social Council resolution 1999/30</p> <p>Membership: 53 government officials</p> <p>Number of sessions in 2024: 2</p>	180.1	180.1
Standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime	<p>Established to improve the governance and financial situation of UNODC. It prepares decisions and action by the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice in a number of key areas, including strategic and budgetary matters, the programmatic work of UNODC and its financial situation, evaluation and oversight, and improving the methods of work of the Commissions.</p>	<p>Mandate: Economic and Social Council decisions 2009/251 and 2022/316</p> <p>Membership: N/A (open-ended)</p> <p>Number of sessions in 2024: 1</p>	–	–
International Narcotics Control Board	<p>A treaty-based, quasi-judicial body responsible for evaluating, promoting, assisting Governments in and monitoring their compliance with the provisions of the three international drug control treaties (the Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol, the Convention on Psychotropic Substances of 1971 and the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988). The Board assesses national and international drug control efforts, establishes and maintains an ongoing dialogue with Governments, conducts technical training and publishes various annual and technical reports mandated under the Conventions.</p> <p>The Board continually examines the functioning of the international drug control regime, identifies shortcomings in its implementation by Governments party to the three main international drug control treaties and formulates recommendations for further action addressed to national drug control agencies and relevant international and regional organizations. Those recommendations are included every year in the annual report of the Board, for dissemination to all Governments. In addition, the Board produces an annual report on the implementation of article 12 of the 1988 Convention and two annual technical publications, on narcotic drugs and psychotropic substances.</p>	<p>Mandate: General Assembly resolution 1774 (XVII); Economic and Social Council resolutions 1966/1106 (XL) and 1967/1196 (XLII); and the 1961 Convention as amended by the 1972 Protocol, article 9</p> <p>Membership: 13 members</p> <p>Number of sessions in 2024: 3</p>	572.8	572.8

Part IV International cooperation for development

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Conference of the Parties to the United Nations Convention against Transnational Organized Crime	Established to improve the capacity of States parties to combat transnational organized crime and to promote and review the implementation of the United Nations Convention against Transnational Organized Crime and the Protocols thereto. It comprises of the following working groups to assist it in promoting and reviewing the implementation of the Convention and the Protocols thereto (listed in chronological order of establishment): the Working Group of Government Experts on Technical Assistance; the Working Group on International Cooperation; the Working Group on Trafficking in Persons; the Working Group on the Smuggling of Migrants; and the Working Group on Firearms.	Mandate: General Assembly resolutions 55/25 and 55/255 ; the United Nations Convention against Transnational Organized Crime, article 32, and rule 3 of the rules of procedure for the Conference Membership: 191 government officials Number of sessions in 2024: 1	–	–
Conference of the States Parties to the United Nations Convention against Corruption and its subsidiary bodies	Established to improve the capacity of and cooperation between States parties to achieve the objectives set forth in the United Nations Convention against Corruption and to promote and review its implementation. It provides policy guidance to UNODC for the development and execution of activities related to combating corruption. The Conference has established the Implementation Review Group and two open-ended intergovernmental working groups to further the implementation of specific aspects of the Convention (namely, asset recovery and prevention), as well as open-ended intergovernmental expert meetings on international cooperation.	Mandate: General Assembly resolution 58/4 ; the United Nations Convention against Corruption, article 63; and rule 3 of the rules of procedure for the Conference Membership: 189 government officials Number of sessions in 2024: –	–	–
Total			815.3	815.3

16.165 The proposed regular budget resources for 2024 amount to \$815,300 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 16.25.

Executive direction and management

- 16.166 The executive direction and management component comprises the Office of the Executive Director and the Independent Evaluation Section.
- 16.167 The Executive Director is responsible for coordinating and providing leadership for all United Nations drug control and crime prevention activities to ensure the coherence of actions within the programme and the coordination, complementarities and non-duplication of such activities across the United Nations system. In that capacity, the Executive Director participates in the work of the United Nations System Chief Executives Board for Coordination. The Executive Director acts on behalf of the Secretary-General in fulfilling the responsibility that devolves upon the Executive Director under the terms of international treaties and resolutions of United Nations organs relating to international drug control or crime prevention. The responsibilities are combined with those of the Director-General of the United Nations Office at Vienna. The Office of the Executive Director is integrated with that of the Director-General and is supported with resources from the regular budget under section 1, Overall policymaking, direction and coordination.
- 16.168 The core functions of the Office of the Executive Director are: (a) to assist the Executive Director in the overall executive direction and management of UNODC; (b) to facilitate inter-office cooperation in the implementation of workplans and administrative matters; (c) to ensure the timely implementation of decisions and the coordination of inputs from all organizational units to the activities of the Office; and (d) to support the Executive Director in the overall leadership and coordination of the activities of UNODC with extensive research and substantive information to advise on issues of policy, resources and results management.
- 16.169 The Office of the Executive Director also coordinates on cross-cutting institutional issues, such as the systematic inclusion of gender equality aspects in all areas of UNODC work and reaching gender parity in staff. The Gender Team in the Office of the Executive Director coordinates the implementation of the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and the Empowerment of Women (2022–2026) to ensure delivery of United Nations commitments on gender equality and the empowerment of women, including Sustainable Development Goal 5, through a wide range of activities, including supporting field offices to contextualize gender commitments to their setting, ensuring that institutional mechanisms on gender mainstreaming are efficient and providing capacity-building for personnel to further strengthen capacity on gender issues across the UNODC programme of work. The United Nations Office at Vienna and UNODC continue to recognize high-impact policies and programmes on gender issues through an annual Gender Award and have strengthened their efforts on male engagement to promote gender equality and women's empowerment.
- 16.170 The Independent Evaluation Section provides evaluation-based knowledge for decision-making to the Executive Director and Member States.
- 16.171 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the United Nations Office at Vienna and UNODC are integrating environmental management practices into their operations.
- 16.172 Information on the timely submission of documentation and advance booking for air travel is reflected in table 16.26. The low travel compliance rate in 2022 (25 per cent) was still due to continued global uncertainty caused by the COVID-19 pandemic, which also affected event planning and resulted in the late nomination of travellers and the late booking of travel. Compliance rates continue to be monitored and further awareness-raising sessions will be held with the staff at large.

Table 16.26
Compliance rate

Air tickets purchased at least 2 weeks before the commencement of travel	19	18	25	100	100

16.173 The proposed regular budget resources for 2024 amount to \$840,500 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 16.27 and figure 16.XXXVI.

Table 16.27

Extrabudgetary resources

- 16.174 Extrabudgetary resources for the component are estimated at \$4,617,500 and would, under the Office of the Executive Director, support the implementation of the Strategy and Action Plan for Gender Equality and the Empowerment of Women (2022–2026). Under the Independent Evaluation Section, the resources would provide for continued investments in innovative evaluation products and services, national evaluation capacity-building, knowledge management, communication and information technology tools. The expected increase of \$195,600 is due mainly to the increased level of activities in the areas of evaluation and gender mainstreaming.

Programme of work**Subprogramme 1****Countering transnational organized crime**

- 16.175 The proposed regular budget resources for 2024 amount to \$3,531,800 and reflect a decrease of \$406,500 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 16.158.
- 16.176 Additional details on the distribution of the proposed resources for 2024 are reflected in table 16.28 and figure 16.XXXVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.177 Extrabudgetary resources for the subprogramme are estimated at \$152,931,200 and would provide for legal advisory services and other technical cooperation activities to assist countries in implementing the United Nations Convention against Transnational Organized Crime and the Protocols thereto and the international drug control conventions, as well as to make further progress towards the achievement of Sustainable Development Goal 16, relating to peace, justice and strong institutions. The expected increase of \$7,548,600 is due mainly to the increased level of activities in the area of countering transnational organized crime.

Subprogramme 2

A comprehensive and balanced approach to counter the world drug problem

16.178 The proposed regular budget resources for 2024 amount to \$775,800 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 16.29 and figure 16.XXXVIII.

Subprogramme 2: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.179 Extrabudgetary resources for the subprogramme are estimated at \$66,928,700 and would provide effective, comprehensive and balanced responses to the world drug problem in compliance with the three drug control conventions and other relevant United Nations treaties through normative and technical cooperation. The resources would also provide for advisory services and field projects at the global, regional and national levels to support Member States on evidence-based drug prevention, treatment and rehabilitation, HIV/AIDS prevention, alternative development and sustainable livelihoods, including new initiatives against organized wildlife and environmental crime. The expected increase of \$3,307,000 is due mainly to the increased level of activities to counter the world drug problem.

**Subprogramme 3
Countering corruption**

16.180 The proposed regular budget resources for 2024 amount to \$2,930,300 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 16.30 and figure 16.XXXIX.

Table 16.30

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.181 Extrabudgetary resources for the subprogramme are estimated at \$25,956,100 and would provide for a broad set of advisory services, training courses, seminars and workshops, knowledge products and tools, as well as field projects, to support Member States in the ratification and implementation of the United Nations Convention against Corruption. The expected increase of \$1,279,900 is due mainly to the increased level of activities on prevention and combating corruption.

Subprogramme 4 Terrorism prevention

16.182 The proposed regular budget resources for 2024 amount to \$1,376,500 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 16.31 and figure 16.XL.

Subprogramme 4: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.183 Extrabudgetary resources for the subprogramme are estimated at \$17,369,000 and would provide for legal and capacity-building technical assistance on the ratification and implementation of the international legal instruments against terrorism in order to promote and strengthen criminal justice

responses to terrorism in accordance with international human rights law and the rule of law. The expected increase of \$855,600 is due mainly to the increased level of activities in the area of terrorism prevention.

Subprogramme 5 Justice

16.184 The proposed regular budget resources for 2024 amount to \$1,392,200 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 16.32 and figure 16.XLI.

Subprogramme 5: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.185 Extrabudgetary resources for the subprogramme are estimated at \$58,376,200 and would provide support to Member States in their efforts to develop effective strategies, policies and programmes to prevent crime and to improve criminal justice systems in line with international standards and norms. Examples of areas of work include the treatment of prisoners, the prevention and addressing of violence against children and women, legal aid, women in prisons and maritime crime. The expected increase of \$2,883,500 is due mainly to the increased level of activities in the area of criminal justice and crime prevention.

**Subprogramme 6
Research, trend analysis and forensics**

16.186 The proposed regular budget resources for 2024 amount to \$3,162,600 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 16.33 and figure 16.XLII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.187 Extrabudgetary resources for the subprogramme are estimated at \$28,621,900 and would support studies and in-depth global analyses of emerging transnational crime threats, including monitoring and analysis of migrant smuggling networks and the involvement of organized crime in smuggling. These resources would also be used to support research work for the *World Wildlife Crime Report* and the *Global Study on Homicide*, as well as to increase the availability and quality of comparable and real-time data on drug and crime problems using innovative methods and new technologies. These resources would also contribute to strengthening the technical and forensic capacity of Member States through quality assurance support, laboratory training and assistance in the creation of early warning systems, especially for new psychoactive substances. In addition, these resources would address an expanded mandate and cover a number of forensic issues in the drug and crime segments, with greater emphasis on laboratory research and monitoring activities in support of drug trend analysis and surveys. The increase of \$1,398,500 is due mainly to the increased level of activities in the area of research, trend analysis and forensics.

**Subprogramme 7
Policy support**

16.188 The proposed regular budget resources for 2024 amount to \$1,085,100 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the resources for 2024 are reflected in table 16.34 and figure 16.XLIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.189 Extrabudgetary resources for the subprogramme are estimated at \$8,145,700 and would provide for, inter alia, the enhancement of communication and public information, the training of UNODC staff on results-based management, the operation of the Programme Review Committee and travel costs for engagement in relevant inter-agency forums. The increase of \$383,100 is due mainly to the increased level of activities in the areas of policy support, partnership engagement and external relationships.

Subprogramme 8 Technical cooperation and field support

16.190 The proposed regular budget resources for 2024 amount to \$607,900 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 16.35 and figure 16.XLIV.

Extrabudgetary resources

16.191 Extrabudgetary resources for the subprogramme are estimated at \$12,692,800 and would support integrated programming and cross-sectoral technical cooperation, strategic direction, monitoring and results-oriented reporting of UNODC field-based programmes, as well as field security support.

The increase of \$519,600 is due mainly to the increased level of activities in support of integrated programming and cross-sectoral technical cooperation.

Subprogramme 9 Provision of secretariat services and substantive support to the United Nations intergovernmental bodies, the International Narcotics Control Board and the United Nations Congress on Crime Prevention and Criminal Justice

16.192 The proposed regular budget resources for 2024 amount to \$5,722,700 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 16.36 and figure 16.XLV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

16.193 Extrabudgetary resources for the subprogramme are estimated at \$6,844,900 and would support the work of intergovernmental bodies and activities related to new psychoactive substances, reduced trafficking in dangerous, non-medical synthetic opioids and other dangerous new psychoactive substances and limiting their supply to consumer markets. The increase of \$338,300 is due mainly to the increased level of activities in support of the prevention of trafficking in dangerous non-medical synthetic opioids and other new psychoactive substances as well as relevant precursors.

Programme support

16.194 The proposed regular budget resources for 2024 amount to \$463,300 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 16.37 and figure 16.XLVI.

Extrabudgetary resources

16.195 Extrabudgetary resources for the component are estimated at \$5,340,300 and would provide for the provision of software products to Member States within the thematic areas of the substantive mandates of UNODC. The increase of \$264,000 is due mainly to the increased provision of software products to Member States.

Annex I

Organizational structure and post distribution for 2024

Charts showing the organizational structure of the United Nations Office on Drugs and Crime (UNODC) are presented below. Section A of the present annex reproduces the approved organizational structure for 2023. Section B presents the proposed organizational structure for 2024.

Justification for the proposed changes

In line with UNODC Strategy 2021–2025 and the regional visions, in order to support the delivery of more agile field-based technical assistance, UNODC is proposing an internal realignment of the Corruption and Economic Crime Branch. Since its establishment in 2010, the Branch has seen significant changes and expansion. For the portfolio to continue to grow and build on the momentum created by the special session of the General Assembly against corruption, the ninth session of the Conference of the States Parties to the United Nations Convention against Corruption, the Summit for Democracy and other high-level forums, the new proposed structure is as follows:

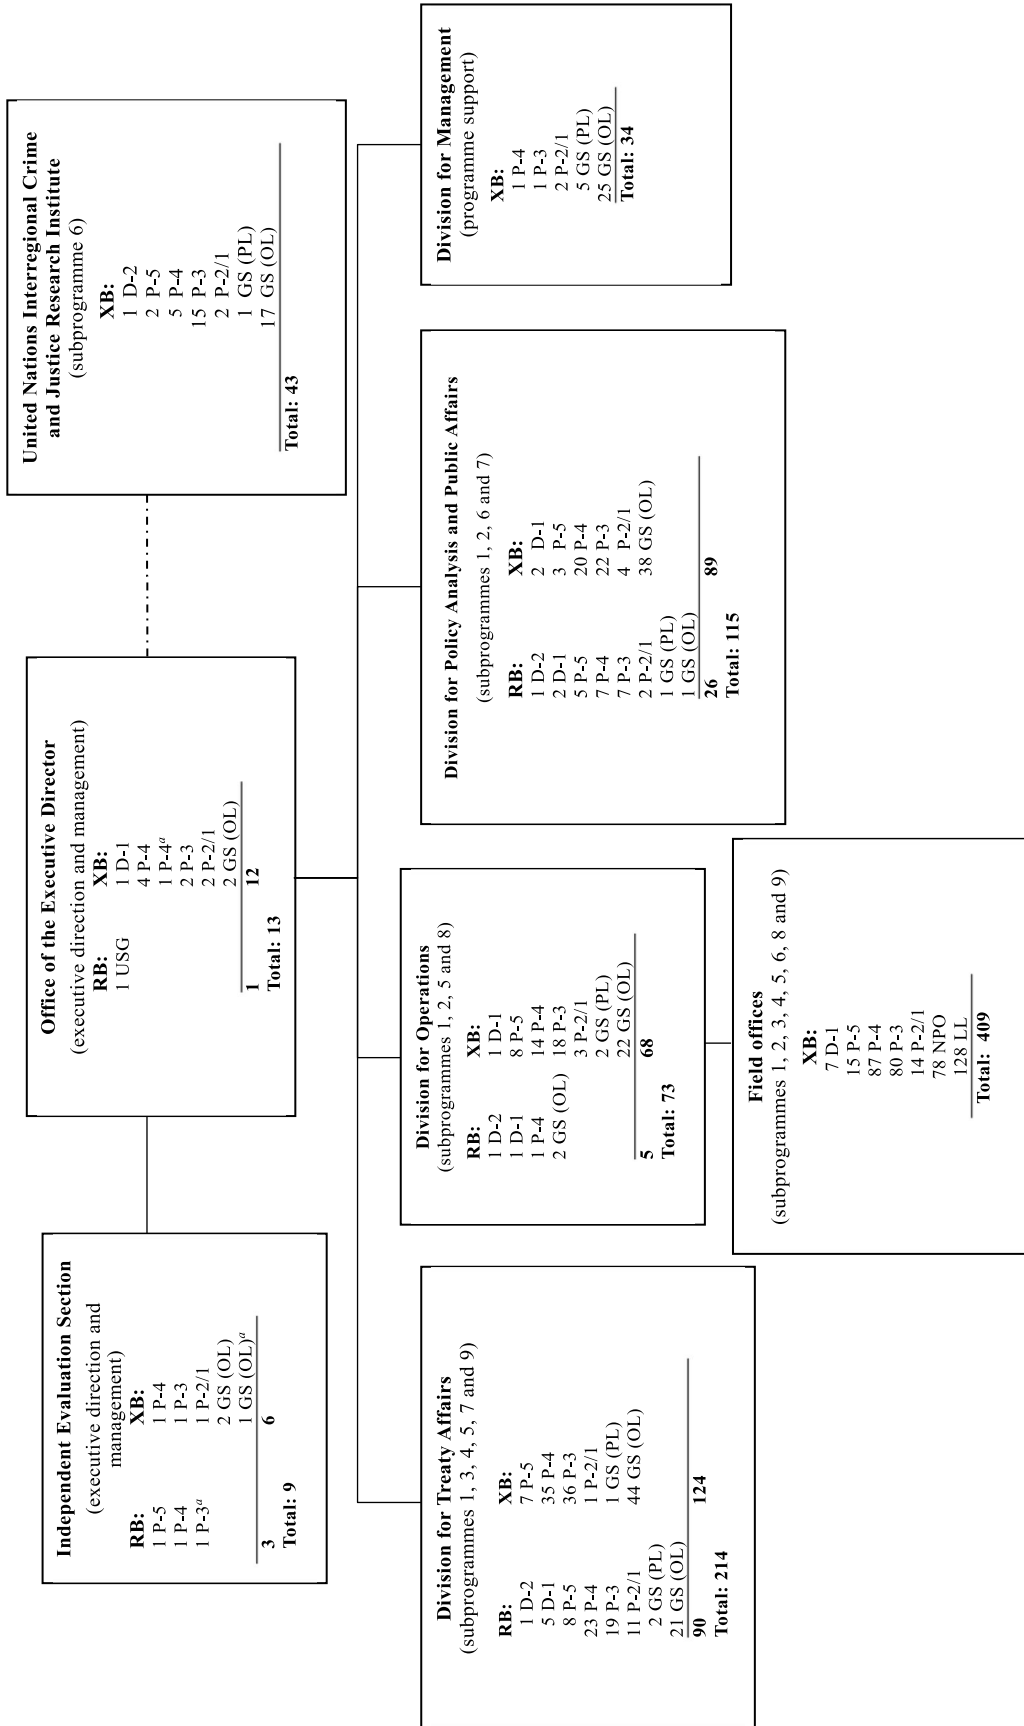

(a) The Conference Support Section will be renamed the Convention Support Section and will be responsible for the servicing of the sessions of the Conference of the States Parties to the United Nations Convention against Corruption, the Mechanism for the Review of Implementation of the United Nations Convention against Corruption and the working groups on asset recovery and international cooperation. It will also serve as the secretariat to the Global Operational Network of Anti-Corruption Law Enforcement Authorities (GlobE Network);

(b) The Implementation Support Section will be renamed the Thematic Support Section and will be responsible for the management and conceptualization of thematic and cross-divisional workstreams in the area of corruption prevention (e.g. education, youth, the private sector, corruption and the environment, corruption and sports, and partnerships with supreme audit institutions and parliamentarians);

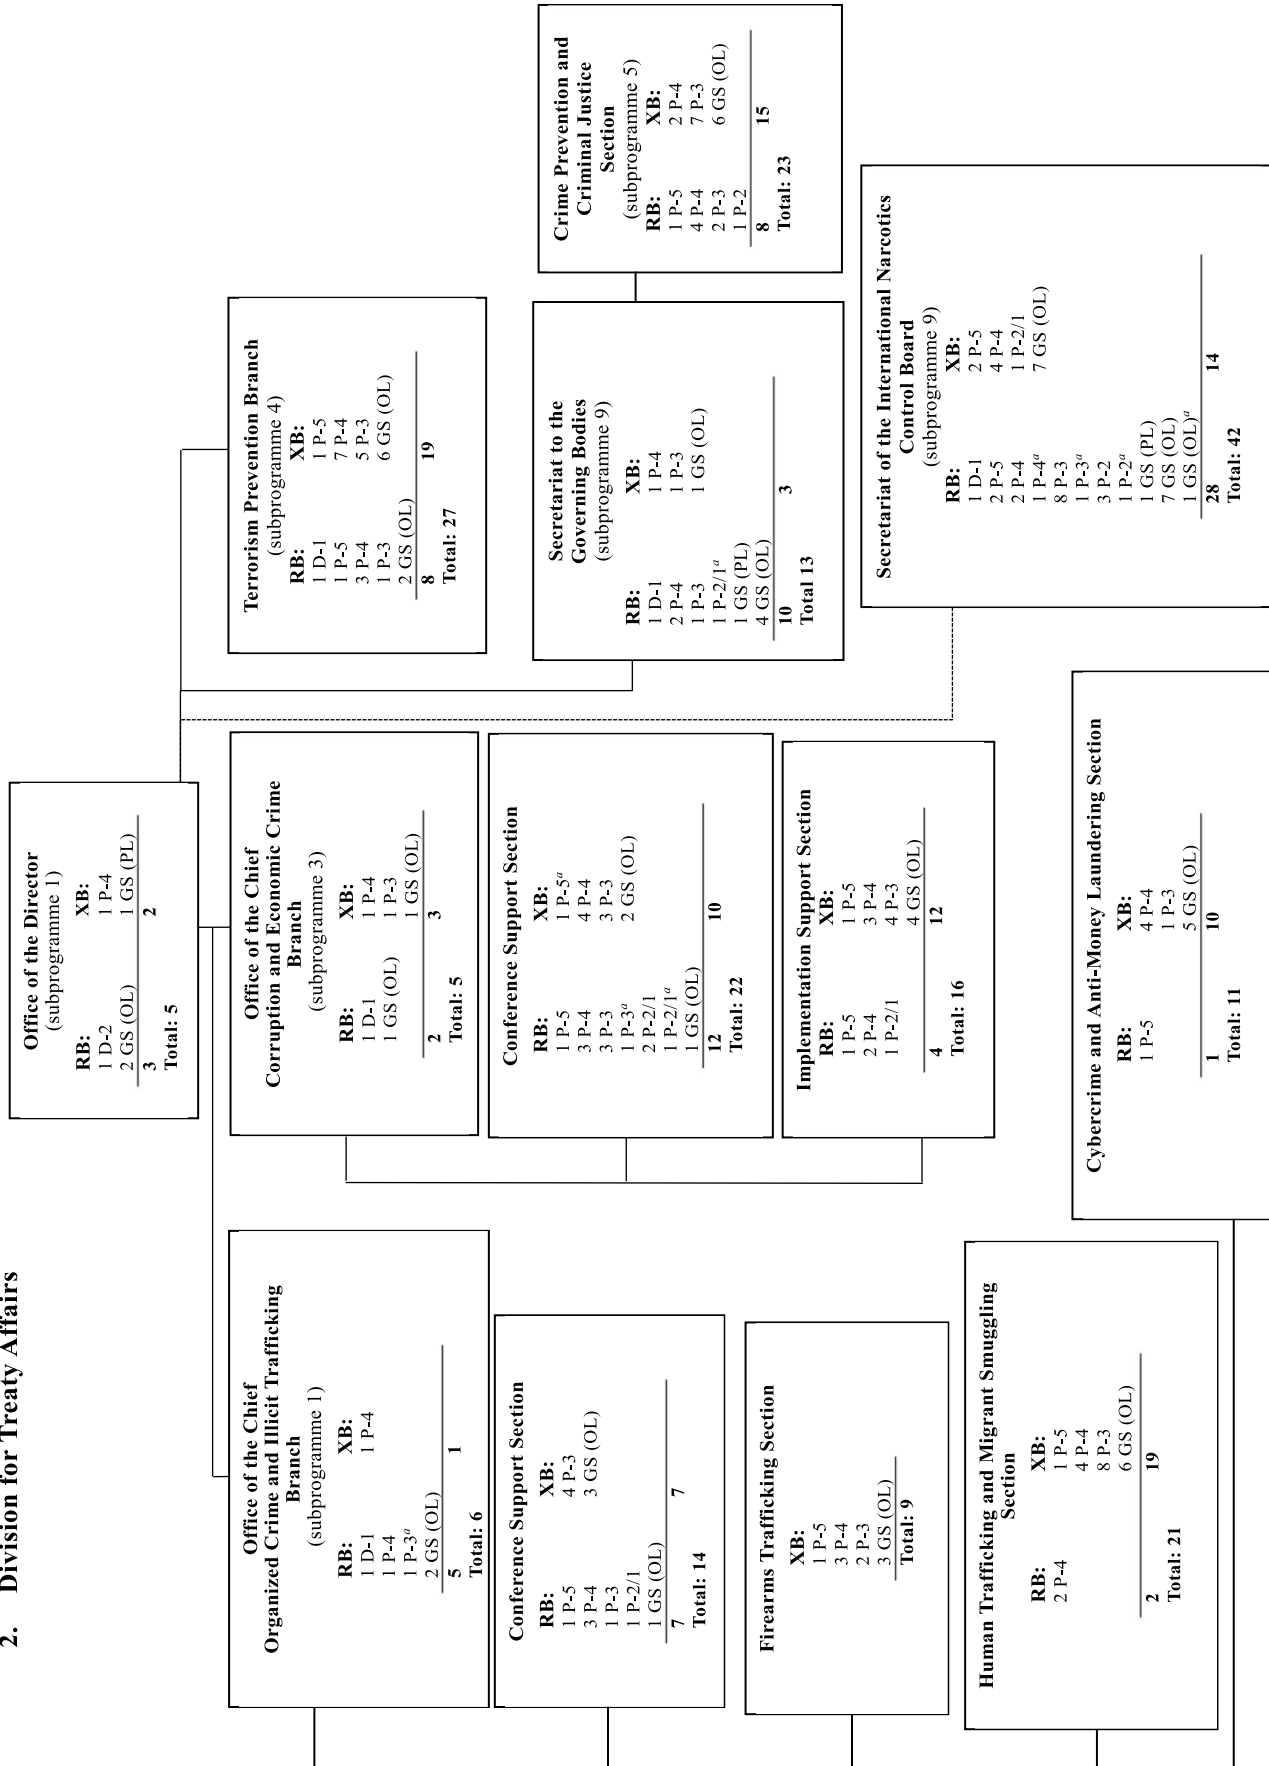

(c) A new Field Support Section will be established to coordinate all field-based work, including the conceptualization, management and expansion of new regional hubs. The proposed Field Support Section will be funded from extrabudgetary resources.

Annex II

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Board of Auditors

A/77/5/Add.10, chap. II

The Board recommends that UNODC headquarters, in coordination with the country offices in Colombia and Peru enhance the approval and workflow process for project revisions within the integrated planning, management and reporting solution, with the aim of avoiding delays between the original end dates and approval dates as well as preventing interruptions in project implementation and delivery (para. 92).

The recommendation has been implemented. In the first quarter of 2022, UNODC enhanced its existing approval workflow in the Umoja integrated planning, management and reporting module, which significantly reduced the length of the approval cycle and increased efficiency. For instance, the average time needed to approve project documents and project revisions in the module for the UNODC offices in Colombia and Peru was reduced from an average of 50 days in 2021 to 41 days in 2022.

A/76/5/Add.10, chap. II

The Board recommends that UNODC headquarters together with the UNODC country office in Afghanistan, continue to take the measures related to the critical full cost recovery tier faced by the country office and manage the actions tending to approach a desirable or manageable full cost recovery level (para. 24).

Implementation is in progress. The actual full cost recovery rate for 2022 was improved and stood at 15.6 per cent against the approved rate of 18.3 per cent. Following the review of the office structure, the country office in Afghanistan identified a few positions that could be streamlined and would minimize the impact of the full cost recovery. UNODC continues to monitor the situation.

The Board recommends that UNODC carry out a risk assessment in the strategic, governance, compliance, operations and financial pillars, as included in the Secretariat's risk universe, and update the risk register and the risk response and treatment plan accordingly (para. 34).

The recommendation has been implemented. The revised enterprise risk management framework, including the risk register and treatment plan, were approved by the UNODC Executive Committee in December 2022.

The Board recommends that UNODC update the risk areas and/or categories on the risk register and risk profile as a product of the consideration of new emerging risks (para. 35).

The recommendation has been implemented. The revised enterprise risk management framework, including the risk register and treatment plan, were approved by the UNODC Executive Committee in December 2022.

The Board recommends that UNODC define, through a formal document and in a comprehensive way, the form, duties, responsibilities, expected results and geographical coverage for its field office network structure (para. 51).

The recommendation has been implemented. The document entitled "UNODC's Field Office Network – Updated Typologies" was approved by the UNODC Executive Committee in October 2022.

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee trusts that UNODC will engage more national consultants and local experts to support the priorities of Member States and will provide an update in future programme budget submissions (para. IV.152).

The Advisory Committee notes the planned realignment of UNODC structures and trusts that there should be a period of stability and that updated information on any efficiencies and lessons learned from the exercise will be reflected in the next programme budget submission (para.IV.158).

The Advisory Committee trusts that UNODC will continue to seek more soft-earmarked and unearmarked donor contributions and provide an update in future programme budget submissions (para. IV.162).

In the statistics provided to the Advisory Committee in 2022 during the consideration of the proposed programme budget for 2023, the classification of the consultants and experts by type (local and international) was determined by the duty station in which they resided. Although the majority of consultants were classified as international, the services and support were provided by the consultants and experts broadly recruited at the country and regional levels.

The realignment of UNODC structures has brought greater substantive efficiency by generating more synergy and integration among the five thematic areas and cross-cutting commitments designated as priorities in the UNODC Strategy 2021–2025. It helped to create stronger linkages and alignment in the delivery of UNODC normative and technical assistance interventions, while also broadening the field footprint of UNODC operations. Updates on lessons learned and effectiveness of this substantive consolidation will be reflected in the next programme budget submission.

UNODC continues to make efforts in attracting soft-earmarked and unearmarked resources, including through bilateral meetings of the Executive Director with partner countries, the meetings of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime, grouping the principal partners of UNODC, and the annual strategic planning dialogues with key partners.

Foreword

In 2024, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), in line with its mandate of normative, United Nations system coordination and programmatic support, will implement the programme plan, in alignment with its strategic plan 2022–2025. At the same time, UN-Women will work closely with Member States and partners across and outside of the United Nations system to drive the acceleration of the implementation of the Beijing Declaration and Platform for Action and the achievement of the 2030 Agenda for Sustainable Development.

The Entity will further build its role as a global knowledge centre on gender equality and the empowerment of all women and girls, providing thought leadership, advocacy and capacity-building on key issues to fill critical knowledge gaps and improve the lives of the women and girls of the world.

The proposed programme plan is intended to create opportunities for greater inclusion, leadership and participation of all women, with an enhanced focus on UN-Women country offices engaging in activities related to the empowerment of women and girls with disabilities within the continued focus on leaving no one behind. In addition, among other planned results for 2024, UN-Women will respond to the global care crisis and the transformation of the care economy by enhancing its capacity-building support to policymakers to improve the provision of essential services, goods and/or resources for women.

In addition, the proposed programme plan sets out examples of progress, including measures to ensure that UN-Women continues to achieve measurable results and builds long-term resilience among the women and girls of the world.

(Signed) Sima **Bahous**
Under-Secretary-General/Executive Director, UN-Women

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 17.1 The United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) is responsible for supporting the achievement of gender equality and the empowerment of all women and girls as actors and beneficiaries of sustainable development, human rights, humanitarian action and peace and security. The mandate derives from the priorities established in relevant General Assembly, Economic and Social Council and Security Council resolutions, including General Assembly resolutions [64/289](#), in which the Assembly established UN-Women as a composite entity that functions as a secretariat, carries out operational activities at the country and regional levels, and leads, coordinates and promotes the accountability of the United Nations system in its work on gender equality and the empowerment of women; [70/1](#) on the 2030 Agenda for Sustainable Development, pursuant to which UN-Women supports systematic mainstreaming of a gender perspective in the implementation of the 2030 Agenda; [72/279](#) on the repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system; and [75/233](#) on the quadrennial comprehensive policy review of operational activities for development of the United Nations system, in which the Assembly called on the United Nations development system to enhance and accelerate gender mainstreaming through the full implementation of the System-wide Action Plan on Gender Equality and the Empowerment of Women, developed under the leadership of UN-Women.
- 17.2 The mandate of UN-Women endows it with a unique role and capacity to: (a) support the strengthening and development of global norms and standards, including with country-level experiences; (b) promote more effective coordination, coherence and gender mainstreaming across the United Nations system in support of commitments for gender equality and the empowerment of women; and (c) support Member States, upon request, to translate global norms and standards into legislation, policies and development plans as part of its operational activities. UN-Women also has a critical role in supporting the mobilization of civil society, the private sector and other relevant stakeholders, at all levels, in support of the implementation of the Beijing Declaration and Platform for Action and the gender-responsive implementation of the 2030 Agenda.

Strategy and external factors for 2024

- 17.3 The UN-Women strategic plan 2022–2025 guides the Entity’s activities and its strategic direction, objectives and approaches to support the efforts of Member States to accelerate the realization of gender equality and the empowerment of all women and girls, as well as the enjoyment of all human rights by women and girls (General Assembly resolution [76/142](#)).
- 17.4 The strategic plan is based on an extensive consultative process and draws from analysis of progress and persistent challenges, including recommendations from the 25-year review and appraisal of the implementation of the Beijing Declaration and Platform for Action, as well as lessons learned from the Entity’s first decade.
- 17.5 In 2024, UN-Women will continue its work on its established thematic impact areas: (a) governance and participation in public life; (b) women’s economic empowerment; (c) ending violence against women and girls; and (d) women and peace and security, humanitarian action and disaster risk reduction. UN-Women will continue to focus on integrated approaches to address the root causes of gender inequality and effect broader systems change by advancing seven systemic outcomes across the four thematic impact areas, given the interconnected nature of global challenges: (a) the strengthening of global normative frameworks and gender-responsive laws, policies and institutions; (b) financing for gender equality; (c) positive social norms, including by engaging men and boys; (d) equitable

access by women to services, goods and resources; (e) women's voices, leadership and agency; (f) the production, analysis and use of gender statistics, sex-disaggregated data, and knowledge; and (g) United Nations system coordination for gender equality and the empowerment of women.

- 17.6 UN-Women will continue to implement its programme by leveraging its normative support function, United Nations system coordination and operational activities, as mandated by its founding resolution, in an integrated and mutually reinforcing manner for transformative results.
- 17.7 UN-Women will continue to act as a knowledge hub to support gender mainstreaming and provide research and data analysis to inform policies, strategies and other interventions, and substantive and technical support and expertise to Member States upon request. It will continue to facilitate the mainstreaming of a gender perspective into intergovernmental norms and standards. It will also provide support to Member States, upon request, in implementing commitments to gender equality and the empowerment of women and girls through operational activities. UN-Women will continue to work in partnership with a range of actors and support, at the request of Member States, civil society, the private sector and other relevant stakeholders, for accelerated action for gender equality and the empowerment of women and girls.
- 17.8 UN-Women will continue to engage closely as a key partner in a repositioned United Nations development system, as it is a strong priority of the Under-Secretary-General/Executive Director to enhance the engagement of the Entity in that area. Thus, UN-Women will take full advantage of the repositioned United Nations development system opportunities for integrated, cost-effective support to partners. Furthermore, the Entity has placed and will continue to place business transformation at the heart of its new organizational effectiveness and efficiency framework, creating a stronger culture of accountability and strengthening organizational performance management through a cascading internal management system to ensure that the organizational effectiveness and efficiency is a comprehensive management and leadership process to drive the implementation of the strategic plan.
- 17.9 With regard to inter-agency coordination and liaison, UN-Women will continue to comprehensively leverage its coordination mandate for gender equality and the empowerment of women. UN-Women will continue to enhance support for gender mainstreaming, including through inter-agency mechanisms, and the implementation of the United Nations System-wide Action Plan on Gender Equality and the Empowerment of Women and the United Nations country team System-wide Action Plan gender equality scorecard. With a view to working better together, UN-Women will continue to build strategic partnerships with United Nations entities, including through inter-agency mechanisms, to deliver results for women and girls in a coordinated and coherent way. Further, the Entity will collaborate with other United Nations entities, including through the Inter-Agency and Expert Group on Sustainable Development Goal Indicators, providing a gender perspective on methodology development, monitoring and follow-up, as well as capacity development. UN-Women will also collaborate specifically with departments and offices of the Secretariat, including on issues related to women and peace and security, sexual violence in conflict, gender mainstreaming in peacekeeping operations and gender parity. UN-Women will continue its cooperation with and support to the Security Council and Human Rights Council, as requested. This includes, among other things, country briefs with an emphasis on gender equality and women's empowerment for the universal periodic review and inputs to several special procedures reports, panels and interactive dialogues and related side events. UN-Women will continue to brief the Security Council, upon request, as well as provide secretariat services to the Security Council's Informal Expert Group on Women and Peace and Security.
- 17.10 Where it has a country presence, UN-Women will support the integration of a gender perspective in United Nations country team programming processes, including the United Nations Sustainable Development Cooperation Framework roll-out process, joint initiatives, collective advocacy and coordination to ensure a coherent system-wide approach in operational activities. UN-Women will continue to chair or co-chair the gender theme groups¹ of United Nations country teams and provide technical leadership for the implementation of the United Nations country team System-wide Action Plan gender equality scorecard and the United Nations country team gender equality marker.

¹ See <https://unsdg.un.org/resources/gender-theme-groups-standards-and-procedures>.

- 17.11 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) The continued availability of voluntary contributions, which account for approximately 98 per cent of UN-Women resources;
 - (b) The commitment of Member States to advance gender equality and the empowerment of all women and girls, including by achieving consensus in relevant intergovernmental meetings;
 - (c) The commitment of Member States to adopt and implement laws, policies and strategies and create and maintain an enabling environment for civil society and women’s organizations in their work for the promotion of gender equality and the empowerment of women and girls.
- 17.12 In line with the United Nations Disability Inclusion Strategy and the UN-Women global strategy on disability inclusion, the Entity will continue to contribute to accelerating the effective mainstreaming of disability inclusion in its institutional processes and programming, including mitigating measures to overcome any operational challenges. At the corporate level, UN-Women will chair the United Nations Inter-agency Group on Gender Equality and Disability Inclusion. Where it has a country presence, UN-Women will support gender-responsive disability inclusion and an intersectional approach in United Nations country team programming processes, including joint initiatives, collective advocacy and coordination to ensure a coherent system-wide approach in operational activities. Together with United Nations partners, the Entity will promote gender-responsive disability inclusion work with organizations of persons with disabilities.

Impact of the pandemic and lessons learned

- 17.13 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had less impact on the implementation of mandates compared with previous years, as the lifting of mitigation measures allowed for an increase in the number of in-person meetings and travel. The main impact was on the convening capacity of the Commission on the Status of Women and the norm-setting work of all subprogrammes. For example, the sixty-sixth session of the Commission was held in person, with some hybrid elements to take into account the health and safety guidelines implemented at United Nations Headquarters. In-person intergovernmental negotiations were supported effectively and resulted in a normative outcome: the agreed conclusions on the priority theme of the Commission.
- 17.14 UN-Women continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. For example, UN-Women produced knowledge products based on extensive research on government responses to the pandemic and developed concrete recommendations to strengthen gender-sensitive approaches to emergency response and recovery efforts, which will enhance resilience and preparedness in the future and provide support to Member States, upon their request. Rapid assessments, in collaboration with national statistical offices, government entities and other partners, resulted in new data that shed a critical light on the pandemic’s impact on women and girls and helped inform national responses related to humanitarian emergencies and income support to informal workers.

Legislative mandates

- 17.15 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

34/180	Convention on the Elimination of All Forms of Discrimination against Women	54/4	Optional Protocol to the Convention on the Elimination of All Forms of Discrimination against Women
50/42	Fourth World Conference on Women		
50/203	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action	54/134 S-23/2	International Day for the Elimination of Violence against Women Political declaration

Section 17 UN-Women

S-23/3	Further actions and initiatives to implement the Beijing Declaration and Platform for Action	74/235; 77/181 75/158; 77/194 75/160; 77/195	Women in development Trafficking in women and girls
64/289	System-wide coherence		Intensifying global efforts for the elimination of female genital mutilation
66/130	Women and political participation	75/161	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: sexual harassment
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		Improvement of the situation of women and girls in rural areas
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	76/140 76/141 77/193	Violence against women migrant workers Intensification of efforts to prevent and eliminate all forms of violence against women and girls: gender stereotypes and negative social norms
74/128; 76/142	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly		

Economic and Social Council resolutions and decisions

5. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1

Evaluation activities

17.17 The following evaluations completed by the UN-Women Independent Evaluation Service in 2022 have guided the proposed programme plan for 2024:

- (a) Evaluation on the Entity’s policy advocacy work;
- (b) Evaluation on the Entity’s capacity development.

17.18 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, the evaluation on the Entity’s policy advocacy work found that the global policy priorities established through the operationalization of the strategic plan, including cross-cutting outcome 1, were resulting in cohesive policy advocacy approaches. In response to the evaluation findings, UN-Women will further strengthen data, knowledge-generation and knowledge management to support gender analysis and gender mainstreaming. Gender statistics, sex-disaggregated data, and knowledge will be produced, analysed and used to inform policymaking, advocacy and accountability for delivering results which support gender equality and the empowerment of women. UN-Women will strengthen its approach to capacity development that helps to support groups that are left behind.

17.19 The following evaluations are planned for 2024:

- (a) Work of UN-Women in the area of governance and participation in public life;
- (b) Work of UN-Women on changing social norms;
- (c) Work of UN-Women on financing for gender equality;

Programme of work

Subprogramme 1

Intergovernmental support, coordination and strategic partnerships

Objective

17.20 The objective, to which this subprogramme contributes, is to strengthen the achievement of gender equality and the empowerment of all women and girls, including full enjoyment of their human rights.

Strategy

- 17.21 To contribute to the objective, the subprogramme will:
- (a) Support the normative processes of intergovernmental bodies, including the Commission on the Status of Women, by facilitating the exchange of good practices and lessons learned among Governments and other relevant stakeholders, including through meetings, the issuance of reports and the presentation of analyses and policy options that enable discussion on key gender equality issues;
 - (b) Lead, coordinate and promote the accountability of the United Nations system for gender equality and the empowerment of women, and gender mainstreaming. This includes providing expertise, advocacy, monitoring of the development of relevant tools and guidance and capacity-building within the United Nations system. Actions towards system-wide improvement of the status of women will also be undertaken;
 - (c) Develop strategic partnerships by enabling civil society actors and other stakeholders to contribute to relevant intergovernmental processes, including through information dissemination, the convening of stakeholders to share lessons learned and recommendations for actions and the provision of funding for attending capacity- and alliance-building opportunities.
- 17.22 In doing so, the subprogramme will assist Member States in their efforts to achieve Sustainable Development Goal 5 and in the systematic mainstreaming of a gender perspective in the implementation of the 2030 Agenda.
- 17.23 The above-mentioned work is expected to result in:
- (a) A strengthened global normative framework and increased reflection of a gender perspective in the outcomes of intergovernmental processes;
 - (b) An enabling working environment to accelerate gender mainstreaming and gender parity goals in the United Nations system, leading to greater achievement of results towards gender equality;
 - (c) Enhanced cooperation among stakeholders and Governments on gender equality and the empowerment of women, as well as enhanced opportunities for stakeholders to present lessons learned and good practices in conjunction with intergovernmental processes, and the availability of a growing resource base.

Programme performance in 2022

Leveraging the influence of high-level women leaders

- 17.24 Building on the Beijing Declaration and Platform for Action, which included women in power and decision-making among its 12 critical areas of concern, UN-Women supported the Presidents of the seventy-sixth and seventy-seventh sessions of the General Assembly in institutionalizing a regular meeting of women Heads of State and Government during the Assembly's high-level week. The aim of the meeting was for women leaders to share experiences and effective policies to respond to interrelated and complex global crises. UN-Women liaised with the President of the seventy-seventh session to organize the first meeting of the General Assembly's Platform of Women Leaders on 21 September 2022 on the topic of transformative solutions by women leaders to today's interlinked challenges. The subprogramme built on analysis, research and evidence on the political participation of women in politics worldwide, and the guidance, tools and training programmes of UN-Women to support women's leadership and participation.
- 17.25 Progress towards the objective is presented in the performance measure below (see table 17.2).

Table 17.2
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	The President of the General Assembly convened the Assembly’s Platform of Women Leaders, which increased the visibility of the influence and role of women leaders in national and global decision-making in support of the goals of the United Nations

Planned results for 2024

Result 1: systematic mainstreaming of a gender perspective in the implementation of the 2030 Agenda for Sustainable Development

Programme performance in 2022 and target for 2024

- 17.26 The subprogramme’s work contributed to 62 per cent of countries mainstreaming a gender perspective into the voluntary national reviews at the high-level political forum on sustainable development, which exceeded the planned target of 56 per cent.
- 17.27 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 17.I).

Figure 17.I

Performance measure: percentage of national voluntary reviews at the high-level political forum on sustainable development that mainstream a gender perspective (General Assembly resolution 76/142) (annual)

Result 2: youth as agents of change in the achievement of the Sustainable Development Goals

Programme performance in 2022 and target for 2024

- 17.28 The subprogramme’s work contributed to 3,380 young women and girls with strengthened capacities to contribute to relevant intergovernmental policy discussions and forums, which exceeded the planned target of 3,000 young women and girls.
- 17.29 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 17.II).

Figure 17.II

Performance measure: number of young women and girls with strengthened capacities to contribute to relevant intergovernmental policy discussions and forums (annual)

Result 3: leaving no women or girls with disabilities behind

Proposed programme plan for 2024

- 17.30 In line with the principle of leave no one behind, as called for in the 2030 Agenda, UN-Women strives to accelerate the effective mainstreaming of disability inclusion in its work.
- 17.31 The subprogramme has enabled the increased engagement of UN-Women country offices in activities related to the empowerment of women and girls with disabilities and disability inclusion. Several catalytic initiatives have been provided through the subprogramme, including normative guidance, integrated policy advice, operational support, knowledge and capacity development in leadership and governance, economic and legal empowerment, ending violence against women and girls, rule of law, peace and security, humanitarian action and disaster risk reduction. This resulted in enhanced inter-agency coordination and collaboration to systematically address the situation of women and girls with disabilities. The subprogramme supported the development of global inter-agency guidance on an intersectional approach to leaving no one behind to support United Nations country teams and diverse stakeholders in implementing an effective approach to disability inclusion. In addition, a United Nations inter-agency joint programme was implemented to support countries in the design and implementation of disability-inclusive COVID-19 response and recovery strategies, as well as the holding of regular consultations with organizations of persons with disabilities.

Lessons learned and planned change

- 17.32 The lesson for the subprogramme was the need to enhance engagement with organizations of persons with disabilities, especially where UN-Women has a country presence. In applying this lesson, the subprogramme will therefore strengthen its partnership with such organizations to address the specific needs and demands of women and girls with disabilities in the work of United Nations country teams and other partners. This translates, among other things, into joint initiatives, advocacy, knowledge-generation and knowledge-sharing, capacity development, the leveraging of networks and communities of practice, and the provision of help desk support.
- 17.33 Expected progress towards the objective is presented in the performance measure below (see figure 17.III)

Figure 17.III

Performance measure: number of organizations of persons with disabilities partnering with United Nations country offices to address the specific needs and demands of women and girls with disabilities (cumulative)

Deliverables

17.34 Table 17.3 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: cross-sectoral interactive dialogues and ministerial round tables, with broad regional representation and participation from Governments, United Nations entities, women’s organizations and the private sector; multi-stakeholder expert side events on gender equality and the empowerment of women in key meetings, conferences and summits, for an average of 100 participants per event, comprising representatives of Member States, women’s and other civil society organizations, United Nations entities and think tanks; expert consultations on gender mainstreaming in a thematic area or sector in which gender considerations are absent or need strengthening, with at least 4 to 6 experts and representatives of Governments, United Nations entities and civil society organizations (per consultation).

D. Communication deliverables

Digital platforms and multimedia content: UN-Women website.

**Subprogramme 2
Policy and programme activities**

Objective

- 17.35 The objective, to which this subprogramme contributes, is to enhance efforts in the elimination of discrimination against women and girls and the achievement of gender equality in, among other things, the fields of sustainable development, human rights and peace and security, including through enhanced accountability of the United Nations system.

Strategy

- 17.36 To contribute to the objective, the subprogramme will:
 - (a) Serve as a global knowledge centre on gender equality and the empowerment of women, including in the areas of women and peace and security, ending violence against women, the economic empowerment of women, and gender-responsive governance, by undertaking and disseminating research, analysis and evaluation of trends, including on new and emerging issues and their impact on the situation of women;
 - (b) Provide advisory, technical and advocacy support, training and capacity development, including through field offices, to Member States, upon request, to advance the implementation of their commitments on gender equality and the empowerment of women, in line with their national priorities;
 - (c) Ensure the accountability of the United Nations system, including the United Nations country and regional teams and their gender theme groups, by offering guidance and through engagement in their work on gender equality and the empowerment of women.
- 17.37 In doing so, the subprogramme will assist Member States in their efforts to achieve Sustainable Development Goal 5 and in the systematic mainstreaming of a gender perspective in the implementation of the 2030 Agenda.
- 17.38 The above-mentioned work is expected to result in:
 - (a) Policies and actions taken by national and regional bodies to implement United Nations instruments, standards and resolutions that contribute to gender equality and the empowerment of women, focusing on the Beijing Declaration and Platform for Action, the outcome of the twenty-third special session of the General Assembly and the Convention on the Elimination of All Forms of Discrimination against Women;
 - (b) Increased capacity of Member States to implement, monitor and evaluate laws, policies and strategies that contribute to the achievement of gender equality and the empowerment of women and girls and the realization of their human rights (General Assembly resolution [76/142](#));

- (c) Improved ability of United Nations programmes to support more effectively Member States, at their request, in the implementation of commitments to eliminate discrimination against women and girls.

Programme performance in 2022

Strengthened responses on gender equality and the empowerment of women and girls in emergency situations

- 17.39 The subprogramme has been serving as a global knowledge centre, providing reports, policy briefs and flagship publications to inform gender-responsive policymaking in the context of multiple emergencies and repeated shocks. Shortly after the outbreak of the pandemic, in collaboration with the United Nations Development Programme (UNDP), UN-Women launched a new virtual platform, the COVID-19 Global Gender Response Tracker. Over 18 months, a total of almost 5,000 government response measures were compiled and assessed from a gender perspective.
- 17.40 In 2022, UN-Women and UNDP conducted in-depth research and data analysis based on the Tracker and other sources to produce a comprehensive assessment report entitled *Government Responses to COVID-19: Lessons on Gender Equality for a World in Turmoil*. The report identified the factors that enabled a stronger response with regard to gender equality across countries and outlined a forward-looking policy agenda for preventing deterioration in and ensuring progress on gender equality and the empowerment of women and girls during emergencies. It thus provided important guidance, support and good practices for policymakers, not only in the context of the pandemic, but also in relation to new and emerging emergency situations. To support awareness-raising and further exchange of good practices, the report has been publicized through virtual outreach events and engagements with Member States at the global, regional and national levels.
- 17.41 Progress towards the objective is presented in the performance measure below (see table 17.4).

Table 17.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Member States, through a comprehensive gender assessment of COVID-19 response measures, use evidence-based information to strengthen policy and programmatic linkages on gender-responsive emergency and recovery measures.

Planned results for 2024

Result 1: data-based and results-driven implementation of national action plans on women and peace and security

Programme performance in 2022 and target for 2024

- 17.42 The subprogramme’s work contributed to 89 adopted national action plans on women and peace and security with monitoring indicators, which exceeded the target of 87 plans.
- 17.43 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 17.IV).

Figure 17.IV
Performance measure: number of adopted national action plans on women and peace and security with monitoring indicators (cumulative)

Result 2: towards women’s full and equal participation in political life

Programme performance in 2022 and target for 2024

- 17.44 The subprogramme’s work contributed to 69 legislative frameworks that promote gender balance in elections and decision-making institutions, which exceeded the planned target of 68 legislative frameworks.
- 17.45 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 17.V).

Figure 17.V
Performance measure: number of legislative frameworks that promote gender balance in elections and decision-making institutions (cumulative)

Result 3: Governments adopt policies and make investments to transform the care economy

Proposed programme plan for 2024

- 17.46 Women spend on average three times as many hours on unpaid domestic work and care work as men.² Rising demand for care during the COVID-19 pandemic and response has deepened already existing inequalities in the gender division of labour, placing a disproportionate burden on women and girls.³

² See www.unwomen.org/sites/default/files/Headquarters/Attachments/Sections/Library/Publications/2021/Progress-on-the-Sustainable-Development-Goals-The-gender-snapshot-2021-en.pdf.

³ See www.unwomen.org/en/digital-library/publications/2021/04/policy-tool-care-economy.

17.47 Against this backdrop, the subprogramme has led the development of an applied policy tool to strengthen the capacity of policymakers to address the care economy and women’s employment in the context of COVID-19. The policy tool provides an effective programmatic approach to costing care needs, assessing coverage gaps and estimating the employment and fiscal returns of increasing investment in care infrastructure. Twenty-six UN-Women country offices are currently working with a range of partners – government, civil society and other development actors – to advance the policy agenda to transform the care economy. Furthermore, UN-Women has participated in the High-level Committee on Programmes core group on beyond gross domestic product to ensure that a focus on unpaid care measures is included in the recommendations.

Lessons learned and planned change

17.48 The lesson for the subprogramme was the need to first focus on building technical capacity, at both the regional and country levels. In applying the lesson, the subprogramme will integrate capacity development initiatives upstream of programmatic implementation to ensure that policymakers and various stakeholders possess the skills necessary to apply and implement the tools developed. Furthermore, the subprogramme will strengthen advocacy efforts to accelerate political buy-in at the national level to create an enabling environment for the implementation of gender-responsive policies and programmes.

17.49 Expected progress towards the objective is presented in the performance measure below (see figure 17.VI).

Figure 17.VI

Performance measure: number of institutions benefiting from the support of the Entity to improve the provision of essential services, goods and/or resources for women (cumulative)

Deliverables

17.50 Table 17.5 lists all deliverables of the subprogramme.

17.52 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 17.9 to 17.11 and figure 17.VII.

17.53 As reflected in tables 17.9 (1) and 17.10 (1), the overall resources proposed for 2024 amount to \$10,614,400 before recosting, reflecting no change compared with the appropriation for 2023. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

17.54 As reflected in tables 17.9 (2) and 17.10 (2), extrabudgetary resources amount to \$500,000,000. The resources would complement regular budget resources and would be used mainly to provide support for overall executive direction and management, including the planning, coordination, management and assessment of the programme of work and the strategic plan of UN-Women and the production of the programme’s deliverables. In addition, the resources under subprogramme 1 would enable the engagement with intergovernmental bodies and, under subprogramme 2, would provide support to Member States, at their request, in the implementation of their national commitments to eliminating discrimination against women and girls, empowering women and achieving equality between women and men as partners and beneficiaries of sustainable development, human rights of women and girls, humanitarian action and peace and security. Extrabudgetary resources represent 98.0 per cent of the total resources for this section.

Part IV International cooperation for development

17.55 The extrabudgetary resources under the present section are subject to the oversight of the Executive Board of UN-Women.

Policymaking organs

17.56 The resources proposed under this component would provide for requirements relating to the substantive servicing of meetings of the Commission on the Status of Women. Table 17.12 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 17.12
Policymaking organs

(Thousands of United States dollars)

Policymaking organ	Description	Additional info	2023	2024
			appropriation	estimate (before recosting)
Commission on the Status of Women	The Commission has a central role within the United Nations system in monitoring the implementation of the Beijing Declaration and Platform for Action and in advising the Economic and Social Council thereon. The Commission holds a ministerial segment, including interactive high-level round tables in parallel chambers, two interactive expert panels on the priority theme of each session, a panel on an emerging issue, an interactive dialogue to review a theme from an earlier session and other high-level interactive dialogues. Under Council resolutions 76 (V), 304 (XI) and 1983/27, the Secretary-General is mandated to prepare lists of confidential and non-confidential communications on the status of women for submission to the Commission.	Mandate: Economic and Social Council resolutions 11 (II) and 1989/45 Membership: 45 government officials Number of sessions in 2024: 1 (sixty-eighth session)	124.4	124.4
Total			124.4	124.4

17.57 The proposed regular budget resources for 2024 amount to \$124,400 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 17.13.

Table 17.13

Travel of representatives	23.2	124.4	–	–	–	–	–	124.4
Total	23.2	124.4	–	–	–	–	–	124.4

Extrabudgetary resources

17.58 Extrabudgetary resources for this component amount to \$818,100. The resources would complement regular budget resources and would be used mainly for conference services, including document preparation, translation and conference facilities to support the meetings of the Executive Board.

Executive direction and management

- 17.59 The executive direction and management component comprises the Office of the Under-Secretary-General/Executive Director and the Independent Evaluation and Audit Services.
- 17.60 The overall responsibilities of the executive direction and management component include the following functions:
- (a) Assist and support the Under-Secretary-General/Executive Director in the overall executive direction and management of UN-Women, including the planning, coordination, management and assessment of the programme of work of UN-Women;
 - (b) Facilitate inter-office cooperation in the implementation of organizational priorities, workplans and administrative matters;
 - (c) Ensure the timely implementation of decisions and coordination of input from all organizational units to the activities of the Office;
 - (d) Coordinate and provide guidance for the support of the intergovernmental process, operational activities in the field and United Nations system coordination efforts;
 - (e) Provide strategic policy support and support in managing communications with Member States, the United Nations system and civil society, and coordinate organizational efforts for advocacy, expanding partnerships and seizing new opportunities to promote gender equality and the empowerment of women;
 - (f) Provide, through its Independent Evaluation and Audit Services office, independent assurance and advice to the Under-Secretary-General/Executive Director on UN-Women programmes, controls, business systems and processes;
 - (g) Through the Strategy, Planning, Resources and Effectiveness Division, integrate corporate strategy, resource management and performance measurement and monitor corporate performance and budget implementation to support improved decision-making and governance to manage for results, while ensuring increased transparency and accountability.
- 17.61 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), UN-Women continues to integrate environmental management practices into its operations. In 2022, UN-Women continued to use its e-filing system and its PaperSmart tool, which enables delegations to download documents electronically and substantially reduces the printing of documents, while still allowing for printing at the request of delegations. In 2024, UN-Women will further enhance its use of videoconferencing and other online collaboration tools for meetings involving remote offices to help reduce travel.
- 17.62 Information on the timely submission of documentation and advance booking for air travel is reflected in table 17.14. Senior management is committed to the implementation of the advance purchasing and travel policy. With a steady uptick in the volume of travel since the loosening of COVID-related travel restrictions, UN-Women achieved a 70 per cent compliance rate in 2022, through travel planning during the formulation of each division's annual workplan. The lower than planned rate of compliance in 2022 is due to last-minute requirements from Governments, civil society and other partners for UN-Women personnel to attend events. Management will continue to reinforce the requirement of adequate planning and advance purchasing of tickets in 2023 and beyond to ensure that the advance booking policy is complied with.

Part IV International cooperation for development

17.63 The proposed regular budget resources for 2024 amount to \$1,030,400 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 17.15 and figure 17.VIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

17.64 Extrabudgetary resources for this component amount to \$13,277,200. The resources would complement regular budget resources and would be used mainly to assist in the overall executive direction and management of UN-Women, including the planning, coordination, management and assessment of its programme of work and strategic plan. The change in resources reflects the move of the Executive Board secretariat section (1 P-5, 1 P-3 and 1 P-2) from subprogramme 1 to executive direction and management. The move is aimed at enhancing the coordination and provision of guidance for the support of the intergovernmental process and increasing engagement with Executive Board members.

Programme of work

Subprogramme 1

Intergovernmental support, coordination and strategic partnerships

17.65 The proposed regular budget resources for 2024 amount to \$4,984,300 and reflect an increase of \$500 compared with the appropriation for 2023. Resource changes result from an inward redeployment from subprogramme 2, under travel of staff. Additional details on the distribution of the proposed resources for 2024 are reflected in table 17.16 and figure 17.IX.

Table 17.16
Subprogramme 1: evolution of financial and post resources

Figure 17.IX
Subprogramme 1: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

17.66 Extrabudgetary resources for this subprogramme amount to \$21,425,800. The resources would complement regular budget resources and would be used mainly to engage with and support the intergovernmental bodies and processes to strengthen the integration of gender equality issues in discussions and outcomes; enhance consultation with and support for civil society organizations to participate in intergovernmental processes, including through increased outreach, funding and capacity-building; and carry out system-wide coordination of the gender mainstreaming efforts of the United Nations system, as well as system-wide coordination and monitoring of the status of women in the United Nations system and fulfilment of other commitments of the Beijing Declaration and Platform for Action. The decrease in resources reflects the move of the Executive Board secretariat section (1 P-5, 1 P-3 and 1 P-2) from subprogramme 1 to executive direction and management. The move is aimed at enhancing the coordination and provision of guidance for the support of the intergovernmental process and increasing engagement with Executive Board members.

**Subprogramme 2
 Policy and programme activities**

17.67 The proposed regular budget resources for 2024 amount to \$3,750,600 and reflect a decrease of \$500 compared with the appropriation for 2023. The resource changes result from an outward redeployment to subprogramme 1, under travel of staff. Additional details on the distribution of the proposed resources for 2024 are reflected in table 17.17 and figure 17.X.

Table 17.17

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

17.68 Extrabudgetary resources for the subprogramme amount to \$426,734,500. The resources would complement regular budget resources and would be used mainly to enable support for Member States, upon their request, in the implementation of their national commitments to eliminate discrimination against women and girls, empower women and achieve equality between women and men as partners and beneficiaries of development, human rights, humanitarian action and peace and security.

Programme support

- 17.69 Responsibility for this area is vested in the Management and Administration Division, the Human Resources Division and, partially, the Strategy, Planning, Resources and Effectiveness Division of UN-Women. The Divisions assist the Under-Secretary-General/Executive Director in discharging responsibilities in the areas of finance and budget, administrative services, procurement and facilities management, information technology services, security, operational oversight and accountability, audit coordination and human resources. In addition, the Divisions provide administrative and operational support for the implementation of the programme activities of UN-Women.
- 17.70 The proposed regular budget resources for 2024 amount to \$724,700 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of resources in 2024 are reflected in table 17.18 and figure 17.XI.

Table 17.18

Extrabudgetary resources

- 17.71 Extrabudgetary resources for the subprogramme amount to \$37,744,400. The resources would complement regular budget resources and would be used mainly to assist the Under-Secretary-General/Executive Director in discharging responsibilities in the areas of human resources, finance, information technology, procurement and general administration.

Annex I

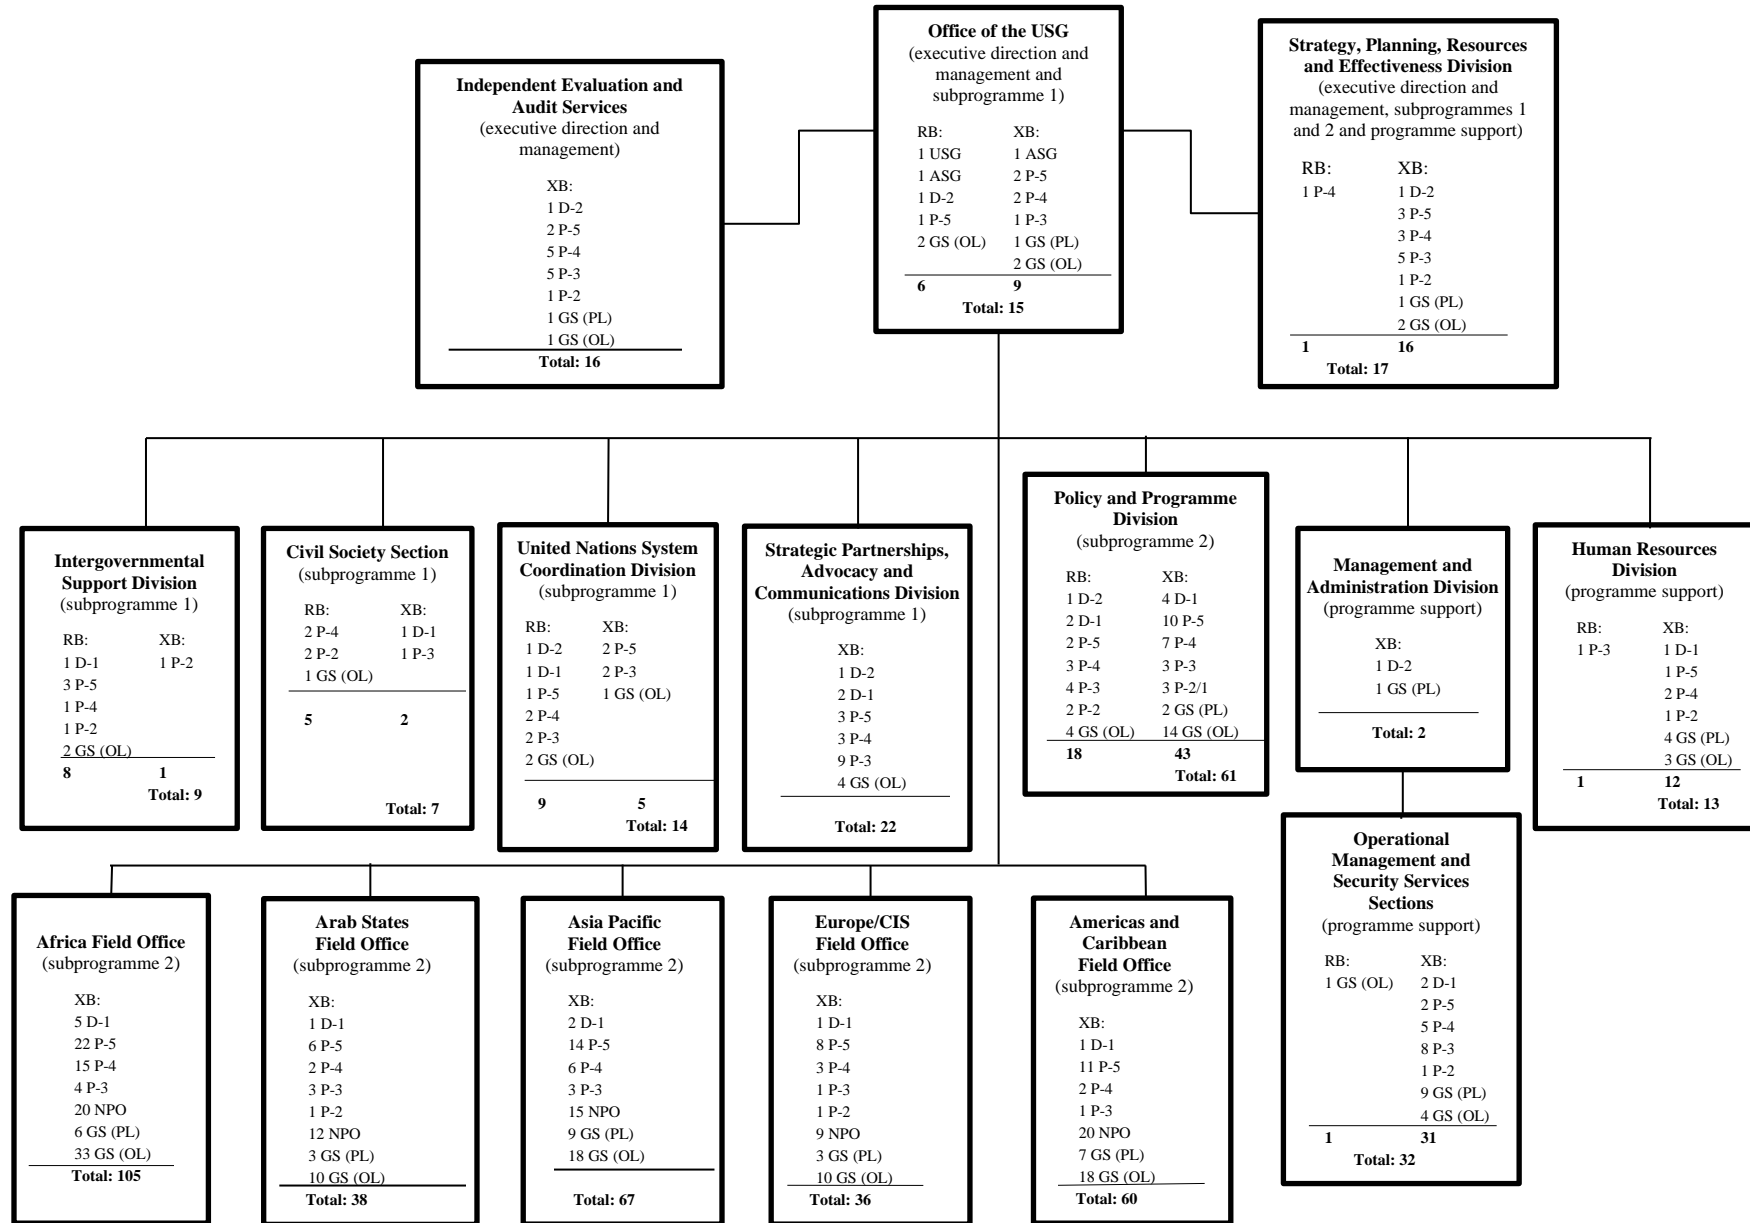

Organizational structure and post distribution for 2024

Two charts showing the organizational structure of the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) are presented below. Chart A reproduces the organizational structure for 2023, as contained in document [A/77/6 \(Sect. 17\)](#). Chart B presents the organizational structure for 2024.

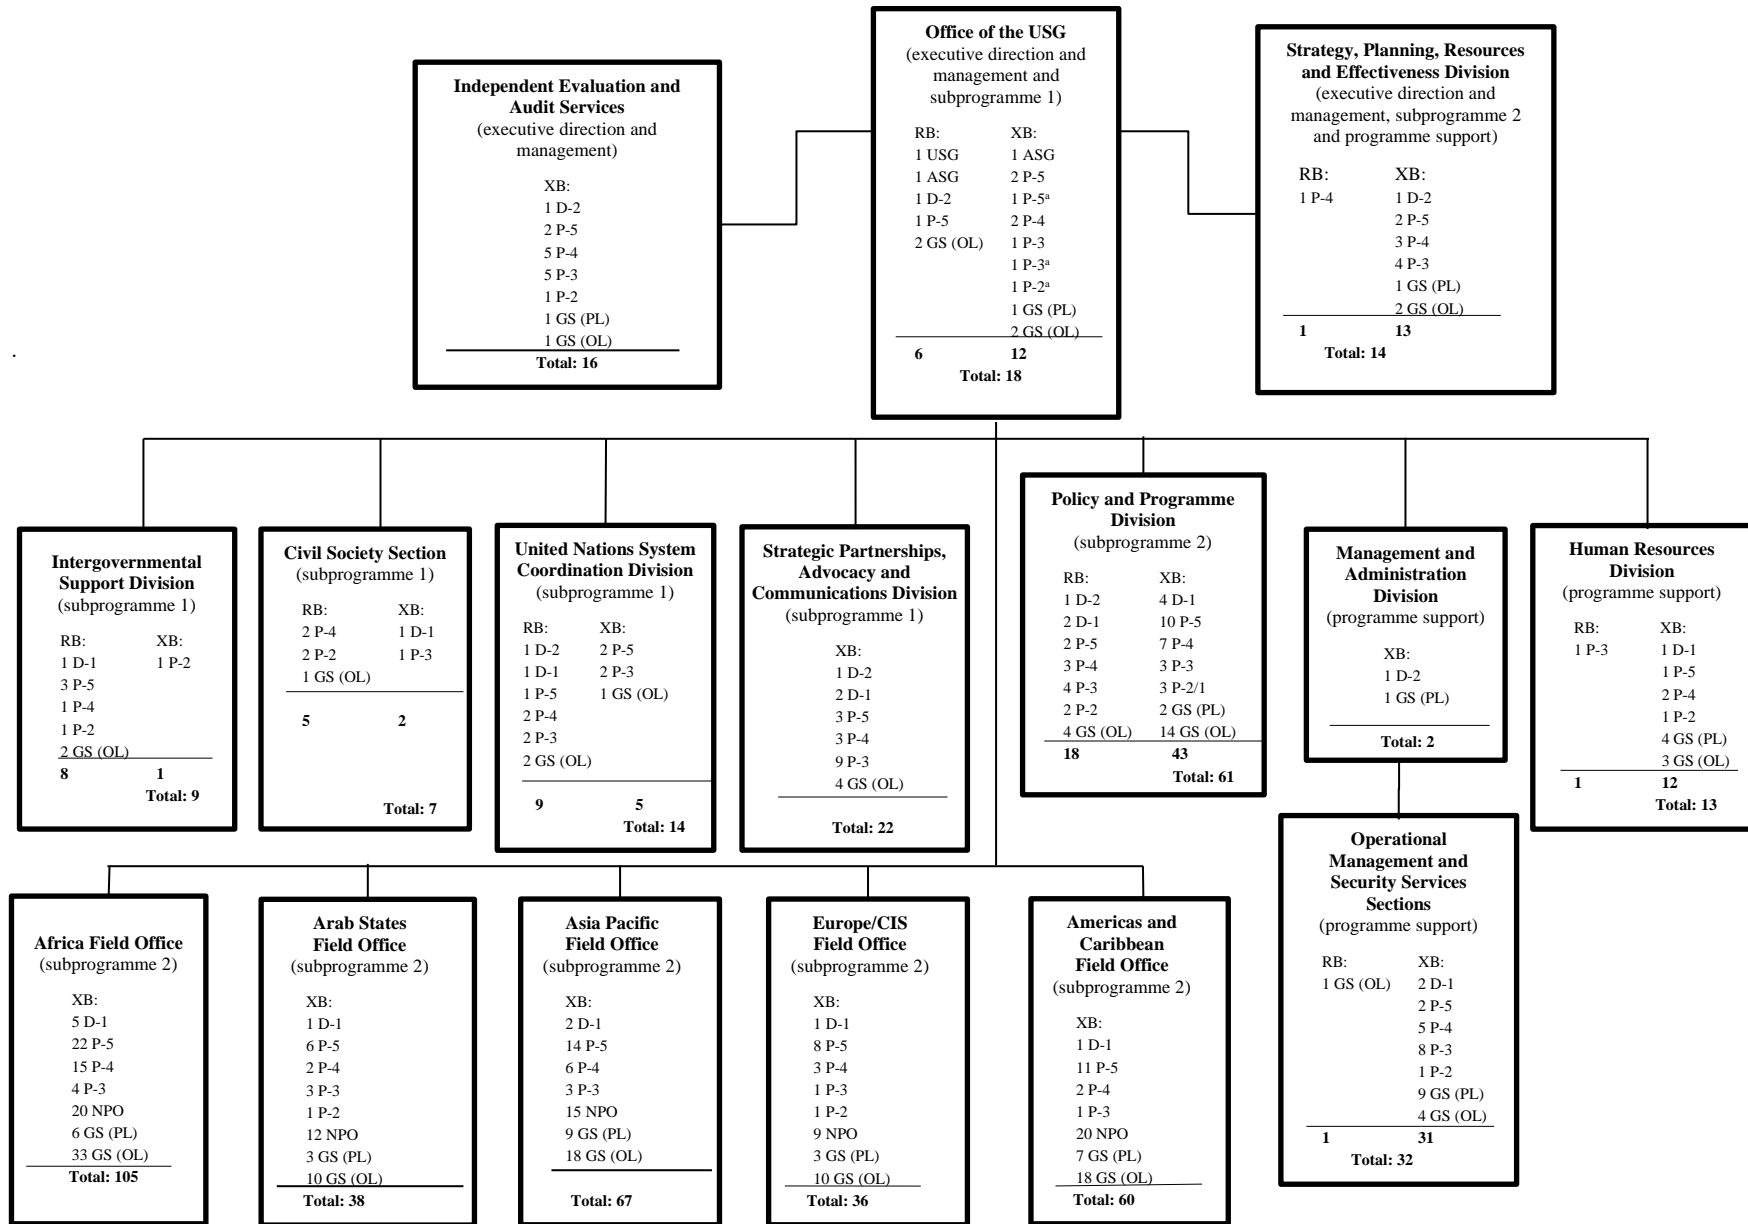

Justification for the proposed changes

The change in the organizational structure reflects the move of the Executive Board secretariat section (1 P-5, 1 P-3 and 1 P-2) from subprogramme 1 to executive direction and management. The move is aimed at enhancing the coordination and provision of guidance for the support of the intergovernmental process and increasing engagement with the Executive Board members.

Annex II

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee notes the continued cooperation of UN-Women with the United Nations development system, as well as its continued support to the implementation of mandates of the Security Council and Human Rights Council, when requested. The Committee is of the view that such cooperation can be further enhanced, and encourages the Secretary-General to continue his efforts towards that end (para. IV.181).

The programme plan for 2024 contained in part A reflects the continued efforts towards cooperating with the Security Council and the Human Rights Council.

Foreword

Over the course of 2024, the Economic Commission for Africa (ECA) will step up its work on boosting socioeconomic recovery from the global crises impeding progress by Africa towards resilience, prosperity and attainment of the goals of the 2030 Agenda for Sustainable Development and Agenda 2063: The Africa We Want, of the African Union. Guided by its strategic directions and core functions, ECA focuses on the following pillars of intervention: macroeconomic policy and sustainable financing; implementation of the Agreement Establishing the African Continental Free Trade Area, of sustainable industrialization and of economic diversification; and inclusive and resilient growth through climate action, energy transition, the green and blue economy, and digital transformation.

ECA will scale up its work on migration by promoting a new and positive narrative on the economic import of migration and the free movement of persons, goods and services, in particular in operationalizing the African Continental Free Trade Area. It will step up its work on the training and capacity development of public officials and other stakeholders through the African Institute for Economic Development and Planning.

ECA will promote a more coordinated and coherent approach in the work which it carries out with its members, with resident coordinators and with United Nations country teams, through its headquarters and five subregional offices, to ensure innovative, demand-driven technical support in driving the development agenda of Africa.

ECA will continue to support and play a major role in the implementation of the regional reform process through an effective Africa Regional Collaborative Platform and will reinforce its work and partnership with the African Union and regional economic communities. In fulfilling its mandate, ECA will continue to mainstream a gender perspective in its work, and foster the inclusion of persons with disabilities.

(Signed) Antonio **Pedro**
Acting Executive Secretary, Economic Commission for Africa

I. Economic Commission for Africa

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 18.1 The Economic Commission for Africa (ECA) is responsible for promoting the economic and social development of its members, fostering intraregional integration and promoting international cooperation for the development of Africa. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, and also Economic and Social Council resolution 671 A (XXV).
- 18.2 ECA has a critical role to play in providing sets of innovative solutions, together with demand-driven and tailor-made policy and technical advice, grounded in evidence, to its members and regional economic communities in pursuit of strengthening the social and economic resilience of its members and ensuring attainment of the goals of the 2030 Agenda for Sustainable Development and Agenda 2063: The Africa We Want, of the African Union. ECA also works to build the capacity of its members to formulate and implement policies for sustainable development, including through the implementation of the regular programme for technical cooperation and United Nations Development Account projects.

Strategy and external factors for 2024

- 18.3 The ECA programme strategy focuses on transformational changes to make a measurable contribution to the 2030 Agenda and Agenda 2063, employing an integrated and coherent approach. In pursuing its mandate, ECA will continue to concentrate on five strategic directions:
- (a) Deploying knowledge to support policymaking to drive the development agenda of Africa;
 - (b) Formulating policy options to accelerate economic diversification and job creation for the transformation of Africa;
 - (c) Designing and implementing financing models and leveraging them for the development of human, physical and social infrastructure assets;
 - (d) Supporting ideas and actions to foster deeper regional integration and the development of regional public goods, with a focus on social inclusion and taking into account synergies between the economic and social development programmes of Africa;
 - (e) Advocating a common position for Africa at the global level and developing regional responses as a contribution to global governance issues.
- 18.4 In pursuing these strategic directions, ECA will employ its convening function, through the provision of multilateral and multi-stakeholder platforms; its think-tank function, by conducting interdisciplinary research and the analysis of key challenges facing its members and Africa as a whole, while promoting peer learning and development; and its operational function, through the provision of direct policy advice and support to its members, including in cooperation with other entities of the United Nations system.
- 18.5 ECA will further mainstream policy guidance and recommendations, taking into account the relevant provisions of intergovernmental policy organs and platforms, and promote cooperation among the regional economic communities for effective and expeditious implementation of regional agreements within the context of the various United Nations-African Union partnership frameworks. ECA will build on its medium-term programme framework (2022–2025), aimed at providing forward-looking

planning guidance and bringing together all the streams of work of its divisions and subregional offices and the African Institute for Economic Development and Planning, while focusing on transformative areas that provide entry points for subprogramme activities in 2024.

- 18.6 In 2024, ECA will continue to facilitate the identification and proposal of innovative financing tools and economic governance instruments to boost domestic resource mobilization, and address debt servicing as a principal mitigating measure. Its activities will also entail targeted support for an accelerated operationalization of the African Continental Free Trade Area and sustainable development of the sectors of infrastructure, energy, agriculture and land. Furthermore, ECA support will be geared towards increasing investments in climate action for enhanced national resilience, promoting the circular economy,¹ and harnessing the green and blue economy in the context of sustainable development and poverty eradication. ECA will also pursue its role in spearheading digital transformation and the strengthening of data and statistical systems on the continent and will scale up its work on migration, and also on social inclusion and equitable growth. ECA will also further engage policymakers and other stakeholders in training and peer-learning on related topics through the African Institute for Economic Development and Planning.
- 18.7 With regard to cooperation with other entities at the global, regional national and local levels, ECA will continue its close cooperation with the African Union Commission and will build on its existing strategic partnerships with regional and subregional organizations, central banks, universities, think tanks, other research institutions, and civil society and private sector organizations and forge new partnerships in advancing attainment of the 2030 Agenda and Agenda 2063. With regard to South-South and triangular cooperation, ECA will continue to leverage value-adding partnerships premised on the principle of enhancing complementarity and development impact.
- 18.8 With regard to inter-agency coordination and liaison, ECA will continue to promote collaborative delivery through cross-sectoral initiatives that cut across goals and targets and ensure effective linkages between regional, subregional and national perspectives. This will include working through the Regional Collaborative Platform for Africa and its opportunity and issue-based coalitions, along with enhanced collaboration with regional United Nations entities, the Department of Economic and Social Affairs, the United Nations Conference on Trade and Development, resident coordinators and country teams to ensure a more coordinated contribution to fulfilment of the 2030 Agenda and Agenda 2063.
- 18.9 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Members of ECA continue to identify and implement sustainable long-term pathways to recovery from recurrent shocks and global crises;
 - (b) Members of ECA and regional economic communities continue to cooperate among and between themselves for harmonized actions, focusing on implementation of the 2030 Agenda and Agenda 2063, operationalization of the African Continental Free Trade Area and sustainable long-term recovery from the COVID-19 pandemic;
 - (c) The Africa Regional Forum for Sustainable Development, the Conference of African Ministers of Finance, Planning and Economic Development, and the subregional intergovernmental committees of experts and senior officials continue to provide policy advice to ECA on emerging priorities.
- 18.10 The Commission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, subprogramme 6 will continue to provide technical support to the Commission's other subprogrammes to ensure that a gender perspective is reflected in their programmes of work. The subprogramme will also strengthen the capacity of members of ECA, through the provision of tailored technical support, advisory services and hands-on training, in gender equality and the empowerment of women and girls, inclusion and economic diversification,

¹ See United Nations Environment Assembly resolution 5/11 of 2 March 2022, on enhancing circular economy as a contribution to achieving sustainable consumption and production.

women's entrepreneurship and the mainstreaming of a gender perspective into national policies and programmes. ECA will also promote further alignment and coherence between global, regional and national frameworks on gender equality and the empowerment of women and girls.

- 18.11 In line with the United Nations Disability Inclusion Strategy, ECA will pursue the implementation of measures to ensure the inclusion of persons with disabilities, through its programme design, implementation and evaluation, along with training and policies on programme delivery, including for the provision of reasonable accommodation for conference and workshop participants, among other measures. These activities will be complemented by, and implemented in consultation with, persons with disabilities. Furthermore, specialized assistive equipment will continue to be provided at the headquarters compound in Addis Ababa and at subregional offices to enhance accessibility for persons with disabilities, including delegates and participants of intergovernmental meetings.

Impact of the pandemic and lessons learned

- 18.12 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had limited impact on the implementation of mandates. ECA resumed in-person activities, such as the conduct of scoping and field country missions, and the convening of subregional and country meetings and events in in-person and hybrid formats. In addition, two key statutory meetings – the 2022 meeting of the Africa Regional Forum for Sustainable Development and the 2022 Conference of the African Ministers of Finance, Planning and Economic Development – took place with in-person participation, in Kigali in March 2022 and in Dakar in May 2022, respectively, following a two-year hiatus.
- 18.13 In addition, in order to support members of ECA on issues related to the COVID-19 pandemic, within the overall scope of the objectives, policy guidelines were developed under subprogramme 6 with a view to strengthening members' capacities to integrate the care economy in their post-COVID-19 recovery policy frameworks, while support was provided under subprogramme 5 to members in securing financing towards a climate-resilient and sustainable recovery from the COVID-19 pandemic.
- 18.14 ECA continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including the use of e-learning, which proved to be a useful platform during the pandemic. The subprogramme will continue to diversify training modalities to enable access to high-quality digital deliverables, with the aim of developing, strengthening and sharing critical development planning and policymaking knowledge and skills. Furthermore, building on the use of information technologies in 2020 and 2021, ECA has convened – and will continue to convene – online and hybrid meetings and events, upon members' requests and subject to available resources, to maximize stakeholder participation.

Legislative mandates

- 18.15 The list below provides all mandates entrusted to the programme.

General Assembly resolutions and decisions

S-21/2	Key actions for the further implementation of the Programme of Action of the International Conference on Population and Development	64/215	Legal empowerment of the poor and eradication of poverty
57/2	United Nations Declaration on the New Partnership for Africa's Development	64/222	Nairobi outcome document of the High-level United Nations Conference on South-South Cooperation
58/220	Economic and technical cooperation among developing countries	66/130	Women and political participation
60/222	New Partnership for Africa's Development: progress in implementation and international support	66/137	United Nations Declaration on Human Rights Education and Training
61/234	Enhancing the role of the subregional offices of the Economic Commission for Africa	67/107	People's empowerment and development
		67/302	Cooperation between the United Nations and the African Union

Section 18 Economic and social development in Africa

68/145	Strengthening collaboration on child protection within the United Nations system	75/156	Strengthening national and international rapid response to the impact of the coronavirus disease (COVID-19) on women and girls
68/225	Specific actions related to the particular needs and problems of landlocked developing countries: outcome of the International Ministerial Conference of Landlocked and Transit Developing Countries and Donor Countries and International Financial and Development Institutions on Transit Transport Cooperation	75/180	Enhancement of international cooperation in the field of human rights
		75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, "Water for Sustainable Development", 2018–2028
68/238	Follow-up to and implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	75/228	Follow-up to the second United Nations Conference on Landlocked Developing Countries
		75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
69/225	Promotion of new and renewable sources of energy	75/307	Cooperation between the United Nations and the International Organization of la Francophonie
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development	76/195	Financial inclusion for sustainable development
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	76/213	Science, technology and innovation for sustainable development
70/192	Follow-up to the International Conference on Financing for Development	76/216	Follow-up to the Fourth United Nations Conference on the Least Developed Countries
70/211	Role of the United Nations in promoting development in the context of globalization and interdependence	76/218	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
70/215	Development cooperation with middle-income countries	76/229	Report of the United Nations Commission on International Trade Law on the work of its fifty-fourth session
70/224; 76/224	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners	76/258	Doha Programme of Action for the Least Developed Countries
71/1	New York Declaration for Refugees and Migrants	76/273	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system
71/212	Information and communications technologies for development	76/298	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
72/185	Globalization and its impact on the full enjoyment of all human rights	77/150	Information and communications technologies for sustainable development
73/195	Global Compact for Safe, Orderly and Regular Migration	77/151	International trade and development
73/326	Format and organizational aspects of the international migration review forums	77/152	International financial system and development
74/4	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly	77/153	External debt sustainability and development
74/213	Cooperative measures to assess and increase awareness of environmental effects related to waste originating from chemical munitions dumped at sea	77/154	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development
74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	77/155	Promoting investments for sustainable development
		77/156	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
74/270	Global solidarity to fight the coronavirus disease 2019 (COVID-19)	77/160	Entrepreneurship for sustainable development

Part V Regional cooperation for development

77/162	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21	77/189	Inclusive development for and with persons with disabilities
77/165	Protection of global climate for present and future generations of humankind	77/205	A global call for concrete action for the elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action
77/167	Implementation of the Convention on Biological Diversity and its contribution to sustainable development	77/212	The right to development
77/169	Harmony with Nature	77/223	Human rights and extreme poverty
77/170	Ensuring access to affordable, reliable, sustainable and modern energy for all	77/235	Preventing and combating corrupt practices and the transfer of proceeds of corruption, facilitating asset recovery and returning such assets to legitimate owners, in particular to countries of origin, in accordance with the United Nations Convention against Corruption
77/174	Towards a New International Economic Order		
77/176	International migration and development		
77/178	Promotion of sustainable and resilient tourism, including ecotourism, for poverty eradication and environment protection	77/245	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
77/180	Industrial development cooperation		
77/181	Women in development		
77/183	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development		
77/185	South-South Cooperation	77/248	Oceans and the law of the sea
77/186	Agriculture development, food security and nutrition	77/267	Shifting the management paradigm in the United Nations: review of changes to the budgetary cycle
77/188	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly	77/270	New Partnership for Africa's Development: progress in implementation and international support

Economic and Social Council resolutions

2008/18	Promoting full employment and decent work for all	2022/15	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society
2018/23	New strategic directions of the Economic Commission for Africa		
2021/10	Socially just transition towards sustainable development: the role of digital technologies on social development and well-being of all	2022/18	Mainstreaming a gender perspective into all policies and programmes in the United Nations system

Economic Commission for Africa resolutions

671 (XXV) A	Establishment of an Economic Commission for Africa	874 (XLIII)	Strengthening the subregional offices of the United Nations Economic Commission for Africa
748 (XXVIII)	Population, family and sustainable development	909 (XLVI)	Realizing and harnessing the demographic dividend in Africa
819 (XXXI)	Promotion of energy resources development and utilization in Africa	928 (XLVIII)	Implementing Agenda 2063: planning, mobilizing and financing for development
822 (XXXI)	Implementation of the treaty establishing the African Economic Community: strengthening regional economic communities; rationalization and harmonization of the activities of regional and subregional communities	931 (XLVIII) 935 (XLVII) 937 (XLIX)	Data revolution and statistical development Least developed countries in Africa Mainstreaming the 2030 Agenda for Sustainable Development and Agenda 2063 into national strategic frameworks, action plans and programmes
862 (XLII)	Enhancing domestic resource mobilization		

Section 18 Economic and social development in Africa

938 (XLIX)	Integrated reporting and follow-up on sustainable development	969 (LII)	Digitization and the digital economy initiative
939 (XLIX)	Africa Regional Forum on Sustainable Development	972 (LIII)	African Continental Free Trade Area
941 (XLIX)	Organization of an annual African regional review of progress in the implementation of the outcomes of the World Summit on Information Society	973 (LIII)	Data and statistics
965 (LII)	Luxembourg Protocol to the Convention on International Interests in Mobile Equipment on Matters Specific to Railway Rolling Stock	974 (LIII)	Civil registration and vital statistics
966 (LII)	Review of the intergovernmental structure of the Economic Commission for Africa pursuant to its resolution 943 (XLIX) and resolution 957 (LI)	975 (LIII)	Sustainable industrialization and diversification of Africa in the digital era in the context of the coronavirus disease pandemic
967 (LII)	Progress in the implementation of the Programme of Action for the Least Developed Countries for the Decade 2011–2020 and preparation for the Fifth United Nations Conference on the Least Developed Countries	976 (LIII)	Coronavirus disease vaccines
968 (LII)	Fiscal policy, trade and the private sector in a digital era: a strategy for Africa	977 (LIII)	Economic Commission for Africa support for least developed countries in the context of the Fifth United Nations Conference on the Least Developed Countries

D. Communication deliverables

Outreach programmes, special events and information materials: information materials focused on regional integration and emerging socioeconomic issues for awareness-raising with members of ECA.

Evaluation activities

- 18.17 The following evaluations completed in 2022 have guided the proposed programme plan for 2024:
- (a) Office of Internal Oversight Services evaluation of subprogramme 1, Macroeconomic policy and governance;
 - (b) ECA evaluation of the project on support for boosting intra-African trade (African Trade Policy Centre);
 - (c) ECA evaluation of the project on measuring, monitoring, and improving performance in regional integration;
 - (d) ECA evaluation of the project on accountability frameworks and evidence-based policies for development planning;
 - (e) ECA evaluation of the project on strengthening the capacities of selected African countries in the area of geospatial information resources and services;
 - (f) ECA evaluation of the project on building urban economic resilience during and after the COVID-19 pandemic.
- 18.18 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, the recommendation from the evaluation of subprogramme 1 by the Office of Internal Oversight Services, that performance monitoring should be strengthened, has had wider application and uptake across ECA: the Commission will undertake to strengthen its capacities to ensure effective programme planning, monitoring and evaluation. Similarly, in response to the recommendation that collaboration with the resident coordinators should be strengthened, ECA is supporting the ongoing United Nations reforms and is focusing on strengthening the Regional Collaborative Platform for Africa. The findings of the project evaluations also support the renewed focus placed by ECA on ensuring robust monitoring systems, as part of the development of new projects and programmes.
- 18.19 The following evaluations to be conducted by ECA are planned for 2024:
- (a) Evaluation of ECA capacity-building support for gender statistics and monitoring systems;
 - (b) Evaluation of ECA support for integrated national financing frameworks;
 - (c) Evaluation of ECA support for innovative approaches to ensuring the competitiveness of micro, small and medium-sized enterprises and promotion of trade and inclusive industrialization in Southern Africa in the post-COVID-19 pandemic context;
 - (d) Evaluation of ECA subregional support provided to its members in East Africa.

Programme of work

Subprogramme 1

Macroeconomic policy and governance

Objective

- 18.20 The objective, to which this subprogramme contributes, is to achieve structural transformation and inclusive growth in Africa through strengthened and effective development planning, macroeconomic policy analysis and enhanced public sector finance management and governance.

Strategy

- 18.21 To contribute to the objective, the subprogramme will:
- (a) Support members of ECA in tracking progress in the implementation of the 2030 Agenda and Agenda 2063 and customize policy-relevant tools such as the ECA integrated planning and reporting toolkit, developed in response to a request from members, to assist countries in the design, implementation and monitoring of their national development plans;
 - (b) Provide tailor-made support to accelerate the graduation of African countries from the list of least developed countries, including a smooth transition strategy. This will include supporting the implementation of the Doha Programme of Action for Least Developed Countries for the decade 2022–2031, and reporting on the progress of African least developed countries;
 - (c) Build the capacity of members of ECA to design and implement policy frameworks that promote transparency and accountability in public financial management, including debt management, and optimize resource mobilization and allocation to build resilience to shocks;
 - (d) Convene platforms for policy dialogue on matters related to macroeconomic policy, economic governance and development planning and contribute to the organization of the annual session of the Conference of African Ministers of Finance, Planning and Economic Development;
 - (e) Publish policy-relevant knowledge products underpinned by research and innovative ECA macroeconomic modelling tools to support evidence-based policymaking and produce forecasts with recommendations for responding to the impacts of external shocks as required by members and partners of ECA.
- 18.22 The above-mentioned work is expected to result in:
- (a) More coordinated and integrated policy design and implementation by members of ECA;
 - (b) Accelerated and sustainable graduation of African countries from the least developed country category;
 - (c) More robust evidence-based policymaking by members of ECA;
 - (d) Increased mobilization of domestic and international resources by members of ECA for development and investment in priority areas;
 - (e) Improved debt management and reduced debt vulnerabilities among members of ECA.

Programme performance in 2022

Strengthened monitoring and reporting on national development plans in Africa

- 18.23 An important aspect of implementing national development plans in support of fulfilling the 2030 Agenda and Agenda 2063 is capacity to effectively measure progress, which requires robust results frameworks. The subprogramme strengthened the monitoring and evaluation frameworks of national

development plans and improved the quality of national development planning reporting systems. During 2021 and 2022, the subprogramme supported the implementation of the integrated planning and reporting toolkit, which enabled members of ECA to align their national development plans more closely with the 2030 Agenda and Agenda 2063. The subprogramme also enhanced the toolkit’s monitoring and evaluation module to include performance dashboards, to enable members of ECA to better assess progress, with some of the countries strengthening their monitoring and evaluation frameworks as a result. In Malawi, based on the gaps identified through use of the toolkit, the country revised its results framework to include tangible targets, with corresponding indicators and baselines, and addressed other data gaps. In Morocco, based on the use of the toolkit, the High Commission for Planning took steps to harmonize existing sectoral plans to facilitate monitoring and evaluation and introduced a system for the preparation of coherent reports on progress in national development.

18.24 Progress towards the objective is presented in the performance measure below (see figure 18.I).

Figure 18.I

Performance measure: number of countries strengthening monitoring frameworks of development plans based on the integrated planning and reporting toolkit

Planned results for 2024

Result 1: improved development planning for sustainable development and structural transformation in Africa

Programme performance in 2022 and target for 2024

18.25 The subprogramme’s work contributed to the adoption of development planning tools by four countries (Malawi, Ghana, Seychelles and Zambia), bringing the cumulative total to 19, which exceeded the planned target of 17 countries.

18.26 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.II).

Figure 18.II
Performance measure: number of countries adopting development planning tools (cumulative)

Result 2: strengthened debt management for resilient recovery

Programme performance in 2022 and target for 2024

18.27 The subprogramme’s work contributed to the establishment of the Liquidity and Sustainability Facility, designed to compress liquidity premiums and improve sovereign access to international bond markets for African countries through a repurchasing agreement market for the region, in line with international standards, which has been implemented by three members of ECA, which did not meet the planned target of two policy initiatives. The target was not met as the subprogramme prioritized the development and launch of the Liquidity and Sustainability Facility. In November 2022, the Facility completed its first \$100 million repurchasing agreement transaction.

18.28 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.III).

Figure 18.III
Performance measure: number of policy interventions related to financial and debt management developed and/or implemented (cumulative)

Result 3: enhanced economic governance and improved tax policy and administration for the mobilization of public resources

Proposed programme plan for 2024

- 18.29 Global crises, diminishing fiscal space, and debt sustainability issues have intensified the need for reforms to expand domestic resource mobilization options. The subprogramme supports efforts by African countries to mobilize public resources and improve economic governance architecture through analytical work, technical assistance, and advisory services. For instance, in 2022, the subprogramme supported members of ECA that requested assistance in producing estimates of illicit financial flows and developing medium-term action plans to measure such flows. The subprogramme also provided technical assistance to members of ECA to conduct excise and direct tax assessments and to employ a benchmarking methodology to estimate tax expenditures.

Lessons learned and planned change

- 18.30 The lesson for the subprogramme was that there were further opportunities to increase buy-in and strengthen engagement of national tax authorities in effective governance, including through tax reform. In applying the lesson, the subprogramme will improve institutional coordination in all its interventions to maintain country interest and ownership. Furthermore, the subprogramme will prioritize economic governance and public financial management advisory services and the provision of technical assistance to requesting members of ECA and pan-African organizations and will also develop tangible recommendations to improve tax policy and administration.
- 18.31 Expected progress towards the objective is presented in the performance measure below (see figure 18.IV).

Figure 18.IV

Performance measure: number of members of ECA that implement recommendations on improved tax policy and administration (cumulative)

Deliverables

- 18.32 Table 18.2 lists all deliverables of the subprogramme.

Table 18.2

Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>

13. On emerging economic issues and challenges to growth and development in Africa	3	3	2	3
14. Policy briefs on emerging issues related to macroeconomic analysis, economic governance and public finance	3	3	2	3
15. Africa quarterly economic performance and outlook report	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services to six members of ECA on emerging macroeconomic development planning and economic governance issues; technical advice to the African Peer Review Mechanism secretariat in the area of country self-assessments and integration of outcomes from the assessments into national development plans and related processes; advisory services to regional and continental bodies (such as the Economic Community of West African States (ECOWAS), the secretariat of the African Continental Free Trade Area and the African Union), including support to the African Union Commission in carrying out the second ten-year implementation plan of Agenda 2063.				
D. Communication deliverables				
Outreach programmes, special events and information materials: annual African Economic Conference (some 200 in-person participants); Pan-African Conference on Illicit Financial Flows and Taxation (some 100 in-person participants).				

Subprogramme 2

Regional integration and trade

Objective

- 18.33 The objective, to which this subprogramme contributes, is to strengthen regional cooperation and integration among members of ECA through increased trade flows, improved industrialization and increased investment.

Strategy

- 18.34 To contribute to the objective, the subprogramme will:
- (a) Provide advisory services and technical assistance to members of ECA on market access and business opportunities arising from the African Continental Free Trade Area with a view to minimizing potential adverse effects (such as import surges, dumping and customs revenue loss risks) in the context of the Area and multilateral and bilateral trade issues, including those related to the World Trade Organization, regional trade protocols, the African Growth and Opportunity Act and economic partnership agreements;
 - (b) Develop and disseminate policy tools, instruments and guidelines and provide technical assistance to identify opportunities for diversification, value addition and the development of manufacturing and industrial clusters for members of ECA in support of the Action Plan for Accelerated Industrial Development of Africa, contributing to the achievement of Sustainable Development Goal 9;
 - (c) Provide training, with a particular focus on landlocked developing countries and regional economic communities, related to the implementation of existing regional cooperation frameworks and provide technical assistance for the implementation of the African Digital Transformation Strategy;
 - (d) Provide advisory services and technical assistance to members of ECA and regional economic communities on regional integration, national, regional and continental competition policies, intellectual property policies and measures for investment facilitation in collaboration with the United Nations Conference on Trade and Development.
- 18.35 The above-mentioned work is expected to result in:
- (a) Countries implementing the recommendations set out in their respective strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area in order to better harness the benefits of the Agreement;
 - (b) More coherent, coordinated and responsive interfaces between the African Continental Free Trade Area and the free trade areas and customs unions of the regional economic communities;
 - (c) More coherent trade and industrialization policies aligned with the 2030 Agenda and Agenda 2063;
 - (d) Accelerated industrialization and increased diversification of productive capacities and production patterns;
 - (e) Reduced transaction risks and intermediation costs for members of ECA;
 - (f) An improved business environment characterized by enhanced opportunities for private sector operators to leverage transboundary opportunities and improved market access conditions for African trade of goods and services, as well as the free movement of capital and people.

Programme performance in 2022

Realizing the benefits of the African Continental Free Trade Area through national strategies

- 18.36 Effective implementation of the Agreement Establishing the African Continental Free Trade Area requires countries to have clear plans and strategies to fully harness the benefits of the Agreement. Since 2019, the subprogramme assisted a total of 23 countries in formulating their strategies on implementation of the Agreement through technical support. The strategies contribute to the inclusive implementation of national and subregional trade policies with the objectives of diversifying concerned economies, creating jobs, and generating foreign exchange by repositioning trade to take advantage of the African Continental Free Trade Area and also address the challenges to trade in the continent and beyond. As of 2022, 20 countries have started implementing priority areas of their national strategies, such as the development of sectoral strategies and capacity-building for the private sector, with the subprogramme's technical support.
- 18.37 Progress towards the objective is presented in the performance measure below (see figure 18.V).

Figure 18.V

Performance measure: number of members of ECA that have formulated and/or started implementation of their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area (cumulative)

Planned results for 2024

Result 1: members of ECA adopt and implement recommendations for increasing regional integration

Programme performance in 2022 and target for 2024

- 18.38 The subprogramme's work contributed to the adoption by 54 members of ECA of recommendations from the report on assessing regional integration in Africa, which exceeded the planned target of 30 members of ECA. The subprogramme's work did not meet the planned target of 20 members of ECA implementing recommendations from the report. The target was not met because preparations to commence implementation had not concluded by the end of 2022.
- 18.39 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.VI).

Figure 18.VI
Performance measure: number of members of ECA that adopted and implemented recommendations from the report on assessing regional integration in Africa (cumulative)

Result 2: more inclusive and equitable development in the pharmaceutical sector

Programme performance in 2022 and target for 2024

18.40 The subprogramme’s work contributed to ten members of ECA implementing recommendations on inclusive and equitable development in the pharmaceutical sector, which did not meet the planned target of 15 members of ECA. The target was not met because of the unexpected length of time taken by technical work in targeted members of ECA, which prevented the subprogramme from being extended to other countries in 2022.

18.41 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.VII).

Figure 18.VII
Performance measure: number of members of ECA that implemented recommendations on inclusive and equitable development in the pharmaceutical sector (cumulative)

Result 3: members of ECA implement priority areas of their strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area related to industrialization

Proposed programme plan for 2024

18.42 Industrialization can help African countries to increase the production and export of value-added products, diversify their economies and reduce trade imbalances. While the African Continental Free Trade Area can be leveraged to foster industrialization and economic transformation, the benefits of the Area will also depend on the extent to which countries industrialize and increase their productive capacities. The subprogramme has provided support to members of ECA in the development and implementation of national strategies on the Agreement Establishing the African Continental Free Trade Area. In addition, the subprogramme has been providing technical assistance and various knowledge products to support the industrialization efforts of members of ECA.

Lessons learned and planned change

18.43 The lesson learned for the subprogramme was the need to strengthen its focus on the linkages between the African Continental Free Trade Area and industrialization issues, given that they are mutually reinforcing. In applying the lesson, the subprogramme will, as part of its support for the implementation of national strategies on the Agreement Establishing the African Continental Free Trade Area, place more emphasis on technical assistance on industrialization-related issues such as sustainable industrialization, development of value chains for goods and services, establishment of special economic zones, application of standards and removal of non-tariff barriers.

18.44 Expected progress towards the objective is presented in the performance measure below (see figure 18.VIII).

Figure 18.VIII

Performance measure: number of members of ECA implementing the priority areas of their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area related to industrialization (cumulative)

Deliverables

18.45 Table 18.3 lists all deliverables of the subprogramme.

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advisory services in response to the needs expressed by all 54 members of ECA and regional or subregional cooperation groups in the context of the New Partnership for Africa’s Development (NEPAD) and the Framework for a Renewed United Nations-African Union Partnership on Africa’s Integration and Development Agenda 2017–2027; analytical advice for the implementation of the Vienna Programme of Action.

Databases and substantive digital materials: observatory on regional integration in Africa.

D. Communication deliverables

Outreach programmes, special events and information materials: information materials on regional integration and trade; information kits; high-level policy dialogue on trade.

Digital platforms and multimedia content: content for the subprogramme’s social media accounts on regional integration and trade.

Subprogramme 3 Private sector development and finance

Objective

- 18.46 The objective, to which this subprogramme contributes, is to enhance the business environment to leverage the role of the private sector and its investments in the economic growth and transformation of Africa, to improve land-tenure security, in particular for women, and to enhance innovative private sector financing and investment for infrastructure, energy and services, and agriculture.

Strategy

- 18.47 To contribute to the objective, the subprogramme will:
- (a) Produce knowledge products with policy recommendations, offer advisory services and technical assistance and convene members of ECA in areas of particular importance for accelerating agricultural development and food systems transformation, including regionally integrated agricultural value chains, climate change management, risk management, agribusiness and agro-industrial development, including agro-industrial parks, intra-African trade, food security and nutrition, food safety and land governance;
 - (b) Support members of ECA in implementing the African Union Declaration on Land Issues and Challenges in Africa and other associated commitments, and support regional economic communities, African universities and research institutions and civil society organizations in knowledge generation and the provision of technical and advisory services to improve land tenure security for land users, in particular women, increase youth engagement and create an enabling environment for responsible land-based investments by the private sector in land-related sectors such as agriculture and infrastructural development to boost energy and transport for successful implementation of the Agreement Establishing the African Continental Free Trade Area;
 - (c) Work with the African Union Commission, the African Union Development Agency, the African Development Bank and regional economic communities to operationalize the second priority plan of the Programme for Infrastructure Development in Africa and assist with technical analysis in the context of the African Continental Free Trade Area, and to promote the African air transport market, improved road safety and digitalization of the continent’s infrastructure;
 - (d) Support the development of home-grown solutions for Africa by developing and disseminating best practices in public-private partnership models that attract private sector participation and

investment in energy and infrastructure and advocating capital support for existing and new rail projects in Africa;

- (e) Support members of ECA and market participants in exploring investment and co-investment opportunities in infrastructure, real estate and other sectors in close cooperation with pension funds, asset management firms, private equity firms and financial institutions;
- (f) Provide technical assistance and disseminate best practices to members of ECA to identify priority growth sectors and develop and implement policies, strategies and programmes to improve their competitiveness, attract investment and stimulate entrepreneurship;
- (g) Support members of ECA in developing and deepening their domestic debt markets and design frameworks and mechanisms to promote the development of financial innovations as sustainable methods for mobilizing additional resources for development financing needs and increasing financial resilience;
- (h) Promote the economic and financial empowerment of African women entrepreneurs through the development of an innovative financing platform that will foster the growth of women-owned or women-led companies and improve their access to capital.

18.48 In doing so, the subprogramme will support members of ECA in making progress towards Sustainable Development Goals 1, 5, 8, 9, 11 and 17.

18.49 The above-mentioned work is expected to result in:

- (a) Improved standing of members of ECA in the global business environment rankings;
- (b) Business climate conducive to improved access to markets and a diversified investor base with an increased appetite for domestic currency debt markets;
- (c) Mobilized capital, both domestically and internationally, including through venture capital, private equity and impact investment;
- (d) Improved competitiveness, productivity, value addition and trade in agricultural goods and services and accelerated food systems transformation towards inclusive, resilient and nutrition-oriented systems;
- (e) Enhanced private sector role and land-based investments in agriculture and other sectors that promote women and youth entrepreneurship and safeguard the rights of local communities and the environment;
- (f) Improved policy and regulatory reforms, following the framework and guidelines on land policy in Africa and the guiding principles for large-scale land-based investments in Africa, and effective land administration;
- (g) Increased energy access and innovative financing for energy and infrastructure for the transformation of Africa;
- (h) Increased efficiency and safety of the African transport sector, including cheaper finance from the private sector to support rail stock procurement, and reduced road fatalities and injuries and cost of road accidents to the African economies.

Programme performance in 2022

Members of ECA develop money markets for economic growth and financial stability

18.50 Money markets support the functioning of financial systems and their ability to contribute to economic growth and poverty reduction. The subprogramme developed a technical assistance programme to strengthen the capacity of central banks to assess the current money and interbank market development and to formulate policies for their further development. The programme was implemented in Uganda and Zambia, in collaboration with a technical partner. In Uganda, a study

was conducted of the current state of the money and interbank market, resulting in policy recommendations, including the need for training on accounting, legal and risk management aspects of money market instruments for the financial sector. The training was organized in two sessions and contributed to strengthening the capacity of market participants. The country’s efforts are yielding results, as evidenced by the good progress recorded in the latest version of the Absa Africa Financial Markets Index 2022, published by the Official Monetary and Financial Institutions Forum, where the country ranks fourth in Africa. In Zambia, a study was carried out on the design of a guarantee structure to enhance market liquidity and mitigate systemic default risks. Several workshops and consultations were conducted with regulators, the central bank and the banking industry, resulting in a proposed guarantee structure in the form of a technical note. This note serves as a guide for central bank and regulator discussions in improving the regulatory framework and market liquidity.

18.51 Progress towards the objective is presented in the performance measure below (see table 18.4).

**Table 18.4
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Cooperation agreement concluded to support African Governments in the debt relief and debt restructuring initiative within the context of COVID-19	Uganda and Zambia have included the development of money and interbank markets as strategic issues in their road maps	Uganda has risen two places and Zambia has maintained its ranking in the Absa Africa Financial Markets Index 2022

Planned results for 2024

Result 1: increased access to financing for infrastructure development through public-private partnerships

Programme performance in 2022 and target for 2024

- 18.52 The subprogramme’s work contributed to five countries (Cameroon, Kenya, Malawi, Uganda, and Zambia) adopting national public-private partnership action plans, which chart the way forward to improving their national public-private partnership environments, including immediate priority actions on resource mobilization and capacity-building, which exceeded the planned target of three countries.
- 18.53 The subprogramme’s work also contributed to a concept note on the establishment of a forum for public-private partnerships in Africa being considered by national public-private partnership units, which did not meet the planned target of project development and technology transfer in six countries. The target was not met as the subprogramme focused its support for members of ECA on the adoption of their national public-private partnership action plans.
- 18.54 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 18.5).

Table 18.5
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
North-South and South-South public-private partnership cooperation agreements for project development and technology transfer are in place in six members of ECA (Cameroon, Côte d'Ivoire, Kenya, Malawi, Uganda and Zambia)	South Africa, Kenya and Mozambique determined their current status and planned trajectory for public-private partnerships	Cameroon, Kenya, Malawi, Uganda, and Zambia have adopted national public-private partnership action plans that chart the way forward to improving the national public-private partnership environment, including immediate actions on public-private partnership resource mobilization and capacity-building programmes Concept note on the establishment of a forum for public-private partnerships in Africa considered by national public-private partnership units	Six members of ECA have access to capacity-building programmes instituted for public-private partnership units African forum for public-private partnerships is established	Six public-private partnership-ready projects developed by members of ECA African forum for public-private partnerships is operational and has a programme of action

Result 2: enhanced policies to improve the business environment

Programme performance in 2022 and target for 2024

- 18.55 The subprogramme’s work contributed to the success of 12 members of ECA (Cameroon, Democratic Republic of the Congo, Ghana, Guinea, Kenya, Malawi, Morocco, Namibia, Senegal, South Africa, Uganda and United Republic of Tanzania) in designing policies, strategies and programmes to address critical land governance-related challenges, which met the planned target.
- 18.56 The subprogramme’s work also contributed to one member of ECA (Uganda) designing policies, strategies and programmes to enhance private sector investments that boost food systems, in particular agribusiness, agro-industries and value chains, which met the planned target.
- 18.57 The subprogramme’s work also contributed to one member of ECA (Uganda) designing a demand-driven programme to enhance private sector investments in land in northern Uganda. This did not meet the planned target of two members of ECA improving the business-enabling environment for attracting investments in critical areas of food systems, agriculture and land. The target was not met as the subprogramme focused on targeted support to only one member of ECA, owing to capacity limitations.

18.58 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 18.6).

Table 18.6
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)

Result 3: increased commitment by members of ECA to liberalize air transport markets

Proposed programme plan for 2024

18.59 Effective and efficient transport and logistics have the potential to boost the social and economic development of Africa and its competitiveness in global markets. Air transport on the continent is characterized by poor connectivity and high costs, which could hinder attainment of the objective of the African Continental Free Trade Area of increasing intra-African trade. As recognized by African States through the adoption of the Yamoussoukro Decision of 1999, on air transport liberalization, airport security and air safety in the regions of ECOWAS, this challenge can be overcome by

liberalizing air transport markets in Africa. The subprogramme has supported members of ECA in implementing the Yamoussoukro Decision in relation to the regulation of African air transport markets. In this regard, as part of a study conducted by the subprogramme, it has developed key performance indicators for the monitoring of implementation and applied these indicators in Cabo Verde, Cameroon and Rwanda.

Lessons learned and planned change

- 18.60 The lesson for the subprogramme was that the findings of studies will be easier to implement when they are complemented with comprehensive advisory services and technical support to enable uptake of the findings and support national action to address recommendations. In applying the lesson, the subprogramme will work with the African Civil Aviation Commission to train members of ECA in aligning their bilateral air transport agreements with the Yamoussoukro Decision, enabling members of ECA to establish new and revise existing agreements. The subprogramme will also assist members of ECA, through advisory services and technical support, to implement their action plans to fast-track implementation of the Yamoussoukro Decision. The action plans are developed from gap assessments in the implementation undertaken with support from ECA, using performance indicators developed by ECA.
- 18.61 Expected progress towards the objective is presented in the performance measure below (see figure 18.IX).

Figure 18.IX

Performance measure: number of members of ECA that align their bilateral air transport agreements with the Yamoussoukro Decision (cumulative)

Deliverables

- 18.62 Table 18.7 lists all deliverables of the subprogramme.

Table 18.7

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to three universities in three countries on the review of curricula on agriculture and land governance in Africa and to four members of ECA on policy, legal and institutional reforms to support women’s land tenure security and entrepreneurship; advice on mainstreaming a gender perspective in land and agriculture policies and programmes, on the adoption of guidelines on the development of agricultural growth poles, on mainstreaming national agricultural, industrial and trade policy in national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area, on promoting healthy diets and nutritious food, and on improving risk management for building resilience; advisory services to three countries in creating centres of excellence in road safety and at least one organization in digitalizing regional transport corridors; advocacy of regional energy transport policies and programmes; advice to members of ECA on the issuance of bonds in Africa to enhance environmental sustainability and development finance in Africa; advisory services to members of ECA in developing special economic zones; the annual conference of the African Private Equity and Venture Capital Association; the Conference on Land Policy in Africa; advice to three members of ECA in developing regional agricultural value chains and in mainstreaming land governance issues in agriculture; high-level policy forums to advocate on behalf of young people in such areas as agribusiness and employment.

Databases and substantive digital materials: toolkit for mapping land-based investment opportunities for agriculture and agribusiness in Africa; interactive map on large-scale land-based investments covering three countries.

D. Communication deliverables

Outreach programmes, special events and information materials: information materials on energy infrastructure and capital markets development.

**Subprogramme 4
Data and statistics**

Objective

- 18.63 The objective, to which this subprogramme contributes, is to strengthen the production, dissemination and use of credible data, statistics and geospatial information at the national, regional and global levels for evidence-based policy and decision-making.

Strategy

- 18.64 To contribute to the objective, the subprogramme will:
- (a) Support African national statistical systems in transforming their data governance and management methods by digitalizing the data collection, compilation and dissemination process for statistical areas, including censuses and civil registration systems, and provide technical assistance and training in the design and implementation of national strategies for the

development of statistics and national spatial data infrastructure with related integrated geospatial information frameworks;

- (b) Maintain and regularly update databases that are accessible for public use, with available harmonized data, statistics and geospatial information disaggregated by location on such topics as African economies, demographics, social indicators, the environment and other statistics needed for monitoring and reporting on the implementation of the 2030 Agenda and Agenda 2063;
- (c) Provide training and make platforms available for the exchange of best practices among members of ECA and their respective statistical agencies;
- (d) Integrate policy advice and sustained capacity-building activities on data, statistics, and geospatial information to support members of ECA in enhancing monitoring and reporting on the implementation of the 2030 Agenda and Agenda 2063;
- (e) Enhance communication about and advocacy of the use of statistics and geospatial information through national celebrations of African Statistics Day, Geographic Information Systems Day and Africa Civil Registration and Vital Statistics Day, engagement on social media and design, and distribution of communication and advocacy materials.

18.65 The above-mentioned work is expected to result in:

- (a) Improved capacity, resilience and efficiency of national statistical systems, including the uptake and use of innovative tools and technologies in the collection of comparable and harmonized statistics at various levels of disaggregation, and improved statistical operations, including the conduct of censuses, surveys and administrative data processing and analysis, and dissemination of timely data;
- (b) Improved uptake of geospatial information management, closer collaboration between components and stakeholders of the national spatial data infrastructures, and better integrated geospatial information frameworks;
- (c) Enhanced monitoring and reporting on the implementation of the 2030 Agenda and Agenda 2063.

Programme performance in 2022

Universal and responsive information and communications technology-based civil registration and vital statistics systems

- 18.66 Innovative technologies can help to increase the operational efficiency, integration, and decentralization of services of civil registration and vital statistics systems. The subprogramme strengthened the efficiency of these systems using innovative technologies such as mobile phones and tablets to declare vital events, and handheld devices such as tablets and mobile phones in data collection and management. The subprogramme enhanced the capacities of members of ECA in the integration of health services and civil registration services, decentralization of civil registration services to all communities, and digitalization of services to improve the efficiency and timely delivery of registration documents. With this progress, there was a need to revisit the legal and regulatory clauses and framework to address existing and potential conflicts with the automated system and facilitate the use of information and communications technology (ICT)-based civil registration and vital statistics systems. In this regard, the subprogramme provided technical and legislative assistance to eight countries, contributing to the adoption by those countries of legal and regulatory frameworks to support the use of ICT-based civil registration and vital statistics systems.
- 18.67 Progress towards the objective is presented in the performance measure below (see figure 18.X).

Figure 18.X
Performance measure: number of countries that have adopted legal and regulatory frameworks that support ICT-based civil registration and vital statistics systems (cumulative)

Planned results for 2024

Result 1: towards integrated geospatial information frameworks

Programme performance in 2022 and target for 2024

- 18.68 The subprogramme’s work contributed to 16 countries developing and implementing national action plans on an integrated geospatial information network, which exceeded the planned target of 15 countries.
- 18.69 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.XI).

Figure 18.XI
Performance measure: number of countries developing and implementing an integrated geospatial information framework (cumulative)

Result 2: towards digital transformation and modernization of statistical systems

Programme performance in 2022 and target for 2024

- 18.70 The subprogramme’s work contributed to eight members of ECA (Burundi, Cameroon, Ethiopia, Lesotho, Namibia, Nigeria, Seychelles and United Republic of Tanzania) implementing the road map on digital transformation and modernizing official statistics, which exceeded the planned target of two members of ECA.
- 18.71 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.XII).

Figure 18.XII
Performance measure: number of members of ECA that implemented the road map on digital transformation and modernized official statistics (cumulative)

Result 3: members of ECA produce and disseminate comparable economic statistics

Proposed programme plan for 2024

- 18.72 African countries can leverage the African Continental Free Trade Area to diversify their economies and become more resilient to crises. In addition, without immediate action to address the impacts of climate change, future adaptation to these effects is likely to be more difficult and expensive. The subprogramme has supported members of ECA in improving their national accounts production systems, putting in place the institutional structures for the sustained production of natural capital, environment and climate change statistics, and producing supply and use tables to support policies related to economic diversification, structural transformation, climate action and a just, inclusive, equitable and secure transition to renewable sources of energy.

Lessons learned and planned change

- 18.73 The lesson for the subprogramme was that building the capacity of national statistical systems to sustainably produce comparable economic data relevant for policymaking is a multi-year process that requires consistent advocacy and regular technical assistance and can benefit from modernization efforts in other areas of statistics. In applying the lesson, the subprogramme will work with identified countries based on their needs to help them put in place the required institutional arrangements to effectively employ tools and techniques that leverage new and traditional data sources to produce statistics, in line with international standards. This will enable members of ECA to develop evidence-based policies related to economic diversification, structural transformation, climate action and just transition.
- 18.74 Expected progress towards the objective is presented in the performance measure below (see figure 18.XIII).

Figure 18.XIII
Performance measure: number of members of ECA that have adopted and applied the recommended international standards and methodology (*System of National Accounts 2008*² and extensions) in economic statistics (cumulative)

Deliverables

18.75 Table 18.8 lists all deliverables of the subprogramme.

Table 18.8
Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	7	7	3	7
Reports on:				
1. Statistical capacity development to the Statistical Commission for Africa at its seventh and eighth meetings	1	1	–	1
2. Progress in population and housing censuses to the Statistical Commission for Africa at its seventh and eighth meetings	1	1	–	1
3. State of a gender perspective and social development statistics to the Statistical Commission for Africa at its seventh and eighth meetings	1	1	–	1
4. Integration of geospatial and statistical data to the Statistical Commission for Africa at its seventh and eighth meetings	1	1	1	1
5. Implementation of the 2008 System of National Accounts to the Statistical Commission for Africa at its seventh and eighth meetings	1	1	–	1
6. Implementation of civil registration and vital statistics to the Conference of African Ministers responsible for Civil Registration	1	1	1	1
7. Geospatial information management to the Regional Committee of United Nations Global Geospatial Information Management for Africa at its eighth and ninth meetings	1	1	1	1

² The System of National Accounts 2008 is the latest version of the international statistical standard for the national accounts, adopted by the United Nations Statistical Commission. The System of National Accounts is the internationally agreed standard set of recommendations on how to compile measures of economic activity. It describes a coherent, consistent and integrated set of macroeconomic accounts in the context of a set of internationally agreed concepts, definitions, classifications and accounting rules. Available at <https://unstats.un.org/unsd/nationalaccount/sna.asp>.

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: technical advice on civil registration and vital statistics, on the 2023 round of population and housing censuses for members of ECA and on Sustainable Development Goal indicators.

Advice to the annual meetings of the Committee of Directors General of National Statistics Offices of the African Union, African Statistical Coordination Committee, Statistical Commission, consultative meeting on strengthening and harmonization of economic statistics in Africa, and high-level forums on global geospatial information management.

Technical advice to members of ECA on the implementation of civil registration frameworks and systems; the implementation and revision of national strategies for the development of statistics; digitalization and the integration of data science initiatives; and survey methodology and coordination of the national statistical system and statistical legislation (including administrative data systems and other sources); and to national statistical offices on the application of data dissemination and exchange systems; advocacy of the adoption of strategies and methodologies by members of ECA and regional bodies to make official statistics open by default; the production and dissemination of gender statistics; advocacy to strengthen the gender statistics focal point network; advocacy to strengthen population and housing censuses; and advice on the adoption and technical implementation of the System of National Accounts 2008 in Africa by members of ECA.

Technical advice to five members of ECA in developing integrated geospatial information frameworks at the national and regional levels; and technical assistance in the integration of geospatial and statistical information, the implementation of the African Geodetic Reference Frame and the development of fundamental themes and standards for geospatial datasets.

Databases and substantive digital materials: ECA statistical data portal (ECAStats), providing data for the 54 members of ECA; geospatial databases (2), online applications, services and platforms (2); and the Africa GeoPortal.

D. Communication deliverables

Outreach programmes, special events and information materials: African Statistics Day; annual Africa Symposium on Statistical Development for some 300 participants; outreach programmes for publications: facts and figures on African and major world economies and advocacy materials on African Statistics Day; Geographic Information Systems Day; desktop and mobile versions of the Executive Statistics Monitoring mobile application.

**Subprogramme 5
Technology, climate change and natural resources management**

Objective

- 18.76 The objective, to which this subprogramme contributes, is to advance inclusive and sustainable development through the strengthened capacity of members of ECA to harness new technologies and innovation, natural resources and the green and blue economies, and to enhance climate resilience.

Strategy

- 18.77 To contribute to the objective, the subprogramme will:
 - (a) Conduct policy research and analysis, and provide technical assistance and advisory services to members of ECA on:
 - (i) The design and implementation of policies related to new technologies, investment in innovation and digital transformation methodologies and frameworks, including the principles for good digital identification;
 - (ii) Extractives-led productive linkages and the design and implementation of mineral policies, strategies and plans that consider health, environmental and social aspects and matters related to gender equality, in line with the principles of the Africa Mining Vision;

- (iii) The circular economy,³ the green economy in the context of sustainable development and poverty eradication, including the conduct of voluntary national and local reviews;
 - (iv) Climate resilience and disaster vulnerability of African economies, societies and ecosystems and the integrated implementation of climate action;
 - (v) Modelling of the economic impacts of climate change and private sector investments for the implementation of nationally determined contributions;
 - (vi) Sustainable recovery from the COVID-19 pandemic, including prioritization of stimulus plans for economic recovery and the links between climate change, the economy and health issues;
- (b) Provide technical advice to the African Union Commission, regional economic communities and intergovernmental organizations on sustainable planning, policy formulation and governance of the blue economy in line with the Africa Blue Economy Strategy of the African Union;
 - (c) Provide training for policymakers, experts and practitioners on the different perspectives and sectors of the blue economy, complemented by assessments of living species, geomorphological analysis and mapping of floors of water bodies, including underground waters, in general and in oceans in particular;
 - (d) Convene peer-learning, policy dialogues and regional consensus-building platforms in the above-mentioned areas, in particular the Africa Regional Forum on Sustainable Development;
 - (e) Provide capacity-building support to members of ECA, private sector, civil society and academia to contribute to the preparatory process for a global digital compact and to build human capital and innovation through education, competitions and design schools for innovators.
- 18.78 The above-mentioned work will help members of ECA to make progress towards the achievement of Sustainable Development Goals 1, 2, 4, 5, 8, 9, 11, 12, 13, 15 and 17.
- 18.79 The above-mentioned work is expected to result in:
- (a) Policy environment conducive to private sector investment in new and emerging technologies and strengthened implementation of the principles for good digital identification, including security of information, to enable digital transformation, inclusive growth and development;
 - (b) Natural resource-rich African countries achieving diversification in their policies and strategies, through economic linkages between their natural resources sector and other sectors;
 - (c) Expanded uptake of effective policies and good practices for inclusive and sustainable growth, poverty eradication and sustainable development;
 - (d) Enhanced policy frameworks on the blue economy at the national, subregional and continental levels;
 - (e) Attainment of common positions and robust development policies, strategies and plans that capitalize on the challenges posed by climate change to the transition to low-emission and climate-resilient economies, with increased private sector investment in the implementation of the Goals;
 - (f) Increased ambition of nationally determined contributions that converge with and complement national development frameworks, plans and programmes and sustainable recovery from COVID-19, climate resilience and increased awareness of the link between climate change and health;
 - (g) Contribution of members of ECA, private sector, civil society and academia well reflected in the global digital compact.

³ United Nations Environment Assembly resolution 5/11.

Programme performance in 2022

Carbon market for the sustainable and climate-resilient development of Africa: from rhetoric to tangible actions

- 18.80 In response to the effects of climate change, compounded by limited access to finance, 16 members of ECA requested the subprogramme's assistance to develop carbon markets alongside other innovative financial instruments, to expand the revenue streams for adaptation, resilient growth, and other sustainable recovery plans. In May 2022, for example, the subprogramme and the Congo Basin Climate Commission co-produced the first harmonized protocol on the continent for accounting, monitoring and reporting carbon emissions to support the development of a high-integrity carbon market for the 16 members of the Commission. At their meeting in Brazzaville in May 2022, ministers from the member countries of the Commission adopted the statutes instituting the Commission and the Blue Fund for the Congo Basin and endorsed the Commission's work plan, including the harmonized protocol. The subprogramme also produced the first regional registry in Africa for the Commission to build a high-integrity carbon market and reduce the transaction costs for trading carbon credits from the member countries of the Commission and other African countries in global stock exchange and to support climate and sustainable development plans. ECA presented the first regional carbon registry to ministers from countries of the Congo basin and other key stakeholders at the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, held in Sharm El Sheikh, Egypt, and was part of the steering committee which launched the Africa Carbon Market Initiative at that session.
- 18.81 Progress towards the objective is presented in the performance measure below (see table 18.9).

Table 18.9

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
National consumption and production action plans established by 13 countries	<p>Ministers from Congo basin countries adopted a common position to scale up financial flows in the conservation of carbon sinks and pricing forest carbon in the Congo Basin Climate Commission, and presented the position at the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change</p> <p>The African Union Commission adopted a joint sustainable recovery action plan based on recommendations published in 2021</p>	<p>Harmonized protocol for carbon market development for the 16 member countries of the Congo Basin Climate Commission as part of its sustainable recovery action plan</p> <p>The regional carbon registry was welcomed for use by ministers from countries of the Congo basin at the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change</p> <p>Ministers from the member countries of the Commission adopted the statutes of the Commission and the Blue Fund for the Congo Basin and related work plans which incorporate the harmonized protocol for accounting, monitoring and reporting carbon emissions</p>

Planned results for 2024

Result 1: increased resilience through channelling resources to respond to the COVID-19 pandemic and climate change

Programme performance in 2022 and target for 2024

- 18.82 The subprogramme’s work contributed to two members of ECA (Egypt and Kenya) designing and implementing initiatives to secure financing for climate-resilient sustainable economic recovery and the green and blue economy, which met the planned target.
- 18.83 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 18.10).

Table 18.10
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Two countries (Rwanda and Seychelles) developed policy options for a climate-resilient blue economy pathway	Three countries (Democratic Republic of the Congo, Congo and Sudan) developed policy options including investments for a climate-resilient sustainable economic recovery and the green and blue economy	Two countries (Egypt and Kenya) implemented initiatives and developed policy options for such purposes as securing finance for a climate-resilient sustainable economic recovery and the green and blue economy	Four policies are developed in members of ECA on sustainable economic recovery and the green and blue economy	Four frameworks for action are developed in members of ECA on sustainable economic recovery and the green and blue economy

Result 2: adoption of good digital identification framework principles for a sustainable and inclusive digital transformation

Programme performance in 2022 and target for 2024

- 18.84 The subprogramme’s work contributed to four members of ECA (Benin, Botswana, Ethiopia, and Togo) formulating policies to adopt new and emerging digital technologies, which met the planned target (see figure 18.XIV).

Figure 18.XIV
Performance measure: members of ECA that formulated policies to adopt new and emerging digital technologies (cumulative)

Result 3: members of ECA develop inclusive, climate-resilient and sustainable economies**Proposed programme plan for 2024**

- 18.85 The impacts of climate change, loss and degradation of ecosystems and growing scarcity of resources are undermining prospects for inclusive and sustainable growth in the region. In response, the subprogramme has undertaken activities to assist members of ECA to align their national development policies, plans and programmes with global frameworks such as the Paris Agreement on climate change, the 2030 Agenda and Agenda 2063. Recent initiatives include the regional forum on sustainable development processes, closer engagement with the global climate change negotiations and implementation of national determined contributions. Since the onset of the COVID-19 pandemic, the subprogramme has supported members of ECA with options for debt management, financial instruments for the reduction and control of emissions, and literature on linkages between multiple concurrent challenges, including the pandemic, climate change and debt sustainability.

Lessons learned and planned change

- 18.86 The lesson for the subprogramme is that increased capacity development support can help with the better integration of climate resilience and sustainable growth pathways into national development policies and programmes. In applying this lesson, in coordination with regional partners, the subprogramme will expand and carry out more targeted and results-oriented capacity-development interventions on developing green and blue economies which are inclusive and climate resilient.
- 18.87 Expected progress towards the objective is presented in the performance measure below (see table 18.11).

Table 18.11

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Private sector investments in clean energy actions under the Goal 7 initiative in three countries (Ethiopia, Senegal and South Africa)	Five countries revised their nationally determined contributions (Burkina Faso, Eswatini, Liberia, Namibia and Zimbabwe)	Three countries (Eswatini, Morocco and Zimbabwe) engage with the private sector in the implementation of nationally determined contributions	Two countries implement revised nationally determined contributions and promulgate low emissions development policies	Four additional countries implement revised nationally determined contributions and promulgate low emissions development policies
	Five national studies on private sector-led sustainable growth and job creation in Cameroon, Côte d'Ivoire, Kenya, South Africa and Zambia			

Deliverables

- 18.88 Table 18.12 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to two members of ECA and two regional and subregional cooperation groups on the framework for a renewed United Nations-African Union partnership on Africa’s integration and development agenda for 2017–2027; technical advice to the secretariat of the African Peer Review Mechanism; advisory services to three countries on climate change and to the African climate commissions; advisory services to two countries and high-level policy event on the green economy in the context of sustainable development and poverty eradication, and structural transformation; advisory services to three countries on innovation and technology in Africa; high-level expert dialogues on science, technology and innovation with approximately 35 African country representatives; advisory services on policies and strategies on technology and innovation to two countries; advisory services to three countries on natural resources management; advisory services and documentation for the African Union-NEPAD meetings in the areas of new technologies and innovation, and climate change in the context of the 2030 Agenda and Agenda 2063; African regional review of the implementation of the outcomes of the World Summit on the Information Society with representatives of all African countries and the African Internet Governance Forum (African platform for multi-stakeholder policy dialogue on prevailing and emerging issues on Internet governance for 400 participants).

D. Communication deliverables

Outreach programmes, special events and information materials: brochures, newsletters, flyers, briefs and information kits on technology, climate change, the green economy in the context of sustainable development and poverty eradication and the blue economy, environment and natural resources management; Africa Climate Talks, with the participation of 100 African stakeholders.

External and media relations: press releases, podcasts and videos related to the issuance of major publications and events.

Digital platforms and multimedia content: websites, social media and platforms on technology and the environment.

Subprogramme 6 Gender equality and women’s empowerment

Objective

- 18.89 The objective, to which this subprogramme contributes, is to achieve gender equality and women’s empowerment in Africa, through accelerating the pace of implementation by members of ECA and their reporting on their global and regional commitments related to gender equality and the empowerment of women and girls and to enhance their implementation of policies and programmes for the empowerment of women and girls.

Strategy

- 18.90 To contribute to the objective, the subprogramme will:
- (a) Undertake policy research and technical advisory services and increase knowledge, develop capacity and stimulate discussion on topical issues relating to gender equality and women’s empowerment, to ensure gender-sensitive development outcomes, building on existing ECA knowledge products;
 - (b) Promote women’s economic empowerment placing particular emphasis on digital transformation in the context of the African Union strategy on digital transformation and the preparatory process for the global digital compact;
 - (c) Provide technical support to members of ECA, including national machineries for gender equality and line ministries, in mainstreaming a gender perspective in their sectoral development policies and programmes, as well as support across ECA subprogrammes on their deliverables for members of ECA, building on ECA knowledge products;
 - (d) Roll out the African Gender and Development Index and the Africa Gender Index, in collaboration with partners, in the remaining countries that have not yet implemented them,

assisting members of ECA in their progress towards achieving Sustainable Development Goal 5 and provide technical support to members of ECA in measuring progress and reporting on the status of implementation of global and regional commitments, including the regional review of the Beijing Declaration and Platform for Action;

- (e) Support ongoing research and analysis on the impacts of extreme weather patterns and natural disasters on women and girls to inform gender-sensitive policy interventions and financing for climate resilience that consider the needs of women and girls.

18.91 The above-mentioned work is expected to result in:

- (a) Strengthened consideration of a gender perspective in the planning and implementation of national policies and programmes, to ensure outcomes that address gender equality and women's empowerment;
- (b) Improved capacity of policymakers to identify and respond to global and regional frameworks on gender equality and women's empowerment, align their national development outcomes, fulfil national commitments and ensure policy coherence;
- (c) Increased knowledge and strengthened capacities of members of ECA to design and develop policies that address the disproportionate impacts of climate change on women and girls;
- (d) Increased knowledge on the role of policymakers in the implementation of policies, legislation and programmes to achieve greater influence and positive impacts on gender equality and women's empowerment;
- (e) Increased opportunities, greater economic empowerment and improved livelihoods for women and girls across Africa, as a result of smart policies and tools designed to address existing and emerging discrepancies in gender equality.

Programme performance in 2022

Strengthened commitment of members of ECA to design policies that address the care economy as part of COVID-19 response and recovery

18.92 The care economy has a fundamental contribution to economic production, economic well-being and sustainable development. Care work, both paid and unpaid, is disproportionately performed by women. Despite its importance and contribution, care work lacks greater public visibility. It is underestimated and overlooked in national accounts and in the design of economic and social policies. The COVID-19 pandemic and associated crises have led to growing concerns regarding deepening pre-existing inequalities, in particular those related to gender. In this context, the subprogramme has contributed to strengthening the capacity of members of ECA to design policies that address the care economy. The subprogramme achieved this by developing policy guidelines on integrating issues related to gender equality and the care economy in post-COVID-19 recovery policies which highlighted the importance of care work for societies, outlining the impacts of the COVID-19 pandemic on women's work and the care economy. In addition, the subprogramme has organized a regional workshop to promote the integration of the care economy in post-COVID-19 recovery policies in Africa.

18.93 Progress towards the objective is presented in the performance measure below (see table 18.13).

Table 18.13
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Eight members of ECA endorsed policy guidelines and committed themselves to integrating the care economy as part of their COVID-19 response and recovery

Planned results for 2024

Result 1: members of ECA engage to address gender equality in the economic and digital transformation of African countries

Programme performance in 2022 and target for 2024

- 18.94 The subprogramme’s work contributed to five members of ECA (Mauritius, Nigeria, Seychelles, South Africa and Tunisia) drafting and endorsing policies and programmes designed to narrow the gender digital divide and the adoption of a common Africa position by members of ECA on innovation and technological change in the digital age for achieving gender equality and women’s empowerment, which met the planned target.
- 18.95 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 18.14).

Table 18.14
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Preliminary findings for the <i>African Women’s Report 2021</i> , which will focus on digital finance as a pathway to women’s economic empowerment, providing a comprehensive overview of the digital finance architecture	100 per cent of survey respondents, representing members of ECA, have enhanced their knowledge on the gender digital divide Outcome statement by members of ECA on the importance of promoting digital finance for achieving women’s economic empowerment across the region	Five African countries drafted and endorsed policies and programmes designed to narrow the gender digital divide as part of the five-pillar capacity-development strategy on digital upskilling for women and girls in Africa Adoption of a common African position on innovation and technological change in the digital age, for achieving gender equality and women’s empowerment	Improved capacity of five members of ECA to formulate policies that promote digital skills and training for women and girls and science, technology, engineering and mathematics employment for women	50 policymakers implement the regional capacity development strategy for women and girls to harness the economic and digital transformation of African countries

Result 2: members of ECA integrate a gender perspective into their sectoral policies

Programme performance in 2022 and target for 2024

- 18.96 The subprogramme’s work contributed to the increased capacity of five members of ECA (Ghana, Namibia, Nigeria, South Africa and Tunisia) to design gender-sensitive sectoral policies, including on women’s leadership, and the adoption of a common Africa position by members of ECA to integrate gender equality into the climate action agenda, which met the planned target.
- 18.97 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 18.15).

Table 18.15
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Increased capacity of three members of ECA to integrate a gender perspective into their national strategies for the implementation of the African Continental Free Trade Area	Increased capacity of three members of ECA to design gender-sensitive policies focused on the artisanal and small-scale mining sector and to inform policy and finance for nationally determined contribution plans	Increased capacity of five members of ECA (Ghana, Namibia, Nigeria, South Africa and Tunisia) to design gender-sensitive sectoral policies, including on women’s leadership Adoption of a common Africa position by members of ECA to integrate gender equality into the climate action agenda	Five members of ECA integrate a gender perspective into their sectoral policies and national development planning	Five additional members of ECA integrate a gender perspective into their relevant sectoral policies, national development plans, legislation, public finance, fiscal plans, and other policy tools and instruments

Result 3: members of ECA measure, monitor and report on implementation of global and regional commitments on gender equality

Proposed programme plan for 2024

- 18.98 The subprogramme has been providing support to members of ECA through its African Gender and Development Index, a tool designed to facilitate effective monitoring and evaluation, policy and planning analysis, and also an assessment of the extent to which Africa is implementing the regional and international commitments to gender equality and women’s empowerment. The tool has been implemented in 40 African countries to date. At the request of its members, ECA started producing the Africa Gender Index in 2020 as a regional comparison tool, to identify the bottlenecks impeding progress in the implementation of global and regional commitments, and support members of ECA in developing policy interventions to address identified challenges. At the fourth session of the Committee on Social Policy, Poverty and Gender, members of ECA requested ECA to maintain the African Gender and Development Index as a self-reporting tool, while also extending it to other members of ECA and broadening its scope.

Lessons learned and planned change

- 18.99 The lesson for the subprogramme was that there is a need to support members of ECA in addressing gaps in the implementation of global and regional commitments on gender equality. Despite the

progress made, some African countries have experienced a retraction of the development gains achieved in respect of gender equality and the empowerment of women and girls, where external shocks have taken precedence and shifted development priorities. In applying the lesson, and using the ECA knowledge products, the subprogramme will support members of ECA in monitoring progress made and thereby inform policy interventions for socioeconomic development that targets women and girls and that moves towards the implementation of global and regional commitments on gender equality.

18.100 Expected progress towards the objective is presented in the performance measure below (see table 18.16).

Table 18.16
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Five members of ECA completed the African Gender and Development Index assessment, bringing the total to 40 members of ECA	Availability of revised methodology to align it with the 2030 Agenda	Two members of ECA have employed the revised African Gender and Development Index to monitor and review their commitments to gender equality	Five members of ECA employ the African Gender and Development Index to design, report and monitor programmes and progress made in achieving selected targets for Goal 5	Three members of ECA institutionalize the African Gender and Development Index into national statistical systems to enable them monitor and report progress made in achieving selected targets for Goal 5
First edition of the Africa Gender Index compiled for 51 countries				

Deliverables

11. Workshop on policies and programmes to narrow the gender digital divide	2	2	2	10
Publications (number of publications)	2	2	1	–
12. African Women’s Report based on thematic and topical issues	–	–	1	–
13. African women’s leadership report to assess the status of women in leadership positions	1	1	–	–
14. Analytical report on ECA work in support of gender-sensitive sectoral policies	1	1	–	–
Technical materials (number of materials)	3	3	2	3
15. Technical notes on the Africa Gender Index and the African Gender and Development Index	–	–	1	1
16. On climate change and gender equality and women’s empowerment in Africa	–	–	–	1
17. Policy brief on gender equality in the economic and digital transformation of African countries	3	3	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: special event on International Women’s Day (2024) and the 16 Days of Activism against Gender-based Violence campaign as part of the global campaign and support for the preparatory ministerial meeting attended by African countries, for the Commission on the Status of Women. These are part of a broader mandate and campaigns targeting all members of ECA.				
D. Communication deliverables				
Digital platforms and multimedia content: knowledge platforms for information-sharing and advocacy on gender equality and women’s empowerment to deepen dialogue and policy options using the subprogramme’s social media accounts.				
External and media relations: press releases on the subprogramme’s website after the hosting and organization of each event.				

**Subprogramme 7
Subregional activities for development**

**Component 1
Subregional activities in North Africa**

Objective

18.102 The objective, to which the component contributes, is to enhance the employment creation environment in North Africa through strengthened economic diversification, fiscal management and regional integration and a better recognition of migrant workers’ qualifications and skills.

Strategy

18.103 To contribute to the objective, the component will:

- (a) Develop evidence-based policies, strategies and reforms and provide technical assistance related to economic diversification, fiscal management and resilient economies;

- (b) Provide advisory services and hold subregional consultations on the implementation of the Agreement Establishing the African Continental Free Trade Area, in partnership with ministries of trade, the African Union and the European Union;
- (c) Provide technical assistance and training for selected African countries on migration data collection and analysis and evidence-based policy formulation to mainstream and leverage migrants' economic contributions, through data collection and analysis;
- (d) Conduct research on demographic trends, the digital skills gap and productive employment creation in Africa in collaboration with United Nations and external partners;
- (e) Analyse, in collaboration with others, employment creation through small and medium-sized enterprises in North Africa, with a focus on the green economy in the context of sustainable development and poverty eradication, digitalization, gender equality and post-pandemic recovery.

18.104 The above-mentioned work is expected to result in:

- (a) Adoption of evidence-based macroeconomic policies and structural reforms by members of ECA to enhance productive employment, redirecting resource allocations towards sectors that have high potential in terms of competitiveness;
- (b) Policies and strategies that foster regional integration, enhance productivity and create new jobs in higher-skilled sectors;
- (c) Development of evidence-based policies and actions by members of ECA that promote the contribution of migration to sustainable development;
- (d) Conducive environment for small and medium-sized enterprises to generate productive and sustainable jobs, especially for women and young people.

Programme performance in 2022

Enhanced tax revenue mobilization in the Sudan

- 18.105 The tax revenues of the Sudan relative to its gross domestic product (GDP) have been in single digits, limiting the country's capacity, including in the provision of education and health-care services and facilitation of large infrastructure investments. The component provided technical assistance to the Sudan Taxation Chamber to modernize its tax administration processes, develop new audit methodologies and efficiently audit monthly and annual tax returns. In 2022, in partnership with the Egyptian Tax Authority, the component also provided technical assistance to implement the withholding tax system for the first time in the Sudan, resulting in significant revenues and transaction information. Subsequently, a regulation decree was issued to update the criteria for selecting large taxpayers. For the first time in the Sudan, a reverse-charge value added tax return form was developed. New audit guidance for auditing large taxpayers' annual and monthly returns was developed. The penalties imposed on non-compliant taxpayers who violate tax laws were stiffened.
- 18.106 Progress towards the objective is presented in the performance measure below (see figure 18.XV).

Figure 18.XV
Performance measure: ratio of tax revenue to gross domestic product in the Sudan (annual)

(Percentage)

Planned results for 2024

Result 1: North African countries and regional economic communities design policies to foster regional integration

Programme performance in 2022 and target for 2024

- 18.107 In 2022 the component’s work contributed to the design by two members of ECA (Libya and Tunisia) of appropriate policies to foster regional integration, which met the cumulative planned target of eight members of ECA and regional economic communities.
- 18.108 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.XVI).

Figure 18.XVI
Performance measure: number of members of ECA and regional economic communities that design appropriate policies to foster regional integration (cumulative)

Result 2: small and medium-sized enterprises as engines of sustainable development in North Africa

Programme performance in 2022 and target for 2024

- 18.109 The component’s work contributed to strengthened job creation and export capabilities of 50 policymakers from the Ministry of Trade and of owners of small and medium-sized enterprises,

mostly women, in one country (Sudan), which did not meet the planned target of one country adopting innovative and sustainable policies and strategies for enhancing the capacity of small and medium-sized enterprises. The target was not met as the process towards the adoption of such policies is still under way.

- 18.110 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 18.18).

**Table 18.18
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	One country (Tunisia) received analysis and policy advice for strengthening the capacity of small and medium-sized enterprises, including through innovative sources of finance and environmentally sound practices	Strengthened job creation and export capabilities of policymakers from the Ministry of Trade and small and medium-sized enterprise owners in one country (Sudan)	One additional country adopting innovative and sustainable policies and strategies for enhancing the capacity of small and medium-sized enterprises	One additional country adopting innovative and sustainable policies and strategies for enhancing the competitiveness of small and medium-sized enterprises

Result 3: developing evidence-based policies and actions that leverage migrants’ economic contributions

Proposed programme plan for 2024

- 18.111 Since the adoption of the Global Compact for Safe, Orderly and Regular Migration, members of ECA across the continent have called for greater efforts to capitalize on the benefits of migration for the achievement of sustainable development. Since 2020, the component has been supporting members of ECA in implementing two objectives (1 and 18) of the Global Compact to strengthen capacities to collect, analyse and disseminate migration-related data and enhance mutual recognition of skills and qualifications of workers.

Lessons learned and planned change

- 18.112 The lesson for the component was the need to expand its support to members of ECA to not only collect, analyse and disseminate migration-related data but also to formulate policies based on the data collected. In applying the lesson, the component will provide technical assistance and policy advice to support countries in developing evidence-based policies that leverage migrants’ economic contributions and that take into account the different needs of women and men.
- 18.113 Expected progress towards the objective is presented in the performance measure below (see figure 18.XVII).

Figure 18.XVII

Performance measure: number of countries developing evidence-based policies to leverage migrants' economic contributions (cumulative)

Deliverables

18.114 Table 18.19 lists all deliverables of the component.

Table 18.19

32. Report on challenges facing middle income countries in North Africa	–	–	–	1

C. Substantive deliverables

Consultations, advice and advocacy: advisory services to four members of ECA on debt management; advisory services to two members of ECA on how to carry out their national strategies on implementation of the Agreement Establishing the African Continental Free Trade Area; advisory services to at least three members of ECA on migration issues; advisory services to two members of ECA on aligning their development strategy to sustainability challenges, with a focus on firm practices.

D. Communication deliverables

Digital platforms and multimedia content: knowledge management website; three maintained platforms: electronic documents management, collaborative space, and customer relationship management of communities of practice.

External and media relations: press releases, newsletters, briefings, social media and other communication materials.

Component 2 Subregional activities in West Africa

Objective

- 18.115 The objective, to which this component contributes, is to advance inclusive development in West Africa through strengthening countries' capacity to integrate challenges related to demographic dynamics into their policies and planning processes and achieve regional integration.

Strategy

- 18.116 To contribute to the objective, the component will:
- (a) Increase its analytical work, and provide knowledge, tools and policies on the acceleration of a demographic transition and related implications for sustainable development, including family dynamics, migration and migrants, health and mortality, ageing and living conditions, gender equality and the empowerment of women and girls, youth and sustainable peace and resilience in West Africa, among others;
 - (b) Engage in high-level policy dialogues and provide technical support and capacity-building to members of ECA on regional integration issues, including the implementation of the Agreement Establishing the African Continental Free Trade Area, and also the development of budgeting frameworks that are sensitive to a demographic dividend with special emphasis on the empowerment of women and young people;
 - (c) Leverage its strategic partnership with the ECOWAS Commission to support members of ECA in implementing the first five-year strategic plan of the ECOWAS Vision 2050.
- 18.117 The above-mentioned work is expected to result in:
- (a) Demographic dividend dimensions mainstreamed in national planning-programming and budgeting systems and processes;
 - (b) Deepened regional economic and monetary integration through the operationalization of the ECOWAS Vision 2050;
 - (c) Accelerated implementation of the 2030 Agenda and Agenda 2063 by members of ECA and regional organizations;
 - (d) Accelerated implementation of the Agreement Establishing the African Continental Free Trade Area in Africa, with women and young people empowered to seize the opportunities of the Agreement.

Programme performance in 2022

West African business linkages for women and young people established to leverage benefits of the African Continental Free Trade Area

- 18.118 As part of its support for implementation of the Agreement Establishing the African Continental Free Trade Area, in 2021 the component convened a regional business forum in Lagos, Nigeria, attended by more than 500 participants from national ministries and regional organizations, as well as the private sector and civil society. The Forum's main objective was to promote the effective participation of women and young people in the implementation of the Agreement Establishing the African Continental Free Trade Area and ensure that those groups could benefit from its implementation. The forum led to the establishment of the West Africa business linkages platform, which promotes the sharing of market information and opportunities among women and young entrepreneurs in West Africa and beyond. Following the establishment of the platform, the component engaged in further outreach to women and young entrepreneurs to raise awareness of its availability. As of 2022, 100 women and young entrepreneurs across different business sectors, including agriculture, information technology, cultural and artisanal sector, education and health, registered and used the platform for a range of activities, including business matchmaking, market research and logistics.
- 18.119 Progress towards the objective is presented in the performance measure below (see table 18.20).

Table 18.20
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	West Africa business linkages platform established to promote the sharing of market information and opportunities among women and young entrepreneurs in West Africa and beyond	100 women and young entrepreneurs used the platform to operate and expand their business, including business matchmaking, market research and logistics

Planned results for 2024

Result 1: strengthened national strategies for implementing the African Continental Free Trade Area

Programme performance in 2022 and target for 2024

- 18.120 The component’s work contributed to the ratification of the Agreement Establishing the African Continental Free Trade Area by 13 West African countries, which met the planned target.
- 18.121 The component’s work also contributed to one additional country (Nigeria) formulating and validating its national strategy for the implementation of the Agreement Establishing the African Continental Free Trade Area, which met the cumulative planned target of 10 countries.
- 18.122 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 18.21).

Table 18.21
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Eleven ECOWAS countries ratified the Agreement	Eleven ECOWAS countries ratified the Agreement	Thirteen ECOWAS countries ratified the Agreement (cumulative)	Eleven ECOWAS countries validated their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area (cumulative)	Twelve ECOWAS countries validated their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area (cumulative)
Six ECOWAS countries validated their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area (Côte d’Ivoire, Guinea, Niger, Senegal, Sierra Leone and Togo)	Nine ECOWAS countries validated their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area (Burkina Faso, Côte d’Ivoire, Gambia, Ghana, Guinea, Niger, Senegal, Sierra Leone and Togo)	Ten ECOWAS countries validated their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area (Burkina Faso, Côte d’Ivoire, Gambia, Ghana, Guinea, Niger, Nigeria, Senegal, Sierra Leone and Togo)	Eight ECOWAS countries implemented key activities included in their respective national strategies for the implementation of the Agreement	Nine ECOWAS countries implemented key activity projects included in their respective national strategies for the implementation of the Agreement Establishing the

			Establishing the African Continental Free Trade Area	African Continental Free Trade Area

Result 2: developing and implementing a planning, programming and budgeting system that integrates the demographic dividend

Programme performance in 2022 and target for 2024

- 18.123 The component’s work contributed to the development of national road maps for implementation of a budgeting framework integrating a demographic dividend in six members of ECA, as well as the development of national analytical reports by three of these members (Burkina Faso, Niger and Senegal) to guide the appropriate allocation of resources to work related to the demographic dividend, which did not meet the planned target of three members of ECA adopting a planning, programming and budgeting system integrating a demographic dividend. The target was not met as the preliminary analytical reports could only be completed in 2022.
- 18.124 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.XVIII).

Figure 18.XVIII

Performance measure: members of ECA that adopted a planning, programming and budgeting system integrating a demographic dividend (cumulative)

Result 3: regional performance monitoring and accountability mechanism to monitor and report on progress in the implementation of the African Union road map on harnessing the demographic dividend through investments in youth

Proposed programme plan for 2024

- 18.125 Demographic transition offers opportunities for accelerated economic growth, poverty reduction, and enhanced quality of life. The component has been supporting members of ECA in advancing the integration of demographic dynamics into their development plans and policies, in line with the four pillars of the African Union road map on harnessing the demographic dividend through investments in youth.

Lessons learned and planned change

- 18.126 The lesson for the component was the need to focus more strongly on supporting members of ECA in monitoring and reporting on progress made to enable them to make informed decisions on further national action required to harness the demographic dividend. In applying the lesson, the component

will strengthen the skills of policymakers and practitioners in the use of demographic economic and planning tools, including economic models and national transfer accounts, to enable them to better assess progress in the implementation of their country’s respective budgeting framework sensitive to the road map for harnessing the demographic dividend. In addition, the component will facilitate coordination and engage in policy dialogue and advocacy with key stakeholders to support members of ECA in establishing a regional monitoring and accountability mechanism to track regional progress in the implementation of the road map.

18.127 Expected progress towards the objective is presented in the performance measure below (see figure 18.XIX).

Figure 18.XIX

Performance measure: number of national officials with enhanced capacity in demographic dynamics and policy implications and number of members of ECA establishing a performance monitoring and accountability mechanism for a demographic dividend (cumulative)

Deliverables

18.128 Table 18.22 lists all deliverables of the component.

Table 18.22

Subprogramme 7, component 2: deliverables for the period 2022–2024, by category and subcategory

B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
5. Strengthening the institutional capacity of regional economic communities, intergovernmental organizations, national Governments, national observatories of the demographic dividend and parliaments to capitalize on demographic dynamics for development in West Africa	1	1	1	1
Seminars, workshops and training events (number of days)	14	14	14	14
6. Workshops for think tanks on opportunities and challenges of demographic dynamics in West Africa	9	9	9	9
7. Training events on strengthening the capacities of members of ECA in demographic economic dynamics for development	5	5	5	5
Publications (number of publications)	3	3	3	3
8. On country and subregional socioeconomic and demographic profiles	2	2	2	2
9. On economic and social structural transformation in West Africa	1	1	1	1
Technical materials (number of materials)	2	1	2	2
10. On sustainable economic and social transformation in West Africa	1	1	1	1
11. On demographic dynamics for development	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to 15 members of ECOWAS (Governments, parliaments, national observatories of the demographic dividend, universities), upon request, and on the monitoring and implementation of strategies, statistics development, regional integration, demographic dynamics for development and sustainable development in West Africa and making progress towards the Sustainable Development Goals.				
D. Communication deliverables				
Outreach programmes, special events and information materials: events for parliamentary networks and events for the launch of flagship reports and related publications.				
External and media relations: press releases; quarterly newsletter (KAKAKI NEWS) and other communication materials to the media.				
Digital platforms and multimedia content: West African subregion-specific content for the ECA website; West African business linkage platform; network of West African economic journalists; social media platforms, and other communities of practice.				
Library services: Exhibition of ECA knowledge products through various channels and information on the ECA main repository.				

Component 3 Subregional activities in Central Africa

Objective

- 18.129 The objective, to which this component contributes, is to expand the manufacturing and high-value service sectors and increase the share of tradeable and manufactured goods in total exports, deepen regional value chains and improve the competitiveness and productivity of local economies in order to accelerate economic diversification and structural transformation in Central Africa.

Strategy

- 18.130 To contribute to the objective, the component will:
- (a) Provide technical assistance and advisory services to members of ECA in Central Africa on:

- (i) Formulating, operationalizing and implementing national development plans and economic diversification strategies with a focus on intra-Central African trade and also advocating a conducive business climate with pro-growth and pro-jobs policies;
 - (ii) Translating their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area into specific and bankable projects, programmes and reforms, using market access information and trade opportunity data, with a particular focus on the agricultural, energy and pharmaceutical sectors;
 - (iii) Transforming the transport corridors into development corridors, in line with the Central Africa consensual transport plan, including through use of the GIS-enabled spatial planning and hotspot analysis tool;
 - (iv) Developing ICT infrastructure and regulatory frameworks required for the digital transition, including support for the establishment of technology innovation centres in two selected countries, in collaboration with the African Centre of Excellence on Digital Identity, Trade and Economy and subprogramme 4;
 - (v) Harmonizing trade instruments of the Economic Community of Central African States and the Central African Economic and Monetary Community and formulating a consolidated industrial development and economic diversification master plan for Central Africa;
 - (vi) Developing an ECA macro model in Central Africa, complemented by training in its use for national officials in relevant units, in collaboration with the Debt Management Facility of the World Bank and subprogramme 8;
- (b) Train members of ECA and United Nations country teams in the use of the ECA integrated planning and reporting toolkit;
 - (c) Further develop collaboration with private sector bodies and catalyse a reform agenda conducive to triggering the changes needed to reach productivity and competitiveness targets in partnership with the private sector, subregional think tanks and regional economic communities.

18.131 The above-mentioned work is expected to result in:

- (a) Strengthened regional value chains and industrial clusters, integrated with local economies, and expanded manufacturing and high-value service sectors;
- (b) Increased share of intra-Central African trade in the subregion's total trade;
- (c) Integration of the relevant economic diversification-related goals and targets of the 2030 Agenda and Agenda 2063 into national development strategies and plans, common country analyses and United Nations sustainable development cooperation frameworks;
- (d) Increased productivity of local firms, including adoption of new technologies;
- (e) Strengthened role of the private sector in economic diversification in Central Africa and the identification of policy and market failures.

Programme performance in 2022

Centre of excellence for advanced battery research established to build skills for economic diversification

18.132 The operationalization and implementation of economic diversification strategies call for innovative skills development models based on promoting science, technology, engineering and mathematics sectors. The component, in its efforts to move from designing to implementing economic diversification strategies, stepped up its support to the Democratic Republic of the Congo in the development of the joint special economic zone on batteries, electric vehicles and renewable sources

Section 18 Economic and social development in Africa

of energy between that country and Zambia. To complement these efforts, the component supported the development of a skills development strategy which aims to strengthen the human capital pillars of the region's industrial master plan. The strategy led to the establishment and launch by national authorities of a centre of excellence for advanced battery research, which will furnish the future labour force with the necessary skills and knowledge to contribute to the growth of the battery and renewable energy sector.

18.133 Progress towards the objective is presented in the performance measure below (see table 18.23).

Table 18.23

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	Following the 2021 business forum organized by the Democratic Republic of the Congo in 2021, stakeholders from Central African countries and other African regions signed a memorandum of understanding aimed at increasing the share held by Africa in the global output of value-added battery precursors and electric vehicles	Democratic Republic of the Congo and Zambia implement a skills development strategy for batteries, electric vehicles and renewable sources of energy, including through establishment of the African centre of excellence for advanced battery research

Planned results for 2024

Result 1: policy changes conducive to economic diversification in the context of building forward and building better from the socioeconomic impacts of the COVID-19 pandemic and the operationalization of the African Continental Free Trade Area

Programme performance in 2022 and target for 2024

18.134 The component's work contributed to the adoption of a change of policy on economic diversification and industrial development, related to design of an industrialization and economic diversification master plan for the new, consolidated regional economic community of Central Africa, which met the planned target.

18.135 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.XX).

Figure 18.XX
Performance measure: number of policy changes adopted in respect of economic diversification and industrial development (cumulative)

Result 2: sustainable financing mobilized by mainstreaming natural capital in the national accounts

Programme performance in 2022 and target for 2024

- 18.136 The component’s work contributed to two countries (Cameroon and Gabon) applying natural capital accounting methods in rebasing their national accounts, which did not meet the planned target of four countries. The target was not met as the process of integrating natural capital into national accounts is still under way in some countries.
- 18.137 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.XXI).

Figure 18.XXI
Performance measure: number of countries that applied natural capital accounting methods in rebasing their national accounts (cumulative)

Result 3: bankable projects implemented in support of inclusive and sustainable industrialization and economic diversification

Proposed programme plan for 2024

- 18.138 In November 2020, the Intergovernmental Committee of Senior Officials and Experts of Central Africa declared 2021–2023 as the Decade for Economic Diversification in Central Africa. As part of the component’s efforts towards moving from ideas to actions in promoting inclusive and sustainable industrialization and economic diversification, and in light of the declaration of the Decade for

Economic Diversification, the component has been providing support for the development of special economic zones.

Lessons learned and planned change

18.139 The lesson for the component, based on experiences during the COVID-19 pandemic, was that the use of virtual modalities for certain activities can help to integrate new partners and agents of change. In applying the lesson, the component will strengthen its ICT capacity, focus more on promoting the digital economy and engage with new partners in the development of special economic zones. This will enable the component to strengthen its partnership with African financial institutions, subregional institutions, private sector entities and United Nations country teams, to ensure their active engagement and a coordinated approach in the development of two additional such zones in Central Africa.

18.140 Expected progress towards the objective is presented in the performance measure below (see figure 18.XXII).

Figure 18.XXII

Performance measure: number of bankable projects implemented in the Central African subregion (cumulative)

Deliverables

18.141 Table 18.24 lists all deliverables of the component.

C. Substantive deliverables				
Consultation, advice and advocacy: advisory services and high-level policy dialogues with Central African members of ECA on the implementation and monitoring of economic diversification and strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area.				
D. Communication deliverables				
Outreach programmes, special events and information materials: brochures and knowledge products, press briefings, media visits, newsletters and press releases on achievements on economic diversification and change leadership in the subregion.				
Digital platforms and multimedia content: maintenance of at least seven websites, digital platforms and communities of practices on economic diversification, industrialization and the Sustainable Development Goals.				

Component 4 Subregional activities in East Africa

Objective

- 18.142 The objective, to which this component contributes, is to achieve deeper regional integration in East Africa by advancing the operationalization of the African Continental Free Trade Area, increasing intraregional investments, harnessing the blue economy and enhancing regional tourism.

Strategy

- 18.143 To contribute to the objective, the component will:
- (a) Provide support to countries and regional economic communities through knowledge production, technical assistance, capacity-building and policy dialogues, on the development and effective implementation of their national and regional strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area African Continental Free Trade Area, and also the negotiation and arrangements concerning outstanding protocols

and instruments on the Area, including on investments, competition, intellectual property rights, electronic commerce, and women and young people in trade.

- (b) Build the capacity of the private sector, notably small and medium-sized enterprises, to take part in the African Continental Free Trade Area, through information and awareness-raising workshops on the functionalities of the instruments and protocols of the Area and also on innovative sources of financing;
 - (c) Engage in policy dialogue and provide training to promote transboundary investments and cost-effective trade logistics, including the creation and use of digital platforms and commodity exchanges to reduce asymmetries of information;
 - (d) Convene a subregional forum to raise awareness on issues related to the blue economy, including inland waterway transport, and the potential of the blue economy to diversify goods and services and to operationalize the African Continental Free Trade Area, with a particular focus on multisectoral approaches to fisheries, maritime transport, management of freshwater resources, tourism, deep-sea mining and women's access to natural resources;
 - (e) In collaboration with subprogrammes 4, 5 and 8, develop indicators, collect data and use analytical tools to assess the socioeconomic and environmental potential of blue economy resources of members of ECA;
 - (f) Support members of ECA with the development of national tourism strategies, the implementation of guidelines for urban tourism, in line with the recommendations set out in the African tourism strategy, and provide training for members of ECA and regional economic communities on the production of high-quality tourism statistics in the subregion, in partnership with subprogrammes 4 and 9, the World Tourism Organization and the World Bank.
- 18.144 The above-mentioned work will help members of ECA make progress towards the achievement of Sustainable Development Goals 5, 7, 8, 11, 12, 13, 14 and 17.
- 18.145 The above-mentioned work is expected to result in:
- (a) National development planning frameworks incorporating and amplifying blue economy policies and strategies;
 - (b) Standardized methodologies for tourism data collection and analysis in the subregion;
 - (c) Increased market diversification and economic resilience to external shocks, related in particular to the blue economy and the tourism sector;
 - (d) Deeper regional integration and improved connectivity of landlocked countries, through harmonized strategies and policies for inland waterway transport;
 - (e) Higher levels of intraregional trade in goods and services;
 - (f) Harmonization of investment regimes and investment promotion strategies, and improved regulatory frameworks governing investment.

Programme performance in 2022

Integrated tourism data in the national accounting system of Uganda

- 18.146 Tourism satellite accounts provide an internationally recognized and standardized method of assessing the scale of tourism-related production and its links across different sectors. This method is instrumental in guiding both the private sector and Governments in making optimal investment decisions in the tourism sector and thereby fostering economic growth. Between 2017 and 2022, the component supported various countries, including Uganda, in the formulation of their tourism satellite accounts. In 2017, the component supported measures to build the capacity of Ugandan technical experts from the Ministry of Tourism, the Ministry of Finance and Planning, the Uganda Bureau of Statistics, the Uganda Tourism Board, the Uganda Wildlife Authority, the Uganda Tourism

Association, the Uganda Hotel Owners Association, the Bank of Uganda and the Civil Aviation Authority to develop their tourism satellite accounts, but the process was not completed because of data gaps. In 2018, the component supported the Uganda Bureau of Statistics in conducting surveys to close data gaps and ensure that adequate tourism data were made available in 2019. The process was interrupted, however, by the COVID-19 pandemic and support in this regard could only be resumed in Uganda in 2022.

- 18.147 In 2022, leveraging the experience gained by other countries in developing tourism satellite accounts, the component organized capacity-building workshops for technical experts on tourism and carried out consultation sessions with key institutions to increase their understanding of how to construct such accounts. In September 2022, the component organized a workshop attended by 15 trained experts, to construct 10 tables of tourism satellite accounts. Subsequently, a workshop was conducted in December 2022 to review and validate the first tourism satellite account in Uganda and was attended by 26 technical experts and senior government officials. The whole process was characterized by the strong sense of ownership manifested by the Government.
- 18.148 Progress towards the objective is presented in the performance measure below (see table 18.25).

Table 18.25
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	–	Uganda tourism satellite account validated, enabling informed decision-making on investments in the tourism sector

Planned results for 2024

Result 1: harnessing the potential of the blue economy, including tourism, within the African Continental Free Trade Area

Programme performance in 2022 and target for 2024

- 18.149 The component’s work contributed to one member of ECA (United Republic of Tanzania) adapting the blue economy valuation toolkit to the national context, which did not meet the planned target of at least two additional members of ECA implementing subregional initiatives in the area of the blue economy. The target was not met owing to the limited availability of the reliable data in selected members of ECA required for the formulation of blue economy satellite accounts.
- 18.150 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 18.26).

Table 18.26
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Nine policy frameworks and tools developed by members of ECA on the blue economy	Eleven policy frameworks and tools developed by members of ECA on the blue economy	One country (United Republic of Tanzania) adapted the blue economy valuation toolkit to the national context	An additional three members of ECA implement subregional initiatives in the	One additional member of ECA implements a policy framework in the area of the blue economy

Section 18 Economic and social development in Africa

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
One country (Seychelles) finalized draft tourism satellite accounts (awaiting government approval)	Two members of ECA (Kenya and the United Republic of Tanzania (Zanzibar)) finalized tourism satellite accounts		area of the blue economy	

Result 2: designing and implementing policy frameworks on trade, the blue economy and tourism

Programme performance in 2022 and target for 2024

- 18.151 The component’s work contributed to the enhanced capacity of one member of ECA (United Republic of Tanzania) to design policy frameworks in trade and the blue economy and two members (Kenya and Rwanda) having implemented policy and strategy frameworks in trade and tourism, which met the planned targets.
- 18.152 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 18.27).

Table 18.27
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	Two members of ECA with enhanced capacity to design policy frameworks in the areas of trade, the blue economy and tourism	Enhanced capacity of one member of ECA (United Republic of Tanzania) to design a policy framework in trade and the blue economy Two members of ECA (Kenya and Rwanda) implemented policy and strategy frameworks in trade and tourism	Two additional members of ECA implemented policy and strategy frameworks in trade, the blue economy or tourism	One additional member of ECA implements policy and strategy frameworks in tourism

Result 3: members of ECA shift from formulation to implementation of their African Continental Free Trade Area national strategies

Proposed programme plan for 2024

- 18.153 The component’s work contributed to ten countries (Burundi, Democratic Republic of the Congo, Djibouti, Ethiopia, Kenya, Rwanda, Seychelles, Somalia, Uganda and United Republic of Tanzania) ratifying the Agreement Establishing the African Continental Free Trade Area. The component has been providing support to members of ECA and regional economic communities for the formulation of their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area and the identification of priority export products.

Lessons learned and planned change

18.154 The lesson for the component was the need to shift the focus of its support from formulation toward the effective implementation of these strategies, building on its experience of supporting Kenya and Rwanda where implementation had already started. In applying this lesson, the component will support additional members of ECA in the implementation of their national strategies, conducting needs assessments to ensure that its technical assistance is more demand-driven. It will also support members of ECA in organizing awareness-raising activities for the private sector, civil society, academia and government institutions on instruments and protocols of the African Continental Free Trade Area, with a view to enhancing engagement in regional integration and optimizing the implementation of the Agreement Establishing the African Continental Free Trade Area.

18.155 Expected progress towards the objective is presented in the performance measure below (see table 18.28).

Table 18.28
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Four out of fourteen countries (Burundi, Democratic Republic of the Congo, Kenya and Rwanda) and one regional economic community (East African Community) formulated African Continental Free Trade Area strategies	An additional three countries (Comoros, South Sudan and Somalia) and one regional economic community (Intergovernmental Authority on Development) formulated strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area Two out of fourteen countries (Kenya and Rwanda) started implementation of their national strategies on the Agreement Establishing the African Continental Free Trade Area	One additional country implements its national strategy on the Agreement Establishing the African Continental Free Trade Area	One additional country implements its national strategy on the Agreement Establishing the African Continental Free Trade Area

Deliverables

18.156 Table 18.29 lists all deliverables of the component.

Table 18.29

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to all 14 members of ECA in the subregion on implementation of the Agreement Establishing the African Continental Free Trade Area, inclusive growth and economic and social transformation through inter-agency coordination.

D. Communication deliverables

Outreach programmes, special events and information materials: quarterly booklets, pamphlets, fact sheets, wallcharts and information kits and videos to reach all 14 countries in the subregion.

External and media relations: quarterly engagements with national and regional media outlets (written blogs and interviews targeting 14 countries); and electronic briefs and press releases on major activities of the Subregional Office for Eastern Africa, including regional updates to reach all 14 countries in the subregion.

Digital platforms and multimedia content: monthly web-based information bulletins on global outreach.

Component 5 Subregional activities in Southern Africa

Objective

- 18.157 The objective, to which this component contributes, is to deepen regional integration and strengthen capacities to achieve inclusive industrialization for the reduction of poverty and inequality in Southern Africa.

Strategy

- 18.158 To contribute to the objective, the component will:
- (a) Undertake policy research and analysis on inclusive industrialization, regional integration and trade, and private sector development, and also on poverty and inequality; provide technical assistance to members of ECA, regional economic communities, and intergovernmental organizations; and disseminate best practices at the subregional and national levels in Southern Africa;
 - (b) Develop and disseminate policy tools and guidelines to promote industrialization, including value addition, manufacturing and value chain development, at the national and subregional levels in Southern Africa, thus contributing to the attainment of Goal 9 and related goals of Agenda 2063;
 - (c) Support members of ECA in the implementation of Vision 2050 of the Southern African Development Community (SADC) and its regional indicative strategic development plan for 2020–2030, thereby contributing to the achievement of Goals 1, 8, 9 and 10 and related goals of Agenda 2063;
 - (d) Collaborate with partners, including the African Union Southern Africa Regional Office, SADC, the Common Market for Eastern and Southern Africa (COMESA), the African Development Bank, the African Export-Import Bank, private sector associations and business councils, as well as universities and research institutions:

- (i) To strengthen the capacities of members of ECA to advance inclusive industrialization and regional integration through implementation of the SADC industrialization strategy and road map (2015–2063) and the COMESA industrial policy (2015–2030), the African Continental Free Trade Area and the free trade areas of the regional economic communities;
 - (ii) To establish institutional and learning support structures and tools to support the private sector, including micro, small and medium-sized enterprises, to leverage digitalization, science, technology, and innovation to facilitate growth, business development and enhance productivity and competitiveness;
- (e) Build the capacities of members of ECA and the private sector, including micro, small and medium-sized enterprises, as appropriate:
- (i) To strengthen their policies to address the challenges and opportunities of the green economy in the context of sustainable development and poverty eradication, and to increase productive capacities, in particular given the situation of energy resource deficiency in the region and the impact of climate change on key sectors of members of ECA;
 - (ii) To address the impact of external shocks, by rolling out initiatives aimed at supporting their recovery and strengthening their resilience to future shocks.

18.159 The above-mentioned work is expected to result in:

- (a) Enhanced implementation of the SADC Vision 2050 and indicative strategic plan, the SADC Industrialization Strategy and Roadmap, and also of the COMESA industrial policy;
- (b) Economic diversification and transformation through value addition and the development of regional value chains, accelerated by transboundary industrial clusters, hubs and special economic zones in selected members of ECA;
- (c) National industrial policies harmonized with regional industrial frameworks for improved industrial competitiveness of the subregion;
- (d) Accelerated implementation of the Agreement Establishing the African Continental Free Trade Area and the free trade agreements of the regional economic communities, increased intraregional trade in goods and services, and enhanced regional integration in Southern Africa;
- (e) Increased resilience and competitiveness of the private sector and micro, small and medium-sized enterprises, enhanced participation in industry and trade, and the development of national and regional value chains in Southern Africa;
- (f) Evidence-based policy responses related to poverty, inequality and vulnerability situations in Southern Africa through informed analyses of trends and causal factors.

Programme performance in 2022

Members of ECA in Southern Africa cooperate in development planning: revival of the SADC National Planning Entities Platform

18.160 Regional cooperation in national development can contribute to the better alignment of development plans with regional and global agendas. The component provided technical support to members of ECA and the SADC secretariat in reviving the SADC National Planning Entities Platform, bringing together ministries, agencies and commissions responsible for national development planning in the 16 members of SADC. The revival and operationalization of the Platform enabled the re-establishment of a formal space under which to share information and experiences on development planning. Once back in operation, the Platform is intended to strengthen regional and national linkages by facilitating the harmonization and alignment of national development plans with subregional agendas such as the SADC Industrialization Strategy and Roadmap (2015–2063) and the SADC Vision 2050, through

cooperation among national planning entities. In 2022, the Platform adopted its framework of operation, a resource mobilization strategy, and a workplan to guide its operations. The Platform also convened an online dialogue on the macroeconomic impacts of global crises on the SADC region. The dialogue enabled national planning entities to identify short-term, medium-term and long-term opportunities; develop specific recommendations on how countries can best manage the negative impacts; and explore how these could be incorporated into the work of the Platform and into national development plans and budgets.

18.161 Progress towards the objective is presented in the performance measure below (see table 18.30).

**Table 18.30
Performance measure**

Planned results for 2024

Result 1: inclusive industrialization in Southern Africa through private sector development

Programme performance in 2022 and target for 2024

18.162 The component’s work contributed to one member of ECA (Eswatini) developing an initiative aimed at promoting the integration of micro, small and medium-sized enterprises in the inclusive industrialization agenda, which did not meet the cumulative planned target of five members of ECA. The target was not met owing to a delay in rolling out the initiatives to other countries, mainly occasioned by COVID-19 pandemic-related constraints and logistical challenges.

18.163 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.XXIII).

Figure 18.XXIII

Performance measure: number of members of ECA that have developed initiatives aimed at promoting the integration of micro, small and medium-sized enterprises in the inclusive industrialization agenda (cumulative)

Result 2: accelerating intraregional trade through the African Continental Free Trade Area in Southern Africa

Programme performance in 2022 and target for 2024

- 18.164 The component’s work contributed to an additional two countries (Mauritius and Mozambique) developing national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area, and one (Zambia) initiating the implementation of such strategies, which met the planned targets.
- 18.165 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.XXIV).

Figure 18.XXIV

Performance measure: number of countries in Southern Africa that have developed and started implementation of national strategies on the Agreement Establishing the African Continental Free Trade Area (cumulative)

Result 3: Southern African members of ECA revise and implement their national industrial policy frameworks in alignment with regional industrialization strategies

Proposed programme plan for 2024

- 18.166 The component focuses on the alignment of national and regional policies to support industrial development in Southern Africa and supports members of ECA in stimulating an export diversification strategy through value addition and manufacturing, with the aim of increasing the share of manufacturing value added in GDP in the subregion from 11.9 per cent as of 2021 towards the SADC target of 30 per cent by 2030. An increased number of members of ECA have requested support in reviewing their industrial policies, with a view to developing priority value chains and local content strategies (policy measures implemented by Governments that typically require a certain percentage of inputs used in various stages of the production process to be sourced from the domestic economy), in line with the SADC Industrialization Strategy and Roadmap and the COMESA industrial policy.

Lessons learned and planned change

- 18.167 The lesson for the component was that strategic thinking, sound analytical products, continuous engagement and partnerships at all levels are useful tools for influencing policy changes and critical to supporting the design and effective implementation of industrialization initiatives. In applying these lessons, the component will provide members of ECA with analyses and policy briefs on identified areas of priority alignment and the harmonization of industrialization policies, and will provide technical support for the review of national industrial policies. The component will also

support strategic thinking about value addition and value chain development, private sector and micro, small and medium-sized enterprise development, and implementation of the Agreement Establishing the African Continental Free Trade Area by convening public forums and policy dialogues to engage and forge partnerships with key stakeholders such as government officials, policymakers and the private sector, including micro, small and medium-sized enterprises.

18.168 Expected progress towards the objective is presented in the performance measure below (see figure 18.XXV).

Figure 18.XXV

Performance measure: number of Southern Africa members of ECA that revise and implement their national industrial policy frameworks in alignment with regional industrialization strategies (cumulative)

Deliverables

18.169 Table 18.31 lists all deliverables of the component.

C. Substantive deliverables				
Consultation, advice and advocacy: advisory services, including technical knowledge, upon request by members of ECA, regional economic communities and intergovernmental organizations, on inclusive industrialization, value chain development, special economic zones, regional integration and operationalization of the African Continental Free Trade Area, private sector and micro, small and medium-sized enterprise development, and tourism; and consultation and advice for the work of 11 United Nations country teams in Southern Africa.				
Databases and substantive digital materials: database of economic and social statistics on the 11 members of ECA in Southern Africa.				
D. Communication deliverables				
Outreach programmes, special events and information material: events and quarterly electronic newsletters on inclusive industrialization and regional integration.				
Digital platforms and multimedia content: subprogramme’s website; content for social media accounts and communities of practice.				

Subprogramme 8 Economic development and planning

Objective

- 18.170 The objective, to which this subprogramme contributes, is to strengthen the development planning of African countries and to improve their capacity to formulate and manage effective public sector policies for structural transformation and sustainable development.

Strategy

- 18.171 To contribute to the objective, the subprogramme will:
- (a) Deliver face-to-face and online training based on enriched content on sectoral, national and regional development and medium to long term planning to deal with the socioeconomic impact of the COVID-19 pandemic, climate change and other crises, based on updated content on

- economic and social policy formulation and management, which integrates risk management dimensions;
- (b) Promote peer learning and collaboration among African development planners through communities of practice and broaden access to the digitized knowledge repository of the African Institute for Economic Development and Planning on the evolution of development planning in Africa and through policy briefs and research papers;
 - (c) In cooperation with resident coordinator offices, other subprogrammes and components and external partners, enhance countries' capacity to monitor and evaluate the implementation of the 2030 Agenda and Agenda 2063, using the integrated planning and reporting toolkit developed by ECA;
 - (d) Foster knowledge generation, cross-fertilization and knowledge-sharing through research products, fellowship programmes, development seminars and high-level policy dialogues;
 - (e) Support the integration of a gender perspective and youth-related issues in all relevant public policies through capacity-building programmes that also consider issues such as social inclusion, entrepreneurship, employment, green economy in the context of sustainable development and poverty eradication, innovation and digital transformation.
- 18.172 In doing so, the subprogramme will help members of ECA to make progress towards Goals 1, 5, 7, 8, 10 and 13.
- 18.173 The above-mentioned work is expected to result in:
- (a) Engagement of development planners and policymakers in policy management and development planning processes which take into account global developments and emerging risks, in support of structural transformation and increased resilience of national economies;
 - (b) More effective formulation, management and influencing of public policies by officials and other stakeholders;
 - (c) Identification and rectification by development planners and other stakeholders of the structural and systemic impediments to sustainable development;
 - (d) More inclusive approaches to the formulation of development policies by members of ECA, including through the formulation of social protection policies.

Programme performance in 2022

Active involvement of youth in national, regional and global policymaking processes

- 18.174 The large number of young people in Africa present an enormous opportunity for economic and social transformation. The subprogramme provided training to 629 course participants in youth-related issues in such areas as macroeconomic growth; debt management; climate change; social inclusion; trade; gender equality and women's empowerment. In addition, the subprogramme also provided training to the ECA Young Economists Network on macro-economic modelling, with a view to enabling participants to make an active contribution to their countries' strategic foresight. Following the various training activities, the subprogramme conducted impact surveys, in which 69 per cent of the respondents confirmed, with specific evidence, that they had made use of the knowledge acquired in the formulation of national policies. For example, some trainees had been considered sufficiently skilled to participate as climate negotiators in the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change. In addition, selected members of the Network contributed to research in support of double-digit growth on the continent and delivered scientific papers to inform decision-making processes.
- 18.175 Progress towards the objective is presented in the performance measure below (see table 18.32).

Table 18.32
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	<p>Confirmation by 69 per cent of respondents, with specific evidence, that they supported the formulation of national policies</p> <p>Trained negotiators actively participated in climate negotiations at the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change</p> <p>Selected members of the ECA Young Economists Network contributed to research and delivered scientific papers to inform decision-making processes.</p>

Planned results for 2024

Result 1: more inclusive and resilient economies

Programme performance in 2022 and target for 2024

- 18.176 The subprogramme’s work contributed to the development of six additional policies by members of ECA (Gabon, Gambia (two policies), Namibia (two policies) and Senegal) on innovative means of financing and public policies on gender parity, the informal economy and extractive governance, for a cumulative total of 11 policies directed towards building more inclusive and resilient societies, which exceeded the planned target of 10 policies.
- 18.177 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.XXVI).

Figure 18.XXVI

Performance measure: number of policies developed by members of ECA directed towards building more inclusive and resilient economies (cumulative)

Result 2: mainstreaming risk management into policy planning and development

Programme performance in 2022 and target for 2024

- 18.178 The subprogramme’s work contributed to the development of three policies by members of ECA that include integrated risk management, specifically a draft social affirmative policy targeting the most vulnerable (Congo); a microfinance strategy to support livelihood diversification towards promoting economic activities (Nigeria); and a national social protection policy framework (Zimbabwe), which met the planned target.
- 18.179 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.XXVII).

Figure 18.XXVII

Performance measure: policies developed by members of ECA that include integrated risk management (cumulative)

Result 3: members of ECA integrate social protection into development planning and economic analysis

Proposed programme plan for 2024

- 18.180 The COVID-19 pandemic has exposed significant gaps in the coverage, comprehensiveness and adequacy of social protection systems. More investment in social protection is needed to close these protection gaps, facilitate faster and inclusive socioeconomic recovery and enhance resilience to future shocks. The subprogramme has been working to strengthen the capacity of members of ECA to mainstream social services and social protection into development planning and economic analysis.

Lessons learned and planned change

- 18.181 The lesson for the subprogramme was the need to integrate the social dimension of the development agendas into its capacity-building programmes. In applying the lesson, the subprogramme will conduct assessments and consult with members of ECA in 2023 to identify specific aspects where knowledge and skills can be strengthened and will develop and deliver training to policymakers on those aspects, with a view to strengthening their capacity to integrate social protection in the development planning. In that undertaking, the subprogramme will also collaborate with United Nations country teams and regional stakeholders.
- 18.182 Expected progress towards the objective is presented in the performance measure below (see figure 18.XXVIII).

Figure 18.XXVIII

Performance measure: number of members of ECA whose development policies integrate social protection (annual)

Deliverables

18.183 Table 18.33 lists all deliverables of the subprogramme.

Table 18.33

Subprogramme 8: deliverables for the period 2022–2024, by category and subcategory

C. Substantive deliverables				
Consultation, advice and advocacy: advisory services to five members of ECA and three regional economic communities on economic management, development planning and capacity-building.				
Databases and substantive digital materials: two communities of practice for African development planners.				
D. Communication deliverables				
Outreach programmes, special events and information materials: high-level policy dialogues involving policymakers, the private sector and subject-matter experts on various issues pertaining to African economic development and planning, with particular emphasis on those related to the 2030 Agenda.				
External outreach and media relations: information kit for the African Institute for Economic Development and Planning comprising a strategic plan, training brochures, booklets, leaflets, kakemonos, banners and assorted accessories.				
Library services: books, journals and other library materials on economic management and development planning in French and English.				

Subprogramme 9 Poverty, inequality and social policy

Objective

- 18.184 The objective, to which this subprogramme contributes, is to eradicate extreme poverty and reduce inequality through ensuring that members of ECA have improved policies and strategies for social investment and productive urban job creation.

Strategy

- 18.185 To contribute to the objective, the subprogramme will:
- (a) Develop analytical knowledge, provide technical assistance and promote regional dialogue and learning for members of ECA on designing national policies and strategies for the eradication of extreme poverty, reduction of inequality and mitigation of vulnerability in these areas;
 - (b) Generate knowledge, provide technical assistance to members of ECA and organize regional dialogue and learning on strategies that leverage migration for inclusive development in Africa;
 - (c) Develop analytical knowledge and provide technical assistance to members of ECA in the regional implementation and appraisal of global agreements, including the Global Compact for Safe, Orderly and Regular Migration, the Madrid International Plan of Action on Ageing, 2002, the Programme of Action of the International Conference on Population and Development, the

Addis Ababa Declaration on Population and Development in Africa beyond 2014 and the New Urban Agenda;

- (d) Enhance knowledge and skills of members of ECA through technical assistance and facilitating regional policy learning and dialogue to promote sustainable urbanization that enhances job creation, revenues and economic growth, helping members of ECA to make progress towards Goal 11.

18.186 The above-mentioned work is expected to result in:

- (a) Enhanced, evidence-based policy options for poverty eradication, reduction in inequality and protection of the economically vulnerable;
- (b) Strengthened responses by members of ECA to address migration and population and development challenges and opportunities;
- (c) Increased prioritization of productive urban job creation in national development planning towards eradicating extreme poverty and reducing inequality;
- (e) Improved economic and financial recovery and resilience in African countries.

Programme performance in 2022

Members of ECA monitor the economy of cities to inform policies for sustainable urbanization

18.187 African cities generate more than half of the region's GDP yet the economic contribution of cities is not systematically monitored. With the technical support of the subprogramme, six African cities (Accra, Harare, Kigali, Lusaka, Maseru and Yaoundé) have already estimated their city GDP and the findings have been critical in informing evidence-based planning and policies. For instance, in Accra and Harare, the city GDP estimates were a key aspect in developing resilience and economic recovery plans of the respective cities. The exercise also highlighted key challenges and opportunities as a basis for effective policies to optimize the economic role and contribution of the cities.

18.188 Progress towards the objective is presented in the performance measure below (see figure 18.XXIX).

Figure 18.XXIX

Performance measure: number of members of ECA that assessed the economic contribution and potential of their cities (cumulative)

Planned results for 2024

Result 1: designing inclusive policies

Programme performance in 2022 and target for 2024

- 18.189 The subprogramme's work contributed to one additional member of ECA, Namibia, using digital tools to design inclusive social policies for reducing risk and vulnerability, resulting in a total of six members of ECA (Chad, Kenya, Mauritania, Mozambique, Nigeria and Namibia) using such tools, which met the planned target.
- 18.190 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 18.XXX).

Figure 18.XXX

Performance measure: number of members of ECA that used digital tools to design inclusive social policies for reducing risk and vulnerability (cumulative)

Result 2: leveraging continental initiatives for promoting youth policies

Programme performance in 2022 and target for 2024

- 18.191 The subprogramme's work contributed to building the knowledge base and developing a new approach to youth employment which integrates demographic variables through a life cycle, which did not meet the planned target of two countries with increased capacity in designing youth policies. The target was not met because of operational constraints which limited the ability to engage in advisory services; instead the development of knowledge products (technical reports and policy briefs) was prioritized.
- 18.192 Progress towards the objective and the target for 2024 is presented in the performance measure below (see figure 18.XXXI).

Figure 18.XXXI

Performance measure: number of countries engaged in designing youth policies that leverage continental initiatives (cumulative)

Result 3: local governments design resource mobilization policies for improved financial sustainability

Proposed programme plan for 2024

- 18.193 Local revenues have the potential to contribute substantially to domestic resource mobilization. To date, the subprogramme has developed a financial performance assessment framework with methodologies, tools, dimensions and indicators to measure the fiscal performance of cities. The framework provides the basis for collecting data, mainly related to the revenue side of fiscal performance, with the aim of enhancing the generation of local revenues, and it has been pilot tested in two cities (Accra and Harare).

Lessons learned and planned change

- 18.194 The lesson for the subprogramme was the need to implement technical assistance projects through a multi-level and multi-sector approach to ensure coherent collaboration with all levels and sectors of government. In applying the lesson, the subprogramme will work through a national project implementation team in each country. The subprogramme will provide technical assistance to African cities and local and national Governments through a chain of interventions, ranging from generating evidence to the design of actual interventions for improved fiscal space. As a foundation, the subprogramme will support members of ECA in assessing the financial performance of the target cities, using the financial assessment framework to determine the current status and priority areas of potential interventions to broaden and strengthen the fiscal space through both city and national level intervention. Such evidence will be used to design new and innovative solutions for expanding fiscal space in each city, tailored to the local and national contexts, to enhance their financial performance and contribute to national revenues.
- 18.195 Expected progress towards the objective is presented in the performance measure below (see figure 18.XXXII).

Figure 18.XXXII

Performance measure: number of cities that have assessed their fiscal performance as evidence base for designing improved fiscal policies and planning (cumulative)

Deliverables

18.196 Table 18.34 lists all deliverables of the subprogramme.

Table 18.34

Subprogramme 9: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	–	–	1	–
1. Report to the Committee on Social Policy, Poverty and Gender	–	–	1	–
Substantive services for meetings (number of three-hour meetings)	–	–	4	–
2. Meetings of the Committee on Gender, Poverty and Social Policy	–	–	4	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	5	5	3	3
3. On urbanization and development to build the capacity of national policymakers	2	2	1	1
4. On social policy in Africa to enhance the capacities of policymakers in selected countries	2	2	1	1
5. Fellowship programme for young African scholars to build their capacity in the demographic dividend, employment, urbanization and migration	1	1	1	1
Seminars, workshops and training events (number of days)	13	13	11	10
6. Workshops on urbanization and development to build the policy capacity of members of ECA	4	4	4	4
7. Workshop on peace and security in Africa in the context of the concept of human security in accordance with General Assembly resolution 66/290	1	1	1	–
8. Workshops on social policies and policy dialogues for national policymakers in selected countries	8	8	6	6
Publications (number of publications)	5	4	6	3
9. African Social Development Report	–	–	1	1
10. On the state of urbanization in Africa for evidence-based policymaking	1	1	1	1
11. On strategies to reduce the poverty gap in Africa	1	1	–	–
12. On the African human security Index (qualitative and quantitative)	–	–	1	–

Section 18 Economic and social development in Africa

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
13. On international migration in Africa	1	1	–	–
14. Africa Migration Report	–	–	1	1
15. Regional report on the Madrid International Plan of Action on Ageing	1	1	1	–
16. Regional report on the International Conference on Population and Development	1	–	1	–
Technical materials (number of materials)	3	3	3	4
17. On urbanization to inform African policymakers	2	2	1	2
18. On security and development in Africa in the context of the concept of human security in accordance with General Assembly resolution 66/290	–	–	1	–
19. On poverty and inequality	1	1	1	–
20. On social development	–	–	–	1
21. On migration	–	–	–	1

C. Substantive deliverables

Consultation, advice and advocacy: advice on evidence-based policies, strategies and investment to national policymakers in seven selected members of ECA; advice for improved capacities in policy formulation, implementation and monitoring; policy dialogues for enhanced policy learning and exchange at the national and regional levels.

D. Communication deliverables

Outreach programmes, special events and information materials: flyers, brochures and advocacy materials on the work of the subprogramme, special events at relevant global and regional events, webinars and online seminars.

External and media relations: press and media releases on the role of cities and social policy in the development of Africa.

Digital platforms and multimedia content: digital platform and visual materials on voluntary local reviews, poverty and vulnerability and youth employment, among other issues.

B. Proposed post and non-post resource requirements for 2024

Overview

18.197 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 18.35 to 18.37.

Table 18.35

Overall: evolution of financial resources by object of expenditure

^a Includes two temporary posts (1 P-3 and 1 National Professional Officer).

18.198 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 18.38 to 18.40 and figure 18.XXXIII.

18.199 As reflected in tables 18.38 (1) and 18.39 (1), the overall resources proposed for 2024 amount to \$84,341,800 before recosting, reflecting a net decrease of \$2,837,700 (or 3.3 per cent) compared with the appropriation for 2023. Resource changes result from two factors, namely: technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Technical adjustments

18.200 As reflected in table 18.38 (1), resource changes reflect a net decrease of \$2,957,700 resulting from:

- (a) The higher provision at continuing vacancy rates for posts reassigned in 2023, which were approved for 2023 at a 50 per cent vacancy rate in line with the established practice; the details are as follows:
 - (i) **Subprogramme 4, Data and statistics.** The increase of \$17,800 relates to one Senior Information Systems Assistant (LL) reassigned as Senior Programme Management Assistant in 2023;
 - (ii) **Subprogramme 7, component 1, Subregional activities in North Africa.** The increase of \$15,600 relates to one Light Vehicle Driver (LL) reassigned as Team Assistant in 2023;
- (b) **Programme support.** The net decrease of \$2,991,100 relates to:
 - (i) Decrease of \$3,100,900 under grants and contributions, reflecting the removal of non-recurrent requirements approved by the General Assembly for 2023 in its resolution [77/263](#) relating to the Africa Hall project. Resource requirements relating to the Africa Hall project will be presented to the General Assembly later in 2023, during the main part of the seventy-eighth session of the Assembly;
 - (ii) Increase of \$109,800 under posts, reflecting the 2023 reassignments of one Information Management Assistant (LL) as Documents Management Assistant, one Administrative Assistant (LL) as Programme Management Assistant and one Team Assistant (LL) as Meetings Services Assistant, and the conversion of one Finance Assistant and one Senior Accounting Assistant (2 LLs) to Associate Finance Officers (NPO).

Other changes

18.201 As reflected in table 18.38 (1), resource changes reflect an increase of \$120,000 under subprogramme 8, Economic development and planning, and are related to increased rental and maintenance requirements for office space to be occupied by the existing staff of the African Institute

for Economic Development and Planning in Dakar, due to the move to the United Nations country team premises. The current office space, provided by the host country, will not be available to the Institute after 2023.

Extrabudgetary resources

- 18.202 As reflected in tables 18.38 (2) and 18.39 (2), extrabudgetary resources amount to \$13,286,600 and would be used mainly to finance technical cooperation activities and build the capacities of members of ECA in a number of priority areas, such as: implementation of their respective debt management strategies and policies, and research and analysis related to the single African air transport market; development of curricula on land governance in Africa; development of integrated geospatial information frameworks at national and regional levels; support for the African response to climate challenges and negotiations through research, policy analysis and training; support for capacity-building in the areas of international migration and population development; strengthening of policy capacities on urbanization; activities relating to the Madrid International Plan of Action on Ageing; macroeconomic modelling for African policymakers and experts; support for the accelerated programme on civil registration and vital statistics; strengthening of advisory capacities for land governance in Africa; development of privacy and data protection frameworks in implementing digital ID systems in Africa; capacity-building for inclusive and equitable African trade arrangements; deepening of African trade integration through effective implementation of the Agreement Establishing the African Continental Free Trade Area and operationalization of the Area; support for private sector development; and pooled procurement of essential drugs and products, and pooled local pharmaceutical production. The expected decrease of \$4,275,600 is due mainly to the conclusion of technical cooperation projects related to the African Continental Free Trade Area.
- 18.203 The extrabudgetary resources under this section are subject to the oversight of the Executive Secretary of ECA, who has delegated authority from the Secretary-General.

Polymaking organs

- 18.204 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies and intergovernmental processes, the servicing of which is the responsibility of ECA. The Commission provides the legislative mandate and policy guidance for the work of the secretariat. The terms of reference of the Commission were established by the Economic and Social Council in its resolution [671 A \(XXV\)](#) of 29 April 1958 and subsequent amendments. The Commission is composed of 54 members and reports to the Economic and Social Council.
- 18.205 Table 18.41 provides information on the standing intergovernmental organs and related resource requirements.

Section 18 Economic and social development in Africa
**Table 18.41
Policymaking organs**

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Conference of African Ministers of Finance, Planning and Economic Development	The Commission holds annual sessions to review the work of its secretariat, approve its annual programme of work and make decisions on the recommendations of its subsidiary bodies and of the Executive Secretary. The annual session also serves as a forum for articulating the position of Africa on development issues on the agenda of the United Nations. The Committee of Experts is an integral part of the session of the Commission that meets prior to and provides technical support for the Conference of African Ministers of Finance, Planning and Economic Development	Mandate: Economic and Social Council resolution 671 A (XXV) of 29 April 1958 Membership: 54 government officials Number of sessions in 2023: 1 Number of sessions in 2024: 1	279.6	279.6
Intergovernmental Committee of Senior Officials and Experts	The five subregional intergovernmental committees of senior officials and experts meet annually between February and March prior to and report to the Conference of African Ministers of Finance, Planning and Economic Development. They oversee the overall formulation and implementation of the programme of work and priorities of the subregional offices and make recommendations on issues concerning economic and social development in their subregions, and also on the promotion and strengthening of subregional economic cooperation and integration. They also provide a platform for subregional ministerial caucuses for the discussion of specific subregional development challenges, whose outcomes are brought to the attention of the Conference	Mandate: Economic and Social Council resolution 671 A (XXV) of 29 April 1958 and subsequent amendments Membership: 54 government officials Number of sessions in 2023: 1 Number of sessions in 2024: 1	Included in the budget of the subregional offices	Included in the budget of the subregional offices
Committee on Economic Governance	The Committee was established to provide evidence-based advice and guidance on economic governance issues, including promoting sound macroeconomic management and inclusive development strategies, fighting corruption and illicit financial flows out of Africa, in addition to networking and support for regional and global governance process such as the African Peer Review Mechanism and representation of Africa at such international forums as the Group of 20	Mandate: Economic Commission for Africa resolution 966 (LII) of 26 March 2019 Membership: 54 government officials Number of sessions in 2023: 1 Number of sessions in 2024: 1	52.0	52.0
Committee on Statistics and Data	The Committee provides a forum to deliberate on issues related to statistics and data; give guidance on emerging issues in data production, exchange and analysis; introduce innovation in data; and explore capacity and data gaps. The Committee ensures that all members of ECA have the capability to provide data on a variety of development issues and endeavours to promote the coordination of statistical activities, to foster good statistical practices and to ensure consistent functioning of the statistical system in Africa	Mandate: Economic Commission for Africa resolution 966 (LII) of 26 March 2019 Membership: 54 government officials Number of sessions in 2023: 1 Number of sessions in 2024: 1	52.0	52.0

Part V Regional cooperation for development

<i>Polymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Committee on Private Sector Development, Regional Integration, Trade, Infrastructure, Industry and Technology	The Committee provides a forum for dialogue and consensus-building in the important areas of private sector development, regional integration and trade, infrastructure, industry and technology and, more significantly, serves as a catalyst for accelerating progress at the national and regional levels in these fields. The Committee focuses on topical and emerging issues of relevance to these identified areas, with a view to taking stock of related progress made by members of ECA	Mandate: Economic Commission for Africa resolution 966 (LII) of 26 March 2019 Membership: 54 government officials Number of sessions in 2023: 1 Number of sessions in 2024: 1	52.0	52.0
Committee on Climate Change, Blue Economy, Agriculture and Natural Resource Management	The Committee provides guidance and direction to the work of the Commission on advancing sustainable development, in particular through agricultural transformation, enhanced management and transformation of African land and natural resources, integration of climate resilience in national development plans and the transition to sustainable development, including through technology and innovation. As a policy dialogue and consensus-building forum, the Committee provides direction on the future work and strategic focus of the Commission on key emerging issues relating to agriculture, the blue economy, climate change, land and natural resources management and the green economy, in support of the attainment of the development objectives of the 2030 Agenda and Agenda 2063, and also support for the implementation of the Africa Mining Vision and the African Union Declaration on Land Issues and Challenges in Africa, both adopted by African Heads of State and Government in 2009, and the Paris Agreement on climate change	Mandate: Economic Commission for Africa resolution 966 (LII) of 26 March 2019 Membership: 54 government officials Number of sessions in 2023: 1 Number of sessions in 2024: 1	52.0	52.0
Committee on Social Development, Poverty and Gender	The Committee reviews the work undertaken under the subprogrammes on gender equality and women's empowerment and on poverty, inequality and social policy. The Committee provides a forum for analysing the work done by ECA as it relates to the priorities of Africa on poverty and inequality reduction, sustainable urbanization, gender equality and women's empowerment, and social policy. The Committee is also important as a policy dialogue and consensus-building forum which provides strategic direction for future work in these important areas of the African development agenda and, more significantly, serves as a catalyst for accelerating progress at the national and regional levels in these fields. The Committee places an emphasis on topical and emerging issues of relevance to its identified areas of focus, with a view to taking stock of progress made by members of ECA in these areas and identifying policy directions	Mandate: Economic Commission for Africa resolution 966 (LII) of 26 March 2019 Membership: 54 government officials Number of sessions in 2023: 1 Number of sessions in 2024: 1	52.0	52.0
Total			539.6	539.6

18.206 The proposed regular budget resources for 2024 amount to \$539,600 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 18.42 and figure 18.XXXIV.

Executive direction and management

- 18.207 The executive direction and management component comprises the Office of the Executive Secretary, the Office of the Deputy Executive Secretary (Programmes), the Office of the Deputy Executive Secretary (Programme Support), the Strategic Planning, Oversight and Results Division, and business continuity.
- 18.208 The overall responsibilities of the executive direction and management component include the following functions:
- (a) Maintaining and managing effective partnerships and collaborating with major African organizations, such as the African Union Commission and the African Development Bank, regional economic communities and other key stakeholders, to promote synergies across policies on major development issues;
 - (b) Ensuring that the development priorities and positions of Africa on critical issues are reflected at the global level and providing policy guidance and leadership in respect of the formulation of regional strategies and programmes, in line with the goals set out in the 2030 Agenda and Agenda 2063;

- (c) Providing critical leadership for the implementation of the Joint United Nations-African Union Framework for an Enhanced Partnership in Peace and Security and the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development and on special initiatives that reinforce the work of ECA and thus provide further impetus to the African development agenda;
- (d) Determining the overall strategic direction and management of the ECA secretariat, ensuring the optimal use of resources in line with best practices and promoting environmental sustainability and disability inclusion. The component is also responsible for building and maintaining the Commission's strategic partnerships with development partners and major stakeholders. Furthermore, it is responsible for mobilizing extrabudgetary resources to support new and emerging priorities of importance to the development goals of members of ECA. It represents the United Nations Legal Counsel in Addis Ababa, provides advice to ECA senior management on all legal matters and represents the Secretary-General in matters before the United Nations Dispute Tribunal. The component is also responsible for ensuring business continuity;
- (e) Supporting and advising the Executive Secretary on matters relating to overall strategic direction, priorities and policies in the areas of programme coordination and planning, monitoring, evaluation and quality assurance, including reporting on the implementation of the ECA programme of work within a results-oriented framework to ensure organizational effectiveness. Furthermore, the component coordinates ECA performance reporting to relevant intergovernmental bodies and reports on the implementation of relevant resolutions and decisions of those bodies.
- 18.209 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), ECA is integrating environmental management practices into its operations. In 2024, ECA will continue to reduce its greenhouse gas footprint and will maintain its greenhouse gas neutrality by offsetting its remaining footprint.
- 18.210 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 18.43. ECA is making every effort to plan well in advance and raise awareness among programme managers and focal points of ECA members about the importance of early nomination of travellers and the policy regarding advance booking. In addition, ECA is continuing its corporate agreement with airlines, which provides for extended ticketing time limits, thus mitigating the cost impacts of late purchases.

Table 18.43

Compliance rate

(Percentage)

Extrabudgetary resources

18.212 Extrabudgetary resources for this component amounting to \$113,000 would support the 2023 Mo Ibrahim Foundation Leadership Fellowship Programme.

Programme of work

Subprogramme 1

Macroeconomic policy and governance

18.213 The proposed regular budget resources for 2024 amount to \$3,729,000 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 18.45 and figure 18.XXXVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.214 Extrabudgetary resources for the subprogramme are estimated at \$319,800 and would be used to improve the capacities of members of ECA in tax policy and administration through continued technical support. Support will also be provided for disaster risk management, debt management and advocacy for reform of the global financial architecture. The expected decrease of \$290,400 is due mainly to the conclusion of the project on strengthening the capacity of ECA in the area of public finance.

Subprogramme 2 Regional integration and trade

18.215 The proposed regular budget resources for 2024 amount to \$3,372,800 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 18.46 and figure 18.XXXVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.216 Extrabudgetary resources for the subprogramme are estimated at \$774,100 and would be used to provide technical support to African countries for planning and monitoring and for efforts to operationalize the Agreement Establishing the African Continental Free Trade Area, with particular reference to the planned protocol on women and youth. The expected decrease of \$4,236,300 is due to the conclusion of technical cooperation projects.

Subprogramme 3 Private sector development and finance

18.217 The proposed regular budget resources for 2024 amount to \$2,943,500 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 18.47 and figure 18.XXXVIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.218 Extrabudgetary resources for the subprogramme are estimated at \$401,300 and would assist with technical cooperation projects, research and analysis in the areas of implementation of the single African air transport market; development of curricula on land governance in Africa; and stock exchange development and integration in Africa. The expected decrease of \$275,500 is due to the conclusion of a technical cooperation project.

Subprogramme 4 Data and statistics

18.219 The proposed regular budget resources for 2024 amount to \$5,028,100 and reflect an increase of \$17,800 compared to 2023. The proposed increase is explained in paragraph 18.200 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 18.48 and figure 18.XXXIX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.220 Extrabudgetary resources for the subprogramme are estimated at \$1,247,400 and would support technical cooperation projects, research and analysis; field support in the areas of civil registration and vital statistics; development of integrated geospatial information frameworks at national and regional levels; and efforts to attain and to track progress towards the Sustainable Development

Goals. The expected decrease of \$1,270,200 is due to the finalization and expected closure of a project on the monitoring of the Sustainable Development Goals and statistics in Africa.

Subprogramme 5 Technology, climate change and natural resources management

18.221 The proposed regular budget resources for 2024 amount to \$3,383,400 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 18.49 and figure 18.XL.

Extrabudgetary resources

18.222 Extrabudgetary resources for the subprogramme are estimated at \$2,537,300 and would be used mainly to support members of ECA in the area of climate change through research, policy analysis, workshops and training. In addition, the resources would support digital identity and data protection work within Africa through the digital transformation strategy. The expected decrease of \$38,400 is due to reduced requirements for contractual services.

**Subprogramme 6
Gender equality and women’s empowerment**

18.223 The proposed regular budget resources for 2024 amount to \$1,096,700 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 18.50 and figure 18.XLI.

Extrabudgetary resources

18.230 Extrabudgetary resources for the subprogramme are estimated at \$1,966,000 and would contribute to such work of the African Institute for Economic Development and Planning as the training of participants from members of ECA and costs associated with the relocation of the Institute to its new premises at United Nations House in Dakar. The increase of \$107,500 is mainly due to the Commission’s plans to fill the three vacant posts at the Institute and for the Institute to provide additional on-site training.

Subprogramme 9 Poverty, inequality and social policy

18.231 The proposed regular budget resources for 2024 amount to \$3,304,400 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 18.57 and figure 18.XLVIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.232 Extrabudgetary resources for the subprogramme are estimated at \$2 million and would assist with technical cooperation projects, research and analysis, and field support, including capacity-building in the areas of international migration, population and development, the strengthening of policy capacities in the areas of urbanization and development, and ageing (activities related to the Madrid

International Plan of Action on Ageing). The expected increase of \$1,466,400 will support the project on international migration in Africa.

Programme support

- 18.233 The programme support component comprises two divisions, the Division of Administration and the Publications, Conference and Knowledge Management Division. The Division of Administration ensures the effective implementation of the Commission’s mandate by providing administrative and financial support, guaranteeing compliance with United Nations regulations and rules, policies and procedures. It encompasses the Office of the Director of Administration, the Human Resources Management Section, the United Nations Health-Care Centre, the Supply Chain Management Section, the Facilities Management Section and the Finance and Budget Section.
- 18.234 In 2024, the component will continue to ensure efficient support for the functions and services performed at ECA headquarters in Addis Ababa, the five subregional offices and the African Institute for Economic Development and Planning. It will also continue to collaborate with the United Nations agencies, funds and programmes based in Ethiopia in supporting the United Nations common services framework through the operations management team.
- 18.235 The key focus will be on supporting the implementation of United Nations system-wide projects, including the strategic capital master plan, the provision of effective career advancement and development support to staff members, the further delegation of authority to the subregional offices in the areas of human and financial resources management, the supervision of the \$57 million Africa Hall project, the coordination of business continuity and organizational resilience initiatives, coordination with the 28 United Nations entities serving in Ethiopia in the area of business continuity and operational matters and coordination with member organizations and offices to further strengthen the medical services provided at the United Nations Health-Care Centre. In addition, the component will participate actively in the Secretariat-wide implementation of the Secretary-General’s efficiency agenda.
- 18.236 The proposed regular budget resources for 2024 amount to \$33,629,700 and reflect a decrease of \$2,991,100 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 18.200 (c). Additional details on the distribution of the proposed resources for 2024 are reflected in table 18.58 and figure 18.XLIX.

Table 18.58

Figure 18.XLIX
Programme support: distribution of proposed resources for 2024 (before recosting)
 (Number of posts/thousands of United States dollars)

Extrabudgetary resources

18.237 Extrabudgetary resources for the component are estimated at \$3,927,700 and would support the United Nations Health-Care Centre. The estimated resource level reflects an increase of \$401,300 compared with the estimates for 2023, due to the projected increase in cost recovery.

II. Regional Commissions New York Office

Proposed post and non-post resource requirements for 2024

Overview

- 18.238 The Regional Commissions New York Office is a joint office representing, coordinating, and providing policy advice to the five regional commissions, namely, the Economic Commission for Africa, the Economic and Social Commission for Asia and the Pacific, the Economic Commission for Europe, the Economic Commission for Latin America and the Caribbean and the Economic and Social Commission for Western Asia. It supports the regional commissions in the effective implementation of relevant legislative mandates at the regional level.
- 18.239 In pursuing its objective, the Office assumes the following interrelated key functions: providing strategic policy advice to the regional commissions on United Nations deliberations and global policy frameworks that have a bearing on their positioning and the implementation of their programmes of work; supporting representation and outreach vis-à-vis relevant intergovernmental and inter-agency bodies with a view to informing decision-making from a regional perspective; enhancing coordination and cooperation among the regional commissions; and making their work and knowledge products readily accessible to a wide range of stakeholders.
- 18.240 In 2022, the Office contributed to the task of amplifying the voices of the regional commissions, reinforcing their partnerships and creating connections at the country and global levels to further increase the visibility and impact of their innovations, joint initiatives and events. The Office contributed to enriching intergovernmental processes and deliberations on regional aspects of development and illustrated the innovative initiatives and platforms developed by the regional commissions. The Office also identified and made available opportunities for the regional commissions to contribute to shaping global policy debate on sustainable development and coordinated initiatives around joint priorities.

Strategic coordination and policy advice

- 18.241 In 2022, the Office played a key role, working closely with the regional commissions, in supporting the follow-up and review of the 2030 Agenda, in particular by strengthening coherence and interaction among entities at the global, regional and national levels. At its meeting in July 2022, the high-level political forum on sustainable development put the spotlight on the regional dimension of development and highlighted innovative regional action on the Sustainable Development Goals. Working with the Coordinator, the Office facilitated the contributions of the regional commissions to the thematic discussion on the Goals under review, as well as the organization of the reporting session of the five chairs of the regional forums on sustainable development. The side-event organized by the Office at the 2022 meeting of the high-level political forum on the theme, “Role of voluntary local reviews in complementing the voluntary national review process: experiences from the regions”, saw a rich exchange of lessons and innovative practices emerging from the regions.
- 18.242 Ahead of the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, the Office coordinated, under the leadership of the Deputy Secretary-General, a tripartite collaboration among the regional commissions, the Egyptian Presidency of the twenty-seventh session and the United Nations High-Level Climate Champions that resulted in the organization of five regional round tables on accelerating public and private investment in mature and scalable climate initiatives aligned with the Paris Agreement. The outcome of the round tables included policy measures needed to unlock financial flows and to speed up the pace of climate action, and a compendium containing a pipeline of 50 investment-ready climate initiatives responding to country-driven priorities.
- 18.243 With a view to supporting the Secretary-General in convening the first annual meeting with heads of regional organizations, the Office, in collaboration with the Department of Political and

Peacebuilding Affairs, articulated the objective, scope and thematic focus of the meeting, including its linkage with regional meetings. The Office also coordinated the regional commissions' contribution to the first brief issued by the Global Crisis Response Group on Food, Energy and Finance, and to the weekly briefings provided to the Secretary-General on the implications of the war in Ukraine on the global economy, highlighting trends, impacts and policy measures.

- 18.244 With a view to informing and influencing global policy debates, the Office provided strategic advice to the regional commissions in support of their participation in global platforms for joint policy formation and decision-making, notably the Chief Executives Board and the United Nations Sustainable Development Group. The Office ensured effective contributions by the regional commissions to system-wide initiatives in such areas as measurements of progress that complement GDP, financing for development, extractives, and engagement with the Indonesian Presidency of the Group of 20. Ahead of the fifteenth meeting of the Conference of the Parties to the Convention on Biological Diversity, the Office supported the issuance of a joint statement by the executive secretaries calling for the mainstreaming of biodiversity in policies and programmes and strengthening of knowledge exchange on biodiversity.
- 18.245 In the area of financing, the Office co-led, with the Economic and Social Commission for Western Asia, efforts to advance work by the cluster on illicit financial flows of the Initiative on Financing for Development in the Era of COVID-19 and Beyond, dealing with the operationalization of measures to combat illicit financial flows in such areas as the measurement of such flows, asset recovery and taxing the digital economy.
- 18.246 In advancing corporate priorities, the Office organized and serviced the bi-annual meetings of the executive secretaries with the Deputy Secretary-General, ensuring the provision of effective and coherent support by the regional commissions to system-wide initiatives, including through the exchange of good practices and coordinated approaches to roll-out of the United Nations development system reform.

Representation, communication and outreach

- 18.247 Working closely with the Coordinator, the Office undertakes global representation and advocacy on behalf of the five regional commissions. Efforts in this regard in 2022 contributed to improved coherence and effectiveness of system-wide initiatives and increased the visibility of regional innovations leading to impactful partnerships.

Intergovernmental bodies

- 18.248 The representation and advocacy efforts of the Office contributed to continued recognition of the regional dimensions of development in intergovernmental deliberations.
- 18.249 The Office organized the annual dialogue of the executive secretaries with the Second Committee of the General Assembly under the theme "From risk to resilience: accelerating actions to achieve a more sustainable and equitable future through regional cooperation." The executive secretaries delivered a series of presentations from the regional perspective on the state of progress of pandemic recovery and the combined impact of the food, energy and financing crises, as well as innovative initiatives emerging in their regions to build forward from the pandemic, resulting in more resilient, inclusive and sustainable societies.
- 18.250 The Office prepared and introduced to the management segment of the Economic and Social Council the 2022 edition of the annual report of the Secretary-General on regional cooperation. The Office contributed to the Partnership Forum of the Economic and Social Council held in February 2022 by spotlighting promising and scalable regional partnerships around the Sustainable Development Goals. It also facilitated preparation of the regional session during the Council's 2023 coordination segment by providing a preview of the issues coming up at the regional forums on sustainable

development and highlighting regional perspectives on integrated approaches in pursuit of the Sustainable Development Goals.

- 18.251 The Office supported participation by the regional commissions in the dialogue on the repositioning of the United Nations development system at the regional level, held during the 2022 operational activities for development segment of the Economic and Social Council, focusing on delivery of collective support to countries towards achieving the Sustainable Development Goals and regional level response to cross-border development challenges such as climate change, biodiversity loss and population movements.
- 18.252 In pursuit of relevant mandates and in support of the priorities of the presidents of the General Assembly and the Economic and Social Council, the Office coordinated the effective contribution of the regional commissions to the preparation of the high-level meeting on the New Urban Agenda and the high-level thematic debate entitled a “Moment for Nature”, and also in support of priorities in such areas as climate action, financing, taxation, youth, road safety, ending the COVID-19 pandemic and the sustainable development of Africa, to cite a few.

Inter-agency mechanisms

- 18.253 The Office represents the regional commissions in various inter-agency forums. During the reporting period, it actively participated in and contributed to the work of the High-Level Committee on Programmes of the United Nations System Chief Executives Board for Coordination. In this context, the Office has contributed to the work of several task teams, including in the areas of measuring progress beyond GDP. In addition, the Office provided advisory support to the Coordinator and harmonized positions of the regional commissions and supported the Coordinator’s participation in the meetings of the Management Committee to advance internal reform and management-related initiatives.

Outreach and partnership activities

- 18.254 During the reporting period, the Office further strengthened its communication and outreach efforts and increased the visibility of the work of the regional commissions at Headquarters, and also among permanent missions based in New York, civil society and other stakeholders for potential engagement and partnerships.
- 18.255 Key activities in this regard included the dissemination of a bimonthly newsletter highlighting key events, publications and partnerships involving the regional commissions, and the production of promotional video clips, in partnership with the United States non-profit organization for the transformation of energy systems, the Rocky Mountain Institute, amplifying policy messages from the regional commissions on the climate agenda.
- 18.256 On the margins of the 2022 meeting of the high-level political forum on sustainable development, the Office organized, in collaboration with the regional commissions, the United Nations Development Programme and the United Nations Global Compact, an inaugural partnership event co-hosted with the Office of the President of the Economic and Social Council. The event was an occasion to honour the outgoing President of the Council and to celebrate the work of the regional commissions in support of the Council and regional partnerships in advancing implementation of the 2030 Agenda. Stakeholders that participated in the partnership event welcomed the event as a successful opportunity to exchange perspectives and set in motion new conversations and partnerships on the 2030 Agenda.
- 18.257 In October 2022, the Office also took part in the annual policy dialogue of the Club de Madrid to share an overview of the work of the regional commissions in the areas of debt and financing for development. The outcome fed into deliberations of the Group of Seven, the Group of 20 and the United Nations and assisted Governments and other multilateral organizations with policy recommendations.

Inter-regional cooperation

- 18.258 During the reporting period, the Office supported collaboration among the regional commissions in several areas as reported under the section on strategic coordination and policy advice above. Working with the Coordinator, the Office facilitated the identification of priority areas for interregional collaboration among the regional commissions and with other United Nations entities and supported the formulation of joint projects to be financed through the Development Account. It also promoted collaboration on several substantive issues among the regional commissions and with other United Nations entities through its networks of focal points.

Plans for 2024

- 18.259 The outcomes of the 2023 Sustainable Development Goals Summit, the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, the United Nations 2023 Water Conference, the fifth United Nations Conference on the Least Developed Countries, the high-level meeting of the General Assembly on the mid-term review of the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030, the 2023 Forum on Financing for Development Follow-up, and other global conferences and mandates will guide the work of the Office in 2024.
- 18.260 Building on the momentum generated by the Sustainable Development Goals Summit, the Office will further strengthen its support for the follow-up and review of the 2030 Agenda and the Sustainable Development Goals, bringing regional innovations and best practices to global discussions and ensuring that outcomes of the regional forums feed into the forthcoming meeting of the high-level political forum on sustainable development.
- 18.261 In preparation for the Summit of the Future, to be held in 2024, the Office will provide, in close consultation with the Coordinator, strategic advice and coordination support to the regional commissions in such areas as the rethinking of the international financial architecture, advancing of new metrics, including complementary measures to the GDP, financing for development, and safeguarding the interests of future generations.
- 18.262 The Office will also continue to serve as secretariat to the joint work of the regional commissions, with a special focus on supporting the advancement of the 2030 Agenda, strengthening linkages at the global level and advising on enhancing impact at regional and country levels. Building on the joint work of the regional commissions in 2023, including in such areas as financing for development, support for key transitions in energy, food systems, social and digital connectivity, social protection and sustainable urbanization, the Office will also contribute, through advisory and coordination support, to advancing accelerated implementation of the 2030 Agenda across the five regions.
- 18.263 The Office will systematically hold regular dialogues with the regional commissions and will also service the bi-annual meetings of the Deputy Secretary-General with the executive secretaries, with a view to enhancing internal coordination and ensuring coherent and effective support for global initiatives and processes, including preparations for the Summit of the Future.
- 18.264 In support of efforts to accelerate progress towards the Sustainable Development Goals, the Office will identify engagement and advocacy opportunities, coordinate effective participation of regional commissions in interagency mechanisms, and leverage key opportunities arising in 2024 such as the third United Nations Conference on Landlocked Developing Countries and the fourth International Conference on Small Island Developing States for strategic visibility and the uptake of solutions and perspectives that foster sustainable development at the regional and national levels.
- 18.265 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office is integrating environmental management practices into its operations. Whenever possible, the Regional Commissions New York Office uses online tools to facilitate collaboration among the regional commissions, including by organizing meetings in an

Section 18 Economic and social development in Africa

online format and distributing information and communications materials digitally rather than in printed form. Other measures include adhering to the ban on single-use plastics, optimizing the use of natural light, decreasing the brightness on computer monitors and turning off office equipment at the end of the workday, opting for reusable stationery and reusing copy paper, and encouraging the cultivation of plants in the office to improve indoor air quality.

- 18.266 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 18.60. In 2022, no official trips were undertaken owing to COVID-19-related travel restrictions coupled with exigencies in New York requiring the attention of the Office.

Table 18.59

- 18.267 The proposed regular budget resources for 2024 amount to \$940,300 and reflect no change compared with the appropriation for 2023. The proposed level of resources provides for the full, efficient and effective implementation of mandates. Additional details on the distribution of the proposed resources for 2024 are reflected in table 18.60 and figure 18.L.

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

While the Advisory Committee reiterates the importance of using local consultants for uninterrupted mandate delivery (see [A/76/7](#) and [A/76/7/Corr.1](#), para. V.12), the Committee trusts that every effort will be made to judiciously manage the engagement of consultants in the context of the upcoming budget period, with a view to making use of and strengthening the Commission's in-house capacity and taking into account priorities for staff development and recruitment. The Committee also trusts that the situation of the protocol officers, locally contracted and in the Commission for a long time continuously, will be reviewed and addressed in a sustainable way and that an update will be provided in the context of the next budget submission.

The Commission is judicious about keeping the engagement of consultants at a minimum and in that regard, has made every effort to fill vacant posts and enhance staff training to ensure full and effective mandate delivery.

The Commission's protocol team, which continuously provides exceptional service, is headed by a P-3 and has remained unchanged for the past five years. Currently, there are no locally contracted protocol officers at the Commission.

Foreword

Given recent setbacks due to cascading crises, renewed efforts to fully implement the 2030 Agenda for Sustainable Development are more critical than ever if the Asia and Pacific region is to attain its development goals by the end of the decade.

While this diverse region includes some of the largest, most dynamic countries in the world, more than half of them are least developed countries, landlocked developing countries or small island developing States. These countries have fewer options and resources to counter exogenous shocks and to implement the measures necessary for the attainment of their development goals.

In a world where peoples' lives are intertwined environmentally, economically and socially, national policies must be coupled with regional cooperation to reach long-lasting solutions. In the Bangkok Declaration Commemorating the Seventy-fifth Anniversary of the Economic and Social Commission for Asia and the Pacific: a Common Agenda to Advance Sustainable Development in Asia and the Pacific, members of the Economic and Social Commission for Asia and the Pacific (ESCAP) reaffirmed their commitment to leave no one behind; put people, including women and girls, at the centre of their efforts; protect the planet from the challenges to the shared environment, including climate change; work together to enhance regional connectivity and improve digital cooperation; keep markets open; and align public and private financial resources to effectively pursue their sustainable development aspirations.

The journey to reach long-lasting solutions begins with one step. It must transcend immediate concerns, focus on what is held in common and build the trust necessary to bridge gaps. The proposed programme budget for ESCAP for 2024 reflects the Commission's commitment to forge consensus on the future of Asia and the Pacific and to take steps to secure it.

(Signed) Armida Salsiah **Alisjahbana**
Executive Secretary, Economic and Social Commission for Asia and the Pacific

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 19.1 As the principal intergovernmental platform of the United Nations in the region, the Economic and Social Commission for Asia and the Pacific (ESCAP) assists its members and associate members in pursuing solutions for sustainable development. The mandates derive from the priorities established in relevant resolutions and decisions of the General Assembly, the Economic and Social Council and the Economic and Social Commission for Asia and the Pacific, including Council resolution 37 (IV), by which the Commission was established, and Council resolution 1895 (LVII), which amended its mandate to include the social dimension of integrated development.
- 19.2 The work of ESCAP is also grounded in its resolution 77/1, by which the Commission reaffirmed the importance of international and regional cooperation to strengthen the resilience of member States to the socioeconomic effects of pandemics, and its resolution 78/1, in which the Commission stressed its leadership role in catalysing regional cooperation and supporting actions to confront regional, transboundary and common challenges faced by its membership.
- 19.3 Through its three core functions, namely, research and analysis, the facilitation of intergovernmental consensus-building and norm-setting, and capacity development, ESCAP supports the implementation of the 2030 Agenda for Sustainable Development. In fulfilling these functions, ESCAP is guided by General Assembly resolutions, including Assembly resolution 74/4, and the regional road map for implementing the 2030 Agenda in Asia and the Pacific, endorsed by the Commission in its resolution 73/9, which serve as reference frameworks.

Strategy and external factors for 2024

- 19.4 The Commission's overall programme strategy is founded on the balanced integration of the economic, social and environmental pillars of sustainable development, implemented through its nine subprogrammes at the regional and subregional levels that focus on the following issues: macroeconomics, poverty reduction and financing for development; trade, investment and innovation; transport; environment; information and communications technology and disaster risk reduction and management; social development; statistics; and energy. Through its nine subprogrammes, ESCAP addresses the needs and requests of its member States, paying particular attention to those in special situations, namely, least developed countries, landlocked developing countries and small island developing States.
- 19.5 Improving regional connectivity plays an important role in advancing inclusive and sustainable development, reducing poverty and addressing inequalities in Asia and the Pacific. Therefore, ESCAP encourages all member States to work jointly to develop integrated and seamless connectivity across the region and strengthen regional cooperation. To help member States in closing connectivity gaps, ESCAP identifies, analyses and advocates action-oriented and cross-sectoral approaches that stimulate innovative policymaking. It also builds consensus on norms and agreements to assist member States in responding effectively to the changing and emerging needs of the region and coordinates region-wide inclusive policy dialogue in close collaboration with the United Nations development system and relevant stakeholders.
- 19.6 In 2024, ESCAP will advocate pathways that help its member States to protect people and the planet, especially people in vulnerable situations, including women, youth, older persons, migrants and persons with disabilities. In this regard, the Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific is the guiding framework for member States on preventing poverty and reducing vulnerability through the provision of universal health coverage and

investment in inclusive national social protection systems that improve access to essential services, resources, human capital development, education, employment and decent jobs and strengthen health resilience. The promotion of the active participation of women in decision-making and in the design and implementation of social protection policies and programmes is inherent in these efforts.

- 19.7 Member States reaffirmed their commitment to taking measures towards disability-inclusive development in the Jakarta Declaration on the Asian and Pacific Decade of Persons with Disabilities, 2023–2032. Consequently, ESCAP will accord priority to assisting member States in the effective implementation of the Incheon Strategy to “Make the Right Real” for Persons with Disabilities in Asia and the Pacific and the Beijing Declaration, including the Action Plan to Accelerate the Implementation of the Incheon Strategy, and to strengthening disability inclusion for the full and effective implementation of the 2030 Agenda in Asia and the Pacific during the Asian and Pacific Decade of Persons with Disabilities, 2023–2032. It will also follow up on the outcome of the Seventh Asian and Pacific Population Conference to further support member States in making progress towards the regional implementation of the Programme of Action of the International Conference on Population and Development and the commitments contained in the Asian and Pacific Ministerial Declaration on Population and Development.
- 19.8 In support of the implementation of the Ministerial Declaration on Protecting our Planet through Regional Cooperation and Solidarity in Asia and the Pacific, ESCAP will foster stronger regional cooperation on climate action, the protection of ecosystems and oceans, and sustainable urban development, and support the implementation of the framework principles on human rights and the environment throughout 2024 and beyond. ESCAP plans to assist its member States in identifying ecosystem-based approaches and nature-based solutions to climate change and curbing greenhouse gas emissions and build the capacity of member States to deliver policy packages that enhance energy access and efficiency, ensure climate-resilient infrastructure and preserve biodiversity. This includes the implementation of the Regional Action Programme on Air Pollution, which was adopted at the seventh session of the Committee on Environment and Development, and lays the foundation for stronger science-based and policy-driven cooperation among member States to improve air quality management, inter alia, through improved air quality standards, the sharing of open data and the exchange of best practices.
- 19.9 Shifting to inclusive and sustainable development pathways requires additional fiscal and financial resources. In support of the Addis Ababa Action Agenda, ESCAP will analyse pathways to align government expenditures with the Sustainable Development Goals and climate priorities. It will facilitate multi-stakeholder dialogue on debt issues and solutions to combat illicit cross-border financial flows and tax evasion and promote the financing of climate action. This will also include promoting better debt management to reduce the cost of servicing public debt, advocating progressive forms of taxation, developing domestic capital markets and raising funds through innovative financing instruments and mechanisms, including thematic bonds and debt swaps for development. In this regard, the Goals offer a comprehensive framework for multi-year planning and value creation that enhances returns, reduces risk and achieves impact at scale.
- 19.10 International trade and foreign investment could be greater engines for inclusive economic growth and poverty reduction in the region. As an impartial convener, ESCAP has developed and implemented several regional cooperation agreements and frameworks focused, inter alia, on enhancing transport and on trade integration. To further simplify and digitize trade procedures, ESCAP will continue to drive the implementation of the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific while also focusing on sustainable trade practices. It will analyse the opportunities to expand sustainable cross-border e-commerce for greater cooperation among countries, as well as between international organizations and the private sector. Moreover, ESCAP plans to undertake in-depth analysis to better understand the impact of, as well as opportunities for, making trade more sustainable and assess the potential for response strategies in the Asia-Pacific region.
- 19.11 Through the implementation of the Regional Action Programme for Sustainable Transport Development in Asia and the Pacific (2022–2026), ESCAP will support member States in addressing

the negative externalities generated by freight transport, including greenhouse gas emissions. It will implement capacity-building projects to strengthen regional and interregional transport connectivity, fast-track transformative action in transport for the delivery of the Sustainable Development Goals and promote the integration of the environmental aspects of international supply chains and the introduction of digital and intelligent transport systems. Further, it will encourage the cooperation of member States and coordinate their efforts to improve transport infrastructure to ensure a seamless and sustainable transport system in the Asia-Pacific region.

- 19.12 To implement the second phase of the Asia-Pacific Information Superhighway initiative, ESCAP will support member States in making digital solutions the default, enabling access to an affordable, reliable and safe Internet to stimulate e-government services and a thriving e-commerce sector. Leveraging the socioeconomic development opportunities offered by digitization, member States will be assisted in expanding the coverage of digital services implemented within robust policy and regulatory frameworks that protect data and privacy. The introduction of universal digital identification can improve access to a wider range of government and non-governmental services and help member States to enhance transparency and identify those most likely to be left behind, with the aim of increasing their inclusion in social protection systems, including for better crisis preparedness. Thus, ESCAP will advocate the development of user-friendly platforms and applications to enhance equitable Internet access and reduce inequalities between rural and urban areas and among vulnerable groups. ESCAP will also serve as a platform for collaboration between Governments and the business sector to enable the implementation of training programmes that match market requirements, with a view to creating digital job opportunities for the youth of the region.
- 19.13 Data and statistics are enablers to facilitate the implementation of the 2030 Agenda. ESCAP will deepen its support related to the assessment of progress towards the Sustainable Development Goals at the regional, subregional and national levels and focus on guiding member States to implement complementary statistics relating to gross domestic product (GDP) that will measure inclusive and sustainable growth and prosperity, building on the work of the Statistical Commission. Priority will be given to assisting the decision-making of member States by strengthening the capacity of statistical departments to raise the visibility of vulnerable groups in statistical data by disaggregating data, including by income, sex, age, race, ethnicity, migratory status, disability and geographical location, as well as other characteristics relevant in national contexts. Across all sectors, ESCAP will invest more in improving data collection, analysis and dissemination, as well as assist member States in developing strategic foresight to manage systemic risk and policies that incentivize all individuals and the private sector to protect people and the planet. Through its Regional Space Applications Programme for Sustainable Development, ESCAP will also facilitate the provision of high-resolution satellite imagery and big Earth data analytical tools for consistent natural disaster risk monitoring and reduction, with a focus on countries in special situations.
- 19.14 With more than half its member States belonging to the group of countries in special situations, ESCAP is mainstreaming the implementation of the various programmes of action into all subprogrammes to assist these countries in attaining relevant goals and targets. The year 2024 will mark the end of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the SIDS Accelerated Modalities of Action (SAMOA) Pathway, and ESCAP plans to support the reviews of those programmes of action. As a member of the inter-agency task force on least developed country graduation, and with 5 of the 11 least developed countries in the region due to graduate from the category by 2026, ESCAP will continue to provide advice to those member States.
- 19.15 Together with a broad range of partners, including member States, United Nations development system entities, other international and regional organizations, the private sector and civil society, ESCAP will convene the eleventh Asia-Pacific Forum on Sustainable Development in 2024. The Forum will enable multi-stakeholder engagement for the regional follow-up to and review of the implementation of the 2030 Agenda, the follow-up to the outcomes of the high-level political forum on sustainable development, and the regional preparations for the Summit of the Future.

- 19.16 With regard to cooperation with other entities at the global, regional, national and local levels, ESCAP will strengthen its linkages with global, regional and subregional organizations and support the organization of the meeting of the Secretary-General with regional organizations. It will collaborate with the following: regional development banks, including the Asian Development Bank (ADB), the Asian Infrastructure Investment Bank and the Islamic Development Bank; international, regional and subregional organizations, including but not limited to the Association of Southeast Asian Nations (ASEAN), the Economic Cooperation Organization, the Organisation for Economic Co-operation and Development and the Eurasian Economic Union; and research institutes, associations and other civil society organizations. ESCAP will also proactively engage with its development partners to strategically implement its programme, including through North-South, South-South and triangular cooperation, as appropriate. Each component under subprogramme 8 is aimed at strengthening cooperation, in particular with subregional organizations on transboundary issues.
- 19.17 With regard to inter-agency coordination and liaison, ESCAP works with an array of United Nations development system entities at the global, regional and national levels. Its multisectoral expertise will contribute to global products, as well as to common country assessments and United Nations Sustainable Development Cooperation Frameworks. Its subregional offices will serve as the main point of contact for resident coordinator offices and United Nations country teams. Jointly with the Regional Bureau for Asia and the Pacific of the United Nations Development Programme (UNDP) and the Development Coordination Office regional office for Asia and the Pacific, ESCAP will provide secretariat services to the Regional Collaborative Platform for Asia and the Pacific, and its substantive divisions will collaborate in supporting issue-based coalitions. ESCAP will continue to co-lead the issue-based coalition on raising ambitions on climate action with the United Nations Environment Programme (UNEP), where its expertise, geared to help the achievement of Sustainable Development Goals 7 and 13 and the implementation of the Paris Agreement, is of specific relevance. Furthermore, the “Asia-Pacific knowledge management hub”, co-led by ESCAP and the Development Coordination Office, is the main platform for sharing policy expertise, showcasing analytical work and providing rapid response to the needs of countries and United Nations country teams relating to the implementation of the 2030 Agenda.
- 19.18 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) National Governments maintain and strengthen their commitment to the Commission as the principal intergovernmental platform in the region for leveraging regional cooperation to meet transboundary and common challenges;
 - (b) Governments and other stakeholders continue to collaborate with the Commission in undertaking the proposed programme activities with the necessary capacity and resources;
 - (c) Extrabudgetary funding for technical cooperation continues to be available.
- 19.19 ESCAP integrates a gender perspective in its operational activities, deliverables and results, as appropriate, and will lead the regional review in preparation for the global review of the Beijing Declaration and Platform for Action (Beijing+30). Gender equality is a thematic area for subprogramme 6, while advancing the disaggregation of data, including disaggregation by sex, is a focus of subprogramme 7. In the 2024 programme plan, subprogrammes 2, 6 and 7, and components 4 and 5 of subprogramme 8, will specifically contribute results to gender equality and women’s economic empowerment, while subprogrammes 2 to 4 and 9, and components 1 to 4 of subprogramme 8, will address gender equality in their respective strategies.
- 19.20 In line with the United Nations Disability Inclusion Strategy and the Commission’s disability inclusion policy, subprogramme 6 incorporates disability-specific interventions to protect and empower persons with disabilities and, ultimately, to build disability-inclusive societies. ESCAP will continue to provide support to member States to further advance the implementation of the Incheon Strategy and to strengthen disability inclusion for the full and effective implementation of

the 2030 Agenda in Asia and the Pacific during the Asian and Pacific Decade of Persons with Disabilities, 2023–2032, in line with the Convention on the Rights of Persons with Disabilities.

Impact of the pandemic and lessons learned

- 19.21 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular the modalities for implementing mandates and the programme of work. The vast geographical area of Asia-Pacific region, with time zones spanning 9.5 hours, posed challenges to the servicing of virtual and hybrid meetings since the differences in working hours permitted only meetings of relatively short duration. Nevertheless, the hybrid format afforded a certain flexibility in terms of engaging a wider audience through leveraging virtual and e-conferencing platform opportunities and continued to facilitate the engagement of member States from across the region, in particular small island developing States, for which in-person participation is linked to extensive travel. However, in these cases, opportunities for interpersonal engagement during breaks or on the sidelines of a meeting were available only to representatives who were physically present.
- 19.22 Since travel continued to be restricted, the ability to undertake national consultations remained limited. ESCAP shifted its capacity-building activities to online platforms and engaged local experts to compensate for the absence of its own staff, thereby ensuring the continuity of its technical cooperation and advisory services. An example of such online capacity-building on trade policy negotiation and facilitation is highlighted under subprogramme 2.
- 19.23 ESCAP continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme as a result of the pandemic. The overall focus of its programme is geared towards increasing the resilience of economies, social protection systems and the environment to emerging risks, with the aim of reducing vulnerabilities that have further widened during the pandemic. Building on those lessons, ESCAP will deepen its work through local institutions and the engagement of local experts to ensure the sustainability of its work. ESCAP will also continue to carefully consider the most effective modalities, including hybrid and virtual modalities, for implementing its programme of work, as appropriate.

Legislative mandates

- 19.24 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

61/16	Strengthening of the Economic and Social Council	69/283	Sendai Framework for Disaster Risk Reduction 2015–2030
66/288	The future we want	69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)
67/10	Cooperation between the United Nations and the Eurasian Economic Community		
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014-2024	70/170	Towards the full realization of an inclusive and accessible United Nations for persons with disabilities
69/142	Realizing the Millennium Development Goals and other internationally agreed development goals for persons with disabilities towards 2015 and beyond	70/192	Follow-up to the International Conference on Financing for Development
69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations	72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system

Section 19 Economic and social development in Asia and the Pacific

73/133	Graduation of countries from the least developed country category	76/213	Science, technology and innovation for sustainable development
74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway	76/215	Development cooperation with middle-income countries
74/4	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly	76/216	Follow-up to the Fourth United Nations Conference on the Least Developed Countries
74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	76/224	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
74/297	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system	76/258	Doha Programme of Action for the Least Developed Countries
74/306	Comprehensive and coordinated response to the coronavirus disease (COVID-19) pandemic	76/273	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system
74/307	United response against global health threats: combating COVID-19	76/296	Our ocean, our future, our responsibility
75/90	The situation in Afghanistan	77/12	Cooperation between the United Nations and the Association of Southeast Asian Nations
75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	77/18	Cooperation between the United Nations and the Organization of Islamic Cooperation
75/268	Cooperation between the United Nations and the Shanghai Cooperation Organization	77/21	Cooperation between the United Nations and the Organisation for Economic Co-operation and Development (OECD)
75/288	Cooperation between the United Nations and the Pacific Islands Forum	77/162	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
75/290 A	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council	77/171	Combating sand and dust storms
	Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level	77/179	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
	Economic and Social Council	77/181	Women in development
75/290 B	High-level political forum on sustainable development	77/183	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
75/324	Cooperation between the United Nations and the Economic Cooperation Organization	77/184	Operational activities for development of the United Nations system
76/136	Promoting social integration through social inclusion	77/185	South-South cooperation
76/154	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: participation	77/186	Agriculture development, food security and nutrition
76/200	Agricultural technology for sustainable development	77/189	Inclusive development for and with persons with disabilities
		77/203	Rights of Indigenous Peoples
		77/212	The right to development
		77/223	Human rights and extreme poverty
		77/245	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
		77/246	Follow-up to the second United Nations Conference on Landlocked Developing Countries
		77/248	Oceans and the law of sea

Economic and Social Council resolutions

37 (IV)	Economic Commission for Asia and the Far East	2019/6	Addressing inequalities and challenges to social inclusion through fiscal, wage and social protection policies
1895 (LVII)	Change of name of the “Economic Commission for Asia and the Far East” to “Economic and Social Commission for Asia and the Pacific”	2020/5	Strengthening coordination of the statistical programmes in the United Nations system
1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2022/8	Report of the Committee for Development Policy on its twenty-fourth session
2013/19	Conclusion of the work of the Commission on Sustainable Development	2022/11	A conference structure of the Economic and Social Commission for Asia and the Pacific to advance sustainable development
2014/11	Follow-up to the International Conference on Financing for Development	2022/18	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2016/11	Committing to the effective implementation of the 2030 Agenda for Sustainable Development in Asia and the Pacific	2022/19	Programme of action for the least developed countries for the decade 2022–2031
2018/5	Strategies for eradicating poverty to achieve sustainable development for all	2022/21	Support to Non-Self-Governing Territories by the specialized agencies and international institutions associated with the United Nations

Economic and Social Commission for Asia and the Pacific resolutions

66/1	Incheon Declaration	73/2	Strengthening the regional mechanism for the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
66/9	Full and effective implementation of the Beijing Platform for Action and its regional and global outcomes in the Asia-Pacific region		
66/15	Strengthening of the evaluation function of the secretariat of the Commission	73/3	Advancing integrated and seamless connectivity for sustainable development in Asia and the Pacific
67/14	Cooperation between the Economic and Social Commission for Asia and the Pacific and other United Nations and regional and subregional organizations serving Asia and the Pacific	73/5	Strengthening Asia-Pacific’s support for the United Nations Conference to Support the Implementation of Sustainable Development Goal 14
68/8	Enhancing coordination within the United Nations system and cooperation with regional organizations for promoting regional development	73/9	Regional road map for implementing the 2030 Agenda for Sustainable Development in Asia and the Pacific
71/1	Restructuring the conference structure of the Commission to be fit for the evolving post-2015 development agenda	74/1	Supporting the smooth transition of the least developed countries in Asia and the Pacific towards a sustainable graduation
71/2	Implementation of the Programme of Action for the Least Developed Countries for the Decade 2011–2020 in Asia and the Pacific	74/6	Advancing disaster-related statistics in Asia and the Pacific
71/3	Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	74/10	Implementation of the Ministerial Declaration on Enhancing Regional Economic Cooperation and Integration to Support the Implementation of the 2030 Agenda in Asia and the Pacific
71/4	Implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway	75/1	Implementation of the outcome of the Euro-Asian Regional Midterm Review of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
72/6	Committing to the effective implementation of the 2030 Agenda for Sustainable Development in Asia and the Pacific	75/2	Committing to strengthening the links between national, regional and global follow-up to and review of the 2030 Agenda for Sustainable Development in Asia and the Pacific
72/8	Fostering regional cooperation and partnerships to respond to the climate change challenge in the Asia-Pacific region		
72/9	Regional cooperation to promote the conservation and sustainable use of the oceans, seas and marine resources for sustainable development in Asia and the Pacific	75/3	Advancing partnerships within and across regions for the sustainable development of Asia and the Pacific

Section 19 Economic and social development in Asia and the Pacific

75/4	Strengthening regional cooperation to tackle air pollution challenges in Asia and the Pacific	77/1	Building back better from crises through regional cooperation in Asia and the Pacific
76/1	Strengthening cooperation to promote the conservation and sustainable use of the oceans, seas and marine resources for sustainable development in Asia and the Pacific	78/1	Bangkok Declaration Commemorating the Seventy-fifth Anniversary of the Economic and Social Commission for Asia and the Pacific: A Common Agenda to Advance Sustainable Development in Asia and the Pacific
76/2	Regional cooperation to address the socioeconomic effects of pandemics and crises in Asia and the Pacific	78/2	A conference structure of the Commission to advance sustainable development

Subprogramme 1**Macroeconomic policy, poverty reduction and financing for development***General Assembly resolutions*

77/152	International financial system and development	77/153	External debt sustainability and development
--------	--	--------	--

Economic and Social Commission for Asia and the Pacific resolutions

E/CN.11/63	Statistical and economic documentation work	71/5	Implementing the outcome of the Asia-Pacific High-level Consultation on Financing for Development
------------	---	------	---

Subprogramme 2**Trade, investment and innovation***General Assembly resolutions*

77/151	International trade and development	77/160	Entrepreneurship for sustainable development
--------	-------------------------------------	--------	--

Economic and Social Commission for Asia and the Pacific resolutions

68/3	Enabling paperless trade and the cross-border recognition of electronic data and documents for inclusive and sustainable intraregional trade facilitation	72/3	Statute of the Asian and Pacific Centre for Transfer of Technology
		72/4	Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific
70/5	Strengthening regional cooperation and capacity for enhanced trade and investment in support of sustainable development	72/12	Harnessing science, technology and innovation for inclusive and sustainable development in Asia and the Pacific
70/6	Implementation of the decision of the Ad Hoc Intergovernmental Meeting on a Regional Arrangement for the Facilitation of Cross-border Paperless Trade	75/8	Advancing science, technology and innovation for the implementation of the 2030 Agenda for Sustainable Development in Asia and the Pacific

Subprogramme 3**Transport***General Assembly resolutions*

69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	72/212	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals
70/197	Towards comprehensive cooperation among all modes of transport for promoting sustainable multimodal transit corridors	74/299 76/294	Improving global road safety Political declaration of the high-level meeting on improving global road safety

Economic and Social Commission for Asia and the Pacific resolutions

70/7	Implementation of the Suva Declaration on Improving Maritime Transport and Related Services in the Pacific	72/5	Strengthening regional cooperation on transport connectivity for sustainable development in Asia and the Pacific
71/6	Maritime transport connectivity for sustainable development	73/4; 78/3	Implementation of the Ministerial Declaration on Sustainable Transport Connectivity in Asia and the Pacific
71/7	Adoption of the Regional Cooperation Framework for the Facilitation of International Railway Transport	74/2	Promotion of the regional framework for the planning, design, development and operation of dry ports of international importance
71/8	Strengthening intraregional and interregional connectivity in Asia and the Pacific	74/3	Improving road safety in Asia and the Pacific for sustainable transport systems

**Subprogramme 4
Environment and development**

General Assembly resolutions

71/222	International Decade for Action, “Water for Sustainable Development”, 2018–2028	75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028
71/256	New Urban Agenda		
74/212	International Day of Clean Air for blue skies	77/167	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
		77/169	Harmony with Nature

Economic and Social Council resolution

2017/24	Human settlements
-------------------------	-------------------

Economic and Social Commission for Asia and the Pacific resolutions

70/11	Implementing the outcome of the Asia-Pacific Forum on Sustainable Development	72/2	Statute of the Centre for Sustainable Agricultural Mechanization
70/12	Strengthening efforts on human settlements and sustainable urban development for the Asia-Pacific region	74/4	Implementation of the Ministerial Declaration on Environment and Development for Asia and the Pacific, 2017
71/9	Strengthening cooperation on sustainable management of water resources in Asia and the Pacific		

**Subprogramme 5
Information and communications technology and disaster risk reduction and management**

General Assembly resolutions

70/125	Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society	77/121	International cooperation in the peaceful uses of outer space
		77/150	Information and communications technologies for sustainable development
77/29	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development	77/164	Disaster risk reduction

Economic and Social Council resolutions

2015/14	Strengthening of the coordination of emergency humanitarian assistance of the United Nations	2018/14	Strategic Framework on Geospatial Information and Services for Disasters
2015/31	Establishment of the Asian and Pacific Centre for the Development of Disaster Information Management	2022/15	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society
2016/27	Strengthening institutional arrangements on geospatial information management		

Economic and Social Commission for Asia and the Pacific resolutions

71/12	Strengthening regional mechanisms for the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030 in Asia and the Pacific	73/7	Enhancing regional cooperation for the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030 in Asia and the Pacific
72/7	Regional cooperation to combat sand and dust storms in Asia and the Pacific	75/5	Implementation of the Ulaanbaatar Declaration of the 2018 Asian Ministerial Conference on Disaster Risk Reduction
72/10	Regional review of the implementation of the World Summit on the Information Society action lines	75/6	Implementation of the Ministerial Declaration on Space Applications for Sustainable Development in Asia and the Pacific and the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030)
72/11	Advancing disaster-related statistics in Asia and the Pacific for implementation of internationally agreed development goals	75/7	Advancing the implementation of the Asia-Pacific Information Superhighway initiative through regional cooperation

**Subprogramme 6
Social development**

General Assembly resolutions

49/128	Report of the International Conference on Population and Development	75/161	Intensification of efforts to prevent and eliminate all forms of violence against women and girls
65/234	Follow-up to the International Conference on Population and Development beyond 2014	75/226	International migration and development
65/312	Outcome document of the High-level Meeting of the General Assembly on Youth: Dialogue and Mutual Understanding	76/135	Cooperatives in social development
68/4	Declaration of the High-level Dialogue on International Migration and Development	76/139	Preparations for and observance of the thirtieth anniversary of the International Year of the Family
69/147	Intensification of efforts to eliminate all forms of violence against women and girls	76/142	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
73/195	Global Compact for Safe, Orderly and Regular Migration	76/146	The girl child
73/326	Format and organizational aspects of the international migration review forums	76/168	Effective promotion of the Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities
74/121	Policies and programmes involving youth	76/266	Progress Declaration of the International Migration Review Forum
74/126; 76/140	Improvement of the situation of women and girls in rural areas	77/188	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
75/131	United Nations Decade of Healthy Ageing (2021–2030)	77/190	Follow-up to the Second World Assembly on Ageing
75/156	Strengthening national and international rapid response to the impact of the coronavirus disease (COVID-19) on women and girls

D. Communication deliverables

Outreach programmes, special events and information materials: observance of United Nations international days, including United Nations Day; outreach programmes upon demand for the general public, including for academic organizations, for approximately 300 participants.

External and media relations: press releases and op-ed articles on the work and activities of ESCAP; press conferences/press briefings and press interviews for major publications and events.

Digital platforms and multimedia content: multimedia promotional content, including videos and educational materials for major publications and events; blog posts for the ESCAP website and content for ESCAP social media accounts.

Evaluation activities

19.26 The following evaluations conducted by ESCAP and completed in 2022 have guided the proposed programme plan for 2024:

- (a) Evaluation of subprogramme 5: phase 1 (2018–2022) of the implementation of the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030);
- (b) Evaluation of subprogramme 8.

19.27 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024 and were used to focus the work of ESCAP on the environment, climate and urbanization that maximizes its comparative advantages, and that is transboundary in nature and fully aligned with the relevant ministerial declarations, such as those reflected in the strategy of subprogramme 4. The results were also used to identify concrete regional initiatives driven by member States and pathways to support the implementation of the second phase of the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030), which were discussed at the fourth Ministerial Conference on Space Applications for Sustainable Development in Asia and the Pacific, held in Jakarta on 26 October 2022, and have been reflected in the strategy of subprogramme 5.

19.28 The following evaluations conducted by ESCAP are planned for 2024:

- (a) Evaluation of the Statistical Institute for Asia and the Pacific;
- (b) Evaluation of the Centre for Sustainable Agricultural Mechanization;
- (c) Evaluation of the Asian and Pacific Centre for the Development of Disaster Information Management.

Programme of work

Subprogramme 1

Macroeconomic policy, poverty reduction and financing for development

Objective

19.29 The objective, to which this subprogramme contributes, is to strengthen the capacity of member States to achieve stable, inclusive and sustainable economic development in Asia and the Pacific.

Strategy

19.30 To contribute to the objective, the subprogramme will support member States in transforming their economies in a manner that is consistent with the 2030 Agenda, contributing in particular to the achievement of Sustainable Development Goals 1, 8–10, 12 and 17, as well as promote a

development approach that goes beyond the primary focus on economic growth. Specifically, the subprogramme will:

- (a) Support member States in exploring, adopting and mainstreaming economic development policies and financing strategies aligned with the achievement of the Goals through methodologies developed through and policy recommendations emerging from knowledge products, technical advisory and capacity-building efforts and the facilitation of knowledge exchange and consensus-building among member States;
- (b) Undertake research, advisory and capacity-building services on country-level policymaking and regional-level policy coordination, guided by the Committee on Macroeconomic Policy, Poverty Reduction and Financing for Development of the Commission and further supported through the Consultative Group on Financing Strategies for the Sustainable Development Goals;
- (c) Undertake outreach and follow-up of the subprogramme's research and knowledge products through policy dialogues and closer cooperation of members of the Consultative Group, policy think tanks, resident coordinator offices and United Nations country teams to further integrate the subprogramme's research and capacity-building work;
- (d) Provide substantive inputs to global and United Nations system-wide processes, task teams and publications coordinated by the Department of Economic and Social Affairs, and to United Nations system-wide initiatives, in particular on financing for development issues.

19.31 The above-mentioned work is expected to result in:

- (a) Evidence-based economic policies and development strategies for strengthened economic resilience, inclusive development and environmental sustainability;
- (b) The strengthened ability of member States, in particular least developed countries, to mobilize and allocate financial resources for sustainable development, including by mainstreaming sustainable development into public and private financing;
- (c) The improved ability of member States to employ economic and financial policy levers to promote the transformation of their economies towards resilient, inclusive and sustainable development pathways.

Programme performance in 2022

Sri Lanka addresses economic and financing challenges

- 19.32 Confronted with multiple and severe economic difficulties in 2022, the Government of Sri Lanka requested assistance from the subprogramme for its engagement with development partners to address those challenges, as well as technical advice on innovative development financing options and long-term sustainable development planning.
- 19.33 Following a direct request from the Government of Sri Lanka, and in close coordination with the resident coordinator, the subprogramme provided direct advisory support to Sri Lanka on long-term socioeconomic policies and the development of a sovereign green bond framework for effective pursuit of the Sustainable Development Goals in partnership with the Sustainable Development Council of Sri Lanka.
- 19.34 Progress towards the objective is presented in the performance measure below (see table 19.2).

Table 19.2
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Sri Lanka developed a draft sovereign green bond framework using a macroeconomic model for sustainable development developed specifically for the Sri Lankan context

Planned results for 2024

Result 1: member States design policies and strategies for resilient economies

Programme performance in 2022 and target for 2024

- 19.35 The subprogramme’s work contributed to three member States (Kyrgyzstan, Pakistan and Samoa) implementing national strategies and policy initiatives to increase the resilience of their economies, including but not limited to fiscal and financial measures, informed by knowledge products prepared under the subprogramme, which met the planned target.
- 19.36 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.3).

Table 19.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Member States decided to establish the Consultative Group on Financing Strategies for the Sustainable Development Goals and requested further support in areas such as pandemic economic recovery, poverty alleviation and transformation towards resilient, inclusive and sustainable economies	Three member States (Kyrgyzstan, Pakistan and Samoa) implemented national strategies and policy initiatives to increase the resilience of their economies, including but not limited to fiscal and financial measures	Three member States take policy actions to implement national strategies and policy initiatives to increase the resilience of their economies	Three member States take additional policy actions to implement national strategies and policy initiatives to increase the resilience of their economies

Result 2: strengthened financing for sustainable development, with a focus on innovative and emerging financing options in the Asia-Pacific region

Programme performance in 2022 and target for 2024

- 19.37 The subprogramme’s work contributed to three member States (Bangladesh, Bhutan and Cambodia) taking policy actions, informed by knowledge products prepared under the subprogramme, intended to strengthen financing for development, which met the planned target.
- 19.38 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.4).

Table 19.4
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
New initiatives by seven member States (Bangladesh, Brunei Darussalam, China, Indonesia, Kazakhstan, Samoa and Sri Lanka) to design and implement financing strategies to bridge financing gaps for the implementation of the 2030 Agenda	New policy initiatives or reforms by three member States (Bangladesh, Cambodia and Vanuatu) to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by three member States (Bangladesh, Bhutan and Cambodia) to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by three member States to strengthen financing and resource mobilization and allocation for sustainable development	New policy initiatives or reforms by three member States to strengthen financing and resource mobilization and allocation for sustainable development

Result 3: engagement of member States for evidence-based and forward-looking macroeconomic policymaking aligned with the Sustainable Development Goals

Proposed programme plan for 2024

- 19.39 Influencing and informing the macroeconomic policymaking of member States, under rapidly changing economic conditions, is one key area of work of the subprogramme. The need for targeted evidence-based and forward-looking macroeconomic policy advice has become even more pronounced, given the growing macroeconomic uncertainties and the urgency of accelerating progress towards the Sustainable Development Goals, both within the region and worldwide. A deliberate effort has been made by the subprogramme to link its knowledge products with its capacity-building activities to better translate research outcomes into direct impacts on policymaking at the country level.

Lessons learned and planned change

- 19.40 To realize the full benefits of broad macroeconomic research in supporting changes at the national level, the lesson for the subprogramme was that, in addition to focused and targeted capacity-building activities, direct and substantive interactions with member States can be mutually beneficial, and that and current interactions could be expanded further. In applying the lesson, the subprogramme plans to strengthen these interactions by seeking direct partnerships with the relevant policymaking bodies of member States. It will do so through the recently established Consultative Group on Financing Strategies for the Sustainable Development Goals and jointly organize macroeconomic policy dialogues informed by the subprogramme’s flagship policy reports, as well as partner with resident coordinators and United Nations country teams for several targeted country interventions.

Section 19 Economic and social development in Asia and the Pacific

19.41 Expected progress towards the objective is presented in the performance measure below (see table 19.5).

Table 19.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
National policy dialogues on substantive macroeconomic policy involved policymakers as participants	National policy dialogues on substantive macroeconomic policy involved policymakers as participants	National policy dialogues on substantive macroeconomic policy involved policymakers as participants	Relevant ministries of three member States engage on the organization of substantive macroeconomic policy dialogues	Relevant ministries of an increasing number of member States engage on the organization of substantive macroeconomic policy dialogues

Deliverables

16. Policy briefs on macroeconomic policy, poverty reduction and financing for development	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: side event on financing for development at the Economic and Social Council; technical advice to all member States on financing for development and macroeconomic policy; technical advisory notes and presentation materials on macroeconomic policy, poverty reduction and financing for development; advisory services for the issue-based coalition on inclusive economic growth and COVID-19 recovery.				
D. Communication deliverables				
Outreach programmes, special events and information materials: presentations, videos, brochures and infographics on the <i>Economic and Social Survey of Asia and the Pacific</i> .				
External and media relations: press releases and op-ed articles on macroeconomic policy, poverty reduction and financing for development; press interviews for major publications and events.				
Digital platforms and multimedia content: web pages on economic assessment and sustainable development, and on financing for development.				

Subprogramme 2 Trade, investment and innovation

Objective

- 19.43 The objective, to which this subprogramme contributes, is to strengthen the capacity of member States to implement policies and programmes that more effectively harness the potential of trade, investment, innovation, technology and enterprise development for sustainable development and regional integration in Asia and the Pacific.

Strategy

- 19.44 To contribute to the objective, the subprogramme will:
- Support member States in formulating and implementing policies and measures to promote and facilitate trade, investment, innovation and enterprise development in support of inclusive and sustainable development, with a specific focus on the needs of countries in special situations;
 - Build the capacity of member States, in cooperation with global and regional partners, such as ADB, the United Nations Conference on Trade and Development (UNCTAD) and the World Trade Organization (WTO), to negotiate and implement trade and investment agreements aligned with the 2030 Agenda and to design and implement trade and investment facilitation policies and measures, including through the adoption of paperless trade systems;
 - Provide capacity-building in close cooperation with the Asian and Pacific Centre for Transfer of Technology, including workshops, training activities and policy advice; develop knowledge

products on sustainable foreign direct investment (FDI), innovation, technology cooperation and transfer, emerging and frontier technologies, responsible and inclusive business, social enterprise, impact investment and innovative finance for women's entrepreneurship; and support member States in making progress towards the achievement of Sustainable Development Goals 3, 5–9, 13 and 17;

- (d) Support member States and micro-, small and medium-sized enterprises in the areas of trade facilitation and support trade digitization, such as paperless and contactless trade, in particular to maintain trade flows of critical goods in times of global and regional crises;
- (e) Support member States in formulating policies for sustainable FDI, infrastructure financing and micro-, small and medium-sized enterprises, with a key focus on private sector engagement through the ESCAP Sustainable Business Network and on developing innovative financial and digital tools to support women entrepreneurs with regard to reducing vulnerabilities;
- (f) Support regional cooperation platforms and expand expert networks in the areas of trade, investment, technology and innovation and sustainable business, including through public-private partnerships, for knowledge transfer and peer learning.

19.45 The above-mentioned work is expected to result in:

- (a) Reduced trade costs and increased participation and competitiveness of companies, especially micro-, small and medium-sized enterprises, in international trade;
- (b) The adoption by member States of more effective rules and procedures governing trade, leading to more efficient trade outcomes aligned with the Sustainable Development Goals;
- (c) The adoption by member States of policies and measures aimed at achieving more inclusive and sustainable outcomes of private sector activities, including public-private partnerships;
- (d) The integration of inclusive and sustainable practices into technology and innovation policies in the region;
- (e) The increased resilience of supply chains by enabling continued trade activities and using technology and innovation to mitigate the impact of crises.

Programme performance in 2022

Certified improved understanding among policymakers and other stakeholders of trade policy negotiation and facilitation

- 19.46 The importance of trade facilitation was highlighted during the COVID-19 pandemic when export bans and other measures affected access to essential goods. In addition, several countries in the region are in the process of graduating from least developed country status and are in need of building their capacity to negotiate trade agreements to reduce the impact of losing the preferential treatment associated with this status.
- 19.47 To address these challenges and opportunities, the subprogramme rolled out several e-learning courses in 2021 and 2022 on trade policy negotiation and trade facilitation aimed at policymakers and other stakeholders in the trade policy ecosystem. The e-learning courses were developed in collaboration with global and regional partners such as UNCTAD, WTO and ADB. Courses covering topics such as trade facilitation, global value chain analysis, trade negotiations in times of crises and sustainable development in trade agreements have been made available online. All courses include quizzes that need to be passed in order for participants to receive a completion certificate. These online courses were used to complement and support in-person capacity-building workshops.
- 19.48 Progress towards the objective is presented in the performance measure below (see figure 19.I).

Figure 19.I
Performance measure: number of stakeholders certified as successfully completing an online course offered by the Commission on issues related to trade policy negotiation and facilitation (cumulative)

Planned results for 2024

Result 1: more efficient, transparent and safer trade processes through paperless and contactless trade

Programme performance in 2022 and target for 2024

- 19.49 The subprogramme’s work contributed to six additional countries (Mongolia, Republic of Korea, Tajikistan, Timor-Leste, Turkmenistan and Tuvalu) having acceded to the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific, bringing the number of countries that have acceded to or ratified the Agreement to 11, which exceeded the planned target of 7 countries.
- 19.50 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 19.II).

Figure 19.II

Performance measure: number of countries having acceded to or ratified the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific (cumulative)

Result 2: strengthened commitment of the private sector in support of the Sustainable Development Goals in Asia and the Pacific

Programme performance in 2022 and target for 2024

- 19.51 The subprogramme's work contributed to 81 private sector organizations adopting a declaration on the Asia-Pacific Green Deal for Business, including five business transformational opportunities for an environmentally friendly economy, which met the planned target.
- 19.52 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.7).

Table 19.7

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
The private sector supported the idea for an Asia-Pacific Green Deal for businesses in the Asia-Pacific region	The private sector developed a draft of an Asia-Pacific Green Deal for businesses and gave its full support thereto	A total of 81 private sector organizations, including 33 small and medium-sized enterprises, adopted the Asia-Pacific Green Deal for Business	An increased number of private sector organizations pledge their support to an Asia-Pacific Green Deal for businesses and sign a declaration to that effect	There is a further increase in the number of private sector organizations that sign a declaration on the Asia-Pacific Green Deal for Business, of which the majority are small and medium-sized enterprises

Result 3: enhanced policy measures to promote inclusive business for sustainable development**Proposed programme plan for 2024**

- 19.53 An inclusive business model in which businesses have social and/or environmental objectives alongside economic objectives and provide products, services and livelihoods to people living at the base of the economic pyramid can help to meet the ambitions of the 2030 Agenda.
- 19.54 The subprogramme's work on inclusive business supports ESCAP member States in developing and implementing policies, measures and initiatives that promote inclusive business models for sustainable development, with a specific objective of facilitating the establishment and strengthening of women-led and women-owned businesses and their integration into the formal economy.

Lessons learned and planned change

- 19.55 Based on previous initiatives, the lesson for the subprogramme was the need for a whole-of-government approach to promote inclusive business and to build the capacities of stakeholders. In applying the lesson, the subprogramme will work closely with relevant line ministries in member States to advance recognition of the opportunities offered by inclusive business models for the sustainable development of their economies and to facilitate the development of enabling policy frameworks and measures, such as inclusive business accreditation systems and national strategies. The dissemination of ESCAP knowledge products on that topic through the organization of more frequent webinars is one of the approaches to be taken to that end. Moreover, the subprogramme will increase opportunities for sharing successful experiences from the region among policymakers.
- 19.56 Expected progress towards the objective is presented in the performance measure below (see table 19.8).

Table 19.8

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	–	Member States (Cambodia, Philippines and Viet Nam) implemented measures to promote inclusive businesses	Policy measures developed by member States to promote inclusive businesses	Additional policy measures developed by member States to promote inclusive businesses

Deliverables

- 19.57 Table 19.9 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: advisory services on trade, investment and innovation, technology cooperation and transfer, and emerging and frontier technologies; regional knowledge networks linking researchers, policymakers and practitioners in trade, investment and innovation, including the Asia-Pacific Research and Training Network on Trade and the United Nations Network of Experts for Paperless Trade and Transport in Asia and the Pacific; advisory support for the task forces of the ESCAP Sustainable Business Network and for the United Nations Special Programme for the Economies of Central Asia Working Group on Innovation and Technology for Sustainable Development.

Databases and substantive digital materials: two online courses and databases on trade, investment and innovation; the comprehensive trade cost database; the Asia-Pacific Trade and Investment Agreements Database; trade performance indicators on non-tariff measures; the online Trade Intelligence and Negotiation Adviser.

D. Communication deliverables

Outreach programmes, special events and information materials: country fact sheets, multimedia materials and briefings on trade, investment and innovation; side event on trade investment and innovation at the Asia-Pacific Forum on Sustainable Development.

External and media relations: press releases and op-ed articles on trade, investment, and innovation; press interviews for major publications and events.

Digital platforms and multimedia content: website of the Asia-Pacific Research and Training Network on Trade and web pages on technology and innovation, business and investment, trade facilitation and digital trade, trade policy and integration, infrastructure financing and public-private partnerships.

**Subprogramme 3
Transport**

Objective

- 19.58 The objective, to which this subprogramme contributes, is to achieve sustainable transport connectivity, logistics and mobility in the Asia-Pacific region.

Strategy

- 19.59 To contribute to the objective, the subprogramme will:
 - (a) Serve as the secretariat for the Intergovernmental Agreement on the Asian Highway Network, the Intergovernmental Agreement on the Trans-Asian Railway Network and the Intergovernmental Agreement on Dry Ports, and provide technical expertise to the intergovernmental deliberations of the relevant working groups, including on operational issues and issues of particular relevance to landlocked developing countries;
 - (b) Provide technical assistance and conduct related research and analysis on land and maritime transport, with due consideration for the specific needs of landlocked developing countries and small island developing States, focusing on enhanced operational connectivity through promoting knowledge products and best practices, including efficient operational arrangements and harmonized legal frameworks for multimodal transport, and facilitate systematic regional and, as appropriate, interregional dialogue to foster regional and interregional connectivity;
 - (c) Facilitate the exchange of good practices on the utilization of new and emerging technologies, and support the wider deployment of smart transport systems through the development of a regional road map and by raising awareness through knowledge products and capacity development;
 - (d) Undertake policy advocacy and capacity-building in the areas of sustainable urban transport and low greenhouse gas emissions and logistics, including by promoting and facilitating an

accelerated transition to electric mobility, clean and energy-efficient transport and environmentally friendly supply chains and applying the sustainable urban transport index developed by ESCAP;

- (e) Provide technical assistance in the areas of road safety and inclusive transport and mobility, including through a regional plan of action for road safety and regional guidelines addressing accessibility, to support reductions in poverty and inequality and promote inclusive transport for people with different travel requirements, including but not limited to women, children, older persons, low-income transport users, rural inhabitants and persons with disabilities;
- 19.60 These workstreams will support member States in making progress towards the achievement of Sustainable Development Goals 3, 7, 9, 11–13 and 17 and the objectives of the Regional Action Programme for Sustainable Transport Development in Asia and the Pacific (2022–2026).
- 19.61 The above-mentioned work is expected to result in:
- (a) A more sustainable, efficient and resilient transport infrastructure along the regional transport networks (Asian highways, trans-Asian railways and dry ports) and at maritime ports to support freight and, where appropriate, passenger operations that are affordable, safe, accessible and environmentally friendly;
 - (b) Enhanced regional land, maritime and interregional transport connectivity to preserve regional transport linkages and foster regional cooperation to support interregional and intraregional trade and people connectivity;
 - (c) The formulation and implementation of sustainable transport and mobility policy initiatives in member countries, including the planning and development of urban public transport systems, measures and mechanisms to promote the use of low-greenhouse-gas-emission transport and smart mobility approaches, and measures to improve transport safety and promote inclusive transport in the region.

Programme performance in 2022

Strengthened legal framework to facilitate multimodal transport operations

- 19.62 Countries with a higher use of multimodal transport (utilization of different available modes of transport, i.e. road, rail, air or waterborne transport) showed increased resilience in preserving their transport connectivity during the pandemic, especially when rail transport was combined with other transport modes.¹ The existing legal framework for multimodal transport operations in Asia and the Pacific consists of several international conventions designed to regulate unimodal carriage, diverse regional and subregional agreements, national laws and standard term contracts, which could benefit from enhancements to reflect developments in the transport sector in terms of transport patterns, technology and markets.
- 19.63 The subprogramme has raised the awareness of ESCAP member States of the importance of shifting from unimodal to multimodal transport to increase the resilience of their transport networks, including in response to disruptions such as those experienced as a result of the pandemic. It identified several options for how to approach the harmonization of national legal frameworks for multimodal transport, facilitated expert analysis and country consultations and finalized the “Guidelines for harmonization of national laws on multimodal transport in Asia and the Pacific”.
- 19.64 Progress towards the objective is presented in the performance measure below (see table 19.10).

¹ Economic and Social Commission for Asia and the Pacific, “COVID-19 and its impact on the railway sector in Asia and the Pacific”, policy brief, 30 October 2020, Available at www.unescap.org/sites/default/files/5NOV_Railway_Green_SCREEN.pdf.

Table 19.10
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
The Committee on Transport underscored the importance of facilitating multimodal transport operations by further improving the existing legal framework in Asia and the Pacific	ESCAP member States decided to work towards a harmonized legal framework for multimodal transport in Asia and the Pacific at the fourth session of the Ministerial Conference on Transport	ESCAP member States welcomed the “Guidelines for harmonization of national laws on multimodal transport in Asia and the Pacific”

Planned results for 2024

Result 1: accelerated transformative action in transport for the delivery of the Sustainable Development Goals

Programme performance in 2022 and target for 2024

- 19.65 The subprogramme’s work contributed to the development of eight new policies and measures by member States that intensify support for the efficiency and resilience of supply chains, the environmental dimensions of transport systems and improvements in transport safety to accelerate progress towards achieving the transport-related targets of the Sustainable Development Goals, which met the planned target.
- 19.66 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.11).

Table 19.11
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
ESCAP member States advanced discussions on priority areas that would balance economic, social and environmental dimensions of transport and support the decade of action for the Sustainable Development Goals by 2030	ESCAP member States adopted seven regional transport priority areas, including three new priority areas, that accelerate impactful change towards sustainability while recovering from the COVID-19 pandemic	ESCAP member States developed eight new policies and measures that intensify support for the efficiency and resilience of supply chains, the environmental dimensions of transport systems and improvements in transport safety to accelerate the progress towards achieving the transport-related targets of the Sustainable Development Goals	Eight new policies and measures by member States that intensify support for the efficiency and resilience of supply chains, the environmental dimensions of transport systems and improvements in transport safety to accelerate the progress towards achieving transport-related targets of the Sustainable Development Goals	Three ESCAP member States enhance: <ul style="list-style-type: none"> • The economic efficiency of supply chains • The environmental dimensions of transport systems • Transport safety

Result 2: leveraged regional transport network to address the environmental dimension of transport development and international supply chains

Programme performance in 2022 and target for 2024

- 19.67 The subprogramme’s work contributed to progress made by several member States (China, India, Russian Federation and Thailand) in fulfilling the transport-related emission reduction commitments, including the development of long-term polices and road maps to accelerate the transition to electric mobility to support climate action (China, India and Thailand), which met the planned target.
- 19.68 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.12).

Table 19.12
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
ESCAP member States encouraged a holistic approach to strengthen the environmental and social dimensions of transport development and operations	Countries utilized the Working Groups on the Asian Highway, on the Trans-Asian Railway Network and on Dry Ports to discuss a regional approach towards enhancing the sustainability of freight transport, listing the environmental dimension of transport development among its priorities	Several member States (China, India, Russian Federation and Thailand) fulfilled their transport-related emission reduction commitments, including the development of long-term polices and road maps to accelerate the transition to electric mobility to support climate action (China, India and Thailand)	Countries further institutionalize an agenda to address the environmental dimension of transport development and operations, and implement projects and policy actions along the regional land transport network and supply chains	Members of the existing intergovernmental working groups and initiatives introduce more ambitious policy measures to address the environmental dimension of freight transport operations

Result 3: enhanced policies for safe and inclusive transport and mobility

Proposed programme plan for 2024

- 19.69 Globally, the number of road traffic fatalities and serious injuries did not decrease during the first Decade of Action for Road Safety 2011–2020,² putting at risk the achievement of targets 3.6 and 11.2 of the Sustainable Development Goals. The subprogramme provided analytical and technical advice to members and associate members to develop the Regional Plan of Action for Asia and the Pacific for the Second Decade of Action for Road Safety 2021–2030, which serves as a guiding document to support efforts to reduce road traffic deaths and injuries. To enhance safe and inclusive transport, it has also assessed available inclusive transport measures implemented by countries and identified best practices in addressing the needs of different transport users, including strengthening the socioeconomic resilience of rural communities in the region.

² The Global Health Observatory web page of the World Health Organization, available at www.who.int/data/gho/data/indicators/indicator-details/GHO/estimated-number-of-road-traffic-deaths.

Lessons learned and planned change

- 19.70 The lesson for the subprogramme was the increased demand for enhancing the capacity of policymakers to effectively address safe and inclusive transport and better align its interventions to assist member States in realizing the full benefits of the implementation of the Regional Plan of Action. In applying the lesson, the subprogramme will coordinate its technical cooperation portfolio to maximize existing synergies in its activities at the national level. It will also enhance the capacity of member States to improve road safety management, including the safety of motorized two-wheelers and infrastructure, as well as plans for more accessible, inclusive and innovative urban transport systems. In supporting member States to develop safe and inclusive transport policies through comprehensive approaches, the subprogramme will also build on the specific expertise of subprogrammes 5 and 6 to jointly implement relevant initiatives.
- 19.71 Expected progress towards the objective and the target for 2024 is presented in the performance measure below (see table 19.13).

Table 19.13
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
ESCAP member States highlighted the need for a holistic approach to strengthen the safety and inclusiveness of transport systems and infrastructure	ESCAP member States agreed to include safe and inclusive transport in the Regional Action Programme for Sustainable Transport Development in Asia and the Pacific (2022–2026) as one of its three overarching objectives	The Regional Plan of Action for Asia and the Pacific for the Second Decade of Action for Road Safety 2021–2030 was welcomed by the Committee on Transport ESCAP member States contributed to the development of regional guidelines on enhancing social inclusion and innovations in urban transport systems in Asia-Pacific cities	Three ESCAP member States initiate the formulation and/or implementation of national road safety policies to improve road safety	Three additional member States formulate and/or implement national policies and measures to reduce road traffic deaths and injuries by at least 50 per cent between 2021 and 2030

Deliverables

- 19.72 Table 19.14 lists all deliverables of the subprogramme.

C. Substantive deliverables				
Databases and substantive digital materials: Asian Highway database, the Trans-Asian Railway Network and the network of dry ports.				
D. Communication deliverables				
Outreach programmes, special events and information materials: infographics on road safety for regional and global access.				
External and media relations: press releases, blogs and op-ed articles on the Asian Highway Network, environmentally sustainable transport, the Trans-Asian Railway Network, dry ports and intermodal transport, connecting to global supply chains, urban transport, and safe and inclusive transport; press interviews for major publications and events.				
Digital platforms and multimedia content: web pages on the Asian Highway Network, environmentally sustainable transport, the Trans-Asian Railway Network, dry ports and intermodal transport, connecting to global supply chains and safe and inclusive transport.				

Subprogramme 4

Environment and development

Objective

- 19.73 The objective, to which this subprogramme contributes, is to reduce the negative impacts of growth on the natural environment and to improve human well-being in urban and rural environments through building the capacity of member States to strengthen climate action and sustainable resource use, realize sustainable urban development and eliminate pollution and waste.

Strategy

- 19.74 To contribute to the objective, the subprogramme will:
- (a) Support member States in the development of ambitious climate action policies and plans aligned with the Paris Agreement and the decisions to be adopted by the Conference of the Parties to the United Nations Framework Convention on Climate Change at its twenty-eighth session and by the Commission, as well as those adopted by the Committee on Environment and Development at its seventh session, and support the implementation of these policies and plans at the regional, national, subnational and local levels;
 - (b) Generate evidence on status and trends related to the common environment and the health impacts of environmental degradation in Asia and the Pacific, including from an urban perspective, and provide technical support for integrated policies to promote and strengthen ecosystem-based approaches, nature-based solutions and food systems, reduce pollution and strengthen procedural rights for environmental protection, including through multi-stakeholder engagement and partnerships, while taking into account the needs of women and promoting their participation in decision-making processes;
 - (c) Promote regional cooperation on air pollution, including through support for implementation of the Regional Action Programme on Air Pollution, by, inter alia, facilitating dialogues and the exchange of best practices on air quality management and providing technical support to member States on the assessment of air quality, standards and data;
 - (d) Build the capacity of city officials to strengthen urban planning processes, provide technical and policy support to facilitate the adoption of urban resilience strategies, the application of appropriate smart technologies and the financing of resilient urban infrastructure, and increase awareness of sustainable and inclusive urban solutions, including issues related to environmental protection, resource consumption, infrastructure needs, air pollution, climate change and disaster risk reduction;
 - (e) Support regional cooperation to prevent ocean pollution and protect marine ecosystems, including by coordinating the regional implementation of the United Nations Decade of Ocean Science for Sustainable Development, by, inter alia, providing participatory, multi-stakeholder dialogue platforms such as the Asia-Pacific Day for the Ocean, and by promoting the implementation of international conventions and region-wide initiatives, as appropriate.
- 19.75 The above-mentioned work is expected to result in:
- (a) Enhanced action to address climate change through accelerating the implementation of the Paris Agreement in Asia-Pacific countries;
 - (b) Increased sustainability and resilience of communities and reduced negative impacts of urbanization;
 - (c) Improved policy scenarios, plans, legislation and action to address the risk of air pollution in the region;

- (d) Enhanced action to protect the environment and support the transition to healthy ecosystems, especially healthy oceans and food systems;
- (e) Advancement of a regional legal framework as a foundation to enshrine the right to a clean, healthy and sustainable environment;
- (f) Strengthened and revitalized multilateral cooperation on environmental action.

Programme performance in 2022

Increased cooperation to advance the right to a clean, healthy and sustainable environment, including procedural and substantive rights in South-East Asia

- 19.76 Following a recommendation to develop an Asia-Pacific framework analogous to the Convention on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters in Europe and the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean, the subprogramme contributed to building understanding on best practices for developing such an instrument. Subsequently, it enabled the initiation of an intergovernmental process, chaired by the ASEAN Intergovernmental Commission on Human Rights, in 2022 to develop a framework for a subregional legal instrument. Providing technical and legal advice to the ASEAN Environmental Rights Working Group, the subprogramme has drawn on the experience of the above-mentioned regional agreements for environmental access rights while ensuring consideration of the specific regional dynamics and national attributes in South-East Asia and supported the achievement of sustainable development.
- 19.77 Progress towards the objective is presented in the performance measure below (see table 19.15).

Table 19.15
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Legal experts recommended to the secretariat that it support the development of a subregional legal instrument on the right to a clean, healthy and sustainable environment	The ASEAN Intergovernmental Commission on Human Rights decided to pursue the development of a subregional framework on the right to a clean, healthy and sustainable environment and requested the support of the subprogramme	The ASEAN Environmental Rights Working Group was established to agree on the substantive and procedural elements of an ASEAN-wide framework agreement on the right to a clean, healthy and sustainable environment

Planned results for 2024

Result 1: member States strengthen regional cooperation on natural resource management, adopt sustainable urban development pathways and develop climate and air pollution mitigation actions

Programme performance in 2022 and target for 2024

- 19.78 The subprogramme’s work contributed to the adoption of terms of reference for a technical expert group on environment and development by the Committee on Environment and Development to strengthen access to technical expertise and capacity-building activities, supporting the implementation of the Regional Action Programme on Air Pollution, which did not meet the planned target of member States having enhanced access to technical expertise and capacity-building activities under the substantive coordination of the technical expert group. The target was not met, as the establishment of the technical expert group was delayed by a year.

19.79 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.16).

Table 19.16
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
The Committee on Environment and Development decided to establish the technical expert group on environment and development to enhance regional exchange and to mobilize technical expertise to accelerate environmental and sustainable development action	Member States deliberated the terms of reference for a technical expert group on environment and development	The terms of reference for a technical expert group on environment and development were adopted during the seventh session of the Committee on Environment and Development	Member States make voluntary commitments and adopt national and/or local policies to address air pollution	The Regional Action Programme on Air Pollution is implemented

Result 2: accelerated implementation of climate action

Programme performance in 2022 and target for 2024

- 19.80 The subprogramme’s work contributed to 18 Asia-Pacific countries developing long-term, low-carbon and low-emissions development strategies and 3 Asia-Pacific countries developing local climate and/or air pollution action plans, which exceeded the planned target of 10 Asia-Pacific countries.
- 19.81 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 19.III).

Figure 19.III
Performance measure: number of Asia-Pacific countries that develop local climate and/or air pollution action plans and long-term, low-carbon and low-emissions development and recovery strategies (cumulative)

Result 3: local governments localize the Sustainable Development Goals and contribute to national climate strategies

Proposed programme plan for 2024

19.82 The subprogramme built the capacities of local authorities to undertake voluntary local reviews to implement the outcomes of the seventh Asia-Pacific Urban Forum, including its ministerial segment, held in 2019. To better integrate local and national actions in reporting on progress towards the Sustainable Development Goals, ESCAP issued regional guidelines for voluntary local reviews in 2020, which emphasize a “whole-of-government approach” to Goal localization. Since the issuance of the guidelines, the subprogramme has technically supported four cities in Bangladesh, Indonesia, Malaysia and Nepal in finalizing their voluntary local reviews. In addition, the city of Melbourne, Australia, undertook its voluntary local review in 2022 using the methodology developed by ESCAP.

Lessons learned and planned change

19.83 The lesson for the subprogramme was that it needed to adjust the criteria for cities participating in the voluntary local review process to better align with the voluntary national review reporting at the high-level political forum to strengthen the vertical integration between national, subnational and local authorities. In applying the lesson, the subprogramme will assist in strengthening national urban policies to enable local authorities to implement sustainable urban action, such as on solid waste management and urban air quality. It will further support the collection of local data across all of the Sustainable Development Goals and assist cities in taking local actions that contribute to the achievement of the 2030 Agenda, including local climate actions that contribute to nationally determined contributions developed under the Paris Agreement.

19.84 Expected progress towards the objective is presented in the performance measure below (see figure 19.IV).

Figure 19.IV

Performance measure: number of cities developing voluntary local reviews and/or Sustainable Development Goal localization plans with the direct support of the Commission (annual)

Deliverables

19.85 Table 19.17 lists all deliverables of the subprogramme.

Table 19.17

Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

C. Substantive deliverables

Consultation, advice and advocacy: advisory services on environment and development provided in collaboration with the broader United Nations system.

Databases and substantive digital materials: 16 e-learning courses on the environment and the implementation of the 2030 Agenda.

D. Communication deliverables

Outreach programmes, special events and information materials: information material on agricultural mechanization; United Nations international days such as the International Day of Clean Air for blue skies, World Cities Day, World Environment Day and World Habitat Day, including special events on sustainable urban development and environment and development; side event on environment and development at the Asia-Pacific Forum on Sustainable Development.

External and media relations: press releases and op-ed articles on reducing the negative impacts of growth on the natural environment and improving human well-being in urban and rural environments; press interviews for major publications and events.

Digital platforms and multimedia content: web pages of the subprogramme on safeguarding natural resources, sustainable agricultural mechanization, cities for a sustainable future and sustainable growth.

Subprogramme 5 Information and communications technology and disaster risk reduction and management

Objective

- 19.86 The objective, to which this subprogramme contributes, is to strengthen information and communications technology (ICT), space technology applications and disaster risk reduction and management for resilient and sustainable development in Asia and the Pacific through regional cooperation and the sharing of best practices.

Strategy

- 19.87 To contribute to the objective, the subprogramme will support member States in making progress towards the achievement of Sustainable Development Goals 1, 4, 5, 9–11, 13–15 and 17 by developing norms for inclusive digital connectivity, geospatial data-sharing and disaster risk reduction and resilience-building, supported by policy analysis and evidence-based research. Specifically, the subprogramme will:
- (a) Build capacity, especially of countries with special needs, in the above-mentioned areas, anchored in regional cooperation mechanisms that promote technical cooperation through the South-South and North-South modalities and are augmented by the programmes of the Asian and Pacific Training Centre for Information and Communication Technology for Development and the Asian and Pacific Centre for the Development of Disaster Information Management;
 - (b) Promote regional policy dialogue and cooperation through expert group meetings on transboundary challenges related to connectivity and disaster risks, including those related to major development challenges such as climate change;
 - (c) Promote the implementation of the Action Plan for Implementing the Asia-Pacific Information Superhighway Initiative, 2022–2026, by carrying out diagnostic studies on the digital divide, assessing policy and regulatory frameworks and providing policy recommendations, supplemented by advocacy, networking and partnerships in support of regionally agreed frameworks;
 - (d) Guided by the Jakarta Ministerial Declaration on Space Applications for Sustainable Development in Asia and the Pacific and the Asia-Pacific Plan of Action on Space Applications

for Sustainable Development (2018–2030), assist member States in harnessing recent advances in space technology applications and geospatial data, facilitate timely and expanded access to space-derived geospatial data, pool expertise and resources at the regional and subregional levels, promote the sharing of knowledge and good practices and create synergies with other existing regional initiatives;

- (e) Augment and leverage subregional and regional cooperation in disaster risk reduction, adaptation and climate-resilient pathways for action, including through the implementation of the activities of the Asia-Pacific Disaster Resilience Network and the ESCAP multi-donor trust fund for tsunami, disaster and climate preparedness, and disaster information management services provided by the Asian and Pacific Centre for the Development of Disaster Information Management, including the activities under the Regional Plan of Action on Sand and Dust Storms in Asia and the Pacific;
- (f) Further build the resilience of human and institutional capacity, in particular by providing assistance in the advancement of inclusive digital transformations, the use of innovative risk analytics and geospatial data applications and the provision of targeted solutions for the special needs of countries that face a high disaster risk.

19.88 The above-mentioned work is expected to result in:

- (a) The bridging of the digital divide, and an accelerated digital transformation;
- (b) The anticipation of disaster risks and the enhancement of disaster risk reduction and management solutions benefiting all levels of society;
- (c) Enhanced applications of integrated geospatial information to reduce disaster risk and accelerate the monitoring and implementation of the Sustainable Development Goals.

Programme performance in 2022

Renewed commitment to digital cooperation in Asia and the Pacific

- 19.89 Digital divides in Asia and the Pacific, which have exacerbated the unequal distribution of digital dividends, have the potential to perpetuate cycles of economic inequality within the region. The subprogramme supported member States in enhancing ICT connectivity through the Asia-Pacific Information Superhighway initiative, which has been recognized as a regional platform for the promotion of digital cooperation.³ The subprogramme facilitated the formation and discussions of the working groups that drafted the Action Plan for Implementing the Asia-Pacific Information Superhighway Initiative, 2022–2026, and supported the organization of the first Asia-Pacific Digital Ministerial Conference, which was convened by the Republic of Korea. Additionally, the subprogramme conducted analytical work and launched a regional capacity-building programme on frontier ICTs.
- 19.90 Furthermore, the subprogramme co-organized, jointly with the Government of Indonesia, the fourth Ministerial Conference on Space Applications for Sustainable Development in Asia and the Pacific, under the theme of “Space+ for our Earth and future” and facilitated the dissemination of good practices and lessons learned through the publication *Geospatial Practices for Sustainable Development in South-East Asia 2022: A Compendium* and its associated database and dashboard. The maintenance and updating of the Risk and Resilience Portal leveraged digital innovations to provide customized adaptation solutions to countries by converting the vast array of publicly available geospatial, statistical and remote sensing information into usable data analytics for disaster risk-informed decision-making.
- 19.91 Progress towards the objective is presented in the performance measure below (see table 19.18).

³ ESCAP/RES/78/1.

Table 19.18
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
The Committee on Information and Communications Technology, Science, Technology and Innovation recommended the creation of a drafting group to develop an action plan for the next phase of implementation of the Master Plan for the Asia-Pacific Information Superhighway, for the period 2022–2026	Under the leadership of Maldives, with Tonga and Mongolia as vice-chairs, the drafting group reviewed and provided further guidance on the draft Action Plan for Implementing the Asia-Pacific Information Superhighway Initiative, 2022–2026	The Committee on Information and Communications Technology, Science, Technology and Innovation endorsed the Action Plan for Implementing the Asia-Pacific Information Superhighway Initiative, 2022–2026 The fourth Ministerial Conference on Space Applications for Sustainable Development in Asia and the Pacific adopted the Jakarta Ministerial Declaration on Space Applications for Sustainable Development in Asia and the Pacific

Planned results for 2024

Result 1: bridging development divides through accelerated access to affordable and resilient digital connectivity

Programme performance in 2022 and target for 2024

- 19.92 The subprogramme’s work contributed to monthly expenditure in the Asia-Pacific region on fixed-broadband subscriptions as a percentage of gross national income per capita in the amount of 3.50 per cent, which did not meet the planned target of 2.55 per cent. The target was not met due to the sudden surge in bandwidth demand for more advanced cellular technologies (from third-generation to fourth- and fifth-generation technologies) and higher speed capabilities during the COVID-19 pandemic, which led to an increase in the price of subscriptions globally, including in Asia and the Pacific.
- 19.93 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 19.V).

Figure 19.V
Performance measure: average monthly expenditure in the Asia-Pacific region on fixed-broadband subscriptions as a percentage of gross national income per capita

^a The latest statistics issued by the International Telecommunication Union in its ICT Price Basket 2022 revised the projections for monthly expenditure on fixed-broadband subscriptions for the year 2023 from 3.60 per cent to 3.73 per cent of gross national income per capita (see www.itu.int/en/ITU-D/Statistics/Dashboards/Pages/IPB.aspx). Planned figures for 2024 are based on past years' average percentage changes.

Result 2: augmented use of geospatial data for accelerating Sustainable Development Goal monitoring and implementation

Programme performance in 2022 and target for 2024

- 19.94 The subprogramme's work contributed to the initiation of the integration of geospatial and sectoral data for monitoring and implementation of the Sustainable Development Goals in three countries (Indonesia, Sri Lanka and Thailand), which exceeded the planned target of two countries.
- 19.95 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.19).

Table 19.19
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Members and associate members requested support to enhance their capacity to produce a common data format and methodologies	Members and associate members gained access to training and tools to enhance the use of geospatial data	Three countries (Indonesia, Sri Lanka and Thailand) initiated policy actions or projects on integrating geospatial and sectoral data for monitoring and implementation of the Sustainable Development Goals	Two additional countries initiate policy action(s) or project(s) on integrating geospatial and sectoral data for monitoring and implementation of the Sustainable Development Goals	Increased availability of geospatial and sectoral data for tracking progress on the Sustainable Development Goals in two countries

Result 3: strengthened national and subregional frameworks on disaster risk reduction and climate adaptation

Proposed programme plan for 2024

19.96 The region continues to be affected by multiple disasters related to climate change, and there has been a continued trend of global warming. The impacts of warming trends in different subregions of the Asia-Pacific region are varied, and each subregion can benefit from a risk profile with subregional specificities. To support the understanding of subregional warming trends, the subprogramme customized the flagship *Asia-Pacific Disaster Report 2021* for each subregion and used it to guide the development of subregional disaster risk reduction and resilience-building frameworks.

Lessons learned and planned change

19.97 The lesson for the subprogramme was that it had to incorporate the fast-changing and compounding impacts of the pandemic, which has reshaped and expanded the “riskscape” of the Asia-Pacific region, into its analytical, capacity-building and intergovernmental work, including by building partnerships with subregional organizations, space agencies and other stakeholders to adapt its programme of work and operating modalities to the cascading disaster risks at the subregional level. In applying the lesson, the subprogramme will deepen these partnerships further by providing knowledge services to partner organizations, including on-demand analysis of the state of the climate and customized decision-support systems to accelerate the adoption and implementation of adaptation and resilience pathways. The subprogramme will also leverage digital transformation by providing additional online solutions to countries through the following: the ESCAP Risk and Resilience Portal and the online geospatial good practice database and dashboard; platforms for knowledge-sharing on the application of geospatial data for disaster risk reduction and resilience, as well as on sand and dust storms; and the Asian and Pacific Centre for the Development of Disaster Information Management.

19.98 Expected progress towards the objective is presented in the performance measure below (see table 19.20).

Table 19.20
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
ASEAN member countries adopted a declaration on adaptation to drought	ASEAN member countries translated the declaration into an action plan	Three countries (Indonesia, Lao People’s Democratic Republic and Thailand) translated the action plans into national strategies	Two subregional organizations adopt disaster risk reduction and climate adaptation frameworks and support the Early Warning for All by 2027 initiative	Two additional subregional organizations adopt disaster risk reduction and climate adaptation frameworks and support the Early Warnings for All initiative

Deliverables

19.99 Table 19.21 lists all deliverables of the subprogramme.

Table 19.21

Subprogramme 5: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

28. On geospatial information applications	1	1	1	1
--	---	---	---	---

C. Substantive deliverables

Consultation, advice and advocacy: advisory services for working groups on disaster risk reduction and resilience, including the Issue-Based Coalition on Building Resilience; advice to the task forces of the ESCAP Sustainable Business Network; advice for committees and consultations with organizations on issues related to disaster risk reduction, space applications and ICT; briefing notes on digital development for senior government officials from ICT-related ministries and agencies.

Databases and substantive digital materials: ESCAP Risk and Resilience Portal; digital materials on space technology applications for regional and global access; geospatial practices database and dashboard with 80 new data entries and 30 institutional users; digital material for the development and management of disaster information databases and spatial data infrastructure; two new e-learning courses of the Asian and Pacific Training Centre for Information and Communication Technology for Development.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures and/or online materials to raise awareness on disaster information management.

External and media relations: press releases and op-ed articles on ICT, space technology applications and disaster risk reduction and management for resilient and sustainable development in Asia and the Pacific; press interviews for major publications and events.

Digital platforms and multimedia content: online presence of the Asian and Pacific Centre for the Development of Disaster Information Management; web pages on the Asia-Pacific Information Superhighway, building resilience to disasters, e-resilience, regional cooperation in disaster risk reduction, monitoring drought from space, the integration of geospatial information for resilience-building, and space and geospatial information systems for disaster management.

Subprogramme 6 Social development

Objective

- 19.100 The objective, to which this subprogramme contributes, is to realize inclusive and equitable societies that protect, empower and leave no one behind in Asia and the Pacific, with a focus on population and development, social protection, disability, and gender equality and the empowerment of women.

Strategy

- 19.101 To contribute to the objective, the subprogramme will bring together Governments on critical issues related to social development in the region and inform these intergovernmental processes through analysis and by drawing upon the complementary strengths of ESCAP through its regional convening power and the capacity of United Nations agencies, funds and programmes to support national implementation to advance the Sustainable Development Goals. Specifically, the subprogramme will:
- (a) Support Governments in the continued implementation of the Programme of Action of the International Conference on Population and Development, the Madrid International Plan of Action on Ageing, 2002, and the Global Compact for Safe, Orderly and Regular Migration by strengthening the evidence base with regard to population and development issues, with a focus on ageing, migration and population dynamics, poverty reduction and leaving no one behind;
 - (b) Facilitate the monitoring of the implementation of the Asian and Pacific Ministerial Declaration on Population and Development through the framework that was endorsed at the sixth session of the Committee on Social Development;
 - (c) Provide support to member States in identifying the population groups that are at the highest risk of being left behind through its Leave No One Behind methodology, analytical reports and capacity-building;
 - (d) In line with the Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific, consolidate national progress and experiences related to extending social

protection coverage in periodic progress reports; develop a regional platform for member States to share good practices; and provide new and innovative analytical tools and products and capacity-development tools and training sessions to Governments;

- (e) Conduct research and analysis and provide capacity-building support to member States on building disability-inclusive societies, guided by the Convention on the Rights of Persons with Disabilities, the Incheon Strategy to “Make the Right Real” for Persons with Disabilities in Asia and the Pacific and the Jakarta Declaration on the Asian and Pacific Decade of Persons with Disabilities, 2023–2032, and support other subprogrammes in mainstreaming disability inclusion;
 - (f) Follow up on the outcomes of the Asia-Pacific regional 25-year review of the implementation of the Beijing Declaration and Platform for Action by supporting Governments in accelerating the implementation of the Beijing Declaration and Platform for Action;
 - (g) Provide technical assistance in developing policies in the context of economic empowerment and entrepreneurship for women and support other subprogrammes in mainstreaming a gender perspective;
 - (h) Provide knowledge products, seminars and technical advice on bridging gaps in the legal framework for micro-, small and medium-sized enterprises and for designing strategies and policy provisions specific to women-led enterprises.
- 19.102 The above-mentioned work will help support member States in their progress towards the achievement of Sustainable Development Goals 1, 3, 4, 5, 8, 10, 11 and 17.
- 19.103 The above-mentioned work is expected to result in:
- (a) The development of regional frameworks for social development;
 - (b) The development of responsive policies and programmes in the domain of population dynamics and social development;
 - (c) Enhanced skills and knowledge to enable countries to design and implement inclusive social protection policies;
 - (d) Improved national policies and strategies to advance gender equality and women’s empowerment, including responsive business development and investment policies and programmes;
 - (e) Improved national policies and programmes in support of disability-inclusive development;

Programme performance in 2022

Strengthened policy environment for women’s economic empowerment and entrepreneurship

- 19.104 The subprogramme has fostered a strong policy and institutional environment for women’s economic empowerment and entrepreneurship in the Asia and Pacific region through partnerships with five ministries for small and medium-sized enterprises and two ministries of women’s affairs. Laws, regulations and policies continue to pose barriers to women entrepreneurs in starting and managing their businesses. Through the regional programme of ESCAP on catalysing women’s entrepreneurship, specific provisions for women entrepreneurs have been incorporated in the laws and policies on small and medium-sized enterprises in several countries. In Cambodia and Viet Nam, the subprogramme supported a review of existing legal frameworks, provided technical inputs to draft policies and organized multi-stakeholder consultations throughout the policy review process.
- 19.105 Furthermore, the subprogramme has generated evidence and supported policymakers in five countries in addressing the impact of COVID-19 on women entrepreneurs and gaps in accessing information and services. The subprogramme supported the establishment of one-stop hubs in Viet Nam (with an estimated 300,000 users) and in Bangladesh. ESCAP has also partnered with the ASEAN Coordinating Committee on Micro, Small and Medium Enterprises to develop a comprehensive toolkit to guide ASEAN countries in strengthening policy support for women-led micro-, small and medium-sized enterprises, which has been adopted by all 10 ASEAN member States.
- 19.106 Progress towards the objective is presented in the performance measure below (see table 19.22).

Table 19.22
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Five ESCAP member States (Bangladesh, Cambodia, Fiji, Samoa and Viet Nam) participated in consultations on reforms of policies to enhance women’s entrepreneurship at the country level	Four policy measures and initiatives were undertaken by Cambodia and Viet Nam that addressed the needs of women entrepreneurs in support of their business development	Three additional policy measures and initiatives were undertaken by Bangladesh, Cambodia and Viet Nam to address the needs of women entrepreneurs in support of their business development

Planned results for 2024

Result 1: advancing data and guidance for evidence-based policy related to population ageing, in line with the Madrid International Plan of Action on Ageing and the 2030 Agenda for Sustainable Development

Programme performance in 2022 and target for 2024

- 19.107 The subprogramme’s work contributed to ESCAP member States adopting an outcome document entitled “Accelerating Implementation of the Madrid International Plan of Action on Ageing, 2002, to Build a Sustainable Society for All Ages in Asia and the Pacific”, which contained recommendations for action at the regional and national levels to address the economic and social impacts of population ageing, especially on older women, which met the planned target.
- 19.108 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.23).

Table 19.23
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
ESCAP member States supported the mapping of policies on population ageing and the collection of data to monitor population ageing	Five ESCAP member States in special situations (Bhutan, Cambodia, Kyrgyzstan, Maldives and Mongolia) conducted national reviews on data and policies through bottom-up approaches and interministerial meetings to prepare for the fourth review and appraisal of the Madrid International Plan of Action on Ageing in the context of the 2030 Agenda	ESCAP member States adopted an outcome document (“Accelerating Implementation of the Madrid International Plan of Action on Ageing, 2002, to Build a Sustainable Society for All Ages in Asia and the Pacific”), which contained recommendations for action at the regional and national levels to address the economic and social impacts of population ageing, especially on older women	Three additional ESCAP member States address population ageing and other population and development concerns in policy frameworks and action plans	50 per cent of ESCAP member States have provided input to an online ESCAP repository of policies and data on implementing the Madrid International Plan of Action on Ageing 20 per cent of member States use the online ESCAP repository, and implement recommendations therein, when drafting new policies, laws, programmes and guidelines on population ageing

Result 2: strengthened national policies and programmes to promote the rights of, and advance the empowerment of, persons with disabilities, including women with disabilities

Programme performance in 2022 and target for 2024

- 19.109 The subprogramme’s work contributed to the adoption and implementation of policies and programmes to empower persons with disabilities, including women and children with disabilities, by three ESCAP member States (Bhutan, Lao People’s Democratic Republic and Philippines), which met the planned target.
- 19.110 Progress towards the objective and the target for 2024 are presented in the performance measure (see table 19.24).

Table 19.24
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Three ESCAP member States (China, India and the Lao People’s Democratic Republic) developed and implemented evidence-informed socially inclusive policies to ensure that no one was left behind, in particular in the context of the COVID-19 pandemic	Two ESCAP member States developed and implemented evidence-informed inclusive policies to support persons with disabilities	Three ESCAP member States (Bhutan, Lao People’s Democratic Republic and Philippines) adopted and implemented policies and programmes to empower persons with disabilities	Three additional ESCAP member States adopt and implement policies and programmes to empower persons with disabilities	Three ESCAP member States further strengthen their policy frameworks on disability-inclusive development, in particular in the areas of employment, social protection and accessibility

Result 3: advancement of data and guidance for inclusive and evidence-based policy design and implementation to reduce inequality of opportunity and leave no one behind

Proposed programme plan for 2024

- 19.111 Since the onset of the COVID-19 pandemic, the long-term positive trajectory of poverty reduction has seen a deterioration, leaving millions of people in Asia and the Pacific vulnerable and without access to basic services and opportunities that are key for human, social and economic development. The subprogramme has widened the knowledge base, developed a Leave No One Behind policy tool and, through training, strengthened policymakers’ capacity to identify those who have been left furthest behind in accessing opportunities or facing barriers to benefiting from nine Sustainable Development Goals.

Lessons learned and planned change

- 19.112 With the popularity of the Leave No One Behind policy tool widening, the lesson for the subprogramme was that the tool needs to be easily understandable and more user-friendly in order to be employable by a broad range of stakeholders. In applying the lesson, the subprogramme will improve the user interface of the data analysis component to facilitate policymakers’ use of and access to the tools available to disaggregate and analyse data on the circumstances shared by the population groups left furthest behind. It will provide more capacity-building opportunities for policymakers to fully understand and interpret the results obtained, while offering more advanced training to technical officials, with the purpose of extending the application of the tool to cover additional Sustainable Development Goals and the use of national data sets. The subprogramme will

Section 19 Economic and social development in Asia and the Pacific

actively leverage global, regional, subregional and national events and forums to showcase the relevance of its innovative tools and advocate for the design and monitoring of evidence-based inclusive policies that leave no one behind.

19.113 Expected progress towards the objective is presented in the performance measure below (see table 19.25).

**Table 19.25
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	An interactive and online Leave No One Behind tool was made available for member States to identify the furthest behind groups in relation to 15 Sustainable Development Goal indicators covering nine Goals in more than 25 countries across Asia and the Pacific	Five ESCAP member States (Mongolia, Philippines, Tonga, Turkmenistan and Tuvalu) conducted national training sessions to enhance understanding and use of the Leave No One Behind tool	Three ESCAP member States capitalize on the Leave No One Behind tool to generate their own data and evidence, with a view to informing inclusive policies	20 per cent of ESCAP member States that commit to voluntary national reviews in 2024 use data and evidence generated by the Leave No One Behind tool and that inform inclusive policies

Deliverables

19.114 Table 19.26 lists all deliverables of the subprogramme.

**Table 19.26

C. Substantive deliverables				
Consultation, advice and advocacy: advisory services for working groups on issues related to social development, including the Issue-Based Coalition on Inclusion and Empowerment; and for the Working Group on the Asian and Pacific Decade of Persons with Disabilities, 2023–2032.				
Databases and substantive digital materials: online databases and resource facilities on social development for regional and global access.				
D. Communication deliverables				
Outreach programmes, special events and information materials: United Nations international days, including special events on gender equality, population and disability inclusion.				
External and media relations: press releases and op-ed articles on population and development, social protection, disability, and gender equality and the empowerment of women; press interviews and media outreach for major publications and special events.				
Digital platforms and multimedia content: web pages on ageing societies, disability-inclusive development, gender equality and women’s empowerment, inequality and leaving no one behind, international migration, population and development, social inclusion, social protection and youth empowerment.				

Subprogramme 7 Statistics

Objective

- 19.115 The objective, to which this subprogramme contributes, is to improve the availability, accessibility and use of quality data and official statistics in support of sustainable development in Asia and the Pacific.

Strategy

- 19.116 To contribute to the objective, the subprogramme will:
- (a) Support statistical development in the region, regional cooperation and the formulation of regional positions to advance official statistics in line with existing commitments, including Advancing official statistics for the 2030 Agenda for Sustainable Development: a collective vision and framework for action by the Asia-Pacific statistical community, the Declaration on Navigating Policy with Data to Leave No One Behind, and the Ministerial Declaration on Building a More Resilient Future with Inclusive Civil Registration and Vital Statistics;
 - (b) Provide technical assistance, training and capacity-building support, in collaboration with the Statistical Institute for Asia and the Pacific:
 - (i) To enhance national statistical capacities to produce, disseminate and communicate statistical products and services, including but not limited to gender-sensitive and sex-disaggregated data and statistics, with an emphasis on those countries left further behind, such as the least developed countries and small island developing States;
 - (ii) To modernize national statistical systems and empower national statistical offices in the region to benefit from the data sources generated by the various components of national data ecosystems, including administrative data and big data produced and owned by other governmental agencies and the private sector;
 - (c) Provide statistical products and services, such as the *Asia and the Pacific SDG Progress Report* and the Asia-Pacific Sustainable Development Goals Gateway, that make regional data and official statistics accessible in order to assess progress in the Asia-Pacific region towards achieving the Sustainable Development Goals;
 - (d) Develop and support the production of knowledge products in the form of research papers, working papers, statistics briefs and blogs to raise awareness of and share knowledge and experience relating to official statistics;
 - (e) Promote cooperation and facilitate consensus-building among member States, regional entities and other partners working in data and statistics through regional and country-specific initiatives. This includes, among other things, advancing the Declaration on Navigating Policy with Data to Leave No One Behind, in cooperation with member States and development partners, which will constitute the foundation for enhanced statistical capacity in Asia and the Pacific;
 - (f) Expand its work to transform national statistical systems so that they are resilient to future shocks similar to the COVID-19 pandemic, including through virtual platforms, which promote cooperation and consensus-building.
- 19.117 The above-mentioned work is expected to result in:
- (a) The improved availability, accessibility and use of quality data and official statistics in support of sustainable development in Asia and the Pacific;
 - (b) The improved capacity of national statistical systems to review progress in the implementation of the 2030 Agenda.

Programme performance in 2022

Countries track progress towards the Sustainable Development Goals at the national level

- 19.118 The subprogramme supported countries in improving their capacity to track the Sustainable Development Goals through technical assistance and knowledge-sharing, thereby providing vital information for policymakers to assess progress and take corrective action where needed at the country level.
- 19.119 In 2021, the subprogramme launched the National SDG Tracker in selected countries, which has allowed countries to add data, enter national target values and track their progress. Following the launch of the Tracker, the subprogramme provided technical assistance related to national Sustainable Development Goal assessments in Brunei Darussalam, Fiji, Kyrgyzstan, Maldives, the Philippines, Samoa, Sri Lanka, Timor-Leste, Tuvalu and Uzbekistan. Six of these countries have completed the implementation of the Tracker. A side event at the eighth session of the Committee on Statistics provided an opportunity for other countries to learn from the experience of countries adopting the tool. It also provided an opportunity for all countries to exchange views on challenges and concerns regarding the measurement of national progress towards the Goals.
- 19.120 Progress towards the objective is presented in the performance measure below (see figure 19.VI).

Figure 19.VI

Performance measure: number of countries that have put in place the National SDG Tracker (cumulative)

Planned results for 2024

Result 1: Asia-Pacific national statistical systems are better equipped to review progress in the implementation of the 2030 Agenda for Sustainable Development

Programme performance in 2022 and target for 2024

- 19.121 The subprogramme's work contributed to countries across the region being able to fill data gaps relating to the Sustainable Development Goals, with 55.4 per cent of Goal indicators having sufficient data for the Asia-Pacific region, which exceeded the planned target of 54 per cent.
- 19.122 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 19.VII).

Figure 19.VII
Performance measure: percentage of Sustainable Development Goal indicators having sufficient data for the Asia-Pacific region (cumulative)

Result 2: enhanced capacity of Asia-Pacific national statistical systems to measure development progress beyond economic growth

Programme performance in 2022 and target for 2024

- 19.123 The subprogramme’s work contributed to 10 countries (Bangladesh, Cambodia, Kyrgyzstan, Lao People’s Democratic Republic, Mongolia, Nepal, Palau, Samoa, Thailand and Uzbekistan) demonstrating an enhanced capacity of national statistical systems to measure development progress beyond GDP, including on ocean accounts, ecosystem accounts, disaster-related statistics, climate change and environmental statistics, which met the planned target.
- 19.124 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.27).

Table 19.27
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
The Committee on Statistics noted with appreciation the increased efforts to compile environmental accounts in the region	13 countries demonstrated enhanced capacity of national statistical systems to measure development progress beyond GDP	10 countries (Bangladesh, Cambodia, Kyrgyzstan, Lao People’s Democratic Republic, Mongolia, Nepal, Palau, Samoa, Thailand and Uzbekistan) enhanced capacities to measure development progress beyond GDP, including on sustainability, well-being and the environment	11 countries have enhanced capacities to measure development progress beyond GDP	12 countries have enhanced capacities to measure development progress beyond GDP

Result 3: national statistical systems advance the mainstreaming of a gender perspective**Proposed programme plan for 2024**

- 19.125 Gender equality is recognized as essential to the process of sustainable development and to ensuring that no one is left behind in the achievement of the 2030 Agenda. Gender statistics and indicators are important tools for promoting gender equality. At its seventh session, the Committee on Statistics decided to “advance the mainstreaming of gender in its work”.⁴ The Statistical Institute for Asia and the Pacific held three training courses during 2022 with a specific focus on incorporating a gender perspective in statistics. These courses provided countries with the knowledge and skills for gender mainstreaming in the production of official statistics. In addition, a specific Asia-Pacific Stats Café was held to discuss the issue of women in leadership in official statistics and, following this event, an informal network of female heads of national statistical offices in Asia-Pacific countries was established.

Lessons learned and planned change

- 19.126 The lesson for the subprogramme was the need to strengthen gender mainstreaming in all aspects of programming, from the leadership of national statistical offices to training and knowledge-sharing. In applying the lesson, the subprogramme will share the experiences gained from providing technical assistance to countries to promote gender mainstreaming in statistical work. It also plans to support national statistical offices in ensuring that data on different segments of society, including women and girls, are available to enable countries to monitor and measure the impact on people in vulnerable situations. In particular, the subprogramme will focus on working with national statistical offices to strengthen inclusive data governance frameworks that promote analysis and the use of gender statistics throughout the data value chain.
- 19.127 Expected progress towards the objective is presented in the performance measure below (see table 19.28).

Table 19.28

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
The seventh session of the Committee on Statistics decided to advance the mainstreaming of gender in its work	Statistical training courses for Asia-Pacific countries integrated a gender perspective	Government statisticians from 35 countries attended training courses on how to integrate a gender perspective in statistics	One national statistical system applies gender mainstreaming in its statistical work	Two national statistical systems apply gender mainstreaming in their statistical work

Deliverables

- 19.128 Table 19.29 lists all deliverables of the subprogramme.

⁴ ESCAP/CST/2020/6.

C. Substantive deliverables				
Consultation, advice and advocacy: advisory support for subregional networks on official social, economic and environmental statistics.				
Databases and substantive digital materials: ESCAP statistical database accessible at the regional and global levels; database on statistical training materials and resources.				
D. Communication deliverables				
External and media relations: press releases and op-ed articles on improving the availability, accessibility and use of quality data and official statistics in support of sustainable development in Asia and the Pacific; press interviews for major public actions and events.				
Digital platforms and multimedia content: multimedia promotional content and web pages on investment and user engagement, skills development, quality assurance and trust in statistics, statistical business process modernization and integrated statistics and analysis.				

Subprogramme 8

Subregional activities for development

Component 1

Subregional activities for development in the Pacific

Objective

- 19.129 The objective, to which component 1 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of the Pacific, which include building resilience against natural disasters and climate change to reduce vulnerabilities and to improve socioeconomic conditions.

Strategy

- 19.130 To contribute to the objective, the component will be guided by the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Doha Programme of Action for the Least Developed Countries. In particular, it will:
- (a) Provide subregional and in-country capacity development support in the area of ocean accounts using the System of Environmental-Economic Accounting and data standards under the Global Ocean Accounts Partnership, in cooperation with subprogramme 7;
 - (b) Provide technical assistance to member States and create knowledge-exchange opportunities between member States and civil society to develop nationally appropriate indicator frameworks and promote women's economic empowerment, social protection and disability policies, in cooperation with subprogramme 6;
 - (c) Provide technical assistance and advisory services with regard to addressing the socioeconomic challenges of the subregion and devising appropriate recovery responses through national frameworks for Sustainable Development Goal financing and regional cooperation on transboundary issues, in line with the outcomes of relevant assessments;
 - (d) Organize annual meetings and facilitate dialogues on sustainable development, including a subregional forum on sustainable development, among government officials, civil society, experts and other stakeholders, and on the sharing of information on subregional implementation efforts;
 - (e) Promote coordination with and collaboration among subregional intergovernmental organizations and member States for an effective representation of subregional perspectives at regional and global consultations, and provide implementation support for the Commission's subprogrammes relating to the subregion's priorities;
 - (f) Advance the Pacific Road Map for Sustainable Development and serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance in preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives and access to regional networks and facilitating South-South and triangular cooperation;
 - (g) Strengthen coordination with Pacific Islands Forum Secretariat and other Council of Regional Organizations of the Pacific agencies in the Pacific to deliver the 2050 Strategy for the Blue Pacific Continent in line with the 2030 Agenda.
- 19.131 The above-mentioned work is expected to result in:
- (a) Improved data availability for evidence-based policymaking on climate-resilient development;

- (b) Strengthened capacity of member States to implement and monitor the 2030 Agenda while ensuring that no one is left behind and that development activities address socioeconomic conditions and reach people in vulnerable situations;
- (c) Stronger subregional cooperation to address transboundary issues;
- (d) Advanced inclusive economic development in the Pacific subregion.

Programme performance in 2022

Strengthened cooperation of Pacific small island developing States on debt sustainability

- 19.132 Existing debt and fiscal sustainability challenges facing Pacific small island developing States have been exacerbated by the COVID-19 pandemic, with increasing fiscal deficits leading to heightened debt stress for the majority of these States, which affects sovereign debt risk.
- 19.133 To address these challenges, the component contributed to delivering the Pacific Regional Debt Conference in April 2022, co-hosted by the Pacific Islands Forum Secretariat and co-convened by the Government of Fiji (Chair of the Pacific Islands Forum) and the Government of Tuvalu (Chair of the Forum Economic Ministers Meeting). Work involved preparing a technical assessment on the debt and fiscal sustainability challenges created by the COVID-19 pandemic, developing a contextualized agenda with high-level speakers from government, civil society, the private sector, development partners and academia and bringing together the perspectives of both debtors and creditors to discuss policy options for increasing fiscal space.
- 19.134 Progress towards the objective is presented in the performance measure below (see table 19.30).

Table 19.30
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Economic ministers from the subregion recognized that debt and fiscal risks posed by the impact of COVID-19 pandemic had put a strain on the fiscal resources of Pacific small island developing States	Based on the results of an impact assessment, the Pacific Islands Forum Economic Ministers Meeting requested technical support to convene a debt conference for the Pacific	The Pacific Islands Forum Economic Ministers Meeting called for the development of a subregional mechanism to engage with development partners on debt sustainability in the Pacific

Planned results for 2024

Result 1: Pacific small island developing States strengthen their capacity for socioeconomic recovery from the impacts of the COVID-19 pandemic

Programme performance in 2022 and target for 2024

- 19.135 The component’s work contributed to three member States (Marshall Islands, Samoa and Solomon Islands) developing new or improved national policies and frameworks for social protection and sustainable development financing, which met the planned target.
- 19.136 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.31).

Table 19.31
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Pacific member States strengthened their commitment to expanding and strengthening social protection systems	Two member States (Samoa and Cook Islands) developed social protection measures to address socioeconomic challenges in the context of COVID-19 recovery	Three member States (Marshall Islands, Samoa and Solomon Islands) developed new or improved national policies and frameworks for social protection and sustainable development financing	Implementation of the new and improved national policies, strategies, planning systems and frameworks by three member States	Pacific member States share good practices and lessons learned to overcome socioeconomic challenges

Result 2: Pacific small island developing States strengthen regional cooperation in addressing transboundary issues and building resilience

Programme performance in 2022 and target for 2024

- 19.137 The component’s work contributed to one member State (Tuvalu) formulating a national strategy to address climate- and disaster-related resilience and reduce vulnerabilities, which aligned with regional priorities, which met the planned target.
- 19.138 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.32).

Table 19.32
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Pacific island countries considered the development of a regional strategy to address the regional priorities on climate- and disaster-related resilience and reduce vulnerabilities	One member State (Tuvalu) formulated a national strategy to address climate- and disaster-related resilience and reduce vulnerabilities, which aligned with regional priorities	One additional country formulates a national strategy to address climate- and disaster-related resilience and reduce vulnerabilities, which aligns with regional priorities	An increased number of Pacific member States join agreed regional frameworks to address transboundary issues related to climate and disaster resilience

Result 3: advancing implementation of the 2050 Strategy for the Blue Pacific Continent for Pacific small island developing States

Proposed programme plan for 2024

- 19.139 Pacific Islands Forum leaders, in 2022, endorsed the 2050 Strategy for the Blue Pacific Continent as the overarching blueprint for advancing the interests of the Pacific region for the next three decades, articulating the region’s long-term vision, values and key thematic areas and strategic pathways. The component has been providing expert advice on economic policy development and knowledge products on building resilience to contribute to the process of strategy development.

Lessons learned and planned change

- 19.140 The lesson for the component was that it was required to strengthen implementation modalities for sustainable economic development through the plans and strategies of Council of Regional Organizations of the Pacific agencies, such as the 2050 Strategy for the Blue Pacific Continent. Furthermore, it needed to effectively align socioeconomic policy analysis with the Pacific development architecture to enhance the timely delivery of subregional and in-country support, where applicable, with other United Nations agencies, funds and programmes. In applying the lesson, the component, in partnership with the Pacific Islands Forum Secretariat, other agencies of the Council of Regional Organizations of the Pacific and the United Nations development system will assist in developing the Pacific Road Map for Economic Development. The component will further provide policy advice and technical support to develop resilient and inclusive economic and financing strategies and pathways for advancing sustainable economic prosperity in the Pacific through regional cooperation and collaboration, in cooperation with subprogrammes 1–6 and 9.
- 19.141 Expected progress towards the objective is presented in the performance measure below (see table 19.33).

Table 19.33
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Pacific Islands Forum leaders endorsed the 2050 Strategy for the Blue Pacific Continent	Pacific small island developing States develop and adopt a regional framework/plan for one of the thematic areas of the 2050 Strategy for the Blue Pacific Continent, including a regional framework on the Pacific Road Map for Economic Development	Pacific small island developing States commence implementation of the regional framework/plan as endorsed by Pacific Islands Forum leaders

Deliverables

- 19.142 Table 19.34 lists all deliverables of the component.

Table 19.34
Component 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned

C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to member States in the subregion to strengthen regional cooperation and integration for sustainable development and to build resilience against natural disasters and climate change to reduce vulnerabilities and improve socioeconomic conditions.				
D. Communication deliverables				
Outreach programmes, special events and information materials: newsletter with updates related to the Sustainable Development Goals in the Pacific.				
External and media relations: press releases and op-ed articles.				
Digital platforms and multimedia content: web pages of the component.				

Component 2 Subregional activities for development in East and North-East Asia

Objective

- 19.143 The objective, to which component 2 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of East and North-East Asia, which includes sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies.

Strategy

- 19.144 To contribute to the objective, the component will:
- (a) Facilitate multisectoral dialogues and promote knowledge-sharing among member States on sustainable development, trade, transport, energy and ICT connectivity, as well as on emerging technologies and their deployment in priority sectors, through regional and subregional platforms, including the North-East Asia Regional Power Interconnection and Cooperation Forum, the North-East Asian Subregional Programme for Environmental Cooperation and the North-East Asia Clean Air Partnership;
 - (b) Support the implementation of a road map for sustainable power connectivity and promote intergovernmental processes for sustainable connectivity, environmental sustainability and innovation in East and North-East Asia;
 - (c) Develop knowledge products and foster peer-to-peer exchanges on inclusive science, technology and innovation policies and programmes with a focus on people in vulnerable situations, including on ageing societies, disaster resilience and gender equality in the technology industry;

- (d) Identify and promote innovative approaches to facilitate cross-border connectivity, including contactless cross-border trade and transport solutions, and cross-border data exchanges between railway and customs authorities, with a particular focus on Mongolia as the only landlocked developing country in North-East Asia;
 - (e) Build the capacity of member States on the above-mentioned focus areas and promote coordination with and collaboration among subregional intergovernmental organizations and member States for an effective representation of subregional perspectives at regional and global consultations;
 - (f) Provide implementation support for the Commission's subprogrammes relating to the subregion's priorities and serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance with regard to preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives and access to regional networks and facilitating South-South and triangular cooperation.
- 19.145 These work streams will help member States make progress towards the achievement of Sustainable Development Goals 3, 5, 7, 9–11, 13–15 and 17.
- 19.146 The above-mentioned work is expected to result in:
- (a) Policy coherence and the integration of connectivity initiatives among member States, for example, with regard to trade and transport facilitation;
 - (b) Coordinated actions among stakeholders and Governments to counter common environmental challenges, including air pollution, and to promote low greenhouse gas emissions;
 - (c) Improved use of science, technology and innovation in building inclusive and resilient societies in the subregion, including resilience to natural and human-caused disasters;
 - (d) More effective formulation and implementation of policies and strategies consistent with the 2030 Agenda, including through the North-East Asia Multi-stakeholder Forums on the Sustainable Development Goals;
 - (e) Enhanced collaboration among Governments, the United Nations, subregional organizations and other stakeholders to address priority challenges in the subregion.

Programme performance in 2022

National officials engage in the prospective development of dry ports in Mongolia

- 19.147 Disruptions caused by the pandemic highlighted the potential of inland intermodal facilities such as dry ports to efficiently meet supply chain requirements and shorten the amount of time needed to get goods to markets. Port infrastructure, including dry ports, is also a key element of the economic corridor programme involving China, Mongolia and the Russian Federation. To support the implementation of the economic corridor programme, Mongolia established the Investment Research Centre. In 2019, Mongolia requested the technical assistance of ESCAP in building the Centre's capacity, including with regard to improving knowledge on dry ports.
- 19.148 The component organized workshops in 2020 and early 2021 on effective corridor management, with a focus on the development of dry ports. The component also developed a dry ports learning module covering the basic concepts and functions of dry ports, as well as guiding principles and a regional framework in line with the Intergovernmental Agreement on Dry Ports. In 2022, the component conducted a study on dry ports which provided the first-ever comprehensive technical assessment of seven dry port locations in Mongolia and recommendations for seamless connections to seaports in China and the Russian Federation. The component organized a technical consultation during which officials from China, Mongolia and the Russian Federation deliberated on the study's recommendations.

19.149 Progress towards the objective is presented in the performance measure below (see table 19.35).

Table 19.35
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Strengthened awareness of the Government of Mongolia of the basic concepts, guiding principles and regional frameworks on dry port development	During the fourth meeting of the Working Group on Dry Ports, Mongolia noted the continued need to develop its knowledge and capacity on dry ports	National officials from China, Mongolia and the Russian Federation engaged in the prospective development of dry ports based on a comprehensive technical assessment of dry ports in Mongolia

Planned results for 2024

Result 1: improved subregional power grid connectivity in East and North-East Asia

Programme performance in 2022 and target for 2024

- 19.150 The component's work contributed to three member States (China, Mongolia and Republic of Korea) expressing their support for the North-East Asia road map on power system connectivity at the North-East Asia Regional Power Interconnection and Cooperation Forum, which met the planned target.
- 19.151 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.36).

Table 19.36
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Member States strengthened their awareness and understanding of potential strategies for improving connectivity	Member States strengthened their awareness and understanding of the technical and regulatory requirements for power interconnections using renewable sources of energy	Three member States (China, Mongolia and Republic of Korea) expressed their support for the North-East Asia road map on power system connectivity at the North-East Asia Regional Power Interconnection and Cooperation Forum	One of six member States begins implementing the North-East Asia road map on power system connectivity	One additional member State begins implementing the North-East Asia road map on power system connectivity

Result 2: enhanced multilateral and multi-stakeholder cooperation for climate action in East and North-East Asia

Programme performance in 2022 and target for 2024

- 19.152 The component's work contributed to the engagement of government officials and other stakeholders, including marine protected area networks, cities and city networks, in subregional cooperation on climate action in East and North-East Asia, such as at the International Forum on

Low-Carbon Cities, which was attended by around 450 participants, including those from 10 cities and 12 city networks working on city-led climate action, which met the planned target.

19.153 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.37).

Table 19.37
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Member States adopted the North-East Asian Subregional Programme for Environmental Cooperation Strategic Plan 2021–2025 for subregional collaboration containing five priority areas: air pollution; biodiversity and nature conservation; marine protected areas; low carbon cities; and desertification and land degradation	The first International Forum on Low-Carbon Cities convened governments, international organizations, regional city networks, academia and research institutions to advance multi-stakeholder cooperation on climate action	Government officials and other stakeholders engaged in subregional cooperation on climate action in East and North-East Asia	Midterm evaluation of the North-East Asian Subregional Programme for Environmental Cooperation Strategic Plan 2021–2025 demonstrates an increase in subregional collaboration on environmental protection and climate action	Member States increase joint activities on environmental protection and climate action in the subregion

Result 3: strengthened collaboration for monitoring and addressing air pollution in East and North-East Asia

Proposed programme plan for 2024

19.154 As deteriorating air quality has become a pressing concern in North-East Asia, countries have been making efforts to reduce air pollution. In 2018, for example, member States launched the North-East Asia Clean Air Partnership to ensure protection of the environment and human health from air pollution. The Partnership serves as a voluntary framework for addressing air pollution, covering multiple pollutants. The component has been supporting member States in building their capacity to monitor and model air pollutants and facilitating dialogues for subregional cooperation in addressing air pollution.

Lessons learned and planned change

19.155 The lesson for the component was that there were opportunities to further leverage its convening power to build trust among members to identify the next steps in advancing collaboration to address air pollution in North-East Asia. In applying the lesson, the component will take a step-by-step approach, first consulting with member States on their priorities and then fostering a common understanding with the aim of implementing joint activities on air pollution and in support of the Regional Action Programme on Air Pollution. It plans to utilize national focal points of the North-East Asian Subregional Programme for Environmental Cooperation and the Science and Policy Committee of the North-East Asia Clean Air Partnership in formulating recommendations on addressing air pollution in North-East Asia to the Senior Officials Meeting for its decision-making.

19.156 Expected progress towards the objective is presented in the performance measure below (see table 19.38).

Table 19.38
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Member States adopted the workplan for 2021–2025 of the North-East Asia Clean Air Partnership to enhance collaboration on air pollution in North-East Asia	The Science and Policy Committee of the North-East Asia Clean Air Partnership recommended joint activities under the workplan	Member States approved the plan to publish a policy analysis report on air pollution in 2023 and organize two policy dialogues by 2024	Midterm evaluation of the workplan for 2021–2025 reflects the strengthened collaboration of member States in addressing air pollution	Two joint activities of member States on addressing air pollution are approved or initiated

Deliverables

19.157 Table 19.39 lists all deliverables of the component.

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: expert advice to member States of the subregion on sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies; side events at the Commission session.

D. Communication deliverables

Outreach programmes, special events and information materials: newsletters, infographics and side activities on major events on sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies.

External and media relations: press releases and op-ed articles on sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies; press interviews for major publications and events.

Digital platforms and multimedia content: web page of the North-East Asian Subregional Programme for Environmental Cooperation; web pages on environmental sustainability, strengthening intraregional connectivity and innovation for resilient and inclusive societies.

Component 3 Subregional activities for development in North and Central Asia

Objective

- 19.158 The objective, to which component 3 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of North and Central Asia, including sustainable connectivity, economic transformation, and social inclusion and resilience, and through follow-up and review of the 2030 Agenda.

Strategy

- 19.159 To contribute to the objective, the component will:
- (a) Provide secretariat support to and coordinate the seven thematic working groups of the United Nations Special Programme for the Economies of Central Asia to ensure that priorities emanating from the Governing Council and the Economic Forum of the Special Programme regarding trade facilitation, innovation and technology, transport, energy and digital connectivity, innovative financing and investment tools and environmental sustainability are incorporated into their workplans, and that discussions held in the working groups contribute to the deliberations of the Governing Council and the Economic Forum;
 - (b) Coordinate high-level dialogues and working meetings to support the implementation of the road map for the accelerated implementation of the Vienna Programme of Action in the remaining five years;
 - (c) Support member States in the implementation of the 2030 Agenda by providing policy advice and technical assistance on subregional connectivity, gender equality and women’s economic empowerment, and climate change mitigation and adaptation strategies, helping member States make progress towards achieving Goals 5, 10 and 13;
 - (d) Organize annual meetings and facilitate dialogues on sustainable development, including a subregional forum on sustainable development, among government officials, civil society, experts and other stakeholders, and on the exchange of information on subregional implementation efforts, helping member States review progress towards achieving the Sustainable Development Goals, including Goal 17;
 - (e) Support voluntary national review processes at the request of member States, including the voluntary national review twinning programme, and build human and institutional capacity for sustainable and resilient development, in line with the 2030 Agenda;

- (f) Further support cooperation with subregional intergovernmental organizations and institutions such as the Shanghai Cooperation Organization, the Economic Cooperation Organization, the Eurasian Economic Commission and the Eurasian Development Bank for an effective representation of subregional perspectives at regional and global consultations;
- (g) Provide implementation support for the Commission's subprogrammes relating to the subregion's priorities and serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance in preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives and access to regional networks and facilitating South-South and triangular cooperation.

19.160 The above-mentioned work is expected to result in:

- (a) Enhanced application by member States of, evidence-based solutions for, and strengthened subregional cooperation on, programmes to improve trade and transport facilitation as well as energy and digital connectivity;
- (b) The adoption of policy options for economic transformation in the subregion;
- (c) Increased knowledge-sharing in cooperation with intergovernmental organizations and bodies;
- (d) Increased skills and knowledge on digital connectivity and digital transformation in the subregion as a driver to achieve the 2030 Agenda.

Programme performance in 2022

Enhanced structural economic transformation through policy advice and dialogue

- 19.161 The landlocked countries of Central Asia, located between the three large consumer markets of Europe, South Asia and China, have undergone significant economic transformation as a result of the adoption of market-oriented policies over the years. Nevertheless, economic growth in the subregion has slowed in recent years and widening inequalities were observed due to the COVID-19 pandemic and increasing geopolitical tension. Special attention is needed to support those economies towards sustainable and equitable development, including through continued structural economic transformation and greater connectivity, so that countries are better able to gain access to neighbouring consumer markets.
- 19.162 To support member States in implementing structural economic transformation strategies in their national plans, the component organized a North and Central Asia multi-stakeholder forum to review progress towards the Sustainable Development Goals, including Goals 7, 9 and 11. Member States recognized the need to leverage digitization and innovation as a means of advancing economic and social transformation and the need to strengthen policy measures to build an inclusive and resilient post-pandemic society. The component facilitated exchanges among experts and member States on the implementation of policy recommendations for environmentally friendly economic development through a dedicated expert group meeting and the 2022 Economic Forum of the United Nations Special Programme for the Economies of Central Asia.
- 19.163 Progress towards the objective is presented in the performance measure below (see table 19.40).

Table 19.40
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Member States recognized, at the 2020 Economic Forum of the United Nations Special Programme for the Economies of Central Asia, that a more integrated approach to structural economic transformation was needed for efficient socioeconomic development with a view to achieving the Goals	Member States in the subregion recognized structural economic transformation as one of the key drivers for accelerating progress towards the achievement of the Sustainable Development Goals	Two member States (Kazakhstan and Uzbekistan) implemented structural transformation policies as part of their strategies to recover from the COVID-19 pandemic

Planned results for 2024

Result 1: strengthened sustainable subregional connectivity

Programme performance in 2022 and target for 2024

- 19.164 The component’s work contributed to two member States initiating measures to enhance subregional connectivity, which led to the consideration by member States in the subregion of options relating to the operating modalities of the digital solutions centre in Kazakhstan, and the development of a plan by Uzbekistan on the thematic scope of the regional centre for the development of transport and communication interconnection, which exceeded the planned target.
- 19.165 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.41).

Table 19.41
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Two member States (Kazakhstan and Uzbekistan) initiated measures to enhance subregional connectivity	Options relating to the operating modalities of the digital solutions centre in Kazakhstan by were considered by member States Uzbekistan developed a plan on the thematic scope of the regional centre for the development of transport and communication interconnection, with the support of ESCAP	Policymakers from two member States enhance their skills and knowledge to advance digital technologies to further develop the sustainability of connectivity	New and/or revised policies and initiatives on connectivity in the subregion are adopted

Result 2: enhanced subregional cooperation on the use of new technologies for improving railway operational performance

Programme performance in 2022 and target for 2024

- 19.166 The component’s work contributed to 92 per cent of policymakers from Azerbaijan and Uzbekistan reporting an increase in awareness of new technologies to increase the efficiency of rail transport, which met the planned target.
- 19.167 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.42).

Table 19.42
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Border crossings were facilitated by paper-based documentation and customs clearance software with low interoperability	Available data on border crossings indicated 39 per cent of transit time in trans-Eurasian transportation was related to customs clearance and documentation formalities	92 per cent of policymakers from Uzbekistan and Azerbaijan reported an increase in awareness of new technologies to increase the efficiency of rail transport	Policymakers adopt policy recommendations on strengthening regional cooperation for improving railway operational performance	Policymakers review and align railway operation standards for the further implementation of digital transformation for resilient and competitive railway operation

Result 3: landlocked developing countries advance the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the new programme of action beyond 2024

Proposed programme plan for 2024

- 19.168 The comprehensive High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024, held in 2019, revealed that accelerated action by landlocked developing countries was required to achieve the Vienna Programme of Action targets. At the request of the Group of Landlocked Developing Countries, a road map for the accelerated implementation of the Programme of Action was developed. The road map identified transit, trade and transport facilitation, energy and ICT, and structural economic transformation as the priority areas that required urgent focus.
- 19.169 In the subregion, seven out of nine member States are landlocked developing countries. The component has been providing support to these countries in the above priority areas. For instance, the component facilitated the participation of policymakers in subregional expert group meetings to discuss the alignment of member States’ national development plans with the road map and identify development gaps in each priority area.

Lessons learned and planned change

- 19.170 The lesson for the component was that dedicated technical support and advice to the countries of the subregion could help to further advance the implementation of the road map and the 2030 Agenda. In applying the lesson, the component will offer additional peer-learning opportunities and coordinate the interventions of ESCAP subprogrammes with the aim of identifying practical advice and complementary actions for implementing the Vienna Programme of Action and achieving its targets. The component will do so by working closely with the resident coordinator offices in the

subregion and by engaging United Nations agencies and development organizations. Concerning its analytical contribution, the component plans to work in tandem with the International Think Tank for Landlocked Developing Countries. It will also provide technical support to the landlocked developing countries of the subregion for the Euro-Asian regional review leading to the global review of the Vienna Programme of Action in 2024.

19.171 Expected progress towards the objective is presented in the performance measure below (see table 19.43).

Table 19.43
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Landlocked developing countries in the subregion agreed to strengthen collaboration in developing transport and transit corridors, facilitating energy transit and promoting digital inclusion	One initiative or measure is implemented through the joint efforts of landlocked developing countries in the subregion, in line with the priority areas recommended in the road map	Four countries in the subregion report progress towards reaching the targets of the Vienna Programme of Action

Deliverables

19.172 Table 19.44 lists all deliverables of the component.

Table 19.44
Component 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the Commission	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	12	12	12	12
Meetings of:				
2. The Governing Council of the United Nations Special Programme for the Economies of Central Asia	1	1	1	1
3. The Economic Forum of the United Nations Special Programme for the Economies of Central Asia	3	4	3	3
4. Expert groups on policy and programme options to address emerging economic and social development issues in North and Central Asia	4	3	4	4
5. The subregional forum on the Sustainable Development Goals in North and Central Asia	4	4	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	–
6. On regional cooperation and integration for the landlocked and transit developing countries	1	1	1	–

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
Technical materials (number of materials)	1	1	1	1
7. On regional cooperation and integration for the landlocked and transit developing countries	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: advocacy with member States of the United Nations Special Programme for the Economies of Central Asia on regional and subregional priority issues; side events for member States and regional organizations at the annual session of the Commission.

D. Communication deliverables

External and media relations: press releases and op-ed articles on sustainable connectivity, economic transformation, social inclusion and resilience, and follow-up and review of the 2030 Agenda; press interviews for major events.

Digital platforms and multimedia content: web pages on sustainable connectivity, economic transformation, social inclusion and resilience, the United Nations Special Programme for the Economies of Central Asia and the review of the 2030 Agenda.

Component 4 Subregional activities for development in South and South-West Asia

Objective

- 19.173 The objective, to which component 4 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of South and South-West Asia, including sustainable connectivity, women’s economic empowerment and the sustainable graduation of the least developed countries.

Strategy

- 19.174 To contribute to the objective, the component will:
- (a) Prepare analytical papers and provide technical assistance on sustainable transport, energy, ICT and trade and investment facilitation to advance transboundary connectivity among countries of the subregion, including the landlocked developing countries, in alignment with the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the road map for its accelerated implementation, and to prepare graduating least developed countries for post-graduation challenges;
 - (b) Provide tailored analytical support, policy advice and technical assistance to member States and other stakeholders, upon request, including on transboundary connectivity in transport, energy, ICT and supply chains, women’s economic empowerment and disaster risk reduction to ensure that development challenges can be met in a coherent manner;
 - (c) Convene subregional consultations on the Sustainable Development Goals, including through the South Asia Network on the Sustainable Development Goals, to facilitate the sharing of good practices and the articulation of subregional perspectives that contribute to the relevant ESCAP knowledge products and forums, such as the Asia-Pacific Forum on Sustainable Development and the high-level political forum on sustainable development;
 - (d) Promote coordination with and collaboration among subregional intergovernmental organizations and member States for an effective representation of subregional perspectives at regional and global consultations;
 - (e) Serve as the focal point for the Commission’s engagement with the resident coordinator system and United Nations country teams, including through substantive assistance in preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable

- development, and assist country-level programming by providing subregional perspectives, access to regional networks and facilitating South-South and triangular cooperation;
- (f) Forge partnerships with other United Nations entities, multilateral and bilateral development agencies, and civil society organizations in common areas of work, for enhanced impact in supporting member States towards their achievement of the Goals;
 - (g) Deepen linkages and synergies with other ESCAP subprogrammes and components in common areas of work, for enhanced harmonization and coherence in the delivery of assistance to member States.
- 19.175 The above-mentioned work will help member States make progress towards achieving Goals 1, 5, 7–10, 12, 13 and 17.
- 19.176 The above-mentioned work is expected to result in:
- (a) The smooth and sustainable transition of countries graduating from least developed country status in South Asia;
 - (b) Enhanced connectivity in the subregion, especially for landlocked developing countries and least developed countries;
 - (c) Strengthened capacity of member States, especially least developed countries, landlocked developing countries and small island developing States, to reduce the risk of disasters, including those induced by climate change;
 - (d) The exchange of experiences and best practices between governments, civil society, academia/think tanks, the private sector, United Nations agencies, subregional organizations and other international organizations and financial institutions to bridge knowledge gaps for addressing the Sustainable Development Goals.

Programme performance in 2022

Increased participation of women entrepreneurs in local, regional and global supply chains in South and South-West Asia

- 19.177 To bolster the skills and knowledge of women entrepreneurs to utilize e-commerce to expand their businesses, the component introduced a training initiative on e-commerce and digital marketing targeted at women entrepreneurs of micro-, small and medium-sized enterprises in South and South-West Asia in 2019. The component developed manuals, training modules and an e-commerce training portal, and integrated hands-on practical sessions with real-time support and peer exchange through the creation and facilitation of networking groups on social messaging applications. Training and networking also focused on creating opportunities for integration into local, regional and global supply chains.
- 19.178 In 2022, due to the success of the initiative, the component was requested by the Governments of Bhutan and Sri Lanka and the State government of Karnataka, India, to conduct such training for their women entrepreneurs and officials on a State-sponsored basis. In addition, the Commonwealth partnered with the component to expand the training initiative interregionally to include women entrepreneurs in other Asia-Pacific subregions and the African continent.
- 19.179 Progress towards the objective is presented in the performance measure below (see figure 19.VIII).

Figure 19.VIII
Performance measure: number of women entrepreneurs in South and South-West Asia benefiting from support to engage in e-commerce and digital marketing and participate in local, regional and global supply chains

Planned results for 2024

Result 1: think tanks in South Asian least developed countries improve their capacity for evidence-based policy analysis to support policymaking to accelerate the achievement of the Sustainable Development Goals

Programme performance in 2022 and target for 2024

- 19.180 The component’s work contributed to a think tank in Afghanistan and a think tank in Bhutan providing inputs to, and holding informed debates on, strategies for accelerating the achievement of the Goals at meetings of the South Asia Network on the Sustainable Development Goals, and a think tank engaging policymakers from the Government of Bhutan at a policy dialogue on supporting the development and implementation of the country’s thirteenth five-year plan, which met the planned target.
- 19.181 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.45).

Table 19.45
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Engagement of emerging think tanks in Afghanistan and Bhutan with established counterparts in other South Asian countries in addressing the policy challenges arising from the COVID-19 pandemic to accelerating the achievement of the Goals	A think tank in Afghanistan advanced the use of analytical tools in research and analysis to gauge progress towards the achievement of the Sustainable Development Goals	<p>A think tank in Afghanistan and a think tank in Bhutan provided inputs to, and held debates on, strategies for accelerating the achievement of the Sustainable Development Goals and sustainable recovery from the COVID-19 pandemic at meetings of the South Asia Network on the Sustainable Development Goals</p> <p>A think tank engaged policymakers from the Government of Bhutan at a policy dialogue on supporting the development and implementation of that country’s thirteenth five-year plan</p>	The think tank in Bhutan provides policy inputs in developing strategies for its achievement of the Sustainable Development Goals	Enhanced peer learning on developing strategies towards the achievement of the Sustainable Development Goals is enabled by think tanks in Bhutan sharing experiences and expertise with other think tanks in South and South-West Asia

Result 2: increased integration of disaster risk-related analysis in national and local planning in countries of South and South-West Asia

Programme performance in 2022 and target for 2024

- 19.182 The component’s work contributed to the identification of existing gaps in disaster risk management, including with regard to data availability, by disaster management authorities in Maldives through the use of customized techniques, database development and data collection, which met the planned target.
- 19.183 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.46).

Table 19.46
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Evidence-based approaches to disaster risk reduction and climate change adaptation are not yet institutionalized and operationalized in a practical manner	Disaster management authorities in Maldives identified existing gaps in disaster risk management through the use of customized planning tools, database development and data collection	Policymakers from two countries in South Asia use customized planning tools, techniques and guidelines to facilitate the undertaking of disaster risk-related analyses for national and local planning purposes	Enhanced peer learning on improving disaster risk resilience is enabled by two countries in South Asia sharing their expertise in undertaking disaster risk-related analyses for planning purposes with other countries in South and South-West Asia

Result 3: improved flow of goods and services at border crossing points in Eastern South Asia

Proposed programme plan for 2024

19.184 Eastern South Asia contains extensive land linkages between Bangladesh, Bhutan, India and Nepal, with more than 5,437 km of shared border, which offer the potential for expanded economic linkages and exchanges at border crossing points and the improvement of livelihoods for people residing in those areas. However, the flow of goods and services at border crossing points can be hampered due to limited transboundary connectivity in transport, energy, ICT and supply chains, which stems from infrastructural, regulatory, procedural and other bottlenecks. The component conducted a scoping mission to Shillong, India, in 2022 to ascertain the nature and extent of barriers to connectivity in that area.

Lessons learned and planned change

19.185 The lesson for the component was that it could further enhance its engagement with all relevant stakeholders concerning the flow of goods and services at border crossing points, including national and local State authorities; civil society, including community organizations; businesses; and development partners, as well as strengthen the assessment of existing policies, regulations, practices and norms that have an impact on the flow of goods and services at border crossing points and the opportunities and challenges related to enhancing transboundary connectivity in those areas. In applying the lesson, the component will undertake a comprehensive mapping of stakeholders, the legal framework and the socioeconomic environment and conditions of selected border crossing points in Eastern South Asia and conduct a detailed analysis of the enablers of and barriers to promoting transboundary connectivity at these points. Thereafter, the component will convene stakeholders to jointly explore avenues for improving transboundary connectivity and the flow of goods and services at these border crossing points and forge a consensus, including the prioritization of specific action points, on the way forward.

19.186 Expected progress towards the objective is presented in the performance measure below (see table 19.47).

Table 19.47
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	The flow of goods and services at border crossing points in Eastern South Asia is hampered due to limited transboundary connectivity in transport, energy, ICT and supply chains in those localities	Two member States express interest in working jointly to improve the transboundary flow of goods and services at border crossing points in Eastern South Asia	Stakeholders of at least one border crossing point in Eastern South Asia reach a shared understanding of the bottlenecks to be mitigated for enhanced transboundary connectivity and the flow of goods and services

Deliverables

19.187 Table 19.48 lists all deliverables of the component.

 Table 19.48
Component 4: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the Commission	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	6	6	6	4
Meetings of:				
2. Expert groups on policy and programme options to address emerging sustainable development issues in South and South-West Asia	2	1	2	–
3. The South and South-West Asia Forum on the Sustainable Development Goals	4	5	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	3	2	1
4. On institutional programmatic priorities of ESCAP in South and South-West Asia	1	3	2	1
Seminars, workshops and training events (number of days)	–	–	2	2
5. On thematic areas related to sustainable development	–	–	2	2
Technical materials (number of materials)	5	5	5	5
6. Development paper series on economic and social development	5	5	5	5
C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to member States of the subregion in implementing the 2030 Agenda and promoting regional economic cooperation and integration.				
D. Communication deliverables				
Outreach programmes, special events and information materials: sessions at the South Asia Economic Summit; the sustainable development conference organized by the Sustainable Development Policy Institute, Pakistan; other subregional events; a newsletter related to the Sustainable Development Goals in South Asia.				
External and media relations: press releases and op-ed articles on sustainable connectivity, women's economic empowerment and the sustainable graduation of the least developed countries; press interviews for major events.				
Digital platforms and multimedia content: web portal of the South Asia Network on the Sustainable Development Goals; web pages on regional cooperation for accelerating progress towards achieving the Sustainable Development Goals, sustainable connectivity, women's economic empowerment and the sustainable graduation of the least developed countries.				

Component 5

Subregional activities for development in South-East Asia

Objective

- 19.188 The objective, to which component 5 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of South-East Asia, including sustainable connectivity, inclusive and equitable societies, the efficient management of natural resources and resilient development.

Strategy

- 19.189 To contribute to the objective, the component will:
- (a) Coordinate high-level dialogues and working meetings to support the implementation of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025), as well as the complementarities road map for the period 2020–2025;
 - (b) Create knowledge products, in collaboration with relevant subprogrammes, on regional and subregional perspectives on global issues for member States in South-East Asia;
 - (c) Further expand cooperation with ASEAN through increased engagement with the ASEAN secretariat and relevant sectoral bodies and committees, as appropriate, and on initiatives to achieve the Sustainable Development Goals and subregional goals, including through support for the implementation of the ASEAN Comprehensive Recovery Framework;
 - (d) Promote coordination with and collaboration among subregional intergovernmental organizations and member States for an effective representation of subregional perspectives at regional and global consultations;
 - (e) Further develop partnerships and cooperation with civil society organizations in support of people in vulnerable situations to enhance synergy and effective participation at the subregional Sustainable Development Goals forum and raise awareness of the Goals among youth through a collaboration with the Association of Pacific Rim Universities in mutual areas of interest;
 - (f) Provide implementation support for the Commission's subprogrammes relating to the subregion's priorities, serve as the focal point for the Commission's engagement with the resident coordinator system and United Nations country teams, including through substantive assistance in preparing common country assessments and United Nations Sustainable Development Cooperation Frameworks, in particular with regard to the transboundary dimensions of sustainable development, and assist country-level programming by providing subregional perspectives and access to regional networks and facilitating South-South and triangular cooperation;
 - (g) Support coordination among the various agencies and partners, with a focus on sustainable investment and finance, inclusive and equitable societies, the efficient management of natural resources and resilient development, while ensuring synergy in the implementation of the processes.
- 19.190 The above-mentioned work will help support member States in their progress towards the achievement of Goals 3, 5, 9, 10, 13 and 17.
- 19.191 The above-mentioned work is expected to result in:
- (a) Enhanced sustainable FDI to support the development of sustainable investment and financing in the subregion;
 - (b) Fairer and more equitable access to social protection, especially for those most vulnerable, such as women, youth, older persons and persons with disabilities, and strengthened disability statistics, ageing and disability policies and social protection floor costing;
 - (c) The improved coordination and coherence of technical assistance provided under the ASEAN Comprehensive Recovery Framework in the subregion.

Programme performance in 2022

Strengthened cooperation and relations between the Association of Southeast Asian Nations and the Economic and Social Commission for Asia and the Pacific

- 19.192 To implement the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between ASEAN and the United Nations (2021–2025), which guides cooperation efforts, the component organized a session on sustainable infrastructure investment as part of the fifth South-East Asia Multi-stakeholder Forum on the Implementation of the Sustainable Development Goals, and considered how the Regional Comprehensive Economic Partnership Agreement could help attract and promote sustainable private sector investment in those areas through public-private partnerships. It also held a high-level dialogue on accelerating the implementation of the complementarities initiative in enhancing resilience and tackling climate change and organized a policy dialogue with the ASEAN Centre for Sustainable Development Studies and Dialogue to discuss collaborative policy actions to mitigate climate-related disasters and promote health resilience in the subregion, in line with the Sendai Framework for Disaster Risk Reduction 2015–2030.
- 19.193 Further advancing the implementation of the Plan of Action, the component collaborated with the Centre for Indonesia-Malaysia-Thailand Growth Triangle Subregional Cooperation to advance sustainable urbanization in Indonesia, Malaysia and Thailand. For the sixth South-East Asia Multi-stakeholder Forum on the Implementation of the Sustainable Development Goals, the component worked closely with the Centre, which, jointly with the three countries, organized a session on urbanization and sustainable development.
- 19.194 Progress towards the objective is presented in the performance measure below (see table 19.49).

Table 19.49

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Adoption of the ASEAN-United Nations Plan of Action for 2021–2025	Member States exchanged information and best practices on initiatives to promote sustainable investment at the ASEAN Forum on Sustainable Investment and the fifth South-East Asia Multi-stakeholder Forum on the Implementation of the Sustainable Development Goals, in line with the ASEAN-United Nations Plan of Action for 2021–2025	ASEAN member States identified pathways for collaborative policy actions for multi-hazard early warning systems that support climate and health resilience, implementing one initiative of the joint ASEAN-United Nations Plan of Action for 2021–2025

Planned results for 2024

Result 1: women entrepreneurs in the subregion empowered to overcome the socioeconomic impact of the COVID-19 pandemic

Programme performance in 2022 and target for 2024

- 19.195 The component's work contributed to member States in the subregion endorsing a toolkit designed to facilitate the design of policies and actions plans for strengthening women's entrepreneurship in national micro-, small and medium-sized enterprises, which did not meet the planned target of two member States in the subregion implementing projects with a focus on enhancing the financial access and inclusion of women entrepreneurs. The target was not met due to delays experienced in

collecting feedback from all stakeholders, which was needed to maintain a participatory approach to capturing the needs and the buy-in of all member States in the subregion.

19.196 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.50).

**Table 19.50
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Member States expressed interest in initiatives to address barriers faced by women entrepreneurs	Two member States (Cambodia and Viet Nam) established institutional mechanisms for collaboration across ministries and sectors to increase access to financing and business support services for women entrepreneurs	Member States in the subregion endorsed a toolkit designed to facilitate the design of policies and action plans for strengthening women’s entrepreneurship in national micro-, small and medium-sized enterprises	Two additional member States from the subregion implement projects with a focus on enhancing the financial access and inclusion of women entrepreneurs	Two member States establish a baseline using the policy toolkit to monitor the longitudinal progress of initiatives targeted at advancing women-owned and women-led micro-, small and medium-sized enterprises

Result 2: increased use of innovative financing policies and instruments to achieve the Sustainable Development Goals

Programme performance in 2022 and target for 2024

19.197 The component’s work contributed to building consensus among member States to use Sustainable Development Goal-linked bonds as an instrument to catalyse energy investment opportunities to address post-COVID-19 financing needs and achieve the 2030 Agenda, which met the planned target.

19.198 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.51).

**Table 19.51
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Member States expressed interest in discussing sustainable bonds in the ASEAN region and with other subregions	Member States agreed to further study the use of Sustainable Development Goal-linked bonds as an instrument to address post-COVID-19 financing needs and achieve the 2030 Agenda	Consensus is achieved among member States on using Sustainable Development Goal-linked bonds as an instrument to catalyse energy investment opportunities to address post-COVID-19 financing needs and achieve the 2030 Agenda	Member States implement initiatives that facilitate innovative financing mechanisms	Member States adopt guidelines on sustainable environmental finance that will facilitate innovative financing mechanisms towards climate mitigation and adaptation

Result 3: improved sustainable foreign direct investment strategies in the subregion

Proposed programme plan for 2024

- 19.199 Since the onset of the pandemic, there have been reductions in FDI inflows in the subregion and globally, with such flows continuing to decline steadily in 2022.
- 19.200 The component, in collaboration with subprogramme 2, organized a round-table discussion to explore ways to maximize the potential of intraregional FDI, which historically has been the second-highest source of FDI in the subregion. Following this round-table discussion, member States in the subregion expressed an interest in promoting intraregional FDI as a means for inclusive recovery and development.

Lessons learned and planned change

- 19.201 The lesson for the component was that it needed to change the modality of its support to member States from providing platforms for a conceptual agreement to delivering technical support for the development of an intraregional investment strategy and concrete national strategies for the promotion of FDI that channel appropriate investments to suit country-specific situations. In applying the lesson, the component, in collaboration with subprogramme 2, will work on delivering sector-specific capacity-building activities to promote sustainable FDI and devising country-specific FDI strategies in line with the strategic priorities of the United Nations Sustainable Development Cooperation Frameworks of the countries in the subregion.
- 19.202 Expected progress towards the objective is presented in the performance measure below (see table 19.52).

Table 19.52
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	The ASEAN Coordinating Committee on Investment, the ASEAN secretariat and member States organized a session on sustainable investment at the fifth South-East Asia Multi-stakeholder Forum on the Implementation of the Sustainable Development Goals to kickstart the discussion on subregional sustainable FDI	Member States in the subregion agreed to promote intraregional sustainable FDI as a means for inclusive recovery and development	The capacity of member States to promote sustainable FDI in the subregion is enhanced	One member State in the subregion develops a national strategy to attract sustainable FDI

Deliverables

- 19.203 Table 19.53 lists all deliverables of the component.

Table 19.53

Component 5: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the Commission	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	7	5	9	9
Meetings of:				
2. Expert groups on policy and programme options to address emerging sustainable development issues in South-East Asia	–	–	2	2
3. The South-East Asia Multi-Stakeholder Forum on the Implementation of the Sustainable Development Goals	4	4	4	4
4. ASEAN member States, the ASEAN secretariat and the ASEAN sectoral working groups on sustainable development in South-East Asia	3	1	3	3
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	–	1	1
5. On institutional programmatic priorities of ESCAP in South-East Asia	1	–	1	1
Seminars, workshops and training events (number of days)	1	1	2	2
6. On the implementation of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025)	1	1	1	1
7. On the implementation of sustainable FDI indicators	–	–	1	1
Technical materials (number of materials)	1	1	1	1
8. On the implementation of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025)	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultations and advisory support to the subregional member States on sustainable connectivity, inclusive and equitable societies, the efficient management of natural resources and resilient development; advocacy with member States on the subregional findings of the Commission’s publications; and side events at the Commission session.				
D. Communication deliverables				
Outreach programmes, special events and information materials: subregional launch of ESCAP publications; side events at the Asia-Pacific Forum on Sustainable Development.				
External and media relations: press releases and op-ed articles on sustainable connectivity, inclusive and equitable societies, the efficient management of natural resources and resilient development; press interviews for major publications and events.				
Digital platforms and multimedia content: web pages on climate action, environment, social development, and trade and financial integration.				

Subprogramme 9

Energy

Objective

- 19.204 The objective, to which this subprogramme contributes, is to ensure access to affordable, reliable, sustainable and modern energy for all in Asia and the Pacific by enhancing member States’ capacity for energy access, renewable energy, energy efficiency and energy connectivity.

Strategy

- 19.205 To contribute to the objective, the subprogramme will enhance the evidence base for the achievement of Sustainable Development Goal 7 and Goals with interlinkages to it, and support member States in progressing towards Goal 7. Specifically, the subprogramme will:
- (a) Facilitate intergovernmental dialogue and develop and disseminate evidence-based policy recommendations and guidance related to expanding access to modern energy, growing the share of renewable sources of energy in the energy mix, adopting energy efficient technologies and approaches, and increasing energy connectivity;
 - (b) Provide capacity-building activities focused on facilitating planning and policy development for achieving Goal 7, based on local contexts and in alignment with national priorities, in cooperation with resident coordinator offices to leverage institutional resources and ensure the efficiency of work programme implementation;
 - (c) Produce and contribute to the development of knowledge products focused on broadening understanding of the benefits and implications of energy connectivity for energy security and resilience, affordability and sustainability;
 - (d) Provide access to up-to-date data, policy information and energy infrastructure maps through the Asia Pacific Energy Portal and other knowledge platforms;
 - (e) Provide support through the development and implementation of road maps and plans (Goal 7 road maps, the regional road map on power system connectivity and national cooling action plans) and by promoting the use of modelling and policy planning tools and methodologies;
 - (f) Focus capacity-building efforts on the acceleration of progress towards inclusive access to clean cooking fuels and technologies, on energy connectivity in Pacific Island states and on power system connectivity, including in countries in special situations;
 - (g) Mainstream a gender perspective by facilitating dialogue and producing knowledge products that include the energy system's impacts on women and highlight their contribution to a sustainable and just energy transition, working jointly with subprogramme 6.
- 19.206 The above-mentioned work is expected to result in:
- (a) The adoption of evidence-based policies, strategies and investment plans to increase energy access, energy efficiency and the use of renewable sources of energy at the national and subnational levels;
 - (b) Improved capacity to implement policies for the transition to renewable sources of energy, environmentally sound energy technologies and national net-zero emissions goals, targets and ambitions;
 - (c) Increased capacity of policymakers and regulators to plan and implement power system connectivity initiatives that enable the scaling up of renewable energies;
 - (d) Better access by member States to clean energy, energy research and technology;
 - (e) Greater recognition among policymakers of a gender perspective in the sustainable energy transition, including the potential for women to accelerate progress.

Programme performance in 2022

Adoption of national policy and planning frameworks for improving the energy efficiency of cooling technologies and approaches

- 19.207 The rising demand for cooling and the associated increase in energy demand and greenhouse gas emissions is placing a strain on power systems and hindering progress towards the achievement of climate goals. Ensuring the transition to efficient, climate-friendly cooling for all is particularly beneficial for climate action and sustainable development.

19.208 The subprogramme, in collaboration with UNEP under the framework of the Cool Coalition, supported the development of a national cooling action plan methodology – a tool for countries to establish a framework to catalyse integrated and comprehensive action to improve the energy efficiency of cooling technologies and approaches, and to mitigate the sector’s greenhouse gas emissions. The development of this methodology drew on experiences from early national efforts, such as in China and India, and provides a comprehensive assessment and planning approach across cooling subsectors. The holistic methodology was released in 2021 and piloted in Cambodia, where the subprogramme reviewed and analysed the cooling sector and its subsectors, and consultations with national stakeholders contributed to the findings. It also modelled current and future demand for cooling to develop policy recommendations that were compiled into a comprehensive national cooling action plan, which was adopted in 2022, the first such plan in South-East Asia. Building on this experience, the subprogramme extended its support to Indonesia and Viet Nam to develop national cooling action plans.

19.209 Progress towards the objective is presented in the performance measure below (see figure 19.IX).

Figure 19.IX

Performance measure: number of Asia-Pacific countries that have released national cooling action plans (cumulative)

Planned results for 2024

Result 1: localization of Sustainable Development Goal 7: evidence-based energy efficiency and renewable strategies for urban areas

Programme performance in 2022 and target for 2024

19.210 The subprogramme’s work contributed to the development of two additional city-level road maps for the City of Borongan and the City of Ormoc in the Philippines, for a cumulative total of eight localized road maps on Sustainable Development Goal 7, which did not meet the planned target of 10 such road maps. The target was not met due to unforeseen delays in mobilizing complementary resources to finalize two additional road maps by year end.

19.211 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 19.X).

Figure 19.X

Performance measure: number of localized road maps on Sustainable Development Goal 7 taken up at the city level in the Asia-Pacific region (cumulative) and number of cities where officials have been trained in the Goal 7 planning strategy (cumulative)

Result 2: evidence-based strategies for increasing sustainable power system connectivity

Programme performance in 2022 and target for 2024

- 19.212 The subprogramme’s work contributed to ESCAP member States providing updates on connectivity activities on a voluntary basis at meetings of the Expert Working Group on Energy Connectivity and meeting or developing the time frames for achieving the road map milestones, which met the planned target.
- 19.213 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 19.54).

Table 19.54
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
ESCAP member States agreed on draft text of a regional road map on power system connectivity through informal consultation	Committee on Energy endorsed the regional road map on power system connectivity at its third session, and the Commission endorsed it at its seventy-seventh session	ESCAP member States provided updates on connectivity activities on a voluntary basis at meetings of the Expert Working Group on Energy Connectivity Time frames for achieving the road map milestones have been met or are under development	ESCAP member States analyse gaps in policies, regulations and standards in each subregion and agree on a set of principles for enabling sustainable power system connectivity	At least one subregion demonstrates progress on establishing multilateral power trading

Result 3: increased ambition of national commitments by member States towards modern and clean energy in support of Goal 7

Proposed programme plan for 2024

- 19.214 New national pathways toward a just energy transition can help increase the share of energy produced from renewable sources, energy efficiency and access to electricity and clean cooking, while setting the region on a net-zero trajectory.
- 19.215 Through the Committee on Energy and its expert groups, the subprogramme worked to enhance the capacity of member States to develop and implement national commitments towards modern and clean energy.

Lessons learned and planned change

- 19.216 The lesson for the subprogramme was that it needed to strengthen activities to implement mandates given by member States and provide alignment with the Commission, the Asian and Pacific Energy Forum and the Committee on Energy for their deliberations. In applying the lesson, the subprogramme will facilitate intergovernmental deliberations at the sessions of the Committee and Commission and streamline the workflow and coordination among intergovernmental bodies. The subprogramme will also deliver knowledge products that support member States in achieving the energy transition and Goal 7.
- 19.217 Expected progress towards the objective is presented in the performance measure below (see table 19.55).

Table 19.55

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	At the Committee on Energy, member States announced commitments to increasing energy access, energy efficiency and renewable capacity	Member States provided updates on the development of sustainable energy policies at meetings of the Expert Working Group on Universal Access to Modern Energy Services, Renewable Energy, Energy Efficiency and Cleaner Use of Fossil Fuels	Member States agree on accelerated Sustainable Development Goal 7 actions in support of the 2030 Agenda and the Paris Agreement	Member States announce more ambitious national commitments to increase the share of energy from renewable sources, and to adopt advanced energy efficiency and enhance access to electricity and clean cooking technologies, research, technology and investments in clean energy

Deliverables

- 19.218 Table 19.56 lists all deliverables of the subprogramme.

Table 19.56

Subprogramme 9: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	4	1
Reports for:				
1. The Commission	1	1	1	1
2. The Asian and Pacific Energy Forum	–	–	3	–
Substantive services for meetings (number of three-hour meetings)	10	10	16	10
Meetings of:				
3. The Asian and Pacific Energy Forum	–	–	6	–
4. The Expert Working Group on Universal Access to Modern Energy Services, Renewable Energy, Energy Efficiency and Cleaner Use of Fossil Fuels	4	4	4	4
5. The Expert Working Group on Energy Connectivity	4	4	4	4
6. The United Nations Special Programme for the Economies of Central Asia Working Group on Water, Energy and Environment (energy-related issues)	2	2	2	2
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	7	1	2
7. On the implementation of Goal 7	2	7	1	2
Seminars, workshops and training events (number of days)	1	1	1	1
8. Policy dialogues on energy	1	1	1	1
Publications (number of publications)	4	4	3	2
9. On ensuring access to affordable, reliable, sustainable and modern energy for all	4	4	3	2
Technical materials (number of materials)	2	2	1	4
10. On ensuring access to affordable, reliable, sustainable and modern energy for all	2	2	1	4
C. Substantive deliverables				
Consultation, advice and advocacy: policy advice to all member States, upon request, on the implementation of Goal 7 and energy connectivity.				
Databases and substantive digital materials: Asia Pacific Energy Portal (containing more than 200 data sets, 3,000 policy documents and a mapping of more than 6,000 power plants).				
D. Communication deliverables				
Outreach programmes, special events and information materials: information materials on subregional statistical perspectives on sustainable energy, primarily for government officials and technical experts in the region.				
External and media relations: press releases, social media posts, blog posts and op-ed articles on energy access, renewable sources of energy, energy efficiency, and energy connectivity; press interviews for major publications and events.				
Digital platforms and multimedia content: web pages on renewable sources of energy, energy efficiency, cleaner use of fossil fuels, access to electricity, access to clean cooking, energy connectivity and regional cooperation.				

B. Proposed post and non-post resource requirements for 2024

Overview

19.219 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 19.57 to 19.59.

Table 19.57

Overall: evolution of financial resources by object of expenditure^a

(Thousands of United States dollars)

Object of expenditure	2022 expenditure	2023 appropriation	Changes				2024 estimate (before recosting)	
			Technical adjustments	New/expanded mandates	Other	Total		Percentage
Posts	45 836.0	48 577.4	–	–	29.1	29.1	0.1	48 606.5

Total	418	418	–	–	–	–	418

^a Includes four temporary posts (three P-4 and one P-3) that were approved pursuant to General Assembly resolution 71/272.

19.220 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 19.60 to 19.62 and figure 19.XI.

19.221 As reflected in tables 19.60 (1) and 19.61 (1), the overall resources proposed for 2024 amount to \$54,582,200 before recosting, reflecting a net decrease of \$556,500 (or 1.0 per cent) compared with the appropriation for 2023. Resource changes result from two factors, namely: (a) technical adjustments; and (b) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Overall resource changes

Technical adjustments

19.222 As reflected in table 19.60 (1), resource changes reflect a decrease of \$556,500 under programme support related to the removal of non-recurrent requirements approved by the General Assembly for 2023 in its resolution [77/263](#), on the seismic mitigation retrofit and life-cycle replacements project at ESCAP. Resource requirements relating to the seismic mitigation project at ESCAP will be reflected in the report of the Secretary-General on the seismic mitigation retrofit and life-cycle replacements project at ESCAP premises in Bangkok, which will be prepared later in the year for the consideration of the General Assembly during the main part of its seventy-eighth session.

Other changes

19.223 As reflected in table 19.60 (1), the net effect of the proposed changes is cost-neutral. The breakdown of changes is as follows:

- (a) **Subprogramme 1, Macroeconomic policy, poverty reduction and financing for development.** The net increase of \$11,100 relates mainly to increased requirements under consultants (\$6,800) owing to an increase in consultancy services at a higher rate for the *Economic and Social Survey of Asia and the Pacific* and the *Financing for Development in Asia and the Pacific* series and under experts (\$11,100) owing to an increase in the number of expert group meetings on financing for development; and an increase in travel of staff (\$2,700) owing to an increase in planned travel for policy-focused discussions, offset in part by a decrease in contractual services (\$9,500) owing to a decrease in requirements for a publication for the *Financing for Development in Asia and the Pacific* series which is printed in odd years;
- (b) **Subprogramme 2, Trade, investment and innovation.** The net decrease of \$17,400 under non-post resources relates mainly to decreased requirements under experts (\$2,400) owing to the expectation that some experts will participate online, travel of staff (\$1,500) and contractual services (\$13,100), as the flagship publication on trade and investment is not mandated for 2024;
- (c) **Subprogramme 3, Transport.** The net increase of \$8,200 under non-post resources relates mainly to increased requirements under contractual services (\$13,900) for the substantive editing of a flagship publication related to developments in transport, offset in part by a decrease in experts (\$3,500) owing to the expectation that some experts will participate online and a decrease in travel of staff (\$1,600) owing to a decrease in the amount of anticipated travel;
- (d) **Subprogramme 4, Environment and development.** The net decrease of \$7,900 under non-post resources relates mainly to decreased requirements under consultants (\$8,300) due to the shifting of the contractual modality in some cases from consultants to contractual services, travel of staff (\$1,500) owing to a decrease in the number of days of travel and experts (\$3,500) owing to the expectation that some experts will participate online, offset in part by an increase in contractual services (\$5,400) owing to the shifting of the contractual modality in some cases from consultants to contractual services;
- (e) **Subprogramme 5, Information and communications technology and disaster risk reduction and management.** The net increase of \$11,600 under non-post resources relates mainly to increased requirements under experts (\$11,100) and consultants (\$4,400) owing to an increase in the number of expert group meetings and associated consultancy services on space applications and the information superhighway, offset in part by a decrease in travel of staff (\$1,500) owing to the reduced requirement for travel and contractual services (\$2,400) owing to a reduced number of publications to be produced on the topic of disaster information management;
- (f) **Subprogramme 6, Social development.** The net increase of \$47,900 under non-post resources relates mainly to increased requirements under consultants (\$34,200) owing to increased consultancy services required for the preparation of background material for the flagship publication entitled *Social Outlook for Asia and the Pacific*, contractual services (\$13,900) related to the *Social Outlook* and travel of staff (\$4,500) owing to an increase in planned travel for effective engagement with member States in the region related to the implementation of the 2030 Agenda and the *Social Outlook*, offset in part by a decrease under experts (\$4,700) owing to the expectation that some experts will participate online;
- (g) **Subprogramme 7, Statistics.** The net decrease of \$17,500 under non-post resources relates mainly to decreased requirements under experts (\$15,000) owing to the shorter duration required for the expert group meetings, consultants (\$8,000) owing to the shifting of the contractual modality in some cases from consultants to contractual services required for the socioeconomic and environmental analysis in the *Asia and the Pacific SDG Progress Report*,

and travel of staff (\$2,100), offset in part by an increase in contractual services (\$7,500) owing to the shifting of the contractual modality in some cases from consultants to contractual services required for the socioeconomic and environmental analysis in the *Asia and the Pacific SDG Progress Report*;

- (h) **Subprogramme 8, component 1, Subregional activities for development in the Pacific.** The net decrease of \$1,100 under non-post resources relates mainly to decreased requirements under general operating expenses (\$7,500) owing to a reduction in anticipated communications costs and rental and maintenance of premises, offset in part by increased requirements under travel of staff (\$4,000) owing to an increase in the number of days of travel required to engage with member States in supporting them in the implementation of 2030 Agenda in the Pacific and experts (\$1,600) owing to an increase in the number of experts required for reviewing policy options to address sustainable development issues in the Pacific;
- (i) **Subprogramme 8, component 2, Subregional activities for development in East and North-East Asia.** The net decrease of \$4,400 under non-post resources relates mainly to decreased requirements under consultants (\$3,400) owing to a decrease in the number of days of consultancy services in the area of policy and programme options to address emerging economic and social development issues in East and North-East Asia and experts (\$3,100) owing to a reduced number of experts and the expectation that some experts will participate online, and general operating expenses (\$2,600), primarily as a result of lower requirements for communications services through the utilization of Internet-based communications, offset in part by an increase under contractual services (\$5,200) owing to an increase in data processing services and production of a publication on digital literacy among older persons in North-East Asia;
- (j) **Subprogramme 8, component 3, Subregional activities for development in North and Central Asia.** The net decrease of \$1,000 under non-post resources relates mainly to decreased requirements under travel of staff (\$3,400) owing to a reduced number of trips and days of travel required to support member States, and contractual services (\$1,200) owing to editorial services for the preparation of technical materials not required, offset in part by an increase under experts (\$2,900) owing to an increase in expertise required for providing support to sustainable development and policy and programme options to address emerging economic and social development issues in North and Central Asia;
- (k) **Subprogramme 8, component 4, Subregional activities for development in South and South-West Asia.** The net decrease of \$18,700 in non-post resources relates mainly to a decrease under experts (\$9,000) owing to the reduced number of experts required, general operating expenses (\$9,400) owing to an anticipated reduction in the cost of rental and maintenance of premises and utilities, and an anticipated decrease in requirements under furniture and equipment (\$2,100) owing to an anticipated reduction in the purchase of office furniture and equipment, as well as information technology equipment, since new equipment was recently purchased;
- (l) **Subprogramme 8, component 5, Subregional activities for development in South-East Asia.** The net increase of \$56,400 is due to an increase in post costs (\$59,100) owing to inward redeployment of a Local-level post from programme support, which will provide the needed secretarial and logistical assistance to meetings and conferences, and the processing of administrative requests and documents to enable the subprogramme to efficiently manage the programme of work under its preview, offset in part by a decrease in experts (\$1,900) owing to the expectation that some experts will participate online;
- (m) **Subprogramme 9, Energy.** The net decrease of \$8,100 in non-post resources relates mainly to reduced requirements under contractual services (\$13,000) owing to a smaller number of publications required on the topic of regional trends in energy; experts (\$2,400) owing to the expectation that some experts will participate online; and travel of staff (\$1,500) due to the reduced number of travel days required, offset in part by an increase in consultants (\$8,800)

owing to increased requirements for substantive research required for implementing the outcome of the third Asian and Pacific Energy Forum;

- (n) **Programme support.** The net decrease of \$59,100 is comprised mainly of a net decrease of \$30,000 in post costs due to (i) the establishment of a Procurement Officer post (P-3); (ii) the abolishment of one Procurement Assistant post (Local level); and (iii) the outward redeployment of a post (Local level) to subprogramme 8, component 5 (see annex II), and \$29,100 in non-post resources due to reduced requirements under other staff costs (\$17,400) owing to the redeployment of resources to outsourced contractual services to support intergovernmental meetings, travel of staff (\$11,500) owing mainly to a lower standard of accommodation for air travel to an internal conference of job/functional networks, general operating expenses (\$73,400) owing to reduced requirements for communications costs, maintenance costs for transportation services, offsite storage service costs and costs for the rental and maintenance of premises, and furniture and equipment (\$90,500) owing to reduced requirements for physical server replacement and maintenance as a result of a move to cloud services, discontinuation of the physical server and the end of support for checkpoint firewall software and some SharePoint tools and other software, offset in part by an increase under consultants (\$38,500) owing to an increase in demand for staff counselling services to support employee health and well-being and an increased need for an information technology consultant to improve the performance of ICT help desk services, Wi-Fi services and software-defined networking, contractual services (\$68,600) owing mainly to an increase in subscriptions to electronic resources, databases and online publications to facilitate subprogrammes in their research and analysis work, and an increase in data processing services for preventive maintenance, and supplies and materials (\$56,600) owing to the gradual replacement of access switches for the information technology network, support for which is ending in 2025.

Extrabudgetary resources

- 19.224 As reflected in tables 19.60 (2) and 19.61 (2), ESCAP expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2024, extrabudgetary resources are estimated at \$20,151,607. Total in-kind contributions, valued at \$4.41 million, comprise donated right-to-use premises in Bangkok for ESCAP (valued at \$0.94 million) and premises and services at subregional offices and regional institutes (valued at \$1.8 million), as well as experts on non-reimbursable loans and United Nations Volunteers (valued at \$1.67 million).
- 19.225 The extrabudgetary resources under this section are subject to the oversight of the secretariat of ESCAP, which has delegated authority from the Secretary-General.

Policymaking organs

- 19.226 The resources proposed under this component would provide for requirements relating to standing intergovernmental meetings serviced by the secretariat. The Commission, which consists of 53 members and 9 associate members, provides overall direction to the work of the secretariat and reports to the Economic and Social Council. It meets annually, with each session comprising a senior officials' segment and a ministerial segment, to discuss and decide on important issues pertaining to inclusive and sustainable development in the region. The provisions proposed for 2024 are in accordance with Commission resolution 78/2, which sets out the conference structure of the Commission comprising the Asia-Pacific Forum on Sustainable Development and nine committees.
- 19.227 Table 19.63 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 19.63
Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Economic and Social Commission for Asia and the Pacific	The Commission provides overall direction to the work of the secretariat and reports to the Economic and Social Council. It holds regular annual sessions, with each session comprising a senior officials segment and a ministerial segment, to discuss and decide on important issues pertaining to inclusive and sustainable development in the region in the follow-up to the adoption of the 2030 Agenda.	Mandate: Economic and Social Council resolutions 37 (IV) , 1895 (LVII) and 2022/11 Membership: 53 members and 9 associate members Number of sessions in 2024: 1 (eightieth session)	276.0	287.4
Asia-Pacific Forum on Sustainable Development	The Forum is an inclusive intergovernmental platform that meets annually. It supports regional preparations for the high-level political forum on sustainable development under the auspices of both the Economic and Social Council and the General Assembly.	Mandate: Economic and Social Council resolution 2022/11 and Commission resolutions 73/1 and 78/2 Membership: 53 members and 9 associate members Number of sessions in 2024: 1 (eleventh session)	22.3	25.9
Committee on Transport	A subsidiary organ of the Commission that addresses transport issues.	Mandate: Economic and Social Council resolution 2022/11 and decision 2017/269 and Commission resolution 78/2 Membership: 53 members and 9 associate members Number of sessions in 2024: 1 (eighth session)	–	25.9
Committee on Environment and Development	A subsidiary organ of the Commission that addresses environment and development issues.	Mandate: Economic and Social Council resolution 2022/11 and Commission resolution 78/2 Membership: 53 members and 9 associate members Number of sessions in 2024: 1 (eighth session)	–	25.9
Committee on Information and Communications Technology, Science, Technology and Innovation	A subsidiary organ of the Commission that addresses information and communications technology and science, technology and innovation issues.	Mandate: Economic and Social Council resolution 2022/11 and Commission resolution 78/2 Membership: 53 members and 9 associate members Number of sessions in 2024: 1 (fifth session)	–	25.9
Committee on Social Development	A subsidiary organ of the Commission that addresses social development issues.	Mandate: Economic and Social Council resolution 2022/11 and Commission resolution 78/2 Membership: 53 members and 9 associate members Number of sessions in 2024: 1 (eighth session)	–	25.9
Committee on Statistics	A subsidiary organ of the Commission that addresses statistical issues.	Mandate: Economic and Social Council resolution 2022/11 and Commission resolution 78/2	–	25.9

Section 19 Economic and social development in Asia and the Pacific

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
		Membership: 53 members and 9 associate members Number of sessions in 2024: 1 (ninth session)		
Committee on Macroeconomic Policy, Poverty Reduction and Financing for Development	A subsidiary organ of the Commission that addresses macroeconomic policy, poverty reduction and financing for development issues.	Mandate: Economic and Social Council resolution 2022/11 and Commission resolution 78/2 Membership: 53 members and 9 associate members Number of sessions in 2024: none	15.1	–
Committee on Trade, Investment, Enterprise and Business Innovation	A subsidiary organ of the Commission that addresses trade and investment issues.	Mandate: Economic and Social Council resolution 2022/11 and Commission resolution 78/2 Membership: 53 members and 9 associate members Number of sessions in 2024: none	15.1	–
Committee on Disaster Risk Reduction	A subsidiary organ of the Commission that addresses disaster risk reduction issues.	Mandate: Economic and Social Council resolution 2022/11 and Commission resolution 78/2 Membership: 53 members and 9 associate members Number of sessions in 2024: none	15.1	–
Committee on Energy	A subsidiary organ of the Commission that addresses energy issues.	Mandate: Economic and Social Council resolution 2022/11 and Commission resolution 78/2 Membership: 53 members and 9 associate members Number of sessions in 2024: none	–	–
Asia-Pacific high-level intergovernmental meeting on gender equality and women's empowerment: Beijing+30	The meeting will conduct a regional review and appraisal of the implementation of the Beijing Declaration and Platform for Action and the outcomes of the twenty-third special session of the General Assembly, including an assessment of current challenges that affect the full, effective and accelerated implementation of the Platform for Action and the achievement of gender equality and the empowerment of all women and girls, and its contribution towards the full realization of the 2030 Agenda through a gender perspective. The outcomes of the meeting will feed into the 2025 review to be undertaken by the Commission on the Status of Women at its sixty-ninth session.	Mandate: Economic and Social Council resolution 2022/5 Membership: 53 members and 9 associate members Number of sessions in 2024: 1	–	25.9
Asian and Pacific Energy Forum		Mandate: Commission resolutions 67/2, 70/9, 73/8 and 74/9 Membership: 53 members and 9 associate members Number of sessions in 2024: none	15.1	–
Asian and Pacific Population Conference		Mandate: Commission resolution 74 (XXIII) Membership: 53 members and 9 associate members Number of sessions in 2024: none	110.0	–
Total			468.7	468.7

Part V Regional cooperation for development

19.228 The proposed regular budget resources for 2024 amount to \$468,700 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.64 and figure 19.XII.

Executive direction and management

19.229 Executive direction and management is led by the Office of the Executive Secretary and supported by the Section on Sustainable Development and Countries in Special Situations. The Office provides overall policy direction and management to the secretariat to support member States through the provision of strategic analyses, policy options and capacity-building activities. The efforts are aimed at addressing key development challenges through the provision of innovative solutions for equitable and inclusive economic prosperity, social progress and environmental sustainability across Asia and the Pacific. Emerging issues in the regional development agenda will be identified, and regional concerns and priorities will be articulated at the global level.

19.230 The Office of the Executive Secretary provides guidance to divisions, subregional offices and regional institutes on the implementation of the ESCAP programme of work and on ensuring its accountability. It also provides direction on the mainstreaming of policies and strategies relating to gender equality and the empowerment of women, as well as on disability inclusion, across the programme of work and to programme support units.

19.231 The Office of the Executive Secretary provides overall direction and management with respect to the preparation of the annual theme study and the organization of the annual session of the

Commission, an inclusive intergovernmental platform for regional cooperation. It also guides the implementation of reforms to the ESCAP conference structure pursuant to Commission resolution 78/2; the strengthening of organizational effectiveness and results-based management; and the implementation of United Nations system-wide change management and reform initiatives.

- 19.232 The Office of the Executive Secretary also provides overall direction to programme support units in ensuring gender-sensitive and disability-inclusive programme planning and financial and human resources management, as well as accountability systems. Every effort will be made to advance gender parity.
- 19.233 The Section on Sustainable Development and Countries in Special Situations supports the accelerated implementation of the 2030 Agenda in the least developed countries, landlocked developing countries and small island developing States. The section takes a concerted approach to mainstreaming the issues faced by these groups of countries in the overall programme of work, monitors the implementation of the programmes of action for these countries and provides strategic analyses to address key development challenges. It also guides the organization of the Asia-Pacific Forum on Sustainable Development as the multi-stakeholder platform through which to discuss, review and follow up on regional priorities and needs for sustainable development.
- 19.234 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations. In 2022, ESCAP continued the energy efficiency efforts through its daily Earth Hour campaign, through which office lights were automatically switched off during the lunch break, and improvements and adjustments to facilities management systems. ESCAP achieved an energy efficiency improvement of 35 per cent compared with 2016 – its reference environmental baseline year. The energy efficiency improvements are equivalent to 9,736 tons of carbon dioxide over the six years since the launch of the ESCAP environmental management system. ESCAP continues its commitment to green energy by purchasing international renewable energy certificates, allowing it to source 100 per cent of its energy consumption from locally produced solar energy in Thailand. This achievement confirms that the United Nations Secretariat 2030 targets were met as early as 2020, with this trend continuing into 2022. In the same year, ESCAP continued its waste prevention and management efforts and achieved high rates of waste recycling (2022 expected figures: approx. 70 per cent). Efforts included the continuation of the compound-wide ban on all main single-use catering items and the establishment of a new waste management system that boosted recycling (centralized recycling bins, a new waste sorting area and organic waste composting). In 2022, many ESCAP meetings were conducted in a hybrid format, which positively contributed to the organization's efforts to reduce its air travel footprint. ESCAP will have achieved climate neutrality in its 2022 operations by procuring certified carbon emission reduction credits by June 2023. In 2023, the Office will expand its environmental management system beyond the headquarters to also include ESCAP subregional offices and regional institutes. This will further ensure comprehensive, systematic and monitored environmental management across ESCAP and expand its regional efforts to ensure such management across the organization. The system will serve to target energy, waste, water, sustainable meetings and travel and will address staff awareness as a cross-cutting issue for all of the identified environmental issues. It should be noted that, although ESCAP reduction trends were already in place and yielding positive environmental results before the COVID-19 pandemic, the levels of progress reached to date in some of the targeted areas may not be sustainable at the same level in the long term if building occupancy rates and air travel increase.
- 19.235 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 19.65. With reduced restrictions on international travel and normalized entry requirements after the COVID-19 pandemic was declared endemic, the number of travel requests has increased quite exponentially: from 61 in the fourth quarter of 2021 to 854 in the same period of 2022. The advance purchase compliance rate improved, from 39 per cent in 2021 to 59.2 per cent in 2022; staff travel compliance was encouraging, with a rate of 71.6 per cent, while planning and securing nominations for non-staff participants in meetings still posed challenges and resulted in a compliance rate of only 52.6 per cent. ESCAP continues to implement measures to improve the compliance rate, which include regular monitoring of and reporting on its advance purchase compliance rate, as well as bilateral consultations with respective divisions and offices to improve their travel planning and compliance rate.

Table 19.65
Compliance rate
(Percentage)

	Actual 2020	Actual 2021	Actual 2022	Planned 2023	Planned 2024
Timely submission of documentation	93	93	89	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	49	39	59	100	100

19.236 The proposed regular budget resources for 2024 amount to \$3,979,600 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.66 and figure 19.XIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.237 Extrabudgetary resources for this component amount to \$181,500. The resources would complement regular resources and would be used mainly to support technical cooperation projects on implementation of the 2030 Agenda, including a project with ADB and UNDP. The estimated decrease of \$193,600 compared with 2023 is attributable mainly to the completion of projects in 2023.

Programme of work

Subprogramme 1

Macroeconomic policy, poverty reduction and financing for development

19.238 The proposed regular budget resources for 2024 amount to \$2,939,700 and reflect an increase of \$11,100 compared with the appropriation for 2023. The proposed increase is explained in paragraph 19.223 (a). Additional details on the distribution of resources for 2024 are reflected in table 19.67 and figure 19.XIV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.239 Extrabudgetary resources for this subprogramme amount to \$100,000. The resources would complement regular budget resources and would be used mainly to support a technical cooperation project on strengthening the climate financing capacity of least developed countries, landlocked developing countries and small island developing States. The expected increase of \$53,300 is attributable mainly to projected contributions for the implementation of the technical cooperation project.

**Subprogramme 2
Trade, investment and innovation**

19.240 The proposed regular budget resources for 2024 amount to \$3,277,100 and reflect a decrease of \$17,400 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 19.223 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.68 and figure 19.XV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.241 Extrabudgetary resources for the subprogramme amount to \$3,694,500. The resources would complement regular budget resources and would be used mainly to support technical cooperation projects on women’s entrepreneurship (innovative finance component), trade policy and facilitation, investment, enterprise and innovation, as well as technical cooperation activities and the operational costs of the Asian and Pacific Centre for Transfer of Technology. The expected decrease of \$864,200 is attributable mainly to the completion of technical cooperation projects in 2023.

**Subprogramme 3
Transport**

19.242 The proposed regular budget resources for 2024 amount to \$3,381,800 and reflect an increase of \$8,200 compared with the appropriation for 2023. The proposed increase is explained in paragraph 19.223 (c). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.69 and figure 19.XVI.

Subprogramme 3: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.243 Extrabudgetary resources for this subprogramme amount to \$778,400. The resources would complement regular budget resources and would be used mainly to support technical cooperation projects focused on sustainable transport connectivity and logistics, and sustainable transport mobility in the Asia-Pacific region. The expected increase of \$81,300 is attributable mainly to projected contributions to support technical cooperation projects on sustainable transport development in the region.

**Subprogramme 4
Environment and development**

19.244 The proposed regular budget resources for 2024 amount to \$2,927,500 and reflect a decrease of \$7,900 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 19.223 (d). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.70 and figure 19.XVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.245 Extrabudgetary resources for this subprogramme amount to \$2,870,600. The resources would complement regular budget resources and would be used mainly to support technical cooperation projects on the implementation of the 2030 Agenda through the promotion of regional cooperation and networking, research and analysis and capacity-building for sustainable urban development, as well as technical cooperation activities and operational costs of the Centre for Sustainable Agricultural Mechanization. The estimated decrease of \$206,500 compared with the estimates for 2023 reflects the completion of technical cooperation projects in 2023.

**Subprogramme 5
Information and communications technology and disaster risk reduction
and management**

19.246 The proposed regular budget resources for 2024 amount to \$2,824,100 and reflect an increase of \$11,600 compared with the appropriation for 2023. The proposed increase is explained in paragraph 19.223 (e). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.71 and figure 19.XVIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.247 Extrabudgetary resources for this subprogramme amount to \$3,215,100. The resources would complement regular budget resources and would be used mainly to support technical cooperation projects to bridge the digital divide and to advance the use of technologies and geospatial data for disaster resilience and supporting the implementation of the 2030 Agenda in the region, considering social, economic and environmental aspects. The resources would also support the operational costs and technical cooperation activities of the Asian and Pacific Training Centre for Information and Communication Technology for Development and the Asian and Pacific Centre for the Development of Disaster Information Management. The expected increase of \$17,800 is attributable mainly to the projected contributions for the implementation of the technical cooperation projects.

**Subprogramme 6
 Social development**

19.248 The proposed regular budget resources for 2024 amount to \$4,015,200 and reflect an increase of \$47,900 compared with the appropriation for 2023. The proposed increase is explained in paragraph 19.223 (f). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.72 and figure 19.XIX.

Extrabudgetary resources

19.249 Extrabudgetary resources for this subprogramme amount to \$888,100. The resources would complement regular budget resources and would be used mainly to support technical cooperation projects to support member States in addressing the needs of those left furthest behind; enhancing social protection, the promotion of the rights and inclusion of persons with disabilities, older persons and migrants; and promoting gender equality and the economic empowerment of women. The estimated decrease of \$874,200 reflects the completion of technical cooperation projects in 2023.

Subprogramme 7 Statistics

19.250 The proposed regular budget resources for 2024 amount to \$3,077,500 and reflect a decrease of \$17,500 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 19.223 (g). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.73 and figure 19.XX.

Extrabudgetary resources

19.251 Extrabudgetary resources for this subprogramme amount to \$3,126,700. The resources would complement regular budget resources and would be used mainly to support statistical capacity-

building activities to enhance data and statistics for the 2030 Agenda and would improve national monitoring systems by strengthening policy-data links. The resources would also support operational costs and technical cooperation activities of the Statistical Institute for Asia and the Pacific. The estimated decrease of \$1,088,400 is attributable mainly to the completion of technical cooperation projects in 2023.

Subprogramme 8 Subregional activities for development

19.252 The proposed regular budget resources for 2024 amount to \$4,569,600 and reflect an increase of \$31,200 compared with the appropriation for 2023. The proposed regular budget resources for 2024 of the various components of the subprogramme are presented below.

Component 1 Subregional activities for development in the Pacific

19.253 The proposed regular budget resources for 2024 amount to \$1,475,500 and reflect a decrease of \$1,100 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 19.223 (h). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.74 and figure 19.XXI.

Extrabudgetary resources

19.254 Extrabudgetary resources for this component amount to \$304,300. The resources would complement regular budget resources and would be used mainly to support technical cooperation projects on the promotion of regional cooperation and networking for sustainable development in the Pacific subregion. The estimated decrease of \$407,600 reflects the completion of technical cooperation projects in 2023.

**Component 2
 Subregional activities for development in East and North-East Asia**

19.255 The proposed regular budget resources for 2024 amount to \$953,500 and reflect a decrease of \$4,400 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 19.223 (i). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.75 and figure 19.XXII.

Extrabudgetary resources

19.256 Extrabudgetary resources for this component amount to \$1,911,700. The resources would complement regular budget resources and would be used mainly to support technical cooperation projects on promoting and strengthening policy coordination relating to sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies, as well as to cover the operational costs of the Subregional Office for East and North-East Asia. The estimated decrease of \$36,200 is attributable mainly to the expected completion of technical cooperation projects in 2023.

Component 3
Subregional activities for development in North and Central Asia

19.257 The proposed regular budget resources for 2024 amount to \$718,800 and reflect a decrease of \$1,000 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 19.223 (j). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.76 and figure 19.XXIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

19.258 Extrabudgetary resources for this component amount to \$180,400. The resources would complement regular budget resources and would be used mainly to support technical cooperation projects for capacity-building and for research and analysis to support implementation of the United Nations Special Programme for the Economies of Central Asia, which facilitates economic cooperation and the integration of participating countries into the world economy and provides a platform for cross-border cooperation for the achievement of the Goals, as well as to cover the operational costs of the Subregional Office for North and Central Asia. The estimated decrease of \$166,000 is attributable mainly to the expected completion of technical cooperation projects in 2023.

Component 4 Subregional activities for development in South and South-West Asia

19.259 The proposed regular budget resources for 2024 amount to \$1,126,000 and reflect a decrease of \$18,700 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 19.223 (k). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.77 and figure 19.XXIV.

Extrabudgetary resources

19.260 Extrabudgetary resources for the component amount to \$110,600. The resources would complement regular budget resources and would contribute to supporting the implementation of the 2030 Agenda in the subregion, as well as cover the operational costs of the Subregional Office for South and

South-West Asia. The estimated decrease of \$123,800 is attributable mainly to the completion of technical cooperation projects in 2023.

Component 5 Subregional activities for development in South-East Asia

19.261 The proposed regular budget resources for 2024 amount to \$295,800 and reflect an increase of \$56,400 compared with the appropriation for 2023. The proposed increase is explained in paragraph 19.223 (1). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.78 and figure 19.XXV.

Extrabudgetary resources

19.263 Extrabudgetary resources for this subprogramme amount to \$480,900. The resources would complement regular budget resources and would be used mainly to support technical cooperation

projects on enhancing the capacity of member States for cleaner energy, as well as energy efficiency, energy access and energy connectivity. The estimated decrease of \$964,200 is attributable mainly to the completion of technical cooperation projects in 2023.

Programme support

- 19.264 The programme support component assists in the implementation of the substantive programme of work of ESCAP at its headquarters in Bangkok, as well as at its subregional offices. Specifically, programme support includes:
- (a) The Strategy and Programme Management Division, which accords priority to improving the relevance and impact of the work of ESCAP through its functions related to strategic programme planning, management and budgeting, technical cooperation and resource mobilization, monitoring and evaluation, and partnerships, in particular collaboration with development partners;
 - (b) The Division of Administration, which accords priority to improving operational support, including leveraging development reform by working with United Nations entities locally and in the region, as well as streamlining global administrative processes and mainstreaming measures deployed during the pandemic, through its functions related to financial resources management, human resources management, information and communications technology management, mail services, travel, conference management (including events management, in particular at the United Nations Conference Centre in Bangkok) and host country relation services, as well as procurement, facilities management, and commercial and general services;
 - (c) The Communications and Knowledge Management Section, which accords priority to disseminating outreach materials to increase the accessibility and visibility of the analytical, normative and capacity-building work of ESCAP through its communication, knowledge management and information/library services. This includes media relations, social media content, web content management, exhibitions, promotional material, management of the publications programme, the purchase and management of subscriptions to electronic resources, databases and online publications, the preservation of institutional memory and the digitization of official documents, publications and records;
 - (d) The Conference and Documentation Services Section, which enables and facilitates multilingual communication among stakeholders, partners and member States through its mandate of providing interpretation, translation, editorial and text processing services, including documentation management, reproduction and printing, as well as the leveraging of language-related information technology and computer-assisted translation tools.
- 19.265 The proposed regular budget resources for 2024 amount to \$21,328,000 and reflect a decrease of \$615,600 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 19.223 (n). Additional details on the distribution of the proposed resources for 2024 are reflected in table 19.80 and figure 19.XXVII.

(Number of posts/thousands of United States dollars)

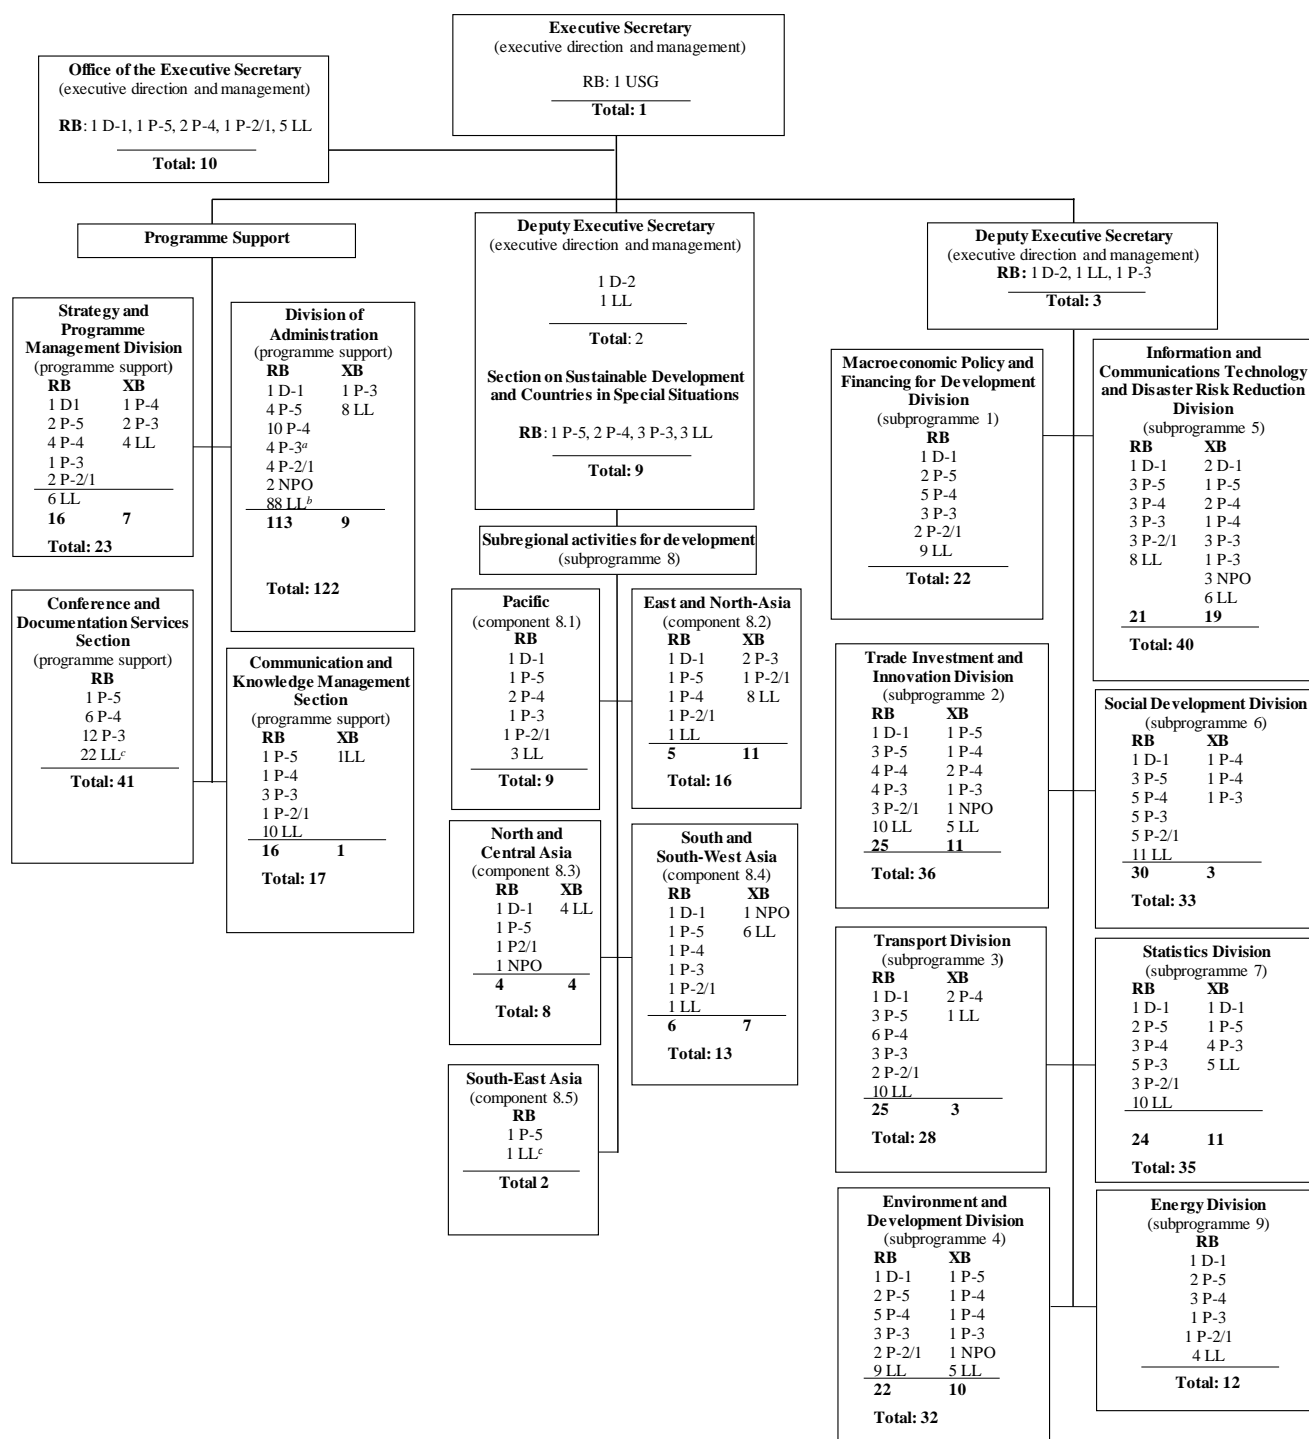

Extrabudgetary resources

19.266 Extrabudgetary resources for programme support amount to \$2,308,800. The resources would complement regular budget resources and would support central administration and programme services provided to projects funded through voluntary contributions, as well as knowledge management and strategic communication initiatives. The estimated resource level for 2024 reflects no change compared with the estimates for 2023.

Annex I

Organizational structure and post distribution for 2024

Abbreviations: LL, Local level; NPO, National Professional Officer; RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.

^a Establishment of one P-3.

^b Abolishment of one Local level.

^c Redeployment/reclassification of one Local level.

Annex II

Summary of proposed changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 8, component 5	1	LL	Redeployment of 1 Editorial Assistant (reclassified as Team Assistant) from programme support	The increasing number of engagements and initiatives handled by subprogramme 8, component 5, requires one additional post to provide office support, which includes secretarial and logistical assistance for meetings and conferences, and the processing of administrative requests and documents. Under programme support, the Conference and Documentation Services Section has put in place a number of measures that are aligned with the practices and procedures of the Department for General Assembly and Conference Management. These include the deployment, adoption and full implementation of the language-related technologies to streamline work processes and procedures and simplify the workflow, which has allowed for efficiency gains. Specifically, proofreading responsibilities have been streamlined, and referencing and formatting/layout tasks have been strengthened. This has resulted in increased operational flexibility of the editorial team. Redeployment of the post would allow for the successful implementation of the work programme with a leaner structure.
Programme support	1	P-3	Establishment of 1 Procurement Officer post	The Procurement Unit is expected to provide strategic advisory support to the requisitioning community of the Economic and Social Commission for Asia and the Pacific (ESCAP), from the supply chain demand planning stage to the data reporting and analysis stages, to transform and modernize the ESCAP supply chain process in line with the Secretary-General's supply chain management reform strategy. In this connection, the professionalized advisory functions will result in more forward-looking, streamlined and long-term category management for the ESCAP key categories to enable the strategic sourcing of business partners to deliver mandated activities more effectively; therefore, the proposed establishment of a regular budget P-3 post would also contribute to the minimization of the advisory and supervisory gap.
Programme support	(1)	LL	Abolishment of 1 Procurement Assistant	The increased demand for upscaling the capacity and capabilities of ESCAP in its procurement advisory functions, digital transformation and process improvement implementation, in line with the Secretary-General's supply chain management reform strategy, requires a higher-level post.

Abbreviation: LL, Local level.

II. Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies	83
III. Summary of proposed post changes, by component and subprogramme	85

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

Foreword

The Economic Commission for Europe (ECE) provides a regional intergovernmental platform promoting economic cooperation among its member States and facilitates their efforts to achieve sustainable development. ECE manages a wide body of international legal instruments and best practices, offering sound solutions to problems shared by the countries that it serves.

The proposed programme budget for 2024 was developed at a time of mounting challenges, with increasing energy and food prices, and climate change and the socioeconomic and environmental impact of the armed conflict in Ukraine affecting progress towards achieving the Sustainable Development Goals in the region and beyond.

Against this background, in 2024 ECE will serve as an instrument of change in responding to the ongoing multidimensional challenges in the region, by supporting the immediate and longer-term needs of member States, in line with agreed priorities and resources. The Commission will also contribute to the decade of action for the Sustainable Development Goals and follow-up action on proposals of the Our Common Agenda report, upon further consideration by member States, by engaging its convening power, normative work and technical assistance, by leveraging partnerships and expertise and by serving as a knowledge hub to promote cross-sectoral solutions for achieving the Goals. Taking advantage of the repositioned United Nations development system, ECE will contribute to regional and subregional efforts to facilitate sustainable development and support resident coordinators and United Nations country teams in the ECE region.

I trust that member States will provide the guidance and resources to advance ECE efforts towards economic cooperation, sustainable development and economic recovery.

(Signed) **Olga Algayerova**
Executive Secretary, Economic Commission for Europe

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 20.1 The Economic Commission for Europe (ECE) is responsible for facilitating economic integration and cooperation among its member States and promoting sustainable development and economic prosperity in the ECE region. The mandate derives from the priorities established in relevant Economic and Social Council resolutions, including on the workplan on reform of ECE and the outcome of the review of the 2005 reform of ECE (resolutions 2006/38 and 2013/1, respectively), and Council resolution 36 (IV). The ECE region continues to face economic and environmental challenges in addressing the complexity of achieving the Sustainable Development Goals, which remain a source of primary concern to member States. ECE provides a regional intergovernmental platform from which to address these challenges, such as promoting sustained economic growth and the sustainable use of natural resources in the region, protecting the environment, advancing sustainable transport and mobility, strengthening the capacity for measuring sustainable development, fostering innovation, competitiveness and public-private partnerships, accelerating trade and economic integration, improving access to affordable and clean energy, ensuring the sustainable management of forests, building urban sustainability, and addressing the implications of demographic trends. The work of ECE is grounded in many of its multilateral agreements, norms and best practices that provide sustainable solutions to problems in areas critical to sustainable development, including those spanning national borders. Apart from serving as a platform for Governments and other stakeholders to collaborate in developing legal instruments and formulating policies for sustainable development, ECE provides specialized and demand-driven technical assistance to build the capacity of countries to implement these instruments, policies and best practices, and facilitates their uptake. ECE support, aimed at developing the capacity of Governments to formulate and implement policies for sustainable development, is also provided through the implementation of capacity-building activities and projects under the regular programme of technical cooperation and the United Nations Development Account.

Strategy and external factors for 2024

- 20.2 ECE works to promote regional cooperation and integration as a means of achieving sustainable development in the ECE region. Its intergovernmental bodies, which comprise the Commission and its sectoral committees, provide the foundation for ECE support for national Governments and other stakeholders in advancing the achievement of the Sustainable Development Goals. By convening the annual Regional Forum on Sustainable Development, ECE also provides a region-wide multi-stakeholder platform for the follow-up and review of the Goals, focusing on peer learning and the exchange of practical solutions for achieving sustainable development. The work of ECE is aligned with the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, the Vienna Declaration and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the New Urban Agenda.
- 20.3 The strategy of the programme is based on the implementation of core interlinked functions that are consistent with the legislative mandates of ECE, namely, policy dialogue, normative work and technical cooperation. In line with the principles of the reform of the United Nations development system at the regional level, in implementing its strategy in 2024 ECE will provide a neutral platform for policy dialogue to address multi-country, transboundary and regional economic and environmental issues among its 56 member States. The normative work of the programme will focus on the development and implementation of international legal instruments, norms and standards in areas critical to sustainable development, and on the identification and dissemination of best practices within and outside the region. Through technical cooperation in its areas of expertise, the

programme will provide integrated policy advice, normative support and capacity-building aimed at expanding the use of its normative work, facilitate the achievement of the internationally agreed development goals at the country level and achieve multiplier effects by targeting cross-border issues.

- 20.4 The strategy of the programme will be achieved through an integrated approach to sustainable development, which builds on synergies and the results-oriented work of its eight subprogrammes that are aligned with specific Sustainable Development Goals: environment; transport; statistics; economic cooperation and integration; sustainable energy; trade; forests and the forest industry; and housing, land management and population. Identifying and exploiting cross-sectoral synergies of the 2030 Agenda for Sustainable Development and engaging multiple actors for joint action has been critical to accelerating progress in achieving the Goals and will remain key in the future work of ECE. To that end, ECE will continue to leverage its integrated approach by providing multisectoral policy advice and capacity-building through cross-sectoral collaboration among its eight subprogrammes in areas in which multiple Goals converge, namely:
- (a) Digital and green transformations for sustainable development in the ECE region (agreed at the 119th meeting of the ECE Executive Committee as a cross-cutting theme of the seventieth session of ECE, in 2023);
 - (b) Circular economy and the sustainable use of natural resources (see decision B (69) in the biennial report of the Commission ([E/2021/37-E/ECE/1494](#)));
 - (c) Sustainable and smart cities for all ages;
 - (d) Sustainable mobility and smart connectivity;
 - (e) Measuring and monitoring progress towards achieving the Goals.
- 20.5 In 2024, the programme will continue to provide support to its member States in addressing the economic and environmental challenges of achieving the Sustainable Development Goals. Specific attention will be placed on promoting solutions that help to address environmental pressures while ensuring economic prosperity – an ongoing challenge for the ECE region that is central to advancing sustainable development. ECE will actively contribute to the decade of action for the Goals in the ECE region by engaging its convening power, normative production and technical cooperation, by leveraging its partnerships and expertise from its networks of experts and by serving as a knowledge hub to promote integrated and cross-sectoral solutions for achieving the Goals. Taking into account the significant environmental footprint of the economies in its region, ECE will also focus on facilitating progress towards a circular economy and the sustainable use of natural resources, as mandated at the sixty-ninth session of ECE in April 2021.
- 20.6 With regard to cooperation with other entities at the global, regional, national and local levels, ECE will build on its close cooperation with international and regional organizations and other regional actors, such as the Organisation for Economic Co-operation and Development, the Organization for Security and Cooperation in Europe, the European Union and the Eurasian Economic Union. Partnerships with the private sector and civil society organizations, think tanks and the academic sector will be strengthened in order to facilitate ECE policy dialogue and normative work and to engage them in the implementation of the 2030 agenda by member States.
- 20.7 With regard to inter-agency coordination and liaison, ECE will continue to play a key role in coordinating regional United Nations system entities. ECE will continue to co-lead the Regional Collaborative Platform for Europe and Central Asia and work as part of the secretariat servicing the platform, working to promote joint action and closer cooperation among United Nations regional entities and their partners in addressing regional, cross-cutting policy issues, offering integrated policy advice and providing regional perspectives at the global level. This work will build on continued strategic partnerships and joint initiatives, programmes and projects established by ECE with other United Nations entities and international financial institutions, for example, the United Nations Conference on Trade and Development, the Food and Agriculture Organization of the United Nations, the United Nations Environment Programme, the United Nations Development Programme,

the International Trade Centre, the World Trade Organization and the World Bank. ECE will actively engage in issue-based coalitions aimed at facilitating concerted action among various United Nations entities and partners at the operational level. Cooperation with other regional commissions will be pursued through joint initiatives, programmes and projects in order to maximize synergies for institutional coordination, expertise and knowledge management for best results. The United Nations Special Programme for the Economies of Central Asia, implemented jointly by ECE and the Economic and Social Commission for Asia and the Pacific, will serve as the major framework for cooperation with other relevant stakeholders in Central Asia. At the country level, ECE will work closely with the resident coordinators and United Nations country teams in 17 United Nations programme countries in the ECE region to facilitate the implementation of joint programmes and projects in response to country demands. ECE will also continue its active engagement as part of these country teams through the United Nations Sustainable Development Cooperation Frameworks by contributing to their planning, monitoring and implementation through common country analyses and participation in joint workplans and results groups. The programme will also promote interregional (including South-South) and triangular cooperation.

- 20.8 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Member States continue to guide ECE intergovernmental processes, support the work of ECE and give high priority to regional and subregional cooperation and integration, with a view to achieving sustainable development;
 - (b) All relevant stakeholders at the national level have the political will to cooperate in implementing ECE legal instruments, norms and standards;
 - (c) Voluntary resources continue to be available.
- 20.9 ECE integrates a gender perspective in its operational activities, deliverables and results, as appropriate, to support member States in the achievement of Sustainable Development Goal 5 and targets of the Goals related to gender equality and women's empowerment. Guided by its policy on gender equality and the empowerment of women, all ECE subprogrammes will commit themselves to taking concrete action with measurable outputs in the 2024 ECE action plan on mainstreaming a gender perspective into the Commission's normative work and further promoting the participation of women in all meetings and workshops. All ECE technical cooperation projects will be assessed against their impact on gender equality.
- 20.10 In line with the United Nations Disability Inclusion Strategy, ECE will mainstream disability inclusion into its operational activities, deliverables and results, as appropriate. In line with its annual disability inclusion action plan, ECE will advance disability inclusion in the relevant normative instruments and good practices, as well as its programmes and projects.

Impact of the pandemic and lessons learned

- 20.11 The continuation of the coronavirus disease (COVID-19) pandemic had less impact on the implementation of ECE mandates in 2022, compared with the 2020–2021 period, given that the lifting of mitigation measures in the second half of the year allowed international travel and in-person meetings. The main impact was on the Commission's convening capacity and the norm-setting work of all subprogrammes. Mitigating measures approved by ECE member States early in the pandemic minimized the impact and ensured that ECE continued to provide a platform for policy dialogue and deliver knowledge products and capacity-building services to member States. There was a reduction in the number of ECE intergovernmental meetings with interpretation alongside the reduced availability of conference-servicing capacity at the United Nations Office at Geneva in the first half of 2022. The mode of delivery of capacity-building workshops was done mainly online under all subprogrammes.
- 20.12 In addition, in order to support member States' management and recovery from the COVID-19 pandemic, within the overall scope of the objectives ECE utilized its convening power, the

production of norms and standards for common application in the region and beyond, and technical cooperation through the implementation of capacity-building projects and activities to support member States' efforts to promote sustainable recovery from the pandemic (all subprogrammes). For example, subprogramme 2 facilitated the development and implementation of a new generation of legal instruments supporting the digitalization and computerization of transport and border-crossing procedures in countries that have interconnected their customs system with the eTIR international system. On the basis of its adapted guidelines for smaller businesses in the energy sector, subprogramme 5 continued to train entrepreneurs and policymakers on best practices in energy efficiency and renewable energy to facilitate sustainable recovery from the COVID-19 crisis.

- 20.13 ECE continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. For example, one of the main lessons learned was the recognition that a shift towards a circular economy and digital and sustainable resource management frameworks could enable a more just recovery, thereby accelerating progress towards achieving the Sustainable Development Goals and building more resilient economies in the region. As a result, circularity and the sustainable use of natural resources were mainstreamed into ECE sectoral work programmes (all subprogrammes), and ECE will focus on progress towards digital and green transformations for sustainable development, which member States agreed would be the theme of the seventieth session of the Commission, to be held in April 2023. The Commission's action framework for responses to the COVID-19 crisis provided specific tools to assist member States' work on sustainable recovery and will continue to serve this purpose, including in response to other emergencies (all subprogrammes). Under the Protocol on Water and Health to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes, ECE will further support member States in setting or revising their national targets and action plans focused on the recovery from the COVID-19 pandemic and strengthening resilience against future outbreaks (subprogramme 1). Pandemic-related constraints further highlighted the need to provide support to member States in the digitalization of legal instruments on transport. Subprogramme 2 will scale up its technical advice and support for the digitalization of transport and border-crossing procedures, allowing for end-to-end, paperless cross-border transit of goods, and facilitate the deployment of existing mechanisms, such as eTIR, in support of member States' efforts towards a sustainable recovery. To contribute to strengthening the resilience of member States, subprogramme 7 will facilitate the improved integration of forest resources and products into planning and recovery from economic, health and environmental shocks, including from COVID-19, through its capacity-building events, data collection and dedicated publications. With respect to lessons learned in modes of delivery, capacity-building workshops and policy advisory services continued online in 2022 under all subprogrammes. The option of a hybrid modality, while challenging to manage, became a valuable addition to intergovernmental meetings and capacity-building events to ensure business continuity and higher rates of participation by experts, but reduced the networking and consensus-building opportunities, which were important for the negotiation and decision-making processes. There was greater regional participation for hybrid capacity-building events compared with those held in person and ECE will, upon request and subject to the availability of resources, continue to mainstream these practices in order to explore the opportunities for greater participation in its events.

Legislative mandates

- 20.14 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

66/288	The future we want	67/290	Format and organizational aspects of the high-level political forum on sustainable development
67/10	Cooperation between the United Nations and the Eurasian Economic Community		

Part V Regional cooperation for development

69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations	74/231, 76/215	Development cooperation with middle-income countries
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	74/235	Women in development
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	74/271	Progress towards an accountability system in the United Nations Secretariat
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	74/297	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
71/16	Cooperation between the United Nations and the Economic Cooperation Organization	75/8, 77/15	Cooperation between the United Nations and the Organization for Democracy and Economic Development – GUAM
71/256	New Urban Agenda	75/9, 77/16	Cooperation between the United Nations and the Commonwealth of Independent States
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	75/12	Cooperation between the United Nations and the Black Sea Economic Cooperation Organization
73/10	Cooperation between the United Nations and the Central European Initiative	75/216; 76/204	Disaster risk reduction
73/195	Global Compact for Safe, Orderly and Regular Migration	75/221	Ensuring access to affordable, reliable, sustainable and modern energy for all
74/122	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
74/128	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	75/290 B	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council
74/144	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: accessibility		Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level
74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	75/324	High-level political forum on sustainable development
		77/185	Cooperation between the United Nations and the Economic Cooperation Organization
			South-South cooperation

Economic and Social Council resolutions

1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2013/1	Outcome of the review of the 2005 reform of the Economic Commission for Europe
2006/38	Workplan on reform of the Economic Commission for Europe and revised terms of reference of the Commission	2022/18	Mainstreaming a gender perspective into all policies and programmes in the United Nations system

Economic Commission for Europe decisions

A (64)	The work of the Economic Commission for Europe	A (69)	High-level statement
A (65)	Outcome of the review of the 2005 reform of ECE	B (69)	Circular economy and the sustainable use of natural resources
A (66)	Endorsement of the High-level statement on the post-2015 development agenda and expected sustainable development goals in the ECE region	C (69)	Extension of the mandate of the Regional Forum on Sustainable Development

**Subprogramme 1
Environment**

General Assembly resolutions

2994 (XXVII)	United Nations Conference on the Human Environment	71/222	International Decade for Action, “Water for Sustainable Development”, 2018–2028
47/193	Observance of World Day for Water	71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development
62/68	Consideration of prevention of transboundary harm from hazardous activities and allocation of loss in the case of such harm	72/222	Education for sustainable development in the framework of the 2030 Agenda for Sustainable Development
64/200	International Strategy for Disaster Reduction		
67/291	Sanitation for All	73/226	Midterm comprehensive review of the implementation of the International Decade for Action, “Water for Sustainable Development”, 2018–2028
69/172	Human rights in the administration of justice		
69/215	International Decade for Action, “Water for Life”, 2005–2015, and further efforts to achieve the sustainable development of water resources	73/238	The role of the international community in the prevention of the radiation threat in Central Asia
69/235	Industrial development cooperation		
70/169	The human right to safe drinking water and sanitation	75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028
70/209	United Nations Decade of Education for Sustainable Development (2005–2014)		

Economic Commission for Europe decisions

CEP/AC.13/2005/2	Report of the high-level meeting of environment and education ministries (2005) adopting the ECE strategy for education for sustainable development	ECE/BATUMI. CONF/2016/2/ Add.1	Declaration: “Greener, cleaner, smarter!” by ministers of the region of ECE, report of the eighth Environment for Europe Ministerial Conference, 2016
ECE/BELGRADE. CONF/2007/4/ Add.1	Statement on education for sustainable development and of the environment of the ECE region adopted at the joint session on education for development of the sixth Ministerial Conference, entitled “Environment for Europe”, 2007	ECE/BATUMI. CONF/2016/2/ Add.2	Batumi ministerial statement on education for sustainable development adopted by the high-level meeting of education and environment ministries of the region of ECE, report of the eighth Environment for Europe Ministerial Conference, 2016
ECE/AC.21/2021/ 2-EUCHP2018924/ 4.3.2	Report of the High-level Meeting on Transport, Health and Environment and of the special session of the Steering Committee of the Transport, Health and Environment Pan-European Programme	ECE/NICOSIA. CONF/2022/Add.1	Ministerial declaration of the ninth Environment for Europe Ministerial Conference
ECE/ASTANA. CONF/2011/2/ Add.1	Declaration: “Save water, grow green!” by ministers of the region of ECE, report of the seventh Ministerial Conference, entitled “Environment for Europe”, 2011	ECE/NICOSIA. CONF/2022/Add.2	Nicosia ministerial statement on education for sustainable development

Relevant decisions of the governing bodies of the multilateral environmental agreements of the Economic Commission for Europe

ECE/EB.AIR/148 and Add.1	Report of the Executive Body for the Convention on Long-range Transboundary Air Pollution on its forty-first session	ECE/MP.PP/2021/2 and Add.1	Report of the Meeting of the Parties to the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters on its seventh session
ECE/MP.PRTR/ 2021/6 and Add.1	Report of the Meeting of the Parties to the Protocol on Pollutant Release and Transfer Registers to the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters on its fourth session		

Part V Regional cooperation for development

ECE/MP.PP/2021/16-ECE/MP.PRTR/2021/2 and Add.1	Report of the Joint High-level Segment of the seventh session of the Meeting of the Parties to the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters and of the fourth session of the Meeting of the Parties to the Protocol on Pollutant Release and Transfer Registers, and the Geneva Declaration on Environmental Democracy for Sustainable, Inclusive and Resilient Development, adopted by the two Meetings of the Parties	ECE/MPEIA/27-ECE/MP.EIA/SEA/11 and Add.1	Report of the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context and of the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context serving as the Meeting of the Parties to the Protocol on Strategic Environmental Assessment on their intermediary sessions
ECE/MP.EIA/23-ECE/MP.EIA/SEA/7 and Add.1, Add.2 and Add.3	Report of the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context on its seventh session, and the Meeting of the Parties to the Convention on Environmental Impact Assessment in a Transboundary Context serving as the Meeting of the Parties to the Protocol on Strategic Environmental Assessment on its third session	ECE/CP.TEIA/42 and Add.1	Report of the Conference of the Parties to the Convention on the Transboundary Effects of Industrial Accidents on its eleventh meeting
		ECE/MP.WAT/63 and Add.1 and Add.2	Report of the Meeting of the Parties to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes on its ninth session
		ECE/MP.WH/19 and Add.1 and Add.2	Report of the Meeting of the Parties to the Protocol on Water and Health to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes on its fifth session

**Subprogramme 2
Transport***General Assembly resolutions*

58/9	Global road safety crisis	72/212	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals
68/269	Improving global road safety		
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	72/271 73/243	Improving global road safety
69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	74/299	Follow-up to the Second United Nations Conference on Landlocked Developing Countries
70/197	Towards comprehensive cooperation among all modes of transport for promoting sustainable multimodal transit corridors	76/255	Improving global road safety
70/217	Follow-up to the second United Nations Conference on Landlocked Developing Countries		Integration of mainstream bicycling into public transportation systems for sustainable development

Economic and Social Council resolutions

1999/65	Reconfiguration of the Committee of Experts on the Transport of Dangerous Goods into a Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals	2021/13	Work of the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals
2013/7	Europe-Africa fixed link through the Strait of Gibraltar	2022/2	Revised terms of reference of the Inland Transport Committee of the Economic Commission for Europe

Economic Commission for Europe decisions

ECE/AC.21/2014/2	Report of the High-level Meeting on Transport, Health and Environment on its fourth session	ECE/TRANS/236	Report of the Inland Transport Committee on its seventy-fifth session (Joint Declaration on the promotion of Euro-Asian Rail Transport and Activities towards Unified Railway Law; and Joint Statement on Future Development of Euro-Asian Transport Links)
ECE/TRANS/224	Report of the Inland Transport Committee on its seventy-fourth session (UNECE Road Map for promoting ITS-20 global actions 2012–2020)		

Section 20 Economic development in Europe

ECE/TRANS/248	Report of the Inland Transport Committee on its seventy-seventh session	B (66)	Endorsement of the Geneva Charter on Sustainable Housing
ECE/TRANS/254	Report of the Inland Transport Committee on its seventy-eighth session	ECE/TRANS/294	Report of the Inland Transport Committee on its eighty-second session (adopting Ministerial Declaration on enhancing sustainable inland transport solutions to global climate and environmental challenges: a united call to action)
ECE/TRANS/270	Report of the Inland Transport Committee on its seventy-ninth session (adopting Ministerial Resolution on embracing the new era for sustainable inland transport and mobility)		
ECE/TRANS/274	Report of the Inland Transport Committee on its eightieth session	ECE/TRANS/304	Report of the Inland Transport Committee on its eighty-third session (adopting Ministerial resolution on enhancing resilient inland transport connectivity in emergency situations: an urgent call for concerted action, and adopting the updated ECE road map on intelligent transport systems)
ECE/TRANS/288	Report of the Inland Transport Committee on its eighty-first session (adopting Ministerial Resolution on enhancing cooperation, harmonization and integration in the era of transport digitalization and automation; Committee resolution no. 265 on the ministerial declaration “Inland Navigation in a Global Setting” and on facilitating the development of the inland water transport; and the Committee strategy until 2030)	ECE/TRANS/316	Report of the Inland Transport Committee on its eighty-fourth session (adopting ministerial resolution on ushering in a decade of delivery for sustainable inland transport and sustainable development)

Decisions of the treaty bodies of United Nations transport agreements

E/ECE/TRANS/505/Rev.3	1958 Agreement Concerning the Adoption of Harmonized Technical United Nations Regulations for Wheeled Vehicles, Equipment and Parts which can be Fitted and/or be Used on Wheeled Vehicles and the Conditions for Reciprocal Recognition of Approvals Granted on the Basis of these United Nations Regulations	ECE/TRANS/ADN/CONF/10/Add.1	European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways
		ECE/TRANS/WP.30/AC.2/125	Report of the Administrative Committee for the TIR Convention 1975 on its sixty-first session (annex II, “Joint statement on the computerization of the TIR procedure”)
ECE/RCTE/CONF/4	1997 Agreement concerning the adoption of uniform conditions for periodical technical inspections of wheeled vehicles and the reciprocal recognition of such inspections	ECE/TRANS/WP.30/AC.2/147 and Corr.1	Report of the Administrative Committee for the TIR Convention 1975 on its seventy-second session (annex I: Consolidated draft eTIR legal framework).
ECE/TRANS/132	1998 Agreement concerning the establishment of global technical regulations for wheeled vehicles, equipment and parts which can be fitted and/or used on wheeled vehicles		

**Subprogramme 3
Statistics***General Assembly resolutions*

67/144	Intensification of efforts to eliminate all forms of violence against women	73/148	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: sexual harassment
68/261	Fundamental Principles of Official Statistics		
69/210	Entrepreneurship for development	76/140	Improvement of the situation of women and girls in rural areas
69/282	World Statistics Day	76/141	Violence against women migrant workers
72/234	Women in development		

Economic and Social Council resolutions and decisions

2006/6	Strengthening statistical capacity	2014/219	Report of the Statistical Commission on its forty-fifth session (Statistical Commission decision 45/103: Programme review: broader measures of progress)
2013/235	Report of the Statistical Commission on its forty-fourth session (Statistical Commission decision 44/105: Environment statistics)		
2014/7	Further implementation of the Madrid International Plan of Action on Ageing, 2002	2015/10	2020 World Population and Housing Census Programme

Part V Regional cooperation for development

2015/216	Report of the Statistical Commission on its forty-sixth session (Statistical Commission decisions 46/102: Population and housing censuses; 46/107: International trade and economic globalization statistics)	2021/7	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2016/27	Strengthening institutional arrangements on geospatial information management	2021/224	Report of the Statistical Commission on its fifty-second session (Statistical Commission decisions 52/102: Data and indicators for the 2030 Agenda for Sustainable Development; 52/103: Partnership, coordination and capacity-building for statistics for the 2030 Agenda for Sustainable Development; 52/105: Economic statistics; 52/106: National accounts)
2017/7	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development	2022/3	Ensuring that the work in the field of statistics and data is adaptive to the changing statistical and data ecosystem (paras. 4 and 9–10)
2017/228	Report of the Statistical Commission on its forty-eighth session (Statistical Commission decisions 48/103: Transformative agenda for official statistics; 48/107: Fundamental Principles of Official Statistics; 48/108: Integration of statistical and geospatial information; 48/114: Business registers)	2022/324	Report of the Statistical Commission on its fifty-third session (decisions 53/101 (global indicator framework for the Sustainable Development Goals and targets of the 2030 Agenda for Sustainable Development), 53/104 (data stewardship), 53/106 (regional statistical development), 53/107 (population and housing censuses), 53/111 (gender statistics), 53/115 (environmental-economic accounting), 53/116 (climate change statistics), 53/117 (national accounts), 53/119 (business and trade statistics), 53/123 (informal economy statistics), 53/124 (big data) and 53/127 (integration of statistical and geospatial information))
2018/5	Strategies for eradicating poverty to achieve sustainable development for all

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advice to and consultations with member States and United Nations country teams to facilitate implementation of the United Nations Sustainable Development Cooperation Framework process by 17 countries.

D. Communication deliverables

Outreach programmes, special events and information materials: promotional materials (brochures, banners, panels, posters and postcards) for regional access; information materials for United Nations Road Safety Fund advocacy campaign and awareness-raising material; and globally accessible films on ECE activities.

External and media relations: ECE weekly newsletter; and news, approximately 200 press releases and press conferences on ECE activities for regional and global access.

Digital platforms and multimedia content: ECE website; ECE Executive Committee, the gender equality and the technical cooperation activities websites; and news on ECE activities on four social media platforms.

Evaluation activities

- 20.16 The following evaluations completed in 2022 have guided the proposed programme plan for 2024:
- (a) Office of Internal Oversight Services (OIOS) evaluation of ECE subprogrammes 4 and 6;
 - (b) OIOS Secretariat-wide evaluations: of Secretariat entities' contribution to the Sustainable Development Goals, and on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives for 2020–2021;
 - (c) Evaluation conducted by ECE on activities serviced by ECE under the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters (Aarhus Convention) and its Protocol on Pollutant Release and Transfer Registers (2018–2021) (subprogramme 1);
 - (d) Evaluation conducted by ECE on the relevance of the Forest Products Annual Market Review to the needs of member States and challenges in the forest sector (subprogramme 7);
 - (e) Evaluation conducted by ECE on the ECE Forum of Mayors (subprogramme 8).
- 20.17 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, the main conclusions and recommendations emerging from the evaluation of the ECE Forum of Mayors were shared with member States in advance of the eighty-third session of the Committee on Urban Development, Housing and Land Management (ECE/HBP/2022/4) and provided the basis for the session's deliberations on the objectives, format and frequency of the Forum. The findings of the evaluation have been taken into account in the new plan (subprogramme 8).
- 20.18 The following evaluations are planned for 2024:
- (a) Implementation of the Inland Transport Committee strategy until 2030 (subprogramme 2);
 - (b) Supporting member States in statistics for the Sustainable Development Goals (subprogramme 3);
 - (c) Sustainable resource management: regular budget activities on the United Nations Framework Classification for Resources and the United Nations Resource Management System (subprogramme 5).

Programme of work

Subprogramme 1 Environment

Objective

- 20.19 The objective, to which this subprogramme contributes, is to improve environmental governance and performance for safeguarding the environment and health.

Strategy

- 20.20 To contribute to the objective, the subprogramme will:
- (a) Support the implementation of outcomes of global and regional summits and conferences, and support and promote the implementation by countries of the ECE multilateral environmental agreements, contributing to achieving mainly Sustainable Development Goals 3, 6, 9, 11 to 13 and 15 to 17, through the core interlinked functions of international policy dialogue, normative work, capacity-building and the dissemination of good practices and lessons learned in the areas of air quality, water, industrial safety, public participation, impact assessment, environmental monitoring and assessment, environmental performance, education for sustainable development and the mainstreaming of environmental concerns into other dimensions of sustainable development;
 - (b) Support and promote the implementation of the ECE policy tools, including the ECE Environmental Performance Review Programme, contributing to achieving mainly Goals 6, 11 to 13 and 15; the ECE Environmental Monitoring and Assessment Programme, contributing to achieving mainly Goal 17; the ECE strategy for education for sustainable development, contributing to achieving Goals 4, 12 and 13; and the Transport, Health and Environment Pan-European Programme, contributing to achieving mainly Goals 3, 11, 13 and 17;
 - (c) Support and promote the sharing of information (e.g., through the Shared Environmental Information System), experiences and good practices in the ECE region;
 - (d) Promote synergies among ECE multilateral environmental agreements;
 - (e) Conduct environmental performance reviews, assisting countries in the implementation of the recommendations from those reviews and monitor the impact of the recommendations on national policies;
 - (f) Using a country needs-based approach, support countries, with a focus on those in the Caucasus, Central Asia and Eastern and South-Eastern Europe, in environmental policymaking, monitoring, assessment and management, including by providing an intergovernmental decision-making platform, organizing capacity-building activities and providing advisory services;
 - (g) Work with interested non-ECE countries, including those wishing to join the multilateral environmental agreements that are open to global accession;
 - (h) Support member States in addressing emerging issues related to the work of the subprogramme, including those resulting from international and regional processes by, among others, providing advisory support and developing policy packages and/or recommendations, and supporting countries in the development of region-wide approaches to such emerging issues (e.g., on sustainable infrastructure).
- 20.21 The above-mentioned work is expected to result in:
- (a) Improved environmental governance and performance by member States;

- (b) Strengthened integration of environmental concerns into member States’ sectoral policies, including the post-COVID-19 pandemic economic recovery phase;
- (c) More effective development and implementation of environmental legislation and policy by member States;
- (d) Improved response to environmental challenges by member States;
- (e) Enhanced cross-border cooperation between countries and effective international and national cooperation;
- (f) Strengthened implementation of ECE multilateral environmental commitments and increased geographical coverage.

Programme performance in 2022

Improved protection of environmental defenders

20.22 Under article 3 (8) of the Aarhus Convention, parties shall ensure that persons exercising their rights in conformity with the provisions of the Convention shall not be penalized, persecuted or harassed in any way for their involvement. Until recently, there was no mechanism to specifically protect environmental defenders within a legally binding framework, either under the United Nations system or other intergovernmental structures. In 2022, at the Meeting of the Parties to the Convention, at its third extraordinary session, an independent Special Rapporteur on environmental defenders was elected. The Special Rapporteur’s role is to take measures to protect any person experiencing or at imminent threat of penalization, persecution or harassment for seeking to exercise their rights under the Convention. The subprogramme prepared the required official documents and background material, and organized and serviced all preparatory intergovernmental meetings, as well as the sessions of the Meeting of the Parties. In 2021 and 2022, steps were taken at the Meeting of the Parties to strengthen public participation in decision-making and access to information and justice in environmental matters, as well as uphold the human right to a clean, healthy and sustainable environment, which was recently recognized by the Human rights Council (resolution [48/13](#)) and the General Assembly (resolution [76/300](#)).

20.23 Progress towards the objective is presented in the performance measure below (see table 20.2).

Table 20.2
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	Improved protection of environmental defenders through establishment of a rapid response mechanism pursuant to decision VII/9 of the seventh session of the Meeting of the Parties to the Aarhus Convention ^a	Improved protection of environmental defenders through election of an independent Special Rapporteur on environmental defenders

^a See ECE/MP.PP/2021/2/Add.1.

Planned results for 2024

Result 1: improved information for strengthening transboundary water cooperation

Programme performance in 2022 and target for 2024

- 20.24 The subprogramme’s work contributed to 117 countries for which data on transboundary river and lake component of indicator 6.5.2 were submitted to the Statistical Commission in 2022, which exceeded the planned target of 97 countries.
- 20.25 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.I).

Figure 20.I

Performance measure: number of countries for which data on transboundary river and lake component of indicator 6.5.2 are submitted to the Statistical Commission (cumulative)

Result 2: strengthened industrial safety governance in Eastern and South-Eastern Europe, the Caucasus and Central Asia

Programme performance in 2022 and target for 2024

- 20.26 The subprogramme’s work contributed to one meeting of the Serbian national policy dialogue and supported Serbia’s review of its policies and legislation to align with the Convention on the Transboundary Effects of Industrial Accidents, which met the planned target. Owing to a suspension of a project to launch the national policy dialogues on industrial safety by the donor, the target of launching a national policy dialogue on industrial safety in Central Asia was not met.
- 20.27 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 20.3).

Table 20.3

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Serbia initiated the development of terms of reference for a steering committee on national policy dialogues	Serbia established a national policy dialogue steering committee Central Asian countries reviewed	Serbian national policy dialogue meeting addresses issues of national concern, involving relevant authorities	National policy dialogues are sustained and implemented by Serbia and	National policy dialogues are sustained and implemented by Serbia

Part V Regional cooperation for development

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Central Asian countries began activities to launch national policy dialogues	industrial safety legislation to align with the Convention's requirements	Finalization of review of industrial safety legislation to align with the Convention's requirements	5 Central Asian countries	Serbia finalizes the national programme on industrial safety

Result 3: increased number of United Nations Member States becoming parties to multilateral environmental agreements serviced by ECE

Proposed programme plan for 2024

20.28 The subprogramme carries out activities to strengthen the capacity of Member States for accession and effective implementation of these instruments, dissemination of best practices and lessons learned. In 2022, those efforts led to the accession by Ukraine to the Convention on the Transboundary Effects of Industrial Accidents. Since 2018, countries outside the ECE region have begun to accede to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes, and a similar trend is expected for the Aarhus Convention by 2023, thereby expanding the benefits of these instruments beyond the ECE region.

Lessons learned and planned change

20.29 The lesson for the subprogramme was that it needed to apply more efforts and resources to strengthen the accession and implementation capacity of countries, including beyond the ECE region, especially regarding benefits, costs and mechanisms for multisectoral involvement, to ensure the commitment from all sectors concerned by implementation. In applying the lesson, the subprogramme will adapt and enhance outreach efforts to all sectors concerned by the implementation of the instruments, fostering an integrated and multisectoral approach, to encourage accession and ensure effective implementation.

20.30 Expected progress towards the objective is presented in the performance measure below (see figure 20.II).

Figure 20.II

Performance measure: number of parties to multilateral environmental agreements serviced by ECE (cumulative)

Deliverables

20.31 Table 20.4 lists all deliverables of the subprogramme.

19. Progress reports and performance reviews on environmental issues	4	4	4	7
20. Multilateral environmental agreements administered by the subprogramme	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: advisory services for some 100 government officials and other stakeholders of States participating in the United Nations Special Programme for the Economies of Central Asia on water, energy and other environmental issues.

D. Communication deliverables

Outreach programmes, special events and information materials: environmental performance review highlights to facilitate broad dissemination of key messages and recommendations to representatives of Governments, local authorities, academia, business and intergovernmental and non-governmental organizations, as well as media outlets in the reviewed countries.

External and media relations: press releases on environmental issues.

Digital platforms and multimedia content: website of the subprogramme.

Subprogramme 2 Transport

Objective

- 20.32 The objective, to which this subprogramme contributes, is to advance a regionally and globally sustainable inland transport (road, rail, inland waterway and intermodality) system by making it safer, cleaner, more efficient and more affordable, both for freight transport and people’s mobility.

Strategy

- 20.33 To contribute to the objective, the subprogramme will:
- (a) Service the Inland Transport Committee and its 20 working parties and 11 administrative committees, as well as the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals and more than 50 formal and informal expert networks;
 - (b) Administer the international regulatory framework for inland transport, which includes 59 United Nations legal instruments on safety, pollution, efficiency, multimodality and effectiveness (normative function), and ensure that the Committee’s regulatory functions are up to date with current technologies and transport innovations, such as intelligent transport systems, autonomous vehicles and digitalization, and are open to all United Nations Member States, as appropriate, by developing new and updating existing legal instruments, as necessary, including maintaining the database of international regulatory frameworks for inland transport;
 - (c) Provide an intergovernmental policy dialogue platform at the annual sessions of the Inland Transport Committee to review emerging challenges and emergency situations; support consensus-building during the Committee’s events in favour of regional and interregional connectivity, among other matters, including through the adoption of high-level statements or resolutions on harmonized action by member States and contracting parties in order to enable the full implementation of the Committee’s mandate;
 - (d) Analyse and provide technical assistance and capacity-building on accession to and implementation of legal instruments, at the request of member States and contracting parties;

- (e) Contribute to the work of the Special Envoy of the Secretary-General for Road Safety and the operation of the United Nations Road Safety Fund to facilitate global improvements in road safety through policy dialogue at Committee meetings, and provide capacity-building and advisory assistance with regard to promoting legal instruments, calls for proposals and other related activities, as appropriate;
- (f) Support the efforts of member States to respond to and recover from emergency situations, including pandemics, while minimizing disruptions to the functioning of national, regional and international transport systems and the implementation of the sustainable development agenda, including Sustainable Development Goal 5, on gender equality;
- (g) Promote knowledge-sharing and cooperation among Governments and key stakeholders to raise awareness of emerging issues and best responses, to improve tracking and measuring of progress towards achieving the Goals, and to facilitate the adaptation of legally binding instruments and frameworks to new realities, including through new guidance materials.

20.34 The above-mentioned work is expected to result in:

- (a) Improvements in sustainable mobility, and in monitoring and measuring the Sustainable Development Goals;
- (b) Improvements in inland transport, leading to safer, cleaner, more efficient and more affordable multimodal systems for contracting parties to the United Nations inland transport conventions;
- (c) More efficient and resilient cross-border flows of goods and people regionally and globally;
- (d) Enhanced intergovernmental cooperation in emergency situations and minimized disruptions to the continued implementation and updating of United Nations inland transport conventions.

Programme performance in 2022

Accelerated digitalization of legal instruments in inland transport in response to COVID-19

20.35 In response to inland transportation issues such as border-crossing, which arose during the COVID-19 pandemic, the subprogramme developed enhanced response measures, including through the implementation of a new generation of legal instruments supporting the digitalization and computerization of transport and border-crossing procedures, such as the eTIR application in six countries that have interconnected their customs system with the eTIR international system. The official operations of the eTIR procedure started in December 2022 and are complemented by the creation of specialized knowledge exchange to facilitate and accelerate the operationalization of some of these instruments. For example, the Group of Experts on the operationalization of eCMR was established in 2022, which contributed to increased accessions to the Additional Protocol to the Convention on the Contract for the International Carriage of Goods by Road concerning the electronic consignment note and the deployment of LearnITC, the inland transport and trade connectivity e-learning platform, in 2022, to build an in-depth understanding of the United Nations inland transport legal instruments and their digitalization.

20.36 Progress towards the objective is presented in the performance measure below (see figure 20. III).

Figure 20.III

Performance measure: number of accessions by Member States to legal instruments for the digitalization of transport and border-crossing procedures (CMR, eCMR and TIR) (cumulative)

Abbreviations: CMR: Convention on the Contract for the International Carriage of Goods by Road; eCMR: Additional Protocol to the Convention on the Contract for the International Carriage of Goods by Road concerning the electronic consignment note; TIR, Customs Convention on the International Transport of Goods under Cover of TIR Carnets.

Planned results for 2024

Result 1: strengthened regulatory support in road safety contributing to fewer worldwide road accident fatalities and injuries

Programme performance in 2022 and target for 2024

20.37 The subprogramme’s work contributed to an increase to 426 contracting parties to core United Nations road safety conventions, which exceeded the planned target of 411.

20.38 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.IV).

Figure 20.IV

Performance measure: number of contracting parties to core United Nations road safety conventions^a (cumulative)

^a For the 2023 and 2024 targets, the performance measure will include eight core United Nations road safety conventions; the additional instrument is the European Agreement concerning the Work of Crews of Vehicles Engaged in International Road Transport.

Result 2: enhanced regulatory framework for sustainable inland transport systems

Programme performance in 2022 and target for 2024

- 20.39 The subprogramme’s work contributed to an increase to 1,822 contracting parties to United Nations legal instruments on transport administered by ECE, which exceeded the planned target of 1,810.
- 20.40 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.V).

Figure 20.V

Performance measure: number of contracting parties to United Nations legal instruments on transport administered by ECE^a (cumulative)

^a The actual value for 2021 was increased on the basis of recent actual data.

Result 3: increased number of new and updated legal instruments strengthening capacity of Member States to address climate change

Proposed programme plan for 2024

- 20.41 There is a growing demand from Member States to support them in advancing sustainable inland transport and mobility. The 2019 adoption of the Inland Transport Committee strategy until 2030 and the endorsement of the revised terms of reference of the Committee by the Economic and Social Council in 2022 provided an enhanced mandate for the subprogramme to develop new and strengthen existing United Nations regulations essential for sustainable transport systems. The subprogramme has focused on, among others, improved adaptation to the most recent technological innovations and introducing more stringent limits for road vehicles aimed at increasing their environmental performance.

Lessons learned and planned change

- 20.42 The lesson for the subprogramme was that, the strengthened regulatory framework notwithstanding, there was a growing demand from Member States to support them in advancing sustainable inland transport and mobility and there were opportunities to accelerate the regulatory support to implement the Inland Transport Committee strategy towards a sustainable and decarbonized or low-emission inland transport sector (ECE/TRANS/316, para. 54). In applying the lesson, the subprogramme will enhance its focus on areas of increased demand, in particular addressing climate change, through, among others, dedicated high-level Committee meetings, declarations and commitments, thus further accelerating its work on modernizing its legal instruments. Furthermore, the subprogramme will develop and implement new analytical and training tools, policy reviews and capacity-building workshops that further assist Member States and contracting parties in achieving their targets regionally and globally.

20.43 Expected progress towards the objective is presented in the performance measure below (see figure 20.VI).

Figure 20.VI

Performance measure: number of new and updated United Nations legal instruments under ECE purview entering into force annually and improving the climate performance of the transport sector^a (cumulative)

^a The chart reflects data since the 2015 Paris Agreement.

Deliverables

20.44 Table 20.5 lists all deliverables of the subprogramme.

Table 20.5

Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies

Technical materials (number of materials)	1	1	1	2
17. Recommendations for performance evaluation of automated driving systems	–	–	–	1
18. Transport statistics – country profiles	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: advisory services for contracting parties of United Nations transport conventions administered by ECE on legal instruments relating to inland transport, facilitation of transport, border crossing, road safety, vehicle construction, and transport of dangerous goods and other special cargo.

Databases and substantive digital materials: the International TIR Data Bank for users from more than 70 contracting parties of the TIR Convention, which includes the list of the more than 31,000 transport companies authorized to use the TIR system; TIR and eTIR portals; the eTIR international system allowing the exchange of data among the eTIR stakeholders in the course of TIR transports following the eTIR procedure; the International Transport Infrastructure Observatory, hosting data on a large variety of transport infrastructure networks and nodes; the Sustainable Inland Transport Connectivity Indicators online user platform, offering a set of measurable criteria for Governments to evaluate the extent to which they implement the relevant United Nations legal instruments in the field of transport and the degree to which their inland transport systems are interoperable with those in neighbouring countries; the database of main standards and parameters of the E Waterway Network; inventory of existing European Agreement on Main International Railway Lines and European Agreement on Important International Combined Transport Lines and Related Installations standards and parameters; databases on transport statistics, road traffic accidents, transport of dangerous goods, transport of perishable foodstuffs, urban transport and transport and environment; Rail Security Observatory; digitized signs and signals (E-CoRSS) under the Convention on Road Signs and Signals; and the database of specimens of the International Certificate for Operators of Pleasure Craft.

D. Communication deliverables

Outreach programmes, special events and information materials: information materials, including brochures on legal instruments and activities of the subprogramme for global and regional audiences.

External and media relations: press releases for the subprogramme.

Digital platforms and multimedia content: LearnITC and other digital platforms and multimedia content on sustainable transport and mobility; and website of the subprogramme for global and regional audiences.

**Subprogramme 3
Statistics**

Objective

- 20.45 The objective, to which this subprogramme contributes, is to advance official statistics at the national and international levels for evidence-based policymaking and assessing progress towards achieving the Sustainable Development Goals and to ensure the coordination of statistical activities in the ECE region under the Conference of European Statisticians.

Strategy

- 20.46 The strategy of the subprogramme is guided by the priorities and needs of member States and is based on the core interlinked functions: the streamlining of international statistical work in the ECE region by promoting policy dialogue; methodological work to develop and promote guidelines and recommendations to enhance the quality of statistics; and the statistical capacity development of ECE member States with less developed statistical systems.
- 20.47 To contribute to the objective, the subprogramme will:
 - (a) Promote in-depth statistical dialogue at the Conference of European Statisticians and expert meetings;

- (b) Launch regional and country-specific initiatives related to methodological work to develop and disseminate statistical models, guidelines and recommendations to enhance the quality of statistics and to support the modernization of national statistical offices and their changing role to become data stewards, as well as the promotion of the use of official statistics;
 - (c) Maintain and develop the ECE statistical database;
 - (d) Establish and strengthen partnerships between geospatial experts and statisticians to support the integration of statistical and geospatial information, in cooperation with statistical departments of other regional entities, as well as international specialized agencies active in the region;
 - (e) Facilitate the exchange of experiences and good practices in the fields of population and housing censuses, price statistics and environment statistics, including leveraging adaptations introduced in response to COVID-19 restrictions;
 - (f) Provide support to countries in planning and conducting their census and developing their statistical capacity, including cross-cutting topics such as statistics on the Sustainable Development Goals, statistical legislation, data collection, data integration and dissemination, and human resource management.
- 20.48 The above-mentioned work is expected to result in:
- (a) Improved statistical methodology and capacity of member States to measure and monitor the Sustainable Development Goals and develop evidence-based policies to manage their post-COVID-19 pandemic recovery;
 - (b) Member States using innovative and efficient approaches to conducting censuses that result in the improved cost-efficiency, coverage, accuracy, comparability and timeliness of dissemination of the census results.

Programme performance in 2022

Improved climate change-related statistics in the ECE region

- 20.49 While national statistical offices can help to generate climate change-related statistics, this area still requires methodological development, coordination and exchange of experiences and good practices. The subprogramme developed the first international recommendations on climate change-related statistics in 2014 and has supported member States in implementing them through annual expert forums, the development of indicators and the collection and dissemination of good practices. In 2022, a new task force began to develop guidance on the role of national statistical offices in meeting national climate objectives. The subprogramme has been supporting the task force and working with national statistical offices to develop a compilation of greenhouse gas inventories, produce national climate change-related indicators and improve collaboration with other national producers of climate-related data.
- 20.50 Progress towards the objective is presented in the performance measure below (see figure 20.VII).

Figure 20.VII
Performance measure: number of countries implementing ECE recommendations on climate change-related statistics (cumulative)

Planned results for 2024

Result 1: increasing the number of countries that report sex-disaggregated statistical indicators

Programme performance in 2022 and target for 2024

- 20.51 The subprogramme’s work contributed to an increase, to 68 per cent, of ECE member states reporting sex-disaggregated indicators in the Sustainable Development Goals database, which exceeded the planned target of 67 per cent.
- 20.52 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.VIII).

Figure 20.VIII
Performance measure: sex-disaggregated indicators available for ECE member States in the ECE Sustainable Development Goals database (cumulative)

(Percentage)

Result 2: increased number of countries collaborating on developing and using machine learning techniques for the production of official statistics

Programme performance in 2022 and target for 2024

- 20.53 The subprogramme’s work contributed to an increase to 36 member States actively collaborating in developing and using machine learning techniques for the production of official statistics, which exceeded the planned target of 30 member States.
- 20.54 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.IX).

Figure 20.IX

Performance measure: number of member States actively collaborating in developing and using machine learning techniques for the production of official statistics (cumulative)

Result 3: improved environmental statistics and indicators in the Economic Commission for Europe region

Proposed programme plan for 2024

- 20.55 Among the three pillars of sustainable development – economy, society and environment – data availability for the environmental pillar is the lowest. According to estimates, for approximately 58 per cent of the environment-related Sustainable Development Goals indicators there are insufficient data, making it difficult to assess progress and understand the environmental challenges. The subprogramme has been working with member States to improve their environment statistics through the Joint Task Force on Environmental Statistics and Indicators, in cooperation with the ECE environment subprogramme. The Task Force supports the implementation of the ECE guidelines for the application of environmental indicators in member States. Until now, the work has focused mainly on East and South-East Europe, the Caucasus and Central Asia.

Lessons learned and planned change

- 20.56 The lesson for the subprogramme was that there was a strong demand to further develop environment statistics in all member States, because providing data on environment-related Sustainable Development Goals and other emerging policy areas, such as the circular economy, are common challenges in the ECE region. In applying the lesson, the subprogramme will extend its work so that it is open to all member States, providing a platform to exchange knowledge and experience on common challenges in implementing the ECE guidelines for the application of environmental indicators and identifying emerging policy areas where further guidance is needed.
- 20.57 Expected progress towards the objective is presented in the performance measure below (see figure 20.X).

Figure 20.X

Performance measure: number of countries improving environmental statistics and indicators through the Joint Task Force on Environmental Statistics and Indicators (annual)

Deliverables

20.58 Table 20.6 lists all deliverables of the subprogramme.

Table 20.6

Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	81	69	81	69

External and media relations: articles for the “UNECE Weekly” and “EnvStats” newsletters for regional access.

Digital platforms and multimedia content: interactive digital workspaces (wikis, including the ECE census wiki); and website of the subprogramme.

Subprogramme 4 Economic cooperation and integration

Objective

- 20.59 The objective, to which this subprogramme contributes, is to strengthen policies on innovation, competitiveness and public-private partnerships in the ECE region.

Strategy

- 20.60 The strategy of the subprogramme is based on the implementation of three core interlinked functions in the subprogramme’s two areas of work (innovation and competitiveness policies, and public-private partnerships): international policy dialogue; normative and analytical work; and capacity-building and the sharing of best practices and lessons learned.

- 20.61 To contribute to the objective, the subprogramme will:

- (a) Support member States in creating a conducive business environment by developing good practices to inform innovation policy reforms that drive sustainable development, including through advisory-based analyses of national innovation systems, policies and institutions, upon request; and through capacity-building workshops and seminars at the national and subregional levels;
- (b) Build the capacity of member States in creating regulatory frameworks and public-private partnership project pipelines that can help to close the Sustainable Development Goals infrastructure financing gap, including through:
 - (i) The promotion of innovative modalities of financing, development and management of critical infrastructure;
 - (ii) The development of international guidelines and standards to design public-private partnership projects and legal and regulatory frameworks;
 - (iii) The use, on demand, of a methodology to evaluate and score public-private partnership projects in support of sustainable development;
 - (iv) Cooperation with multilateral platforms for sustainable infrastructure (including SOURCE¹);
- (c) Focus some of its policy dialogues, analyses and recommendations, standards and capacity-building on addressing economic challenges through innovation policies and public-private partnership infrastructure projects that can facilitate innovation and develop infrastructure to make economies more resilient and sustainable.

- 20.62 This work will help member States to make progress towards achieving Sustainable Development Goals 8, 9, 12 and 17 and contribute to enhancing the sustainable use of natural resources, and digital and green transformations for sustainable development.

¹ SOURCE is the multilateral platform for sustainable infrastructure.

- 20.63 The above-mentioned work is also expected to result in:
- (a) Improved innovation-related policies and institutions in member States for sustainable development;
 - (b) The improved design and operation of public-private partnerships by member States that contribute to sustainable development and lead to more sustainable projects.

Programme performance in 2022

Improved capacity of member States in the use of public-private partnerships to finance sustainable development

- 20.64 The subprogramme promoted the concept of “PPPs for the SDGs”, an enhanced approach for public-private partnerships that overcomes some of the weaknesses in the way in which the traditional public-private partnership model has been implemented, placing equal focus on the economic, social and environmental pillars of sustainable development, including making the transition to the circular economy and the sustainable use of natural resources. To support member States in implementing public-private partnerships for sustainable infrastructure development, the subprogramme developed a public-private partnership evaluation methodology to score and assess projects in countries against a set of sustainability outcomes and the Sustainable Development Goals. The subprogramme provided training to member States on the use of the evaluation methodology to identify, develop and implement infrastructure that promotes a circular economy and is resilient, environmentally and fiscally sustainable and of high quality, in which people are the main beneficiaries.
- 20.65 Progress towards the objective is presented in the performance measure below (see table 20.7).

Table 20.7
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	Evaluation methodology approved by member States 50 public-private partnerships projects assessed by member States during a pilot phase	An additional 50 public-private partnerships projects assessed by member States

Planned results for 2024

Result 1: improved capacity of member States to use innovation to achieve their sustainable development objectives

Programme performance in 2022 and target for 2024

- 20.66 The subprogramme’s work contributed to 1,100 policymakers and other innovation stakeholders from requesting countries benefiting from ECE capacity-building on innovation policy, which exceeded the planned target of 1,000 policymakers and other innovation stakeholders.
- 20.67 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.XI).

Figure 20.XI
Performance measure: number of policymakers and other innovation stakeholders from requesting countries that have benefited from ECE capacity-building on innovation policy (cumulative)

Result 2: improved capacity of member States in the development of infrastructure projects in support of the Sustainable Development Goals and the circular economy

Programme performance in 2022 and target for 2024

- 20.68 The subprogramme’s work contributed to 270 policymakers from member States that have used the ECE standards and guidelines on public-private partnership for the Sustainable Development Goals, which exceeded the planned target of 225 policymakers.
- 20.69 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.XII).

Figure 20.XII
Performance measure: number of policymakers from member States that have used the ECE standards and guidelines on public-private partnership for the Sustainable Development Goals to identify and prepare infrastructure projects aligned with the Goals and the circular economy and the sustainable use of natural resources (cumulative)

Result 3: member States implement transformative innovation² policies and good practices for sustainable development

Proposed programme plan for 2024

20.70 To accelerate progress towards achieving the Sustainable Development Goals, the ECE region needs more transformative innovations that can make entire systems sustainable (e.g., the built environment or individual mobility). The subprogramme has been providing good practices, policy advice and capacity-building on policies to promote innovation for sustainable development.

Lessons learned and planned change

20.71 The lesson for the subprogramme was that more evidence was needed on policies to promote transformative innovation and that member States had a large demand for policy analysis, dialogue and capacity-building on the topic. In applying the lesson, the subprogramme will use a network of innovation policymakers and agencies to develop an evidence base for policymaking and to increase the capacity of policymakers to promote transformative innovation.

20.72 Expected progress towards the objective is presented in the performance measure below (see table 20.8).

Table 20.8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Weak evidence base for transformative innovation policies	Member States endorsed good practices on innovation policies for the circular economy transformation, and noted the need for more policy learning	Member States endorsed the establishment of an ECE transformative innovation network of innovation agencies	Member States endorse an additional 10 good practices on transformative innovation policy	At least 3 member States implement policies and good practices to stimulate transformative innovation for sustainable development

Deliverables

20.73 Table 20.9 lists all deliverables of the subprogramme.

Table 20.9
Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

10. Fact-finding missions for Innovation for Sustainable Development Reviews and public-private partnership needs assessments	–	2	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services under the Working Party on Public-Private Partnership and the Team of Specialists on Innovation and Competitiveness Policies, reaching 30 government ministries and agencies and stakeholder entities.				
Databases and substantive digital materials: database of public-private partnership case studies from some 15 member States.				
D. Communication deliverables				
External and media relations: press releases and launch events for the above publications for regional, subregional and national access.				
Digital platforms and multimedia content: subprogramme’s website for regional access.				

Subprogramme 5 Sustainable energy

Objective

- 20.74 The objective, to which this subprogramme contributes, is to ensure secure access to affordable, reliable, sustainable and modern energy for all and to reduce greenhouse gas emissions and the carbon footprint of the energy sector in the region.

Strategy

- 20.75 The strategy of the subprogramme is to support international policy dialogue and cooperation among Governments, energy industries and other stakeholders to foster sustainable energy development; develop and deploy ECE policy recommendations, norms, standards, guidelines and tools on energy-related issues; and provide capacity-building and assistance to member States, at their request, through training programmes, advisory services and technical cooperation projects. Through its work, the subprogramme will contribute to the ECE work on cross-sectoral collaboration areas, as described in paragraph 20.4 (a)–(e) above, and to priorities related to the circular economy.
- 20.76 To contribute to the objective, the subprogramme will:
- (a) Further develop normative instruments (e.g., best practices and principles), awareness-raising campaigns and the deployment of ECE tools through workshops, seminars and technical projects to help member States to meet their commitments to the 2030 Agenda and the Paris Agreement

with regard to reducing their environmental footprint related to energy, accelerating the transformation of the energy sector to meet future needs, ensuring the sustainable management of resources and assessing options to ensure energy for sustainable development;

- (b) Promote policy dialogue and cooperation among member States, regional entities and other partners on sustainable energy issues;
- (c) Provide technical assistance and guidance on energy transitions in the context of sustainable development, disseminate best practices and improve information-sharing;
- (d) Promote collaboration among private and public stakeholders that are key to implementing national and regional policies, including with regard to normative instruments and their deployment and dissemination;
- (e) Coordinate and promote efforts related to energy resilience across the ECE region and provide an ECE platform on resilient energy systems for inclusive dialogue;
- (f) Explore and increase understanding on energy-related climate financing in the ECE region, including policies and mechanisms for increasing financing for low- and zero-carbon technologies, the critical raw materials needed for low-carbon transformations and sustainable infrastructure projects.³

20.77 The above-mentioned work is expected to result in:

- (a) More effective integration of sustainable energy across national policies and normative frameworks in support of the 2030 Agenda and the Paris Agreement;
- (b) Enhanced and inclusive dialogue and cooperation among all energy actors to boost transformational investment in the energy sector, support the building of resilient energy systems and, consequently, accelerate the modernization of the energy system to meet countries' sustainable development and climate commitments;
- (c) Improved access of member States to frameworks and tools required for integrated and sustainable resource management that aid the progress towards a more circular economy and contribute to the food-water-energy nexus;
- (d) Improvement in the performance of buildings from a health perspective (e.g., temperatures, comfort, effective air intake and recycling filters), which will improve the protection and resilience of populations;
- (e) Increased understanding and implementation of climate-friendly policies and mechanisms by member States, which are aimed at addressing issues such as financing for low- and zero-carbon technologies and sustainable infrastructure, and the critical raw materials needed for such transformations.

³ This language was agreed by ECE member States at the thirty-first session of the ECE Committee on Sustainable Energy, held from 21 to 23 September 2022, and, subsequently, at the 125th meeting of the ECE Executive Committee. In particular, the Committee "agreed to the proposed modifications to the programme of work for the sustainable energy subprogramme for 2024 (ECE/ENERGY/31/2022/INF.1) and requested the secretariat to reflect the modifications in the proposed programme plan of the Sustainable energy subprogramme for 2024" (ECE/ENERGY/143, para. 76).

Programme performance in 2022

Enhanced understanding of the technology interplay for the power and energy intensive industries’ transition in the Economic Commission for Europe region

- 20.78 The ECE region depends on fossil fuels for more than 80 per cent of its primary energy demand.⁴ Energy-intensive industries account for approximately 25 per cent of total CO2 emissions globally.⁵ These industries are often crucial for modern economies, and they can assist in the post-COVID energy transition. Reducing emissions of hard-to-abate sectors is a priority for the region to meet the Paris Agreement targets.
- 20.79 In 2020, the subprogramme launched a technical assistance project⁶ and initiated consultations on the theme, including conducting six capacity-building workshops for member States on technology interplay. In 2021, the subprogramme continued consultations, conducted research on the design of low-carbon and low-emission intensive energy systems and developed an ECE dedicated toolkit.⁷ The subprogramme also conducted eight capacity-building workshops for member States on innovative technologies for energy transition.
- 20.80 Progress towards the objective is presented in the performance measure below (see table 20.10).

Table 20.10
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
30 member States nominated national focal points to the ECE project task force	Enhanced capacity of member States on innovative technology for energy transition Member States have access to research that identifies technology and policy options and to recommendations for creating a sustainable energy system	Countries of Central Asia and Ukraine deployed the ECE carbon neutrality toolkit

Planned results for 2024

Result 1: managing gases to implement the 2030 Agenda

Programme performance in 2022 and target for 2024

- 20.81 The subprogramme’s work contributed to the commitment of 16 Member States to applying ECE guidance to manage gases, which met the planned target.
- 20.82 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.XIII).

⁴ ECE, “Carbon neutrality in the UNECE region: technology interplay under the carbon neutrality concept” page 21. Available at https://unece.org/sites/default/files/2022-09/Technology%20Interplay_final_2.pdf.

Figure 20.XIII
Performance measure: number of Member States applying ECE guidance to manage gases (CH₄, H₂ and CO₂) (cumulative)

Result 2: digitalization of the energy sector as an enabler of a circular economy and the sustainable use of natural resources

Programme performance in 2022 and target for 2024

20.83 The subprogramme’s work contributed to increased awareness of member States on the role that digitalization of the energy system may play in improving system efficiency, of existing sectoral opportunities and of the potential impact of digitalization in energy on the economy and society. This work laid the groundwork for Member States to develop national case studies in the future that apply recommendations on digitalization developed by ECE.

20.84 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.XIV).

Figure 20.XIV
Performance measure: number of Member States applying ECE recommendations on digitalization by developing national case studies (cumulative)

Result 3: enhanced resilience of energy systems in the Economic Commission for Europe region

Proposed programme plan for 2024

20.85 While the ECE region has made significant progress in implementing the 2030 Agenda and achieving Sustainable Development Goal 7, there remain areas to further strengthen member States’ ability to

ensure energy resilience, which supports energy security, economic recovery and affordability and environmental sustainability.

20.86 The subprogramme has developed several mechanisms to enhance the resilience of member States’ energy systems and attain the targets of Sustainable Development Goal 7, including the carbon neutrality toolkit, renewable energy “hard talks”, best practice guidance on methane reductions, the Framework Guidelines for Energy Efficiency Standards in Buildings and the newly established ECE platform on resilient energy systems to promote ECE mechanisms and inclusive dialogue among member States.

Lessons learned and planned change

20.87 The lesson for the subprogramme was that there was an increased demand to support member States in strengthening the resilience of energy systems. In applying the lesson, the subprogramme will increase capacity-building, including through United Nations country teams, to help member States to better utilize the above-mentioned ECE mechanisms, promote international cooperation and dialogue on energy and raise awareness of how achieving Sustainable Development Goal 7 can secure sustainable energy development and improve energy system resilience.

20.88 Expected progress towards the objective is presented in the performance measure below (see figure 20.XV).

Figure 20.XV
Performance measure: number of member States using ECE mechanisms to enhance the resilience of energy systems in the ECE region (cumulative)

Deliverables

20.89 Table 20.11 lists all deliverables of the subprogramme.

D. Communication deliverables				
Outreach programmes, special events and information materials: booklets on sustainable energy and related topics, for regional access.				
External and media relations: press releases, keynote speeches and articles on the activities of the energy subprogramme.				
Digital platforms and multimedia content: subprogramme’s website for regional and global access.				

Subprogramme 6 Trade

Objective

- 20.90 The objective, to which this subprogramme contributes, is to strengthen trade facilitation and electronic business, regulatory cooperation and standardization policies, agricultural quality standards and trade-related economic cooperation in the ECE region and beyond.

Strategy

- 20.91 The strategy of the subprogramme is to support international policy dialogue on reducing regulatory and procedural barriers to trade, including those caused by cumbersome trade procedures and paperwork, by differences in trade procedures, standards and documents, or by divergent regulatory approaches and product standards; to facilitate the development of standards and recommendations in the areas of trade facilitation and e-business, agricultural quality standards and regulatory cooperation; and to provide capacity-building and enable the sharing of best practices and lessons learned.

- 20.92 To contribute to the objective, the subprogramme will:
- (a) Promote simple, transparent and effective processes for global trade through its normative work to develop standards and recommendations in the areas of trade facilitation and electronic business;
 - (b) Facilitate international policy dialogue on establishing digital trading environments and on compliance with the multilateral trading system requirements, including the dissemination of standards, recommendations and guidelines;
 - (c) Promote the circular economy and the sustainable use of natural resources, sustainable and resilient value chains and the enhanced traceability of supply chains (e.g., minimizing waste and maximizing the use of natural resources towards the circular economy) through studies, policy dialogues and technology-based pilot initiatives such as blockchain-based traceability for textile value chains. This work will help member States to make progress towards achieving Sustainable Development Goals 8 and 12;
 - (d) Strengthen regulatory cooperation and promote standards and best practices in regulatory frameworks, risk management, conformity assessments and market surveillance to facilitate a predictable and harmonized regulatory environment;
 - (e) Provide practical ways forward for standards bodies wishing to mainstream a gender perspective into standards. The subprogramme will also support capacity-building and dissemination on the use of standards and regulatory cooperation, notably with its web portal on standards for the Sustainable Development Goals (<https://standards4sdgs.unece.org/>) and its initiative on education on standards (<https://learnqi.unece.org/>). This work will support member States in making progress towards achieving Goals 5 and 17;
 - (f) Promote up-to-date agricultural quality standards and explanatory guidelines through its normative work and promote awareness of food loss reduction through policy dialogues, partnerships with international organizations and technology-based initiatives to address food loss and waste to support the progress of member States towards achieving Goals 2 and 12;
 - (g) Identify regulatory and procedural barriers to trade and assist Governments in setting action-oriented recommendations for implementing the instruments developed by the subprogramme through analytical evidence-based studies, to support member States in making progress towards achieving Goals 12 and 17;
 - (h) Deepen its international policy dialogue, normative, technical assistance and capacity-building activities on the digitalization of trade processes in order to support a sustainable and resilient recovery to support member States in making progress towards achieving Goals 8 and 9.
- 20.93 The above-mentioned work is expected to result in:
- (a) Increased implementation of simplified trade processes and the digitalization of member States' trading environments, leading to greater productivity;
 - (b) Increased transparency and traceability of the value chains and reduction of waste, promoting sustainable consumption and production patterns;
 - (c) Increased uptake of international standards by countries to enable the implementation of internationally harmonized regulatory processes;
 - (d) Improved gender equality in trade through the increased participation of women traders;
 - (e) Enhanced digitalization of trade (e.g., progress towards the adoption of trade-related digital services such as Single Window) to support the efforts of the public and private sectors in member States to facilitate trade.

Programme performance in 2022

Trade-related policies and action to promote the circular economy and resource-efficient economies

- 20.94 While trade and related policies can help to accelerate the transition to more circular economies, knowledge of policy options and capacity-building can be further strengthened.
- 20.95 As requested by member States (E/2021/37-E/ECE/1494, decision B (69)), the subprogramme has worked to promote the circular economy, including through the launch of a dedicated stakeholder engagement platform (Circular STEP), the development of policy papers and support for the Governments of Serbia and Tajikistan in strengthening policy frameworks for a circular economy. Activities included capacity-building on traceability and food loss and waste reduction and management, using ECE normative tools. The subprogramme has also continued its work to improve transparency and traceability in the garment sector, as an enabler of reduced environmental footprints and improved recyclability.
- 20.96 Progress towards the objective is presented in the performance measure below (see table 20.12).

Table 20.12

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	Knowledge-sharing among member States through a network of trade-related circular economy focal points in the ECE region	<p>Government of Serbia recognizes food waste as a separate category of communal waste and recognizes target 12.3 of the Sustainable Development Goals and its aim to halve per capita food waste. It adopts a waste management programme for the period 2022–2031, stating that separate collection of food waste will be gradually implemented</p> <p>The Tajikistan Ministry of Economic Development and Trade initiates an action plan for the circular economy transition that will include a traceability system of circular garment and footwear value chains and action towards the creation of an effective system of incentives, development of traceability standards, and engagement plans with the business sector and civil society</p>

Planned results for 2024

Result 1: enhanced digitalization of trade in Economic Commission for Europe member States

Programme performance in 2022 and target for 2024

- 20.97 The subprogramme’s work contributed to a 76 per cent average implementation rate of digital trade facilitation measures of ECE member States, which exceeded the planned target of 75 per cent.
- 20.98 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.XVI).

Figure 20.XVI

Performance measure: average implementation rate of digital trade facilitation measures of ECE member States^a

(Percentage)

^a The data for 2022 are based on past progress as reflected in the last survey, conducted in 2021, given that the data are captured every two years through the United Nations Global Survey on Digital and Sustainable Trade Facilitation.

Result 2: increased facilitation of agricultural trade through the adoption of agricultural quality and electronic business standards in Economic Commission for Europe member States

Programme performance in 2022 and target for 2024

- 20.99 The subprogramme’s work contributed to 24 ECE member States fully or partially implementing the Commission’s standard for “electronic application and issuance of electronic sanitary and phytosanitary certificates”, which did not meet the planned target of 26 member States. The target was not met because the data for 2022 were based on past progress as reflected in the biennial United Nations Global Survey on Digital and Sustainable Trade Facilitation, last conducted in 2021. The next Global Survey will be conducted in 2023.
- 20.100 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.XVII).

Figure 20.XVII

Performance measure: number of ECE member States fully or partially implementing the Commission's standard for "electronic application and issuance of electronic sanitary and phytosanitary certificates"^a (cumulative)

^a The data for 2022 are based on past progress as reflected in the last survey, conducted in 2021, given that the data are captured every two years through the United Nations Global Survey on Digital and Sustainable Trade Facilitation.

Result 3: mainstreaming a gender perspective into standards development organizations

Proposed programme plan for 2024

20.101 International standards can help efforts to advance gender equality and the empowerment of women and ensure that the needs of women are integrated into product design. The ECE initiative to mainstream a gender perspective into standards and a newly formed Team of Specialists⁸ aim to guide standards development organizations on mainstreaming a gender perspective, ensuring, among others, that women participate in the design of standards. Initial guidance has been developed and several webinars and conferences held with a number of participating standard development organizations committing themselves to mainstreaming a gender perspective into standard setting and to establishing relevant focal points.

Lessons learned and planned change

20.102 The lesson for the subprogramme, as indicated in recent surveys, was that there was an increasing need for stakeholder buy-in to support the development of action plans for mainstreaming a gender perspective and to build awareness of stakeholders on those issues with regard to standards setting. In applying the lesson, the subprogramme will expand its work with the ECE Working Party on Regulatory Cooperation and Standardization Policy to increase awareness and capacity to mainstream a gender perspective into standards.

20.103 Expected progress towards the objective is presented in the performance measure below (see figure 20.XVIII).

⁸ ECE Team of Specialists on Gender-Responsive Standards established at the 124th meeting of the ECE Executive Committee (30 September 2022).

Figure 20.XVIII

Performance measure: number of standards development organizations that have committed themselves to implementing the ECE Declaration for Gender-Responsive Standards and Standards Development (cumulative)

Deliverables

20.104 Table 20.13 lists all deliverables of the subprogramme.

Table 20.13

Subprogramme 6: deliverables for the period 2022–2024, by category and subcategory

22. On ECE trade facilitation best practice and recommendations	1	–	–	–
Technical materials (number of materials)	8	17	8	8
23. Guidelines on cross-border trade	1	1	1	1
24. Training material and guidelines on trade standards and/or regulatory cooperation	2	2	2	2
25. Standards and guidelines on agricultural quality	4	10	4	4
26. Training material on trade facilitation and electronic business	1	4	1	1
Fact-finding, monitoring and investigating missions (number of missions)	–	1	3	3
27. Fact-finding missions on trade facilitation and electronic business, agricultural quality standards, regulatory cooperation and standardization, and regulatory and procedural barriers to trade	–	1	3	3

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to government officials and other stakeholders in at least 10 ECE member States on trade facilitation and electronic business, agricultural quality standards, regulatory cooperation and standardization, and regulatory and procedural barriers to trade.

Databases and substantive digital materials: databases for e-business standards and codes.

D. Communication deliverables

Outreach programmes, special events and information materials: booklets, fact sheets and information brochures reaching at least 17 ECE programme countries and for more than 1,000 public and private sector experts.

External and media relations: press releases, publication launch events and articles in external newsletters intended for government officials and experts working on trade.

Digital platforms and multimedia content: subprogramme's website.

Subprogramme 7

Forests and the forest industry

Objective

- 20.105 The objective, to which this subprogramme contributes, is to strengthen the sustainable management of forests and enhance the contribution of forests and forest products to sustainable development in the ECE region.

Strategy

- 20.106 The strategy of the subprogramme is based on the implementation of the core interlinked functions, namely, analytical and normative work, international policy dialogue, capacity-building and communication.
- 20.107 To contribute to the objective, the subprogramme will:
- (a) Promote cooperation among member States, regional entities and other partners for sustainable forest management, forest landscape restoration, the sustainable use of forest products and services, linkages between sustainable food systems and forests, and urban and peri-urban forestry;
 - (b) Collect, validate and disseminate information, research and analysis related to sustainable forest management and the sustainable production and consumption of wood products, including wood energy;
 - (c) Facilitate the exchange of national experiences and best practices and monitor progress on achieving sustainable forest management using indicators for Sustainable Development Goals 12 and 15, which will help member States to measure progress towards achieving the Goals and provide an indirect indication of progress under the United Nations strategic plan for forests 2017–2030;
 - (d) Organize capacity-building seminars and webinars and prepare dedicated publications on the forest sector and wood energy, including on crisis response and on solutions for more resilient economies.
- 20.108 The above-mentioned work is expected to result in:
- (a) The ability of ECE member States to sustainably manage healthy forest ecosystems in order to provide important ecosystem goods and services to benefit society, including climate mitigation and adaptation;
 - (b) Increased and more efficient use by ECE member States of sustainable forest products that contribute to the circular economy and the sustainable use of natural resources, with increased use of renewable raw materials to replace less sustainable alternatives;
 - (c) The integration of forest resources and products into planning and recovery from economic, health and environmental shocks, including COVID-19 recovery, to increase the resilience of member States and their most vulnerable persons.

Programme performance in 2022

Improved policies and access to information for planning and implementing forest landscape restoration in the Caucasus and Central Asia

20.109 Integrated approaches to forest landscape restoration are one solution to address the widespread impacts of forest degradation. The subprogramme supported national Governments⁹ by improving knowledge among policymakers about enabling policies for forest landscape restoration. The subprogramme developed a forest landscape restoration knowledge exchange platform, which integrates member States' experiences, data and region-specific policy and capacity-building tools. This includes the national policy guiding principles on forest landscape restoration, which support national forest authorities in identifying and adapting national forest landscape restoration-related policies, strategies and laws according to available best practice and evidence. The guiding policy principles were already used by Kyrgyzstan and Uzbekistan in developing their national strategic planning in forest landscape restoration. The publicly available platform shares national experiences and up-to-date information on forests and forest management, as well as knowledge about forest landscape restoration in the Caucasus and Central Asia.

20.110 Progress towards the objective is presented in the performance measure below (see figure 20.XIX).

Figure 20.XIX

Performance measure: ECE member States providing data and information to the forest landscape restoration knowledge exchange platform

Planned results for 2024

Result 1: increased access to forest product information to support evidence-led policymaking for the sustainable production and consumption of forest products

Programme performance in 2022 and target for 2024

20.111 The subprogramme's work contributed to updated information on a cumulative total of 41 key forest product commodities, which exceeded the planned target of 39 key forest product commodities.

20.112 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.XX).

⁹ Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan.

Figure 20.XX

Performance measure: number of wood-based commodities assessments available to member States with specific information regarding their production, trade and consumption (cumulative)

Result 2: enhanced accessibility and timeliness of sustainable forest management information and improved monitoring of the impact of increased wood use in a circular economy

Programme performance in 2022 and target for 2024

- 20.113 The subprogramme’s work contributed to 3,483 public users and 8,671 views of up-to-date data on sustainable forest management from the INForest platform that is accessible to persons with disabilities, which exceeded both the planned target of 2,250 public users and the planned target of 5,000 views.
- 20.114 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 20.XXI).

Figure 20.XXI

Performance measure: number of public users and number of views of up-to-date data on sustainable forest management from the INForest platform that is accessible to persons with disabilities (cumulative)

Result 3: cities and towns commit themselves to expanding sustainable urban and peri-urban forest cover

Proposed programme plan for 2024

- 20.115 Sustainable urban forests are increasingly recognized as important components of more liveable, healthier and more resilient cities and towns. Since 2019, the subprogramme has developed substantive materials, established an informal network of experts and created a Trees in Cities

Challenge to engage with local and national policymakers to have them commit themselves to sustainable urban forest management and tree planting pledges.

Lessons learned and planned change

20.116 The lesson for the subprogramme was that targeted outreach to cities, when combined with substantive guidance materials and collaboration (e.g., financial incentives, maintenance or management, as well as opportunities for peer exchange), is the most effective approach to encourage local and national policymakers to commit themselves to increasing sustainable urban tree and forest cover. In applying the lesson, the subprogramme will strengthen the exchange among cities, policymakers and experts through more informal network events, targeted campaigns and needs-based substantive materials for local and national action. The subprogramme will tailor activities and support on the basis of unique needs and challenges faced by cities and towns and the diverse benefits of urban trees and forests such as the mitigation of floods, reduced heat islands and energy consumption, improved physical and mental health and improved air quality. The subprogramme will also develop guidance and resources focused on the integrated, long-term planning and management of urban and peri-urban forests as a cost-effective nature-based solution¹⁰ for sustainable development.

20.117 Expected progress towards the objective is presented in the performance measure below (see figure 20.XXII).

Figure 20.XXII
Performance measure: number of cities and towns making pledges and commitments to increasing sustainable urban tree and forest cover (cumulative)

Deliverables

20.118 Table 20.14 lists all deliverables of the subprogramme.

C. Substantive deliverables				
Consultation, advice and advocacy: forest policy dialogues at the request of countries and support for forest policy issues, for up to 3 member States.				
Databases and substantive digital materials: ECE region databases on: forest policies and institutions; forest resources and forest ownership; forest products, including production, consumption and trade; wood energy; and prices of wood raw material.				
D. Communication deliverables				
Outreach programmes, special events and information materials: events celebrating the International Day of Forests; brochures and information materials on various forest-related topics; and presentations at round tables and international forest-related events.				
External and media relations: press releases for the subprogramme; and Forest Information Billboard newsletter for approximately 4,000 subscribers.				
Digital platforms and multimedia content: website of the subprogramme; social media accounts; and videos on forest-related topics.				

Subprogramme 8 Housing, land management and population

Objective

- 20.119 The objective, to which this subprogramme contributes, is to strengthen member State-owned and city-level programmes and policies promoting decent, adequate, affordable, energy-efficient and healthy housing for all, smart sustainable cities, and sustainable urban development and land management, and to advance evidence-based population and social cohesion policies.

Strategy

- 20.120 The subprogramme comprises two components: (a) housing and land management; and (b) population.
- 20.121 The strategy of the subprogramme is based on the implementation of the core interlinked functions, namely, international policy dialogue, normative work and capacity-building and the sharing of best practices and lessons learned in all areas of the subprogramme's work.
- 20.122 To contribute to the objective, the housing and land management component of the subprogramme will:
- (a) Support the national, regional and local governments of member States and other key stakeholders in the review of progress in achieving Sustainable Development Goals 3, 5, 7, 9, 11 and 12, and build their capacities for the implementation of measures to accelerate achieving the Goals through technical assistance projects, thematic studies, training sessions, the exchange of experiences and best practices and policy advice on: affordable climate-neutral and decent housing for all; housing finance; smart sustainable cities and digitization in and innovative financial mechanisms for cities; land administration and management, including informal settlements; and urban strategies and programmes that integrate climate change measures and promote the climate neutrality of buildings;
 - (b) Support local governments in the development of evidence-based policies on sustainable housing and urban development through the application of the ECE/International Telecommunication Union key performance indicators on smart sustainable cities, indicators on urban economic resilience and a United Nations system-wide urban monitoring framework; and in the preparation of smart sustainable cities profiles and voluntary local reviews of the implementation of the Goals, based on the assessments of achievement of the Goals;
 - (c) Provide assistance to national Governments and local ones in the development of evidence-based urban and housing policies through the preparation of country profiles on urban development, housing and land management;
 - (d) Support the strengthening of the capacities of national Governments and local ones in the design, implementation and monitoring of urban resilience plans and sustainable urban infrastructure development projects, including those that provide support to the most vulnerable persons, especially those in informal settlements;
 - (e) Promote multi-stakeholder partnerships and innovative financing instruments to unlock further financing and partnerships for the implementation of these plans and projects, in collaboration with the Geneva United Nations Charter Centres of Excellence;
 - (f) Organize the fourth Forum of Mayors to discuss the challenges for sustainable housing and urban development.
- 20.123 To contribute to the objective, the population component of the subprogramme will:
- (a) Support national and regional review and follow-up activities to assess progress in implementing the Madrid International Plan of Action on Ageing and its Regional Implementation Strategy by providing a platform for intergovernmental policy debate on matters related to mainstreaming ageing, and facilitate communication with a wider network of experts and non-governmental organizations;
 - (b) Coordinate data collection on active ageing indicators, including intergenerational and sex-disaggregated data, as well as policy-oriented research on ageing and intergenerational and gender relations, to support evidence-based policymaking and the monitoring of the implementation of the Madrid International Plan of Action on Ageing and its Regional Implementation Strategy;

- (c) Support the development of national capacities for policy formulation through policy seminars, policy briefs and the showcasing of good practices from member States;
 - (d) Assess lessons learned and strengthen the capacity of member States in terms of preparedness and emergency response to mitigate the risks for older persons, in particular older persons in vulnerable situations.
- 20.124 The above-mentioned work in the area of housing and land management is expected to result in:
- (a) Improved national and local policies for housing affordability, adequacy and accessibility for all; the energy efficiency and climate neutrality of buildings; and sustainable and resilient urban development;
 - (b) Increased capacity of national and local governments for the development of housing and urban development policies and programmes, which integrate the concepts of the 2030 Agenda, the Geneva UN Charter on Sustainable Housing and relevant best practices, and the action plan entitled “Place and Life in the ECE – A Regional Action Plan 2030: Tackling challenges from the COVID-19 pandemic, climate and housing emergencies in the region, city, neighbourhood and homes”;
 - (c) Improved understanding by city authorities of their socioeconomic development priorities through the preparation of smart sustainable cities profiles and voluntary local reviews of the achievement of the Sustainable Development Goals, based on the revised guidelines for the development of voluntary local reviews in the ECE region and using ECE/International Telecommunication Union key performance indicators for smart sustainable cities, urban economic resilience indicators and a United Nations system-wide urban monitoring framework;
 - (d) Increased capacity of land administration authorities to develop national land administration and management systems;
 - (e) More effective local urban development and housing policies and related resilience plans, in particular for the most vulnerable persons living in informal settlements.
- 20.125 The above-mentioned work in the thematic area of population is expected to result in:
- (a) Demonstrated progress by member States in mainstreaming ageing across all policy fields and governance levels;
 - (b) Enhanced capacities of member States with regard to designing and implementing integrated policies for active and healthy ageing;
 - (c) Policy approaches adopted by member States that advance the rights and dignity of older persons and their contribution to a sustainable and inclusive society for all ages;
 - (d) The design and implementation by member States of national and regional emergency responses, including to the COVID-19 pandemic, that include more prominent considerations for older persons.

Programme performance in 2022

Access to high-quality long-term care: renewed commitment and experience exchange

- 20.126 The demand for long-term care services in the ECE region is growing because of population ageing and growing longevity, exerting pressure on countries’ care infrastructure. The need for equal access to long-term care services and for upholding high-quality standards across care settings was underscored by the COVID-19 pandemic. In view of this, during the Ministerial Conference on Ageing held in Rome in 2022, ECE member States renewed their commitment to ensuring access to high-quality long-term care.
- 20.127 The subprogramme has undertaken several activities to facilitate knowledge-building and policy dialogue among member States and to strengthen the capacity of member States to address the

challenges related to long-term care provision in the ECE region through information-sharing and experience exchange. Examples of such activities include a rapid assessment on the impact of COVID-19 on long-term care services in Kazakhstan and the organization of policy seminars on ageing involving national policymakers, experts on long-term care systems and services, civil society representatives and other stakeholders.

20.128 Progress towards the objective is presented in the performance measure below (see table 20.15).

Table 20.15
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Increased knowledge on COVID-19 and the impacts for older persons in need of long-term care	Member States agreed to focus on access to long-term care and support for carers and families as one of the key themes of the Ministerial Conference on Ageing (Rome, 2022)	In the 2022 Rome ministerial declaration, ECE member States set the goal of ensuring access to long-term care and support for carers and families

Planned results for 2024

Result 1: Madrid International Plan of Action on Ageing beyond 2022: reaching a consensus on the goals and actions for healthy and active ageing in a sustainable world

Programme performance in 2022 and target for 2024

20.129 The subprogramme’s work contributed to reaching a consensus on the goals and actions for healthy and active ageing in a sustainable world, which met the planned target.

20.130 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 20.16).

Table 20.16
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
The Bureau issued the guidelines for national reports and launched the fourth review and appraisal exercise in the region	Member States held national review and appraisal exercises and submitted their national reports to the ECE secretariat	Member States adopted the 2022 Rome ministerial declaration as the outcome document of the ECE Ministerial Conference on Ageing. It outlines the goals and main actions for healthy and active ageing in 2022–2027 that safeguard the dignity and rights of older persons	The programme of work of the Standing Working Group on Ageing for 2023–2027, based on the priorities outlined in a declaration of the 2022 Ministerial Conference and the outcome of the global review of the Madrid International Plan of Action on Ageing in 2023, is developed and adopted by member States	New policies and programmes responding to the goals of the Rome Declaration implemented and reported by 2 ECE member States

**Result 2: acceleration of the city-level implementation of the Sustainable Development Goals
Programme performance in 2022 and target for 2024**

- 20.131 The subprogramme’s work contributed to the development of two smart sustainable cities profile for Tbilisi (Georgia) and Podgorica (Montenegro) and one smart sustainable country/city profile for San Marino (as requested by the Government, the profile combined a country-wide analysis with cities’ analysis), which met the planned target.
- 20.132 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 20.17).

Table 20.17
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
One smart sustainable cities profile (for Nur-Sultan, Kazakhstan) using evidence-based approaches developed	Two smart sustainable cities profiles (for Hrodna, Belarus, and Bishkek, Kyrgyzstan) using evidence-based approaches developed	Two smart sustainable cities profile (for Tbilisi, Georgia, and Podgorica, Montenegro) and one smart sustainable country/city profile (for San Marino and its cities) developed using evidence-based approaches	Four additional smart sustainable cities profiles and voluntary local reviews using evidence-based approaches developed	Four additional country/city profiles and smart sustainable city profiles and voluntary local reviews using evidence-based approaches developed Two cities implementing the recommendations contained in the profiles and voluntary local reviews

Result 3: acceleration of the city-level implementation of best practices in housing and land management and urban development

Proposed programme plan for 2024

- 20.133 ECE cities face challenges in ensuring the comprehensive treatment of housing, land management and urban development. To support city authorities, the subprogramme prepared thematic guideline documents to help cities to develop reform initiatives that create horizontal synergies across policy areas and vertical synergies among the local, national and global levels.

Lessons learned and planned change

- 20.134 The lesson for the subprogramme was that targeted support to local governments should combine evidence-based analysis with thematic, action-oriented policy briefs and best practice guidelines. In applying the lesson, the subprogramme will utilize its evidence-based analysis to develop thematic, action-oriented policy briefs and guidelines in collaboration with its network of experts and ECE cities. The subprogramme will also support local governments and national Governments in better coordinating housing, land management and urban development initiatives with other policy areas (horizontal synergies), bolstering regional cooperation and finding local solutions to global challenges such as climate change (vertical synergies).
- 20.135 Expected progress towards the objective is presented in the performance measure below (see table 20.18).

Table 20.18
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	“Place and Life in the ECE – A Regional Action Plan 2030: Tackling challenges from the COVID-19 pandemic, climate and housing emergencies in region, city, neighbourhood and homes” adopted by member States	One country/city implementing recommendations contained in the thematic policy briefs and guidelines on housing, land management and urban development	Two countries/cities implementing recommendations contained in the thematic policy briefs and guidelines on housing, land management and urban development

Deliverables

20.136 Table 20.19 lists all deliverables of the subprogramme.

Table 20.19
Subprogramme 8: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	16	19	25	16
Documentation for:				
1. The Committee on Urban Development, Housing and Land Management	10	11	11	11
2. The Working Party on Land Administration	–	–	7	–
3. The Standing Working Group on Ageing	4	5	5	5
4. The Ministerial Conference on Ageing	2	3	–	–
5. The regional conference on population and development issues	–	–	2	–
Substantive services for meetings (number of three-hour meetings)	31	34	37	33
Meetings of:				
6. The Committee on Urban Development, Housing and Land Management, its Bureau and expert bodies	14	14	14	18
7. The Working Party on Land Administration and its Bureau	6	6	10	6
8. The Standing Working Group on Ageing and its Bureau	7	10	9	9
9. The Ministerial Conference on Ageing	4	4	–	–
10. The regional conference on population and development issues	–	–	4	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	2	3
11. Country profiles on housing, land administration and spatial planning	1	1	1	2
12. Road map for mainstreaming ageing project for a specific country	–	–	1	1

Section 20 Economic development in Europe

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
Seminars, workshops and training events (number of days)	5	5	10	10
13. Workshops, seminars and training courses for policymakers and/or experts in the ECE region on housing and land administration (including real estate) and spatial planning	4	4	8	8
14. Workshops and policy seminars on population ageing issues for policymakers, experts, practitioners and other stakeholders in countries of the ECE region	1	1	2	2
Publications (number of publications)	6	7	6	6
15. On housing and land management	4	4	4	4
16. On population	2	3	2	2
Technical materials (number of materials)	1	1	4	3
17. Technical guidelines on housing and land management	1	1	2	2
18. Toolkit and training course material on mainstreaming ageing	–	–	2	1
Fact-finding, monitoring and investigation missions (number of missions)	–	1	2	2
19. Fact-finding missions for government officials and other stakeholders to develop national capacities in designing and implementing ageing-related policies and programmes	–	–	1	1
20. Fact-finding missions for policymakers in preparation for and follow-up to the country profiles on housing, land administration and spatial planning	–	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: Generations and Gender Programme advocacy for national survey coordinators; advisory services for policymakers in up to 4 member States in preparation for and follow-up to the country profiles on housing, land administration and spatial planning; and advisory services for government officials and other stakeholders to develop national capacities in designing and implementing ageing-related policies and programmes.

Databases and substantive digital materials: active ageing indicators data set for global access and a database on ageing-related policies.

D. Communication deliverables

Outreach programmes, special events and information materials: fact sheets of the Committee on Urban Development, Housing and Land Management and the Working Party on Land Administration; and booklet of the Standing Working Group on Ageing and ageing-related side events for various stakeholders.

External and media relations: press releases related to housing, land management and population activities.

Digital platforms and multimedia content: websites related to housing, land management and population activities for global and regional access; and Active Ageing Index wiki.

B. Proposed post and non-post resource requirements for 2024

Overview

20.137 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 20.20 to 20.22.

Table 20.20

20.138 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 20.23 to 20.25 and figure 20.XXIII.

20.139 As reflected in tables 20.23 (1) and 20.24 (1), the overall net resources for 2024 amount to \$37,063,600 before recosting, reflecting a net decrease of \$165,800 compared with the appropriation for 2023. Resource changes result from technical adjustments, new and expanded mandates and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

20.140 As reflected in table 20.23 (1), resource changes reflect a decrease of \$40,800, as follows:

Executive direction and management. The decrease relates to the removal of non-recurrent non-post provisions under experts (\$20,800) and consultants (\$20,000) related to the biennial

Commission session held in 2023, in accordance with General Assembly resolution [62/225](#) and paragraph 9 of annex I to Economic and Social Council resolution 2006/38.

New and expanded mandates

20.141 As reflected in table 20.23 (1), resource changes reflect an increase of \$20,400, as follows:

Executive direction and management. The increase relates to the non-recurrent non-post provision under consultants (\$20,400) for the advance preparation (in 2024) of the seventy-first session of the Commission, to be held in 2025, in accordance with General Assembly resolution [62/225](#) and paragraph 9 of annex I to Economic and Social Council resolution 2006/38.

Other changes

20.142 As reflected in table 20.23 (1), the net effect of the proposed changes is a reduction of \$145,400. The breakdown of changes is as follows:

- (a) **Subprogramme 3, Statistics.** The cost-neutral changes reflect the movement of \$200 from travel of staff to travel of experts within the programme to ensure adequate resources for travel;
- (b) **Subprogramme 7, Forests and the forest industry.** The decrease of \$72,700 reflects the net effect of the proposed abolishment of one post of Senior Statistics Assistant (General Service (Principal level)) (\$170,000) and the establishment of one post of Data Analyst (P-3) (\$97,300), as explained in annex III to the present report. The proposed establishment of the Data Analyst (P-3) is made possible by the proposed abolishment of the post of Senior Statistics Assistant (General Service (Principal level));
- (c) **Programme support.** The decrease of \$72,700 reflects the net effect of the proposed abolishment of one post of Senior Administrative Assistant (General Service (Principal level)) (\$170,000) and the establishment of one post of Management and Programme Analyst (P-3) (\$97,300), as explained in annex III. The proposed establishment of the Management and Programme Analyst (P-3) is made possible by the proposed abolishment of the Senior Administrative Assistant (General Service Principal level).

Extrabudgetary resources

20.143 As reflected in tables 20.23 (2) and 20.24 (2), extrabudgetary resources amount to \$24,315,500. The resources would complement regular budget resources and would be used mainly to deliver technical cooperation projects and activities approved by ECE governing bodies. The increase in extrabudgetary resources reflects the level of expected project contributions.

20.144 The extrabudgetary resources under the present section are subject to the oversight of the Executive Committee of ECE and the governing bodies of the conventions.

Policymaking organs

20.145 The governance structure of ECE was revised in accordance with the workplan on ECE reform adopted by the General Assembly in its resolution [60/248](#) and the outcome of the review of the 2005 reform of ECE adopted by the Economic and Social Council in its resolution [2013/1](#). The Commission reports to the Council and provides strategic direction to the work of the ECE secretariat. It serves as a regional platform for high-level policy dialogue on sustainable development in the region and meets biennially for up to three working days. In the intersessional period, the Executive Committee is entrusted with the implementation of the overall policy set by the Commission. It meets as often as necessary to perform its oversight role with regard to programme planning and administrative and budgetary issues, including extrabudgetary funding. It reviews and approves the programmes of work and subsidiary structures of the sectoral committees, thus ensuring coherence and coordination among subprogrammes.

- 20.146 The following eight sectoral committees act as subsidiary bodies of the Commission and as governing bodies for the eight subprogrammes: the Committee of Environmental Policy (subprogramme 1); the Inland Transport Committee (subprogramme 2); the Conference of European Statisticians (subprogramme 3); the Committee on Innovation, Competitiveness and Public-Private Partnerships (subprogramme 4); the Committee on Sustainable Energy (subprogramme 5); the Steering Committee on Trade Capacity and Standards (subprogramme 6); the Committee on Forests and the Forest Industry (subprogramme 7); and the Committee on Urban Development, Housing and Land Management (subprogramme 8). These bodies meet for two to three days annually to provide guidance to ECE on work relating to their sectors. No regular or extrabudgetary resources are proposed for 2024 for those bodies.

Executive direction and management

- 20.147 The executive direction and management component comprises the Office of the Executive Secretary, the Sustainable Development Unit and the Information Unit. It also includes the Programme Management Unit, which falls under the Programme Management and Support Services Division.
- 20.148 The overall responsibilities of the executive direction and management component include the following functions:
- (a) To facilitate the debate among member States on the strategic direction of ECE and to develop a forward-looking strategy for adjusting ECE activities to respond to emerging and foreseeable priorities of its member States;
 - (b) To provide guidance and direction for the work of the Secretariat, and to promote transparency and interdivisional cooperation;
 - (c) To service meetings of the Commission and its Executive Committee and ensure the follow-up to their decisions;
 - (d) To provide guidance and overall coordination of ECE programme management and evaluation, including under technical cooperation, and to promote the application of evaluation findings to the subprogrammes' work;
 - (e) To undertake regional policy reviews relating to major cross-sectoral issues, in particular sustainable development, gender, and the 2030 Agenda and its Sustainable Development Goals;
 - (f) To contribute to increasing the visibility of ECE and to raising the awareness and use of ECE products through the dissemination of information about its activities;
 - (g) To promote synergies and cooperation with other United Nations entities active in the ECE region, including with the resident coordinator system at the country level and the United Nations Sustainable Development Group for Europe and Central Asia at the regional level;
 - (h) To foster and mainstream a gender perspective and disability inclusion into ECE subprogrammes;
 - (i) To ensure effective financial, human and information and communications technology (ICT) resources management, as well as the implementation of recommendations of oversight bodies and internal controls.
- 20.149 The Office of the Executive Secretary, which includes the Executive Secretary, the Deputy Executive Secretary and the Secretary of the Commission, has the overall responsibility for providing policy guidance and leadership in the ECE secretariat, including the coordination of the work of the Commission; overseeing and developing relations with Governments; coordination with the United Nations Secretariat; reporting to the General Assembly and the Economic and Social Council; overseeing and developing relations with other United Nations entities and with non-United Nations organizations, civil society and non-governmental organizations; and mainstreaming a gender

perspective across all subprogrammes through the development and implementation of the ECE gender policy and action plan and the gender parity strategy.

- 20.150 The Programme Management Unit, under the Programme Management and Support Services Division, provides guidance and ensures overall coordination of ECE programme management (planning, monitoring, reporting and evaluation). The Unit also ensures the follow-up to and implementation of the recommendations of United Nations oversight bodies, promotes synergies between the normative and operational work of ECE and provides guidance and overall coordination of technical cooperation. The Unit coordinates with other regional commissions and United Nations entities on programmatic and technical cooperation issues in support of the resident coordinator system countries within the ECE region.
- 20.151 The Sustainable Development Unit provides policy advice, analysis and advocacy on cross-cutting issues relating to the implementation of, follow-up on and review of the 2030 Agenda, in partnership with other United Nations entities and stakeholders, as relevant. The Unit convenes the annual Regional Forum on Sustainable Development for the ECE region, in cooperation with the entities of the regional United Nations system, providing the regional contribution to the global follow-up on and review of the 2030 Agenda. It plays a leading role in carrying out the functions of the regional collaborative platform, which gathers the heads of the regional offices for Europe and Central Asia of the United Nations entities. The Unit leads the internal work on the alignment of ECE activities with the Sustainable Development Goals through a cross-cutting approach.
- 20.152 The Information Unit is responsible for implementing the ECE information strategy aimed at raising awareness and mobilizing support for the work of ECE. The Unit manages ECE relations with the media, ensures the Commission's presence on social media and provides related monitoring and analysis. It advises the Executive Secretary, senior managers and the staff of ECE on outreach and advocacy.
- 20.153 In 2024, the executive direction and management component will coordinate the planning of the ECE programme of work leading towards the 2025 session and ensure monitoring of progress towards achieving planned results. The 2024 annual exchange on evaluation will foster the use of evaluation results to improve programme planning and internal processes, which will be documented in the 2023 annual report on evaluation presented to the Executive Committee. To improve data quality and use, the component will guide and support, in cooperation with substantive divisions, the operationalization of the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, based on the ECE ICT strategy and substantive divisions' related action plans. The component will support the United Nations reform implementation and accelerated action for implementing the 2030 Agenda and the outcomes of the Sustainable Development Goals Summit, by improving system-wide coherence and coordination of programme delivery at the regional and country levels. This will be done, among others, through the facilitation of the implementation of the 2024 workplan of the Regional Collaborative Platform for Europe and Central Asia, ensuring a successful meeting of the Regional Forum on Sustainable Development for the ECE Region and continuing active engagement in the 17 programme countries in partnership with resident coordinator offices and United Nations country teams, including in the preparation of United Nations Sustainable Development Cooperation Frameworks, to be signed in 2025. Structured around the Goals, the 2023 technical cooperation report, to be presented to the Executive Committee, will include all the technical assistance provided to member States. The component will also continue to foster and mainstream a gender perspective by coordinating the implementation of the ECE gender action plan for 2023–2024, which acts as the primary vehicle for implementation of the ECE policy for gender equality and the empowerment of women (2021–2025). In line with the United Nations Disability Inclusion Strategy, executive direction and management will continue to mainstream disability inclusion into the ECE work, by reporting on the implementation of the ECE disability inclusion action plan for 2023 and planning for 2025.
- 20.154 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in

paragraph 19 of General Assembly resolution 72/219, ECE is integrating environmental management practices into its operations. ECE takes into account lessons learned in the leveraging of communications technology, allowing for remote participation, wherever possible.

20.155 Information on the timely submission of documentation and advance booking for air travel is reflected in table 20.26. The compliance rate of 98 per cent in 2022 relates to the timely submission of documentation related to ECE meetings organized through the United Nations Office at Geneva Division of Conference Management and marks an improvement, compared with the prior period. The compliance rate of 52 per cent for air tickets purchased at least two weeks before the commencement of travel relates to all travel requests, including of staff, experts and consultants, and participants, the latter funded exclusively through extrabudgetary resources, processed by ECE in 2022 through the United Nations Office at Geneva Travel and Logistics Unit. While the ECE compliance rate in 2022 increased compared with 2021, the compliance rate has been affected by delays related to the impact of COVID-19 on the travel industry. ECE will continue to work closely with the travel and logistics counterparts on early planning to improve compliance rates in 2023 and 2024.

Table 20.26
Compliance rate
(Percentage)

	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Actual 2022</i>	<i>Planned 2023</i>	<i>Planned 2024</i>
Timely submission of documentation	97	94	98	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	44	51	52	100	100

20.156 The proposed regular budget resources for 2024 amount to \$4,821,100 and reflect a decrease of \$20,400 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 20.140 and 20.141 above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 20.27 and figure 20.XXIV.

 (Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 20.157 Extrabudgetary resources for executive direction and management amount to \$2,766,000 and relate to the secretariats of the United Nations Road Safety Fund and the Special Envoy for Road Safety. The resources would complement regular budget resources and would be used mainly to provide for resource mobilization activities for the Fund, along with support for the implementation of high-impact projects.
- 20.158 The expected increase of \$168,500 is attributable mainly to increased requirements related to the establishment of an Associate Programme Management Officer, (P-2) and expected contributions for other staff costs in the secretariat of the Special Envoy for Road Safety, travel and meetings.

Programme of work

**Subprogramme 1
 Environment**

- 20.159 The proposed regular budget resources for 2024 amount to \$5,914,100 and reflects no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 20.28 and figure 20.XXV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

20.160 Extrabudgetary resources for the subprogramme amount to \$12,978,500. The resources would complement regular budget resources and would be used mainly to support the implementation of the ECE multilateral environmental agreements and the ECE policy tools, which include the ECE Environmental Performance Review Programme, the ECE Environmental Monitoring and Assessment Programme, the ECE Strategy for Education for Sustainable Development and technical assistance programmes under the ECE multilateral environmental agreements, through international

policy dialogue, normative work, capacity-building and the dissemination of good practices and lessons learned.

20.161 The expected increase of \$35,000 is attributable to increased requirements in 2024 for travel and meetings, offset in part by a decrease in requirements under posts due to the abolishment of an Environmental Affairs Officer (P-3) and a Programme Management Assistant (General Service (Other level)) resulting from the scheduled completion of an extrabudgetary project during 2023.

Subprogramme 2 Transport

20.162 The proposed regular budget resources for 2024 amount to \$7,049,000 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 20.29 and figure 20.XXVI.

Extrabudgetary resources

20.163 Extrabudgetary resources for the subprogramme amount to \$2,566,400. The resources would complement regular budget resources and would be used mainly to support the implementation and computerization of the TIR Convention and the implementation of the Trans-European North-South Motorway and the Trans-European Railway projects and projects in the areas of sustainable transport and mobility solutions and the adaptation of transport systems to climate change.

20.164 The expected increase of \$295,400 is attributable mainly to increased requirements and related contributions for travel, meetings and technical assistance workshops for existing projects.

**Subprogramme 3
Statistics**

20.165 The proposed regular budget resources for 2024 amount to \$5,016,600 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 20.30 and figure 20.XXVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 20.166 Extrabudgetary resources for the subprogramme amount to \$289,500. The resources would complement regular budget resources and would be used mainly to support projects in the areas of strengthening the statistical capacity of member States to provide high-quality statistics and indicators to monitor progress towards achieving the Sustainable Development Goals and enhancing the coherence and integration of economic and social statistics in support of the implementation of the 2008 System of National Accounts.
- 20.167 The expected increase of \$7,700 is attributable mainly to increased requirements and related contributions for travel, meetings and technical assistance workshops for existing projects.

**Subprogramme 4
 Economic cooperation and integration**

- 20.168 The proposed regular budget resources for 2024 amount to \$2,182,100 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 20.31 and figure 20.XXVIII.

Extrabudgetary resources

20.169 Extrabudgetary resources for the subprogramme amount to \$1,354,000. The resources would complement regular budget resources and would be used mainly to provide support for technical cooperation projects on the implementation of ECE innovation policies, development innovation for sustainable development reviews and the implementation of the standards on people-first public-private partnerships for the Sustainable Development Goals.

20.170 The expected increase of \$112,400 is attributable mainly to increased requirements for projects, travel, meetings and technical assistance workshops for existing projects, offset in part by a decrease in posts resulting from the abolishment of an Economic Affairs Officer (P-3) due to the completion of an extrabudgetary project during 2023.

Subprogramme 5 Sustainable energy

20.171 The proposed regular budget resources for 2024 amount to \$2,296,400 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 20.32 and figure 20.XXIX.

Extrabudgetary resources

20.172 Extrabudgetary resources for the subprogramme amount to \$825,500. The resources would complement regular budget resources and would be used mainly to enable further development and implementation of the United Nations Framework Classification for Resources and the United

Part V Regional cooperation for development

Nations Resource Management System, which allow for dynamic resource management, in line with the 2030 Agenda, and will provide for technical cooperation projects on sustainable resource management, accelerating transformations of the energy sector, and carbon neutrality and sustainable hydrogen production in the ECE region.

- 20.173 The expected increase of \$42,000 is attributable mainly to increased requirements and related contributions for travel, meetings and technical assistance workshops for existing projects.

**Subprogramme 6
Trade**

- 20.174 The proposed regular budget resources for 2024 amount to \$3,766,500 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 20.33 and figure 20.XXX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 20.175 Extrabudgetary resources for the subprogramme amount to \$1,280,800. The resources would complement regular budget resources and would be used mainly to support technical cooperation projects, advocacy, evidence-based studies to identify regulatory and procedural barriers to trade and technical cooperation projects in the areas of trade facilitation, sustainable value chains and the promotion of the use of standards for sustainable development.
- 20.176 The expected increase of \$233,700 is attributable mainly to increased requirements and expected contributions for travel, meetings and technical assistance workshops for existing projects.

**Subprogramme 7
Forests and the forest industry**

- 20.177 The proposed regular budget resources for 2024 amount to \$1,490,500 and reflects a decrease of \$72,700 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 20.142 above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 20.34 and figure 20.XXXI.

Extrabudgetary resources

20.178 Extrabudgetary resources for the subprogramme amount to \$142,300. The resources would complement regular budget resources and would be used mainly to support research, analysis and the dissemination of information related to sustainable forest management, the sustainable production and consumption of forest products and technical cooperation projects on sustainable forest management.

20.179 The expected resource level reflects no change compared with the estimates for 2023.

**Subprogramme 8
Housing, land management and population**

20.180 The proposed regular budget resources for 2024 amount to \$1,218,900 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 20.35 and figure 20.XXXII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

20.181 Extrabudgetary resources for the subprogramme amount to \$329,700. The resources would complement regular budget resources and would be used mainly to support the projects on the development of smart sustainable city profiles and voluntary local reviews and support the implementation of the programme of work related to housing and land management, as well as population ageing.

20.182 The expected increase of \$82,600 is attributable mainly to increased requirements and expected contributions for travel, meetings and technical assistance workshops for existing projects.

Programme support

20.183 The Programme Management and Support Services Division carries out activities related to programme planning, oversight, technical cooperation support, administration and common services such as budget and financial management, human resource management, and information systems management and technology services for ECE. It also ensures compliance with organizational policies in these areas and liaises with Headquarters and the United Nations Office in Geneva, the designated service provider for ECE. The Division comprises the Office of the Director, which manages all aspects of programme planning, oversight and administration; the Programme Management Unit, under executive direction and management (explained in paragraph 20.150 above); and the Executive Office, which oversees and manages all aspects of administration, budget, finance, human resources and information systems.

20.184 The proposed regular budget resources for 2024 amount to \$3,308,400 and reflect a decrease of \$72,700 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 20.142 above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 20.36 and figure 20.XXXIII.

Figure 20.XXXIII
Programme support: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

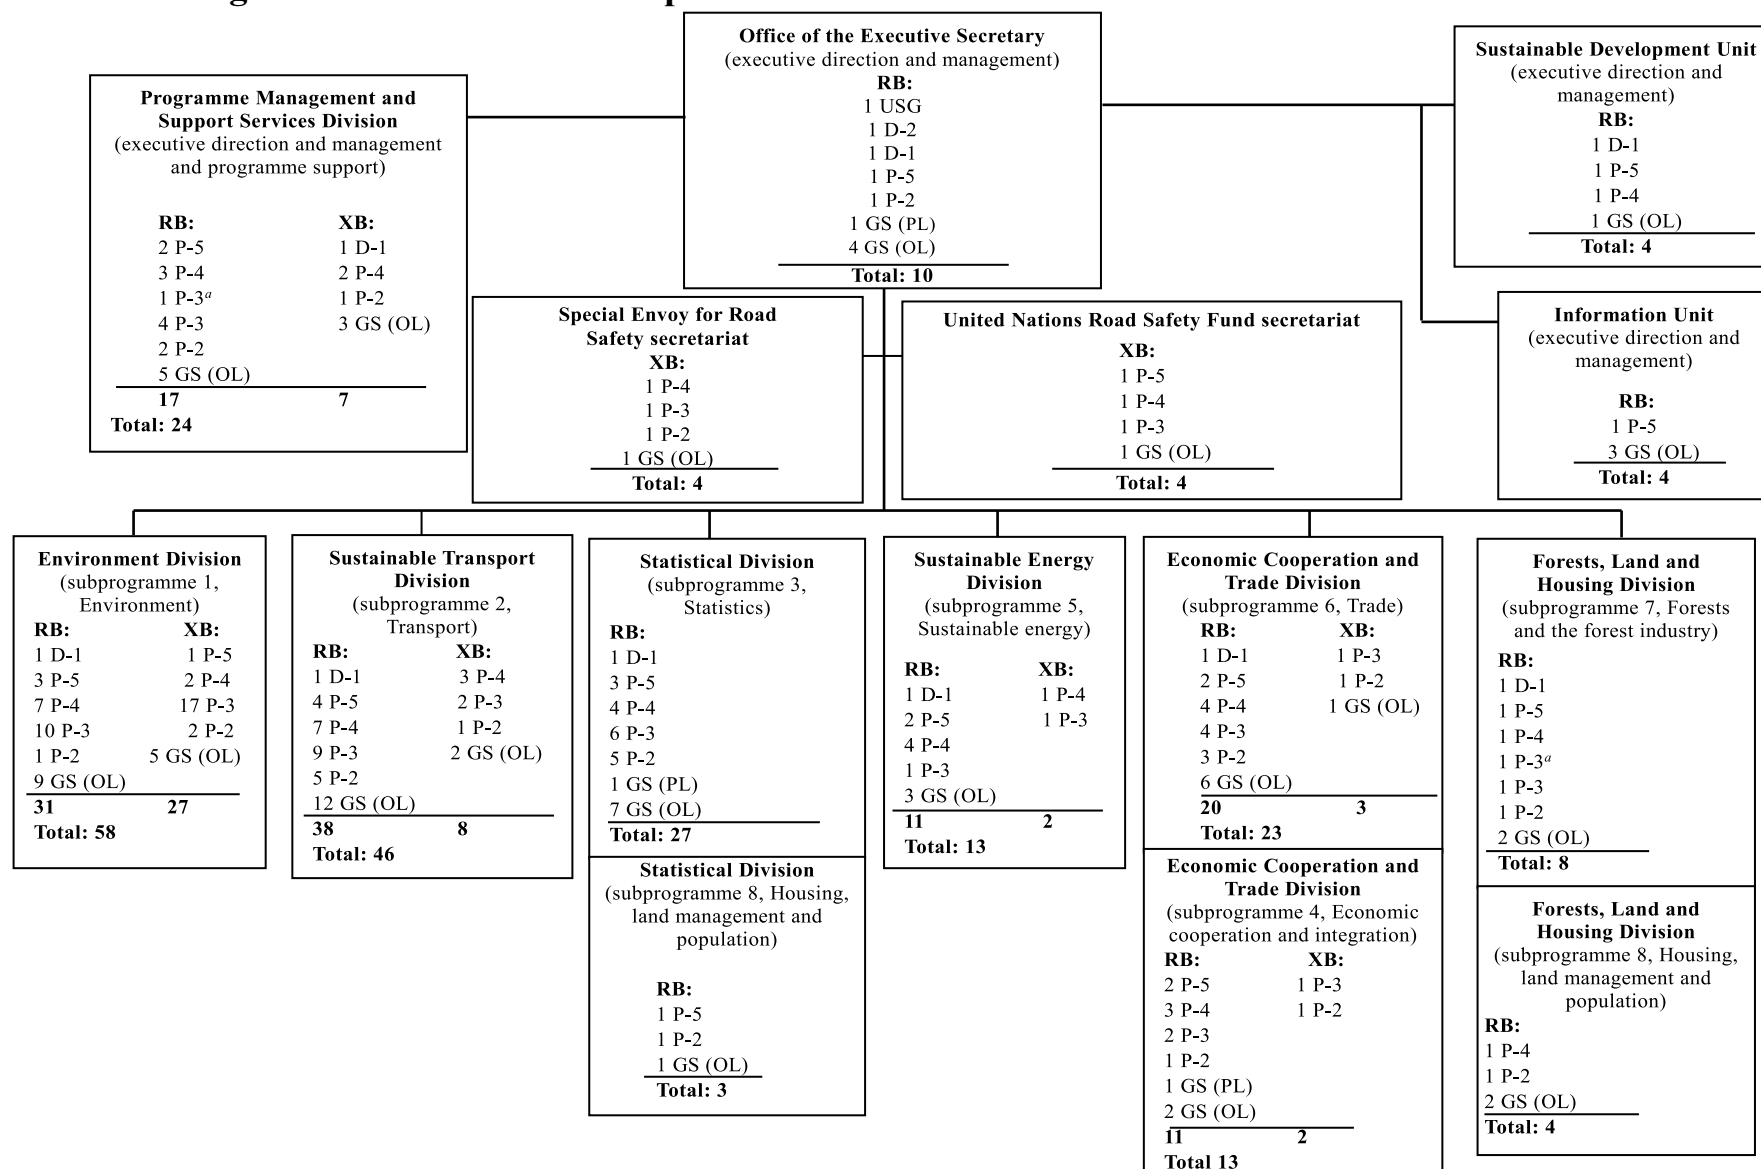

Extrabudgetary resources

20.185 Extrabudgetary resources for programme support amount to \$1,782,900. The resources would complement regular budget resources and would be used mainly to provide support in the areas of budget, finance, human resources, general administration and ICT. In addition, these resources would further strengthen the functions related to strategy, programme management, oversight, evaluation, enterprise risk management, coordination of ECE technical cooperation programmes and support for the resident coordinator countries.

20.186 The expected resource level reflects no change compared with the estimates for 2023.

Annex II

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

**Office of Internal Oversight Services
Audit of mainstreaming of Sustainable Development Goals and COVID-19 response into the programme of work of the Economic Commission for Europe
Report No. 2021/048**

OIOS recommended that ECE prepare an action plan for the review and endorsement of nexus publications by relevant subprogrammes, sectoral committees and the Executive Committee to enable timely tracking and monitoring of the implementation of recommendations related to the achievement of the Sustainable Development Goals (para. 1).

Status: Implemented, pending review by the Office of Internal Oversight Services.

The relevant recommendations from the nexus publications were put on the agendas and communicated to the following ECE expert groups discussing issues related to the Sustainable Development Goals: (a) the Joint Task Force on Environmental Statistics and Indicators; (b) the Expert Meeting on Statistics for Sustainable Development Goals; (c) the Working Party on Transport Statistics; and (d) the Joint FAO/ECE Working Party on Forest Statistics, Economics and Management.

At the eighteenth session of the Joint Task Force on Environmental Statistics and Indicators, held on 18 and 19 October 2021, note was taken of the information and recommendations presented in the nexus report titled *Measuring and Monitoring Progress Towards the Sustainable Development Goals* and encouraged its members to review and possibly apply the recommendations of the report nationally (ECE/CEP-CES/GE.1/2021/2, para. 27(h)).

At the sixth Expert Meeting on Statistics for Sustainable Development Goals, held on 5 and 6 May 2022, the above-mentioned nexus report was considered, and it was agreed that the ECE Steering Group on Statistics for SDGs and the task teams with the support of the secretariat would continue to provide guidance for implementing the recommendations of this report (ECE/CES/2022/14/Add.14, para. 9).

At the seventy-third session of the Working Party on Transport Statistics, held from 15 to 17 June 2022, note was taken of the information and recommendations contained in the above-mentioned nexus report and its members were encouraged to review and possibly apply the recommendations of the report nationally (ECE/TRANS/WP.6/183, para. 26).

OIOS recommended also that ECE set targets for regional advisers to complete national action plans for their respective programme countries to optimize and tailor ECE support to the specific needs of each Member State (para. 2).

At the forty-third session of the Joint FAO/ECE Working Party on Forest Statistics, Economics and Management, held from 15 to 17 June 2022, note was taken of the information and recommendations provided in the above-mentioned nexus report and its members were encouraged to review and possibly apply the recommendations of the report nationally (ECE/TIM/EFC/WP.2/2022/2, paras. 75–76).

Status: Implemented, pending review by the Office of Internal Oversight Services.

In March 2022, ECE revised its internal directive on the management of the regular programme of technical cooperation, clarifying the role of the regional advisers as “ECE focal points for ongoing engagement with Resident Coordinator Offices and UNCTs to identify potential areas for developing technical cooperation activities in the programme countries”.

Further to the issuance of that directive, a template has been agreed for country briefs, based on the signed United Nations Sustainable Development Cooperation Framework of a country, and reflecting programmatic opportunities for ECE in the country.

The delivery of the 17 country briefs was sequenced throughout 2022. A total of 5 were delivered in May 2022, for Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan, while the last 12 were finalized on 1 December 2022, for Albania, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Georgia, Montenegro, North Macedonia, the Republic of Moldova, Serbia, Türkiye and Ukraine.

These documents are shared with government officials during high-level visits and with United Nations counterparts in the United Nations country teams. They will be updated regularly in the future by the relevant regional advisers.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 7 Forests and the forest industry	(1)	GS (PL)	Abolishment of 1 post of Senior Statistics Assistant (GS (PL))	The abolishment is proposed because the post no longer responds to the requirements of the subprogramme, given that data analysis- and assessment-related work has become more complex, and the post now requires specific skills that are not commensurate with a GS (PL) level. The proposal to abolish this post is contingent upon the establishment of the following Data Analyst post (P-3).
	1	P-3	Establishment of 1 post of Data Analyst (P-3)	The proposed establishment of 1 Data Analyst post (P-3) (\$97,300) responds to the requirements of the subprogramme to provide insight on forests and forest products to member States and senior management by analysing data and turning it into information to enable data-driven planning and evidence-based decision-making, in line with the Data Strategy of the Secretary-General for Action by Everyone, Everywhere. In addition, the post will collect, identify and communicate facts, trends and patterns through reports and data visualization methods to senior officers, as well as representatives and officials of national Governments, and other counterparts.
Programme support	(1)	GS (PL)	Abolishment of 1 post of Senior Administrative Assistant (GS (PL))	The abolishment is proposed because the post no longer responds to the requirements of the section, given that the work of programme support has become more strategic and data-driven. The post requires specific skills that are not available at the GS (PL) level. The proposal to abolish this post is contingent upon the establishment of the Management and Programme Analyst post (P-3).
	1	P-3	Establishment of 1 post of Management and Programme Analyst (P-3)	The proposed establishment of one post of Management and Programme Analyst (P-3) (\$97,300) responds to the increasing need for analysis and metrics to enable senior management decision-making and provide strategic support, oversight and control in various areas, including monitoring and performance management, delegation of authority and strategic organizational change. The post requires professional analytical skills and knowledge in results-based management and the development of key performance indicators to better inform planning and identification of risks for mitigation. In addition, the post requires regular interaction and communication with senior management within ECE and other United Nations counterparts.

Abbreviation: GS (PL), General Service (Principal level).

Foreword

Over the last 75 years, the Economic Commission for Latin America and the Caribbean (ECLAC) has been fully committed to the sustainable development of the countries of the region. In October 2022, in Buenos Aires, the Commission held its thirty-ninth session. At the event, ECLAC presented to its member States the document *Towards Transformation of the Development Model in Latin American and the Caribbean: Production, Inclusion and Sustainability*, which considers the complex conditions that pose significant challenges to accelerating growth, tackling high inflation and the cost-of-living increases, maintaining transfers to the most vulnerable households, mitigating the social costs of the crisis and boosting investment. The document also contains policy recommendations for advancing towards a renewed model for inclusive and sustainable growth.

In its capacity as a leading think tank of the United Nations Secretariat, the Commission will continue to support member States in the implementation of the 2030 Agenda for Sustainable Development and the attainment of the Sustainable Development Goals. ECLAC will continue to perform its role as a universal and impartial forum to foster public policy debate, the exchange of best practices and the promotion of regional positions in global forums, as well as in regional and interregional high-level meetings and summits of heads of State and government. ECLAC will also continue to perform its convening role by providing intergovernmental platforms for policy dialogue, consensus-building, peer learning and normative discussions, and its operational role by providing policy advice and technical cooperation, in response to the demands of its member States, to implement capacity development activities at the regional, subregional and national levels.

ECLAC will continue to give a voice to the only least developed country, as well as to the landlocked developing countries, in the region. The Commission will also maintain its commitment to support the agenda for the small island developing States and to provide support to face the challenges faced by middle-income countries.

I would like to express my deepest gratitude to all States Members of the United Nations for their continuous support and trust in the work of ECLAC.

(Signed) José Manuel **Salazar-Xirinachs**
Executive Secretary
Economic Commission for Latin America and the Caribbean

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 21.1 The Economic Commission for Latin America and the Caribbean (ECLAC) is responsible for promoting the economic, social and environmentally sustainable development of the Latin American and Caribbean countries through international cooperation and by undertaking applied research and evidence-based comparative analysis of development processes, as well as by providing normative and operational capacity development, technical cooperation and advisory services in support of regional development efforts. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, as well as Economic and Social Council resolution 106 (VI), by which the Council established the Commission for the purpose of contributing to, and coordinating action towards, the economic and social development of the region and reinforcing economic relationships among the countries of Latin America and the Caribbean and with other regions of the world. In 1996, pursuant to its resolution 553 (XXVI), the Commission decided, inter alia, to collaborate with member States in the comprehensive analysis of development processes geared towards the design, monitoring and evaluation of public policies and the resulting provision of operational services in the fields of specialized information, advisory services, training and support for regional and international cooperation and coordination. The Commission's support aimed at developing the capacity of Governments to formulate and implement policies for sustainable development is provided through an array of instruments, including the regular programme for technical cooperation, Development Account projects and extrabudgetary projects and programmes.

Strategy and external factors for 2024

- 21.2 The Commission's overall strategy for achieving the objectives of the programme is structured around 13 interdependent and complementary subprogrammes that are to be implemented using a multidisciplinary and integrated approach. The present proposed programme budget is also aimed at being responsive to the priorities, policy needs and emerging challenges of member States against a backdrop characterized by distress and uncertainties.
- 21.3 The Commission will continue to support the development pillar of the United Nations, to foster economic integration at the subregional and regional levels, to support member States in the implementation of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals and the implementation of the international agreements stemming from the major summits and conferences in the development field, and to facilitate sustainable development by helping to bridge economic, social and environmental gaps within and between countries of the region, as well as with other regions of the world.
- 21.4 To achieve these objectives, ECLAC will continue to offer its value proposition to member States by combining its three main functions: the think tank and thought leadership role in performing analytical, normative and knowledge management work; the convening capacity through its intergovernmental platforms and subsidiary bodies; and the operational role by providing technical cooperation, advisory and capacity development services and peer learning, anchored in rigorous data and evidence-based analysis and understanding of the realities of the region.
- 21.5 Latin American and Caribbean countries have been deeply affected by the coronavirus disease (COVID-19) pandemic, and its impact is equivalent to the loss of a decade of progress. Persistent structural problems, such as low productivity and fragmented social protection systems, have been aggravated. Global challenges and uncertainties resulting from cascading crises, including food, energy and financial challenges, the disruption of supply chains and the resurgence of inflation, are

also affecting the recovery from the pandemic. In this context, poverty and extreme poverty rates, as well as inequality, increased in the region. Faced with this reality, ECLAC advocates a redoubling of efforts in the region both to reactivate its economies and to transform countries' development models. Such efforts should be centred around policies for productive transformation and diversification and supported by significant public and private investment. This would contribute to accelerating structural change and technological and digital transformation to achieve high, sustained growth and sustainable and inclusive development, ensuring that no one is left behind and avoiding setbacks in achieving the 2030 Agenda and the Goals.

- 21.6 ECLAC will continue to provide integrated and comprehensive follow-up to world summits from a regional perspective, by coordinating the region's approach to the implementation of the 2030 Agenda. It will also continue to act as the secretariat of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, providing support for the follow-up and review process of the implementation of the 2030 Agenda at the regional level, as well as for the reporting to the high-level political forum on sustainable development at the global level, thereby linking the national, regional and global dimensions of the process.
- 21.7 ECLAC will continue to enhance its bilateral and multilateral collaboration with cooperation partners within and outside the United Nations system, to strengthen its strategic partnerships and mobilize additional extrabudgetary resources to enhance the implementation of the programme of work and maximize its impact in beneficiary countries and at the regional level.
- 21.8 With regard to cooperation with other entities at the global, regional, national and local levels, ECLAC will continue to collaborate with the Bretton Woods institutions, in particular with the International Monetary Fund and the World Bank, and with other inter-American and Ibero-American organizations, such as the Organization of American States, the Inter-American Development Bank, the Ibero-American Secretariat and the Development Bank of Latin America. ECLAC will reinforce its close cooperation with all regional mechanisms, including the Community of Latin American and Caribbean States (CELAC), the Caribbean Community (CARICOM), the Latin American Integration Association, the Southern Common Market, the Central American Integration System, the Pacific Alliance and the Bolivarian Alliance for the Peoples of Our America. In addition, ECLAC will strengthen its collaboration with private sector associations, non-governmental and civil society organizations, think tanks and academia to promote policy dialogue and active engagement in the implementation of the 2030 Agenda, which is primarily driven by member States.
- 21.9 ECLAC will work closely with the Governments in the region and other stakeholders, such as the business community, development banks, international financial institutions, civil society, academia and universities, to reinforce linkages between national experiences and regional perspectives, foster data comparability and the exchange of good practices and provide technical cooperation services on transboundary issues. The Commission will continue to foster a multisectoral and integrated approach to development and give a voice to countries in special situations, including the single least developed country in the region, the landlocked developing countries, the small island developing States of the Caribbean and the middle-income countries.
- 21.10 With regard to inter-agency coordination and liaison, ECLAC will collaborate actively with the United Nations resident coordinator system and the United Nations country teams in the region, including through the Regional Collaborative Platform for Latin America and the Caribbean and other mechanisms.
- 21.11 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
 - (a) The international community continues to be committed to implementing the 2030 Agenda and achieving the Sustainable Development Goals and to sustaining coordinated multilateral actions to overcome the impact of the COVID-19 pandemic and secure a transformative recovery;

- (b) The countries of Latin America and the Caribbean continue to support and attach high priority to multilateralism, regional and subregional cooperation, integration and the gradual convergence of integration schemes with a view to broadening the opportunities for achieving economic, social and environmentally sustainable development;
 - (c) The regional and international communities support the member States of ECLAC and respond to their specific needs and concerns.
- 21.12 The Commission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For instance, result 3 of subprogramme 5 reflects the relevance of the increased use of new technologies and digital tools to design and implement care policies for the advancement of women in Latin America and the Caribbean. The Commission will continue to ensure that gender focal points (see General Assembly resolution [76/142](#)) are consulted in programme formulation and that gender analysis (see Assembly resolution [74/235](#)) is integrated into all areas under the Commission's mandate.
- 21.13 In line with the United Nations Disability Inclusion Strategy and guided by the Commission's Disability Inclusion Strategy 2021–2025, ECLAC will continue to work to further advance the inclusion of persons with disabilities. This will include implementing inclusive and comprehensive measures regarding the accessibility of facilities and reasonable accommodations, including improvements in audiovisual technology in conference rooms, and the adaptation of office space and furniture to facilitate the full participation and inclusion of persons with disabilities in the daily work of the Commission.

Impact of the pandemic and lessons learned

- 21.14 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular the need to continue to adapt the modalities of planned deliverables to virtual or hybrid modalities under all subprogrammes. However, even though virtual modalities enabled the participation of a greater number of meeting participants and trainees in seminars and workshops, it also presented challenges, given the higher costs involved and the unequal access to Internet services within and among member States in the region. Tailor-made technical assistance and policy advice to senior national and sectoral authorities were affected as a result of reduced face-to-face interactions in meetings and other exchanges.
- 21.15 In addition, in order to support member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, ECLAC delivered capacity-building activities, technical assistance and advisory services to countries in the region, upon request, under all subprogrammes.
- 21.16 ECLAC mainstreamed lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including the use of hybrid workshops and meetings, when possible, increasing the number of e-learning courses, adapting training materials to virtual settings and addressing new complexities of working methods in hybrid modalities, as supporting such modalities implies higher associated costs. The proposed programme plan for 2024 continues to incorporate such lessons learned and best practices, as appropriate. For example, under subprogramme 4, ECLAC will explore the possibility of increasing the use of hybrid formats for the delivery of workshops and of fostering the organization of regional and interregional platforms to promote the exchange of experiences on social protection instruments and reforms.

Legislative mandates

- 21.17 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

55/2	United Nations Millennium Declaration	66/210; 70/211	Role of the United Nations in promoting development in the context of globalization and interdependence
58/269	Strengthening of the United Nations: an agenda for further change		
59/57	A Fair Globalization: Creating Opportunities for All – report of the World Commission on the Social Dimension of Globalization	66/213	Fourth United Nations Conference on the Least Developed Countries
60/1	2005 World Summit Outcome	66/216; 70/219; 77/181	Women in development
60/4	Global Agenda for Dialogue among Civilizations	66/217; 68/228; 72/235	Human resources development
63/199	International Labour Organization Declaration on Social Justice for a Fair Globalization	66/288	The future we want
63/260	Development-related activities	67/12; 75/14; 77/117	Cooperation between the United Nations and the Latin American and Caribbean Economic System
64/172; 66/155; 68/158; 71/192; 73/166; 75/182; 77/212	The right to development	67/140	Realizing the Millennium Development Goals and other internationally agreed development goals for persons with disabilities towards 2015 and beyond
64/200; 70/204	International Strategy for Disaster Reduction	67/148; 69/151; 70/133; 74/128; 76/142	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
64/222	Nairobi outcome document of the High-level United Nations Conference on South-South Cooperation		Human rights and extreme poverty
64/289	System-wide coherence	67/164; 69/183; 71/186; 73/163; 75/175	
65/1	Keeping the promise: united to achieve the Millennium Development Goals	67/205; 75/214; 77/163	Towards the sustainable development of the Caribbean Sea for present and future generations
66/71	International cooperation in the peaceful uses of outer space	67/207	Follow-up to and implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
66/84	Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples by the specialized agencies and the international institutions associated with the United Nations	67/215; 69/225	Promotion of new and renewable sources of energy
66/125; 73/141; 75/151	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly	67/217; 73/240; 75/225; 77/174	Towards a New International Economic Order
66/157	Strengthening United Nations action in the field of human rights through the promotion of international cooperation and the importance of non-selectivity, impartiality and objectivity	67/218	Promoting transparency, participation and accountability in fiscal policies
66/161; 70/159; 71/197	Globalization and its impact on the full enjoyment of all human rights	67/226; 71/243; 75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
66/165; 68/180	Protection of and assistance to internally displaced persons	67/230; 69/202	The role of the United Nations in promoting a new global human order
66/166; 70/166	Effective promotion of the Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities	68/1	Review of the implementation of General Assembly resolution 61/16 on the strengthening of the Economic and Social Council
66/172; 68/179; 70/147; 74/148	Protection of migrants	68/4	Declaration of the High-level Dialogue on International Migration and Development
66/200; 71/228; 75/217; 76/205; 77/165	Protection of global climate for present and future generations of humankind	68/6	Outcome document of the special event to follow up efforts made towards achieving the Millennium Development Goals

Part V Regional cooperation for development

68/134; 69/146; 71/164; 74/125; 75/152; 76/138; 77/190	Follow-up to the Second World Assembly on Ageing	70/127; 74/121; 76/137 70/131	Policies and programmes involving youth Convention on the Elimination of All Forms of Discrimination against Women
68/151	Global efforts for the total elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action	70/132; 74/126; 76/140 70/138; 76/146 70/140; 73/262; 75/237; 77/205	Improvement of the situation of women and girls in rural areas The girl child A global call for concrete action for the total elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action
68/160; 70/153	Enhancement of international cooperation in the field of human rights		
68/192; 70/179	Improving the coordination of efforts against trafficking in persons	70/163	National institutions for the promotion and protection of human rights
68/198	Information and communications technologies for development		
68/201; 73/220; 75/204; 76/192; 77/152	International financial system and development	70/189; 72/206; 76/195 70/217; 72/232; 75/228; 77/246	Financial inclusion for sustainable development Follow-up to the second United Nations Conference on Landlocked Developing Countries
68/202; 71/216; 72/204; 73/221; 75/205; 76/193; 77/153	External debt sustainability and development	70/223; 71/245; 73/253; 75/235	Agriculture development, food security and nutrition
68/204	Follow-up to the International Conference on Financing for Development	70/299	Follow-up and review of the 2030 Agenda for Sustainable Development at the global level
68/210; 71/223; 73/227; 74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	71/177; 73/155; 76/147 71/178; 74/135; 75/168; 76/148; 77/203	Rights of the child Rights of Indigenous Peoples
68/220; 72/228	Science, technology and innovation for development	71/180	International Convention on the Elimination of All Forms of Racial Discrimination
68/222; 70/215; 72/230; 74/231; 76/215	Development cooperation with middle-income countries	71/190; 72/172	Promotion of a democratic and equitable international order

Outreach programmes, special events and information materials: booklets, fact sheets, wall charts and information kits; the <i>ECLAC Notes</i> electronic newsletter; and public information materials related to the United Nations, ECLAC events and special observances.				
External and media relations: guided tours of ECLAC premises in Santiago; photographic coverage of ECLAC meetings and activities and audiovisual products on the work of ECLAC; press conferences and media events related to the launch of flagship publications and other relevant documents of ECLAC and of the United Nations; press releases related to the work of ECLAC and of the United Nations; and interviews with United Nations/ECLAC spokespersons by national and international news media.				
Digital platforms and multimedia content: regional inter-agency knowledge and data platform on the implementation of the Sustainable Development Goals; ECLAC digital repository; and social media campaigns.				

Evaluation activities

- 21.19 The following evaluations completed in 2022 have guided the proposed programme plan for 2024:
- (a) Office of Internal Oversight Services (OIOS) evaluation of ECLAC subprogramme 3, Macroeconomic policies and growth;
 - (b) OIOS evaluation of the regional offices of the Development Coordination Office;
 - (c) Evaluations of projects on sustainable energy (subprogramme 8); national institutional frameworks in Caribbean States (subprogramme 12); the environmental dimension of the 2030 Agenda (subprogramme 7); rural-urban linkages in Colombia (subprogramme 3); technological transformations: promoting productive jobs and confronting the challenge of new forms of informal employment (subprogrammes 3 and 4); and leaving no one behind: strengthening institutions for social policy coherence and integration (subprogrammes 4 and 11).
- 21.20 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, subprogramme 3 will work closely with resident coordinator offices, United Nations country teams and the Commission's subregional and country offices to identify areas of potential synergy for technical assistance projects, in line with recommendation 1 of the OIOS report. In addition, subprogramme 4 is planning to increase its work on social protection, as highlighted under its result 3, which was the first recommendation of the project evaluation on social policy coherence.
- 21.21 Evaluations of projects on climate change and disaster indicators for evidence-based policies in the small island developing States of the Caribbean (subprogrammes 10 and 12) are planned for 2024.

Programme of work

Subprogramme 1

International trade, integration and infrastructure

Objective

- 21.22 The objective, to which this subprogramme contributes, is to advance sustainable development and strengthen the role of Latin America and the Caribbean in international trade and the global economy by deepening regional integration and enhancing logistics and infrastructure.

Strategy

- 21.23 To contribute to the objective, the subprogramme will:
- (a) Support the capacities of member States to face new challenges, such as digital trade and services, participation in global and regional value chains, the reduction of their dependency on the export of primary products, the internationalization of small and medium-sized enterprises, trade facilitation, new public and private standards, environmental sustainability and emerging issues in the area of trade infrastructure, by conducting analyses at the country and regional levels, thus helping member States to make progress towards the achievement of Sustainable Development Goals 8, 9 and 12;
 - (b) Assist member States in the development and review of logistics policies at the national, subregional and transboundary levels; and provide policy recommendations and technical assistance to monitor the economic infrastructure gap and investment in the region, disseminate new policy options and promote the exchange of good practices in logistics and transport infrastructure operation, with a particular focus on landlocked developing countries and other member States with special needs, thus helping member States to make progress towards the achievement of the Goals, in particular target 17.11;

- (c) Seek to mainstream the balance among efficiency, resilience and sustainability as a pillar for logistics infrastructure policies and support the implementation of policies that increase the share of industrialized goods in the exports of Latin American and Caribbean countries, thus helping member States to make progress towards the achievement of Goal 9;
- (d) Examine the impact of the pandemic in all its publications, capacity-building activities and technical assistance services, as relevant.

21.24 The above-mentioned work is expected to result in:

- (a) National policies that promote more sustained, inclusive and sustainable economic growth through sustainable consumption and production patterns;
- (b) Policy recommendations for the formulation and negotiation of trade policies by countries and implementation and administration of trade agreements at the bilateral, regional, plurilateral and multilateral levels, while ensuring special and differentiated treatment for developing countries;
- (c) Technical advice on more effective participation by countries in the region in global and regional value chains, including through reduced logistics overcost and increased sustainable trade;
- (d) Policy recommendations for a more sustainable and resilient recovery from the pandemic.

Programme performance in 2022

Trade policies with a gender perspective

21.25 Gender inequality can have negative effects on economic activities, including international trade, by neglecting the comparative advantage that more equitable participation could generate. At the same time, trade policy and the composition of the export basket can have an impact on the participation of women. The subprogramme has developed a methodology to measure the participation of women in the export sector and provided technical assistance to governments on the relationship between the participation of women and trade, and on best practices and tools to include provisions on gender equality and the empowerment of women in bilateral and plurilateral trade agreements.

21.26 Progress towards the objective is presented in the performance measure below (see figure 21.I).

Figure 21.I

Performance measure: number of Latin America and Caribbean countries with chapters or provisions on gender equality in trade agreements (cumulative)

Planned results for 2024

Result 1: improved coordination of policies on trade, logistics infrastructure and regional integration

Programme performance in 2022 and target for 2024

- 21.27 The subprogramme's work contributed to 19 Latin American and Caribbean country institutions requesting technical support in implementing more coordinated trade and logistics strategies within a regional perspective, which exceeded the planned target of 16 countries.
- 21.28 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.II).

Figure 21.II

Performance measure: number of Latin American and Caribbean country institutions requesting technical support in implementing more coordinated trade and logistics strategies within a regional perspective (cumulative)

Result 2: improved capacity of member States to identify key economic sectors for sustainable recovery from the COVID-19 pandemic

Programme performance in 2022 and target for 2024

- 21.29 The subprogramme's work contributed to 15 Latin American and Caribbean national or regional institutions with improved capacity to identify vulnerable, resilient and potential sectors in the recovery from the pandemic, which met the planned target.
- 21.30 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.III).

Figure 21.III

Performance measure: number of Latin American and Caribbean national or regional institutions with improved capacity to identify vulnerable, resilient and potential sectors in the recovery from the pandemic (cumulative)

Result 3: member States promote the participation of small and medium-sized enterprises in cross-border e-commerce

Proposed programme plan for 2024

- 21.31 The COVID-19 pandemic has resulted in accelerated growth of domestic and cross-border e-commerce as a result of improved Internet access, mobility restrictions and targeted policies. However, many small and medium-sized enterprises face challenges in participating in this dynamic segment of international trade. The subprogramme has been providing technical assistance to export promotion agencies, trade ministries and chambers of commerce to identify the strengths and weaknesses of present support programmes for small and medium-sized enterprises and other critical pillars for their digital transformation and participation in cross-border e-commerce.

Lessons learned and planned change

- 21.32 The lessons for the subprogramme were threefold. First, the subprogramme can strengthen data collection efforts on cross-border e-commerce and digital trade to monitor trends to implement and evaluate the implementation of national policies. Second, more information can help to identify the success factors of support programmes for small and medium-sized enterprises to encourage their digital transformation and increased participation in cross-border e-commerce. Third, the subprogramme can carry out more analysis on other factors influencing the participation of small and medium-sized enterprises in cross-border digital trade, such as trade facilitation. In applying the lessons, the subprogramme will work more closely with statistical institutes, export promotion agencies, trade ministries, customs agencies and other important e-commerce actors to better identify bottlenecks that prevent small and medium-sized enterprises from participating in e-commerce abroad and define more impactful solutions.
- 21.33 Expected progress towards the objective is presented in the performance measure below (see figure 21.IV).

Figure 21.IV

Performance measure: number of Latin American and Caribbean national institutions implementing new policy measures to foster the digital transformation of small and medium-sized enterprises and their participation in cross-border e-commerce (cumulative)

Deliverables

21.34 Table 21.2 lists all deliverables of the subprogramme.

Table 21.2

Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
1. Provision of infrastructure and logistics services that promote economic efficiency, social equality and environmental sustainability, and increasing the integration of physical infrastructure in the region	1	1	1	1
Seminars, workshops and training events (number of days)	8	8	8	8
2. Workshops and seminars on the relationship between regional trade policy and the attainment of the Sustainable Development Goals; comparative strategies for deepening regional value chains; new challenges in the region related to resilient infrastructure policies; links between trade and other public policies in the light of developments in the global economy and international trade; and cooperation and trade facilitation initiatives in the region	8	8	8	8
Publications (number of publications)	22	22	20	20
3. <i>International Trade Outlook for Latin America and the Caribbean</i>	1	1	1	1
4. On economic relations with the United States of America; capital flows to the region; emerging trade; and financial issues in the global economy and the implementation of the Sustainable Development Goals in Latin America and the Caribbean	9	9	8	8
5. On trade and development; maritime transport, sustainable logistics, mobility and infrastructure policies and regional integration; and value chains, modern services and e-commerce in the region	12	12	11	11
Technical materials (number of materials)	10	10	10	10
6. <i>Bulletin on the Facilitation of Transport and Trade in Latin America and the Caribbean</i>	6	6	6	6
7. On international trade in goods in Latin America and the Caribbean	4	4	4	4

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on value chains, trade policy, integration, sustainable logistics, mobility and infrastructure policies, and social and sustainability issues.

Databases and substantive digital materials: databases on trade data and disputes, including the Interactive Graphic System for International Trade Data, bond issuance, spreads and credit ratings, the Maritime and Logistics Profile of Latin America and the Caribbean data tool, and other data on infrastructure services.

D. Communication deliverables

Outreach programmes, special events and information materials: *CEPAL News* newsletter.

**Subprogramme 2
Production and innovation**

Objective

- 21.35 The objective, to which this subprogramme contributes, is to enhance the diversification of productive structures through innovation and the diffusion of new technology and to strengthen linkages and networking between firms.

Strategy

- 21.36 To contribute to the objective, the subprogramme will:
- (a) Promote policy advocacy and the exchange of experiences and best practices with respect to the dynamics of productive development among stakeholders at the regional, national and local levels through meetings, seminars and electronic forums, including the provision of technical cooperation services, such as specific training courses and workshops;
 - (b) Focus on the integration of innovation and new, low-carbon and low-emission technologies in production processes with an emphasis on digital technologies convergence (that is, the integration of the Internet of things, 5G, big data, artificial intelligence, information technology and cognitive science) and new manufacturing processes (the Industrial Internet); on capacity-building in digital technologies; and on mainstreaming a gender perspective on structural change, for example, with regard to productivity, digital and employment gaps;
 - (c) Conduct economic analyses along with applied research on the basis of the generation, processing and analysis of information and indicators in various databases, disseminate the result of those studies and submit policy recommendations to Governments, regional bodies and other relevant stakeholders;
 - (d) Facilitate the connection of micro-, small and medium-sized enterprises with larger firms that use advanced technologies so as to integrate them into the process of learning and competition in dynamic foreign and domestic markets and increase the dissemination of technology;
 - (e) Analyse and measure the impact of foreign direct investment so as to devise industrial policies that will have positive effects on learning and the diversification of the production and export structures; and provide technical assistance, upon request by member States, on the assessment, development and implementation of industrial policies and strategies, thus contributing to the attainment of Sustainable Development Goal 9;
 - (f) Continue to provide its analysis of the ongoing impact of COVID-19 on firms and sectors in the region and further support member States in mitigating fragilities and imbalances in the productive structure of the region that have emerged or been exacerbated, with particular attention given to the digitalization of the productive sector.

- 21.37 The above-mentioned work is expected to result in:
- (a) The design and implementation of industrial and technology policies by Governments and regulators aimed at diversifying the productive structure and building capacities in Latin American and Caribbean countries;
 - (b) Strengthened national capacities to incorporate innovation and new technologies into production processes;
 - (c) The design and implementation of policies by Governments and regulators that heighten local innovation and adaptation, helping to leverage the potential of foreign direct investment;
 - (d) Strengthened scientific and technological capacity of member States to move towards more sustainable patterns of consumption and production;
 - (e) A diversification process associated with the creation of new opportunities for formal jobs and productivity growth;
 - (f) Increased resilience of the productive sector through a significant increase in the digitalization of firms in the region, including micro-, small and medium-sized enterprises.

Programme performance in 2022

Adoption of the Digital Agenda for Latin America and the Caribbean

- 21.38 The regional digital agenda establishes the thematic priorities in relation to the digital development of Latin American and Caribbean countries. It is built through a participatory process involving the Governments of the region and other relevant actors in the digital ecosystem. In order to achieve a greater impact, the Agenda is highly disseminated and is presented at the Ministerial Conference on the Information Society. In 2022, the eighth Ministerial Conference was held in Montevideo, in both face-to-face and hybrid formats, which enabled higher levels of participation.
- 21.39 Progress towards the objective is presented in the performance measure below (see table 21.3).

Table 21.3
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
At the seventh Ministerial Conference on the Information Society, held in 2020, the countries of the region adopted the Digital Agenda for Latin America (eLAC 2022)	–	At the eighth Ministerial Conference on the Information Society, held in Uruguay in 2022, the countries of the region adopted the Digital Agenda for Latin America and the Caribbean (eLAC 2024), integrating new elements into its thematic scope
The importance of digital technologies in mitigating the effects of the COVID-19 pandemic and their incorporation into economic recovery plans were emphasized in the Agenda		At the Conference, countries committed themselves to strengthening regional cooperation activities in digital matters by preparing a programme of activities

Planned results for 2024

Result 1: improved connectivity to speed up firm digitalization

Programme performance in 2022 and target for 2024

- 21.40 The subprogramme's work contributed to 82 per cent of the countries in the region having fixed broadband speeds that enable intensive use of the Internet, which exceeded the planned target of 80 per cent.
- 21.41 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.V).

Figure 21.V

Performance measure: percentage of countries in the region with fixed broadband speeds that enable intensive use of the Internet (annual)

Result 2: policies to accelerate digital transformation

Programme performance in 2022 and target for 2024

- 21.42 The subprogramme's work contributed to one new policy to accelerate digital transformation, which met the planned target.
- 21.43 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.VI).

Figure 21.VI

Performance measure: number of new policies to accelerate digital transformation (cumulative)

Result 3: improved policies to promote productive development in Latin America and the Caribbean

Proposed programme plan for 2024

21.44 The region's economy is characterized by a strong polarization between dynamic companies and others with lower productivity, which hinders the possibility of creating integrated production systems and perpetuates the marginalization of a significant proportion of the population. Overcoming this situation requires policies and actions that are aimed at reducing the relative productivity gaps among agents and among territories.

Lessons learned and planned change

21.45 The lesson for the subprogramme was that there are frequent opportunities to engage with new officials at the political level to maintain the continuity of joint work with governments and therefore strengthen the impact of the proposed actions. In applying the lesson, the subprogramme will support, and focus in particular on, working with the technical level of national and subnational institutions. The subprogramme will provide technical assistance on issues related to productive development, such as: foreign direct investment, competition policies, micro-, small and medium-sized enterprises, the social and solidarity economy and territorial economic development.

21.46 Expected progress towards the objective is presented in the performance measure below (see figure 21.VII).

Figure 21.VII

Performance measure: number of policy measures implemented by government institutions to promote productive development in areas related to business strategies, investment and territorial economic development (cumulative)

Deliverables

21.47 Table 21.4 lists all deliverables of the subprogramme.

Table 21.4
Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	6	2	6	6
1. Meetings of the Conference on Sciences, Innovation and Information and Communications technologies of ECLAC	6	–	6	–
2. Preparatory meetings of the Conference on Science, Innovation and Information and Communications Technologies of ECLAC	–	2	–	6
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1

Seminars, workshops and training events (number of days)	47	47	48	47
4. Training and seminars on foreign direct investment and small and medium-sized enterprises, new and emerging technologies and on productive structure diversification	6	6	7	6
5. Training courses on innovation policy management and economies of the region	35	35	35	35
6. Meeting of experts to analyse recent structural changes, study the trends and progress of the digital economy, and examine recent trends in the behaviour of economic agents in sectors and countries in the region	6	6	6	6
Publications (number of publications)	7	7	7	7
7. <i>Foreign Direct Investment in Latin America and the Caribbean</i>	1	1	1	1
8. On the production structure of the region, foreign investment, industrial policies, and digital technologies and innovation	5	5	5	5
9. On technological, productive or trade performance in Argentina	1	1	1	1
C. Substantive deliverables				
Consultation, advice, and advocacy: advice to member States, upon request, on policies and strategies for productive development and competitiveness, public-private partnerships, foreign direct investment, small and medium-sized enterprises, and innovation systems and new and emerging technologies.				
Databases and substantive digital materials: databases on economic activity in specific sectors, software for the analysis of the competitiveness of nations and statistical information on the main economic agents in the region.				

Subprogramme 3 Macroeconomic policies and growth

Objective

- 21.48 The objective, to which this subprogramme contributes, is to foster sustainable and inclusive growth in Latin America and the Caribbean by strengthening the capacity of policymakers and other stakeholders in the region to analyse current and emerging macroeconomic and development finance issues and to evaluate, design and implement development-centred macroeconomic and development financing policies that incorporate a gender perspective and are based on comparative policy analysis.

Strategy

- 21.49 To contribute to the objective, the subprogramme will:
- (a) Prepare the annual *Economic Survey of Latin America and the Caribbean*, the *Preliminary Overview of the Economies of Latin America and the Caribbean*, the *Fiscal Panorama of Latin America and the Caribbean* and other reports focusing on Latin America and the Caribbean to support member States in responding to current and emerging macroeconomic and financing for development trends;
 - (b) Conduct applied policy analysis to support member States in the evaluation and formulation of macroeconomic and financing for development policies that promote sustainable development in line with the Sustainable Development Goals;
 - (c) Facilitate South-South interaction of policymakers and dialogue with regional and international organizations through seminars, including the annual regional fiscal policy seminar, and through workshops on macroeconomic and financing for development policies;
 - (d) Foster the establishment and operation of networks of key stakeholders, including policymakers, academics, private sector analysts, members of civil society organizations and the public at large, to enable regional discussion of key macroeconomic and financing for development issues;
 - (e) Provide technical cooperation and advisory services, upon request, in the areas of macroeconomic, labour and financing for development policies.
- 21.50 These workstreams will help member States to make progress towards achieving all of the Sustainable Development Goals, with a particular emphasis on Goals 8, 10, 16 and 17.
- 21.51 The above-mentioned work is expected to result in:
- (a) Enhanced analysis of current and emerging macroeconomic and development finance issues by policymakers and other stakeholders in the region;
 - (b) Evaluation, design and implementation by policymakers of macroeconomic and development financing policies that incorporate a gender perspective and are based on comparative policy analysis.

Programme performance in 2022

Strengthened regulations for decent work for digital platform workers

- 21.52 The COVID-19 pandemic highlighted the rapid growth of new business models based on online platforms in the region, which have given rise to new occupations that generally do not meet the criteria of decent work, which entail employment relationships that are neither wage employment nor own-account work and which, in most cases, are not covered by labour legislation. The subprogramme worked in close collaboration with countries of the region to strengthen data collection methods, so as to better characterize the workers involved; to promote dialogue on options for labour regulation; and to generate evidence-based policy recommendations, so as to promote decent work conditions for platform workers.
- 21.53 Progress towards the objective is presented in the performance measure below (see table 21.5).

Table 21.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Costa Rica, the Dominican Republic and Ecuador received technical support to strengthen capacities and improve methods for collecting data on digital platform workers	Improved data collection to better capture information on digital platform workers, including through the use of methods relating to big data	Policymakers gained access to evidence-based policy recommendations for labour regulations, through studies on the cases of Chile and Colombia
Policymakers discussed options for labour regulations at seminars held in Costa Rica and Mexico	Policymakers shared experiences, during a seminar held in Chile and at a regional event held in the context of South-South dialogue	Chile became the first country of the region to introduce a regulatory framework for digital platform workers (Act 21.431 <i>regulating the hiring of workers by digital platform service companies</i>)
Policymakers discussed detailed studies on existing labour regulations in Argentina and Mexico		

Planned results for 2024

Result 1: macroeconomic and financing for development policies for sustainable and inclusive growth in a post-pandemic world

Programme performance in 2022 and target for 2024

- 21.54 The subprogramme’s work contributed to 14 macroeconomic and financing for development policies, measures and strategies for sustainable recovery from the COVID-19 pandemic, which met the planned target.
- 21.55 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.VIII).

Figure 21.VIII

Performance measure: number of macroeconomic and financing for development policies, measures and strategies for sustainable recovery from the COVID-19 pandemic (cumulative)

Result 2: fiscal, financial and employment policies for a transformative recovery

Programme performance in 2022 and target for 2024

- 21.56 The subprogramme’s work contributed to five references to the subprogramme analysis and policy recommendations in official documents, which met the planned target.

21.57 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.IX).

Figure 21.IX

Performance measure: number of references to the subprogramme analysis and policy recommendations in official documents (cumulative)

Result 3: strengthened resource mobilization to support sustainable development and the achievement of the Sustainable Development Goals in Latin America and the Caribbean

Proposed programme plan for 2024

21.58 Fiscal space to drive sustainable and inclusive growth and to build resilience to climate change in Latin America and the Caribbean is limited, with countries taking measures to reduce fiscal deficits and to ensure the sustainability of public debt, which rose sharply because of the unprecedented measures taken in response to the pandemic. Ramping up resource mobilization to build fiscal space is therefore a helpful avenue to supporting policies to achieve the Sustainable Development Goals and tackle climate change. The subprogramme provides evidence-based and comparative policy analysis, incorporating a gender perspective, to countries in the region, in order to support their evaluation and formulation of resource mobilization policy measures. In line with those efforts, countries in the region are taking steps to adopt measures to improve their mobilization of resources.

Lessons learned and planned change

21.59 The lesson for the subprogramme was that there is rapidly growing demand from the countries in the region for comparative policy analysis and for South-South discussion on resource mobilization measures. In applying the lesson, the subprogramme will ramp up support – through its flagship reports, dialogue forums and technical cooperation – for countries to evaluate, formulate and adopt resource mobilization measures in support of sustainable development and the achievement of the Sustainable Development Goals.

21.60 Expected progress towards the objective is presented in the performance measure below (see figure 21.X).

Figure 21.X

Performance measure: resource mobilization policies and strategies to support sustainable development and the achievement of the Sustainable Development Goals (cumulative)

Deliverables

21.61 Table 21.6 lists all deliverables of the subprogramme.

Table 21.6

Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	6	6	6	6
1. Seminars, meetings of experts, workshops and training events on macroeconomic, fiscal and financing policies in Latin America and the Caribbean	6	6	6	6
Publications (number of publications)	11	11	13	13
2. <i>Economic Survey of Latin America and the Caribbean</i>	1	1	1	1
3. <i>Fiscal Panorama of Latin America and the Caribbean</i>	1	1	1	1
4. <i>Preliminary Overview of the Economies of Latin America and the Caribbean</i>	1	1	1	1
5. On macroeconomic, sectoral, fiscal and financing policies in Latin America and the Caribbean	7	7	7	7
6. On specific economic issues in Uruguay	1	1	1	1
7. On a high-priority issue concerning macroeconomic and development policies in Colombia	–	–	1	1
8. On current and emerging macroeconomic and development finance issues in Brazil to foster sustainable and inclusive growth	–	–	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on macroeconomic, fiscal and monetary policy analysis and formulation, macroeconomic analysis and systems for monitoring economic development, and on the design and implementation of financing for development schemes and policies geared towards financial and productive development and/or social protection; advice to the Ministry of Economy and Finance of Uruguay on macroeconomic issues; and technical cooperation services to Colombian public agencies on economic and fiscal issues.				
Databases and substantive digital materials: statistical information for policymakers, academia, private sector analysts and the public at large of economic, monetary and financial variables for countries in the region; statistical data sets covering government operations, public debt, tax revenue and revenue from non-renewable natural resources.				

Subprogramme 4

Social development and equality

Objective

- 21.62 The objective, to which this subprogramme contributes, is to improve the overall well-being of the people of the region and achieve greater social and economic equality in line with the 2030 Agenda and with full respect for human rights.

Strategy

- 21.63 To contribute to the objective, the subprogramme will focus on the following priority areas: addressing the multiple dimensions of poverty, inequality and well-being; bridging gaps in well-being and tackling inequalities; ensuring access to universal, comprehensive and sustainable social protection; promoting social and labour inclusion policies; coordinating social, economic and environmental policies; and promoting health, pensions and educational policies as key elements of inclusive social development and improving the capacity of social policy to adapt to new and emerging challenges related to such topics as demographic transition, migration, changes in the world of employment, new technologies, pandemics and climate change. In implementing these priorities, the subprogramme will:
- (a) Support countries in implementing the Regional Agenda for Inclusive Social Development, in line with the outcomes and agreements reached at the Regional Conference on Social Development in Latin America and the Caribbean, by conducting applied research, generating analyses, disseminating results, providing training and advisory services and formulating policy recommendations, as well as by promoting policy dialogue for inclusive social development among policymakers, academics, members of civil society organizations and other stakeholders and by facilitating the exchange of experiences and good practices;
 - (b) Assist countries with capacity-building and technical cooperation in the design, implementation, monitoring and evaluation of strategies, policies and programmes. Research and advisory services will emphasize, in particular, social protection systems with full respect for human rights, taking an equality-oriented and sustainable approach; the protection and promotion of the rights of population groups subjected to discrimination and exclusion; social investment; and education and public health systems, thus helping member States to make progress towards the achievement of Sustainable Development Goals 1, 2, 3, 4, 8, 10 and 16;
 - (c) Assist governments in tackling the socioeconomic consequences of crises through advisory services and knowledge-sharing activities in affected social policy areas.
- 21.64 The above-mentioned work is expected to result in:
- (a) Deeper understanding by policymakers of the structural social challenges and disparities that characterize the region;
 - (b) Measures and public policies promoting greater social and economic equality and overall well-being of the people of the region;
 - (c) Expanded and improved social protection systems that take into consideration the social impacts that arise from crises, emerging challenges and other catastrophic events and the need to build greater resilience over time.

Programme performance in 2022

Implementation of the national social protection and promotion policy in Haiti

- 21.65 The subprogramme has been providing support to the Ministry of Social Affairs and Labour of Haiti for the development of an implementation plan for the country's national social protection and promotion policy, including costing exercises for specific measures, services and transfers with different levels of coverage and different possible benefits. The subprogramme has also been providing assistance to, and participating in, the specific drafting working groups established by the Ministry, as well as supporting the organization of an expert meeting to share national experiences on issues related to the implementation of social policies in countries of the region. In that regard, an international seminar on the challenges of implementing the policy in the light of Latin American and Caribbean experiences was held in June in Haiti, and a four-week virtual training course on social protection policies was developed, aimed at strengthening the capacities of national and local officials from the Ministry on these issues.
- 21.66 Progress towards the objective is presented in the performance measure below (see table 21.7).

Table 21.7

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	Haiti estimated the cost of implementing its national social protection and promotion policy	Haiti approved its budget for 2023, taking into account the key role of social policy initiatives together with the information from the cost estimation on such policies, and an appropriate allocation for the implementation of the national social protection and promotion policy

Planned results for 2024

Result 1: advancing innovative sectoral and intersectoral social policies to address inequalities affecting the most vulnerable

Programme performance in 2022 and target for 2024

- 21.67 The subprogramme's work contributed to 121 national officers having increased capacity to develop innovative sectoral and intersectoral social policies, which exceeded the planned target of 115.
- 21.68 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XI).

Figure 21.XI

Performance measure: number of national officers with increased capacity to develop innovative sectoral and intersectoral social policies (annual)

Result 2: more resilient social protection systems

Programme performance in 2022 and target for 2024

- 21.69 The subprogramme’s work contributed to three national institutions having improved capacities to ensure social protection during periods of crisis, which met the planned target.
- 21.70 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XII).

Figure 21.XII

Performance measure: number of national institutions with improved capacities to ensure social protection during periods of crisis (annual)

Result 3: strengthened comprehensive and universal social protection systems

Proposed programme plan for 2024

- 21.71 Aggravated by the impact of the COVID-19 pandemic, poverty and inequality remain structural issues, and gaps in social protection continue to widen, in a context marked by structural disparities. In its work, the subprogramme has been increasing awareness among countries in the Latin American and Caribbean region on the important role of social protection systems in achieving inclusive social development.

Lessons learned and planned change

21.72 The lesson for the subprogramme was that, in order to better respond in a timely manner to the needs and demands of countries of the region regarding those issues, it needs to be more flexible in terms of dates and more innovative in terms of delivery modalities, in addition to working at the national level with all relevant actors to reach agreements on reforms in social protection systems in the context of the Regional Agenda for Inclusive Social Development. In applying the lesson, the subprogramme will explore the possibility of increasing the use of hybrid formats for the delivery of workshops and as a new tool for technical assistance, thereby increasing participation and contributing to expanded capacity-building opportunities. The subprogramme will also foster the organization of regional and interregional spaces through hybrid formats to promote the exchange of experiences on social protection instruments and reforms.

21.73 Expected progress towards the objective is presented in the performance measure below (see table 21.8).

Table 21.8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Countries agreed on the importance of addressing social protection gaps to achieve universal and comprehensive social protection systems	Countries reaffirm their commitments to achieving universal and comprehensive social protection systems	Countries identify obstacles and challenges to achieving universal and comprehensive social protection systems

Deliverables

21.74 Table 21.9 lists all deliverables of the subprogramme.

Table 21.9
Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	1	1	9	1
1. Session of the Regional Conference on Social Development in Latin America and the Caribbean	–	–	9	–
2. Meeting of the Presiding Officers of the Regional Conference on Social Development in Latin America and the Caribbean	1	1	–	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	2	2
3. On social protection, social and labour inclusion policies, human capacities and full respect for human rights in social protection systems; social investment and emerging challenges for social policies; and education, health and pension systems	1	1	2	2

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
Seminars, workshops and training events (number of days)	14	14	14	14
4. Meetings of experts to examine mechanisms that contribute to increasing coverage, sufficiency and sustainability within national social protection systems with a rights and equality approach and to discuss trends in social issues and challenges for social policy institutions	8	8	8	8
5. Training activities on poverty reduction, equality and well-being, and access to social protection networks	6	6	6	6
Publications (number of publications)	9	9	8	8
6. <i>Social Panorama of Latin America</i>	1	1	1	1
7. Country office studies	3	3	2	2
8. On topics including social rights among specific population groups, social protection, productive and inclusive labour policies, pension systems, health, education, and social institutions, policies and programmes	5	5	5	5
Technical materials (number of materials)	2	2	2	1
9. On social development policies; and on analytical and methodological proposals to foster the universal implementation of social policies, including on social protection, and enhance their impact on equality gaps, in order to enhance intersectoral and inter-institutional cooperation and increase the effectiveness and efficiency of social policies	2	2	2	1

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on social policies for equality, decision-making in social policy, and social investment and policies; analytical and methodological proposals to enhance intersectoral and inter-institutional cooperation, aimed at improving effectiveness and efficiency; and design, implementation and evaluation of social policies for the needs of the most vulnerable.

Databases and substantive digital materials: Observatory on Social Development in Latin America and the Caribbean, which includes databases on social development, young people, non-contributory social protection, social institutions and regional commitments.

D. Communication deliverables

Digital platforms and multimedia content: knowledge management tools, including on the strengthening of the Latin American and Caribbean Network on Social Development; and infographics or other material to disseminate the subprogramme’s research findings and policy recommendations.

Subprogramme 5 Gender equality and women’s autonomy

Objective

- 21.75 The objective, to which this subprogramme contributes, is to strengthen gender equality and women’s autonomy in sustainable development strategies of the Latin American and Caribbean countries.

Strategy

- 21.76 To contribute to the objective, the subprogramme will:
- (a) Produce knowledge and develop gender statistics and indicators, expanding the scope and improving the quality of data and indicators available from the Gender Equality Observatory for Latin America and the Caribbean;
 - (b) Provide technical support to mainstream a gender perspective in the work of the Statistical Conference of the Americas of ECLAC and its working groups;
 - (c) Provide technical assistance to the countries in the region in developing policies to promote gender equality, and strengthen the capacities of national mechanisms for the advancement of women as well as those of national statistical offices;

- (d) Foster increased dissemination of publications and research findings among policymakers and other relevant stakeholders. Particular attention will be devoted to the economic autonomy of women in an integrated framework, connected to physical autonomy and to decision-making autonomy.

21.77 The above-mentioned work is expected to result in:

- (a) Enhanced production of gender statistics by national statistical offices;
- (b) Strengthened capacities of member States in building policies for gender equality along with the implementation of the 2030 Agenda;
- (c) Advancement of gender equality across the region.

Programme performance in 2022

Financial sustainability strategies for the supply of care services under the District Care System of Bogotá

- 21.78 The subprogramme continued to provide technical assistance through the mapping and design of financial sustainability strategies for the supply of care services under the District Care System of Bogotá. The System not only strengthens the social protection system by orienting it towards joint responsibility, but also constitutes a milestone in the inclusion of the care economy as a central component of the economic policy. The technical support provided by the subprogramme contributed to the systematization of international experiences and the development of socioterritorial criteria for the implementation of the System, as well as to the design of scenarios for its financial sustainability.
- 21.79 Progress towards the objective is presented in the performance measure below (see table 21.10).

Table 21.10
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
District Administration of Bogotá discussed and considered options to design and implement the District Care System, including by identifying regional and international good practices on estimating the demand for and supply of care in the city and identifying appropriate financing strategies	<p>Implementation of the District Care System by the District Administration in Bogotá</p> <p>District Secretariat for Women of the city of Bogotá implemented the first care blocks through the development of georeferencing on the supply of and demand for care in the 19 localities of the city</p>	<p>A map with georeferenced indicators of supply and demand for care services was made available through the Gender Equality Observatory for Latin America and the Caribbean</p> <p>Mayor’s Office of Bogotá supported the implementation of care blocks</p>

Planned results for 2024

Result 1: improvement in the formulation and development of gender equality policies

Programme performance in 2022 and target for 2024

- 21.80 The subprogramme’s work contributed to 22 stakeholders in the region reporting an improvement in the formulation and development of gender equality policies, which met the planned target.
- 21.81 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XIII).

Figure 21.XIII
Performance measure: number of stakeholders in the region reporting an improvement in the formulation and development of gender equality policies (cumulative)

Result 2: enhanced public policies related to the legal framework for care in the countries of the region

Programme performance in 2022 and target for 2024

- 21.82 The subprogramme’s work contributed to enhanced public policies related to the legal framework of care, which exceeded the planned target of advancing the public-private dialogue on the social organization of care, as national authorities agreed on the need to move towards a development approach that places care at the centre.
- 21.83 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 21.11).

Table 21.11
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
At the fourteenth session of the Regional Conference on Women in Latin America and the Caribbean, and in accordance with paragraph 26 of the Santiago Commitment, Governments in the region agreed to take action towards the design of comprehensive care systems from a gender perspective to meet the different care needs of the population, as part of social protection systems	Peru approved a ministerial resolution that defined care work and established the bases for a national care system	Enhanced public policies related to the legal framework of care At the fifteenth session of the Regional Conference on Women in Latin America and the Caribbean, member States adopted the Buenos Aires Commitment, in which they agreed to take steps towards a care society in the countries of the region	Countries in the region further strengthen and mainstream a gender perspective into the design of care-related normative frameworks	Countries in the region further strengthen and mainstream a gender perspective into the design of care-related policies based on georeferenced information

Result 3: increased use of new technologies and digital tools to design, implement and monitor care policies

Proposed programme plan for 2024

21.84 On average, women in Latin America and the Caribbean devote three times as much time as men to unpaid care and domestic work.¹ This unequal burden and the unfair division of labour, which are structural challenges in the region, prevent women from attaining full and equal participation in the labour market and limit their opportunities in other areas. The subprogramme has been working on innovations, using new technologies, to support programmes designed to provide care services, such as mapping tools and georeferencing techniques, in order to help to redistribute care work among various actors in society. Those tools can provide women and families with important information regarding care services available near their homes or work and thus can help to reduce care burdens.

Lessons learned and planned change

21.85 The lesson for the subprogramme was that, in order to foster the development and use of those tools, it can help to make tools that are low-cost or free of cost, such as open-source software. In addition, to build operational sustainability, this needs to be accompanied by customized capacity-building for using the tools. In applying the lesson, the subprogramme will consider those issues to better focus the technical assistance provided to member States to implement the new technologies to support care policies and programmes.

21.86 Expected progress towards the objective is presented in the performance measure below (see figure 21.XIV).

Figure 21.XIV

Performance measure: national or subnational governments that use new technologies for the design and implementation of care policies (cumulative)

Deliverables

21.87 Table 21.12 lists all deliverables of the subprogramme.

¹ United Nations Entity for Gender Equality and the Empowerment of and ECLAC, “Care in Latin America and the Caribbean during the COVID-19. Towards comprehensive systems to strengthen response and recovery”, 19 August 2020.

Table 21.12

Subprogramme 5: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	14	14	6	6
1. Session of the Regional Conference on Women in Latin America and the Caribbean	10	10	–	–
2. Meetings of the Presiding Officers of the Regional Conference on Women in Latin America and the Caribbean	1	1	6	6
3. Subregional preparatory meetings in the Caribbean, South America and Central America	3	3	–	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
4. On unpaid work and social protection of women; gender equality and sustainable development policies; and the economic and physical autonomy of women	1	1	1	1

5. Training programme on public policies for gender equality for government agencies, the economic autonomy of women, planning for development with a gender perspective and gender statistics for government agencies	8	8	5	5
6. Meetings to consider priority issues emerging from the fourteenth and fifteenth sessions of the Regional Conference on Women in Latin America and the Caribbean on the evaluation of best practices and challenges in the implementation of gender policies, the promotion of an economic agenda for gender equality, the monitoring of the 2030 Agenda for Sustainable Development and the analysis of policies on gender equality and the autonomy of women; a meeting with organizations participating in the Gender Equality Observatory for Latin America; and an inter-agency meeting with United Nations agencies, funds and programmes	1	1	4	4
Publications (number of publications)	6	6	5	5
7. Gender Equality Observatory for Latin America and the Caribbean Studies series on gender analysis, including on gender mainstreaming policies, the economic and physical autonomy of women and poverty from a gender perspective	5	5	5	5
8. For the fifteenth session of the Regional Conference on Women in Latin America and the Caribbean	1	1	–	–
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on matters relating to the fulfilment of regional and international agreements on gender equality.				
Databases and substantive digital materials: Gender Equality Observatory for Latin America and the Caribbean; and gender statistics with data from household and time-use surveys and other sources.				

Subprogramme 6 Population and development

Objective

- 21.88 The objective, to which this subprogramme contributes, is to fully integrate population issues into development planning, policies and programmes of the countries of Latin America and the Caribbean.

Strategy

- 21.89 To contribute to the objective, the subprogramme will:
- (a) Provide national and local institutions with training on demographic analysis, population estimates and projections, generate knowledge on population and demographic trends in the

region to underpin evidence-based policymaking and improve the use of census data, vital statistics and surveys through the generation of data and the development of procedures, computer programmes and information systems and, in the context of the regional implementation of the 2030 Agenda, help member States to make progress towards the achievement of Sustainable Development Goals 1, 3, 5, 7, 10 and 17;

- (b) Provide technical support in the follow-up to international agreements, including the Framework of Action for the follow-up to the Programme of Action of the International Conference on Population and Development beyond 2014, the Montevideo Consensus on Population and Development, the Madrid International Plan of Action on Ageing, 2002, and the Global Compact for Safe, Orderly and Regular Migration, with gender-sensitive, disability and ethnic analysis, and in the follow-up of the population-related targets of the 2030 Agenda;
- (c) Provide technical assistance in the planning, design, implementation and dissemination of population and housing censuses and in the inclusion of a sociodemographic perspective in public policies design and implementation at the national and local levels. Workshops and seminars will be held to facilitate South-South cooperation, networking and the sharing of successful experiences;
- (d) Conduct and disseminate applied research and analysis on key issues, such as population ageing, adolescent fertility, persons with disabilities, international migration, Indigenous Peoples, Afrodescendent populations and the socioeconomic impact of demographic transition, including recommendations on how to reduce inequalities. Information and communications technologies (ICT) will be used to reach the wider public;
- (e) Play a leading role for the region in the United Nations Network on Migration and in other networks relevant to population issues, such as the National Transfer Accounts network, work in close cooperation with other ECLAC subprogrammes and the subregional headquarters and seek to foster synergies with other United Nations entities involved in the population cluster and other international and intergovernmental organizations.

21.90 The above-mentioned work is expected to result in:

- (a) Enhanced monitoring of population trends by local and national authorities;
- (b) Increased use of demographic analysis, population estimates and other evidence for policymaking.

Programme performance in 2022

Better information on the challenges of population ageing

21.91 Many countries in Latin America and the Caribbean have ageing populations, which has an impact on societies and economies. The subprogramme organized the Fifth Regional Intergovernmental Conference on Ageing and the Rights of Older Persons in Latin America and the Caribbean, held in December in Santiago, to examine the achievements made in fulfilling the commitments of the Madrid International Plan of Action on Ageing. Participating countries adopted a declaration on human rights and the participation of older persons,² in which they reaffirmed their commitment to promote, protect and respect the human rights, dignity and fundamental freedoms of all older persons, without discrimination or violence of any kind. In preparation for the Conference, the subprogramme drafted a guide for the preparation of national voluntary reports on the implementation of the Madrid Plan of Action and provided technical assistance to countries of the region in the preparation of their reports. Those national reports, prepared with inputs from different sectoral ministries, as well as from civil society, provide information on the ageing process in each country and on the policies implemented to realize the human rights, dignity and fundamental freedoms of all older persons.

² See <https://conferenciaenvejecimiento.cepal.org/5/en/documents/santiago-declaration>.

21.92 Progress towards the objective is presented in the performance measure below (see figure 21.XV).

Figure 21.XV

Performance measure: number of countries in the region that have prepared national voluntary reports on the implementation of the Madrid International Plan of Action on Ageing

Planned results for 2024

Result 1: updated population estimates and projections at the subnational level

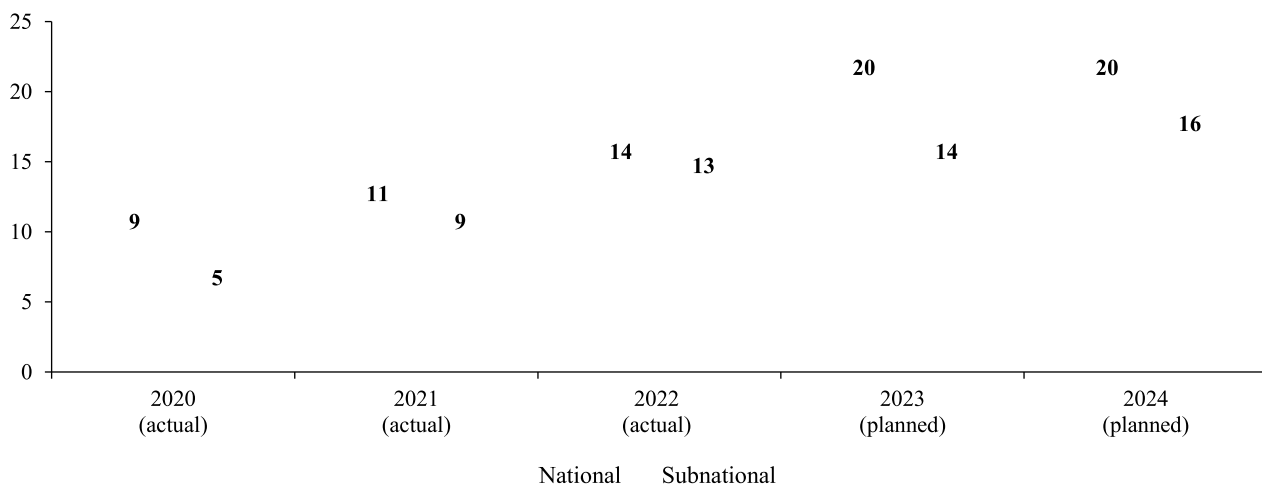

Programme performance in 2022 and target for 2024

21.93 The subprogramme’s work contributed to 14 countries having updated their population estimates and projections at the national level and 13 countries having done so at the subnational levels, which met the planned target.

21.94 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XVI).

Figure 21.XVI

Performance measure: number of countries that updated their population estimates and projections at the national and subnational levels (cumulative)

Result 2: innovative approaches to conducting censuses

Programme performance in 2022 and target for 2024

- 21.95 The subprogramme’s work contributed to the incorporation of innovative approaches in population and housing censuses in five countries in the region, including the addition of new topics (such as questions about commuting to work or study and the use of ICT) and the use of mobile devices for data capture and geolocation, of management and quality control systems and of self-enumeration using the Internet, among other innovations, which met the planned target.
- 21.96 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 21.13).

Table 21.13
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Mexico carried out its census	Bolivia (Plurinational State of), Cuba, the Dominican Republic, Honduras and Paraguay evaluated the incorporation of innovative approaches	Argentina, Brazil, Costa Rica, the Dominican Republic and Ecuador carried out their censuses in 2022, incorporating innovative approaches	Countries that carried out their censuses in 2022 incorporate innovative approaches in the dissemination of the results	Countries that carried out their censuses in 2023 incorporate innovative approaches in the dissemination of the results
Argentina, Brazil, Chile, Costa Rica, Ecuador, Panama and Venezuela (Bolivarian Republic of) postponed their census survey dates and began to evaluate the adoption of innovative approaches			Countries that carry out their censuses in 2023 incorporate innovative approaches	Countries that carry out their censuses in 2024 incorporate innovative approaches

Result 3: countries of the region analyse the impact of population ageing on inclusive and sustainable economic growth using national transfer accounts

Proposed programme plan for 2024

- 21.97 The estimation and use of national economic statistics disaggregated by age (national transfer accounts) makes it possible to analyse how economic resources are shared throughout the life cycle, from one age group or generation to another. This information supports long-term forecasts on the financing of policies in areas such as social protection, health and education, which is helpful in the context of population ageing in Latin America and the Caribbean. The subprogramme has provided technical support to the countries of the region on national transfer accounts through national and regional training workshops, which led to the establishment of a network of trained government officials in national statistical offices, ministries of labour and ministries of planning.

Lessons learned and planned change

- 21.98 The lesson for the subprogramme was that, in a region characterized by large inequalities, it is important to disaggregate national accounts by socioeconomic status. In applying the lesson, the subprogramme will contribute to strengthening the capacities of countries in the region to produce and update national transfer accounts, taking into account inequalities among socioeconomic groups wherever possible, and to use them for the design of public policies adapted to new and evolving demographic realities.
- 21.99 Expected progress towards the objective is presented in the performance measure below (see table 21.14).

Table 21.14
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	10 countries developed national studies based on national transfer accounts	Colombia and Jamaica developed national studies based on national transfer accounts Colombia updated its national transfer account estimates	Countries with studies based on national transfer accounts consider formulating policies and plans that take account of future demographic change	4 countries produce updated national transfer accounts and conduct studies to examine inequalities between socioeconomic groups

Deliverables

21.100 Table 21.15 lists all deliverables of the subprogramme.

Table 21.15
Subprogramme 6: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	9	9	9	9
1. Session of the Regional Conference on Population and Development in Latin America and the Caribbean	9	9	–	9

B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
3. On migration; the socioeconomic impact of population dynamics; Indigenous Peoples and people of African descent; and ageing, including gender-sensitive analysis	1	1	1	1
Seminars, workshops and training events (number of days)	73	73	73	29
4. Meetings of experts on demographic change and its consequences for development, including issues related to Indigenous Peoples and people of African descent; ageing-related issues, persons with disabilities and migrants; the implementation of recommendations of the Regional Conference on Population and Development; and population censuses	5	5	5	5
5. Workshops on demographic analysis and projections; REDATAM ^a (information system on censuses); sociodemographic variables and emerging issues in development policies, programmes and projects; and population and development	20	20	20	20
6. Training course on demographic analysis with gender-sensitive analysis	44	44	44	–
7. Training courses on quantitative analytical methods and techniques	4	4	4	4
Publications (number of publications)	8	8	8	8
8. On demography and on population and development	3	3	3	3
9. On demography and a gender perspective; demographic trends of indigenous people and people of African descent; sociodemographic trends of persons with disabilities; and population and development	5	5	5	5

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
Technical materials (number of materials)	3	3	3	3
10. On population projection and censuses	1	1	1	1
11. On ageing and development and on REDATAM ^a	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on population and development, including REDATAM-related computer applications, population and housing censuses and data collection, demographic analysis and methodologies for population projections and estimates; consultation and advice on the incorporation of sociodemographic variables into development policies, programmes and projects, taking a gender-sensitive approach and considering specific groups; consultation and advocacy at intergovernmental forums in the region on population and development issues; advice on the implementation of the Montevideo Consensus on Population and Development and the Regional Strategy for the Implementation in Latin America and the Caribbean of the Madrid International Plan of Action on Ageing, the 2030 Agenda for Sustainable Development and the Global Compact for Safe, Orderly and Regular Migration.

Databases and substantive digital materials: guidelines to facilitate the production of demographic estimates and population projections at the national and subnational levels; a regional databank of censuses on population and housing, and vital statistics; databases on demographic trends and population projections, spatial distribution and urbanization; databases on Indigenous Peoples and peoples of African descent and on maternity and migration; REDATAM software for the processing, analysis and dissemination of census data; and a platform to follow up on the implementation of the Montevideo Consensus on Population and Development.

D. Communication deliverables

Digital platforms and multimedia content: subprogramme’s pages on the ECLAC website.

^a REDATAM is an acronym that stands for “retrieval of data for small areas by microcomputer”. REDATAM+SP (abbreviated R+SP) is the most recent version of the fourth generation of the software. It can be used in English, Portuguese or Spanish.

Subprogramme 7 Sustainable development and human settlements

Objective

- 21.101 The objective, to which this subprogramme contributes, is to ensure the integration and due consideration of environmental, climate and urban management concerns and opportunities in policymaking and policy implementation, with a rights-based approach and ensuring that no one is left behind.

Strategy

- 21.102 To contribute to the objective, the subprogramme will:
- (a) Enhance knowledge of the region’s economic, social and environmental profiles and continue to convene and involve national and subnational governments, academic institutions, civil society and other stakeholders to foster participatory decision-making;
 - (b) Assess the advances made by countries in integrating sustainability criteria into public policies, including monitoring the implementation of principle 10 of the Rio Declaration on Environment and Development, as established in the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean (Escazú Agreement), and providing support to the Forum of the Countries of Latin America and the Caribbean on Sustainable Development;
 - (c) Strengthen national capacities to design and implement public policies for the sustainability of human settlements and the implementation of the 2030 Agenda, the New Urban Agenda, the nationally determined contributions under the Paris Agreement and the decisions taken within the framework of the Conference of the Parties to the United Nations Framework Convention on Climate Change;

- (d) Conduct the above-mentioned activities through research, resulting in the publication of studies, the organization of expert group meetings, seminars and workshops, and the provision of technical assistance to member States, upon request, helping member States to make progress towards the achievement of Sustainable Development Goals 11, 12, 13, 15 and 16;
 - (e) Promote the creation of networks with a wide range of stakeholders in the environmental, economic and social sectors relevant to sustainable development, including government institutions, academia, civil society organizations, private sector representatives and relevant sectoral bodies;
 - (f) Hold consultations and undertake joint actions with the specialized agencies, funds and programmes of the United Nations system, including the resident coordinator system and the United Nations Human Settlements Programme (UN-Habitat), as well as with regional and subregional development banks;
 - (g) Provide support on designing economic recovery plans, to support recovery from the impacts of the pandemic, based on regional and national studies of specific economic sectors.
- 21.103 The above-mentioned work is expected to result in:
- (a) Better-designed policies that take into account the three pillars of sustainable development, including policies for sustainable development and environmental performance, policies to address the economics of climate change and policies that support sustainable and inclusive human settlements;
 - (b) Sustainable development and climate change criteria effectively mainstreamed into more areas of government;
 - (c) The design of guidelines for the implementation of economic plans towards a low-carbon, low-emission and more resilient economy that creates more employment and economic well-being.

Programme performance in 2022

A regional space for dialogue on human rights defenders in environmental matters to advance the right to a clean, healthy and sustainable environment

- 21.104 Latin America and the Caribbean is the most dangerous region in the world in which to protect the environment. It accounts for three quarters of the killings of environmental activists.³ Strong institutions, rule of law, policies to guarantee a safe environment and measures to protect them and to punish attacks, threats or intimidations contribute to addressing that situation. The subprogramme organized the first meeting of the Conference of the Parties to the Escazú Agreement and supported the establishment of a regional space for dialogue to improve regional cooperation and strengthen national capacities in this matter.⁴ In its decision I/6, the Conference of the Parties established a working group to draft an action plan on human rights defenders in environmental matters, for adoption in 2024. In addition, the subprogramme organized the first annual forum on human rights defenders in environmental matters, which was attended by the parties, members of civil society, Indigenous representatives, academics and representatives of United Nations entities. Two United Nations special rapporteurs provided valuable recommendations, and participants searched for solutions in 10 working groups. Results will be presented at the second meeting of the Conference of the Parties to the Agreement and will feed into parties' national implementation plans that are currently being prepared.
- 21.105 Progress towards the objective is presented in the performance measure below (see table 21.16).

³ A/71/281, para. 28.

⁴ Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean, art. 7, para. 13.

Table 21.16
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	Escazú Agreement entered into force after meeting the requirements under article 22 and achieving the necessary threshold of parties	Decision I/6 was adopted at the first meeting of the Conference of the Parties to the Agreement, by which an ad hoc working group on the matter charged with drafting an action plan was established and an annual forum on environmental human rights defenders convened Ad hoc working group was operationalized in October, and first regional forum was held in November

Planned results for 2024

Result 1: big push for sustainability for a transformative and sustainable recovery in the context of the 2030 Agenda

Programme performance in 2022 and target for 2024

- 21.106 The subprogramme’s work contributed to the consideration by Costa Rica of a bill for the creation of a ministry for territorial planning, habitat and housing, as well as the launch in Brazil of a parliamentary observatory for climate change, which met the planned target.
- 21.107 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 21.17).

Table 21.17
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Member States gained access to a comprehensive framework for a sustainable recovery	Chile and Colombia developed sustainable development policy instruments	Costa Rica considers a bill for the creation of a ministry for territorial planning, habitat and housing Brazil launched a parliamentary observatory for climate change	2 additional countries in the region develop sustainable development strategies and/or policy instruments	2 additional countries in the region develop sustainable development strategies and/or policy instruments

Result 2: progress towards financial systems that address the challenge of climate change and support the implementation of the 2030 Agenda and the Sustainable Development Goals

Programme performance in 2022 and target for 2024

- 21.108 The subprogramme’s work contributed to the development by the Central Bank of Mexico of models to analyse the impact of climate change under different macroeconomic scenarios, which met the expected target.

21.109 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 21.18).

Table 21.18
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Countries in the region increased awareness of the need to incorporate climate change considerations into financial systems	Central Bank of Mexico developed models to analyse the impact of climate change under different macroeconomic scenarios	2 additional countries develop strategies or policy instruments to incorporate climate change criteria and tools into the financial system	2 additional countries develop strategies or policy instruments to incorporate climate change criteria and tools into the financial system

Result 3: national implementation plans aimed at strengthening environmental access rights
Proposed programme plan for 2024

21.110 Environmental access rights underpin the right to a clean, healthy and sustainable environment and contribute to sustainable development and to the facilitation of sound environmental policymaking and stewardship. In recent years, the subprogramme has provided support to the countries of the region in the implementation of principle 10 of the Rio Declaration and has provided services as secretariat of the Escazú Agreement. The subprogramme has also delivered technical assistance related to specific content of the Escazú Agreement, namely regarding the development of environmental information systems, participation procedures and environmental law, among other matters. Furthermore, the subprogramme has drafted an implementation guide and a road map to support the design of implementation plans, including national diagnoses, governance systems, agreements on priorities and the identification of cooperation opportunities. Pilot countries are currently being assisted, with the objective of extending that technical support to the other parties in the coming years.

Lessons learned and planned change

- 21.111 The lesson for the subprogramme was that, to ensure a stronger likelihood of countries adopting national implementation plans and more effective implementation of such plans, as well as higher performance measures, building broad and long-term relationships with key national stakeholders can have a durable impact in countries of the region and provide for the implementation of long-term environmental policies, in particular where changes in Governments or authorities may occur. In applying the lesson, the subprogramme will seek to establish broad-based and multi-stakeholder partnerships in the countries of the region, thus enhancing this area of work in those countries.
- 21.112 Expected progress towards the objective is presented in the performance measure below (see figure 21.XVII).

Figure 21.XVII

Performance measure: number of national implementation plans on environmental access rights in place (cumulative)

Deliverables

21.113 Table 21.19 lists all deliverables of the subprogramme.

Table 21.19

Subprogramme 7: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	21	21	21	21
1. Meetings of the General Assembly of Ministers and High-level Authorities of the Housing and Urban Development Sector in Latin America and the Caribbean	6	6	6	6
2. Meetings of the signatory countries to the Escazú Agreement	6	6	–	–
3. Meetings to strengthen regional cooperation and implementation on topics under the Escazú Agreement	–	–	6	6
4. Sessions of the Conference of the Parties to the Escazú Agreement	9	9	9	9
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
5. On adaptation to climate change and mitigation of its impact	1	1	1	1
Seminars, workshops and training events (number of days)	9	8	8	9
6. Meetings of the expert groups on policies for sustainable development of human settlements and climate change; climate change mitigation and adaptation; the Conference of the Parties to the United Nations Framework Convention on Climate Change; environmental and urban dimensions of the 2030 Agenda for Sustainable Development; and experiences in implementing policies related to sustainable development in the region	5	5	4	4
7. Training courses on sustainable development and/or environmental economics; climate change mitigation and adaptation assessment and policies; human settlement issues; and strategies for the implementation of the intended nationally determined contributions	4	3	4	5
Publications (number of publications)	11	11	9	8
8. On topics including climate change, sustainable development, the environmental impact of public policies, instruments for the reduction and control of greenhouse gases, low-carbon and low-emission economies, sustainable recovery policies, development scenarios in urban areas, the circular economy and sustainable consumption and production patterns, the integration of public policies for sustainable development and institution-building, the implementation of the New Urban Agenda with a gender perspective, and greenhouse gas emissions and related public policies	11	11	9	8

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on environmental public policies related to sustainable development and urban sustainability, risk reduction and adaptation to climate change, and strengthening national capacities; and technical advice to national Governments and institutions, at their request, on assessing the progress made towards achieving sustainable development.

Databases and substantive digital materials: inputs for the General Assembly of Ministers and High-level Authorities of the Housing and Urban Development Sector in Latin America and the Caribbean; and databases on sustainable development, climate change and urban issues.

Subprogramme 8 Natural resources

Objective

- 21.114 The objective, to which this subprogramme contributes, is to improve the governance and enhance the sustainable use and exploitation of natural resources in Latin America and the Caribbean, focusing on water resources management, affordable, inclusive and clean energy, extractive resources efficiency, food security, sustainable agriculture and biodiversity.

Strategy

- 21.115 To contribute to the objective, the subprogramme will:
- (a) Support countries of the region in the design of policies related to an increased participation of renewable sources of energy in the total supply of energy, water sustainability, sustainable energy transition and sustainable management of the water cycle;
 - (b) Provide technical assistance and disseminate best practices on the regulation, supply and sustainable use of water and renewable sources of energy, helping member States to make progress towards the achievement of Sustainable Development Goals 6 and 7;
 - (c) Carry out studies on the governance of fossil and mineral resources (extractive resources), taking into consideration issues and challenges relating to the collection and use of resource rents, material efficiency and decoupling;
 - (d) Provide technical assistance and support multi-stakeholder dialogue, within the framework of more sustainable governance of the extractive industries, to foster clusters and value addition in those activities and their linkages to the rest of the economy;
 - (e) Promote, among other solutions, the bioeconomy, agroecology and ecosystem-based approaches as new production development frameworks for the sustainable utilization of biological resources (cultivated biomass and biodiversity and its components) and the full utilization of biogenic waste and residues as valuable productive resources;
 - (f) Reinforce the coherence, integration and coordination of national and regional policies and institutions in agricultural development and biodiversity and provide technical assistance, upon request, to member States, on issues related to sustainable agriculture, bioeconomy development and sustainable use of biodiversity and genetic resources, helping member States to make progress towards the achievement of Goals 2, 8, 9, 12, 13, 14 and 15;
 - (g) Provide technical support to member States on issues of food security and the role of sustainable and resilient food systems, including in the context of the follow-up and implementation of the commitments made at the United Nations Food Systems Summit, held in 2021.

- 21.116 The above-mentioned work is expected to result in:
- (a) Improved access to clean and affordable energy and water;
 - (b) Industrial cluster, value addition and linkage initiatives in the mineral and hydrocarbon sectors;
 - (c) Enhanced design and implementation of bioeconomy-related policies and strategies for sustainable agricultural and rural development, and the conservation, knowledge and sustainable use of biodiversity;
 - (d) Strengthened analysis by member States of water and energy access indicators, food security and food systems data and contributions of the bioeconomy, enabling improved long-term planning and the development of evidence-based policies.

Programme performance in 2022

Development of the regional potential for the bioeconomy

21.117 During 2022, the subprogramme contributed to consolidating the Commission’s role as a leading regional institution in supporting countries of the region in the development of their bioeconomy strategies. Ecuador benefited from initial technical support in the elaboration of its national development plan and in positioning the bioeconomy as an innovative and productive development approach for economic diversification, thus increasing value addition to biological resources. In that regard, ECLAC was invited by the Ministry of Production, Foreign Trade, Investments and Fisheries to join the panel of experts that will advise on the bioeconomy strategy development process. Technical assistance delivered to Uruguay has contributed to the identification of high value-added bioeconomy initiatives and to creating an enabling framework for the scaling of those initiatives, while the continued delivery of technical support to the National Secretariat of Science and Technology of Guatemala will foster the preparation of a proposal under the national bioeconomy strategy. This work builds on the technical assistance delivered by the subprogramme in 2020 to Colombia, Costa Rica and Uruguay in the development of their national bioeconomy strategies and, in 2021, to Costa Rica and Guatemala in identifying opportunities and challenges for developing the bioeconomy and for the development of a bioeconomy satellite account, pioneering the approach for other countries.

21.118 Progress towards the objective is presented in the performance measure below (see figure 21.XVIII).

Figure 21.XVIII

Performance measure: number of Latin American and Caribbean countries that have initiated the development of national bioeconomy strategies and bioeconomy-related initiatives (cumulative)

Planned results for 2024

Result 1: increasing value addition and productive linkages in the mining sector

Programme performance in 2022 and target for 2024

- 21.119 The subprogramme’s work contributed to the establishment of the permanent technical forum on innovation, technological development and value addition of the “lithium triangle” countries, Argentina, Bolivia (Plurinational State of) and Chile, which met the planned target.
- 21.120 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XIX).

Figure 21.XIX

Performance measure: number of measures adopted by countries in the region to promote value addition and productive linkages in the mining sector (cumulative)

Result 2: countries in the region adopt initiatives aimed at water management transition

Programme performance in 2022 and target for 2024

- 21.121 The subprogramme’s work contributed to the elaboration of a road map on integrated water resources management for the Andean community in the context of the Andean Environmental Charter, a multilateral instrument aimed at implementing inclusive and more sustainable water governance and management systems, as well as to working together to address the effects of climate change and protect biodiversity, while taking into consideration transboundary basin settings, which met the planned target.
- 21.122 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XX).

Figure 21.XX

Performance measure: number of initiatives developed by countries in the region to implement more sustainable and inclusive water governance and management systems (annual)

Result 3: digitalization in agriculture

Proposed programme plan for 2024

- 21.123 Although in recent years there has been a greater speed of progress in the adoption of digital technologies in regional agriculture, this development has been uneven. Gaps persist between urban and rural territories, and between farmers at different stages of technological development, which contributes to the deepening of economic inequalities among and within countries of the region. The subprogramme has worked with various governments in the region in recent years, with the aim of promoting the development of a broader and more equitable digital agriculture through the study of current technological gaps and the proposal of measures such as infrastructure and connectivity to overcome those gaps, as well as through the provision of financing, the development of digital skills, the design of a regulatory framework for telecommunications, data privacy and security and the promotion of competition. The subprogramme has also worked in a novel area, which consists of supporting the training of young rural entrepreneurs so that they can provide digital solutions for the specific demands of the agricultural sector in a given group of countries.

Lessons learned and planned change

- 21.124 The lesson for the subprogramme was that there was strong demand, given fiscal constraints, to generate low-cost solutions that take advantage of the resources of communities and territories for the digital development of agriculture in the region. In applying the lesson, the subprogramme will support approaches to developing and implementing low-cost solutions and promote the coordination of actors to enable the generation of synergies and the joint implementation of activities that contribute to the development of digital agriculture in the region. The subprogramme will also promote the coordination of public actors in the agricultural digitalization process and its integration into the agrifood systems sustainability and resilience approach that stemmed from the United Nations Food Systems Summit held in September 2021.
- 21.125 Expected progress towards the objective is presented in the performance measure below (see figure 21.XXI).

Figure 21.XXI

Performance measure: number of initiatives implemented by countries in the region to support digital agriculture based on low-cost solutions and the coordination of public and private actors (cumulative)

Deliverables

21.126 Table 21.20 lists all deliverables of the subprogramme.

Table 21.20

Subprogramme 8: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	3	3
1. On energy, natural resources governance, the interlinkages between water, energy and food and non-renewable natural resources; water and energy transitions; environmental sustainability; agrifood systems; and bioeconomy, ecosystem-based solutions and biodiversity	2	2	3	3
Seminars, workshops and training events (number of days)	15	15	17	22
2. Meetings of experts on sustainable water and energy management; public policies linked to the governance of natural and extractive resources; environmental sustainability; agrifood systems; digitalization in agriculture and associated value chains; and bioeconomy, ecosystem-based solutions and biodiversity	6	6	8	10
3. Training and courses for public and private sector officials involved in agriculture, bioeconomy, ecosystem-based solutions and biodiversity, water, renewable energy, the management of natural and non-renewable resources and sustainable and inclusive energy transition	9	9	9	12
Publications (number of publications)	8	8	9	10
4. <i>Natural Resources and Development in Latin America and the Caribbean</i>	–	–	–	1
5. <i>The Outlook for Agriculture and Rural Development in the Americas: A Perspective on Latin America and the Caribbean</i>	–	–	1	–
6. On issues relating to water resources and the interlinkages with other sectors; energy integration; governance of natural resources and the environment; natural resources and development; extractive industries; environmental sustainability; agrifood systems; bioeconomy, ecosystem-based solutions and biodiversity; and effects of technology and digitalization on agriculture value chains	8	8	8	9
Technical materials (number of materials)	2	2	1	1
7. Bulletin on natural resources for sustainable development in Latin America and the Caribbean	2	2	1	1

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on natural resources; and advice to business and trade promotion organizations and other key stakeholders on the design and implementation of policies and strategies for sustainable agricultural and rural development and bioeconomy, in areas related to water and energy public policies and non-renewable natural resources.

**Subprogramme 9
Planning and public management for development**

Objective

21.127 The objective, to which this subprogramme contributes, is to enhance planning and public management processes in the region for the advancement of equitable and sustainable development.

Strategy

21.128 To contribute to the objective, the subprogramme will:

- (a) Promote the application of new methodologies, instruments and conceptual frameworks to strengthen capacities of government officials in the whole cycle of public management, including foresight, strategic and territorial planning, monitoring and evaluation of plans and public policies for participatory planning and public management by Governments while fostering high-quality public investment and strong linkages between development and sector-based plans and budgets;
- (b) Encourage cooperation, peer-to-peer learning, innovation and the sharing of experiences and good practices in planning and public management through the provision of technical cooperation services and training and by conducting applied research, helping countries in the region to make progress towards the achievement of Sustainable Development Goals 5, 11, 13, 16 and 17;
- (c) Enhance regional capacities for building institutional resilience to cope with challenges posed by internal and external crises produced by natural disasters and/or human activities, such as pandemics, climate change impacts, social and political disruption and economic shocks.

21.129 The above-mentioned work is expected to result in:

- (a) Effective, inclusive, smart and strategic institutions and planning processes that prioritize comprehensive development through medium- and long-term visions;
- (b) Reduced structural gaps by enhancing citizens' participation, deliberation and accountability, and the strengthening of territorial governance, planning and management in public policy processes;
- (c) Strengthened capacities in Latin American and Caribbean institutions to withstand deep disruption and ensure continuity of basic services while enhancing preparedness and responsive, adaptive and transformational institutional capacities, including digital solutions, at both the national and subnational levels.

Programme performance in 2022

Increased number of countries implementing open government action plans at the subnational level

21.130 Planning authorities actively participated in the design of post-pandemic recovery strategies and made efforts to link those strategies with medium- and long-term planning instruments and to align them

with the 2030 Agenda. As an important part of these strategies, digital and open government and the territorialization of plans and policies played important roles in building more transparent, efficient and resilient institutions. The subprogramme, jointly with the Open Government Partnership, has been supporting countries of the region in the implementation of subnational open government action plans. The guidance document on tools for co-creation, monitoring and evaluation for the management of local open government action plans, published by ECLAC in 2020, has been the reference for the implementation of these action plans in various municipalities. In Chile, after receiving technical support from the subprogramme, the municipality of Peñalolén is currently implementing its first action plan, the municipality of Maipú is co-creating its first action plan, jointly with civil society groups, community actors and the general public, and the municipality of Rancagua is applying to join the Partnership. With a view to sharing experiences and lessons learned, in September 2022, the subprogramme organized a local open government workshop, held in a hybrid format, to generate synergies and conduct peer exchanges between local governments in Chile and other local governments of the region. Technical support has also been provided to Ecuador; following a virtual course held in 2021, with participation by subnational authorities, a commitment by one local authority is being incorporated into the country’s second national open government action plan.

21.131 Progress towards the objective is presented in the performance measure below (see table 21.21).

Table 21.21
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Guidance document on tools for co-creation, monitoring and evaluation for the management of local open government action plans was made available to support the implementation of open government plans in various municipalities in the region	Municipalities of Maipú and Rancagua, Chile, began to develop open government action plans, applying the methodology developed by the subprogramme	11 of 33 countries in the region are currently implementing local actions plans
Municipality of Peñalolén, Chile, joined the Open Government Partnership	Subnational governments in Ecuador increased their technical capacity to develop open government action plans	Municipality of Peñalolén began implementing its first plan and was promoting the creation of an open government unit within the Chilean Association of Municipalities
		Municipality of Maipú joined the Open Government Partnership and started to co-create its first plan; the municipality of Rancagua began preparing its application to join the Partnership, using the methodology developed by the subprogramme.
		Ecuador began preparing its second action plan, which will include an objective for the creation of a subnational plan

Planned results for 2024

Result 1: building institutional resilience to face internal and/or external shocks

Programme performance in 2022 and target for 2024

21.132 The subprogramme’s work contributed to three countries of the region implementing open government public management systems to increase transparency for citizens (Chile, Ecuador and

Section 21 Economic and social development in Latin America and the Caribbean

Honduras), one country developing a civil servants’ performance index for strengthening its Government’s policy of management by results (Guatemala), and two countries incorporating a territorial strategic vision into planning (Bolivia (Plurinational State of) and Panama), which exceeded the planned target of three countries adopting approaches for building resilient institutions and strengthening capacities in their national planning and public management systems.

21.133 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 21.22).

Table 21.22
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Planning authorities in the region addressed the importance of building institutional resilience and requested the subprogramme to develop an analytical framework that contributed to building institutional resilience	Planning authorities and technical teams identified main issues for building institutional resilience and started the discussion on how to strengthen capacities in that area	Chile, Ecuador and Honduras implemented open government public management systems to increase transparency for citizens Guatemala developed a civil servants’ performance index for strengthening the Government’s policy of management by results Bolivia (Plurinational State of) and Panama incorporated a territorial strategic vision into planning	2 countries improve the resilience of institutions participating in their planning systems by strengthening their foresight capacities and the collective and participatory appropriation of future scenarios	2 countries strengthen their institutional resilience by improving digital government services, intersectoral and multilevel policymaking and more collaborative institutional arrangements

Result 2: strengthened foresight capacities in national planning systems

Programme performance in 2022 and target for 2024

21.134 The subprogramme’s work contributed to two countries (Mexico and Panama) having strengthened foresight capacities, which met the planned target.

21.135 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XXII).

Figure 21.XXII
Performance measure: number of countries with strengthened foresight capacities (cumulative)

Result 3: member States develop more efficient, collaborative and participatory public policies

Proposed programme plan for 2024

21.136 Developing a framework for institutions to consolidate open government policies and digital services can help them be more transparent and closer to their citizens. In 2021, the subprogramme published a document on citizen participation in public affairs as a guide for planning and facilitating effective and meaningful citizen participation processes in planning and public management, in response to a need expressed by public, private and civil society stakeholders for rigorous methodologies and instruments conducive to meaningful public participation processes at diverse territorial scales. The document was developed taking into consideration lessons learned from almost a decade of work undertaken by the subprogramme in facilitating participatory open government co-creation planning processes and will be used to guide territorial strategic participatory development planning. In 2022, the subprogramme supported applied research on the state of digital government, on understanding the barriers to the incorporation of meaningful participatory processes in planning and public management and on governmental interoperability.

Lessons learned and planned change

21.137 The lesson for the subprogramme was that the requests of national Governments and development stakeholders point to the importance of developing innovative and effective methodologies to promote and implement collaborative and participatory planning and public management processes and to better understand the barriers for their implementation. In applying the lesson, the subprogramme will focus on the development of two e-learning courses, one on digital governance and one on citizen participation, in order to strengthen national capacities to formulate and implement more efficient and participatory public policies.

21.138 Expected progress towards the objective is presented in the performance measure below (see table 21.23).

Table 21.23
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Planning authorities in the region addressed the importance of public participation in all spheres of planning and public management	Planning authorities gained access to methodologies and lessons learned to move towards facilitating effective and meaningful citizen participation in planning and public management	Planning authorities in Nuevo León, Mexico, made advancements in the co-creation of public policies by government together with civil society As part of a midterm review of the state's development plan, planning authorities of Guanajuato, Mexico, identified recommendations for improving public participation in future planning processes	1 country formulates or implements participatory public policies or participatory planning processes	1 additional country formulates or implements participatory public policies or participatory planning processes

Deliverables

21.139 Table 21.24 lists all deliverables of the subprogramme.

Table 21.24
Subprogramme 9: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings, per entity/theme)	6	–	6	6
1. Meetings of the Regional Council for Planning	–	–	6	–
2. Meetings of the Presiding Officers of the Regional Council for Planning	6	–	–	6
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	1
3. On development planning and public management for development	1	1	1	1
Seminars, workshops and training events (number of days)	53	53	53	53
4. Training courses on public management systems and practices, budgeting, evaluation and public investment; foresight and scenario planning techniques; multiscale and territorial governance, planning and management; planning, public value and public administration/management in cross-cutting and emerging issues; and public policies and programmes	50	50	50	50
5. Technical materials (number of materials)	1	1	1	1
7. On planning and public management for development	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: advice to member States, upon request, on the strengthening of planning for development systems and institutions and integrated public management systems and practices, public policies and programmes, project formulation and evaluation, national systems for public investment, foresight for development, multilevel governance and planning, mainstreaming of a gender perspective and open government; and technical advice on assessing progress towards better planning, budgeting and implementation of government policies.

Databases and substantive digital materials: Regional Observatory of Planning for Development in Latin America and the Caribbean; technical manuals and software that support training (in situ and e-learning) and technical assistance activities; and databases on planning and public management for development in Latin America and the Caribbean.

Subprogramme 10 Statistics

Objective

- 21.140 The objective, to which this subprogramme contributes, is to improve the production, dissemination and use of statistics for evidence-based decision-making in the region.

Strategy

- 21.141 To contribute to the objective, the subprogramme will:
- (a) Provide specialized advisory services and online and face-to-face training courses, expert meetings and seminars, as well as technical assistance related to the development of basic statistics and institutional coordination mechanisms in areas of national accounts, basic economic statistics and price statistics; environmental statistics, climate change and disaster risk reduction statistics; household survey design and implementation; poverty and inequality measurement; integration of statistical and geospatial information systems; and national coordination mechanisms for Sustainable Development Goal monitoring. Special emphasis will be placed on coordination with agencies and international organizations to avoid the duplication of efforts and maximize the complementarity of activities;
 - (b) Compile and harmonize indicators and selected primary data sources, such as household surveys, economic surveys and other non-traditional data sources, to produce regionally relevant economic, environmental and social statistics and indicators;
 - (c) Develop and maintain the ECLAC statistical portal (CEPALSTAT) and other regional statistical dissemination platforms, as well as the Statistical Yearbook and other publications;
 - (d) Develop, adapt, translate and implement statistical methodologies, standards and recommendations;
 - (e) Reinforce the strategic and decision-making role of the Statistical Conference of the Americas and provide technical secretariat services to the Conference and its various working groups, ensuring that their work is consistent with regional priorities;
 - (f) Support the joint implementation of projects and initiatives and work in close cooperation with other ECLAC offices and divisions, as well as bilateral and multilateral partners;

- (g) Encourage the development and adoption of resilient methodologies for data collection and the production of statistics, such as strengthening the use of administrative records and non-traditional data sources, adopting new modes of data collection and integration of different data sources and building capacity in nowcasting methods.
- 21.142 The above-mentioned work is expected to result in:
- (a) Production of reliable economic, social and environmental statistics and new indicators in emerging areas and the improvement of non-traditional sources of information;
 - (b) Increased availability of regionally comparable data, which are required as a benchmark for regional statistical development;
 - (c) Greater regional coordination, leading to increased use of statistics at the regional and national levels;
 - (d) Increased capacities in member States for the continued production of statistics in situations similar to the pandemic.

Programme performance in 2022

Strengthened cooperation and mutual learning among national statistical offices

- 21.143 Towards the end of 2019, the Statistical Conference of the Americas identified the need to increase mutual learning among national statistical institutions and invited member countries to strengthen knowledge dissemination and horizontal cooperation through the Knowledge Transfer Network. In partnership with the National Statistical Institute of Chile, the subprogramme developed a regular programme of webinars for the exchange of experiences and knowledge on topics of regional interest, which became particularly relevant during the COVID-19 pandemic. In addition to the regular programme of webinars, in 2022, the Network launched a series of community groups as a new mechanism for peer collaboration. Groups have been formed around the topics of population and housing censuses and the follow-up of Sustainable Development Goal indicators, and a group was created to support the women leaders of national statistical offices. Between 2020 and 2022, 48 virtual events were held, covering a wide array of topics, such as the challenges for national statistical offices and strategies for data collection during the pandemic, the outcomes of the different Conference working groups during the 2020–2021 biennium, the labour market, the use of international standards on Statistical Data and Metadata Exchange (SDMX), information technology, gender mainstreaming, the quality of household surveys and the use of big data.
- 21.144 Progress towards the objective is presented in the performance measure below (see table 21.25).

Table 21.25
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
National statistical offices shared their experiences on how they were facing the challenges of the pandemic to continue their data collection efforts amid confinement measures	<p>National statistical offices learned from recent advances in small area estimation methodologies and their application to poverty maps in Latin America, in replicate weights for the estimation of sampling error in household surveys and in environmental statistics, among other topics</p> <p>Countries received recommendations for statistical production on issues related to the measurement of time use, on the use of economic administrative records and on environmental and disaster indicators, among other topics</p>	<p>The cumulative number of participants from 2020 to 2022 reached 7,614</p> <p>National statistical offices learned good practices on how to mainstream the gender perspective in the production of official statistics, and national technicians were trained in the use of a software library to evaluate the quality of estimates from household surveys and on the possibilities of using mobile phone data for the production of official statistics</p> <p>Peer exchanges have led to the adoption of practices and products at the national and regional levels; for example, El Salvador started evaluating the quality of estimates from household surveys using the library and criteria shared in one of the meetings, and the discussion of mainstreaming the gender perspective in the production of official statistics led to the creation of a community of practice of women leaders of national statistical offices at the regional level, to promote gender equality within those offices at all levels, especially in decision-making positions</p>

Planned results for 2024

Result 1: strengthened capacities of Latin American and Caribbean countries to produce relevant environment, climate change and disaster indicators

Programme performance in 2022 and target for 2024

- 21.145 The subprogramme’s work contributed to 650 national trained practitioners acknowledging that they have strengthened their skills to produce relevant internationally agreed environment, climate change and disaster statistics, which exceeded the planned target of 269.
- 21.146 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XXIII).

Figure 21.XXIII

Performance measure: number of national trained practitioners that acknowledge that they have strengthened their skills to produce relevant internationally agreed environment, climate change and disaster statistics (cumulative)

Result 2: increased capacities to produce disaggregated Sustainable Development Goal indicators to leave no one behind

Programme performance in 2022 and target for 2024

- 21.147 The subprogramme’s work contributed to 103 national trained practitioners having improved capacity to apply small area estimation techniques to produce disaggregated statistics in 2022, which exceeded the planned target of 50.
- 21.148 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XXIV).

Figure 21.XXIV

Performance measure: number of national trained practitioners with improved capacity to apply small area estimation techniques to produce disaggregated statistics (cumulative)

Result 3: improved data collection on prices to better inform policymaking

- 21.149 To assess the economic impact of inflation, improvements with regard to data on consumer prices and to calculating purchasing power parities are required, to enable public policymakers to implement decisions based on statistical evidence, for an inclusive and sustainable recovery. However, prevailing significant gaps in statistical development in countries of the region represent a challenge in generating statistics that enable robust comparisons. The subprogramme has worked directly with several countries in the region, providing them with technical assistance in the production of their consumer and producer price indexes. In addition, the subprogramme coordinates the implementation of the International Comparison Program in the region.

Lessons learned and planned change

21.150 The lesson for the subprogramme was that, in order to improve results on statistical price indicators, it is helpful to promote synergies in the data collection and processing of price data between the consumer price index and the International Comparison Program, to avoid duplication of statistical operations. In applying the lesson, the subprogramme will work with countries in the region to generate synergies between price statistics operations for the consumer price index and the indicators needed to calculate purchasing power parities on a regular basis, under the International Comparison Program, using innovative methods of data collection and processing.

21.151 Expected progress towards the objective is presented in the performance measure below (see figure 21.XXV).

Figure 21.XXV

Performance measure: number of Latin American and Caribbean countries with coordinated consumer price index and International Comparison Program data collection activities (cumulative)

Deliverables

21.152 Table 21.26 lists all deliverables of the subprogramme.

Table 21.26

Subprogramme 10: deliverables for the period 2022–2024, by category and subcategory

Technical materials (number of materials)	6	5	6	6
8. Bulletins on economic, social and environmental statistics and geospatial information	6	5	6	6
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on environment, climate change and disaster statistics and indicators; economic statistics; household surveys, poverty, inequality and other social statistics; geospatial information; and follow-up of the 2030 Agenda.				
Databases and substantive digital materials: the statistical information system and databases (CEPALSTAT) for 800,000 annual visits; the household survey database (BADEHOG); and the economic survey database (BADECON).				

**Subprogramme 11
Subregional activities in Central America, Cuba, the Dominican Republic,
Haiti and Mexico**

Objective

- 21.153 The objective, to which this subprogramme contributes, is to improve the formulation of evidence-based public policies in the economic, social and environmental fields in the countries in the subregion.

Strategy

- 21.154 To contribute to the objective, the subprogramme will support the implementation of national development agendas and strategic reforms towards generating economic and social impacts, and social compacts for equality benefiting those in vulnerable situations in the countries of Central America, Cuba, the Dominican Republic, Haiti and Mexico. Special emphasis will be placed on economic and social development, international trade, industry and integration, agriculture, food security and rural development, energy and natural resources, and climate change, thus helping member States to make progress towards the achievement of Sustainable Development Goals 1, 2, 7, 8, 10, 13 and 17. Specifically, the subprogramme will:
- (a) Undertake analytical work to foster the generation, dissemination and implementation of innovative and sound approaches to address the subregion's development challenges and build national and subregional capacities to formulate more integrated and coherent policies, taking into full consideration the different national contexts in the subregion;
 - (b) Strengthen its multisectoral and interdisciplinary approach by maintaining and updating relevant databases and developing quantitative and qualitative analytical models;
 - (c) Provide training activities, advisory services and fellowships, as well as organize and promote forums in the areas of economic, social and environmental public policies.

21.155 The above-mentioned work is expected to result in the design, implementation and evaluation of effective public policies, including those focused on fiscal matters, trade and integration, energy, agriculture, food security, social protection and climate change.

Programme performance in 2022

Rural territories in Mexico invigorated through the articulation of processes of social economy

21.156 The subprogramme has been working on strengthening productive inclusion through social economy schemes in rural territories categorized as poor and extremely poor, with a methodology replicable in the rest of the region. In the framework of a five-year project now coming to conclusion, ECLAC and the Government of Mexico supported productive development through territorial diagnoses, territorial and productive value chain targeting, incubation processes, commercialization and technical assistance to enterprises, as well as by building strategic alliances at the local level and strengthening institutional articulation. The project has led to 10,349 direct and indirect beneficiaries and, in 2022, assisted 262 micro- and small enterprises in increasing their productive capacities and/or their income in the pandemic and post-pandemic contexts. The cross-cutting strategies of the project – financial inclusion and gender equality – have also been key to its success.

21.157 Progress towards the objective is presented in the performance measure below (see figure 21.XXVI).

Figure 21.XXVI

Performance measure: number of social economy micro- and small enterprises that increased their productive capacities (annual)

Planned results for 2024

Result 1: design of public investment projects that incorporate disaster risk reduction and sustainable and inclusive adaptation to climate change

Programme performance in 2022 and target for 2024

21.158 The subprogramme’s work contributed to four countries (Costa Rica, El Salvador, Nicaragua and Panama) having public investment systems that strengthen project design with disaster risk reduction and sustainable and inclusive adaptation to climate change in at least one sector, which met the planned target.

21.159 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XXVII).

Figure 21.XXVII

Performance measure: number of countries with public investment systems strengthening project design with disaster risk reduction and sustainable and inclusive adaptation to climate change in at least one sector (annual)

Result 2: strengthened technical capacities of national and regional institutions to design better public policies for development focused on the role of the State

Programme performance in 2022 and target for 2024

- 21.160 The subprogramme’s work contributed to Haiti following up on the implementation of national and subnational plans under its national social protection and promotion policy and the municipality of Iztapalapa, in Mexico City, evaluating the impacts of its social inclusion project, which exceeded the planned target.
- 21.161 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XXVIII).

Figure 21.XXVIII

Performance measure: number of public institutions with strengthened technical capacity to design public policies for development focused on the role of the State (annual)

Result 3: increased contribution by subregional integration institutions to policy design on economic issues

Proposed programme plan for 2024

- 21.162 The integration of public policies in Central America can be a lever for development, as well as for generating better public budgeting. Within such a diverse region, effective and efficient integration policies can help in overcoming various obstacles that may hamper the subregion’s full potential.

The subprogramme helps to promote intraregional integration in Central America through specific actions and policy recommendations. It has provided technical assistance to central banks and national statistical offices to update the regional input-output table, which supports the design and evaluation of trade, industrial and structural change policies. ECLAC has also accumulated experience on several economic policy issues, such as the development of innovative financing that can be helpful for Central American integration institutions.

Lessons learned and planned change

- 21.163 The lesson for the subprogramme was that the technical dialogue with Central American integration institutions can be strengthened and that focusing technical assistance on economic policy issues that strengthen regional integration can benefit member States. In applying the lesson, the subprogramme will provide technical advice, both to regional institutions and to national Governments, on specialized economic policy issues, with a special focus on regional integration, in order to strengthen their capacities. Technical areas could include fiscal policy and the customs union of El Salvador, Guatemala and Honduras, as well as deepening work on input-output tables for Central America.
- 21.164 Expected progress towards the objective is presented in the performance measure below (see table 21.27).

**Table 21.27
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	–	Executive Secretariat of the Council of Ministers of Finance of Central America, Panama and the Dominican Republic has started developing technical tools on specialized economic issues, such as fiscal policy and public debt	1 regional integration institution has access to technical knowledge and empirical evidence to be able to formulate economic policy recommendations to its council of ministers	1 regional integration institution has installed capacities to formulate national economic forecasts and policy analysis

Deliverables

- 21.165 Table 21.28 lists all deliverables of the subprogramme.

Table 21.28

Subprogramme 11: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge

6. On subregional activities	2	2	2	1
7. On recent macroeconomic developments in the countries of the subregion	10	10	10	10
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on macroeconomic and macroprudential policies, the 2030 Agenda, social development issues, sectoral policy, energy and climate change, international trade and integration.				
Databases and substantive digital materials: databases on economic statistics and national accounts, social indicators, the agricultural sector and food security, trade integration, the hydrocarbon and electricity sectors and climate change in the subregion.				

Subprogramme 12

Subregional activities in the Caribbean

Objective

- 21.166 The objective, to which this subprogramme contributes, is to strengthen the sustainable development process in the Caribbean in the economic, social and environmental dimensions and to enhance the subregion's cooperation with Latin America.

Strategy

- 21.167 To contribute to the objective, the subprogramme will:
- Engage ECLAC member States, regional and extraregional entities and other partners in regional and country-specific initiatives and convene high-level intergovernmental and technical meetings related to the follow-up to global and regional initiatives and conferences, including the 2030 Agenda and the Sustainable Development Goals, and explore and articulate strategies for and approaches towards sustainable development based on practical research and empirical and conceptual frameworks of analysis;

- (b) Support Caribbean countries, through technical missions and advisory services, in the development of evidence-based policies that promote sustainable development, helping member States to make progress towards the achievement of Goals 3, 4, 5, 8, 9, 13 and 14;
- (c) Undertake research and analysis on emerging issues and challenges facing the Caribbean;
- (d) Build the capacities of development practitioners and decision makers in designing and implementing resilience-building measures for durable development that are inclusive of the special situation of women and persons with disabilities, in close cooperation with United Nations entities and Caribbean development partners.

21.168 The above-mentioned work is expected to result in:

- (a) Increased effective subregional and regional engagement and consensus, functional cooperation and enhanced political advocacy on issues critical to the development of the Caribbean;
- (b) Advancement of the implementation of national and subregional strategies and programmes.

Programme performance in 2022

Increased availability of data for decision-making and development planning

21.169 National population and housing censuses are not only a source of demographic and social statistics, they also provide input data for the calculation of many other social and economic statistics. National population and housing censuses can support national development planning, policymaking and the monitoring of international commitments such as the 2030 Agenda. The subprogramme, through a series of virtual sessions over the course of two years, provided technical support to Suriname to facilitate the availability of microdata from its 2012 population census. Similar support was provided to Montserrat. This was enabled through the use of the REDATAM software,⁵ which allows for the online processing and analysis of census and survey data, which can contribute to evidence-based decision-making.

21.170 Progress towards the objective is presented in the performance measure below (see table 21.29).

Table 21.29
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	Government staff used the REDATAM software to create, process and publish microdata sets	Suriname validated its data, with a view to making it publicly available in early 2023. Statistics Department of Montserrat made the processing and analysis of microdata from the 2018 intercensal count and labour force census available online

⁵ REDATAM stands for “retrieval of data for small areas by microcomputer”. REDATAM+SP (abbreviated R+SP) is the most recent version of the fourth generation of the software. It can be used in English, Portuguese or Spanish.

Planned results for 2024

Result 1: sustainable recovery from the COVID-19 pandemic through economic restructuring and diversification

Programme performance in 2022 and target for 2024

- 21.171 The subprogramme's work contributed to the undertaking of in-depth research on diversification within the tourism sector to determine the optimal areas for development and identify niche areas to help countries to develop proposals for diversification, which did not meet the planned target of two Caribbean countries developing proposals for investing in new or existing sector niches and segments. The target was not met owing to changing priorities, including increasing demand from the member States to advance the establishment of the Caribbean Resilience Fund during 2022.
- 21.172 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 21.30).

Table 21.30

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Member States gained access to research on the potential impact of the COVID-19 pandemic on Caribbean economies	Caribbean member States gained access to a road map to begin economic restructuring and diversification in selected priority sectors	Recommendations based on research and analysis to identify priority areas for diversification of tourism products at an advanced stage of preparation	4 Caribbean countries develop proposals for diversification into key goods and services sectors	1 additional Caribbean country develops proposals for diversification into key goods and services sectors

Result 2: sourcing and leveraging financing for development through innovative instruments and mechanisms

Programme performance in 2022 and target for 2024

- 21.173 The subprogramme's work contributed to high-level decision-making on the establishment of the Caribbean Resilience Fund, whereby it was agreed that the Fund would operate through two windows, one for resilience-building and sustainable resilience and the second for debt restructuring and liquidity enhancement, which met the planned target.
- 21.174 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 21.31).

Table 21.31

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Draft of the structure, operation and governance of the Caribbean Resilience Fund available to Caribbean countries for review	Endorsement of the structure, operation and governance of the Caribbean Resilience Fund by key stakeholders	Agreement on the establishment of the Caribbean Resilience Fund	1 Caribbean country has initiated a debt swap/debt restructuring with creditors and/or private investors	At least 1 additional Caribbean country has initiated a debt swap/debt restructuring with creditors and/or private investors

Result 3: gender-sensitive policies on paid and unpaid work in the Caribbean better informed through time-use surveys

Proposed programme plan for 2024

21.175 Recognizing the importance of unpaid work is critical to achieving gender equality and the empowerment of women and girls (Sustainable Development Goal 5). As with most of the people-focused Goals of the 2030 Agenda, the COVID-19 pandemic reversed some of the gains made in gender equality and the empowerment of women. The extent to which men and women were forced to devote greater time to unpaid work activities has not been previously well documented in the Caribbean. The subprogramme conducted a study on the impact of the pandemic on paid and unpaid work in 2022, which revealed that, in comparison with men, the pandemic forced many women to devote greater time to unpaid work activities, which limited their ability to rejoin the labour market after the pandemic.

Lessons learned and planned change

21.176 The lesson for the subprogramme was that greater attention needed to be given to the far-reaching impact of the pandemic across multiple dimensions of sustainable development. In applying the lesson, the subprogramme will seek to ascertain where progress has been reversed or impeded by the pandemic and will undertake the necessary actions to advise countries on how to incorporate time-use modules in their population and housing censuses or labour force surveys.

21.177 Expected progress towards the objective is presented in the performance measure below (see table 21.32).

Table 21.32
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Dominica, Jamaica and Trinidad and Tobago incorporated time-use modules in their labour force survey and/or population and housing censuses	At least 1 additional Caribbean country commits itself to incorporating time-use modules in its population and housing census or labour force survey	At least 1 additional Caribbean country carries out a time-use survey as part of its population and housing census or labour force survey

Deliverables

21.178 Table 21.33 lists all deliverables of the subprogramme.

Table 21.33
Subprogramme 12: deliverables for the period 2022–2024, by category and subcategory

10. <i>Caribbean Development Report</i>	1	1	–	1
11. On issues related to economic development and finance; ICT; statistics; selected social development issues; and selected issues related to the environment in the Caribbean	7	6	8	7
Technical materials (number of materials)	9	9	8	8
12. On specific issues related to economic development, ICT for development, social development, environmental development, statistics and disaster risk management or resilience building in the Caribbean	5	5	4	4
13. <i>FOCUS</i> magazine	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on ICT for development, economic policies and integration, gender equality and social and population development, environmental development, disaster preparedness and risk reduction, and statistics and statistical development.				
Databases and substantive digital materials: database on statistical indicators; and database on science and technology.				
D. Communication deliverables				
Outreach programmes, special events and information materials: <i>The Hummingbird</i> newsletter; and community outreach events.				
External and media relations: news items; media events; and television and radio interviews.				
Digital platforms and multimedia content: ECLAC Caribbean website; and social media pages.				
Library services: information requests; library catalogue; interlibrary loans and services; and book displays (virtual).				

**Subprogramme 13
Support for regional and subregional integration and cooperation processes
and organizations**

Objective

- 21.179 The objective, to which this subprogramme contributes, is to enhance regional and subregional integration processes in order to foster their convergence and the participation of the region through common positions in interregional and global political dialogues in support of the 2030 Agenda.

Strategy

- 21.180 To contribute to the objective, the subprogramme will:
- (a) Promote coordination and cooperation within and among member States and associate members, subregional and regional entities, the resident coordinator system, United Nations agencies, funds and programmes, the private sector, civil society organizations (including the business community), academic institutions, extraregional stakeholders and other third parties through technical, logistical and substantive contributions to subregional and regional initiatives;
 - (b) Support the development of joint regional positions in multilateral forums and global conferences in connection with important events, such as the meetings of CELAC, the Central American Integration System, the Southern Common Market, the Pacific Alliance, CARICOM, the Association of Caribbean States, the Organization of Eastern Caribbean States and other integration mechanisms that will report to the Forum of the Countries of Latin America and the Caribbean on Sustainable Development;
 - (c) Provide technical cooperation and advisory services, upon request, and training activities;
 - (d) Promote the sharing of knowledge and experiences to support the achievement of sustainable development, as well as promote discussions on shared targets, mainstreaming a gender perspective and in line with the Caribbean First strategy of the Commission;
 - (e) Promote multilateral cooperation, in the context of integration schemes and organizations in the region, and help the region to make progress towards the achievement of the Goals, in particular Sustainable Development Goals 16 and 17.
- 21.181 The above-mentioned work is expected to result in:
- (a) Reduced regional asymmetries and increased South-South and triangular cooperation initiatives, including subregional integration processes and the region's strategic positioning at the global level;
 - (b) Common positions of the countries of the region in support of the implementation of the 2030 Agenda.

Programme performance in 2022

Strengthened cooperation among the countries of the region and collaboration with bilateral and multilateral partners

- 21.182 How to evaluate South-South cooperation and assess its results at the regional level has been the subject of discussion for more than a decade among the countries of Latin America and the Caribbean. There is demand in the region to share information on South-South cooperation programmes and projects, in order to generate greater knowledge on the subject, as well as for decision-making, inter alia, to improve programmes at the regional level and with other regions of the world, given the need to adapt all international development cooperation initiatives. The subprogramme contributed to enhancing collaboration with bilateral and multilateral cooperation partners by providing technical and logistical support; it also made substantive contributions to the countries of the region through technical assistance and by providing opportunities for multilateral discussions. The subprogramme also held a seminar on new challenges and perspectives of international cooperation in September 2022, with the participation of Argentina, Chile, Costa Rica, Peru and Uruguay, as well as the Development Bank of Latin America, the Organisation for Economic Co-operation and Development, the Inter-American Development Bank, the European Union, the United Nations Development Programme and the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women).
- 21.183 Progress towards the objective is presented in the performance measure below (see table 21.34).

Table 21.34
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Member States discussed potential methodologies for evaluating South-South cooperation and for the measurement, at the regional or subregional level, of cooperation on projects	Bilateral and multilateral organizations and other stakeholders gained access to a diagnosis on the need to evaluate international cooperation	A road map was agreed with the Chilean Agency for International Cooperation for Development, the Development Centre of the Organisation for Economic Co-operation and Development and the Inter-American Development Bank to support discussions among member States aimed at the development of indicators, short- and long-term goals, budgets and the joint generation of instruments on issues such as sustainable productive and technological partnerships

Planned results for 2024

Result 1: robust regional and subregional integration processes in support of post-pandemic recovery in line with the 2030 Agenda

Programme performance in 2022 and target for 2024

- 21.184 The subprogramme’s work contributed to 40 regional and subregional organizations and civil society organizations participating in the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, which met the planned target.
- 21.185 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XXIX).

Figure 21.XXIX

Performance measure: number of regional and subregional organizations and civil society organizations participating in the Forum of the Countries of Latin America and the Caribbean on Sustainable Development (annual)

Result 2: strong regional and subregional participation of intergovernmental integration schemes and organizations in the region in support of the recovery from the pandemic in line with the 2030 Agenda

Programme performance in 2022 and target for 2024

- 21.186 The subprogramme’s work contributed to 30 regional and subregional intergovernmental integration schemes and organizations participating in the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, which met the planned target.
- 21.187 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 21.XXX).

Figure 21.XXX

Performance measure: number of regional and subregional intergovernmental integration schemes and organizations participating in the Forum of the Countries of Latin America and the Caribbean on Sustainable Development (annual)

Result 3: strengthened South-South cooperation as an instrument of regional integration in line with the 2030 Agenda

Proposed programme plan for 2024

- 21.188 International cooperation for development, in particular South-South and triangular cooperation, helps to advance global, regional and subregional integration. In that context, the subprogramme contributed to the establishment, in 2021, of the Regional Conference on South-South Cooperation in Latin America and the Caribbean pursuant to resolution 752 (PLEN.36).

Lessons learned and planned change

- 21.189 The lesson for the subprogramme was that there were opportunities to work more closely with multilateral organizations and development banks in matters relating to international, South-South and triangular cooperation to better support countries of the region in being part of global discussions and in conveying a common regional perspective. In applying the lesson, the subprogramme will promote the participation of regional and subregional intergovernmental integration schemes and multilateral organizations, including development banks, in the meetings of the Regional Conference on South-South Cooperation in Latin America and the Caribbean. The subprogramme will provide substantive and secretariat support for the first meeting of the Regional Conference, to be held in May 2023. The Regional Conference will facilitate social, economic and political cooperation and coordinated dialogue for promoting regional and subregional integration among the countries of the region.
- 21.190 Expected progress towards the objective is presented in the performance measure below (see figure 21.XXXI).

Figure 21.XXXI

Performance measure: number of regional and subregional intergovernmental integration schemes and multilateral organizations participating in the meetings of the Regional Conference on South-South Cooperation of Latin America and the Caribbean and those of its Presiding Officers (annual)

Deliverables

5. Technical note for the intergovernmental meeting on integration and cooperation and the Regional Conference on South-South Cooperation in Latin America and the Caribbean about how to include extraregional stakeholders and third parties	2	2	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: advice to member States, upon request, on topics related to the Commission's mandate, including on integration and cooperation, and to regional and subregional organizations and processes, including on the 2030 Agenda and the use of the ECLAC damage and loss assessment methodology; and technical advice to member States, upon request, on regional and subregional processes and organizations in areas relevant to the Commission's mandate and in their relationships with extraregional stakeholders and third parties in areas relating to the work of the subprogramme.				

B. Proposed post and non-post resource requirements for 2024

Overview

21.192 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 21.36 to 21.38.

Table 21.36

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2022 expenditure ^a	2023 appropriation	Changes				2024 estimate (before recosting)

^a Includes three temporary posts (1 P-4 and 2 P-3) that were approved pursuant to General Assembly resolution [71/272](#).

21.193 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 21.39 to 21.41 and figure 21.XXXII.

21.194 As reflected in tables 21.39 (1) and 21.40 (1), the overall resources proposed for 2024 amount to \$58,716,400 before recosting, reflecting a net decrease of \$24,800 (or 0.004 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 21.XXXII
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

- 21.195 As reflected in table 21.39 (1), a net decrease of \$24,800 in grants and contributions under programme support relates to the removal of non-recurrent requirements for the renovation of the North Building at the Economic Commission for Latin America and the Caribbean in Santiago, approved by the General Assembly for 2023 in its resolution [77/263](#) (sect. X). The corresponding resource requirements for 2024 will be reflected in the report of the Secretary-General on progress on the renovation of the North Building at the Economic Commission for Latin America and the Caribbean in Santiago which will be submitted for the consideration of the General Assembly during the main part of its seventy-eighth session.

Other changes

- 21.196 As reflected in table 21.39 (1), the net effect of the proposed other changes is cost-neutral. The breakdown of changes is as follows:
- Executive direction and management.** The net increase of \$39,000 relates to the inward redeployment of travel resources to expand the coverage and the needs for ECLAC management to attend sessions of the General Assembly and the Economic and Social Council, including the high-level segments, and those of their relevant subsidiary bodies. Given the Commission's location at an outposted duty station and with the return to pre-pandemic meeting arrangements, attending in-person meetings with advisory and subsidiary bodies and delegations of Member States is vital to present the work of the Commission and engage in peer learning with other regional commissions and relevant development partners;
 - Programme support.** The net decrease of \$39,000 relates to the outward redeployment of travel resources. The enhanced use of virtual modalities for interdepartmental coordination allows for the reprioritization of travel resources.

Extrabudgetary resources

- 21.197 As reflected in tables 21.39 (2) and 21.40 (2), extrabudgetary resources amount to \$10,599,800. The resources would complement regular budget resources and would be used mainly to support activities under the programme of work, such as capacity-building, advisory and technical cooperation services

for countries and institutions of the region in areas relating to sustainable development, economic, social and environmental matters. The extrabudgetary resources would supplement the financing of field projects, online and on-site training courses, applied research training, seminars and workshops in cooperation with governmental entities and academic, non-governmental, regional and subregional institutions as a way of fostering cooperation, peer-to-peer learning, networking and sharing of good practices at the national, subregional and regional levels.

- 21.198 The extrabudgetary resources for 2024 reflect a decrease of \$697,200 compared with extrabudgetary resources for 2023. This change mainly results from the closure of two regional multidivisional projects related to development in middle-income countries and sustainable cities. In addition, the closure of some projects in the fields of road safety, open government and agricultural development, among others, will have an impact on some of the subprogrammes. This scenario reflects the particularly challenging context for the mobilization of development financing during 2023, in which the realignment of priorities by traditional donors has had a negative impact on development cooperation flows towards middle-income economies. Most Latin American and Caribbean countries are categorized as such, in spite of the significant persistent structural development gaps they face as they struggle on the path towards sustainable development.
- 21.199 Consequently, ECLAC continues to revamp its extrabudgetary resources mobilization strategy by reaching out to non-traditional partners, which has already resulted in new initiatives with private sector foundations and universities. The main goal is to engage these stakeholders in the implementation of the 2030 Agenda while intervening in key sectors to foster a transition towards an inclusive, resilient and transformative recovery of the region. The diversification of implementing modalities, including by increasing participation in United Nations multi-partner trust funds jointly with partners from the United Nations country teams throughout the region, is also a core part of the ECLAC financing mobilization strategy.
- 21.200 ECLAC expects to receive both cash and in-kind contributions. In-kind contributions are received by ECLAC under donated right-to-use arrangements on rent-free premises for the ECLAC national office in Brasília, with an estimated annual value of \$41,825, and the donated right-to-use of land for ECLAC premises in Santiago, with an estimated annual value of \$828,569, as reflected in the 2022 financial statements.
- 21.201 The extrabudgetary resources under the present section are subject to the oversight of the secretariat of ECLAC, which has delegated authority from the Secretary-General.

Policymaking organs

- 21.202 The resources proposed under this component would provide for the requirements relating to the servicing of meetings of ECLAC intergovernmental bodies. The sessions of the Commission provide overall guidance to the work of the secretariat. Table 21.42 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 21.42
Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Session of the Economic Commission for Latin America and the Caribbean	The biennial session of the Commission considers development issues for the countries of the region and reviews the progress of the Commission’s work. It also enables member States to examine the secretariat’s report on the Commission’s activities. Through the programme of work that they adopt and the calendar of conferences they approve, Governments also define the mandates that will guide the Commission’s work in the future.	Mandate: Economic and Social Council resolution 106 (VI) Membership: 60 government officials Number of sessions in 2024: 1	–	199.4

Section 21 Economic and social development in Latin America and the Caribbean

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Committee of the Whole	The Committee of the Whole normally meets at United Nations Headquarters with permanent representatives of ECLAC member States during the years in which the Commission does not hold a session.	Mandate: Economic and Social Council resolution 106 (VI), para. 3, and ECLAC resolutions 419(PLEN.14) and 489(PLEN.19) Membership: 60 government officials Number of sessions in 2024: –	56.9	–
Regional Conference on Women in Latin America and the Caribbean	The Regional Conference reviews the regional and subregional situation with regard to women's autonomy and rights, puts forward recommendations on public policies on gender equality, undertakes periodic assessments of the activities carried out in fulfilment of regional and international agreements and serves as a forum for discussion on gender equality. It brings together high-level authorities with responsibility for issues relating to the situation of women and for policies to ensure gender equity in the countries of the region. The Regional Conference is held at least once every three years.	Mandate: Decision adopted on 21 November 1977 by the Committee of the Whole at its eleventh special session Membership: 60 government officials The next session is expected to take place in 2025.	–	–
Presiding Officers of the Regional Conference on Women in Latin America and the Caribbean	The Presiding Officers provide overall direction on the work of the secretariat on issues related to the integration of women into development in the region in intersessional intervals of the Conference.	Mandate: Regional Plan of Action on the Integration of Women into Latin American Economic and Social Development, para. 88.2 Membership: 60 government officials Number of sessions in 2024: 2	40.9	41.6
Regional Council for Planning of the Latin American and Caribbean Institute for Economic and Social Planning	The Regional Council acts as the senior guiding body for the activities of the Latin American and Caribbean Institute for Economic and Social Planning and serves as an advisory body with respect to the implementation of the work programmes of the Institute and the evaluation of their results. The Council meets every two years or as required.	Mandate: ECLAC resolutions 351(XVI) and 553(XXVI) Membership: 33 government officials Number of sessions in 2024: –	80.2	–
Presiding Officers of the Regional Council for Planning of the Latin American and Caribbean Institute for Economic and Social Planning	The Presiding Officers review the progress with respect to resolutions adopted by the Regional Council for Planning of the Latin American and Caribbean Institute for Economic and Social Planning and also review the activities of the Institute. The Presiding Officers meet every two years or as required.	Mandate: ECLAC resolution 340(AC.66), adopted by the Committee of the Whole at its eighth extraordinary session. ECLAC resolutions 351(XVI) and 553(XXVI) Membership: 33 government officials Number of sessions in 2024: 1	25.0	41.6
Caribbean Development and Cooperation Committee	The Committee coordinates economic and social development cooperation and addresses other development concerns of the Caribbean members of ECLAC. It also serves as an advisory and consultative body to the Executive Secretary of ECLAC on issues concerning the Caribbean. The Committee meets every two years or as required.	Mandate: ECLAC resolution 358(XVI) and constituent declaration, functions and rules of procedure of the Committee (E/CEPAL/1022) Membership: 29 government officials Number of sessions in 2024: 1	–	92.1
Monitoring Committee of the Caribbean Development and	The Monitoring Committee promotes and strengthens economic and social cooperation and integration among the countries of the Caribbean and also promotes cooperation between them and	Mandate: ECLAC resolutions 358(XVI), 419(PLEN.14), 489(PLEN.19) and 553(XXVI)	58.0	–

Part V Regional cooperation for development

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Cooperation Committee	the countries and integration processes of Latin America and the Caribbean. The Committee meets every two years or as required.	Membership: 29 government officials Number of sessions in 2024: –		
Forum of the Countries of Latin America and the Caribbean on Sustainable Development	The Forum follows up and reviews the implementation of the 2030 Agenda for Sustainable Development, including the Sustainable Development Goals and targets, and the Addis Ababa Action Agenda of the Third International Conference on Financing for Development. The Forum meets annually.	Mandate: ECLAC resolution 700(XXX) Membership: 33 government officials Number of sessions in 2024: 1	99.0	99.5
Ministerial Conference on the Information Society in Latin America and the Caribbean	The Ministerial Conference designs and implements programmes for access to and use of ICT in the region. The Plan of Action for the Information Society in Latin America and the Caribbean (eLAC 2007) represents the region's vision for and political commitment to reducing the digital divide and promoting access to and use of ICT as a development tool. The Conference is held every two years or as required.	Mandate: ECLAC resolution 610(XXX) Membership: 33 government officials Number of sessions in 2024: 1	–	41.1
Preparatory meeting for the Ministerial Conference on the Information Society in Latin America and the Caribbean	The preparatory meeting evaluates the commitments made in the Digital Agenda for Latin America and the Caribbean (eLAC 2020) with a view to preparing for the Ministerial Conference. The preparatory meeting is held every two years or as required.	Mandate: ECLAC resolution 610(XXX) Membership: 33 government officials Number of sessions in 2024: –	31.0	–
Statistical Conference of the Americas	The Conference contributes to the progress of policies on statistics and statistical activities in the countries of the region and promotes international, regional and bilateral cooperation among national statistical offices and international and regional agencies. The Conference is held every two years.	Mandate: ECLAC resolution 580(XXVIII) and Economic and Social Council resolution 2000/7 Membership: 60 government officials Number of sessions in 2024: –	85.2	–
Executive Committee of the Statistical Conference of the Americas	The Executive Committee supports the preparation of technical reports on the progress and results achieved under the programme of work defined by the Conference. The Committee meets annually.	Mandate: ECLAC resolution 580(XXVIII) and Economic and Social Council resolution 2000/7 Membership: 60 government officials Number of sessions in 2024: 1	40.9	41.6
Regional Conference on Social Development in Latin America and the Caribbean	The Regional Conference promotes the development of national policies on social development and international, regional and bilateral cooperation in the field of social development, in order to examine multidimensional poverty and make progress on poverty measurement and addressing inequality and structural gaps. The Regional Conference is held every two years.	Mandate: ECLAC resolution 682(XXXV) and Economic and Social Council resolution 2014/32 Membership: 60 government officials Number of sessions in 2024: –	85.2	–
Presiding Officers of the Regional Conference on Social Development in Latin America and the Caribbean	The Presiding Officers meet at least once between regular sessions of the Conference and review the progress made in the implementation of resolutions adopted by the Conference and of the agreements of the previous Presiding Officers.	Mandate: ECLAC resolution 682(XXXV) and Economic and Social Council resolution 2014/32 Membership: 60 government officials Number of sessions in 2024: 1	–	41.6

Section 21 Economic and social development in Latin America and the Caribbean

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Regional Conference on Population and Development in Latin America and the Caribbean	The Regional Conference focuses on monitoring and reviewing issues relating to population and development, international migration, Indigenous Peoples and Afrodescendent populations, and ageing. The Regional Conference is held every two years.	Mandate: ECLAC resolution 670(XXXIV), Agreement 1 of the ECLAC Ad Hoc Committee on Population and Development, Montevideo Consensus on Population and Development Membership: 60 government officials Number of sessions in 2024: 1	–	92.6
Presiding Officers of the Regional Conference on Population and Development in Latin America and the Caribbean	The Presiding Officers meet at least once between regular sessions of the Conference and serve as a link between member States and the ECLAC secretariat in order to provide regional follow-up on issues related to population and development adopted by the Conference.	Mandate: ECLAC resolution 670(XXXIV), Agreement 1 of the ECLAC Ad Hoc Committee on Population and Development, Montevideo Consensus on Population and Development Membership: 60 government officials Number of sessions in 2024: –	40.9	–
Conference on Science, Innovation and Information and Communications Technologies	The Conference promotes the development and improvement of national policies on science, technology and innovation and those related to the progress of the information and knowledge society. The Conference meets annually or as required.	Mandate: ECLAC resolution 672(XXXIV) and Economic and Social Council resolution 2012/35 Membership: 60 government officials Number of sessions in 2024: –	76.1	–
Executive Committee of the Conference on Science, Innovation and Information and Communications Technologies	The Executive Committee meets at least once between regular sessions of the Conference and it follows up on the implementation of the agreements adopted and tasks assigned by the Conference, particularly with respect to the biennial programme of activities.	Mandate: ECLAC resolution 672(XXXIV) and Economic and Social Council resolution 2012/35 Membership: 60 government officials Number of sessions in 2024: 1	–	28.0
Regional Conference on South-South Cooperation in Latin America and the Caribbean	The Regional Conference prioritizes the implementation of the mandates conferred on United Nations regional commissions in the outcome document of the second High-level United Nations Conference on South-South Cooperation and carries out its activities within the framework of the 2030 Agenda for Sustainable Development and General Assembly resolution 76/221 on South-South cooperation.	Mandate: General Assembly resolution 58/220 , ECLAC resolutions 611(XXX) and 752(PLEN.36) Membership: 60 government officials Number of sessions in 2024: –	30.7	–
Presiding Officers of the Regional Conference on South-South Cooperation in Latin America and the Caribbean	The Presiding Officers meet at least once between regular sessions of the Conference and adopt a draft programme of activities for the Conference.	Mandate: General Assembly resolution 58/220 , ECLAC resolutions 611(XXX) and 752(PLEN.36) Membership: 60 government officials Number of sessions in 2024: 1	–	30.4
Conference of the Parties to the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean	The Conference is held annually to review and promote the implementation and effectiveness of the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean.	Mandate: ECOSOC resolution 2021/31 and the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean Membership: 33 government officials Number of sessions in 2024: 1	69.6	70.1

Part V Regional cooperation for development

Policymaking organ	Description	Additional information	2023	2024
			appropriation	estimate (before recosting)
Committee of High-level Government Experts	The Committee reviews the achievement of objectives of the International Development Strategy in Latin America. The Committee meets as and when required.	Mandate: ECLAC resolutions 310(XIV), 419(PLEN.14), 422(XIX), para. 204, 425(XIX), 489(PLEN.19) and 553(XXVI) Membership: 33 government officials Number of sessions in 2024: 1	3.0	3.0
Central American Economic Cooperation Committee	The Committee serves as a consultative and advisory forum for Central American integration. The Committee meets as and when required.	Mandate: ECLAC resolutions 9(IV) and 553(XXVI) Membership: 7 government officials Number of sessions in 2024: 1	3.0	3.0

Executive direction and management

- 21.204 Executive direction and management, headed by the Executive Secretary, is responsible for the overall direction, supervision and management of ECLAC in the implementation of its mandates and its approved programme of work. The component is also responsible for the coordination of the preparation of the institutional document on the main substantive topics discussed at the biennial session of the Commission, as well as for the publication of the *CEPAL Review*. The Office of the Executive Secretary is responsible for the coordination of the preparation of the progress report on the implementation of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals in Latin America and the Caribbean, and the report on the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, which is convened annually under the auspices of ECLAC. The Executive Secretary is assisted by the Deputy Executive Secretary.
- 21.205 The Office of the Executive Secretary provides leadership and policy orientation and establishes the criteria to coordinate follow-up in the region on the implementation of the 2030 Agenda, including the Sustainable Development Goals, and the Addis Ababa Action Agenda, as well as the mainstreaming of cross-cutting issues, such as gender, disability inclusion and sustainability perspectives, throughout ECLAC subprogrammes. It is also responsible for coordinating its programme of work with other funds, programmes and specialized agencies of the United Nations system in the region. It includes the Office of the Secretary of the Commission, which is responsible for maintaining political relations with the Governments and authorities of ECLAC member States and for performing diplomatic and protocol functions and is entrusted with servicing intergovernmental meetings.
- 21.206 The Programme Planning and Operations Division provides overall coordination, guidance and advice to the ECLAC subprogramme managers with respect to the preparation of the draft programme of work and the report on the activities of the Commission for consideration and adoption at the biennial session of the Commission or at the Committee of the Whole, and the annual proposed programme budget. The Division also monitors the implementation of the work programme and coordinates, organizes and reports on the implementation of the ECLAC evaluation plan.
- 21.207 The Public Information Unit works in close coordination with the Department of Global Communications of the Secretariat to conduct public information activities relating to the United Nations system and ECLAC, including organizing press conferences and issuing press releases, producing and disseminating booklets and information kits about the work of ECLAC and the United Nations and conducting campaigns, including through social media.
- 21.208 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, ECLAC is integrating environmental management practices into its operations. ECLAC will continue to mainstream environmental sustainability initiatives into its internal management and foresees a phased environmental plan to further realize long-term benefits for the sustainable operations of the Commission. The ECLAC water management plan was initiated to address a prolonged drought crisis in the ECLAC headquarters host country, which was recognized as facing drought emergencies in the period 2020–2022.⁶ The progress achieved thus far through the water management plan enables a more sustainable use of water resources and upscales recycling capabilities on campus. ECLAC will continue to strengthen these efforts and align its operations with the strategy for sustainability management in the United Nations system, 2020–2030 (CEB/2019/1/Add.1), as well as with its host countries' environmental policies.
- 21.209 Information on the timely submission of documentation and advance booking for air travel is reflected in table 21.44. The compliance rate at ECLAC reflects the impact of operational

⁶ United Nations Convention to Combat Desertification, “Drought in numbers 2022: restoration for readiness and resilience” (2022). Available at <https://www.unccd.int/resources/publications/drought-numbers>.

Part V Regional cooperation for development

adjustments to providing travel services to the 26 resident coordinator offices in the region, which has increased the workload significantly, as well as the challenges associated with the still limited availability of connections and flight routes in the region. These factors require an enhanced level of coordination in the travel planning process. In response, ECLAC will offer tailored training with a particular focus on applicable personnel from the resident coordinator offices, monitoring the performance of contracted travel agencies and further optimizing associated workflows based on lessons learned after a post-pandemic service consolidation period.

Extrabudgetary resources

- 21.211 Extrabudgetary resources for this component amount to \$777,500. The resources would complement regular budget resources and would be used mainly to facilitate resource mobilization and central management, including the provision of planning, monitoring and managerial support to operations, programmes and projects.

Programme of work
Subprogramme 1
International trade, integration and infrastructure

- 21.212 The proposed regular budget resources for 2024 amount to \$3,209,600 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.46 and figure 21.XXXV.

Extrabudgetary resources

21.213 Extrabudgetary resources for the subprogramme amount to \$635,200. The resources would complement regular budget resources and would be used mainly to support regional, subregional and national capacity development, through applied research, policy proposals, technical assistance and training, and the promotion of policy dialogues. The subprogramme plans to focus on strengthening: (a) regional economic integration by enhancing supply chains to improve the region’s participation in global chains and reduce the dependency in strategic sectors such as manufacturing and retrofit of equipment for electromobility in public transportation, pharmaceutical products and medical equipment; and (b) countries’ capacities to address diverse challenges, such as digital trade and services, particularly for the internationalization of small and medium-sized enterprises and emerging issues such as circular economy and the linkages between trade infrastructure and climate change. The expected decrease of \$63,500 is attributable to the scheduled completion of a regional project on road safety.

**Subprogramme 2
Production and innovation**

21.214 The proposed regular budget resources for 2024 amount to \$2,612,400 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.47 and figure 21.XXXVI.

Extrabudgetary resources

21.215 Extrabudgetary resources for the subprogramme amount to \$973,500. The resources would complement regular budget resources and would be used mainly to promote innovative industrial policy advocacy and the exchange of experiences and best practices, technical assistance, and training with a focus on the role of the productive sectors in the transition towards a renewed model for inclusive and sustainable development. The subprogramme plans to mainly focus on supporting countries’ efforts to develop productive policies aimed at increasing productivity focusing on the regional digital markets, emerging issues such as circular economy, and the value added from services in the final industrial goods. The expected increase of \$45,900 is attributable mainly to a new planned regional project on digital economy.

Subprogramme 3 Macroeconomic policies and growth

21.216 The proposed regular budget resources for 2024 amount to \$4,495,700 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.48 and figure 21.XXXVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.217 Extrabudgetary resources for the subprogramme amount to \$605,000. The resources would complement regular budget resources and would be used mainly to support national capacity development, through applied research, policy proposals, technical assistance and training, and promotion of policy dialogues, particularly regarding the challenges derived from the pandemic-induced crisis and other external shocks in the realm of fiscal policy and financing for development. The work of the subprogramme is expected to focus on: (a) assisting policymakers in formulating sustainable fiscal policy frameworks

backstopped through the ramping up of domestic and international resource mobilization efforts through innovative financing schemes; and (b) promoting the role of development-centred macroeconomic and development financing policies to support efforts in the social and productive sectors for transformative recovery. The expected decrease of \$60,500 is attributable mainly to the scheduled completion of two multidivisional projects related to fiscal policies for sustainable development in middle-income countries and environmental taxation for sustainable cities.

Subprogramme 4 Social development and equality

21.218 The proposed regular budget resources for 2024 amount to \$1,967,700 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.49 and figure 21.XXXVIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.219 Extrabudgetary resources for the subprogramme amount to \$782,300. The resources would complement regular budget resources and would be used mainly to conduct applied research, deliver trainings and advisory services, develop and disseminate policy recommendations and promote policy dialogue to strengthen the capacity of stakeholders to perform sound diagnostic assessments of social issues for application in policy design and implementation. The work of the subprogramme is expected to focus on the need to establish universal, sustainable and resilient social protection systems, the linkages between social and labour inclusion policies and the contribution of social policies to promote a transformative recovery. The expected decrease of \$78,200 is attributable mainly to the scheduled completion of two regional projects related to social reforms in middle-income countries and social inclusion for sustainable cities.

**Subprogramme 5
Gender equality and women’s autonomy**

21.220 The proposed regular budget resources for 2024 amount to \$1,234,300 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.50 and figure 21.XXXIX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.221 Extrabudgetary resources for the subprogramme amount to \$912,300. The resources would complement regular budget resources and would be used mainly to carry out activities aimed at moving towards fairer care economies and societies, contributing with new evidence, analysis and policy dialogue towards a gender-sensitive transformative, sustainable and just economic recovery in Latin America and Caribbean countries. The subprogramme expects to produce knowledge on and expand the scope and improve the quality of data on gender statistics and indicators, providing technical assistance in developing policies to promote gender equality. Special attention would be granted to gender equality in the design of short- and long-term care, trade, fiscal and financial, digital, productive and cooperation policies, to the emerging challenges in the world of work for women’s economic autonomy and gender equality and to the challenge of addressing the critical question of how to promote women’s participation in economic recovery strategies that take into account climate change and sustainability challenges. The expected decrease of \$91,200 is mainly attributable to the scheduled completion of multidivisional projects in the area of advancement of women in middle-income countries and gender equality consideration for sustainable cities.

**Subprogramme 6
Population and development**

21.222 The proposed regular budget resources for 2024 amount to \$1,804,500 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.51 and figure 21.XL.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.223 Extrabudgetary resources for the subprogramme amount to \$288,300. The resources would complement regular budget resources and would be used mainly to provide technical assistance and training. The work of the subprogramme is expected to focus on: (a) developing national capacities and tools to identify those further behind, through subnational mapping, small area estimations and disaggregation of socioeconomic indicators; and (b) improving the use of census data, vital statistics and surveys through the generation of data and development of procedures, computer programs and information systems. The subprogramme would give special attention to enhancing the capacity of governments, as requested, to integrate population dynamics into the design of evidence-based public policies and sustainable development, considering structural dynamics in the region such as migration and the challenges of population ageing and inequalities affecting vulnerable groups. The expected decrease of \$23,300 is attributable mainly to the scheduled completion of a project related to demographic transition in the region.

Subprogramme 7 Sustainable development and human settlements

21.224 The proposed regular budget resources for 2024 amount to \$2,791,000 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.52 and figure 21.XLI.

Extrabudgetary resources

21.225 Extrabudgetary resources for the subprogramme amount to \$1,294,000. The resources would complement regular budget resources and would be used mainly to support national capacity development, through applied research, policy proposals, technical assistance and training, and promotion of policy dialogues. The work of the subprogramme is expected to focus on: (a) integrating sustainability criteria into public policies and making progress towards nationally determined contributions under the Paris Agreement; and (b) strengthening national capacities to

design and implement public policies for the sustainability of human settlements and enhancing regional cooperation in adapting to and mitigating the impact of climate change. Furthermore, in cooperation with other subprogrammes, special attention would be given to piloting the application of initiatives aimed at promoting the transition towards a renewed model for inclusive and sustainable development. The expected decrease of \$129,400 is attributable mainly to the scheduled completion of one regional project related to electromobility for sustainable cities.

Subprogramme 8 Natural resources

21.226 The proposed regular budget resources for 2024 amount to \$2,242,800 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.53 and figure 21.XLII.

Extrabudgetary resources

21.227 Extrabudgetary resources for the subprogramme amount to \$793,400. The resources would complement regular budget resources and would be used mainly to support national capacity development, through applied research, policy proposals, technical assistance and training, and the promotion of policy dialogues. The work of the subprogramme is expected to focus on: (a) fostering the sustainable energy transition and the sustainable management of the water cycle; (b) enhancing the governance of extractive resources; (c) increasing value addition in those activities and developing further linkages to the rest of the economy; (d) promoting the bioeconomy and the circular economy; and (e) strengthening regional cooperation in agricultural development and biodiversity. Furthermore, in cooperation with other subprogrammes, special attention would be given to promoting the transition towards a renewed model for inclusive and sustainable development. The expected decrease of \$79,400 is attributable mainly to the scheduled completion of one regional multidivisional project in the area of agriculture in middle-income countries and energy transition for sustainable cities.

Subprogramme 9

Planning and public management for development

21.228 The proposed regular budget resources for 2024 amount to \$1,239,800 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.54 and figure 21.XLIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

21.229 Extrabudgetary resources for the subprogramme amount to \$1,087,000. The resources would complement regular budget resources and would be used mainly to undertake applied research training and promotion of peer-to-peer learning and the sharing of experiences and good practices, in order to promote the application of new methodologies, instruments and conceptual frameworks for planning and public management by different levels of government. The subprogramme would grant special attention to the application of prospective approaches, e-government policies and national digital strategies, and to developing local leaderships and the coordination of national and subnational governments. The expected decrease of \$74,900 is attributable mainly to the scheduled completion of one project in the field of open government in the region.

**Subprogramme 10
Statistics**

21.230 The proposed regular budget resources for 2024 amount to \$2,947,200 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of proposed resources for 2024 are reflected in table 21.55 and figure 21.XLIV.

**Extrabudgetary resources**

- 21.231 Extrabudgetary resources for the subprogramme amount to \$389,300. The resources would complement regular budget resources and would be used mainly to provide specialized advisory services and online and on-site training, promote peer-to-peer learning and the sharing of experiences and good practices, and South-South cooperation. The work of the subprogramme is expected to focus on strengthening national capacities in the areas of basic economic statistics and price statistics, environmental statistics, climate change statistics and disaster risk reduction statistics. The subprogramme would grant special attention to: (a) strengthening the capacities of national statistical offices for the design, formulation and implementation of statistical geoportals that are able to administrate, integrate and visualize geospatially enabled statistical data; and (b) using geospatial statistical instruments, including in emerging sectors such as circular economy. The expected decrease of \$38,900 is attributable mainly to the scheduled completion of a regional multidivisional project related to geospatial statistics capacities to improve the decision-making process in middle-income countries.

Subprogramme 11 Subregional activities in Central America, Cuba, the Dominican Republic, Haiti and Mexico

21.232 The proposed regular budget resources for 2024 amount to \$5,212,000 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.56 and figure 21.XLV.

Extrabudgetary resources

21.233 Extrabudgetary resources for the subprogramme amount to \$976,900. The resources would complement regular budget resources and would be used mainly to support applied research, training and advisory services, policy recommendations and the promotion of policy dialogue to strengthen national capacities, with special emphasis in supporting countries in the transition towards a renewed model for inclusive and sustainable development and to protect public investments in infrastructure resilient to natural disasters and climate change. The expected decrease of \$97,700 is attributable

mainly to the scheduled completion in 2023 of projects related to agriculture development, particularly in rural development and resilient infrastructure investment.

Subprogramme 12 Subregional activities in the Caribbean

21.234 The proposed regular budget resources for 2024 amount to \$3,910,500 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.57 and figure 21.XLVI.

Extrabudgetary resources

21.235 Extrabudgetary resources for the subprogramme amount to \$261,100. The resources would complement regular budget resources and would be used mainly to undertake applied research and advisory services to strengthen the capacity of development practitioners and decision makers in designing and

implementing policies to reduce the impact of natural disasters and climate change and for the transition towards a renewed model for inclusive, sustainable and resilient development. The expected decrease of \$5,900 is attributable mainly to the scheduled completion in 2023 of one project on modernizing the statistical ecosystem through enhanced Sustainable Development Goal data development.

Subprogramme 13 Support for regional and subregional integration and cooperation processes and organizations

21.236 The proposed regular budget resources for 2024 amount to \$904,600 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.58 and figure 21.XLVII.

Programme support

21.237 The programme support component assists the implementation of the substantive programme of work of ECLAC in the ECLAC headquarters in Santiago; the two ECLAC subregional headquarters, in Mexico City, serving the Central American subregion, and in Port of Spain, serving the Caribbean region; ECLAC national offices in Buenos Aires, Brasília, Bogotá and Montevideo; and the ECLAC liaison office in Washington, D.C. Programme support activities include:

- (a) Conference services, for meetings of ECLAC intergovernmental bodies and special events;
- (b) Documentation and publication services, including editing and translation, text processing, printing and distribution of documents. Documentation and publication services also include planning and implementing the publications programme as well as establishing and updating guidelines for the preparation of documents and publications by ECLAC organizational units, taking into account United Nations practices;
- (c) Library services that provide access to resources and information services to both ECLAC staff members and external users. Library services include the publication of bulletins to promote relevant and timely resources, the coordination of capacity-building events, the digitization of content and the dissemination of information digitally to remote users. The ECLAC Library's Digital Repository collects, stores and makes accessible the official documentation produced by the Commission;
- (d) Technical cooperation, including the management of activities that complement those funded from the regular budget. This also includes the application of research findings to the provision of advisory services and training activities for the benefit of ECLAC member States;
- (e) Common services related to administration, human resources management, financial management, ICT services and general support.

21.238 The proposed regular budget resources for 2024 amount to \$19,453,800 and reflect a decrease of \$63,800 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 21.195 and 21.196 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 21.59 and figure 21.XLVIII.

Extrabudgetary resources

21.239 Extrabudgetary resources for the component amount to \$824,000. The resources would complement regular budget resources and would cover incremental indirect costs for programme support services incurred in supporting extrabudgetary activities, including management of technical cooperation, monitoring and evaluation, finance, human resources management, procurement, information technology and other miscellaneous services.

Annex I

Organizational structure and post distribution for 2024

Abbreviations: GS (OL), General Service (Other level); LL, Local level; NPO, National Professional Officer; RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.

^a Includes the Office of the Secretary of the Commission of the Economic Commission for Latin America and the Caribbean.

^b Includes the ECLAC Liaison Office in Washington, D.C., and the ECLAC National Offices in Buenos Aires, Bogotá, Brasília and Montevideo. Within these offices, seven RB posts (1 P-4, 2 P-3 and 4 GS (OL)) are part of subprogramme 1, and nine RB posts (2 P-5, 2 P-4, 1 P-3 and 4 LL) are part of subprogramme 3.

Office of Internal Oversight Services

[E/AC.51/2022/7](#)

Evaluation of the Economic Commission for Latin America and the Caribbean: subprogramme 3 – Macroeconomic policies and growth

Recommendation 1 (results B and D)

Within the context of its regional, subregional and transboundary mandate to support sustainable development, the Economic Development Division should put in place an improved mechanism to plan, coordinate and monitor more systematically its project-based technical cooperation and capacity-building work.

The Economic Development Division is working closely with resident coordinator offices, United Nations country teams and ECLAC subregional and national offices to increase the visibility of existing technical assistance projects and identify areas of potential synergies. This work is further benefited by the Division's active participation in issue-based coalitions. Work is ongoing to formalize a mechanism to centralize project-based information – which often follows very different reporting requirements for each project – in a central database. This work, coupled with the actions outlined for recommendation 2 below, will support the formulation of a strategy to identify and prioritize future technical cooperation activities, considering that the technical assistance delivered is upon request from member States.

Recommendation 2 (results A, B and C)

Within its regional, subregional and transboundary mandate, with a focus on promoting outreach and visibility, the Economic Development Division should undertake a review of its country-level activities and coverage to inform management actions and strategies.

The Economic Development Division is preparing a review of country-level activities, currently with a focus on technical assistance work as part of the development of a central project database. Further review of country-level analysis and work will also be conducted. A document will be prepared to present the findings of this review and identify next steps.

Recommendation 3 (result D)

Within the context of its regional, subregional and transboundary mandate and the United Nations reform implementation measures under way, the Economic Development Division should develop a detailed internal strategic plan and/or guiding principles to identify and articulate its related role and envisioned responsibilities.

The Economic Development Division continues to work closely with all partners as part of the reform of the United Nations development system. Efforts are ongoing to strengthen the regional economists' network and catalyse the potential of regional issue-based coalitions. The Division is carrying out a review of the elements identified by the Office of Internal Oversight Services as part of recommendation 3 with the aim of developing a document outlining potential measures that the Division can undertake within its mandates and in line with the programme of work of the Commission as adopted by the member States.

Foreword

As this proposed programme budget for 2024 is being considered, the Economic and Social Commission for Western Asia enters the sixth decade of its service to the peoples of the Arab region, peoples who aspire to live in just and thriving societies anchored in shared prosperity.

The potential for achieving this ambition is there, but many challenges, including climate change, limited economic diversification and high dependence on extractive industries, increased unemployment especially among the fast-growing youth populations, as well as conflict and occupation, to name only a few, continue to jeopardize progress against the national development targets set within the broader framework of the 2030 Agenda for Sustainable Development.

In 2024, the Economic and Social Commission for Western Asia (ESCWA) will continue to deploy its in-house expertise and know-how to provide its member States with relevant evidence and actionable policy options in support of decision-making, while fostering regional consensus and cooperation on transboundary issues. Technology- and artificial intelligence-enabled, contextualized, “on-demand” policy impact simulation tools remain pivotal in this regard and will be amplified by enhanced knowledge resources, accessible to broader audiences through the e-learning modality.

The proposed programme plan’s formulation was guided not only by the principle of “leaving no one behind”, but also with the aim to empower and enable all the peoples of the Arab region, including those in the most vulnerable situations, to contribute to shared development outcomes. Further investment in partnerships, including with civil society, academia and the private sector, is essential as ESCWA strives to ensure such a “whole of society” approach.

The 2024 ESCWA programme of work is backed by the strong commitment to effective delivery on the Commission’s mandate, while ensuring efficient use of resources in support of its objectives and member States’ priorities. To this effect, ESCWA programme managers embarked on a comprehensive spending review, to optimize their planned resource use; the outcome of this review is reflected in part B of the current proposal.

(Signed) Rola **Dashti**
Executive Secretary, Economic and Social Commission for Western Asia

A. Proposed programme plan for 2024 and programme performance for 2022

Overall orientation

Mandates and background

- 22.1 The Economic and Social Commission for Western Asia (ESCWA) is responsible for promoting inclusive and sustainable development in the Arab region. The mandate derives from the priorities established in relevant General Assembly and Economic and Social Council resolutions and decisions, including Council resolution 1818 (LV) establishing the Commission and resolution 1985/69 amending its terms of reference to emphasize its social functions. At the seventh special session of the Commission, held in December 2022, member States welcomed the request by Djibouti to join the Commission, and recommended to the Economic and Social Council that it accept the request. If endorsed by the Council, the membership of ESCWA will represent 21 out of the 22 member States of the League of Arab States (LAS).
- 22.2 Achieving all facets of sustainable development demands concerted efforts, underpinned by universal principles and evidence-based analysis, allowing for the enacting of short-, medium- and long-term solutions within national, regional and global trajectories. Although the Arab region holds all the human capital and resources vital for achieving shared prosperity and a dignified life for all its peoples, social, economic and environmental challenges and conflict continue to have an adverse impact on its progress towards the achievement of the 2030 Agenda for Sustainable Development. Within the mandates entrusted to it, ESCWA is uniquely positioned to support national and regional efforts in this regard, in particular through the collection of evidence, the convening of dialogue around key development issues, the provision of policy advice and the building of government capacities. The Commission remains committed to do so in coordination with relevant stakeholders, ensuring a whole-of-government and whole-of-society approach.

Strategy and external factors for 2024

- 22.3 In line with its mandate and to deliver on its commitment to member States, the Commission will focus on the following: promoting, brokering and advocating for viable development solutions in the Arab region, championing a regional perspective through a global lens; defining and tabling novel policy options; and facilitating peer-to-peer exchanges. It will harness modern technologies and good practices and leverage all available resources for more effective and efficient programme delivery, and elevate its expertise to anticipate and match stakeholders' needs to accelerate progress towards the 2030 Agenda. The Commission will focus on areas such as natural resource and transboundary water management and sustainability under changing climate conditions; the transition to new and renewable sources of energy and the circular economy; multidimensional poverty reduction and social protection; equitable and inclusive social development, with particular consideration of the needs of persons in vulnerable situations, such as women, young people, the elderly and persons with disabilities, and as part of the commitment to "leave no one behind"; equitable economic growth and prosperity supported by improved regional integration and opportunities for trade and small and medium-sized enterprises; innovative financing for development solutions; information technology and statistics as a means to improve the availability and accessibility of evidence, participation and inclusion; as well as governance, strengthening of public institutions and the assessment and mitigation of transboundary risks, including conflict.
- 22.4 ESCWA will also ensure that the diverse and specific development needs of least developed and middle-income countries and countries in conflict are appropriately considered and addressed, including by supporting five Arab least developed countries, members of ESCWA, in meeting the commitments of the Doha Programme of Action for the Least Developed Countries for the Decade 2022–2031.

- 22.5 As part of its concerted efforts in support of member States' achieving the Sustainable Development Goals, the Commission will continue to analyse trends and generate and disseminate knowledge, good practices and data related to a variety of sustainable development issues. It will further enhance and consolidate its suite of interactive, artificial intelligence- and technology-based modelling tools, which will enable government officials, policymakers, experts and practitioners, as well as the private sector and civil societies at large, to utilize data in new and more intelligent ways, such as simulation models and tailored-to-context policy options with impact forecasting for informed decision-making.
- 22.6 ESCWA will also continue to leverage its convening role to serve as a regional forum for setting norms and building consensus at the sub-, intra- and interregional levels, in particular, to promote durable solutions for transboundary issues that impede the progress of individual member States towards the achievement of the 2030 Agenda. It will also promote South-South and triangular cooperation and act as an active advocate for the needs and priorities of the Arab region at the global level.
- 22.7 With regard to cooperation with other entities, the Commission will continue to consolidate its strategic partnerships at the global, interregional, regional, national and local levels to deliver results. At the core of this enhanced approach to partnerships is the understanding that no development intervention can succeed in a silo. Against this backdrop, further investments will be made in strategic engagement with intergovernmental organizations, such as LAS or the Organisation for Economic Co-operation and Development (OECD)/Development Assistance Committee; international financial institutions, for example the Islamic Development Bank; academia and think tanks, through the established Academic Network for Development Dialogue platform; civil society organizations; and the private sector, so as to create maximum synergy and coherence and to ensure that no one is left behind. In addition, new opportunities and initiatives will be pursued with existing and potential partners to expand the range of services and support available to member States, in particular by securing access to innovation and new technologies, knowledge, data and expertise, as well as financing.
- 22.8 With regard to inter-agency coordination and liaison, ESCWA will continue to play a lead role in the Arab region in implementing the Secretary-General's reform agenda, as approved by the General Assembly in its resolution [72/279](#). In this context, the Commission will further strengthen its cooperation and coordination with the World Bank, the International Monetary Fund, the World Trade Organization, the United Nations Conference on Trade and Development (UNCTAD) and the United Nations Industrial Development Organization, among others. It will continue to work closely with the United Nations Development Coordination Office and Resident Coordinator Offices of the United Nations and through the regional collaborative platform in the Arab region to support common country assessments and to ensure greater complementarity and synergy of its own projects with those implemented by the United Nations country teams as part of the United Nations Sustainable Development Cooperation Frameworks.
- 22.9 With regard to external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) The national and regional development and political landscapes remain conducive for ESCWA to provide integrated policy advice and technical support and to build member States' capacities;
 - (b) Arab member States, and Member States at large, remain committed to sub-, inter- and intraregional collaboration on transboundary issues;
 - (c) Development partners remain engaged and interested in joint initiatives and projects in support of member States and sustainable development solutions.
- 22.10 ESCWA will continue to integrate a gender perspective in its activities, deliverables and results, by supporting member States in developing inclusive, gender-sensitive policy frameworks aimed at tackling a wide range of social and economic issues for women's empowerment, as outlined in

result 3 under subprogramme 2 and result 2 under subprogramme 3. In addition to generating the required evidence and ongoing advocacy, the Commission will continue to build the capacity of national actors and promote peer-to-peer learning on gender justice, population and inclusive development, as part of the global accountability framework for gender equality, in line with Economic and Social Council resolution [2013/16](#).

- 22.11 In line with the United Nations Disability Inclusion Strategy, the Commission will continue to intensify its efforts to advance the inclusion of the needs of persons with disabilities in its programmes, working, inter alia, towards enhancing their access to labour markets and basic services. It will also continue to engage with government representatives through the established Intersessional Group of Experts on Disability as part of its efforts to foster policy discussions, peer-to-peer learning and cooperation for achieving greater disability inclusion.
- 22.12 ESCWA remains committed to advocacy for a greater empowerment and addressing the unique concerns and needs of young people and the elderly, as vital conditions for a successful and inclusive socioeconomic development of the Arab region; as outlined in results 1 and 3 under subprogramme 2.

Impact of the pandemic and lessons learned

- 22.13 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 did not have a significant impact on the implementation of mandates and did not result in the need to reprogramme planned ESCWA activities for 2022. The lifting of travel restrictions allowed ESCWA to resume in-person engagements, which have proved much more effective for the transfer of knowledge, capacity-building as well as advocacy and consensus-building at the regional level, and peer-to-peer learning. While these activities had not ceased during the pandemic, online modalities of their delivery had proved less effective.
- 22.14 In addition, in order to support member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, ESCWA ensured that considerations and support to member States related to socioeconomic recovery from the pandemic continued to be mainstreamed into the Commission's overall programme of work and used as anchors and opportunities for contextualized support with the aim of accelerating progress against national Sustainable Development Goals targets and emerging, post-pandemic priorities linked to the Goals. For example, as indicated in result 1 under subprogramme 5, ESCWA engaged with member States to promote a closer alignment between national Sustainable Development Goals agendas and recovery and post-COVID-19 development planning.
- 22.15 The Commission continues to mainstream lessons learned and good practices related to the adjustments to and adaptation of the programme, both substantively and with respect to modalities of delivery, owing to the COVID-19 pandemic. For instance, the use of modern technologies during the pandemic allowed ESCWA to maintain engagement and dialogue with member States and other relevant stakeholders. ESCWA will further invest in the use of modern technologies, where appropriate, to complement more traditional methods of programme delivery with the aim of further broadening the range of stakeholders partaking in its consultative processes and promoting a whole-of-society approach to development. On the basis of the positive feedback from end users, also in the context of effective programme delivery during the pandemic, ESCWA will place greater emphasis on anticipatory analysis of trends and of related policy advice needs of its member States and address them proactively through the production and dissemination of timely, contextualized and concise knowledge products, such as policy briefs and technical materials. It will also further consolidate and develop additional interactive, artificial intelligence-enabled policy simulation tools, which when paired with capacity-building, will continue to boost the ability of policy- and decision-makers to generate "on demand", customized policy scenarios and alternatives.

Legislative mandates

22.16 The list below provides all mandates entrusted to the programme:

General Assembly resolutions

68/196	United Nations Guiding Principles on Alternative Development	74/230	Culture and sustainable development
68/211	International Strategy for Disaster Reduction	75/4	Special session of the General Assembly in response to the coronavirus disease (COVID-19) pandemic
69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations	76/258	Doha Programme of Action for the Least Developed Countries
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development	77/156	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	77/162	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development	77/183	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	77/185	South-South cooperation

Economic and Social Council resolutions

1818 (LV)	Establishment of an Economic Commission for Western Asia	2016/10	Economic and Social Commission for Western Asia strategy and plan of action on the 2030 Agenda for Sustainable Development
1985/69	Amendment of the terms of reference of the Economic Commission for Western Asia: change of name of the Commission	2017/7	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development
2011/5	The role of the United Nations system in implementing the internationally agreed goals and commitments in regard to gender equality and the empowerment of women	2020/5	Strengthening coordination of the statistical programmes in the United Nations system
2014/36	Redesignation of the Technical Committee of the Economic and Social Commission for Western Asia as the Executive Committee and amendment of its terms of reference	2020/23	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
2015/10	2020 World Population and Housing Census Programme	2021/3	New strategic vision of the Economic and Social Commission for Western Asia
		2022/23	Situation of and assistance to Palestinian women

Economic and Social Commission for Western Asia ministerial declarations and resolutions

Tunis Declaration on Social Justice in the Arab Region (2014)	334 (XXX)	Adoption of the reports of the subsidiary bodies of the Economic and Social Commission for Western Asia
Doha Declaration on the Implementation of the 2030 Agenda for Sustainable Development (2016)		
Beirut Consensus on Technology for Sustainable Development in the Arab Region (2018)	335 (S-VI)	Programme Plan for the Economic and Social Commission for Western Asia for 2021
Arab Declaration on Progress in Implementation of the Beijing Declaration and Platform for Action after 25 Years (2019)	337 (S-VII)	Request from Djibouti for membership of the Economic and Social Commission for Western Asia
286 (XXV) Gender statistics for equality and empowerment of women	340 (S-VII)	Proposed programme plan for the Economic and Social Commission for Western Asia for 2024
296 (XXVI) Enhancing public sector institutions and resources to attain national development goals	341 (S-VII)	Adoption of the session reports of subsidiary bodies of the Economic and Social Commission for Western Asia
331 (XXX) Comprehensive approaches to technical cooperation in response to member States' emerging needs		

**Subprogramme 1
Climate change and natural resource sustainability**

General Assembly resolutions

71/222	International Decade for Action, “Water for Sustainable Development,” 2018–2028	75/219; 77/167	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
72/178	The human rights to safe drinking water and sanitation	75/222	Combating sand and dust storms
72/242	Impact of rapid technological change on the achievement of the Sustainable Development Goals	75/235	Agriculture development, food security and nutrition
73/226	Midterm comprehensive review of the implementation of the International Decade for Action “Water for Sustainable Development”, 2018–2028	75/271	Nature knows no borders: transboundary cooperation – a key factor for biodiversity conservation, restoration and sustainable use
74/215	Agricultural technology for sustainable development	75/280	International meeting entitled “Stockholm+50: a healthy planet for the prosperity of all – our responsibility, our opportunity”
75/179	The right to food	77/164	Disaster risk reduction
75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development,” 2018–2028	77/165	Protection of global climate for present and future generations of humankind
75/218; 77/166	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa	77/170	Ensuring access to affordable, reliable, sustainable and modern energy for all

Economic and Social Commission for Western Asia resolutions

281 (XXV)	Addressing climate change issues in the Arab region	329 (XXX)	Establishment of the Arab centre for climate change policies in the Arab region
305 (XXVII)	Sustainable development in the region and follow-up and implementation of the decisions of the Rio+20 Conference	339 (S-VII)	Establishment of a centre for advancing carbon emissions reduction under the Commission

United Nations Environment Assembly of the United Nations Environment Programme

5/11	Enhancing circular economy as a contribution to achieving sustainable consumption and production

**Subprogramme 2
Gender justice, population and inclusive development**

General Assembly resolutions

66/130	Women and political participation	69/236	World Survey on the Role of Women in Development
66/131	Convention on the Elimination of All Forms of Discrimination against Women	71/256	New Urban Agenda
68/143	Assistance to refugees, returnees and displaced persons in Africa	73/195	Global Compact for Safe, Orderly and Regular Migration
68/181	Promotion of the Declaration on the Right and Responsibility of Individuals, Groups and Organs of Society to Promote and Protect Universally Recognized Human rights and Fundamental Freedoms: protecting women human rights defenders	74/120	Promoting social integration through social inclusion
68/191	Taking action against gender-related killing of women and girls	74/121	Policies and programmes involving youth
		74/126	Improvement of the situation of women and girls in rural areas
		74/127	Violence against women migrant workers

Section 22 Economic and social development in Western Asia

74/128	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	75/161	Intensification of efforts to prevent and eliminate all forms of violence against women and girls
74/134	The girl child	77/176	International migration and development
74/144	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: accessibility	77/179	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
74/148	Protection of migrants	77/181	Women in development
74/253	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system	77/188	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
		77/190	Follow-up to the Second World Assembly on Ageing

Security Council resolutions

1325 (2000) 2535 (2020)

Economic and Social Council resolutions

2014/5	Promoting empowerment of people in achieving poverty eradication, social integration and full employment and decent work for all	2019/6	Addressing inequalities and challenges to social inclusion through fiscal, wage and social protection policies
2015/21	Taking action against gender-related killing of women and girls	2020/15	Multi-year programme of work of the Commission on the Status of Women
2017/12	Promoting the rights of persons with disabilities and strengthening the mainstreaming of disability in the implementation of the 2030 Agenda for Sustainable Development	2021/7	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
		2021/8	Future organization and methods of work of the Commission for Social Development

Economic and Social Commission for Western Asia declarations and resolutions

Muscat Declaration: Towards the Achievement of Gender Justice in the Arab Region (2016)	304 (XXVII)	The role of participation and social justice in achieving sustainable development
Arab Declaration on Progress in the Implementation of the Beijing Declaration and Platform for Action after 25 years (2019)		

**Subprogramme 3
Shared economic prosperity***General Assembly resolutions*

69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	77/151	International trade and development
72/212	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals	77/152	International financial system and development
74/205	Financial inclusion for sustainable development	77/153	External debt sustainability and development
74/231	Development cooperation with middle-income countries	77/154	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development
74/299	Improving global road safety	77/174	Towards a New International Economic Order
75/182	The right to development	77/175	Role of the United Nations in promoting development in the context of globalization and interdependence

Economic and Social Commission for Western Asia resolutions

214 (XIX)	Establishment of a technical committee on liberalization of foreign trade and economic globalization in the countries of the ESCWA region	332 (XXX)	Developing the work of the Technical Committee on Liberalization of Foreign Trade, Economic Globalization and Financing for Development
303 (XXVII)	Towards enhancing the macroeconomic policy in ESCWA member countries	338 (S-VII)	Establishment of an Arab integrated road safety observatory
308 (XXVII)	The regional dimension of development		
313 (XXVII)	Frequency of sessions of the Technical Committee on Liberalization of Foreign Trade, Economic Globalization and Financing for Development in the Countries of the ESCWA Region		

**Subprogramme 4
Statistics, the information society and technology**

General Assembly resolutions

68/261	Fundamental Principles of Official Statistics	74/229	Science, technology and innovation for sustainable development
70/125	Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society	75/316	Impact of rapid technological change on the achievement of the Sustainable Development Goals and targets

292 (XXVI)	Upgrading the Section for Emerging and Conflict-Related Issues to the level of a division and establishing a governmental	Support for the Palestinian people Justice for the Palestinian people: fifty years of Israeli occupation

Deliverables

22.17 Table 22.1 lists all cross-cutting deliverables of the programme.

Table 22.1
Cross-cutting deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	9	10	12	10
1. Reports for the ESCWA ministerial session (special session)	1	10	–	–
2. Reports for the Executive Committee	8	–	12	10
Substantive services for meetings (number of three-hour meetings)	16	13	17	15
Meetings of:				
3. The ESCWA ministerial session (special session)	–	4	–	–
4. The Executive Committee	6	–	8	6
5. The ESCWA Advisory Committee	3	2	2	2
6. The Committee for Programme and Coordination	1	1	1	1
7. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
8. The Fifth Committee	1	1	1	1
9. The Regional collaborative platform	4	4	4	4
B. Generation and transfer of knowledge				
Publications (number of publications)	1	1	2	1
10. ESCWA annual report	1	–	1	1
11. Arab Vision 2045	–	1	–	–
12. Performance of the United Nations development system in the Arab region	–	–	1	–
C. Substantive deliverables				
Databases and substantive digital materials: Manara (knowledge platform providing artificial intelligence-enabled public access to all United Nations knowledge resources, tools and analysis for improved decision-making), ESCWA Learn (a global and innovative learning platform to provide training and knowledge and increase capabilities and skills).				
D. Communication deliverables				
Outreach programmes, special events and information materials: newsletters; celebration of special international days and weeks, such as International Women’s Day, International Day of Persons with Disabilities and World Environmental Day; brochures, leaflets, posters and other promotional material on ESCWA activities; briefings, lectures and awareness-raising activities with schools, universities and visitors on the work of the United Nations and ESCWA; ESCWA Stories, a comic book for children on the 2030 Agenda and accompanying outreach programme.				
External and media relations: press conferences, interviews and briefings by the Executive Secretary and other senior officials and for the launch of flagship publications and events; ESCWA live television broadcasting services; press releases and media coverage on ESCWA activities and meetings.				
Digital platforms and multimedia content: videos and other visual content on ESCWA activities and daily ESCWA news on the ESCWA website and social media accounts; ESCWApod (podcast series).				

Evaluation activities

- 22.18 The following evaluations completed in 2022 have guided the proposed programme plan for 2024:
- (a) Office of Internal Oversight Services (OIOS) evaluation of subprogramme 3: shared economic prosperity;
 - (b) Two thematic evaluations conducted by ESCWA of: (i) the ESCWA e-learning portfolio; and (ii) the Commission’s approaches to supporting and influencing policymaking at the national and regional levels (phase II).

- 22.19 The results and lessons of the evaluations referenced above have been taken into account for the programme plan for 2024. For example, the evaluation of the e-learning portfolio informed its ongoing enhancement to match the substantive demand by civil servants in member States and the optimization of the modes of delivery. Going forward, e-learning has been adopted as an efficient and effective means of building capacity, which makes it possible on the one hand to reach broader audiences and on the other hand to prepare target audiences for more focused capacity-building activities. Phase II of the evaluation of ESCWA approaches to policy influence resulted in the development and roll-out of hands-on internal guidance on good practices in knowledge production and dissemination, as well as capacity-building and consensus-building activities for more concrete policy results in the region. In addition, ESCWA has been working on addressing the recommendations of OIOS developed in connection with the evaluation of its subprogramme 3: shared economic prosperity, in particular those referring to enhanced communication with member States and partners on ongoing programmes and services provided.
- 22.20 The following evaluations are planned for 2024:
- (a) Thematic evaluation conducted by the entity of ESCWA communication function;
 - (b) Thematic evaluation conducted by the entity of one additional area of the Commission's work.

Programme of work

Subprogramme 1

Climate change and natural resource sustainability

Objective

- 22.21 The objective, to which this subprogramme contributes, is to advance climate action and integrated and sustainable policies in the areas of water, energy and food security.

Strategy

- 22.22 To contribute to the objective, the subprogramme will:
- (a) Deploy in-house expertise and, where relevant, collaborate with experts to assess the impact of and analyse trends, challenges and opportunities, and subsequently disseminate science-based knowledge products pertaining, but not limited, to issues such as transboundary management of water resources; extractive industries and transition to cleaner energy, also as means of economic diversification; sustainable production and consumption; climate action and climate adaptation, including pathways to reducing climate vulnerability and innovative and accessible solutions for financing climate- and resilience-related interventions; and developing interactive, data-driven, modelling platforms;
 - (b) Provide technical and policy advice and expertise to member States and build human and institutional capacities at the national and local levels to use the knowledge, as well as evidence and tools to identify and operationalize immediate, medium- and long-term solutions; mainstream climate- and natural resource management-related considerations into national development plans and budgets; and identify opportunities for financing climate change action and adaptation;
 - (c) Convene intergovernmental platforms and technical bodies to facilitate cross-sectoral dialogue and peer-to-peer exchanges between policymakers and practitioners, experts, civil society and other development partners from within and outside the Arab region with the aim of promoting sub-, intra- and interregional cooperation and coordination, and of fostering consensus on priorities and actions, towards the development of national, transboundary and regional normative frameworks that will support and promote: (i) the sustainable management of water

and other natural resources; (ii) sustainable production and consumption pathways; (iii) improved access to affordable, reliable and sustainable sources of energy; and (iv) improved resilience of individuals and livelihoods, all in the context of climate change and required adaptation;

- (d) Advocate with national Governments, regional intergovernmental bodies and other relevant stakeholders, including through supporting integrated, regional reporting and monitoring of the progress against specific Sustainable Development Goal targets, for a greater uptake of identified solutions; and leverage existing and build new partnerships in support of implementing such commitments and securing the necessary resources;
- (e) Through the newly established centre for advancing carbon emissions reduction, foster opportunities for regional collaboration to accelerate the reduction of emissions and facilitate the implementation of the circular carbon economy as a key component for addressing carbon emission management towards more sustainable and equitable development.¹

22.23 The above-mentioned work is expected to result in:

- (a) The adoption by member States of national policy frameworks and regional agreements related to climate action and adaptation, allowing for: (a) greater access to climate finance; (b) surface and groundwater resource management; (c) the transition to sustainable energy and the circular economy; (d) resilient food systems supported by sustainable agriculture; and (e) reduced emissions;
- (b) Strengthened sub- and intraregional cooperation on issues outlined in paragraph 22.22, supported by inclusive networks and participatory coordination mechanisms and platforms.

Programme performance in 2022

Arab member States pitch investable proposals for climate action financing

22.24 There is a shortfall of climate finance in the Arab region. In response, the subprogramme led the first ever Arab regional forum on climate initiatives to finance climate action and the Sustainable Development Goals. The event, hosted by ESCWA, aimed to support its member States in leveraging financial support for climate action, particularly for improved availability of water, energy and food under changing climate conditions. The forum enabled member States to engage with a broad set of donors and investors from the public and private sectors, articulate their financing needs and seek feedback on planned projects. In addition, to assist with identifying opportunities for private sector investment, blended finance and bilateral support, the subprogramme supported seven Arab countries (Algeria, Egypt, Iraq, Jordan, Lebanon, Oman and Tunisia) with the preparation of 26 investable projects, on the basis of country-driven priorities. The proposals focused on climate change adaptation in the areas of water supply and sanitation, flood control, irrigation management, agricultural resilience and forests and coastline management, as well as climate change mitigation through new and renewable sources of energy, energy efficiency, transport and co-benefits. Furthermore, to foster understanding among national stakeholders, further inform climate finance dialogues and support access to and the mobilization of climate finance for its member States, ESCWA published a policy brief highlighting climate finance flows and needs in the Arab region and contributed to the development of the Arab States Climate Finance Access and Mobilization Strategy 2022–2030, as well as its annex, the technical assessment of climate finance in the Arab States.

22.25 Progress towards the objective is presented in the performance measure below (see table 22.2).

¹ See ESCWA resolution 339 (S-VII), on the establishment of a centre for advancing carbon emissions reduction under the Commission.

Table 22.2
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Identification of the shortfall in financing as a key factor impeding progress on climate action	Member States have access to the technical assessment of climate finance	7 member States (Algeria, Egypt, Iraq, Jordan, Lebanon, Oman and Tunisia) developed and presented 26 climate change finance projects to potential investors

Planned results for 2024

Result 1: improved groundwater management in transboundary settings under the changing climate

Programme performance in 2022 and target for 2024

- 22.26 The subprogramme’s work contributed to five member States (Algeria, Jordan, Libya, the State of Palestine and Tunisia) recognizing the importance of transboundary groundwater for securing their medium- to long-term freshwater needs, which met the planned target.
- 22.27 In addition, the subprogramme’s work contributed to 12 member States (Iraq, Jordan, Kuwait, Lebanon, Morocco, Oman, Qatar, Saudi Arabia, the State of Palestine, the Sudan, the Syrian Arab Republic and Yemen) having access to a regional digital database on groundwater resources, which exceeded the planned target of 10 member States.
- 22.28 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 22.3).

Table 22.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
A diverse range of stakeholders benefited from webinars on groundwater-related topics, structured around shared priority concerns and addressing knowledge gaps	2 member States (Iraq and Mauritania) joined transboundary water cooperation arrangements	5 member States (Algeria, Jordan, Libya, the State of Palestine and Tunisia) recognized the importance of transboundary groundwater for securing their medium- to long-term freshwater needs	At least 2 member States develop arrangements to address transboundary groundwater challenges within the context of climate change	At least 1 additional member State develops arrangements to address transboundary groundwater challenges within the context of climate change
Regional guidelines for improved groundwater abstraction and management, vetted by at least 5 member States	4 member States (Iraq, Jordan, Kuwait and the State of Palestine) conducted an assessment of climate change impact on their	12 member States (Iraq, Jordan, Kuwait, Lebanon, Morocco, Oman, Qatar, Saudi Arabia, the State of Palestine, the Sudan, the Syrian Arab Republic and	At least 5 member States contribute data for the regional digital database on groundwater resources	At least 3 additional member States contribute data for the regional digital database on groundwater resources

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
	groundwater resources	Yemen) acknowledged and benefited from the launch of a regional digital database on groundwater resources		

Result 2: increased use of regional knowledge platforms for informed climate action

Programme performance in 2022 and target for 2024

- 22.29 The subprogramme’s work contributed to 32,453 visits to the regional knowledge platforms and 7,904 downloads, which exceeded the planned target of 28,500 visits, but did not meet the target of 26,000 downloads. The target was not met owing to maintenance and overhaul work being conducted, which prevented downloads during part of the reporting period.
- 22.30 Progress towards the objective and target for 2024 are presented in the performance measure below (see figure 22.I).

Figure 22.I
Performance measure: number of visits to the regional knowledge platforms and number of downloads (annual)

Result 3: sustainable transition to new and renewable sources of energy underpinned by a transformed extractive industries sector

Proposed programme plan for 2024

- 22.31 Extractive industries underpin economic development for many countries in the Arab region; yet, in the context of rapidly changing climate and the urgent need to adapt, the sector’s transformation is critical and, if approached strategically, can play a key role in achieving the 2030 Agenda for Sustainable Development. Recognizing the importance of the issue, in 2021, member States established the regional group of experts on extractive industries, a platform aimed at fostering regional consensus in the context of the global conversation on extractive industries.

Lessons learned and planned change

- 22.32 The lesson for the subprogramme was that a holistic approach that considers the distinct needs of resource-rich developing countries in the region and, at the same time, enables greater long-term diversification and targeted support to people in vulnerable situations, including women, indigenous communities, young people and those who will be initially affected by the transition, is required, in order to foster the desired transformation of the extractive industries sector in the Arab region. In applying the lesson, the subprogramme will leverage the group of experts to foster inclusive, multi-stakeholder policy dialogue and information exchange and to ensure that regional- and national-level initiatives support, enhance and fill the gaps in ongoing efforts to transform extractive industries globally. Concurrently, the subprogramme will engage with member States to identify and utilize opportunities for capacity-building, foster partnerships and coordinate interventions and resources in line with “net-zero emission” targets, enabling a just, inclusive, equitable and secure energy transition.
- 22.33 Expected progress towards the objective is presented in the performance measure below (table 22.4).

Table 22.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Regional group of experts on extractive industries established	Member States have access to information on extractive industries in the Arab region Strategic framework and road map for enabling a just, inclusive, equitable and secure transition of the energy sector, on the basis of the circular carbon economy framework, is developed for one member State (Kuwait)	Member States have access to a suite of knowledge products and evidence on key pillars of the extractive industries sector and pathways to transition to sustainable energy systems Member States utilize the group of experts to exchange expertise and good practices, and coordinate national actions at the regional level	Member States formulate national policy frameworks in support of transforming extractive energy sector towards a transition to affordable, reliable, sustainable and modern, energy systems

Deliverables

- 22.34 Table 22.5 lists all deliverables of the subprogramme.

Table 22.5

--------------------------	------------------------	-----------------------	------------------------	------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: briefs, fact sheets and booklets on climate change, digital and sustainable technologies, water security, resilient food systems, good agriculture practices, food security, sustainable energy, extractive industries and emissions reduction, as well as other related issues; side events during the sessions of conferences and committees, as well as global and regional events; and webinars for at least 2,000 regional stakeholders.

Subprogramme 2 Gender justice, population and inclusive development

Objective

- 22.35 The objective, to which this subprogramme contributes, is to achieve equitable and inclusive social development and reduced inequality, poverty and unemployment in line with the principle of leaving no one behind.

Strategy

- 22.36 To contribute to the objective, the subprogramme will:
- (a) Develop knowledge products and policy recommendations, underpinned by an analysis of trends, challenges and opportunities, as well as international norms and standards, on a wide range of issues pertaining, but not limited, to the following: social inclusion and protection; social and gender justice; reduction of multidimensional poverty and unemployment; and socioeconomic participation and the empowerment of women, young people, the elderly, persons with disabilities and other groups in vulnerable situations, as a key pillar of inclusive and sustainable development;
 - (b) Provide technical and policy advice and expertise to member States and build national and local, human and institutional capacities to assess existing policy frameworks and social protection systems, to identify and operationalize viable legislation and solutions and to mainstream into national development plans and budgets considerations related to the greater inclusion and equal participation, the protection and the specific needs of those in vulnerable situations;
 - (c) Enhance the existing methodology for analysis of multidimensional poverty and of the impact of shocks on inclusive development trajectories; and further develop interactive, intelligent, data-driven tools to facilitate policymaking, in particular with respect to unemployment and labour markets;
 - (d) Engage member States and relevant stakeholders and development partners in dialogue and exchange of good practices, including by promoting South-South collaboration and peer learning, on issues such as migration, social protection and inclusion, and rights and social and economic empowerment of women, young people and persons with disabilities.
- 22.37 The above-mentioned work is expected to result in:
- (a) National policy frameworks developed and implemented by member States on various topics, including social protection systems, poverty alleviation, employment and labour markets, aimed at reduced structural inequalities and greater inclusion and socioeconomic empowerment and participation, while addressing the specific needs of women, young people, the elderly, persons with disabilities, migrants and other groups in vulnerable situations;

- (b) Enhanced coverage of peoples of the Arab region, and in particular persons in vulnerable situations, by social protection systems, and their improved access to employment opportunities.

Programme performance in 2022

Common ground and strengthened dialogue for improved national migration policies

- 22.38 The Global Compact for Safe, Orderly and Regular Migration mandated the United Nations regional commissions to support the follow-up and review process to ensure progress towards achieving the set objectives. In this context, the subprogramme and its partners led the first regional review of the Global Compact (2020–2021), including the development of its methodology, which was endorsed by member States, and the provision of technical support to member States. The applied whole-of-government and whole-of-society approach, which brought together government officials, trade unions and migrant representatives, enabled the identification of national challenges and potential ways forward to tackle migration issues. Subsequently, the subprogramme facilitated a regional dialogue and peer-to-peer exchanges to promote regional, intraregional and cross-border collaboration between concerned countries. In 2022, together with partners, the subprogramme facilitated the articulation of common concerns and positions by Arab member States ahead of the International Migration Review Forum and an interregional dialogue between African and Arab States in relation to the existing migration corridors between the two regions, focused on identifying possible solutions and areas for collaboration. It also joined other regional commissions in exploring the means to accelerate the implementation of the Global Compact at the regional level.
- 22.39 Progress towards the objective is presented in the performance measure below (see table 22.6).

Table 22.6

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Arab member States agreed on methodology for national reviews against the Global Compact for Safe, Orderly and Regular Migration	11 member States (Bahrain, Egypt, Iraq, Jordan, Kuwait, Libya, Mauritania, Morocco, Qatar, the Sudan and Tunisia) completed their first national migration reviews	Arab member States developed a common position by which they commit to ensuring safe, orderly and regular migration for everyone, ahead of the International Migration Review Forum
	First regional migration review completed	Strengthened dialogue and cross-border collaboration on migration between Member States in Africa and the Arab region

Planned results for 2024

Result 1: accelerated coherent ageing policies in the Arab region

Programme performance in 2022 and planned target for 2024

- 22.40 The subprogramme's work contributed to three additional policies having been developed in the Arab region (Iraq, the Sudan and the Syrian Arab Republic), which exceeded the planned target of two additional policies.
- 22.41 Progress towards the objective and target for 2024 are presented in the performance measure below (see figure 22.II).

Figure 22.II
Performance measure: number of Arab countries with coherent ageing policies (cumulative)

Result 2: increased effectiveness and efficiency of social protection systems in the Arab region

Programme performance in 2022 and planned target for 2024

- 22.42 The subprogramme’s work contributed to civil servants and social assistance professionals from three member States (Egypt, Jordan and Mauritania) having been trained on the social protection programme rapid assessment framework tool to increase the inclusiveness of social protection systems, which met the planned target.
- 22.43 In addition, the subprogramme’s work contributed to two member States (Egypt and Jordan) identifying enhancements required to improve the efficiency and effectiveness of their social protection systems, which met the planned target.
- 22.44 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 22.7).

Table 22.7
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
During COVID-19, at least eight member States (Egypt, Jordan, Mauritania, Morocco, Oman, State of Palestine, the Sudan and Tunisia) rapidly channelled additional assistance to households covered by social insurance and social assistance and set up temporary emergency programmes directed at informal workers who were covered neither by social	179 people (66 men and 113 women) from 17 member States trained on tools to increase inclusiveness of social protection systems 1 member State (Jordan) analysed the inclusiveness of its social protection systems	Civil servants and social assistance professionals from 3 member States (Egypt, Jordan and Mauritania) trained on the social protection programme rapid assessment framework tool to increase inclusiveness of social protection systems 2 member States (Egypt and Jordan)	2 additional member States identify enhancements required to improve the efficiency and effectiveness of their social protection systems	2 member States adopt measures to enhance the efficiency and effectiveness of their social protection systems

assistance nor social insurance		identified enhancements required to improve the efficiency and effectiveness of their social protection systems, in particular those related to effective coverage of currently excluded groups		

Result 3: skills-focused approaches to boost access to employment opportunities

Proposed programme plan for 2024

22.45 The COVID-19 pandemic compounded the issue of unemployment in the Arab region, where, as of 2022, nearly 15.3 million individuals remained without jobs, putting additional pressure on policymakers to develop immediate, medium- and long-term solutions to address the stagnant labour force participation and ensure sustainable and inclusive employment creation. The subprogramme examined the underlying causes of the persisting lack of employment opportunities in Arab economies, while focusing on the mismatch of skills as a key factor. In this context, the Commission developed an interactive tool – Skills Monitor – which tracks labour market needs and skills deficits in the region and supports the development of targeted national labour market policies, by providing information on required upskilling, reskilling and skills diversification.

Lessons learned and planned change

22.46 The lesson for the subprogramme was that an early, commensurate action by Governments, academic institutions and concerned individuals requires an anticipatory analysis of changes in skill sets, including skills driven by the fourth industrial revolution, and unexpected shocks such as the COVID-19 pandemic. In applying the lesson, the subprogramme will further enhance its artificial intelligence-based Skills Monitor tool with the aim of enabling Arab policymakers to monitor skills that are “in demand”, evaluate factors and shocks affecting the evolution of the job market and design relevant policy frameworks. The tool, which will be enhanced to capture implicit and explicit gender bias in the job market, will also be made available to Arab universities in support of decision-making on curricula offered, in order to better prepare individuals for the requirements of the labour market.

22.47 Expected progress towards the objective is presented in the performance measure below (see table 22.8).

Table 22.8
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	Prototype of the artificial intelligence-based skills-to-jobs matching portal is piloted by 1 member State (Qatar)	Working-age populations in 4 member States (Jordan, Kuwait, Lebanon and Qatar) were able to identify job	Arab policymakers have access to evidence on factors affecting the job market (skill sets in demand, inclusiveness)	At least 10 academic institutions in the Arab region utilize the Skills Monitor as part of their career-planning support to graduates

Deliverables

22.48 Table 22.9 lists all deliverables of the subprogramme.

Table 22.9

Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	–	13	–
1. Documents for the Committee on Women	2	–	7	–
2. Documents for the Committee on Social Development	2	–	6	–
Substantive services for meetings (number of three-hour meetings)	–	–	11	1
3. Meetings of the Committee on Social Development	–	–	4	–
4. Meetings of the Committee on Women	–	–	4	–
5. Meetings of subcommittees on social protection, gender and the Sustainable Development Goals, and the intersessional group of experts on disability	–	–	3	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	3	3	2	2
Projects on:				
6. Migration governance framework	1	1	–	–
7. Ageing policy framework	1	1	–	–
8. Assessing skills and skills matching techniques	1	1	–	1
9. Towards Beijing +30 review	–	–	1	–
10. Women and peace and security: moving from plans to actions	–	–	1	1
Seminars, workshops and training events (number of days)	3	5	26	20
Workshops on:				
11. Social justice, including integrating social justice principles into public policies and programmes, social entrepreneurship	–	–	11	8
12. Gender justice and women's empowerment	3	3	1	4
13. Population development, aging	–	–	4	–
14. Multidimensional poverty, social protection	–	2	6	6
15. Migration	–	–	4	2
Publications (number of publications)	4	4	10	2
16. On the realization of human rights for women; social protection; poverty; inequality; the future of work; and migration	4	4	10	2

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
Technical materials (number of materials)	15	18	16	22
17. On the realization of human rights for women; social protection; poverty; inequality; the future of work; and migration	15	18	16	22

C. Substantive deliverables

Consultation, advice and advocacy: meetings of standing and ad hoc expert groups on violence against women; women and peace and security; women’s economic empowerment; social protection; poverty; inequality; fiscal policy; informality and the labour market; the future of work; urban development; disability; migration; ageing, youth; and other social issues.

Databases and substantive digital materials: social protection programme rapid assessment framework; ESCWA Skills Monitor; virtual portal on gender justice and equality in law in the Arab region.

D. Communication deliverables

Outreach programmes, special events and information materials: campaign, promotional material and closing ceremony for the 16 Days of Activism against Gender-based Violence campaign^a event on gender justice for at least 50 regional stakeholders; events, campaigns and promotional materials on International Women’s Day for at least 50 regional stakeholders; materials on violence against women; information graphs on key results of publications and expert group meetings; advocacy campaigns on International Day of Older Persons, International Migrants Day and International Day of Persons with Disabilities.

External and media relations: commentaries on violence against women; commentaries on women economic empowerment.

^a See General Assembly resolution [67/144](#).

Subprogramme 3 Shared economic prosperity

Objective

22.49 The objective, to which this subprogramme contributes, is to achieve equitable economic growth, amplify regional interconnectedness and integration, and advance the effective implementation of the Addis Ababa Action Agenda of the Third International Conference on Financing for Development in support of the 2030 Agenda.

Strategy

22.50 To contribute to the objective, the subprogramme will:

- (a) Develop and make available knowledge products and evidence for policymaking related to trade, logistics and transport, including: opportunities for greater regional integration; economic diversification and macroeconomic stability; fiscal practices and frameworks as a means of increasing resources available for investment in identified social priorities; and financing of development initiatives, including the development of integrated national financing frameworks, debt management and sustainability, and debt-swap for climate change action;
- (b) Enhance existing and develop new interactive, data-driven platforms and policy simulation models pertaining to trade flows, taxation, social expenditure and development investments, the impact of policies towards gender equality on economies and contextualized economic modelling, among others; and promote the application of modern technologies, such as blockchain, as means of facilitating trade and logistics;
- (c) Make available to its member States technical and policy advice and expertise and build national and local, human and institutional capacities to deploy available modelling, forecasting and impact simulation tools in support of decision-making and policy development processes aimed at providing immediate, medium- and long-term solutions to a range of national development challenges in the areas identified in paragraph 22.50 (a);

- (d) Promote greater collaboration and coordination at the national and regional levels, including through the exchange of good practices; and foster consensus on priorities and actions, as well as joint initiatives aimed at improving regional integration, facilitating trade and securing funding for development initiatives.

22.51 The above-mentioned work is expected to result in:

- (a) National policy frameworks developed and enacted by member States to tackle structural economic challenges, including debt management and sustainability; boosting trade opportunities and economic diversification, including by enhancing operational environment for small and medium-sized enterprises; and creating fiscal space for social investment and provision of expanded range of basic social services;
- (b) A greater contribution of small and medium-sized enterprises to national and regional economies, and a greater economic participation and empowerment of individuals, including those in vulnerable situations.

Programme performance in 2022

Arab small and medium-size enterprises engage in conducting business online

22.52 A significant proportion of small and medium-sized enterprises in Arab the region remained unable to tap into online marketplaces, owing to a lack of know-how and connectivity to e-payment systems and logistics networks, as well as a scarcity of information on markets, among other things. This, in turn, affected their income and growth, and employment opportunities overall. As part of its plan to support small and medium-sized enterprises in the region, The subprogramme launched a pilot programme – the “e-commercial acceleration programme” – which supported such enterprises in the digitalization process. The subprogramme conducted three training modules, developed using the available information and communications technology, focused on building capacities in commercial and promotion strategies for online merchandizing, website development, marketplace analysis and other infrastructure necessary to conduct an online business.

22.53 Progress towards the objective is presented in the performance measure below (see table 22.10).

Table 22.10
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	–	100 small and medium-sized enterprises, including 46 women-owned businesses, from 15 Arab member States and sectors such as agriculture, retail and services, engaged in conducting business online

Planned results for 2024

Result 1: debt swap for improved resources for climate and development finance

Programme performance in 2022 and target for 2024

- 22.54 The subprogramme's work contributed to one member State (Jordan) developing a debt-swap programme proposal estimated at \$1 billion to finance climate action and the Sustainable Development Goals over the period 2022–2030, and two additional member States (Egypt and Tunisia) initiating the process to operationalize the debt-swap for climate finance initiative, which did not meet the planned target of one or more additional member States agreeing to set aside an amount of debt to swap for a climate or development finance initiative. The target was not met owing to the slower-than-expected progress in negotiations between the different stakeholders and the shifting priorities in view of emerging global crises in 2022.
- 22.55 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 22.11).

Table 22.11

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
3 member States (Egypt, Jordan and Tunisia) expressed interest in operationalizing the debt-swap mechanism	1 member State (Jordan) established a national task force to operationalize a debt swap for a climate or development finance initiative	1 member State (Jordan) developed a debt-swap programme proposal estimated at \$1 billion to finance climate action and the Sustainable Development Goals over the period 2022–2030 2 additional member States (Egypt and Tunisia) initiated the process to operationalize the debt-swap for climate finance initiative	1 additional member State increases expenditure on climate or Sustainable Development Goals initiatives, utilizing funds from the debt swap	Member States exchange experiences and best practices on debt-swap for climate and development finance

Result 2: improved effectiveness of economic policies from a gender perspective

Programme performance in 2022 and target for 2024

- 22.56 The subprogramme's work contributed to two member States (Morocco and the United Arab Emirates) developing new policies to improve women's economic participation, which met the planned target.
- 22.57 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 22.12).

Table 22.12
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Global Gender Gap Index scoring by member States ranged between 0.494 and 0.655, compared with the global average of 0.686	Global Gender Gap Index scoring by member States ranged between 0.492 and 0.716 compared with the global average of 0.677	2 member States (Morocco and the United Arab Emirates) developed new policies to improve women’s economic participation	Improved ranking on the Global Gender Gap Index scoring of at least 1 of the 2 member States that developed new policies to advance women’s economic participation	Arab policymakers have access to a tool and the capacity deploy it to simulate the broader impact of policies towards gender equality on national economies

Result 3: contextualized economic modelling informs development of economic, social and trade policies

Proposed programme plan for 2024

22.58 Due to its complexity, economic modelling can be underutilized by policymakers in the region, often owing to limited expertise in the use of complex and sophisticated economic models. As a result, some Governments do not use them while others rely on external consultancies to run simulations during the preparation of national budgets and plans.

Lessons learned and planned change

22.59 The lesson for the subprogramme was that models built by external consultants, although vital for decision-making, have often been abandoned by member States owing to their complexity and the limited capacity of their end users. The challenge was to create a tailored, sustainable approach to economic modelling, anchored in ownership by member States, and a related building of capacities at the national level to ensure its uptake, keeping in mind that a “one-size-fits-all” solution would weaken its effectiveness and uptake. In applying the lesson, ESCWA developed an interactive, user-friendly economic modelling tool that can be customized to specific context and needs. The model has already been piloted in Jordan, the State of Palestine and Yemen. To further increase the use of economic modelling in policymaking across the Arab region, the subprogramme will engage with civil servants in member States to adapt the methodology and design and deliver commensurate capacity-building programmes to meet the specific needs of countries. When rolled out, the models will enable on-demand, interactive simulations of a set of economic, social and trade policies and their effects on growth, unemployment and specific sectoral policies.

22.60 Expected progress towards the objective is presented in the performance measure below (see table 22.13).

Table 22.13
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Desktop version of the computable general equilibrium model used by Tunisia	Pilot web-based computable general equilibrium model used by Jordan	2 national computable general equilibrium models used by the State of Palestine and Yemen	4 additional member States use computable general equilibrium models	3 additional member States use computable general equilibrium models

Deliverables

22.61 Table 22.14 lists all deliverables of the subprogramme.

Table 22.14

Subprogramme 3: deliverables for 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	10	13	12	12
1. Documents for the Committee on Trade Policies	5	8	–	6
2. Documents for the Committee on Transport and Logistics	4	4	6	6
3. Documents for the Committee on Financing for Development	1	1	6	–

8. National Agenda for the Future of Syria – Phases II and III	1	1	1	1
9. Transformative actions for safe motorcycles in Tunisia	–	–	1	–
10. Reducing road deaths and injuries in Jordan	–	–	1	–
11. Strengthening evidence-based interventions for road safety in the Arab region through effective and reliable data recording, processing and analysis	–	–	1	–
Seminars, workshops and training events (number of days)	–	–	–	8
12. Seminars and workshops on transport and logistics, economic modelling and the use of policy simulators	–	–	–	8
Publications (number of publications)	2	2	2	2
13. On issues relating to economic development	2	2	2	2
Technical materials (number of materials)	19	22	20	22
14. On the economy of the future; public finance and inclusive fiscal policy, including fiscal space challenges for low- and middle-income countries and climate finance; trade and industrial policy; trade negotiation and trade facilitation; transport connectivity and logistics; productive capacity of Arab least developed countries; illicit financial flows, financing for development and other issues related to economic development	19	22	20	22
C. Substantive deliverables				
Consultation, advice and advocacy: consultations of ad hoc and standing expert groups on the economy of the future; public finance and inclusive fiscal policy; trade and industrial policy; trade negotiation and trade facilitation; transport connectivity and logistics; the productive capacity of Arab least developed countries; illicit financial flows; financing for development and other issues relating to economic development; and strategic advice to the United Nations Road Safety Fund Steering Committee.				
Databases and substantive digital materials: the Arab Trade Gateway (comprising a trade agreement portal, a trade cost portal, a digital and sustainable trade facilitation measures portal, a logistics performance portal, a system for measuring, monitoring and evaluating Arab economic integration, an index simulator for policymakers in the Arab region; an Arab trade simulation interface), a Sustainable Development Goals financing resources knowledge portal; a financing for development gateway and data analytics; a Sustainable Development Goals costing calculator for the Arab region; a dynamic financing for development simulator; a Sustainable Development Goals interlinkages tool; computable general equilibrium models; a social expenditure monitor tool.				
D. Communication deliverables				
Outreach programmes, special events and information materials: side event in the margins of the Arab Forum for Sustainable Development.				

Subprogramme 4

Statistics, the information society and technology

Objective

- 22.62 The objective, to which this subprogramme contributes, is to strengthen the development of official statistical frameworks, improve the quality and availability of statistics and advance the information society by accelerating the integration of technology and innovation for sustainable development in the Arab region.

Strategy

- 22.63 To contribute to the objective, the subprogramme will:
- (a) Enhance the capacity of national statistical offices in Arab member States for the implementation of international statistical standards and best practices and of innovative data science-enabled non-traditional data sources;
 - (b) Provide policymakers and practitioners in member States with policy recommendations, underpinned by analysis of challenges and opportunities stemming from the emergence and increasing availability of emerging technologies and digital solutions pertinent to: digital governance, accessibility and inclusion; and digitalization and a just digital transformation;
 - (c) Provide technical expertise and enhance national human and institutional capacities to utilize the available data-driven evidence, emerging and existing technologies and innovation as enablers for sustainable solutions supporting digital and open government aligned with national development plans and priorities;
 - (d) Convene intergovernmental and technical forums to foster consensus and facilitate dialogue and exchanges between policymakers and practitioners, experts, civil society, the private sector and other stakeholders from within and outside the Arab region, to incentivize investments in data and technology and promote intra- and interregional cooperation, partnerships and coordination to increase value created from statistic, geospatially enabled data and digital technologies in support of the regional perspective towards achieving the 2030 Agenda.
- 22.64 The above-mentioned work is expected to result in:
- (a) Improved availability of official statistics and smart, geospatially-enabled data, compliant with international statistical and data protection standards, as well as Sustainable Development Goals data and their use by member States and development partners for evidence-based decision- and policymaking;
 - (b) Member States designing and implementing sound national and regional policy frameworks, catalysing synergies between science, technology and innovation for digital transformation and governance; digital accessibility and inclusion; and enhanced citizens' engagement in decision-making, enabling economic diversification and inclusive social development, while ensuring cybersecurity.

Programme performance in 2022

Localized geospatial analysis enhances response to future natural disasters in Egypt

- 22.65 The increasing frequency and severity of disasters, especially disasters related to climate change, mainly drought, floods and dust storms, have added to the existing challenges in achieving the 2030 Agenda for Sustainable Development. Furthermore, significant gaps still exist on disaster-related data in most member States. The integration of new technologies, such as satellite imagery and remote sensing, and social media platforms with official statistics to produce more timely, frequent

and disaggregated disaster indicators, has a significant potential to prevent the loss of life and livelihoods. In this context, the subprogramme worked with a satellite imagery and geospatial data sets analytics provider to build the capacity of the Egypt national statistical office on the use of remote sensed data and data analytics and their integration with different free data sets and official statistics with the aim of filling data gaps. Although the pilot focused on localized areas in one member State (Egypt) and one type of natural disaster (floods), the application of the flood estimation algorithms and flood localization tools can be applied by any other national statistical or disaster management authority in the region, while the project’s methodology allows for it to be scaled up to encompass more types of natural hazards.

22.66 Progress towards the objective is presented in the performance measure below (see table 22.15).

**Table 22.15
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Strengthened capacities of civil servants in the Egypt national statistical office to use free remote sensed data and coding	Detailed geospatial assessments of past flood events conducted in one member State (Egypt)	Disaster management authority in 1 member State (Egypt) gained access to localized, geospatial analysis that will allow for improved response to future natural disasters Member States have access to regional platform based on satellite imagery and tools for floods mapping

Planned results for 2024

Result 1: improved production and communication of data on the Sustainable Development Goals to leave no one behind

Programme performance in 2022 and target for 2024

- 22.67 The subprogramme’s work contributed to improving the percentage of Arab States with country data available in the official global database on the Sustainable Development Goals, including disaggregation of data, to 60 per cent in 2022, which exceeded the planned target of 50 per cent.
- 22.68 Progress towards the objective and target for 2024 are presented in the performance measure below (see figure 22.III).

Figure 22.III
Performance measure: percentage of country data available for the Arab States in the official global database on the Sustainable Development Goals

Result 2: advancement of digital development assessments and strategies at the national and regional levels in the Arab region

Programme performance in 2022 and target for 2024

- 22.69 The subprogramme’s work contributed to three member States (Iraq, Mauritania and the State of Palestine) designing digital development strategies, which met the planned target.
- 22.70 Progress towards the objective and target for 2024 is presented in the performance measure below (see figure 22.IV).

Figure 22.IV
Performance measure: number of member States that undertook biennial national digital development reviews and design digital development strategies (cumulative)

Result 3: Arab policymakers gain access to on-demand, reliable evidence enabled by artificial intelligence and geospatial capacities

Proposed programme plan for 2024

- 22.71 Policymakers, who often rely on data to inform the development of intended frameworks, sometimes lack sufficient relevant data in certain critical areas or may have to work with large quantities of data from multiple sources with different attributes and quality dimensions. In recent years, ESCWA has engaged with member States and partners to improve the availability of quality data and developed several interactive, digital policy simulation tools in support of evidence-based decision making in the region.

Lessons learned and planned change

- 22.72 The lesson for the subprogramme was that inconsistent data and the unavailability of relevant data have proved counterproductive to policymaking processes. In addition, many new technologies in the field of data science, big data and machine learning provide an opportunity to address some of the traditional data challenges policymakers face in developing evidence-based policies. In applying the lesson, the subprogramme will scale up the “data ecosystem”, which will deploy, inter alia, artificial intelligence and geospatial capacities to enhance and harness the evidence available from local, national, regional and global sources. The resulting regional data hub will support the interactive generation of policy options by streamlining the different technology- and data-driven regional tools and platforms, developed by ESCWA, within a unified and structured repository. Such an ecosystem will promote and standardize data analytics approaches to deliver complementary, modular knowledge and policy support products with the goal of providing high-quality and reliable evidence. The approach will allow member States to save time and other resources currently required to mine for data “in-house.”
- 22.73 Expected progress towards the objective is presented in the performance measure below (see table 22.16).

Table 22.16

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Member States have access only to (statistical) data produced by ESCWA and certain Arab national statistics offices	Member States gained access to 8 interactive policy simulation tools	Member States gained access to additional national, regional and global (statistical and non-statistical) data sets	Member States have access to centralized, regional data management and analytics platform	Member States generate evidence and simulate (impact of) policy options through at least 5 artificial intelligence- and geospatial-enabled, interactive tools

Deliverables

- 22.74 Table 22.17 lists all deliverables of the subprogramme.

Table 22.17

Subprogramme 4: deliverables for 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	–	12	10	10
1. Documents of the Committee on Technology for Development	–	5	4	4
2. Documents of the Statistical Committee	–	7	6	6
Substantive services for meetings (number of three-hour meetings)	23	31	26	27
Meetings of:				
3. The Committee on Technology for Development	–	4	4	4
4. The Statistical Committee	–	4	4	4
5. The ESCWA Technology Centre Advisory Board	1	1	2	1
6. The ESCWA Technology Centre Technical Committee	2	2	2	2
7. The Bureau of the Statistical Committee	2	2	2	2
8. The standing working groups of the Statistical Committee on economic statistics, demographic and social statistics and disability in the Sustainable Development Goals	8	8	4	6
9. The Task Force on SDG Data of the Regional Coordination Platform for Arab States	4	4	2	2
10. The Regional Committee of United Nations Global Geospatial Information Management for the Arab States	2	2	2	2
11. The LAS on Internet governance; automated digital network systems; the digital economy; innovation policies; enhanced information and communications technology (ICT) cooperation; ICT strategy; science, technology and innovation; and ICT for the Sustainable Development Goals	4	4	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	1	1
12. ESCWA Technology Centre	1	1	1	1
13. International Comparison Program, including on the harmonized consumer price index	1	1	–	–
Seminars, workshops and training events (number of days)	–	20	30	24
14. Workshops on statistics, including gender and disability statistics	–	6	6	6
15. Workshops on big data and open data	–	2	2	2
16. Seminars and workshops on Sustainable Development Goals measuring and reporting	–	4	8	4
17. Workshops and seminars on the information society, ICT governance and infrastructure, digital cooperation and digital inclusion	–	4	8	6
18. Workshops on digital transformation, emerging technologies, digital government, digital economy, e-commerce, innovation and entrepreneurship	–	4	6	6
Publications (number of publications)	4	3	4	2
19. On statistics and indicators; non-traditional data sources; national accounts; monitoring of and follow-up on the 2030 Agenda; Arab digital development; and technology and innovation for sustainable development	4	3	4	2
Technical materials (number of materials)	7	7	7	6
20. On statistics and indicators; non-traditional data sources; national accounts; monitoring of and follow-up on the 2030 Agenda; Arab digital development; and technology and innovation for sustainable development	6	6	6	6
21. Development and testing of a methodology to identify clear and accurate baselines for national targets and relevant indicators	1	1	1	–

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: meetings of experts on digital development; regulation and legislation to promote the information society; Internet governance; innovation policies; frontier technologies; technological entrepreneurship; technology transfer; innovation; and other issues relating to technology for development.

Databases and substantive digital materials: ESCWA Online Statistical Information System, ESCWA data portal (comprising databases and data visualization dashboards related to economics, social and demographic matters, environment and energy, population, gender statistics, education and employment); Sustainable Development Goals database; country profiles, each providing access to information, knowledge, and capacity-building to all 21 member States and international stakeholders; ESCWA data ecosystem.

D. Communication deliverables

Outreach programmes, special events and information materials: annual statistics newsletter; technology bulletin.

**Subprogramme 5
2030 Agenda and SDG coordination**

Objective

- 22.75 The objective, to which this subprogramme contributes, is to accelerate progress towards sustainable development in the Arab region in line with the 2030 Agenda and to advance intraregional collaboration and a multi-stakeholder approach to key regional and subregional sustainable development issues.

Strategy

- 22.76 To contribute to the objective, the subprogramme will:
 - (a) Advocate for the principles of the 2030 Agenda for Sustainable Development, in particular the commitment to leave no one behind and the people-centred approach to development; and leverage existing and build new and non-traditional partnerships with intergovernmental and non-governmental organizations, international financial institutions, civil societies, academic institutions and think tanks, and the private sector, to promote a whole-of-government and whole-of-society approach;
 - (b) Engage with relevant national and local authorities and stakeholders, including ministries of planning and finance, supreme audit institutions and parliaments, to support cross-sectoral cooperation and the alignment of national development priorities and plans with both the 2030 Agenda and the resources available for their implementation;
 - (c) Convene, and ensure ongoing support to and follow-up on, various platforms, within and in connection with the Arab Forum for Sustainable Development, to facilitate multi-stakeholder dialogue and peer-to-peer exchanges within and outside the Arab region, fostering consensus on national and regional sustainable development priorities and actions and promoting sub-, inter- and intraregional (South-South) and triangular collaboration and coordination;
 - (d) Support, and build individual and institutional capacities to conduct, integrated monitoring and reporting, at the local, national and regional levels, of the progress against specific Sustainable Development Goals targets, including by building national and institutional capacity to conduct voluntary national reviews; compile and disseminate policy recommendations; and ensure that the Arab region’s perspective is reflected through the global lens.

- 22.77 The above-mentioned work is expected to result in:
- (a) An enhanced commitment to the principles of the 2030 Agenda for Sustainable Development by policymakers and practitioners, regional intergovernmental organizations, international financial institutions, academia and think tanks, civil society organizations and the private sector in the Arab region and beyond;
 - (b) The adoption by member States and development stakeholders of a more participatory, whole-of-government and whole-of-society approach to the implementation of and follow-up to Sustainable Development Goals priorities and related actions;
 - (c) The improved utilization by Arab member States and relevant stakeholders of available dialogue platforms as a means of promoting consensus, peer-to-peer learning and coordination at the national (institutional and cross-institutional) and sub-, intra- and interregional as well as global levels for an accelerated achievement of the 2030 Agenda for Sustainable Development.

Programme performance in 2022

Improved alignment of national budgets with national development plans and the 2030 Agenda

22.78 Effective implementation of the 2030 Agenda requires development priorities and targets to be aligned with the resources required for their achievement. While the former are usually determined by ministries of planning, making the latter available falls under the responsibility of ministries of finance, which can lead to the misalignment of procedures and cycles. The subprogramme identified improved cooperation between those two national entities as a means for member States to accelerate their progress towards the Goals. In that context, the subprogramme established a regional platform, within the Arab Forum for Sustainable Development framework, to promote dialogue and alignment on the Goals implementation between ministries of finance and ministries of planning. The Forum allowed the five participating member States (Egypt, Iraq, Jordan, Lebanon and Yemen) to exchange good practices on the alignment of national budgets with national development plans and the Goals. Three priorities were identified as a result: (a) the design and implementation of integrated national financing frameworks; (b) more effective Sustainable Development Goals budgeting, with national budgets geared to achieving the Goals as opposed to post-assessments of budgetary allocations related to the Goals; and (c) greater coordination with and among international financial institutions. The platform also enabled peer-to-peer advocacy across the Arab region on the importance of the issue, highlighting the urgent need to link budgeting processes to national development plans and the Goals.

22.79 Progress towards the objective is presented in the performance measure below (see table 22.18).

Table 22.18
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	–	Ministries of planning and finance from 5 member States (Egypt, Iraq, Jordan, Lebanon and Yemen) identify priorities to improve alignment of national budgets with national development plans and the Sustainable Development Goals

Planned results for 2024

Result 1: recovery and post-COVID-19 development planning integrates the 2030 Agenda and the Sustainable Development Goals

Programme performance in 2022 and target for 2024

- 22.80 The subprogramme's work contributed to one COVID-19 recovery plan in the Arab region (Jordan) integrating the 2030 Agenda to accelerate progress on the Goals, and the assessment by one member State (State of Palestine) of the extent to which it had integrated the Goals into its sectorial recovery plans and strategies, which met the planned target.
- 22.81 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 22.19).

Table 22.19

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	1 member State (Egypt) integrated the 2030 Agenda to accelerate progress on the Sustainable Development Goals into its COVID-19 recovery plan	1 COVID-19 recovery plan in the Arab region (Jordan) integrated the 2030 Agenda to accelerate progress on the Sustainable Development Goals 1 member State (State of Palestine) assessed the extent to which sectorial recovery plans and strategies integrate the Goals	2 additional national development plans aligned with the 2030 Agenda	Integrated approach to implementation in the national development plan of 1 additional member State

Result 2: improved voluntary national review process through formalized intraregional and interregional peer learning

Programme performance in 2022 and target for 2024

- 22.82 The subprogramme's work contributed to two member States (Oman and the Syrian Arab Republic) engaging in a twinning exercise (pilot voluntary national review peer-learning initiative) to discuss solutions to challenges and identify best practices throughout the voluntary national review process, which met the planned target.
- 22.83 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 22.20).

Table 22.20
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Informal interaction between member States in workshops focusing on regional issues of concern	Member States benefit from the first peer-learning activity on methodological issues of reporting on the 2030 Agenda	2 member States (Oman and the Syrian Arab Republic) engaged in a twinning exercise (pilot voluntary national review peer-learning initiative) to discuss solutions to challenges and identify best practices throughout the voluntary national review process	2 additional member States benefit from peer-learning approaches to voluntary national reviews (twinning and issues-based focus groups)	2 more member States apply voluntary national review peer-learning approaches (twinning and issues-based focus groups)

Result 3: university graduates play a part in a whole-of-society, principled approach to achieving the Sustainable Development Goals

Proposed programme plan for 2024

- 22.84 ESCWA has been supporting government and non-government stakeholders to partake in the implementation, follow-up to and review of the 2030 Agenda in Arab countries. For the region to achieve the Goals by 2030, a whole-of-society approach is needed; where Governments, civil society organizations, the private sector and citizens at large contribute to sustainable development outcomes. Universities are well placed to inform young people and equip them with the awareness, knowledge, skills and motivation to contribute towards the achievement of the 2030 Agenda.

Lessons learned and planned change

- 22.85 The lesson for the subprogramme was that engaging with academic institutions, including through the Academic Network for Development Dialogue to promote dialogue between the United Nations and academia and Sustainable Development Goals-focused research, was not sufficient and that, in order for the desired result to be achieved, the mainstreaming of the 2030 Agenda principles and the Goals across academic curricula or initiatives is required, so as to allow member States to tap into the power of engaged university graduates for positive change. In applying this lesson, the subprogramme will support university faculties in member States to incorporate the shared principles and commitments of the Goals into their academic programmes through the provision of frameworks, guidelines, examples and suggestions. The subprogramme will subsequently leverage its existing networks to support peer learning and the dissemination of good practices among universities in the region.
- 22.86 Expected progress towards the objective is presented in the performance measure below (see table 22.21).

Table 22.21
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Academic Network for Development Dialogue is established	Systematic dialogue between ESCWA and academia is established, promoting academic institutions' participation in Sustainable Development Goals-related discussions	Sustainable Development Goals-focused research by Arab academic institutions contributed to regional and national dialogues on achieving the 2030 Agenda	1 university faculty in a member State commits to incorporating the shared principles and commitments of the Goals into its programmes	2 academic institutions in the Arab region incorporate shared principles and commitments of the Goals into their programmes

Deliverables

22.87 Table 22.22 lists all deliverables of the subprogramme.

Table 22.22
Subprogramme 5: deliverables for 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	8	8	9	8
1. Meetings of the Arab Forum for Sustainable Development	8	8	9	8
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	–	–	4	3
2. Voluntary national review workshops	–	–	4	3
Publications (number of publications)	–	–	–	1
3. Arab sustainable development report	–	–	–	1
Technical materials (number of materials)	2	6	4	3
4. Annual Sustainable Development Goals review	–	3	–	1
5. On sustainable development	2	3	4	2
C. Substantive deliverables				
Consultation, advice and advocacy: consultation with the taskforce of the Arab Forum for Sustainable Development, which is attended by more than 1,000 participants; advice to global and regional events on the 2030 Agenda for approximately 2,000 participants, and the Arab Sustainable Development Week, attended by over 1,000 participants; advocacy to universities on the 2030 Agenda; advice to the community of practice on voluntary national reviews in the Arab region: twinning and issues-based focus groups.				
Databases and substantive digital materials: Sustainable Development Goals knowledge and learning platform, including training material on the 2030 Agenda and the Sustainable Development Goals and guidelines on the implementation of, follow-up to and review of the 2030 Agenda.				

Subprogramme 6 Governance and conflict prevention

Objective

- 22.88 The objective, to which this subprogramme contributes, is to advance just, peaceful and inclusive societies, especially for people living under occupation or in conflict or post-conflict settings; to improve governance and strengthen effective, efficient and accountable public institutions; and to enhance service delivery.

Strategy

- 22.89 To contribute to the objective, the subprogramme will:
- (a) Develop and make available evidence and policy recommendations to member States and relevant stakeholders and partners aimed at addressing challenges and utilizing opportunities to accelerate human development, with a particular focus on: mitigating the impact of conflict and occupation on the capacity to achieve the Goals, and transboundary risks; improving governance and institutional capacities to deliver basic services and respond to shocks; and boosting the competitiveness of the business environment, including consumer protection mechanisms;
 - (b) Provide technical expertise and build human and institutional capacities to identify and operationalize immediate, medium- and long-term solutions, aimed at: lowering the risks associated with emerging socioeconomic, environmental and governance challenges and potential shocks; enhancing transparency and accessibility, as well as efficiency of State-run services; and more effective competition and consumer protection;
 - (c) Foster consensus on the priorities and actions required to minimize the impact of conflict and any transboundary risks and shocks, inter alia, on the ability of member States to advance their national development agendas;
 - (d) Support the five Arab least developed countries, within the framework of the Doha Programme of Action for the Least Developed Countries for the Decade 2022–2031, in enhancing their institutional capacities for achieving the 2030 Agenda and graduating from the least developed country category;
 - (e) Enhance the capabilities of Palestinian institutions to mitigate the impact of the Israeli occupation on service delivery and social and economic development, including decreasing the asymmetric dependency of the Palestinian economy.
- 22.90 The above-mentioned work is expected to result in:
- (a) Improved prevention of transboundary risks, including conflict, and mitigation of their impact on national development trajectories;
 - (b) More effective public institutions, in particular in the five Arab least developed countries, and their enhanced ability to deliver basic services in a transparent, accessible and inclusive way;
 - (c) A more competitive business environment and more effective consumer protection.

Programme performance in 2022

Contextualized support to the four Arab least developed countries in the context of the Doha Programme of Action for the Least Developed Countries for the Decade 2022–2031

- 22.91 The four Arab least developed countries – Mauritania, Somalia, the Sudan and Yemen – did not graduate from their status within the previous decade, as per the Istanbul Programme of Action for

the Least Developed Countries for the Decade 2011–2020, and continue to face serious challenges in achieving the 2030 Agenda for Sustainable Development. In the context of the formulation of the Doha Programme of Action, the subprogramme engaged with the four Arab least developed countries to map out those challenges and promote an agreement on a common and most adequate way forward. As a result, the four member States committed to the Programme and engaged with the Commission on such priority areas as: (a) addressing the root causes of conflict; (b) inclusive and rapid socioeconomic development; and (c) rebuilding more resilient national institutions and their capacities. In that context, the subprogramme provided public institutions in the four Arab least developed countries with guidance on fostering an integrated approach for humanitarian development and peace in countries in situations of conflict and post-conflict countries. In addition, the subprogramme facilitated an inclusive, technical dialogue on a vision for recovery and development in Yemen and piloted an institution-building and capacity-development e-platform for the same State. Concurrently, the subprogramme supported the strengthening of partnerships among development entities working on building the capacities of public institutions in Arab least developed countries.

22.92 Progress towards the objective is presented in the performance measure below (see table 22.23).

Table 22.23

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Gaps and challenges that prevented least developed countries from graduating from the least developed country status, as per the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011–2020, are assessed	Challenges particular to the 4 Arab least developed countries were mapped out and informed the development of the Doha Programme of Action for the Least Developed Countries for the Decade 2022–2031 4 Arab least developed countries defined foundational elements to achieve the commitments of the Doha Programme of Action	The 4 Arab least developed countries agreed to emphasize the need for recovery led by national institutions for an integrated approach for humanitarian-development and peace, as part of the Doha Programme of Action 1 Arab least developed country (Yemen) conducted inclusive, technical dialogue on a vision for recovery and development National institutions and international development partners in 1 member State (Yemen) used a dedicated e-platform to coordinate capacity development programming

Planned results for 2024**Result 1: enhanced integration of transboundary risk planning, management and prevention into national development plans and policies****Programme performance in 2022 and target for 2024**

22.93 The subprogramme's work contributed to the integration by one additional member State (Lebanon) of the developed risk assessment tools that address transboundary conflict and non-conflict drivers of hazards and vulnerability into its national development strategy, which met the planned target.

- 22.94 The subprogramme’s work also contributed to the launch of the regional technical dialogue platform enabling peer exchanges among member States on transboundary risk management, which met the planned target.
- 22.95 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 22.24).

**Table 22.24
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Arab States gained access to contextualized (for the region) risk assessment tools and gained a better understanding of qualitative risk assessment approaches	1 member State (Jordan) integrated a developed risk assessment tool that addresses transboundary conflict and non-conflict drivers of hazards and vulnerability into its national COVID-19 response strategy	1 additional member State (Lebanon) integrated the developed risk assessment tools that address transboundary conflict and non-conflict drivers of hazards and vulnerability into its national development strategy Regional technical dialogue platform was launched and enabled peer exchanges among member States on transboundary risk management	Policies developed in the 3 member States in which the initiative is piloted take into consideration the effects of transboundary conflict and non-conflict drivers of hazards and vulnerability	At least 3 member States use the upgraded and contextualized (for the region) tool to assess multidimensional risks to their development trajectories

Result 2: policymakers determine development challenges at the national level

Programme performance in 2022 and target for 2024

- 22.96 The subprogramme’s work contributed to access to a toolkit that allows member States to assess the impact of improvements to specific dimensions and indicators on the overall performance of the global development challenges index, and a tool that allows member States to design and tailor their own national development challenges indices, which did not meet the planned target of four member States having endorsed the measurement framework for the global index. The target was not met owing to a shift in focus from the endorsement of a methodology to the actual roll-out of the toolkit in support of member States’ ability to assess their development challenges.
- 22.97 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 22.25).

Table 22.25
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Countries use global indices, such as the human development index, to evaluate the effectiveness of their national development plans	Member States gained access to a toolkit that made it possible to assess the impact of improvements to specific dimensions and indicators on the overall performance on the global development challenges index, and a tool that allowed them to design and tailor their own national development challenges indices	3 countries develop national assessments and national human development challenges reports, on the basis of the findings from the global development challenges index	Civil servants in at least 3 member States use national development challenges indices and integrate those indices in national development planning processes

Result 3: improved consumer protection in the Arab region**Proposed programme plan for 2024**

- 22.98 National and regional economic prosperity depends largely on the competitiveness of the business environment, which remains a challenge for many countries in the Arab region. ESCWA has been working with its member States to enhance relevant policy frameworks to boost competition. In 2020, ESCWA convened the joint ESCWA-UNCTAD-OECD Competition Forum for the Arab Region, serving as a platform for member States to exchange knowledge, experiences and good practices in this regard. By 2022, all 20 States members of the Commission had attended the forum. As a result, by the end of 2021, Kuwait, Oman and Saudi Arabia had implemented new competition legislation. In 2022, Oman expanded its competition authority, while Lebanon, with support from ESCWA, adopted its first-ever competition law.

Lessons learned and planned change

- 22.99 The lesson for the subprogramme was that, although progress has been achieved with respect to national competition policy frameworks, legislation around consumer protection to safeguard consumers rights was inconsistently adopted across the region. In applying the lesson, ESCWA will support member States in building capacity in this area and, in particular, promote development of related and relevant national policy frameworks and legislation. Specifically, in 2023, ESCWA will conduct assessments of national and regional legislative frameworks on consumer protection. A dedicated regional platform will be convened in the subsequent year aimed at enabling member States' dialogue, networking and peer-to-peer exchanges of knowledge and good practices on consumer protection.
- 22.100 Expected progress towards the objective is presented in the performance measure below (see table 22.26).

Table 22.26
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Competition Forum for the Arab Region is launched in partnership with OECD and UNCTAD	Second joint Competition Forum for the Arab Region is attended by 16 member States	All 20 Arab member States participated in the third Competition Forum for the Arab Region	Arab policymakers have access to recommendations on how to improve national consumer protection frameworks	Member States exchange knowledge and good practices on consumer protection
1 member State (Kuwait) implemented new competition law	3 member States (Kuwait, Oman and Saudi Arabia) implemented new legislation on competition	1 member State (Lebanon) introduced competition legislation and 1 additional member State (Kuwait) introduced further legislation on competition		2 member States establish or reform their consumer protection laws
		1 member State (Oman) expanded its dedicated competition authority		

Deliverables

22.101 Table 22.27 lists all deliverables of the subprogramme.

 Table 22.27
Subprogramme 6: deliverables for 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	1	1	2
1. Note of the Secretary-General on the economic and social repercussions of the Israeli occupation on the living conditions of the Palestinian people in the Occupied Palestinian Territory, including East Jerusalem, and the Arab population in the occupied Syrian Golan to the General Assembly and the Economic and Social Council	1	1	1	1
2. Report to the ESCWA ministerial session on the social and economic impact of the Israeli occupation: thematic focus	1	–	–	1
Substantive services for meetings (number of three-hour meetings)	–	–	4	–
3. High-level meeting of LAS/Arab Administrative Development Organization/ESCWA	–	–	4	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	4	4
4. Country specific and regional projects (Arab least developed countries, Libya, State of Palestine and Yemen)	2	2	4	4

7. Workshops on governance and digital transformation; and major subindices (governance, human development index, conflict, environment)	2	2	–	1
8. Workshop on comprehensive risk assessment framework	1	1	–	1
9. Workshops on development strategy for Palestine; strategic planning in fragile contexts; developing, improving and increasing the effectiveness of basic service delivery; fostering an integrated approach for humanitarian development and peace in countries in situations of conflict and post-conflict countries	–	–	–	5
Publications (number of publications)	1	2	2	2
10. On governance and conflict prevention	–	1	1	1
11. <i>Palestine under occupation</i>	1	1	1	1
Technical materials (number of materials)	8	8	8	8
12. On durable peace; vulnerability assessments and risk (associated with conflict, climate change, water scarcity, food security and forced displacement) mitigation; institution-building to strengthen resilience, performance and service provision; innovation in the public sector; open government; economic governance; mitigating the impact of occupation; sustainable development of countries in situations of conflict and post-conflict countries; impact of competition reforms on trade policy; human development and human security (see General Assembly resolution 66/290); and advancing the Sustainable Development Goals	8	8	8	8

C. Substantive deliverables

Consultation, advice and advocacy: annual Competition Forum for the Arab Region; consultative meetings on post-conflict and durable peace; vulnerability assessments and risk mitigation; institution-building to strengthen resilience, performance and service provision; innovation in the public sector; public service delivery; open government; economic governance; and mitigating the impact of occupation, advocacy for policy dialogue and issues concerning sustainable development of countries in situations of conflict and post-conflict countries; consultative meeting with member States at the OECD global forum on competitiveness.

Database and other substantive digital materials: portal on open government and open data in the Arab region; portal on Arab business environment legislative framework, including competition provisions and legislation; prototype platform for policymakers to help formulate responses and implement and monitor adopted policies (during a crisis) by leveraging new kinds of data and analytical approaches; ESCWA violence early warning system portal; regulatory reforms tracker.

D. Communications deliverables

Outreach programmes, special events and information materials: observance of the International Day of Solidarity with the Palestinian people; wallchart on the impact of conflict and occupation on the socioeconomic development of the Palestinian people; analysis and information material on governance, conflict prevention and the impact of occupation on development outcomes; regional technical dialogue platform (periodic meetings) for member States on the assessment of risks associated with transboundary conflict and non-conflict drivers of hazards and vulnerability.

B. Proposed post and non-post resource requirements for 2024

Overview

- 22.102 In January 2020, pursuant to the request of its member States,² ESCWA embarked on the implementation of its new operational model. The new model aims to harmonize processes and improve synergies across functional and administrative units for the streamlined delivery of the development and regional integration mandate. To support the new operational model, a new programmatic structure was adopted after a comprehensive business analysis (A/76/6 (Sect. 22)). This was the first step towards a better alignment of resources in the light of emerging strategic priorities. After three years of implementing those changes, ESCWA carried out a spending review pursuant to paragraph 20 of General Assembly resolution 77/262, as part of its proposed budget exercise for 2024. With the engagement of all programme managers, a review was carried out for each subprogramme and component of ESCWA including an in-depth analysis of the latest post complement and functional profiles, as well as non-post resource types and distribution, with a view to determining the optimal level and types of resources required to implement the mandates of ESCWA, as set out in the programme plan for 2024.
- 22.103 The outcome of the spending review points to several opportunities for the better utilization of resources and further investment in new skills, profiles and ways of doing business. It highlighted the need for the continuous review of the workforce and work processes in order to keep pace with the evolving demand for innovative tools to support data-driven policy solutions, and to maintain a vibrant work environment. The review highlighted the need to direct the available resources across subprogrammes in a manner that reflects the multidisciplinary and interlinked nature of the mandate, mirroring the complexity of the goals and themes of the 2030 Agenda. Hence, the Commission will focus its resources to work on innovative information technology solutions, now a strategic function at ESCWA, and modernize the existing platforms using the latest technologies and concepts, including the development and maintenance of interactive policy simulation and e-learning tools, and the production of data in the implementation of the Data Strategy of the Secretary-General using a well-integrated data ecosystem. ESCWA will attract new talent, acquire new skills and enhance internal capacity, in order not only to engage individuals with specific professional technical skills, including the capacity to develop applications and portals, but also to allow for prompt responsiveness to the needs of member States for up-to-date and customized decision-making policy tools and platforms. ESCWA will redirect resources towards emerging targets to better support the region, including the least developed member countries (Djibouti, Mauritania, Somalia, the Sudan and Yemen) at national levels in policy assessment, formulation and implementation.
- 22.104 Under the new operational model, which introduces the project approach in programme delivery and promotes cross-subprogramme initiatives, ESCWA will be in a position to direct available staff and non-staff resources in a way that addresses the needs of member States more effectively. The Commission has identified opportunities for the reclassification of posts to enhance internal capacity in quality control and validation of official documents and various types of content, including digital, using the latest technology. ESCWA also proposes the conversion of two data analysis assistant posts from temporary to established in order to stabilize internal capacity in data analytics, data science, emerging technologies, to provide support in developing interactive policy analytics and simulation tools and to maintain and upgrade the state-of-the-art in-house data ecosystem. This approach allows for adjustments to accommodate emerging demands and unforeseen needs. In its budget proposal formulation exercise for 2024, ESCWA considered the costs and benefits of various conferencing, communication and content dissemination models, to ensure that the formats and techniques employed support programme delivery in the most effective and efficient way. The proposed resource changes – under Executive direction and management, Programme support and all subprogrammes – which are the outcome of the spending review, are presented under “Other

^a Includes four temporary posts (1 P-4, 2 P-3 and 1 Local level), which were approved pursuant to General Assembly resolution 71/272 A.

22.106 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 22.28 to 22.30 and figure 22.V.

22.107 As reflected in tables 22.31 (1) and 22.32 (1), the overall resources proposed for 2024 amount to \$49,030,700 before recosting, reflecting an increase of \$99,200 (or 0.2 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 22.V
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

22.108 As reflected in table 22.31 (1), resource changes reflect an increase of \$99,200 under subprogramme 4, Statistics, the information society and technology, due to the delayed impact of the reassignment of one Statistician post (P-4) as Data Scientist, which was subject to a 50 per cent vacancy rate in accordance with the established practice for reassigned posts.

Other changes

22.109 As reflected in table 22.31 (1), resource changes reflect cost-neutral changes, as follows:

- (a) **Executive direction and management.** The net decrease of \$99,600 reflects: (i) reduced requirements under supplies and materials (\$114,600) due to lower use of office supplies and materials and library-related subscriptions following the introduction of an internally developed knowledge repository and digitization efforts; (ii) increased requirements under travel of staff (\$15,000), reflecting additional partnership initiatives and more proactive engagement with member States; and (iii) the proposed reassignments (cost-neutral), as reflected in annex II, of one Senior Programme Officer (P-5) post as Chief of Staff and one Library Assistant (LL) post as Graphic Design Assistant post. The spending review identified that the development of the ESCWA knowledge repository, an online database that collects, organizes and preserves all ESCWA knowledge products and provides open access to a wide range of intellectual products, had reduced the need for office supplies and materials and library-related subscriptions and allowed for the redeployment of resources within the component and to subprogrammes 3, 4 and 6. In addition, informed by the digital transformation strategy deployed by the Commission, the spending review identified the need to reassign two posts, mainly for: (i) strengthening workforce planning and building new data skills and innovative capabilities required by ESCWA to adapt to new technologies and challenges; and (ii) enhancing the capacity to develop and produce innovative content and support timely and effective dissemination of information.
- (b) **Subprogramme 1, Climate change and natural resource sustainability.** The net decrease of \$21,300 relates: (i) to lower requirements under other staff costs (\$36,300), reflecting the consolidation of data compilation-related requirements under subprogramme 4, Statistics, the information society and technology; (ii) to increased requirements under travel of staff (\$15,000), reflecting a higher anticipated need for contextualized policy and capacity-building support at the national level; and (iii) to the proposed reassignment (cost-neutral), as reflected in annex II, of one Senior Programme Management Assistant (LL) post to a Data Analysis Assistant post, which would enhance capacity in modelling the impacts of climate change on the most vulnerable populations. The spending review, informed by the inputs of programme managers engaged in the review process, identified that the consolidation of activities related to digital transformation, (geospatial) data production and analytics under subprogramme 4 would enhance the effectiveness of data production and dissemination on climate-related issues.
- (c) **Subprogramme 2, Gender justice, population and inclusive development.** The cost-neutral changes relate: (i) to reduced requirements under experts (\$23,200) and contractual services (\$43,900), reflecting anticipated streamlining of activities and publications into interrelated events, back-to-back meetings, and joint flagship publications on various topics relating to gender and social justice; and (ii) to increased requirements under other staff costs (\$46,100) and travel of staff (\$21,000), reflecting higher anticipated needs for enhanced, customized technical and policy tools on gender and social justice, poverty reduction and social protection, and their subsequent transfer to member States through capacity-building activities at the national and regional levels. The spending review considered that the expert meetings held had resulted in a joint agreement on the road map for customized policy solutions for the region and thus concluded that future meetings could be further streamlined while still delivering the mandate in full. In addition, it was identified that the subprogramme needed to adjust its resources to focus more on providing member States with real-time data and artificial intelligence-based policy formulation tools on gender and social justice, poverty reduction and social protection, as well as in-person policy advice to new member States, including the least developed countries, to further implement the agreed policy road map.
- (d) **Subprogramme 3, Shared economic prosperity.** The increase of \$47,800 relates: (i) to higher requirements under other staff costs (\$58,400) to enable the development and enhancement of digital guidance and customized policy recommendation tools, such as the Arab trade simulator interface and the computable general equilibrium models; (ii) to increased requirements under

travel of staff (\$15,700), reflecting additional capacity-building activities required to further policy formulation, adoption and implementation at the national level; and (iii) to reduced requirements under contractual services (\$26,300) due to lower anticipated printing jobs, reflecting new production formats, including the digitization of technical materials and publications. The spending review identified the need to adjust resources to address the increasing requests for support and guidance on issues related to financing for development and trade and regional integration through customized policy recommendations and by supporting their implementation at the national level.

- (e) **Subprogramme 4, Statistics, the information society and technology.** The increase of \$308,500 relates to higher requirements under: (i) other staff costs (\$185,100), reflecting the need to design, develop and maintain specialized data solutions for member States, such as the United Nations Arab Region Data and Policy Support Hub; (ii) experts (\$23,200) due to additional expert group meetings planned on issues related to digital policies and data strategies; (iii) travel of staff (\$25,000), reflecting the roll-out of the data production and analysis tools at the national level and related capacity-building activities, as well as attending the World Data Forum; and (iv) contractual services (\$75,200) relating to requirements for the servicing of additional expert group meetings and an increased need for analytical capabilities in support of big data compilation, artificial intelligence analytics and dissemination. The spending review, informed by the strategy of the subprogramme under part A of the present report, concluded that there was a need: (i) to transform the skill sets, competencies and culture at ESCWA towards a modern, data-driven organization in the context of the Data Strategy of the Secretary-General; and (ii) to provide additional support, through dedicated specialized profiles and individual contractors, for the development, deployment and operationalization of the many new technology- and artificial intelligence-driven policy (impact) simulation tools developed under other subprogrammes and encompassed by the ESCWA data ecosystem, as a key means of supporting national development trajectories.
- (f) **Subprogramme 5, 2030 Agenda and SDG coordination.** The cost-neutral changes reflect increased requirements under travel of staff (\$5,000) to carry out additional policy tool-customization and related capacity-building activities at the national level and the expanding activities related to the Arab Forum for Sustainable Development, offset by reduced requirements under contractual services (\$5,000) due to lower printing requirements, reflecting the page limits assigned to all forms of content and the digitization of technical materials, promotional campaigns and publications. The spending review, informed by the digital transformation strategy deployed by the Commission, concluded that use of hard copy materials could be reduced while ensuring the effective dissemination of information. This allowed the redeployment of resources to increase the focus on supporting member States at the national level, in order to optimize efficient and effective mandate implementation.
- (g) **Subprogramme 6, Governance and conflict prevention.** The increase of \$19,400 under travel of staff relates to the need for increased support for member States in policy formulation and implementation on topics related to institutional reforms and governance. The spending review identified the need to adjust resources to provide for increased contextualized policy formulation and implementation support to member States, particularly the least developed countries and new member States, at the national level.
- (h) **Programme support.** The net decrease of \$254,800 relates to reduced requirements under:
- (i) General operating expenses (\$262,400), reflecting the anticipated reduction in requirements for ad hoc maintenance following the recent renovations of ESCWA premises;
 - (ii) Contractual services (\$253,000) mainly due to lower revision and ICT support requirements, reflecting the introduction of new technologies, including a “one-stop shop” portal for planning and requesting documents and meeting services, which helped to simplify business processes;

- (iii) Supplies and materials (\$20,200), reflecting the anticipated reduction in the use of paper and other office supplies in line with the digital transformation strategy of the Commission.

Offset in part by increased requirements under:

- (iv) Posts (\$214,400), relating to the proposed upward reclassifications, as reflected in annex II to the present document, of two Arabic Translator (P-3) posts to Arabic Revisor (P-4) posts; and to the proposed conversions, as also reflected in annex II, of one Senior Information Systems Assistant (LL) and one Information Systems Assistant (LL) general temporary assistance positions to established posts;
- (v) Other staff costs (\$56,500) to enable the development of new analytics and data management capabilities to maintain the United Nations Arab Region Data and Policy Support Hub and to establish a comprehensive cybersecurity programme and governance structure;
- (vi) Travel of staff (\$9,900), reflecting increased requirements for participating in training and workshops related to capacity-building on business continuity and risk management and on innovative artificial intelligence tools to optimize the impact of programme support function.

In addition, the following cost-neutral change is proposed:

- (vii) As reflected in annex II, the reassignment of one Property Control and Inventory Assistant (LL) post as a Data Analysis Assistant post.

Extrabudgetary resources

- 22.110 As reflected in tables 22.31 (2) and 22.32 (2), ESCWA expects to continue to receive cash contributions amounting to \$10,712,700. The resources would complement the regular budget and would be used mainly: (a) to implement activities related to climate mainstreaming, climate change adaptation to address water scarcity, and the centre for the advancement of emission reductions, under subprogramme 1; (b) to support Egypt in enhancing the effectiveness and efficiency of its national social protection system, as well as the organization of the second Arab Forum for Equality, and the “Josour initiative: To a better future for youth in the Arab Region” and its related activities, under subprogramme 2; (c) to enhance the operationalization of the initiative for additional member States, help ESCWA to strengthen the capacity of project countries in advancing finance for climate action and the Sustainable Development Goals and improve the outreach of ESCWA in order to advocate for the results of the initiative to regional and global stakeholders, deliver technical assistance to the Government of the Syrian Arab Republic, integrate analysis related to the Syrian Arab Republic in ESCWA regional work and provide a holistic approach to tackling social, economic and political challenges and provide lessons learned and comparative material for other countries in a conflict context (Iraq, Libya and Yemen) under subprogramme 3; (d) to provide technical support and advice for the development of a sustainable system of national accounts in Jordan under subprogramme 4; and (e) to provide technical expertise, build human and institutional capacities, mainstream peacebuilding and conflict prevention policies and enhance the capabilities of Palestinian institutions, to mitigate the impact of the Israeli occupation on social and economic development under subprogramme 6. The expected increase of \$1,285,800 is attributed to an increase in the level of contributions for the above-mentioned projects.
- 22.111 The authority to oversee the use of extrabudgetary resources rests with the secretariat of ESCWA, which has delegated authority from the Secretary-General.

Polymaking organs

- 22.112 The resources proposed under this component would provide for requirements relating to the servicing of standing intergovernmental organs and intergovernmental processes. The provisions for

intergovernmental organs and intergovernmental processes are in accordance with the rules of procedure of ESCWA and related amendments. ESCWA reports to the Economic and Social Council and the sessions of the Commission provide overall direction to the work of the secretariat.

22.113 Table 22.34 provides information on the standing intergovernmental organs and expert bodies and related resource requirements under the regular budget.

**Table 22.34
Policymaking organs**

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Executive Committee	The Committee develops interaction and consultation among members of ESCWA and the secretariat on substantive development issues. It facilitates direct and timely communication with member States and submits resolutions to the Economic and Social Council between ESCWA ministerial sessions.	Mandate: ESCWA resolution 320 (XXVIII) Membership: 21 government officials Number of sessions in 2024: 2	30.0	30.0
Statistical Committee	The Committee follows up on the progress of member States in the development of their statistical systems, provides technical advice, proposes training programmes and organizes workshops and seminars to strengthen their statistical capacity. It also assists member States in the standardization of national statistics for greater comparability at the regional and international levels and supports them in coordinating statistical data and information with the Statistical Commission and with other member countries, in particular, in surveys and censuses.	Mandate: ESCWA resolution 179 (XVI), as endorsed by the Economic and Social Council in its resolution 1993/2 Membership: 21 government officials Number of sessions in 2024: 1	–	18.5
Committee on Transport and Logistics	The Committee contributes to the establishment and formulation of priorities for the programmes of work and medium-term plans in the field of transport, monitors developments in the field of transport in ESCWA member States, monitors progress achieved in the activities of the ESCWA secretariat in the field of transport, ensures the participation of member States in international and regional conferences and coordinates efforts of member States relating to the implementation of resolutions and recommendations.	Mandate: ESCWA resolution 213 (XIX), as endorsed by the Economic and Social Council in its resolution 1997/11, and ESCWA resolution 229 (XXI) Membership: 21 government officials Number of sessions in 2024: 1	22.0	22.0
Committee on Technology for Development	The Committee follows up on regional priorities in the field of technology for development, including ICT, Internet governance, the digital economy and the information society, as well as areas related to scientific research and technology transfer. It also follows up on relevant regional and international processes, conferences and forums and coordinates regional efforts to implement the decisions and recommendations of those conferences, and supports cooperation with regional organizations, including LAS and other specialized organizations.	Mandate: ESCWA resolution 315 (XXVIII), as endorsed by the Economic and Social Council in its resolution 2014/35 Membership: 21 government officials Number of sessions in 2024: 1	–	18.5

Section 22 Economic and social development in Western Asia

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Committee on Trade Policies in the States Members of the Economic and Social Commission for Western Asia	The Committee is mandated to discuss priorities under the programme of work and medium-term action plans of the Commission in the field of trade policies; to follow up on progress in trade policies in member States and make recommendations in that regard; and to monitor developments in regional and international forums, conferences and processes with regard to trade policies and coordinate regional efforts to implement related resolutions and recommendations emanating from such platforms.	Mandate: ESCWA resolution 332 (XXX), as endorsed by the Economic and Social Council in its resolution 2019/30 Membership: 21 government officials Number of sessions in 2024: 1	–	18.5
Committee on Energy	The Committee participates in the planning, development and monitoring of the ESCWA programme of work in the field of energy. It follows up on developments in the energy sector and their impact on socioeconomic development in member States. It also ensures close regional cooperation among member States to improve their capacity to manage energy sources in an efficient and effective manner and to use renewable energy in achieving sustainable development.	Mandate: ESCWA resolution 204 (XVIII), as endorsed by the Economic and Social Council in its resolution 1995/25 Membership: 21 government officials Number of sessions in 2024: –	13.0	–
Committee on Water Resources	The Committee participates in the planning, development and monitoring of the ESCWA programme of work in the field of water resources. It follows up on regional and global developments in the water sector and their impact on socioeconomic development in member States. It also ensures close regional cooperation between member States to improve their capacity to manage water resources in an efficient and effective manner to achieve sustainable development.	Mandate: ESCWA resolution 205 (XVIII), as endorsed by the Economic and Social Council in its resolution 1995/26 Membership: 21 government officials Number of sessions in 2024: –	13.0	–
Committee on Social Development	The Committee participates in defining priorities for social programmes and activities and in formulating and developing the ESCWA programme of work in the area of social development; monitoring progress in social programmes and activities in ESCWA member States; adopting recommendations to strengthen regional social development processes; and following up on international and regional conferences and coordinating regional efforts to implement resulting resolutions and recommendations.	Mandate: ESCWA resolution 198 (XVII), as endorsed by the Economic and Social Council in its resolution 1994/27 Membership: 21 government officials Number of sessions in 2024: –	13.0	–
Committee on Financing for Development in the States Members of the Economic and Social Commission for Western Asia	The Committee is mandated to discuss priorities under the programme of work and medium-term action plans of the Commission in the field of financing for development; to follow up on progress in financing for development policies in member States and make recommendations in that regard; and to monitor developments in regional and international forums, conferences and processes with regard to financing for development and coordinate regional efforts to implement related resolutions and recommendations emanating from such platforms.	Mandate: ESCWA resolution 332 (XXX), as endorsed by the Economic and Social Council in its resolution 2019/30 Membership: 21 government officials Number of sessions in 2024: –	13.0	–

Part V Regional cooperation for development

			<i>appropriation</i>	<i>estimate (before recosting)</i>
Committee on Women	The Committee is mandated to follow up on global and regional conferences addressing women's advancement and facilitate the participation of member States in related global discussions. It is also tasked with the coordination of regional efforts to implement resolutions and recommendations.	Mandate: ESCWA resolution 240 (XXII), as endorsed by the Economic and Social Council in its resolution 2003/9 Membership: 21 government officials Number of sessions in 2024: –	13.9	–
ESCWA session	The ESCWA session, composed of a senior officials segment and a ministerial segment, is the highest governing body of ESCWA and is responsible for broad direction-setting. It follows up on programmatic implementation and technical cooperation activities and addresses salient development issues in the region, such as financing for development, the 2030 Agenda for Sustainable Development, climate change, young people and labour, social policies and technology for development.	Mandate: Economic and Social Council resolution 1818 (LV) Membership: 21 government officials Number of sessions in 2024: 1	–	10.4
Total			117.9	117.9

22.114 The proposed regular budget resources for 2024 amount to \$117,900 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 22.35 and figure 22.VI.

Executive direction and management

- 22.115 Executive direction and management is under the responsibility of the Executive Secretary, supported by the Deputy Executive Secretary for Programme, the Deputy Executive Secretary for Programme Support and the Secretary of the Commission. It comprises the Office of the Executive Secretary, the Strategy, Planning, Accountability, Results and Knowledge Section and the Resource Mobilization and Partnerships Section.
- 22.116 The Office of the Executive Secretary is responsible for coordinating and providing overall leadership, policy direction and management of the ESCWA secretariat to support member States, in collaboration with other entities of the United Nations system, with strategic analysis, policy guidelines and capacity-building activities to address key development challenges and issues and to implement innovative solutions for region-wide equitable and inclusive economic prosperity, social progress and environmental sustainability. The Office provides leadership and policy orientation and establishes criteria to coordinate follow-up in the region on implementing the 2030 Agenda for Sustainable Development and the Addis Ababa Action Agenda of the International Conference on Financing for Development, and the mainstreaming of cross-cutting issues, such as gender equality and the empowerment of women, and sustainability perspectives, throughout ESCWA substantive programmes.
- 22.117 The Strategy, Planning, Accountability, Results and Knowledge Section will continue to promote dynamism and innovation in the ESCWA business model and medium-term strategy and to act as a focal point for the annual results framework and related applications in Umoja. The Section will continue to be the basis for organizational learning processes, focusing accountability on the attainment of results and ensuring the operational excellence of ESCWA through risk reduction and change management processes. The Section will continue to manage the broader knowledge and dissemination processes of ESCWA.
- 22.118 The Resource Mobilization and Partnerships Section will continue to strengthen relationships with funding agencies and donors; maintain up-to-date regional and global donor mapping; coordinate and support project development, budgeting and fundraising; support and track implementation of extrabudgetary projects; assist ESCWA cluster leaders in building and enhancing institutional partnerships (regional and global); support cluster leaders' relationships with civil society and non-State actors and partners; and develop and negotiate legally binding partnerships and donor agreements.

Part V Regional cooperation for development

22.119 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Commission integrates environmental management practices into its operations. In 2024, the Commission expects to reduce its carbon footprint by 4 per cent of current carbon emissions.

22.120 Information on the timely submission of documentation and advance booking for air travel is reflected in table 22.36. ESCWA has made efforts to raise awareness among staff of the requirement to comply with the advance purchase guidance and, in this context, has put in place a procedure whereby travel requests not compliant with the advance booking policy have to be cleared by the Office of the Executive Secretary to hold project managers accountable for the late travel-related submissions. ESCWA will continue to pursue efforts to achieve its targets in 2024.

22.121 The proposed regular budget resources for 2024 amount to \$5,921,800 and reflect a decrease of \$99,600 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 22.109 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 22.37 and figure 22.VII.

Programme of work

Subprogramme 1

Climate change and natural resource sustainability

22.122 The proposed regular budget resources for 2024 amount to \$4,316,600 and reflect a decrease of \$21,300 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 22.109 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 22.38 and figure 22.VIII.

Subprogramme 1: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

22.123 Extrabudgetary resources for the subprogramme are estimated at \$3,663,300. The resources would be used mainly to support activities related to climate mainstreaming and capacity-building on climate change, sustainable energy systems, food security, and the centre for the advancement of emission reductions. These resources would complement the programme of work in supporting member States on climate finance and capacity-building on climate change, the work on the sustainable energy transition being undertaken by ESCWA. The expected increase of \$1,832,300 reflects mainly the requirements for the centre.

**Subprogramme 2
 Gender justice, population and inclusive development**

22.124 The proposed regular budget resources for 2024 amount to \$5,729,900 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 22.39 and figure 22.IX.

Table 22.39

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

22.125 Extrabudgetary resources for the subprogramme are estimated at \$555,200. The resources would be used mainly to support the implementation of the women and peace and security agenda among Arab States. These resources would complement the Commission’s ongoing effort to assist member States in formulating needed social protection policies and longer-term development programmes targeting all members of society, with a special focus on marginalized and vulnerable groups, to eradicate poverty and mitigate inequalities, while adopting a rights-based approach, in addition to the work on reducing inequality and the threat of inequality to social and political stability. The expected decrease of \$67,000 is due mainly to the finalization of projects started in 2023, including the project which supports the development of a comprehensive national social protection and reforms country profile of Egypt.

Subprogramme 3 Shared economic prosperity

22.126 The proposed regular budget resources for 2024 amount to \$4,846,200 and reflect an increase of \$47,800 compared with the appropriation for 2023. The proposed increase is explained in paragraph 22.109 (d). Additional details on the distribution of the proposed resources for 2024 are reflected in table 22.40 and figure 22.X.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

22.127 Extrabudgetary resources for the subprogramme are estimated at \$850,300. The resources would be used mainly to continue to provide technical assistance to the Government of the Syrian Arab Republic and to integrate analysis related to the Syrian Arab Republic in ESCWA regional work and provide lessons learned and comparative material for other countries in a conflict context (Iraq, Libya and Yemen), in addition to the initiative started by ESCWA on climate Sustainable Development Goals debt swaps. These resources will support ESCWA in enhancing the operationalization of the initiative for additional member States, help ESCWA to strengthen the capacity of project countries in advancing finance for climate action and the Sustainable Development Goals, and improve the Commission’s outreach to advocate for the results of the initiative to regional and global stakeholders. The expected decrease of \$667,700 is due to the finalization of projects started in 2023, including the projects that provide support for heavily indebted countries to develop climate action, debt swap programmes, advocacy and channels of engagement for civil society organizations.

**Subprogramme 4
Statistics, the information society and technology**

22.128 The proposed regular budget resources for 2024 amount to \$5,212,500 and reflect an increase of \$407,700 compared with the appropriation for 2023. The proposed increase is explained in paragraph 22.109 (e). Additional details on the distribution of the proposed resources for 2024 are reflected in table 22.41 and figure 22.XI.

Extrabudgetary resources

22.129 Extrabudgetary resources for the subprogramme are estimated at \$301,800. The resources would be used mainly to provide technical support and advice for the development of a sustainable system of national accounts in Jordan.

**Subprogramme 5
 2030 Agenda and SDG coordination**

22.130 The proposed regular budget resources for 2024 amount to \$2,266,200 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 22.42 and figure 22.XII.

**Subprogramme 6
 Governance and conflict prevention**

22.131 The proposed regular budget resources for 2024 amount to \$3,399,000 and reflect an increase of \$19,400 compared with the appropriation for 2023. The proposed increase is explained in paragraph 22.109 (g). Additional details on the distribution of the proposed resources for 2024 are reflected in table 22.43 and figure 22.XIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

22.132 Extrabudgetary resources for the subprogramme are estimated at \$130,100. The resources would be used mainly to provide technical expertise, build human and institutional capacities and mainstream peacebuilding and conflict prevention policies. These resources complement the activities related to technical assistance or capacity-building activities dedicated by the cluster towards building public sector capacities. These will include numerous trainings of civil servants on various methodologies and tools designed to strengthen risk-informed national policies and programmes, and contribute to knowledge creation through recurrent and non-recurrent publications. National and regional expert group meetings mandated in the regular budget programme, on governance and on risk or development challenges resulting from conflict, will benefit from the project’s various assessments

and diagnostics in the form of working papers and presentations. The expected decrease of \$111,800 is due mainly to the finalization of projects started in 2023, such as the Arab fund for economic and social development supporting the Palestinian people towards development and self-determination.

Programme support

- 22.133 Programme support comprises the Resource Management and Service Development Division. The component will continue to provide timely, effective and efficient administrative and logistical support to implement the Commission’s programme of work.
- 22.134 The proposed regular budget resources for 2024 amount to \$17,220,600 and reflect a net decrease of \$254,800 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 22.109 (h). Additional details on the distribution of the proposed resources for 2024 are reflected in table 22.44 and figure 22.XIV.

Figure 22.XIV
Programme support: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

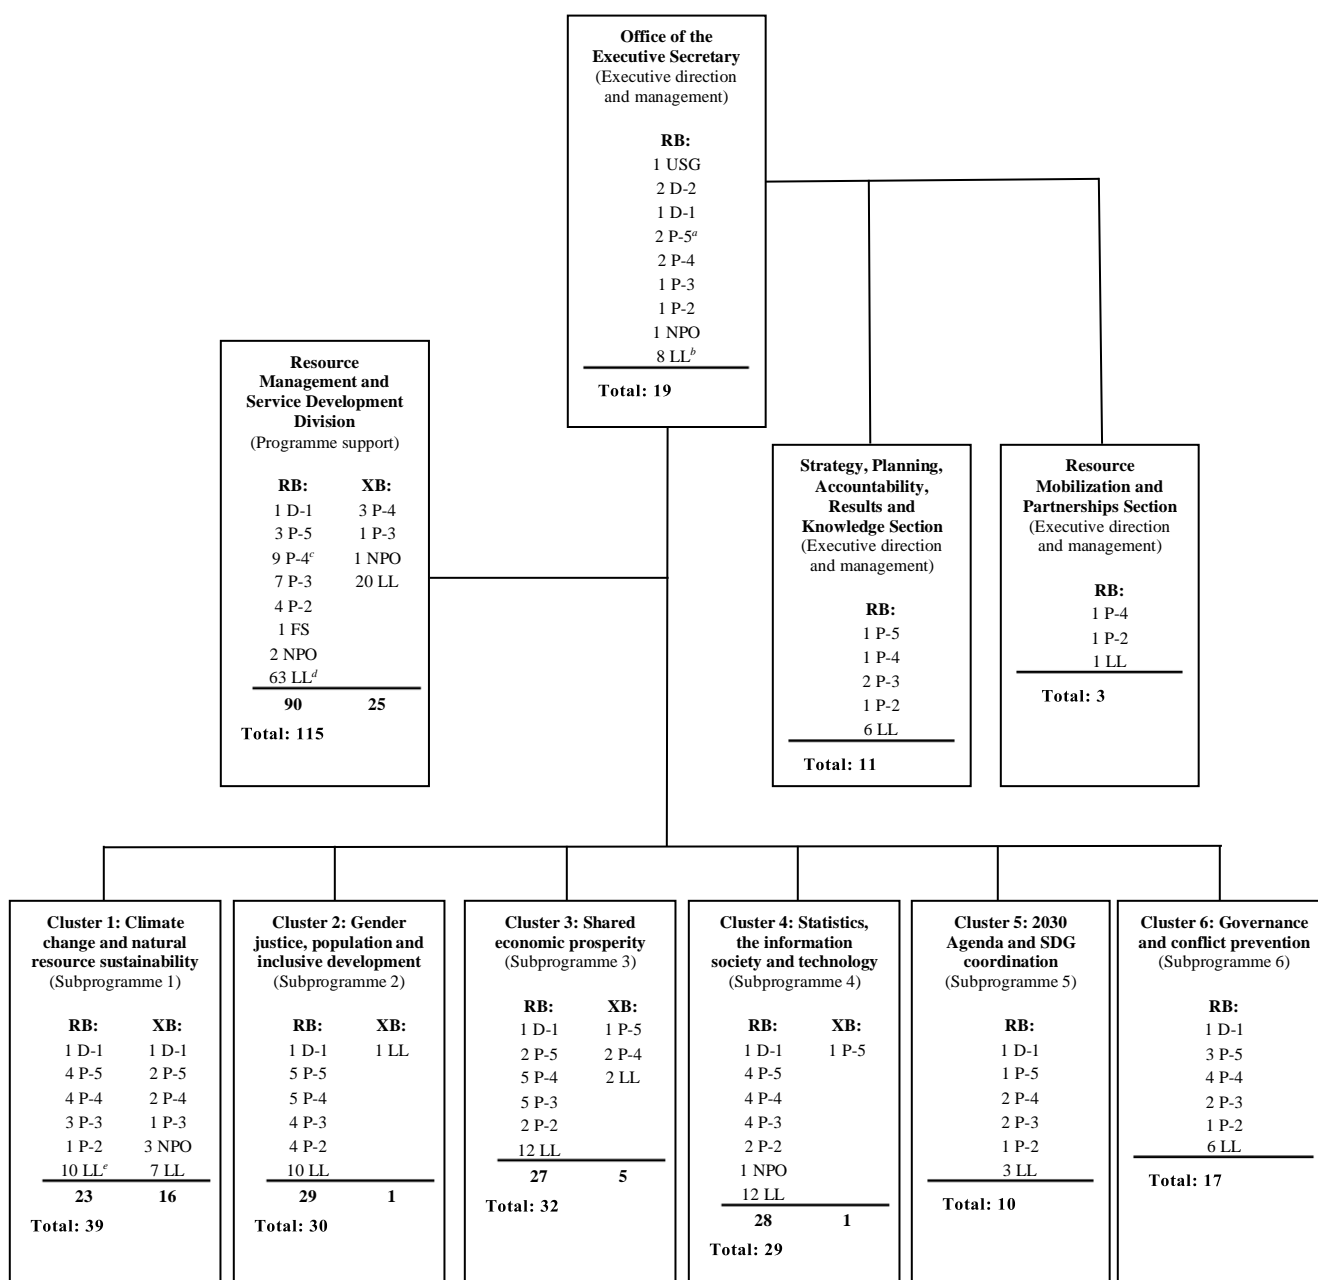

Extrabudgetary resources

22.135 Extrabudgetary resources for programme support are estimated at \$5,212,000. The resources will be used mainly to continue to support the areas of budget, finance, human resources, general administration and ICT. In addition, these resources will further strengthen the functions related to strategy, programme management, oversight, evaluation, enterprise risk management and coordination of the ESCWA technical cooperation programme. The expected increase of \$300,000 is due mainly to the anticipated increase in extrabudgetary resources requiring administrative support.

Annex I

Organizational structure and post distribution for 2024

Abbreviations: FS, Field Service; LL, Local level; NPO, National Professional Officer; RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.

^a Reassignment of one Senior Programme Officer (P-5) post as Chief of Staff post.

^b Reassignment of one Library Assistant (LL) post as Graphic Design Assistant post.

^c Reclassification of two Arabic Translator (P-3) posts to Arabic Reviser (P-4) posts.

^d Conversion of one Senior Information Systems Assistant (LL) and one Information Systems Assistant positions to posts, and reassignment of one Property Control and Inventory Assistant (LL) post as Data Analysis Assistant post.

^e Reassignment of one Senior Programme Management Assistant (LL) post as Data Analysis Assistant post.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-5	Reassignment of one Senior Programme Officer as Chief of Staff	The proposed reassignment is related to the need to strengthen workforce planning and management capacity of the Commission. The Chief of Staff, in line with the data-driven transformation strategy deployed by ESCWA, would support building a workforce with the new data skills and innovative capabilities that would enhance support to member States and would promote agility and foster a positive culture essential to: (a) leverage collaboration; (b) embrace new technologies; and (c) quickly adapt to new working methods and challenges.
Executive direction and management	1	LL	Reassignment of one Library Assistant as Graphic Design Assistant	The proposed reassignment is related to the reduced workload in the traditional library services and the increased demand for digital content on ESCWA repository and e-learning platforms. The Graphic Design Assistant would strengthen the capacity to develop and produce innovative content and support the timely and effective dissemination of information.
Subprogramme 1, Climate change and natural resource sustainability	1	LL	Reassignment of one Senior Programme Management Assistant as Data Analysis Assistant	The proposed reassignment is related to the need to enhance capacity in modelling the impacts of climate change on the most vulnerable populations and the production of data in the implementation of the Data Strategy of the Secretary-General using a well-integrated data ecosystem.
Programme support	2	P-3 to P-4	Reclassification of two Arabic Translators as Arabic Revisers	The proposed upward reclassification relates to the need to strengthen the in-house Arabic language services provided to member States. The proposed reclassifications would allow for the replacement of a two-stage translation and revision process with a single stage of self-revision, with quality control functions and end-to-end project coordination.
Programme support	2	LL	Conversion of one Senior Information Systems Assistant and one Information Systems Assistant	The proposed conversion of two general temporary assistance positions to posts is related to the need to stabilize the capacity required for the management and maintenance of the data ecosystem. The posts would strengthen the capacity: (a) for the development of new applications and portals, including interactive policy simulation platforms and artificial intelligence tools; and (b) to address data-related requests by member States.
Programme support	1	LL	Reassignment of one Property Control and Inventory Assistant as Data Analysis Assistant	The proposed reassignment is related to the need to strengthen the capacity required for the management and maintenance of the data ecosystem, including interactive policy simulation platforms and artificial intelligence tools.

Abbreviation: LL, Local level.

Annex

Summary of follow-up action taken to implement relevant recommendations of
advisory and oversight bodies 68

Overview

Overall orientation

- 23.1 The regular programme of technical cooperation, established by the General Assembly in its resolution 58 (I) in 1946, serves to support developing countries, least developed countries, countries with economies in transition and countries emerging from conflict in their capacity-development efforts. Currently, those efforts are geared towards the implementation of the 2030 Agenda for Sustainable Development, including the Sustainable Development Goals and other internationally agreed development goals, and the outcomes of United Nations conferences and summits. The programme's broad objective is to support and advance processes aimed at developing the capacity of Governments, through both individuals and institutions, to formulate and implement policies for sustainable economic and social development. The sharing of experiences across countries and regions, South-South cooperation, the use of national expertise from the beneficiary countries to the extent possible and the building of knowledge networks to facilitate continued exchange and assistance and promote sustainability are characteristic of the programme.
- 23.2 The programme enables the Secretariat to offer Member States access to the diverse global and regional specialized development expertise and knowledge readily available within the programme's implementing entities: the Department of Economic and Social Affairs, the five regional commissions (the Economic Commission for Africa (ECA), the Economic and Social Commission for Asia and the Pacific (ESCAP), the Economic Commission for Europe (ECE), the Economic Commission for Latin America and the Caribbean (ECLAC) and the Economic and Social Commission for Western Asia (ESCWA)), the United Nations Conference on Trade and Development (UNCTAD), the United Nations Office on Drugs and Crime (UNODC), the United Nations Human Settlements Programme (UN-Habitat), the Office for the Coordination of Humanitarian Affairs and the Office of the United Nations High Commissioner for Human Rights (OHCHR).
- 23.3 The capacity-development activities of the implementing entities draw substantively from their normative and analytical work and respond to the policy guidance and programmes of action agreed by Member States through the intergovernmental mechanisms. This enables developing countries to benefit from both the knowledge acquired through that work and from the experiences of different geographic regions, allowing for the sharing and exchange of innovative and good practices. Of equal importance is the contribution that the capacity-development work brings to the normative and analytical activities and, ultimately, to the support provided to the intergovernmental dialogue.
- 23.4 The defining feature of the programme is that it is demand-driven, responding to an expressed need by Member States for capacity-development support. At the same time, in order to ensure that services complement and are aligned with the overall and mandated strategic priorities of the implementing entities, they cannot be delivered solely on an ad hoc basis, but rather must be part of more strategic programmatic approaches based on a thorough understanding and appreciation of national needs.
- 23.5 Member States have recognized that part of the implementation of the 2030 Agenda is the adoption of new, transformative and innovative approaches to integrate sustainability into national development planning, policies, budgets, law, institutions and monitoring and accountability frameworks. Doing so will require considerable individual, institutional, analytical and statistical capacities to address the complexity and cross-cutting nature of the sustainable development challenges in a coherent and integrated fashion. While countries have made important strides in some of these areas, the challenges remain enormous. For this reason, capacity development is a central requirement to advancing the implementation of the 2030 Agenda and the Addis Ababa Action Agenda of the Third International Conference on Financing for Development.
- 23.6 The devastating effect of the coronavirus disease (COVID-19) pandemic is a challenge to hard-won development gains and hamper progress towards achieving the Sustainable Development Goals. With an already fragile global economy, the world is now facing simultaneous crises in food, energy and finance that threaten the economies of many developing countries. The agile modality of the

programme allows the implementing entities, when applicable, to support Member States in designing response measures to mitigate the adverse effects of the different crises for a sustainable and inclusive recovery. The programme will, inter alia, provide policy advice, facilitate the exchange of information, scientific knowledge and best practices and provide capacity development while increasingly adopting new and innovative approaches, including virtual training sessions, meetings and advisory services.

- 23.7 The programme will support countries in strengthening their resilience to external shocks and global crises leading to rising food prices, rising energy prices and tightening financial conditions, with dramatic implications for social cohesion, financial systems and global peace and security.
- 23.8 While the programme cannot address the many facets of these ongoing global challenges, the strategic use of the programme's resources facilitates quick responses and initial support by implementing entities and is complementary to other development funds, including the United Nations Development Account and extrabudgetary resources, which optimizes the programme's impact through strengthened linkages and follow-through.
- 23.9 Global and regional entities of the Secretariat implementing activities under the programme coordinate those activities through established internal mechanisms. The Executive Committee on Economic and Social Affairs, the main focus of which is the harmonization of its members' programmes, helps to achieve a rational division of labour and complementarity between the global and regional entities by promoting programmatic coordination and identifying synergies for operational work. At another level, the engagement of implementing entities within the United Nations Sustainable Development Group brings about greater awareness by a larger group of entities of the specific expertise and operational strengths available in the United Nations system, thereby increasing potential cooperation to implement projects and undertake operational work at the country level, and improving system-wide coherence in the context of relevant country processes and cooperation frameworks.

Coordination with the resident coordinator system and other partners

- 23.10 The implementing entities of the programme are all non-resident agencies. As such, they engage with the Resident Coordinator and resident agencies to maximize the impact of country-level development work. Such cooperation enables access to up-to-date information on national development priorities and better positioning in the broader development cooperation environment. For resident agencies, it enables access to the knowledge and expertise of non-resident agencies. This cooperation can include joint programming, including through the common country assessment, the United Nations Sustainable Development Cooperation Framework and the poverty reduction strategy paper process, as well as joint needs assessments, joint work plans and, where appropriate, joint fundraising.
- 23.11 Many non-resident agencies have entered into institutional cooperation agreements with resident agencies, often in the form of memorandums of understanding. Some Resident Coordinators have a dedicated liaison officer to engage with non-resident agencies. There has been improvement in non-resident agency/resident agency cooperation in terms of better communication and coordination, including through increased awareness of each other's mandates, participation in knowledge networking and better advance planning by the non-resident agencies when undertaking country missions by directly engaging with the resident coordination offices and resident agencies on country-level work. The development and adoption of the standard operating procedures for countries wishing to adopt the "Delivering as one" approach is an important milestone in providing concrete, flexible solutions for United Nations country teams that are in line with the reform agenda, as formulated in the resolution on the quadrennial comprehensive policy review.
- 23.12 Cooperation with partners within the broader development assistance community, including the Bretton Woods institutions, the Organization for Economic Cooperation and Development (OECD), regional development banks and other regional organizations will continue to be pursued as partners work together to align with and improve coherence of development priorities among country clusters (least developed countries/landlocked developing countries/small island developing States), within

regional and subregional groupings, and at the country level for greater impact of the programme's activities in the field.

Objective and strategy

- 23.13 The overarching objective that guides the programming of the resources allocated to individual entities under the programme and the overall strategy and criteria followed for implementation are:
- (a) **Objective.** The objective to which each subprogramme of the entities of the regular programme of technical cooperation contributes can be found in the relevant fascicle of the proposed programme plan for 2024 (A/78/6), for each implementing entity;
 - (b) **Strategy.** The strategy to promote the above objective consists of:
 - (i) Responding to the requests of Governments for urgent advice on policy-related issues;
 - (ii) Providing Governments with specific advice on sectoral matters relevant to their development strategies and programmes;
 - (iii) Assisting Governments in the formulation or evaluation of programmes and projects leading to the enhancement of national programmes;
 - (iv) Developing networks of experts and practitioners in the respective sectoral areas to facilitate information-sharing, synergies and potential collaboration, especially through information and communications technology (ICT), workshops and seminars;
 - (c) **Criteria.** The following criteria are relevant to all implementing entities of the programme:
 - (i) Activities should be responsive primarily to the requests of developing countries and be of a short-term nature (i.e., conceived and implemented within less than two calendar years); longer-term initiatives that require a phased approach and that build on knowledge acquired through previous interventions may continue, pending the mobilization of external resources;
 - (ii) Activities should fall within one of the priority areas of the implementing entity as mandated by its governing body, and the entity should play a demonstrable leadership role in normative and analytical functions relating to the activities;
 - (iii) Activities should build capacity in developing countries, including for meeting treaty and related normative obligations and, through the sharing of experience gained at the country level, enrich the analytical functions of the implementing entity for the benefit of all Member States;
 - (iv) Activities that aid in the preparation of specialized components of a country's development strategy or that help to prepare requests for larger-scale funding from other sources are encouraged.
- 23.14 In line with General Assembly resolution [2514 \(XXIV\)](#) and Economic and Social Council resolution [1434 \(XLVII\)](#), activities financed under the present budget section will continue to focus on short-term advisory services, training and field projects, as outlined below. Activities will be based on needs expressed by Member States and by regional and subregional cooperation groups, either at the request of a State or as guided by the intergovernmental process, bearing in mind the criteria set forth for the purposes and uses of the programme.

Short-term advisory services

- 23.15 Advisory services ensure the provision of high-level technical expertise, the transfer of knowledge from global and regional entities to Governments on policy-related issues and development strategies and the formulation, assessment or evaluation of projects and programmes. The core of the programme is built around regional and interregional advisers who are specialists in both capacity development and in the substantive knowledge of the subprogramme. These advisers represent the critical interface between the countries and the implementing entities, facilitating country-level

access to the expertise of the Organization. Advisory services may also be provided by national consultants, supported by the implementing entity, or any other member of staff tasked with programming funds of the regular programme of technical cooperation. Services may be provided through an advisory mission, involving travel to the target country, by virtual or hybrid means. Advisory services may lead to the formulation of technical cooperation projects, implemented either by a Government or in partnership with a United Nations entity. Advisory services may also lead to United Nations Development Account projects, providing a natural platform to pursue longer-term and sustainable support to the countries.

- 23.16 To ensure that the pool of interregional/regional advisers represents the highest calibre of technical skills and knowledge, all implementing entities of the programme have committed to updating their advisory capacities so as to be able to replace advisers as needed to ensure that they have the best skills and knowledge to respond to the changing needs of Member States. Extensions are reviewed on an annual basis by senior-level departmental panels and include a review of the advisory services provided during the past period and an examination of a results-based workplan, which is fully integrated within the subprogramme's technical cooperation programme, for the forthcoming period. While there is an annual review of the advisory skills needed during the next period, the positions are automatically redefined at the five-year mark to better respond to the changing needs of countries and to address new and emerging concerns. Doing so may result in a total change of competencies and skills or the redefinition of the positions' sectoral focus to address a specific technical area.
- 23.17 In line with past intergovernmental guidance, the implementing entities have taken steps to utilize complementary resources for the provision of advisory services, including the recruitment of short-term advisers who respond to very specific, distinct assignments of a limited duration, as well as consultancy assignments, in which national and regional expertise are drawn upon, in particular when addressing issues that are country-specific and for which expert knowledge of national or regional issues is fundamental in ensuring the most relevant and targeted support. The entities also rely on national or regional institutions, in particular in the context of national workshops, which ensures the transfer of local knowledge and expertise and promotes local follow-up actions.

Field projects

- 23.18 Field projects provide a link between research and analysis that is based on implementation experiences and provide opportunities to test-drive policy or other normative recommendations on a small scale in which the impact can be quickly and closely gauged. The projects are designed in response to demands by Member States regarding a clearly articulated need, while simultaneously reflecting programmatic and subprogramme priorities. They are longer-term initiatives and are often supplemented by extrabudgetary resources or the United Nations Development Account in order to scale up their activities. Such projects may be country-based but can also be interregional or subregional.

Training

- 23.19 Training is aimed at building knowledge and skills that will contribute to strengthening national capacity for policy development and the effective implementation of national policies. Training is often conducted through seminars and workshops, as well as through the provision of short-term fellowships, which foster peer-to-peer opportunities for learning. The exchange of good practices and South-South cooperation are consistently fostered. The main consideration guiding the training conducted under the programme is that the topics should play a catalytic role in the development process and should contribute to linking local needs and conditions with the follow up of major conferences. Even where the organizing entity is a global one, the participation of the relevant regional commissions is encouraged in the interest of sustainability and continued regional support after the event.
- 23.20 Training is undertaken in response to an identified capacity gap in one or more countries and at the request of Member States. Interregional advisers, staff and/or consultants may lead and participate in seminars and workshops by developing training modules, facilitating discussions and providing

hands-on training. Training can be held virtually, in-person or through a hybrid means. Seminars and workshops are held at the subnational, national and regional levels.

Alignment and complementarity of the regular programme of technical cooperation and the United Nations Development Account

- 23.21 Implementing entities have used the complementarity of the activities of the regular programme of technical cooperation and the United Nations Development Account, as well as extrabudgetary resources, to create multiplier effects that contribute to longer-term sustained development results. Initial support funded by the regular programme is often followed through by developing projects by the United Nations Development Account and extrabudgetary resources. For example, advisory missions undertaken under the regular programme of technical cooperation may lead to the establishment of United Nations Development Account projects that provide a natural platform to pursue longer-term and sustainable support to countries. This serves to enhance the multiplier effects that contribute to longer-term, sustained impact.

Status of internal assessment

- 23.22 Considering the decentralized nature of the regular programme of technical cooperation, each implementing entity assesses the results of its regular programme activities and conducts periodic evaluations. The Department of Economic and Social Affairs engaged the support of an independent consultant for the preparation of the eighth progress report, covering 2022. The report is expected to be finalized in May 2023 and will provide information on, inter alia: (a) results achieved; (b) linkages between the regular programme, the United Nations Development Account, extrabudgetary resources and the resident coordinator system; (c) the programme's outreach; and (d) the programme's delivery modalities. The consultant is expected to work with all 11 implementing entities to come up with a minimum common standard for reporting on their activities under the regular programme of technical cooperation to serve as a basis for all future progress reports.

Office of Internal Oversight Services evaluation of section 23

- 23.23 In response to recommendations made by the Advisory Committee on Administrative and Budgetary Questions in paragraphs V.103, V.111 and V.112 of its report ([A/77/7](#)) and endorsed by the General Assembly in its resolution [77/262](#), the Office of Internal Oversight Services is undertaking an evaluation of the regular programme of technical cooperation. The evaluation is expected to assess, as systematically and objectively as possible, the relevance, effectiveness and coherence of regular programme support to Member States to enhance their capacities to formulate, revise and/or implement policies, guidance, strategies and laws. The work on the evaluation started in the first quarter of 2023 and will continue during the rest of 2023, with the outcome being a final report that would be reviewed by the Committee for Programme and Coordination in May 2024, followed by subsequent reviews by the Advisory Committee and the Assembly.

Overview of resources for the regular budget

- 23.24 As reflected in table 23.1 and table 23.2, the overall resources proposed for 2024 amount to \$44,874,500 before recosting and reflect an increase of \$1,500,000, or 3.5 per cent, compared with the appropriation for 2023. Resource changes result from other changes. The overall increase takes into account anticipated additional demand for support in specific areas, including in the context of continuing recovery from the impact of the COVID-19 pandemic. In response to the anticipated increase in the volume of requests for assistance from Member States, all implementing entities would provide additional support to Member States, for example, the Department of Economic and Social Affairs expects to provide targeted capacity development in tax and domestic resource mobilization, infrastructure asset management and risk-informed development cooperation.
- 23.25 The proposed level of resources provides for the full, efficient and effective implementation of mandates.

I. Sectoral advisory services

1. Economic and social affairs

A. Programmatic activities delivered through the regular programme of technical cooperation

23.26 The activities under economic and social affairs are implemented by the Department of Economic and Social Affairs. The programmatic activities are implemented under the following subprogrammes of the Department: subprogramme 2, Inclusive social development; subprogramme 3, Sustainable development; subprogramme 4, Statistics; subprogramme 5, Population; subprogramme 6, Economic analysis and policy; subprogramme 7, Public institutions and digital government; subprogramme 8, Sustainable forest management; and subprogramme 9, Financing for sustainable development.

23.27 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2024 ([A/78/6 \(Sect. 9\)](#)).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

23.28 The Department of Economic and Social Affairs leverages many different engagement channels to promote the regular programme of technical cooperation. Its website provides information on its projects, approach and funding modalities and houses an interactive map as well as audiovisual material. Targeted engagement with government officials, including permanent representatives, from developing countries also takes place in the context of intergovernmental meetings, conferences and workshops, for example, via sessions of the United Nations Forum on Forests, the United Nations Tax Committee, the Commission on Population and Development. Given the demand-driven nature of the regular programme, raising awareness of the Department's offering for Member States is integral for all communications.

- 23.29 The Department of Economic and Social Affairs also builds on its convening power and has put in place global networks to discuss pertinent issues and raise aware of the products and services available. Its Statistic Division uses the Global Network of Data Officers and Statisticians as a strategic outreach tool to engage with national statistical offices and respective United Nations country teams. The network has helped to advance several capacity-development objectives, by sharing suggestions for modernizing and strengthening national statistical systems; applying statistical standards and new data architecture for data sharing, exchange and integration; and facilitating the use of new technology and new data sources in statistical production processes. Similarly, systematic outreach on the support offered by the regular programme of technical cooperation for capacity-development and technical assistance has provided information about the United Nations policy and support on tax and domestic resource mobilization for sustainable development.
- 23.30 The Department of Economic and Social Affairs Digital Learning Centre is a curated repository of the Department's digital capacity-building portfolio, which includes self-paced courses and microlearning and is open to anyone interested in learning together with our experts. We see digital engagement and connecting with our stakeholders through the platform as a privilege that allows us to overcome time and space restrictions and offer our content to a much larger audience.

Complementarity with the resident coordinator system

- 23.31 The current approach of the Department of Economic and Social Affairs to country-level support, including interventions funded by the regular programme of technical cooperation, is fully aligned with the new role and functions of the resident coordinator system. Activities funded by the regular programme are triggered by direct government requests for the Department's expertise or by resident coordinators' requests, either on behalf of a Government or to address capacity-development needs expressed in the United Nations Sustainable Development Cooperation Framework that cannot be fulfilled by regional and/or United Nations country team entities. The implementation of the Department's activities funded by the regular programme is governed by the Department's standard operating procedures for country-level engagement in the context of the new resident coordinator system, which were published in May 2020. When responding to direct government requests for the Department's expertise, the standard operating procedures require the Department's staff to inform the resident coordinator and the United Nations country team to ensure coordination with existing team efforts and enable the necessary changes in the Cooperation Framework and country team configuration to embed the capacity at the country level, in accordance with the Cooperation Framework guidelines. The participation of the Department in the formulation and implantation of the Cooperation Framework, including as a country team member, has provided an opportunity to establish closer collaboration and partnerships with country team entities for the implementation of specific outputs or suboutputs of the Cooperation Framework, including through joint programmes and resource mobilization.

Review of high-level positions at headquarters duty stations (Department of Economic and Social Affairs)

- 23.32 The main function of interregional advisers based at headquarters duty stations is to provide technical expertise, facilitate the transfer to Governments of knowledge from global deliberations and latest analytical work, and contribute to the formulation, assessment and/or evaluation of national policies, strategies, programmes and projects of Member States, at their request. The roles and functions are reflected in the job descriptions and terms of reference and are classified at the appropriate level. Any new appointments and extensions of appointments of interregional advisers are considered annually on the basis of the departmental panel review and recommendation and by the Head of the Department for approval prior to the submission of the budget.

Response provided to Member States' requests for support in 2022**Strengthened economic analysis and knowledge of development policy options for accelerating progress towards achieving the Sustainable Development Goals, including through the recovery from the pandemic and the leveraging of megatrends**
(result 1 of subprogramme 6 of [A/78/6 \(Sect. 9\)](#))

- 23.33 In 2022, subprogramme 6, Economic analysis and policy, collaborated with Governments and resident coordinator offices to respond to requests for capacity-building on the use of climate, land use, energy and water systems methodology in sub-Saharan Africa and African small island developing States. The climate, land use, energy and water systems tool provides a means to analyse and assess the interlinkages that exist among energy, water and agricultural systems, as well as their impacts on and vulnerability to climate change. The capacity-building on climate, land use, energy and water systems built on the successful implementation of the United Nations Development Account project “Enhancing policy coherence for the Sustainable Development Goals through integrated assessments and institutional strengthening in Africa”.
- 23.34 The subprogramme also responded to requests from Member States to further develop an enhanced monitoring mechanism, including a crisis response process, in line with the Doha Programme of Action for the Least Developed Countries (see General Assembly resolution [76/258](#), annex, para. 284). The objective was to improve the effectiveness of the monitoring of crisis indicators, including those that can present socioeconomic impacts. Member States in various formal stages of graduation showed strong interests in and commitments to participating in the mechanism and requested continued technical support by the subprogramme on the issue. The activity was closely linked to two longer-term projects funded by the United Nations Development Account and the United Nations peace and development trust fund. Consultation meetings and workshops were held in several countries on the graduation and monitoring of least developed countries financed under the regular programme of technical cooperation.
- 23.35 The above-mentioned work contributed to strengthened economic analysis and knowledge of development policy options for accelerating progress towards achieving the Sustainable Development Goals, including through the recovery from the pandemic and the leveraging of megatrends, which is reflected in result 1 of subprogramme 6, and the related performance measure, in the proposed programme budget for 2024 ([A/78/6 \(Sect. 9\)](#)) (see table 23.3 and figure 23.III).

Table 23.3

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Member States have access to policy recommendations on addressing the short- and long-term impacts of COVID-19 on sustainable development	Member States benefited from increased knowledge and analysis on the economic and social benefits and challenges posed by new technologies	Member States have access to policy recommendations on two new thematic issues: the influence of new technologies on the structure of the economy and the impact of ongoing population ageing	Member States will have access to an up-to-date analysis on inequalities, as well as on other major socioeconomic challenges, and sustainable development policy recommendations to resolve them	Member States will have access to an up-to-date analysis of the major challenges to sustainable development stemming from the recurrent crises, and policy recommendations to resolve them

Figure 23.III
Performance measure: number of least developed countries participating in the enhanced monitoring mechanism

Expected responses to anticipated requests for support in 2024

Interdisciplinary look at implementation of the Sustainable Development Goals – the *Global Sustainable Development Report*

(result 2 of subprogramme 3 (A/78/6 (Sect. 9)))

- 23.36 In 2024, subprogramme 3, sustainable development, will focus on assisting countries in providing the following: (a) technical advice on policy options and their implications, aimed at generating countries' adoption or launch of transformative policies and new commitments to advance progress towards the Sustainable Development Goals, with people at the forefront; (b) capacity-building in the four areas identified in the 2023 *Global Sustainable Development Report* (innovation, strategic direction, impediments and disturbances); (c) training for government officials and policy practitioners on national strategies and plans of action, including on localization of the Goals; science, technology and innovation for Goals-related road maps; and mobilizing multi-stakeholder engagement and partnerships to accelerate implementation of the Goals; and (d) advisory services and policy advice, technical support, technical cooperation and assistance to the least developed, developing and middle-income countries in relation to Sustainable Development Goal 6 acceleration actions.
- 23.37 The subprogramme will pursue its capacity-development goals and objectives by working closely with United Nations country teams and resident coordinators and United Nations regional economic commissions and other partners, building on complementarity and thereby boosting the capacity of developing countries and middle-income countries to develop and implement national development strategies and plans and to effectively implement the 2030 Agenda and achieve the Sustainable Development Goals by the target date of 2030, leaving no one behind.
- 23.38 The expected responses in 2024 would contribute to an interdisciplinary look at implementation of the Sustainable Development Goals – the *Global Sustainable Development Report*, which is reflected in result 2 of subprogramme 3, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 9)) (see table 23.4).

Table 23.4

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
<p>Member States decide to use the levers and entry points of the 2019 report as the framework for the thematic review of the Sustainable Development Goals during the 2020 high-level political forum on sustainable development</p> <p>The Secretary-General appoints a new group of 15 scientists for the preparation of the 2023 <i>Global Sustainable Development Report</i></p>	<p>The new independent group of scientists gave a briefing to Member States during the 2021 high-level political forum on sustainable development with the outline of the report finalized</p> <p>A call for inputs is widely circulated to secure evidence from stakeholders, including underrepresented communities</p>	<p>Member States received a briefing by the independent group of scientists during the 2022 high-level political forum, and participated in regional consultations, providing context-specific insights to inform the <i>Global Sustainable Development Report</i></p>	<p>The 2023 <i>Global Sustainable Development Report</i> is formally launched in September</p> <p>A first series of global and regional briefings will start immediately after the launch, with a focus on localizing the global calls for action to support implementation in different contexts</p>	<p>Member States integrate the findings of the report into their national development strategies and policies</p> <p>Appointment of a new group of 15 scientists for the preparation of the 2027 <i>Global Sustainable Development Report</i></p>

Enhanced innovation and digital government transformation for effective and inclusive public service delivery

(result 3 of subprogramme 7 ([A/78/6 \(Sect. 9\)](#)))

- 23.39 In 2024, subprogramme 7, Public institutions and digital government, will focus on expanding capacity-development support for the following: (a) strengthened governance and public institutions and improved human resource capacities in support for the decade of action, including through partnerships with regional commissions and the resident coordinator system; (b) equipping public servants with the capacities to realize the 2030 Agenda including strengthened skills on leadership, institutional arrangements for policy coherence, transparency and integrity in the public service, digital government, digital transformation and innovations in public service delivery; (c) promoting innovation in public governance; (d) supporting supreme audit institutions on auditing the achievement of the Sustainable Development Goals; and (e) promoting and leveraging public governance innovative practices and digital government strategies.
- 23.40 Digitalization continues to be an important tool to accelerate innovation and the provision of public service delivery, as countries struggle to recover from the COVID-19 pandemic. In response to requests from countries, the digital government capacity-assessment tool will continue to support Governments to identify challenges and enablers for digital government transformation and to prepare action plans and road maps.
- 23.41 In addition, the curriculum on governance for the Sustainable Development Goals will continue to be applied through a train-the-trainers approach in order to reach a larger audience of civil servants in support of innovation and digital government transformation. This work will complement a United Nations Development Account project on digital government transformation in the Caribbean region. The subprogramme will maximize its use of resources and coverage by using virtual and hybrid meeting formats whenever possible. It will also continue to work closely with Resident Coordinators and United Nations country teams and partner with regional economic commissions, while leveraging country offices of the Department of Economic and Social Affairs in the Republic of Korea.

23.42 The expected responses in 2024 would contribute to enhanced innovation and digital government transformation for effective and inclusive public service delivery, which is reflected in result 3 of subprogramme 7, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 9)) (see figure 23.IV).

Figure 23.IV

Performance measure: number of civil servants supporting the preparation of action plans and road maps on innovation and digital government (annual)

B. Deliverables

23.43 Table 23.5 contains a list of all expected deliverables, by category and subcategory, for the period 2022–2024.

Seminars, workshops and training events (number of days)	268	229	347	334

C. Proposed non-post resource requirements for 2024

Table 23.6

Financial resources by object of expenditure

(Thousands of United States dollars)

	2022 expenditure	2023 appropriation	Changes		2024 estimate (before recosting)
			Total	Percentage	
Other staff costs	6 132.5	7 093.1	(173.8)	(2.5)	6 919.3
Consultants	1 061.3	596.8	325.9	54.6	922.7
Experts	141.1	–	–	–	–

Part V Regional cooperation for development

	2022 expenditure	2023 appropriation	Changes		2024 estimate (before recosting)
			Total	Percentage	
Travel of staff	723.2	431.2	366.1	84.9	797.3
Contractual services	345.8	111.0	110.0	99.1	221.0
General operating expenses	248.5	158.1	(114.6)	(72.5)	43.5
Supplies and materials	0.1	–	–	–	–
Furniture and equipment	18.7	15.7	34.3	218.5	50.0
Grants and contributions	757.8	1 521.4	26.7	1.8	1 548.1
Total	9 428.9	9 927.3	574.6	5.8	10 501.9

23.44 The proposed regular budget resources for 2024 amount to \$10,501,900 and reflect a resource increase of \$574,600, or 5.8 per cent, compared with the appropriation for 2023. The proposed increase is attributable mainly to increases under consultants (\$325,900), travel of staff (\$366,100) and contractual services (\$110,000), offset in part by decreases under other staff costs (\$173,800) and general operating expenses (\$114,600), in line with expected demands from Member States in 2024.

2. Trade and development

A. Programmatic activities delivered through the regular programme of technical cooperation

23.45 The activities under trade and development are implemented by UNCTAD. The programmatic activities are implemented under all subprogrammes of UNCTAD.

23.46 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2024 (A/78/6 (Sect. 12)).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

23.47 In line with the demand-driven nature of the regular programme of technical cooperation, UNCTAD raises awareness of the opportunities for developing countries to gain access to assistance from the programme resources through outreach and UNCTAD notifications on various training offerings, in addition to face-to-face meetings with government officials, including permanent representatives, from developing countries in the context of intergovernmental meetings, conferences and various capacity-building events organized by the entity. Those formal and informal settings pave the way for assessments of country needs and to match them with subject-matter experts. In this context, on the provision of training for government officials and policy practitioners on key issues on the international economic agenda (the “paragraph 166” course), UNCTAD coordinates its delivery to ensure all subprogrammes are engaged in the assessments, regional economic commissions and the host countries. UNCTAD also works closely with the permanent missions to the United Nations based in Geneva with respect to the processes involved in the nominations of capital-based policymakers for regional courses, on the one hand, and the selection of topics for short courses, on the other hand. For instance, both the UNCTAD notifications for regional and short courses are channelled via the permanent missions in Geneva, with the former geared toward capitals and the latter toward Geneva-based delegates. In addition, UNCTAD works extensively with the host countries on the coordination and substance, including national and regional economic trajectory experiences, to relay and enhance knowledge among policymakers from across developing regions.

This ensures the delivery of comprehensive training. Selected participants – policymakers – are the main beneficiaries of this capacity-building programme.
