- 23.48 UNCTAD has also made constant efforts to disseminate the opportunities for assistance through the regular programme of technical cooperation to partner universities and think tanks such as the European University Institute in Florence, Italy, the Nelson Mandela Institute in Cape Town, South Africa, and other universities to deliver presentations and disseminate research findings on specific areas of work such as the rules of origin and the geographical indications. In the case of its Automated System for Customs Data (ASYCUDA) programme, UNCTAD participates in a large number of partnerships and events with other international organizations, such as World Customs Organization, the World Trade Organization, the International Civil Aviation Organization, the secretariat of the Convention on International Trade in Endangered Species of Wild Fauna and Flora, the Food and Agriculture Organization of the United Nations, etc, which further enhances its outreach efforts. The programme's staff is furthermore in regular contact with customs administrations of recipient and non-recipient countries, as well with regional economic communities, including through a network of dedicated regional project officers that cover each major developing region.

Response provided to Member States' requests for support in 2022

Women digital entrepreneurs empowered to build a more inclusive digital economy (result 1 of subprogramme 4 ([A/78/6 \(Sect.12\)](#)))

- 23.49 Subprogramme 4, Technology and logistics, contributes to harnessing innovation and technology, including e-commerce and the digital economy, improving trade logistics and increasing human capacity for inclusive and sustainable trade and development in developing countries and economies in transition. In 2022, the subprogramme deepened its engagement with developing countries on assessing the state-of-play of their e-commerce enabling environment through eTrade Readiness Assessments and assisting them in the development of E-commerce Strategies and Action Plans to serve as road maps of how e-commerce can support their strategic development goals.
- 23.50 Four eTrade Readiness Assessments, including one at the regional level, were completed in 2022 – for Jordan, Kenya, the Economic Community of West African States (ECOWAS) and Tunisia – bringing the total number of Assessments conducted to date to 32. In Kenya, the Assessment resulted in the development of a draft national e-commerce strategy in consultation with public and private stakeholders. The strategy aims to be complementary to the regional East African Community e-commerce strategy, which draws on findings from recent studies and assessments conducted by various development partners, including the Assessments of the United Republic of Tanzania and Uganda, as well as the e-commerce strategy of Rwanda (all led by UNCTAD). In ECOWAS, the regional Assessment built on the eight Assessments undertaken by UNCTAD for ECOWAS member States between 2018 and 2020 and was the first step towards the development of a regional e-commerce strategy – the first in West Africa.
- 23.51 In 2022, UNCTAD continued to foster synergies among development partners, facilitate access to e-commerce capacity-building development solutions and monitor progress on the implementation of eTrade Readiness Assessment recommendations in beneficiary countries through the Assessment implementation support mechanism. The second review was released in 2022 during the e-commerce week and confirmed a positive trend in implementation, with an average implementation rate of 59 per cent for the 14 participating countries, up from 50 per cent the year before.
- 23.52 Support offered by the regular programme of technical cooperation complemented the work undertaken through the regular budget for section 12, which emphasizes the specific needs and critical weaknesses of developing countries, in particular the least developed countries, with regard to national e-commerce ecosystems with the aim of proposing concrete action for Governments to improve their e-commerce ecosystems.

23.53 The above-mentioned work contributed to women digital entrepreneurs being empowered to build a more inclusive digital economy, which is reflected in result 1 of subprogramme 4, and the related performance measure, in the proposed programme budget for 2024 (*A/78/6 (Sect. 12)*) (see table 23.7).

Table 23.7
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Improved business and leadership skills of 50 women digital entrepreneurs participating in eTrade for Women activities	Improved business and leadership skills of a cumulative total of 200 women digital entrepreneurs participating in eTrade for Women activities and three new communities established, in South-East Asia, East Africa and the Western Balkans	Improved business and leadership skills of a cumulative total of 240 women digital entrepreneurs participating in eTrade for Women activities throughout six active Trade for Women communities	Improved business and leadership skills of a cumulative total of 300 women digital entrepreneurs participating in eTrade for Women activities. At least four eTrade for Women communities active across regions	Improved business and leadership skills of a cumulative total of 400 women digital entrepreneurs participating in eTrade for Women activities. At least six eTrade for Women communities active across regions

Expected response to anticipated requests for support in 2024

Holistic approach to effective and integrated policy responses in a changing global economy – the “paragraph 166” programme

Enhanced policymaking capacities to facilitate economic diversification through increased data capacities in services trade

(result 3 of subprogramme 3 (*A/78/6 (Sect. 12)*))

- 23.54 In 2024, all subprogrammes are expected to continue to support government officials and policy practitioners in developing countries on key issues on the international economic agenda, with a view to increasing their capacity to build more effective and integrated policy responses to a changing global economy, as mandated in paragraph 166 of the Bangkok Plan of Action and subsequently reconfirmed by the Sao Paulo Consensus, the Doha Programme of Action for the Least Developed Countries and the Nairobi Maafikiano of 2016. Most recently, the “paragraph 166” course was given special attention by Member States in the context of the technical cooperation work of UNCTAD, in the Bridgetown Covenant, the outcome document of its fifteenth ministerial conference, recognizing the activities under paragraph 166 of the Bangkok Plan of Action to be of great importance and utility.
- 23.55 Following positive feedback from Member States, UNCTAD is planning to continue to provide its flagship “paragraph 166” course on key issues on the international economic agenda, for policymakers, Geneva-based delegates and other stakeholders from developing and transition economies. The course would continue to be based on the development perspective of UNCTAD and focus on the linkages between trade, finance, investment, technology, logistics and macroeconomic policies in the context of major economic trends and debates in multilateral forums. It would also emphasize the various approaches that countries have taken to derive maximum development gains and would incorporate recovery and resilience, in response to and following the global pandemic, into its overall curricula, which continue to evolve to reflect the needs of policymakers in developing regions.
- 23.56 In response, more specifically, the subprogramme would:
- (a) Continue to address in the curriculum the challenges that developing economies face, including coping with the economic consequences of crises and building resilience and response to shocks;

- (b) Further develop the modules of the capacity-building programme focusing on development, development policies and the role of international trade and finance in a globalized world; on harnessing benefits from trade and changing dynamics in the multilateral trading system, as well as trade logistics, regional trade agreements; on the digital economy; and on enhancing the productive capacity of developing countries through foreign direct investment, enterprise development and science, technology and innovation;
- (c) Roll out three regional courses in three of the five developing regions, covering African economies (to be held in Nairobi), Latin America and the Caribbean (to be held in Buenos Aires) and Asia and the Pacific, to be held in Islamabad, all of which will be tailored to the specific requirements of each region;
- (d) Further continue to implement capacity-building activities for developing countries in order to invest in human capital for sustainable development and achieve the Sustainable Development Goals and the 2030 Agenda;
- (e) Carry out e-learning components, evaluations and other aspects, in addition to the above-mentioned activities, which will represent an additional cost the programme must cover in 2024 and subsequent years.

23.57 The response would complement the planned work of all UNCTAD subprogrammes to be undertaken through the regular budget of section 12 to further enhance the capacity of policymakers to formulate policies and provide advisory services in the context of major economic trends and debates in multilateral forums, emphasizing various approaches that countries have taken to derive maximum development gains.

23.58 The expected response in 2024 would contribute to results under all five subprogrammes, including enhanced policymaking capacities to facilitate economic diversification through increased data capacities in services trade, which is reflected in result 3 of subprogramme 3, and the related performance measure of at least three additional countries that adopt, revise or implement services trade-related policies informed by better data collection and use, in the proposed programme budget for 2024 (A/78/6 (Sect. 12)) (see table 23.8).

Table 23.8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Policymakers from the ECOWAS region have increased capacities to formulate national services trade policies in, inter alia, tourism and energy services	Policymakers from Morocco and Paraguay have increased capacities to formulate national services trade policies in, inter alia, transport and logistics services	Member States benefit from the establishment an open-ended and time-bound Working Group on data for services trade and development policies	At least two additional countries adopt, revise or implement services trade-related policies informed by better data collection and use	At least three additional countries adopt, revise or implement services trade-related policies informed by better data collection and use

B. Deliverables

23.59 Table 23.9 contains all expected deliverables, by category and subcategory, for the period 2022–2024.

Table 23.9

United Nations Conference on Trade and Development: expected deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	46	51	46	51

C. Proposed non-post resource requirements for 2024

Table 23.10

Financial resources by object of expenditure

(Thousands of United States dollars)

	<i>2022 expenditure</i>	<i>2023 appropriation</i>	<i>Changes</i>		<i>2024 estimate (before recosting)</i>
			<i>Total</i>	<i>Percentage</i>	
Other staff costs	1 116.5	1 326.8	–	–	1 326.8
Consultants	6.1	–	–	–	–
Travel of staff	256.4	234.3	56.0	23.9	290.3
Contractual services	14.8	–	–	–	–
General operating expenses	3.9	–	–	–	–
Furniture and equipment	1.3	–	–	–	–
Grants and contributions	308.4	464.1	–	–	464.1
Total	1 707.3	2 025.2	56.0	2.8	2 081.2

23.60 The proposed regular budget resources for 2024 amount to \$2,081,200 and reflect a resource increase of \$56,000, or 2.8 per cent, compared with the appropriation for 2023. The proposed increases under travel of staff (\$56,000) are to provide additional resources to support the work of regional advisers in providing effective and timely technical advice on policy options and their implications, as well as technical assistance in trade, investment, e-commerce and other related areas, in response to the anticipated increase in the volume of requests for support from Member States, emphasizing the need to continue to assist developing countries in systematically assessing the state-of-play of their e-commerce enabling environment and overcoming barriers identified, including through eTrade Readiness Assessments and implementation support, e-commerce strategies and action plans.

3. Human settlements

A. Programmatic activities delivered through the regular programme of technical cooperation

23.61 The activities under human settlements are implemented by UN-Habitat. The programmatic activities are implemented under all subprogrammes of UN-Habitat.

23.62 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2024 ([A/78/6 \(Sect. 15\)](#)).

Expected additional requests for support from Member States for 2024

- 23.63 An increase in the volume of requests for assistance in the housing and sustainable urbanization sectors is anticipated from at least 10 cities in eight member States in the Latin America and the Caribbean, Africa, Asia-Pacific, Central Asia and Eastern European regions in support of localizing the Sustainable Development Goals and investing in the impact of the Goals. Moreover, continued requests are expected in support of urban recovery processes in Eastern Europe and the Southern Caucasus regions.

Response provided to Member States' requests for support in 2022**Voluntary local reviews to enhance the shared prosperity of cities and regions globally through Sustainable Development Goals localization**

(result 3 of subprogramme 2 (A/78/6 (Sect. 15)))

- 23.64 In 2022, the regular programme of technical cooperation received requests for support to mobilize technical advisory services for sustainable urban development from a wide range of regions, countries and locations in Eastern Europe (Albania, Bosnia and Herzegovina, Montenegro, North Macedonia and Serbia), Africa (Botswana, Ghana, Namibia, Rwanda, South Africa and Zambia), Central Asia and Asia-Pacific (Azerbaijan, China, the Islamic Republic of Iran, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan), Latin America and the Caribbean (Bolivia (Plurinational State of) and Brazil) and Western Europe and other States (Portugal, Spain, Türkiye and Ukraine). The subprogramme provided technical advisory services and support, including face-to-face and web-based collaboration measures, and organized capacity-building and validation workshops, providing the evidence base for adequate policies and their respective implementation.
- 23.65 In 2022, as COVID-19 restrictions continued to be applied in selected countries, the regular programme of technical cooperation provided technical advisory services to the second session of the Sustainable Development Goals Cities global conference in Shanghai, China, during the celebration of World Cities Day 2022. In total, 230 participants from 55 countries and territories across the world joined the conference, which widely engaging local governments and various stakeholders at the local level.
- 23.66 Moreover, subprogramme 2, Enhanced shared prosperity of cities and regions, supported the achievement of enhanced inclusive economic development by guiding local and regional governments in the process of developing voluntary local reviews. The support of this subprogramme has contributed to catalysing the localization of the Sustainable Development Goals in additional cities, following the demand indicated by expressions of interest in joining this global movement. UN-Habitat has been providing assistance in technical cooperation, strategic partnership, knowledge development, learning and capacity-building, and global advocacy.
- 23.67 The above-mentioned work contributed to voluntary local reviews enhancing the shared prosperity of cities and regions globally through localization of the Sustainable Development Goals, which is reflected in result 3 of subprogramme 2, and the related performance, in the proposed programme budget for 2024 (A/78/6 (Sect. 15)) (see figure 23.V).

Figure 23.V
Performance measure: number of voluntary local reviews prepared by local and regional governments (annual)

Expected response to anticipated requests for support in 2024

Implementation of the outcomes of the urban dimensions of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals, as well as the New Urban Agenda, and strengthened capacity of cities to address inequalities and bridge social, spatial and digital divides

(two results in sections on strategy of [A/78/6 \(Sect. 15\)](#))

- 23.68 For 2024, Member States are expected to increase requests for technical advisory services building on the strategic plan for the period 2020–2025, which calls for more integrated programming, aligned with the United Nations development system through common country analyses and the United Nations Sustainable Development Cooperation Frameworks. This should result in more transformative action that allows countries and cities to accelerate their implementation of the urban dimensions of the Sustainable Development Goals, the New Urban Agenda and other global agendas as set forth also in the decade of action. Particular focus will be on localizing the Sustainable Development Goals in at least six selected countries in sub-Saharan Africa, the Middle East and North Africa, South-East Asia, Latin America and the Caribbean, Eastern Europe and Central Asia.
- 23.69 UN-Habitat will continue to support the implementation of its strategic plan for the period 2020–2023, as extended to 2025 by the UN-Habitat Assembly in June 2023, domains of change and the Sustainable Development Goals Cities flagship initiative by further developing and promoting the use of the global urban monitoring framework data tools, local institutional capacity-development tools and the Cities Investment Facility, which is jointly implemented with the United Nations Capital Investment Fund. This will enhance sustainable urbanization practices and accelerate the implementation of the Goals in cities, with a focus on achieving more inclusive societies and cities and long-term recovery from the impact of the COVID-19 pandemic. UN-Habitat anticipates that, by 2024, around 100 cities will have been included in the Sustainable Development Goals Cities programme.
- 23.70 In response to the anticipated requests in 2024, UN-Habitat would:
 - (a) Broaden the scope of technical advisory services and capacity-building activities to cover digital transformation aimed at accelerating achievement of the Sustainable Development Goals in target countries;
 - (b) Develop and digitalize all normative tools relevant to the implementation of the five UN-Habitat flagship programmes, which are designed to support Member States that are developing countries in achieving the urban-related Goals at scale;

Section 23 Regular programme of technical cooperation

- (c) Further develop and refine the methodology and guidance material on integrated national and local urban development frameworks, based on lessons learned from pilot initiatives, and carry out additional capacity-building activities as required;
 - (d) Promote technical cooperation and knowledge exchange between regions, including through the roll-out of the Shanghai Global Award for Sustainable Development in Cities, the Shanghai Adapted Index and the Shanghai Manual 2024.
- 23.71 These responses would complement the planned work of the UN-Habitat subprogrammes to be undertaken through the regular budget for section 15 in order to further develop and implement integrated national urban policies.
- 23.72 The expected response in 2024 would contribute to the implementation of the outcomes of the urban dimensions of the 2030 Agenda and the respective Goals as well as the New Urban Agenda, in addition to the strengthened capacity of cities to address inequalities and bridge social, spatial and digital divides, which is a result reflected in the section on strategy under subprogramme 2, in the proposed programme budget for 2024 (A/78/6 (Sect. 15)).

B. Deliverables

23.73 Table 23.11 lists all expected deliverables, by category and subcategory, for the period 2022–2024.

Table 23.11

United Nations Human Settlements Programme: expected deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	26	26	28	28

C. Proposed non-post resource requirements for 2024

Table 23.12

Financial resources by object of expenditure

(Thousands of United States dollars)

	<i>2022 expenditure</i>	<i>2023 appropriation</i>	<i>Changes</i>		<i>2024 estimate (before recosting)</i>
			<i>Total</i>	<i>Percentage</i>	
Other staff costs	870.7	979.6	–	–	979.6
Consultants	111.8	171.5	15.1	8.8	186.6
Travel of staff	64.5	79.8	12.5	15.7	92.3
Contractual services	26.5	98.2	9.9	10.1	108.1
General operating expenses	30.6	25.5	–	–	25.5
Supplies and materials	0.2	0.5	0.2	40.0	0.7
Furniture and equipment	10.1	7.0	–	–	7.0
Grants and contributions	4.5	–	–	–	–
Total	1 118.9	1 362.1	37.7	2.8	1 399.8

- 23.74 The proposed regular budget resources for 2024 amount to \$1,399,800 and reflect an increase of \$37,700, or 2.8 per cent, compared with the appropriation for 2023. The proposed increases under consultants, travel of staff and contractual services are to provide additional technical expertise for the catalytic funds made available for each of the four regional offices and in support of the emerging regional presence in the Eastern Europe and Central Asian regions. Moreover, an anticipated increase in the number of requests for technical advisory services to urban recovery processes in the Eastern Europe and Southern Caucasus regions would make an increase under travel necessary. Furthermore, the proposed increase under contractual services would allow for the development of an urban recovery framework tool kit and its application to Eastern European urban crisis contexts, as well as support to countries affected by natural disasters.

4. International drug control, crime and terrorism prevention and criminal justice

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.75 The activities under international drug control, crime and terrorism prevention and criminal justice are implemented by UNODC. The programmatic activities are implemented under subprogramme 8, Technical cooperation and field support.
- 23.76 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the following subprogrammes: subprogramme 1: Countering transnational organized crime; subprogramme 2: A comprehensive and balanced approach to counter the world drug problem; subprogramme 3: Countering corruption; subprogramme 4: Terrorism prevention; subprogramme 5: Justice; subprogramme 6: Research, trend analysis and forensics; subprogramme 7: Policy support; and subprogramme 8: Technical cooperation and field support, and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2024 (*A/78/6 (Sect. 16)*).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.77 The outreach and dissemination of guidelines to Member States are provided through regular dialogues with national counterparts; national campaigns to observe the International Day against Drug Abuse and Illicit Trafficking, World Day against Trafficking in Persons and the International Anti-Corruption Day; and fundraising initiatives and strategic partnerships with international financial institutions, international organizations and the private sector specifically focused on country or regional contexts. UNODC also liaises with United Nations country team members to discuss pending requests for the regular programme of technical cooperation, and to devise coordinated approaches to Member States' needs that fall under areas of the regular programme.

Response provided to Member States' requests for support in 2022

Enhanced social reintegration and job opportunities for people in prison in Mexico (as reflected in programme performance in 2022 in subprogramme 8)

- 23.78 UNODC receives a number of requests from Member States, in a broad range of areas covering the entirety of the UNODC mandate. Annually, UNODC supports policy advice and technical capacity through an interregional adviser's full-time work and missions, as well as 25 field projects that are devised to support specific actions. As an example of the 25 initiatives funded by the regular programme of technical cooperation in 2022, UNODC received a request to build capacities of detained women and men in a Mexico prison with a vocational training certification and to increase their employability in the Latin America and the Caribbean region. In addition to discrimination and stigmatization of prisoners, the social reintegration of offenders is hindered by a lack of employment skills and job opportunities, leading to further isolation and an increased likelihood of recidivism.

The initiative provided people deprived of their liberty in prison with tools to tackle biases and prejudices, as well as vocational training and job search support. For instance, in Mexico City, UNODC offered job-qualifying training and certification on rainwater harvesting systems and solar panel installation as part of a wider, public-private partnership re-entry effort. In 2022, 59 inmates (39 male and 20 female) were certified as qualified installers, which enhanced their chances of employability upon release. A further 30 women inmates were given complementary financial education.

23.79 The above-mentioned work contributed to the result of enhanced social reintegration and job opportunities for people in prison in Mexico, which is reflected in the programme performance section of subprogramme 8, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 16)) (see figure 23.VI).

Figure 23.VI

Performance measure: number of detained women and men in Mexico City with vocational certification and increased employability (annual)

Expected responses to anticipated requests for support in 2024

Strengthened rule of law and protection of those who are vulnerable in small island developing States in the Pacific

(result 2 of subprogramme 8 (A/78/6 (Sect. 16)))

23.80 For 2024, UNODC expects to receive an increasing number of requests from Member States across a number of themes. In response to those requests, UNODC plans to respond by providing policy advice and technical support to developing countries, countries in transition and post-conflict countries in the following areas: (a) acceding to and implementing international instruments on drug and crime control; (b) strengthening and reforming their criminal justice systems in line with norms, standards and existing good practices (e.g. South-South cooperation); and (c) supporting capacity development of national counterparts in the areas of drug control, tackling organized crime, terrorism prevention and criminal justice. In that context, UNODC would arrange technical workshops and deliver training to criminal justice practitioners, policymakers and professionals in specialized areas; hold expert group meetings; and undertake strategic missions and assessments on a specific country or thematic need, with the aim of engaging in the subsequent design of upscaled, longer-term technical assistance programmes. Through the regular programme of technical cooperation funds, UNODC would focus on the least developed countries, landlocked developing countries and small island developing States, as well as on vulnerable groups and fragile States' crises.

- 23.81 UNODC would work on improving data collection systems on human trafficking in six small island developing States in the Pacific and enhance South-South cooperation on anti-corruption between 14 small island developing States in the Pacific. This would be coupled with community policing involving civil society in enhancing border control management and would complement any operational support to Member States with a long-term vision to restore criminal justice, border control and customs institutions.
- 23.82 The expected response in 2024 would contribute to strengthened rule of law and protection of those who are vulnerable in small island developing States in the Pacific, which is reflected under result 2 of subprogramme 8, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 16)) (see table 23.13).

Table 23.13
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Partnerships established for anti-corruption and countering migrant smuggling in the Pacific	Common country analysis and cooperation frameworks of Fiji, Papua New Guinea and Samoa reflect UNODC mandates under Sustainable Development Goals 3, 16 and 17	Improved data collection systems on human trafficking in six small island developing States in the Pacific Enhanced South-South cooperation between 14 small island developing States in the Pacific	Improved legal and policy frameworks to address corruption and organized crime for small island developing States in the Pacific Small island developing States in the Pacific actively and effectively participate in the review mechanisms of the United Nations Convention against Transnational Organized Crime and the United Nations Convention against Corruption	Small island developing States in the Pacific have an increased evidence base on the threat of transnational organized crime and are better prepared to combat transnational organized crime (including crimes facilitated by the misuse of ICT) 14 small island developing States in the Pacific promote and strengthen the prevention of and fight against corruption, in line with the United Nations Convention against Corruption, and support implementation of the Pacific road map to address corruption in the region (the Teieniwa Vision)

- 23.83 The expected response in 2024 would also contribute to results under all implementing subprogrammes, including the following: increased international cooperation and strengthening the institutional and legislative capacity of Member States to detect, prevent, investigate and prosecute transnational organized crime and new and emerging crimes; reduced illicit supply of drugs through joint and coordinated work by law enforcement authorities to strengthen maritime, air and land

border control, and to track and dismantle networks engaging in drug production, trafficking and distribution; and increased equal access to justice for the vulnerable segments of the population and increased public trust in the justice system, including through nationwide legal aid services that are accessible to all and are tailored to the rights and needs of the population, as reflected under the expected results of subprogrammes 1, 2 and 5, respectively, of the proposed programme budget for 2024 (A/78/6 (Sect. 16)). The response would also contribute to enhanced analytical capacity through increased knowledge of the emerging threats and challenges in relation to human trafficking, and good practices based on evidence and supported through South-South cooperation. In addition, the response would contribute to increased policymaking capacities in the area of human trafficking for improved criminal justice systems, border management and anti-corruption measures.

B. Deliverables

23.84 Table 23.14 lists all expected deliverables, by category and subcategory, for the period 2022–2024.

Table 23.14

United Nations Office on Drugs and Crime: expected deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	20	22	25	25

C. Proposed non-post resource requirements for 2024

Table 23.15

Financial resources by object of expenditure

(Thousands of United States dollars)

	2022 expenditure	2023 appropriation	Changes		2024 estimate (before recosting)
			Total	Percentage	
Other staff costs	335.2	730.6	–	–	730.6
Consultants	156.9	68.6	–	–	68.6
Travel of staff	81.5	62.6	(0.4)	(0.6)	62.2
Contractual services	139.4	97.2	31.8	32.7	129.0
General operating expenses	38.5	4.1	–	–	4.1
Supplies and materials	16.2	–	–	–	–
Furniture and equipment	74.7	–	–	–	–
Construction and maintenance	8.6	–	–	–	–
Grants and contributions	116.1	170.2	–	–	170.2
Total	967.2	1 133.3	31.4	2.8	1 164.7

23.85 The proposed regular budget resources for 2024 amount to \$1,164,700 and reflect an increase of \$31,400 or 2.8 per cent compared with the appropriation for 2023. The increase under contractual services (\$31,800) would provide for additional capacity-building support required in the delivery of technical assistance as a result of the anticipated increase in the number of Member States' requests.

5. Human rights

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.86 The activities under human rights are implemented by OHCHR. The programmatic activities are implemented under the following subprogrammes of OHCHR: subprogramme 1, Human rights mainstreaming, right to development, and research and analysis; and subprogramme 3, Advisory services, technical cooperation and field activities.
- 23.87 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2024 ([A/78/6 \(Sect. 24\)](#)).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.88 In line with the demand-driven nature of the regular programme of technical cooperation, subprogramme 1 raises awareness of opportunities for developing countries to gain access to technical assistance from regular programme resources through engagement in annual regional sustainable development forums and the High-level Political Forum on Sustainable Development. The subprogramme works with the rest of the United Nations development system in partnering with Governments at the country level to design United Nations programmes that are aligned with and support national development priorities. In that context, Member States' demand for technical assistance and advice has grown significantly.

Response provided to Member States' requests for support in 2022

United Nations system equipped to implement the pledge to leave no one behind in implementing the 2030 Agenda

(programme performance in 2022 of subprogramme 1 (a) ([A/78/6 \(Sect. 24\)](#)))

Indigenous and minority leaders empowered through the indigenous and minorities fellowship programmes

(result 1 of subprogramme 1 (c) ([A/78/6 \(Sect. 24\)](#)))

- 23.89 In 2022, the implementing subprogrammes scaled up work to advance implementation of the 2030 Agenda by further investing in enhanced support to assist Member States and the United Nations development system to deliver on strong human rights outcomes. These included United Nations Sustainable Development Cooperation Frameworks, voluntary national reviews and capacity-building to United Nations entities, Member States, civil society actors, national human rights institutions and other relevant stakeholders.
- 23.90 The subprogrammes provided operational advice and guidance on analytical and programmatic contents for the preparation of common country analyses and/or United Nations Sustainable Development Cooperation Framework processes, providing support to Albania, Angola, Brazil, Bolivia (Plurinational State of), Bosnia and Herzegovina, Chile, Costa Rica, the Dominican Republic, Ecuador, Haiti, Madagascar, Mauritius, South Africa, Venezuela (Bolivarian Republic of) and Zambia.
- 23.91 The subprogrammes supported human rights mainstreaming work by United Nations staff, Governments and other stakeholders, through: (a) contributions to the global workshop on mainstreaming the right to development in voluntary national reviews; (b) outreach events to launch

Section 23 Regular programme of technical cooperation

and raise awareness of the human rights and voluntary national review guidance note; and (c) the development of tools and guidance for Member States and United Nations country teams.

- 23.92 On advancing the principle to leave no one behind, the work of the subprogrammes resulted in the enhanced capacities of States to conduct assessments and implement policies to counter marginalization, while at the same time ensuring that the United Nations response to discrimination and economic inequalities was grounded in the principles of equality and non-discrimination.
- 23.93 The above-mentioned work contributed to United Nations system equipped to implement the pledge to leave no one behind in implementing the 2030 Agenda, which is reflected the programme performance for 2022 of subprogramme 1 (a), and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 24)) (see table 23.16).

**Table 23.16
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Member States were supported on leaving no one behind and reaching the furthest behind first through the provision of operational guidance developed with the inter-agency Task Team under the United Nations Sustainable Development Group	The Secretary-General’s COVID-19 policy brief on human rights and economic response to and recovery from the pandemic was made available to support Member States and United Nations country teams to design measures to tackle inequalities	Two checklists and an online tool on integrating human rights, leaving no one behind and gender equality and women’s empowerment strengthened United Nations country team capacities to support Member States in analysis and programming to prioritize the most vulnerable and tackle discrimination and inequalities
Member States had access to an operational checklist on human rights and the socioeconomic response to the COVID-19 pandemic		

- 23.94 Regarding requests for capacity-building initiatives, for example, OHCHR organized a two-day workshop on promoting the implementation of the United Nations Guiding Principles on Business and Human Rights to government officials, civil society and business in Lesotho. In Egypt, subprogramme 3 conducted a workshop for parliamentarians on United Nations international human rights norms and standards and the international human right system, while subprogramme 1 contributed to a refresher course on human rights for staff of resident coordinator offices in the Europe and Central Asia region.
- 23.95 In 2022, the subprogrammes also worked to continue supporting countries to strengthen their national human rights institutions and civil society through two distinct but comprehensive fellowship programmes: one for staff members of national human rights institutions worldwide; and the other for indigenous representatives of indigenous people and ethnic, linguistic and religious minorities.
- 23.96 The above-mentioned work contributed to indigenous and minority leaders being empowered through the indigenous and minorities fellowship programmes, as reflected in result 1 of subprogramme 1 (c), and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 24)) (see figure 23.VII).

Figure 23.VII
Performance measure: number of senior indigenous and minority fellowships (cumulative)

Expected responses to anticipated requests for support in 2024

Enhanced capacity of Member States to reduce inequalities

(result 2 of subprogramme 3 (A/78/6 (Sect. 24)))

- 23.97 The subprogrammes will aim at expanding the work carried out by Sustainable Development Goals regional advisors to other regions. In 2022, they played an instrumental role in advising on United Nations common country analyses and programming in countries in Latin America and the Caribbean and Southern Africa, building a close collaboration with the regional office of the Development Coordination Office, actively supporting the regional mechanisms established under the United Nations development reform, delivering training and reviewing the process of common country analyses and/or United Nations Sustainable Development Cooperation Frameworks undertaken in support of the Secretary-General's call to action for human rights' strategic interventions on sustainable development. Through the deployment of additional specialized capacity to Asia-Pacific and Eastern Africa and the onboarding of human rights data experts in 2024, the subprogrammes will work with Member States: (a) to provide technical advisory services on mainstreaming human rights into the 2030 Agenda, advancing the implementation of the principle of leaving no one behind and the integration of human rights in voluntary national reviews; (b) to consolidate partnerships at the regional level with regional economic commissions and other United Nations development entities for policy and programmatic support to States in the region; and (c) to provide policy advice and capacity-building on mainstreaming human rights in sustainable development plans and programmes, including with regard to data disaggregation and aimed at supporting national statistical systems.
- 23.98 In response to an increase in requests for assistance from Member States, the subprogrammes would provide additional policy expert advice and technical assistance to operationalize the pledge to leave no one behind and design policies that prioritize marginalized and disadvantaged sections of the population, in accordance to the 2030 Agenda accelerators adopted by the General Assembly in 2019 and the resolution adopted by the 2020 Quadrennial Comprehensive Policy Review of United Nations system operational activities.
- 23.99 To meet growing demands for building more inclusive social protection systems and reduce inequalities, the subprogrammes would continue to work with Member States to enhance their capacity to reduce inequalities and integrate economic, social and cultural rights into their national policies, legislation and mechanisms. The subprogrammes would do so through the provision of advisory services and technical cooperation programmes to Member States and other stakeholders.

23.100 The expected response in 2024 would contribute to enhanced capacity of Member States to reduce inequalities, which is reflected in result 2 of subprogramme 3, and the related performance measure, in the proposed programme budget for 2023 (A/78/6 (Sect. 24)) (see figure 23.VIII).

Figure 23.VIII

Performance measure: number of Member States that took action to enhance legislation and policies that integrate economic, social and cultural rights (cumulative)

B. Deliverables

23.101 Table 23.17 lists all expected deliverables, by category and subcategory, for the period 2022–2024.

Table 23.17

Office of the United Nations High Commissioner for Human Rights: expected deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	242	248	245	272

C. Proposed non-post resource requirements for 2024

Table 23.18

Financial resources by object of expenditure

(Thousands of United States dollars)

	2022 expenditure	2023 appropriation	Changes		2024 estimate (before recosting)
			Total	Percentage

Part V Regional cooperation for development

	2022 expenditure	2023 appropriation	Changes		2024 estimate (before recosting)
			Total	Percentage	
General operating expenses	142.8	128.0	–	–	128.0
Furniture and equipment	0.8	–	–	–	–
Grants and contributions	487.0	1 098.9	–	–	1 098.9
Total	2 342.4	2 733.5	75.6	2.8	2 809.1

23.102 The proposed regular budget resources for 2024 amount to \$2,809,100 and reflect an increase of \$75,600 or 2.8 per cent compared with the appropriation for 2023. The proposed increase under other staff costs (\$75,600) would provide additional support for the implementation of technical cooperation programmes at OHCHR field presences.

6. Humanitarian assistance

A. Programmatic activities delivered through the regular programme of technical cooperation

23.103 The activities under humanitarian assistance are implemented by the Office for the Coordination of Humanitarian Affairs. The programmatic activities are implemented under the following subprogrammes of the Office: subprogramme 1, Policy and analysis; subprogramme 2, Coordination of humanitarian action and emergency response; subprogramme 3, Emergency support services; and subprogramme 4, Humanitarian emergency information and advocacy.

23.104 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2024 ([A/78/6 \(Sect. 27\)](#)).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

23.105 The Office for the Coordination of Humanitarian Affairs organizes training (including online), conferences and partnership events to raise awareness on available support services to Member States. The conferences would provide platforms for Member States and other partners to share experiences, information about new initiatives and good practice, such as through the Humanitarian Network and Partnership Week. The Office for the Coordination of Humanitarian Affairs will continue to conduct outreach and awareness-raising on opportunities for collaboration and partnership, mostly with developing countries, and to increase the capacities of Member States on how to access international humanitarian assistance and international disaster response services, such as of the United Nations Disaster Assessment and Coordination Team and International Search and Rescue Advisory Group. The Office will also reach out to regional organizations that support Member States to partner and raise awareness on its capacity-building activities. Some of the organizations include the Association of Southeast Asian Nations (ASEAN) and the Coordination Centre for Disaster Prevention in Central America and the Dominican Republic.

Response provided to Member States' requests for support in 2022

Crisis-affected people received emergency humanitarian assistance in the immediate aftermath of a catastrophe

(result 2 of subprogramme 3 ([A/78/6 \(Sect. 27\)](#)))

23.106 In 2022, the Office for the Coordination of Humanitarian Affairs responded to sudden onset and complex emergencies in 11 countries (Afghanistan, the Gambia, Madagascar, Malawi, Pakistan,

Paraguay, Peru, the Philippines, Somalia, Tonga and Ukraine). In Afghanistan, the United Nations Disaster Assessment and Coordination Team deployed to support the country in response to the earthquake that struck the eastern border region of Afghanistan. In Madagascar, following a request from the resident coordinator and Government after the tropical cyclone Batsirai, the Team deployed to support the Government and humanitarian leadership to coordinate disaster response and conduct an evidence-based needs assessment and analysis. In Peru, following an oil spill, and on the basis of a request for technical assistance from the Government, an environmental emergency response team, including environmental experts and United Nations Disaster Assessment and Coordination Team members, was dispatched to advise national authorities on incident management and coordination, rapid socioenvironmental assessments, the review of any existing contingency plans and strengthening emergency preparedness.

- 23.107 The above-mentioned work contributed to the result of crisis-affected people receiving emergency humanitarian assistance in the immediate aftermath of a catastrophe, reflected under result 2 of subprogramme 3, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 27)) (see figure 23.IX).

Figure 23.IX

Performance measure: number of emergency responders trained in United Nations Disaster Assessment and Coordination Team and United Nations humanitarian civil-military coordination, to deploy and respond to sudden-onset emergencies (annual)^a

^a The performance measure has been updated to reflect annual figures rather than cumulative.

Expected response to anticipated requests for support in 2024

Strengthened disaster risk analysis for humanitarian response (result 2 of subprogramme 4 (A/78/6 (Sect. 27)))

- 23.108 In 2024, the Office for the Coordination of Humanitarian Affairs anticipates increased demand by Members States to strengthen the standardization of emergency response approaches and humanitarian response coordination capacities, in particular in developing countries that are at a high risk of natural disaster impacts and have low coordination response capacities. To address those requests, the Office is planning to hold additional simulation programme training for new Information Communication Technology Officers. The goal, by the end of 2024, is to have 10 Officers trained in emergency response to further enhance their skills for surge capacity, which is a vital part of the Office's work.
- 23.109 The Office for the Coordination of Humanitarian Affairs will continue to strengthen rapid response capacities through standardized and improved response methodologies, with a planned target of 214 United Nations Disaster Assessment and Coordination Team members trained in the application of

local and regional emergency preparedness and response approaches. The Office’s “connecting business” initiative will prioritize scaling up to establish relationships with private sector networks that respond to crises in at least 20 of the most vulnerable countries, mostly from Asia Pacific region.

23.110 As part of strengthening early recovery efforts and working with development partners, the Office for the Coordination of Humanitarian Affairs will work with Resident Coordinators and Humanitarian Coordinators to strengthen coordination efforts between humanitarian and development actors to deliver people-centred solutions to reduce future humanitarian needs through recovery and resilience strengthening capacity-building support.

23.111 The expected response in 2024 would contribute to strengthened disaster risk analysis for humanitarian response, which is reflected in result 2 of subprogramme 4, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 27)) (see figure 23.X).

Figure 23.X

Performance measure: number of countries with strengthened risk analysis capacities for humanitarian response (cumulative)

B. Deliverables

23.112 Table 23.19 lists all expected deliverables, by category and subcategory, for the period 2022–2024.

Table 23.19

Office for the Coordination of Humanitarian Affairs: expected deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	28	27	28	28

C. Proposed non-post resource requirements for 2024

Table 23.20

Financial resources by object of expenditure

(Thousands of United States dollars)

	2022 expenditure	2023 appropriation	Changes		2024 estimate (before recosting)
			Total	Percentage	
Other staff costs	393.9	463.3	82.5	17.8	545.8
Consultants	126.4	75.5	–	–	75.5
Travel of staff	59.4	81.7	10.0	12.2	91.7
Contractual services	–	59.3	(7.5)	(12.6)	51.8
General operating expenses	55.6	4.2	11.6	276.2	15.8
Supplies and materials	1.4	–	–	–	–
Furniture and equipment	17.3	–	–	–	–
Grants and contributions	53.3	95.0	(75.0)	(78.9)	20.0
Total	707.3	779.0	21.6	2.8	800.6

- 23.113 The proposed regular budget resources for 2024 amount to \$800,600 and reflect a net increase of \$21,600, or 2.8 per cent, compared with the appropriation for 2023. The increase under other staff costs (\$82,500), travel of staff (\$10,000) and general operating expenses (\$11,600) are offset in part by decreases under contractual services and grants and contributions and would provide additional simulation programme training for new Information Communication Technology Officers. The goal by end of 2024 is to have 10 Officers trained in emergency response to further enhance their skills for surge capacity.

II. Regional and subregional advisory services

7. Economic and social development in Africa

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.114 The activities under economic and social development in Africa are implemented by ECA and are used to support African countries in their capacity-development efforts and technical advisory services. The programmatic activities are implemented under all subprogrammes of ECA.
- 23.115 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2024 (A/78/6 (Sect. 18)).

Expected additional requests for support from member States for 2024

- 23.116 In response to an anticipated increase in the volume of requests for assistance from member States, ECA would provide additional support in three main strategic areas: (a) macroeconomic policy and sustainable financing; (b) implementation of the Agreement Establishing the African Continental Free Trade Area, sustainable industrialization and economic diversification; and (c) inclusive and resilient growth through climate action, energy transition, the green and blue economy, data and digital transformation. ECA has supported member States with related advisory services and technical assistance since 2021, with increasing emphasis on debt management, the

operationalization of the above-mentioned Agreement, harnessing the blue economy and digital transformation in Africa. The opportunity has arisen for ECA to replicate and upscale its pioneering instruments and tools (manuals, policy handbooks and frameworks, etc.) in several African countries and regional economic communities, as the main drivers of post-crisis recovery and sustainable growth on the continent.

Review of high-level positions at headquarters duty stations (ECA)

- 23.117 The main function of interregional advisers is to provide technical expertise, facilitate the transfer of knowledge from global deliberations and the latest analytical work to Governments and institutions, and contribute to the formulation, assessment and/or evaluation of national and subregional policies, strategies, programmes and projects of member States and regional economic communities, at their request. The specific roles, functions and areas of expertise are reflected in the job descriptions and terms of reference, and are classified at the appropriate level. Any new appointments and extensions of appointments of interregional advisers are subject to the review and approval of the head of the entity and the onward processing by the human resources and budget sections. The specific focus of each position evolves over time in line with the Commission's strategic intervention tracks, member States' shifting priorities, regional trends, etc.

Response provided to member States' requests for support in 2022

Member States develop money markets for economic growth and financial stability (section on programme performance in 2022 under subprogramme 3 (A/78/6 (Sect. 18)))

- 23.118 In 2022, ECA provided a response focused on building liquid and inclusive money and interbank markets in Uganda and Zambia. Those countries have segmented money and interbank markets, where liquidity is unevenly held by banks of different sizes and credit profiles, owing to legal, regulatory, risk management and technical skill deficiencies. Such conditions hinder the effectiveness of the transmission of central banks' monetary policies and impose great risk at the time of financial turbulence or crisis. During the COVID-19 pandemic, owing to the spill-over effects of tighter financial conditions in the United States of America and Euro area, as well as other external shocks, the emerging market local stress index hit a record high since the 2008 global financial crisis, making financing for sustainable development in Africa even more difficult. Therefore, it is a top priority for central banks to develop robust money and interbank markets.
- 23.119 In response, ECA provided technical assistance to Uganda and Zambia at their central banks' requests, to work on an umbrella guarantee facility to address the segmentation issue in their money and interbank markets. In Uganda, ECA organized training workshops to central bank officials as well as commercial bank professionals on the documentation, operational process, collateral management and accounting methods for repo and swap transactions. A "fireside chat" was organized alongside the trainings to sensitize the market about the ambitions of the central bank and to share thoughts that would help further develop the markets. In Zambia, ECA carried out a feasibility study on a facility from four dimensions, including legal and regulatory review, system infrastructure, market demand and relevance, and knowledge and capacity of banking professionals. The findings of the study were shared with all stakeholders in Zambia, including the central bank, the Securities and Exchange Commission and the commercial banks.
- 23.120 The above-mentioned work contributed to Member States developing money markets for economic growth and financial stability, which is a result reflected in the section on programme performance in 2022 under subprogramme 3, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 18)) (see table 23.21).

Table 23.21
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Cooperation agreement concluded to support African Governments in the debt relief and debt restructuring initiative within the context of COVID-19	Uganda and Zambia have included the development of money and interbank markets as strategic issues in their road maps	Uganda has risen two places and Zambia has maintained its ranking in Absa Africa Financial Markets Index 2022

Expected responses to anticipated requests for support in 2024

Improved capacity in development planning for sustainable development and structural transformation in Africa

(result 1 of subprogramme 1 (A/78/6 (Sect. 18)))

- 23.121 Subprogramme 1, Macroeconomic policy and governance, aims to achieve structural transformation and inclusive growth in Africa by supporting Governments in strengthened and effective development planning, macroeconomic policy analysis and enhanced public sector finance management and governance. Among others, the subprogramme supports member States in tracking their progress in the implementation of the 2030 Agenda and Agenda 2063 and customizing policy-relevant tools, such as the ECA integrated planning and reporting toolkit, to assist countries in the design, implementation, and monitoring of their national development plans. ECA developed the toolkit in response to the need expressed by experts at the 2016 session of the Conference of African Ministers of Finance, Planning and Economic Development for countries to adopt specific tools that successfully integrated the 2030 Agenda and Agenda 2063 into their national development plans and the related recommendation that the African Union Commission and ECA should assist member States in designing a road map for the implementation of the two agendas at the national level and to put in place a harmonized monitoring and evaluation framework for the two agendas.
- 23.122 By supporting countries in migrating their national development plans to the integrated planning and reporting toolkit digital platform, the subprogramme has facilitated and accelerated the digitalization of national planning frameworks in Africa. Digitalization has also made it easier for countries to align their planning frameworks with their international commitments with greater precision and created increased advocacy for Agenda 2063. Since its inception, the programme has continued to receive requests from member States for support in these processes.
- 23.123 The subprogramme also provides tailor-made support to accelerate the graduation of African countries from the list of least developed countries. The need for improved monitoring and implementation of progress towards achieving the global and continental agendas is particularly urgent in those countries, with 33 out of 46 least developed countries being African countries. The least developed countries grapple with several challenges in formulating and implementing their development plans, including lack of good governance, transparency and accountability and ineffectiveness of the public sector, coupled with the weak capacity of institutions, limited human resources and lack of skills, inadequate domestic resource mobilization, and the proliferation of goals and targets among others.
- 23.124 The anticipated support will enhance the capacity of member States that are least developed countries to implement the Doha Programme of Action for Least Developed Countries for the decade 2022-2031, through their national development plans, as well as report on progress. This will involve customizing the integrated planning and reporting toolkit to incorporate the goals, targets and indicators of the Programme of Action, and mapping these onto the Sustainable Development Goals. This process of defining the indicators of the Programme of Action will also inform the setting of global indicators for the Programme. In addition to the digitalization of plans and facilitating alignment with the Goals, Agenda 2063 and the Programme of Action, this support would also focus

on strengthening the results framework of national development plans to facilitate implementation monitoring, and on aligning financing frameworks with international commitments, to ensure appropriate funding allocations.

- 23.125 The expected response in 2024 would contribute to the improved capacity in development planning for sustainable development and structural transformation in Africa, which is reflected in result 1 of subprogramme 1, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 18)) (see figure 23.XI).

Figure 23.XI

Performance measure: number of countries adopting development planning tools (cumulative)

Harnessing the potential of the blue economy, including tourism, within the African Continental Free Trade Area

(result 1 of component 4 of subprogramme 7 (A/78/6 (Sect. 18)))

- 23.126 Subprogramme 7, component 4, supports the East Africa subregion including, 14 East African countries and regional economic communities, in regional trade integration, tourism and the blue economy. Delivering onto its blue economy mandate, the Subregional Office for East Africa provides technical assistance to countries, with the view of strengthening capacity of member States of the region to realize the potential of the blue economy resources at hand, and to formulate adequate policies and strategies for its sustainable exploitation. Such assistance is extended to countries at their request. Since 2020, the subprogramme has leveraged the blue economy valuation toolkit to impart to policymakers, academics and private sector representatives the tools and skills required to conduct regular quantitative assessments of the contribution of comprehensive blue economy resources to the economic, social and ecological well-being of a country or a region. Equipped with the toolkit, Governments and agencies will be able to develop evidence-based, costed strategies for the blue economy sector and its subsectors. They will be able to evaluate a return on investment by measuring the benefits generated. It will also allow them to use the data generated by the toolkit to support fundraising requests for blue economy projects vis-à-vis donors. The subprogramme furthermore supports regional efforts towards the development of blue economy-related trade and services and maritime security. The subprogramme is working closely with the Indian Ocean Commission in supporting the regional maritime architecture in the Western Indian Ocean, given the critical role that safe sea transportation plays in ensuring enhanced trade of goods and services under the African Continental Free Trade Area. It has furthermore conducted a comparative analysis on inland waterway transportation in the East Africa region to explore how to harmonize the multimodal transportation policies and strategies across the region for the efficiency of goods transportation in general.

- 23.127 The subprogramme receives regular requests for support from member States and regional economic communities on: (a) blue economy valuation assessment using the ECA blue economy valuation

toolkit; (b) blue economy satellite accounts; and (c) the formulation and implementation of national and/or regional blue economy strategies.

- 23.128 In response to these anticipated requests in 2024, the subprogramme would implement demand-driven interventions in the above areas and, in doing so, plans to work closely with regional agencies, and resident coordinator offices to create awareness about the need for regular and disaggregated data collection about all the water bodies of countries, the importance of valuation assessments of blue economy resources in order to establish its positive or negative correlation with other subsectors of activities, and the value of evidence-based policy planning. The subprogramme also seeks to educate countries on the direct and indirect costs of maritime insecurity in the region. More niche training support on trade facilitation will be provided to coastal communities engaged in cross-border trade of perishables. The subprogramme will also contribute to initiatives aiming at improving the business environment for the trade of perishable blue economy products by exploring the potential for inland waterway transportation in the central and northern corridor of East Africa. The subprogramme would conduct capacity-building workshops and training, and generate a number of knowledge products to support and effectively communicate the outcomes of these projects.
- 23.129 These interventions would lead to an increase in the knowledge base and capacity of member States of the subregion to formulate and implement adequate blue economy policies and strategies to elevate the contribution of the sector to sustainable socioeconomic and ecological development of Africa. The objective is in line with the commitment of the Secretary-General at the 2022 United Nations Ocean Conference, where the need was emphasized to support developing countries in improving their capacity for scientific observation, data collection and access to finance and technology.
- 23.130 The expected response in 2024 would contribute to harnessing the potential of the blue economy, including tourism, within the African Continental Free Trade Area, which is reflected in result 1 of subprogramme 7, component 4, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 18)) (see table 23.22).

Table 23.22
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Nine policy frameworks and tools developed by member States on the blue economy	Eleven policy frameworks and tools developed by member States on the blue economy	One country (United Republic of Tanzania) adapted the blue economy valuation toolkit to the national context	An additional three member States implement subregional initiatives in the area of the blue economy	One additional member State implements a policy framework in the area of the blue economy
One country (Seychelles) finalized draft tourism satellite accounts (awaiting government approval)	Two member States (Kenya and the United Republic of Tanzania (Zanzibar)) finalized tourism satellite accounts			

B. Deliverables

- 23.131 Table 23.23 lists all expected deliverables, by category and subcategory, for the period 2022–2024.

Total	7 805.9	9 306.7	257.5	2.8	9 564.2

23.132 The proposed regular budget resources for 2024 amount to \$9,564,200 and reflect an increase of \$257,500, or 2.8 per cent, compared with the appropriation for 2023. The proposed increase under grants and contributions (\$257,500) would provide for activities related to the building of capacity for economic, planning, statistical and social development policies and frameworks, as outlined in paragraph 23.116.

8. Economic and social development in Asia and the Pacific

A. Programmatic activities delivered through the regular programme of technical cooperation

23.133 The activities under economic and social development in Asia and the Pacific are implemented by ESCAP. The programmatic activities are implemented under the following subprogrammes of ESCAP: subprogramme 1, Macroeconomic policy, poverty reduction and financing for development; subprogramme 2, Trade, investment and innovation; subprogramme 3, Transport; subprogramme 4, Environment and development; subprogramme 5, ICT and disaster risk reduction and management; subprogramme 6, Social development; subprogramme 7, Statistics; subprogramme 8, Subregional activities for development (components 1 to 5); and subprogramme 9, Energy.

- 23.134 In providing this assistance, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2024 (A/78/6 (Sect. 19)).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.135 Emphasizing the demand-driven nature of the programme, ESCAP raises awareness of the opportunities for assistance that the programme offers on a continuous basis and in particular through: (a) official documentation of intergovernmental meetings, conferences, other events and forums and related public information; (b) regular briefing of the Advisory Committee of Permanent Representatives and Other Representatives Designated by Members of the Commission; (c) bilateral meetings of the Executive Secretary with senior officials and permanent representatives of member States; (d) official missions and advisory services of ESCAP senior management and other staff; and (e) official correspondence addressed to seats of Governments related to advisory and other technical assistance offerings available to member States upon request.

Response provided to member States' requests for support in 2022

Advancing data and guidance for evidence-based policy related to population ageing, in line with the Madrid International Plan of Action on Ageing and the 2030 Agenda for Sustainable Development

(section on programme performance in 2022 under subprogramme 6 (A/78/6 (Sect. 19)))

- 23.136 In the period 2021–2022, ESCAP (subprogramme 6, Social development) received four requests for technical support from Cambodia, Maldives, Mongolia and the Philippines to develop capacity for the implementation of the Action Plan to Strengthen Regional Cooperation on Social Protection. The beneficiary entities (of the subsequent ESCAP interventions) included ministries responsible for social protection schemes and line ministries engaged in interministerial coordination on social protection in the target countries. In the Philippines, the ESCAP national review of the Action Plan fed into the preparation of the draft national social protection strategy as part of the Philippines national development plan 2023-2028. Stocktaking reviews on the readiness to implement the Action Plan were conducted in Cambodia, in collaboration with the Ministry of Social Affairs, Veterans and Youth Rehabilitation; in Maldives, in collaboration with the Ministry of Gender, Family and Social Services; and in Mongolia in collaboration with the Ministry of Labour and Social Protection.
- 23.137 In 2022, the ESCAP social protection simulator was expanded to help countries assess the impact of non-contributory cash transfers on economic indicators of consumption, poverty, inequality and the costs of schemes in their respective countries. ESCAP conducted a workshop to enhance the capacity of the Government of the Philippines to use the simulator to inform the design of social protection schemes. Further capacity-development material was produced through primers on the design of child benefits and maternity leave policies and cash transfers, as well as implementation of inclusive and universal social protection systems.
- 23.138 The above-mentioned work contributed to advancing data and guidance for evidence-based policy related to population ageing, in line with the Madrid International Plan of Action on Ageing and the 2030 Agenda for Sustainable Development, as reflected result 1 of subprogramme 6, and the related performance measure, as reflected in the programme budget for 2024 (A/78/6 (Sect. 19)) (see table 23.25).

Table 23.25
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
ESCAP member States support the mapping of policies on population ageing and the collection of data to monitor population ageing	Five ESCAP member States in special situations (Bhutan, Cambodia, Kyrgyzstan, Maldives and Mongolia) conduct national reviews on data and policies through bottom-up approaches and interministerial meetings to prepare for the fourth review and appraisal of the Madrid International Plan of Action on Ageing in the context of the 2030 Agenda	ESCAP member States adopted an outcome document (“Accelerating Implementation of the Madrid International Plan of Action on Ageing, 2002, to Build a Sustainable Society for All Ages in Asia and the Pacific”), which contained recommendations for action at the regional and national levels to address the economic and social impacts of population ageing, especially on older women	Three additional ESCAP member States address population ageing and other population and development concerns in policy frameworks and action plans	50 per cent of ESCAP member States have provided input to an online ESCAP repository of policies and data on implementing the Madrid International Plan of Action on Ageing 20 per cent of member States use the online ESCAP repository, and implement recommendations therein, when drafting new policies, laws, programmes and guidelines on population ageing

Expected responses to anticipated requests for support in 2024

Accelerated implementation of climate action

(result 2 of subprogramme 4 (A/78/6 (Sect. 19)))

Local governments localize the Sustainable Development Goals and contribute to national climate strategies

(result 3 of subprogramme 4 (A/78/6 (Sect. 19)))

- 23.139 In 2024, following the seventy-ninth session of ESCAP, on raising climate ambition in Asia and the Pacific, subprogramme 4, Environment and development will focus on the delivery of technical assistance for the development of “net zero” strategies and road maps, including for the application of instruments for the reduction and control of greenhouse gases and the development of enhanced transparency frameworks. Technical assistance for the development of “net zero” strategies and road maps is planned to be provided to Mongolia and countries in the South-East Asian subregion. Furthermore, capacity-development activities in that area will align with and complement activities expected to be delivered under the fifteenth tranche of the United Nations Development Account, on enhancing investments for equitable and accelerated climate action in the post-COVID-19 recovery, which includes activities in Bangladesh, Indonesia, Maldives and Samoa. Also, in 2024, demand from countries in the Pacific subregion on ocean-based climate solutions is expected to increase, coinciding with the hosting of the seventh Asia-Pacific Day for the Ocean, which will contribute to the implementation of ESCAP resolution 76/1, entitled “Strengthening cooperation to promote the conservation and sustainable use of the oceans, seas and marine resources for sustainable development in Asia and the Pacific”. In addition, requests are expected to increase in support of the follow-up to and review of the Global Food Summit and to build capacities for food systems risk and resilience.

- 23.140 With regard to sustainable urban development, subprogramme 4 is expected to continue to receive requests to support the localization of the Sustainable Development Goals and the development of voluntary local reviews, and increasingly for smart city solutions. Additional countries have expressed interest in receiving support from ESCAP for localization and/or smart city efforts, including Cambodia, India, the Lao People’s Democratic Republic and the Philippines. Priorities also include local climate action and strategies, through an international climate initiative project (“UrbanACT”) in which ESCAP is an implementing partner with the German Agency for International Cooperation (GIZ), to support the vertical integration of climate strategies in China, India, Indonesia, the Philippines and Thailand. The expected regular programme of technical cooperation activities will leverage ongoing and past and other projects to further support localization across the region.
- 23.141 The expected response in 2024 would contribute to accelerated implementation of climate action, which is reflected in result 2 of subprogramme 4, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 19)) (see figure 23.XII). In addition, the expected response in 2024 would contribute to local governments enhancing their capacities to localize the Sustainable Development Goals and contribute to national climate strategies, which is reflected in result 3 of subprogramme 4, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 19)) (see figure 23.XIII).

Figure 23.XII
Performance measure: number of Asia-Pacific countries that develop local climate and/or air pollution action plans and long-term, low-carbon and low-emissions development and recovery strategies (cumulative)

Figure 23. XIII

Performance measure: number of cities that develop voluntary local reviews and/or Sustainable Development Goals localization plans with direct support by ESCAP (annual)

Improved flow of goods and services at border crossing points in Eastern South Asia
(result 3 of subprogramme 8, component 4 ([A/78/6 \(Sect. 19\)](#)))

Increased integration of disaster risk-related analysis in national and local planning in countries of South and South-West Asia
(result 2 of subprogramme 8, component 4 ([A/78/6 \(Sect. 19\)](#)))

23.142 In 2024, component 4 of subprogramme 8, Subregional activities for development in South and South-West Asia, will support member States in strengthening transport, energy and ICT connectivity in collaboration with subprogrammes 3, 6 and 9. On the basis of a request from India to develop Sustainable Development Goals-aligned recommendations for improving cross-border connectivity in the subregion, as well as stakeholder consultations carried out in 2023 under the regular programme for technical cooperation, the component anticipates requests for additional technical assistance and capacity-building for strengthening connectivity in the above-mentioned areas, in particular in Eastern South Asia. Follow-up support is also anticipated from a joint high-level event in April 2023 by ESCAP and the Bay of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation on risk management in the climate-disaster-health nexus. In response to the anticipated requests, the component would provide training to government officials on the basis of modalities for implementation of specific connectivity projects recommended by studies and stakeholder consultations conducted in 2023. Technical assistance and capacity-building activities for stakeholders in South and South-West Asia is also anticipated on the use of relevant tools for enhancing disaster risk reduction.

23.143 The expected response in 2024 would contribute to improved flow of goods and services at border crossing points in Eastern South Asia, which is reflected in result 3 of component 4 of subprogramme 8, and the related performance measure, in the proposed programme budget for 2024 ([A/78/6 \(Sect. 19\)](#)) (see table 23.26). The expected response would also contribute to increased integration of disaster risk-related analysis in national and local planning in countries of South and South-West Asia, which is reflected in result 2 of component 4, and the related performance measure, in the proposed programme budget for 2024 ([A/78/6 \(Sect. 19\)](#)) (see table 23.27).

Table 23.26
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	The flow of goods and services at border crossing points in Eastern South Asia is hampered due to limited transboundary connectivity in transport, energy, ICT and supply chains in those localities	Two member States express interest in working jointly to improve the transboundary flow of goods and services at border crossing points in Eastern South Asia	Stakeholders of at least one border crossing point in Eastern South Asia reach a shared understanding of the bottlenecks to be mitigated for enhanced transboundary connectivity and the flow of goods and services

Table 23.27
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Evidence-based approaches to disaster risk reduction and climate change adaptation are not yet institutionalized and operationalized in a practical manner	Disaster management authorities in Maldives identified existing gaps in disaster risk management through the use of customized planning tools, database development and data collection	Policymakers from two countries in South Asia use customized planning tools, techniques and guidelines to facilitate the undertaking of disaster risk-related analyses for national and local planning purposes	Enhanced peer learning on improving disaster risk resilience enabled by two countries in South Asia sharing their expertise in undertaking disaster risk-related analyses for planning purposes with other countries in South and South-West Asia

Evidence-based strategies for increasing sustainable power system connectivity
(result 2 of subprogramme 9 (A/78/6 (Sect. 19)))

Increased ambition of national commitments by member States towards modern and clean energy in support of Goal 7
(result 3 of subprogramme 9 (A/78/6 (Sect. 19)))

23.144 In 2024, subprogramme 9, Energy, anticipates multiple country requests for support to upscale clean cooking in support of target 7.1 of Sustainable Development Goal 7 in their respective countries. Several of these country requests (Fiji and the Lao People’s Democratic Republic) have already been received in 2023, with more expected that will require support in 2024. In response to those requests, the subprogramme will roll out activities that would encompass capacity-building for the design and deployment of clean cooking technologies with a focus on electric cooking. This work is linked to the delivery of other elements of the work programme, in particular the follow-up to road maps

relating to Goal 7 and related recommendations on expanding access to clean cooking. The subprogramme also expects requests for capacity-building on key aspects of power system connectivity to integrate renewable electricity, including establishing multilateral power trading, for example, in South-East Asia to support efforts by South-East Asian energy utilities and regulators to continue the development of the ASEAN Power Grid. The subprogramme also anticipates requests from stakeholders in South Asia to support efforts to establish power trading arrangements in Bangladesh, Bhutan India and Nepal. This would include requests to give direct capacity-building support in priority areas for power connectivity development and power trade, and to exchange knowledge among Asia-Pacific subregions and relevant stakeholders in other regions of the world, in particular Africa and Europe. Requests for support are also anticipated on topics related to the sustainable development of extractive industries and the impacts of energy transition on critical raw materials.

- 23.145 The expected response in 2024 would contribute to the follow-up on recommendations in the road maps related to Sustainable Development Goal 7 and to the evidence-based strategies for increasing sustainable power system connectivity, which is reflected under result 2 of subprogramme 9, and the related performance measure, in the proposed programme budget (A/78/6 (Sect. 19)) (see table 23.28). The work would also contribute to the increased ambition of national commitments by member States towards modern and clean energy in support of Goal 7, as reflected under the result 3 of subprogramme 9, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 19)) (see table 23.29).

Table 23.28

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
ESCAP member States agreed on draft text of a regional road map on power system connectivity through informal consultation	Committee on Energy endorsed the regional road map on power system connectivity at its third session, and the Commission endorsed it at its seventy-seventh session	ESCAP member States provided updates on connectivity activities on a voluntary basis at meetings of the Expert Working Group on Energy Connectivity Time frames for achieving the road map milestones have been met or are under development	ESCAP member States analyse gaps in policies, regulations and standards in each subregion and agree on a set of principles for enabling sustainable power system connectivity	At least one subregion demonstrates progress on establishing multilateral power trading

Table 23.29

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	At the Committee on Energy, member States announced commitments to increasing energy	Member States provided updates on the development of sustainable energy policies at meetings	Member States agree on accelerated Sustainable Development	Member States announce more ambitious national commitments to increase the share of

Section 23 Regular programme of technical cooperation

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
	access, energy efficiency and renewable capacity	of the expert working group on universal access to modern energy services, renewable energy, energy efficiency and cleaner use of fossil fuels	Goal 7 actions in specific areas in support of the 2030 Agenda and the Paris Agreement	energy from renewable sources; and to adopt advanced energy efficiency and enhance access to electricity and clean cooking technologies, research, technology and investments in clean energy

B. Deliverables

23.146 Table 23.30 lists all expected deliverables, by category and subcategory, for the period 2022–2024.

Table 23.30

Economic and Social Commission for Asia and the Pacific: expected deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	134	131.5	140	150

C. Proposed non-post resource requirements for 2024

Table 23.31

Financial resources by object of expenditure

(Thousands of United States dollars)

	<i>2022 expenditure</i>	<i>2023 appropriation</i>	<i>Changes</i>		<i>2024 estimate (before recosting)</i>
			<i>Total</i>	<i>Percentage</i>	
Other staff costs	743.3	858.2	–	–	858.2
Consultants	1 462.8	1 323.9	–	–	1 323.9
Experts	33.6	–	–	–	–
Travel of staff	202.7	394.0	51.9	13.2	445.9
Contractual services	380.5	581.7	–	–	581.7
General operating expenses	126.6	198.2	–	–	198.2
Supplies and materials	1.1	–	–	–	–
Grants and contributions	445.2	396.7	51.9	13.1	448.6
Total	3 395.8	3 752.7	103.8	2.8	3 856.5

23.147 The proposed regular budget resources for 2024 amount to \$3,856,500 and reflect an increase of \$103,800, or 2.8 per cent, compared with the appropriation for 2023. The proposed increase under

travel of staff (\$51,900) would be for the delivery of in-person advisory services and technical support on the ground to Governments, with specific advice on sectoral matters relevant to their development strategy or programme and aid in the preparation of specialized components of a country's development strategy. The proposed increase under grants and contributions (\$51,900) would provide support for technical cooperation activities in institutional capacity-building, including through the development of networks of experts and practitioners in the respective sectoral areas to facilitate knowledge exchange and potential collaboration, especially through South-South cooperation.

9. Economic development in Europe

A. Programmatic activities delivered through the regular programme of technical cooperation

- 23.148 The activities under economic development in Europe are implemented by the secretariat of ECE. The programmatic activities are implemented under the following subprogrammes of ECE: subprogramme 1, Environment; subprogramme 2, Transport; subprogramme 3, Statistics; subprogramme 4, Economic cooperation and integration; subprogramme 5, Sustainable energy; subprogramme 6, Trade; subprogramme 7, Forests and the forest industry; and subprogramme 8, Housing, land management and population. Technical cooperation activities are focused on the 17 United Nations programme countries in the ECE region, with a view to strengthening their national capacities to accede to and implement ECE and international legal instruments, norms and standards.
- 23.149 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2024 (A/78/6 (Sect. 20)).

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.150 ECE established a system for consistent outreach to raise awareness on technical cooperation opportunities for the United Nations programme countries in the ECE region through meetings with government officials in the context of intergovernmental meetings, workshops, advisory missions, regular meetings with the resident coordinators and United Nations country teams in the region. Some examples include: (a) workshops and sessions for policymakers at national, subregional and regional levels to promote multilateral environmental agreements, United Nations transport-related legal instruments and other available norms, tools and standards; (b) targeted presentations at regular intergovernmental sessions, for instance, presentation to the Inland Transport Committee at its eighty-fifth session on the implementation of the Inland Transport Committee Capacity Development Action Plan; (c) annual high-level seminar on capacity development for heads of national statistical offices in programme countries in the ECE region and regular meetings of the Regional United Nations Coordination Group on Data and Statistics in Europe and Central Asia, which provides opportunities for data and statistics focal points from country teams in the region to share needs and request support; (d) annual meetings of the thematic working groups of the United Nations Special Programme for the Economies of Central Asia, jointly organized by ECE and ESCAP, where member States discuss common challenges in the area of environment, energy, trade, transport and innovations, and have an opportunity to request technical cooperation support to identify common solutions; (e) meetings of the issues-based coalition on environment and climate change and outreach to resident coordinator offices and country teams on integrating environment and climate change to the United Nations Sustainable Development Cooperation Framework; and (f) regular briefings for the resident coordinators and country teams on the ongoing and planned portfolio of the regular programme of technical cooperation, including regular participation of ECE regional advisers in country team and relevant Cooperation Framework results group meetings.

- 23.151 Strategic- and technical-level discussions with the resident coordinators and United Nations country teams on existing portfolio to identify areas for partnerships and new programmatic opportunities prove to be an important vehicle for awareness-raising and leveraging funding through joint submissions to such funding instruments as the Sustainable Development Goals Fund. ECE works closely with the permanent missions to the United Nations based in Geneva with respect to the processes involved in the nominations of policymakers for capacity-building and field projects and organizing briefings on ECE portfolio in mandated areas. It also coordinates and looks for complementarities with other United Nations organizations for national and subregional interventions.

Response provided to member States' requests for support in 2022

Accelerated digitalization of legal instruments in inland transport in response to COVID-19
(programme performance section of subprogramme 2 (A/78/6 (Sect. 20)))

- 23.152 In 2022, ECE focused its technical cooperation on delivering integrated policy- and capacity-building responses to facilitate transboundary cooperation, improve connectivity and support green transformation and digitalization, and on responding to emerging needs due to the war in Ukraine and its consequences for neighbouring countries.
- 23.153 Subprogramme 2: Transport contributes to advancing a regionally and globally sustainable inland transport (road, rail, inland waterway and intermodality) system by making it safer, cleaner, more efficient and more affordable, both for freight transport and people's mobility. In 2022, technical cooperation responses achieved an important milestone in the efforts to improve road safety and the modernization of international transportation for the benefits of target countries. In Bosnia and Herzegovina, on the basis of a request of the Government, ECE prepared a road map for roadside technical inspection of vehicles. That road map is a continuation of ECE support to Bosnia and Herzegovina that originated with the draft framework road safety strategy and the road map for accession to and implementation for Bosnia and Herzegovina of the 1997 Agreement concerning the adoption of uniform conditions for periodical technical inspections of wheeled vehicles and the reciprocal recognition of such inspections. In 2022, Georgia adopted a national road safety strategy that is based on findings and recommendations of the earlier road safety performance review conducted by ECE. ECE also provided technical support in modernizing international transportation through the use of digital technology. The first electronic TIR (eTIR) transport in line with the Customs Convention on the International Transport of Goods under Cover of TIR Carnets has taken place between Azerbaijan and Uzbekistan. This marked a new, digital era of the TIR system and is the result of long-lasting efforts by ECE to modernize international transport.
- 23.154 The above-mentioned work contributed to accelerated inland transport in response to COVID-19, which is a result reflected in the section on programme performance under subprogramme 2, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 20)) (see figure 23.XIV).

Figure 23.XIV

Performance measure: number of accessions by Member States to legal instruments for the digitalization of transport and border-crossing procedures (CMR, eCMR and TIR) (cumulative)

Abbreviations: CMR: Convention on the Contract for the International Carriage of Goods by Road; eCMR: Additional Protocol to the Convention on the Contract for the International Carriage of Goods by Road concerning the electronic consignment note; TIR, Customs Convention on the International Transport of Goods under Cover of TIR Carnets.

Expected responses to anticipated requests for support in 2024

Improved information for strengthening transboundary water cooperation

(result 1 of subprogramme 1 (A/78/6 (Sect. 20)))

Strengthened regulatory support in road safety contributing to fewer worldwide road accident fatalities and injuries

(result 1 of subprogramme 2 (A/78/6 (Sect. 20)))

Enhanced regulatory framework for sustainable inland transport systems

(result 2 of subprogramme 2 (A/78/6 (Sect. 20)))

Increased number of countries collaborating on developing and using machine learning techniques for the production of official statistics

(result 2 of subprogramme 3 (A/78/6 (Sect. 20)))

Improved capacity of member States in the development of infrastructure projects in support of the Sustainable Development Goals and the circular economy

(result 2 of subprogramme 4 (A/78/6 (Sect. 20)))

Enhanced resilience of energy systems in the Economic Commission for Europe region

(result 3 of subprogramme 5 (A/78/6 (Sect. 20)))

Increased facilitation of agricultural trade through the adoption of agricultural quality and electronic business standards in Economic Commission for Europe member States

(result 2 of subprogramme 6 (A/78/6 (Sect. 20)))

Increased access to forest product information to support evidence-led policymaking for the sustainable production and consumption of forest products

(result 1 of subprogramme 7 (A/78/6 (Sect. 20)))

Acceleration of the city-level implementation of the Sustainable Development Goals

(result 2 of subprogramme 8 (A/78/6 (Sect. 20)))

- 23.155 In 2024, subprogramme 1: Environment, subprogramme 2: Transport, subprogramme 3: Statistics, subprogramme 4: Economic cooperation and integration, subprogramme 5: Sustainable energy, subprogramme 6: Trade, subprogramme 7: Forests and the forest industry, and subprogramme 8:

Housing, land management and population will continue to provide timely responses to the requests from member States and support government officials and policy practitioners from United Nations programme countries to strengthen national capacities to accede to and implement ECE and international legal instruments, norms and standards, address ongoing and emerging transboundary challenges and provide integrated policy responses to changing economic realities, thus supporting the countries in achieving the 2030 Agenda for Sustainable Development. ECE will continue to deliver its targeted and demand-driven sectoral and cross sectoral capacity-building services, including advisory services, training and field projects, in close collaboration with resident coordinators and United Nations country teams in the 17 United Nations programme countries. The interconnectedness of the Sustainable Development Goals will be reflected in capacity-building activities in areas where multiple Goals converge (digitalization, the circular economy, green transformation, sustainable urban solutions, sustainable mobility and connectivity, and others). It will also integrate South-South cooperation and peer learning components to share experience on various capacity-development approaches and policy options that countries employed to build up on available good practices that could be replicated across region.

23.156 In response to the anticipated requests in 2024, the subprogrammes would:

- (a) Address the emerging challenges of United Nations programme countries, focusing on the economic and environmental impacts of the COVID-19 pandemic and the ongoing crisis;
- (b) Deliver technical cooperation to support the ratification and implementation of international norms, standards and agreements;
- (c) Address transboundary cross-border challenges, improve connectivity and build economic and environmental resilience, including through the platform provided by the United Nations Special Programme for the Economies of Central Asia.

23.157 The subprogrammes would deliver capacity-building programmes focusing on:

- (a) Strengthened capacities of member States in Central Asia in the areas of water and health (under the Protocol on Water and Health to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes), and development of national state-of-the-environment reporting in Central Asia;
- (b) Enhancement of South-Eastern Europe, the Caucasus and g Asia member States for the efficient implementation of United Nations transport legal instruments, with the aim of deploying digitalized transport services and improving national road safety systems;
- (c) Strengthened capacities of national statistical systems in programme countries to modernize their statistical production, including moving to more efficient organizational structures, implementing relevant ECE standards and models and developing the use of new data sources, with a focus on high demand from the Caucasus, the Republic of Moldova and Ukraine;
- (d) Support for institutional structures for innovation and technology in the programme countries and building an enabling environment for public-private partnerships;
- (e) Strengthened capacities of member States in South-Eastern and Eastern Europe, the Caucasus and Central Asia in the areas of energy efficiency in buildings and industry, renewable energy, attaining “net zero”, safe and environmentally and socially conscious coal mine closure, just transition, and enhancing resilience of energy systems;
- (f) Strengthened capacities of Azerbaijan, Turkmenistan and Uzbekistan to implement the World Trade Organization Trade Facilitation Agreement and the United Nations Centre for Facilitation of Procedures and Practices for Administration, Commerce and Transport standards for trade facilitation and electronic business multimodal transport data exchange;
- (g) Support for the United Nations programme countries in sustainably managing healthy forest ecosystems in order to provide important ecosystem goods and services to benefit society, including climate mitigation and adaptation;

- (h) Support for local governments in the development of sustainable urban solutions, development of smart cities profiles and Sustainable Development Goals-related voluntary local reviews;
- (i) Strengthened capacity of member States in South-Eastern and Eastern Europe, the Caucasus and Central Asia in mainstreaming ageing through the development of national strategic frameworks for mainstreaming ageing, data gap analyses, training in age-sensitive analysis and methods for mainstreaming ageing in sectoral policies.

23.158 The expected responses would contribute to results under all eight subprogrammes, including, for example, improved information for strengthening transboundary water cooperation, which is reflected in result 1 of subprogramme 1, and the related performance measures (see figure 23.XV); strengthened regulatory support in road safety contributing to fewer worldwide road accident fatalities and injuries, which is reflected in result 1 of subprogramme 2, and the related performance measure (see figure 23.XVI); enhanced regulatory framework for sustainable inland transport systems, which is reflected in result 2 of subprogramme 2, and the related performance measure (see figure 23.XVII); increased number of countries collaborating on developing and using machine learning techniques for the production of official statistics, which is reflected in result 2 of subprogramme 3, and the related performance measures (see figure 23.XVIII); improved capacity of member States in the development of infrastructure projects in support of the Sustainable Development Goals and the circular economy, which is reflected in result 2 of subprogramme 4, and the related performance measure (see figure 23.XIX); enhanced resilience of energy systems in the ECE region, which is reflected in result 3 in subprogramme 5, and the related performance measure (see figure 23.XX); increased facilitation of agricultural trade through the adoption of agricultural quality and electronic business standards in Economic Commission for Europe member States, which is reflected in result 2 of subprogramme 6, and the related performance measure (see figure 23.XXI); increased access to forest product information to support evidence-led policymaking for the sustainable production and consumption of forest products, which is reflected in result 1 of subprogramme 7, and the related performance measure (see figure 23.XXII); and acceleration of the city-level implementation of the Sustainable Development Goals, which is reflected in result 2 of subprogramme 8, and the related performance measure (see table 23.32), of the proposed programme budget for 2024 ([A/78/6 \(Sect. 20\)](#)).

Total	2 334.2	2 542.1	70.3	2.8	2 612.4

23.160 The proposed regular budget resources for 2024 amount to \$2,612,400 and reflect an increase of \$70,300, or 2.8 per cent, compared with the appropriation for 2023. The proposed increase under consultants (\$70,300) is to provide additional demand-driven advisory services field projects on the basis of requests from the Member States, implemented through national and regional consultants to accelerate achievement of 2030 Agenda for Sustainable Development.

10. Economic and social development in Latin America and the Caribbean

A. Programmatic activities delivered through the regular programme of technical cooperation

23.161 The activities under economic and social development in Latin American and the Caribbean are implemented by ECLAC. The programmatic activities are implemented under the following subprogrammes of ECLAC: subprogramme 1: International trade, integration and infrastructure; subprogramme 2: Production and innovation; subprogramme 3: Macroeconomic policies and growth; subprogramme 4: Social development and equality; subprogramme 6: Population and development; subprogramme 7: Sustainable development and human settlements; subprogramme 8: Natural resources; subprogramme 10: Statistics; subprogramme 11: Subregional activities in Central

America, Cuba, the Dominican Republic, Haiti and Mexico; and subprogramme 12: Subregional activities in the Caribbean.

- 23.162 In implementing those activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2024 (A/78/6 (Sect. 21)).

Expected additional requests for support from member States for 2024

- 23.163 In response to an anticipated increase in the volume of requests for assistance from member States, ECLAC plans to provide additional technical cooperation, advisory services and capacity-building support to the countries of the Latin American and the Caribbean Region in the area of improved coordination of trade, logistics and regional integration policies, to support the following: the digital transformation of small and medium-sized enterprises and their participation in cross-border e-commerce and fiscal policies; the strengthening of social security systems and social protection policies to address inequalities affecting the most vulnerable; the delayed round of 2020 census and populations estimations; issues related to the care economy and non-remunerated work; gender equality and women's autonomy; sustainable management of water; energy transition; the increase in value addition in the mining sector; and statistical and data production and use.

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.164 In line with the demand-driven nature of the regular programme of technical cooperation, ECLAC raises awareness of the opportunities for Latin American and Caribbean countries to gain access to technical support from the regular programme resources through outreach and ECLAC notifications and announcements on various training offerings, in addition to face-to-face meetings with government officials, including permanent representatives, of the countries of the region, in the context of intergovernmental meetings, conferences, seminars, workshops and various capacity-building events organized by the entity. Those informal settings are better suited to make an initial assessment of a country's needs and to try to match them with in-house expertise.

Response provided to member States' requests for support in 2022

Strengthened regulations for decent work for digital platform workers (programme performance section of subprogramme 3 (A/78/6 (Sect. 21)))

- 23.165 Subprogramme 3: Macroeconomic policies and growth, contributes to fostering suitable and inclusive growth in Latin America and the Caribbean by strengthening the capacity of policymakers and other stakeholders in the region to analyse current and emerging macroeconomic and development finance issues, and to evaluate, design and implement development-centred macroeconomic and development for financing policies that incorporate a gender perspective and are based on comparative analysis. Moreover, labour markets play a crucial role in channelling the benefits of strengthened macroeconomic fundamentals to society. In the region, this mechanism of transmission is hampered by high levels of informality and inequality, as well as insufficient provision of labour market intermediation services. These challenges are being aggravated by rapid changes in the world of work, with the accelerating creation of new occupations, such as those tied to digital platforms, that are less amenable to social security systems. The COVID-19 pandemic highlighted the rapid growth in the region of new business models based on online platforms, which have given rise to new occupations that generally do not meet the criteria of decent work, entail employment relationships that are neither wage employment nor own-account work, and in most cases are not covered by labour legislation.
- 23.166 In this regard, ECLAC continued to receive requests to support countries of the region to strengthen data collection methods to better characterize these workers, promote dialogue on options for labour regulation and generate evidence-based policy recommendations to promote decent work conditions

for platform workers. In 2022, advisory services were delivered to Chile and Colombia on the issue of labour regulations applicable to digital platform workers.

- 23.167 The above-mentioned work contributed to strengthened regulations for decent work for digital platform workers, a result in the programme performance section of subprogramme 3, and the related performance measure, in the proposed programme budget for 2024 ([A/78/6 \(Sect. 21\)](#)) (see table 23.35).

Table 23.35
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Costa Rica, Dominican Republic and Ecuador and received technical support to strengthen capacities and improve methods for collecting data on digital platform workers	Improved data collection to better capture information on digital platform workers, including through the use of methods relating to big data	Policymakers gained access to evidence-based policy recommendations for labour regulations, through studies on the cases of Chile and Colombia
Policymakers discussed options for labour regulations at seminars held in Costa Rica and Mexico	Policymakers shared experiences, during a seminar held in Chile and at a regional event held in the context of South-South dialogue	Chile became the first country of the region to introduce a regulatory framework for digital platform workers (Act 21.431, regulating the hiring of workers by digital platform service companies)
Policymakers discussed detailed studies on existing labour regulations in Argentina and Mexico		

Expected responses to anticipated requests for support in 2024

Member States promote the participation of small and medium-sized enterprises in cross-border e-commerce
(result 3 of subprogramme 1 ([A/78/6 \(Sect. 21\)](#)))

- 23.168 In 2024, subprogramme 1: International trade, integration and infrastructure will continue to support national officials and government authorities from countries of Latin America and the Caribbean to advance sustainable development and strengthen the role of the region in international trade and the global economy by deepening regional integration and enhancing logistics and infrastructure. The subprogramme has been providing technical assistance to export promotion agencies, trade ministries and chambers of commerce to identify the strengths and weaknesses of present support programmes for small and medium-sized enterprises and other critical pillars for their digital transformation and participation in cross-border e-commerce. The subprogramme is planning to work more closely with the with statistical institutes, export promotion agencies, trade ministries, customs and other important actors of the e-commerce ecosystem to better identify bottlenecks that hold back the participation of small and medium-sized enterprises in e-commerce abroad and define more impactful solutions.
- 23.169 In response to the anticipated requests in 2024, the subprogramme would: (a) tailor its capacity-building activities and advisory services to better respond to the needs of the countries of the region, providing updated information, analysis and policy recommendations; and (b) provide technical assistance and support knowledge dissemination and the sharing of best practices through expert meetings, seminars and workshops.
- 23.170 The expected response in 2024 would contribute to Member States promoting the participation of small and medium-sized enterprises in cross-border e-commerce, which is reflected in result 3 of subprogramme 1, and the related performance measure, in the proposed programme budget for 2024 ([A/78/6 \(Sect. 21\)](#)) (see figure 23.XXIII).

Figure 23.XXIII

Performance measure: number of Latin American and Caribbean country institutions requesting technical support in implementing more coordinated trade and logistics strategies within a regional perspective (cumulative)

Digitalization in agriculture

(result 3 of subprogramme 6 (A/78/6 (Sect. 21)))

- 23.171 In 2024, subprogramme 8: Natural resources will continue to support countries of the Latin American and Caribbean region to improve the governance and enhance the sustainable use and exploitation of natural resources, focusing on water resources management; affordable, inclusive and clean energy; extractive resources efficiency; food security; sustainable agriculture; and biodiversity. The subprogramme has been working with various Governments of the region in recent years with the aim of promoting the development of digital agriculture through the study of current technological gaps and the proposal of measures to overcome them. In addition, the subprogramme has been helping several countries to deliver capacity-building activities to train young rural entrepreneurs in this area, so that they can provide digital solutions to the specific demands of the agricultural sector in their respective countries. The subprogramme is planning to support member States in developing and implementing low-cost solutions and to promote the coordination of public actors to allow the generation of synergies and to co-implement activities contributing to the development of digital agriculture in the region.
- 23.172 In response to the anticipated requests in 2024 the subprogramme will: (a) promote the coordination of public actors in the agricultural digitalization process and its integration with the approach of sustainability and resilience of agrifood systems; and (b) provide capacity-building activities and technical assistance through training and expert meetings, seminars and workshops.
- 23.173 The expected response in 2024 would contribute to digitalization in agriculture, which is reflected in result 3 of subprogramme 6, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 21)) (see figure 23.XXIV).

Figure 23.XXIV

Performance measure: Number of initiatives implemented by countries in the region to support digital agriculture based on low-cost solutions and the coordination of public and private actors (cumulative)

Gender-sensitive policies on paid and unpaid work in the Caribbean better informed through time-use surveys

(result 3 of subprogramme 12 (A/77/6 (Sect. 21)))

- 23.174 In 2024, subprogramme 12: Subregional activities in the Caribbean will continue to support countries of the Caribbean in strengthening sustainable development processes in the subregion in the economic, social and environmental dimensions, and in enhancing subregional cooperation with Latin America. The subprogramme has been working with various Governments of the subregion to assess the gendered impact of the COVID-19 pandemic on paid and unpaid work. The subprogramme is planning to support member States in ascertaining where progress in women’s participation in the labour market has been reversed or impeded by the pandemic and provide technical assistance to advise national institutions on how to incorporate time-use modules in population and housing census and labour force surveys.
- 23.175 In response to the anticipated requests in 2024, the subprogramme will: (a) provide capacity-building activities and technical assistance through training and expert meetings, seminars and workshops; and (b) advisory services and technical assistance to expand capacity for data collection and analysis and the production of sex-disaggregated data.
- 23.176 The expected response in 2024 would contribute to gender-sensitive policies on paid and unpaid work in the Caribbean being better informed through time-use surveys, which is reflected in result 3 of subprogramme 12, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 21)) (see table 23.36).

Table 23.36

Total	4 066.5	5 019.0	138.9	2.8	5 157.9

23.178 The proposed regular budget resources for 2024 amount to \$5,157,900 and reflect a resource increase of \$138,900, or 2.8 per cent, compared with the appropriation for 2023. The proposed increase under consultants (\$138,900) is to provide to support the provision of specialized technical assistance to the countries of the region.

11. Economic and social development in Western Asia**A. Programmatic activities delivered through the regular programme of technical cooperation**

23.179 The activities under economic and social development in Western Asia are implemented by ESCWA, which is mandated to promote inclusive and sustainable socioeconomic development in the Arab region. The programmatic activities are implemented under the following subprogrammes of ESCWA: subprogramme 1, Climate change and natural resource sustainability; subprogramme 2, Gender justice, population and inclusive development; subprogramme 3, Shared economic prosperity; subprogramme 4, Statistics, the information society and technology; subprogramme 5, 2030 Agenda and Sustainable Development Goal coordination; and subprogramme 6, Governance and conflict prevention.

- 23.180 In implementing these activities, the regular programme of technical cooperation contributes to the objectives and expected results of the above subprogrammes and complements their respective strategies and deliverables, which can be found in the relevant paragraphs of the proposed programme budget for 2024 (A/78/6 (Sect. 22)).

Expected additional requests for support from member States for 2023

- 23.181 In response to an anticipated increase in the volume of requests for assistance from member States in 2024, ESCWA would provide additional capacity-building activities and advisory services, with a focus on the newest member States that are also least developed countries, namely, Djibouti and Somalia. Additional requests are also anticipated from other the least developed country members, such as Mauritania, the Sudan and Yemen, and countries in conflict or under occupation, namely, Libya, the State of Palestine and the Syrian Arab Republic. Lastly, ESCWA is providing a higher number of training days every year, as requests and needs for in-person capacity development are increasing.

Outreach and dissemination of guidelines to Member States on the opportunities for assistance through the regular programme of technical cooperation

- 23.182 Outreach for the regular programme of technical cooperation is undertaken through several formal and informal channels. In December 2022, ESCWA organized a meeting of its technical cooperation network, comprising national technical cooperation focal points in member States to discuss their priorities and needs, highlight modes of delivery of the regular programme and means of requesting assistance, and present an overview of main technical cooperation interventions in member States in 2022. In May 2022, ESCWA responded to the request of the Government of Oman for an outreach workshop on the regular programme, presenting the programme, ways to benefit from it and main services and tools delivered under it. More than 60 participants from national entities concerned with economic and social development benefitted from the workshop; bilateral discussions were held the next day with several ministries; as a result, ESCWA received and is responding to more than 15 requests from Oman. Throughout the year, ESCWA also placed a discussion on the regular programme on the agendas of all formal policy dialogues held with member States in the context of intergovernmental committees, namely the committees on technology for development; statistics; and transport and logistics. ESCWA presented sectoral reports to those committees on its technical cooperation activities in their respective fields.
- 23.183 In 2022, the Executive Secretary of ESCWA led at least six outreach visits to different member States in order to advance regular programme of technical cooperation assistance provided to them. Less formal outreach channels were also activated throughout the year: staff from the different subprogrammes organized briefings or participated in meetings to showcase ESCWA technical cooperation services, contributing to some 50 outreach activities, including conferences, meetings and seminars on technical cooperation services that ESCWA renders in fields such as road safety, conflict and development, and climate change.

Review of high-level positions at headquarters duty stations (ESCWA)

- 23.184 The main function of interregional advisers based at headquarters duty stations is to provide technical expertise, facilitate the transfer of knowledge from global deliberations and latest analytical work to Governments and contribute to the formulation, assessment and/or evaluation of national policies, strategies, programmes and projects of member States at their request. The roles and functions are reflected in the job descriptions and terms of reference and are classified at the appropriate level. Any new appointments and extensions of appointments of interregional advisers are considered annually on the basis of their respective supervisors' evaluations and recommendations and sent to the Head of the Department for approval prior to the submission of the budget.

Response provided to member States' requests for support in 2022**Increased effectiveness and efficiency of social protection systems in the Arab region**
(result 2 of subprogramme 2 (A/78/6 (Sect. 22)))

- 23.185 The COVID-19 pandemic has revealed weaknesses in the readiness of the social protection systems of Arab countries for absorbing and responding to shocks of such magnitude. Since its onset, the pandemic has pushed more and more individuals from vulnerable groups, including women, workers in the informal labour market and persons with disabilities, into poverty and unemployment. Accordingly, throughout 2022, ESCWA received and responded to 14 requests for advisory services and capacity development in the area of social protection strengthening, from Arab least developed countries such as Mauritania and Somalia, and middle-income countries such as Egypt, Jordan and Tunisia. The requests concerned different aspects of social protection, such as covering informal workers in health insurance programmes; advancing equality in health and education through conditional cash transfers; analysing data from social registries, using technology to unify and digitize such registries and creating dashboards for social protection programmes; and supporting the formulation of action plans for the graduation of beneficiaries in aid programmes.
- 23.186 In 2022, ESCWA responded to those requests through the combined efforts of its subprogrammes 2 (Gender justice, population and inclusive development) and 4 (Statistics, the information society and technology). It organized advisory missions to support national aid funds and social protection entities in unifying their social registries and digitizing corresponding data (e.g., to Jordan in September and November 2022; and to the Sudan in June 2022). The subprogrammes provided policy advice on better targeting vulnerable groups by increasing the effectiveness of social assistance, by way of advisory reports and official briefings to the five above-mentioned countries throughout the year. They also organized workshops for knowledge exchange on graduation options and on extending social protection to persons in non-standard forms of work (including entry-level workshop and training-of-trainers for Jordan on quantitative analysis in support of social protection policymaking, held in Amman in March 2022; and training for directors of social protection programmes, held in Nouakchott in September 2022). Moreover, in March 2022, ESCWA organized a study tour for social protection officials from Kuwait to the National Aid Fund in Jordan (funded through the United Nations Development Account) to support collaboration and peer exchange on social protection issues among the two countries.
- 23.187 To complement assistance under the regular programme of technical cooperation, ESCWA has leveraged its United Nations Development Account project entitled “Social Expenditure Monitor: An integrated framework for supporting macro-fiscal policies and the Sustainable Development Goals in the Arab region”, implemented under subprogramme 3, to roll out national social expenditure monitors in Jordan and Tunisia, two of the countries that requested technical assistance under the regular programme to improve their social protection systems. These national monitors, launched in September 2022, provided a tool for Governments to monitor their social expenditure by beneficiary group, and analyse and improve its effectiveness and efficiency. ESCWA is currently rolling out the social expenditure monitor in Egypt, a third country it has assisted through the regular programme on social protection issues. In addition, ESCWA has leveraged a second United Nations Development Account project, on including persons with disabilities in the Arab labour market, to provide four train-the-trainer sessions throughout 2022 and produce training material on facilitating access of persons with disabilities to employment opportunities and supporting their graduation from aid programmes.
- 23.188 The above-mentioned work contributed to increased effectiveness and efficiency of social protection systems in the Arab region, which is reflected in result 2 of subprogramme 2, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 22)) (see table 23.39).

Table 23.39
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
During COVID-19, at least eight member States (Egypt, Jordan, Mauritania, Morocco, Oman, State of Palestine, the Sudan, Tunisia) rapidly channelled additional assistance to households covered by social insurance and social assistance and set up temporary emergency programmes directed at informal workers who were covered neither by social assistance nor social insurance	179 people (66 men and 113 women) from 17 member States trained on tools to increase inclusiveness of social protection systems 1 member State (Jordan) analysed the inclusiveness of its social protection systems	Civil servants and social assistance professionals from 3 member States (Egypt, Jordan and Mauritania) trained on the social protection programme rapid assessment framework tool to increase inclusiveness of social protection systems 2 member States (Egypt and Jordan) identified enhancements required to improve the efficiency and effectiveness of their social protection systems, in particular those related to effective coverage of currently excluded groups	2 additional member States identify enhancements required to improve the efficiency and effectiveness of their social protection systems	2 member States adopt measures to enhance the efficiency and effectiveness of their social protection systems

Expected responses to anticipated requests for support in 2024

Sustainable transition to new and renewable sources of energy underpinned by a transformed extractive industries sector

(result 3 of subprogramme 1 (A/78/6 (Sect. 22)))

- 23.189 Several ESCWA member States are highly dependent on fossil fuels for revenue and employment but have the opportunity to achieve a green transition by building on their natural resources and their potential in oil, gas and renewables. In the period 2021-2022, in response to a request from Kuwait, ESCWA has developed a strategic framework and road map for enabling a just transition of the energy sector. It is expected that requests of this nature will increase in the period 2023-2024 thanks to the advocacy efforts of ESCWA for member States to adopt and implement the circular economy framework. As a result, at its special seventh session, held in Amman in December 2022, ESCWA was mandated to establish a centre for supporting reducing greenhouse gas emissions in the Arab region, whose functions would include advancing climate neutrality and operationalizing the circular economy approach. On 16 February 2023, ESCWA held a briefing session with the Ministry of Energy and Water Resources of Somalia to present its assessment of the state of the energy sector in the country and the technical cooperation services it could provide for developing a detailed long-term energy strategy beyond 2024, and it is expecting a formal request from the country in that

regard. Such demands are expected to increase, and capacity-development and advisory services would also need to increase in the context of the centre to be established from extrabudgetary sources. This will allow increasing complementarity between the regular programme of technical cooperation and other sources of funding, in order to undertake the costly assessments needed, produce the required data and generate the evidence for the formulation of just energy transition plans in ESCWA member States.

- 23.190 The expected response in 2024 would contribute to sustainable transition to new and renewable sources of energy underpinned by a transformed extractive industries sector, which is reflected in result 3 of subprogramme 1, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 22)) (see table 23.40).

Table 23.40
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Regional group of experts on extractive industries established	Member States have access to information on extractive industries in the Arab region Strategic framework and road map for enabling just, inclusive, equitable and secure transition of the energy sector, based on the circular economy framework, is developed for one member State (Kuwait)	Member States have access to a suite of knowledge products and evidence on key pillars of the extractive industries sector and pathways to transition to sustainable energy systems Member States utilize the group of experts to exchange expertise and good practices, and coordinate national actions at the regional level	Member States formulate national policy frameworks in support of transforming extractive energy sector towards a transition to affordable, reliable, sustainable and modern, energy systems

Contextualized economic modelling informs development of economic, social and trade policies (result 3 of subprogramme 3 (A/78/6 (Sect. 22)))

- 23.191 Since 2021, ESCWA has been making efforts to push for evidence-based policymaking in another area of work. It has developed a user-friendly interface for economic computable general equilibrium modelling, which allows policymakers to simulate the effects of a given policy on a range of economic and social indicators of their choice. It has tailored it to the needs of Egypt, Iraq, Jordan, the State of Palestine and Yemen on the basis of their requests in the context of the regular programme of technical cooperation and under subprogrammes 3 and 4 (the latter being involved in the production of input and output tables and social accounting matrices needed for the model). Currently, ESCWA is responding to requests for the development of such an interface for Mauritania, Morocco, Oman and the United Arab Emirates, and has very recently received a request from Saudi Arabia for such a model. It is expected that more and more member States will be interested in developing such a user-friendly economic model, which has been widely welcomed and used by those States that have already benefited from it. In parallel, ESCWA is developing another modelling interface for trade policy simulations, linking tariffs and other trade costs to a range of indicators, including foreign direct investment flows, greenhouse gas emissions, and movements and stocks of

migrants and remittances. ESCWA has received requests from Oman and the United Arab Emirates to benefit from its trade model and tailor it to their needs, and it is expected that more countries will make such requests through 2024. To respond to those needs, ESCWA will provide advisory services and training for national statistical offices to provide the required national data, and for ministries of economy, finance and central banks to tailor the model to their specific needs.

- 23.192 These efforts would contribute to contextualized economic modelling informs development of economic, social and trade policies, which is reflected in result 3 of subprogramme 3, and the related performance measure, in the proposed programme budget for 2024 (A/78/6 (Sect. 22)) (see table 23.41).

23.194 The proposed regular budget resources for 2024 amount to \$4,926,200 and reflect a resource increase of \$132,600, or 2.8 per cent, compared with the appropriation for 2023. The proposed increase under other staff costs (\$132,600) is to provide additional capacity-building workshops and advisory services to the least developed countries and conflict-affected member States.

Annex

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee notes that the resources under the programme are used for positions, including at higher levels, with some for many years and in some cases exceeding five years. Taking also into consideration the short-term and small-scale nature of the programme, as well as the number of requests for assistance from the Member States, the Committee considers that a concentration of higher-level positions at Headquarters and other offices limits the opportunities to widen the level and areas of support. The Committee, therefore, recommends that the General Assembly request the Secretary-General to undertake a review of the levels and functions of all the positions in the implementing entities, and the duration of their incumbency, with a view to ensuring that the resources allocated to the programme are field-oriented and are used accountably and efficiently to support as many Member States as possible (para. V.93).

The Advisory Committee notes the reliance of some entities on international consultants and trusts that more efforts will be made to increase the use of national and regional consultants, taking into account the benefits of such use, including in building national capacities and addressing country-specific issues by the programme (para. V.96).

The Advisory Committee once again considers that the outreach activities of the regular programme of technical cooperation need to be further enhanced and consolidated to support the Member States, in particular the most vulnerable ones. The Committee reiterates its recommendation that the General Assembly request the Secretary-General to develop a consolidated outreach plan, in close coordination with the relevant entities, as well as the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States, the Office of the Special Adviser on Africa, the regional commissions and the resident coordinator system, among others, to provide comprehensive information on the guidelines of the programme, including the programme's activities and performance, the lessons learned and best practices, the resources available and the criteria of the selection process, to facilitate the formulation of demands by the Member States (para. V.100).

Information relating to the reviews of the high-level positions has been included in the supplementary information for the proposed programme budget for 2024 ([A/78/6 \(Sect. 23\)](#)).

The implementing entities make continuous effort to increase the use of national consultants. Nevertheless, when there is limited technical capacity in a country, international consultants bring the required expertise and are often familiar with national contexts.

In response to Advisory Committee's recommendations in its report [A/77/7](#), the Secretariat has requested The Office of Internal Oversight Services (OIOS) to undertake a comprehensive evaluation of the regular programme of technical cooperation (see para. 23.23). The Secretariat is awaiting the outcome and findings of the ongoing OIOS evaluation of section 23, which may need to be considered in the development of comprehensive guidelines and a coordinated outreach plan. The OIOS is expected to present its findings in a report to be considered by the Committee for Programme and Coordination in June 2024.

The Advisory Committee recalls its recommendation on the need for an assessment of the two mechanisms to maximize complementarity and the impact of the projects, in particular at the local level, and ensure the efficient use of resources, in cooperation with the resident coordinator system (para. V.103).

The United Nations Development Account and the regular programme of technical cooperation share the objective of providing coherent and focused capacity-development support to member States and to advance the implementation of 2030 Agenda for Sustainable Development. Their programming and implementation approaches are, however, distinctly different. The Development Account funds medium-term interventions executed over a period of up to four years in response to requests from countries for specific development assistance. The regular programme, on the other hand, funds specific short-term and small-scale interventions in response to requests from countries for urgent, and not easily predictable, national development assistance.

There is an integrated approach at the management level in all implementing entities to consider coherence. Implementing entities use Development Account funding and regular programme funding complementarily to maximize impact in several different ways. Through the identification of synergies and areas of cooperation, coordination between the two programmes is ensured.

First, many Development Account projects are formulated on the basis of earlier interventions of the regular programme. Thus, long-term impact and sustainability of initial intervention through the regular programme is ensured by longer-term project activities. Initiatives of the regular programme can lead to the formulation of Development Account projects when the regular programme is used as seed funding for the development of Development Account projects. In other instances, requests for the regular programme from member States are scaled up and transformed into Development Account projects.

Second, the regular programme is sometimes used to implement project activities in additional countries after the closure of a Development Account project. At other times, Development Account projects give rise to additional country requests during the implementation of the project, which are responded to by using regular programme funding.

Third, where United Nations Development Account projects' activities are successful and could be expanded but funds are a constraint, implementing entities have successfully utilized funds of the regular programme and vice versa. This has allowed to deepen the interventions through the provision of further capacity-development support.

The Advisory Committee is of the view that a clear governance, coordination and evaluation mechanism should be established at the global, regional and local levels, and considers that the Department of Economic and Social Affairs and the Development Coordination Office should have a leading role in focusing on coordination and evaluation at the global level. The Committee, therefore, recommends that the General Assembly request the Secretary-General to develop, and present in the context of the review report, a mechanism incorporating guidelines on governance, coordination and evaluation for all the activities of the programme at the Headquarters level (Department of Economic and Social Affairs and Development Coordination Office), regional level (regional commissions) and local level (resident coordinators and relevant entities, both resident and non-resident). The Committee considers that the mechanism should make more efforts to facilitate the submission of requests by Member States and consolidate relevant lessons learned and best practices in the progress report (para. V.106).

The Advisory Committee recommends that the General Assembly request the Secretary-General to include in the next progress report detailed performance information related to the implementation of the projects, as well as on the development of a common standard of reporting on the programme activities (para. V.109).

The Advisory Committee notes that the implementing entities have different evaluation systems and that the most recent reviews by the Board of Auditors and OIOS were conducted in 2004 and 2018, respectively. The Committee reemphasizes that, regardless of the size of the projects, internal and external reviews should be conducted regularly to ensure the efficient implementation and the development impact of the programme. The Committee therefore recommends that the General Assembly request the Secretary-General to develop a common evaluation framework, including comprehensive policy and evaluation guidelines, to ensure the standardization of the monitoring and evaluation mechanisms across all entities and to provide an update in the context of the next progress report (para. V.111).

The Secretariat is awaiting the outcome and findings of the ongoing OIOS evaluation of section 23 (see paragraph 23.23), which may need to be considered in the development of a governance, coordination and evaluation mechanism. OIOS is expected to present its findings in a report to be considered by the Committee for Programme and Coordination in June 2024.

The common standard of reporting for the regular programme of technical cooperation implementing entities was developed by the Department of Economic and Social Affairs and agreed by the implementing entities in March 2023. While the eighth progress report, which is included in the supplementary information of the present report, has been improved by agreeing on common definitions, changing the monitoring templates and systems will take time and will be incorporated in the ninth progress report, to be included in the supplementary information for the proposed programme budget for 2024.

The Secretariat is awaiting the outcome and findings of the ongoing OIOS evaluation on section 23 (see paragraph 23.23), which may need to be considered in the development of a common evaluation framework. OIOS is expected to present its findings in a report to be considered by the Committee for Programme and Coordination in June 2024.

Section 23 Regular programme of technical cooperation

Brief description of the recommendation

Action taken to implement the recommendation

Taking into consideration the recommendations and observations above, the Advisory Committee recommends that the General Assembly request the Secretary-General to conduct a comprehensive independent review, within existing resources, of the regular programme of technical cooperation and present the findings in a separate report during the consideration of the next programme budget (para. V.116).

There is an ongoing OIOS evaluation of section 23 (see paragraph 23.23). OIOS is expected to present its findings in a report to be considered by the Committee for Programme and Coordination in June 2024.

I. Office of the United Nations High Commissioner for Human Rights

Foreword

In 2023, we celebrate the seventy-fifth anniversary of the adoption of the Universal Declaration of Human Rights and the thirtieth anniversary of the adoption of the Vienna Declaration and Programme of Action, which led to the establishment of the post of the United Nations High Commissioner for Human Rights.

In the face of today's global challenges, these anniversaries offer a unique opportunity to take stock of achievements, revitalize the worldwide consensus on the universality and indivisibility of human rights and collectively innovate to bolster the human rights ecosystem and respond to the needs of our time.

The Office of the United Nations High Commissioner for Human Rights is committed to continue implementing its programme, in cooperation with Member States, and renewing its links with partners of the United Nations system and other actors. This will be fulfilled by mainstreaming human rights across the United Nations system, advancing the right to development, increasing knowledge, awareness and understanding of human rights issues, supporting the human rights treaty bodies, providing advisory services and technical cooperation and supporting the Human Rights Council, its subsidiary bodies and mechanisms. My Office will work with Member States towards further strengthening its support to mandates and intergovernmental working bodies, including the strengthening of its evaluation function and of the treaty bodies' predictable review cycle; this strengthening is key to delivering on our mandates.

To this end, my Office has started a review of the resource requirements and funding arrangements to support delivery of our mandates, which has resulted in the budget proposals contained in the present report. We will continue such a review, the outcome of which will be reflected in the proposed programme budget for 2025. I trust that Member States will provide the guidance and adequate resources to advance our essential work.

My Office and I remain fully committed to implementing the mandate entrusted by the General Assembly and leading the efforts to advance the promise of the Universal Declaration of Human Rights of freedom, equality and justice for all.

(Signed) Volker **Türk**
United Nations High Commissioner for Human Rights

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 24.1 The United Nations human rights programme is responsible for the promotion, protection, enjoyment and full realization, by all people, of all human rights. The mandate derives from the priorities established in the Charter of the United Nations; the Universal Declaration of Human Rights and international human rights treaties; the Vienna Declaration and Programme of Action, including its principles and recommendations subsequently endorsed by the General Assembly in its resolution [48/121](#); General Assembly resolution [48/141](#), by which the Assembly established the post of the United Nations High Commissioner for Human Rights; the outcomes of relevant United Nations conferences and summits, including General Assembly resolution [70/1](#), entitled “Transforming our world: the 2030 Agenda for Sustainable Development”; and other relevant General Assembly and Human Rights Council resolutions and decisions. In addition to international human rights law, the programme will also be guided by international humanitarian law, as applicable.
- 24.2 The programme is guided by the principles of universality, objectivity, impartiality, indivisibility and non-selectivity in removing obstacles to the full realization of all human rights and in preventing the continuation of human rights violations, including with relevant parties. The programme has a role in supporting the implementation by Member States of the 2030 Agenda, making development equitable, sustainable and responsive to the needs of people, including in relation to conflict prevention and resolution.
- 24.3 The programme falls under the leadership of the High Commissioner, who is entrusted with the principal responsibility for the human rights activities of the Organization, under the direction and authority of the Secretary-General and within the framework of the overall competence, authority and decisions of the General Assembly and the Human Rights Council.

Strategy and external factors for 2024

- 24.4 In a global context affected by threats to the enjoyment of human rights by all, the programme will continue to support the human rights mechanisms and to assist States in their efforts to comply with their human rights obligations. Increased support for and collaboration in matters regarding human rights will be provided to requesting Member States through mutually agreed bilateral frameworks. Emphasis will be placed on highlighting the importance of human rights in international and national agendas; sustaining social development and social justice (as defined in General Assembly resolution [62/10](#)) and countering discrimination on all grounds, including race, sex, language or religion; advancing the rights of children and women; raising awareness of human rights; responding to the needs of the vulnerable for protection; and addressing situations of international concern as identified by the Human Rights Council and other relevant United Nations organs.
- 24.5 The programme will continue to engage with Member States and all relevant actors to assist them in their efforts to realize human rights, through the provision of technical assistance, support to mechanisms and, where possible, the establishment of country presences. In particular, the programme will continue to support and advise the United Nations human rights machinery (subprogrammes 2 and 4), integrate all human rights into areas of work of the United Nations system (subprogramme 1 (a)), contribute to the effective realization of the right to development (subprogramme 1 (b)), increase knowledge, awareness and understanding of human rights (subprogramme 1 (c)) and enhance capacities, including through assistance to requesting States (subprogramme 3).

- 24.6 The Sustainable Development Goals outlined in the 2030 Agenda are an opportunity for the programme to engage further, since “leaving no one behind” is at the heart of the programme’s work to combat discrimination and inequality, which are root causes of exclusion. The programme will support countries in the implementation of the Goals through multi-stakeholder partnerships, as fostered through the 2030 Agenda.
- 24.7 Strengthened and consolidated organizational support will be provided to the Human Rights Council and its subsidiary bodies and mechanisms, including the universal periodic review, the special procedures, the Human Rights Council Advisory Committee and the complaint procedure, as well as other relevant United Nations organs. The United Nations treaty bodies will continue to be provided with services, support and advice.
- 24.8 For 2024, the programme’s planned deliverables will support Member States in their efforts to build more resilient societies through the promotion and protection of human rights. Specific examples of such planned deliverables are provided under all subprogrammes.
- 24.9 The Office of the United Nations High Commissioner for Human Rights (OHCHR) will continue to engage with a wide range of stakeholders, including civil society actors, such as non-governmental organizations (NGOs). It will also continue to help victims of human rights violations by managing the humanitarian funds that provide financial assistance for support services, such as rehabilitation and redress for victims of torture and slavery.
- 24.10 With regard to inter-agency coordination and liaison, OHCHR will continue to engage with the United Nations development system both through participation in inter-agency forums and cooperation with United Nations country teams on the ground. It will also continue to cooperate with missions with a human rights component supported by the Department of Political and Peacebuilding Affairs and the Department of Peace Operations of the Secretariat, as well as with the Peacebuilding Support Office. It will also continue its collaboration with all the United Nations agencies and programmes, including in crisis situations, such as humanitarian emergencies, and will continue to provide advice for the coronavirus disease (COVID-19) lessons-learned processes.
- 24.11 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) There is political will on the part of States to work with the programme;
 - (b) Extrabudgetary resources will continue to be provided for the programme.
- 24.12 The programme integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, in subprogramme 1, deliverables include publications that integrate a gender perspective and/or have a specific focus on issues related to gender equality and women’s empowerment. Subprogramme 2 will deliver capacity-building activities on the follow-up to treaty body recommendations, including those related to the Convention on the Elimination of All Forms of Discrimination against Women. Subprogramme 3 will provide substantive advice on issues related to gender equality and women’s empowerment. Finally, under subprogramme 4, a gender perspective is reflected through the servicing of the Working Group on discrimination against women and girls.
- 24.13 In line with the United Nations Disability Inclusion Strategy, OHCHR will integrate disability inclusion in its operational activities, deliverables and results, as appropriate. For example, subprogramme 1 will provide expert advice on the development of standards on strengthening national human rights promotion and protection capacities as they relate to persons with disabilities. Subprogramme 2 will promote the Convention on the Rights of Persons with Disabilities as part of the international human rights system through briefings, capacity-building and legal analysis. Subprogramme 3 will continue to promote the implementation of the Strategy at the field level, and subprogramme 4 will continue to increase the accessibility of the Human Rights Council to persons with disabilities.

Impact of the pandemic and lessons learned

- 24.14 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular for the organization of sessions of the Human Rights Council and its mechanisms and of the treaty bodies. For instance, the continuation of some COVID-19-related restrictions around the world, such as travel restrictions, as well as specific limitations in the host country and at the Palais des Nations at the beginning of 2022, which eased progressively, led the Council to decide to continue with extraordinary modalities of participation during its sessions and meetings. This required continuous support to service remote participation and maintain hybrid meetings. Furthermore, in 2022, the Bureau of the Council decided to continue with extraordinary modalities of participation for all of its sessions, which required additional support to service remote participation by States, NGOs and other participants through pre-recorded videos and videoconference platforms.
- 24.15 OHCHR continues to mainstream lessons learned to ensure programme delivery, with a particular focus on new methods of work and information technology tools and solutions. For instance, virtual meetings largely had a positive impact on inclusiveness. An OHCHR internal review confirmed that virtual meetings, including of treaty bodies and legislative bodies, allowed for more inclusive participation of stakeholders, in addition to being more time-efficient. Meetings that otherwise would have resulted in limited participation owing to travel costs or that would have been impossible to schedule owing to competing priorities or conflicting agendas were made possible. Events reached a larger number and a broader scope of participants, including people living in remote areas and persons with disabilities. However, maintaining opportunities for intricate and complex negotiations proved more challenging in a virtual or hybrid context as informal consultations and interaction were not possible. OHCHR will continue to make use of virtual or hybrid sessions, as appropriate and in accordance with requests and decisions of Member States, within existing capacities.

Legislative mandates

- 24.16 The list below provides all mandates entrusted to the programme.¹

General Assembly resolutions

47/135	Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities	61/166	Promotion of equitable and mutually respectful dialogue on human rights
48/121	World Conference on Human Rights	62/134	Eliminating rape and other forms of sexual violence in all their manifestations, including in conflict and related situations
48/141	High Commissioner for the promotion and protection of all human rights	65/1	Keeping the promise: united to achieve the Millennium Development Goals
55/2	United Nations Millennium Declaration	65/312	Outcome document of the High-level Meeting of the General Assembly on Youth: Dialogue and Mutual Understanding
56/266	Comprehensive implementation of and follow-up to the World Conference against Racism, Racial Discrimination, Xenophobia and Related Intolerance	66/3	United against racism, racial discrimination, xenophobia and related intolerance
57/300; 58/269	Strengthening of the United Nations: an agenda for further change	66/288	The future we want
60/1	2005 World Summit Outcome	67/1	Declaration of the high-level meeting of the General Assembly on the rule of law at the national and international levels
61/159	Composition of the staff of the Office of the United Nations High Commissioner for Human Rights	67/144	Intensification of efforts to eliminate all forms of violence against women

¹ The list of mandates includes resolutions adopted at the fifty-second session of the Human Rights Council. In accordance with current practice, planned activities and associated resource requirements will be presented in the report of the Secretary-General on revised estimates resulting from resolutions and decisions adopted by the Council, as applicable.

Section 24 Human rights

68/134 ; 77/190	Follow-up to the Second World Assembly on Ageing	73/159 ; 75/171 ; 76/151 ; 77/206	Use of mercenaries as a means of violating human rights and impeding the exercise of the right of peoples to self-determination
68/165	Right to the truth		
68/181	Promotion of the Declaration on the Right and Responsibility of Individuals, Groups and Organs of Society to Promote and Protect Universally Recognized Human Rights and Fundamental Freedoms: protecting women human rights defenders	73/168 ; 75/180 ; 76/159 ; 77/213 73/169 ; 75/178 ; 76/165 ; 77/215	Enhancement of international cooperation in the field of human rights Promotion of a democratic and equitable international order
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	74/132 74/143 ; 77/209	Report of the Human Rights Council Torture and other cruel, inhuman or degrading treatment or punishment
70/133 ; 76/142	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	74/144 74/147 ; 76/169	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: accessibility Terrorism and human rights
70/262	Review of the United Nations peacebuilding architecture	74/148 ; 76/172 74/149 ; 75/179 ; 76/166 ; 77/217	Protection of migrants The right to food
71/167 ; 75/158 ; 77/194	Trafficking in women and girls	75/161 ; 77/193	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: gender stereotypes and negative social norms
71/189	Declaration on the Right to Peace		
72/140 ; 74/123 ; 76/130	Persons with albinism		
72/149 ; 74/127 ; 76/141	Violence against women migrant workers	75/175 ; 77/223 75/176 ; 77/211	Human rights and extreme poverty The right to privacy in the digital age
72/170 ; 74/159 ; 76/162	Human rights and cultural diversity	75/181 ; 76/161 ; 77/214	Human rights and unilateral coercive measures
72/171 ; 76/164	Strengthening United Nations action in the field of human rights through the promotion of international cooperation and the importance of non-selectivity, impartiality and objectivity	75/182 ; 76/163 ; 77/212 75/188 ; 76/156 ; 77/221 75/189 ; 77/218	The right to development Freedom of religion or belief
72/178 ; 74/141 ; 76/153	The human rights to safe drinking water and sanitation		Extrajudicial, summary or arbitrary executions
72/182 ; 74/160 ; 76/167	Protection of and assistance to internally displaced persons	75/237 ; 76/226 ; 77/205	A global call for concrete action for the elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action
72/245 ; 73/155 ; 74/133 ; 76/147	Rights of the child		
73/156 ; 75/168 ; 76/148 ; 77/203	Rights of Indigenous Peoples		
73/157 ; 75/169 ; 76/149 ; 77/204	Combating glorification of Nazism, neo-Nazism and other practices that contribute to fuelling contemporary forms of racism, racial discrimination, xenophobia and related intolerance	76/154 76/158	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: participation International Convention for the Protection of All Persons from Enforced Disappearance

70/161	Human rights defenders in the context of the Declaration on the Right and Responsibility of Individuals, Groups and Organs of Society to Promote and Protect Universally Recognized Human Rights and Fundamental Freedoms		

Human Rights Council resolutions and decisions

5/1	Institution-building of the United Nations Human Rights Council	32/8; 49/13	Mandate of the Special Rapporteur on the right to food
5/2	Code of Conduct for Special Procedures Mandate-holders of the Human Rights Council	32/11; 41/15; 50/6	Mandate of the Special Rapporteur on the human rights of internally displaced persons
6/17	Establishment of funds for the universal periodic review mechanism of the Human Rights Council	32/19	Accelerating efforts to eliminate violence against women: preventing and responding to violence against women and girls, including Indigenous women and girls
Decision 6/102	Follow-up to Human Rights Council resolution 5/1	32/32; 41/12; 50/17	The rights to freedom of peaceful assembly and of association
11/11	System of special procedures	33/1; 42/10; 51/15	Special Rapporteur on contemporary forms of slavery, including its causes and consequences
Decision 17/119	Follow-up to Human Rights Council resolution 16/21 with regard to the universal periodic review	33/9; 42/16; 51/21	The right of everyone to the enjoyment of the highest attainable standard of physical and mental health
19/26	Terms of reference for the Voluntary Technical Assistance Trust Fund to Support the Participation of Least Developed Countries and Small Island Developing States in the Work of the Human Rights Council	33/12; 42/20; 51/16	Human rights and Indigenous Peoples: mandate of the Special Rapporteur on the rights of Indigenous Peoples
Decision 19/119	Task force on secretariat services, accessibility for persons with disabilities and use of information technology	33/30; 42/22; 51/8	Arbitrary detention
Decision 19/119	Task force on secretariat services, accessibility for persons with disabilities and use of information technology	34/2; 49/16; 52/18	Promotion of the enjoyment of the cultural rights of everyone and respect for cultural diversity
22/16	Promotion and protection of human rights in post-disaster and post-conflict situations	34/3; 43/10	Mandate of the Independent Expert on the effects of foreign debt and other related international financial obligations of States on the full enjoyment of all human rights, particularly economic, social and cultural rights
Decision 22/115	Human Rights Council webcast		
31/31	Torture and other cruel, inhuman or degrading treatment or punishment: safeguards to prevent torture during police custody and pre-trial detention	34/40	Promoting the Voluntary Technical Assistance Trust Fund to Support the Participation of Least Developed Countries and Small Island Developing States in the Work of the Human Rights Council
31/32	Protecting human rights defenders, whether individuals, groups or organs of society, addressing economic, social and cultural rights	35/12	Independence and impartiality of the judiciary, jurors and assessors, and the independence of lawyers
32/2	Protection against violence and discrimination based on sexual orientation and gender identity	35/18	Elimination of discrimination against women and girls
32/4	Elimination of discrimination against women		

Part VI Human rights and humanitarian affairs

35/23	The right of everyone to the enjoyment of the highest attainable standard of physical and mental health in the implementation of the 2030 Agenda for Sustainable Development	44/5	Mandate of the Special Rapporteur on extrajudicial, summary or arbitrary executions
35/24	Human rights in cities and other human settlements	44/6	Elimination of discrimination against persons affected by leprosy and their family members
35/29	Contribution of parliaments to the work of the Human Rights Council and its universal periodic review	44/8	Mandate of the Special Rapporteur on the independence of judges and lawyers
35/34	Protection of human rights and fundamental freedoms while countering terrorism	44/10	Special Rapporteur on the rights of persons with disabilities
Decision 35/101	Panel discussion on the human rights of internally displaced persons in commemoration of the twentieth anniversary of the Guiding Principles on Internal Displacement	44/11	Mandate of the Independent Expert on human rights and international solidarity
36/7	Special Rapporteur on the promotion of truth, justice, reparation and guarantees of non-recurrence	44/13	Extreme poverty and human rights
36/29	Promoting international cooperation to support national human rights follow-up systems, processes and related mechanisms, and their contribution to the implementation of the 2030 Agenda for Sustainable Development	44/15	Business and human rights: the Working Group on the issue of human rights and transnational corporations and other business enterprises, and improving accountability and access to remedy
37/21; 45/5	Human rights and unilateral coercive measures	45/3	Enforced or involuntary disappearances
38/1; 41/6; 50/18	Elimination of all forms of discrimination against women and girls	45/4	Mandate of the Independent Expert on the promotion of a democratic and equitable international order
38/9; 41/16	The right to education: follow-up to Human Rights Council resolution 8/4	45/17	Mandate of the Special Rapporteur on the implications for human rights of the environmentally sound management and disposal of hazardous substances and wastes
38/13	Business and human rights: improving accountability and access to remedy	49/32	Strengthening the Voluntary Technical Assistance Trust Fund to Support the Participation of Least Developed Countries and Small Island Developing States in the Work of the Human Rights Council
39/4; 42/8; 51/11	Promotion of a democratic and equitable international order	50/5	Independence and impartiality of the judiciary, jurors and assessors, and the independence of lawyers: participation of women in the administration of justice
40/16; 49/10	Mandate of the Special Rapporteur on the promotion and protection of human rights and fundamental freedoms while countering terrorism	50/7	Mandate of Special Rapporteur on violence against women and girls, its causes and consequences
41/17	Accelerating efforts to eliminate all forms of violence against women and girls: preventing and responding to violence against women and girls in the world of work	50/10	Mandate of Independent Expert on protection against violence and discrimination based on sexual orientation and gender identity
41/18	Mandate of the Independent Expert on protection against violence and discrimination based on sexual orientation and gender identity	51/3	Neurotechnology and human rights
42/12; 51/4	The human rights of older persons	51/13	Mandate of the Working Group on the use of mercenaries as a means of violating human rights and impeding the exercise of the right of peoples to self-determination
43/14; 49/17; 52/10	Adequate housing as a component of the right to an adequate standard of living, and the right to non-discrimination in this context	51/30	Strengthening the voluntary funds for the universal periodic review mechanism of the Human Rights Council
44/4	Trafficking in persons, especially women and children: strengthening human rights through enhanced protection, support and empowerment of victims of trafficking, especially women and children	51/33	Promoting international cooperation to support national mechanisms for implementation, reporting and follow-up
		Decision 51/101	Appropriate support for the Human Rights Council

Section 24 Human rights

52/4	Mandate of Special Rapporteur on the situation of human rights defenders	52/20	Human rights of migrants: mandate of Special Rapporteur on the human rights of migrants
52/5	Mandate of Special Rapporteur on minority issues	52/23	The human right to a clean, healthy and sustainable environment
52/7	Torture and other cruel, inhuman or degrading treatment or punishment: mandate of the Special Rapporteur	52/26	Mandate of Special Rapporteur on the sale, sexual exploitation and sexual abuse of children
52/9	Freedom of opinion and expression: mandate of Special Rapporteur on the promotion and protection of the right to freedom of opinion and expression	52/36	Mandate of Special Rapporteur on contemporary forms of racism, racial discrimination, xenophobia and related intolerance

President's statements agreed upon by the Human Rights Council

PRST/1/1	Entry into force of the Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment	PRST/20/1	Reports of the Working Group on the Universal Periodic Review
		PRST/29/1	Enhancing the efficiency of the Human Rights Council
PRST/6/2	The twentieth anniversary of the entry into force of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment	PRST/OS/12/1	Enhancing the efficiency of the Human Rights Council, including by addressing financial and time constraints
PRST/8/1	Modalities and practices for the universal periodic review process	PRST/OS/13/1	Efficiency of the Human Rights Council – addressing financial and time constraints
PRST/9/2	Follow-up to President's statement 8/1	PRST/OS/14/2	Methods of work of the Consultative Group of the Human Rights Council
PRST/15/2	President's statement	PRST/OS/15/1	Efficiency of the Human Rights Council
PRST/18/2; PRST/19/1	Statement by the President	PRST/OS/16/1	Efficiency of the Human Rights Council: addressing financial and time constraints

Deliverables

24.17 Table 24.1 lists all cross-cutting deliverables of the programme.

Table 24.1

Cross-cutting deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Reports to the General Assembly	1	1	1	1
2. Reports to the Human Rights Council	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	34	34	34	34
Meetings of:				
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
5. The General Assembly (Third and Fifth Committees)	32	32	32	32
B. Generation and transfer of knowledge				
Fact-finding, monitoring and investigation missions (number of missions)	10	12	6	6
6. Commissions of inquiry	10	12	6	6
C. Substantive deliverables				
Good offices: engagement with government officials.				

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: booklets, pamphlets, fact sheets, wallcharts and information kits on various human rights issues, including for the commemoration of Human Rights Day and other outreach campaigns; programme's website, including in the six official languages, and presence on social media.

Evaluation activities

- 24.18 The following evaluations completed by OHCHR in 2022 have guided the proposed programme plan for 2024:
- (a) Evaluation of the youth and human rights project (global);
 - (b) Evaluation of the Emergency Response Teams programme (global);
 - (c) Evaluation of three country programmes or projects at the field level.
- 24.19 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For instance, OHCHR is strengthening its capacity for data analysis to inform prevention activities of humanitarian partners, in follow-up to the recommendations of the Emergency Response Teams programme evaluation.
- 24.20 The following evaluations are planned for 2024:
- (a) One thematic evaluation of a global cross-cutting issue or programme;
 - (b) Three country programmes or project evaluations at the field level.

Programme of work

Subprogramme 1

Human rights mainstreaming, right to development, and research and analysis

(a) Human rights mainstreaming

Objective

- 24.21 The objective, to which this subprogramme contributes, is to advance the promotion and protection of all human rights through strengthened integration of all human rights into areas of work of the United Nations system.

Strategy

- 24.22 To contribute to the objective, the subprogramme will:
- (a) Lead cooperation within the United Nations system for the integration of all human rights into United Nations programmes and activities in the development, environmental, humanitarian, peace and security, governance, democracy and rule of law areas, including the implementation of the 2030 Agenda;
 - (b) Promote the practical integration of all human rights into development programmes, ensuring consistency and mutual reinforcement between United Nations-supported development

activities and country engagement strategies that are jointly agreed upon with the Member States;

- (c) Contribute to developing the capability and knowledge of the United Nations system regarding relevant human rights issues through training and advice, taking into account disability and mainstreaming a gender perspective;
- (d) Develop methodological tools to facilitate the practical integration of all human rights into United Nations policies, programmes and activities and, where appropriate, the advancement of the practical application of approaches to that end.

24.23 The above-mentioned work is expected to result in:

- (a) The United Nations system further integrating all human rights into its respective programmes and activities;
- (b) Member States, pursuant to their request for support, building and strengthening national human rights promotion and protection capacities.

Programme performance in 2022

United Nations system equipped to implement the pledge to leave no one behind in implementing the 2030 Agenda

24.24 The subprogramme contributed to increasing the capacities of the United Nations system through the provision of guidance and tools, technical advice and capacity-building, with the aim of integrating the pledge to leave no one behind and reaching the furthest behind first in the implementation of the 2030 Agenda and the Sustainable Development Goals. This work resulted in States' enhanced capacity to conduct assessments and implement policies to end discrimination and exclusion and reduce the inequalities and vulnerabilities that leave people behind. OHCHR has helped to support the responses to discrimination and economic inequalities to ensure that they are firmly grounded in the principles of equality and non-discrimination. In the implementation of Human Rights Council resolution [37/24](#) on the promotion and protection of human rights and the implementation of the 2030 Agenda for Sustainable Development, OHCHR held one intersessional meeting of the Human Rights Council on human rights and the 2030 Agenda, which included reflections on addressing inequalities.

24.25 Progress towards the objective is presented in the performance measure below (see table 24.2).

Table 24.2
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Member States were supported on leaving no one behind and reaching the furthest behind first through the provision of operational guidance developed with the inter-agency task team under the United Nations Sustainable Development Group	The Secretary-General's COVID-19 policy brief on human rights and economic response to and recovery from the pandemic was made available to support Member States and United Nations country teams to design measures to tackle inequalities	Two checklists and an online tool on integrating human rights, leaving no one behind and gender equality and women's empowerment strengthened the capacities of United Nations country teams to support Member States in analysis and programming to prioritize the most vulnerable and tackle discrimination and inequalities
Member States had access to an operational checklist on human rights and the socioeconomic response to the COVID-19 pandemic		

Planned results for 2024

Result 1: improved inter-agency collaboration for human rights mainstreaming

Programme performance in 2022 and target for 2024

- 24.26 The subprogramme's work contributed to 10 joint policy documents and guidance on the promotion and protection of human rights adopted by the United Nations system, which met the planned target.
- 24.27 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 24.3).

Table 24.3

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
High-level Committee on Programmes task force on inequalities	System-wide human rights review of over 80 new common country analyses and cooperation frameworks developed in collaboration with 11 other entities	10 joint policy documents and guidance on the promotion and protection of human rights, including a guidance note on human rights and voluntary national reviews; a United Nations policy on a human rights approach to sexual exploitation and abuse; and Committee on World Food Security policy recommendations on promoting youth engagement and employment in agriculture and food	United Nations system-wide initiatives on "leaving no one behind" integrate human rights standards	Availability of a framework to monitor civic space trends and support the United Nations system's reporting on relevant issues, pursuant to General Assembly resolution 76/174 and Human Rights Council resolution 47/3
Agreed workplan of the United Nations Sustainable Development Group task team on "Leaving no one behind", human rights and the normative agenda, co-chaired by OHCHR	Continued implementation of the United Nations Guidance Note on the Protection and Promotion of Civic Space under the inter-agency task team, with special attention to country-level implementation	United Nations policy on a human rights approach to sexual exploitation and abuse; and Committee on World Food Security policy recommendations on promoting youth engagement and employment in agriculture and food security and nutrition		Availability of a United Nations system-wide toolkit on the protection and promotion of civic space, including the protection of human rights defenders, pursuant to, inter alia, General Assembly resolution 76/174 and Human Rights Council resolution 49/18
Four joint policy documents and guidance on the socioeconomic response to COVID-19 available to Member States				

Result 2: enhanced awareness and knowledge of Member States and key stakeholders on the right to take part in the conduct of public affairs

Programme performance in 2022 and target for 2024

- 24.28 The subprogramme contributed to the elaboration by OHCHR and the Inter-Parliamentary Union of a self-assessment toolkit, addressed to parliamentarians, on the right to participate in public affairs and on constitutional processes, which met the planned target.
- 24.29 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 24.4).

Table 24.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Increased capacities of national authorities to promote and protect the right to participate in public affairs, through technical guidance, training and briefing sessions	Enhanced awareness of Member States on the right to participate in public affairs, including through <i>Human rights and Elections: A Handbook on International Human Rights Standards on Elections</i> and other publications	Elaboration by OHCHR and the Inter-Parliamentary Union of a self-assessment toolkit, addressed to parliamentarians, on the right to participate in public affairs and on constitutional processes	Increased capacity of parliamentarians and national authorities with regard to the protection and promotion of human rights in electoral contexts and constitutional processes through the wide dissemination of the toolkit	Parliamentarians and national authorities participate in the protection and promotion of human rights in electoral contexts and constitutional processes with the support of capacity-building initiatives

Result 3: integration of human rights in the United Nations agenda on future generations

Proposed programme plan for 2024

24.30 The subprogramme supported inter-agency coordination and contributed human rights analysis for the development of the Declaration on Future Generations and in preparation for the upcoming Summit of the Future in 2024. OHCHR contributed to the elements paper, which emphasized the integration of human rights in the Declaration.

Lessons learned and planned change

24.31 The lesson for the subprogramme was that enhanced coordination among a wide variety of stakeholders and that dedicated capacities for human rights issues can help to integrate human rights in the development of key processes of the United Nations agenda on future generations, including the Declaration on Future Generations. In applying the lesson, the subprogramme will broaden the global network of actors advocating for the human rights of future generations through enhanced cooperation with United Nations entities, Member States, civil society and academic experts.

24.32 Expected progress towards the objective is presented in the performance measure below (see table 24.5).

Table 24.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Strengthened cooperation with United Nations system entities to enhance a shared understanding of human rights and implications of the elements paper for the Declaration on Future Generations	A global network of actors advocating for the human rights of future generations is in place, with participation from the United Nations system, Member States, civil society, and children and youth advocates	The global network of actors provides substantive human rights input to key milestones of the United Nations Our Common Agenda processes, including the Summit of the Future

Deliverables

24.33 Table 24.6 lists all deliverables of the subprogramme.

Table 24.6

Subprogramme 1 (a): deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	3	3
1. Report to the General Assembly	1	1	1	1
2. Report to the Human Rights Council	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	–	1	1	1
3. Meetings of the Human Rights Council: thematic plenary panel on human rights mainstreaming	–	1	1	1
B. Generation and transfer of knowledge				
Publications (number of publications)	2	2	2	2
4. On human rights and the sustainable development agenda; and on environmental perspectives and human rights	2	2	2	2
Technical materials (number of materials)	10	10	10	10
5. On strengthening national protection systems, areas of human rights protection, institution-building, education and compilation of best practices on the integration of human rights aspects into United Nations policies and programmes	10	10	10	10
C. Substantive deliverables				
Consultation, advice and advocacy: advice to United Nations entities and to Member States, at their request, on the development of standards on strengthening national human rights promotion and protection capacities; integration of human rights aspects into development, humanitarian, peace and security, governance and rule of law areas.				

(b) Right to development

Objective

24.34 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights through the effective realization of the right to development.

Strategy

24.35 To contribute to the objective, the subprogramme will pursue a multidimensional strategy. The subprogramme will:

- (a) Enhance awareness, knowledge and understanding about the content and importance of the right to development and identify obstacles at the international, regional and national levels through increased engagement, research, advocacy and information and educational activities;
- (b) Promote the realization of the right to development across the human rights programme and encourage relevant bodies of the United Nations system, as well as funds and specialized agencies, to integrate the right to development into their work and increase focus on its practical implementation;

- (c) Strengthen partnerships and collaboration with Member States, development agencies and international development, financial and trade institutions, and civil society, including NGOs and the private sector;
 - (d) Encourage the promotion of the right to development in global development partnerships for the implementation by Member States of the 2030 Agenda, and most specifically Sustainable Development Goal 17, through cooperation and collaboration, advocacy, networking and technical advice, and the establishment of partnerships, and in keeping with existing mandates;
 - (e) Provide substantive support to the Human Rights Council and its subsidiary mechanisms related to the right to development, including the Working Group on the Right to Development, the Expert Mechanism on the Right to Development and the Human Rights Council biennial panel on the right to development;
 - (f) Promote the implementation of the right to development by providing requesting States with technical assistance to formulate national development strategies, such as poverty reduction strategy papers, Sustainable Development Goal strategies and the United Nations Sustainable Development Cooperation Frameworks, taking into account the full respect of human rights.
- 24.36 The above-mentioned work is expected to result in the integration of the promotion and protection of the right to development in global partnerships for development and policies and operational activities of relevant actors at all levels.

Programme performance in 2022

Member States have access to guidance to integrate the right to development in their voluntary national reviews of the Sustainable Development Goals

- 24.37 Building on previous results, the subprogramme promoted mutual reinforcement and complementarity between the right to development and the Sustainable Development Goals. For example, it organized an interactive online workshop on the theme “Mainstreaming the right to development in voluntary national reviews”,² based on the guidelines to integrate human rights in the voluntary national reviews,³ which was attended by 115 stakeholders, primarily Member States. As the Expert Mechanism on the Right to Development noted, many of the principles in these guidelines, including multi-stakeholder engagement and free, meaningful and active participation, as well as leaving no one behind, are inherent to the right to development.
- 24.38 Progress towards the objective is presented in the performance measure below (see table 24.7).

Table 24.7
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Member States have access to guidance on the integration of the right to development in voluntary national reviews

² See <https://www.upeace.org/files/Academic/VNR%20and%20RTD%20Concept%20Note%20and%20Workshop%20Description.pdf>.

³ See Office of the United Nations High Commissioner for Human Rights and United Nations Development Programme, “Human rights and voluntary national reviews: operational common approach guidance note”, June 2022.

Planned results for 2024

Result 1: increased awareness and capacity regarding the right to development

Programme performance in 2022 and target for 2024

- 24.39 The subprogramme's work contributed to 402 participants completing the online training module on the right to development and the online global platform reaching 1,000 users, which met the planned target.
- 24.40 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 24.I).

Figure 24.I

Performance measure: number of participants completing the online training module (annual) and number of users of the online global platform (cumulative)

Result 2: Working Group on the Right to Development and Expert Mechanism on the Right to Development inform intergovernmental deliberations on the right to development

Programme performance in 2022 and target for 2024

- 24.41 The subprogramme's work contributed to 541 participants engaging with the Working Group on the Right to Development and the Expert Mechanism on the Right to Development, which exceeded the planned target of 340, resulting from increased outreach and online participation as well as the exceptional organization of an additional meeting of the Expert Mechanism with civil society in 2022.
- 24.42 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 24.II).

Figure 24.II
Performance measure: engagement with the Working Group on the Right to Development and the Expert Mechanism on the Right to Development (annual)

(Number of participants)

Result 3: increased participation in the Social Forum

Proposed programme plan for 2024

24.43 The subprogramme leads the organization of the Social Forum, an annual meeting convened by the Human Rights Council. It is a unique space for interactive dialogue between representatives of Member States, intergovernmental organizations and civil society, including grass-roots organizations, on a theme chosen by the Council each year. It aims to promote social cohesion on the basis of the principles of social justice, equity and solidarity, taking into account the linkages to the social dimensions and challenges of the ongoing globalization process.

Lessons learned and planned change

24.44 The lesson for the subprogramme was that the engagement of a broad and diverse group of stakeholders in the planning, outreach and organization of the Social Forum can contribute to a higher level of meaningful participation and uptake of its conclusions and recommendations. In applying the lesson, the subprogramme will elaborate outreach and engagement strategies in consultation with Member States, intergovernmental organizations and civil society, including grass-roots organizations, to enhance participation in the Social Forum. The subprogramme will strengthen its efforts to support the broadest possible range of relevant stakeholders, especially the greater participation of grass-roots organizations and of those living in poverty, particularly women, especially from developing countries.

24.45 Expected progress towards the objective is presented in the performance measure below (see figure 24.III).

Figure 24.III

Performance measure: number of participants attending the Social Forum of the Human Rights Council

Deliverables

24.46 Table 24.8 lists all deliverables of the subprogramme.

Table 24.8

Subprogramme 1 (b): deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	13	17	13	13
1. Reports to the General Assembly	1	1	2	1
2. Reports and pre-sessional documents to the Human Rights Council, including on the right to development, the Social Forum, the Working Group on the Right to Development and the Expert Mechanism on the Right to Development	12	16	11	12

C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to Member States, at their request, United Nations entities and others on the promotion of human rights, including on the development of related standards and implementation of the right to development.				
D. Communication deliverables				
Outreach programmes, special events and information materials: booklets, pamphlets, fact sheets, wallcharts and information kits on mainstreaming the right to development, including in national development strategies, such as poverty reduction strategy papers, national Sustainable Development Goal strategies and United Nations development frameworks.				

(c) Research and analysis

Objective

- 24.47 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights through increased knowledge, awareness and understanding.

Strategy

- 24.48 To contribute to the objective, the subprogramme will:
- (a) Enhance the research and analysis of human rights issues, as well as the development and application of expertise in areas such as the elimination of all forms of discrimination, racism, including its contemporary forms, racial discrimination, xenophobia and related intolerance; the rule of law, democracy and good governance; the integration of human rights into counter-terrorism and anti-trafficking measures, as well as in the implementation of the Sustainable Development Goals and poverty reduction strategies and programmes; and the protection of human rights in the context of the fight against terrorism and business activities;
 - (b) Advocate for the indivisibility, interdependence and interrelatedness of all human rights, through research, policy-oriented analysis, support to standard-setting, advocacy, the compilation of best practices and improved knowledge management; the provision of specialized human rights reference services; the development of methodologies, operational guidelines and tools; capacity-building and international cooperation, including in areas such as human rights protection, institution-building and education; and the development and delivery of human rights training and activities, for example within the framework of the World Programme for Human Rights Education;
 - (c) Further develop and strengthen substantive and methodological human rights expertise to support effective engagement with countries and with global and national-level partnerships, and lead efforts within the United Nations system to meet current human rights challenges;
 - (d) Provide advice and assistance to requesting States, the United Nations system, civil society, the media and national human rights institutions in their efforts to overcome human rights implementation gaps, promote inclusion and protect rights holders, through technical cooperation, advocacy, training, policy development, analysis, protection and advice to partners at all levels;
 - (e) Follow up and implement the Durban Declaration and Programme of Action, the outcome document of the Durban Review Conference and related declarations, and the programme of activities for the implementation of the International Decade for People of African Descent (2015–2024).
- 24.49 The above-mentioned work is expected to result in enhanced knowledge, awareness and understanding of human rights issues.

Programme performance in 2022

United Nations country teams address racial discrimination and the protection of minorities

- 24.50 The United Nations network on racial discrimination and protection of minorities, established in 2012, brings together over 20 United Nations Secretariat departments and United Nations agencies, funds and programmes. Recent global developments – including the impact of the pandemic on minority communities, as well as the global movements leading to heightened Human Rights Council attention on the situation of Africans and People of African Descent, in particular concerning treatment at the hand of law enforcement (see Council resolution [47/21](#)) – have elevated the status

of the network and raised its importance across the United Nations system. The network has contributed to improving the United Nations system’s response to racial discrimination and the protection of national or ethnic, religious and linguistic minorities. OHCHR is a permanent Co-Chair of the network. Through awareness-raising, advocacy and capacity-building, the network provides a platform to address issues, including issues of multiple and intersecting forms of discrimination, and to mobilize United Nations action to address racial discrimination and strengthen the protection of minorities in programming and in practice.

24.51 Progress towards the objective is presented in the performance measure below (see table 24.9).

**Table 24.9
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Adoption of a checklist to strengthen United Nations work at the country level to combat racial discrimination and advance minority rights	United Nations country teams strengthened their engagement to programming on racial discrimination and the protection of minorities	United Nations country teams have access to the network’s guidance note on intersectionality, racial discrimination and protection of minorities ^a
United Nations network on racial discrimination and protection of minorities adopted its workplan for the period 2021-2025, with eight pillars, including the agenda for protection led by OHCHR		A global community of practice of United Nations country teams is established to strengthen work to address racial discrimination and the protection of minorities

^a United Nations network on racial discrimination and protection of minorities, Guidance Note on Intersectionality, Racial Discrimination and Protection of Minorities, 2022.

Planned results for 2024

Result 1: Indigenous and minority leaders empowered through the Indigenous and minorities fellowship programmes

Programme performance in 2022 and target for 2024

- 24.52 The subprogramme’s work contributed to 119 senior Indigenous and minority fellowships, which exceeded the planned target of 109.
- 24.53 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 24.IV).

Figure 24.IV

Performance measure: number of senior Indigenous and minority fellowships (cumulative)

Result 2: advance racial justice and equality, particularly for Africans and people of African descent⁴

Programme performance in 2022 and target for 2024

- 24.54 The subprogramme’s work contributed to the Human Rights Council considering the first report of the International Independent Expert Mechanism to Advance Racial Justice and Equality in Law Enforcement (A/HRC/51/55) and the report of the High Commissioner on the promotion and protection of the human rights and fundamental freedoms of Africans and of people of African descent against excessive use of force and other human rights violations by law enforcement officers through transformative change for racial justice and equality (A/HRC/51/53) in an enhanced interactive dialogue, which included the participation of directly affected individuals and communities, including victims and their families. This met the planned target.
- 24.55 The subprogramme’s work also contributed to the International Independent Expert Mechanism to Advance Racial Justice and Equality in Law Enforcement holding its first session, including a public meeting, one consultation in South America and six virtual consultations, reaching out to 220 participants in total, which met the planned target.
- 24.56 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 24.10).

Table 24.10

violations, systemic racism, police brutality and violence against peaceful protests	Human Rights Council considered the report of the High Commissioner (A/HRC/47/53) and the annex thereto entitled “Four-Point Agenda towards Transformative Change for Racial Justice and Equality”, and adopted resolution 47/21	Commissioner’s report (A/HRC/51/53) in an enhanced interactive dialogue, which included the participation of directly affected individuals and communities, including victims and their families The International Independent Expert Mechanism held its first session. The Mechanism and OHCHR held several consultations, which had a large participation of people of African descent	towards transformative change for racial justice and equality	transformative change for racial justice and equality

Result 3: promoting and protecting economic, social and cultural rights within the context of addressing inequalities in the recovery from the COVID-19 pandemic

Proposed programme plan for 2024

24.57 The subprogramme scaled up efforts to support Member States and other stakeholders to promote and protect economic, social and cultural rights within the context of addressing inequalities in the recovery from the COVID-19 pandemic (see [A/HRC/51/20](#)). It conducted research and advocacy, organized events and issued substantive documents in support of mainstreaming human rights in universal health coverage and universal and equitable vaccine and medicines access.

Lessons learned and planned change

24.58 The lesson for the subprogramme was that there were further opportunities to enhance research and advocacy on the relevance of economic, social and cultural rights in upholding all other rights. In applying the lesson, the subprogramme will strengthen its advocacy on the indivisibility, interdependence and interrelatedness of all human rights. In 2024, it will continue to provide context-specific analysis and policy advice to United Nations country presences and national partners in these areas.

24.59 Expected progress towards the objective is presented in the performance measure below (see table 24.11).

Table 24.11
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Member States and other stakeholders have access to the report of the High Commissioner on economic, social and cultural rights (E/2020/63), in which the High Commissioner examined the impact of the COVID-19 pandemic on economic, social and cultural rights, focusing on the rights to health and social protection	The General Assembly, in its resolution 76/162, requested the Secretary-General to prepare a report on human rights and cultural diversity	The Human Rights Council, in its resolution 50/13, identified challenges in ensuring access to medicines, vaccines and other health products identified by the Human Rights Council Human rights group established within the United Nations Inter-Agency Task Force on the Prevention and Control of Non-communicable Diseases	Member States consider a report on access to medicines and therapies and rare diseases, and guidance on mental health, human rights and legislation	Member States have access to guidance to address access to medicines, vaccines and other health products in the context of the right of everyone to the highest attainable standard of physical and mental health, as recognized in the International Covenant on Economic, Social and Cultural Rights

Deliverables

Consultation, advice and advocacy: expert advice to Member States, United Nations entities, special rapporteurs and independent experts of the Human Rights Council, and other stakeholders, including on the development of related standards.				
D. Communication deliverables				
Outreach programmes, special events and information materials: booklets, pamphlets, wallcharts, information kits on global and national advocacy and capacity-building related to women’s rights, racial discrimination, Indigenous Peoples and the administration of justice, in particular transitional justice mechanisms.				
Library services: OHCHR publications, human rights training and education publications, books, reports, periodicals, videos on human rights and translations of the Universal Declaration of Human Rights.				

Subprogramme 2 Supporting human rights treaty bodies

Objective

- 24.61 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment of all human rights by all, in particular through support and advice to the human rights treaty bodies and by increasing awareness among national and international actors of the international human rights treaties and the work of treaty bodies.

Strategy

- 24.62 To contribute to the objective, the subprogramme will:
- (a) Provide support and advice for the review of State reports; the conduct of inquiries and country visits, where provided for in the treaty or upon request of States; early warning and urgent action procedures and the processing of individual complaints, urgent actions and inter-State complaints; visits to places of deprivation of liberty, as well as assistance and advice to the national preventive mechanisms; and the preparation of general comments;
 - (b) Support the efforts of treaty bodies to improve and enhance their working methods;
 - (c) Engage with Member States, United Nations agencies, NGOs and other actors to enhance awareness, knowledge and understanding of the treaty bodies’ work and outputs, and to promote ratification of international human rights treaties;
 - (d) Facilitate the use of videoconferencing and webcasting to improve the accessibility and visibility of the treaty bodies;
 - (e) Support States parties, upon request, in building their capacity to implement their treaty obligations as well as in the preparation and timely submission of their national reports;

- (f) Support States, upon request, in establishing or strengthening national mechanisms for reporting and follow-up through the exchange of experiences and good practices;
- (g) Assist treaty bodies in their efforts to address reprisals when they occur, and in their responses to claims and acts of intimidation or reprisals against individuals and groups for their contribution to the work of the human rights treaty bodies.

24.63 The above-mentioned work is expected to result in:

- (a) Efficient and effective functioning of the treaty bodies;
- (b) Enhanced cooperation of stakeholders at all levels with treaty bodies in accordance with their working methods and mandates.

Programme performance in 2022

Newly appointed treaty body experts participate in online induction sessions

24.64 The subprogramme supported the efforts of treaty bodies to improve and enhance their working methods, by sharing information and facilitating discussions among their experts. Induction sessions for newly appointed experts contribute to enhancing their capacity, and serve to share timely information on working methods, travel procedures, diplomatic immunities and privileges, and addressing and preventing reprisals.

24.65 Progress towards the objective is presented in the performance measure below (see figure 24.V).

Figure 24.V

Performance measure: number of newly appointed experts participating in an online induction session (annual)

Planned results for 2024

Result 1: enhanced support for individual complaints

Programme performance in 2022 and target for 2024

24.66 The subprogramme contributed to the registration of 100 urgent action and 374 new individual communication cases as they met prima facie admissibility, which did not meet the planned target of 250 urgent actions and 400 individual communications. The planned target was not met as a result of the increased workload associated with case intake and case management, including 289 individual communications that were pre-screened but are pending further processing.

24.67 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 24.VI).

Figure 24.VI

Performance measure: number of individual communications and urgent actions registered (annual)

Result 2: capacity of States parties to engage with treaty bodies strengthened

Programme performance in 2022 and target for 2024

24.68 The subprogramme’s work contributed to the establishment or strengthening of 55 national mechanisms for reporting and follow-up with treaty bodies, which exceeded the planned target of 53.

24.69 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 24.VII).

Figure 24.VII

Performance measure: number of national mechanisms for reporting and follow-up with treaty bodies (cumulative)

Result 3: enhanced participation of delegates in reviews by treaty body committees of reports of States parties

Proposed programme plan for 2024

24.70 The subprogramme improved the accessibility and visibility of the treaty bodies to enhance stakeholders’ engagement with their mandated work, including by offering States parties and other stakeholders the opportunity to participate remotely in the consideration of reports. During the COVID-19 pandemic, with online and remote work and related travel and meeting restrictions, the

subprogramme contributed to the treaty body committees being enabled to discharge their mandates in an online or hybrid mode, with remote connections during 2020 and 2021 at times replacing in-person meetings.

Lessons learned and planned change

- 24.71 The lesson for the subprogramme was that digital technologies offer new opportunities to improve the accessibility and visibility of the treaty bodies and serve to enhance stakeholders’ engagement with their mandated work, including by offering States parties and other stakeholders the opportunity to participate remotely in the consideration of reports. However, interpretation and other conference service support is limited to formal meetings, and is not provided for online informal or intersessional meetings, resulting in such meetings only being offered in one language.
- 24.72 In applying the lesson, the subprogramme will continue to use new digital meeting tools to improve the accessibility and visibility of the treaty bodies, including through improved tools for interpretation for online meetings.
- 24.73 Expected progress towards the objective is presented in the performance measure below (see figure 24.VIII).

Figure 24.VIII

Performance measure: number of hybrid meetings of treaty bodies with interpretation

Deliverables

- 24.74 Table 24.13 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: advocacy on legal instruments on the international human rights system (briefings, capacity-building, legal analysis, information materials, technical cooperation and assistance) with Member States, United Nations entities and other stakeholders; consultation and advice on the establishment and/or strengthening of national mechanisms for reporting and follow-up to the human rights treaty bodies; briefings with respect to newly elected mandates holders of the Committees and new members of the Boards of Trustees of the humanitarian trust funds.

Databases and substantive digital materials: the Universal Human Rights Index, with over 170,000 observations and recommendations made by international human rights mechanisms; treaty body jurisprudence databases; knowledge hub on national mechanisms on reporting and follow-up; the national recommendations tracking database.

D. Communication deliverables

Outreach programmes, special events and information materials: informational brochures on the activities of the treaty bodies, the capacity-building programme and the humanitarian trust funds, as well as the Special Fund established by the Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.

Subprogramme 3

Advisory services, technical cooperation and field activities

Objective

- 24.75 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights, through enhanced capacity-building, including through assistance to requesting States.

Strategy

- 24.76 To contribute to the objective, the subprogramme will:
- Provide States and stakeholders at the national level with human rights legal advice, education, awareness-raising and training through mutually agreed advisory services and technical cooperation programmes, including in the implementation of the recommendations to which States have agreed in the universal periodic review process;
 - Improve cooperation within the United Nations system for the protection and promotion of human rights, through joint activities, the deployment of human rights officers and advisers,

interaction with OHCHR programmes in the field and relevant United Nations human rights mechanisms;

- (c) Continue to deploy human rights observers and fact-finding missions, at the request of an affected country or as mandated by United Nations legislative bodies;
- (d) Assist the Human Rights Council and its mechanisms, as well as other policymaking bodies and the treaty bodies, in preparing for and following up on their dialogue with thematic and country-specific special procedures by following human rights developments.

24.77 The above-mentioned work is expected to result in:

- (a) Enhanced national capacities to translate international human rights obligations into effective laws, regulations and policies and meet the challenges to the full realization of human rights;
- (b) Enhanced capacity of United Nations country teams, field presences, peacekeeping operations and peacebuilding activities to assist requesting countries in their efforts to develop national human rights protection systems, guided, inter alia, by the recommendations of the international human rights mechanisms;
- (c) Prevention of the continuation of human rights violations, including in situations of large-scale crisis.

Programme performance in 2022

Mainstreaming human rights to help accelerate the implementation of the sustainable development agenda

24.78 In 2022, the subprogramme contributed to strengthening engagement with other United Nations entities to help accelerate the implementation of the sustainable development agenda. Through the work of human rights advisers as part of the United Nations country teams, the subprogramme contributed to the provision of essential guidance to include human rights in budgeting, data collection, policymaking and programming. The work done by human rights advisers in this context led to increased support to State actors to promote and protect human rights at the country level.

24.79 For example, in Kenya, the human rights advisers helped the United Nations country team strengthen links with – and between – the national human rights institution and the national statistical office. This resulted in the mainstreaming of human rights in data collection, analysis and programming, facilitating the identification of target people who could have been left furthest behind had the approach not been implemented.

24.80 Progress towards the objective is presented in the performance measure below (see figure 24.IX).

Figure 24.IX

Performance measure: number of countries where specific programmes of United Nations entities mainstreamed human rights with the subprogramme’s support (cumulative)

Planned results for 2024

Result 1: timely data and analysis of human rights situations

Programme performance in 2022 and target for 2024

- 24.81 The subprogramme’s work contributed to the formalization of a new agreement with the United Nations Satellite Centre for the 2022–2023 period to receive dedicated support for imagery acquisition and analysis, which met the planned target.
- 24.82 The subprogramme’s work also contributed to the use of timely data on and analysis of human rights situations, including through 154 infographics used by the United Nations principals and other partners, a 15 per cent increase compared with the previous year, which met the planned target.
- 24.83 The subprogramme’s work also contributed to the establishment of one emergency response team in Fiji and access to situation reports and dashboards, with data and information being made available upon request to inform the timely and evidence-based decisions made by the emergency response teams, the United Nations system and Member States, which met the planned target.
- 24.84 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 24.14).

Table 24.14

Result 2: enhanced capacity of Member States to reduce inequalities

Programme performance in 2022 and target for 2024

- 24.85 The subprogramme contributed to the strengthening of national policies, legislation and mechanisms for the promotion and protection of human rights, providing advisory services and technical cooperation programmes to Member States and other stakeholders, leading to 74 Member States taking action to enhance legislation and policies that integrate economic, social and cultural rights, which exceeded the planned target of 70.
- 24.86 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 24.X).

Figure 24.X

Performance measure: number of Member States that took action to enhance legislation and policies that integrate economic, social and cultural rights (cumulative)

Result 3: towards implementation by Member States of recommendations emanating from international human rights mechanisms

Proposed programme plan for 2024

24.87 In its resolution 51/30, the Human Rights Council requested the Secretary-General to further strengthen the dedicated capacity of OHCHR to implement the mandates of the Voluntary Fund for Participation in the Universal Periodic Review and the Voluntary Fund for Financial and Technical Assistance in the Implementation of the Universal Periodic Review. In the resolution, the Council placed particular emphasis on the least developed countries and small island developing States.

Lessons learned and planned change

24.88 The lesson for the subprogramme was that the direct in-country engagement with State partners in the least developed countries and small island developing States led to the increased demand of Member States for additional, more specific technical support. In applying the lesson, the subprogramme will enhance efforts and focus in the area of engagement with human rights mechanisms. Through the strengthening of its capacity in regional offices, the subprogramme will provide increased support to Member States to improve their engagement with international human rights mechanisms to facilitate the implementation of outstanding recommendations of the treaty bodies, special procedures and the Human Rights Council and from the universal periodic review.

24.89 Expected progress towards the objective is presented in the performance measure below (see figure 24.XI).

Figure 24.XI

Performance measure: number of least developed countries and small island developing States that implement recommendations emanating from international human rights mechanisms (cumulative)

Deliverables

24.90 Table 24.15 lists all deliverables of the subprogramme.

Table 24.15

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Databases and substantive digital materials: databases on geographic human rights information, including the human rights case database, a secure information exchange platform in support of the commissions of inquiry and fact-finding missions.

D. Communication deliverables

External and media relations: press releases and media briefings by country mandate holders and the High Commissioner.

**Subprogramme 4
Supporting the Human Rights Council, its subsidiary bodies and mechanisms**

Objective

- 24.91 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights, by providing strengthened support and advice to the Human Rights Council and its subsidiary bodies and mechanisms, including the Human Rights Council Advisory Committee, the special procedures, the universal periodic review and the complaint procedure.

Strategy

- 24.92 To contribute to the objective, the subprogramme will:
- (a) Research and develop analytical information and knowledge in support of the thematic special procedures and the universal periodic review mechanism to enhance their effectiveness;
 - (b) Support and provide thematic expertise for fact-finding missions and special procedure mandate holders’ country visits, including through enhanced cooperation within the programme, the analysis of gaps in the implementation of international human rights instruments, the promotion of observance for international human rights standards and the provision of timely advice for addressing gross and systematic violations of human rights;
 - (c) Support the international human rights mechanisms in their efforts to promote the implementation of the 2030 Agenda in accordance with States’ human rights obligations;
 - (d) Disseminate knowledge of the conclusions, recommendations and other outcomes of the universal periodic review, as well as the findings and methodology of the thematic special procedures, and improve coordination among mandate holders and other mechanisms of the human rights machinery;
 - (e) Support partnerships and reinforce dialogue and cooperation with Governments, national human rights institutions, civil society organizations, victims, United Nations agencies and programmes and the United Nations human rights machinery and cooperating policymaking bodies, including to support follow-up to the findings and recommendations of the special procedure mandate holders and the outcomes of the universal periodic review;
 - (f) Provide assistance to States within the universal periodic review framework.
- 24.93 The above-mentioned work is expected to result in:
- (a) Enhanced and effective functioning of the Human Rights Council and its subsidiary bodies and mechanisms, including more effective deliberations and decision-making processes;
 - (b) Enhanced cooperation at all levels with stakeholders that can benefit from and/or contribute to the work of the Human Rights Council and its subsidiary bodies and mechanisms.

Programme performance in 2022

Enhanced impact of special procedures through strengthened coordination

- 24.94 Enhanced coherence among special procedures mandate holders, including dedicated efforts to ensure effective coordination and consolidated expertise, can help to increase their contributions to the promotion and protection of human rights. The subprogramme supported special procedures in this regard, for example, through joint annual meetings, joint initiatives and communications; through the implementation of consistent working methods, a common manual of operations and a code of conduct, as well as the work of the Coordination Committee of Special Procedures and joint briefings and training for new mandate holders; and through support to strengthen coordination in special procedures' interactions with intergovernmental bodies. This support also included enhanced visibility of the work and efforts, with special attention paid to good practices and technical cooperation and advice.
- 24.95 Progress towards the objective is presented in the performance measure below (see table 24.16).

Table 24.16

Stakeholders have access to a web page serving as a central location for the compilation of all calls for inputs to and themes of upcoming reports to be submitted by special procedures in the year ahead	Enhanced coherence and coordination among special procedures mandate holders in relation to prevention and sustaining peace through public events organized with the Coordination Committee of Special Procedures, resulting in enhanced visibility of their role and mandates	<p>Collaboration and common approaches by special procedures mandate holders on cross-cutting thematic issues, such as the Sustainable Development Goals, climate change, migration, new technologies and the COVID-19 response, which are more visible through a dedicated website</p> <p>The report of the Secretariat on the activities of special rapporteurs, independent experts and working groups of the special procedures of the Human Rights Council undertaken in 2021 (A/HRC/49/82), which contains information on the work of the Coordination Committee of Special Procedures, for the first time included examples of the contribution of special procedures through technical cooperation and advice addressed to Member States and other stakeholders. These were contained in an addendum (A/HRC/49/82/Add.1) with infographics and analysis on follow-up activities by special procedures and examples of good practices and concrete contributions to United Nations processes</p>

Planned results for 2024

Result 1: enhanced participation in the universal periodic review

Programme performance in 2022 and target for 2024

- 24.96 The subprogramme contributed to 135 delegates from the least developed countries and small island developing States participating in sessions of the Working Group on the Universal Periodic Review (fortieth and forty-first), which exceeded the planned target of 130.
- 24.97 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 24.XII).

Figure 24.XII

Performance measure: number of delegates from the least developed countries and small island developing States participating in sessions of the Working Group on the Universal Periodic Review (annual)

Result 2: enhanced engagement of parliamentarians in the universal periodic review

Programme performance in 2022 and target for 2024

- 24.98 The subprogramme's work contributed to 81 parliamentarians with increased knowledge on engagement with the Human Rights Council and its universal periodic review, which exceeded the planned target of 70.
- 24.99 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 24.XIII).

Figure 24.XIII

Performance measure: number of parliamentarians with increased knowledge on engagement with the Human Rights Council and its universal periodic review (annual)

Result 3: enhanced participation of the least developed countries and small island developing States in the Human Rights Council

Proposed programme plan for 2024

- 24.100 In 2012, the Human Rights Council, through its resolution 19/26, established the Voluntary Technical Assistance Trust Fund to Support the Participation of Least Developed Countries and Small Island Developing States in the work of the Council. The Trust Fund aims to ensure that these countries, in particular those without permanent representation in Geneva, participate and contribute to the work of the Council. In 2024, the subprogramme will continue to support the implementation of the Fund's mandate by facilitating the travel of delegates for Council sessions, providing training on human rights and engagement with the Council, and organizing fellowship programmes.

Lessons learned and planned change

- 24.101 The lesson for the subprogramme was that, with the increased length of Human Rights Council sessions, the increasing complexities of the methods of work and an expanding spectrum of issues considered, the support provided by the Trust Fund to those countries needed to be strengthened during their membership in the Council. In applying the lesson, the subprogramme will strive to target the least developed countries and small island developing States that are new members of the Council in the first year of their membership to build their capacity and increase meaningful participation and engagement with the Council, by encouraging applications for support from the Fund.
- 24.102 Expected progress towards the objective is presented in the performance measure below (see figure 24.XIV).

Figure 24.XIV

Performance measure: increased number of delegates from least developed countries and small island developing States participating in Human Rights Council sessions

Deliverables

24.103 Table 24.17 lists all deliverables of the subprogramme.

- 24.105 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 24.21 to 24.23 and figure 24.XV.
- 24.106 As reflected in tables 24.21 (1) and 24.22 (1), the overall resources proposed for 2024 amount to \$142,497,000 before recosting, reflecting a net decrease of \$32,936,700 (or 18.8 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

24.107 As reflected in table 24.21 (1), resource changes reflect a net decrease of \$49,170,800, as follows:

- (a) **Policymaking organs.** The increase of \$75,600 relates to the provision at continuing vacancy rates for one post of Human Rights Officer (P-3) established in 2023 pursuant to Human Rights Council decision 51/101, which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;

- (b) **Subprogramme 1, Human rights mainstreaming, right to development, and research and analysis.** The decrease of \$5,435,800 relates to the removal of non-recurrent provisions in support of new and expanded mandates approved for 2023 pursuant to Human Rights Council resolutions from its forty-seventh to fifty-first sessions (including those mandates for which resource requirements were consolidated in the proposed programme budget for 2023 (see paragraph 24.108 below)), biennial mandates from the twenty-sixth, twenty-seventh and forty-third sessions of the Council and General Assembly resolutions [69/16](#), [75/314](#) and [76/226](#);
- (c) **Subprogramme 2, Supporting human rights treaty bodies.** The decrease of \$428,500 relates to the removal of non-recurrent provisions in support of new and expanded mandates approved for 2023 pursuant to Human Rights Council resolutions from its forty-seventh to fifty-first sessions;
- (d) **Subprogramme 3, Advisory services, technical cooperation and field activities.** The decrease of \$43,956,200 relates to the removal of non-recurrent provisions in support of new and expanded mandates approved for 2023 pursuant to Human Rights Council resolutions from its forty-seventh to fifty-first sessions (including those mandates for which resource requirements were consolidated in the proposed programme budget for 2023);
- (e) **Subprogramme 4, Supporting the Human Rights Council, its subsidiary bodies and mechanisms.** The net increase of \$574,100 relates to the provision at continuing vacancy rates for 17 posts (12 P-4, 3 P-3 and 2 General Service (Other level)) established in 2023 pursuant to Human Rights Council resolution [51/30](#) and decision 51/101, which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts (\$1,347,300), offset in part by the removal of non-recurrent provisions in support of new and expanded mandates approved for 2023 pursuant to Human Rights Council resolutions from its fiftieth and fifty-first sessions (\$773,200).

24.108 Of the overall net decrease of \$49,170,800 under technical adjustments, \$33,001,200 (\$30,349,500 before recosting) reflects the removal of provisions related to Human Rights Council mandates included in the proposed programme budget for 2023 for the consolidation of the budget for section 24, Human rights, pursuant to General Assembly resolution [77/263](#). Related requirements for 2024 are not included in the present proposed programme budget but will be included in the report of the Secretary-General on revised estimates resulting from resolutions and decisions adopted by the Human Rights Council in 2023, which will be submitted to the General Assembly during the main part of its seventy-eighth session. Revised criteria for the consolidation of the proposed programme budget for section 24, Human rights, are presented in annex IV to the present report; if approved, those criteria would be used to provide a consolidated budget for section 24 (and related budget sections) starting with the proposed programme budget for 2025.

New and expanded mandates

- 24.109 As reflected in table 24.21 (1), resource changes reflect an increase of \$10,810,400. The distribution across the subprogrammes is as follows:
- (a) **Policymaking organs.** An increase of \$594,600 under travel of representatives (\$423,400), travel of staff (\$56,300), contractual services (\$6,400), general operating expenses (\$42,000) and grants and contributions (\$66,500) is related to additional requirements for meetings and travel for the treaty body system pursuant to General Assembly resolution [68/268](#) (\$588,200), taking into account the workload statistics as published in the report of the Secretary-General on the status of the human rights treaty body system ([A/77/279](#)) and explained in further detail in paragraphs 24.110 to 24.114, and Human Rights Council resolution [51/3](#) (\$6,400);
 - (b) **Executive direction and management.** An increase of \$308,800 under posts reflects the proposed establishment of one Public Information Officer (P-4) and two Public Information Officers (P-3) for media and communications support, related to the establishment of a core capacity pursuant to General Assembly resolution [77/262](#). Further information about the proposed core capacity is provided in paragraphs 24.115 to 24.119;

- (c) **Subprogramme 1, Human rights mainstreaming, right to development, and research and analysis.** An increase of \$1,718,600 under other staff costs (\$910,500), travel of representatives (\$173,800), travel of staff (\$64,000), contractual services (\$31,200), general operating expenses (\$52,000) and grants and contributions (\$487,100) relates to requirements for Human Rights Council resolutions, as identified in the respective statements of budgetary implications (see table 24.24);

- (d) **Subprogramme 2, Supporting human rights treaty bodies.** A net increase of \$1,116,500, including under posts (\$2,197,100), relating to the proposed establishment of seven Human Rights Officer (P-3) posts and the conversion of eight Human Rights Officers (P-3) and one Programme Management Assistant (General Service (Other level)) from general temporary assistance positions, travel of representatives (\$28,600), contractual services (\$4,800) and grants and contributions (\$114,500), is offset in part by a reduction in other staff costs (reduction of \$1,228,500) owing to the proposed conversions from general temporary assistance. The net increase is related to additional requirements for meetings and travel for the treaty body system pursuant to General Assembly resolution [68/268](#), taking into account the workload statistics as published in the report of the Secretary-General on the status of the human rights treaty body system ([A/77/279](#)) (\$829,600), explained in further detail in paragraphs 24.110 to 24.114 and annex III, and Human Rights Council resolution [51/33](#) (\$286,900);
- (e) **Subprogramme 3, Advisory services, technical cooperation and field activities.** An increase of \$6,419,300, including under posts (\$286,100), other staff costs (\$5,168,300), consultants (\$61,400), travel of representatives (\$128,900), travel of staff (\$144,600), contractual services (\$132,300), general operating expenses (\$299,600), supplies and materials (\$5,900), furniture and equipment (\$13,300) and grants and contributions (\$178,900), relates to the establishment of a core capacity of one Information Management Officer (P-4), one Information Management Officer (P-3) and one Information Management Assistant (General Service (Other level)) for archival support pursuant to General Assembly resolution [77/262](#) (\$286,000), explained in further detail in paragraphs 24.115 to 24.119, and Human Rights Council resolutions (\$6,133,200), as identified in the respective statements of programme budget implications (see table 24.25 and annex III);

Table 24.25

- (f) **Programme support.** An increase of \$652,600 under post resources relates to the establishment of one Security Coordination Officer (P-4), one Security Coordination Officer (P-3), one Administrative Officer (P-3) and one Programme Management Assistant (General Service (Other level)) as core capacity for administrative and security support, pursuant to General Assembly resolution 77/262. Further information about the proposed core capacity is provided in paragraphs 24.115 to 24.119 and annex III.

Requirements for the treaty body system

24.110 With regard to the resource requirements under policymaking organs and subprogramme 2 (see para. 24.109 (a) and (d)), in its resolution 68/268, the General Assembly decided that the allocation of meeting time to the treaty bodies would be identified by:

- (a) The number of weeks that each treaty body required to review the reports of States parties that it could expect annually, using the average number of reports received per committee during the previous four years, on the basis of an assumed attainable rate of review of at least 2.5 reports per week and, where relevant, at least 5 reports per week under the Optional Protocols to the human rights treaties;

- (b) An allocation of additional meeting time to those committees dealing with individual communications, on the basis of each such communication requiring 1.3 hours of meeting time for review and the average number of such communications received per year by those committees;
 - (c) A further allocation of two weeks of meeting time per committee to allow for mandated activities;
 - (d) An additional margin of 5 per cent to prevent the recurrence of backlogs;
 - (e) An adequate allocation of financial and human resources to those treaty bodies whose main mandated role is to carry out field visits.
- 24.111 The General Assembly further decided that the amount of meeting time allocated would be reviewed biennially and requested the Secretary-General to report on the status of the human rights treaty body system biennially and to include resources in the proposed programme budget in accordance with budgetary procedures.
- 24.112 The report of the Secretary-General on the status of the human rights treaty body system ([A/77/279](#)) presented the related workload statistics, including the number of reports and communications received. Those workload statistics, according to the criteria set out in resolution [68/268](#), result in a requirement for the committees of the treaty bodies to meet for 95.9 weeks in 2024.
- 24.113 With regard to staff requirements, 16 additional posts and additional months of general temporary assistance are required in order to support the additional meeting time compared to 2015 and to support treaty bodies' field visits. Specifically, the support for the treaty bodies in reviewing States parties' reports and individual communications, including conducting research and analysis, liaising with States parties and stakeholders, assisting with drafting lists of issues and concluding observations, revising texts as needed, and providing support during treaty body meetings, would require a total of 15 posts, comprising 14 posts plus 1.5 months of general temporary assistance at the P-3 level and 1 full-time post and 10 months of general temporary assistance in the General Service (Other level). The current staffing to undertake these roles consists of eight general temporary assistance positions at the P-3 level and one General Service (Other level) position. These nine positions are proposed for conversion to posts, and an additional six posts at the P-3 level are proposed for establishment to bring the staffing complement up to the level required to meet the work weeks as determined by resolution [68/268](#) to support the additional meeting time. In addition, one post at the P-3 level is proposed to support those treaty bodies whose main mandated role is to carry out field visits. Staff resources are presented under subprogramme 2, Supporting human rights treaty bodies.
- 24.114 With regard to non-staff resources, resources under travel of representatives (daily subsistence allowance), grants and contributions (travel of assistants for the Committee on the Rights of Persons with Disabilities), travel of staff and general operating expenses to support those treaty bodies whose main mandated role is to carry out field visits are proposed under policymaking organs.

Core capacity

- 24.115 With regard to the establishment of a core capacity for administrative, human resources, media and communications, archival and security support, pursuant to General Assembly resolution [77/262](#), in which the Assembly endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions contained in paragraph VI.36 of its report ([A/77/7](#)), the proposed budget includes the resources set out in the paragraphs below to meet current and future needs.
- 24.116 With regard to archiving, two Information Management Officers (1 P-4 and 1 P-3) and one Information Management Assistant (General Service (Other level)) would perform archiving functions (maintenance, revision, freezing and unfreezing of data) for safe keeping of data from inception beyond the end of any given mandate, including for 13 ongoing field-based investigative bodies, future bodies and archives of past investigative bodies.

- 24.117 Media, investigative and other mechanisms mandated by the Human Rights Council invariably generate significant media interest and must be handled with transparency, sensitivity and speed. If media interest, media speculation and misinformation are not handled promptly and professionally, there can be serious repercussions for the work of the mechanisms and the credibility of the Council and OHCHR. Three Public Information Officers (1 P-4 and 2 P-3) would coordinate and manage the media and communications needs of the mechanisms, including crisis communications management.
- 24.118 With regard to administration, two Administrative Officers (P-3) and two Programme Management Assistants (General Service (Other level)) would support administrative and logistical work to support investigative missions.
- 24.119 With regard to security, three Security Officers (1 P-4 and 2 P-3) would provide security services to existing and future investigative bodies and for other mandated activities where country visits, including to places of arbitrary detention, are required.

Other changes

- 24.120 As reflected in table 24.21 (1), the effect of the proposed changes is a net increase of \$5,423,700, related to:
- (a) Executive direction and management. An increase of \$1,980,000 under post resources is due to the proposed conversion of 12 posts (3 P-4, 4 P-3 and 5 General Service (Other level)) from extrabudgetary to regular budget posts to support the intergovernmental mechanisms, as explained in paragraph 24.122, and to support the evaluation processes. The evaluation and data analysis capacity of OHCHR conducts between 12 and 15 evaluations each year, which are funded from extrabudgetary resources and which, for that reason, have focused mainly on discrete programmes such as country programmes or particular thematic entities. Specific areas of work funded by the regular budget, such as evaluations of support provided to Member States in the reporting on and follow-up to the recommendations emanating from the human rights mechanisms in a given country, are conducted as part of the overall country evaluations when viable, and cross-cutting and programme-wide evaluations are also mainly carried out by resources funded by extrabudgetary sources. The related post changes are explained in annex III;
 - (b) Subprogramme 1, Human rights mainstreaming, right to development, and research and analysis. A decrease of \$20,300 under grants and contributions is due to a reduction in the travel of witnesses, enabled by an increase in remote interviews, and an increase in remote consultations in lieu of in-person interactions;
 - (c) Subprogramme 2, Supporting human rights treaty bodies. An increase of \$578,000 under post resources is due to the establishment of six temporary posts (1 P-4, 4 P-3 and 1 General Service (Other level)), as explained in paragraph 24.123 and annex III;
 - (d) Subprogramme 3, Advisory services, technical cooperation and field activities. A decrease of \$400,300 under contractual services (\$150,000), general operating expenses (\$230,000) and grants and contributions (\$20,300) is due to a reduction in the travel of witnesses, enabled by an increase in remote interviews, and a decrease under other staff costs (\$689,600) is offset by a corresponding increase under posts related to proposed conversion of four long-standing general temporary assistance positions to posts (4 P-3) to support special rapporteurs and independent experts in carrying out their mandates, as explained in annex III;
 - (e) Subprogramme 4, Supporting the Human rights Council, its subsidiary bodies and mechanisms. A net increase of \$3,204,000 relates to an increase of \$3,376,400 under post resources, owing to the conversion of 20 posts (5 P-4, 3 P-3, 5 P-2/1 and 7 General Service (Other level)) from extrabudgetary to regular budget posts and the conversion of one general temporary assistance position (P-3) to a post to support the Independent Expert on human rights and international solidarity in carrying out the Independent Expert's mandate, as explained in annex III, offset in part by a decrease under other staff costs (\$172,400);

- (f) Programme support. A net increase of \$81,500 results from the conversion of one post of Senior Budget Assistant (General Service (Principal level)) from extrabudgetary to regular budget, as explained in annex III (increase of \$161,100 under posts), offset in part by decreases under contractual services (\$39,500) and supplies and materials (\$40,100) owing to efficiencies in the use of premises, supplies and software licences resulting from renegotiated software licences and rent, as well as a movement towards more paperless processes.
- 24.121 The changes outlined in paragraph 24.120 (a) to (f) are related to various areas, including evaluation and support to intergovernmental mechanisms and the treaty body system. These areas cover mandated activities for which the regular budget is the appropriate source of funding. While these mandated activities were indeed funded under the regular budget from the outset, the demanded activity level has increased over the years, without the concomitant increases under the regular budget. In the case of evaluation and support to intergovernmental mechanisms, voluntary resources have made up for the difference. The current budget proposal seeks to start to rectify this misalignment in funding sources. In addition, the Office of Internal Oversight Services has identified the risk that the reliance on extrabudgetary funding could affect the delivery of services in the event of funding shortfalls and affect the perceived objectivity and independence of OHCHR. In this context, OHCHR will further review its resource requirements and funding arrangements, the outcome of which will be reflected in the proposed programme budget for 2025. The related post changes are detailed in annex III.
- 24.122 The support to intergovernmental mechanisms includes the Human Rights Council, the universal periodic review, and the Human Rights Council Advisory Committee meetings. Since 2010, there has been a significant increase in the number of Human Rights Council meetings and activities related to these meetings, which represents an increased workload for the secretariat. The increases include a 23 per cent increase in the number of meetings; a 23 per cent increase in the number of speakers; a 93 per cent increase in the number of interactive dialogues; and a 50 per cent increase in the number of Human Rights Council panel discussions. In addition, there has been a 400 per cent increase in the number of investigative mechanisms and a 48 per cent increase in the number of special rapporteurs and independent experts. Furthermore, the number of written statements and video statements by NGOs has increased by 2,000 per cent. Preparatory work for these meetings and the related side events is now required three months before the beginning of the session and the related follow-up work now continues for approximately six weeks on average owing to the increased volume of activities. The sessions of the Human Rights Council Advisory Committee, which are held over a one-week period twice a year, require preparatory work that starts up to four months before the beginning of the session, with related follow-up work typically taking place over three to four months depending on the number and nature of the mandates under consideration by the Committee. These mandated activities have been increasingly supported by extrabudgetary resources owing to the increased workload. The associated resources are proposed to be converted to regular budget funding. The resources also include those for the processing of parliamentary (General Assembly and Human Rights Council) and treaty body documentation for mandated activities, following a growing volume of documentation linked to an increase in mandated reports, as well as in Human Rights Council resolutions and ratifications by treaty bodies. Details of related post changes are explained in annex III.
- 24.123 The support to the treaty body system is intended to address the significant exceptional increase in the backlog of reports of States parties and individual cases. During the COVID-19 pandemic, the treaty bodies could not carry out reviews in person, and the backlog accumulated over time. The current backlog stands at 426 reports of States parties, an increase from the pre-pandemic level of 183 reports. In order for the treaty bodies to process this backlog, preparatory work, such as the compilation of information from United Nations entities, national human rights institutions, NGOs and other stakeholders, will be required to prepare reviews of the pending reports. Related post changes are explained in annex III.

Other assessed resources

24.124 As reflected in tables 24.21 (2) and 24.22 (2), the Office receives other assessed resources under the support account for peacekeeping operations. For 2024, the projected resources amount to \$2,452,600, including eight posts and two positions. This represents a net increase of \$95,300, or 4 per cent, compared with the resource level for 2023. The resources would support the activities of the Peace Missions Support Section, the Methodology, Education and Training Section, and the Africa Branch of the Field Operations and Technical Cooperation Division in their contributions to a number of expected results, established by the General Assembly. Resources are also proposed for undertaking strategic and technical assessment missions to peacekeeping operations, in the context of planning exercises or operational support visits, to advise on the effective integration of human rights into peacekeeping operations, including for the further implementation of the human rights due diligence policy on United Nations support to non-United Nations security forces.

Extrabudgetary resources

- 24.125 As reflected in tables 24.21 (3) and 24.22 (3), for 2024, extrabudgetary resources are estimated at \$277,746,000. Further details are provided under the respective components and subprogrammes below. The Office receives both cash and in-kind contributions, which complement regular budget resources. Anticipated in-kind contributions will provide for rent-free premises with an estimated value of \$517,300, and the provision of an armoured vehicle and running costs with an estimated value of \$50,000.
- 24.126 The authority to oversee the use of extrabudgetary resources rests with OHCHR, in accordance with the delegation of authority by the Secretary-General.

Polymaking organs

24.127 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies, including the Human Rights Council and its Advisory Committee, and the expert committees established under the core international human rights treaties, the servicing of which is the responsibility of OHCHR. The Council and the treaty bodies meet throughout the year in formal sessions in Geneva and, in some cases, undertake follow-up missions to relevant countries. Table 24.26 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 24.26

Polymaking organs

(Thousands of United States dollars)

Polymaking organ	Description	Additional information	2024 estimate	
			2023 appropriation	(before recosting)
Human Rights Committee	The Human Rights Committee monitors the implementation of the International Covenant on Civil and Political Rights by examining periodic reports submitted by the States parties and receives individual communications concerning violations of the Covenant by States parties that have ratified or adhered to the Optional Protocol to the Covenant. The Committee is also competent to examine inter-State communications with respect to the States parties that have made a declaration pursuant to article 41 of the Covenant. It actively promotes the ratification of the Second Optional	Mandate: In accordance with article 28 of the International Covenant on Civil and Political Rights, adopted by the General Assembly in its resolution 2200 (XXI) Membership: 18 experts Number of sessions in 2024: 3	1 843.7	1 770.1

	Protocol to the Covenant aiming at the abolition of the death penalty.			
Committee against Torture	The Committee against Torture monitors the implementation of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment by examining periodic reports submitted by the States parties and individual communications concerning violations of the Convention by States parties that have accepted the optional procedure under article 22 of the Convention. The Committee is also empowered to conduct inquiries in States parties that have accepted the optional procedure under article 20 of the Convention.	Mandate: In accordance with article 17 of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, adopted by the General Assembly in its resolution 39/46 , annex Membership: 10 experts Number of sessions in 2024: 3	716.9	785.0
Committee on the Rights of the Child	The Committee on the Rights of the Child monitors the implementation of the Convention on the Rights of the Child by examining periodic reports submitted by the States parties. The Committee also monitors the implementation of the Optional Protocols to the Convention on the sale of children, child prostitution and child pornography and on the involvement of children in armed conflict through the examination of reports. The Committee also monitors the implementation of the Optional Protocol to the Convention on a communications procedure, which gives the Committee competence to receive and consider communications submitted by or on behalf of individuals or groups of individuals in States parties concerning alleged violations of the Convention. In accordance with article 13 of the Optional Protocol on a communications procedure, the Committee is empowered to conduct inquiries into grave or systematic violations of the Convention by a State party.	Mandate: In accordance with article 43 of the Convention on the Rights of the Child, adopted by the General Assembly in its resolution 44/25 , annex Membership: 18 experts Number of sessions in 2024: 3	1 297.4	1 297.4
Committee on Economic, Social and Cultural Rights	The Committee on Economic, Social and Cultural Rights monitors the implementation of the International Covenant on Economic, Social and Cultural Rights by examining periodic reports submitted by the States parties and making general recommendations to the Economic and Social Council. The Committee also monitors the implementation of the Optional Protocol to the Covenant, which was adopted by the Council in its resolution 8/2 and the General Assembly in its resolution 63/117 and entered into force on 5 May 2013. The Optional Protocol gives the Committee competence to receive and consider communications submitted by or on behalf of individuals or groups of individuals in States parties that have made such a declaration concerning alleged violations of the Covenant. In accordance with article 11 of the Optional Protocol, the Committee is empowered to conduct inquiries into grave or systematic violations of the Covenant by a State party.	Mandate: Economic and Social Council resolution 1985/17 Membership: 18 experts Number of sessions in 2024: 2	931.1	1 068.4

Committee on the Elimination of Discrimination against Women	The Committee on the Elimination of Discrimination against Women reviews reports of States parties to the Convention on the Elimination of All Forms of Discrimination against Women submitted in accordance with article 18 of the Convention and formulates concerns and recommendations. The Committee is mandated under the Optional Protocol to the Convention to receive and consider communications from individuals or groups of individuals and adopt its views with respect to such communications. It is also empowered, in accordance with article 8 of the Optional Protocol, to conduct inquiries into grave or systematic violations of the Convention in States parties to the Optional Protocol that have not opted out of the inquiry procedure pursuant to article 10 of the Optional Protocol. A working group on communications and a working group on inquiries of the Committee meets prior to each session in order to determine the admissibility of communications and make the necessary recommendations on the merits of communications and to make an assessment and recommendations as to whether information received under article 8 of the Optional Protocol is reliable and indicates grave or systematic violations of the Convention, respectively.	Mandate: In accordance with article 17 of the Convention on the Elimination of All Forms of Discrimination against Women, adopted by the General Assembly in its resolution 34/180 , annex Membership: 23 experts Number of sessions in 2024: 3	1 347.7	1 347.7
Committee on the Protection of the Rights of All Migrant Workers and Members of Their Families	The Committee on the Protection of the Rights of All Migrant Workers and Members of Their Families monitors the implementation of the International Convention on the Protection of the Rights of All Migrant Workers and Members of Their Families by examining periodic reports submitted by the States parties. The optional procedure under article 77 of the Convention would allow the Committee to examine individual communications concerning violations of the Convention once it enters into force (10 declarations of acceptance required).	Mandate: In accordance with article 72 of the International Convention on the Protection of the Rights of All Migrant Workers and Members of Their Families, adopted by the General Assembly in its resolution 45/158 Membership: 14 experts Number of sessions in 2024: 2	367.0	340.3
Subcommittee on Prevention of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment	The Subcommittee on Prevention of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment undertakes regular visits to places where people are or may be deprived of their liberty, in accordance with article 1 of the Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment. Following the visits, the Subcommittee makes observations and recommendations to States parties for the prevention of torture or ill-treatment of persons deprived of their liberty and for improvements in the treatment and conditions of detention of persons deprived of their liberty and continues to work with the relevant authorities on the implementation of the recommendations. As set out in article 11 of the Optional Protocol, the Subcommittee's mandate also includes: (a) the provision of assistance and advice to the national preventive mechanisms to be established or	Mandate: General Assembly resolution 57/199 Membership: 25 experts Number of sessions in 2024: 3	1 094.8	1 311.7

	may undertake country visits in cases in which the Committee receives reliable information that a State party is seriously violating the provisions of the Convention.			
Chairs of the human rights treaty bodies	An annual meeting of persons chairing the human rights treaty bodies has been convened since 1995 in order to discuss topics of mutual relevance and ensure coherence in their working methods and procedures. The meetings are attended by the Chairs, or their representatives, of the Human Rights Committee; the Committee on Economic, Social and Cultural Rights; the Committee on the Elimination of Racial Discrimination; the Committee on the Elimination of Discrimination against Women; the Committee against Torture; the Committee on the Rights of the Child; the Committee on the Protection of the Rights of All Migrant Workers and Members of Their Families; the Subcommittee on Prevention of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment; the Committee on the Rights of Persons with Disabilities; and the Committee on Enforced Disappearances.	Mandate: General Assembly resolution 49/178 Membership: 10 experts Number of sessions in 2024: 1	86.7	86.7
Special Committee to Investigate Israeli Practices Affecting the Human Rights of the Palestinian People and Other Arabs of the Occupied Territories	The Special Committee investigates Israeli practices affecting the human rights of the population of the occupied territories. The Committee undertakes a two-week field mission to the Middle East annually in order to hear witnesses with recent and first-hand information about the situation of human rights in the occupied territories. The Committee meets in Geneva during the Human Rights Council's consideration of the human rights situation in the State of Palestine and other occupied Arab territories. The members of the Special Committee also meet at Headquarters in New York to present their report and participate in the deliberations of the Special Political and Decolonization Committee (Fourth Committee) of the General Assembly.	Mandate: General Assembly resolution 2443 (XXIII) Membership: 3 Member States Number of sessions in 2024: 1	95.0	95.0
Human Rights Council	The Human Rights Council was established as a subsidiary organ of the General Assembly, replacing the Commission on Human Rights and assuming its role and responsibilities as the principal international organ for human rights. The Council is composed of 47 members, for staggered three-year terms. The Council meets regularly throughout the year in Geneva for a minimum of three sessions annually, for a total duration of no fewer than 14 weeks. The Council may also hold special sessions when needed. The Council also holds panel discussions during each of its three regular sessions. By its resolution 60/251 , the General Assembly also mandated the Council to undertake a universal periodic review of the fulfilment by each State of its human rights obligations and commitments. A number of working groups have also been established by the Council (and the Commission), which meet regularly throughout the year to consider specific issues and report to the Council with legal opinions and recommendations.	Mandate: General Assembly resolution 60/251 Membership: 47 government officials Number of sessions in 2024: 3	254.8	254.8

Section 24 Human rights

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Human Rights Council Advisory Committee	The Human Rights Council, in its resolution 5/1, established the Human Rights Council Advisory Committee as its subsidiary body to undertake research and prepare advisory reports on pertinent human rights topics, as requested, and implement a complaint procedure, with the mandate to examine the communications received under the complaint procedure and to bring to the attention of the Council consistent patterns of gross and reliably attested violations of human rights and fundamental freedoms occurring in any part of the world and under any circumstances. The Committee will hold two sessions annually.	Mandate: Paragraph 6 of General Assembly resolution 60/251 Membership: 18 experts Number of sessions in 2024: 2	384.0	390.4
Office of the President of the Human Rights Council	The Office of the President of the Human Rights Council was established to formalize the ongoing procedural and organizational roles of the President, as described in the annex to Council resolution 5/1, to support the President in the fulfilment of the President's tasks and enhance efficiency and institutional memory in this regard.	Mandate: Human Rights Council decision 17/118	505.0	580.8

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 24.129 Extrabudgetary resources for this component are estimated at \$1,127,400 and would be used to provide support to the Subcommittee on Prevention of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.
- 24.130 The expected increase of \$53,700 is attributable to anticipated additional contributions and visits to be undertaken by the Subcommittee on Prevention of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.

Executive direction and management

- 24.131 The executive direction and management of OHCHR comprises the Executive Office of the United Nations High Commissioner for Human Rights; the Policy, Planning, Monitoring and Evaluation Service; the External Outreach Service; and the New York Office.
- 24.132 The High Commissioner is the United Nations official with principal responsibility for United Nations human rights activities, in accordance with the mandate entrusted to the High Commissioner by the General Assembly in its resolution 48/141. The High Commissioner advises the Secretary-General on the policies of the United Nations in the area of human rights and is responsible for coordinating human rights activities throughout the United Nations system and for rationalizing, adapting, strengthening and streamlining the United Nations system in the area of human rights, with a view to improving its efficiency and effectiveness.
- 24.133 The High Commissioner provides overall executive direction, management, policy guidance and leadership for the implementation of the United Nations human rights programme.
- 24.134 The Deputy High Commissioner assists the High Commissioner in the overall direction and management of OHCHR. In addition, the executive management responsibilities of the Deputy High Commissioner include the direct supervision of all OHCHR divisions in support of the High Commissioner and the direct supervision of OHCHR-wide functions centralized in executive direction and management and programme support. The Assistant Secretary-General, who is the head of the New York Office, allows for participation at the appropriate level in executive decision-making processes and ensures principal-level representation and access to high-level policy discussions, improving the overall efficiency and effectiveness of OHCHR.

Section 24 Human rights

24.135 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, OHCHR is integrating environmental management practices into its operations. In 2019, OHCHR achieved full “carbon neutral” status by offsetting the greenhouse gas emissions from its operations, based on 2018 data. The Office continued to reduce its greenhouse gas emissions by digitizing existing work processes; encouraging “soft commuting” and the use of OHCHR-supplied bicycles, rather than private vehicles, between office locations; measuring annual electricity use at headquarters in order to monitor and encourage reduced consumption; and increasing the use of desktop conferencing to reduce travel. OHCHR field presences have also been encouraged to calculate their own individual footprints and develop their own emission reduction plans.

24.136 Information on the timely submission of documentation and advance booking for air travel is reflected in table 24.28. OHCHR continues to use the available work processing data to monitor and manage compliance with the advance purchase of tickets for air travel policy.

24.137 The proposed regular budget resources for 2024 amount to \$10,543,700 and reflect an increase of \$2,289,600 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 24.109 (b) and 24.120 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 24.29 and figure 24.XVII.

Extrabudgetary resources

- 24.138 Extrabudgetary resources for this component are estimated at \$31,749,000 and would be used mainly to assist in the overall executive direction and management of OHCHR, including planning, coordination, management, fundraising and communications, and the assessment of the programme of work/strategic plan of the Office. The Executive Office and the New York Office are also provided with extrabudgetary resources in view of the overall coordination role of OHCHR and their efforts to further integrate human rights into relevant activities.
- 24.139 The expected increase of \$1,511,900 is attributable mainly to the need to provide coordination and management in line with the increased demand by Member States, as well as investments in outreach and communication.

Programme of work

**Subprogramme 1
 Human rights mainstreaming, right to development, and research and analysis**

- 24.140 The proposed regular budget resources for 2024 amount to \$17,741,400 and reflect a decrease of \$3,737,500 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 24.107 (b), 24.109 (c) and 24. 120 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 24.30 and figure 24.XVIII.

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

- 24.141 Other assessed resources for this subprogramme are estimated at \$511,600 and would provide for one temporary post and one general temporary assistance position. The estimated increase of \$13,500 is due to updated salary costs, as explained in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).
- 24.142 Extrabudgetary resources for this subprogramme are estimated at \$27,165,400 and would be used mainly to support research and analysis and develop practical tools to assist other United Nations agencies and programmes in integrating human rights into their activities and implement the right to development at the national level.
- 24.143 The expected increase of \$1,293,600 is attributable mainly to the expansion in demand for tools and training in the area of human rights.

Subprogramme 2 Supporting human rights treaty bodies

24.144 The proposed regular budget resources for 2024 amount to \$18,782,000 and reflect an increase of \$1,266,000 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 24.107 (c), 24.109 (d) and 24.120 (c). Additional details on the distribution of the proposed resources for 2024 are reflected in table 24.31 and figure 24.XIX.

Extrabudgetary resources

24.145 Extrabudgetary resources for this subprogramme are estimated at \$18,027,400 and would be used mainly to support the work of the treaty bodies, including the servicing and organization of their

Section 24 Human rights

meetings, and the preparation of missions and reports thereon, as well as providing grants to organizations to aid victims of torture and slavery.

- 24.146 The expected increase of \$858,400 is attributable mainly to increased demand for human rights work in the area of victims of torture and slavery.

**Subprogramme 3
Advisory services, technical cooperation and field activities**

- 24.147 The proposed regular budget resources for 2024 amount to \$45,253,100 and reflect a net decrease of \$37,937,200 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 24.107 (d), 24.109 (e) and 24.120 (d). Additional details on the distribution of the proposed resources for 2024 are reflected in table 24.32 and figure 24.XX.

Other assessed and extrabudgetary resources

- 24.149 Other assessed resources for this subprogramme are estimated at \$1,941,000 and would provide for seven temporary posts and one general temporary assistance position. The estimated increase of \$81,800 is due to updated salary costs, as explained in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).
- 24.150 Extrabudgetary resources for this subprogramme are estimated at \$174,626,400 and would be used mainly to support OHCHR work undertaken in the field at more than 100 locations worldwide, including through regional offices, country-specific offices established at the request of Governments, the placement of human rights advisers in United Nations country teams and complementary work undertaken by the human rights components of United Nations peacekeeping and special political missions. Furthermore, extrabudgetary resources would also enable continued support for project activities implemented from geographic desks at headquarters.
- 24.151 The expected increase of \$8,315,500 is attributable mainly to the increased demand from Member States to establish field presences, in accordance with agreements with host countries, the placement of human rights advisers as requested by United Nations country teams and an increase in training activities and seminars.

Subprogramme 4 Supporting the Human Rights Council, its subsidiary bodies and mechanisms

24.152 The proposed regular budget resources for 2024 amount to \$32,003,700 and reflect an increase of \$3,778,100 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 24.107 (e) and 24.120 (e). Additional details on the distribution of the proposed resources for 2024 are reflected in table 24.34 and figure 24.XXI.

Figure 24.XXI
Subprogramme 4: distribution of proposed resources for 2024 (before recosting)
(Number of posts/thousands of United States dollars)

Extrabudgetary resources

24.153 Extrabudgetary resources for this subprogramme are estimated at \$16,807,900 and would be used mainly to support of the work of the special procedure mandate holders, primarily the preparation of their missions and reports and to support the work of the Human Rights Council.

24.154 The expected increase of \$800,400 is attributable mainly to anticipated increased demand for activities related to the trust funds established by the Human Rights Council, such as training courses, fellowships and travel assistance for delegates from the least developed countries and small island developing States.

Programme support

24.155 In order for OHCHR to fully implement its mandate at both headquarters and its more than 100 field presences, Programme Support and Management Services provides support in the form of budgeting and financial management; recruitment and human resources management; safety and security, procurement, asset management and general logistical support for field activities; travel and information technology; and staff development and training. This includes support for staff members and members of intergovernmental and expert bodies, as well as for special rapporteurs, special representatives and independent experts, and the management of premises; and information management and technology support, including technical development and operational maintenance of the OHCHR websites, specialized databases and other systems.

24.156 The proposed regular budget resources for 2024 amount to \$5,726,800 and reflect an increase of \$734,100 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 24.109 (f) and 24.120 (f). Additional details on the distribution of the proposed resources for 2024 are reflected in table 24.35 and figure 24.XXII.

Figure 24.XXII

Programme support: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 24.157 Extrabudgetary resources for this component are estimated at \$8,242,500 and would be used to complement the capacity of Programme Support and Management Services to provide services such as human resources, information technology and financial, administrative and logistical support related to extrabudgetary activities at all OHCHR locations around the world.
- 24.158 The expected increase of \$392,500 is due mainly to an increased need for support activities in line with the expected increase in activities by the subprogrammes.

II. Committee on Missing Persons in Cyprus

- 24.159 The Committee on Missing Persons in Cyprus was established in 1981 by agreement between the Greek Cypriot and Turkish Cypriot communities in Cyprus under the auspices of the United Nations. The tripartite Committee is composed of two members appointed by the leaders of the two Cypriot communities and a Third Member (United Nations member) selected by the International Committee of the Red Cross (ICRC) and appointed by the Secretary-General.
- 24.160 The overall objective of the Committee on Missing Persons in Cyprus is to ascertain the fate of 2,002 persons reported missing following intercommunal fighting (1963–1964) as well as the events of July 1974. In addition, following an agreement between the leaders of both Cypriot communities, the Committee has been entrusted with a new role as of 2006: to investigate and excavate unknown burial sites, to recover and identify the remains of missing persons and then to hand them over to their families across the island for dignified burials. As of January 2023, the Committee had exhumed 1,196 persons and identified and returned the remains of 1,029 missing persons to their families, that is, just over half of all missing persons in Cyprus. As time passes, the Committee has increased its efforts to locate more burial sites by hiring and training new investigators and investing in modern technologies.
- 24.161 The role of the United Nations member in Committee is threefold: (a) mediation between the two Cypriot members and their respective authorities; (b) fundraising for the Committee’s operational budget (3.2 million euros in 2023); and (c) co-management of Committee’s operations. The United Nations is responsible only for the expenses of the third member, the third member’s Special Assistant and Administrative Assistant and the miscellaneous operating expenses of the office of the third member. The provisions in the proposed programme budget for 2024 reflect continuity in the Committee’s activities.
- 24.162 On the basis of existing information regarding suspected burial sites, the project is expected to continue at the current level of activity for at least another four to five years. It is assumed that even with a solution of the Cyprus problem, the involvement of the United Nations in the work of the Committee would likely need to continue for several years to come.
- 24.163 While the Committee’s scientific and technical operations are financed under a separate budget (using funds that were raised by the Committee and are financially managed by the United Nations Development Programme), the United Nations budget covers the three core responsibilities of the office of the third member listed above.
- 24.164 As the Committee’s secretariat, the office of the third member follows up on the implementation of all Committee decisions and leads the Committee project’s operational coordination. The office of the third member is accountable to the Department of Political and Peacebuilding Affairs of the United Nations Secretariat. In Cyprus, the third member also works in close consultation with the Special Representative of the Secretary-General in Cyprus. The office of the third member ensures the smooth running of the bicomunal component of the Committee project that employs more than 100 locally recruited Greek Cypriot and Turkish Cypriot scientists. An international forensic group as well as ICRC act as quality control mechanisms for the Committee laboratory staff members.
- 24.165 The proposed regular budget resources for 2024 amount to \$752,600 and reflect no change in the resource level compared with the appropriation for 2023. Additional details are reflected in table 24.36. The proposed resource level provides for the full, efficient and effective implementation of the mandate.

Annex I

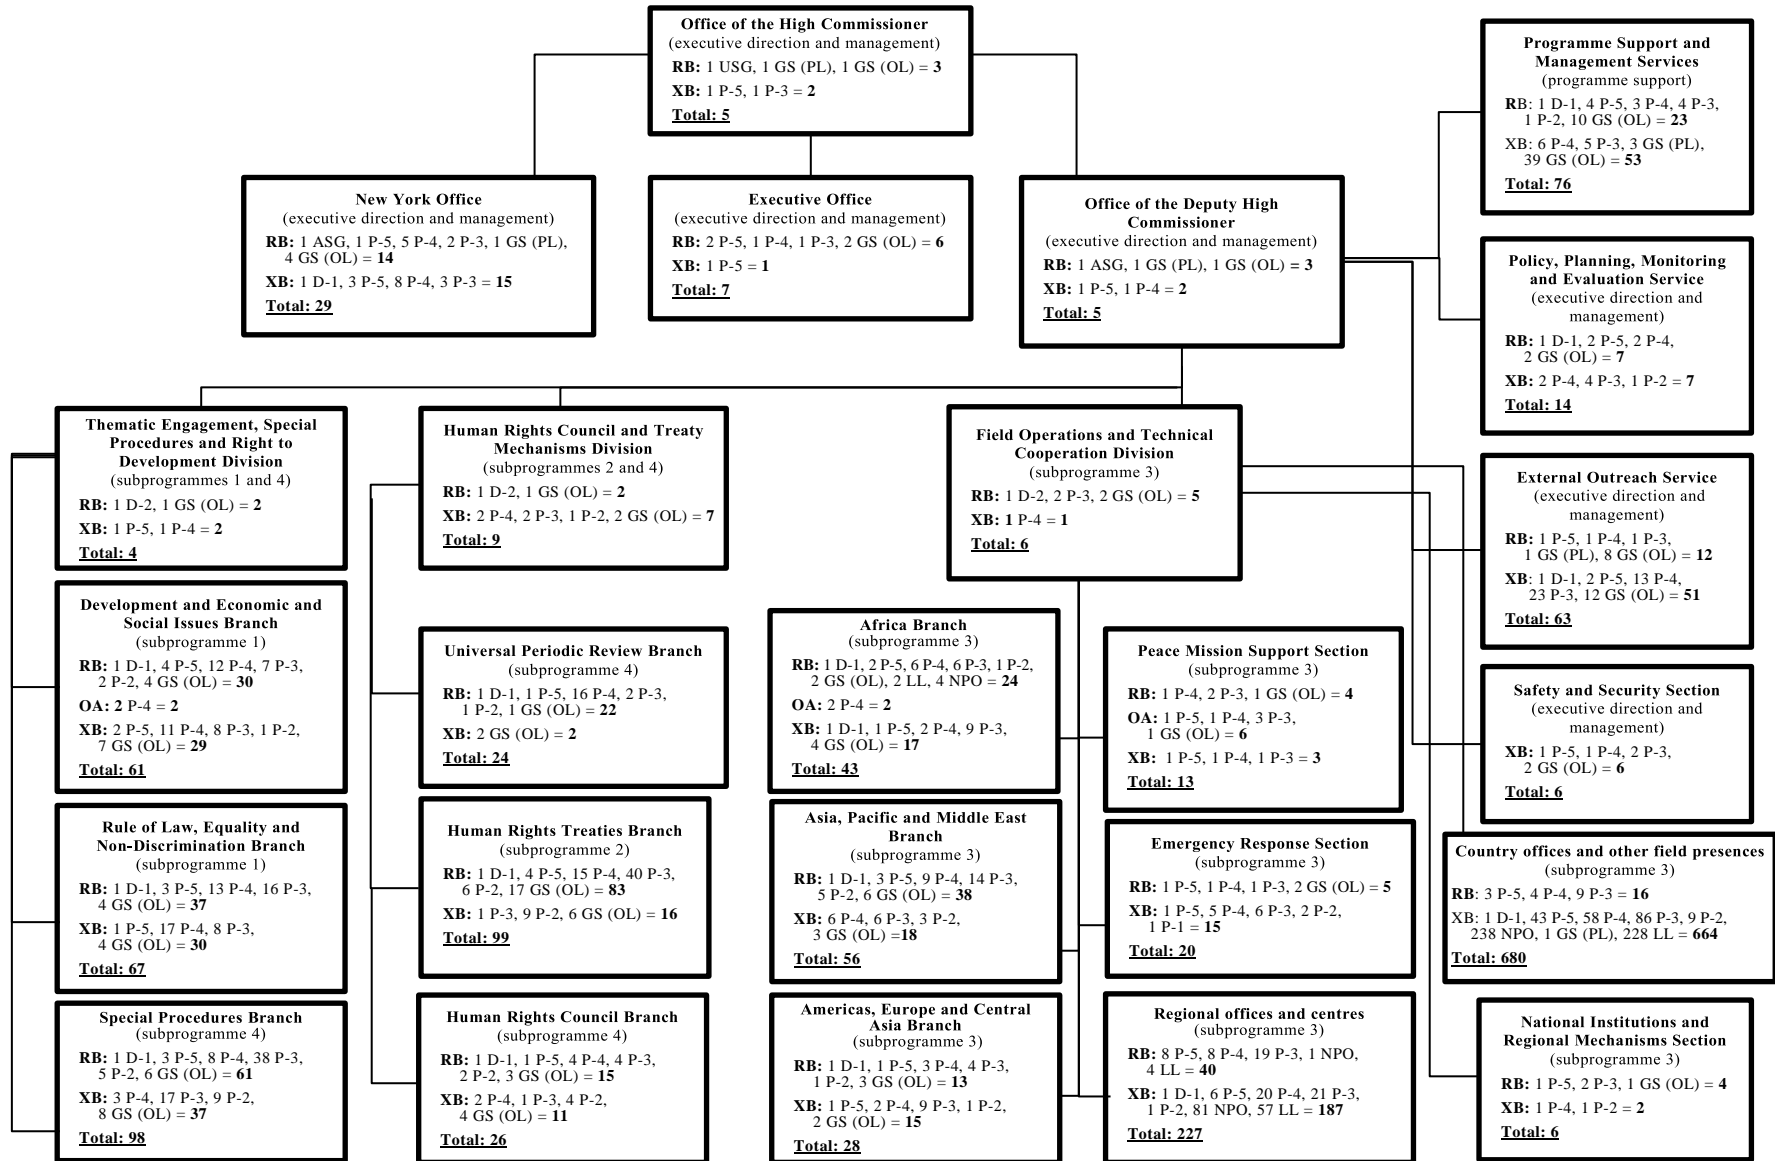

Organizational structure and post distribution for 2024

Two charts showing the organizational structure of the Office of the United Nations High Commissioner for Human Rights (OHCHR) are presented below. Chart A reproduces the approved organizational structure for 2023, as contained in document [A/77/6 \(Sect. 24\)](#). Chart B presents the proposed organizational structure for 2024.

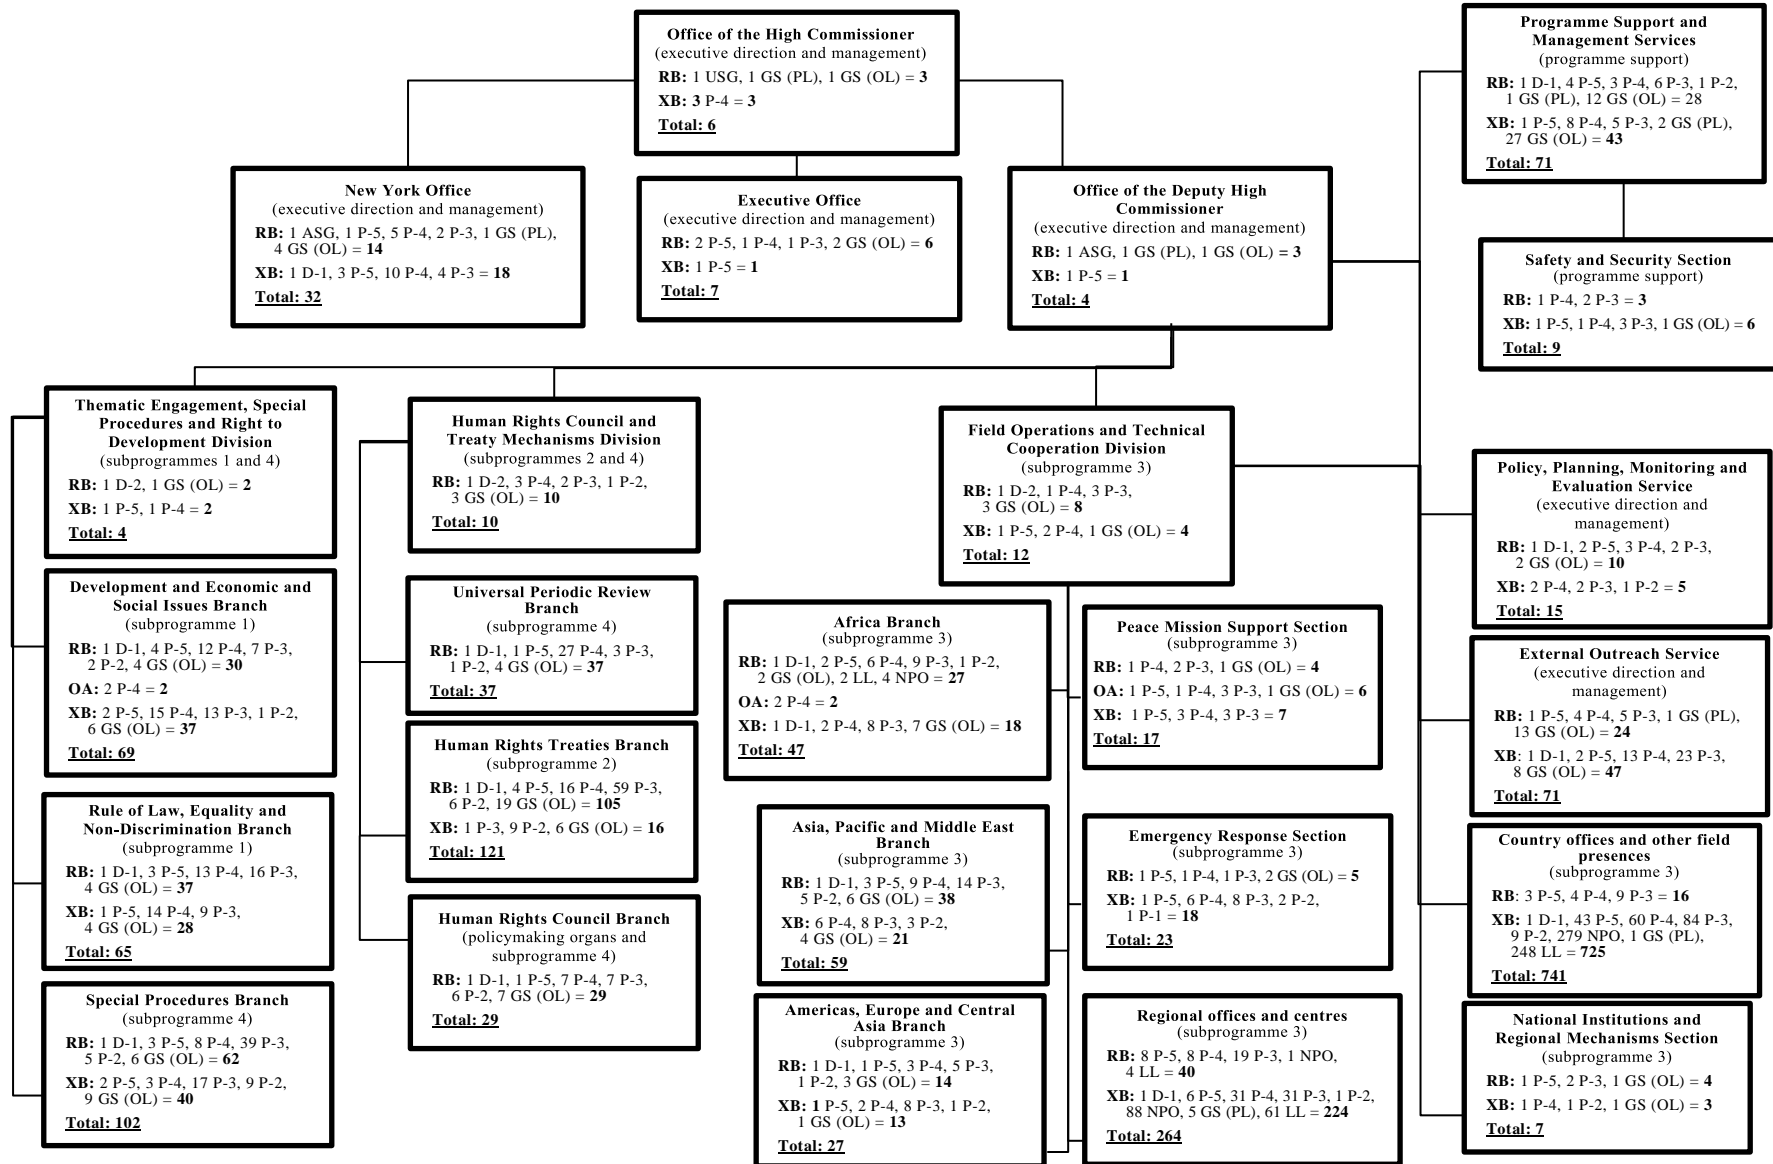

Justification for the proposed changes

In the approved organizational structure for 2023, the Safety and Security Section reports to the Office of the Deputy High Commissioner; in 2024, however, it is proposed that the Section report to Programme Support and Management Services. The proposed change in structure would enable the Deputy High Commissioner to focus more on programmatic activities by removing the direct report of a non-programmatic section. The move to reporting to Programme Support and Management Services would ensure that the work of the Safety and Security Section remains within the overall responsibility of the Deputy High Commissioner.

A. Approved organizational structure and post distribution for 2023

B. Proposed organizational structure and post distribution for 2024

Annex II

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/77/7)

The Advisory Committee considers that the current proposal still does not fully address the challenges related to the fragmentation of resources for the Human Rights Council mandates and is of the view that there is a need for a more in-depth examination of the criteria that would be used to identify the mandates whose requirements could be considered in the context of the proposed programme budget for section 24, and those that could be considered in the context of the revised estimates. The Committee therefore recommends a review of these criteria, which should include: (a) a detailed analysis of all mandates (specifically, date of commencement and duration of mandate), including all recurrent mandates that will continue to be presented in the context of the revised estimates report; (b) an overview of the budgetary impact, if available at the time, on commitment authorities that are presented to the Committee for its concurrence on a recurring basis, or are new requirements (if available); (c) mandates with full appropriation, and related expenditures, as a criterion in the selection of any “frontloaded” requirements; and (d) an explanation of any efficiencies and economies of scale as result of “frontloading” resources, including a reduction in the workload and related resources, if any, in the various offices and Member State organs needed for the preparation, consideration, vetting and processing of related documents (para. VI.10).

The Committee notes that any potential major changes pertaining to the scope and scale of mandates would potentially have an impact on the resource implications of those that are “frontloaded”, and trusts that a safeguarding mechanism, including the additional revision in the context of the revised estimates, should also be considered (para. VI.11).

The Advisory Committee considers that there is a need to address the challenges related to the fragmentation of the presentation of resources under section 24, but is of the view that a further assessment is necessary, based on clearly defined criteria and robust data analysis, including the duration and cycle of the human rights mandates, for consideration by the General Assembly in advance of any inclusion of anticipated proposed

A review of the criteria and the updated proposal for the consolidation of the proposed resources for the implementation of the mandates of the Human Rights Council, including a proposed safeguarding mechanism, are presented in annex IV to the present report.

resource requirements in a future programme budget proposal. Taking into consideration its observations and recommendations in the paragraphs above, the Committee therefore recommends against the proposed “frontloading” of the resource requirements for 2023 for Human Rights Council mandates at this stage. The Committee recommends a review of the resources required for 2023 for the 16 “frontloaded” mandates and, in accordance with established practice, the inclusion of the related resource requirements in the context of the report of the Secretary-General on the revised estimates resulting from resolutions and decisions adopted by the Council during 2022. The Committee recommends that the Assembly request the Secretary-General to provide an update thereon in the next submission of the proposed programme budget for section 24 (para. VI.16).

The Committee recommends that the Assembly request the Secretary-General to undertake an analysis, within existing resources, of the potential establishment of a core capacity for administrative, human resources, media and communications, archival, and security support, and to present a proposal, including any related staffing requirements, to the Assembly in the context of the next proposed programme budget submission (para. VI.36).

The Advisory Committee looks forward to an update on the efforts pertaining to the digitalization of the work of treaty bodies, including on the efficiencies gained, with a view to a reduction of the backlog, in the context of the next proposed programme budget submission (para. VI.39).

Advisory Committee on Administrative and Budgetary Questions
(A/76/7)

(With regard to a proposal by the Secretary-General to convert long-standing general temporary assistance positions to posts)

The Advisory Committee considers that, should an increased need for the aforementioned general temporary assistance positions result in more stable incumbency, their conversion should be proposed at the appropriate time (para. VI.6 (c) and (d)).

A proposal for a core capacity is presented in paragraphs 24.115 to 24.119 of the present report.

There is an exceptional level of backlog, which will be addressed by the six proposed temporary posts, who would provide support in expediting the processing of States parties’ reports and individual communications. The digitalization process for the portal for registering individual complaints and the case management system will bring further efficiencies and is in the testing phase, with full roll-out scheduled for the beginning of 2024.

The conversion of the general temporary assistance positions is proposed in the present report, as they have been consistently encumbered since the recommendation by the Advisory Committee in 2021.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-4	Establishment of Public Information Officer	New/expanded mandates: establishment of core capacity (public information)
	2	P-3	Establishment of Public Information Officers	To carry out functions including: replying to international, regional and national media inquiries; accompanying experts during country visits to manage communications needs before, during and after the visits; preparing statements for the presentation of mandated reports and updates to the Human Rights Council and other bodies; preparing written and audiovisual material, including for social media; organizing press briefings and press conferences as needed; and proactively explaining the mandate publicly to help to prevent and counter misinformation and the politicization of mandates. The Public Information Officer at the P-4 level would, in addition, manage and coordinate the work across various mechanisms, as well as carrying out crisis communications.
	2	P-4	Conversion of 1 Editor and 1 Documents Management Officer from XB	Other changes: supporting intergovernmental mechanisms To carry out the mandated activities of processing parliamentary (General Assembly and Human Rights Council) and treaty bodies' documentation.
	2	P-3	Conversion of 1 Public Information Officer and 1 Documents Management Officer from XB	
	5	GS (OL)	Conversion of 2 Documents Management Assistants and 3 Public Information Assistants from XB	
	1	P-4	Conversion of Programme Management Officer from XB	Other changes: evaluation To carry out evaluations of mandated activities, such as cross-cutting and programme-wide evaluations.
	2	P-3	Conversion of 1 Programme Management Officer and 1 Human Rights Officer from XB	
Subprogramme 2 Supporting human rights treaty bodies	6	P-3	Establishment of Human Rights Officers	New/expanded mandates: human rights treaty body system (General Assembly resolution 68/268)
	8	P-3	Conversion of Human Rights Officer general temporary assistance positions to posts	To support the 95.9 weeks of treaty body meetings, inter alia, by preparing States parties' reports, processing individual communications and supporting the various treaty body committees during their meetings.
	1	GS (OL)	Conversion of Programme Management Assistant general temporary assistance position to post	

Part VI Human rights and humanitarian affairs

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
	1	P-3	Establishment of Human Rights Officer	<p>New/expanded mandates: human rights treaty body system (General Assembly resolution 68/268) – Subcommittee on Prevention of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment/Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment</p> <p>To support the Subcommittee, a treaty body whose main mandated role is to carry out field visits. The post would assist in the preparation and conduct of field visits, conduct research on countries to be visited, liaise with State authorities and other stakeholders, arrange logistics for visits, assist experts in conducting visits and drafting visit reports, and follow up with State authorities and stakeholders on visit conclusions. The post would also provide substantive and technical assistance to the Subcommittee in its interactions with national preventive mechanisms, including drafting and reviewing documentation on the establishment and operation of such mechanisms and consulting with relevant United Nations partners, States parties and civil society actors on evaluating effectiveness and technical assistance needs.</p>
	1	P-4	Establishment of Human Rights Officer (temporary post)	<p>Other changes: support to the human rights treaty body system backlog</p> <p>The posts, located in the Human Rights Treaties Branch, led and coordinated by the Human Rights Officer (P-4), would carry out preparatory work related to the reduction of the backlog of the treaty bodies , such as compiling information from United Nations entities, national human rights institutions, non-governmental organizations and other stakeholders and preparing reviews of the pending reports.</p>
	3	P-3	Establishment of Human Rights Officers (temporary posts)	
	1	P-3	Establishment of Information Management Officer (temporary post)	
	1	GS (OL)	Establishment of Programme Management Assistant (temporary post)	
Subprogramme 3 Advisory services, technical cooperation and field activities	1	P-4	Establishment of Information Management Officer	<p>New/expanded mandates: establishment of core capacity (archival services)</p> <p>To provide operational expertise for efficient information management, secure maintenance of relevant information management systems, and management of information and evidence produced by investigative bodies, as well as archiving, to foster collaboration and information-sharing among investigators, experts and other relevant stakeholders outside of the Organization, in line with well-established legal protocols.</p>
	1	P-3	Establishment of Information Management Officer	<p>The post would ensure the safekeeping and continued accessibility of digital data and evidence in the archives of all current investigative bodies and those whose mandate had ended by performing maintenance, revision, freezing and unfreezing of information, and would respond to requests from judicial and other mechanisms, in full compliance with established legal protocols.</p>

Section 24 Human rights

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
	1	GS (OL)	Establishment of Information Management Assistant	To ensure the safe transfer, classification and keeping of physical archives and evidence.
	4	P-3	Conversion of Human Rights Officer general temporary assistance positions to posts	<p>Other changes: conversion of long-standing general temporary assistance positions</p> <p>The positions support the below special rapporteurs and independent experts in carrying out their mandates, inter alia, by assisting in the development of questionnaires for data collection, preparing recommendations for promoting related topics, ensuring that expertise feeds into the mandate holder's work, informing stakeholders about the human rights impact, and seeking views and contributions to investigate efforts towards the Sustainable Development Goals. The mandate holders are:</p> <ul style="list-style-type: none"> • The Special Rapporteur on the situation of human rights in Belarus • The Special Rapporteur on the situation of human rights in Eritrea • The Independent Expert on the situation of human rights in Mali • The Independent Expert on the situation of human rights in the Central African Republic
Subprogramme 4 Supporting the Human Rights Council, its subsidiary bodies and mechanisms	2	P-4	Conversion of Human Rights Officers from XB	<p>Other changes: support to intergovernmental mechanisms</p> <p>To carry out mandated activities supporting intergovernmental mechanisms, such as the Human Rights Council, the universal periodic review and the Human Rights Council Advisory Committee, owing to a significant increase in the number of Council meetings and activities related to those meetings, which represents an increased workload for the secretariat. The increases include a 23 per cent increase in the number of meetings; a 23 per cent increase in the number of speakers; a 93 per cent increase in the number of interactive dialogues; and a 50 per cent increase in the number of Human Rights Council panel discussions. In addition, there has been a 400 per cent increase in the number of investigative mechanisms and a 48 per cent increase in the number of special rapporteurs and independent experts. Furthermore, the number of written statements and video statements by non-governmental organizations has increased by 2,000 per cent.</p>
	2	P-4	Conversion of Programme Management Officers from XB	
	1	P-4	Conversion of Public Information Officer from XB	
	1	P-3	Conversion of Human Rights Officer from XB	
	1	P-3	Conversion of Information Systems Officer from XB	
	1	P-3	Conversion of Public Information Officer from XB	
	5	P-2/1	Conversion of Associate Human Rights Officers from XB	
	6	GS (OL)	Conversion of Programme Management Assistants from XB	
	1	GS (OL)	Conversion of Team Assistant from XB	
	1	P-3	Conversion of Human Rights Officer general temporary assistance position to post	<p>Other changes: conversion of long-standing general temporary assistance positions</p> <p>To support the Independent Expert on human rights and international solidarity in carrying out the Independent Expert's mandate.</p>

Part VI Human rights and humanitarian affairs

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Programme support	1	P-4	Establishment of Security Officer	New/expanded mandates: establishment of core capacity (safety and security)
	2	P-3	Establishment of Security Officer	To provide security services to support existing and future investigative bodies and other mandated activities where country visits, including to places of arbitrary detention, are required.
	2	P-3	Establishment of Administrative Officers	New/expanded mandates: establishment of core capacity (administration)
	2	GS (OL)	Establishment of Programme Management Assistants	To support administrative and logistical work to support investigative missions.
	1	GS (PL)	Conversion of Senior Finance and Budget Assistant from XB	Other changes: support to intergovernmental mechanisms To carry out mandated activities supporting intergovernmental mechanisms, such as the Human Rights Council, by preparing financial documents, including oral statements.

Abbreviations: GS (OL), General Service (Other level); GS (PL), General Service (Principal level); XB, extrabudgetary.

Annex IV

Updated proposal to consolidate the proposed resources to implement mandates of the Human Rights Council

Background

1. The Human Rights Council was established in 2006, and until 2008 individual revised estimates reports were submitted by the Secretary-General at multiple times during the year following the sessions of the Council. This resulted in a fragmented presentation of the budget for human rights, and in 2008, the Advisory Committee on Administrative and Budgetary Questions noted that the procedure contributed to a piecemeal approach to budgeting and that it should be improved ([A/62/7/Add.34](#), para. 8).
2. Following the recommendation of the Advisory Committee, the Secretary-General made proposals and the General Assembly, in its resolution [63/263](#), decided to maintain the practice of presenting resource requirements emanating from resolutions of the Human Rights Council in revised estimates reports, but that an annual report with regard to revised estimates would be submitted to the Assembly at its main session.
3. In 2022, the Advisory Committee again stressed that there was a need for further clarity with regard to the presentation of proposed resources emanating from mandates of the Human Rights Council and asked the Secretary-General to present further clarifications on the potential consolidation of resources for section 24 to the General Assembly during the consideration of the proposed programme budget for 2023 ([A/77/7](#), para. VI.5 (a)). During its consideration of the proposed budget, the Assembly requested information about the possibility of consolidation and the Secretary-General provided information on two approaches, one of which was used to consolidate resource requirements in the proposed programme budget for 2023.
4. In its first report on the proposed programme budget for 2023, the Advisory Committee recommended a review of the criteria that would be used to identify the mandates whose requirements could be considered in the context of the proposed programme budget for section 24, and those that could be considered in the context of the revised estimates, and that the review should include:
 - (a) A detailed analysis of all mandates (specifically, date of commencement and duration of mandate), including all recurrent mandates that would continue to be presented in the context of the revised estimates report;
 - (b) An overview of the budgetary impact, if available at the time, on commitment authorities that were presented to the Committee for its concurrence on a recurring basis, or were new requirements (if available);
 - (c) Mandates with full appropriation, and related expenditures, as a criterion in the selection of any “frontloaded” requirements;
 - (d) An explanation of any efficiencies and economies of scale as a result of “frontloading” resources, including a reduction in the workload and related resources, if any, in the various offices and Member State organs needed for the preparation, consideration, vetting and processing of related documents (*ibid.*, para. VI.10).
5. The Advisory Committee further trusted that a safeguarding mechanism, including the additional revision in the context of the revised estimates report, should also be considered (*ibid.*, para. VI.11).
6. The present annex responds to the above-mentioned recommendations of the Advisory Committee and presents the analysis and revised criteria for consolidation of the resources emanating from mandates of the Human Rights Council, as proposed by the Secretary-General for consideration and approval by the General Assembly. It should be noted that no resources related to the consolidation

are proposed for 2024. The revised criteria, if endorsed by the Assembly, would be applied from the 2025 budget period onwards.

Types of mandates

7. The review established the following types of mandates:
 - (a) Open-ended mandates: mandates without a specific end date or mandate period;
 - (b) Perennial mandates, or mandates of a perennial nature: mandates for special rapporteurs or independent experts, with a mandate period, most commonly one year or three years, that is subject to renewal;
 - (c) One-time mandates: mandates that entail the implementation of a specific activity or deliverable, such as organizing a panel or submitting a report on a specific topic;
 - (d) Renewable mandates: mandates with a mandate period, either explicit, such as one year, or implicit, such as the continuous implementation of an activity with a reporting requirement one year after the start of the mandate. Examples of renewable mandates include investigations (e.g. commissions and fact-finding missions), the provision of technical assistance and technical cooperation, and monitoring.
8. It should be noted that the perennial mandates meet the definition of renewable mandates as they do have a mandate period. However, the distinction is being made in the context of this review as perennial mandates for special rapporteurs and independent experts are already consolidated into the proposed programme budget, thus when the text refers to renewable mandates, it is intended to refer to those not already consolidated into the proposed programme budget (other than for 2023).

Analysis

9. The Secretary-General was requested by the General Assembly, which endorsed the recommendation of the Advisory Committee, to review the criteria, taking into account the date of commencement and duration of mandates, the budgetary impact, expenditure analysis, efficiencies and economies of scale.

Safeguarding mechanism

10. It is important to note that the renewable mandates are not open-ended and, for that reason, are expected to end at some point. In order to safeguard against the risk of overbudgeting and overspending by consolidating resource requirements in the proposed programme budget on the assumption of mandate renewal, the Secretariat would apply the following two mechanisms:
 - (a) **Mechanism to safeguard against the risk of overspending during a budget period.** The consolidation of resources implies that resources for mandates of a renewable nature would be appropriated on the assumption of a mandate extension. For mandates that have been consolidated but have not yet been extended through the full budget period, the Controller will proactively apply a block to the funds that relate to the period for which the mandate has not yet been extended. At the time of mandate renewal, the Controller would release the remaining funds; if a mandate is not renewed, the funds would remain blocked. This would ensure that the related approved appropriation is not used for other purposes. Any funds not spent would be reported by the Secretary-General in the context of the financial performance report on the programme budget;
 - (b) **Mechanism to safeguard against the risk of overbudgeting.** The consolidation of resources implies that resources for mandates of a renewable nature would be included in the proposed programme budget on the assumption of a mandate extension. For mandates that are terminated after the submission of the proposed programme budget and before the start of the budget period, the Secretary-General would include the corresponding negative amount in the report

on the revised estimates resulting from resolutions and decisions adopted by the Human Rights Council, to offset the amount requested in the proposed programme budget. The total amount requested by the Secretary-General thus would not include any resources for mandates that are terminated prior to the start of the budget period.

Commencement and duration

11. With regard to the date of commencement and duration, the analysis included a review of Human Rights Council mandates for investigations from 2006 to 2022, which included commissions, groups and teams of experts and fact-finding missions.
12. The analysis demonstrated that there has been a shift in how mandates are established and renewed during the review period. Mandates established during the first years of the period were mainly established for less than one year, and mandates established in the past several years were mainly established for one year or longer. The data also demonstrated that mandate periods of one year or longer were likely to be renewed, while shorter mandates had less likelihood of being renewed. For that reason, the proposed revised criteria for consolidation include a criterion of a mandate period of at least one year.
13. It was also noted that language related to the possible ending of mandates has been used by the Human Rights Council recently. Such language includes mention of, inter alia, “final extension”, “final report” or “non-renewable extension”, and allows the Office of the United Nations High Commissioner for Human Rights (OHCHR) to specifically identify mandates that will be extended for a final time. Inclusion of such language in the resolution correlates with the end date of the mandate (while it should be noted that even with such language, in a few exceptional cases, mandates have been renewed) and for that reason the proposed revised criteria for consolidation will not include any mandate where the resolution indicates non-extension.

Mandates of active investigations

14. Of the investigations analysed, 14 are currently active. The longest running investigation was established in 2011 and has been extended 12 times, and the second longest running investigation was established in 2016 and has been extended 8 times.
15. As mentioned in paragraph 12, over the years, the mandate period of established and renewed investigations has changed. Of the currently active mandates, three are open-ended, one has a three-year mandate period, three have a two-year mandate period, one has a mandate period of 18 months and six have a one-year mandate period.
16. The chart below displays the current investigative mandates adopted by the Human Rights Council and their respective mandate periods.

2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023

Past mandates of investigations

17. The analysis included past renewable mandates for investigations, to assess those mandates that would meet the consolidation criteria, as detailed below:
 - (a) The most recent mandate that ended was a fact-finding mission established in 2020. It was renewed in 2021 for nine months (Human Rights Council resolution [48/25](#)) and was last renewed in Council resolution [50/23](#) “for a final, non-extendable period of nine months”. The mandate would not have passed the proposed revised criteria of resolution language or duration of mandate and for that reason would not have been consolidated in the following budget;
 - (b) A commission established in 2016 (Human Rights Council resolution [33/24](#)) ended in October 2021. The previous extension was in 2020 for one year (Council resolution [45/19](#)), and the mandate would have met the criteria for consolidation. The mandate therefore would have been consolidated in the proposed programme budgets for 2021 and 2022. The 2021 budget period would have included three months of excess appropriation. With regard to the safeguarding mechanisms, the amount related to the 2022 proposed budget would have been offset in the report of the Secretary-General on revised estimates resulting from resolutions and decisions adopted by the Human Rights Council, and the amount for 2021 would remain blocked by the Controller to avoid overspending on the mandate (it should be noted, however, that the commission’s mandate was followed by the appointment of a special rapporteur and a request to continue monitoring until the special rapporteur was in place, entailing additional requirements in 2021, which could be covered by the unspent funds owing to the discontinuation of the commission);
 - (c) The mandate for a group of experts established in 2017 (Human Rights Council resolution [36/31](#)) ended in October 2021. The mandate was last renewed in Council resolution [45/15](#) for a period of one year and therefore would have been consolidated in the proposed programme budgets for 2021 and 2022. With regard to the safeguarding mechanisms, the amount related to the 2022 proposed budget would have been offset in the report of the Secretary-General on revised estimates resulting from resolutions and decisions adopted by the Human Rights Council, and the amount for 2021 would remain blocked by the Controller to avoid overspending on the mandate;
 - (d) A fact-finding mission established in March 2017 in Human Rights Council resolution [34/22](#) ended in October 2019. The mandate was extended for one year in September 2017, in Council decision [36/115](#), “to submit its final report”. The mandate would not have passed the proposed revised criteria of resolution language and for that reason would not have been consolidated in the proposed programme budget for the biennium 2018–2019. The mandate was followed by an expert mechanism, and was extended for a final time in Council resolution [39/2](#) “until the new mechanism is operational”. Again, the mandate would not have passed the proposed revised criteria of resolution language or duration of mandate and for that reason would not have been consolidated in the following proposed budget.

Removal of number of extensions as a criterion for consolidation

18. The criteria used for consolidation in the proposed programme budget for 2023 included an element of a minimum of extensions of two years for mandates that had not yet been extended into the proposed budget period. As part of the analysis for the current updated proposal, the Secretariat further analysed the number of prior extensions for a resolution and whether that same resolution was extended further. It could not be concluded, however, that two years (or any number of years) of prior extensions significantly correlated with subsequent renewals. For that reason, the proposed revised criteria do not include a criterion on a minimum number of past extensions.
19. Overall, since 2006, the number of active investigations has increased, as illustrated in figure I.

Figure I
Active investigations mandated by the Human Rights Council, by year

Budgetary impact

20. With regard to the budgetary impact, the current approach to budgeting (excluding 2023) provides a fragmented presentation, with the resource requirements presented in the proposed programme budgets, the revised estimates reports and the commitment authorities. This fragmentation has increased over the years, with only 73 per cent of the resource requirements presented to the General Assembly up front in the proposed programme budget. Figure II provides the distribution of the total amount of resources requested through the proposed programme budget, revised estimates reports and commitment authorities. The figure shows the trend towards increased fragmentation. It should be noted that in 2020, the coronavirus disease (COVID-19) pandemic contributed to the cancellation and modification of multiple activities; this enabled the Office to accommodate additional requirements within the approved appropriation without seeking additional commitment authorities. In 2023, requirements of approximately \$30 million were consolidated in the proposed programme budget, thereby reducing the amount requested through the revised estimates report and eliminating the need for commitment authorities during the same budget period.

Figure II
Fragmentation of the budget: distribution of proposed budget by source
 (Percentage)

21. The bar labelled “2023 alt” illustrates an alternative scenario, if the budget for 2023 had not been consolidated. It is estimated that in this scenario, the amount presented in the proposed programme budget would have accounted for less than 70 per cent of the total requested budget.

Expenditure and additional requirements

22. Information on expenditure related to mandates of a renewable nature, including investigations, provision of technical assistance and cooperation, and monitoring, is provided below. As can be seen in figure III, the trend points at increasing expenditure, and it should be noted that the level of expenditure in 2020 and 2021 was impacted by the COVID-19 pandemic, as well as the recruitment freeze put in place owing to the liquidity situation of the Organization during that period. These mandates are typically implemented by staff funded under general temporary assistance, characterized by a high turnover and therefore particularly impacted by the recruitment freeze.

Figure III
Expenditure related to renewable mandates

(United States dollars)

23. As a result of the consolidation of resource proposals in 2023, the first quarter indicates more robust implementation as increased expenditure related to the issuance of fixed-term contracts, more stable incumbency and earlier acquisition of goods and services was made possible by full-year consolidated funding.

Benefits, efficiencies and economies of scale

24. The consolidation of resource proposals brings multiple benefits, as outlined below:
- Member States have an improved and comprehensive picture of the totality of the proposed resources as they consider the proposed programme budget;
 - The consolidation of requirements results in greater clarity, reduced fragmentation and higher predictability of funding, the benefits of which have already been manifested in 2023, when fixed-term appointments were offered to staff instead of temporary contracts, with benefits in terms of better retention and institutional knowledge of a long-term workforce at OHCHR and in operational and administrative stability. The fixed-term contracts have attracted a wider pool of qualified candidates;
 - Mandate implementation is improved owing to the predictability of funding and continuity of work. The Office will not defer activities owing to the uncertainty of funding and will be better able to deliver on its mandates in a timely manner;
 - Efficiencies in administrative processes are gained as work related to hiring and re-hiring is avoided, which brings a significant benefit for the Office as a substantial overhead is spent in preparing job postings, assessing candidates and processing personnel actions;
 - Efficiencies in the budgetary process are gained as a lower number of commitment authorities are required. As a result of the consolidated budget for 2023, and as at the time of preparation of the present report, the Office estimates that it may not need to seek commitment authorities in 2023, whereas had the budget not been consolidated it is estimated that at least five commitment authorities would have been sought following the fifty-second session of the Human Rights Council. Commitment authorities create a significant workload, not only for OHCHR, but also for the Advisory Committee on Administrative and Budgetary Questions;

- (f) There would be a reduction in the potential charges against the contingency fund resulting from the consolidation. The potential charges against the contingency fund have exceeded the approved level for all the annual budget periods. For 2020, 2021 and 2022, revised estimates related to the Human Rights Council represented 53 per cent, 100 per cent and 80 per cent, respectively, of the potential charges over and above the approved level. In other words, if all revised estimates resources for human rights mandates had been consolidated for 2021, the potential charges against the contingency fund would not have exceeded the approved level. For 2023, if resources for human rights mandates had not been consolidated, an additional \$32 million would have been presented as a charge to the contingency fund, which would have increased the contingency fund overrun from \$66 million to \$98 million.

Comparison with other types of mandates

25. This section analyses how the renewable mandates of the Human Rights Council compare with other mandates that are subject to extension or renewal.
- (a) Mandates for peacekeeping missions: the proposed consolidation of resources for the mandates of the Human Rights Council is similar to the established budget practice for peacekeeping operations. In both cases, the budget proposals would cover the complete upcoming budget period (from 1 January to 31 December for the regular budget and from 1 July to 30 June for the peacekeeping budget) regardless of the actual mandate period, which is typically one year for peacekeeping missions and not aligned with the budget period. For example, a peacekeeping mission that has a mandate period of 1 April to 31 March is budgeted for the full period from 1 July to 30 June. This means that there is a budget and appropriation including the period from 1 April to 30 June, for which the peacekeeping operation does not yet have an extended mandate;
- (b) Mandates for special political missions mandates are similar to those of the peacekeeping missions, as they typically cover one year and are not aligned with the budget period, with the difference that the budget period for a special political mission runs from 1 January to 31 December, while the budget period for peacekeeping missions is from 1 July to 30 June. In the case of a special political mission with a mandate period, for example, from 1 August to 31 July, the budget is prepared and approved for the full period from 1 January to 31 December of the following year, on the budget assumption of two extensions; from August of the year preceding the budget period, and from August during the budget period;
- (c) Perennial mandates of the Human Rights Council are again similar to those of peacekeeping missions and special political missions. Their mandate periods are often not in alignment with the regular budget period, which is from 1 January to 31 December; the mandate periods typically align with the sessions of the Council, for example, starting on 1 April, 1 July or 1 October and ending on 31 March, 30 June or 30 September. The budgetary requirements for these perennial mandates are already included in the budget baseline for the full year in line with the established practice;
- (d) Renewable mandates of the Human Rights Council are similar to the types of mandates listed above. The mandate periods align more closely with the perennial mandates of the Council, in that their mandate periods typically start (with the exception of the very first establishment) in conjunction with the March, June and September sessions of the Council and usually commence from 1 April, 1 July or 1 October. They are typically larger than perennial mandates and smaller than peacekeeping missions and special political missions.
26. The table below compares different types of mandates against key mandate-related aspects and the treatment in the budget. As the table shows, the renewable mandates of the Human Rights Council share characteristics with peacekeeping mandates, mandates for special political missions and the Council's mandates of a perennial nature. Budgeting for the renewable mandates of the Council in the same way, if approved, would result in a consistent budgetary treatment of all mandates of a similar nature entrusted to different Secretariat entities.

Comparison of mandates subject to extension

	<i>Mandate duration (typical)</i>	<i>Mandate period covers full budget period</i>	<i>Subject to renewal</i>	<i>Included in the proposed budget</i>
Open-ended mandates (on any subject matter)	Continuing	Yes	n/a	Yes, for the full budget period
Peacekeeping	1 year	No	Yes	Yes, for the full budget period
Special political mission	1 year	No	Yes	Yes, for the full budget period
Perennial mandates	1 to 3 years	No	Yes	Yes, for the full budget period
Renewable mandates	1 year (up to 3 years)	No	Yes	No (for the period beyond the mandate)
One-time mandates	Within one year	n/a	No	No (for the period beyond the mandate)

Conclusion and proposal

27. The Secretariat conducted a thorough review of Human Rights Council mandates to address the challenges related to the fragmentation of the presentation of resources under section 24, with the aim of updating the criteria for the consolidation of resources, and with emphasis on the assessment areas as set out by the Advisory Committee on Administrative and Budgetary Questions in its first report on the proposed programme budget for 2023 (A/77/7, paras. VI.10 and VI.16) and endorsed by the General Assembly. On the basis of the findings of the review, including benefits realized by the consolidation of resources in the proposed programme budget for 2023, the Secretary-General proposes that the General Assembly, starting with the proposed programme budget for 2025, approve the consolidation of resources in the proposed programme budget for section 24 and related budget sections for Human Rights Council mandates of a renewable nature, defined as mandates with a defined mandate period, or continuous mandates with a request for periodic reporting to the Human Rights Council, provided that:
 - (a) The mandate period is at least 12 months;
 - (b) The resolution does not contain language indicating that the mandate will not be extended.
28. In line with paragraph VI.11 of the report of the Advisory Committee and as demonstrated in paragraph 10 above, in applying the above criteria, the following safeguarding mechanisms would avoid overbudgeting and overspending:
 - (a) The Controller shall proactively apply a funds block in Umoja of the resources related to mandate renewal upon the approval of the appropriation by the General Assembly, and lift the block only when the mandate is renewed. Any remaining blocked resources shall be reported to the General Assembly in the context of the financial performance report on the programme budget and returned to Member States accordingly;
 - (b) The Secretary-General shall adjust, as required, the request for future appropriations in his report on revised estimates resulting from resolutions and decisions adopted by the Human Rights Council. Resources consolidated in the proposed programme budget that are related to mandates that are not extended would be proposed for reduction in the same amount in the respective revised estimates report.

Foreword

More than 103 million^a people around the world have been forced to flee owing to armed conflict, persecution, discrimination and the climate emergency. Unless there is a dramatic reversal of the world's current trajectory, the human toll of forced displacement will continue in 2024 and beyond. The work of the Office of the United Nations High Commissioner for Refugees (UNHCR) to support States in protecting and assisting the refugees and other persons of concern will therefore remain both urgent and imperative.

UNHCR will strengthen protection and find solutions to displacement. It will respond to emergencies, carry out key protection activities, including registration, promote the inclusion of the refugees and other persons of concern in national services, strengthen livelihoods and deliver humanitarian assistance. Cash grants, which play a vital role in protection, will be increasingly used and will empower the displaced to determine how best to meet their own needs. Efforts by UNHCR to empower refugees to find solutions to their plight, including through resettlement and other complementary pathways to admission in third countries, and to remove obstacles to voluntary return will also continue to be critical in the coming year.

This work requires resources. The budget of UNHCR for 2024 reflects the growing number of people whom it serves and their expanding needs. While UNHCR is raising record levels of funding from diverse sources, shortfalls in voluntary contributions and earmarking, compounded by inflationary pressures, are hampering the scope of assistance and protection provided by UNHCR and compelling the organization to make difficult choices. I therefore appeal to the international community to step up its support to meet the needs of the people whom UNHCR serves.

(Signed) Filippo **Grandi**
United Nations High Commissioner for Refugees

^a This figure is as of June 2022, in line with UNHCR mid-year statistical trends:

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 25.1 The Office of the United Nations High Commissioner for Refugees (UNHCR) is responsible for leading and coordinating international action for the protection of refugees and the search for solutions to their plight. Its mandate derives from relevant General Assembly resolutions and decisions, including resolutions [319 A \(IV\)](#), by which the Assembly established the Office, and [428 \(V\)](#), which sets out its statute. In addition, the international legal basis for the protection of refugees finds its principal expression in the Convention relating to the Status of Refugees of 1951 and the Protocol relating to the Status of Refugees of 1967. UNHCR also has responsibilities for stateless persons pursuant to paragraph 6 (A) (ii) of its statute and article I (A) (2) of the 1951 Convention with regard to refugees who are stateless, as well as to various Assembly resolutions, including resolutions [3274 \(XXIX\)](#) and [31/36](#) in relation to the Convention relating to the Status of Stateless Persons of 1954 and the Convention on the Reduction of Statelessness of 1961. Over the years, the mandate of UNHCR has been extended to other groups through various Assembly resolutions. UNHCR provides protection and assistance to internally displaced persons, working in cooperation with the Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator and in the context of the collaborative response of the United Nations system, as well as with the consent of the State concerned.

Programme of work

International protection, durable solutions and assistance to refugees

Objective

- 25.2 The objective, to which this programme contributes, is to ensure international protection for refugees and other persons of concern and to achieve durable solutions to their plight, in cooperation with States and other organizations, without discrimination.

Strategy and external factors for 2024

- 25.3 To contribute to the objective, UNHCR will, in close cooperation with national and local authorities, partners in the United Nations system, non-governmental organizations, the private sector, academia, persons of concern and other relevant stakeholders:
- (a) Advocate adherence by States to relevant international and regional instruments, including the refugee and statelessness conventions;
 - (b) Work towards ensuring that the attainment of durable solutions to displacement influences broader development agendas and is central to peacebuilding efforts, and advocate and support measures that foster inclusion, including with respect to educational opportunities, and access to formal economies and the labour market;
 - (c) Support the implementation of the Global Compact on Refugees,¹ advocate greater financial support for refugee host countries and communities, follow up on pledges made at the Global

¹ See www.unhcr.org/the-global-compact-on-refugees.html.

- Refugee Forum² and redouble efforts to expand international cooperation and burden- and responsibility-sharing;
- (d) Promote adequate and proper reception conditions for asylum-seekers, alternatives to detention and the fair treatment of protection claims, strengthen and expand reception facilities, develop transitional accommodation and provide effective assistance, focusing on women and children and the needs of the most vulnerable;
 - (e) Raise awareness of protection principles and refugee law, and provide training for government officials and partners;
 - (f) Enhance protection and assistance for internally displaced persons under the Inter-Agency Standing Committee coordination system, in line with relevant General Assembly resolutions, including 76/167;
 - (g) Swiftly react to new humanitarian crises, including in conflict-affected areas, by providing humanitarian assistance through cash-based assistance, core relief items and shelter materials, as well as by monitoring and addressing protection risks and needs;
 - (h) Advocate the prevention and reduction of statelessness, as well as the protection of stateless persons, including by promoting accession to the relevant international instruments to facilitate the acquisition or confirmation of nationality by stateless persons.
- 25.4 By adopting inclusive and comprehensive approaches, UNHCR will contribute to relevant goals contained in the 2030 Agenda for Sustainable Development, ensuring that persons of concern are not left behind in development processes (A/AC.96/1224, paras. 54–57 and table I.17). This will help to promote the inclusion of persons of concern in national emergency preparedness and response plans.
- 25.5 The above-mentioned work is expected to result in:
- (a) Key advances in the response to refugee situations through more predictable and equitable burden- and responsibility-sharing, through a multi-stakeholder approach, consistent with the Global Compact on Refugees;
 - (b) Strengthened national asylum systems;
 - (c) Reinforced national systems for collecting data on stateless people, resulting in previously stateless individuals acquiring or confirming nationality;
 - (d) Improved access to protection and assistance for refugees and asylum-seekers through registration in the Population Registration and Identity Management Ecosystem;
 - (e) Strategically located global stockpiles being deployed to provide emergency assistance of up to 1 million people within the early onset of one or simultaneous emergencies.
- 25.6 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Security conditions shall allow UNHCR to carry out its programmes, although vigilance will be required owing to the presence of armed groups and violence against humanitarian workers;
 - (b) Humanitarian access will be granted in most countries, enabling UNHCR to respond to urgent protection and assistance needs;
 - (c) States and the international community at large will remain committed to contributing to and supporting implementation of the Global Compact on Refugees;
 - (d) Asylum space and policies will not restrict admissions further in some countries;

² See www.unhcr.org/global-refugee-forum.html.

- (e) Voluntary funding from donors will enable UNHCR to meet the budgeted needs of refugees and other persons of concern in full.
- 25.7 UNHCR will continue to engage a wide range of partners in programme delivery. UNHCR will remain committed to the principle of participation, ensuring that people who benefit from programme activities are consulted regarding decisions affecting their lives. Strong relationships with development actors, such as international financial institutions, development banks, government development agencies, public and private organizations, and civil society, will remain critical to mobilizing effective responses and pursuing solutions to forced displacement and statelessness.
- 25.8 With regard to inter-agency coordination and liaison, UNHCR will cooperate closely with resident coordinators and Humanitarian Coordinators to ensure that overarching protection and solution strategies are taken into account, including by supporting the implementation of the Secretary-General's action agenda on internal displacement. UNHCR will share its expertise and provide advice on protection matters to its United Nations partners, ensuring the centrality of protection throughout the humanitarian response. UNHCR will remain engaged in several relevant United Nations forums, including the Inter-Agency Standing Committee and the United Nations System Chief Executives Board for Coordination. It will also contribute to the quadrennial comprehensive policy review in support of the 2030 Agenda.
- 25.9 UNHCR integrates a gender perspective in its operational activities, deliverables and results, as appropriate. UNHCR will remain committed to a non-discriminatory approach. Specifically, UNHCR will focus on furthering gender equality, preventing, mitigating, and responding to sexual and gender-based violence and violence against children, including sexual violence, ensuring that survivors have access to health care, psychosocial support, safe shelter and legal aid, strengthening community engagement and prioritizing awareness-raising initiatives.
- 25.10 In line with the United Nations Disability Inclusion Strategy, UNHCR will advance its 2020–2024 action plan for disability inclusion. UNHCR will seek to identify persons of concern who are living with disabilities during registration exercises to better target their needs. UNHCR will engage with persons living with disabilities and relevant organizations, and advocate disability inclusion in humanitarian forums.

Impact of the pandemic and lessons learned

- 25.11 The continuation of the coronavirus disease (COVID-19) pandemic had an impact on the implementation of the mandate of UNHCR, in particular its ability to ensure protection and essential assistance to refugees, and other persons of concern in 2022. UNHCR addressed those challenges through advocacy, the use of technology, the swift identification of needs and the effective use of resources.
- 25.12 UNHCR has mainstreamed lessons learned and best practices from the COVID-19 pandemic. Evidence³ of the response during the pandemic shows that UNHCR was able to accelerate innovation, including by deploying teleworking arrangements, leveraging telehealth services, conducting refugee status determination remotely, providing education through distance learning and using digital and mobile cash payments, which made assistance increasingly accessible and secure. These lessons learned have been incorporated into programme practices.

³ See the joint evaluation of the protection of the rights of refugees during the COVID-19 pandemic, commissioned by the COVID-19 Global Evaluation Coalition, available at www.unhcr.org/joint-evaluation-protection-rights-refugees-during-covid-19-pandemic.html, and the UNHCR response to the COVID-19 pandemic: synthesis of evaluative evidence, available at <https://www.unhcr.org/unhcrs-response-covid-19-pandemic-synthesis-evaluative-evidence.html>.

Evaluation activities

- 25.13 The following evaluations completed in 2022 have guided the proposed programme plan for 2024:
- (a) Evaluations conducted by UNHCR:
 - (i) Strategic and centralized evaluations of UNHCR performance and results in several areas, including asylum capacity development, emergency responses, repatriation programmes and activities, and country strategy evaluations;
 - (ii) Evaluations of multi-country shelter and settlement programming, and the relevance and effectiveness of sports programming for refugee inclusion;
 - (iii) Evaluative synthesis of the response to the COVID-19 pandemic and accountability to affected people;
 - (b) Joint evaluation of the protection of the rights of refugees during the COVID-19 pandemic and inter-agency evaluation of the humanitarian response for Yemen.
- 25.14 The results and lessons learned of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, recommendations from the response to the pandemic (see para. 25.13 (a) (iii) above) have guided a sustained focus on innovation and the use of technology beyond the pandemic to ensure efficiencies. The evaluation of repatriation programmes and activities is shaping new UNHCR guidance on this programmatic area. The recommendations of the evaluation on strengthening national asylum systems (see para. 25.13 (a) (i) above) are guiding the new UNHCR approach to asylum capacity development, in which a greater focus is placed on partnerships, in particular with development actors, as well as on strengthening UNHCR capacities to better support States.
- 25.15 The following evaluations are planned for 2024:
- (a) Evaluations of strategies of selected countries;
 - (b) Selected thematic evaluations in respect to UNHCR results framework and policies;
 - (c) Evaluations managed by divisions, bureaux and country operations and/or where mandated in existing donor agreements.

Programme performance in 2022

Protection and solutions for persons of concern

- 25.16 The programme provided protection to some 13.3⁴ million persons of concern, including more than 5 million children. UNHCR responded to 52 emergencies in 32 countries including Afghanistan, Ethiopia, Myanmar and South Sudan, with armed conflict being the biggest driver of forced displacement. The level of displacement caused by the armed conflict in Ukraine required increased resources and sizeable staff deployments. Although funding received reached a record level, voluntary funding gaps and high earmarking remained.
- 25.17 UNHCR focused on services for the most vulnerable and prioritized access to health care, water and sanitation, protection, social services, shelter materials and core relief items, cash assistance and livelihood opportunities. UNHCR advocated the inclusion of the displaced in national protection systems and monitored such developments.
- 25.18 Progress towards the objective is presented in the performance measure below (see figure 25.I).

⁴ According to provisional data available as of June 2022; final data will be published in April 2023.

Figure 25.I

Performance measure: number of refugees and other persons of concern with improved living conditions and well-being from cash assistance and persons of concern who benefited from improved shelter (annual)

Planned results for 2024

Result 1: strengthened protection of and durable solutions for refugees and asylum-seekers through individual registration

Programme performance in 2022 and target for 2024

- 25.19 UNHCR strengthened its capacities for registration and documentation, resulting in 24.5 million individually registered refugees and asylum-seekers, which exceeded the planned target of 22 million.
- 25.20 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 25.II).

Figure 25.II

Performance measure: number of individually registered refugees and asylum-seekers (cumulative)

(Millions of persons)

Note: The figure for 2023 remain as originally planned in [A/77/6 \(Sect. 25\)](#).

Result 2: solutions through resettlement provided for refugees at risk**Programme performance in 2022 and target for 2024**

- 25.21 The programme's work contributed to more than 58,400 refugees being resettled, which did not meet the planned target of 90,000. The target was not met owing to multiple factors, including ongoing travel restrictions related to the COVID-19 pandemic and capacity and logistical limitations.
- 25.22 Progress towards the objective and the target for 2024 are shown in the performance measure below (see figure 25.III).

Figure 25.III

Performance measure: number of resettled refugees^a

^a The target relates to the number of refugees who depart for resettlement to third countries.

Result 3: enhanced inclusion of displaced people through digital cash payments**Proposed programme plan for 2024**

- 25.23 UNHCR continued to provide cash assistance, which has shown to be an efficient way to support immediate needs, address protection risks and complement Governments' efforts by contributing an additional safety net for vulnerable displaced people. On the basis of the current data for 2022, some 10 million displaced people benefited from cash assistance programmes.

Lessons learned and planned change

- 25.24 The lesson for UNHCR based on research was that financial and digital inclusion could have a tangible and positive impact on the persons of concern, empowering them, ensuring their integration in social and economic life and providing them with greater opportunities to become self-sufficient. In applying the lesson, UNHCR will strengthen its advocacy on financial and digital inclusion and strengthen partnerships with relevant actors, such as central banks, financial service providers, national telecommunication agencies and authorities responsible for adopting the necessary regulations. It will do so by leveraging its guidance on cash assistance and access to formal financial services, which is underpinned by the UNHCR policy on cash-based interventions 2022–2026.⁵ Where national regulations do not allow refugees to have full-fledged access to formal financial services, UNHCR will explore alternative means for delivering cash assistance, such as pre-paid cards or over-the-counter payments.
- 25.25 Expected progress towards the objective is presented in the performance measure below (see figure 25.IV).

⁵ Available at www.unhcr.org/61fbc91a4.

Humanitarian assistance missions (number of missions)	50	85	50	75
23. Humanitarian assistance missions undertaken by the UNHCR senior executive team	50	85	50	75

C. Substantive deliverables

Consultation, advice and advocacy: consultation and advice to Member States in all regions on the establishment of national legal and administrative frameworks in line with protection standards; and dialogues and consultations with partners, including non-governmental organizations, the private sector and Governments.

Direct service delivery: biometric registration for some 26.5 million refugees and asylum-seekers; cash assistance for some 10 million people across operations; the provision of shelter-related relief items for at least 500,000 people; protection services for approximately 13 million people; legal aid to facilitate the process of acquiring nationality or having it confirmed; essential health-care services for persons of concern and comprehensive health care for women and girls; and at least 70 per cent of UNHCR operations have functioning complaint and feedback mechanisms in place.

D. Communication deliverables

Outreach programmes, special events and information materials: global communications milestones such as World Refugee Day, focusing on advocacy for the rights of persons of concern; the Nansen Refugee Award, an annual event recognizing individuals and organizations for their outstanding work on behalf of the displaced; outreach programmes with at least 80 Goodwill Ambassadors and high-profile supporters covering all regions, including current and former refugee advocates, to raise awareness and amplify voices of the displaced on a global scale; and guidelines on ethical communications at UNHCR.

External and media relations: media briefings and press conferences for a geographically diverse global audience; and regular media engagements on protection and emergencies, involving senior management and expert voices on operations and thematic priorities.

Digital platforms and multimedia content: multimedia communications, including text, photos and videos shared on the UNHCR global website, highlighting the organization’s work for approximately 326,000 visitors per day; and UNHCR global social media content to raise awareness, build empathy, disseminate key UNHCR messages about its operations, needs and priorities, and facilitate fundraising from the private and public sector, with more than 45,000 shares per day and more than 1.2 million video views.

B. Proposed post and non-post resource requirements for 2024

Overview

25.28 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 25.2 to 25.4.

Table 25.2

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2022 expenditure ^a	2023 appropriation	Changes				2024 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other	Total Percentage	
Posts	676.0	699.8	–	–	–	–	699.8
Grants and contributions ^b	41 535.0	43 934.1	–	–	–	–	43 934.1
Total requirements	42 211.0	44 633.9	–	–	–	–	44 633.9

^a At the time of reporting, 2022 expenditure presented in this table and subsequent tables is not final and may be subject to adjustments that could result in minor differences between the information contained in the present report and the financial statements to be published by 31 March 2023.

^b Provides for the full cost of 218 temporary posts (4 D-2, 13 D-1, 20 P-5, 35 P-4, 24 P-3, 19 P-2, 24 General Service (Principal level) and 79 General Service (Other level)) and contributes to costs for contractual services, general operating expenditure and contributions to joint United Nations activities.

Note: The following abbreviations are used in tables and figures: ASG, Assistant Secretary-General; USG, Under-Secretary-General.

Part VI Human rights and humanitarian affairs

25.29 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 25.5 and 25.6.

25.30 As reflected in tables 25.5 (1) and 25.6 (1), the overall resources proposed for 2024 amount to \$44,633,900 before recosting, reflecting no change in the resource level compared with the appropriation for 2023. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 25.V
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 25.31 As reflected in tables 25.5 (2) and 25.6 (2), extrabudgetary resources amount to \$10,166,623,300. The resources are based on the UNHCR annual programme budget for 2023 (A/AC.96/1224), approved by the Executive Committee of UNHCR at its plenary session held in October 2022. The 2023 amount has been used as an estimate for 2024, pending the completion of the UNHCR annual planning exercise for 2024 in the second quarter of 2023.
- 25.32 Anticipated in-kind contributions with an estimated value of \$140,000,000, comprising goods to be distributed to beneficiaries, premises, utilities, transport and personnel provided free of charge, are anticipated for 2024.
- 25.33 The extrabudgetary resources under the present section are subject to the oversight of the UNHCR Executive Committee, a subsidiary organ of the General Assembly.

Executive direction and management

- 25.34 The High Commissioner (Under-Secretary-General), who is elected by the General Assembly on the nomination of the Secretary-General, provides the overall direction, supervision and management of activities. The functions of the High Commissioner are set out in the annex to the statute of UNHCR. In discharging these responsibilities, the High Commissioner is assisted by a Deputy High Commissioner (Assistant Secretary-General).
- 25.35 The executive direction and management component comprises the Executive Office, the Governance Service, the Evaluation Service, the Inspector General's Office, the Ethics Office, the UNHCR Liaison Office in New York and the Global Data Service. Reporting to the Deputy High Commissioner, and part of executive direction and management are Enterprise Risk Management, the Ombudsman's Office, the Legal Affairs Service, the Innovation Service and the Transformation and Change Service.
- 25.36 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, UNHCR is continuing its efforts to increase the use of sustainable energy in its operations.
- 25.37 Reporting on the management of carbon dioxide emissions is critical to the UNHCR goal of achieving greenhouse gas neutrality. Data collection systems have been deployed in 388 of the 427 offices worldwide where such installations are allowed to remotely monitor data on carbon dioxide. UNHCR is working on solarization for offices producing the largest amounts of carbon dioxide and aims to have 15 of these offices make the transition to clean energy in 2024. Satellite data tracking systems have been installed on 75 per cent of its vehicles to monitor their emissions, with the aim of increasing this to 79 per cent in 2024. UNHCR has also added electric vehicles to its global fleet and currently has 16 electric vehicles in use in headquarters, Jordan and Nepal.
- 25.38 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 25.8.
- 25.39 The 2022 compliance rate for advance booking of airline tickets remained at 16 per cent. This is owing mainly to the nature of UNHCR operations, which often require staff members to deploy at short notice to respond to urgent humanitarian needs, thus making advance travel plans challenging. The volume of travel has progressively returned to its pre-pandemic levels, owing in large part to emergency deployments to support its field support activities. Notwithstanding the above, significant progress has been achieved in the organization's road map aimed at streamlining travel processes and reducing administrative bottlenecks. The electronic mission request, including a simplified approval workflow, was successfully piloted in five operations and subsequently deployed at headquarters at the end of 2022. In parallel and as part of the cloud enterprise resource planning project, a new travel system will be implemented in July 2023. These initiatives, coupled with an effort to further raise the awareness of staff to the importance of advance travel planning, are expected to improve the compliance rate in the future.

Air tickets purchased at least 2 weeks before the commencement of travel	16	16	16	100	100

25.40 The proposed regular budget resources for 2024 amount to \$699,800 and reflect no change in the resource level, compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2023 are reflected in table 25.9.

Programme of work

25.41 In accordance with article 20 of the UNHCR statute, the Office of the High Commissioner is financed under the budget of the United Nations. Unless the General Assembly decides otherwise, no expenditure other than administrative expenditure relating to the functioning of the Office of the High Commissioner shall be borne on the budget of the United Nations. All other expenditure relating to the activities of the High Commissioner shall be financed through voluntary contributions. Accordingly, no regular budget resources are proposed under the programme of work component.

25.42 Extrabudgetary resources amount to \$8,928,284,300. The resources would cover the cost of country operations, projects and programmes necessary to fulfil UNHCR mandates. Such work includes providing international protection for refugees and seeking permanent solutions to their plight.

Programme support

25.43 The programme support component includes the divisions at headquarters, regional bureaus and some parts of country operations, which develop, formulate, direct and administer programmes and provide programme evaluation and oversight. They also discharge functions with regard to information technology, financial management, human resources management and administration.

25.44 The regular budget provides a grant to support the UNHCR programme support activities. The proposed regular budget resources for the programme support component amount to \$43,934,100,

reflecting no change, compared with the appropriation for 2023. The grant is intended to cover the cost of 218 temporary posts and part of the related non-post requirements at UNHCR headquarters.

25.45 The provision of a grant for the administrative expenditure of the Office rather than as post and non-post resources was initiated in the biennium 2002–2003 (A/56/6 (Sect. 23), para. 23.20) to simplify the work of the Office by eliminating the need for separate administrative procedures in respect of a portion of its administrative posts. It was subject to review after three bienniums. The results of a review of the lump-sum arrangement and the lessons learned from the full three bienniums of 2002–2003, 2004–2005 and 2006–2007 were reported to the General Assembly at its sixty-third session, in 2008 (see A/63/537). The Assembly, in section VII of its resolution 63/263, endorsed the maintenance of the lump-sum arrangement for the funding of UNHCR in future budget presentations of the proposed programme budget, as recommended by the Advisory Committee on Administrative and Budgetary Questions (A/63/616, para. 10).

25.46 Extrabudgetary resources for this component amount to \$1,238,339,000.

Annex I

Organizational structure and post distribution for 2024

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); NPO, National Professional Officer; RB, regular budget; UNHCR, Office of the United Nations High Commissioner for Refugees; USG, Under-Secretary-General; XB, extrabudgetary.

Note: “RB post” indicates one of two posts funded under the regular budget; “RB*” indicates posts that are financed by the grant from the regular budget, shown under the regular budget heading for indicative purposes; the XB posts under headquarters divisions and some services and units include posts located in the Global Service Centres in Budapest and Copenhagen; all posts are calculated in person years.

Annex II

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee notes with concern that the proposed programme budgets for section 25 have still not complied with the provisions of General Assembly resolutions [76/245](#) and [75/252](#). The Committee reiterates its previous recommendation, as approved by the Assembly in the aforementioned resolutions, that the programme budget proposals for section 25 should present a justification for the use of regular budget contributions, in particular for the portion intended for the lump-sum grant, including details of the composition and functions of the 218 posts, the incumbency status, as well as a breakdown of related non-post resources under general operating expenses ([A/76/7](#) and [A/76/7/Corr.1](#), para. VI.34, and [A/75/7](#) and [A/75/7/Corr.1](#), para. VI.26) (para. VI.48).

In accordance with article 20 of the UNHCR statute, unless the General Assembly subsequently decides otherwise, no expenditure, other than administrative expenditure relating to the functioning of the Office, is borne by the budget of the United Nations, and all other expenditure relating to the activities of UNHCR is to be financed through voluntary contributions.

Prior to the programme budget for the biennium 2002–2003, UNHCR had presented its resource requirements under the regular budget for its posts and the related non-post requirements and was subject to the same budgetary process as other sections of the programme budget for regular budget post and non-post requirements.

Starting from the biennium 2002–2003, the regular budget provided for: (a) two posts, namely, those of High Commissioner and Deputy High Commissioner, and (b) a lump-sum grant amount for a portion of the other management- and administration-related costs of UNHCR.

UNHCR grant arrangement was initially deployed on a trial basis, subject to a review after three bienniums. Upon completion of the trial period in 2002–2003, 2004–2005 and 2006–2007, the Secretary-General presented the results of the review of the lump-sum arrangement to the General Assembly at its sixty-third session, in 2008 ([A/63/537](#)). In section VII of its resolution [63/263](#), the Assembly endorsed the maintenance of the lump-sum arrangement for the funding of UNHCR in future budget presentations, as recommended by the Advisory Committee on Administrative and Budgetary Questions in paragraph 10 of its report [A/63/616](#).

While the grant represents the equivalent of 218 posts and non-post resources, the composition of the grant, including the level and number of posts and the distribution between posts and non-post resources, is under the authority of UNHCR, within the parameter of being used only for administrative expenditure, as stipulated in the UNHCR statute. In this regard, the grant arrangement is different from those budget

Brief description of the recommendation

Action taken to implement the recommendation

sections for which the General Assembly approves a staffing table, with the specific number and level of posts, and for which the Assembly considers the appropriate resource level for each individual non-post budget line.

These funding arrangements have simplified the budget formulation and implementation process for UNHCR by eliminating the need for separate administrative procedures in respect of the regular budget share of the administrative needs. Given that the regular budget represents only a fraction (currently estimated at 0.5 per cent of the UNHCR overall budget for 2023), the grant arrangement has been well suited to the highly operational nature of UNHCR activities, providing the necessary efficiency and flexibility while providing transparency and respecting the limits of an overall approved grant amount.

The 218 temporary posts are presented in the programme budget submission (supplementary information) by organizational unit and grade. They perform management and administration functions in executive direction and management (Inspector General's Office, the Legal Affairs Service, the Ombudsman's Office, the Ethics Office, the Transformation and Change Service, the Governance Service, the Investigation Service, the Evaluation Service, Enterprise Risk Management), in the Division of External Relations, in the Division of Information Systems and Telecommunications, in the Division of Human Resources, in the Division of Financial and Administrative Management and in the Division of Strategic Planning and Results.

General Assembly

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

Foreword

The United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) is mandated by the General Assembly to provide assistance and protection to 5.9 million registered Palestine refugees to help them to achieve their full human potential, pending a just and lasting solution to their plight.

In December 2022, Member States signalled their strong political support for UNRWA through the renewal of its mandate until 2025. In the eyes of Palestine refugees, this decision was not just a procedural endorsement of the Agency's operations but represented a commitment that their protection and the fulfilment of their most basic needs would continue to be supported.

The importance of meeting these basic needs has increased sharply in recent years, driven by the closures in Gaza, protracted armed conflict in the Syrian Arab Republic, the occupation of the West Bank, including East Jerusalem, the deteriorating socioeconomic situation in Lebanon and, more recently, the socioeconomic ramifications of the coronavirus disease and other global crises, which have led to increases in food and fuel prices. Together, these factors have deepened the poverty, destitution and sense of despair experienced by Palestine refugees in all fields of operation.

In this context, there is overwhelming pressure on UNRWA to do more, stretching an agency already beset with repeated liquidity crises and chronic underfunding. The proposed programme budget for 2024 offers an opportunity for Member States to match the resources needed for UNRWA to fulfil its mandate with the political commitment that was recently repledged.

(Signed) Philippe **Lazzarini**
Commissioner-General, United Nations Relief and Works Agency
for Palestine Refugees in the Near East

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 26.1 The United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) is responsible for providing assistance and protection to Palestine refugees. The mandate derives from the priorities established in relevant General Assembly resolutions, including resolution 302 (IV) of 1949, by which the Agency was established. Since starting operations in 1950, the Agency has adapted its programmes to meet the increasingly complex needs of Palestine refugees and to provide them with a measure of protection, relief and stability amid chronic uncertainty in the region.

Strategy and external factors for 2024

- 26.2 The mission of UNRWA is to help Palestine refugees to achieve their full potential in human development under the difficult circumstances in which they live. In line with that mission, the Agency works towards six programmatic objectives within its new strategic plan for the period 2023–2028: (a) Palestine refugees are protected through the realization of their rights under international law; (b) Palestine refugees lead healthy lives; (c) Palestine refugees complete inclusive and equitable quality basic education; (d) Palestine refugees have improved livelihood opportunities; (e) Palestine refugees are able to meet their basic human needs of shelter, water and sanitation; and (f) the most vulnerable Palestine refugees have access to effective social assistance.
- 26.3 In accordance with the strategic plan for 2023–2028, the proposed programme budget for 2024 has been updated to reflect the above-mentioned programmatic objectives.
- 26.4 The Agency aims to achieve its goals by maintaining and improving the provision of education, health, relief and social services, livelihoods, including microfinance assistance, infrastructure and camp improvement and protection for the benefit of 5.9 million registered Palestine refugees in Gaza, Jordan, Lebanon, the Syrian Arab Republic and the West Bank, including East Jerusalem. Innovation, modernization and digital transformation will continue to play a pivotal role across UNRWA programming. Digital service delivery will improve the quality of services through greater integration across programmes, faster delivery of services, increased access to information for refugees and greater resilience to external shocks. For example, this will be particularly relevant for the Agency as the provider of education to over half a million children. UNRWA has a responsibility to ensure that the next generation of Palestine refugees has the digital skills to succeed. At the same time, the Agency will ensure that the challenges associated with digital learning, including Internet access and the availability of devices, are addressed, ensuring that no student is left behind.
- 26.5 With regard to cooperation with other entities at the global, regional, national and local levels, the Agency will continue to maintain and strengthen a wide range of partnerships that reflect its commitment to Sustainable Development Goal 17, including with host and donor Governments, non-governmental organizations, UNRWA national committees and the private sector, which assist the Agency in delivering its mandate. In addition, enhanced and new partnerships with international and national non-governmental organizations and community-based organizations will maximize the UNRWA technical capacity to deliver more effective and efficient results in key service delivery areas, including protection, health, poverty alleviation for the most vulnerable and disability inclusion.
- 26.6 With regard to inter-agency coordination and liaison, UNRWA will continue to both maintain and expand partnerships with other United Nations entities. Many of these partnerships, such as those with the United Nations Educational, Scientific and Cultural Organization and the World Health Organization, date to the Agency's founding in 1949. Inter-agency partners have helped to establish

norms for UNRWA education and health programming and will continue to furnish strategic assistance. The Agency is also active with United Nations country teams and their member entities in its fields of operation to improve synergies, in particular in relation to front-line service delivery.

- 26.7 With regard to the external factors, UNRWA considered applicable risks identified in its risk register and, accordingly, the overall plan for 2024 is based on the following planning assumptions:
- (a) Instability and, in some cases, unrest and armed conflict characterize the macroenvironment throughout the year;
 - (b) Demand for Agency emergency assistance increases, combined with increasing demand for core services;
 - (c) Hostility towards and prejudice against Palestine refugees in host communities, where this exists, does not increase;
 - (d) The closure of Gaza does not tighten;
 - (e) Security-related movement restrictions in the occupied Palestinian territory do not increase;
 - (f) Enrolled populations in UNRWA schools do not increase beyond projections based on historical trends;
 - (g) The infrastructure, installations and housing in the Agency's fields of operation do not sustain damage as a result of humanitarian crises;
 - (h) UNRWA can raise sufficient funds.
- 26.8 UNRWA integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, under subprogramme 1, survivors of sexual and gender-based violence will receive support from Agency social workers, while, under subprogramme 2, women and men and girls and boys will have equal access to primary health care. In addition, under subprogramme 3, all Palestine refugee children and young people will enjoy, on a non-discriminatory basis, an equal opportunity to learn in UNRWA schools and, under subprogramme 4, women will be supported in developing their full potential through equal access to technical, vocational and higher education in Agency institutions. Under subprogramme 5, UNRWA will ensure that shelters rehabilitated for Palestine refugees incorporate sex-segregated rooms, where required, and will promote the right of women to own and control property; under subprogramme 6, social transfers will be targeted to vulnerable segments of the Palestine refugee population, including female-headed households.
- 26.9 In line with the United Nations Disability Inclusion Strategy, the Agency will: (a) reconstruct and rehabilitate Agency installations, especially health centres under subprogramme 2, schools under subprogramme 3 and vocational training centres under subprogramme 4, to make them accessible to persons with disabilities; (b) conduct health screening for Palestine refugee infants and children to identify and extend support for those with disabilities under subprogramme 2; (c) support the inclusion of students with disabilities in the UNRWA education system, including through the use of accessible technology, in line with the Agency's inclusive education approach under subprogramme 3; and (d) conduct awareness-raising activities to reduce stigma and foster inclusion at the household and community levels for Palestine refugees with disabilities under subprogramme 1.

Impact of the pandemic and lessons learned

- 26.10 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular: (a) increased demand for protection services provided under subprogramme 1 as a result of the socioeconomic pressures caused by the pandemic; (b) the application of enhanced cleaning protocols in Agency health centres, schools and vocational training centres under subprogrammes 2, 3 and 4; and (c) an increased need for measures to address learning loss for students enrolled in UNRWA schools following two years of disrupted learning under subprogramme 3.

26.11 The Agency continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including through the development of an interactive learning management system to support a virtual learning environment that facilitates: (a) safe, two-way communication between students, teachers and Agency education staff; (b) the tracking of student engagement and progress; (c) online student assessment; and (d) enhanced remote and in-school learning. The learning management system will build on lessons learned from the introduction in 2021 of the UNRWA-wide digital learning platform, which was established during the pandemic to act as a content repository, enabling students, parents and Agency education staff to view and download self-learning materials at any time, thereby ensuring the continuity of learning during periods of school closure.

Legislative mandates

26.12 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

302 (IV), 74/83, 75/93, 76/77	Assistance to Palestine refugees	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
3331 B (XXIX)	United Nations Relief and Works Agency for Palestine Refugees in the Near East	74/84	Persons displaced as a result of the June 1967 and subsequent hostilities
65/272	Report of the Secretary-General on the strengthening of the management capacity of the United Nations Relief and Works Agency for Palestine Refugees in the Near East	77/122	Operations of the United Nations Relief and Works Agency for Palestine Refugees in the Near East

Deliverables

26.13 Table 26.1 lists all cross-cutting deliverables of the programme.

Evaluation activities

26.14 Owing to resource constraints, no evaluations pertaining to the Agency’s programme budget activities were completed in 2022.

- 26.15 However, the results and lessons learned of the evaluations completed in 2021 have been taken into account for the proposed programme plan for 2024. For example, in response to findings from the evaluation of the family health team model, one of the lessons for subprogramme 2 was that the awareness of and accessibility to services for survivors of sexual and gender-based violence available at Agency health centres needed to be improved. In response, the subprogramme introduced a technical instruction aimed at strengthening the screening of patients to identify survivors of sexual and gender-based violence and the training and capacity-building of medical officers to identify and support survivors.
- 26.16 The following evaluations, to be conducted by UNRWA, are planned for 2024:
- (a) Evaluation of social work reform;
 - (b) Evaluation of technical and vocational education services;
 - (c) Evaluation of infrastructure and camp improvement services.

Programme of work

Subprogramme 1

Palestine refugees are protected through the realization of their rights under international law

Objective

- 26.17 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees are protected through the realization of their rights under international law.

Strategy

- 26.18 To contribute to the objective, the subprogramme will:
- (a) Systematically mainstream cross-cutting issues that contribute to addressing protection risk and vulnerability, including gender, disability and age, across all UNRWA systems, processes, methodologies, programming and service delivery;
 - (b) Strengthen the protection of vulnerable and at-risk groups by monitoring and documenting protection incidents and trends, engaging community members in support of self-protection and providing access to medical, legal and/or psychosocial counselling and services for survivors of protection violations, either directly or through referrals to external partners;
 - (c) Advocate for the respect, protection and fulfilment of the rights of Palestine refugees under international law by engaging in evidence-based private and public advocacy with duty bearers, relevant external actors and other United Nations entities, including engagement with international human rights mechanisms, in accordance with resolution [77/122](#);
 - (d) Ensure that UNRWA services are equally accessible to Palestine refugee women and girls, provide a holistic range of programming, including reproductive and maternal health services, skills development and livelihood support for women and girls and gender-responsive education services, and advocate with duty bearers to ensure the safety of women and girls.
- 26.19 In doing so, the subprogramme will contribute to making progress towards the achievement of Goals 1, 3, 4, 5, 8 10 and 16.

26.20 The above-mentioned work is expected to result in:

- (a) Safe and dignified access to UNRWA services for all Palestine refugees, including persons with disabilities, older persons, women and girls, undocumented married women and girls and households headed by women, children and persons with disabilities;
- (b) Support for meeting the protection needs of Palestine refugees, in particular the most vulnerable and at-risk groups and individuals;
- (c) Respect for the rights of Palestine refugees under international law, creating a better protection environment;
- (d) Empowerment of Palestine refugee women and girls and their access to services that contribute to gender equality.

Programme performance in 2022

Rights of Palestine refugees realized

26.21 The Agency's advocacy activities are aimed at strengthening and protecting the rights of Palestine refugees under international law through the prevention of and response to human rights violations and other protection concerns. In 2022, the subprogramme advocated for the rights of Palestine refugees under international law who faced violations of or risks to the enjoyment of their rights by monitoring, documenting and raising key protection concerns through constructive engagement with duty bearers and other external stakeholders. Through the issuance of letters, bilateral meetings, briefings and reports, the subprogramme engaged with duty bearers, including host authorities, United Nations entities, civil society and the international community, to promote compliance with international law and secure remedial action for Palestine refugees whose rights had been impacted. The subprogramme also consistently engaged with and contributed to United Nations international human rights mechanisms to provide information and case studies on human rights violations and other protection concerns affecting Palestine refugees in UNRWA fields of operation, in particular where Palestine refugees were disproportionately affected compared with the rest of the local population.

26.22 Progress towards the objective is presented in the performance measure below (see figure 26.I).

Figure 26.I

Performance measure: number of protection advocacy interventions to duty bearers and external actors

Planned results for 2024

Result 1: strengthened protection for Palestine refugees through compliance monitoring and continuous improvement

Programme performance in 2022 and target for 2024

- 26.23 The subprogramme’s work contributed to 68 per cent of protection audit recommendations being implemented by UNRWA field offices, which exceeded the planned target of 46 per cent.
- 26.24 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 26.II).

Figure 26.II

Performance measure: percentage of protection audit recommendations implemented by field offices (cumulative)¹

Result 2: mental health and psychosocial issues among Palestine refugees addressed

Programme performance in 2022 and target for 2024

- 26.25 The subprogramme’s work contributed to 98.8 per cent of Palestine refugees identified as having mental health and psychosocial issues receiving assistance, which did not meet the planned target of 100 per cent. The target was not met owing to social stigma, which led to some patients diagnosed with mental health and psychosocial issues declining assistance.
- 26.26 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 26.III).

¹ It should be noted that the actual percentages for 2020, 2021 and 2022 pertain to the cumulative implementation rate of protection audit recommendations made as a result of the 2018 protection audit. The target percentages for 2023 and 2024 pertain to the planned cumulative implementation rate of protection audit recommendations made as a result of the 2022 protection audit.

Figure 26.III
Performance measure: percentage of Palestine refugees identified as having mental health and psychosocial issues receiving assistance (annual)

Result 3: protection of the most vulnerable Palestine refugees enhanced

Proposed programme plan for 2024

26.27 Prolonged displacement, repeated cycles of conflict, occupation and socioeconomic hardship have heightened the risk of Palestine refugees, including women, children, persons with disabilities and older persons, being exposed to abuse, violence and/or trauma. The subprogramme addresses the highly complex protection needs of the most vulnerable Palestine refugees by providing professional and integrated social work interventions. Attention is focused on sexual and gender-based violence, child protection and disability as well as the management of other issues such as depression, grief and substance abuse. These interventions are coordinated by a cadre of 249 trained social workers who support individuals and families in identifying the causes of internal distress and their options for enhancing their well-being. Often, such means of recourse involve referrals to specialized services, such as UNRWA medical officers and/or counsellors. A case management system ensures that all interventions are documented, coordinated and tracked.

Lessons learned and planned change

26.28 The lesson for the subprogramme was that some vulnerable Palestine refugees supported under UNRWA social work interventions required specialized support that was not available through the Agency’s existing services. In applying the lesson, the subprogramme will expand the number of external referral pathways to government and non-governmental service provision partners.

26.29 Expected progress towards the objective is presented in the performance measure below (see figure 26.IV).

Figure 26.IV

Performance measure: number of Palestine refugees who benefited from UNRWA social work interventions (annual)

Deliverables

26.30 Table 26.2 lists all deliverables of the subprogramme.

Table 26.2

Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

C. Substantive deliverables

Consultation, advice and advocacy: meetings, briefings and formal written interventions to advocate for the protection of the rights of Palestine refugees.

Direct service delivery: legal counselling, legal information and/or referrals to legal service providers; counselling, medical services and social support for Palestine refugees; multiple submissions to the international human rights system.

Subprogramme 2

Palestine refugees lead healthy lives

Objective

26.31 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees lead healthy lives.

Strategy

26.32 To contribute to the objective, the subprogramme will:

- (a) Address the maternal and child health-care needs of Palestine refugees through the systematic delivery of pre-conception, prenatal and postnatal care, family-planning services, childhood immunization, child growth nutrition, and monitoring and screening for disabilities;
- (b) Control the status of non-communicable diseases and mental health issues through disease surveillance and health promotion and prevention interventions and referrals;
- (c) Control the status of communicable diseases by strengthening surveillance and response capacity and participating in host Governments' mass immunization campaigns;

- (d) Provide safe, quality and people-centred health care using the family health team model in increasingly accessible UNRWA health centres.
- 26.33 In doing so, the subprogramme will contribute to making progress towards the achievement of Goals 2, 3, 5 and 10.
- 26.34 The above-mentioned work is expected to result in:
- Improved maternal and child health among Palestine refugees;
 - Improved control status of non-communicable diseases and mental health;
 - Improved control status of communicable diseases and the prevention and control of infectious diseases;
 - Safe access to quality primary, secondary and tertiary health services for Palestine refugees.

Programme performance in 2022

Palestine refugee child growth and development nurtured

- 26.35 Improving the health of children has a positive impact on their physical, emotional and mental well-being, which improves their health and well-being during later periods of their lives. Schoolchildren constitute a vulnerable group with specific educational, health and human development needs that require special attention. In 2022, the subprogramme provided a comprehensive medical examination to 99.7 per cent of students newly enrolled in the first grade at UNRWA schools. The screening enabled: (a) the detection and, where feasible, correction of physical impairments that are amenable to early management before they develop into permanent disabilities, as well as the detection of major morbidity conditions that require thorough investigation, treatment and follow-up; (b) the prevention and control of communicable diseases, including vaccine-preventable diseases; and (c) health awareness among students, including on healthy lifestyle practices such as healthy eating, personal hygiene and physical exercise. Through this screening, diseases such as tooth decay and gingivitis, speech issues, vision problems, heart disease, bronchial asthma and epilepsy were detected.
- 26.36 Progress towards the objective is presented in the performance measure below (see figure 26.V).

Figure 26.V

Performance measure: percentage of new entrants to UNRWA schools examined during their first scholastic year (annual)

Planned results for 2024

Result 1: vaccine-preventable disease outbreaks prevented within Palestine refugee communities

Programme performance in 2022 and target for 2024

- 26.37 The subprogramme's work contributed to 98.9 per cent of children aged 18 months receiving all booster vaccines, which exceeded the planned target of 95 per cent.
- 26.38 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 26.VI).

Figure 26.VI

Performance measure: percentage of children aged 18 months who received all booster vaccines (annual)

Result 2: the health of expectant mothers safeguarded

Programme performance in 2022 and target for 2024

- 26.39 The subprogramme's work contributed to a maternal mortality rate of 18 deaths per 100,000 live births for women under UNRWA care, which exceeded the planned target of 20.
- 26.40 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 26.VII).

Figure 26.VII

Performance measure: maternal mortality rate of women under UNRWA care per 100,000 live births² (annual)

² The targets for 2023 and 2024 correspond to the World Health Organization performance benchmark² for this indicator.

Result 3: the health of Palestine refugees suffering from non-communicable diseases improved**Proposed programme plan for 2024**

26.41 The subprogramme provides treatment for Palestine refugees, geared towards the prevention and control of non-communicable diseases. Its preventative strategy is based on an approach that screens patients most likely to be at risk of contracting such diseases. Services provided to such patients include: monitoring of blood pressure, plasma glucose, plasma lipids, kidney function and respiratory and cardiovascular systems; foot care for patients with diabetes mellitus; dispensing of medication; and hospital referrals. In 2022, more than 300,000 Palestine refugee patients enrolled in UNRWA health centres were registered as suffering from diabetes mellitus, hypertension or both.

Lessons learned and planned change

26.42 The lesson for the subprogramme was that, despite significant investments by the Agency in non-communicable disease care over the past 10 years, the burden of such conditions and their complications had continued to increase, due in part to an ageing population and sedentary and unhealthy lifestyles. In applying the lesson, the subprogramme will strengthen its primary prevention approach through health education, including on non-communicable disease risk factors. It will also improve early detection by building the capacity of its staff, and the effectiveness of treatment by strengthening the monitoring and follow-up of regular consultations with patients and revising the authorized list of medication for non-communicable diseases in order to adhere to new recommendations made by the World Health Organization.

26.43 Expected progress towards the objective is presented in the performance measure below (see figure 26.VIII).

Figure 26.VIII

Performance measure: percentage of patients with diabetes mellitus enrolled in UNRWA health centres whose condition is under control (annual)**Deliverables**

26.44 Table 26.3 lists all deliverables of the subprogramme.

Table 26.3

Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory*Category and subcategory***C. Substantive deliverables**

Direct service delivery: approximately 7.5 million primary health-care consultations; some 90,000 mental health and psychosocial support consultations.

Subprogramme 3

Palestine refugees complete inclusive and equitable quality basic education

Objective

- 26.45 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees complete inclusive and equitable quality basic education.

Strategy

- 26.46 To contribute to the objective, the subprogramme will:
- (a) Enhance the professionalization of teachers through continuous professional development and career progression opportunities;
 - (b) Ensure that teaching approaches and learning materials used in UNRWA schools develop students' skills and competencies, including higher-order thinking skills;
 - (c) Monitor student performance, ensure safe and violence-free learning environments, facilitate parent engagement and promote inclusive recreational and extracurricular activities;
 - (d) Ensure that students identified as having a disability receive support to meet their specific needs, assist individuals identified as experiencing a protection risk and progressively construct or upgrade existing schools.
- 26.47 In doing so, the subprogramme will contribute to making progress towards the achievement of Goals 4, 5 and 10.
- 26.48 The above-mentioned work is expected to result in:
- (a) Improved learning outcomes and critical thinking skills for Palestine refugee girls and boys;
 - (b) A safe and inclusive learning environment for Palestine refugee boys and girls that ensures their well-being.

Programme performance in 2022

Needs of students with disabilities identified and met

- 26.49 The stigmatization and marginalization of persons with disabilities can limit their access to basic government services and participation in mainstream life on an equal basis with others. Discrimination often starts during their entry into education. The subprogramme worked to identify children with disabilities and support their inclusion in each of its 702 schools through: (a) the training of UNRWA teachers to identify and support children with disabilities; (b) the work of student support teams, comprising principals, teachers, counsellors and health tutors, who are responsible for assessing the needs of children with disabilities and building and implementing individual education plans, utilizing the UNRWA inclusive education toolkit; (c) outreach with parents and students to build a supportive and destigmatized environment around students with disabilities; and (d) the rehabilitation and upgrading of Agency schools to eliminate physical obstacles and barriers, facilitating accessibility for persons with all types of disabilities in UNRWA schools.
- 26.50 Progress towards the objective is presented in the performance measure below (see figure 26.IX).

Figure 26.IX

Performance measure: percentage of students in UNRWA schools identified as having a disability receiving targeted support to meet their needs, such as individual assistance plans and assistive devices (annual)

Planned results for 2024

Result 1: increased education efficiency linked to reduced dropout rates

Programme performance in 2022 and target for 2024

- 26.51 The subprogramme's work contributed to an increase in the coefficient of internal efficiency, which measures the ideal number of pupil-years required to produce a number of graduates from a given school cohort for a cycle of education, to 0.94, which exceeded the planned target of 0.92.
- 26.52 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 26.X).

Figure 26.X

Performance measure: coefficient of internal efficiency³

Result 2: student dropout rates reduced

Programme performance in 2022 and target for 2024

- 26.53 The subprogramme's work contributed to annual dropout rates for students enrolled in UNRWA elementary and preparatory education of 0.97 per cent and 2.88 per cent, respectively, which

³ A coefficient of 1 implies that all students enrolled in grade 1 also graduate from grade 9/10 in the ideal number of years, without any of those students dropping out or repeating a school year.

exceeded the planned elementary education dropout rate target of 1.25 but did not meet the planned preparatory education dropout rate target of 2.84. The target was not met owing to a deterioration of the economic situation in UNRWA areas of operation, which led to some students dropping out of school in favour of paid employment to support their families.

26.54 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 26.XI).

Figure 26.XI

Performance measure: annual dropout rates for UNRWA elementary and preparatory education⁴

Result 3: learning loss recovered

Proposed programme plan for 2024

26.55 The COVID-19 pandemic significantly disrupted the learning of the 544,000 students enrolled in UNRWA schools over three academic years. During this period, students were educated through a combination of in-person and remote lessons. The subprogramme facilitated learning continuity by establishing a digital learning platform and distributing tablets and Internet bundles to students from the poorest families. Despite these measures, learning loss occurred in the core subjects of Arabic and mathematics, as demonstrated through the results of the assessment of learning outcome tests administered in the 2021/22 academic year. In response, the subprogramme introduced catch-up classes and developed an information and communications technology for education strategy to define how technology can serve students and teachers during times of crisis.

Lessons learned and planned change

26.56 The lesson for the subprogramme was that the effectiveness of digital learning depended on the acceptance and capacity of teachers, students and parents to adopt this learning modality. In applying the lesson, the subprogramme will develop learning recovery plans, which will include training for teachers on digital teaching methods and awareness-raising for students and parents on digital learning modalities. This will contribute to closing the learning gap by the next assessment of learning outcome tests in 2023/24.

26.57 Expected progress towards the objective is presented in the performance measure below (see table 26.4).

⁴ The target for 2023 corresponds to an UNRWA performance benchmark established for this indicator in 2017.

Table 26.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
All students enrolled in UNRWA schools have access to remote learning	In-person teaching is gradually reintroduced in UNRWA schools	In-person teaching is resumed in all UNRWA schools	Learning recovery plans are developed and implemented	Assessment of learning outcome tests demonstrate closure of the learning gap
Teachers are enabled to provide remote learning	Students take assessment of learning outcome tests	Students take catch-up classes	Teachers and students use digital learning methods	
Vulnerable students receive tablets and Internet bundles	Additional vulnerable students receive tablets and Internet bundles			

Deliverables

26.58 Table 26.5 lists all deliverables of the subprogramme.

Table 26.5
Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

C. Substantive deliverables

Direct service delivery: education services provided to some 550,000 students through approximately 700 schools.

Subprogramme 4 Palestine refugees have improved livelihood opportunities

Objective

26.59 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees have improved livelihood opportunities.

Strategy

26.60 To contribute to the objective, the subprogramme will:

- (a) Provide financial services, including diversified loan products, covering businesses, consumption and housing needs, to low-income Palestine refugees, women and young people through a network of 23 microfinance branches in Gaza, Jordan, the Syrian Arab Republic and the West Bank;
- (b) Create employment opportunities for Palestine refugees through infrastructure and construction interventions in camps;
- (c) Provide quality and market-relevant technical and vocational education and training at UNRWA vocational training centres and education science facilities for degree-level teacher

education in the West Bank and Jordan, focusing on vulnerable young people, including those whose families are recipients under the Agency’s social safety net programme;

(d) Continue its higher education scholarship programme for young Palestine refugees.

26.61 In doing so, the subprogramme will contribute to making progress towards the achievement of Goals 4, 5 and 8.

26.62 The above-mentioned work is expected to result in:

(a) Improved livelihood capacities of Palestine refugees;

(b) Improved income generation and work opportunities for Palestine refugees, especially women and young people.

Programme performance in 2022

Living conditions improved

26.63 Employment conditions remain extremely difficult for Palestine refugees. All UNRWA fields of operation have, to varying degrees, been beset by deep and protracted economic crises, with Palestine refugees facing widespread unemployment, the loss of assets and livelihoods and increasing basic living costs. The subprogramme provided Palestine refugees with livelihood opportunities that contributed to improved living conditions through the extension of consumer and housing loans. These loans were made available to low-income households to help to constitute assets and/or pay for education, health care and unexpected one-time outlays. Housing loans were also made available to families with no access to mortgage facilities to help them to improve, expand or acquire housing.

26.64 Progress towards the objective is presented in the performance measure below (see figure 26.XII).

Figure 26. XII

Performance measure: percentage of clients who report improved livelihoods from accessing UNRWA microfinance services (annual)

Planned results for 2024

Result 1: improved youth employment through vocational training

Programme performance in 2022 and target for 2024

26.65 The subprogramme’s work contributed to 78.98 per cent of vocational training centre graduates securing employment or continuing their studies within one year of graduation, which exceeded the planned target of 75.5 per cent.

26.66 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 26.XIII).

Figure 26.XIII

Performance measure: percentage of vocational training centre graduates employed within one year of graduation (annual)

Result 2: employability of Palestine refugees improved

Programme performance in 2022 and target for 2024

26.67 The subprogramme’s work contributed to the employability skills of 6,297 refugees being enhanced by camp improvement planning processes, which exceeded the planned target of 5,107 refugees.

26.68 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 26.XIV).

Figure 26.XIV

Performance measure: number of refugees whose employability skills were enhanced by the camp improvement planning process (cumulative)

Result 3: improved access for Palestine refugees to highly skilled professions

Proposed programme plan for 2024

26.69 Across UNRWA fields of operation, a range of structural barriers inhibit the integration of Palestine refugees into labour markets, leading to high unemployment rates and a predominance of employment in low-paying or low-skilled informal jobs. These conditions in turn leave many Palestine refugees trapped in poverty. The subprogramme provides scholarships for university

education and undergraduate degree-level courses in education for trainee teachers, provided either free or for a nominal payment, through the Agency’s Education Science Faculty in the West Bank and its Faculty of Educational Sciences and Arts in Jordan. The subprogramme provided 15 scholarships and enrolled 658 students in the Education Science Facility and 1,393 students in the Faculty of Educational Sciences and Arts for the 2022/23 academic year. Approximately 35 per cent of the students are from the poorest Palestine refugee families, who would otherwise be unable to afford tertiary education.

Lessons learned and planned change

- 26.70 The lesson for the subprogramme was that graduating students need support in building connections with potential employers in host countries so that they can fully utilize their education in highly skilled professions and can remain in the region and contribute to the development of Palestine refugee communities. In applying the lesson, the subprogramme will increase the number of prospective employers participating in Agency-organized annual jobs fairs.
- 26.71 Expected progress towards the objective is presented in the performance measure below (see figure 26.XV).

Figure 26.XV
Performance measure: percentage of Education Science Facility and Faculty of Educational Sciences and Arts graduates employed or continuing their studies within one year of graduation (annual)

Deliverables

- 26.72 Table 26.6 lists all deliverables of the subprogramme.

Table 26.6
Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory
C. Substantive deliverables
Direct service delivery: issuance of microfinance loans valued at approximately \$44 million; approximately 10,000 students enrolled in technical and vocational education and training; some 2,470 job placements created as full-time equivalents. ⁵

⁵ Full-time equivalents are the number of full-time equivalent jobs, defined as total hours worked divided by average actual hours worked in full-time jobs.

Subprogramme 5**Palestine refugees are able to meet their basic human needs of shelter, water and sanitation****Objective**

- 26.73 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees are able to meet their basic human needs of shelter, water and sanitation.

Strategy

- 26.74 To contribute to the objective, the subprogramme will:
- (a) Provide adequate and safe shelters for Palestine refugees living in camps through the rehabilitation of substandard shelters for the most vulnerable Palestine refugees;
 - (b) Provide Palestine refugees living in camps with effective environmental health services, including equitable and sufficient water for their basic needs, storm water drainage systems, solid waste collection and sewerage systems.
- 26.75 In doing so, the subprogramme will contribute to making progress towards the achievement of Goals 1, 6, 10, 11 and 12.
- 26.76 The above-mentioned work is expected to result in:
- (a) Improved living conditions whereby Palestine refugees and their families can live in dignity in an adequate and safe built environment in camps;
 - (b) Improved environmental health and infrastructure services, including access to safe drinking water, sanitation, drainage, electricity and waste disposal, for Palestine refugees living in camps.

Programme performance in 2022**Improved water quality for Palestine refugees residing in camps**

- 26.77 Camp infrastructure has not kept pace with population growth, causing a strain on increasingly depleted potable water supplies and ageing water pipeline networks. As these supplies become scarcer, the risk of water-borne disease outbreaks increases as camp residents seek to obtain water through other means, including from potentially contaminated sources. The subprogramme, in 2022, ensured that Palestine refugees residing in official camps had access to potable water. In cooperation with host authorities, the subprogramme conducted hydrological studies to identify new sources of water and sink new wells. Furthermore, Palestine refugee shelters in camps were connected to safe, official water networks and water loss was reduced through the maintenance and replacement of distribution pipes.
- 26.78 Progress towards the objective is presented in the performance measure below (see figure 26.XVI).

Figure 26.XVI
Performance measure: percentage of shelters in Palestine refugee camps connected to an adequate water supply (cumulative)

Planned results for 2024

Result 1: safe and habitable shelters for vulnerable Palestine refugees

Programme performance in 2022 and target for 2024

- 26.79 The subprogramme’s work contributed to 3,846 Palestine refugee families benefiting from improved shelter conditions owing to non-emergency needs, which did not meet the planned target of 3,876 families. The target was not met owing to the prioritization of the reconstruction of shelters for families affected by hostilities in Gaza in 2021 and 2022.
- 26.80 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 26.XVII).

Figure 26.XVII
Performance measure: number of families benefiting from improved shelter conditions (cumulative)

Result 2: sanitation in Palestine refugee camps enhanced

Programme performance in 2022 and target for 2024

- 26.81 The subprogramme’s work contributed to 94.10 per cent of shelters in camps being connected to official sewerage networks, which did not meet the planned target of 94.25 per cent. The target was not met owing to delays in the implementation of planned infrastructure projects in the West Bank.

26.82 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 26.XVIII).

Figure 26.XVIII

Performance measure: percentage of shelters in camps connected to official sewerage networks (cumulative)

Result 3: living conditions of camp residents improved

Proposed programme plan for 2024

26.83 Since their establishment, the 58 official refugee camps across the five UNRWA fields of operation have been transformed from temporary shelters into urbanized and overcrowded spaces. Increasing population density, coupled with limited regulatory frameworks, caused many camps to suffer from haphazard urbanization which, in turn, has led to unsafe housing, inadequate infrastructure, a lack of communal areas and a gradual deterioration in the quality of life for camp residents. The subprogramme addresses the built environment in camps through the implementation of camp improvement plans, which provide for the coordinated redevelopment of camps, including the rehabilitation of substandard housing stock, the repair and upgrade of public utility networks and roads and the development of communal spaces to enhance the safety, accessibility and social and environmental well-being of camp residents.

Lessons learned and planned change

26.84 The lesson for the subprogramme was that camp populations need to participate in all stages of the planning and implementation of camp improvement plans in order to reflect their diverse needs and maximize ownership of their living environment. In applying the lesson, the subprogramme will increase engagement with camp residents, especially the most vulnerable, including women and refugees with disabilities, to maximize their involvement in the planning and implementation of the plans.

26.85 Expected progress towards the objective is presented in the performance measure below (see figure 26.XIX).

Figure 26.XIX
Performance measure: number of refugees benefiting from the implementation of camp improvement plans (cumulative)

Deliverables

26.86 Table 26.7 lists all deliverables of the subprogramme.

Table 26.7

Subprogramme 5: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

C. Substantive deliverables

Direct service delivery: rehabilitation of 500 substandard shelters for Palestine refugees residing in camps.

Subprogramme 6

The most vulnerable Palestine refugees have access to effective social assistance

Objective

26.87 The objective, to which this subprogramme contributes, is to ensure that the most vulnerable Palestine refugees have access to effective social assistance.

Strategy

26.88 To contribute to the objective, the subprogramme will:

- (a) Distribute cash-based and in-kind social transfers to the most vulnerable Palestine refugees, at risk of poverty and food insecurity;
- (b) Provide preferential access to vocational training opportunities and subsidization of secondary and tertiary health-care costs to Palestine refugees in need, including households headed by women, older persons and persons with disabilities.

26.89 In doing so, the subprogramme will contribute to making progress towards the achievement of Goals 1, 2, 5 and 10.

26.90 The above-mentioned work is expected to result in the alleviation of poverty and food insecurity among the most vulnerable Palestine refugees in the face of economic hardship and restricted household income.

Programme performance in 2022

Access to affordable hospital care ensured

26.91 In the West Bank and Jordan, Palestine refugees have access to effective host government hospitalization care. In Gaza, Lebanon and the Syrian Arab Republic, where public hospitalization support is either non-functional or not extended to Palestine refugees, hospitalization care is prohibitively expensive, leaving the most vulnerable refugees with a choice of either incurring significant personal debt or deferring potentially life-saving treatment. The subprogramme supported access to secondary and tertiary health care for the most vulnerable Palestine refugees, defined as those enrolled in the UNRWA social safety net programme, by subsidizing the hospitalization costs that they incur for treatment. This was achieved through contracts with hospitals or by reimbursing a high proportion of the costs incurred for inpatient care at public, non-governmental and private health-care facilities. Costs to the Agency were controlled through ongoing analysis of hospitalization records to prevent the overuse of services, the strict monitoring of both referrals and invoices and the regular review and renegotiation of contracts with hospitals.

26.92 Progress towards the objective is presented in the performance measure below (see figure 26.XX).

Figure 26.XX

Performance measure: number of Palestine refugees enrolled in the UNRWA social safety net programme receiving subsidized hospital care (cumulative)

Planned result for 2024

Result 1: abject poverty and food insecurity among the most vulnerable Palestine refugees mitigated

Proposed programme plan for 2024

26.93 In Gaza, Lebanon and the Syrian Arab Republic, over 80 per cent of the registered Palestine refugee population is estimated to live below the poverty line. The subprogramme provides eligible refugees with in-kind food assistance and cash-based transfers through the social safety net programme. In Gaza and the Syrian Arab Republic, a minimum basic social assistance floor has been established whereby all Palestine refugees receive regular food and cash transfers, supplemented by additional social transfers for the most vulnerable refugees, including households headed by women, older

persons and persons with disabilities. In Jordan, Lebanon and the West Bank, the eligibility of Palestine refugees to receive cash assistance under the programme continues to be determined through the application of poverty-based criteria.

Lessons learned and planned change

- 26.94 The lesson for the subprogramme was the need to effectively employ finite resources to respond to the increasing number of poor Palestine refugees in Lebanon, as the poverty rate reached 93 per cent in 2022. In applying the lesson, the subprogramme will supplement its current assistance provided through the social safety net programme by offering social transfers that target the most vulnerable Palestine refugees, including children up to the age of 18, persons with disabilities, older persons and refugees with cancer and chronic illnesses. The subprogramme will also maintain high-frequency crisis monitoring surveys to help to identify if and to whom additional social assistance should be provided.
- 26.95 Expected progress towards the objective is presented in the performance measure below (see figure 26.XXI).

Figure 26.XXI

Performance measure: number of vulnerable Palestine refugees who received social transfers and supplementary cash assistance (annual)

Deliverables

- 26.96 Table 26.8 lists all deliverables of the subprogramme.

26.98 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 26.12 to 26.14 and figure 26.XXII.

26.99 As reflected in tables 26.12 (1) and 26.13 (1), the overall resources proposed for 2024 amount to \$55,176,800 before recosting, reflecting a net increase of \$15,472,800 (or 39.0 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments, new and expanded mandates and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

26.100 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), UNRWA is integrating environmental management practices into its operations. In 2022, it strengthened its environmental governance framework through the promulgation of an Agency-wide environmental sustainability policy that articulates the Agency’s commitment in this area while providing a set of overarching principles to guide the mainstreaming of such considerations into all UNRWA interventions. The policy aligns the Agency’s environmental sustainability efforts with the goals of the 2030 Agenda, United Nations development system reforms and international agreements on climate change and environmental protection. The policy is anchored in the UNRWA strategic plan for 2023–2028, launched in January 2023, which posits environmental sustainability as a key Agency-wide priority. It will be operationalized through an implementation plan that is currently under development. In addition, the policy is complemented by: (a) an environmental and social management framework, introduced in April 2022, which mandates the incorporation of environmental and social sustainability principles into all UNRWA construction, rehabilitation and camp improvement works; (b) practical measures to reduce the Agency’s carbon footprint, including, for example, the replacement of fluorescent lights with light-emitting diode bulbs, strengthening recycling efforts and renovating UNRWA installations to incorporate energy-saving measures; and (c) current negotiations with donor partners in relation to additional large-scale solar energy initiatives that form part of the wider UNRWA capital investment plan to modernize Agency operations. Starting in 2023, these efforts will be further facilitated by a Senior Environmental Officer, a new post approved by the General Assembly pursuant to its resolution [77/262](#) that is currently under recruitment.

Figure 26.XXII
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

26.101 As reflected in table 26.12 (1), resource changes reflect an increase of \$890,200, reflecting the higher provision at continuing vacancy rates for 15 posts established in 2023 pursuant to General Assembly resolution 77/262, costed at a 50 per cent vacancy rate in line with the established practice.

New and expanded mandates

- 26.102 As reflected in table 26.12 (1), resource changes reflect an increase of \$14,594,000, as explained below.
- 26.103 In its resolution [77/122](#), the General Assembly decided to consider a gradual increase in the United Nations regular budget allocation to the Agency that would, in addition to covering international staff requirements, in accordance with resolution 3331 B (XXIX) of 17 December 1974, be utilizable to support expenses for operational costs related to executive and administrative management functions of the Agency, and invited the Secretary-General, accordingly, to submit proposals for consideration by the relevant committees at its seventy-eighth session.
- 26.104 Objective 7 of the Agency's strategic plan for 2023–2028 (the UNRWA mandate is implemented effectively and responsibly) is a reflection of the Agency's executive and administrative management functions, which are dedicated to: (a) promoting and maintaining the highest possible standards of management; (b) enhancing stakeholders' relationships; (c) enabling the delivery of quality programmes that help to achieve sustainable development for Palestine refugees; and (d) ensuring that systems, structures and procedures are in place to achieve the above objectives and effectively manage and mitigate risks. In addition, UNRWA has developed and implemented internal oversight workplans that address enterprise risks to further the Agency's ability to achieve its strategic outcomes. Executive and administrative management functions include the functions performed by the Commissioner-General's Office, the Department of Finance, the Department of Human Resources, the Department of External Relations and Communications, the Department of Internal Oversight Services, the Department of Legal Affairs, the Office of the UNRWA Dispute Tribunal, the Department of Planning, the Department of Information Management and Technology, the Department of Security and Risk Management, the Central Support Services Division and the operational and programmatic departments and divisions in the field and at UNRWA headquarters that have been created to support the overall operations of the Agency, as reflected in the organizational structure contained in annex I.
- 26.105 The operational costs related to the executive and administrative management functions of the Agency are estimated at \$29,188,000 before recosting for 2024. Accordingly, this amount will also be reflected as the operational costs related to the management and operational effectiveness subprogramme of the Agency's forthcoming programme budget for the biennium 2024–2025, to be 50 per cent funded from the United Nations regular budget, for the first year of the biennium, as further explained below. These operational costs provide for the maintenance and administration of UNRWA operations on a day-to-day basis and include supplies and materials (such as stationery, accessories, cleaning supplies and security supplies), utilities, including water and electricity, maintenance and renovation of UNRWA office premises, furniture and equipment such as personal and laptop computers, printers, photocopying machines, scanners and fleet management, training, travel, consultancy and miscellaneous administrative services, including Internet connection contracts, cleaning services, telecommunications and other contractual agreements. They also include resources to conduct a detailed assessment and pre-project kick-off work for a new enterprise resource planning solution to replace the solution currently in use at the Agency that will no longer be technically supported beyond 2026.
- 26.106 In accordance with resolution [77/122](#), it is proposed that the regular budget should contribute gradually, with an increase spread over a period of two years, to cover the operational costs related to the executive and administrative management functions of the Agency. The proposed programme budget for 2024 includes a contribution equivalent to 50 per cent of the estimates for those operational costs for 2024, in the amount of \$14,594,000. A contribution equivalent to 100 per cent of the operational costs related to the executive and administrative management functions of the Agency for 2025 would then be reflected in the proposed programme budget for 2025. In line with the resolution, the allocation to the Agency is proposed as a grant that would be utilized to support its expenses for operational costs related to executive and administrative management functions. Since the account structure of UNRWA voluntary resources is different from the account structure of the regular budget, the allocation to the Agency as a grant would allow for a more efficient budget

implementation process for UNRWA by eliminating the need for recording expenditures according to two different account structures during the year.

Other changes

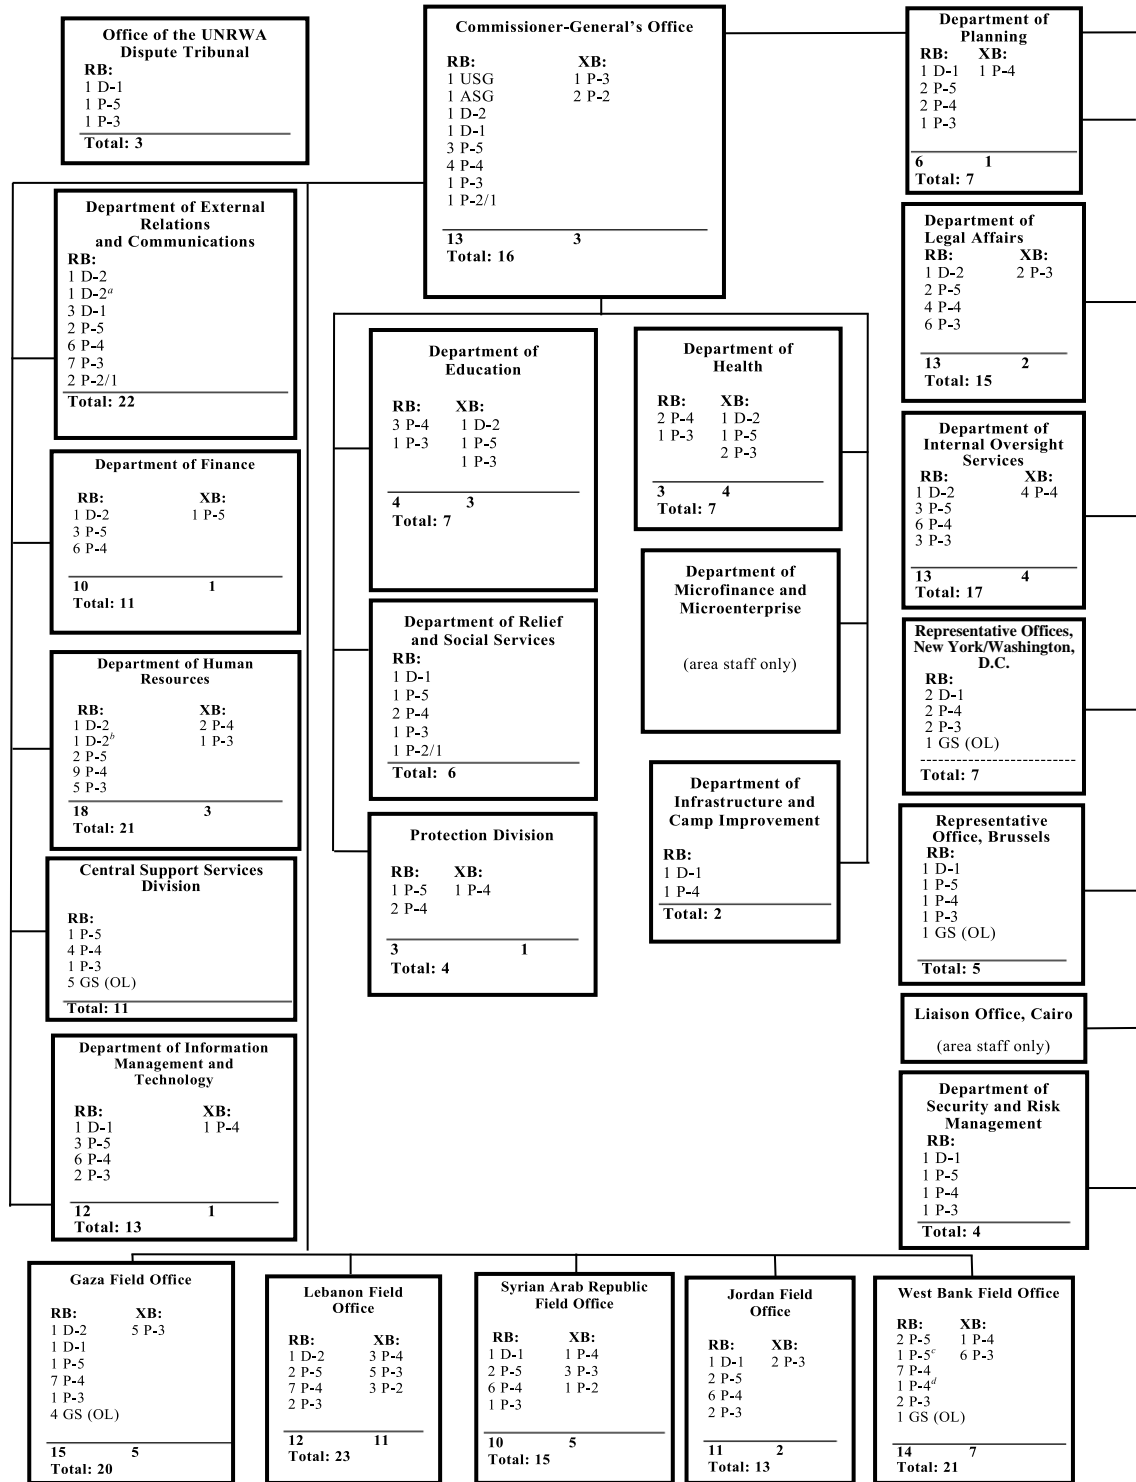

- 26.107 As reflected in table 26.12 (1), the net effect of the proposed changes is a decrease of \$11,400, which reflects: (a) the proposed upward reclassification of the post of Director of the Department of Human Resources from the D-1 to the D-2 level; (b) the proposed redeployment of the post of Director of the Department of External Relations and Communications (D-2) from Jerusalem to Amman; (c) the proposed redeployment of the post of Regional Ombudsman (P-5) from Amman to Jerusalem; and (d) the proposed redeployment of the post of Donor Relations and Communication Officer (P-4) from Beirut to Jerusalem. Additional information is provided in annex III.

Extrabudgetary resources

- 26.108 As reflected in tables 26.12 (2) and 26.13 (2), extrabudgetary resources amount to \$1,083,503,000. The resources would complement regular budget resources and would be used mainly to provide for continued humanitarian support for and aid to Palestine refugees.
- 26.109 The extrabudgetary resources under the present section are subject to the oversight of the Commissioner-General of UNRWA, who is advised and assisted by an Advisory Commission and who has delegated authority from the Secretary-General.

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee trusts that, as part of the restructuring of the Department of Communications of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), further measures will be taken to ensure cooperation with and seek additional support and expertise available from the Department of Global Communications at United Nations Headquarters. The Committee looks forward to an update thereon in the context of the next proposed programme budget (para. VI.64).

The Advisory Committee trusts that the vacant posts, including the long-vacant ones, will be filled expeditiously and that an update on the recruitment status of all vacant posts will be provided to the General Assembly at the time of its consideration of the present report and in the next budget submission (para. VI.65).

The Advisory Committee trusts that the additional contribution, in the form of posts, to the regular budget will enable UNRWA to use the equivalent of the funds under extrabudgetary resources for operational matters and looks forward to an update thereon in the next proposed programme budget (para. VI.71).

The Advisory Committee acknowledges the efforts to date and looks forward to further updates in the next budget proposals (para. VI.75).

The UNRWA Department of External Relations and Communications regularly engages with both the Office of the Spokesperson for the Secretary-General and the Department of Global Communications at United Nations Headquarters to align UNRWA communications priorities with the global priorities of the Secretariat. In this regard, it attends global communications group meetings, consults and reviews the global communications grid to align the UNRWA communications work with key global events and milestones, and keeps the global communications group abreast of communications plans and news from UNRWA.

The update on vacant posts will be provided as part of the supplementary information provided to the Advisory Committee.

Taking into consideration the structural cash crisis under the programme budget, the additional assessed contribution has helped the Agency to partially reduce the burden on the ongoing structural cash deficit. The financial situation of the Agency has, however, remained precarious, as indicated below.

In 2022, UNRWA finalized implementation of the management initiatives, first launched in 2020. In the final year of implementation, significant milestones in the implementation of management reforms were reached.

An Agency-wide protection from retaliation policy was introduced. In addition, UNRWA revised its evaluation policy to ensure compliance with standards of the United Nations Environment Management Group; maintained regular reporting of financial information on the International Aid Transparency Initiative website; finalized restructuring of its finance operations, at both the headquarters and field level; and updated the terms of reference of financial governance committees.

UNRWA also established a women's advisory forum, a space for consultation among female staff and an

The Advisory Committee notes the continued challenges faced by UNRWA in extrabudgetary resources mobilization and trusts that an update on the most recent donor pledges and payments will be provided to the General Assembly at the time of its consideration of the report, as well as in the next budget proposal (para. VI.76).

The Advisory Committee trusts that the Secretary-General will provide an update on the financial situation of UNRWA, as well as on the most recent liabilities and loans management, to the General Assembly at the time of its consideration of the report, as well as in the next budget proposal (para. VI.77).

instrument to advise senior management on effective approaches to promote a safe, empowering and inclusive workplace and on ways to ensure the full and effective participation and leadership of women in the Agency. A new leadership dialogue initiative was developed, and the Office of the Ombudsperson was further strengthened.

Key programmatic strategies and policies developed in 2022 included the Agency's first environmental sustainability policy, an Agency-wide digital transformation strategy, an information and communications technology for education strategy, a revised disability inclusion strategy and an eligibility and registration modernization strategy. In addition, new approaches were adopted with regard to integrated installation assessments and protection alignment reviews.

UNRWA remains committed to continued modernization and reform of its management systems and practices. Its strategic plan for 2023–2028, launched in January 2023, is underpinned by a drive to modernize service delivery and management systems and includes the following key priorities: (a) modernization and digitalization of Agency business processes; (b) continuous review of internal governance structures and mechanisms; and (c) strengthened risk management systems that embed a stronger risk culture in the Agency. Reform efforts will also seek to further boost the leadership capacity of managers and enhance dialogue with staff and refugee communities.

In terms of the financial situation in 2022, UNRWA sustained all critical services until the end of the year, despite challenges. Funding to the Agency's programme budget generally increased (to \$751 million) but did not meet budget requirements (\$817 million). Overall income to the Agency in 2022 reached \$1.17 billion. Funding was volatile, with overreliance on end-of-year top-ups, which adds to the uncertainty in financial planning. UNRWA managed monthly cash flows thanks to flexibility from donors, borrowing from the Central Emergency Response Fund and by continuously deferring payments to vendors.

The Agency managed to maintain operations in 2022 by closing the year with around \$75 million in liabilities and debts carried over to 2023, similar to the situation faced by the Agency in 2020/21. This includes:

- Central Emergency Response Fund loans worth \$30 million, to be repaid in the first quarter of 2023

The Advisory Committee notes the fundraising efforts of UNRWA, in particular in view of the high number of staff with related functions, and trusts that UNRWA will use these staffing resources in an effective and results-oriented manner. The Committee trusts that UNRWA will take into consideration lessons learned and best practices of proven fundraising strategies of other United Nations entities, and continue to strengthen its overall fundraising efforts and broaden its donor base, with a view to achieving sufficient, predictable and sustained levels of voluntary funding, as also requested by the General Assembly in its resolution 71/93 (para. VI.78).

The Advisory Committee reiterates the need for an extrabudgetary budget proposal based on the expected requirements and derived from a comprehensive needs assessment and statistically accurate data of the total population requiring UNRWA services and support (Committee memorandum AC/2184, 18 November 2021, paras. 5–6). Furthermore, the Committee trusts that lessons learned and best practices from other United Nations entities regarding needs-based budgeting will be taken into consideration in the future (para. VI.79).

- Debts of approximately \$45 million, including payments to staff (separation benefits and provident fund) and unpaid liabilities to vendors for goods and services

With regard to the pledges received as at 13 March 2023, total receipts amounted to \$321.4 million, including contributions worth \$253.8 million to the programme budget. The early disbursement of planned contributions enabled the agency to maintain operations in the first quarter and repay the Central Emergency Response Fund loans.

However, the Agency's financial situation remains challenging. On the side of core support, UNRWA will face the next cash crunch in May, when there is insufficient forecasted income to meet expected outflows. Also worrying is the lack of adequate resources to fund the response to the earthquake crisis in the Syrian Arab Republic and to maintain the food pipeline in Gaza.

In order to address these challenges, UNRWA is asking for additional resources to address the multiple and overlapping emergencies. In addition, the Agency continues to raise awareness of the importance of early disbursement and flexible funding as fundamental tools that allow for better financial management and planning.

The Department of External Relations and Communications will continue to be restructured to deliver on its three-year resource mobilization and outreach strategy, using newly approved and created posts to: (a) stabilize some existing posts that had been temporarily created; and (b) strengthen identified pillars such as private sector fundraising and outreach in at least two priority countries. The Department's three-year strategy builds on lessons learned from the previous strategy cycle and includes guidance from at least two United Nations sister entities (mostly the Office of the United Nations High Commissioner for Refugees and the United Nations Children's Fund).

The Agency is currently working on its 2024/25 programme budget, based on its expected requirements and needs assessment, which will be presented to the Advisory Committee in mid-2023.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Action</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Reclassification	+1 -1	D-2 D-1	Reclassification of the post of Director of the Department of Human Resources	<p>The Department of Human Resources of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) is responsible for managing the conditions of service of over 32,000 personnel in a very complex political environment.</p> <p>The current level of the post of Director of the Department of Human Resources (D-1) falls far below the level of responsibility of its functions and its centrality to the Agency's operations and mandate in an organization with such a large number of personnel, and it is thus proposed that the post be reclassified at the D-2 level, in alignment with the job classification standards set by the International Civil Service Commission.</p> <p>The Director of the Department of Human Resources leads the human resources function in the Agency, which includes overseeing the development and implementation of operating policies related to workforce planning, human resources policies and administrative law, recruitment, compensation, organizational design, classification of posts, learning and development, and staff welfare.</p> <p>The Department's responsibility for the pay structure alone is highly complex: on behalf of the Agency, it is responsible for managing the salary scales for approximately 1,000 different types of post at multiple levels across five different field contexts, each with its own salary scale and conditions of work and compensation frameworks, as well as a separate salary regime for international staff. Similarly, staff-management relations are a particularly complex and sensitive task, given that staff are represented by around 17 staff unions organized along the lines of trade unions and one inter-staff unions committee.</p> <p>In addition to leading the Department at headquarters (Amman and Gaza), the incumbent provides technical direction to the human resources teams across five field locations such as the Gaza field location with around 14,000 personnel, including guiding, reviewing and monitoring their activities and adherence to the existing framework of policies and procedures. Providing authoritative advice to the Commissioner-General and the senior management of the organization is a critical role considering the persistent financial crisis of the Agency and its commitment to management and modernization reforms.</p>

Section 26 **Palestine refugees**

<i>Action</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Redeployment (geographical)	1	D-2	Redeployment of the post of Director of the Department of External Relations and Communications from Jerusalem to Amman	The staff of the Department of External Relations and Communications are located in Jerusalem, Gaza and Amman. As UNRWA seeks to find new avenues to raise sufficient resources, a priority focus for the Director of the Department is to develop the Agency's capacity to strengthen its engagement with Arab partners (who are present through their embassies in Amman) and to build the Agency's private sector fundraising capacity. With two senior external relations staff (at the D-1 level) already based in Jerusalem (covering communications and donor partnerships, respectively), and with the Arab Partners Unit and its Private Partnerships Division based in Amman, UNRWA has determined that it is of strategic importance that the Director (D-2) be based in Amman instead of the current location in Jerusalem. This presence in Amman would enable the Agency and its Department of External Relations and Communications to prioritize strategic fundraising priorities and ensure constant coordination with the Executive Office and programme staff based in Amman.
	1	P-5	Redeployment of the post of Regional Ombudsman from Amman to Jerusalem	The main functions of the Regional Ombudsman are: (a) the provision of informal conflict resolution services to UNRWA staff members; (b) the supervision of and support for personnel other than the Regional Ombudsman; (c) outreach and conflict competence- and skill-building for UNRWA headquarters and field office staff; and (d) systemic feedback to UNRWA senior management. As approximately 60 per cent of the Agency's workforce are employed in the Gaza and West Bank field offices, basing the Regional Ombudsman post in Jerusalem would provide easier and faster access to the Regional Ombudsman's services for the majority of the Agency's staff. Moreover, this geographical redeployment would facilitate communication and synergies with the Legal Assistance Office and the Department of Legal Affairs, which are both based in Jerusalem, in order to address issues in a timely and effective manner, and would lead to streamlined processes and procedures. Finally, as the Internet is not always reliable in Gaza, the proximity of the office to Gaza would be beneficial.
	1	P-4	Redeployment of the post of Donor Relations and Communication Officer (P-4) from Beirut to Jerusalem	Given the Agency's precarious financial situation, it has identified the need to strengthen its capacity for fundraising and donor relations with some key institutional donors, including European donors. It is therefore proposed that the post of Donor Relations and Communication Officer (P-4) be redeployed from Beirut to Jerusalem, where key institutional counterparts have offices.

I. Office for the Coordination of Humanitarian Affairs

Foreword

In 2023, a projected 339 million people worldwide will need humanitarian assistance, a significant increase in the number of people in need, up from 326 million in 2022. This trend is likely to continue in 2024, given that the number of people in need of assistance has grown every year since 2013, driven in large part by three factors: the compounding effects of health epidemics; armed conflicts; and the crisis of climate change.

In 2022, the above-mentioned factors, including the ongoing implications of the coronavirus disease (COVID-19) and cholera outbreaks, caused record levels of hunger and displacement and exacerbated poverty. It also led to an unprecedented loss of life, the destruction of civilian infrastructure, the disruption of supply chains and limited access to basic necessities, including food, water, sanitation and hygiene, shelter, health care, education and protection. As a result, 1 of every 23 people in the global population is currently in need of humanitarian assistance, which is more than double the number from just four years ago.

The current United Nations coordinated humanitarian response plan for 2023 is intended to reach 230 million of the most vulnerable people, in particular women and children, across 69 countries, at a cost of \$51.5 billion. The plan is intended to prioritize the prevention of famine and extreme hunger; provide humanitarian assistance to meet nutrition, health, shelter, education, water and sanitation and protection needs; and increase participation of local and national actors in humanitarian responses. However, this is not enough. With the situation likely to worsen in 2024, we have a duty to act quickly to reduce the number of people who need humanitarian assistance.

(Signed) Martin Griffiths
Under-Secretary-General for Humanitarian Affairs
and Emergency Relief Coordinator

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 27.1 The mandate is derived from the priorities established in relevant General Assembly resolutions and decisions, including resolution [46/182](#), in which the Assembly set out the guiding principles of humanitarian response and affirmed the leadership role of the Secretary-General to ensure better preparation and effective response to natural disasters and complex emergencies. This mandate has been confirmed and consolidated through the normative developments of various resolutions over the past 32 years. The Office for the Coordination of Humanitarian Affairs is responsible for ensuring the timely, coherent, coordinated and principled response of the international community to natural disasters and complex emergencies and for facilitating the transition from emergency relief to rehabilitation and sustainable development. With 339 million people in need of humanitarian assistance in 2023 and extreme poverty and hunger on the rise, owing to the compounded effects of emerging and prolonged armed conflicts, the intensifying effects of climate change and the direct and indirect impact of the coronavirus disease (COVID-19) pandemic, ensuring well-coordinated and principled humanitarian assistance by the international community remains as important as ever.

Strategy and external factors for 2024

- 27.2 In 2022, several compounding shocks created a rise in vulnerability worldwide, with 222 million people experiencing food insecurity, the largest global food crises in history. In addition, forced displacement continued to increase, with 103 million people, or 1 per cent of the global population, displaced. Armed conflicts continued to take a heavy toll on civilians, and climate change exacerbated existing humanitarian crises. The lingering effects of the COVID-19 pandemic, coupled with outbreaks of monkeypox, cholera and Ebola, contributed to the overstretching of health-care systems and to the erosion of progress in achieving the Sustainable Development Goal of good health and well-being by 2030.
- 27.3 In the face of these challenges, the Office will continue to enhance the coordination and effective and efficient delivery of humanitarian assistance, together with humanitarian organizations. The Office will continue to develop and promote a common policy on humanitarian issues for the United Nations system and its partners; coordinate response to humanitarian emergencies; mobilize United Nations capacity to expedite the provision of humanitarian assistance; strengthen early action and anticipatory approaches; advocate and contribute to better preparedness for more timely humanitarian assistance in emergencies; advocate on humanitarian issues; and strengthen the analysis and availability of timely information on emergencies and natural disasters, in accordance with its mandate. The Office will also support the mobilization of resources to enable early action and a prompt response to new or rapidly deteriorating humanitarian emergencies.
- 27.4 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue to work with national and local governments, affected communities, the Inter-Agency Standing Committee and other stakeholders, including regional disaster management and response organizations, other regional and subregional organizations, private sector organizations and first responders to promote principled, timely and effective humanitarian responses.
- 27.5 With regard to inter-agency coordination and liaison, the Office will continue, through the Inter-Agency Standing Committee and its subsidiary bodies, to coordinate the development of guidance for the humanitarian system, including on operations policy development and advocacy and supporting implementation of the Secretary-General's action agenda on internal displacement. The Office will provide and manage global platforms, such as the United Nations Disaster

Assessment and Coordination Team mechanism and the International Search and Rescue Advisory Group, to pool resources and facilitate a coordinated response to humanitarian crises. The Office will also collaborate closely with the Development Coordination Office and other United Nations agencies. At the country level, the Office will continue to coordinate with and support United Nations agencies, such as the World Food Programme, the United Nations Development Programme, the United Nations Children's Fund, the Food and Agriculture Organization of the United Nations, the World Health Organization, United Nations Environmental Programme, the Office of the United Nations High Commissioner for Refugees and the United Nations Population Fund, throughout the humanitarian programme cycle to ensure effective and consistent system-wide response strategies that meet the humanitarian needs of people in vulnerable situations and that minimize the duplication and gaps in response efforts.

- 27.6 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) The impact of the global economic contraction triggered by the COVID-19 pandemic will continue to be felt and will threaten to increase vulnerability, and is likely to be compounded by other disasters;
 - (b) Natural disasters will continue to increase in frequency and magnitude, owing, among others, to the adverse effects of climate change;
 - (c) The impact of other disasters, including armed conflicts, will continue to be felt and will increase the vulnerability of people;
 - (d) Humanitarian needs and funding requirements will remain high.
- 27.7 The Office integrates a gender perspective in its operational activities, deliverables, and results, as appropriate. For example, the Office promotes gender equality and the empowerment of women and girls through its action plans, inter-agency policies and tools, and its senior advisers were deployed in support of humanitarian coordinators and humanitarian country teams. In 2024, the Office will strive to address protection issues, including violence affecting women and girls, through its advocacy, resource mobilization and programming. Women's participation and leadership in humanitarian decision-making will also be a key priority.
- 27.8 The Office advances United Nations system-wide commitments on protection from sexual exploitation and abuse and sexual harassment. The Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator, as Chair of the Inter-Agency Standing Committee, leads and promotes Committee efforts that are aimed at ensuring a humanitarian context in which people caught up in crises feel safe and respected and can gain access to the protection and assistance that they need and in which people affected by crisis are protected from exploitation or abuse. The Office will promote system-wide commitments to support and empower beneficiaries and aid workers, as well as the delivery of humanitarian assistance free from sexual harassment. In their coordination role, the Office's field offices will support humanitarian coordinators and humanitarian country teams in the implementation of inter-agency efforts to prevent sexual exploitation and abuse.
- 27.9 In line with the United Nations Disability Inclusion Strategy, the Office will work to make humanitarian action inclusive of persons with disabilities, in line with the Charter on Inclusion of Persons with Disabilities in Humanitarian Action. The inclusion of issues of persons with disabilities will also be assured through the inclusion of persons with disabilities in humanitarian data as a means to achieving an effective identification and response to their needs and rights in humanitarian settings, for more inclusive humanitarian programming.
- 27.10 As described in further detail under paragraph 27.105 below, subprogramme 3, Disaster risk reduction, has been reflected as a separate component of programme 23. Accordingly, subprogramme 4, Emergency support services, and subprogramme 5, Humanitarian emergency information and advocacy, have been renumbered as subprogrammes 3 and 4, respectively.

Impact of the pandemic and lessons learned

- 27.11 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular travel restrictions, which impeded the ability to identify and establish relationships with additional private sector partners in countries at risk of natural disasters, which, in turn, had an impact on the planned results under subprogramme 3. In other cases, virtual formats were adopted. For example, the 2022 Global Humanitarian Policy Forum was conducted virtually, which enabled the engagement of approximately 6,000 participants from across all regions
- 27.12 The Office continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including through mainstreaming the health precautions into humanitarian programming to ensure the safety of the people whom the Office serves, as well as by increasing private sector engagement before, during and after emergencies, increasing the scale and effectiveness of the humanitarian response in a coordinated manner, and recognizing that local response mechanisms are essential in situations such as the COVID-19 pandemic.

Legislative mandates

- 27.13 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

46/182 ; 77/28	Strengthening of the coordination of humanitarian emergency assistance of the United Nations	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
47/120 A and B	An Agenda for Peace: preventive diplomacy and related matters	72/305	Review of the implementation of General Assembly resolution 68/1 on the strengthening of the Economic and Social Council
52/12	Renewing the United Nations: a programme for reform	74/114	Persistent legacy of the Chernobyl disaster
52/167	Safety and security of humanitarian personnel	74/306	Comprehensive and coordinated response to the coronavirus disease (COVID-19) pandemic
60/1	2005 World Summit Outcome		
62/208	Triennial comprehensive policy review of operational activities for development of the United Nations system	75/290 A; 75/290 B	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council
63/147	New international humanitarian order	76/167	Protection of and assistance to internally displaced persons
67/226 ; 75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	77/28	Strengthening of the coordination of emergency humanitarian assistance of the United Nations
68/1	Review of the implementation of General Assembly resolution 61/16 on the strengthening of the Economic and Social Council	77/29	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	77/31	Safety and security of humanitarian personnel and protection of United Nations personnel
		77/199	Assistance to refugees, returnees and displaced persons in Africa

3. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1

Evaluation activities

- 27.15 The inter-agency evaluation of the humanitarian response in Yemen, conducted by the Office and completed in 2022, has guided the proposed programme plan for 2024.
- 27.16 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. For example, the Office will focus on key areas outlined in the findings of the evaluation, including analysis, advocacy, funding, coordination, quality of response and partnerships, together with other Inter-Agency Standing Committee partners as outlined in the humanitarian country team’s management response plan. In addition, the Office will support increased funding and capacity-building for national non-governmental organizations (NGOs) and strengthen their participation in humanitarian decision-making structures. The Office will also promote humanitarian access through the creation of common data-sharing protocols and joint inter-agency beneficiary targeting criteria.

- 27.17 The following evaluations to be conducted by the Office are planned for 2024:
- (a) Evaluation of the Office's efforts to promote gender equality and the empowerment of women and girls through humanitarian planning and response;
 - (b) Inter-agency evaluation of the humanitarian response in Somalia.

Programme of work

Subprogramme 1 Policy and analysis

Objective

- 27.18 The objective, to which this subprogramme contributes, is to improve the strategic and operational coherence of humanitarian response.

Strategy

- 27.19 To contribute to the objective, the subprogramme will:
- (a) Identify emerging humanitarian trends to support the comprehensive, authoritative and evidence-based assessment of global humanitarian needs and analyse challenges and opportunities for humanitarian policy and programme development;
 - (b) Identify policy and programmatic solutions and best practices and the innovative use of new and emerging technologies in the humanitarian field, and take steps to increase preparedness and organizational readiness, which will be disseminated widely to inform and guide policy, operational decisions and crisis management by national disaster managers and humanitarian organizations;
- 27.20 The above-mentioned work is expected to result in:
- (a) Humanitarian assistance that addresses evolving challenges and reduces the gap between humanitarian needs and capacity;
 - (b) A humanitarian system that remains relevant and adapts to the ever-changing operational environment;
 - (c) Humanitarian actors applying innovative solutions for humanitarian operations.

Programme performance in 2022

Humanitarian practitioners and policymakers have access to timely information to adapt to challenges facing the humanitarian operating environment

- 27.21 The subprogramme provided context and trends analysis that informed planning processes of the humanitarian community in 2022 and beyond. The analysis identified trends that affected humanitarian needs and shaped humanitarian action, including the crisis of climate change, slow and uneven economic growth, widening inequality, increasing instability and armed conflicts, pandemics and disease outbreaks. In response to those emerging trends, the subprogramme supported cross-functional and inter-agency coordinated analysis in support of response planning and programming of the humanitarian community. The subprogramme published the findings and recommendations related to the growing humanitarian impact of climate change, identifying transformational shifts for the humanitarian system, including on issues such as advocacy and communication; analysis and planning; humanitarian financing and programming; coordination and partnerships; and operational readiness.

27.22 Progress towards the objective is presented in the performance measure below (see table 27.2).

Table 27.2
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Member States and the humanitarian community have access to findings and recommendations related to global trends affecting humanitarian needs, informing their further analysis, planning and programming of humanitarian action

Planned results for 2024

Result 1: consolidated analysis for more focused evidence-based policy discussions and analysis

Programme performance in 2022 and target for 2024

- 27.23 The subprogramme’s work contributed to an increased uptake of Global Humanitarian Policy Forum research findings and recommendations in the policy agenda for the humanitarian community, which met the planned target, with more than 6,000 participants from 145 countries (75 per cent from the global South) in the Forum in 2022, representing a 200 per cent increase in participation compared with 2021. Research findings and recommendations covered issues related to access and humanitarian diplomacy, the impact of climate change on humanitarian action and the humanitarian implications of risks in the use of information and communications technology (ICT).
- 27.24 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 27.3).

Table 27.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Thematic alignment of the Global Humanitarian Overview with the Global Humanitarian Policy Forum	Trends in the Global Humanitarian Overview supported by policy priorities identified at the Global Humanitarian Policy Forum	Increased uptake of Global Humanitarian Policy Forum research findings and recommendations in the policy agenda for the humanitarian community	Global Humanitarian Policy Forum informs policy agenda of the humanitarian community to strengthen humanitarian assistance	Humanitarian community in 4 countries supports the development of guidance and best practices to address pressing challenges and policy priorities to strengthen humanitarian assistance and provide people-centred solutions

Result 2: strengthened humanitarian assistance to address the growing impacts of the crisis of climate change

Programme performance in 2022 and target for 2024

- 27.25 The subprogramme’s work contributed to the development of policies and strategies to mitigate future impacts of the crisis of climate change on communities, which met the planned target.
- 27.26 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 27.4).

Table 27.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Increased awareness by stakeholders of the growing crisis of climate change and its impact on the humanitarian crisis	Policies and strategies were developed by various stakeholders to adapt humanitarian action to the growing urgency of the crisis of climate change, for example, the call by the Inter-Agency Standing Committee for increased investment in building resilience and adaptation for the most vulnerable and worst affected, and concrete action and increased finance to avert, minimize and address losses and damages	<ul style="list-style-type: none"> • Road map for adapting humanitarian assistance to climate change developed by various stakeholders • Policies and strategies on mitigating impact of climate change implemented by various stakeholders to mitigate the future impact of the crisis of climate change on their communities 	Humanitarian policies and strategies in 4 specific country contexts that contribute to community resilience, including resilience to adverse climate events

Result 3: collective solutions for the protection of the humanitarian operating environment against emerging risks

Proposed programme plan for 2024

- 27.27 In 2022, the Global Humanitarian Policy Forum included a panel discussion that explored the main risks associated with the use of ICT to humanitarian action, its impact and the state of preparedness of humanitarian organizations to face data protection challenges.

Lessons learned and planned change

- 27.28 The lesson for the subprogramme was the need to strengthen humanitarian actors’ data protection against risks associated with the use of ICT. Inadequate policies and practices, digital infrastructure, and training and oversight are a few of the factors contributing to low ICT protective measures. In

applying the lesson, the subprogramme will conduct research and analysis to examine issues related to the safe use of ICT and, on the basis of evidence gathered, will work with partners to advocate improved protection of humanitarian data and operations against risks associated with the use of ICT, in line with the principles of neutrality, impartiality and independence. The focus of future thematic research, analysis and recommendations for the protection of the humanitarian operating environment against emerging risks will be determined on the basis of the evolving landscape.

27.29 Expected progress towards the objective is presented in the performance measure below (see table 27.5)

Table 27.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Increased awareness by the humanitarian community on how technology can be used to improve the effectiveness of humanitarian assistance	Increased availability of information and use of strategic technologies by humanitarian actors	Member States and the humanitarian community discuss risks associated with the use of ICT	Identification of gaps in the protection of the humanitarian operating environment against risks associated with the use of ICT	Humanitarian community begins to develop collective solutions to address gaps in the protection of the humanitarian operating environment against risks associated with the use of ICT

Deliverables

27.30 Table 27.6 lists all deliverables of the subprogramme.

Subprogramme 2 Coordination of humanitarian action and emergency response

Objective

- 27.31 The objective, to which this subprogramme contributes, is to ensure a coherent, effective and timely humanitarian response to reduce and alleviate human suffering in natural disasters and complex emergencies.

Strategy

- 27.32 To contribute to the objective, the subprogramme will:
- (a) Maintain an effective coordination system to convene humanitarian actors and support senior humanitarian leadership at the global level and in countries affected by natural disasters and complex emergencies, by coordinating timely and objective multisectoral assessments and analysis of humanitarian needs and supporting response planning and programming to provide life-saving assistance to people in need during and in the aftermath of emergencies;
 - (b) Promote the delivery of principled humanitarian assistance and coordinate resource mobilization efforts to reduce funding gaps that hamper humanitarian operations, including through effective partnerships with humanitarian actors, Member States and civil society, and the effective management and disbursement of funding from humanitarian pooled funds;
 - (c) Increase the use of anticipatory approaches and early warning early action systems to prevent and reduce human suffering, especially to disasters related to climate change;
 - (d) Strengthen linkages between humanitarian assistance and efforts to support resilience, early recovery and development to reduce the needs and vulnerabilities of affected people, ensuring that sex-, age- and disability-oriented data are taken into account in all aspects of the response.
- 27.33 The above-mentioned work is expected to result in:
- (a) Improved prioritization of humanitarian needs, based on informed and timely decision-making by humanitarian actors;
 - (b) Reduced duplication of response interventions and reduced gaps in humanitarian response;

- (c) An adequately funded international humanitarian system, to respond to increasingly frequent natural disasters and complex emergencies.

Programme performance in 2022

Reaching more people in need with responsive humanitarian assistance

27.34 In 2022, humanitarian crises continued unabated, driven by a mixture of conflict, climate shocks, economic vulnerability, weak health infrastructure and displacement. The subprogramme helped humanitarian partners and the United Nations to organize responses through 35 country plans and 8 regional plans, which enabled a common understanding of the specific humanitarian contexts and collective and coordinated responses. The subprogramme’s analysis, guidance and support in operational coordination contributed to humanitarian actors further investing in understanding the needs of affected communities, listening to their priorities and feedback in order to adapt their response. A total of 14.9 million people used feedback mechanisms to share their concerns, make complaints and ask questions. People facing acute food insecurity received time-sensitive food aid and cash assistance. At the same time, families received emergency agriculture and livelihood support, enabling them to produce their own food, thereby diversifying nutrition and building resilience.

27.35 Progress towards the objective is presented in the performance measure below (see figure 27.I).

Figure 27.I

Performance measure: number of people receiving at least one form of humanitarian assistance and number of countries (annual)

(Millions)

Planned results for 2024

Result 1: strengthened humanitarian response planning

Programme performance in 2022 and target for 2024

- 27.36 The subprogramme's work contributed to the improved quality of humanitarian needs analysis and response plans, with humanitarian response plans in 27 countries reflecting priorities based on intersectoral needs analysis, which met the planned target.
- 27.37 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 27.7).

Table 27.7

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Framework endorsed by the Inter-Agency Standing Committee	Application of new framework for selected humanitarian needs overviews and humanitarian response plans	Humanitarian response plans in 27 countries reflect priorities based on intersectoral needs analysis	100 per cent of humanitarian response plans prioritized based on a joint analysis of needs	100 per cent of humanitarian response plans reflect priorities based on the implementation of the revised joint intersectoral needs analysis framework, which combines sector-specific assessments and demographic and geographical characteristics to identify those most vulnerable according to the severity of their needs

Result 2: increased use of anticipatory approaches and early warning early action systems

Programme performance in 2022 and target for 2024

- 27.38 The subprogramme's work contributed to the increased use of anticipatory approaches by Member States and the humanitarian community, including for floods in Bangladesh, Chad, Nepal and South Sudan, as well as for droughts in Burkina Faso, Ethiopia, the Niger and Somalia, which met the planned target.
- 27.39 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 27.8).

Table 27.8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Central Emergency Response Fund early action approach is formalized with frameworks for food security in Somalia (\$15 million), for floods in Bangladesh (\$2.8 million) and for drought in Ethiopia (\$13.2 million)	Central Emergency Response Fund-supported early action is reviewed, and lessons learned for anticipatory approaches	Increased use of anticipatory approaches by Member States, for floods in Bangladesh, Chad, Nepal and South Sudan, as well as for droughts in Burkina Faso, Ethiopia, the Niger and Somalia	Continue piloting of anticipatory approaches and early action early warning systems, especially to climate-related natural disasters, considering lessons learned	Anticipatory approaches are used by humanitarian actors in 15 countries to predict and respond to the humanitarian impact of predictable hazards

Result 3: transforming humanitarian programming to improve the delivery of aid to people in need

Proposed programme plan for 2024

27.40 The humanitarian programme cycle consists of a set of interlinked tools to assist the Resident and Humanitarian Coordinator and the humanitarian country team to improve the delivery of humanitarian assistance and protection through improved preparation, prioritization, steering and monitoring of the collective response based on evidence. The implementation of the cycle is increasingly challenged by the growing humanitarian needs, complex operating environments, evolving global expectations and mismatch between capacities and resources. There is a need to balance rigorous needs and response analysis with contextual flexibility. The subprogramme has been examining the ways in which coordination mechanisms can continue to be improved.

Lessons learned and planned change

27.41 The lesson for the subprogramme was the need to continue to improve planning processes and the humanitarian programme cycle, which would enable humanitarian organizations to have more time to focus on the delivery of humanitarian assistance. In applying the lesson, the subprogramme will review elements of the current cycle and identify ways to streamline the process and simplify elements, such as the consolidation of guidance on cross-cutting issues and improving flexibility and methodology. It is expected that these changes will lead to a simplified, shorter humanitarian programme cycle and outcome documents (humanitarian needs overviews and humanitarian response plans), thereby providing more time to focus on the delivery of humanitarian assistance. The introduction of a revised severity-based intersectoral analysis framework will support improved prioritization within humanitarian response plans to allow for the more accurate targeting of beneficiaries and the more effective allocation of resources. In addition, these improvements will enable increased participation and leadership of affected communities and local and national actors in humanitarian coordination structures and processes.

27.42 Expected progress towards the objective is presented in the performance measure below (see table 27.9)

Table 27.9
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Humanitarian programme cycle facilitation package for 2023, with initial tips on flexibility and streamlining narratives available to the humanitarian community	Revised humanitarian programme cycle 2024 facilitation package available to the humanitarian community, including a new joint intersectoral analysis framework and a consolidation of cross-cutting guidance as elements of the broader humanitarian programme cycle reform	75 per cent of humanitarian country operations report simplified, shorter humanitarian programme cycle processes and improved ability to focus on delivery of humanitarian assistance

Deliverables

27.43 Table 27.10 lists all deliverables of the subprogramme.

Table 27.10
Subprogramme 2: deliverables for the period 2022–2024 by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Report to the General Assembly on the Central Emergency Response Fund	1	1	1	1
2. High-level pledging events on the provision of international assistance to countries affected by humanitarian emergencies	3	3	3	3
Substantive services for meetings (number of three-hour meetings)	2	2	2	2
3. High-level meetings and side events of the General Assembly on the provision of international assistance to countries affected by humanitarian emergencies	2	2	2	2

Seminars, workshops, and training events (number of days)	2	–	2	–
4. Workshops on international humanitarian law and other emerging issues for resident coordinators/humanitarian coordinators	2	–	2	–
C. Substantive deliverables				
Consultation, advice and advocacy: briefings to the Security Council on specific complex emergency situations; informal consultations with more than 50 Member States on specific emergency situations and the financing of humanitarian requirements; consolidated inter-agency appeals for more than 60 countries and regions affected by humanitarian emergencies; consultations with humanitarian organizations in more than 60 countries on operations, policies and coordination arrangements; and consultations with Member States, regional organizations and the private sector on common humanitarian action.				

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

Databases and substantive digital materials: monitoring mechanisms in support of operational partners (e.g., financial tracking systems).

D. Communication deliverables

Outreach programmes, special events and information materials: meetings and special events on specific complex emergency situations; quarterly donor briefings on humanitarian financing; the Central Emergency Response Fund annual report; consolidated annual report on country-based pooled funds; and Global Humanitarian Overview.

Digital platforms and multimedia content: Central Emergency Response Fund data hub.

E. Enabling deliverables

Administration: grant delivery allocations to United Nations humanitarian agencies and the International Organization for Migration from the Central Emergency Response Fund for new and protracted emergencies; and allocation of grants from the country-based pool funds.

Subprogramme 3 Emergency support services

Objective

- 27.44 The objective, to which this subprogramme contributes, is to expedite international humanitarian assistance to victims of emergencies and natural disasters.

Strategy

- 27.45 To contribute to the objective, the subprogramme will:
- (a) Provide effective and well-coordinated operational response support to disaster-affected States and continue to coordinate and support humanitarian actors to prepare for, plan, deliver and monitor the humanitarian response through the humanitarian programme cycle;
 - (b) Strengthen and build the capacities of Member State mechanisms for emergency response through the management of various technical response services, including the United Nations Disaster Assessment and Coordination Team mechanism, the International Search and Rescue Advisory Group system, the environmental emergency response mechanism of the Joint Environment Unit of the United Nations Environment Programme and the Office for the Coordination of Humanitarian Affairs;
 - (c) Promote the membership of developing and disaster-prone countries in various emergency response networks, including through initiatives such as the International Search and Rescue Advisory Group recognized national accreditation process and external classifications and reclassifications, and the United Nations Disaster Assessment and Coordination Team induction courses;
 - (d) Promote collaboration with various partner organizations, including the private sector, through the Connecting Business initiative, which is managed jointly by the Office for the Coordination of Humanitarian Affairs and the United Nations Development Programme, and United Nations humanitarian civil-military coordination and humanitarian negotiation services; and by continuing to conduct courses and training sessions and meeting regularly with partners through focal points in regional and country offices;
 - (e) Standardize and improve operational procedures for international urban search and rescue teams through the International Search and Rescue Advisory Group and activate and coordinate rapid response coordination platforms, such as the virtual On-Site Operations Coordination Centre and the Global Disaster Alert and Response Coordination System, as well as provide

near real-time alerts on natural disasters around the world and tools to facilitate response coordination;

- (f) Further strengthen the coordination capacity of international responders through the provision of training, guidance and technical support, including through a continued focus on the effective facilitation and functioning of inter-cluster coordination groups and their associated subgroups, and on the role and capacity of local responders.

27.46 The above-mentioned work is expected to result in:

- (a) Enhanced response capacity of local, regional and international responders for sudden onset disasters;
- (b) More efficient and timely mobilization and deployment of emergency response services;
- (c) Improved effectiveness and prioritization of preparedness and response of the national emergency management authorities in disaster-prone countries, ensuring that assistance and protection reach the people who need it most.

Programme performance in 2022

Rapid response to sudden-onset and complex emergencies within 48 hours

27.47 In 2022, the subprogramme responded to sudden-onset and complex emergencies in six countries (Afghanistan, Democratic Republic of the Congo, Gambia, Madagascar, Paraguay and Peru) through its United Nations Disaster Assessment and Coordination Team. For example, in Afghanistan a team deployed to support the Office for the Coordination of Humanitarian Affairs Afghanistan country office in response to the earthquake that struck the eastern border region of the country. In Madagascar, following a request from the resident coordinator and Government after tropical cyclone Bastirai, a team deployed to support the Government and humanitarian leadership on the ground on coordination mechanisms and evidence-based needs assessment and analysis. In Peru, following an oil spill and on the basis of a request for technical assistance from the Government, an environmental emergency response team, including environmental experts and United Nations Disaster Assessment and Coordination Team members, was dispatched to advise national authorities on incident management and coordination, rapid socioenvironmental assessments, the review of any existing contingency plans and strengthening emergency preparedness.

27.48 Progress towards the objective is presented in the performance measure below (see figure 27.II).

Figure 27.II
Performance measure: requests for international assistance in which United Nations Disaster Assessment and Coordination Teams were mobilized and dispatched to the affected country within 48 hours of receiving the request (annual)

(Percentage)

Planned results for 2024

Result 1: enhanced partnership with the private sector in collective humanitarian assistance

Programme performance in 2022 and target for 2024

- 27.49 The subprogramme’s work contributed to 13 local private sector networks supported by the Connecting Business initiative that responded to crises, which did not meet the planned target of 18. The target was not met owing to the ongoing effects of the COVID-19 pandemic and the related travel restrictions, which hindered the subprogramme’s ability to identify and establish relationships with additional private sector partners in countries at risk of natural disasters.
- 27.50 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 27.III).

Figure 27.III
Performance measure: number of Connecting Business initiative-supported local private sector networks that respond to crises (cumulative)

Result 2: crisis-affected people received emergency humanitarian assistance in the immediate aftermath of a catastrophe

Programme performance in 2022 and target for 2024

- 27.51 The subprogramme’s work contributed to 194 emergency responders equipped with the skills and capacity to deploy and respond to sudden-onset emergencies, which exceeded the planned target of 80.
- 27.52 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 27.IV).

Figure 27.IV

Performance measure: number of emergency responders trained in United Nations Disaster Assessment and Coordination Team and United Nations humanitarian civil-military coordination, to deploy and respond to sudden-onset emergencies (annual)^a

^a The performance measure has been updated to reflect annual figures rather than cumulative.

Result 3: engagement of all actors to improve access for the most vulnerable to humanitarian assistance and protection

Proposed programme plan for 2024

- 27.53 Unimpeded and timely access allows humanitarian actors to establish operations, move goods and personnel where they are needed, implement distributions, provide health services, and carry out other activities, and allows affected populations to benefit in full from the assistance and services made available. At the global and country levels, the subprogramme engages and negotiates with relevant actors and stakeholders to help to ease access constraints and ensure that the most vulnerable people have access to humanitarian assistance and protection.

Lessons learned and planned change

- 27.54 The lesson for the subprogramme was that the absence of or limited engagement with all actors involved in conflict often contributes to a less effective humanitarian response. In applying the lesson, the subprogramme will increase engagement with all actors by enhancing the use of humanitarian negotiations and humanitarian diplomacy to advance humanitarian goals, including establishing and maintaining unimpeded access. The Office will reinvigorate strategic partnerships with Member States and regional organizations, to support access efforts, in particular in countries experiencing armed conflicts. The Office will also strengthen communication with various stakeholders, including through its civil-military coordination services, to raise awareness of humanitarian principles and protect vulnerable civilians, in particular women, children, persons with disabilities, older persons and ethnic and religious minorities.
- 27.55 Expected progress towards the objective is presented in the performance measure below (see figure 27.V)

Figure 27.V
Performance measure: number of contexts in which interlocutors with influence on humanitarian access engage in humanitarian diplomacy and negotiations (annual)

Deliverables

27.56 Table 27.11 lists all deliverables of the subprogramme.

Table 27.11

Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	5	5	5	5
1. On the interoperability of response tools and procedures	1	1	1	1
2. On response capacity-building	4	4	4	4
Seminars, workshops, and training events (number of days)	50	50	55	55
3. Training events on various response services and field coordination (e.g., United Nations Disaster Assessment and Coordination Team; United Nations humanitarian civil-military coordination; environmental emergency response; International Search and Rescue Advisory Group; humanitarian programme cycle), at regional and international levels	50	50	55	55
Humanitarian assistance missions (number of missions)	12	13	13	13
4. United Nations humanitarian civil-military coordination support missions	6	7	6	6
5. United Nations Disaster Assessment and Coordination Team missions (subject to occurrence of disasters and at the request of disaster-affected governments or humanitarian country teams)	6	6	7	7
C. Substantive deliverables				
Consultation, advice, and advocacy: diplomacy and engagement with Member States and key stakeholders to facilitate humanitarian access; and advisory services to 70 key stakeholders and Member States on rapid response coordination, including United Nations humanitarian civil-military coordination and integrating environmental considerations into humanitarian response.				
Databases and substantive digital materials: guidance, tools, and handbooks on humanitarian coordination response services; electronic tools related to rapid response and humanitarian coordination; and roster for humanitarian coordinators and operational partners.				
D. Communication deliverables				
Outreach programmes, special events and information materials: annual partnership and outreach event to facilitate collaboration and interoperability among 2,000 stakeholders, including humanitarian responders; and guidance materials on emergency response services annually.				
Digital platforms and multimedia content: websites for technical humanitarian response services.				

Subprogramme 4 Humanitarian emergency information and advocacy

Objective

- 27.57 The objective, to which this subprogramme contributes, is to ensure effective advocacy of humanitarian principles and knowledge-sharing in serving populations affected by disasters and emergencies.

Strategy

- 27.58 To contribute to the objective, the subprogramme will:
- (a) Intensify its efforts to raise public awareness of international humanitarian law through targeted communications, clear and accessible messages, proactive media engagement and more field-oriented messaging;
 - (b) Produce and improve its analytical information products, including digital products and services.
- 27.59 The above-mentioned work is expected to result in:
- (a) Increased respect for international humanitarian law to enhance the protection of affected people and improved unimpeded and unhindered access to humanitarian assistance;
 - (b) Improved humanitarian decisions based on more timely and accurate information on humanitarian crises, including intersectoral analysis of the humanitarian situation and its severity and needs.

Programme performance in 2022

Humanitarian actors track developments regarding the drought in the Horn of Africa for better-informed decision-making

- 27.60 In 2022, the Horn of Africa endured one of the worst droughts in more than four decades, potentially affecting more than 36 million people across Ethiopia, Kenya and Somalia. Two districts in Somalia were at imminent risk of famine and at least 23 million people faced high levels of acute food insecurity owing to the situation between October and December 2022. The subprogramme created an interactive visual tool to bring together key figures and data sets from the Office and its partners related to the potential humanitarian situation in the region. The Horn of Africa drought data explorer included data related to levels of acute food insecurity, seasonal rainfall anomalies, operational priority areas, people reached with assistance, armed conflict, funding and more. Released in October 2022, the guiding principle for developing the data explorer was to make it easier for humanitarian actors to track developments for better-informed decision-making. The drought data explorer contributed to raising awareness of the needs of people affected by drought, the acute food insecurity in the region, operational priority areas and the funding needed.
- 27.61 Progress towards the objective is presented in the performance measure below (see table 27.12).

Table 27.12
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	<ul style="list-style-type: none"> • Between October and December 2022, the Horn of Africa drought data explorer had 4,741 unique views and 2,870 unique users. Use of the drought data explorer by humanitarian actors and Member States informed humanitarian action • Throughout 2022, the humanitarian community managed to reach at least 17.5 million people affected by drought in Ethiopia, Kenya and Somalia. More than 400 organizations in the region, most of them local and community-based, are on the frontline of the response

Planned results for 2024

Result 1: improved humanitarian response planning for secondary impacts of COVID-19 on other infectious diseases

Programme performance in 2022 and target for 2024

- 27.62 The subprogramme’s work contributed to improved humanitarian response planning by the use of the expanded model, in the context of secondary impacts of COVID-19 on the spread and treatment of other infectious diseases, which met the planned target. Since its inception, the data from this model have been downloaded more than 420,000 times.
- 27.63 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 27.13).

Table 27.13
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
COVID-19 model for humanitarian contexts, forecasting the number of cases, hospitalizations and deaths over 2 or 4 weeks	Secondary impacts of COVID-19 on spread and treatment of other infectious diseases defined by use of the model, for example, the spread of measles and malaria in Somalia	Humanitarian response planning was improved by the use of the expanded model. Since its inception, the data from this model have been downloaded more than 420,000 times	Member States use the expanded model for strengthening humanitarian response planning, upon request	Member States incorporate lessons learned from the expanded model for epidemic forecasting and apply similar approaches to other infectious diseases in humanitarian settings, on a needs basis

Result 2: strengthened disaster risk analysis for humanitarian response

Programme performance in 2022 and target for 2024

- 27.64 The subprogramme’s work contributed to 16 countries with strengthened risk analysis capacities for humanitarian response, which met the planned target.
- 27.65 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 27.VI).

Figure 27.VI

Performance measure: number of countries with strengthened risk analysis capacities for humanitarian response (cumulative)

Result 3: strengthened advocacy for an adequate response to humanitarian situations

Proposed programme plan for 2024

- 27.66 Communication plans that are developed jointly with humanitarian partners and that incorporate risk analysis and anticipatory approaches help to raise awareness of humanitarian needs and strengthen advocacy for humanitarian funding, in particular in respect of high-level conferences on key humanitarian situations. It is essential for the technical knowledge and experiential learning to be transformed into humanitarian advocacy and communications, ensuring that humanitarian response plans are adequately resourced, given that they are typically underfunded. High-level pledging conferences organized either by the Office or jointly with partners and Members States provide high visibility opportunities in this regard. Communication plans that were utilized for high-level events on key humanitarian situations in Afghanistan, Somalia, Ukraine and Yemen, as well as the Horn of Africa, helped to raise awareness of humanitarian crises and contributed to fundraising initiatives.

Lessons learned and planned change

- 27.67 The lesson for the subprogramme was that assessing risk of and anticipating different kinds of shocks requires substantial learning, through engagement with technical experts and experiential learning. Initial pilots of risk analysis and anticipatory approaches covered drought, epidemiological shocks, food insecurity and flooding, thereby developing experience across this wide array of shocks. In applying the lesson, the subprogramme will focus on further improving the analysis and anticipation of these shocks, building on and improving the knowledge base of the initial pilots and enabling better analysis and wider geographical applications of risk analysis and anticipatory frameworks. This enhanced analysis will enable more effective humanitarian advocacy and communication, grounded in evidence, to increase awareness of emerging humanitarian needs and raise funds for an adequate humanitarian response.
- 27.68 Expected progress towards the objective is presented in the performance measure below (see table 27.14)

Table 27.14
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
\$7.2 billion pledged through the fourth Brussels Conference on Supporting the Future of Syria and the Region and the virtual high-level humanitarian event on the central Sahel	\$6 billion pledged through the virtual high-level pledging event for the humanitarian situation in Yemen and the fifth Brussels Conference on Supporting the Future of Syria and the Region	\$9.9 billion pledged through the sixth Brussels Conference on Supporting the Future of Syria and the Region, the Ukraine flash appeal and the high-level pledging conference on Afghanistan	Pledges enable adequate response to humanitarian situations	Pledges enable adequate response to humanitarian situations

Deliverables

27.69 Table 27.15 lists all deliverables of the subprogramme.

Table 27.15
Subprogramme 4: deliverables for 2024, by category and subcategory

Category and subcategory
<p>C. Substantive deliverables</p> <p>Consultation, advice, and advocacy: advocacy and advice to humanitarian partners, including a humanitarian communications group to strengthen consistency in messaging and the planning and sequencing of communications content.</p> <p>Databases and substantive digital materials: field guides, maps and other reference information for more than 1,000 humanitarian operational partners; and information management, shared data standards for information exchange in the humanitarian community, databases and electronic tools, including the International Search and Rescue Advisory Group urban search and rescue directory and common risk and vulnerability assessment methodologies and tools.</p> <p>D. Communication deliverables</p> <p>Outreach programmes, special events and information materials: information materials on coordination of humanitarian action; and World Humanitarian Day campaign on protection of humanitarian workers.</p> <p>External and media relations: daily media updates to United Nations accredited correspondents through the noon briefing in New York and twice-weekly Palais des Nations briefings in Geneva; at least 12 on-the-record and background media briefings for global media outlets and two dozen interviews to advocate assistance for people caught in humanitarian crises, to reach decision-making audiences in donor countries and countries with humanitarian situations; and comprehensive communications for the launch of the Global Humanitarian Overview (annual consolidated appeals), in support of the Central Emergency Response Fund, and of pledging conferences for large humanitarian crises.</p> <p>Digital platforms and multimedia content: humanitarian community digital platforms, such as ReliefWeb, ReliefWeb Response and Humanitarian Data Exchange; guidance and templates on various reporting products for humanitarian organizations and Member States, including situation report and humanitarian snapshots; and video, social media and other multimedia content on humanitarian issues, international humanitarian law, international human rights law, humanitarian principles, protection of civilians, specific emergency situations and resource mobilization.</p> <p>E. Enabling deliverables</p> <p>Information and communications technology: global information and communications technology and product support for collaboration services; and information and communications technology for emergency response and business continuity services, business intelligence and data analysis services.</p>

B. Proposed post and non-post resource requirements for 2024

Overview

27.70 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 27.16 to 27.18.

Table 27.16

27.71 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 27.19 to 27.21 and figure 27.VII.

27.72 As reflected in tables 27.19 (1) and 27.20 (1), the overall resources proposed for 2024 amount to \$25,975,500 before recosting, reflecting a net increase of \$113,700 (or 0.4 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 27.VII
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

27.73 As reflected in table 27.19 (1), resource changes reflect an increase of \$113,700 under other staff costs that relates to the provision at continuing vacancy rates for four positions of one Joint Operations Officer/Deputy Head of Operations (P-4), two National Humanitarian Affairs Officer/Liaison (National Professional Officer) and one Associate Information Analyst/Watchkeeper (National Professional Officer) established in 2023 pursuant to General Assembly resolution [77/263](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established positions.

Other changes

- 27.74 As reflected in table 27.19 (1), cost-neutral changes are proposed as follows:
- (a) **Executive direction and management.** The decrease of \$238,300 under posts reflects the proposed outward reassignment of one Chief of Section, Humanitarian Affairs (P-5) in New York to programme support as Chief of Section, Programme Management, to be based in Geneva (see annex II to the present report for details);
 - (b) **Subprogramme 2.** The increase of \$11,600 under posts is due to the proposed redeployment of one post of Director of Humanitarian Financing and Resource Mobilization (D-2) from Geneva to New York (see annex II for details);
 - (c) **Programme support.** The net increase of \$226,700 reflects: (i) the increase of \$228,000 under posts due to the inward reassignment of one P-5 post from executive direction and management as Chief of Section, Programme Management, (see annex II for details); and (ii) the decrease of \$1,300 under general operating expenses that takes into account expenditure experience.

Extrabudgetary resources

- 27.75 As reflected in tables 27.19 (2) and 27.20 (2), the Office for the Coordination of Humanitarian Affairs expects to continue to receive both cash and in-kind contributions. Extrabudgetary resources (cash contributions) amount to \$352,058,100. The resources would complement regular budget resources and would be used mainly to support humanitarian assistance, as detailed in the individual components and subprogrammes. Anticipated in-kind contributions would provide for rent-free premises with an estimated value of \$158,700 and technical assistance and expert services with an estimated value of \$412,100.
- 27.76 The extrabudgetary resources under the present section are subject to the oversight of the Office for the Coordination of Humanitarian Affairs, which has delegated authority from the Secretary-General.

Executive direction and management**1. Executive direction and management**

- 27.77 The executive direction and management component comprises the Office of the Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator, the Office of the Assistant Secretary-General and Deputy Emergency Relief Coordinator, the United Nations Monitoring Mechanism for the Syrian Arab Republic and the Joint Coordination Centre. The Office of the Under-Secretary-General oversees the Internally Displaced Persons Unit and the Strategic Communications Branch. The Office of the Assistant Secretary-General oversees the evaluation activities of the Evaluation and Oversight Section, the Policy Branch, the Operations and Advocacy Division, the Coordination Branch, the Information Management Branch, the Executive Office, the Regional, Field and Disaster Response Adviser offices and the Humanitarian Financing and Resource Mobilization Division.
- 27.78 The overall responsibilities of the executive direction and management component include the following:
- (a) Provide overall direction, management and policy guidance to the offices in New York and Geneva and in the field, including leadership in the coordination of the overall response of the international community to disasters and humanitarian emergencies;
 - (b) Undertake humanitarian diplomacy with Governments of affected countries, including the facilitation of access to emergency areas for the rapid delivery of humanitarian assistance;
 - (c) Provide oversight of the humanitarian coordination leadership in the field, as well as management of the field operations;

- (d) Lead on the humanitarian finances and resource mobilization functions, manage the emergency services on behalf of the United Nations system and coordinate with Member States, donors and partners;
- (e) Facilitate the work of the Inter-Agency Standing Committee in relation to policy development and advocacy in the humanitarian sector;
- (f) Act as the main adviser to the Secretary-General on humanitarian issues and cooperate closely with other United Nations offices in the planning and coordination of United Nations humanitarian assistance activities in crisis situations;
- (g) Monitor, with the consent of the relevant neighbouring country of the Syrian Arab Republic, the loading of all humanitarian relief consignments of the United Nations humanitarian agencies and their implementing partners;
- (h) Oversees the Initiative on the Safe Transportation of Grain and Foodstuffs from Ukrainian Ports under the Black Sea Grain Initiative;
- (i) Assist the Coordinator of the Executive Committee on Humanitarian Affairs in providing the overall direction, management and supervision of the offices in New York and Geneva, as well as in supporting Office for the Coordination of Humanitarian Affairs coordination in the field;
- (j) Interact with Member States, intergovernmental organizations, NGOs and operational humanitarian agencies, as well as departments of the Secretariat whose responsibilities encompass peacekeeping, political and economic activities, to facilitate joint responses, where applicable;
- (k) Serve as Chair of the Inter-Agency Standing Committee Working Group and act on behalf of the Emergency Relief Coordinator in his/her absence;
- (l) Provide strategic advice on issues relating to internally displaced persons and engage with relevant partners to drive the implementation of the Secretary-General's action agenda on internal displacement, including through membership in the Steering Group on Internal Displacement Solutions and co-chairing of the GP2.0 multi-stakeholder global platform on internal displacement;
- (m) Manage and coordinate internal evaluations of the Office for the Coordination of Humanitarian Affairs and inter-agency evaluations, provide secretariat services and chair the Inter-agency Humanitarian Evaluation steering group and coordinate external oversight to ensure organization compliance with audits and evaluation recommendations.

27.79 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycle, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office is integrating environmental management practices into its operations. It is developing an environmental management system to support environmental and climate protection. As part of that system, the Office is developing an environment and climate action strategy, a policy and an information and analysis dashboard. Country-level initiatives include waste management processes that promote recycling, reduction in the use of single-use plastics and continuous guidance to countries on conducting environmental impact assessments in humanitarian action and integrating environmental and climate considerations into programming.

27.80 In 2024, the Office will systematically measure and report on environmental performance through the implementation of its environmental management system. The Office will map its programmatic and operational environmental impacts, work to reduce adverse environmental impacts and maintain climate neutrality through a variety of initiatives. Such initiatives include increasing its use of videoconference and remote meeting options, consistently reviewing its vehicle fleet to ensure that replacements are made only if required and moving to shared facilities when safe, practical and in line with the humanitarian principles, in order to reduce its environmental footprint.

Part VI Humanitarian assistance

27.81 Information on the timely submission of documentation and advance booking for air travel is reflected in table 27.22. Managers are asked to implement preventive and corrective measures. Notwithstanding, the impact of the COVID-19 pandemic and related restrictions on travel in 2022 limited the ability to comply with advance booking for air travel, which resulted in a lower compliance rate. Compliance rates are monitored, and statistics and trends are distributed to managers on a quarterly basis. In 2024, the Office will continue to implement measures to improve the compliance rate for air tickets, including: (a) advance planning and nomination of travellers; (b) onboarding of staff planned in advance with contingencies in place (e.g., advance request for visas); and (c) undertaking communications to staff and managers to raise awareness of the requirement.

Table 27.22
Compliance rate

(Percentage)

	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Actual 2022</i>	<i>Planned 2023</i>	<i>Planned 2024</i>
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	22	16	22	100	100

27.82 The proposed regular budget resources for 2024 amount to \$1,633,600 and reflect a decrease of \$238,300 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 27.74 (a) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 27.23 and figure 27.VIII.

Figure 27.VIII
Executive direction and management: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

27.83 Extrabudgetary resources for the component amount to \$4,507,300. The resources would complement regular budget resources and would support the Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator and the Assistant Secretary-General for Humanitarian Affairs and Deputy Emergency Relief Coordinator in fulfilling their roles as explained in paragraphs 27.77 and 27.78 above. The resources would also support the coordination of the international community’s response to disasters and emergencies and support the Emergency Relief Coordinator in undertaking humanitarian diplomacy with Governments of affected countries. The resources would also be used for servicing inter-agency meetings, meetings of the Inter-Agency Standing Committee and its working groups and meetings of the Executive Committee on Humanitarian Affairs.

2. United Nations Monitoring Mechanism for the Syrian Arab Republic

27.84 The role and functions of the United Nations Monitoring Mechanism for the Syrian Arab Republic were defined by the Security Council in its resolution 2165 (2014), in which the Council authorized the United Nations humanitarian agencies and their implementing partners to use the Syrian border crossings of Bab al-Salam and Bab al-Hawa with Türkiye, Ya’rubiyah with Iraq and Ramtha with Jordan in order to ensure that humanitarian assistance reaches people in need throughout the Syrian Arab Republic through the most direct routes, with notification to the Syrian authorities.

27.85 The Mechanism monitors, with the consent of the relevant neighbouring country of the Syrian Arab Republic, the loading of all humanitarian relief consignments of the United Nations humanitarian agencies and their implementing partners at the relevant United Nations facilities and any subsequent opening of the consignments by the customs authorities of the relevant neighbouring country, for passage into the Syrian Arab Republic, in order to confirm the humanitarian nature of the relief consignments. Following the decision of the Security Council to exclude the border crossings of Ramtha, Ya’rubiyah and Bab al-Salam from the list of authorized crossings, in its resolutions 2504 (2020) and 2533 (2020), and reaffirmed most recently in its resolution 2672 (2023), the United Nations agencies and their implementing partners are relying on the border crossing of Bab al-Hawa to send humanitarian assistance into the Syrian Arab Republic until 10 July 2023. Accordingly, the Mechanism monitors the loading of the United Nations relief consignments and their passage into the Syrian Arab Republic through that crossing exclusively, provides monthly briefings to the Council and reports on a regular basis, at least every 60 days, on the implementation of the

resolutions. The most recent report (S/2023/127) is dated 21 February 2023. The Mechanism comprises the Office of the Chief, the Monitoring Team and the Support and Security Unit, which are based in Gaziantep, Türkiye, and is supported by a Liaison Officer in New York.

27.86 The proposed regular budget resources for the United Nations Monitoring Mechanism for the Syrian Arab Republic for 2024 under this component amount to \$3,014,500 and include 16 general temporary assistance positions (1 D-1, 2 P-4, 3 P-3, 3 P-2, 2 National Professional Officer and 5 Local level) and 3 United Nations Volunteers. The proposed resources reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources are reflected in table 27.24 and figure 27.IX.

3. Black Sea Grain Initiative support office

- 27.87 The Initiative on the Safe Transportation of Grain and Foodstuffs from Ukrainian Ports was signed by the Russian Federation, Türkiye and Ukraine on 22 July 2022, with the Secretary-General signing as a witness. The Initiative is linked closely to the purposes described in the Charter of the United Nations and the leadership roles of the Secretary-General and of the Emergency Relief Coordinator in ensuring a rapid and coherent response to natural disasters and other emergencies as set out in General Assembly resolution [46/182](#). It also responds to more recent calls from the Assembly, in its resolution [77/28](#), to urgently increase measures to prevent famine and reduce and address acute food insecurity. In its resolution [77/186](#), the Assembly welcomed the efforts of the Secretary-General and other parties to coordinate a comprehensive global response to mitigate global food insecurity and its humanitarian impact through the parallel implementation of the Initiative and the memorandum of understanding between the Russian Federation and the Secretariat of the United Nations on promoting Russian food products and fertilizers to the world markets. The Initiative has been taken forward in recognition of the connection between global food security and the predictable supply of grain, other foodstuffs and fertilizers, including ammonia, exported through Ukrainian ports. It is based on agreements concluded by the parties to the International Convention for the Safety of Life at Sea, 1974, as amended, chapter XI-2, regulation 11, and on the International Code for the Security of Ships and of Port Facilities, part B, paragraph 4.26.
- 27.88 The purpose of the Black Sea Grain Initiative is to facilitate the safe navigation for the export of grain and related foodstuffs and fertilizers, including ammonia, from the Ukrainian ports of Odesa, Chornomorsk and Yuzhne. This is being achieved through the establishment of a maritime humanitarian corridor and provision by the parties of maximum assurances regarding a safe and secure environment for all vessels engaged in the Initiative. It also provides for the establishment of the Joint Coordination Centre in Istanbul, Türkiye, under the auspices of the United Nations, including representatives of the three parties and the United Nations, with responsibility for conducting general oversight and coordination of the Initiative. Incoming and outgoing vessels are inspected by teams consisting of representatives of the parties to the Initiative and the United Nations.
- 27.89 The three parties recognized the role of the Secretary-General in securing the discussions for the Black Sea Grain Initiative and requested his further assistance in its implementation, in the furtherance of the humanitarian mission of the United Nations and subject to its authorities and mandates. It is stipulated in the terms of the Initiative that its initial term was 120 days from the date of its signature and that it can be extended automatically for the same period, unless one of the parties notifies the others of the intent to terminate the Initiative or modify it. By its resolution [77/263](#), the General Assembly appropriated \$8,138,500 in 2023 for the continuation of the United Nations activities to mitigate global food security and its humanitarian impact.
- 27.90 The Black Sea Grain Initiative support office will continue to undertake the following activities as part of the assistance in the implementation of the Initiative that the parties have requested from the Secretary-General: (a) coordination and participation in inspection teams checking incoming and outgoing vessels bound for or returning from the designated Ukrainian ports, operating on a daily basis, under the auspices of the Joint Coordination Centre; (b) provision of secretariat assistance for the work of the Centre; (c) dialogue and engagement with the parties and external actors and entities by the United Nations Coordinator for the Black Sea Grain Initiative; (d) maintenance of a maritime watch room monitoring vessel movements; (e) support for public information activities linked to United Nations assistance in the implementation of the Initiative; and (f) information management assistance linked to implementation of the Initiative.
- 27.91 The proposed regular budget resources for the assistance of the United Nations in the implementation of the Black Sea Grain Initiative support office in 2024 amount to \$8,252,200 and include 31 general temporary assistance positions (1 Assistant Secretary-General, 1 D-1, 4 P-5, 4 P-4, 8 P-3, 9 National Professional Officer and 4 Local level). The proposed resources reflect an increase of \$113,700 compared with the approved appropriation for 2023, as explained in paragraph 27.73 above. Additional details on the distribution of the proposed resources are reflected in table 27.25 and figure 27.X.

Programme of work

**Subprogramme 1
 Policy and analysis**

27.92 The proposed regular budget resources for 2024 amount to \$650,600 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 27.26 and figure 27.XI.

Table 27.26

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

27.93 Extrabudgetary resources for the subprogramme amount to \$1,216,600. The resources would complement regular budget resources and would be used mainly for the servicing of meetings, seminars, workshops and training events tailored to improve the strategic and operational coherence of the humanitarian response. Resources would also provide for technical materials to support the strengthening and further development of a humanitarian policy agenda and advance the protection of civilian agenda in the Security Council. The resources would further provide for the production of access assessments in times of humanitarian crisis and the organization of events with academic institutions and NGOs to promote humanitarian assistance and establish and sustain humanitarian access.

Subprogramme 2 Coordination of humanitarian action and emergency response

27.94 The proposed regular budget resources for 2024 amount to \$5,658,500 and reflect an increase of \$11,600 compared with the appropriation for 2023. The proposed increase is explained in paragraph 27.74 (b) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 27.27 and figure 27.XII.

Table 27.27

Extrabudgetary resources

27.95 Extrabudgetary resources for the subprogramme amount to \$274,419,400. The resources would complement regular budget resources and would be used mainly for the servicing of meetings, seminars, workshops and training events that support the effective and timely humanitarian response to alleviate human suffering in natural disasters and complex emergencies. The resources would also provide for consultations, advice and advocacy to support the effective planning of future

emergencies and natural disasters and strengthen contingency funding arrangements. The resources would continue to support the Emergency Relief Coordinator in coordinating the international community's response to complex emergencies and natural disasters. Extrabudgetary resources would also be used to fund donor meetings, including informal briefings and consultations with Member States on specific emergency situations and the financing of humanitarian requirements, process grants for new and protracted emergencies by the Central Emergency Response Fund, manage the roster of potential resident and humanitarian coordinators, conduct humanitarian assessment and strategy-building missions to review humanitarian needs and design appropriate response strategies, support inter-agency assessment and strategy-building missions to review field coordination arrangements, provide training on the humanitarian programme cycle for humanitarian partners, and prepare technical materials on the consolidated appeals process.

Subprogramme 3 Emergency support services

- 27.96 The proposed regular budget resources for 2024 amount to \$3,121,500 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 27.28 and figure 27.XIII.

Table 27.28

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

27.97 Extrabudgetary resources for the subprogramme amount to \$25,397,600. The resources would complement regular budget resources and would be used mainly to cover the costs of seminars, workshops and training events, including capacity-building activities. The resources would also be used to strengthen interoperability initiatives among national, regional and international response mechanisms for more integrated international assistance in support of a Member State affected by a natural disaster.

**Subprogramme 4
 Humanitarian emergency information and advocacy**

27.98 The proposed regular budget resources for 2024 amount to \$1,731,900 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 27.29 and figure 27.XIV.

Table 27.29
Subprogramme 4: evolution of financial and post resources

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

27.99 Extrabudgetary resources for the subprogramme amount to \$18,439,000. The resources would complement regular budget resources and would be used mainly to enable advocacy of humanitarian principles and international humanitarian law and provide timely and reliable information on unfolding emergencies and natural disasters, including through expanded networks, coverage and reach.

Programme support

27.100 The Executive Office is comprised of the Human Resources Section, the Supply Chain and Procurement Section, the People and Culture Section, the Learning and Development and Staff Welfare Unit, and the Strategic Planning, Budget and Finance Section.

27.101 The Executive Office oversees the financial, human resources, procurement of goods and services, and general administrative aspects of the Office for the Coordination of Humanitarian Affairs and provides guidance on administrative matters. It supports senior management in formulating policies and instructions, including: (a) financial management; (b) workforce planning; (c) staff rostering; (d) duty of care, learning, development and staff welfare; (e) organization risk management; (f) business continuity planning; and (g) risk registry and internal controls. It coordinates departmental programme budgets and presentations to legislative bodies. The Executive Office will continue to focus on workforce and succession planning, career and staff development, improving financial monitoring and projections of funding requirements for future budgets, managing and effectively utilizing resources, capturing and sharing field information, and ensuring the accurate and timely reporting of financial transactions. As part of those efforts, the Executive Office will continuously focus on enhancing the service orientation and client focus of its administrative support.

27.102 The proposed regular budget resources for 2024 amount to \$1,912,700 and reflect a net increase of \$226,700 compared with the appropriation for 2023. The proposed net increase is explained in paragraph 27.74 (c) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 27.30 and figure 27.XV.

Table 27.30

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

27.103 Extrabudgetary resources for this component amount to \$28,078,200. The resources would complement regular budget resources and would be used mainly to allow the component to oversee financial, human resources and general administration of the Office.

II. United Nations Office for Disaster Risk Reduction

Foreword

Disasters are not inevitable and there is much that can be done to prevent them. This simple but powerful fact is what drives the United Nations Office for Disaster Risk Reduction. Guided by the targets of the Sendai Framework for Disaster Risk Reduction 2015–2030, the Office works around the world to support Member States in reducing risks before they lead to disasters.

This work has never been more urgent in the light of growing disaster losses, as seen with the floods in Pakistan in 2022 and the earthquakes in the Syrian Arab Republic and Türkiye in 2023. Equally important are the daily small-scale disasters that do not make the news but still devastate communities. These disasters have an impact on everyone but disproportionately harm the most vulnerable members of society, resulting in avoidable deaths, lost livelihoods and increased humanitarian needs. Left unaddressed, growing disasters threaten to undo decades of progress, making it impossible for many developing countries to achieve the Sustainable Development Goals.

In 2024, the Office will build on the results of the midterm review of the implementation of the Sendai Framework to tailor its support for Member States, specifically with regard to helping Member States to understand their risks, develop mechanisms and plans to reduce them, and to implement these plans through sustainable financing. The Office will co-lead the implementation of the Early Warnings for All initiative to ensure that every person on Earth is protected by an early warning system by the year 2027. The Office aims to support all Member States and prioritize the needs of the most disaster-vulnerable Member States, in particular the least developed countries, small island developing States and landlocked developing countries.

As the focal point in the United Nations system for the coordination of disaster risk reduction, the Office will enhance its support for Member States and strengthen partnerships with non-governmental stakeholders, including the private sector, parliamentarians, civil society, international finance institutions, academia, scientific organizations, the media and young people.

The world can put a stop to increasing disaster losses, but only if we commit ourselves to reducing risks before they become disasters. Success would mean saving lives, reducing humanitarian needs and enabling sustainable development.

(Signed) Mami **Mizutori**
Special Representative of the Secretary-General for Disaster Risk Reduction

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 27.104 The United Nations Office for Disaster Risk Reduction is the focal point in the United Nations system for the coordination of disaster reduction and ensuring synergies among the disaster reduction activities of the United Nations system and regional organizations and activities in socioeconomic and humanitarian fields. It provides a data-driven and people-centred approach to supporting Governments and stakeholders in identifying, reporting on and reducing existing and emerging disaster risks, with the aim of ensuring that no one is left behind in implementing the Sendai Framework for Disaster Risk Reduction 2015–2030. The mandate derives from the priorities established in General Assembly resolutions and decisions, including resolutions [42/169](#), [54/219](#), [56/195](#) and [77/164](#), as well as the Sendai Declaration and the Sendai Framework adopted by the Assembly in its resolution [69/283](#).
- 27.105 The General Assembly, in its resolution [69/283](#), tasked the Office with supporting the implementation, follow-up and review of the Sendai Framework. The mandated midterm review of the implementation of the Sendai Framework (see resolution [76/204](#)) and the related high-level session of the Assembly planned for May 2023 further underline the heightened importance of effective implementation of the Framework. The presentation of the Office as a separate component of programme 23 reflects the Office's distinct role in disaster risk reduction. To implement its mandate, in line with its strategic framework for the period 2022–2025 the Office supports regional, national and local implementation of the Sendai Framework, strengthens global monitoring and analysis of disaster risk, catalyses action for risk reduction and resilience by countries and stakeholders, and promotes effective risk communication, advocacy and knowledge management.

Programme of work

Objective

- 27.106 The objective, to which this programme contributes, is to substantially reduce disaster risk and losses in lives, livelihoods and health and in the economic, physical, social, cultural and environmental assets of persons, businesses, communities and countries.

Strategy and external factors for 2024

- 27.107 To contribute to the objective, the Office will:
- Provide guidance to Member States and stakeholders on implementing the Sendai Framework and accelerating the implementation of disaster risk reduction action through the production and dissemination of knowledge resources and best practices and the provision of capacity development and assistance at the regional, national and local levels;
 - Work closely with Member States and stakeholders at the global, regional, national and local levels to implement recommendations from the midterm review of the implementation of the Sendai Framework, following the high-level meeting of the General Assembly pursuant to its resolution [76/204](#);
 - Provide support to Member States for reporting on the global targets of the Sendai Framework and for the related indicators of the Sustainable Development Goals using the Framework monitoring system;

- (d) Co-lead the Secretary-General's Early Warnings for All initiative, together with the World Meteorological Organization (WMO), and lead on the planning and implementation of the initiative's pillar 1 focusing on risk knowledge and management, in line with target (g) of the Sendai Framework;
- (e) Support Member States and other development stakeholders in strengthening the integration of climate change and disaster risk reduction into relevant strategies and policies across and within sectors, including by delivering evidence-based advocacy initiatives with clear calls to action to invest in disaster risk reduction and climate change adaptation and raise public awareness on the importance of such initiatives;
- (f) Work with practitioners and experts around the world to generate risk knowledge and analysis on risk trends, patterns, progress and challenges, including through the Risk Information Exchange and a thematic issue of the United Nations Office for Disaster Risk Reduction's flagship *Global Assessment Report on Disaster Risk Reduction*, and assist local and national governments and regional organizations in applying new risk information and analysis in their decision-making;
- (g) Advise national financial regulatory authorities on measures for the mainstreaming of disaster and climate change risk into public and private investment; advise Member States on developing disaster risk reduction financing strategies and risk-informed investment strategies and mainstreaming disaster risk considerations into the integrated national financing frameworks; and partner with financial institutions to integrate disaster risk reduction considerations into investment decisions and financial instruments;
- (h) Support Member States in strengthening disaster risk reduction policies and programmes in the least developed countries, landlocked developing countries, small island developing States and in humanitarian contexts, through the provision of focused assistance in overcoming the challenges, constraints and gaps that they continue to face.

27.108 The above-mentioned work is expected to result in:

- (a) Improved management and decision-making at the local, national and regional levels regarding current and future disaster risks through an evidence-based understanding of the multi-hazard risk landscape, enabling risk-informed policies, plans, regulatory frameworks and investment that align with the Sendai Framework and the 2030 Agenda;
- (b) Increased accountability for and commitment to implementing the Sendai Framework;
- (c) Multi-sector and inclusive disaster risk reduction interventions that address the needs of the most vulnerable, thereby contributing to leaving no one behind.

27.109 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:

- (a) Disasters will continue to increase in frequency and magnitude owing to, among others, the adverse effects of climate change, necessitating the integration of disaster risk reduction and climate action to reduce the impact of disasters;
- (b) Socioeconomic disparities and political tensions have the potential to deepen vulnerabilities of people living in the most disaster-prone countries, necessitating policies, plans, regulatory frameworks and investment decisions based on an accessible and evidence-based understanding of risks;
- (c) The risk of damage and losses from disasters will remain high for the least developed countries, landlocked developing countries and small island developing States, necessitating an increase in early warning coverage and support to adequately prepare for and respond to disasters.

27.110 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will advance further cooperation with global and regional organizations and with national and local counterparts to promote risk-informed decision-making. The convening of regional platforms

for disaster risk reduction will enable enhanced regional and subregional cooperation among Member States and with regional intergovernmental organizations and other stakeholders for the implementation and monitoring of regional disaster risk reduction action plans.

- 27.111 It is recognized in the Sendai Framework that, while States have the overall responsibility for reducing disaster risk, it is a shared responsibility between Governments and relevant stakeholders. Therefore, cooperation with stakeholders, including science and academia, media, the private sector and civil society, will support an all-of-society approach to disaster risk reduction. The Office will coordinate the Private Sector Alliance for Disaster Resilient Societies network, supporting private sector coordination efforts with national and local governments and strengthening micro-, small and medium-sized enterprises' resilience to disasters. The Office will also emphasize cooperation at the local level by promoting disaster resilience-building in cities.
- 27.112 With regard to inter-agency coordination and liaison, as Chair of the Senior Leadership Group on Disaster Risk Reduction for Resilience and co-Chair, jointly with WMO, of the advisory panel of the Early Warnings for All initiative, the Office will continue to play a coordinating role in disaster risk reduction within the United Nations system. It will strengthen collaboration across disaster risk reduction, development and humanitarian planning, taking into account climate change risk information. At the technical level, the Office will strengthen coordination within the United Nations system by convening the United Nations Disaster Risk Reduction Focal Points' Group and leading the risk knowledge and management pillar of the Early Warnings for All executive action plan for the period 2023–2027. The Office will further contribute to the Climate Risk and Early Warning Systems initiative, a mechanism that funds the least developed countries and small island developing States for risk-informed early warning services, implemented jointly with WMO and the World Bank. The Office will continue to engage in the regional collaborative platforms and issue-based coalitions and support United Nations country teams and resident coordinators in integrating disaster risk reduction and resilience into common country analyses and United Nations Sustainable Development Cooperation Frameworks.
- 27.113 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. In line with the Sendai Framework, the Office will work to promote the full, equal and effective participation and leadership of women in the design, management, resourcing and implementation of gender-sensitive disaster risk reduction policies, plans and programmes, and enable Governments to better incorporate a gender perspective into national risk reduction strategies, early warning systems, climate adaptation and resilience-building.
- 27.114 In line with the United Nations Disability Inclusion Strategy, and recognizing that disasters and the consequent disruption to physical, social, economic and environmental networks and support systems disproportionately affect persons living with disabilities and their families, the Office will increase advocacy on disability inclusive disaster risk reduction and ensure the participation of persons with disability stakeholder groups in processes that set the global and regional disaster risk reduction agendas, with the active involvement of its regional offices. The Office will support States parties' efforts to implement the Convention on the Rights of Persons with Disabilities. Emphasis will be placed on supporting Member States in ensuring that persons living with disabilities and their needs are included in the implementation of the Sendai Framework and its expected results, goal and targets, including through the availability of disaggregated data.

Impact of the pandemic and lessons learned

- 27.115 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular events convened with support from the Office, which had to take into account constraints and travel restrictions and adapt through agile planning, constant coordination with partners and the provision of novel hybrid virtual conference services. The successful organization of the seventh session of the Global Platform for Disaster Risk Reduction exemplified the importance of this new approach to event convening and management.

- 27.116 In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objective the Office published a report titled “Rethinking risks in times of COVID-19” in May 2022, which presented findings from five case studies in different countries, highlighting the cascading nature of risks and identifying lessons learned on the prevention and management of risks. The seventh session of Global Platform for Disaster Risk Reduction focused on the theme “From risk to resilience: towards sustainable development for all in a COVID-19 transformed world”. The Bali Agenda for Resilience, the summary of the seventh session’s proceedings, highlighted the need to reassess the way in which risk is governed and policy is designed in order to apply the transformative lessons learned from the pandemic.
- 27.117 The Office continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including the use of hybrid organizational arrangements for meetings and events, at the request of Member States. In addition, Member States, in General Assembly resolution [77/164](#) and the ministerial declaration of the 2022 high-level political forum on sustainable development ([E/HLS/2022/1](#)), recognized that “the Sendai Framework provides guidance relevant to a sustainable recovery from COVID-19 and also to identify and address underlying drivers of disaster risk in a systemic manner”. In this regard, the Office will prompt reflections and consultations, through the midterm review of the Sendai Framework, on how the continuation of COVID-19 has an impact on understanding risk and how disaster risk and loss can be reduced.

Evaluation activities

- 27.118 The Office’s evaluation policy, adopted in November 2022, provides the framework for an evaluation, to be carried out in 2023, on the effectiveness of the Sendai Framework monitor tool to support Member States in assessing the progress made in the implementation of the Framework. The evaluation will produce findings that the Office will apply in the course of implementing the proposed programme plan for 2024.

Programme performance in 2022

Member States and stakeholders review progress on the implementation of the Sendai Framework and identify recommendations to enhance disaster risk reduction

- 27.119 The General Assembly, in its resolution [72/218](#), recognized the Global Platform for Disaster Risk Reduction as the global multi-stakeholder forum to review progress on the implementation of the Sendai Framework. The Office organized and convened the seventh session of the Global Platform, which was hosted by the Government of Indonesia in Bali from 23 to 28 May 2022. The Platform provided an opportunity for Governments, United Nations entities and other stakeholders to share knowledge and consult the most recent developments and trends in reducing disaster risk, identify gaps and make recommendations to further accelerate the implementation of the Sendai Framework. The Platform enabled the sharing of experiences and the showcasing of opportunities for enhancing financing for prevention, especially in the least developed countries, landlocked developing countries and small island developing States.
- 27.120 Discussions during the Global Platform for Disaster Risk Reduction also highlighted the interconnection between disaster risk reduction and scaling up climate action and enabled the identification of synergies to enhance the use of climate change data for disaster risk reduction.
- 27.121 Progress towards the objective is presented in the performance measure below (see table 27.31).

Table 27.31
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	<ul style="list-style-type: none"> • Member States identified pathways to mainstream disaster risk reduction into investment decision frameworks and developed recommendations on enhancing access to finance for risk reduction at the local and community levels • Stakeholders from climate and hydro-meteorological communities identified synergies to enhance the use of climate change data, including risk forecasts, for disaster risk reduction

Planned results for 2024

Result 1: scale up resilience at the local level through global partnership

Programme performance in 2022 and target for 2024

27.122 The subprogramme’s work contributed to the development of disaster risk reduction plans by 160 additional cities, which exceeded the planned target of 5 additional cities, owing to the launch of “Making Cities Resilient 2030” in 2021, an initiative supported by an innovative outreach model that has accelerated the programme’s impact, with support from the network of regional offices of the Office.

27.123 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 27.XVI).

Figure 27.XVI

Performance measure: number of cities that develop local disaster risk reduction plans (cumulative)

Result 2: national policymakers integrated innovation, good practices and evidence-based risk reduction into their decision-making processes

Programme performance in 2022 and target for 2024

- 27.124 The subprogramme's work contributed to 23 countries integrating climate change data and analysis to develop and implement disaster risk reduction strategies and plans, which exceeded the planned target of 18 countries.
- 27.125 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 27.XVII).

Figure 27.XVII

Performance measure: number of countries integrating climate change data and analysis to develop and/or implement disaster risk reduction strategies and plans (cumulative)

Result 3: accelerated achievement of the Sendai Framework with countries using relevant information and analysis to reduce risks and inform development decisions

Proposed programme plan for 2024

- 27.126 Climate and disaster risk analytics need to be upgraded to better account for systemic risks, cascading impacts and the medium- to long-term effects of climate change scenarios. The use of such information and analysis will enable strengthened evidence-based and risk-informed planning and decision-making in both the development and humanitarian fields, to accelerate the implementation of the Sendai Framework. The programme will work through its network of regional offices to provide Governments and stakeholders with technical assistance and support to strengthen their understanding of risk, including its drivers.

Lessons learned and planned change

- 27.127 The lesson for the programme was the need to promote a systematic approach to disaster risk reduction, given that hazardous events may transform themselves quickly into crises with global and long-lasting social, ecological and economic consequences. In applying the lesson, the programme will support Member States and stakeholders in developing multi-hazard risk profiles in order to better understand the interconnected nature and dynamic interaction of risks stemming from different types of hazards. In this regard, the Office will provide technical support to national partners and the United Nations system on risk information and analytics.
- 27.128 Expected progress towards the objective is presented in the performance measure below (see figure 27.XVIII).

Figure 27.XVIII
Performance measure: number of countries having developed multi-hazard risk profiles (cumulative)

Legislative mandates

27.129 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

54/219	International Decade for Natural Disaster Reduction: successor arrangements	74/4	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
56/195 ; 64/200	International Strategy for Disaster Reduction		
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
70/203	World Tsunami Awareness Day		
72/218 ; 73/231 ; 74/218 ; 75/216 ; 76/204 ; 77/164	Disaster risk reduction	76/258	Doha Programme of Action for Least Developed Countries
74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the Small Island Developing States (SIDS) Accelerated Modalities of Action (SAMOA) Pathway	77/29	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development

Economic and Social Council resolutions and intergovernmental agreed conclusions

2018/14	Strategic Framework on Geospatial Information and Services for Disasters	E/FFDF/2020/3 ; E/FFDF/2021/3 ; E/FFDF/2022/3	Follow-up and review of the financing for development outcomes and the means of implementation of the 2030 Agenda for Sustainable Development
2022/8	Report of the Committee for Development Policy on its twenty-fourth session		
E/2022/27-E/CN.6/2022/16	Report of the Commission on the Status of Women on its sixty-sixth session, on the priority theme “Achieving gender equality and the empowerment of all women and girls in the context of climate change, environmental and disaster risk reduction policies and programmes”	E/HLS/2022/1	Ministerial declaration of the high-level segment of the 2022 session of the Economic and Social Council and the 2022 high-level political forum on sustainable development, convened under the auspices of the Council, on the theme “Building back better from the coronavirus disease (COVID-19) while advancing the full implementation of the 2030 Agenda for Sustainable Development”

Deliverables

27.130 Table 27.32 lists all deliverables of the programme.

Table 27.32

Deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	2	1
1. Report to the General Assembly on the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030	1	1	1	1
2. Report of the midterm review of the Sendai Framework – main findings and recommendations	–	–	1	–
Substantive services for meetings (number of three-hour meetings)	2	2	8	2
3. Provision of substantive and technical support to General Assembly (Second Committee) resolution negotiations on disaster risk reduction (annual)	1	1	1	1
4. Provision of substantive and technical support to General Assembly negotiations on the political declaration of the midterm review of the Sendai Framework	–	–	1	–
5. Provision of substantive and technical support to General Assembly resolution negotiations on building global resilience through regional and interregional infrastructure connectivity	–	–	1	–
6. General Assembly plenary (Second Committee), agenda item on Sustainable development: disaster risk reduction	1	1	1	1
7. General Assembly plenary, high-level meeting on the midterm review of the Sendai Framework	–	–	4	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	30	47	30	35
8. National, regional, and interregional projects related to the implementation of the Sendai Framework	30	47	30	35
Seminars, workshops and training events (number of days)	330	335	330	330
9. Training events on disaster risk reduction planning and implementation and monitoring of the Sendai Framework for regional, national and local capacity development	330	335	330	330
Publications (number of publications)	3	3	4	3
10. Global Assessment Report on Disaster Risk Reduction and Global Assessment Report special reports	1	1	1	1
11. United Nations Office for Disaster Risk Reduction annual report	1	1	1	1
12. United Nations Office for Disaster Risk Reduction biennial work programme and strategic framework	–	–	1	–
13. United Nations Plan of Action on Disaster Risk Reduction for Resilience: Towards a Risk-informed and Integrated Approach to Sustainable Development (progress report)	1	1	1	1
Technical materials (number of materials)	15	16	22	23
14. On the monitoring and implementation of the Sendai Framework	10	10	15	15
15. On the application of risk knowledge	4	4	6	6
16. Technical contributions to outcome documents of the regional and global platforms	1	2	1	2

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: advocacy through high-level engagement of key audiences and decision makers; advice on the formulation of and improvement in 50 regional, national and local disaster risk reduction strategies and plans; advisory services for risk governance capacities of 20 regional and subregional intergovernmental organizations; advocacy with and technical advice to Member States to integrate disaster risk reduction into intergovernmental deliberations and policy decisions at the General Assembly and the Economic and Social Council, including the coordination segment, the Commission on the Status of Women, the forum on financing for development follow-up and the high-level political forum for sustainable development, as well as into the United Nations Framework Convention on Climate Change.

Databases and substantive digital materials: the Sendai Framework monitor, used by 175 Member States for monitoring and reporting on progress against Framework targets and related Sustainable Development Goal targets/indicators; the Sendai Framework voluntary commitments online platform, with more than 180 voluntary commitments; and disaster loss databases complying with the Framework requirements, covering 120 countries and territories.

D. Communication deliverables

Outreach programmes, special events and informative materials: high-level global and regional meetings on disaster risk reduction; World Tsunami Awareness Day events; International Day for Disaster Reduction events; newsletters and notes verbales on Sendai Framework monitoring; and communications campaigns on inclusive disaster risk reduction and the Early Warnings for All initiative.

External and media relations: press releases, op-eds and press coverage; media briefings on community risk and reporting on disaster risk reduction.

Digital platforms and multimedia content: PreventionWeb, the online knowledge platform for disaster risk reduction; and web stories, posts and videos for social media.

B. Proposed post and non-post resource requirements for 2024

Overview

27.131 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 27.33 to 27.35.

Table 27.33

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

27.132 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 27.36 to 27.38 and figure 27.XIX.

27.133 As reflected in tables 27.36 (1) and 27.37 (1), the overall net resources proposed for 2024 amount to \$1,263,600 before recosting, reflecting no change compared with the appropriation for 2023. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 27.XIX
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 27.134 As reflected in tables 27.36 (2) and 27.37 (2), extrabudgetary resources amount to \$63,533,400. The resources would complement regular budget resources and would be used mainly to provide technical assistance, capacity development, coordination and policy guidance to support the implementation of the Sendai Framework at the global, regional, national and local levels. Extrabudgetary resources represent 98 per cent of the total resources of the Office.
- 27.135 The extrabudgetary resources under the present section are subject to the oversight of the Special Representative of the Secretary-General for Disaster Risk Reduction, who has delegated authority from the Secretary-General.
- 27.136 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 27.39. Managers are asked to implement preventive and corrective measures. Notwithstanding, the impact of the COVID-19 pandemic and related restrictions on travel in 2022 limited the ability to comply with advance booking for air travel, which resulted in a lower

compliance rate. In 2024, the Office will continue to implement measures to improve the compliance rate for air tickets, including advance planning and nomination of travellers and undertaking communication to staff and managers to raise awareness of the requirement

Table 27.39
Compliance rate
 (Percentage)

Annex I

Organizational structure and post distribution for 2024

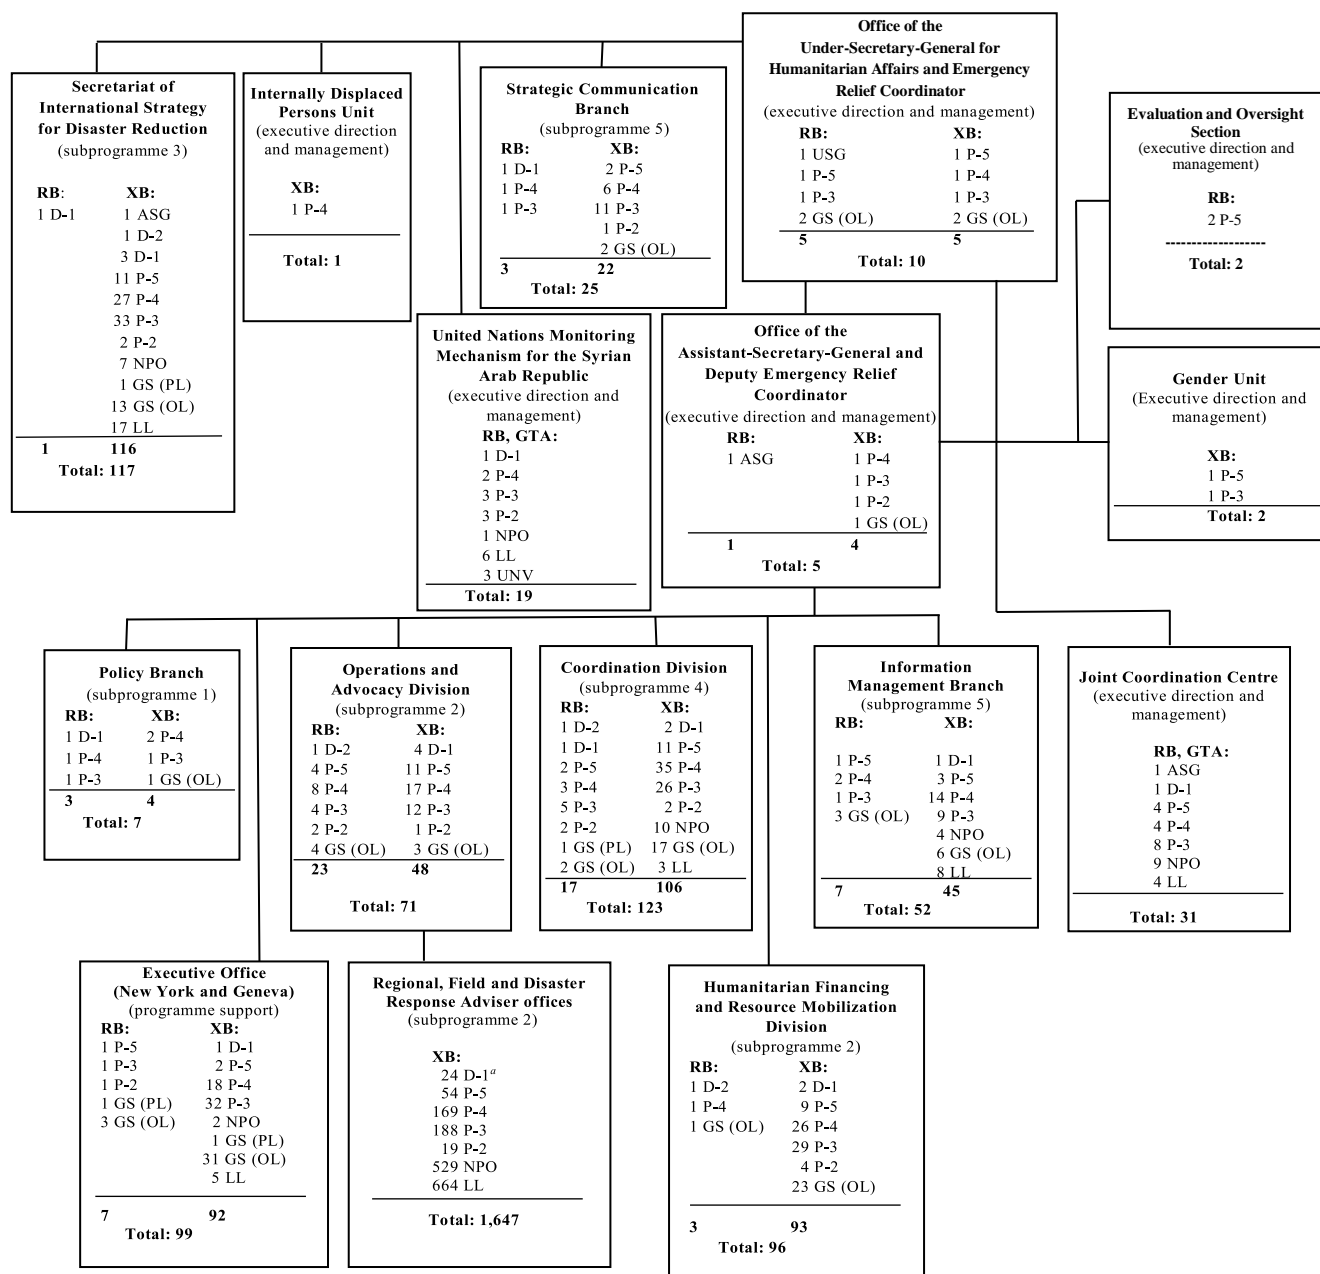

Two charts showing the organizational structure of the Office for the Coordination of Humanitarian Affairs are presented below. Chart A reproduces the approved organizational structure for 2023, as contained in document [A/77/576](#). Charts B and C presents the proposed organizational structure for 2024 for the Office for the Coordination of Humanitarian Affairs and the United Nations Office for Disaster Risk Reduction, respectively.

Justification for the proposed changes

Following the adoption of the Office for the Coordination of Humanitarian Affairs policy instruction on gender equality and the action plan in 2021, the Office proposed that the Gender Unit be moved from executive direction and management to the Operations and Advocacy Division under subprogramme 2. This would enable the Office to build on successful advocacy that has strengthened gender analysis and prioritized response and the prevention of gender-based violence and the promotion of women's leadership in decision-making. It would further enhance the Office's efforts to mainstream and operationalize gender for a larger impact, enhance programming and support to partners on the ground, and drive forward progress on gender equality in the Office's work and humanitarian action more broadly. The Unit will continue to support the Office's engagement in global processes and reporting, and it is composed of two extrabudgetary posts, one Head of Unit/Senior Gender Adviser (P-5) and one Gender Specialist (P-3).

Furthermore, as explained in paragraphs 27.10 and 27.105 above, the organization chart for 2024 for the Office excludes the posts for the secretariat of International Strategy for Disaster Reduction, which is now presented as a separate component and has a separate organization chart for 2024.

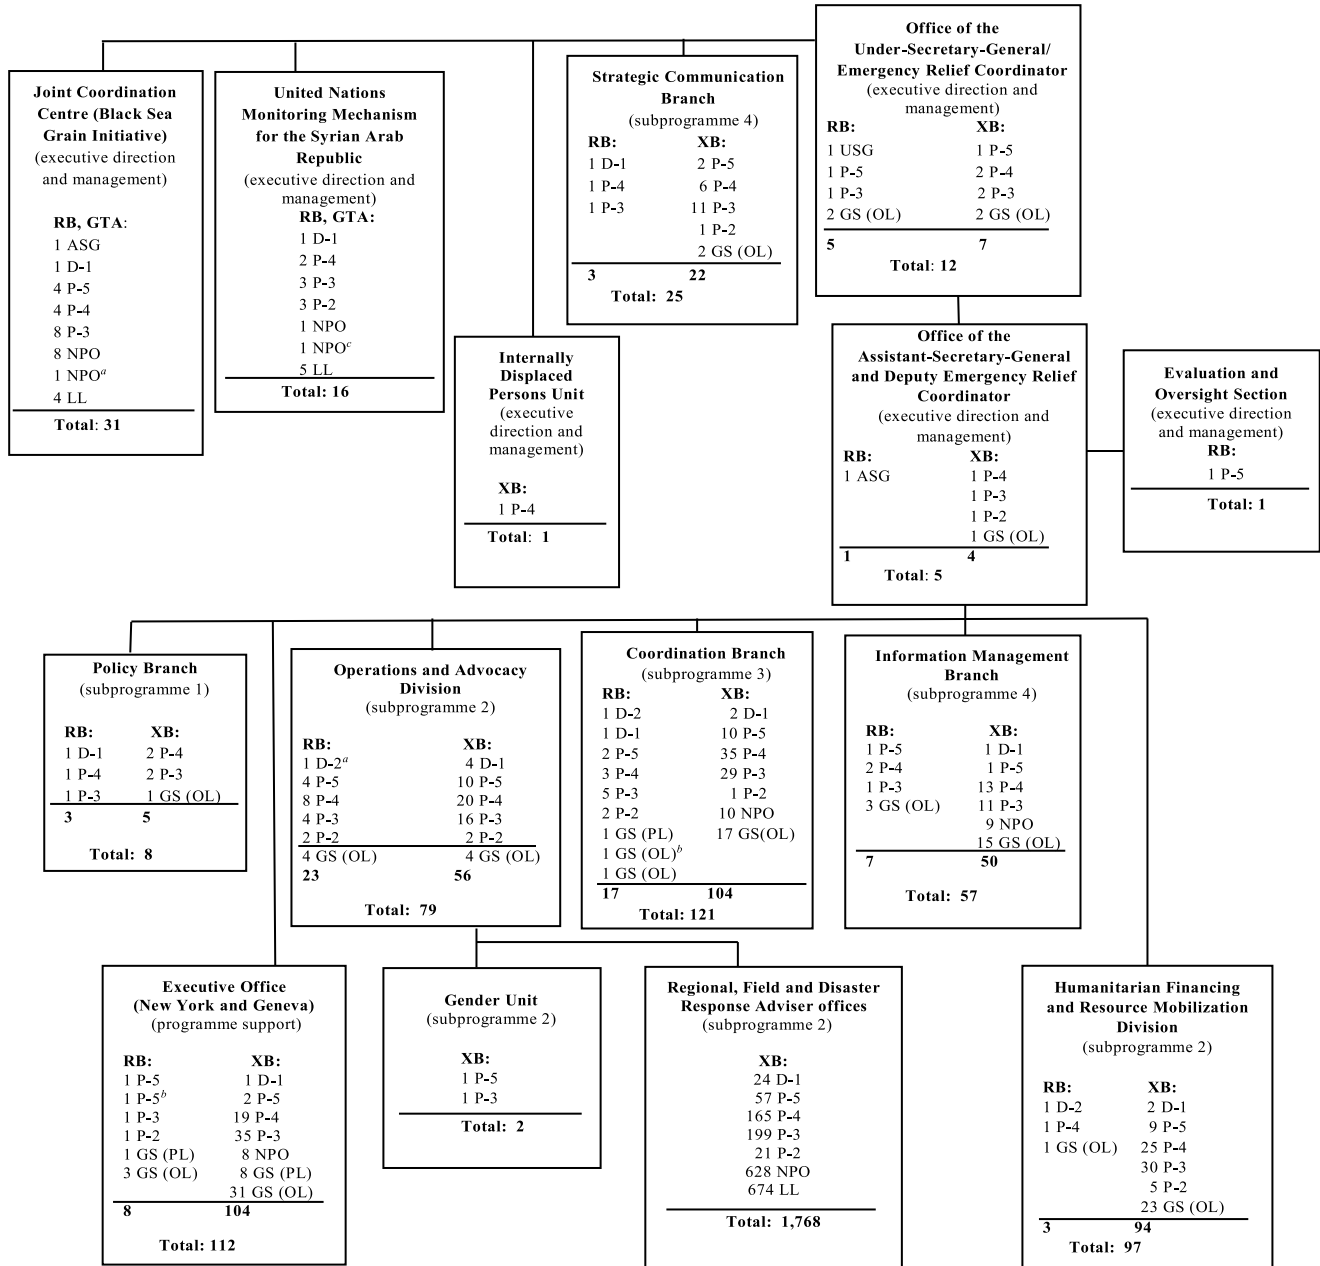

A. Office for the Coordination of Humanitarian Affairs: approved organizational structure and post distribution for 2023

Note: Includes field office local positions (National Professional Officer and General Service (Local level)) administered by the United Nations Development Programme on behalf of the Office for the Coordination of Humanitarian Affairs.

^a Includes two vacant pooled posts.

B. Office for the Coordination of Humanitarian Affairs: proposed organizational structure and post distribution for 2024

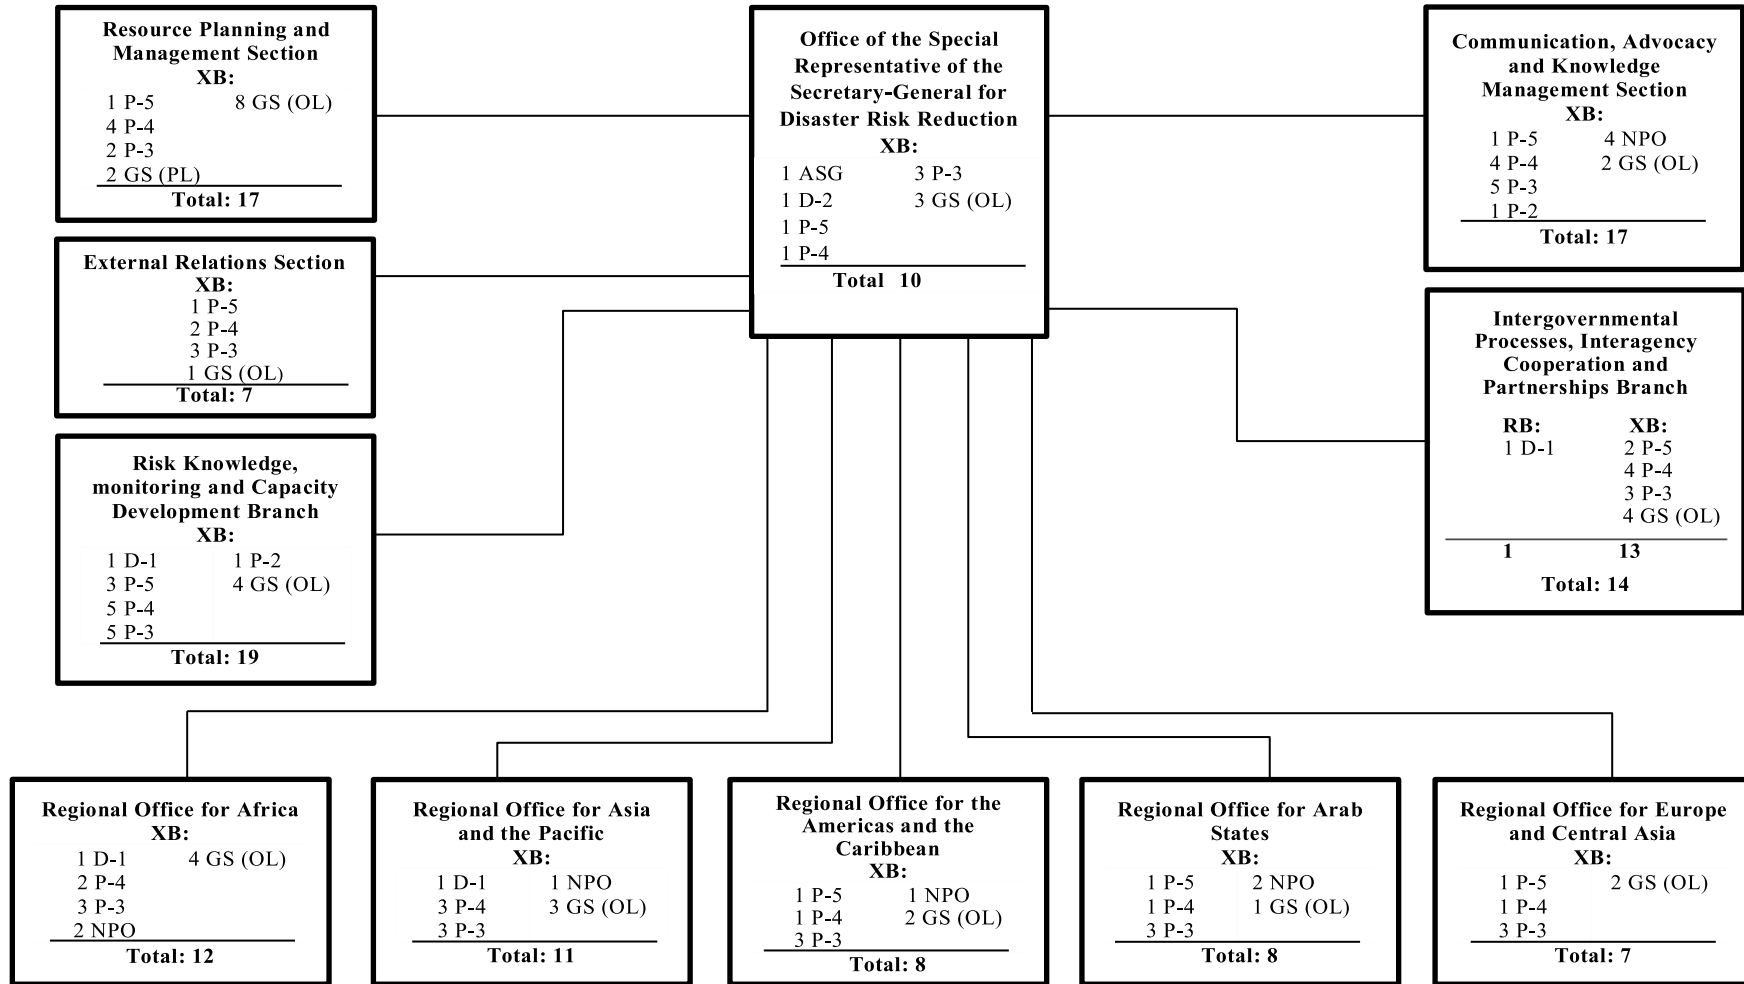

Note: Includes field office local positions (National Professional Officer and General Service (Local level)) administered by the United Nations Development Programme on behalf of the Office for the Coordination of Humanitarian Affairs.

^a Redeployed (geographical).

^a Title of the Office is aligned with the Secretary-General’s bulletin on the Organization of the Secretariat of the United Nations ([ST/SGB/2015/3](#)).

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	(1)	P-5	Outward reassignment of one Chief of Section, Humanitarian Affairs (New York) to programme support as Chief of Section, Programme Management (Geneva)	To strengthen the Office for the Coordination of Humanitarian Affairs support provided to its staff in the areas of staff welfare; anti-racism and promotion of cultural behaviour in line with the United Nations core values; improve the physical and mental well-being of staff members; integrate security, safety, health and well-being considerations into organizational processes and decision-making; and ensure that staff receive training and support related to security, workplace safety, health and well-being. The majority of the Office's staff work in high-risk environments and are exposed to stressful and challenging situations that require urgent and ongoing humanitarian action. In that regard, it is proposed that an existing Chief of Section, Humanitarian Affairs (P-5) in New York be reassigned as Chief of Section, Programme Management to head the People and Culture Section that is responsible for the aforementioned duties. The placement of the post under programme support in Geneva (redeployed from executive direction and management, New York) would allow for closer proximity in location and time zone of the incumbent to the Office's field locations and staff working in the Section, allowing for improved and effective management of the Section and delivery of its support services to the Office's staff worldwide.
Programme support	1	P-5		
Subprogramme 2 Coordination of humanitarian action and emergency response	1	D-2	Redeployment from Geneva to New York of 1 Director of Humanitarian Financing and Resource Mobilization	The Director heads the Humanitarian Financing and Resource Mobilization Division in subprogramme 2. The Division drives the Office for the Coordination of Humanitarian Affairs resource mobilization strategy and all activities and supervises the mechanisms for humanitarian funds, ensuring that all standards and requirements for the operation of these entities are met. It is proposed that the post be placed in New York to strengthen the Office's resource mobilization strategy and activities, including supervision of the existing mechanisms for humanitarian funds. The incumbent would also strengthen the required leadership and support for engagement with permanent missions and donors at the senior level. The work in Geneva will not be affected by the redeployment of the D-2 post, given that the Chief of Partnerships and Resource Mobilization (D-1) will cover the requirements in Geneva.

Section 27 Humanitarian assistance

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 3 Emergency support services	–	GS (OL)	Reassignment of Document Management Assistant as Programme management assistant	<p>The proposed reassignment would allow the subprogramme to meet the increasing demand for the provision of a variety of programmatic support in the areas of humanitarian response planning, assessment and monitoring, in particular in the light of the increase in the number of activities under the cash assistance programme that require more coordination.</p> <p>The incumbent will provide programmatic support to the System-wide Analysis and Policy Section, including recruitment, organizing travel to field locations to roll out training of Office for the Coordination of Humanitarian Affairs staff on cash modalities, coordinating travel for global cluster coordination group missions, and communicating with partners for events and general administration in support of meetings and staff. With the move to cloud computing and the archiving of all documents electronically, the tasks associated with a Document Management Assistant have been phased out.</p>

Abbreviation: GS (OL), General Service (Other level).

Foreword

During 2024, the Department of Global Communications will continue to apply the United Nations global communications strategy to inform audiences everywhere, in languages that they understand and on platforms that they use, about what the United Nations is doing to build a better world. The strategy draws on that foundation of awareness to try to inspire people to care and to act in support of the goals and work of the United Nations.

With the strategy serving as a guide, the Department aims to take an audience-focused and data-driven approach that is also systematic and coordinated. By doing so, its communications should be more impactful and enduring, especially when the United Nations is responding to one of the many crises on its agenda.

In a crowded communications landscape that is often polluted by misinformation and disinformation and hate speech, the Department strives to ensure that the United Nations is a source of authoritative, factual, engaging and accessible content. It does so through storytelling that is human-centred and solutions-focused. This is true whether the Organization is addressing climate change or the recovery from the coronavirus disease (COVID-19) pandemic or partnering with Member States and others to achieve the Sustainable Development Goals. Across the pillars of the United Nations agenda, the Department's communications will demonstrate the Organization as being at the centre of multilateralism in action – pursuing a world where everyone can thrive in peace, dignity and equality, on a healthy planet.

(Signed) Melissa **Fleming**
Under-Secretary-General for Global Communications

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 28.1 The Department of Global Communications is responsible for communicating to the world the ideals and work of the United Nations; interacting and partnering with diverse audiences; and building support for the purposes and principles enshrined in the Charter of the United Nations. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions 13 (I), 76/268 on multilingualism, 77/128 A and B on questions relating to information and 77/262 on questions relating to the proposed programme budget for 2023. The world faces grave, complex and evolving challenges. The Department will leverage the power of communications to tell the United Nations story to global audiences in many languages and across multiple platforms in order to mobilize concerted action in support of the United Nations agenda.

Strategy and external factors for 2024

- 28.2 The overall programme plan for 2024 reflects the Department's strategy to strengthen support for the work and purposes of the United Nations by engaging with audiences and encouraging them to act, through impactful storytelling and a focus on solutions. To fulfil its responsibilities, the Department takes the following core approaches in its work: strategic planning by identifying communications goals and target audiences; maintaining close working relationships with stakeholders, the substantive departments and offices of the Secretariat and entities of the United Nations system and other key partners; enhancing audience reach through multilingualism and the parity of all six official languages in the preparation of news and communications products, including content on United Nations websites and social media accounts, where appropriate; targeted use of the most recent information and communications technologies in traditional, social and digital media to deliver information directly and instantaneously worldwide to key audiences; and using rigorous evaluation tools and processes to measure the impact of campaigns in order to learn and to adjust the Department's work.
- 28.3 The Department, through its subprogrammes, delivers strategic communications campaigns to engage and inspire target audiences. It works through a global network of United Nations information centres, integrated with United Nations resident coordinator offices, to reach local audiences and provide content for global platforms. It produces accurate, objective and balanced multilingual news and communications products that convey authoritative information and solutions-based stories. It advocates on priority issues with the help of a wide array of partners, including Member States, civil society, academia, the media and, in particular, young people, to expand programmatic impact. The Department contributes to the observance of international days and celebrations established by the General Assembly by raising awareness and promoting those events and in cooperation with the specialized agencies in charge of their implementation, where appropriate.
- 28.4 The Department also provides information and services to delegates and staff, including through the Dag Hammarskjöld Library, and promotes knowledge-sharing and internal communication by way of iSeek, the United Nations intranet.
- 28.5 The Department continues to put accuracy, timeliness and trustworthiness at the centre of its work. In an age when misinformation and hatred are disseminated to sow bigotry, promote discrimination and undermine civil discourse, United Nations communications, including crisis communications, strive to serve as a source of reliable, fact-based information that advances the work, principles and purposes of the United Nations.
- 28.6 With regard to cooperation with other entities at the global, regional, national and local levels, the Department will work collaboratively with an array of partners, including civil society, Member States, non-governmental organizations, academia, the media and the private sector. The Department will

apply its strategic and streamlined approach to partnerships to enhance its ability to target and deliver its message to an even wider community, including young people around the world, in a variety of ways.

- 28.7 The Department will lead and coordinate crisis communications, by working closely with communications colleagues from across the United Nations system to identify crises and emerging reputational risks, strengthen the United Nations response through shared strategies and aligned messaging, and mitigate risk by developing policy, guidance and training on crisis communications.
- 28.8 With regard to inter-agency coordination and liaison, as the secretariat for the United Nations Communications Group and its various task forces on subject matters the Department will continue to strengthen the coordination of communications, across the United Nations system, including through United Nations communications groups at the country and regional levels, in order to harmonize communications on specific issues for greater impact. Coordination will also be strengthened through the integration of United Nations information centres with resident coordinator offices, in line with the implementation of the United Nations development system reform. The Department's field staff serve as communications officers and advisers to resident coordinators and work under their direct supervision. As part of the integration process, the Information Centres Service will continue its work with the Development Coordination Office to provide strategic communications support to resident coordinators in countries without an information centre presence, to ensure the Department's reach.
- 28.9 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) All stakeholders and partners fulfil their responsibilities and obligations under service agreements and partnerships;
 - (b) Access by target audiences to programmes, products and services is not limited by communications technology, security or infrastructure conditions.
- 28.10 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The strategic communications guidance of the Department mainstreams a gender perspective into the work of the Department as a matter of practice. For example, the Department will promote the balanced presence of women and men, as well as a multidimensional representation and portrayal of women and men, in all its products, campaigns, events and activities. It will offer alternative perspectives, including the representation and participation of women as a key communication focus area, helping to ensure that all media products, campaigns and outreach efforts promote gender equality and women's empowerment.
- 28.11 In line with the United Nations Disability Inclusion Strategy, the Department will use its network of focal points to help to develop a common and coordinated approach to the implementation of relevant General Assembly mandates and to making United Nations services and activities accessible for persons with disabilities. The focal points will continue to provide communications support to the Strategy, including by setting accessibility standards for United Nations websites.

Impact of the pandemic and lessons learned

- 28.12 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular pandemic-related travel restrictions, which limited the ability to produce video content in some locations. The Department also held some events virtually, including the Reham Al-Farra Memorial Journalists' Fellowship, the Sustainable Development Goals media zone and the International Day of Reflection on the 1994 Genocide against the Tutsi in Rwanda. Capacity-building activities were also conducted virtually, including the Department's biennial training for United Nations officials system-wide on communicating on sexual exploitation and abuse. While pandemic-related restrictions limited some activities, a number of events that had been postponed during the first period of the pandemic were rescheduled for 2022. The resumption of in-person events and the scheduling of previously postponed events, combined with hybrid and remote events, increased the Department's delivery of services and activities above those that would normally take place.

- 28.13 In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, the Department provided the most recent updates on the pandemic and its continuing impact, highlighting the recovery of communities and countries from the crisis that gripped the world for the past few years. The Department continued to promote the “Verified” campaign in combating misinformation related to the pandemic. Fact-based reporting and engaging multimedia content provided audiences with a trusted alternative to the misinformation and disinformation that continued in 2022. The news and multimedia coverage highlighted stories about the world emerging from the pandemic. Coverage ranged from first-person testimonies of people confronting health challenges to struggles in various countries over inequity in vaccine availability and distribution to steps taken to rebuild economies and overcome supply chain bottlenecks.
- 28.14 The Department continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the pandemic, including a renewed focus on virtual events and online media. Although the Department has consistently produced hybrid events, social media and other online multimedia before the pandemic, it continues to identify new partnerships and promotional methods to engage global audiences in numbers far larger than its on-site facilities could accommodate for any activity (including guided tours).

Legislative mandates

- 28.15 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

13 (I)	Organization of the Secretariat	76/142	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
168 (II)	United Nations Day		
423 (V)	Human Rights Day		
32/40 B	Question of Palestine		
35/201	Annual Reham Al-Farra Memorial Journalists' Fellowship Programme	76/268 77/24	Multilingualism Special information programme on the question of Palestine of the Department of Global Communications of the Secretariat
36/67	International Year of Peace and International Day of Peace		
54/134	International Day for the Elimination of Violence against Women	77/87	United Nations Disarmament Information Programme
57/7	Final review and appraisal of the United Nations New Agenda for the Development of Africa in the 1990s and support for the New Partnership for Africa's Development	77/128 A 77/128 B	Questions relating to information: information in the service of humanity Questions relating to information: United Nations global communications policies and activities
57/129	International Day of United Nations Peacekeepers	77/148	Dissemination of information on decolonization
60/7	Holocaust remembrance		
60/225	Assistance to survivors of the 1994 genocide in Rwanda, particularly orphans, widows and victims of sexual violence	77/177 77/205	Follow-up to the Fifth United Nations Conference on the Least Developed Countries A global call for concrete action for the elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action
62/122	Permanent memorial to and remembrance of the victims of slavery and the transatlantic slave trade		
64/13	Nelson Mandela International Day		
76/68	Follow-up to the Declaration and Programme of Action on a Culture of Peace	77/246 77/262	Follow-up to the second United Nations Conference on Landlocked Developing Countries Questions relating to the proposed programme budget for 2023

Deliverables

28.16 Table 28.1 lists all cross-cutting deliverables of the programme.

Table 28.1

Cross-cutting deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	1	1	1

Evaluation activities

28.17 The following evaluations completed in 2022 have guided the proposed programme plan for 2024:

- (a) Office of Internal Oversight Services evaluation on the triennial review of the Department (E/AC.51/2022/10);
- (b) The preliminary findings of the Department’s evaluations of the global communications strategy and on multilingualism that are expected to be completed in the second quarter of 2023.

28.18 The Office of Internal Oversight Services, in its triennial review, recommended, among others, that the Department invest in high-level, sustained and forward-looking strategic thinking and prioritization. The 2024 plan and priorities reflect a dynamic and responsive approach to managing a fast-changing media and communications landscape to ensure that content is highly relevant and engaging, with greater reach. The Department will utilize existing partnerships and networks and new opportunities to generate new ideas, find new audiences and amplify its messages through these channels. For example, in response to insights on the audience impact of influencers, including their ability to engage a wide range of audiences and encourage them to become agents of change, the Department has included an expansion of its outreach to high-profile influencers in its planned result 3, under subprogramme 3.

28.19 An evaluation of the United Nations Academic Impact initiative is planned for 2024.

Programme of work

Subprogramme 1

Campaigns and country operations services

Objective

28.20 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

Strategy

- 28.21 To contribute to the objective, the subprogramme will:
- (a) Deliver communications campaigns related to United Nations priorities, including sustainable development, climate change, peace and security and human rights, directed by the global communications strategy for the United Nations and facilitated through a variety of communications tools, including audience-targeted messaging, issue-focused content and inspiring stories;
 - (b) Promote strategic communications priorities of the United Nations through its information centres by developing multimedia content that supports targeted and localized messages and communications campaigns;
 - (c) Provide strategic and crisis communications guidance to resident coordinator offices and United Nations country teams in their relevant regions;
 - (d) Devise strategic guidance on countering misinformation and disinformation and develop and promote content to counter false narratives and build confidence among global audiences.
- 28.22 The above-mentioned work is expected to result in:
- (a) Increased knowledge and engagement of target audiences around the globe, and further action in support of United Nations priorities;
 - (b) Global reach of communications campaigns available in the languages and on the platforms used by audiences, thus ensuring greater impact.

Programme performance in 2022

Timely updates available on United Nations response to armed conflict and crises

- 28.23 The prevalence of crises and armed conflict situations in 2022 heightened global audience interest in the work of the Organization in this context. In response, the subprogramme used its powerful social media presence, including the United Nations corporate accounts with 64.5 million followers in nine languages, to provide social media users with timely updates on the United Nations response to armed conflict, including on events at Headquarters and the United Nations response on the ground. Social media posts related to the role of multilateralism in the maintenance of international peace and security were among the top-performing posts on social media of any topic in 2022, with users responding to calls for peace and protection of civilians. Examples include the adoption of the General Assembly resolution [ES-11/6](#) at its eleventh emergency special session, which increased engagements and visual assets that stressed that civilians were not a target, and it was among top-performing content and was picked up by mainstream media in their coverage.
- 28.24 Progress towards the objective is presented in the performance measure below (see figure 28.I).

Figure 28.I
Performance measure: number of engagements with and video views of the General Assembly session on “Uniting for peace”

(Millions)

Planned results for 2024

Result 1: strengthened action on climate change

Programme performance in 2022 and target for 2024

28.25 The subprogramme’s work contributed to informed understanding and strengthened engagement of audiences on climate action, including through its ActNow campaign, resulting in 5.5 million individual climate actions logged in 2022 for a cumulative total of 10 million actions logged, which exceeded the planned target of 2 million actions logged.

28.26 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 28.II).

Figure 28.II
Performance measure: number of climate actions logged on the website or in the ActNow application (cumulative)

(Millions)

Result 2: increased engagement with global audience on United Nations priority themes

Programme performance in 2022 and target for 2024

- 28.27 The subprogramme’s work contributed to the increased impact and reach of United Nations campaigns on priority themes, with 64.5 million social media followers across platforms, which exceeded the planned target of 61 million social media followers.
- 28.28 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 28.III).

Figure 28.III
Performance measure: number of social media followers across platforms

(Millions)

Result 3: increased public engagement with the global peace and security agenda

Proposed programme plan for 2024

- 28.29 Given that peace and security issues feature prominently on the agenda of the international community, there is heightened audience interest for accurate and timely information on action taken by the United Nations. In response, the subprogramme provides information across several platforms on the work of the United Nations on such issues. In addition, other Secretariat departments also share information on peace and security on their websites, in line with their relevant mandates.

Lessons learned and planned change

- 28.30 The lesson for the subprogramme was that it needed to develop a website that captured consolidated information on peace and security issues that would be easy to gain access to. Having a central website would increase awareness of and create an understanding of the role of multilateralism in this core area of the Organization’s work, including prevention and peacebuilding, peacekeeping, disarmament, counter-terrorism and other related areas.
- 28.31 In applying the lesson, the subprogramme will, in coordination with the Department of Political and Peacebuilding Affairs and the Department of Peace Operations, establish a new website that consolidates all information on the Organization’s work on peace and security, and will strengthen outreach to its global audience on various issues on peace and security. Consultation with partners working on peace and security within the United Nations will help to enlarge an understanding of system-wide work on peace and security. The website will feature communications campaigns aimed at informing and soliciting support for the work of the Organization on peace and security issues and work with partners to promote their issues of interest.
- 28.32 Expected progress towards the objective is presented in the performance measure below (see figure 28.IV)

Figure 28.IV
Performance measure: views of United Nations website on peace and security issues

(Thousands)

Deliverables

28.33 Table 28.2 lists all deliverables of the subprogramme.

Table 28.2

Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the General Assembly on the dissemination of information on decolonization	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	26	25	26	26
2. Training programme for Palestinian broadcasters and journalists	24	23	24	24
3. International Media Seminar on Peace in the Middle East	2	2	2	2
D. Communication deliverables				
Outreach programmes, special events and information materials: communications campaigns and strategic outreach events and programmes through the Department’s field offices reaching local audiences, including lectures, exhibits and the organization of more than 100 Model United Nations conferences on priority issues or special observances of the United Nations, with specific target audiences (e.g. civil society, young people, academia, Governments and the private sector) and working in some 124 languages.				
External and media relations: press conferences, briefings and panel discussions on United Nations priorities, activities, events, publications, reports and outcomes of negotiations or other United Nations activities; media outreach, including media interviews and/or placement of opinion articles; strategic partnerships with education institutions, the media, civil society, the private sector, the creative community and other partners; and radio and television programmes.				
Digital platforms and multimedia content: flagship and other social media accounts, campaigns and multilingual websites managed by United Nations information centres.				

Subprogramme 2

News services

Objective

- 28.34 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

Strategy

- 28.35 To contribute to the objective, the subprogramme will:
- (a) Provide the timely delivery of accurate, impartial, comprehensive, balanced, coherent and objective news and information;
 - (b) Produce customized news and information materials (textual, audiovisual and photographic);
 - (c) Provide services to the media and other consumers, including through the use of the newest web-based and mobile distribution platforms, with an overall emphasis on multilingualism from the planning stage.
- 28.36 The above-mentioned work is expected to result in increased public awareness of and engagement with the United Nations through access to more user-friendly and diversified content and a broader range of options available to audiences, from traditional to social media.

Programme performance in 2022

Increased engagement through podcasts and audio programmes on content related to barriers facing young women and challenges related to hate speech, intolerance and xenophobia

- 28.37 The evolution of digital communications, changes in media consumption patterns and emerging audience habits have meant a need for new packaging and distribution methods, with audio content in particular growing in popularity.
- 28.38 In response to this dynamic of rapid change, the subprogramme developed and launched two new podcast series and expanded audio programming. The new podcast series built on the success of other podcast series, namely, “Awake at Night” and “No Denying It”, a podcast series on climate change. The first new podcast series, entitled “AmplifyHER”, produced in partnership with SoundCloud, included conversations with a number of exciting young emerging stars in the music industry on the challenges that women musicians face in their careers and on how they have overcome such barriers. The second, “UNiting against Hate”, explores the challenges involved in addressing hate speech, intolerance and xenophobia.
- 28.39 Progress towards the objective is presented in the performance measure below (see figure 28.V).

Figure 28.V
Performance measure: number of audio interactions on podcasts and audio programmes^a
 (Millions)

^a Measured by downloads, plays, shares and listens, as well as feeds to external platforms.

Planned results for 2024

Result 1: increased focus on climate change

Programme performance in 2022 and target for 2024

28.40 The subprogramme’s work contributed to growth in overall measured audience impact in relation to climate action, with the United Nations News platform achieving 5.2 million page views in 2022, which was equivalent to 8.5 per cent of the total page views of United Nations News in 2022, which did not meet the planned target of a 25 per cent increase in users of news related to climate action. The target was not met because the content-tagging technology required to measure audience by thematic content was implemented only midway through 2021, and therefore measurable targets were possible only after 2021. However, overall visitors to climate content were seen to have increased on the basis of a range of metrics, along with a growth in audience for climate content as a share of overall page views in United Nations News.

28.41 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 28.3).

Table 28.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Access to breaking news related to climate change, including feature stories, explainers and advocacy-oriented content in response to audience interest	Dedicated multimedia content on climate change increasingly viewed, with a tagging system used to collect baseline metrics to measure engagement by thematic issue	5.2 million page views to content published on United Nations News related to climate action, equating to 8.5 per cent of total page views	30 per cent increase in traffic related to news products and platforms on climate action	10 per cent of total page views on climate action on United Nations News platforms

Result 2: increased access to United Nations News

Programme performance in 2022 and target for 2024

- 28.42 The subprogramme’s work contributed to increased access to the redesigned United Nations News website, with 34.4 million users, which exceeded the planned target of 33 million users.
- 28.43 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 28.VI).

Figure 28.VI

Performance measure: increased access to the redesigned United Nations News website (annual)

(Millions of users)

Result 3: increased global audience for the United Nations Web TV platform in the six official languages

Proposed programme plan for 2024

- 28.44 The subprogramme, through the United Nations Web TV platform (webtv.un.org), has been bringing United Nations meetings held in New York (since 2001), Geneva (since 2006) and The Hague (since 2012) live to audiences around the world through live and on-demand video streaming. The platform has proved to be an effective means of reaching global audiences.

Lessons learned and planned change

- 28.45 The lesson for the subprogramme was that, by making live and on-demand webcasting available on multiple platforms and languages, it could reach larger and broader audiences around the world. United Nations Web TV also enables content from other United Nations duty stations and entities to be easily available to global audiences, which serves as a one-stop United Nations portal.
- 28.46 In applying the lesson, the subprogramme will launch versions of the United Nations Web TV platform in all other official United Nations languages. The new language versions of the platform will offer live and on-demand streaming of video content, with searchable metadata in each of the official United Nations languages. The subprogramme will also expand the deliberations available on United Nations Web TV to include meetings at other United Nations Headquarters duty stations and meetings of United Nations system entities joining the United Nations Web TV platform.
- 28.47 Expected progress towards the objective is presented in the performance measure below (see figure 28.VII)

Figure 28.VII
Performance measure: watch time on United Nations Web TV platform

(Millions of minutes)

Deliverables

28.48 Table 28.4 lists all deliverables of the subprogramme.

Table 28.4

Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

D. Communication deliverables

External and media relations: accreditation of and services to 1,100 members of the media, covering United Nations meetings and issuing press releases in all six official languages; coverage of intergovernmental meetings; online publication and distribution of speeches and statements of the Secretary-General and the Deputy Secretary-General and transcripts of press encounters of the Secretary-General; and photo coverage of meetings of key intergovernmental bodies and activities of the Secretary-General, the Deputy Secretary-General and the President of the General Assembly.

Digital platforms and multimedia content: daily multimedia content – audio, video and text – in the six official languages and three non-official languages (Hindi, Kiswahili and Portuguese) disseminated through multiple platforms and channels, including online and on social media, and through partnerships with external media organizations; the core United Nations website (including the home page), 214 United Nations observances and major global campaigns in the six official languages; assistance to United Nations entities in the multilingual aspects of their websites (47 websites); live television coverage, including live streams, and the posting of on-demand webcasts of intergovernmental meetings and other newsworthy events taking place at Headquarters, including the Sustainable Development Goals Studio; and provision of audiovisual library services to delegates, media outlets and others.

Subprogramme 3 Outreach and knowledge services

Objective

28.49 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

Strategy

- 28.50 To contribute to the objective, the subprogramme will:
- (a) Engage in advocacy with a broad and international range of academic institutions, students and educators, the creative community and civil society;
 - (b) Organize briefing programmes, special events, guided tours and interactive workshops, and engage with organizers of Model United Nations conferences;
 - (c) Organize outreach and education programmes on the Holocaust and the transatlantic slave trade and create publications, research guides and exhibits on the same priorities, with a special focus on young people;
 - (d) Develop communications materials, visual identities and branding in support of United Nations priorities;
 - (e) Develop and maintain strategic partnerships with the entertainment, advertising and publishing industries, major sports and international events and institutions of higher education and research, targeting young people in particular;
 - (f) Work with partners to develop multilingual and effective educational resources and programmes, campaigns, projects and events to inspire and encourage action for the 2030 Agenda for Sustainable Development;
 - (g) Facilitate knowledge-sharing and the preservation of United Nations information resources for internal and external audiences.
- 28.51 The above-mentioned work is expected to result in:
- (a) A better understanding of the principles and purposes of the United Nations and the mobilization of young people and student participation in local, regional or national political, non-governmental and intergovernmental processes;
 - (b) Increased mobilization of youth and student activity to advance the achievement of the Sustainable Development Goals and foster a new generation of leaders committed to the principles and values of the United Nations;
 - (c) Increased access to United Nations documentation and information by Member States, United Nations staff around the world, research institutions, young people, schools and the general public for improved engagement, awareness and decision-making.

Programme performance in 2022

International Day of Peace reinforced the relevance of building peace and ending racism

- 28.52 The subprogramme organized an annual event to mark the International Day of Peace youth observance on 16 September for more than 500 students, under the theme of “End racism. build peace”. The event offered young people an opportunity to present projects that illustrated the action that they had taken to combat racism and thereby foster peace. The subprogramme partnered with a performance art company and created a video for the specific day, which boosted the live and on-demand views for the event and the visibility for International Day of Peace across all digital platforms.
- 28.53 Progress towards the objective is presented in the performance measure below (see figure 28.VIII).

Figure 28.VIII
Performance measure: live and on-demand views for the International Day of Peace
 (Thousands)

Planned results for 2024

Result 1: increased access to United Nations knowledge and parliamentary documentation

Programme performance in 2022 and target for 2024

- 28.54 The subprogramme’s work contributed to the provision of immediate and diverse formats of United Nations parliamentary documents and publications to members of permanent missions, researchers and citizens worldwide, resulting in 4.5 million unique downloads of United Nations content on its platforms, which exceeded the planned target of 3.2 million unique downloads.
- 28.55 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 28.IX).

Figure 28.IX
Performance measure: number of unique downloads of United Nations content on subprogramme platforms (cumulative)
 (Millions)

Result 2: increased engagement and action for the Sustainable Development Goals through the global football community

Proposed programme plan for 2023

- 28.56 The subprogramme’s work contributed to engaging 100 football entities, including 13 federations, 9 football clubs and a mix of national leagues, players associations, foundations, non-governmental organizations and private sector organizations, as official members of the United Nations “Football for the Goals” initiative, which exceeded the planned target of 7 football federations and football clubs.
- 28.57 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 28.X).

Figure 28.X

Performance measure: number of partner entities engaged in the United Nations “Football for the Goals” initiative (cumulative)

Result 3: increased engagement by macro influencers regarding the Sustainable Development Goals

Proposed programme plan for 2024

- 28.58 To accelerate the achievement of the Sustainable Development Goals and to better respond to humanity's pressing challenges, including climate change, armed conflict and the dangerous spread of misinformation and disinformation, the United Nations will work to ensure that diverse groups of stakeholders, including general global audiences, are aware of these issues, including emerging challenges. To that end, the subprogramme has been working at driving engagement from influencers who have been selected by the United Nations and who have a significant social media presence in order to amplify and advocate United Nations priority issues to their considerable and often untapped audiences.

Lessons learned and planned change

- 28.59 The lesson for the subprogramme, on the basis of previous engagements with macro influencers, was that consistent engagement with and outreach to such advocates was essential to success. In applying the lesson, the subprogramme will build on and enhance existing relationships with celebrity advocates already connected to the United Nations system, including designated United Nations Messengers of Peace and Goodwill Ambassadors, to identify milestone moments and opportunities, such as major climate conferences, and key Secretary-General speeches and international days. The influencers will amplify United Nations priorities and messages through their social media platforms and will provide support to such influencers through the drafting of suggested posts and the creation of relevant graphic social media assets. Such advocacy will reach new and geographically diverse

audiences and highlight ways in which the general public can become agents of change. Additional supporters and collaborators will also be identified to advocate by highlighting United Nations messaging and key United Nations campaigns and initiatives.

28.60 Expected progress towards the objective is presented in the performance measure below (see figure 28.XI).

Figure 28.XI

Performance measure: number of macro influencers engaged and combined number of followers

Deliverables

28.61 Table 28.5 lists all deliverables of the subprogramme.

Table 28.5

Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: guidance and expert advice to the Model United Nations; and conferences on subjects such as slavery and the transatlantic slave trade and Holocaust remembrance.

D. Communication deliverables

Outreach programmes, special events and information materials: partnerships with civil society, academic institutions and other entities; educational and promotional materials, including events and lectures on United Nations activities, such as *UN Chronicle* and *Basic Facts about the United Nations*; responses to public enquiries; exhibits at United Nations Headquarters and online; multilingual guided tours to more than half a million visitors in more than one dozen languages; outreach programme with prominent personalities, including Messengers of Peace and other celebrities, as advocates; special events and observances of selected commemorative days and years; Creative Community Outreach Initiative to feature the United Nations or a United Nations issue in a film, television or theatre product; graphic design products in support of branding, communication campaigns and information materials; and student events.

External and media relations: press conferences and press releases to announce new outreach partnerships and special events; and exhibit openings.

Digital platforms and multimedia content: iSeek (including articles), the primary internal communications platform of the Secretariat for all users across the world in English and French; DeleGATE; United Nations Development Business; web and social media presence United Nations System Electronic Information Acquisition Consortium and the United Nations Depository Library Programme.

Library services: a secure digital United Nations central repository (United Nations Digital Library) in the six official languages; online library products for the Library’s global public, loan and related services and the provision of direct and targeted research to representatives of Member States; management of the United Nations System Electronic Information Acquisition Consortium and the United Nations Depository Library Programme; and curation of diverse library content.

B. Proposed post and non-post resource requirements for 2024

Overview

28.62 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 28.6 to 28.8.

Table 28.6

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

28.63 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 28.9 to 28.11 and figure 28.XII.

28.64 As reflected in tables 28.9 (1) and 28.10 (1), the overall resources proposed for 2024 amount to \$108,971,200 before recosting, reflecting a net increase of \$7,164,200 (or 7.0 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

28.65 As reflected in table 28.9 (1), resource changes reflect a net increase of \$199,700, as follows:

- (a) **Subprogramme 1, Campaigns and country operations services** (net increase of \$46,900). The net increase relates to the provision at continuing vacancy rates for one post of Public Information Assistant (General Service (Other level)) established in 2023 pursuant to General Assembly resolution 77/263, which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts (\$53,400), offset in part by the removal of non-recurrent provisions under other staff costs to support the implementation of resolutions and decisions adopted by the Human Rights Council (\$6,500);
- (b) **Subprogramme 2, News services** (net increase of \$21,600). The net increase relates to the provision at continuing vacancy rates for the reassignment of one post of Associate Information Management Officer (P-2) (\$65,600) and the establishment of one general temporary assistance position of Public Information Assistant (General Service (Other level)) (\$35,800) in 2023 pursuant to General Assembly resolution 77/262, which were subject to a 50 per cent vacancy rate in accordance with the established practice for reassigned and newly established posts and positions, offset in part by the removal of non-recurrent provisions under other staff costs and contractual services to support the implementation of new and expanded mandates from the Assembly for webcasting and public information services, as well as resolutions and decisions adopted by the Human Rights Council (\$79,800);
- (c) **Subprogramme 3, Outreach and knowledge services** (increase of \$131,200). The increase relates to the provision at continuing vacancy rates for one post of Associate Information System Officer (P-2) and one post of Associate Information Management Officer (P-2)

reassigned in 2023 pursuant to General Assembly resolution [77/262](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for reassigned posts.

New and expanded mandates

28.66 As reflected in table 28.9 (1), resource changes reflect an increase of \$6,938,600, as follows:

- (a) **Subprogramme 1, Campaigns and country operations services** (increase of \$104,800). The increase relates to additional requirements in support of the human rights treaty bodies system in accordance with General Assembly resolution [68/268](#) to service an additional five weeks of meetings annually. This will entail extra technical and language capacity. The additional requirements include provisions under: (i) other staff costs for two posts of Press Officer (P-2) and two posts of Editor (P-3) (one for English and one for French) (\$42,000); and (ii) contractual services for four additional webcast assistants in English, French, Spanish and Arabic engaged as individual contractors, as well as for webcasting services (\$62,800);
- (b) **Subprogramme 2, News services** (increase of \$6,609,100). The increase relates to:
 - (i) Additional requirements of \$6,540,300, which would support the mandate contained in General Assembly resolution [77/262](#), in which the Assembly recalled paragraph 57 of the report of the Advisory Committee on Administrative and Budgetary Questions ([A/77/7](#)) and reiterated the paramount importance of the equality of the six official languages of the United Nations, and requested the Secretary-General to take additional measures to improve multilingualism and the equal and adequate treatment of all six official languages, and to report thereon in the next programme budget submission. The Advisory Committee, in paragraph 57 of its report, noted that, despite repeated requests of the Assembly, the Department of Global Communications had not proposed measures to increase the availability of press releases in official languages other than English and French. The increase would provide for the production of press releases and coverage of meetings in the six official languages, and the proposed establishment of language teams in Arabic, Chinese, Russian and Spanish (which mirror the existing English and French teams) for the preparation and dissemination of public information products. The additional requirements include an increase under the following objects of expenditure:
 - a. Posts: an increase of \$4,801,100 for the proposed establishment of 54 posts (1 Chief of Section, Meetings Coverage (P-5), 8 Editor (P-4) (2 per language team), 28 Press Officer (P-3), 8 Editorial Assistant (General Service (Other level)), 8 Public Information Assistant (General Service (Other level)) and 1 Administrative Assistant (General Service (Other level)) (see annex III to the present report);
 - b. Other staff costs: an increase of \$1,739,200 related to the provisions for general temporary assistance for two and half months of 14 Press Officers (P-3) and 6 Proofreaders (General Service (Other level)) per language, which would provide additional coverage of meetings during peak workload periods, mainly during the main session of the General Assembly when the six Main Committees of the Assembly are in session;
 - (ii) Additional requirements of \$68,800 under other staff costs (\$3,400) and contractual services (\$65,400) relate to coverage of meetings and webcasting services to support the implementation of the General Assembly resolutions on: (a) further practical measures for the prevention of an arms race in outer space (resolution [77/250](#)); (b) crimes against humanity (resolution [77/249](#)); (c) follow-up to the second United Nations Conference on Landlocked Developing Countries (resolution [77/246](#)); (d) the illicit trade in small arms and light weapons in all its aspects (resolution [76/232](#)); (e) developments in the field of information and telecommunications in the context of international security (resolution [75/240](#)); and (f) modalities for the Summit of the Future (resolution [76/307](#));

- (c) **Programme support** (increase of \$224,700). The additional requirements relate to non-post provisions associated with the proposed establishment of 54 posts (see para. 28.66 (b) (i) a above), including under: (i) contractual services for information technology services (\$86,400); (ii) supplies and materials (\$10,800); and (iii) furniture and equipment for the acquisition of office automation equipment (\$64,800). Furthermore, additional requirements under contractual services would be required for the general temporary assistance positions (see para. 28.66 (b) (i) b above) for information technology services (\$62,700).

Other changes

- 28.67 As reflected in table 28.9 (1), the net effect of the proposed changes is an increase of \$25,900. The breakdown of changes is as follows:
- (a) **Subprogramme 1, Campaigns and country operations services.** The decrease under posts (\$8,700) reflects the proposed geographical redeployment of one Public Information Officer (P-3) from New York to Geneva (see annex III);
- (b) **Subprogramme 2, News services.** The increase under contractual services (\$34,600) relates to the provision for webcasting services that are anticipated to be proposed in the context of future statements of programme budget implications, on the basis of historical trends.

Other assessed and extrabudgetary resources

- 28.68 As reflected in tables 28.9 (2) and 28.10 (2), other assessed resources amount to \$898,000. The resources would complement regular budget resources and would support public information activities in peacekeeping missions.
- 28.69 As reflected in tables 28.9 (3) and 28.10 (3), the Department expects to continue to receive both cash and in-kind contributions. In 2024, extrabudgetary resources amount to \$10,047,900. The resources would complement regular budget resources and would be used mainly to carry out the Department's capacity development work, support specific communications campaigns at Headquarters and in the field, support multimedia and operational activities in Hindi, provide webcast and website support activities, and conduct activities in support of the United Nations Development Business, United Nations Academic Impact and United Nations System Electronic Information Acquisition Consortium programmes. Anticipated in-kind contributions would provide primarily for rent-free premises for United Nations information centre offices, with an estimated value of \$1,500,000.
- 28.70 The extrabudgetary resources under the present section are subject to the oversight of the Department, which has delegated authority from the Secretary-General.

Executive direction and management

- 28.71 The executive direction and management component comprises the Office of the Under-Secretary-General.
- 28.72 The overall responsibilities of the executive direction and management component include the following functions:
- (a) The overall direction and strategic management of United Nations communications in the implementation of the Department's mandates and its approved programme of work, both at Headquarters and in the field;
- (b) The establishment of departmental strategy, policies and guidelines, while dealing with specific policy and management issues and problems;
- (c) The administrative, financial and personnel management of the Department;

- (d) The direction of liaison functions performed by the Department with regard to intergovernmental bodies, such as the Committee on Information, and with the United Nations Communications Group;
- (e) Oversight of crisis communications and reputation management, convening relevant United Nations entities and partners within crisis cells to align approaches and messaging, and providing crisis communications policy, guidance and training;
- (f) The establishment of United Nations communications priorities, identifying opportunities to communicate about these within a congested media landscape, and providing coordination across the United Nations system by strengthening the United Nations Communications Group, including at the country level through United Nations information centres and the resident coordinator system;
- (g) The promotion of information integrity in public information, including the monitoring and analysis of and response to digital content hostile to the United Nations and its staff and operations.

28.73 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. The Department will, where feasible and effective, continue to make all official documentation, publications, brochures and communications and advocacy materials available online, rather than in print, in order to reduce its carbon footprint and save energy. It will also continue to adopt a range of sustainability practices, including reducing the photocopying and printing of internal documents, and will promote videoconferencing, in order to reduce the travel undertaken, where possible. In addition, the Department will continue to support internal and external communications on United Nations system sustainability efforts at Headquarters and in duty stations and field missions, and will continue to encourage staff to join the ActNow campaign and other Secretariat initiatives focused on individual action related to climate change and sustainability.

28.74 Information on the timely submission of documentation and advance booking for air travel is reflected in table 28.12. With regard to the advance booking for air travel, the Department has implemented the requirement for the traveller to request approval from the Under-Secretary-General for Global Communications for cases that do not comply with the policy and to provide a reason for the delayed request and justification for travel. In addition, the Department reviews closely the exceptions sought and regularly sends communications to staff and managers to raise awareness of the policy requirement and the importance of minimizing the instances of exceptions.

Subprogramme 1

Campaigns and country operations services

28.76 The proposed regular budget resources for 2024 amount to \$40,173,800 and reflect an increase of \$143,000 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 28.65 (a), 28.66 (a) and 28.67 (a) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 28.14 and figure 28.XIV.

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

28.77 Other assessed resources for this subprogramme amount to \$560,600. The resources would complement regular budget resources and would be used mainly to support peacekeeping missions through guidance, backstopping and advice on their communications strategies, workplans and communications campaigns; the organization of training; the maintenance of digital and web platforms; and the provision of assistance to missions during start-up or downsizing. The increase of \$30,900 relates to the updated salary costs, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).

28.78 Extrabudgetary resources for the subprogramme amount to \$1,015,400. The resources would complement regular budget resources and would be used mainly to support communications campaigns at Headquarters.

**Subprogramme 2
News services**

28.79 The proposed regular budget resources for 2024 amount to \$41,302,700 and reflect an increase of \$6,665,300 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 28.65 (b), 28.66 (b) and 28.67.(b) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 28.15 and figure 28.XV.

Figure 28.XV
Subprogramme 2: distribution of proposed resources for 2024 (before recosting)
 (Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

- 28.80 Other assessed resources for the subprogramme amount to \$337,400. The resources would complement regular budget resources and would be used mainly to support activities in relation to the broadcasting of stories and the hosting of peacekeeping-related videos online. The increase of \$10,000 relates to the updated salary costs, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).
- 28.81 Extrabudgetary resources for the subprogramme amount to \$3,062,100. The resources would complement regular budget resources and would be used mainly to support multimedia activities in Hindi and activities related to webcast and website services. The projected increase of \$152,300, compared with estimated 2023 resources, is attributable mainly to anticipated increases in the scope for multimedia activities.

**Subprogramme 3
 Outreach and knowledge services**

- 28.82 The proposed regular budget resources for 2024 amount to \$20,853,900 and reflect an increase of \$131,200 compared with the appropriation for 2023. The proposed increase is explained in paragraph 28.65 above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 28.16 and figure 28.XVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

28.83 Extrabudgetary resources for the subprogramme amount to \$5,124,100. The resources would complement regular budget resources and would be used mainly to support the substantive and operational activities of various programmes, including the United Nations Development Business, United Nations System Electronic Information Acquisition Consortium and United Nations Academic Impact initiatives. The decrease of \$2,423,100 is attributable mainly to the planned discontinuation and transfer, where applicable, of the activities and resources of the Office of the Envoy of the Secretary-General on Youth following the newly established United Nations Youth Office as an independent office pursuant to General Assembly resolution [76/306](#).

Programme support

28.84 The proposed regular budget resources for 2024 amount to \$4,077,500 and reflect an increase of \$224,700 compared with the appropriation for 2023. The proposed increase is explained in paragraph 28.66 (c) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 28.17 and figure 28.XVII.

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee stresses the Department's crucial role in the global communication of the work of the United Nations, including in the implementation of the 2030 Agenda for Sustainable Development. In that connection, the Committee is of the view that an assessment should be conducted to identify and achieve rationalization of the Department's resources, including with respect to improving its current operating model and the alignment of its organizational structures, to ensure that the Department efficiently and effectively fulfils its central function of communicating and disseminating information globally on the role and activities of the United Nations. The Department should also identify areas for potential improvement, leveraging opportunities for complementarity with other entities within the United Nations system, including the cooperation between the United Nations information centres and the resident coordinator system on the implementation of the 2030 Agenda, while also taking into account rapid technological innovations, bearing in mind the differences in access to technology across the world. In view of the above, the Committee recommends that the General Assembly request the Secretary-General to conduct, within existing resources, an independent review of the Department and to provide the outcome thereof to the General Assembly in the next programme budget proposal (para. VII.3).

The Advisory Committee trusts that consolidated information on lessons learned since the inception of the Studio, including the utilization rate, client base and cost-recovery efforts, will be provided in the context of the next programme budget submission (para. VII.16).

The Advisory Committee trusts that the Secretary-General will provide more detailed information on resources funded by cost recovery, including their recording, in the next programme budget submission (para. VII.23).

A triennial review of the Department's operations was completed by the Office of Internal Oversight Services in 2022 and the preliminary findings of the Department's evaluations of the global communications strategy and on multilingualism are expected to be completed in the second quarter of 2023.

The Office of Internal Oversight Services, in its triennial review, recommended, among others, that the Department invest in high-level, sustained and forward-looking strategic thinking and prioritization. The 2024 plan and priorities reflect a dynamic and responsive approach to managing a fast-changing media and communications landscape to ensure that content is highly relevant and engaging, with greater reach. The Department will utilize existing partnerships and networks and new opportunities to generate new ideas, find new audiences and amplify its messages through these channels. For example, in response to insights on the audience impact of influencers, including their ability to engage a wide range of audiences and encourage them to become agents of change, the Department has included an expansion of its outreach to high-profile influencers in its planned result 3, under subprogramme 3.

The financial performance report will include consolidated information on the amounts recovered in 2022, by type of service.

The Advisory Committee encourages the ongoing coordination and harmonization of activities between the United Nations information centres and the resident coordinator offices and trusts that updated information thereon will be provided in the context of the next programme budget submission. The Committee recommends that the General Assembly request the Secretary-General to facilitate the dissemination of UN Web TV and web content, including through the information centres, to Member States' public and private channels and to provide an update thereon in the next programme budget submission (para. VII.25).

In October 2022, the Department and the Development Coordination Office collaborated on the administrative framework for the integration of United Nations information centres and resident coordinator offices project, which is intended to develop an internal administrative framework, including workflows, roles, templates and technology, to support the integration of human resources, procurement, finance and other operations. The framework is anticipated to be set up in 2023 and will generate benefits in terms of productivity, more efficient administration and synergies between resident coordinator offices and United Nations information centres.

On the programmatic side, coordination on strategic communications and its implementation is well established between the United Nations information centres and resident coordinator offices. Since the onset of the United Nations development system reform in 2019, the 44 resident coordinator office-integrated United Nations information centres have been leading or supporting United Nations communications groups in positioning key priorities in the United Nations Sustainable Development Cooperation Framework, the Sustainable Development Goals and other specific communication campaigns. This has led to a collaborative implementation of programmes between United Nations information centres, resident coordinator offices and United Nations country team members. Capacity development for all field communications officers is also undertaken jointly by the Department and the Development Coordination Office.

The Advisory Committee trusts that further justification for the discontinuation of the *Yearbook* and the utilization of the related resources, as well as the new feature called Yearbook Pre-press, will be provided to the General Assembly during the consideration of the present report. The Committee also trusts that consolidated lessons learned from the use of the *Yearbook* will be provided in the next programme budget submission (para. VII.27).

The Department is in the process of reassigning staff of the *Yearbook* unit to ensure that their skills and competencies are used, where needed, in the Department. A small number of the existing team will continue to work on the Year in Review, a legacy website for the *Yearbook*, currently called Yearbook Pre-press, which will likely fall under the responsibility of the Dag Hammarskjöld Library, as part of its role in preserving United Nations reports and documentation. A small number of the editors and writers will be tasked with producing updates of high-demand publications such as *Basic Facts about the United Nations*, *The Essential UN*, *The United Nations Guide to Model UN* and potentially new publications. The remaining staff will be reassigned to areas in the Department to support the production of departmental reports, support the Committee on Information secretariat and augment the production of content on United Nations websites and other digital products.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 1 Campaign and country operations services	1	P-3	Redeployment (geographical) of a Public Information Officer	The redeployment of one post of Public Information Officer (P-3) from New York to Geneva. By having a member of the social media team located in a different time zone, the Department would be able to provide 24-hour social media coverage and manage reputational risk by overseeing content posted during the night hours in New York, as well as respond to global events in real time.
	2	GS (OL)	Reassignment of Information Management Assistant as Public Information Assistant	The introduction of new technologies such as Microsoft SharePoint have enabled the Department to undertake its activities without information technology programming capacity provided by Information Management Assistants. The new duties of these posts include maintaining knowledge management platforms, organizing webinars, preparing branding materials and reviewing content on websites and social media platforms of United Nations information centres to monitor compliance, and are more closely aligned with public information activities.
Subprogramme 2 News services				To support the mandate contained in General Assembly resolution 77/262 , in which the Assembly reiterated the paramount importance of the equality of the six official languages of the United Nations, and requested the Secretary-General to take additional measures to improve multilingualism and the equal and adequate treatment of all six official languages, and to report thereon in the next programme budget submission, an additional 54 posts would enable the simultaneous production of press releases and coverage of meetings in the six official languages and the proposed establishment of language teams in Arabic, Chinese, Russian and Spanish (which mirror the existing English and French teams) for the preparation and dissemination of public information products.
	1	P-5	Establishment of Chief of Section	With 79 staff under supervision, the expanded meetings coverage team cannot be managed effectively by one Chief of Section (P-5). Following the existing practices of United Nations News sections I and II, an additional post is required to work alongside the existing Chief of Section, Meetings Coverage, with each Chief managing the planning, organizing and administration of three of the language teams.
	8	P-4	Establishment of 8 Editors (2 per language team)	The Editors are responsible for the overall quality and timely delivery of the press releases, including editing press releases and giving final approval for their release; planning meetings coverage schedules and assignments; recruiting, training and mentoring Press Officers; and

Part VII Global communications

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
				interacting with United Nations offices and Member States on meetings coverage requirements and output.
	28	P-3	Establishment of 28 Press Officers (7 per language team)	The Press Officers follow closely speaker-by-speaker intergovernmental meetings and write summaries for proofreading and editing while the meetings are under way. They conduct background research in preparation for upcoming meetings. Acting as team leaders, they edit summaries prepared by fellow Press Officers and finalize press releases for publication.
	8	GS (OL)	Establishment of 8 Editorial Assistants (2 per language team)	The Editorial Assistants support the Editors in scheduling and planning meeting coverage assignments and in the daily operation of the team and assist in the proofreading of press releases. In addition, they oversee information technology requirements of the Meetings Coverage Section and troubleshoot computer and web-posting problems.
	8	GS (OL)	Establishment of 8 Public Information Assistants (2 per language team)	The Public Information Assistants proofread draft press releases in line with United Nations guidelines, format them and publish them on the website.
	1	GS (OL)	Establishment of Administrative Assistant	The incumbent would provide a full range of office and administrative support to address the increased administrative work required in the coverage of meetings as a result of the proposed additional 52 new language posts for Arabic, Chinese, Russian and Spanish. The Administrative Assistant will also support the 2 Chiefs of Section (P-5).

Programme 25

Management and support services

* A/78/50.

Overview

Mandates and background

- 29.1 The overall purpose of section 29, Management and support services, the responsibility for which is vested in the Department of Management Strategy, Policy and Compliance, the Department of Operational Support, the Office of Information and Communications Technology and the administrative services of the United Nations Office at Geneva, the United Nations Office at Vienna and the United Nations Office at Nairobi, is to enhance the accountability and efficiency of the Organization in managing its resources in four broad management areas, namely, finance, human resources, information and communications technology and support services, including procurement and infrastructure; to provide support services to the intergovernmental processes of the Organization; to secure financing for the mandated programmes and activities of the Secretariat; and to support the implementation of those programmes and activities.
- 29.2 The departments and offices under section 29 derive their mandates and guidance from relevant articles of the Charter of the United Nations, specifically Articles 8, 17, 97, 100 and 101, as well as the Financial Regulations and Rules of the United Nations; the Staff Regulations and Rules of the United Nations; the Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation; and General Assembly resolutions as included in the relevant components.
- 29.3 Details on the composition of the deliverables proposed under section 29, together with their specific objectives, planned results and the related resource requirements, are contained in subsections 29A to 29F. It is recalled that, in the context of the global service delivery model, a separate subsection was proposed under section 29, as subsection 29D, Global Shared Service Centres, to include the overall resource requirements of the Global Shared Service Centres, as well as the proposed distribution by funding source. In view of the decision of the General Assembly at its seventy-sixth session not to take action on the report of the Secretary-General on the global service delivery model, the listing of the subsections under section 29 has been revised accordingly, in accordance with the recommendation of the Advisory Committee on Administrative and Budgetary Questions ([A/77/7](#), para. VIII.2), endorsed by the Assembly in its resolution [77/262](#).
- 29.4 Summaries of the overall resource requirements for section 29 are set out in the table below.

Foreword

During the post coronavirus disease (COVID-19) period, the Department of Management Strategy, Policy and Compliance will enrich and mainstream the ongoing reforms through continuous improvement and new ways of working internally.

The fruits of reform will continue to be realized and reflected through the annual programme budget cycle. The annual programme budget has been proven to drive a more results-oriented culture and more agile programme planning. The format and presentation balance the need for more transparency and accountability with a preparation process that is efficient and sustainable, to facilitate more holistic reporting and informed decision-making.

Building on good practices and lessons learned, the Department will continue to strengthen the accountability framework, simplify policies, increase the use of data analytics, including through real-time reporting that is available to Member States, and prioritize conduct and integrity through automated tools with the aim of enhancing transparency and facilitating risk management, monitoring and reporting.

The Department will continue to place an essential focus on increasing workforce diversity, in terms of both equitable geographical representation and gender parity across the Organization, in its talent management and strategic workforce planning, and on strengthening its responses to shifting priorities and emergencies, to enable the Organization to deliver on its mandates. Over the course of 2024, the Department will further implement the strategic action plan on addressing racism and promoting dignity for all across the Secretariat. Through all its functions, the Department will endeavour to work towards a more agile, diverse and accountable Organization.

(Signed) Catherine **Pollard**
Under-Secretary-General
Management Strategy, Policy and Compliance

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 29A.1 The Department of Management Strategy, Policy and Compliance is responsible for policy leadership in all management areas through the provision of a clear, integrated global management strategy and policy framework and through strengthened monitoring, evaluation and accountability mechanisms. The Department is also responsible, jointly with the Department of Operational Support, for managing the activities of the Office of Information and Communications Technology. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [72/266 A](#), [72/266 B](#), [72/254](#) and [73/281](#). The Department plays an integral role in realizing the Secretary-General's new management paradigm, with an emphasis on transparency, accountability and decision-making that is closer to points of delivery.

Strategy and external factors for 2024

- 29A.2 The strategy for 2024 includes continuing to advance the new management paradigm through an integrated approach, with four interlinked pillars: the enterprise resource planning solution; programme planning, finance and budget; human resources; and business transformation and accountability. The Department will:
- (a) Commit to new internal ways of working, including through the formulation of holistic policies and approaches that foster the achievement of tangible results, including through renewed investment in technology and a commitment to continuous improvement;
 - (b) Strengthen the Organization's resilience, including its preparedness to maintain business continuity in emergencies, by guiding, monitoring and adjusting the post-coronavirus disease (COVID-19) new internal working practices at United Nations Headquarters to continually adapt to changing environments, risks and opportunities;
 - (c) Drive results-based management policies and practices into the daily functioning and culture of the Organization, together with an integrated cycle of planning, risk and performance management, and evaluation;
 - (d) Foster greater transparency and accountability envisaged to engender greater credibility and trust in the capabilities of the United Nations as an organization, by both the Member States and the people that it serves;
 - (e) Enhance data analysis and reporting capabilities that enable real-time, user-friendly access to data to support informed decision-making and improved management of risks to achieve the objectives of the United Nations;
 - (f) Create a collaborative and inclusive environment through integrated solutions and strategic partnerships throughout the United Nations system;
 - (g) Work towards the implementation of a dynamic human resources strategy that fosters greater workforce diversity, supports managers in finding the right people, provides a strengthened learning framework, supports the development of new competencies, talents and strengthened multilingualism, ensures a civil and safe work environment and promotes a culture of continuous learning, innovation and improvement to actively build a better United Nations;
 - (h) Address racism and racial discrimination more directly and effectively in the Secretariat by encouraging reporting, enhancing accountability, monitoring and transparency, and periodically reporting on progress in addressing the issue and on efforts towards racial diversity, equity and inclusion.

- 29A.3 The Department will continue to provide leadership in the development and delivery of integrated organizational management strategies, policies and models supporting a decentralized, field-focused paradigm in which managers are empowered through the enhanced delegation of authority framework. It will liaise with Member States and other external entities on management-related issues and foster coordination within the Secretariat, as well as with the funds, programmes and specialized agencies of the United Nations system, to build partnerships and promote best practices.
- 29A.4 Having laid the foundation for greater decentralization, the main challenge will continue to be to accelerate the culture shift required to fully implement the new management paradigm of increased delegation of authority, transparency and accountability and a culture of continuous learning.
- 29A.5 The Department will continue to enable business transformation that leverages current and future trends in enterprise resource planning solutions. The Umoja solution and its accompanying business intelligence framework will allow the Department to respond to organizational requirements for better and more timely decision-making, enhanced accountability systems and the rapid adoption of newly identified best practices, as well as strengthened support for real-time data access, augmented and predictive analytics and planning and monitoring capabilities.
- 29A.6 With regard to cooperation with other entities, the Department will continue to support and work closely with all entities of the Secretariat and build partnerships, internally within the Secretariat and externally with the United Nations system, to find inclusive responses to challenges and develop innovative business models that cater to the evolving and specific requirements of each entity, with an emphasis on the field.
- 29A.7 With regard to inter-agency coordination and liaison, the Department will represent the Secretary-General in inter-agency coordination mechanisms, including the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination (CEB) and its networks.
- 29A.8 With regard to the external factors, the Department considered applicable risks identified in its risk register and, accordingly, the overall plan for 2024 is based on the planning assumption that all stakeholders will extend their full cooperation and support to the Department in implementing its mandates.
- 29A.9 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Department will play a leadership role in driving the Secretary-General's system-wide strategy on the future of work and continues to support efforts to achieve gender parity and address sexual harassment in the workplace. Furthermore, the Department will work towards the equitable geographical representation of Member States in the Secretariat workforce and prioritize the integration of environmental sustainability and resilience management into the strategies, policies and compliance and reporting frameworks of the Organization. Through its policy leadership in these interconnected fields, the Department will foster a change in culture at all levels of the Secretariat.
- 29A.10 In line with the United Nations Disability Inclusion Strategy, the Department will continue to elevate awareness of disability inclusion within it and support entities by mainstreaming disability inclusion in human resources strategy and policy, in particular in the areas of leadership, inclusiveness and organizational culture, which are core areas of the Strategy.

Impact of the pandemic and lessons learned

- 29A.11 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates. In particular, support was provided to the Fifth Committee in performing most of its work in an online format in the early part of the year and transitioning to in-person meetings as the year progressed, and in the areas of accountability, enterprise risk management, analytics and business transformation, where the format of delivery of some workshops was modified to a hybrid model. Starting in 2020 with the onset of the pandemic and continuing into 2022, learning programmes with an in-person component were converted to remote delivery. This allowed for training, such as leadership development programmes, to be delivered without interruption, benefiting staff at different levels across the Secretariat. In addition, the savings related to travel meant that

participation in the programmes was increased. With the easing of pandemic-related restrictions in 2022, some programmes, such as the United Nations Leaders Programme, were conducted in a hybrid format, taking place both online and in person.

- 29A.12 The Department continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including enhancement of the virtual delivery of its mandates together with the production of content that can be more widely disseminated and various interactive applications so as to help keep clients engaged. Holding hybrid training sessions by having a presence both on site and remotely also allows a reduction in the need for travel and the ability to cover a wider range of topics and dynamically better respond to the needs assessed by staff on the ground. Virtual sessions alone are not sustainable to reach all of the objectives and will be complemented with in-person visits to enable more in-depth discussions or to allow discussion of complex or sensitive issues.

Legislative mandates

- 29A.13 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

52/12 A and B	Renewing the United Nations: a programme for reform	76/246 B	Special subjects relating to the programme budget for 2022
58/269	Strengthening of the United Nations: an agenda for further change	76/271	Addressing racism and promoting dignity for all in the United Nations Secretariat
58/280	Review of duplication, complexity and bureaucracy in United Nations administrative processes and procedures	77/254 77/262	Programme planning Questions relating to the proposed programme budget for 2023
60/1	2005 World Summit Outcome	77/263 A and B	Special subjects relating to the proposed programme budget for 2023
61/245	Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies	77/267	Shifting the management paradigm in the United Nations: review of changes to the budgetary cycle
72/266 A and B; 73/281	Shifting the management paradigm in the United Nations

Services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination

Charter of the United Nations

- Chap. IV, Art. 17 Functions and powers of the General Assembly

General Assembly resolutions

45/248 B, sect. VI Questions relating to the programme budget for the biennium 1990–1991

Economic and Social Council resolutions

920 (XXXIV) Special Committee on coordination with particular emphasis on the United Nations Development Decade

**Component 3
Management advisory services**

General Assembly resolutions

69/273	Procurement	77/260	Administration of justice at the United Nations
72/219	Protection of global climate for present and future generations of humankind		

**Subprogramme 2
Programme planning, finance and budget**

**Component 1
Finance**

General Assembly resolutions

60/283	Investing in the United Nations for a stronger Organization worldwide: detailed report	77/2	Scale of assessments for the apportionment of the expenses of the United Nations: requests under Article 19 of the Charter
76/272	Improving the financial situation of the United Nations	77/253	Financial reports and audited financial statements, and reports of the Board of Auditors

**Component 2
Field operations finance**

General Assembly resolutions

60/283	Investing in the United Nations for a stronger Organization worldwide: detailed report	76/239	Scale of assessments for the apportionment of the expenses of United Nations peacekeeping operations
73/307	Improving the financial situation of the United Nations	77/253	Financial reports and audited financial statements, and reports of the Board of Auditors

**Component 3
Programme planning and budgeting**

General Assembly resolutions

2617 (XXIV)	Study of the nature of the increases in the level of expenditure in the United Nations regular budget	42/211	Implementation of General Assembly resolution 41/213
41/213; 60/254	Review of the efficiency of the administrative and financial functioning of the United Nations	55/231	Results-based budgeting

**Subprogramme 3
Human resources**

General Assembly resolutions

52/252	Revisions to article I of the Staff Regulations and chapter I of the 100 series of the Staff Rules of the United Nations	61/274	Comprehensive proposal on appropriate incentives to retain staff of the International Criminal Tribunal for Rwanda and the International Tribunal for the Former Yugoslavia
58/144	Improvement of the status of women in the United Nations system		
61/262	Conditions of service and compensation for officials other than Secretariat officials: members of the International Court of Justice and judges and ad litem judges of the International Tribunal for the Former Yugoslavia and the International Criminal Tribunal for Rwanda	63/271 68/265 71/263; 72/254; 77/278 74/254 75/245 A; 77/256	Amendments to the Staff Regulations Mobility framework Human resources management Seconded active-duty military and police personnel United Nations common system

**Subprogramme 4
Business transformation and accountability**

General Assembly resolutions

59/272	Review of the implementation of General Assembly resolutions 48/218 B and 54/244	63/276	Accountability framework, enterprise risk management and internal control framework and results-based management framework
61/245	Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies	64/259	Towards an accountability system in the United Nations Secretariat

Deliverables

29A.14 Table 29A.1 lists all cross-cutting deliverables of the programme.

Table 29A.1

Cross-cutting deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	8	26	10	10
Meetings of:				
1. The Fifth Committee of the General Assembly	3	13	4	4
2. The Special Committee on Peacekeeping Operations	1	1	1	1
3. The Advisory Committee on Administrative and Budgetary Questions	3	9	4	4
4. The Committee for Programme and Coordination	1	3	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultation with Member States on matters relating to the work of the Department.				
D. Communication deliverables				
Outreach programmes, special events and information materials: information and engagement events; articles and videos; and newsletters.				
Digital platforms and multimedia content: websites and social media accounts of the Department.				
E. Enabling deliverables				
Administration: six meetings of the Management Client Board and two meetings of the Arts Committee.				

Evaluation activities

- 29A.15 An evaluation by the Office of Internal Oversight Services (OIOS) of the accountability system of the United Nations completed in 2022 has guided the proposed programme plan for 2024.
- 29A.16 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. For example, lessons and actions for improvement recommended by OIOS will be applied during the planning for 2024 to further strengthen the individual components of the accountability system and the overall culture of accountability in the Secretariat. Examples of areas identified for improvement and further action include: improving understanding of the types of internal controls in force and of the respective roles, a subject matter which is envisaged for inclusion in the enterprise risk management training modules for the focal points; enhancing programme performance information by continuing to streamline the utilization of the Umoja Extension 2 strategic planning, budgeting and performance management solution so as to enhance oversight and management; and continuing to promote analytics, change and innovation by continuing to enhance management dashboards and expand the data analytics and visualization training programme and adopting new ways of working, Secretariat-wide.
- 29A.17 An evaluation by the Department of Management Strategy, Policy and Compliance, the Department of Operational Support and the Office of Information and Communications Technology on self-assessment of information and communications technology security is planned for 2024.

Programme of work

Subprogramme 1

Enterprise resource planning solution, services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination, and management advisory services

Component 1

Enterprise resource planning solution

Objective

- 29A.18 The objective, to which this component contributes, is to improve the management of the Organization's resources for its work in line with mandates.

Strategy

- 29A.19 To contribute to the objective, the component will:
- (a) Support business transformation in the areas of programme planning, programme management, monitoring of programme delivery, and data and business analytics by harmonizing processes and practices and using modern technology;
 - (b) Support the Organization by building upon its business intelligence platforms to support access to real-time data, augmented and predictive analytics, including machine learning and natural language processing, and planning capabilities;
 - (c) Support, monitor and upgrade the Umoja system, to meet evolving business needs through continuous improvements directed by the business and work with business areas to translate requirements into integrated functional solutions that are built, whenever possible, through out-of-the-box solutions that have sustainable road maps and meet Umoja architectural standards.

- 29A.20 The above-mentioned work is expected to result in:
- (a) A more efficient and transparent management of the Organization’s financial, human and physical resources;
 - (b) Effective and timely decision-making by management informed by advanced analytics;
 - (c) Rapid adoption and application of newly identified best practices by the Organization;
 - (d) The continued effective operation of the Organization and of flexible working arrangements, given that Umoja functionality will underpin the Organization’s work beyond the pandemic.

Programme performance in 2022

Effective programme delivery enabled through fit-for-purpose technology

29A.21 A total of 287 continuous improvements were implemented in Umoja to keep the system fit for purpose. Business continuity was strengthened through the implementation of a new solution ensuring high availability of Umoja through industry-leading database replication technology. In the area of human capital management, several improvements have been made to reinforce and streamline processes and increase accuracy. In the area of payroll, a complex enhancement was implemented globally to further automate many individual payroll processes and reduce the risk of errors. The component also supported the redesign of the implementing partner agreement formats, as well as new features for monitoring partner payments and reporting submissions in the implementing partner solution. In the area of finance, changes to electronic payment messaging increased automation and reduced errors.

29A.22 Progress towards the objective is presented in the performance measure below (see table 29A.2).

Table 29A.2
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Close to 100 per cent on-time payments and a reduction in the number of payments requiring reissue
		Improved ability for users to better evaluate the performance of implementing partners

Planned results for 2024

Result 1: advanced analytics for staff and Member States

Programme performance in 2022 and target for 2024

29A.23 The component’s work contributed to Member States gaining access to information and insights through two portals, the uniformed capabilities support portal and the United Nations Secretariat workforce portal, which met the planned target.

29A.24 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.3).

Table 29A.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Increased access to data for managers and Member States in alignment with the Secretary-General’s data strategy, along with deployed Umoja Extension 2 functionality	Better-informed decision-making by managers, based on feedback received, on human resources and uniformed capabilities management that was enabled by the introduction of Umoja analytics	Member States gained access to information and insights through two portals, the uniformed capabilities support portal and the United Nations Secretariat workforce portal	Internal and external stakeholders, as well as Member States, have access to additional data models and dashboards/portals	An expanded group of internal and external stakeholders, as well as Member States, have access to additional data models and dashboards/portals

Result 2: improved stability, security and user experience in Umoja

Programme performance in 2022 and target for 2024

- 29A.25 The component’s work contributed to improved stability, security and user experience in Umoja through multi-factor authentication and regular upgrades, ensuring resilience to security threats, as well as the completion of the planning to upgrade Umoja through the implementation of the SAP ERP 6.0 enhancement package 8 to keep pace with technological advances, which met the planned target.
- 29A.26 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.4).

Table 29A.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Upgrade of all Umoja servers and databases, integration with cloud solutions, additional software upgrades and Umoja disaster recovery exercise	Document management upgrade, reporting solutions upgrades, increased security through Azure authentication, reinforced disaster recovery mechanisms and additional software upgrades	Umoja Change Board endorsed the detailed project plan for the implementation of enhancement package 8 Multi-factor authentication and regular upgrades ensuring resilience to security threats enabled strengthened security for the Umoja application	All users benefit through implemented upgrades, including enhancement package 8 and related software dependencies	All users will continue to benefit through implemented upgrades, including enhancement package 8 and related software dependencies

Result 3: digital transformation and innovations through Umoja for more effective decision-making

Proposed programme plan for 2024

29A.27 Within the framework set out in Our Common Agenda, subject to any future decision of the General Assembly and as part of the set of capabilities to enable a wider transformation towards “United Nations 2.0”, the component delivers digital transformation and innovations driven by business needs and based on the latest technology. These are aimed at contributing to the implementation of reforms, process improvements and the effective use of the Organization’s resources.

Lessons learned and planned change

29A.28 The lesson for the component was that the technology road map within enterprise resource planning is constantly evolving to reflect emerging technologies, business needs and user requirements. In applying the lesson, the component will keep abreast of technology advancements and trends to ensure the digital transformation of the Organization. The component will enhance the user experience of Umoja, including through mobile technologies and a more intuitive user interface. System updates will also focus on leveraging the Umoja system to develop new features and functionalities, strengthening the resilience of information and communications technology security and compatibility with new web browsers, among other things.

29A.29 Expected progress towards the objective is presented in the performance measure below (see table 29A.5).

Table 29A.5

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	The enterprise risk management module was available to six pilot entities to enable the further realization of benefits of the Secretary-General’s reform strategy and the Secretary-General’s statement of internal control	Improvements to the financial statement process related to after-service health insurance, including system enhancements to enable the migration into Umoja of locally recruited former staff participating in after-service health insurance under the medical insurance plan The process control module was available to further support the Secretary-General’s initiative to implement the statement of internal control, an	Availability of additional innovative features and enhancements driven by business needs and based on the most recent technology road maps, contributing to an effective functioning of the Organization’s business processes	Availability of additional innovative features and enhancements driven by business needs and based on the most recent technology road maps, contributing to an effective functioning of the Organization’s business processes

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
		important milestone towards achieving accountability for results		

Deliverables

29A.30 Table 29A.6 lists all deliverables of the component.

Table 29A.6

Subprogramme 1, component 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	–	1	1	1
1. Progress report on the status of the functioning and development of the enterprise resource planning system	–	1	1	1
Substantive services for meetings (number of three-hour meetings)	–	3	3	3
2. Meetings of the Fifth Committee of the General Assembly	–	1	2	2
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	–	2	1	1
E. Enabling deliverables				
Administration: consultations with client groups, through the governance mechanisms and, informally, on the sustainability of and continuous improvements in the system to meet their business needs; Umoja Change Board meetings and informal exchanges; meetings with the Management Committee, Management Client Board and Information and Communications Technology Steering Committee; global information sessions for Secretariat staff; approximately 12 release notes to update users on changes to Umoja; and approximately six internal broadcasts, including news articles on Umoja upgrades.				
Information and communications technology: the Umoja system, including its upgrades and improvements; and service desk tier 3 support.				

Component 2

Services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination

Objective

29A.31 The objective, to which this component contributes, is to facilitate effective and efficient deliberations and decision-making by the Fifth Committee of the General Assembly and the Committee for Programme and Coordination.

Strategy

29A.32 To contribute to the objective, the component will:

- (a) Improve communication on organizational and procedural aspects of meetings;
- (b) Enhance substantive, technical and secretariat support to the Member States and other participants in the meetings.

- 29A.33 The above-mentioned work is expected to result in the smooth conduct of meetings of the intergovernmental bodies serviced.

Programme performance in 2022

Enhanced utilization of technology to facilitate the work of the committees

- 29A.34 In 2022, the component leveraged the technical capabilities of available tools in Fifth Committee Place and CPC Place in the e-deleGATE platform to improve communication with members of both Committees, taking into account the experience and lessons learned from the COVID-19 pandemic. The effective utilization of the e-speakers and the e-announcements modules in e-deleGATE contributed to the accuracy and timeliness of the information available to the members of the Committees. The electronic circulation of information, including documentation, facilitated the work of the Committees, as emphasized by delegations in survey responses.

- 29A.35 Progress towards the objective is presented in the performance measure below (see figure 29A.I).

Figure 29A.I

Performance measure: Member States' delegates who were either "very satisfied" or "satisfied" regarding the content of Fifth Committee Place and CPC Place

(Percentage)

Planned results for 2024

Result 1: improved information available to delegates

Programme performance in 2022 and target for 2024

- 29A.36 The component's work contributed to the high satisfaction of Member States regarding the availability of information, with 100 per cent of Fifth Committee and 100 per cent of Committee for Programme and Coordination survey respondents indicating they were either "very satisfied" or "satisfied" with the availability of organizational and procedural information, which met the planned target.
- 29A.37 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.7).

Table 29A.7
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned) ^a	2024 (planned)
Positive survey results on the availability of organizational and procedural information	High satisfaction of Member States regarding the availability of organizational and procedural information	High satisfaction of Member States regarding the availability of organizational and procedural information	Maintained positive survey results on the availability of organizational and procedural information	Maintained positive survey results on the availability of organizational and procedural information
<ul style="list-style-type: none"> • Fifth Committee of the General Assembly: 100 per cent • Committee for Programme and Coordination: 100 per cent 	<ul style="list-style-type: none"> • Fifth Committee of the General Assembly: 100 per cent • Committee for Programme and Coordination: 96 per cent 	<ul style="list-style-type: none"> • Fifth Committee of the General Assembly: 100 per cent • Committee for Programme and Coordination: 100 per cent 		

Result 2: enhanced accessibility of election- and appointment-related information to Member States

Programme performance in 2022 and target for 2024

29A.38 The component’s work contributed to an 87.9 per cent satisfaction rate of Fifth Committee members on the election- and appointment-related information available to Member States, which met the planned target.

29A.39 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.8).

Table 29A.8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned) ^a	2024 (planned)
–	Informal feedback and observations received from Member States	An 87.9 per cent satisfaction rate of Fifth Committee members on the election- and appointment-related information available to Member States	Maintained positive feedback on the availability of election- and appointment-related information	Maintained positive feedback on the availability of election- and appointment-related information

Result 3: improved access to effective advice on rules, procedures, precedence, practice and working methods

Proposed programme plan for 2024

29A.40 Ready access to information and advice on rules, procedures, precedence, practice and working methods, prior to and throughout the course of the sessions, is critical to the work of the Fifth Committee and the Committee for Programme and Coordination. Such technical and procedural advice is regularly provided by the component through various modalities, contributing to effective and efficient deliberations and decision-making by the two Committees.

Lessons learned and planned change

29A.41 Building on observations and feedback, the lesson for the component was to focus emphasis on providing information, such as historical background and precedence, and technical and procedural advice to stakeholders, including new delegates and the coordinators facilitating agenda items. In applying the lesson, the component will review the modalities for providing such background information and advice and will update procedural guidelines on an ongoing basis, as well as provide more tailored advice to address specific needs.

29A.42 Expected progress towards the objective is presented in the performance measure below (see table 29A.9).

Table 29A.9

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Positive survey results on the accessibility of the component's staff and the effectiveness of the services provided <ul style="list-style-type: none"> • Fifth Committee of the General Assembly: 100 per cent • Committee for Programme and Coordination: 94 per cent 	Maintained positive survey results on the accessibility of the component's staff and the effectiveness of the services provided	Maintained positive survey results on the accessibility of the component's staff and the effectiveness of the services provided

Deliverables

29A.43 Table 29A.10 lists all deliverables of the component.

Table 29A.10

Subprogramme 1, component 2: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	235	269	247	247
1. Notes on the programme of work of the Fifth Committee of the General Assembly	125	145	125	125
2. Notes on the status of documentation of the Fifth Committee of the General Assembly	40	25	40	40
3. Procedural notes for the Chair of the Fifth Committee of the General Assembly	40	43	40	40
4. Notes on the programme of the work of the Committee for Programme and Coordination	12	33	20	20
5. Notes on the status of documentation of the Committee for Programme and Coordination	2	2	2	2
6. Procedural notes for the Chair of the Committee for Programme and Coordination	16	21	20	20
Conference and secretariat services for meetings (number of three-hour meetings)	200	209	200	200
7. Meetings of the Fifth Committee of the General Assembly	160	163	160	160
8. Meetings of the Committee for Programme and Coordination	40	46	40	40
C. Substantive deliverables				
Consultation, advice and advocacy: advice to 15 Bureau members; consultation and advice to approximately 100 coordinators; and response to queries from and provision of advice to individual delegations on historical proceedings of the two Committees.				
D. Communication deliverables				
Digital platforms and multimedia content: websites of the Fifth Committee of the General Assembly and the Committee for Programme and Coordination; and updates of information on e-deleGATE.				

Component 3 Management advisory services

Objective

29A.44 The objective, to which this component contributes, is to advance transparency of administrative decision-making, fairness, integrity and the resilience of the Organization to deliver on its mandates.

Strategy

29A.45 To contribute to the objective, the component will:

- (a) Strengthen the Organization’s resilience, including its preparedness to maintain business continuity in emergencies, by guiding, monitoring and adjusting the post-COVID-19 ways of working at United Nations Headquarters to continually adapt to changing environments, risks and opportunities;
- (b) Improve the overall quality of the acquisition process and reflect those improvements in substantive policy and guidance-related recommendations, including through the use of data analytics;

- (c) Objectively analyse the facts presented in requests for a management evaluation vis-à-vis the legal framework of the Staff Regulations and Rules of the United Nations and provide the requesting staff member with a reasoned, comprehensive evaluation conveying the basis for the recommendation of the Management Advice and Evaluation Section on the case.
- 29A.46 The above-mentioned work is expected to result in:
- (a) A more resilient, agile and sustainable Organization and an innovative and thriving workforce that delivers results;
 - (b) An Organization better prepared for complex and long-term emergencies;
 - (c) A strengthened acquisition and asset disposal process;
 - (d) The early resolution of disputes that arise from decisions taken in the Administration on a staff member's employment;
 - (e) Greater staff awareness of the internal justice system.

Programme performance in 2022

Technology enables better access to management evaluation

- 29A.47 Recent evolution of new software tools in the Organization raised an opportunity in 2022 for the component to take advantage of technical capabilities to enhance case management and data analytics in the Management Evaluation Unit. Management of statistics in the Unit had, up to that time, been based on a local legacy database that was approaching obsolescence and did not adequately support business continuity. During 2022, the component developed a cloud-based solution integrating case management with case document control, which allowed for an improved workflow in addressing management evaluation requests and increased resilience with regard to business continuity.
- 29A.48 Progress towards the objective is presented in the performance measure below (see table 29A.11).

Table 29A.11

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	–	Stakeholders in the internal justice system have better access to refined responses to information requests enabled through improved data analytics and an improved workflow

Planned results for 2024

Result 1: post-COVID-19 new internal working practices: a more resilient, agile and sustainable Organization

Programme performance in 2022 and target for 2024

- 29A.49 The component's work contributed to 31 per cent of the recommendations of the new internal working practices framework for United Nations Headquarters having been implemented or being in the process of being implemented, which met the planned target.
- 29A.50 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.12).

Table 29A.12
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
United Nations Headquarters transitions to business continuity mode as a result of COVID-19	Secretary-General considered proposal for post-COVID-19 new internal working practices framework for United Nations Headquarters	31 per cent of recommendations of the new internal working practices framework implemented or in progress	Increased percentage of recommendations of the new internal working practices framework implemented for United Nations Headquarters	Increased percentage of recommendations of the new internal working practices framework implemented for United Nations Headquarters

Result 2: recommendations of the Headquarters Committee on Contracts accepted by the delegated officials

Programme performance in 2022 and target for 2024

- 29A.51 The component’s work contributed to 100 per cent of recommendations being accepted by the delegated officials, which exceeded the planned target of 95 per cent.
- 29A.52 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29A.II).

Figure 29A.II
Performance measure: percentage of recommendations accepted by the delegated officials

Result 3: early resolution of staff-related disputes without proceeding to litigation

Proposed programme plan for 2024

- 29A.53 The component analyses the facts presented in requests for a management evaluation vis-à-vis the legal framework of the Staff Regulations and Rules of the United Nations and provides the requesting staff member with a reasoned and comprehensive evaluation conveying the basis for the recommendation. The component also helps to promote a broader awareness of staff in field offices and at Headquarters of the internal justice system and issues arising therein.

Lessons learned and planned change

- 29A.54 The lesson for the component was that the demand to establish a mechanism by which information shared with staff during outreach briefings could be made available to staff who join the entity subsequently. In applying the lesson, the component will encourage entities to incorporate the

materials used in the Unit’s outreach briefings into the induction process of staff joining the entity, both staff who join from outside the Organization as well as newly assigned staff.

29A.55 Expected progress towards the objective is presented in the performance measure below (see table 29A.13).

Table 29A.13
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
77 per cent of cases submitted for management evaluation did not proceed to the United Nations Dispute Tribunal for formal litigation	85 per cent of cases submitted for management evaluation did not proceed to the United Nations Dispute Tribunal for formal litigation	71 per cent of cases submitted for management evaluation did not proceed to the United Nations Dispute Tribunal for formal litigation	More than 65 per cent of cases result in an early resolution of staff-related disputes without proceeding to litigation Greater engagement with local staff unions to establish ongoing channels to discuss staff concerns with the internal system of justice	More than 65 per cent of cases result in an early resolution of staff-related disputes and prevention of unnecessary litigation

Deliverables

29A.56 Table 29A.14 lists all deliverables of the component.

Table 29A.14
Subprogramme 1, component 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned

Administration: administration of and support for the new case management system; training and guidance for members of the 34 local committees on contracts and 43 local property survey boards; advice on procurement and property policy documents; and administration and maintenance of online learning tools for local committees on contracts and local property survey boards, and provision of related training and guidance.				
Internal justice and oversight: recommendations on requests for management evaluation of contested administrative decisions; responses to requests for suspension of action in cases involving separation from service of staff members; substantive and technical servicing of the Headquarters Committee on Contracts and the provision of recommendations on proposed procurement awards to the delegated officials; substantive and technical servicing of the Headquarters Property Survey Board; reports on the functioning of the local committees on contracts and local property survey boards; and annual reporting to the United Nations Environment Programme on Secretariat-wide environmental sustainability performance.				

Subprogramme 2 Programme planning, finance and budget

Component 1 Finance

Objective

29A.57 The objective, to which this component contributes, is to secure the financing of the Organization's expenses, pursuant to Article 17 of the Charter of the United Nations, and to ensure sound, effective and efficient integrated financial management of and reporting on United Nations resources, supported by a strong internal control environment.

Strategy

29A.58 To contribute to the objective, the component will:

- (a) Ensure the proper application of the Financial Regulations and Rules of the United Nations, adapt policies relating to financial matters in response to emerging issues and continue to strengthen the system of internal controls in support of the prudent management of resources in the context of the decentralized delegation of authority framework;
- (b) Provide effective support to the Committee on Contributions, ensure the timely issuance of assessments, continue to provide up-to-date information on the status of assessed contributions and closely monitor and forecast the collection of assessments and manage cash outflows based on liquidity forecasts;
- (c) Prepare International Public Sector Accounting Standards (IPSAS)-compliant financial statements for the Organization, focusing on transparency by incorporating a financial discussion and an analysis statement, as well as ensuring that all entities are appropriately guided in year-end requirements for the preparation of financial statements and are supported in the establishment, management and reporting of the extrabudgetary funds of the Organization;
- (d) Manage financial risks through sound investment management, global cash management and global banking management;
- (e) Coordinate and manage the group health and life insurance programmes and provide services to the Advisory Board on Compensation Claims and the United Nations Claims Board, and administer the related compensation payments;
- (f) Provide governance of master data to ensure the integrity, standardization and harmonization of data across the enterprise resource planning system and the other enterprise systems of the Organization;
- (g) Provide procedures, guidance and support for Umoja finance processes to ensure effective and efficient financial management.

29A.59 The above-mentioned work is expected to result in:

- (a) Prudent financial management of the resources entrusted to the Secretariat;
- (b) A strengthened system of internal controls that supports better programme performance management and compliance with the regulatory framework;
- (c) Increased transparency and simplification of financial processes and reporting;
- (d) Better positioning of the Organization to respond to external shocks.

Programme performance in 2022

Enhanced decision-making by programme managers through an integrated planning, management and reporting end-to-end solution

- 29A.60 Following the successful deployment of the integrated planning, management and reporting solution in December 2020, the integrated project manager’s dashboard (an interactive and user-friendly dashboard with data analytics capabilities) was rolled out to enhance the visibility of administrative and substantive data for management analysis and oversight. The dashboard integrates information from multiple Umoja solutions, such as strategic management, project systems and implementing partner management modules. It is effectively an end-to-end solution for managing the life cycle of United Nations programmes and projects, designed to strengthen internal management capabilities in support of the work of the Organization, providing managers with holistic and timely information about projects, including project description, logical framework, monitoring status, financial implementation status and implementation modality. The dashboard establishes linkages between substantive information and financial data at multiple levels. Managers in selected Secretariat entities now have access to cross-functional, business-critical data from various modules of Umoja, which helps them to better communicate the impact of their work and manage the Organization’s resources more efficiently and effectively. The dashboard will be rolled out globally in 2023. To help support the adoption of integrated planning, management and reporting, the subprogramme developed a suite of training and guidance materials. The subprogramme held workshops with all entities and has been providing ad hoc support to build the capability of all United Nations entities.
- 29A.61 Progress towards the objective is presented in the performance measure below (see table 29A.15).

Table 29A.15

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	Project manager dashboard informs programme managers’ decisions with substantive project monitoring data gradually being made available in the integrated planning, management and reporting solution	Enhanced decision-making by programme managers through use of the project manager dashboard, including more timely, intuitive and visualized substantive and financial data

Planned results for 2024

Result 1: enhanced transparency, comparability and usefulness of financial statements across the United Nations system

Programme performance in 2022 and target for 2024

- 29A.62 The component’s work contributed to a harmonized and comprehensive approach to financial statement analysis, enabling consistency and comparability across United Nations system entities, which met the planned target.
- 29A.63 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.16).

Table 29A.16
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Decision by the Task Force on Accounting Standards to align the financial report with the IPSAS Board’s recommended practice guideline 2	Task Force on Accounting Standards adopted a harmonized and comprehensive approach to financial statement analysis, compliant with the recommended practice guideline 2, enabling compliant analysis of the financial report	Financial statements issued in accordance with a harmonized approach enabling consistency and comparability across United Nations system entities	Comparable and consistent financial statement analysis across United Nations system entities, benefiting Member States and internal stakeholders	Comparable and consistent financial statement analysis across a larger number of United Nations system entities, benefiting Member States and internal stakeholders

Result 2: strengthened regulatory framework to improve accountability across United Nations operations

Programme performance in 2022 and target for 2024

- 29A.64 The component’s work contributed to positive feedback, in the context of the self-assessment questionnaire and assurance statement, on the functioning of the internal control framework and its impact on the effective and efficient delivery of mandates, which met the planned target. However, the component did not meet the planned target of positive feedback on the impact of the revised policy on the effective management of financial resources, as additional time was needed to build capacity and awareness of the new guidelines before conducting a survey of the policy’s impact.
- 29A.65 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.17).

Table 29A.17
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Identification and prioritization for streamlining and updating financial policy instruments	Positive feedback on the functioning of the internal control framework and its impact on the effective and efficient delivery of mandates	Positive feedback on the impact of the revised policy on the effective management of financial resources Positive feedback on the functioning of the internal control framework and the impact on the effective and efficient delivery of mandates	Strengthened management of financial resources through harmonization and implementation of financial policies

Result 3: Finance Knowledge Gateway: an integrated digital platform and United Nations global community for Umoja finance users

Proposed programme plan for 2024

29A.66 In January 2021, as part of the integrated policy and guidance framework for the United Nations Secretariat, the component started incorporating updated financial guidance in the finance pillar of the global Knowledge Gateway platform. The Finance Knowledge Gateway platform provides clear connections between financial transactional processes and the related policies and focuses primarily on ensuring practical means for the application of and compliance with current policy.

Lessons learned and planned change

29A.67 The lesson for the component, informed by a review of the Finance Knowledge Gateway, was that accessibility and useability of guidance, including policies and procedures, could be enhanced through more user-centred design principles and integration with online training and customer service portals. In applying the lesson from the review, the component will focus on the design of self-paced training materials, user guidance, frequently asked questions, graphical data analytics (dashboards) and other useful information that incorporates participant feedback and is continually maintained for improvements in Umoja system processes. In addition, relevant examples and linkages that allow users to understand how finance processes relate to the Financial Regulations and Rules of the United Nations and IPSAS will be incorporated. These guidance materials help users to undertake finance tasks efficiently and allow them to resolve questions and problems quickly. The component will update and maintain the comprehensive user guidance related to global finance processes, as well as ensure linkage to customer service portals. In 2024, the Finance Knowledge Gateway will support the use of peer-to-peer knowledge-sharing through the finance support community of practice (Umoja finance users) and hold regular forums for users to outline and resolve common issues. Updates made to IPSAS guidance as a result of updates to standards and relevant updates to IPSAS training will be integrated into the Finance Knowledge Gateway.

29A.68 Expected progress towards the objective is presented in the performance measure below (see figure 29A.III).

Figure 29A.III
Performance measure: increased use of the Finance Knowledge Gateway platform to resolve finance-related issues

(Number of site visits to Finance Knowledge Gateway platform)

Deliverables

29A.69 Table 29A.18 lists all deliverables of the component.

Table 29A.18

Subprogramme 2, component 1: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	12	12	11	11
1. Annual financial reports to the General Assembly	2	2	2	2
2. Reports on multi-year payment plans and the financial situation of the United Nations to the General Assembly	3	3	3	3
3. Financial statements on United Nations peacekeeping and non-peacekeeping operations to the General Assembly	7	7	6	6
Substantive services for meetings (number of three-hour meetings)	22	23	22	22
4. Meetings of the Fifth Committee of the General Assembly	18	19	18	18
5. Meetings of the Investment Committee	4	4	4	4
Conference and secretariat services for meetings (number of three-hour meetings)	20	16	20	31
6. Meetings of the Committee on Contributions	20	16	20	31
B. Generation and transfer of knowledge				
Seminars, workshops, fellowships and training events (number of days)	24	24	20	20
7. Medical insurance plan training events, information sessions and workshops	24	24	20	20
Technical materials (number of materials)	776	777	825	780
8. Monthly reports on the status of contributions	12	12	12	12
9. Documents on the assessment of the contributions of Member States to the United Nations	14	13	13	13
10. Donor financial reports	750	752	800	755

C. Substantive deliverables

Consultation, advice and advocacy: advice to approximately 40 donors on voluntary contribution financial agreements; and ad hoc information on the scale of assessments, peacekeeping financing and the status of contributions.

E. Enabling deliverables**Administration:**

Advice to departments/offices on the application of the Financial Regulations and Rules of the United Nations, accounting and financial matters and related systems; advice on sustaining IPSAS compliance to the United Nations finance community in peacekeeping missions and non-peacekeeping entities; monitoring and support for global bank reconciliation processes and global physical and intangible assets analysis, accounting and reporting support; global finance Umoja production support for integrated finance processes, including managing and testing Umoja enterprise resource planning finance improvements and updates; Umoja finance operational guidance on the Knowledge Gateway including the issuance of substantive training materials and videos; processing of approximately 18,000 United Nations Development Programme transactions related to service clearing accounts; financial management support for the Development Coordination Office and the United Nations Office for Partnerships; and International Aid Transparency Initiative and CEB reporting frameworks for consistent reporting to stakeholders.

Assessment calculations for contributions of Member States for the regular budget, peacekeeping operations and the international tribunals; and calculations for credits for peacekeeping operations.

Guidance on the interpretation of the United Nations Financial Regulations and Rules and financial management policies, procedures and guideline instruments; support for the Business Transformation and Accountability Division in the interpretation of the enhanced delegation of authority framework (finance side); issuance of the statement of internal control for 2023 operations; three technical documents relating to the statement of internal control; consultations with the Internal Control Advisory Group on the statement of internal control framework; roll-out of the Umoja process control module to offices and departments in the scope of the statement of internal control exercise; advocacy on internal controls; guidance on the implementation of the internal control framework; workshop on cross-cutting analysis on the implementation of internal controls in peacekeeping and non-peacekeeping operations; advice to Member States and United Nations offices on the management of extrabudgetary resources; accounting policies and associated corporate guidance, practices and procedures; 5 workshops on financial matters for chief finance officers and 68 chief administrative officers; reports on cases of fraud and presumptive fraud to the Board of Auditors (twice a year); Umoja finance process documents; maintenance of Umoja finance master data; financial help desk for the Umoja enterprise resource planning system; and user access provisioning requests for finance roles in Umoja, with delegation of authority for the roles.

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

265 bank accounts worldwide, including bank account signatory panels; banking arrangements and contracts; payments for the house bank accounts managed by United Nations Headquarters; records of incoming funds; assessment of and support for 65 global cashiers and 15 regional cashiers; cash requirements in different currencies; database on banking details of vendors, staff and Member States; management of pooled investments; monthly United Nations operational rates of exchange for 153 currencies; Umoja finance processes; financial applications; SWIFT and global payment data; substantive support for departments on business analysis; payments; health and life insurance policies; health and life insurance activities; processing of compensation claims under Appendix D to the Staff Rules and the United Nations Claims Board, including payment of monthly survivor and disability benefits; approximately 700 investment settlements; and approximately 5,000 foreign exchange transactions.

Component 2 Field operations finance

Objective

- 29A.70 The objective, to which this component contributes, is to ensure effective and efficient deliberations by Member States on the results to which the field and other Secretariat entities contribute and on the resources required for the work of those entities in line with their mandates, and to ensure the effective and efficient management of resources.

Strategy

- 29A.71 To contribute to the objective, the component will provide strategic guidance on budgeting and financial stewardship and develop policies, methodologies and tools in that regard, in particular:
- (a) Provide strategic guidance on financial management and financing issues, especially on cross-cutting initiatives affecting field operations, including guidance on formulating human resources requirements, corporate initiatives, financial strength and liquidity and strengthening of internal controls, and timely, high-quality, simplified and action-oriented responses to managers in the field, monitor the liquidity of individual special accounts and oversee cash-flow and operating reserves for field operations;
 - (b) Provide strategic guidance on global property management and real estate services, including oversight of major construction projects and long-term capital planning, as reflected in the strategic capital review;
 - (c) Provide expert advice and guidance on property management and review financial data for accurate recording and for compliance with IPSAS and the established property management performance framework for field and other Secretariat entities, and ensure central supervision of projects, including by incorporating risk management principles and lessons learned in decision-making.
- 29A.72 The above-mentioned work is expected to result in client entities effectively and efficiently managing their resources within the approved levels, with improved accuracy in forecasts and proposals.

Programme performance in 2022

Improved accuracy of property records enabled through the quality assurance programme

- 29A.73 Following the implementation of the property management framework comprised of policy, self-assessment and performance monitoring through the utilization of business intelligence tools by all Secretariat entities in 2020, the component engaged with all entities and clients on the stabilization of the end-to-end materials management solution. In 2022, the component promulgated a set of

policy documents to govern various aspects of property management, including governance of material master data, the operational useful life for equipment, guidance on disposal of property and guidance on sale of property to staff members. Quality assurance dashboards were also promulgated as a tool for self-assessment and ongoing identification and rectification of quality issues by the entities, which is an important internal control element for financial and management reporting.

29A.74 Progress towards the objective is presented in the performance measure below (see table 29A.19).

Table 29A.19
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Property management framework comprised of policy, self-assessment and performance monitoring through the utilization of business intelligence tools implemented by all Secretariat entities	Quality assurance programme for assets, equipment, inventory and write-off/disposal processes available for Secretariat entities	Entities utilize the enhanced property management framework of policy, self-assessment and quality assurance measures to strengthen the stewardship of and accountability for United Nations property, improve the quality of data for management decisions and IPSAS financial reporting, increase utilization and reduce purchasing requirements

Planned results for 2024

Result 1: enhanced data analysis to support resource management in special political missions

Programme performance in 2022 and target for 2024

29A.75 The component’s work contributed to all special political missions using new Umoja modules for the monitoring and analysis of programmatic and financial performance, which met the planned target.

29A.76 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.20).

Table 29A.20
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Special political missions analyse their financial performance (especially to articulate the impact of COVID-19 on mandate implementation)	Special political missions manage staffing needs and tailor their resource formulation to integrate new internal working methods adapted in the past two years	Special political missions monitor and analyse their programmatic and financial performance with increased clarity	Missions adapt and apply new internal working methods and modality of mandate delivery and are better able to articulate such improvements in their budget proposals	Missions use data to improve resource management and mandate delivery approaches

Result 2: independent risk management for global United Nations capital construction projects
Programme performance in 2022 and target for 2024

- 29A.77 The component's work contributed to improved budget confidence levels for the ongoing global United Nations construction projects at the United Nations Office at Nairobi, which exceeded the planned target. The projects at the Economic Commission for Africa (32 per cent), the Economic and Social Commission for Asia and the Pacific (35 per cent) and the Economic Commission for Latin America and the Caribbean (14 per cent) did not meet the target mainly because of difficulties in the solicitation of the main contractor and global supply chain disruptions.
- 29A.78 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29A.IV).

Figure 29A.IV

Performance measure: budget confidence levels for ongoing global United Nations construction projects

(Percentage)

Result 3: smooth deliberations of legislative bodies on special political missions facilitated through proactive servicing

Proposed programme plan for 2024

- 29A.79 The component engaged actively with Member States to effectively address queries and facilitate productive deliberations on the budgets of special political missions.

Lessons learned and planned change

- 29A.80 The lesson for the component was that more active engagement with Member States in the preparation of budgetary documentation for special political missions from its early stage and throughout the review process has proven to reduce the need for follow-up queries, thereby contributing to the early conclusion of hearings and the start of deliberations on draft resolutions. In applying the lesson, the component will continue to proactively support legislative review, both by

providing informal pre-session briefings to members of the legislative bodies and by improving the readability of written materials and the accessibility of budget information.

29A.81 Expected progress towards the objective is presented in the performance measure below (see table 29A.21).

Table 29A.21
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Increased amount of written information provided to the Fifth Committee to respond to increased interest	First informal pre-session briefing held for members of the Fifth Committee ahead of the introduction of the budgets of special political missions, contributing to increased ability of legislative bodies to analyse evolving trends in the budgets of special political missions	Further increased clarity and depth of the information available, both in the budget documents and in written responses for the consideration of legislative bodies	Legislative bodies have access to more timely and richer analysis and data to facilitate smooth deliberations on special political missions

Deliverables

29A.82 Table 29A.22 lists all deliverables of the component.

Table 29A.22
Subprogramme 2, component 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	41	45	41	41
1. Reports to the General Assembly on the proposed budget and budget performance of United Nations peacekeeping operations	22	25	22	22
2. Report to the General Assembly on the updated financial position of closed peacekeeping missions	1	1	1	1
3. Reports to the General Assembly on the final disposition of assets and final performance of peacekeeping missions in liquidation	1	2	1	1
4. Reports to the General Assembly on the administrative and budgetary aspects of the financing of peacekeeping operations	7	7	7	7
5. Notes to the General Assembly on the administrative and budgetary aspects of the financing of peacekeeping operations	4	4	4	4
6. Reports to the General Assembly on estimates in respect of special political missions, good offices and other political initiatives authorized by the General Assembly and/or the Security Council	6	6	6	6

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
Substantive services for meetings (number of three-hour meetings)	120	75	110	70
7. Meetings of the Fifth Committee of the General Assembly	70	49	60	45
8. Meetings of the Advisory Committee on Administrative and Budgetary Questions	50	26	50	25
B. Generation and transfer of knowledge				
Technical materials (number of materials)	5	5	5	5
9. Statements to the Security Council and other reports on financial implications of activities other than field operations authorized by the Security Council in its resolutions	5	5	5	5
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with all Member States on financial matters with regard to field operations; specific consultations with all troop- and police-contributing countries on liabilities of missions; and advice to substantive committees of the General Assembly on potential budgetary implications.				
E. Enabling deliverables				
Administration: expert advice and guidance on budgeting and financial stewardship for 13 active field operations; quarterly payments to troop- and police-contributing countries; formulation of resource requirements to support the assessment and planning for new, expanding, transitioning and liquidating field operations; publication of the Property Management Manual and its dissemination to all entities, including resident coordinator offices; strategic guidance on property management performance monitoring and reporting; supplemental instructions for preparation of IPSAS financial reports on property, plant and equipment; training on property management; expert advice and support on Umoja relating to property management; and oversight and technical guidance on major capital projects, ongoing maintenance and alteration projects.				

Component 3 Programme planning and budgeting

Objective

29A.83 The objective, to which this component contributes, is to ensure the effective and efficient deliberations by Member States on the results to which the Secretariat contributes, on the translation of mandates into workplans, on the resources required for the work of the Secretariat in line with its mandates and to ensure the effective and efficient management of resources.

Strategy

29A.84 To contribute to the objective, the component will continue to:

- (a) Issue strategic guidance for the preparation of the programme budget and engage with Member States from the early stages of the budget preparation process;
- (b) Finalize and present to the legislative bodies the Secretary-General’s annual programme budgets and the budget of the International Residual Mechanism for Criminal Tribunals, the budget performance reports and other reports on budgetary matters, including statements of programme budget implications and revised programme budget proposals, in accordance with the Financial Regulations and Rules of the United Nations and the Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation;
- (c) Provide substantive services on budgetary matters to the Fifth Committee of the General Assembly, the Committee for Programme and Coordination and the Advisory Committee on Administrative and Budgetary Questions and provide online tools accessible to Member States in order to facilitate deliberations on budgetary matters;

- (d) Provide strategic guidance on budgeting and financial stewardship, including on managing spending authorities, and develop policies, methodologies and tools in that regard and provide advice on all budgetary matters.

29A.85 The above-mentioned work is expected to result in:

- (a) Increased transparency and strengthened dialogue between the Secretariat and Member States;
- (b) Effective implementation of programmes while ensuring prudent use of resources;
- (c) Improved accuracy of programme budgets.

Programme performance in 2022

Final numbers for budget resolutions and for reports of the Fifth Committee are available to enable adoption by the Fifth Committee in less than six hours

29A.86 The intention of the Fifth Committee is to adopt resolutions capturing the outcome of its deliberations as soon as possible after reaching final decisions. However, its decisions require many calculations involving multiple dimensions, such as budget sections and entities, objects of expenditure, changes that are cross-cutting and changes that are very specific, and changes related to the recommendations of the Advisory Committee on Administrative and Budgetary Questions. This process is labour intensive and time-consuming.

29A.87 In previous years, the Secretariat has indicated that the calculation of the final numbers, including approved staffing tables, and their inclusion in the draft resolutions for adoption by the Fifth Committee would require between 12 and 24 hours. In 2021, the Fifth Committee reached consensus on the proposed programme budget in the early afternoon and scheduled its formal meeting for the adoption of the programme budget at 7 p.m., which provided less than half the time required to produce the final documentation. Even with rush processing, the calculations could not be finalized in time and the meeting had to be postponed by one hour. The formal meeting nevertheless started after delays and with incomplete information that continued to be finalized during the meeting.

29A.88 The component re-engineered its internal processes and segregated this very large task into smaller and more manageable tasks, many of which could be carried out in parallel. As a result, in 2022 the calculation of the resource requirements for 41 budget sections reflecting the informal decisions of the Fifth Committee was completed to allow a turnaround time of less than six hours for the finalization of the draft financing resolution and draft report of the Fifth Committee for adoption by the Committee and the General Assembly.

29A.89 Progress towards the objective is presented in the performance measure below (see figure 29A.V).

Figure 29A.V
Performance measure: turnaround time for the financing resolution to be available for adoption
 (Number of hours)

Planned results for 2024

Result 1: improved budget presentation format

Programme performance in 2022 and target for 2024

- 29A.90 The component's work contributed to the final decision by Member States to lift the trial period and confirm the approval of the change to the annual budget period, which met the planned target.
- 29A.91 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.23).

Table 29A.23

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Decision by Member States to improve the budget presentation format for 2022 by adding more results narratives, improving the structure and consistency of strategies and providing additional information on posts and positions, preliminary estimates for major construction projects and consolidated information on information and communications technology spending	Decision by Member States to improve the budget presentation format for 2023 by improving the quality, clarity and usability of the proposed programme budget while maintaining the level of information	Member States lift the trial period and confirm the approval of the change to an annual budget period Member States note with appreciation the efforts to enhance the quality, clarity and usability of the proposed programme budget while maintaining the level of information	Process and presentation format of the budget stabilized	Further improvements on the programmatic aspects, including planned results, performance measures and external factors, that enhance the quality, clarity and usability of the proposed programme budget

Result 2: additional opportunity for early engagement by Member States

Programme performance in 2022 and target for 2024

- 29A.92 The component's work contributed to a round of early engagement sessions with Member States on the implementation of General Assembly resolutions regarding the budget presentation format, which met the planned target.
- 29A.93 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.24).

Table 29A.24
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Early engagement sessions with Member States on the implementation of General Assembly resolutions regarding the budget presentation format (February)	Two rounds of early engagement sessions with Member States on the implementation of General Assembly resolutions regarding the budget presentation format (February and September)	Early engagement by Member States on the implementation of General Assembly resolutions regarding the budget presentation format (February)	Two rounds of early engagement sessions by Member States on the implementation of General Assembly resolutions (February) and items to be discussed in the main session (September)	Two rounds of early engagement sessions by Member States on the implementation of General Assembly resolutions (February) and items to be discussed in the main session (September)

Result 3: improved accuracy of budget proposals

Proposed programme plan for 2024

29A.94 In accordance with the approved recosting methodology, the proposed programme budget of the United Nations is recosted based on the consumer price index (CPI) in various locations. The recosting adjustments are intended to preserve the purchasing power of the approved budget. While simple and accurate on most occasions, the use of local indexes to adjust non-post provisions may affect the purchasing power of the United Nations owing mainly to differences between the consumption patterns of households and the consumption patterns of a large international organization like the United Nations. In particular, in situations of high inflation and major economic disruptions (e.g. supply chain disruptions), the price changes of the items that form part of the CPI basket can vary significantly, with some items experiencing much higher increases than the average and other items a much lower increase or even a decrease. As a result, the average change in prices measured by the CPI becomes a less reliable indicator for United Nations operations. For example, in early 2023 the 12-month CPI in the United States of America stood at approximately 6.5 per cent, while many of the items comprising the index experienced changes that were very far from the average of 6.5 per cent. For example, housing, which carries the most weight in the consumer price index calculation (with a weight of more than 30 per cent) increased by 3.5 per cent, while energy costs increased by more than 10 per cent and travel and accommodation increased by more than 20 per cent. In contrast, used car prices decreased by more than 10 per cent.

Lessons learned and planned change

29A.95 The lesson for the component was that while under stable macroeconomic conditions (e.g. low inflation and no supply chain disruptions) the degree of price variations across the goods and services in a given CPI basket is relatively small, therefore having a marginal impact on the accuracy of recosting, in a more volatile macroeconomic environment with more pronounced price changes, it is preferable to refine the recosting approach and use item-specific inflation figures to increase the accuracy of recosting. In applying the lesson, the component will propose tailored recosting adjustments for specific items when the projected price changes for the item are significantly different from the CPI.

Table 29A.25
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Budget approved based on standard recosting that relies on the CPI	Budget approved based on standard recosting that relies on the CPI	Budget approved based on the CPI and tailored recosting for energy and travel	The application of a tailored recosting for energy and travel instead of recosting based solely on the CPI enables lower variance between the estimated impact of recosting and the actual impact of recosting	The application of a tailored recosting to a select group of items results in a lower variance between the estimated and actual impact of recosting

Deliverables

29A.96 Table 29A.26 lists all deliverables of the component.

Table 29A.26
Subprogramme 2, component 3: deliverables for the period 2022–2024, by category and subcategory

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: briefings for Member States on programme planning and budgetary matters, including training sessions for new delegates; advice on the potential budgetary implications of approximately 500 draft resolutions of the Main Committees of the General Assembly; and written responses to the Advisory Committee on Administrative and Budgetary Questions and the Fifth Committee in their consideration of the proposed programme budget and programme budget implications of draft resolutions.

E. Enabling deliverables

Administration: expert advice and guidance on budgetary issues and policies relating to programme planning and budgeting for 28 programmes and 41 budget sections.

**Subprogramme 3
Human resources**

**Component 1
Global strategy and policy**

Objective

29A.97 The objective, to which this component contributes, is to ensure a decentralized, agile, field-focused management paradigm for the effective and transparent management of human resources and a high-performing, diverse and engaged workforce.

Strategy

29A.98 To contribute to the objective, the component will:

- (a) Promote an agile, geographically equitable, inclusive and gender-balanced workforce that represents the peoples of the world. By ensuring that the workforce demonstrates the organizational values and behaviours and enhances the Organization’s ability to perform, the component will simplify and streamline policies that will underpin a modern management framework, to enable the effective delivery of mandates;
- (b) Provide efficient strategic guidance on human resources supported by an enabling policy framework to fulfil clients’ mandates, in which team, individual and organizational performance are aligned and human resources risks are transparently and effectively managed, as characterized by an accountable Organization, and foster innovation as a means of improving programmatic delivery of human resources in support of cultural change across the Organization;
- (c) Establish strategic policy imperatives anchored in guidance and feedback from entities, in particular from the field, continue to provide authoritative policy interpretation to ensure consistency, fairness and the equitable treatment of staff in the global Secretariat and oversee the setting of salaries and benefits for locally recruited staff members by applying methodologies established by the International Civil Service Commission;
- (d) Actively engage with management on all aspects of relations between staff and management and work with other organizations of the United Nations common system of salaries and allowances to advance the work of the High-level Committee on Management and the Human Resources Network of CEB, and through the International Civil Service Commission, including by leading the implementation of the United Nations workplace mental health and well-being strategy across the United Nations system;

- (e) Advance efforts towards mutual recognition over time, which calls for entities within the United Nations common system to operate according to the principle of mutual recognition of best practices in terms of policies and procedures, and lead efforts to enhance harmonization and improve efficiency in the United Nations system;
- (f) Continue to improve talent management in the Organization and, in particular, work towards implementing the new approach to mobility and organizational learning, adopting new values and behaviours in talent management, ensuring the universality of candidate assessment methods and strengthening the performance management framework;
- (g) Ensure that future workforce needs are based on entities' strategic direction, assuring that strategic workforce planning remains aligned to the evolving priorities of entities and influences future workforce analysis to inform talent management actions, such as the upskilling of staff or the creation of new functions, with the aim of attracting the best talent through strategic outreach, in particular with regard to geographical diversity and gender parity.

29A.99 The above-mentioned work is expected to result in:

- (a) The use of human resources policies by managers to exercise their delegated authority effectively and in full compliance with the Organization's legislative mandates and internal policies;
- (b) Talent acquisition focused on current workforce gaps and future needs and enhancement of existing talent through learning and development, mobility and effective performance management and career satisfaction support;
- (c) A geographically equitable workforce that reflects the peoples the Organization serves and demonstrates the organizational values and behaviours.

Programme performance in 2022

Business continuity and staff safety and well-being through human resources support in relation to emergencies

29A.100 In 2022, the component provided support for staff in response to emergency situations, such as the emergency in Ukraine and ongoing support in response to the situation in Afghanistan (particularly in relation to the locally recruited staff who were evacuated from the country). Support was provided to relevant entities by providing policy advice and through the development of the CEB Human Resources Network administrative guidelines, which contained a summary of the human resources policy, conditions of service and compensation measures for both international and local personnel in complex and dangerous environments. The guidelines were prepared based on input from Secretariat entities, United Nations common system organizations and staff federations. The component facilitated a harmonized and consistent approach at the country level across the common system, provided regular updates and recommendations on matters identified by relevant stakeholders and participated in various meetings, including the meetings of the Human Resources Network Standing Committee on Field Duty Stations, to discuss and find solutions to the concerns raised in order to preserve business continuity. The component continues to keep abreast of complex and dangerous environments and measures related to the administration of United Nations personnel on the ground, such as temporary special hardship classification, danger pay and the rest and recuperation cycle for all active duty stations.

29A.101 Progress towards the objective is presented in the performance measure below (see table 29A.27).

Table 29A.27
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Business continuity, staff safety and the well-being of staff in emergency situations ensured through the issuance of administrative guidelines made available to Secretariat entities and other United Nations common system organizations

Planned results for 2024

Result 1: enhanced access to human resources information for Member States

Programme performance in 2022 and target for 2024

- 29A.102 The component’s work contributed to initially 20 Member States having access to an enhanced online portal with additional and more timely Secretariat staff composition data and all Member States having access to Secretariat staff composition data through HR Insight, which met the planned target.
- 29A.103 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.28).

Table 29A.28
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Member States have access to Secretariat staff composition data through HR Insight	Member States have access to Secretariat staff composition data through HR Insight Foundation for the new common data warehouse, with human resources information, is built	20 Member States have access to Secretariat staff composition data through the enhanced online portal, which takes readings from the new common data warehouse	Member States have access to additional Secretariat staff composition data through the enhanced online portal Increased scope of data available for Member States in the new portal, for increased data transparency	Member States have access to additional Secretariat staff composition data through the enhanced online portal

Result 2: strategic workforce planning approach to identify future workforce needs

Programme performance in 2022 and target for 2024

- 29A.104 The component’s work contributed to entities having increased awareness of priority workforce capabilities for 2023 in the context of their budget preparation when building job openings and when determining learning needs, which met the planned target.

29A.105 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.29).

Table 29A.29
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Entities benefit by having increased knowledge/awareness of priority workforce capabilities for 2022 for recruitment and learning action	Entities have increased knowledge/awareness of priority workforce capabilities for 2023	Entities have access to and use newly developed job profiles to address priority workforce capabilities	Entities utilize, with increasing frequency, newly developed and updated job profiles to address priority workforce capabilities

Result 3: a more diverse workforce

Proposed programme plan for 2024

29A.106 The component will continue its efforts to attract, recruit and engage talent to realize the overarching goal of creating a diverse workforce. It will develop strategies to support diverse talent pools throughout every stage of the recruitment process, ensuring that the staff selection system remains an effective, fair, efficient and agile recruitment process and contributes to achieving the principle of giving due regard to the importance of recruiting the staff on as wide a geographical basis as possible as stated in paragraph 3 of Article 101 of the Charter of the United Nations.

Lessons learned and planned change

29A.107 The lesson for the component, based on the quantitative analyses conducted in 2021, was that more candidates from countries in overrepresented and within-range categories apply for jobs in the Secretariat and are more likely to succeed in the final stage of the recruitment process than those from unrepresented and underrepresented Member States. Based on the analyses, it was concluded that the shortcomings of the current recruitment process were systemic and structural, making them challenging to overcome within the current staff selection system, as attested to by the slow progress on achieving equitable geographical distribution. In applying the lesson, the component will embark on a staff selection 2.0 multi-year programme, with an expected end result of delivering a new, effective, fair, efficient and agile recruitment process that fulfils the principles laid out in Article 101 of the Charter. The staff selection 2.0 programme is a direct response to the various mandates reaffirmed by the General Assembly (resolutions [77/278](#) and [71/263](#)). Specifically, the component will: (a) undertake a comprehensive job analysis and skills identification exercise; (b) redesign the application process and develop assessment methods and tools; and (c) perform analysis, monitoring and continuous improvements of the required policies, processes and methods, taking into account technological changes.

29A.108 Expected progress towards the objective is presented in the performance measure below (see table 29A.30).

Table 29A.30
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	–	<p>Programme managers can assess candidates’ competency in the six official languages during the recruitment process based on the United Nations Language Framework</p> <p>Strengthened recruitment process that is more inclusive and free from bias providing equal opportunity to all applicants</p>	<p>Increase in the number of qualified candidates added to the talent pools from unrepresented and underrepresented Member States</p> <p>Programme managers have access allowing them to track geographical representation and gender statistics in the application pipeline and monitor progress</p> <p>Programme managers use updated and newly developed generic job profiles containing responsibilities that are future oriented, inclusive and diverse, including from the perspectives of geographical representation, gender parity and disability, and job requirements that are linked to the responsibilities</p>

Deliverables

29A.109 Table 29A.31 lists all deliverables of the component.

Table 29A.31

Subprogramme 3, component 1: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	6	6	3	6
1. Reports to the General Assembly	6	6	3	6
Substantive services for meetings (number of three-hour meetings)	119	118	129	129
Meetings of:				
2. The Advisory Committee on Administrative and Budgetary Questions	6	6	6	6
3. The Fifth Committee of the General Assembly	35	34	35	35
4. The International Civil Service Commission	78	78	88	88
E. Enabling deliverables				
Administration:				
Policy documents and tools on human resources policies and procedures, including on conditions of service and the enhanced delegation of authority; expert advice and authoritative guidance to Secretariat entities on human resources-related rules and policies; salary surveys; and provision of classification advice and related appeals.				
Talent management strategies, policies, processes and tools pertaining to workforce diversity, inclusion, mobility and outreach, leveraging innovation, creativity and best practices, including a new workforce diversity toolkit, a full set of 60 profiles of unrepresented and underrepresented Member States to enable targeted outreach and new technology for establishing a diverse talent pool; outreach with a focus on online channels and platforms, including participation in 27 career events organized with academia and other professional networks; servicing of staff management bodies, including the Staff-Management Committee; strategic workforce planning deliverables, including input to budget processes, delivery of new job profiles and workforce analytics; and online and ad hoc reports for Member States on human resources information, including support for all users in permanent missions.				
Performance management and staff development strategies, strengthening of programmes and products to build leadership and management capacity, including learning initiatives that build strategic skills and behaviours required by staff with different levels of leadership and managerial responsibilities, such as leadership programmes and senior leadership support programme for assistant secretaries-general and under-secretaries-general; strategic advice, tools and guidance on organizational development, including the implementation of values and behaviours; workforce diversity and inclusion; development of and support for professional and substantive skills development programmes, including 6 mandated corporate learning programmes, as well as substantive skills programmes; strategies and tools for career satisfaction and to support staff mobility; frameworks, strategies, tools and guidance on performance management, including managerial effectiveness; launch of a new learning management system that will meet the evolving needs for learning and build staff capacity throughout the Secretariat; and conduct of learning needs analysis to identify high-priority and emerging staff capacities to deliver on mandates.				

Component 2 Administrative law

Objective

29A.110 The objective, to which this component contributes, is to strengthen accountability in line with the standards of conduct by all categories of personnel.

Strategy

- 29A.111 To contribute to the objective, the component will:
- (a) Deploy and use a global case management system and identify lessons learned, including in relation to critical incidents involving serious reputational risks affecting the Organization’s core values and norms, and develop tools and guidance material for senior leaders;
 - (b) Engage in capacity-building, including through the online information-sharing platform ALD Connect, direct outreach to senior managers and the ongoing development of tools and guidance materials to support senior managers in carrying out their responsibilities and exercising their authority;
 - (c) Review disciplinary matters for sanctioning purposes, represent the Secretary-General before the United Nations Dispute Tribunal with regard to appeals against administrative decisions, continue to expand screening for integrity for the Secretariat, and continue to review and update policies relating to the conduct of personnel.
- 29A.112 The above-mentioned work is expected to result in:
- (a) Enhanced oversight across the Secretariat and monitoring of matters that affect the reputation of the Organization, and the timely review and handling of misconduct matters;
 - (b) Well-informed decision-making by senior managers in relation to management of personnel;
 - (c) An enhanced culture of individual accountability.

Programme performance in 2022

Robust utilization of the global case management system across the Secretariat

- 29A.113 The component enhanced the global case management system to make it more user friendly and more widely used as a means to monitor and track administrative law matters. The efforts to develop, roll out and use the global case management system involved enhancing the capacity of practitioners to record and follow case matters, as well as to gain a better understanding of case management work flows, for example by strengthening the linkages between processes such as enforcement and victim assistance.
- 29A.114 Progress towards the objective is presented in the performance measure below (see table 29A.32).

Table 29A.32

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	The global case management system is mainstreamed in all entities of the Secretariat	Approximately 95 per cent of internal and external stakeholders across the Secretariat use the digital global case management system to interact with the Administrative Law Division

Planned results for 2024

Result 1: strengthened individual accountabilities

Programme performance in 2022 and target for 2024

- 29A.115 The component’s work contributed to a consistent approach to handling of disciplinary matters as a means to strengthen decision-making and policy development, which met the planned target.

29A.116 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.33).

Table 29A.33
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Structured knowledge-sharing among conduct and discipline practitioners from all Secretariat entities through ALD Connect	Following development of the global case management system, the network of conduct and discipline practitioners utilized the system fully to record, monitor and track matters	A consistent approach to handling of disciplinary matters as a means to strengthen decision-making and policy development	Strengthened capacity of all Secretariat entities to manage misconduct cases through increased reporting capacity, knowledge-sharing and identification of trends, for consistent and coherent decision-making and policy development	Harmonized case management in use by all Secretariat entities through one system for all, enabling consistency and efficiency as well as informed and sound decision-making

Result 2: risk management for well-informed decision-making in relation to personnel management

Programme performance in 2022 and target for 2024

29A.117 The component’s work contributed to senior managers consulting the Administrative Law Division with increased frequency prior to taking sensitive conduct-related management decisions, which met the planned target.

29A.118 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.34).

Table 29A.34
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Upon taking up their appointment, senior managers were provided induction training/information sessions on the administration of justice framework and conduct and discipline matters	Delivered training to 100 per cent of newly appointed senior managers	Senior managers consulted the Administrative Law Division with increased frequency prior to taking sensitive conduct-related management decisions	Senior managers have a clear understanding of the administration of justice system and framework to ascertain risks for sensitive decisions	Senior managers regularize the practice of seeking advice prior to taking sensitive conduct-related decisions

Result 3: prevention of sexual harassment in the Secretariat through a holistic, system-wide and victim-centric approach

Proposed programme plan for 2024

29A.119 The United Nations Secretariat has existing policy, practice (investigative and disciplinary measures) and training programmes that are designed to address sexual harassment in the workplace and are implemented across several disciplines. The Secretariat has also actively participated in the CEB Task Force on Addressing Sexual Harassment within the Organizations of the United Nations System with a view to taking advantage of lessons learned from CEB members. The component’s work is to align these efforts and develop a strengthened approach to addressing sexual harassment that is victim-centric, comprehensive and in line with CEB recommendations.

Lessons learned and planned change

29A.120 The lesson for the component was the need to strengthen communication and improve coordination among all stakeholders, ensure more consistent data collection on reports of sexual harassment and bolster the organizational culture of zero tolerance for sexual harassment. In applying the lesson, the component will focus on awareness campaigns and educating staff on prevention of sexual harassment, as well as empowering both victims and bystanders to act. The component will increase its efforts to expand participation and utilization by the United Nations system organizations in ClearCheck to avoid the hiring and rehiring of individuals whose working relationship with an organization of the system ended because of a determination that they had perpetrated sexual harassment or sexual exploitation and abuse.

29A.121 Expected progress towards the objective is presented in the performance measure below (see table 29A.35).

Table 29A.35
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Approximately 48 per cent increase in the number of ClearCheck screening requests received (from 81,071 in 2021 to 120,068 in 2022)	Increased number of United Nations system organizations using ClearCheck	Increased reporting of behaviour that constitutes sexual harassment

Deliverables

29A.122 Table 29A.36 lists all deliverables of the component.

Table 29A.36

Subprogramme 3, component 2: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report for the General Assembly	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	23	23	23	23
Meetings of:				
2. The Advisory Committee on Administrative and Budgetary Questions	5	5	5	5
3. The Fifth Committee of the General Assembly	10	10	10	10
4. The Special Committee on Peacekeeping Operations	2	2	2	2
5. The Fourth Committee of the General Assembly	2	2	2	2
6. The Sixth Committee of the General Assembly	3	3	3	3
7. The Committee for Programme and Coordination	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice on conduct issues to other international organizations (such as the African Union and CEB entities); and advocacy with Member States on conduct and discipline issues.				
Databases and substantive digital materials: public database and United Nations standards of conduct website.				
D. Communication deliverables				
Digital platforms and multimedia content: website relating to conduct and discipline.				
E. Enabling deliverables				
Administration: implementation and oversight, including updating, of the Organization’s conduct and discipline policies; development and maintenance of the strategic framework for response to incidents in order to meet the Organization’s duty of care obligations, including staff security; and training of the global network of conduct and discipline focal points (over 200 practitioners).				
Internal justice and oversight: representation of the Secretary-General before the United Nations Dispute Tribunal in cases challenging administrative decisions, including challenges to disciplinary sanctions; facilitation of informal dispute resolution in partnership with relevant Secretariat entities; advice to all Secretariat entities on conduct and discipline and administration of justice matters, as well as on critical incidents involving serious reputational risks affecting the Organization’s core values and norms.				

**Subprogramme 4
Business transformation and accountability**

Objective

29A.123 The objective, to which this subprogramme contributes, is to ensure a results-oriented, data-driven, agile Organization that is efficient, accountable, transparent, compliant and driven by lessons learned and continuous improvements.

Strategy

29A.124 To contribute to the objective, the subprogramme will:

- (a) Focus on the Organization’s systems of accountability by evaluating overall organizational performance trends, assessing the alignment of roles and responsibilities and monitoring the exercise of delegated authority, monitoring the senior managers’ compacts, mainstreaming the use of evaluation as part of the programme planning cycle, and coordinating the Secretariat’s interaction with oversight bodies and identifying trends in their recommendations;

- (b) Carry out capacity-building activities to support all United Nations entities in identifying, assessing, evaluating and controlling risk, using an enterprise risk management approach, and support the achievement of mandated programmatic results by training all entities in results-based management;
- (c) Support the implementation of the data strategy of the Secretariat, enable entities to access management data from Secretariat systems and to access or design analytical tools supporting data-driven decision-making, and lead and coordinate a portfolio of business transformation projects, such as with regard to the availability of a comprehensive business intelligence platform.

29A.125 The above-mentioned work is expected to result in:

- (a) A reinforced accountability culture in the Organization in the areas of risk awareness, monitoring performance and the exercise of delegated authority;
- (b) Greater use of enterprise data and data analytics in decision-making and programme delivery;
- (c) Teams across the Secretariat adopting agile methodology and innovation, and strengthening new collaboration practices using online platforms.

Programme performance in 2022

Secretariat-wide tools and resources to prevent fraud and corruption

- 29A.126 In his report entitled “Shifting the management paradigm in the United Nations: ensuring a better future for all”, the Secretary-General prioritized risk management to ensure that hidden and underlying risks are brought to the fore and properly addressed ([A/72/492](#), para. 63). Accordingly, the 2020 corporate risk register identified the most critical fraud and corruption risks that required appropriate and proportionate mitigation measures to strengthen the Organization’s preparedness and response. One of the defined mitigation actions was to raise the awareness of all staff members on fraud and corruption matters, as it had been identified that there was limited awareness among the staff at large about how fraud and corruption can arise in the various processes and functions of the Secretariat. To achieve this objective, the subprogramme developed and issued a Fraud and Corruption Awareness Handbook following extensive consultations with relevant Secretariat entities.
- 29A.127 The Fraud and Corruption Awareness Handbook was prepared to help staff to understand how fraud and corruption can arise in the various processes and functions of the Secretariat. It includes case studies reflecting some of the most common types of fraud and corruption experienced in the Organization and indicators that may point to the possible presence of fraud or corruption. The Handbook significantly contributes to the consistent and transparent application of the United Nations zero-tolerance approach to fraud and corruption in the Organization.
- 29A.128 The Handbook was published in English and French in 2022 and was disseminated through an all-staff broadcast email on International Anti-Corruption Day on 9 December 2022. In addition, the subprogramme undertook a communication campaign, which included the preparation of downloadable and printed electronic posters, news articles and a pop-up anti-fraud and anti-corruption message to raise awareness on combating fraud and corruption in the Organization.
- 29A.129 Progress towards the objective is presented in the performance measure below (see table 29A.37).

Table 29A.37
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Staff have access to the Fraud and Corruption Awareness Handbook, contributing to the consistent and transparent application of the United Nations zero-tolerance approach to fraud and corruption in the Organization

Planned results for 2024

Result 1: towards organizational transformation and innovation

Programme performance in 2022 and target for 2024

- 29A.130 The subprogramme’s work contributed to increasing availability of opportunities in business transformation and innovation activities across the Secretariat and the United Nations system, including through the Innovation Day bimonthly event with 150–200 active participants each time, the expansion of the NewWork network (now counting 1,800 members) and active engagement and co-leadership in the development of the UNLOCK network, through which the United Nations system organizations engage in change management, innovation and organizational culture change, which met the planned target.
- 29A.131 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29A.38).

Table 29A.38
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
More opportunities in business transformation and innovation activities throughout the Secretariat	More opportunities in business transformation and innovation activities throughout the Secretariat	More opportunities in business transformation and innovation activities throughout the Secretariat were available as a result of specific events or engagement in the NewWork and UNLOCK networks	Further increase in and expansion of opportunities for business transformation and innovation activities and networks across the United Nations system	Increased space to enable innovation and business transformation by increasing opportunities in the form of events, initiatives, network activities and sharing of good practice on matters of business transformation and organizational culture change across the United Nations system

Result 2: capacity-building in data science and visualization through the in-house Kamino training programme

Programme performance in 2022 and target for 2024

- 29A.132 The subprogramme’s work contributed to 168 participants trained in data science and visualization, having completed the Kamino in-house training programme, which enabled, for example, the update of the United Nations Member States “On the record” page of the Dag Hammarskjöld Library with data visualizations, which exceeded the planned target of 100 participants.
- 29A.133 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29A.VI).

Figure 29A.VI
Performance measure: number of participants trained in data science and visualization having completed the Kamino programme

Result 3: strengthened exercise of delegation of authority

Proposed programme plan for 2024

- 29A.134 The subprogramme manages the delegation of authority framework in line with the objectives of the management reform, bringing decision making closer to the point of delivery, better aligning mandate delivery and managerial responsibilities and accountabilities and empowering managers to determine on how best to use their resources for effective programme delivery. The subprogramme has continuously improved the delegation of authority framework (the policies, processes and tools which support heads of entities in the exercise of their authorities). Feedback from clients and results from monitoring activities are used to identify opportunities to improve monitoring through enhancing key performance indicators and aligning delegated authority with the simplified administrative policy framework.

Lessons learned and planned change

- 29A.135 The lesson for the subprogramme was that making decisions closer to the point of delivery in a decentralized model needs to be accompanied by a clear understanding of performance and strengthened accountability. In applying the lesson, the subprogramme will focus on providing heads of entities with improved tools, targeted guidance and analysis to ensure performance is visible and that issues are identified and addressed at the entity level, with clearer escalation measures to address systemic issues related to the exercise of authorities. The subprogramme will also support the migration of the management dashboard to a new platform and will analyse the data to help to inform policy development. This will include identification of systemic issues and better-defined accountability measures, including further clarification and refinements of policy.
- 29A.136 Expected progress towards the objective is presented in the performance measure below (see table 29A.39).

Table 29A.39
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Heads of entity have access to and use the delegation of authority framework, including policies, processes and tools	Improvement in the use of delegated authority as demonstrated by the delegation of authority framework, including key performance indicators	Further improvement in the use of delegated authority as demonstrated by the delegation of authority framework, including key performance indicators

Deliverables

29A.137 Table 29A.40 lists all deliverables of the subprogramme.

Table 29A.40
Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	3	3
1. Report to the General Assembly on accountability	1	1	1	1
2. Reports of the Secretary-General on the implementation of the recommendations of the Board of Auditors	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	13	11	11	12
3. Hearings of the Advisory Committee on Administrative and Budgetary Questions	5	4	3	4
4. Meetings of the General Assembly	4	4	4	4
5. Meetings of the Independent Audit Advisory Committee	4	3	4	4
E. Enabling deliverables				
Administration: provide support for implementing the administrative instruction on evaluation in the United Nations Secretariat to 50 Secretariat entities; quarterly key performance indicators report covering more than 230 entities with a delegation of authority; continuous improvements in the delegation of authority portal; senior managers' compacts performance assessment for 70 entity heads; workshops, briefings and guidance to approximately 190 compact focal points; enterprise-wide outreach, advocacy campaigns, network and training opportunities to raise awareness of change management, business innovation and new internal ways of working; continuous improvements in analytics and corporate dashboards; online, instructor-led and train-the-trainer skills development programme that covers major building blocks in data science and analytics, from foundation to advanced level, benefiting United Nations staff; training and guidance on results-based management to entities; 2 workshops on enterprise risk management with managers and focal points; 1 e-training programme on fraud and corruption awareness; and a workshop for approximately 120 oversight focal points.				

B. Proposed post and non-post resource requirements for 2024

Overview

29A.138 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 29A.41 to 29A.43.

Table 29A.41

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2022 expenditure	2023 appropriation	Changes					2024 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other	Total	Percentage	
Posts	42 463.5	42 391.1	503.6	–	214.2	717.8	1.7	43 108.9

29A.139 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 29A.44 to 29A.46 and figure 29A.VII.

29A.140 As reflected in tables 29A.44 (1) and 29A.46, the overall resources proposed for 2024 amount to \$61,537,700 before recosting, reflecting a net increase of \$652,500 (or 1.1 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29A.141 As reflected in table 29A.44 (1), resource changes reflect a net decrease of \$500 as follows:

- (a) **Executive direction and management** (decrease of \$475,800). This decrease reflects a reduction in other staff costs (\$466,500) and travel of staff (\$9,300) attributable to the removal of non-recurrent provisions for 2023 for two temporary positions relating to the review of the jurisdictional set-up, pursuant to General Assembly resolution [77/257](#);
- (b) **Subprogramme 1, component 2, Services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination** (increase of \$308,500). This net

increase relates to the higher provision at continuing vacancy rates for the posts of one Deputy Secretary (D-1), one Programme Management Officer (P-3) and one Senior Programme Management Assistant (General Service (Principal level)) established in 2023 pursuant to Assembly resolution [77/262](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts (\$312,400), partly offset by a decrease under furniture and equipment relating to the removal of the non-recurrent portion of the associated non-post provisions (\$3,900);

- (c) **Subprogramme 2, component 2, Field operations finance** (increase of \$55,300). The increase relates to the higher provision at continuing vacancy rates for one post of Finance and Budget Officer (P-3) established in 2023 pursuant to Assembly resolution [77/262](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice;
- (d) **Subprogramme 2, component 3, Programme planning and budgeting** (increase of \$135,900). The increase relates to the higher provision at continuing vacancy rates for the posts of one Programme Budget Officer (P-3), one Associate Finance and Budget Officer (P-2) and one Senior Budget Assistant (General Service (Principal level)) established in 2023 pursuant to Assembly resolution [77/262](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice;
- (e) **Subprogramme 3, component 2, Administrative law** (decrease of \$24,400). The net decrease under other staff costs relates to the removal of non-recurrent provisions for temporary assistance that was approved for a period of six months in 2023 (\$120,400), partly offset by the provision at continuing vacancy rates for one temporary position of Legal Officer (P-4) established in 2023 pursuant to Assembly resolution [77/262](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice (\$96,000).

Other changes

29A.142 As reflected in table 29A.44 (1), the net effect of the proposed changes is an increase of \$653,000. The breakdown of changes is as follows:

Conversion, redeployment and reassignment of existing posts (net increase of \$214,200)

- (a) **Executive direction and management** (increase of \$267,500). The increase relates to the proposed conversion of the post of Principal Programme Management Officer (D-1), which has been funded from extrabudgetary resources since 2020. Details are provided in annex III;
- (b) **Subprogramme 3, component 1, Global strategy and policy** (cost neutral). The proposed change reflects the reassignment of a post (P-3) of Information Systems Officer to Data Analyst and a post (General Service (Principal level)) of Senior Information Systems Assistant to Data Analysis Assistant, in line with the Secretary-General's data strategy. Details are provided in annex III;
- (c) **Subprogramme 3, component 2, Administrative law** (decrease of \$53,300). The decrease relates to the proposed redeployment of a post of Administrative Assistant (General Service (Other level)) in New York to Nairobi (Local level). Details are provided in annex III;

Reduction of resources through efficiencies (decrease of \$418,100)

- (d) **Executive direction and management** (decrease of \$52,700). The decrease is comprised of lower provisions under other staff costs based on an anticipated lower need for overtime in the Office of the Under-Secretary-General (\$9,200) and the Office of the Controller (\$3,000), as well as reductions under consultants for addressing racism and promoting dignity for all in the United Nations Secretariat (\$14,100) and under grants and contributions related to resource requirements for the team to develop an efficiency model for management services provision (\$26,400);

- (e) **Subprogramme 1, component 2, Services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination** (decrease of \$1,500). The decrease under other staff costs is based on anticipated lower needs for overtime;
- (f) **Subprogramme 1, component 3, Management advisory services** (decrease of \$2,000). The decrease under other staff costs is based on anticipated lower needs for overtime in the secretariats of the Headquarters Committee on Contracts and the Headquarters Property Survey Board;
- (g) **Subprogramme 2, component 1, Finance** (decrease of \$33,200). The decrease under other staff costs is based on anticipated lower needs for surge capacity and extended leave replacements;
- (h) **Subprogramme 2, component 3, Programme planning and budgeting** (decrease of \$10,700). The decrease under other staff costs is based on anticipated lower needs for surge capacity;
- (i) **Subprogramme 3, component 1, Global strategy and policy** (decrease of \$284,600). The decrease is comprised of lower provisions under other staff costs based on anticipated lower needs for surge capacity and extended leave replacements (\$28,300) and a reduction under contractual services relating to central learning resources following efforts in recent years with regard to changing the format of training programmes to online or virtual formats (\$256,300);
- (j) **Subprogramme 3, component 2, Administrative law** (decrease of \$21,100). The decrease under other staff costs is based on anticipated lower needs for surge capacity and extended leave replacements;
- (k) **Subprogramme 4, Business transformation and accountability** (decrease of \$12,300). The decrease comprises lower provisions under other staff costs based on anticipated lower needs for overtime (\$7,700), as well as reductions under contractual services (\$1,400), supplies and materials (\$300), and furniture and equipment (\$2,900);

Other changes (increase of \$856,900)

- (l) **Executive direction and management** (increase of \$6,000). The increase reflects proposed changes primarily under travel of staff in the Office of the Assistant Secretary-General for Human Resources (increase of \$5,200), owing primarily to the resumption of more face-to-face meetings for the Assistant Secretary-General for Human Resources;
- (m) **Subprogramme 1, component 3, Management advisory services** (decrease of \$800). The decrease reflects proposed changes under travel of staff in the Sustainability and Resilience Management Section;
- (n) **Subprogramme 2, component 1, Finance** (increase of \$81,100). The increase reflects proposed changes primarily under consultants owing to a non-recurrent requirement to strengthen IPSAS reporting on employee benefits by improving documentation on the actuarial process, including frequency of valuations and use of assumptions (\$65,000), as well as under contractual services relating to additional costs associated with maintenance of finance master data (\$9,000) and the annual licence for an investment trading platform (\$6,100);
- (o) **Subprogramme 2, component 2, Field operations finance** (increase of \$18,100). The increase under travel of staff relates to additional travel requirements due to the resumption of property management workshops after the end of the COVID-19 pandemic, as well as official visits to special political missions to discuss mission-specific budgetary and financial issues;
- (p) **Subprogramme 3, component 1, Global strategy and policy** (increase of \$752,500). The increase relates to additional resource requirements under other staff costs for temporary positions of one Senior Programme Management Officer (P-5) and one Programme Management Officer (P-4) (\$458,100), as well as under contractual services for individual contractors to support the proposed temporary positions (\$300,600) for the staff selection 2.0

change programme, by which it is intended to develop a streamlined staff selection system that is effective, fair, efficient and agile and enables the Organization to have a diverse and inclusive workforce that delivers on its evolving mandates, partly offset by reduced requirements under travel of staff due to reduced travel requirements for the Staff-Management Committee based on the planned meeting location (\$6,200).

Other assessed resources

- 29A.143 As reflected in tables 29A.44 (2) and 29A.45 (2), the Department receives other assessed resources to backstop peacekeeping operations. For 2024, other assessed resources are estimated at \$59,142,000. The expected net increase of \$780,200 compared with the estimate for 2023 is attributable primarily to: (a) a net decrease under post resources due to the redeployment of 11 posts to the Department of Operational Support, offset in part by updated salary costs; (b) an increase in consultancy requirements due to an additional IPSAS consultant needed as a result of the major changes in lease accounting and a consultant to assist in the implementation of the mental health strategy; and (c) an increase under furniture and equipment for software, licences and fees. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).

Extrabudgetary resources

- 29A.144 As reflected in tables 29A.44 (3) and 29A.45 (3), the Department receives extrabudgetary resources from several sources. For 2024, extrabudgetary resources are estimated at \$31,396,000. The Department receives voluntary contributions to the trust fund in support of victims of sexual exploitation and abuse, established by the Secretary-General in 2016, as well as management- and reform-related voluntary contributions through another trust fund. Other extrabudgetary resources include: (a) central programme support costs to fund the extrabudgetary resources share of Organization-wide costs, such as the Umoja enterprise resource planning solution (including business support resources) and the development of an efficiency model for management services provision, and to backstop operations funded from voluntary contributions; (b) a system-wide jointly financed resource to fund local salary surveys; and (c) a fund to backstop operations funded from cost recoveries. The expected increase of \$50,500 compared with the estimate for 2023 is attributable to the higher estimates under posts due to the proposal for three new posts in the Office of the Controller, offset in part by a decrease related to the proposed conversion of one D-1 post funded from extrabudgetary resources to the regular budget in the Office of the Under-Secretary-General (details are provided in annex II).
- 29A.145 The extrabudgetary resources under the present section are subject to the oversight of the Department of Management Strategy, Policy and Compliance, which has delegated authority from the Secretary-General.

Executive direction and management

- 29A.146 The executive direction and management component comprises the Office of the Under-Secretary-General, including the Inter-Agency and Intergovernmental Service and the Anti-Racism Team, the Office of the Controller and the Office of the Assistant Secretary-General for Human Resources.
- 29A.147 The Under-Secretary-General for Management Strategy, Policy and Compliance is responsible for the overall direction and management of the Department and for providing the Secretary-General with strategic advice on management issues. The Under-Secretary-General represents the Secretary-General on management issues before relevant expert and intergovernmental bodies, such as the Advisory Committee on Administrative and Budgetary Questions and the Fifth Committee, the International Civil Service Commission and inter-agency coordination mechanisms, including the High-level Committee on Management of CEB, and in the conduct of staff-management

consultations. The Under-Secretary-General oversees and provides direction to the Assistant Secretary-General for Programme Planning, Finance and Budget, Controller; the Assistant Secretary-General for Human Resources; the Director of the Business Transformation and Accountability Division; and the Director of the Enterprise Resource Planning Solution Division. The Under-Secretary-General will also, jointly with the Under-Secretary-General for Operational Support, provide direction and strategic guidance to the Assistant Secretary-General, Chief Information Technology Officer.

- 29A.148 The Office of the Under-Secretary-General provides leadership in the development and delivery of integrated organizational management strategies, policies and models that support a decentralized, field-focused paradigm in which managers are empowered through the new enhanced delegation of authority framework. It provides direction to take advantage of lessons learned and innovative methods to ensure continuous management improvements to meet evolving requirements throughout the Secretariat. It liaises with Member States and other external entities on management-related issues and fosters coordination internally within the Secretariat, as well as externally with the funds, programmes and specialized agencies of the United Nations system, to build partnerships and promote best practices.
- 29A.149 The Under-Secretary-General is assisted by the Controller, who provides strategic and policy leadership on all planning, programming, budgetary and financial matters and on the administration of the Financial Regulations and Rules of the United Nations, and by the Assistant Secretary-General for Human Resources, who provides strategic leadership for the simplified and streamlined human resources policy framework and the mainstreaming of a gender perspective, equitable geographical representation and accessibility into all facets of the work of the Organization through integrated strategies and policies. Working together closely under the guidance of the Under-Secretary-General, the Controller and the Assistant Secretary-General for Human Resources provide leadership in adapting strategies and policies to support new and innovative business models and enable managers to be more effective and agile in the delivery of their programmes.
- 29A.150 The Controller represents the Secretary-General in the committees of the General Assembly, the Advisory Committee on Administrative and Budgetary Questions, the Committee for Programme and Coordination and the Independent Audit Advisory Committee in the presentation of all programme and budget documents, including those related to the regular budget, the peacekeeping budgets and international tribunals, as well as the financial statements of the Organization. The Controller advises the Secretary-General and the Under-Secretary-General for Management Strategy, Policy and Compliance on policy relating to the budgets and finances of the United Nations and the related plans and work programmes. Through the Office of Programme Planning, Finance and Budget, the Controller ensures that the financial policy framework enables efficient mandate delivery. The Director of the Finance Division, in addition to existing responsibilities under subprogramme 2, component 1, directly supports the Controller with regard to overseeing cross-cutting functions, such as financial policy and the Committee on Contributions, and also deputizes for the Controller on all financial policies related to United Nations system entities and other partners of the Secretariat. As the Deputy Controller, the Director of the Finance Division enables appropriate burden-sharing with the Controller in addressing matters related to complex and critical financial management in a proactive manner.
- 29A.151 The Assistant Secretary-General for Human Resources leverages technologies and pursues innovative and holistic approaches to transform the organizational culture, strengthen duty of care, promote inclusion, accessibility and workforce diversity, and drive the creation of a supportive and healthy workplace. The Office of Human Resources responds proactively to issues arising in the formal and informal system of administration of justice to ensure the efficient, effective and fair implementation of the Organization's policies, core values and norms. It builds on the integration of the conduct and discipline function for the entire Secretariat and for all categories of personnel to increase consistency, transparency and accountability in the application of the standards of conduct.
- 29A.152 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability

information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. In line with its functional responsibilities, the Department will continue, in 2024, to mainstream environmental sustainability management into the Secretariat policy framework and the enterprise management and accountability system. Operationally, the Department will prioritize reducing its travel-related greenhouse gas emissions by optimizing the use of online collaborative and conferencing platforms, streamlining and combining travel requirements, systematically using tools developed by the International Civil Aviation Organization in organizing meetings and training and opting to travel by train whenever possible.

29A.153 Information on the timely submission of documentation and advance booking for air travel is reflected in table 29A.47. The Department will continue to implement measures to improve compliance rates with the advance purchase of air tickets through earlier planning of events and nominations of travellers, raising the awareness of programme managers and travellers and minimizing exceptions. In the few cases where full compliance has not been achieved, this has been for reasons beyond the control of the Department.

Table 29A.47
Compliance rate
 (Percentage)

	Actual 2020	Actual 2021	Actual 2022	Planned 2023	Planned 2024
Timely submission of documentation	88	92	97	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	52	75	75	100	100

29A.154 The proposed regular budget resources for 2024 amount to \$6,809,800 and reflect a decrease of \$255,000 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 29A.141 (a) and 29A.142 (a), (d) and (l). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.48 and figure 29A.VIII.

Table 29A.48
Executive direction and management: evolution of financial and post resources
 (Thousands of United States dollars/number of posts)

	2022 expenditure	2023 appropriation	Changes				Total	Percentage	2024 estimate (before recosting)

Figure 29A.VIII
Executive direction and management: distribution of proposed resources for 2024 (before recosting)
 (Number of posts/thousands of United States dollars)

Other assessed resources

29A.155 Other assessed resources are estimated at \$1,508,100. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).

Extrabudgetary resources

29A.156 Extrabudgetary resources are estimated at \$2,478,600. In the Office of the Under-Secretary-General, the resources would be used mainly to monitor the implementation and mainstreaming of the Department’s management reform initiatives, as well as for inter-agency coordination. In the Office of the Controller, resources would be used to support the Controller with respect to budgetary, financial and administrative matters, including the deliberations of all intergovernmental and oversight bodies. With the increased focus on collaborative partnerships addressing complex global issues, resources would be used to provide strategic guidance and support the management of partnerships covering both the public and non-public sector. It is anticipated that additional capacity will be added over time. The expected increase of \$50,500 compared with the estimate for 2023 is attributable to the increase in post resources due to the proposed establishment of three new posts in the Office of the Controller, offset in part by a decrease related to the proposed conversion of one D-1 post funded from extrabudgetary resources to the regular budget in the Office of the Under-Secretary-General. Details are provided in annex II below.

Programme of work

Subprogramme 1

Enterprise resource planning solution, services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination, and management advisory services

Component 1

Enterprise resource planning solution

Regular budget resources

29A.157 The proposed regular budget resources for 2024 amount to \$3,731,900 and reflect no change, compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.49.

Table 29A.49

Subprogramme 1, component 1: evolution of financial resources (regular budget)

(Thousands of United States dollars)

	2022 expenditure	2023 appropriation	Changes				Total	Percentage	2024 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other				
Financial resources by main category of expenditure

Total	3 677.7	3 731.9	--	--	--	--	--	--	3 731.9

Other assessed resources

29A.158 Other assessed resources are estimated at \$15,424,900 and would provide for the peacekeeping budget share of the enterprise resources planning solution. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).

Extrabudgetary resources

29A.159 Extrabudgetary resources for the component are estimated at \$5,722,200 and would provide for the extrabudgetary resources share of the enterprise resource planning solution for 2024. No change in the resource level is expected compared with the estimate for 2023.

Gross budget resource requirements

29A.160 The proposed gross budget for 2024 amounts to \$24,879,000, reflecting no resource change compared with the approved budget for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.50 and figure 29A.IX.

Component 2

Services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination

29A.161 The proposed regular budget resources for 2024 amount to \$1,882,000 and reflect a net increase of \$307,000 compared with the appropriation for 2023. The proposed net increase is explained in paragraphs 29A.141 (b) and 29A.142 (e). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.51 and figure 29A.X.

Other assessed resources

29A.162 Other assessed resources are estimated at \$457,900. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).

**Component 3
 Management advisory services**

29A.163 The proposed regular budget resources for 2024 amount to \$3,103,800 and reflect a decrease of \$2,800 in the resource level compared with the appropriation for 2023. The proposed decrease is explained in paragraph 29A.142 (f) and (m). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.52 and figure 29A.XI.

**Subprogramme 2
Programme planning, finance and budget**

**Component 1
Finance**

29A.165 The proposed regular budget resources for 2024 amount to \$5,707,800 and reflect an increase of \$47,900 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 29A.142 (g) and (n). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.53 and figure 29A.XII.

Other assessed resources

29A.166 Other assessed resources are estimated at \$11,029,300. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).

Extrabudgetary resources

29A.167 Extrabudgetary resources for the component are estimated at \$14,990,100. The resources would be used to provide programme support for substantive and technical cooperation activities and for administrative structures, as well as support for the Special Account for Travel Services. The resources would also provide assistance for substantive activities related to the Tax Equalization Fund and the United Nations Fund for International Partnerships. No change in the resource level is expected compared with the estimate for 2023.

**Component 2
Field operations finance**

29A.168 The proposed regular budget resources for 2024 amount to \$1,540,300 and reflect an increase of \$73,400 compared with the appropriation for 2023. The proposed increase is explained in paragraph 29A.141 (c) and 29A.142 (o). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.54 and figure 29A.XIII.

Other assessed resources

29A.169 Other assessed resources are estimated at \$9,680,100. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).

Extrabudgetary resources

29A.170 Extrabudgetary resources for the component are estimated at \$503,600. The resources would be used to support the provision of policy guidance to field operations on budget preparation, implementation, monitoring and reporting, as well as the provision of such guidance on property management and large-scale capital construction and renovation projects. No change in the resource level is expected compared with the estimate for 2023.

**Component 3
Programme planning and budgeting**

29A.171 The proposed regular budget resources for 2024 amount to \$6,326,400 and reflect a net increase of \$125,200 compared with the appropriation for 2023. The proposed increase is explained in paragraph 29A.141 (d) and 29A.142 (h). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.55 and figure 29A.XIV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29A.172 Extrabudgetary resources for the component are estimated at \$286,400. The resources would be used to support the estimation of extrabudgetary resources presented in the budget and position management for Secretariat entities. No change in the resource level is expected, compared with the estimate for 2023.

**Subprogramme 3
 Human resources**

**Component 1
 Global strategy and policy**

29A.173 The proposed regular budget resources for 2024 amount to \$19,436,000 and reflect an increase of \$467,900 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 29A.142 (b), (i) and (p). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.56 and figure 29A.XV.

Other assessed resources

29A.174 Other assessed resources are estimated at \$4,287,900. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).

Extrabudgetary resources

29A.175 Extrabudgetary resources for the component are estimated at \$1,848,600. The resources would be used primarily to enable the conduct of activities for the jointly financed local salary surveys. No change in the resource level is expected compared with the estimate for 2023.

Component 2 Administrative law

29A.176 The proposed regular budget resources for 2024 amount to \$3,701,100 and reflect a decrease of \$98,800 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 29A.141 (e) and 29A.142 (c) and (j). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.57 and figure 29A.XVI.

Other assessed resources

29A.177 Other assessed resources are estimated at \$6,531,100. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).

Extrabudgetary resources

29A.178 Extrabudgetary resources for the component are estimated at \$1,867,500. The resources would be used to provide assistance to victims of sexual exploitation and abuse, as well as to provide support in the area of conduct and discipline of personnel. No change in the resource level is expected compared with the estimate for 2023.

**Subprogramme 4
Business transformation and accountability**

29A.179 The proposed regular budget resources for 2024 amount to \$7,456,500 and reflect a decrease of \$12,300 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 29A.142 (k). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.58 and figure 29A.XVII.

Other assessed resources

29A.180 Other assessed resources are estimated at \$8,209,800. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).

Extrabudgetary resources

29A.181 Extrabudgetary resources for the subprogramme are estimated at \$3,197,700. The resources would complement regular budget resources and would be used mainly to continue to carry out support and coordination activities related to all voluntary contributions to trust funds, including Secretariat entities funded primarily through voluntary contributions, such as the United Nations resident coordinator system, the Office for the Coordination of Humanitarian Affairs, the United Nations Environment Programme, the United Nations Office on Drugs and Crime, the United Nations Human Settlements Programme and those funded through a combination of assessed and voluntary contributions, covering areas of work such as delegation of authority, business transformation and project management, analytics, oversight coordination, enterprise risk management, results-based management, evaluation and organizational performance measurement. No change in the resource level is expected compared with the estimate for 2023.

Programme support

29A.182 The Business Partner Service assists the Under-Secretary-General in the discharge of the Department’s responsibilities in the areas of human resources management, finance and general administration.

29A.183 The Business Partner Service serves as a business partner for the secretariats of the Advisory Committee on Administrative and Budgetary Questions, the Board of Auditors and the Independent Audit Advisory Committee in carrying out their financial, personnel and administrative responsibilities and administers the official travel of the members of the Committee for Programme and Coordination and the Committee on Contributions.

29A.184 The proposed regular budget resources for 2024 amount to \$1,842,100 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29A.59 and figure 29A.XVIII.

Table 29A.59

Programme support: evolution of financial and post resources

(Thousands of United States dollars/number of posts)

	2022 expenditure	2023 appropriation	Changes				Total	Percentage	2024 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other

Total		12	–	–	–	–	–	12	

Figure 29A.XVIII

Programme support: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

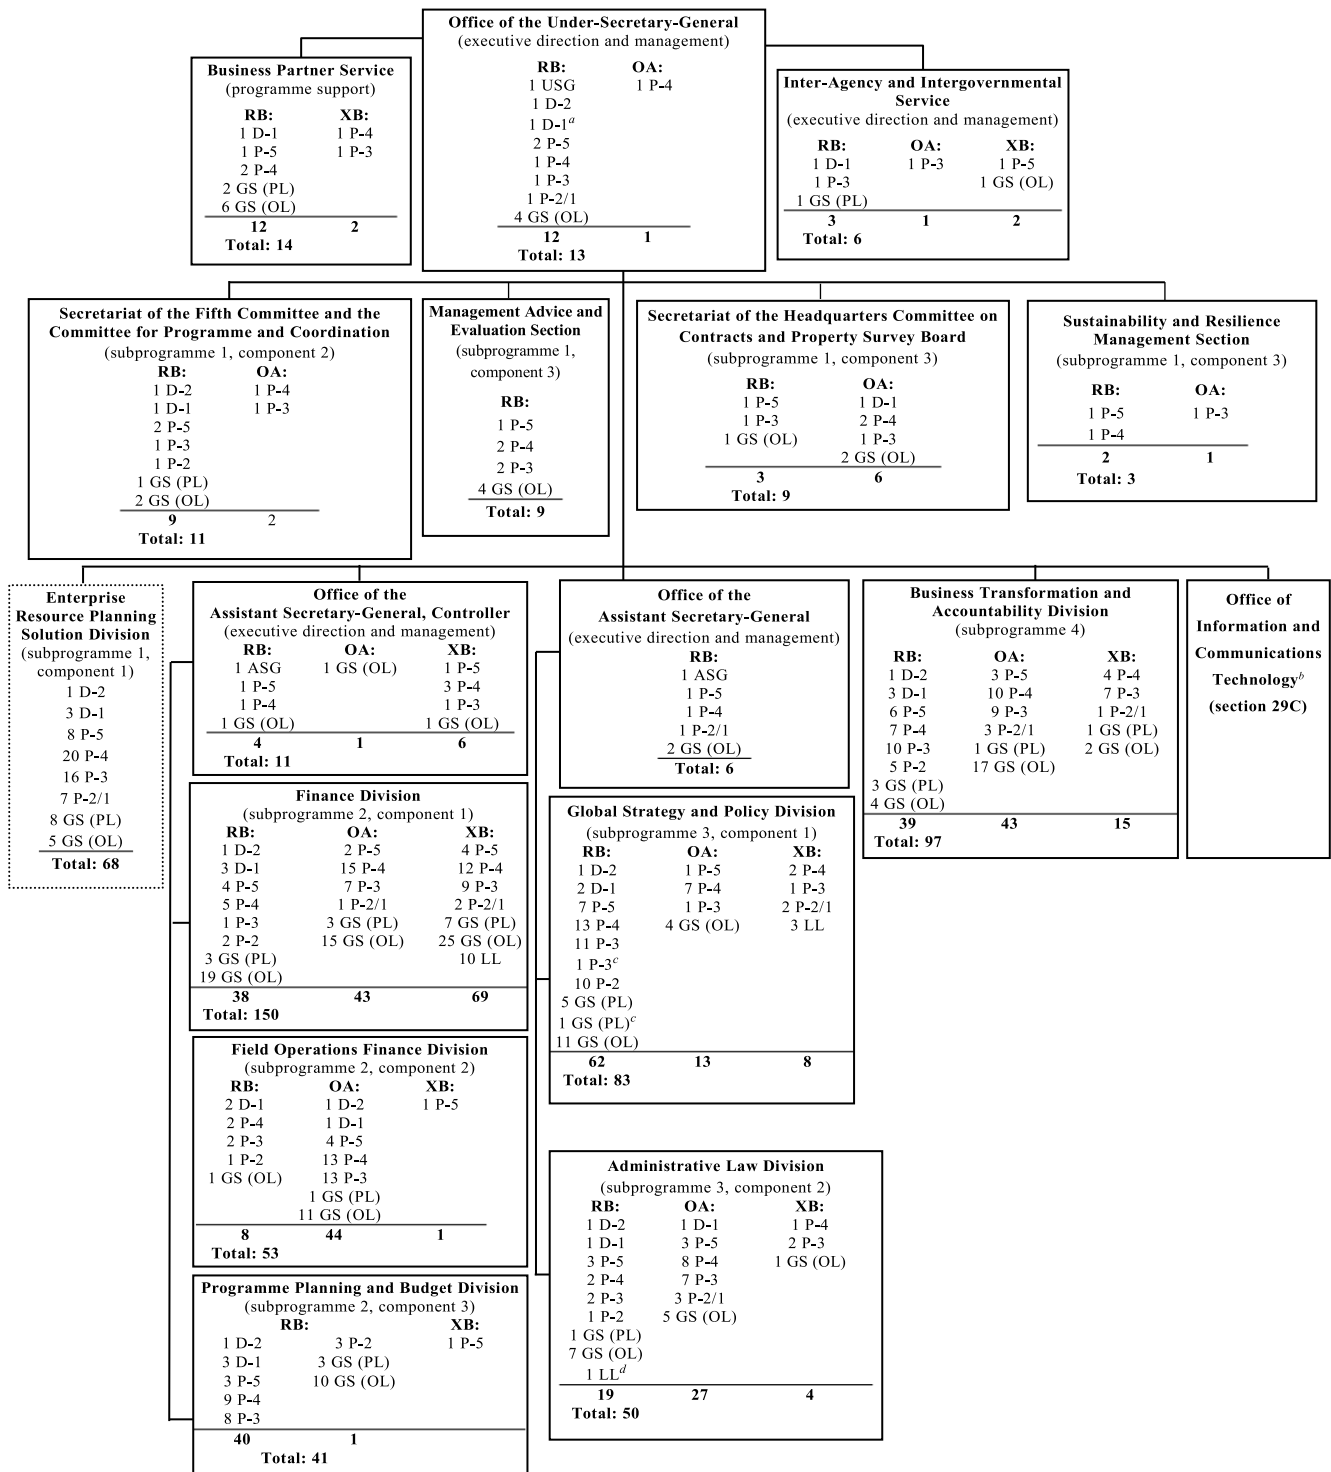

29A.185 Other assessed resources are estimated at \$143,800. Additional details are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).

Extrabudgetary resources

29A.186 Extrabudgetary resources for programme support are estimated at \$501,300. The resources would be used to provide administrative support to departmental resources funded from programme support costs. No change in the resource level is expected compared with the estimate for 2023.

Annex II**Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies**

*Brief description of the recommendation**Action taken to implement the recommendation*

Advisory Committee on Administrative and Budgetary Questions[A/77/7](#)

The Advisory Committee is of the view that the information regarding extrabudgetary resources lacks sufficient detail and recommends that the General Assembly request the Secretary-General to systematically include in future budget proposals a more detailed breakdown of extrabudgetary resources and clear data on voluntary contributions, programme support costs, cost recovery, cost-sharing and central peacekeeping and other funds, specifying the services provided to different entities along with the respective amounts recovered (para. VIII.26).

The information on extrabudgetary resources will be provided in the context of the financial performance report on the programme budget for 2022.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	D-1	Conversion from extrabudgetary resources of a Principal Programme Management Officer (D-1)	The proposed conversion of the post funded from extrabudgetary resources to the regular budget would ensure continuity of functions at an appropriately senior level in the immediate office of the Under-Secretary-General in the areas of: (a) coordination and implementation monitoring of the Department of Management Strategy, Policy and Compliance's ongoing reform activities and reporting, including adoption of lessons learned from the Management Client Board effectiveness evaluation; (b) direction of the work of the Management Advice and Evaluation Section, which handles, among other responsibilities, management evaluation requests with increasing complexity; (c) substantive support to the Under-Secretary-General in the review of highly sensitive personnel cases; (d) strategic, substantive and project management support for various initiatives related to management reform; (e) provision of strategic management advice in programmes and activities requiring cross-functional and interdepartmental coordination; and (f) managerial advice in connection with delegated authorities to the Under-Secretary-General for Management Strategy, Policy and Compliance in the area of implementation of interim measures relating to protection against retaliation.
Subprogramme 3, component 1, Global strategy and policy	1	P-3	Reassignment of a post of Information Systems Officer to Data Analyst, and a post of Senior Information Systems Assistant to Data Analysis Assistant	The Office of Human Resources drives a comprehensive approach to strategic workforce planning across the Organization, based on data-driven tools and reports that will shape the future workforce of the Organization. Support for ongoing improvements and efficiencies in the talent management process, in the context of overseeing long-term planning for human resources while anticipating future needs based on strategic imperatives and expected results, will be increasingly necessary in the coming years. There is a need to be able to draw upon human resources data from a variety of sources, fostering innovation and efficiency through an integrated position and people management system. Currently, there is insufficient human resources data-related technical expertise available in the Office to easily extract reports or obtain industry-standard visualization of data to engage in data analysis. The profiles of the current functions are not meeting the needs as they focus on programme management-related responsibilities, whereas the need is for data-focused functions given the mandate of the component.
Subprogramme 3, component 2, Administrative law	(1)	GS (OL) 1 LL	Redeployment of an Administrative Assistant from New York to Nairobi	The proposed redeployment would address the need for real-time administrative support for the Legal Officers in the component's Nairobi office to enable them to deliver on their respective mandate. Specifically, the objective is to ensure the ability of the Appeals Section under this component to continue delivering its legal and advisory services in a timely manner with respect to administrative legal matters. While noting that efforts have continued towards having more Legal Officers handle appeals cases, the Nairobi office requires administrative support to handle the increasing number of administrative matters associated with the effective representation of the Secretary-General before the United Nations Dispute Tribunal.

Abbreviations: GS (OL), General Service (Other level); GS (PL), General Service (Principal level); LL, Local level.

Foreword

Over the course of 2024, the Department of Operational Support will improve its delivery of operational support while adapting to the challenges of a complex operating environment.

We will strive to remove accessibility barriers that make procedures difficult to use. Where feasible, we will automate workflows and introduce new ways of delivering mandates better, using innovation methods to put clients at the heart of process design, with a view to enabling Secretariat entities to carry out their mandates and achieve results.

Simplifying our processes will enable us to focus on ways to achieve excellence in our advisory support. This includes tailored advice to enable clients to use their delegated authority, leveraging improved guidance documents, multimedia platforms and knowledge hubs, such as the Knowledge Gateway.

Where the Department is best placed to do so, it will provide direct operational support to its clients. This includes maintaining and improving common resource pools such as systems contracts and staff rosters. In addition, there are cases of escalated or in extremis situations – crises, new or closing field operations, or other major changes – in which the Department will provide direct support.

We will progressively shift away from providing transactional support to guidance and advisory services across all areas of operations. A large part of this work involves working with client offices to improve planning, identify our clients' future needs and mitigate the most pressing risks. We will better harness data and monitor performance across all areas of operational support, show progress and change course, when necessary. Throughout this, inclusion, both in terms of who we are and how we work, will be our watchword.

(Signed) Atul **Khare**
Under-Secretary-General for Operational Support

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 29B.1 The Department of Operational Support is the operational arm of the Secretariat and the client-facing interface for operational support matters in the Secretariat's management structure, which exists to support the objective of effective mandate delivery, in partnership with Secretariat entities and other clients. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [72/266 B](#) and [73/281](#). The Department delivers rapid, effective, efficient, responsible and, where required, customized enabling solutions that help partners to meet their mandates, including in the most challenging operating environments.

Strategy and external factors for 2024

- 29B.2 For 2024, the Department will enable effective mandate delivery through the provision of operational support. To implement its programme, the Department will work with client entities to define requirements and co-create solutions in the areas of end-to-end supply chain management, uniformed personnel support, human resources, diverse training services, business process improvement, and medical and occupational health and safety, as well as information and communications technology solutions through the Office of Information and Communications Technology. It will, in exceptional cases, exercise delegated authority on behalf of clients across the Secretariat.
- 29B.3 In addition, it will support entities within the Secretariat, such as small offices at Headquarters or in the field, that lack a dedicated executive office, an administrative unit or the capacity to meet the demands of surge requirements or other unusual circumstances. Surge requirements or other unusual circumstances include, in extremis, operational crisis response and support for other special situations, including field entity start-up or closure or other significant operational changes.
- 29B.4 Internally, the Department will continue its shift from providing direct transactional support to focus on enabling its clients through advisory and guidance functions. It will do this by simplifying existing operational support processes, enhancing advisory support to enable clients to exercise their delegated authority and improving strategic functions such as risk monitoring, foresight and data analytics. The Department will provide direct support only where necessary, for example, where there is a clear strategic imperative, where there are benefits from economies of scale or in response to crises or other escalated situations.
- 29B.5 With regard to cooperation with other entities at the global, regional, national and local levels, the Department will reinforce its collaboration with Member States and regional organizations, such as the African Union and the European Union, including through capacity-building activities, knowledge exchange and functional arrangements in diverse areas of operational support, in order to achieve the scale and effectiveness needed to address complex challenges.
- 29B.6 With regard to inter-agency coordination and liaison, the Department will continue to strengthen the Secretariat-wide service delivery architecture, including country-level partnerships with United Nations agencies, funds and programmes, enhancing operational integration where feasible and providing the same services, of the same quality, to the same standards and at the same cost, throughout different locations. The Department will continue to address the issue of mutual recognition, including in the areas of human resources and supply chain management, and to seek collaboration opportunities and synergies in the spirit of One United Nations.
- 29B.7 With regard to the external factors, the Department considered applicable risks identified in its risk register and, accordingly, the overall plan for 2024 is based on the following planning assumptions:

- (a) Operations increasingly stabilize as the coronavirus disease (COVID-19) pandemic risks recede, allowing the Department to focus on its strategy while applying the lessons learned from the COVID-19 response;
 - (b) Relevant United Nations and non-United Nations partners continue to cooperate, amplifying the Department's impact in supporting client needs and discharging its mandates to ensure timely and sustained delivery of operational support;
 - (c) Supply chain disruptions do not prevent vendors from being able to provide timely and high-quality responses at the right cost;
 - (d) Special situations are not greater in number or complexity than planned for and, consequently, do not draw from resources dedicated to implementation of the broader overall plan.
- 29B.8 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, activities will include camp design methodologies, improvements in the area of women's health, staffing initiatives such as the senior women talent pipeline, and advice to field entities, upon request, to enable them to meet targets related to gender equality. In order to encourage a more equitable approach to the Organization's supply chain, the Department will continue to strengthen outreach and training for vendors, including for women-owned businesses.
- 29B.9 In line with the United Nations Disability Inclusion Strategy, the Department plans to continue to support efforts to improve accessibility for persons with disabilities to the United Nations premises. The Department will also leverage the increased use of digital tools and platforms to upgrade the digital infrastructure at Headquarters in order to increase accessibility.

Impact of the pandemic and lessons learned

- 29B.10 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular in the areas of integrated supply chains, administration and capacity development, and operational training. To mitigate the impact of supply chain volatilities, the Department leveraged its electronic capabilities in areas such as vendor outreach, electronic special committee approval for vendor registration, online bid opening and integrated business planning.
- 29B.11 In addition, in order to support Member States and clients on issues related to the COVID-19 pandemic, within the overall scope of the objectives, the Department provided recommendations for risk mitigation measures on United Nations premises for the 2022 sessions of the General Assembly in accordance with guidelines from the host country, including risk assessments for meetings, walk-throughs and support for other departments servicing the Assembly. The Department also continued to lead the COVID-19 vaccination programme, and the COVID-19 medevac mechanism on behalf of the United Nations system, including its smooth drawdown and closure at the end of 2022.
- 29B.12 The Department continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including incorporating the impact of increased use in flexible working arrangements into office space management, which enabled the Department to reduce the real-estate portfolio at Headquarters and realize efficiencies in rental obligations. On the basis of the lessons learned, the Department will pilot further adjustments to meet current office space needs. With regard to capacity-building, since the onset of the pandemic, the Department has been able to respond nimbly to the organizational need for customized operational learning offerings. The pandemic also hastened a worldwide trend towards online, remote and blended learning. A key insight was that the development of impactful e-learning required recurring investment in specialized digital licences and tools and the continuous maintenance of and improvement in the online platform for operational guidance (Knowledge Gateway). With various software applications, online tools and licences, the Department will be able to develop and deliver global learning content for a broader set of learners across various duty stations, with improved learning outcomes. At the same time, the Department observed that some key capacity development programmes, in particular those requiring behavioural change or soft-skill

acquisition, continue to require face-to-face, instructor-led components. For such programmes, the Department will provide in-person training, complemented by remote learning elements.

Legislative mandates

29B.13 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

72/266 A; 72/266 B; 73/281	Shifting the management paradigm in the United Nations	77/263	Special subjects relating to the proposed programme budget for 2023
76/274	Cross-cutting issues	77/264 A–C	Programme budget for 2023
77/262	Questions relating to the proposed programme budget for 2023		

Subprogramme 2

Supply chain management

Component 1

Integrated supply chain management

General Assembly resolutions

68/263; 69/273	Procurement	76/288	Financing of the United Nations Multidimensional Integrated Stabilization Mission in Mali
70/286	Cross-cutting issues		
76/281	Financing of the United Nations Interim Security Force for Abyei	76/289	Financing of the United Nations Disengagement Observer Force
76/282	Financing of the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic	76/290	Financing of the United Nations Interim Force in Lebanon
76/283	Financing of the United Nations Peacekeeping Force in Cyprus	76/291	Financing of the United Nations Mission in South Sudan
76/284	Financing of the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo	76/292	Financing of the United Nations Mission for the Referendum in Western Sahara
76/287	Financing of the United Nations Interim Administration Mission in Kosovo	76/293	Financing of the activities arising from Security Council resolution 1863 (2009)

Component 2

Uniformed capabilities support

General Assembly resolutions

50/222	Reform of the procedures for determining reimbursement to Member States for contingent-owned equipment	74/279	Triennial review of the rates and standards for reimbursement to Member States for contingent-owned equipment
67/261	Report of the Senior Advisory Group established pursuant to General Assembly resolution 65/289 to consider rates of reimbursement to troop-contributing countries and other related issues	76/275 76/276	Post-traumatic stress disorder framework Rates of reimbursement to troop- and police-contributing countries
72/285	Rates of reimbursement to troop- and police-contributing countries	76/279	Support account for peacekeeping operations

Deliverables

29B.14 Table 29B.1 lists all cross-cutting deliverables of the programme.

Table 29B.1
Cross-cutting deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	4	4	4	4
Meetings of the:				
1. Fifth Committee	1	1	1	1
2. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. Committee for Programme and Coordination	1	1	1	1
4. Special Committee on Peacekeeping Operations	1	1	1	1

Evaluation activities

- 29B.15 The following evaluations conducted by the Department, completed in 2022, have guided the proposed programme plan for 2024:
- (a) Evaluation of subprogramme 1, component 2, Capacity development and operational training;
 - (b) Evaluation of the United Nations system’s HIV post-exposure prophylaxis kit programme.
- 29B.16 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, in response to the evaluation of subprogramme 1, component 2, the Department will strengthen the capacity of its clients for effective resource management by developing learning solutions and providing further tailored support. In response to the evaluation of the HIV post-exposure prophylaxis kit programme, the Department has revised data collection tools and developed a HIV post-exposure prophylaxis custodian directory and usage dashboard to better monitor programme implementation and track the distribution of kits. In addition, the Department will support the implementation of standardized measures for the procurement of HIV post-exposure prophylaxis kits across the United Nations system and explore ways to strengthen local host country health facilities to provide HIV post-exposure prophylaxis services to United Nations personnel.
- 29B.17 An evaluation of the standing surge capacity mechanism, to be conducted by the Department, is planned for 2024.

Programme of work

Subprogramme 1 Support operations

Component 1 Human resources support

Objective

- 29B.18 The objective, to which this component contributes, is to strengthen the human resources capacity of all Secretariat entities, enable improved, simplified human resources processes and offer the Organization talented and diverse staffing pools.

Strategy

- 29B.19 To contribute to the objective, the component will:
- (a) Support Secretariat entities in the exercise of delegated authority in the area of human resources, including through:
 - (i) Timely and consistent specialized advisory support and guidance to human resources business partners across the Secretariat, including on dispute prevention and resolution, non-staff capacities and other entity-specific operational human resources needs;
 - (ii) Active engagement and regular analysis of support requests, with a view to communicating required policy changes to the Department of Management Strategy, Policy and Compliance on the basis of client needs;
 - (iii) Simplification and digitization of human resources processes, tools and procedures, such as recruitment, onboarding, testing and examination services, non-staff capacities and workforce planning, in cooperation with the Office of Human Resources and the Office of Information and Communications Technology, in line with the Organization's human resources commitments;
 - (b) Offer high-quality and diverse pools of candidates by managing rosters across all job families;
 - (c) Administer the young professionals programme.
- 29B.20 The above-mentioned work is expected to result in:
- (a) Secretariat entities accountably, effectively and efficiently exercising their delegated human resources authority in support of their mandates;
 - (b) Increased efficiencies and measurable reductions in delays and redundancies in human resources processes;
 - (c) Strengthened capacity for the timely identification and recruitment of candidates and talent that are the best fit.

Programme performance in 2022

More efficient human resources enterprise resource planning

- 29B.21 The component led business process improvement and simplification in Umoja as part of human resources business support. In 2021, the component established a joint Umoja human resources support team, providing enhanced human resources production support to client offices and streamlining processes. For example, a new danger pay solution was developed, which requires staff to claim danger pay by confirming their location for each day of the month. Previously, staff in danger pay locations were paid the full monthly danger pay amount, which was retroactively recovered for days when they were not present in the danger pay location, based on manual actions taken by human resources partners. The new solution also provided monitoring reports to be used by human resources partners, whose work is now streamlined because they no longer need to manually record the days when danger pay should be recovered. In 2022, the component worked to prioritize and implement Umoja human resources enhancements, for example, with the new P.2 beneficiary workflow, which covers cases of rejected sick leave, and the further streamlining of annual operational activities such as the annual dependency review and the annual time statement.
- 29B.22 Progress towards the objective is presented in the performance measure below (see table 29B.2).

Table 29B.2
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	New danger pay solution streamlined work processes and reduced manual work for human resources partners in client entities, enabling them to perform higher level functions such as operational monitoring	A new P.2 beneficiary workflow and automated rejected sick leave workflow streamlined work processes and reduced the need for manual review by human resources partners in client entities

Planned results for 2024

Result 1: improved recruitment and administration of non-staff personnel

Programme performance in 2022 and target for 2024

- 29B.23 The component’s work contributed to clients managing non-staff personnel responsibly and efficiently with the help of five additional guides and specialized operational advisory support, and contributed to client entities experiencing improved and simplified non-staff processes for consultants, contractors and interns through streamlined recruitment workflows in Inspira and reduced manual processes, which met the planned targets.
- 29B.24 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29B.3).

Table 29B.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
<p>Clients have access to a dedicated compendium for the recruitment and administration of non-staff personnel</p> <p>Clients benefit from a dedicated focal point for the recruitment and administration of non-staff personnel and set the priorities for the work programme based on their needs</p>	<p>Clients that manage non-staff personnel have access to needs-based guidance packages</p> <p>Clients benefit from a dedicated community of practice that prioritizes their needs and leverages best practice</p>	<p>Clients manage non-staff personnel responsibly and efficiently with the help of five additional guides and specialized operational advisory support and guidance</p> <p>Client entities experience improved and simplified non-staff processes for consultants, contractors and interns</p>	<p>Client entities experience improved and simplified processes and systems for the recruitment and administration of non-staff personnel recruited as type II gratis personnel</p> <p>Client entities benefit from improved reporting and statistics on the use of non-staff personnel</p>	<p>75 per cent of client entities report improved business intelligence for decision-making and workforce planning</p>

Result 2: improved young professionals programme**Programme performance in 2022 and target for 2024**

- 29B.25 The component's work contributed to Member States and staff providing their feedback and suggestions on the young professionals programme as part of a comprehensive evaluation study of the programme, which met the planned target. The study highlighted a need for more targeted outreach to qualified young nationals of unrepresented and underrepresented Member States and for increasing the number of posts against which candidates could be placed with a view to rejuvenating the Organization with young talent and improving the representation status of unrepresented and underrepresented Member States in the Secretariat.
- 29B.26 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29B.4).

Table 29B.4

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Member States have access to a dedicated young professionals programme information session/information package	At least 50 per cent of appointed young professionals candidates are from unrepresented/underrepresented countries Positive results obtained in relation to gender parity in the newly established rosters	Member States and staff contribute to the comprehensive evaluation study of the young professionals programme	Member States and candidates benefit from the implementation of improvements suggested in the study in areas such as talent outreach, the examination process, placements, reassignments and career support Stakeholders to benefit from improved communications and guidance	At least 55 per cent of appointed young professionals candidates are from unrepresented/underrepresented countries

Result 3: Secretariat entities engage in workforce planning and organizational design**Proposed programme plan for 2024**

- 29B.27 The component provides operational and advisory support to entities, including peace operations, in exercising their delegation of authority for human resources management and through the development of guidance and tools to support workforce planning and organizational design.

Lessons learned and planned change

- 29B.28 The lesson for the component was the need to enhance its client engagement to better understand the gaps in guidance to support entities in workforce planning and organizational design and develop guidance and tools to meet those needs. In applying the lesson, the component will proactively ensure continued client engagement, including through dedicated support to entities, increased use of data and increased events in the workforce planning and organizational design network, as well as by raising awareness among clients of the available services. The component will also gather regular feedback to improve and update guidance and tools that address clients' needs.

29B.29 Expected progress towards the objective is presented in the performance measure below (see table 29B.5).

Table 29B.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
<p>Clients have access to the workforce planning guide and organizational design inventory in order to plan and manage their human resources effectively</p>	<p>Clients have access to the workforce planning nationalization guide and learning opportunities through online workforce planning course</p> <p>Workforce planning and organizational design network established, with 45 client entities represented</p>	<p>Clients have access to overview of entry level positions to guide utilization of P-1 and P-2 and guidance on rejuvenation of the workforce</p> <p>Clients have increased opportunities to share best practices in the workforce planning and organizational design network, with 59 client entities represented</p>	<p>Clients have access to the workforce capabilities toolkit to be able to progressively incorporate the priority workforce capabilities (e.g., data analytics and management, digital transformation, and innovation)</p> <p>Clients have access to organizational design guide to decide how the entity should be structured and function in order to achieve its goals</p>	<p>Clients have access to dedicated workshops on the workforce capabilities in order to address their specific workforce needs</p>

Deliverables

29B.30 Table 29B.6 lists all deliverables of the component.

Table 29B.6
Subprogramme 1, component 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: advice and guidance in response to collaboration and service requests from Secretariat entities on all human resources issues, including escalation to the Department of Management Strategy, Policy and Compliance regarding authoritative policy interpretation, when necessary; non-staff administration and recruitment improvements; advice on attaining targets related to gender equality; talent programmes focused on field mission recruitment; examinations and tests, including the competitive examination for language positions for approximately 5,000 candidates, the young professionals programme for approximately 2,000 candidates, the Global General Service Test and the language proficiency examination for approximately 6,000 candidates; placement of approximately 60 young professionals programme roster candidates and reassignment of young professional staff members after their initial 2 years of service; approximately 40 centralized generic job openings across 23 job families to populate rosters; updated procedures and tools for the recruitment of national staff in field missions; guidance packages and sessions on workforce planning, organizational design and roster management to facilitate the human resources planning process for all Secretariat entities; tools in the Inspira talent management platform; change management initiatives for the implementation and adoption of business process functionalities in the recruitment module of the Inspira talent management system; and official status files in digital format for the efficient administration of peacekeeping personnel and towards a Secretariat-wide personnel records management system.

Component 2

Capacity development and operational training

Objective

- 29B.31 The objective, to which this component contributes, is to ensure that all Secretariat entities have the operational capacities necessary to effectively deliver on the mandates entrusted to them.

Strategy

- 29B.32 To contribute to the objective, the component will:
- (a) Develop and deliver diverse training and capacity development services in partnership with various offices of the Secretariat focused on operational needs, as well as enhance knowledge management and strengthen the effectiveness of operational capacities through support for standardization and process improvement initiatives, incorporating linguistically diverse delivery modalities, where possible;
 - (b) Develop and deliver training programmes on various operational areas, systems and processes, including governance improvement, administration, support areas and Umoja, with an emphasis on the eLearning mode of delivery and change management techniques, where deemed appropriate;
 - (c) Expand the range and content of training programmes and learning resources to improve multilingualism.
- 29B.33 The above-mentioned work is expected to result in:
- (a) Stronger organizational governance by senior leadership teams, as well as better trained and empowered staff to support operational decision-making, resource management and improvement in operational processes;
 - (b) Knowledge management and learning management platforms reaching the widest possible spectrum of day-to-day practitioners across the Secretariat, as well as the strengthening of awareness and competence with regard to resource stewardship and other operational responsibilities;
 - (c) Greater linguistic proficiency and diversity and improved communication capacities across the Secretariat in support of multilingualism.

Programme performance in 2022

African Union has access to training materials on drafting skills for its staff

- 29B.34 The component designed and developed a comprehensive drafting skills programme for staff of the African Union as part of the broader African Union-Department of Operational Support initiative for the knowledge expertise exchange programme, a long-standing strategic partnership for development. The programme was tailored to the needs of the African Union Peace Support Operations Division and was intended to enhance the correspondence and report writing skills of its staff. The curriculum was based on a learning needs analysis, with input from the African Union. Following the analysis, in the latter part of 2022 the component developed and handed over the following guidance materials: a reference manual for effective writing, which can be used as a stand-alone guide or in conjunction with tutor-led training; an annotated slide deck to present the guidelines during live training sessions; and the related training exercise booklet and facilitator's manual, the latter of which includes completely sequenced lesson plans and facilitation tips.
- 29B.35 Progress towards the objective is presented in the performance measure below (see table 29B.7).

Table 29B.7
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	The African Union has access to training materials, enabling the flexible organization of training sessions to improve the drafting skills of its staff

Planned results for 2024

Result 1: integration of Umoja training

Programme performance in 2022 and target for 2024

- 29B.36 The component’s work contributed to 138 human resource partners completing a newly developed Umoja certification training programme, as well as 59 certified unique learners, and a consequent reduction in user support requests in the human resources functional area to 1,803, which exceeded the planned target of 2,200 requests.
- 29B.37 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29B.I).

Figure 29B.I
Performance measure: number of human resources service requests in Umoja (annual)

Result 2: enhanced language and communication skills of United Nations personnel

Programme performance in 2022 and target for 2024

- 29B.38 The component’s work contributed to personnel of the United Nations and of permanent missions having access to language training on new topics, such as strategic writing skills for the United Nations and the use of gender-inclusive language, in line with United Nations Language Framework coverage, and contributed to the availability of a 10-hour self-paced train-the-trainer course, including a library of ready-to-use materials for language learning and assessment, which met the planned targets.
- 29B.39 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29B.8).

Table 29B.8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
New hybrid and online learning formats available	Variety of hybrid and online learning formats available to users	Staff and permanent mission personnel have access to training on new topics, such as strategic writing skills for the United Nations and webinars introducing the United Nations guidelines for gender-inclusive language use, in line with United Nations Language Framework coverage	Additional self-study and self-assessment tools available to all United Nations Secretariat staff, permanent mission personnel and eligible participants in language courses	Learning managers across the Secretariat have access to additional resources and tools, including language samples, to improve application and use of the United Nations Language Framework
Alignment of pre-existing courses on the 6 official United Nations languages with the United Nations Language Framework initiated	Partial alignment of pre-existing courses with the United Nations Language Framework	10-hour self-paced train-the-trainer course available for United Nations Language Framework users, including a library of ready-to-use materials for language learning and assessment		

Result 3: effective resource stewardship in the Secretariat

Proposed programme plan for 2024

29B.40 The component seeks to build and develop a suite of operational learning solutions in collaboration with clients, utilizing a blended approach of online, virtual and/or face-to-face training, to improve proficiency in the effective management of resources. The suite of courses in areas that include human resources, financial management, decision-making skills or delegation of authority target staff across various levels and functional areas, recognizing that resource stewardship is a collective responsibility requiring multiple training topics and objectives.

Lessons learned and planned change

29B.41 The lesson for the component was that improving capacity in resource stewardship responsibilities worked better when offered through a wide range of learning solutions that are tailored to various audiences, objectives, time scales and operational topics. In applying the lesson, the component will expand the types of learning solutions and topics covered under the suite of resource stewardship to enable a comprehensive learning programme for more effective resource management. Examples include finance business partnering, which develops the skills, knowledge and expertise required to operate effectively as a finance business partner in support of decision-making, and introduction to

grant management, focusing on improving the management of trust fund resources. Combining various learning solutions under a wider umbrella will also allow the component to have a more comprehensive understanding of clients’ needs and identify further learning opportunities.

29B.42 Expected progress towards the objective is presented in the performance measure below (see figure 29B.II).

Figure 29B.II

Performance measure: number of learning solutions on effective resource management available to client entities (cumulative)

Deliverables

29B.43 Table 29B.9 lists all deliverables of the component.

Table 29B.9

Subprogramme 1, component 2: deliverables for 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: in-person, online and blended capacity development programmes and initiatives; in-person and virtual governance improvement programme for approximately 16 senior leadership staff from 2 United Nations Secretariat entities; at least 6 learning products on inclusive communication in all 6 United Nations official languages, including instructor-led training and self-paced content for 500 beneficiaries, and illustrative samples (text, video and audio) to demonstrate language production at the various United Nations levels; instructor-led and self-paced language and communication training in all 6 official United Nations languages, including direct provision at United Nations Headquarters and other duty stations, with approximately 350 initiatives and additional promotion of comparable online language learning licences in 14 Secretariat entities; training on the use of updated and simplified enterprise system workflows and business process improvement; knowledge management products, guidance and best practices for more than 100 thematic areas to simplify and harmonize operational processes to 40,000 Secretariat staff members through the Knowledge Gateway; and embedded accessibility tools for persons with disabilities in the Knowledge Gateway.

Component 3 Health-care management and occupational safety and health

Objective

29B.44 The objective, to which this component contributes, is to ensure the health and well-being of the United Nations workforce.

Strategy

29B.45 To contribute to the objective, the component will:

- (a) Ensure standardized credentialing for United Nations health-care personnel and follow established mechanisms to ensure that health-care personnel with appropriate qualifications and skills are deployed to all field duty stations;
- (b) Implement health-care quality and patient safety standards at all United Nations health-care facilities above level 1+ and above by assessing the facilities, training medical personnel in health-care quality and patient safety standards, training medical officers (or other personnel, as appropriate) in assessment methodologies, and reviewing data from the hospital evaluation tool;
- (c) Promote a culture of safety at all level 1+ and above health-care facilities by implementing a clinical adverse event reporting system to support data collection for surveillance and the reporting of patient safety risks, adverse events and other indicators of harm at level 1+ and above facilities and by administering a culture of safety survey;
- (d) Develop and promote programmes and policies resulting from a disease surveillance system to develop evidence-based chronic disease prevention and health promotion programmes for implementation by United Nations medical services globally;
- (e) Implement the components of an occupational safety and health management system for Secretariat entities, including an incident reporting system and a monitoring and evaluation system, through support for an oversight body, the development of policy and standards, and training;
- (f) Modernize business processes, including for the collection of medical entitlements through the electronic medical record system, the improved capture of the cause of sickness absences and the integration of systems covering incidents, sickness, work-related medical evacuations and service-incurred compensation;
- (g) Undertake workplace and meeting risk assessments at United Nations Headquarters and other supported locations, where necessary, to identify hazards and implement mitigation strategies to prevent workplace illness and injury.

29B.46 The above-mentioned work is expected to result in:

- (a) A reduction in adverse events and preventable harm by enhancing the health and well-being of personnel, thereby contributing to reduced absenteeism and improved productivity in the workplace and resulting in a reduced financial impact on the Organization;
- (b) The continued mitigation of occupational health and safety risks;
- (c) The improved compliance of field and referral hospitals with United Nations health-care quality and patient safety standards that meet the needs of United Nations health-care professionals and staff.

Programme performance in 2022

Field medical personnel at the United Nations Interim Force in Lebanon have access to training on emergency blood transfusion

29B.47 United Nations field medical personnel provide critical support, often in complex contexts, to ensure the well-being of United Nations personnel who deliver on their mandates around the world. The component provides training to update and upgrade the professional skills of the field medical personnel, with the aim of ensuring appropriately trained medical and health personnel in every United Nations duty station. In 2022, the component developed and conducted a pilot emergency hemotherapy course at the United Nations Interim Force in Lebanon, in which 60 civilian and

military health personnel participated in theoretical and practical training on emergency blood transfusion. The component also developed and disseminated guidelines for field medical personnel on blood transfusion and in the handling of fresh whole blood.

29B.48 Progress towards the objective is presented in the performance measure below (see figure 29B.III).

Figure 29B.III

Performance measure: number of field medical personnel who had access to training on emergency blood transfusion

Planned results for 2024

Result 1: occupational safety and health incident-reporting system linking workplace incidents with related health data

Programme performance in 2022 and target for 2024

29B.49 The component’s work contributed to the verification and completion of mitigation measures for 647 workplace incidents, related primarily to COVID-19 exposure in the workplace, which exceeded the planned target of 300 mitigation measures.

29B.50 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29B.IV).

Figure 29B.IV

Performance measure: number of actionable mitigation measures completed and verified (annual)

Result 2: health-care quality and patient safety standards implemented in health-care facilities above level 1+ and above in field missions for enhanced patient safety

Programme performance in 2022 and target for 2024

29B.51 The component’s work contributed to increased knowledge of medical personnel on health-care quality and patient safety, with 33 hospital commanders and other medical personnel in peacekeeping health facilities certified in health-care quality and patient safety standards, which exceeded the planned target of 16; 7 medical personnel trained and certified as assessors, which did not meet the planned target of 10; and 94 per cent of trained level 1+ and above health facility practitioners becoming certified, which exceeded the planned target of 80 per cent. The planned target of 10 medical personnel certified as assessors was not met because some medical officers did not pass the certification assessment. The component will provide further training towards their certification in the next round of assessments .

29B.52 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29B.V).

Figure 29B.V

Performance measure: increased knowledge of medical personnel, hospital commanders and level 1+ and above health facility practitioners of health-care quality and patient safety^a (annual)

^a The performance measure has been updated to reflect annual figures for all categories of medical personnel and to include the number of other medical personnel in peacekeeping health facilities certified, in addition to the number of hospital commanders.

Result 3: a safe and healthy environment for female civilian and uniformed personnel in peace operations

Proposed programme plan for 2024

29B.53 The component supports field medical personnel, including in peace operations, by providing training and certification on a broad range of medical services. As a result of the combined efforts of troop- and police-contributing countries and the Secretariat, there has been an increase in the representation of female civilian and uniformed staff in peace operations.

Lessons learned and planned change

29B.54 The lesson for the component, based on field medical capability surveys and needs assessments, was the need to improve women’s health services in peace operations. In applying the lesson, the subprogramme will develop an online women’s health training course to enable field medical personnel to provide gender-sensitive medical services and address gaps in women’s health services. The course will consist of 10 modules covering topics that include gender-sensitive medical history taking and examination, screening for cancers that affect women, and prenatal and post-partum care, among others. Through these efforts and by engaging chief medical officers, force medical officers and health managers, the component will contribute to fostering a safe and healthy environment for female civilian and uniformed personnel in peace operations.

29B.55 Expected progress towards the objective is presented in the performance measure below (see figure 29B.VI).

Figure 29B.VI

Performance measure: number of field medical personnel who have access to training on women’s health and who report improved knowledge and capabilities for gender-sensitive services (annual)

Deliverables

29B.56 Table 29B.10 lists all deliverables of the component.

Table 29B.10

Subprogramme 1, component 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Health-care management and occupational safety and health: credentialing process for health-care personnel in compliance with the guidelines for technical clearances and the technical skills framework; psychosocial services, including mental health services; medical clearance of 4,000 personnel for recruitment and travel and immunizations of 3,000 personnel annually; guidance on global occupational health and safety services; audit reports on incident investigations performed by duty stations within the field safety programme; occupational health and safety policy and standards; specialist workplace accommodation reviews; field health support plans for field duty stations and field missions, upon request; assessment of field hospitals for compliance with health-care quality and patient safety standards, and training medical personnel on those standards; clinical audits of field health-care facilities; patient experience surveys; weekly webinars for medical personnel and online courses on women’s health and emergency hemotherapy; training on occupational health and safety issues and on medical entitlement for field health case managers; guidance for public health emergencies; and assessments on emergency preparedness, including for mass casualty events.

Subprogramme 2 Supply chain management

Component 1 Integrated supply chain management

Objective

- 29B.57 The objective, to which this component contributes, is to ensure the availability of the right goods and services at the right place, the right time and the right costs for effective and efficient mandate implementation by United Nations Secretariat client entities.

Strategy

- 29B.58 To contribute to the objective, the component will:
- (a) Develop a longer-term strategy that better aligns the Secretariat's end-to-end supply chain with the 2030 Agenda for Sustainable Development and expand the supply chain planning horizon to cover five years in support of the strategy;
 - (b) Identify and ensure the availability of appropriate sourcing options and solutions, such as global and regional systems contracts, local procurement, letters of assist and memorandums of understanding, or the leveraging of existing stock, integrating practices that are client-centric, effective, innovative, responsible, efficient and gender-sensitive;
 - (c) Intensify outreach efforts, including through targeted outreach to Member States and the enhanced use of business seminars, in particular for women-owned businesses, persons with disabilities and vendors from developing countries and countries with economies in transition;
 - (d) Maintain and update the list of strategic goods and services sourced through Headquarters to improve risk management in procurement, economies of scale and standardization;
 - (e) Support all entities with the timely and effective sourcing and delivery of goods and services, including the fulfilment of unforeseen requirements, such as life-saving drugs, blood and blood-related products.
- 29B.59 The above-mentioned work is expected to result in:
- (a) The availability of the right goods and services at the right time, while taking into consideration their whole-life cost;
 - (b) Client entities gaining access to appropriate, effective and efficient sourcing and delivery solutions to deliver on their mandates;
 - (c) A more diversified vendor roster for various categories of goods and services, facilitating more inclusive and effective international competition;
 - (d) The availability of an adequate supply of vaccines, medical equipment and supplies, and transportation services to support the activities of clients.

Programme performance in 2022

Continued operations at the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic, notwithstanding fuel shortages

- 29B.60 The component supports client entities through strategic guidance, technical expert advice, sourcing solutions through turnkey contracts for the supply and delivery of fuel, and the facilitation of contract management. In April 2022, the regional fuel contractor supplying the United Nations Multidimensional

Integrated Stabilization Mission in the Central African Republic faced limitations with the amount of fuel that the contractor could source using its credit lines, in the wake of global price increases, and it ultimately could not source and deliver fuel to the Mission. The situation was further aggravated by the regional shortage of fuel caused by extended delays in shipping through maritime supply routes to West Africa. The regional shortage reached its peak in May 2022, concurrently with the time by which the Mission expected to exhaust its fuel reserves. To mitigate the risk, the component took an immediate response in cooperation with the Mission to procure fuel from alternative sources and ensure business continuity. The measures included the issuance of guidance to all missions to minimize fuel consumption, for the immediate and short term, engaging fuel vendors operating in the region and sourcing and transporting fuel from other countries in the region. At the same time, in the longer term, the component ensured that a new contract was established effective July 2022.

29B.61 Progress towards the objective is presented in the performance measure below (see table 29B.11).

Table 29B.11
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic able to continue operations and implement its mandates, notwithstanding fuel shortages in the region

Planned results for 2024

Result 1: automation and modernization of the supply chain

Programme performance in 2022 and target for 2024

29B.62 The component’s work contributed to the availability of processes for emergency procurement and solicitation timelines for requests for quotations of 42 days, which exceeded the planned target of 52 days.

29B.63 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29B.VII).

Figure 29B.VII
Performance measure: solicitation timelines for requests for quotations (annual)

(Number of days)

Result 2: enhanced competition in United Nations procurement through a focus on vendors from developing countries and countries with economies in transition

Programme performance in 2022 and target for 2024

- 29B.64 The component's work contributed to increased awareness among vendors, in particular from developing countries and countries with economies in transition, regarding options for collaboration on procurement with the United Nations, through intensified outreach efforts, multilingual vendor registration and targeted outreach to vendors living with a disability and women-owned businesses, which met the planned target.
- 29B.65 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29B.12).

Table 29B.12

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	The awareness of vendors from developing countries and countries with economies in transition is increased regarding options for collaboration on procurement with the United Nations	Increased awareness of vendors, in particular vendors from developing countries and countries with economies in transition, regarding options for collaboration on procurement with the United Nations, through intensified outreach efforts, multilingual vendor registration and targeted outreach to vendors living with a disability and women-owned businesses	The awareness of vendors from developing countries and countries with economies in transition is increased regarding options for collaboration on procurement with the United Nations, including through multilingual vendor registration and training on how to do business with the Organization	5 per cent increase in the proportion of businesses from developing countries and countries with economies in transition invited to submit bids, proposals or quotations

Result 3: reduced environmental footprint through effective supply chain management

Proposed programme plan for 2024

- 29B.66 The component provides an agile, accountable and cost-effective supply chain to enable client entities' mandate delivery, through the provision of fit-for-purpose sourcing solutions, technical guidance and training. The component negotiated systems contracts that enable client entities to reduce their environmental footprint.

Lessons learned and planned change

- 29B.67 The lesson for the component was that a broad, multifaceted approach that is intended to address multiple areas to reduce the environmental footprint of United Nations operations may preclude steadier and more immediate progress. In applying the lesson, the component will adopt a phased approach with targeted efforts on specific facets that progressively reduce the environmental

footprint of the United Nations. The component will roll out sourcing solutions that enable United Nations entities to procure renewable energy on a turnkey basis. It will also provide guidance on incorporating circular supply chain practices and models across all categories.

29B.68 Expected progress towards the objective is presented in the performance measure below (see table 29B.13).

Table 29B.13
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Client entities have access to 3 system contracts on energy efficiency, 2 system contracts on water and wastewater treatment and 1 system contract on waste management	Client entities have access to an additional 5 system contracts on waste management and 4 contracts on waste and wastewater treatment	Peacekeeping missions have access to guidance on improved fuel utilization	Client entities have access to turnkey renewable energy solutions	Client entities have access to 3 system contracts for hybrid vehicles, solar surface electric pumps and solar submersible deep well pumps

Deliverables

29B.69 Table 29B.14 lists all deliverables of the component.

Table 29B.14
Subprogramme 2, component 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	–	–	1	–
1. Report of the Secretary-General on supply chain activities to the General Assembly (biennial report)	–	–	1	–
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	46	58	33	54
2. Seminars on how to do business with the United Nations for suppliers from developing countries and countries with economies in transition	46	58	33	54
C. Substantive deliverables				
Consultation, advice and advocacy: advice on 100 local procurement authority requests from client entities.				
D. Communication deliverables				
Outreach programmes, special events and information materials: briefings for 6 international partners, including Member States, on functional arrangements within areas of logistical cooperation in all field missions, system-wide cooperation on business operation projects and procurement cases with the United Nations entities procurement network; and outreach to vendors.				
Digital platforms and multimedia content: e-catalogue for all goods and services; supply chain performance management framework; business intelligence reports for all functions in the Secretariat-wide supply chain, including on supply chain performance; dedicated virtual space to encourage innovation and excellence in supply chain management; and annual update of Secretariat procurement statistics.				

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

E. Enabling deliverables

Administration: advisory services on procurement matters for 44 client entities, including on optimal acquisition plans, sourcing solutions, systems contracts, procurement modalities and other supply chain matters; category management and planning for the end-to-end supply chain, including through the issuance of standard operating procedures, online sourcing support service community of practice and category-specific communities of practice, such as fuel and rations; system contracts; Umoja supply chain planning tool; annual supply chain plan and strategic sourcing; operationalized mutual recognition, in line with the promulgated supply chain operational guidance on cooperation with United Nations organizations; collaborative contracts, such as for a fleet management vehicle-tracking system; 100 global systems contracts, 30 turnkey contracts, air transportation service contracts and other contracts; vendor registration documents in the 6 official United Nations languages; deployment and rotation cycles and solutions sourced for uniformed personnel and associated cargo by air, naval and ground transport modalities; strategic level support within the logistics specialist areas; system-wide aviation regulatory framework; guidance on aviation safety, including that related to air service vendors; operational guidance, manuals and best practices on supply chain management; e-tendering platform; online contracts catalogue for global, regional and local system and turnkey contracts; Umoja master data management and data quality measures; risk management for fuel and rations; electronic fuel management system data quality improvement; and implementation and review of new sustainable supply chain technologies.

**Component 2
Uniformed capabilities support**

Objective

29B.70 The objective, to which this component contributes, is to ensure the efficient and effective functioning of the peace and security pillar of the United Nations.

Strategy

29B.71 To contribute to the objective, the component will:

- (a) Serve as the single point of contact for troop- and police-contributing countries on all administrative and logistical issues related to force generation, memorandums of understanding, contingent-owned equipment and reimbursement;
- (b) Support the periodic review by the General Assembly of the reimbursement framework associated with uniformed capabilities deployed in formed units, support the negotiation and finalization of memorandums of understanding with troop- and police-contributing countries, expeditiously process applicable reimbursements in line with the decisions of the Assembly and facilitate the strategic integration of relevant performance data related to deployed contingent-owned equipment;
- (c) Provide a streamlined reimbursement process involving an enhanced memorandum of understanding and payment processes;
- (d) Provide strategic and operational support and foster enhanced partnerships with troop- and police-contributing countries.

29B.72 The above-mentioned work is expected to result in:

- (a) Servicing of the General Assembly during the periodic review of the reimbursement framework for formed units and the implementation of all derivative guidance;
- (b) Streamlined and timely payments to troop- and police-contributing countries for uniformed personnel and contingent-owned equipment deployed in formed units, letter-of-assist reimbursements, death and disability claims and ad hoc claims;

- (c) Increased transparency and accountability of the reimbursement process and the real-time availability of data to Member States, Headquarters and field missions.

Programme performance in 2022

Periodic review of the reimbursement framework for formed units

- 29B.73 The General Assembly periodically reviews the standards and rates of reimbursement for uniformed personnel deployed in formed units. As established in Assembly resolution [67/261](#), the quadrennial survey informs this review of the standard rate of reimbursement. In line with the methodology required by the Assembly, the component established a sample of troop- and police-contributing countries that participated in the quadrennial survey. Following the development and administration of the data collection instrument, the component visited the participating sample of troop- and police-contributing countries to guide the submission of required data. The component consolidated the data submissions and prepared the report of the Secretary-General. This most recent report of the Secretary-General on the quadrennial survey ([A/76/676](#)) was considered by the Assembly in 2022. The Assembly, in its resolution [76/276](#), agreed to a new standard rate of reimbursement for uniformed personnel, which took effect on 1 July 2022. The Assembly, in its resolution [76/274](#), also revised the recreational leave allowance payable to contingent personnel in field missions.
- 29B.74 Progress towards the objective is presented in the performance measure below (see table 29B.15).

Table 29B.15
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
The General Assembly adopted the standards and rates of reimbursement for contingent-owned equipment on the basis of the 48 recommendations of the 2020 Working Group on Contingent-Owned Equipment	Survey on standard rate of reimbursement to uniformed personnel deployed in formed units received by the General Assembly	The General Assembly adopted a revised standard rate of reimbursement for uniformed personnel deployed in formed units and a revised recreational leave allowance

Planned results for 2024

Result 1: a sustainable and appropriate approach to post-traumatic stress disorder claims within the death and disability framework for uniformed personnel

Programme performance in 2022 and target for 2024

- 29B.75 The component’s work contributed to the General Assembly considering the comprehensive study on the reimbursement of post-traumatic stress disorder claims for closed field missions prepared by the component, which met the planned target. In its resolution [76/275](#), the Assembly adopted a pay-as-you-approach to compensation for adjudicated claims.
- 29B.76 The component’s work also contributed to the settlement of 538 death and disability claims, of which 343 were adjudicated post-traumatic stress disorder claims associated with closed field missions, which met the planned target.
- 29B.77 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29B.16).

Table 29B.16
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
In its resolution 74/280 , the General Assembly called for a comprehensive study on post-traumatic stress disorder	Post-traumatic stress disorder study and report of the Secretary-General based on data collection, interviews and a scientific literature review prepared by advisory board and submitted to General Assembly	The General Assembly, in its resolution 76/275 , adopted a pay-as-you-go approach to compensation for adjudicated claims	The General Assembly decides on the post-traumatic stress disorder framework	Adjudicated claims to be certified and disbursed in accordance with the decisions of the General Assembly
Advisory board on post-traumatic stress disorder claims established with Member States and subject matter experts		343 post-traumatic stress disorder claims associated with closed field missions settled		

Result 2: contingent-owned equipment policies, procedures, standards and definitions considered

Programme performance in 2022 and target for 2024

- 29B.78 The component’s work contributed to preparations for the 2023 meeting of the Working Group on Contingent-Owned Equipment, including the mandated pre-sessional meeting in November 2022 to support Member States in electing the Bureau and agreeing on the agenda for the 2023 meeting, which met the planned target.
- 29B.79 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29B.17).

Table 29B.17
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Standards and rates of reimbursement for contingent-owned equipment were updated through 48 recommendations of the 2020 Working Group on Contingent-Owned Equipment	Member States provided instructions on preparing issue papers and national cost data submissions	Pre-sessional bureau of the 2023 meeting of the Working Group on Contingent-Owned Equipment was convened	Standards and rates of reimbursement for contingent-owned equipment updated on the basis of the recommendations of the 2023 Working Group on Contingent-Owned Equipment	Implementation of the decisions of the General Assembly on the standards for and rates of reimbursement for contingent-owned equipment

Result 3: single point of contact in the areas of administrative, logistical and financial support for troop- and police-contributing countries for faster reimbursement

Proposed programme plan for 2024

- 29B.80 The component serves as the single point of contact within the Secretariat for troop- and police-contributing countries on administrative and logistical aspects related to force generation,

memorandums of understanding, contingent-owned equipment and reimbursement and has been working towards further streamlining timely payments to troop- and police contributing countries.

Lessons learned and planned change

29B.81 The lesson for the component was the importance of continued close coordination with Member States, Headquarters stakeholders and field missions regarding the reimbursement framework for formed units. In applying the lesson, the component will enhance coordination to further streamline timely payments to troop- and police-contributing countries and to strengthen its future support for the legislative review of the reimbursement framework for formed units.

29B.82 Expected progress towards the objective is presented in the performance measure below (see figure 29B.VIII).

Figure 29B.VIII

Performance measure: number of reimbursement claims (uniformed personnel and contingent-owned equipment) certified within the mandated three months following the end of the preceding quarter (annual)

Deliverables

29B.83 Table 29B.18 lists all deliverables of the component.

Table 29B.18

Subprogramme 2, component 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	2	–
Reports of the:

2. Secretary-General on the 2023 Working Group on Contingent-Owned Equipment	–	–	1	–
3. Secretary-General on the results of the survey to support the review of the standard rate of reimbursement to troop- and police-contributing countries	1	1	–	–
Substantive services for meetings (number of three-hour meetings)	5	5	5	5
4. Meeting of intergovernmental bodies, including the Fifth Committee and the Working Group on Contingent-Owned Equipment ^a	5	5	5	5

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	20	20	10	10
5. Training events on the various aspects of memorandums of understanding and contingent-owned equipment policies and procedures, as well as death and disability compensation claims (for Member States)	20	20	10	10

E. Enabling deliverables

Administration: reimbursement framework for formed units, including the quadrennial survey on standard uniformed personnel reimbursements, triennial meetings of the Working Group on Contingent-Owned Equipment and other decisions of the General Assembly; administration of the Member State portal; training for Secretariat entities and all field missions with formed units on the reimbursement framework; new and amended Statements of Unit Requirements, memorandums of understanding, letters of assist and agreements for military and police contingents deployed to field missions or pledged to the rapid deployment level of the Peacekeeping Capability Readiness System, and participation in advisory, predeployment, rapid deployment-level, contingent-owned equipment verification and other visits to troop- and police-contributing countries; reimbursements to military and police personnel and for contingent-owned equipment deployed to field missions on memorandums of understanding or letters of assist, including through the calculation of premiums, deductions and death and disability and post-traumatic stress disorder compensation; servicing of the Contingent-Owned Equipment/Memorandum of Understanding Management Review Board; comparative performance analysis and management decision reports.

^a Includes quarterly briefings to the Fifth Committee on the status of reimbursements, the legislative review of the report of the Secretary-General on the quadrennial survey, and the legislative review of the report of the 2023 Working Group on Contingent-Owned Equipment and the report of the Secretary-General on the 2023 Working Group on Contingent-Owned Equipment.

Subprogramme 3 Special activities

Objective

29B.84 The objective, to which this subprogramme contributes, is to ensure effective and efficient operational support responses by the Secretariat, including for unique and escalated requirements.

Strategy

29B.85 To contribute to the objective, the subprogramme will:

- (a) Facilitate the Secretariat’s operational support response to emerging situations and other unique and surge-level requirements, including through planning support and monitoring, shared situational awareness (early warning and escalated reporting), the provision of surge and specialized capacities, and the facilitation of coordinated efforts;
- (b) Facilitate a robust value-for-money and resource stewardship agenda to inform efficient, effective and responsive operational support functions across the Secretariat;
- (c) Coordinate and maintain bilateral and other multiparty relationships with key non-Secretariat partners in support operations;
- (d) Coordinate or provide specialized advice, development of service delivery relationships or formation of temporary teams, as required.

29B.86 The above-mentioned work is expected to result in:

- (a) Sustainable and responsive multidimensional support for operational response to escalated situations and unique requirements;
- (b) Mutually beneficial collaboration between Secretariat and non-Secretariat entities, including regional organizations, that is predictable and sustainable in addressing priority needs across Secretariat entities;

- (c) Measurable gains in efficiency and responsiveness across the Secretariat operational support architecture, including deepened cooperation in support operations with United Nations agencies, funds and programmes;
- (d) Secretariat entities having access to guidance on operational support resourcing priorities and standards that is responsive to evolving requirements.

Programme performance in 2022

Secretariat entities undertake critical crisis preparedness, planning and response in escalated situations

29B.87 During 2022, the subprogramme placed an increased focus on supporting responses to escalated situations and incidents facing the Secretariat, including the development of major support issues and action to maintain or restore disrupted operations or transition of Secretariat entities. The subprogramme provided support to the United Nations Integrated Office in Haiti in maintaining operations in the face of heightened security threats in Haiti; support to the resident coordinators in Haiti, Sri Lanka and Ukraine in developing contingency plans; planning and surge support to the Office for the Coordination of Humanitarian Affairs in its establishment of the Black Sea Grain Initiative and a new office in Mozambique; assistance to the United Nations Support Mission in Libya in its establishment of a mechanism to monitor implementation of the October 2020 ceasefire agreement; and surge support to assist activities of the International Atomic Energy Agency in Ukraine.

29B.88 Progress towards the objective is presented in the performance measure below (see table 29B.19).

Table 29B.19
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Dedicated coordination arrangements established at Headquarters enable Secretariat entities to continue mandate implementation through the COVID-19 pandemic	Secretariat entities address escalated situations, with the support of rapidly deployed expertise through the newly established standing surge capacity mechanism	Secretariat entities maintain or restore disrupted operations and receive planning expertise and specialized support to address escalated situations

Planned results for 2024

Result 1: new and expanded field operations guided by mission support concepts

Programme performance in 2022 and target for 2024

- 29B.89 The subprogramme’s work contributed to 100 per cent of mission concepts fully meeting the minimum standards, which met the planned target.
- 29B.90 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29B.20).

Table 29B.20
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Mission support concepts applied in the establishment of special political missions in Haiti, the Sudan and Yemen	Systematic application of mission support concepts in all special situations	100 per cent of mission concepts fully met the minimum standards	Secretariat entities receive 50 weekly situational awareness reports on escalated situations affecting them to support the response for the restoration of disrupted operations Improved management of financial resources and risk mitigation by completing post-closure administrative liquidation for 80 per cent of field missions within 12 months of assumption of responsibility	At least 2 missions that are going through transitions and new field operations are enabled to scale up, maintain mandate delivery or manage closure of the entity within the organizational regulations and rules Information-sharing platform available, including as an early warning system for major operational support issues in peace operations or other Secretariat entities

Result 2: robust value-for-money and resource stewardship agenda to inform operational support functions across the Secretariat

Programme performance in 2022 and target for 2024

- 29B.91 The subprogramme’s work contributed to 75 per cent of Secretariat entities receiving enhanced, consistent and improved administrative support services through formal service provision agreements that include standard cost recovery and improved client service from regional and global service providers, which met the planned target.
- 29B.92 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29B.21).

Table 29B.21
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Secretariat entities receive some administrative support services in an ad hoc fashion from various global and regional service providers	75 per cent of Secretariat entities receiving enhanced, consistent and improved administrative support services through formal service provision agreements that include standard cost recovery and improved client service from regional and global service providers	90 per cent of Secretariat entities receive enhanced, consistent and improved administrative support services through formal service provision agreements that include standard cost recovery and improved client service from regional and global service providers	95 per cent of Secretariat entities receive enhanced, consistent and improved administrative support services through formal service provision agreements that include standard cost recovery and improved client service from regional and global service providers

Result 3: mutually beneficial collaboration in support operations through a support partnerships framework

Proposed programme plan for 2024

29B.93 The subprogramme fosters mutually beneficial collaboration in support operations, recognizing that collaboration in support requirements with regional organizations and other actors can provide a source of specialized or ready-made capabilities that are not more freely available to the Secretariat, facilitate needed interoperability in multi-party operations and deliver savings and a reduced footprint in facilitating economies of scale.

Lessons learned and planned change

29B.94 The lesson for the subprogramme was that partnerships in support capabilities are often pursued on an ad hoc basis, which can lead to a lack of awareness regarding the opportunities available across Secretariat entities. In applying the lesson, the subprogramme will facilitate an inclusive, consistent and active approach to establishing and drawing on partnership arrangements within the Department and across the Secretariat by promulgating a new support partnerships framework. This framework would generate significant opportunities for the Department to mobilize a more diverse network of partners, catalyse innovation and support its clients in delivering on its mandates with greater flexibility, scale and impact.

29B.95 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29B.22).

Table 29B.22
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Active engagement of the African Union in the development of a joint United Nations-African Union road map to renew the knowledge and expertise exchange programme Support implications for the proposed reconfiguration of African Union operations in Somalia reviewed by the African Union, the United Nations and other key partners to inform the Security Council’s consideration of a future direction	Secretariat entities have access to a central repository of information on operational support partnerships to address priority support requirements, including specialized and unique needs	United Nations Support Office in Somalia enabled to provide operational support to non-United Nations security forces in Somalia, in compliance with international human rights and humanitarian laws, and in line with the human rights due diligence policy Strengthened engagement of the African Union, European Union and other regional organizations, enabling mutual understanding and interoperability on operational support matters

Deliverables

29B.96 Table 29B.23 lists all deliverables of the subprogramme.

Table 29B.23
Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: 52 regular situational response and awareness reports, standardized procedures for escalated situations, and an emerging situation data management platform; deployments of surge and specialized support capacities within 10 days; administration of residual entity liquidation issues; support partnerships, including arrangements that addresses client priority needs; facilitation and guidance for at least 2 new collaboration initiatives between the Secretariat and United Nations agencies, funds and programmes; and guidance on operational support resourcing priorities and standards across the Secretariat.

Subprogramme 4 Administration, New York

Objective

- 29B.97 The objective, to which this subprogramme contributes, is to ensure a safe and fit-for-purpose physical environment at Headquarters and responsive facilities, as well as administrative, logistical, information and other services in support of the efficient functioning of the Organization and a public informed of the work of the United Nations.

Strategy

- 29B.98 To contribute to the objective, the subprogramme will:
- (a) Proactively maintain and operate the Headquarters buildings to achieve efficiencies, promote a modern workplace and preserve the property value of the campus, with an emphasis on reviewing building components completed more than 10 years ago and supporting efforts to improve accessibility for persons with disabilities and environmental sustainability;
 - (b) Adjust the long-term planning of office accommodation on a regular basis to support the needs of entities in New York, centred on implementing the recommendations from the mandated assessment of the real estate portfolio (see General Assembly resolution [75/253 C](#));
 - (c) Provide efficient, timely and cost-effective services to clients in New York in the areas of building management, office space, asset and official gift management, inventory and warehouse management, travel and transportation, mail and pouch services, event management, postal administration, catering and other commercial operations, placing a strategic focus on high levels of client satisfaction, realigning capacities to manage the additional workload in the travel area resulting from new host country requirements and improving visa and travel document system applications;
 - (d) Provide effective archives and records management services to Secretariat entities globally, with an emphasis on completing the transition to third-party storage of United Nations paper archives to vacate the Falchi Building at the end of 2024 and strengthening the subprogramme's capacity to manage the accelerated shift from paper to digital archives;
 - (e) Provide specialized human resources support in the areas of onboarding, separations and the processing of complex entitlements (including education grants, dependency allowances and rental subsidies) for the staff of all Headquarters-based United Nations entities and relevant field locations;
 - (f) Coordinate and manage commercial insurance policies to mitigate and transfer risk pertaining to property, terrorism and liability programmes, as well as the malicious acts insurance policy, for the Organization, including offices away from Headquarters and peacekeeping and special political missions; adjudicate claims emanated from these insurance programmes and obtain settlements from the insurers; and provide insurance advice for vendor, memorandum of understanding and pro bono contracts and agreements;
 - (g) Ensure accurate and timely disbursement of salaries and related allowances for all staff based in United Nations Headquarters and international staff in field missions, and all field staff from various entities administered by the Headquarters;
 - (h) Process other disbursements in respect of the financial obligations of the Organization and process the tax reimbursement claims of United States taxpayers;
 - (i) Provide postal, gift, archival and information services to the public in New York and globally to raise awareness of the past and current work of the United Nations.

- 29B.99 The above-mentioned work is expected to result in:
- (a) A highly functional, more inclusive and sustainable campus that symbolizes the ideals of the United Nations;
 - (b) High client satisfaction and cost-efficiency in the provision of services;
 - (c) Increased public awareness of the past and current work of the Organization.

Programme performance in 2022

Improved environmental sustainability of United Nations Headquarters facilities

29B.100 Since the renovation of the United Nations Headquarters complex under the capital master plan, the subprogramme has continually pursued opportunities to integrate environmental sustainability into its operations. Among the initiatives undertaken in 2022 to reduce and better manage utility consumption, the subprogramme completed a retrofit of close to 14,000 lighting fixtures in the Secretariat Building to allow for the installation of light emitting diode bulbs, reducing the electricity consumption of these fixtures by 60 per cent. In addition, it completed in large part the design to replace the lighting in the General Assembly Hall with code-compliant energy efficient fixtures, as well as the upgrade of the building management system, which will improve the management of heating, ventilation and air conditioning systems. Furthermore, the subprogramme continued its efforts to improve waste management with a new contract aimed at increasing the collection of compostable waste and recycling of other waste streams.

29B.101 Progress towards the objective is presented in the performance measure below (see figure 29B.IX).

Figure 29B.IX

Performance measure: electricity consumption of the retrofitted lighting fixtures in the Secretariat Building

(Megawatts/hour)

Planned results for 2024

Result 1: streamlined United Nations Secretariat archives management

Programme performance in 2022 and target for 2024

29B.102 The subprogramme’s work contributed to a reduction in the volume of physical records in the Falchi Building repository to 34,600 linear feet, which exceeded the planned target of 35,000 linear feet.

29B.103 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29B.X).

Figure 29B.X
Performance measure: volume of records at the Falchi Building
 (Linear feet)

Result 2: office space aligned with the needs of the Organization

Programme performance in 2022 and target for 2024

- 29B.104 The subprogramme’s work contributed to the alignment of United Nations Headquarters office space with the needs of the Organization by reassigning personnel from the DC1 Building into remaining buildings in preparation for vacating the lease in March 2023, which met the planned target.
- 29B.105 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29B.24).

Table 29B.24
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Flexible workplace project: two floors converted in the Secretariat Building. One floor in FF Building vacated	The General Assembly approved the Secretary-General’s recommendation to close out the flexible workplace project and re-evaluate future needs	Office space aligned with the current needs of the Organization by reassigning personnel from the DC1 Building into remaining buildings, mainly into flexible workplace in the Secretariat Building, in preparation for vacating the lease in March 2023	The General Assembly considers a strategic assessment of the real estate portfolio that would ensure the optimal alignment of the office space with the Organization’s evolving needs	Real estate portfolio further reduced and Falchi Building is vacated Plans to optimize the alignment of office space with evolving needs are finalized on the basis of the General Assembly’s recommendations on the strategic assessment of the real estate portfolio

Result 3: shorter wait time, improved accuracy of estimates and other improvements enabled by simpler and harmonized payroll and accounts payable processes

Proposed programme plan for 2024

29B.106 The subprogramme has been working to enhance service delivery in the administrative areas across the Secretariat, including by streamlining the process for the disbursements of all types of payments.

Lessons learned and planned change

29B.107 The lesson for the subprogramme, through its experience in collaborating across the Secretariat, was that there were variations in the end-to-end processes used by various service providers for payments, which could hinder workload-sharing across duty stations, create the potential for procedural mis-steps and lead to inaccuracies and/or delays in the disbursements of payments. In applying the lesson, the subprogramme will simplify and harmonize the processes for disbursements of payments for a consistent approach across all Secretariat entities. To do so, the subprogramme will automate processes related to payments to vendors and personnel. This will reduce not only the manual transactional work required of Secretariat service providers, allowing them to focus on more analytical work, but also the wait time for payments. The automation of processes, complemented by greater analysis by service providers, will increase the accuracy of client entities' calculations that rely on payroll data.

29B.108 Expected progress towards the objective is presented in the performance measure below (see table 29B.25).

Table 29B.25
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Average lead time of 7 working days for off-cycle payments to be processed for personnel at Headquarters	Average lead time of 7 working days for off-cycle payments to be processed for personnel at Headquarters	Average lead time of 1 working day for off-cycle payments to be processed for personnel at Headquarters	Average lead time of 1 working day for off-cycle payments to be processed for personnel at Headquarters and 3 other payroll offices	Average lead time of 1 working day for off-cycle payments to be processed for personnel at Headquarters and all payroll offices globally Improved accuracy of estimates of resource requirements by client entities based on full adherence to payroll processes. For example, the Office of Programme Planning, Finance and Budget more accurately estimates salary costs and the impact of vacancy rates

Deliverables

29B.109 Table 29B.26 lists all deliverables of the subprogramme.

Table 29B.26

Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

D. Communication deliverables

External and media relations: information and reception services to visitors, delegates and the general public, including responses to approximately 30,000 enquiries on the current and past work of the United Nations.

Library services: archives, records and information management services to all entities at United Nations Headquarters and field missions; guidance on recordkeeping for Secretariat entities; security-screened, catalogued, stored and preserved paper and digital records; and digitized legacy paper archives.

E. Enabling deliverables

Logistics: 1,703,000 square feet of owned and leased premises, facilities and assets, including gifts, managed and maintained; office accommodations provided for some 8,000 personnel; completion of approximately 12,000 service requests for facilities and commercial services; conferences and special events logistics; warehousing and transportation services; approximately 30,000 travel requests and travel documents, lump-sum calculations and host country registrations processed; airline agreements; mail services; and processing of approximately 700,000 postal, courier and diplomatic pouch shipment and messenger services.

Administration: administrative support services, including specialized human resources support in the areas of onboarding and the processing of complex entitlements, dependency benefits and rental subsidies for approximately 8,250 staff of all Headquarters-based United Nations entities and relevant field locations; transactions and claims for 6,600 staff members in the area of tax reimbursement; management of 18 commercial insurance programmes covering \$2.68 billion in assets under the global property and terrorism insurance policies, 180,000 personnel under the malicious acts policy and 30,000 vehicles of diverse types under the worldwide auto policy, including the adjudication of related claims; insurance advice and review of certificates of insurance for 150 contracts and agreements; payroll for 26,000 staff and retirees, including assignment and separation payments; pension schedules for all entities at United Nations Headquarters and offices away from Headquarters; troop- and contingent-owned equipment reimbursements; payments to vendors, consultants and individual contractors; annual declaration exercise; annual rental subsidy monitoring exercise; and management of insurance policies.

B. Proposed post and non-post resource requirements for 2024

Overview

29B.110 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 29B.27 to 29B.29.

Table 29B.27

Overall: evolution of financial resources by object of expenditure

29B.111 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 29B.30 to 29B.32 and figure 29B.XI.

29B.112 As reflected in tables 29B.30 (1) and 29B.31 (1), the overall resources proposed for 2024 amount to \$96,347,900 before recosting, reflecting a net decrease of \$530,100 (or 0.5 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29B.113 As reflected in table 29B.30 (1), resource changes reflect a net increase of \$83,200 as follows:

- (a) **Subprogramme 1, component 1, Human resources support.** The increase of \$43,400 reflects the higher provision at continuing vacancy rates for one post of Data Engineering Assistant (General Service (Principal level)) reassigned in 2023 pursuant to General Assembly resolution [77/262](#), which was subject to a 50 per cent vacancy rate;
- (b) **Subprogramme 4, Administration.** The increase of \$39,800 reflects the net effect of:
 - (i) An increase of \$73,500 relating to the higher provision at continuing vacancy rates for one post of Property Management Officer (P-3) established in 2023 pursuant to General Assembly resolution [77/262](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice;
 - (ii) A decrease of \$33,700 under other staff costs (\$4,200) and furniture and equipment (\$29,500) relating to the removal of non-recurrent provisions in respect of new and expanded mandates approved for 2023 pursuant to General Assembly resolutions [76/306](#) and [77/248](#) in support of the establishment of the United Nations Youth Office and the resumed fifth session of the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction, respectively.

New and expanded mandates

29B.114 As reflected in table 29B.30 (1), resource changes reflect an increase of \$866,200 under subprogramme 4, Administration. The increase of \$866,200 under general operating expenses reflects a non-recurrent provision for office space alterations for 61 posts proposed for establishment under section 9, Economic and social affairs (7 posts), and section 28, Global communications (54 posts) (see [A/78/6 \(Sect. 9\)](#) and [A/78/6 \(Sect. 28\)](#) for additional details).

Other changes

29B.115 As reflected in table 29B.30 (1), resource changes reflect a net reduction of \$1,479,500. The breakdown of changes is as follows:

- (a) **Executive direction and management.** The increase of \$86,800 under posts reflects the proposed cost-neutral redeployment and reassignment of one post of Mail Assistant (General Service (Other level)) from the Facilities and Commercial Activities Service under subprogramme 4 to the Office of the Under-Secretary General as a Programme Management Assistant, as explained in annex III;
- (b) **Subprogramme 2, component 1, Integrated supply chain.** The increase of \$94,600 reflects:
 - (i) An increase of \$32,000 under consultants relating to additional non-recurrent requirements for consultancy services for the expansion of the contract performance rating tool and instant feedback system to all Secretariat entities, including offices away from Headquarters and the regional commissions;
 - (ii) An increase of \$62,600 under contractual services related to additional requirements for SAP business technology platform subscription fees and support to allow vendors from more countries to respond to solicitations;
- (c) **Subprogramme 3, Special activities.** The net increase of \$51,800 under non-posts includes the following:

An increase of \$58,900 under travel of staff for trips related to oversight of the Secretariat's participation in the United Nations Sustainable Development Group common back-office project, and for the follow-up and after-action reviews related to special political missions and engagement with resident coordinator offices, offset in part by a decrease of \$7,100 under consultants due to a reduced number of consultants needed

for the development of the online self-paced advanced personal preparedness and financial readiness training;

- (d) **Subprogramme 4, Administration, New York.** The net decrease of \$1,848,000 includes:
- (i) A decrease of \$331,800 under posts due to the following:
 - a. The proposed abolition of four posts of Mail Assistant (General Service (Other level)) in the Division of Administration (\$347,200) and the outward redeployment of one post of Mail Assistant (General Service (Other level)) to the Office of the Under-Secretary-General under executive direction and management (\$86,800), offset in part by the proposed establishment of one post of Information Management Officer/Digital Archivist (P-3) (\$102,200), as explained in annex III;
 - b. A cost-neutral reassignment of one post of Mail Assistant (General Service (Other level)) as Information Management Assistant within the subprogramme to support the digital transformation of the United Nations, as explained in annex III;
 - (ii) A decrease of \$68,000 under other staff costs relating to the continuation of one general temporary assistance position of Project Manager (P-3) for 8 months instead of 12 months to complete the project to vacate the archive repository in the Falchi Building;
 - (iii) An increase of \$185,000 under contractual services reflecting additional requirements in support of the processing and archiving of physical records from the Special Tribunal for Lebanon following its closure (\$45,000), and the upgrading of the electronic United Nations laissez-passer programme in line with evolving ePassport cryptographic and information security standards (\$140,000);
 - (iv) A decrease of \$1,783,200 under general operating expenses reflecting:
 - a. A decrease of \$1,868,400 resulting from a reduction in rental obligations through a realignment of the Headquarters real-estate portfolio; reduced electricity consumption from energy efficiency initiatives, including the light emitting diode (LED) retrofit of the Secretariat building at United Nations Headquarters; lower usage of cleaning and sanitary supplies complex-wide; decreased postage and pouch-related costs due to a gradual decline in volumes; and reduced requirements for complex-wide maintenance services based on current contract terms;
 - b. An increase of \$85,200 relating to a non-recurrent provision for office space alterations for six posts proposed for establishment under section 10, Least developed countries, landlocked developing countries and small island developing States (see [A/78/6 \(Sect. 10\)](#) for additional details);
 - (v) An increase of \$150,000 under furniture and equipment reflecting additional requirements for: (a) parts and equipment for building maintenance due to the aging of the infrastructure on the Secretariat campus (\$90,000); and (b) the replacement of vehicles that have reached the end of their useful life and are no longer serviceable (\$60,000);
- (e) **Programme support.** The increase of \$135,300 relates to the proposed establishment of one post of Senior Finance and Budget Officer (P-5) in the Headquarters Client Support Service, as explained in annex III.

Other assessed

- 29B.116 As reflected in tables 29B.30 (2) and 29B.31 (2), other assessed resources under the support account for peacekeeping operations are estimated at \$119,746,500. The resources would be used mainly to support the delivery of reliable, consistent and sustainable field support results globally. The expected increase of \$6,762,000 is attributable mainly to the net increase of 16 posts, including posts transferred from the Department of Management Strategy, Policy and Compliance and the

peacekeeping cost-recovery fund, updated salary costs and reduced vacancy rates applied in 2024 for both Professional and General Service categories of staff, and increased facility and information and communications technology standard costs related to staffing changes, offset in part by a reduction in resources due to the exclusion of resources for the triennial Working Group on Contingent-Owned Equipment in 2023, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).

Extrabudgetary resources

- 29B.117 As reflected in tables 29B.30 (3) and 29B.31 (3), extrabudgetary resources amount to \$63,360,200. The resources would complement regular budget resources and would be used mainly to:
- (a) Strengthen capacities for renewable energy in peacekeeping operations;
 - (b) Provide support and services to agencies, funds and programmes in human resources, capacity development and health-care management in the following areas: language proficiency exams, language and communications programmes and the administration of special exams; and the facilitation of rostering and medical consultations, travel health advisories, immunizations and other medical administrative matters, such as medical clearances, sick leave certification and recommendations for medical evacuations/repatriations. Extrabudgetary resources support the client offices funded from extrabudgetary sources in the areas of facilities management and office space, travel and transportation and pouch and mail services, human resources services for processing separations, onboarding and complex entitlements, operational and transactional functions consisting of payroll, accounts payable and commercial insurance, and the processing of tax advances and settlements of federal and state taxes for United States citizens and residents employed by the United Nations and its agencies, funds and programmes;
 - (c) Support procurement actions in the areas of corporate support services for field and Headquarters operations and continuation of the project to implement gender-sensitive designs for infrastructure;
 - (d) Support the triangular partnership programme, a capacity-building model aimed at training uniformed personnel in the peacekeeping-enabling capacity through collaboration among Member States with expertise and resources, troop-contributing countries and the Secretariat.
- 29B.118 The expected decrease of \$8,283,100 is attributable mainly to the transfer of resources funded by the peacekeeping cost-recovery mechanism to the support account; the completion of several health-care-related projects; the expiration of the United Nations Development Programme (UNDP) portion of the pass-through leases of rental premises and the revision of standard facility costs; and a reduction in resources to support the post-traumatic stress disorder framework, which is expected to be completed in 2023, offset in part by an increase due to a return to a full calendar year of training activities after a reassessment exercise in 2023.

Executive direction and management

- 29B.119 The executive direction and management component comprises the Offices of the Under-Secretary-General, the Assistant Secretary-General for Support Operations and the Assistant Secretary-General for Supply Chain Management.
- 29B.120 The overall responsibilities of the executive direction and management component include the following functions:
- (a) The overall direction, supervision and management of the Department in the implementation of its mandates and its approved programme of work, including co-chairing of the Management Client Board by the Under-Secretary-General, jointly with the Under-Secretary-General for Management Strategy, Policy and Compliance;

- (b) Provision of leadership and direction to support clients across the Secretariat through guidance and advisory services in their exercise of authorities for the successful implementation of mandates relating to human resources, health-care management and occupational health and safety, as well as capacity development and operational training;
- (c) Overall administration and management of all activities of the Office of Supply Chain Management and the provision of leadership and direction relating to the implementation and coordination of the organizational entities, which together form the Organization's integrated supply chain and uniformed capabilities support.
- 29B.121 In 2024, the activities and continuous efforts of the Department will be influenced by the mandates, feedback from clients and data. The Department will continually improve its effectiveness by using performance data analytics and strategic foresight to inform decision-making and reporting. It will embrace both innovative and proven technologies to provide services to staff and clients.
- 29B.122 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Department is mainstreaming environmental management practices into its operations through a variety of Secretariat-wide and facility management projects. The Department's long-term approach includes providing technical guidance and advisory support to peacekeeping operations to facilitate and implement the environment strategy for peace operations (2017–2023), environmental management of the United Nations campus and facilities, and environmental initiatives in the area of supply chain management. As the current environment strategy ends in June 2023, the Department is working in consultation with Member States to develop a "way forward", in line with the request of the General Assembly, in its resolution [76/274](#), to ensure continuity with the work done in environmental management.
- 29B.123 Information on timely submission of documentation and advance booking for air travel is reflected in table 29B.33.
- 29B.124 The Department will continue to take measures to improve its compliance rate by encouraging early engagement with relevant stakeholders. The majority of non-compliant travel in 2022 stemmed from external travellers. The Department will schedule meetings and training sessions earlier and emphasize the travel policy requirement to relevant external participants, such as meeting participants, trainers and trainees, and set deadlines for external participants to ensure that necessary personnel data are provided in a timely manner. For Department staff-related travel, non-compliance was affected by lingering complexities owing to the COVID-19 pandemic, travel to attend urgent meetings, late changes due to the security situation, changing travel schedules and/or late nominations of external travellers.

Table 29B.33

Compliance rate

(Percentage)

	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Actual 2022</i>	<i>Planned 2023</i>	<i>Planned 2024</i>
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	44	57	46	100	100

- 29B.125 The proposed regular budget resources for 2024 amount to \$1,931,100 and reflect an increase of \$86,800 compared with the appropriation for 2023. The proposed increase is explained in paragraph 29B.114 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29B.34 and figure 29B.XII.

Figure 29B.XII
Executive direction and management: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed

29B.126 Other assessed resources for this component amount to \$7,179,500 and would provide executive management support to the Under-Secretary-General, including with regard to strategic direction and through analytics and management governance, to help to drive continuous improvement of operational business processes within the Department and throughout the Secretariat; engage on audit response and boards of inquiry, performance and analytics, and environmental issues; and ensure that the Department is adequately configured to respond to operational support needs and priorities. The expected increase of \$444,700 is attributable mainly to updated staff costs.

Extrabudgetary resources

29B.127 Extrabudgetary resources for this component amount to \$972,100. The resources would complement regular budget resources and would be used mainly to strengthen operational resilience through renewable energy in United Nations peacekeeping missions and to build environmental technical capacity in peace operations. The expected decrease of \$99,000 is attributable mainly to activities and the funding mechanism of the United Nations System-Wide Task Force on Medical Evacuations in Response to COVID-19, which were planned through 31 March 2023, with no further activities planned beyond that date.

Programme of work**Subprogramme 1
Support operations****Component 1
Human resources support**

29B.128 The proposed regular budget resources for 2024 amount to \$3,495,100 and reflect an increase of \$43,400 compared with the appropriation for 2023. The proposed increase is explained in paragraph 29B.113 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29B.35 and figure 29B. XIII.

Figure 29B.XIII
Subprogramme 1, component 1: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed

29B.129 Other assessed resources for this component amount to \$16,125,400. The resources would be used mainly to strengthen the human resources management capacity of all Secretariat entities and provide consistent high-quality and timely advice on the proper exercise of human resources delegated authority to business partners across the Secretariat in support of the entity’s mandate through proactive client engagement and regular analysis of support requests received, with a view to communicating required policy changes to the Department of Management Strategy, Policy and Compliance based on client needs; to improve and facilitate efficiencies in various human resources processes through streamlining and simplification and the effective use of technology; to offer diverse and high-quality talent pools of candidates by managing rosters across all job families; and for Umoja business support resources. The expected increase of \$691,600 is attributable mainly to updated salary costs.

Extrabudgetary resources

29B.130 Extrabudgetary resources for this component amount to \$1,544,200. The resources would complement regular budget resources and would be used mainly to administer the language proficiency examination to staff members from the United Nations system, as well as support United Nations departments and entities in the development and delivery of the Global General Service Test, and support capacity development across the Secretariat by helping to maintain online assessment development training and associated resources for usage by hiring managers and recruiters; for Umoja business support resources; and to facilitate the rostering process to fill international vacancies through generic job openings as approved by the General Assembly. Resources are based on a proposed cost-sharing model between each peacekeeping mission and each special political mission that supports the expert panels, which are an integral part of the roster-based recruitment system. The expert panel assesses and recommends candidates who have applied against generic job openings for posts in field missions in order to reduce the administrative timeline on individual hiring managers and to enhance the quality and integrity of the recruitment process by centralizing the assessments. The expected reduction of \$195,900 is attributable mainly to the shift in donor priorities and the anticipated closure of projects.

Component 2 Capacity development and operational training

29B.131 The proposed regular budget resources for 2024 amount to \$6,325,500 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29B.36 and figure XIV.

Table 29B.36

Figure 29B.XIV

Subprogramme 1, component 2: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed

29B.132 Other assessed resources for this component amount to \$5,790,100. The resources would be used mainly for the expansion of cost-effective access to critical operational skills programmes; to support executive governance and the exercise of delegated authorities; to support the simplification of

operational processes through business process improvement training and through the process improvement advisory group, in coordination with process owners; and for Umoja business support resources. The component will continue to work in partnership with the Department of Peace Operations through posts embedded in the Policy, Evaluation and Training Division. The component will continue the implementation of the 2021–2025 Umoja learning strategy, in coordination with Umoja functional subgroups, to continuously strengthen administrative and support capacities in the Organization’s peacekeeping operations. In the area of knowledge management, the component will further enhance the Knowledge Gateway to support the development and dissemination of internal guidance related to administrative and operational support, in addition to capturing and sharing best operational support practices in multimedia formats. The component will also continue to broaden the linguistic diversity of United Nations personnel and commit to expanding the range and content of training programmes by leveraging existing in-house expertise. The expected increase of \$501,100 is attributable mainly to updated salary costs.

Extrabudgetary resources

29B.133 Extrabudgetary resources for this component amount to \$995,200. The resources would complement regular budget resources and would be used mainly for (a) the coordination and delivery of programmes aimed at the improvement of the organizational governance and stewardship of senior leaders charged with delegated authorities, further supported by a series of follow-up individualized advisory engagements to support the implementation of agreed action plans by the respective entity (delivery of the training programme is open to all Secretariat entities, whether at Headquarters locations, regional offices, peacekeeping missions or special political missions); (b) support for innovative projects related to promoting the usage of the United Nations Language Framework across the Secretariat through tools and practical applications; (c) support for language training needs in the six official languages of the United Nations, as well as communication training services for the Secretariat (the component plans to supplement the continuous development and facilitation of the types and scope of language courses in the six official languages); (d) enhancement of the exchange of information and best practices among field missions and between Headquarters and the field to maximize mutual learning and achieve operational excellence; (e) mentoring services in the context of the Human Resources Partner e-learning training; and (f) Umoja business support resources. The expected decrease of \$107,200 is attributable mainly to the discontinuation of one-time cost-recovery services and one-time investment in language programmes in 2023.

**Component 3
Health-care management and occupational safety and health**

29B.134 The proposed regular budget resources for 2024 amount to \$3,429,900 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29B.37 and figure XV.

Figure 29B.XV

Subprogramme 1, component 3: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed

29B.135 Other assessed resources for this component amount to \$3,660,100. The resources would be used mainly to continue to contribute to increased safety and health protection for United Nations personnel in peacekeeping operations. The component will continue to fully implement the medical performance framework, including through the implementation of standards for the quality of health care and for the qualifications for United Nations practitioners, as well as for hospital performance and medical evacuation capabilities. The component will start implementing the mental health support strategy for uniformed personnel and will continue to review compensation claims involving post-traumatic stress disorder coming from troop- and police-contributing countries. Using the incident reporting system developed by the component, missions have started collecting information for staff, and efforts are being undertaken to introduce a simplified trial version of the underlying health and safety records system in certain troop- and police-contributing countries for uniformed personnel. With the delegation of medical entitlement administration (e.g. sick leave and clearances), the component will also implement an auditing and review process to ensure high-quality implementation of those local services. The component will support medical workforce planning, including the development of specialized skills among medical personnel in peacekeeping operations, by offering online and hybrid courses in addition to in-person training. The expected increase of \$172,900 is attributable mainly to updated salary costs.

Extrabudgetary resources

29B.136 Extrabudgetary resources for this component amount to \$4,222,800. The resources would complement regular budget resources and would be used mainly (a) to provide support and services to agencies, funds and programmes in health-care management with regard to health advisories, immunizations and other medical administrative matters, such as medical clearances, sick leave certification and recommendations for medical evacuations and repatriations, as well as administration of long-term sick leave claims for the United Nations Joint Staff Pension Fund; (b) to provide support to users of the EarthMed electronic medical records system; (c) for administration of the United Nations Cares post-exposure prophylaxis kit programme; (d) to improve the safety and security of peacekeepers implementing various projects under the Action for Peacekeeping+ initiative, such as by improving medical services for uniformed personnel by evaluating the performance of peacekeeping hospitals in missions, training hospital commanders and health-care providers of troop- and police- contributing countries with regard to United Nations health-care quality and patient safety standards, and training civilian medical staff as United Nations assessors of such hospitals. The expected decrease of \$1,114,400 is due mainly to the completion of a number of projects under the Action for Peacekeeping+ initiative in 2023, including the implementation of health-care quality and patient safety standards for level 1+ hospitals, the development of an e-learning hemotherapy course and implementation of a public health surveillance system for four peacekeeping operations.

Subprogramme 2 Supply chain management

Component 1 Integrated supply chain management

29B.137 The proposed regular budget resources for 2024 amount to \$4,705,800 and reflect an increase of \$94,600 compared with the appropriation for 2023. The proposed increase is explained in paragraph 29B.115 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29B.38 and figure 29B.XVI.

Table 29B.38

Figure 29B.XVI
Subprogramme 2, component 1: distribution of proposed resources for 2024 (before recosting)
 (Number of posts/thousands of United States dollars)

Other assessed

29B.138 Other assessed resources for this component amount to \$37,910,500. The resources would be used mainly to continue to provide agile, cost-effective, timely and accountable supply chain operational solutions and support to all Secretariat entities, including peacekeeping operations. The expected increase of \$3,491,600 is attributable mainly to the following: the transfer from the peacekeeping cost-recovery fund to the support account of four posts that will form a central enabling capacity to provide operational sustainment for the Umoja foundation modules; the establishment of one post in support of handling increased demands related to the United Nations environmental objectives and policies, as well as supporting missions with sourcing solutions needed to achieve their targets in relation to the objectives of the United Nations Secretariat Climate Action Plan 2020–2030; updated salary costs; and other position-related costs.

Extrabudgetary resources

29B.139 Extrabudgetary resources for this component amount to \$2,827,500. The resources would complement regular budget resources and would be used mainly to support procurement actions in the area of corporate support services for field and Headquarters operations. The resources would also be used for a new strategy for unmanned aircraft systems and airborne intelligence, surveillance and reconnaissance, as well as for the continuation of an accommodation improvement project. The expected decrease of \$8,540,500 is attributable mainly to the regularization and transfer of four posts and two general temporary assistance positions from the peacekeeping cost-recovery fund to the support account and the discontinuation of the remaining 16 posts and related activities.

**Component 2
 Uniformed capabilities support**

29B.140 The proposed regular budget resources for 2024 amount to \$327,500 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29B.39 and figure XVII.

Subprogramme 2, component 2: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed

29B.141 Other assessed resources for this component are estimated at \$11,188,000. The resources would be used to support the component in serving as a single point of contact for all administrative and logistical issues pertaining to the deployment of troops and related reimbursement to Member States. The expected decrease of \$851,700 is attributable mainly to the exclusion of resources required for the meeting of the triennial Working Group on Contingent-Owned Equipment in 2023.

Subprogramme 3 Special activities

29B.142 The proposed regular budget resources for 2024 amount to \$1,212,900 and reflect an increase of \$51,800 compared with the appropriation for 2023. The proposed increase is explained in paragraph 29B.115 (c). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29B.40 and figure XVIII.

Table 29B.40
Subprogramme 3: evolution of financial and post resources

Figure 29B.XVIII
Subprogramme 3: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed

29B.143 Other assessed resources for this subprogramme amount to \$9,123,000 and would be used to facilitate support by the Secretariat in the operational response to unique and surge-level requirements, to increase engagement in support partnerships and to focus on continuous enhancement in the efficiency and responsiveness of operational support across peacekeeping operations. Specific requirements would be met through the coordination of input and other efforts,

the provision of specialized advice and the development of service delivery relationships, or the formation of temporary teams, as required, or the deployment of surge-level or specialized capacities. The expected increase of \$241,500 is attributable mainly to the updated salary costs.

Extrabudgetary resources

29B.144 Extrabudgetary resources for this subprogramme amount to \$8,554,100. The resources would complement regular budget resources and would be used mainly for the triangular partnership programme, including the implementation of on-site, hybrid and remote engineering and medical courses; the establishment of systems and business processes to improve programme deliverables to better target the requirements of peacekeeping missions and measure the outcome and impact of training; coordination with Secretariat and other partners on the enhanced targeting and alignment of triangular partnership programme activities; the development of training materials in French to increase multilingual training options; outreach to Member States to increase the number of women trainees and women peacekeepers; and outreach to Member States to expand the base of countries as donors and hosts of training and for content development. The expected increase of \$2,866,600 for 2024 is due mainly to the return to a full-year training calendar, given that no in-person training sessions were conducted in the first half of 2023 due to a programme-level reassessment exercise.

**Subprogramme 4
Administration, New York**

29B.145 The proposed regular budget resources for 2024 amount to \$73,003,100 and reflect a net decrease of \$942,000 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 29B.113 (b), 29B.114 and 29B.115 (d). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29B.41 and figure XIX.

Table 29B.41

Subprogramme 4: evolution of financial and post resources

Figure 29B.XIX
Subprogramme 4: distribution of proposed resources for 2024 (before recosting)
 (Number of posts/thousands of United States dollars)

Other assessed

29B.146 Other assessed resources for this subprogramme amount to \$26,475,900. The resources would be used mainly to provide office accommodations and other common services for support account-funded posts at Headquarters. Other assessed resources would also be used for travel, mail and pouch services and archiving and records management services for peacekeeping missions. The expected increase of \$1,969,700 is attributable mainly to the transfer of 11 posts from the Department of Management Strategy, Policy and Compliance (payroll, commercial insurance and accounts payable) to the Department of Operational Support, updated salary costs and updated standard facility costs for the overall support account.

Extrabudgetary resources

29B.147 Extrabudgetary resources for this subprogramme amount to \$43,672,100. The resources would complement regular budget resources and would be used mainly to support client offices funded from extrabudgetary sources, primarily in the areas of human resources management; operational and transactional support functions relating to payroll, accounts payable and commercial insurance; the processing of federal and state income taxes for all staff who are United States taxpayers; facilities management and office accommodations; and funds and programmes in the areas of travel, transportation and mail and pouch services, which are provided on a cost-recovery basis. Extrabudgetary resources are also received for the provision of special events and the coordination of cost-recovery activities for all non-calendar events at Headquarters, as well as for the installation and maintenance of gifts to the Organization. The expected decrease of \$844,900 reflects the net effect of (a) decreased requirements for the UNDP portion of pass-through lease costs and downward revision of the standard cost for office accommodations (with the expiration in March 2023 of United Nations Development Corporation leases, which are negotiated separately by UNDP and the Secretariat, the Organization will no longer receive income or pay for the UNDP portion of the lease in 2024); and (b) increased requirements for travel services post-pandemic.

Programme support

29B.148 The proposed regular budget resources for 2024 amount to \$1,917,000 and reflect an increase of \$135,300 compared with the appropriation for 2023. The proposed increase is explained in paragraph 29B.115 (e). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29B.42 and figure XX.

Programme support: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed

29B.149 Other assessed resources for this component amount to \$2,294,000. The resources would be used mainly to provide administrative support services in the areas of human resources, budget and finance, and general administration to the Department of Operational Support, the Office of

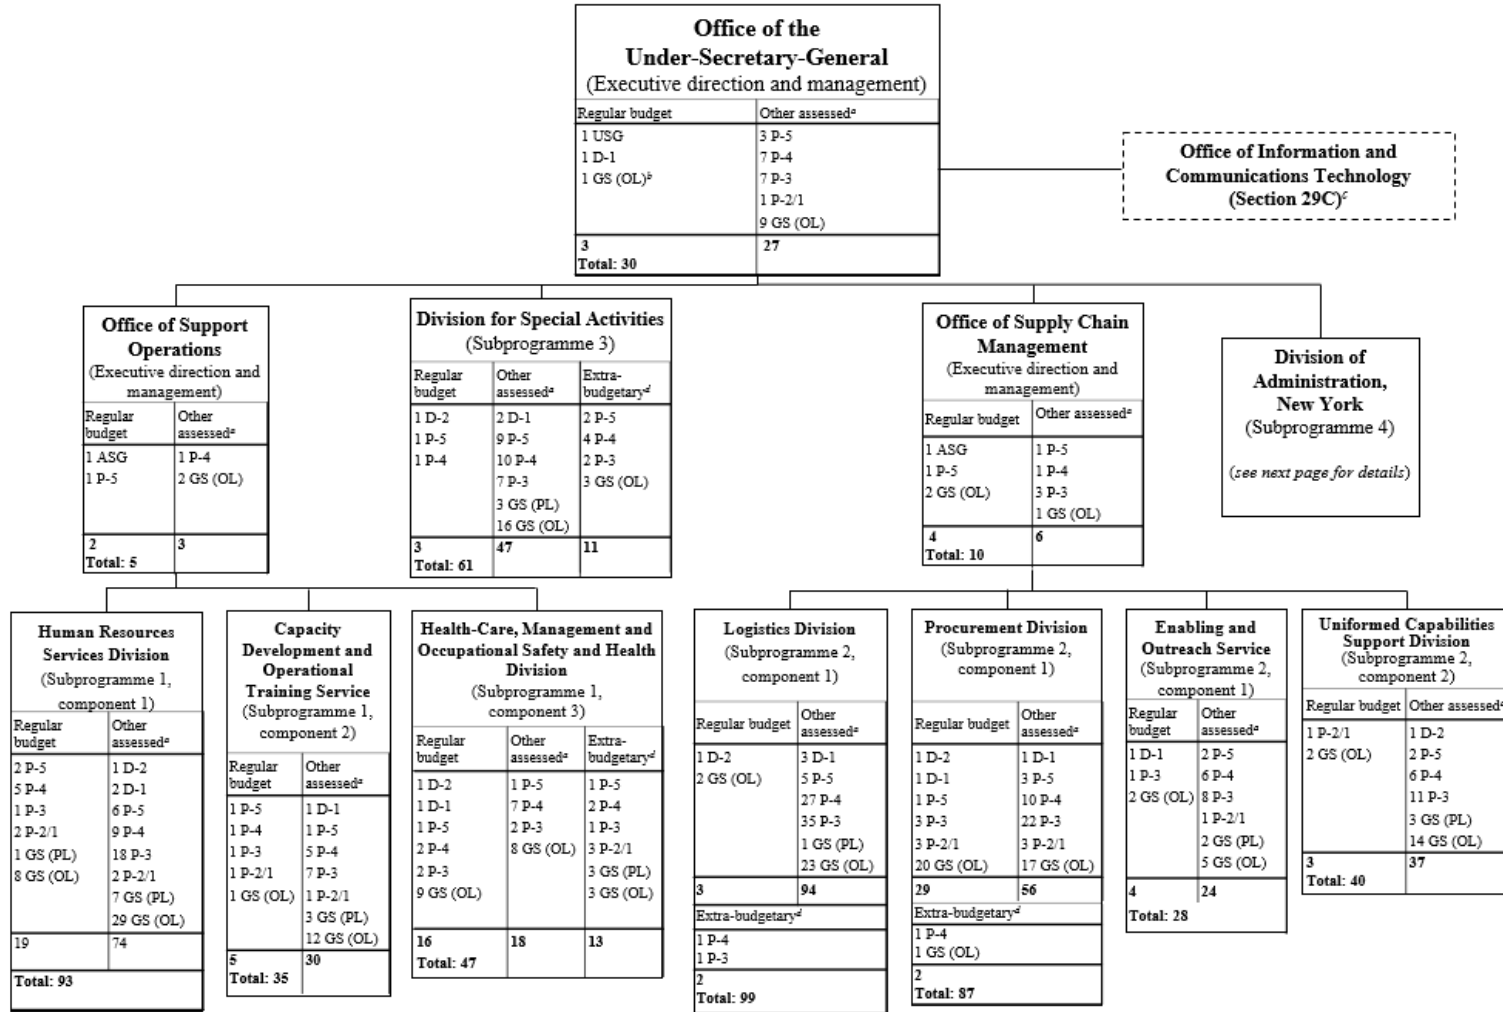

Information and Communications Technology and other entities in New York that do not have a dedicated executive office. The expected increase of \$100,600 from 2023 is attributable mainly to updated staff costs.

Extrabudgetary resources

- 29B.150 Extrabudgetary resources for this component amount to \$572,200. The resources would complement regular budget resources and would be used mainly to support client offices funded from extrabudgetary sources, primarily in the review and approval of memorandums of agreement, overall management of the contributions to ensure available funding for projects, and assistance in financial reporting to donors.

Annex I

Organizational structure and post distribution for 2024

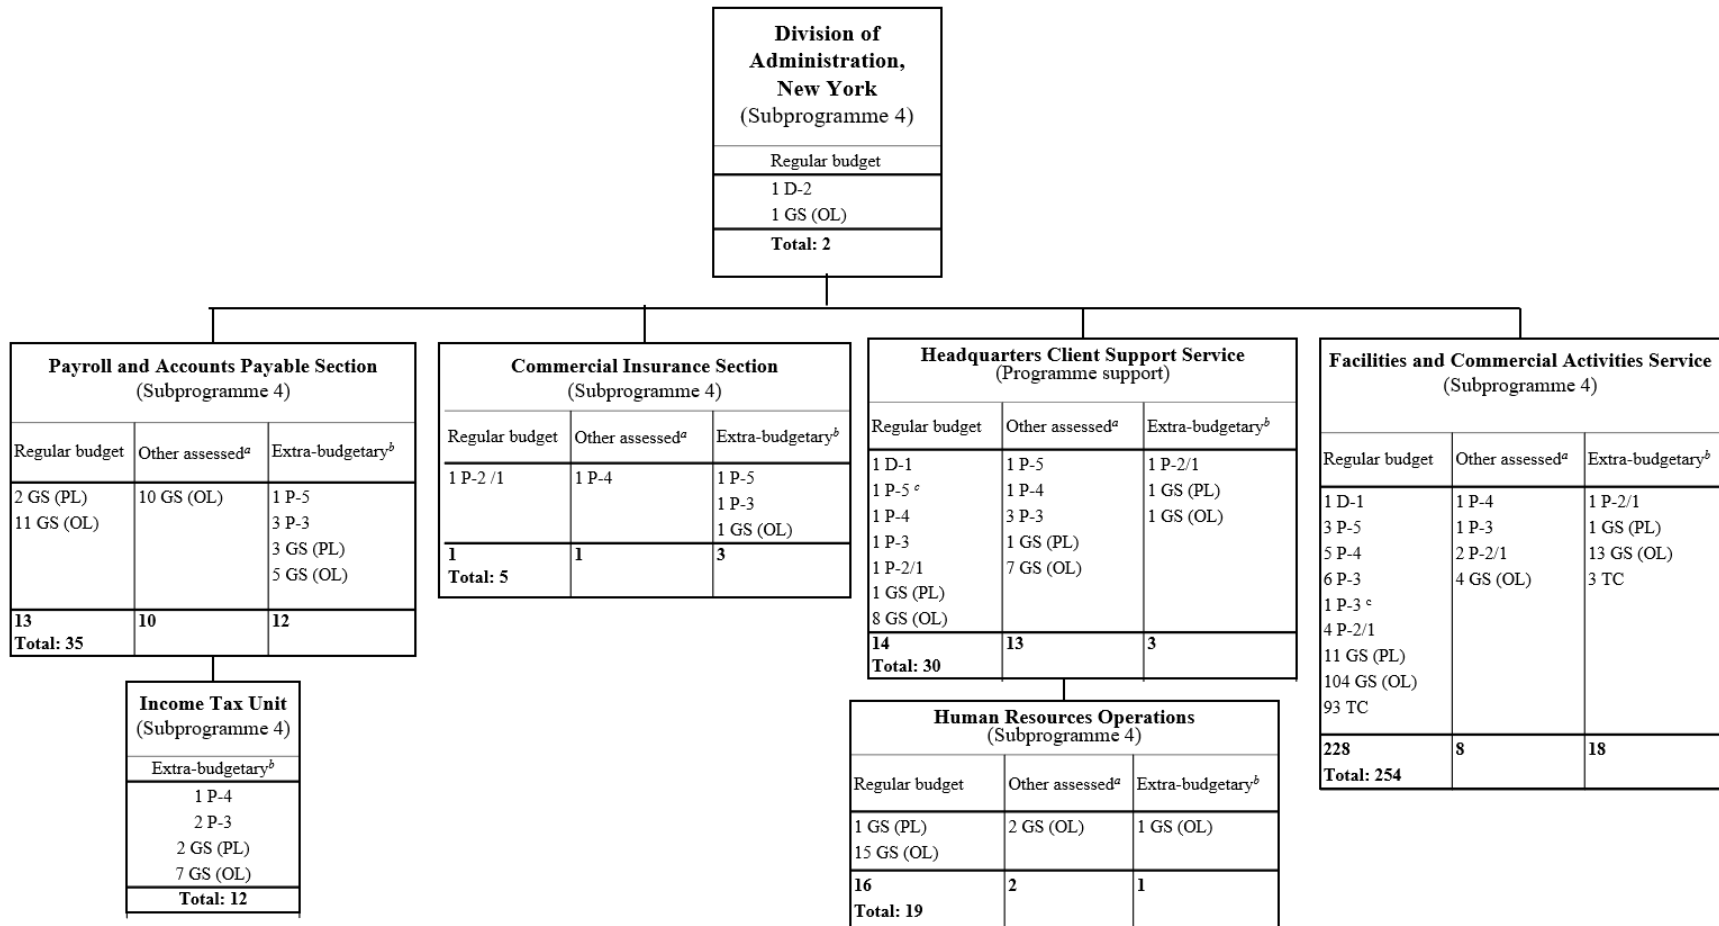

^a Other assessed resources are based on those proposed for the period 2023/24 (see A/77/771).

^b Redeployment of 1 GS (OL) from subprogramme 4 to executive direction and management.

^c Dual reporting to both the Under-Secretary-General for Management Strategy, Policy and Compliance and the Under-Secretary-General for Operational Support.

^d Extrabudgetary resources are based on the estimate for 2024.

Annex II

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/77/7)

The Advisory Committee trusts that updated information on the implications of the discontinuation of the DC-1 building lease, including on lease terms and any efficiency gains, will be provided at the time of its consideration of the present report and in the context of the next budget submission (para. VIII.46).

The Committee also looks forward to the review of the standard costing for office supplies and trusts that information thereon will be provided in the context of the next budget submission (para. VIII.47).

The vacating of the DC-1 building by Secretariat staff was completed on time, by 31 March 2023 at the expiration of the lease.

A new lease for the DC-2 building is still under final negotiation and the United Nations Development Corporation has agreed to extend the existing lease under the current terms until the new lease is in place.

Anticipated efficiencies in rental costs have been reflected in the 2024 proposed programme budget, where it has been noted that lease-related expenditure is funded from the regular budget, the support account for peacekeeping operations and extrabudgetary funds.

The forward-looking assessment of the workplace at Headquarters is being undertaken and the report of the Secretary-General will be presented to the General Assembly at the main part of its seventy-eighth session.

In consultation with the Office of Programme Planning, Finance and Budget, the Department conducted a review of the standard costing for office supplies within United Nations Headquarters in New York.

The Department of Operational Support has an office supply contract (the global contract) with a vendor, from which office supplies are procured by the Department and by departments and offices themselves directly, using the same contract. Supplies procured directly by departments and offices are financed through resources in their individual budgets. Those entities can also purchase office supplies outside the global contract, but these cannot be tracked. Thus, for purposes of the review, the Department considered only regular office supplies that had been purchased through the global contract that it managed for the 2018–2022 period and for all funds (regular budget, support account and extrabudgetary).

The analysis showed that, on average, expenditure on office supplies through the global contract decreased by approximately 37 per cent. This trend can be

	<p>attributed to the impact of flexible workplace, along with enterprise applications and the general digital transformation of the United Nations, as printing was centralized and filing space reduced. It is still unclear, however, whether the recent expenditure level fully reflects post-pandemic trends, as 2022 continued to be affected by COVID-19-related restrictions.</p> <p>The standard rate for office supplies used in the context of the proposed budget for 2023 was \$300 per staff member, and was applied to newly established posts. In conducting the above review, a comparison was made with the standard rate of \$200 per staff member for office supplies applied in the context of the proposed budget for the support account for peacekeeping operations for 2023/24. Based on that comparison, and given the limited data available, it was proposed to align the standard office supplies rate for the regular budget with that of the support account, which resulted in a reduction from a standard rate of \$300 per new staff member to \$200, reflecting a decrease of 33.3 per cent.</p>
<p>The Advisory Committee recommends that the General Assembly request the Secretary-General to present a proposal on the planned improved service delivery concept for the consideration and approval of the Assembly in the context of the next budget submission (para. VIII.49).</p>	<p>A separate report on the planned improved service delivery concept will be presented to the General Assembly at the main part of its seventy-eighth session.</p>
<p>The Advisory Committee is of the view that the information regarding extrabudgetary resources lacks sufficient detail and recommends that the General Assembly request the Secretary-General to systematically include in future budget proposals a more detailed breakdown of extrabudgetary resources and clear data on voluntary contributions, programme support costs, cost recovery, cost-sharing, central peacekeeping and other funds, specifying the services provided to different entities along with the respective amounts (para. VIII.52).</p>	<p>Information on extrabudgetary resources, including cost recovery, will be provided in the context of the financial performance report on the programme budget for 2022.</p>
<p>The Advisory Committee notes that the Secretary-General did not comply with the request of the General Assembly to identify suitable parking for bicycles within the Headquarters premises and that no tangible progress has been made in addressing this longstanding issue (para. VIII.58).</p>	<p>The implementation of the recommendation requires extensive consultation and agreement with the Department of Safety and Security to take into consideration security concerns, as the security screening infrastructure installed for access control purposes during the capital master plan cannot be applied to bicycles.</p> <p>The Facilities and Commercial Activities Service is working with the Department of Safety and Security and the architectural firm on an option for creating additional bicycle parking. The additional bicycle parking would be at the First Avenue external grass</p>

Brief description of the recommendation

Action taken to implement the recommendation

crescent area adjacent to the flagpoles, between the 43rd Street vehicle entrance and the 45th Street delegates entrance. The proposed location has been determined with the Department as an area that poses a minimal security threat and that can be monitored without compromising security requirements. The additional bicycle parking would have capacity for approximately 190 bicycles, would be equipped with charging stations and would be in addition to the capacity of approximately 130 bicycles in the existing bicycle park at the north end of the Headquarters compound. Conceptual renderings of the new bicycle parking have been completed and preliminary assessment of required alterations to security systems and infrastructure and estimations of project costs is in process. A proposal for this additional bicycle parking would be included in section 33, Construction, alteration, improvement and major maintenance. Electrical outlets have been installed at the 48th Street bicycle park to accommodate a limited number of e-bikes and or e-scooters, and are already in use. Furthermore, to address the request of the General Assembly, the Department of Safety and Security has also determined, in consultation with the Department of Operational Support, that a small amount of capacity for bicycle parking can be provided adjacent to the entrance to the General Assembly Building as a limited provision for delegations entering at the 43rd Street access point to Headquarters.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	GS (OL)	Redeployment of 1 Mail Assistant as Programme Management Assistant	With the digital transformation undergone by the Organization, the volume of mail is expected to continue to decline in the coming years, thus allowing for the redeployment and reassignment of the post from the Mail Operations Unit in the Facilities and Commercial Activities Service of the Division of Administration to the Office of the Under Secretary-General.
Subprogramme 4, Administration, New York	(1)	GS (OL)	Redeployment of 1 Mail Assistant as Programme Management Assistant	The Programme Management Assistant would be responsible for providing secretariat services to meetings of the Department of Operational Support executive pillar heads and the senior leadership team, for which there are presently no resources available.
Subprogramme 4, Administration, New York	1	P-3	Establishment of 1 Information Management Officer/Digital Archivist	The digital transformation undergone by the Organization, which was intensified by remote working arrangements in response to the global COVID-19 pandemic, has drastically shifted the generation of United Nations records from paper to digital documents. This evolution has resulted in significant changes in the scope of work, complexity and workload volume for the record and archive management function. Approximately 85 per cent of all inactive records received by the subprogramme for archiving are now digital, which will only continue to increase. At the same time, the subprogramme still has to store, process, preserve and make accessible the paper archives it has received since the inception of the United Nations. To effectively support the United Nations digital transformation in the area of archive management and to safeguard the historical records of the Organization, the function will need to transition fully to digital processes over the next few years. In view of the large volume of digital records in custody and continuously being received, the most pressing requirement is to establish dedicated and specialized expertise in digital archive management, which is currently lacking.
Subprogramme 4 Administration, New York	1	GS (OL)	Reassignment of 1 Mail Assistant post as Information Management Assistant	The Information Management Officer/Digital Archivist would develop and manage a digital preservation programme, leveraging the tools implemented in recent years to capture, assess and preserve digital records. Specifically, the incumbent would develop a preservation strategy and establish end-to-end workflows and related procedural documentation to receive, manage, preserve and provide access to the United Nations digital holdings through their entire life cycle. The Digital Archivist would also lead the reskilling of existing staff at the P-2 and General Service levels, providing information technology support on specific applications related to record and archive management, as well as in connection with the Falchi Building archive repository that will be vacated at the end of 2024.
Subprogramme 4 Administration, New York	(4)	GS (OL)	Abolishment of 4 Mail Assistant positions	Also, in line with the above-mentioned transformation and as part of the efforts to realign resources as workload patterns change, it is proposed to reassign one post of Mail Assistant (General Service (Other level)) as Information Management Assistant (General Service (Other level)) to support the implementation of a digital preservation programme. Furthermore, with the gradual trend of declining mail volume anticipated to continue in the foreseeable future, in part resulting from the digital transformation of the United Nations,

Section 29B Department of Operational Support

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Programme Support	1	P-5	Establishment of 1 Senior Budget and Finance Officer	<p>it is proposed to abolish four posts of Mail Assistant (General Service (Other level)), as the related functions will no longer be required, allowing the Department to meet long-term staffing requirements in other critical areas of operations, in particular for digital archive management under this subprogramme and for budget and finance management under programme support. The posts have been vacant, and the related functions have been redistributed.</p> <p>Within the Division of Administration, the Executive Office in the Headquarters Client Support Service provides support to the Department of Operational Support, the Office of Information and Communications Technology and 17 other entities, as well as for the travel of representatives from least developed countries. This involves support on human resources, budgetary and financial management and other administrative matters. Ten of these are regular budget entities (Department of Operational Support, Office of Information and Communications Technology, Ethics Office, Office of the United Nations Ombudsman and Mediation Services, Office of Administration of Justice, Office of the Victims' Rights Advocate, Office of the Special Representative of the Secretary-General on Violence against Children, Office of the Special Representative of the Secretary-General on Sexual Violence in Conflict, Office of the Special Representative of the Secretary-General for Children and Armed Conflict and Office of the Special Coordinator on Improving the United Nations Response to Sexual Exploitation and Abuse). Each of these entities, eight of which are headed at the Under-Secretary-General or Assistant Secretary-General level, require guidance and support with respect to budgetary and financial management.</p> <p>In that regard, these 10 entities receive approximately \$190 million a year in regular budget funding (in addition to some \$150 million in support account funding and estimated extrabudgetary resources of \$140 million annually). While the level of funding is one indicator of the scope of responsibility of the Executive Office, the requirement for support to all 10 entities on the full range of financial and budgetary matters, from the preparation and defence of the budget submission to the monitoring of expenditure, is as much an indicator of the level of capacity needed to provide effective support.</p> <p>At present, to support these 10 regular budget entities and their \$190 million in annual regular budget resources, the Executive Office has only one professional post (P-3) funded by the regular budget, as well as two General Service (Other level) posts. This level of resources is inadequate to provide the required level of support to the 10 regular budget entities. (The only other post funded from assessed resources is a P-4 under the support account for peacekeeping operations.)</p> <p>The Executive Office of the Headquarters Client Support Service provides advice and guidance to the Department of Operational Support and all client entities regarding the formulation of budgets and the utilization of resources. This became more complex as the delegation of authority given to heads of entities and those staff to which they sub-delegated authority places the decision-making closer to the point of mandate and programme delivery. Accordingly, the Service provides guidance regarding the United Nations financial</p>

Part VIII Common support services

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
				<p>regulations and rules for the certification of resources to implement their mandated activities.</p> <p>Furthermore, entities are also delegated to enter into financial arrangements with United Nations system entities with umbrella or framework agreements, as well as to accept voluntary contributions, gifts and donations. Accordingly, the Service reviews draft agreements and provides guidance and advice to ensure that United Nations policies and procedures are followed.</p> <p>The establishment of a senior-level position (P-5) with extensive knowledge and expertise is required to ensure that entities receive the level of support they require. This post would provide effective leadership, management and oversight of the finance team to ensure that efficient services are provided in accordance with United Nations regulations and rules, review complex financial transactions and agreements in order to mitigate financial and reputational risk to the Organization, and provide advice and guidance to heads of entities and senior managers regarding budgetary and financial policies and procedures, including the signing of financial agreements and the acceptance of contributions.</p> <p>The senior-level officer would be the focal point when interacting with the Controller, Under-Secretaries-General, Assistant Secretaries-General and senior managers regarding financial matters and legislative body processes, as well as during interdepartmental meetings related to financial and budgetary issues. He or she would be responsible for ensuring compliance with intergovernmental recommendations and decisions, as well as with United Nations policies and procedures. The incumbent would provide advice, financial interpretation, adaptations and corrective actions in response to audits and other queries to ensure adherence to the Staff Regulations and Rules of the United Nations, administrative instructions, bulletins and circulars. Also, considering the level of extrabudgetary resources and the delegated authority to heads of entities to solicit and approve voluntary contributions, the incumbent, supported by positions funded through extrabudgetary resources, would oversee the review of draft agreements and cost plans to ensure that they comply with financial regulations and rules and established policies and procedures.</p>

Foreword

As the organization navigates digital transformation in a rapidly changing digital landscape, the Office of Information and Communications Technology has aligned its proposed programme budget for 2024 to meet those demands. Digital transformation is a necessity for survival and for mandate delivery. The coronavirus disease (COVID-19) pandemic accelerated the pace of change and heightened the importance of technology in enabling remote work, digital collaboration and overall adoption of technology.

The Office supported the needs of the General Assembly for hybrid meetings, the delivery of cloud computing support and the establishment of a data architecture blueprint to meet the Data Strategy of the Secretary-General for Action by Everyone, Everywhere. Support continued to field operations to enhance situational awareness and to fulfil an emergent vision of the digital transformation of peacekeeping. These activities have laid the foundation for the Office to nimbly respond to emerging and future needs.

Through wide consultation, the Office has formulated the proposed information and communications technology strategy, which outlines a five-year vision to harness the power of technology and data for more effective mandate implementation.

To respond to the anticipated changes, the Office will continue its efforts, over the course of 2024, towards strategically driven digital transformation, focusing on efficiency gains through improved infrastructure, strengthened security of information and communications technology, targeted innovation and alignment with mandate delivery through enhanced uses of data.

Governance mechanisms will continue to be strengthened so that they are responsive to the range of requirements across the United Nations, and an accountability framework will be developed and implemented.

New technologies are needed to enable users across the Organization to better capture, nurture, protect, share, discover and analyse data, by leveraging a mature interoperability framework.

The Office will continue to engage constructively with Member States and all Secretariat entities in recognition that collaboration is key to enabling technology to accelerate mandate delivery.

(Signed) Bernardo **Mariano, Junior**
Assistant Secretary-General
Office of Information and Communications Technology

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 29C.1 The Office of Information and Communications Technology is responsible for the delivery of information and communications technology (ICT) in the United Nations. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions 63/262 and 72/266 B. The impact of the coronavirus disease (COVID-19) pandemic has demonstrated the importance of ICT in supporting business continuity and mandate delivery across the Secretariat and in intergovernmental bodies.

Strategy and external factors for 2024

- 29C.2 In 2024, the Office will continue to implement programmes that support the strategic goals of ensuring an environment where interoperability allows information to flow effectively throughout the Organization, facilitating coherent and integrated mandate implementation, where ICT is leveraged as a critical operational and strategic enabler for the work of the United Nations and where the Organization is protected from rapidly escalating threats to ICT security.
- 29C.3 Almost every aspect of the work undertaken in the United Nations relies on technology. The Office continues to provide resilient and secure global network and ICT systems, platforms and applications that enable collaboration and communication across the Secretariat and throughout the wider United Nations common system. As a principle of management reform, a balance between centrally provided enterprise services and solutions and those provided closest to the point of delivery is critical. In 2024, the Office will ensure that ICT operational capabilities are preserved, secured and resilient. The Office will also support mandate delivery by Secretariat entities through the development and deployment of innovative technologies and data services and solutions that facilitate their programmatic delivery.
- 29C.4 As demonstrated during the move to remote working arrangements during the COVID-19 pandemic, the adoption of enterprise platforms that are cloud-based, where United Nations personnel can collaborate and connect regardless of their location, proved critical for the Organization as it adapted to new ways of working. The shift to enterprise platforms from legacy applications will continue, leading to a more cohesive, coherent and resilient ICT ecosystem, as will the shift to cloud-based services. As these services evolve and become ubiquitous, they will be combined with innovative and frontier technologies to provide a more effective user experience and increased interoperability. It should be noted, however, that the increased use of technology exposes the United Nations to additional risks and threats. The Office will therefore continue to adopt a balanced approach, taking into account policy, people, ICT security and operational delivery.
- 29C.5 In the specific context of ICT security, which forms one of the core areas of the Office's work, challenges continue to grow in scale, pervasiveness and complexity. In response, the Office has initiated the deployment of proactive threat-hunting capabilities to replace the reactive intrusion detection systems that were used previously. This transition was designed to reduce reliance on outsourced services and strengthen internal capacity, while a clear focus is kept on United Nations operations. Other key initiatives requiring significant effort are also under way, including network segmentation, which is instrumental in containing threats and limiting the impact of successful attacks, the upgrade of various security solutions to protect end user devices, digital identities and cloud-based services, and increased interactive awareness campaigns.
- 29C.6 The Office will support efforts to transform the Organization into one that more effectively uses data and information to support decision-making and inform strategic direction. This work will be aligned

with the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, as one component of the Secretary-General's "quintet of change". The effective use of data across the Secretariat requires cross-cutting efforts, with the Office leading any such efforts relating to technology and the establishment of services and capacities that support the use of data in advancing the programmes of the Organization. While contributing to many of the related work streams, the Office will take the lead in the creation of technology enablers that support the exchange, reconciliation, storage and governance of data. Analytics and data solutions will also continue to be implemented, and associated standards and architecture will be formulated to achieve a consistent approach to data. Efforts will be made to improve the use of data at both the strategic and the tactical levels, with enterprise reporting as a complement to self-service reporting at the point of delivery. The Office will also support areas such as policy formulation and the governance of information management. The continued shift to cloud-based services will also be instrumental to the implementation of the Data Strategy, because such services reduce barriers to combining and sharing data, and enable multiple entities within the Secretariat, as well as Member States and partners, to contribute to and improve data sets in all areas of United Nations work.

- 29C.7 Innovation is one of the Office's core areas of work, and the Office will continue to provide access to technologies that can support a wide range of needs across the United Nations. Frontier technologies, such as artificial intelligence, blockchain and computer vision, will support the work of the Organization and mandate delivery globally, through, for example, the use of machine-learning computer systems to reduce manual work. Conversational artificial intelligence has already been applied to ensure more intuitive and efficient access to information. These solutions are designed to be foundational, to ensure that they can be integrated into the various systems in use across the Organization.
- 29C.8 The Office will advance its work in digital transformation, strengthening project and programme management to ensure that all ICT- and data-related projects are implemented in accordance with prevailing industry project and programme management methodologies. The Office will also systematize the management of relationships with partners both within the Secretariat and externally.
- 29C.9 With regard to inter-agency coordination and liaison, the Office will continue to collaborate with agencies, funds and programmes. This will be done through the United Nations System Chief Executives Board for Coordination Digital and Technology Network, which is co-chaired by the Assistant Secretary-General/Chief Information Technology Officer and serves as a mechanism to collaborate, harmonize and explore possibilities for shared ICT services. The Office will also continue to ensure access to Secretariat platforms for personnel from United Nations agencies, funds and programmes, in order to facilitate collaboration across the larger United Nations common system and support coherence in mandate delivery.
- 29C.10 With regard to external factors, the Office considered applicable risks identified in its risk register, and, accordingly, the overall plan for 2024 is based on the planning assumption that there will be adequate voluntary contributions to complement regular budget resources to carry out the activities of the Office.
- 29C.11 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Office will continue to coordinate and host events, both virtual and in-person, to promote women in technology within the Secretariat and to highlight the contributions of women to mandate delivery across all programmes.
- 29C.12 In line with the United Nations Disability Inclusion Strategy, the Office will continue to improve the accessibility of enterprise applications and public information websites for persons with disabilities, including by adding functionality to, remediating or configuring existing websites and applications in accordance with the established Accessibility Guidelines for United Nations Websites.

Impact of the pandemic and lessons learned

- 29C.13 The continuation of the COVID-19 pandemic into 2022 had a limited impact on the implementation of the mandates of the Office. The continued use of remote and hybrid working arrangements and the adoption of cloud-based enterprise platforms allowed United Nations personnel to collaborate and connect regardless of their location, which proved critical to the Organization as it adapted to new ways of working.
- 29C.14 The Office continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. In particular, many of the systems, services and technologies required for a remote, hybrid and changing workforce were not previously envisaged at the scale necessitated by the pandemic, which led to the need for revisions to the enterprise platforms and other productivity solutions designed for remote working and adjustments to the replacement cycle of ICT equipment and the technical specifications. The pandemic also exposed additional risks linked to information and communications technology security, such as the increased use of a wide variety of devices from diverse locations, including personal, and therefore unmanaged, devices. In addressing these risks, the Office is working to establish and update policies and standards and implement technological measures to manage security in the use of technologies that arise from an ICT landscape that is less standardized. Similarly, the scale of remote and hybrid meetings organized and supported by the Secretariat for intergovernmental bodies dramatically increased from pre-pandemic levels, requiring changes to technology and practices that will continue to be assessed and adjusted in response to the needs and requests of Member States. Another lesson was the increased need for collaboration and partnership with ICT organizational units across the Secretariat in order to sustain and advance ICT and leverage its benefits in a manner that is commensurate with its growth and the changes in the technological landscape, including, for example, data-driven analysis, automation and cloud-based technologies.

Legislative mandates

- 29C.15 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity	71/272 B, sect. III	Special subjects relating to the programme budget for the biennium 2016–2017: status of implementation of the information and communications technology strategy for the United Nations
69/262 , sect. II	Questions relating to the programme budget for the biennium 2014–2015: information and communications technology in the United Nations	72/262 C, sect. I	Special subjects relating to the programme budget for the biennium 2018–2019: status of implementation of the information and communications technology strategy for the United Nations
70/248 A, sect. V	Special subjects relating to the proposed programme budget for the biennium 2016–2017: information and communications technology in the United Nations		

Deliverables

- 29C.16 Table 29C.1 lists all cross-cutting deliverables of the programme.

Table 29C.1
Cross-cutting deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	–	1	1	1
1. Report of the Secretary-General on the status of implementation of the information and communications technology strategy for the United Nations	–	1	1	1
Substantive services for meetings (number of three-hour meetings)	3	8	3	3
Meetings of:				
2. The Fifth Committee	1	2	2	2
3. The Committee for Programme and Coordination	1	3	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	3	2	2

Evaluation activities

- 29C.17 An evaluation completed by the Office in 2022 on the compliance of ICT systems and services with the established enterprise architecture has guided the proposed programme plan for 2024.
- 29C.18 The results and lessons of the evaluation referenced above have been taken into account in the proposed programme plan for 2024. For example, it was reported that public websites were 100 per cent compliant. It was reported that other systems were 84 per cent compliant in terms of using ICT standards and 77 per cent compliant in terms of overall enterprise architecture. Taking into account lessons learned, the Office and its business relationship management team will conduct annual exercises to increase compliance across the Secretariat.
- 29C.19 An evaluation by the Department of Management Strategy, Policy and Compliance, the Department of Operational Support and the Office of Information and Communications Technology on self-assessment of ICT security is planned for 2024.

Programme of work

Subprogramme 1 Strategy and technology innovation

Objective

- 29C.20 The objective, to which this subprogramme contributes, is to enhance an innovative, secure, unified digital space for the United Nations.

Strategy

- 29C.21 To contribute to the objective, the subprogramme will continue to focus on the establishment of strategies, policies and governance, including the development of technology strategies aligned with the Organization's priorities, the establishment of technical procedures and guidelines, and a review of standards and architecture. Specifically, the subprogramme will:
- (a) Provide advisory services covering information technology, innovation, and data and information management;

- (b) Develop technology road maps to envisage and define how United Nations technologies should be implemented in support of the core mandates of the United Nations (see General Assembly resolution 69/292, sect. II, preambular paragraph 3), taking into account organizational needs, as well as strategic direction and innovation;
- (c) Work closely with United Nations clients to identify their key data, information and technology requirements or challenges and, in close collaboration with internal and external partners, provide innovative, integrated and secure technology solutions, such as artificial intelligence, machine learning and distributed ledger technology, and an enabling environment to meet clients' needs;
- (d) Support United Nations entities in reducing the level of risk to the image, resources, data, operations and safety of the personnel and assets of the United Nations and ensure that information security risks do not hamper efforts to implement United Nations mandates or adversely affect support to Member States, through the provision of specific security guidance, the performance of system security reviews and the conduct of information security awareness training;
- (e) Promote information security campaigns and the use of advanced security features, support and implement security measures, and strengthen proactive threat management capabilities;
- (f) Expand and strengthen oversight and coordination for ICT security in additional locations;
- (g) Establish the open source programme, which is primarily aimed at advancing the adoption and use of open source technology, establishing processes for leveraging incoming and outgoing community contributions and connecting with the ever-growing networks of the open source community operating in the public and private sectors;
- (h) Promote the effective use of data, facilitate access to data across the Organization by leveraging modern technology, strengthen data literacy by co-leading the implementation of the Data Strategy of the Secretary-General and govern information and data management.

29C.22 The above-mentioned work is expected to result in:

- (a) Better awareness of innovation techniques and new technologies, and increased capacity for Secretariat entities to deliver on mandates;
- (b) Strengthened resilience of the Organization, better end user awareness of threats and reduced vulnerability of the digital data and infrastructure of the United Nations;
- (c) Expanded oversight and coordination of ICT security in Secretariat locations, including Addis Ababa, Beirut, Santiago and Vienna, and strengthened core capacity for proactive vulnerability management and threat and incident management;
- (d) Integrated, secure and innovative use of information and data by United Nations entities;
- (e) A coherent ICT landscape in the Secretariat through compliance with policies, procedures and guidelines, as well as common standards, strategies and architecture.

Programme performance in 2022

Clients leverage digital transformation, technology innovation and information management

29C.23 Technology innovation is a cross-cutting enabler that is foundational to the work of the Organization. It involves the building of innovative solutions that support entities in delivering on their mandates. Strategic and policy aspects of information management and information technology are key areas in the promotion of effective and responsible use of information and data by departments and offices. The subprogramme focused on the provision of advisory services covering data services, technology innovation and information management by working closely with United Nations client entities to identify their key data, information and technology priorities or challenges, facilitate the adoption

of solutions to meet their needs and meet organizational policy requirements. The subprogramme provided advisory services to 69 entities on information management and 7 entities on technology innovation. The subprogramme also conducted a comprehensive information management assessment for the Office of Counter-Terrorism, and conducted an assessment of the state of ICT security, ICT service management and information management and provided related recommendations for the Economic Commission for Europe.

29C.24 Progress towards the objective is presented in the performance measure below (see table 29C.2).

**Table 29C.2
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
59 entities strengthened information management and 17 entities strengthened technology innovation	46 clients leveraged digital transformation and technology innovation	69 entities strengthened information management and 7 entities strengthened technology innovation
The United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/ Islamic State in Iraq and the Levant strengthened information management based on an assessment and recommendations by the Office of Information and Communications Technology	The Office of the Special Representative of the Secretary-General on Violence against Children and the Global Compact Office strengthened information management based on assessments and recommendations by the Office of Information and Communications Technology	The Economic Commission for Europe strengthened the ICT service management and information management processes and mechanisms based on an assessment and recommendations by the Office of Information and Communications Technology The Office of Counter-Terrorism strengthened information management based on an assessment by the Office of Information and Communications Technology

Planned results for 2024

Result 1: seamless access to United Nations data for all personnel

Programme performance in 2022 and target for 2024

- 29C.25 The subprogramme’s work contributed to strengthening data-driven decision-making for the Department for General Assembly and Conference Management, the Department of Economic and Social Affairs, the Department of Operational Support, the Economic Commission for Latin America and the Caribbean, the United Nations Office on Drugs and Crime (UNODC) and the United Nations Environment Programme (UNEP), which met the planned target of six additional entities having access to authoritative data sets.
- 29C.26 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29C.3).

Table 29C.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Users in 3 entities (the Office for Disarmament Affairs, the Economic and Social Commission for Asia and the Pacific (ESCAP) and the Travel Section of the Department of Operational Support) have access to authoritative data sets supporting decision-making processes	An additional 6 entities have access to authoritative data sets which help users in a wide array of decision-making processes	Data catalogue becomes an integral component of the enterprise data architecture and is accessible to 10 entities for decision-making	Improved access to a growing inventory of data resources with a more systematic classification of data sources

Result 2: enhanced management of the Organization’s master data

Programme performance in 2022 and target for 2024

29C.27 The subprogramme’s work contributed to a common understanding of the management and use of master data by bringing together master data focal points from different entities and commencing the development of a pilot master data registry, which did not meet the planned target of having an initial master data management platform available for users to access. The target was not met because additional time was required by the master data working group to identify and evaluate options and common priorities. The pilot master data registry will be rolled out in 2023.

29C.28 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29C.4).

Table 29C.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Assessment of the current status of master data in the Organization to identify departments’ master data sets	A common understanding of the management and use of master data by bringing together master data focal points from different entities Commencement of the development of a pilot master data registry	Initial master data registry available for users to access Departments and offices have access to improved master data that have been assessed to ensure consistency and accuracy, minimizing duplication and enabling a common understanding of the use of data	Strengthened technical capabilities for master data management are embedded in the enterprise data architecture Pilot environment available to strengthens clients’ master data management capabilities

Result 3: Advance mandate implementation through partnerships on innovative technology

Proposed programme plan for 2024

29C.29 The rapid evolution of ICT requires structured relationships with key stakeholders that leverage technology and data to advance the Organization’s mandates. The subprogramme has been focusing on the use of strategic partnerships to strengthen interaction with the public domain. Specifically, the subprogramme defined five workstreams to exchange good practices and share knowledge with the European Commission Directorate-General for Informatics and initiated collaboration with the World Health Organization, calling on young innovators around the world to build technological solutions to improve health and well-being in line with Sustainable Development Goal 3. Based on these initial efforts, the subprogramme broadened collaboration through open innovation competitions in partnership with the European Commission for open source data solutions and expanded inter-agency coordination with United Nations entities to develop a platform for financial data.

Lessons learned and planned change

29C.30 The lesson for the subprogramme was that open source solutions, particularly applications that can be adapted for different use cases, could be scaled to support the achievement of the Sustainable Development Goals. In applying the lesson, the subprogramme will strengthen partnerships and work with innovators, particularly young innovators, to further establish the use case and provide opportunities to scale the applications.

29C.31 Expected progress towards the objective is presented in the performance measure below (see table 29C.5)

Table 29C.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Member States have access to financial intelligence through the strengthening by United Nations entities of their ability to collect, analyse and share intelligence Innovators from the general public submitted concepts on open source software solutions for Sustainable Development Goals 4 and 11 through open innovation competitions in partnership with the European Commission	The Joint United Nations Programme on HIV/AIDS makes use of new technology to raise awareness of HIV/AIDS by establishing solutions that engage young innovators Strengthened engagement across the United Nations system on digital transformation and innovation issues through partnerships with the International Telecommunications Union	Strengthened response and reduction in technological gaps for the just transitions in vulnerable places project in support of Sustainable Development Goal 11 through joint private/public partnerships and United Nations inter-agency mechanisms

Deliverables

29C.32 Table 29C.6 lists all deliverables of the subprogramme.

Table 29C.6

Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: ICT and information management policies and standards; enterprise architecture framework and compliance oversight mechanism; analytics and innovation guidelines for oversight and accountability; analytics and frontier technology solutions accessible to Secretariat entities; repeatable technology solutions and conversational artificial intelligence solutions; expert advice to Secretariat entities on information management; policies and procedures for data privacy and mechanisms for oversight of adherence to data privacy principles; disaster recovery plan for critical systems; and information security framework across Secretariat entities, comprising a framework document on information security and security assessment of systems and entities.

Subprogramme 2 Operations support

Objective

29C.33 The objective, to which this subprogramme contributes, is to achieve an optimized ICT infrastructure and technology environment for all United Nations entities, within which the Organization's global technology solutions, systems and applications are used securely and in an intuitive manner.

Strategy

29C.34 To contribute to the objective, the subprogramme will continue to implement and upgrade enterprise systems and infrastructure to enable the Secretariat and Member States to effectively deliver on the Organization's work. Specifically, the subprogramme will:

- (a) Enable broader collaboration and the sharing of information by implementing global enterprise solutions that give users a single place to meet, communicate, share files and collaborate within the larger United Nations common system;
- (b) Enable enterprise systems and infrastructure to operationalize the Data Strategy of the Secretary-General by implementing self-service analytics and other advanced analytics tools;
- (c) Implement and support other data-driven initiatives, such as the Unite Aware situational awareness technology platform, which will continue to be rolled out globally and will support data-driven decision-making by senior management in peace operations;
- (d) Continue to implement hybrid cloud hosting, which is transforming how the Organization hosts its data and applications, and consolidate the Organization's data, primarily in a United Nations-managed cloud environment;
- (e) Create a cross-cutting client service desk approach to carry out the Secretariat's customer relationship management activities and to provide around-the-clock support for enterprise applications such as Umoja, Inspira and Unite Mail;
- (f) Provide technology support for intergovernmental meetings.

29C.35 The above-mentioned work is expected to result in:

- (a) The facilitation of mandate delivery by Secretariat entities by means of a modern, resilient and secure global ICT infrastructure;
- (b) Greater collaboration across the United Nations common system that supports the Secretariat in the execution of its mandates with greater agility;
- (c) A modern and secure technology environment that provides simplified access to the Organization’s data and serves as the foundation for the Data Strategy of the Secretary-General;
- (d) An expanded and highly capable cadre and user base that is familiar with the systems and processes to create data-driven insights and present data-driven information for decision makers in an optimal way;
- (e) Timely resolution of incidents and service requests, with end users expressing increased satisfaction with ICT enterprise services, which serves to increase engagement and communication with clients;
- (f) Improvements in the access to intergovernmental meetings, including in respect of remote participation, the access of Secretariat services to verbatim report-writing and translation, and the access of other audiences to interpretation, broadcasting and webcasting capabilities.

Programme performance in 2022

Increased client satisfaction

29C.36 The Unite Service Desk continues to provide around-the-clock support for enterprise applications such as Umoja, Inspira, Unite Mail, SharePoint and Microsoft Teams. The subprogramme continues to strive to maintain the highest standard in client service delivery, with ongoing analysis of client feedback during the period and the implementation of corrective actions to address issues that show repetitive trends. The subprogramme undertook a holistic review of escalation routes and support channels and established standard operating procedures to inform updated ways of working across the Office to ensure that client satisfaction continues at the target levels.

29C.37 Progress towards the objective is presented in the performance measure below (see figure 29C.I).

Figure 29C.I
Performance measure: customer satisfaction with services delivered
 (Percentage)

Planned results for 2024

Result 1: enhanced situational awareness for decision makers

Programme performance in 2022 and target for 2024

- 29C.38 The subprogramme's work contributed to situational awareness by leveraging the Unite Aware platform in the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic (MINUSCA) and the United Nations Peacekeeping Force in Cyprus (UNFICYP), as well as to improved medical situational awareness capabilities in the United Nations Multidimensional Integrated Stabilization Mission in Mali (MINUSMA) and the United Nations Mission in South Sudan (UNMISS), which did not meet the planned target of the Unite Aware platform being available to four additional peace operations. The target was not met owing to a governance change that placed the situational awareness programme under the Department of Peace Operations Strategy for the Digital Transformation of United Nations Peacekeeping. This change triggered a revision of deployment plans and a new approach to enhancing situational awareness in peace operations.
- 29C.39 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29C.7).

Table 29C.7

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Availability of the Unite Aware platform in MINUSCA	Continued situational awareness in MINUSCA, including new modules for medical situational awareness and further online training modules made available on the platform	Improved situational awareness in UNFICYP Improved medical situational awareness capabilities in MINUSMA and UNMISS	Availability of the Unite Aware platform to 3 additional peace operations	Availability of the Unite Aware platform based on additional mission roll-outs in accordance with Department of Peace Operations governance arrangements and priorities

Result 2: modernization of voice communications

Programme performance in 2022 and target for 2024

- 29C.40 The subprogramme's work contributed to a pilot project of 43 users with access to desktop telephone services using Microsoft Teams, which did not meet the planned target of 4,000 users. The target was not met owing to the additional time required to build the business case for a United Nations Secretariat-wide programme of work, which will include the migration of United Nations Headquarters and its endorsement by the Information and Communications Technology Steering Committee prior to implementation.
- 29C.41 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29C.II).

Figure 29C.II
Performance measure: number of users with access to desktop telephone services using Microsoft Teams
 (Cumulative)

Result 3: improved wireless infrastructure coverage for delegates and staff at United Nations Headquarters

Proposed programme plan for 2024

29C.42 At United Nations Headquarters, the subprogramme manages the provision of Wi-Fi services for delegates and staff. The subprogramme maintains and supports the underlying Wi-Fi infrastructure, ensuring that devices and technologies are optimally configured to meet the requirements of the users on the United Nations campus. In addition, the subprogramme resolves incidents or disruptions reported by users specific to the Wi-Fi service.

Lessons learned and planned change

29C.43 The lesson for the subprogramme, based on a recent assessment of all technical and non-technical requirements, risks, issues and constraints for replacing the existing Wi-fi infrastructure, was that most of the current Wi-Fi infrastructure is well beyond its useful life and is no longer supported by the vendor. In applying the lesson, the subprogramme will update the underlying infrastructure of the Wi-Fi service to meet the requirements of delegates and the wider user community in the Secretariat. It is envisaged that the update will provide a reliable, secure and resilient wireless infrastructure that will enhance the user experience and will be able to accommodate future technologies. The upgrade will also include the provision of data services with better performance capable of supporting video streaming and high-speed data download and upload. The upgrade will focus on maximizing seamless, resilient and stable Wi-Fi coverage at Headquarters for all office spaces, conference rooms and designated areas. The subprogramme will also implement contingency plans to minimize service disruptions during the planned upgrade.

29C.44 Expected progress towards the objective is presented in the performance measure below (see figure 29C.III)

Figure 29C.III
Performance measure: increased number of Wi-Fi access points results in a decrease in the number of Wi-Fi incidents

Deliverables

29C.45 Table 29C.8 lists all deliverables of the subprogramme.

Table 29C.8

Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings) ^a	12 700	6 930	12 700	12 700
Meetings of intergovernmental and expert bodies	12 700	6 930	12 700	12 700
E. Enabling deliverables				
Information and communications technology: hardware and infrastructure, and software and applications.				

^a The Broadcast and Conference Support Section of the Office of Information and Communications Technology facilitates meeting services for intergovernmental meetings in New York only.

Subprogramme 3 Enterprise solutions

Objective

29C.46 The objective, to which this subprogramme contributes, is to ensure effective and efficient implementation of the mandates of Secretariat entities.

Strategy

29C.47 To contribute to the objective, the subprogramme will:

- (a) Continue to develop bespoke software solutions that support mandate delivery and the Sustainable Development Goals by partnering with Secretariat entities and leveraging emerging technologies to meet evolving challenges and mandates;
- (b) Actively support the digital transformation of the Secretariat by designing process automation and knowledge management solutions for departments and offices;
- (c) Implement the Data Strategy of the Secretary-General by delivering technical solutions for data exchange between systems through enterprise software;
- (d) Enhance identity management by leveraging cloud technology, upgrade service management solutions, enhance talent management, manage the United Nations safety and security information systems, and design and operate the enterprise web content management platform.

29C.48 The above-mentioned work is expected to result in:

- (a) Facilitation of contributions to the Sustainable Development Goals through technology solutions, as articulated by programmatic mandates;
- (b) Enhanced uniformed capabilities management through the implementation of recommendations of the Working Group on Contingent-Owned Equipment;
- (c) Further automation of administrative support processes;
- (d) Improved data-sharing between and among the Organization's stakeholders, including enhanced coordination and cooperation within and across the Secretariat and the broader United Nations system;
- (e) Faster recruitment process for the Secretariat;
- (f) Increased availability of information for professional security officers to perform their duties of protecting United Nations personnel across the United Nations system.

Programme performance in 2022

Finance knowledge gateway: easy-to-access and up-to-date financial documentation to support adherence to the financial rules, regulations, policies and procedures

29C.49 The Office of Programme Planning, Finance and Budget provides financial services to the operations of the United Nations Secretariat that follow strict financial rules, regulations, policies and procedures. The subprogramme, in collaboration with the Department of Operational Support and the Office of Programme Planning, Finance and Budget developed the finance knowledge gateway to digitally store and manage official documents for the Office of Programme Planning, Finance and Budget, with advanced search capability to help the users find relevant information.

29C.50 Progress towards the objective is presented in the performance measure below (see table 29C.9).

Table 29C.9
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Accessible financial documentation to support all Secretariat clients with adherence to the financial rules, regulations, policies and procedures

Planned results for 2024

Result 1: timely custom information technology solutions for mandate delivery

Programme performance in 2022 and target for 2024

- 29C.51 The subprogramme’s work contributed to three custom ICT solutions to support mandate delivery, including the disaster risk resilience scorecard, the Security Council resolution [2589 \(2021\)](#) knowledge base and the plastic pollution CounterMEASURE II, which met the planned target.
- 29C.52 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29C.10).

Table 29C.10
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
<ul style="list-style-type: none"> • Technology Facilitation Mechanism in use by the Department of Economic and Social Affairs • FeedUP@UN in use by the Economic Commission for Europe • Fourth edition of the Sendai Framework for Disaster Risk Reduction 2015–2030 monitoring solution in use by the United Nations Office for Disaster Risk Reduction 	<ul style="list-style-type: none"> • Making Cities Resilient campaign in use by the United Nations Office for Disaster Risk Reduction • Global Partnership on Marine Litter in use by UNEP • Data collection and analysis platform in use by UNODC 	<ul style="list-style-type: none"> • Disaster risk resilience scorecard in use by the United Nations Office for Disaster Risk Reduction • Security Council resolution 2589 (2021) knowledge base in use by the Department of Peace Operations • Plastic pollution CounterMEASURE II, in use by UNEP 	Three additional custom information technology solutions available to support mandate delivery by Secretariat entities	Three additional custom information technology solutions available to support mandate delivery by Secretariat entities

Result 2: enhanced standards, security, multilingualism and accessibility of United Nations public information websites

Programme performance in 2022 and target for 2024

- 29C.53 The subprogramme’s work contributed to onboarding seven additional websites to the Enterprise Content Management platform, including for the system of administration of justice, the Regional Commissions New York Office, the calendar of conferences and meetings, the emergency portal and the United Nations Centre for Regional Development, which met the planned target.
- 29C.54 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29C.IV).

Figure 29C.IV
Performance measure: number of websites hosted on the Enterprise Content Management platform (cumulative)

Result 3: process automation and knowledge management solutions to support the digital transformation of the Secretariat

Proposed programme plan for 2024

- 29C.55 In order to support the digital transformation of the Secretariat and the Data Strategy of the Secretary-General, the subprogramme has delivered multiple process automation solutions to reduce manual data entry and paper forms, resulting in fewer errors. Some examples of process automation implemented recently include a workstation reservation system in support of the flexible workspace project to enable personnel to book a desk when coming into the office and an official gifts register to track official gifts received by the United Nations Secretariat.

Lessons learned and planned change

- 29C.56 The lesson for the subprogramme was that there was a potential to reduce duplication in the development of ICT solutions for entities. In applying the lesson, the subprogramme will enhance its communication with departmental ICT focal points when assessing business requirements for new ICT initiatives to create opportunities to leverage existing applications and automate business processes across the Secretariat and thereby limit potential duplication of functionalities. The Office will encourage and provide technical support to enable the repurposing of existing solutions. This is expected to include utilizing existing solutions and scaling them to the enterprise level, so that more than one office can use the technology to support their mandate implementation. When business requirements indicate that there is no suitable existing solution and there is an enterprise-level need, the Office will provide technical leadership and expertise to support the development of enterprise solutions. The subprogramme will continue this work and expects to deliver three automations per year.

29C.57 Expected progress towards the objective is presented in the performance measure below (see table 29C.11)

Table 29C.11
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	–	–	3 process automation or knowledge management solutions in place, in which Departments make use of process automation tools to reduce processing time and paperwork and to simplify workflows

Deliverables

29C.58 Table 29C.12 lists all deliverables of the subprogramme.

Table 29C.12
Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: content management solutions for the Secretariat; ongoing development and support for the enterprise web management platform, including security, standards and multilingualism compliance, used by Secretariat entities, field missions and permanent missions; enterprise talent and performance management solutions for approximately 55,000 users, including additional features related to national recruitment, the senior management compacts for Assistant Secretaries-General, integration with the United Nations mutual recognition of rosters interface tool; Umoja support, including uniformed capabilities management and fundraising functionalities; support of service management solutions for approximately 25,500 users; safety and security solutions for 78,000 users; deployment of a solution to support the implementation of Security Council resolution [2589 \(2021\)](#) in the tracking of crimes committed against United Nations peacekeepers; solution for the recruitment of local police by the United Nations police in peacekeeping operations; additional functionalities for the Misconduct Tracking System to enhance the vetting process for non-United Nations civilian and uniformed personnel; business intelligence capabilities to enable field missions to enhance their operational efficiency and strategic planning; solutions to support the mandate delivery of programmatic entities such as the Economic Commission for Europe, UNEP and the Office of the United Nations High Commissioner for Human Rights; application integration mechanism used by 52 applications.

B. Proposed post and non-post resource requirements for 2024

Overview

29C.59 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 29C.13 to 29C.15.

Table 29C.13

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2022 expenditure	2023 appropriation	Changes				Total	Percentage	2024 estimate (before recosting)
			Technical adjustments	New/ expanded mandates	Other				
Posts	25 374.4	24 824.7	–	–	–	–	–	24 824.7

Total	182	–	–	–	–	182

29C.60 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 29C.16 to 29C.18 and figure 29C.V.

29C.61 As reflected in tables 29C.16 (1) and 29C.17 (1), the overall resources proposed for 2024 amount to \$53,980,900 before recosting, reflecting a net increase of \$555,000 (or 1 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments, new and expanded mandates and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 29C.V
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29C.62 As reflected in table 29C.16 (1), resource changes reflect a decrease of \$85,700, as follows:

Subprogramme 2, Operations support. The decrease under contractual services relates to the removal of non-recurrent provisions for 2023 in support of new and expanded mandates pursuant to General Assembly resolution [77/248](#).

New and expanded mandates

29C.63 As reflected in table 29C.16 (1), resource changes reflect an increase of \$49,800, as follows:

Subprogramme 2, Operations support. The increase relates to additional requirements under contractual services in support of new and expanded mandates from the General Assembly for 2024 on: further practical measures for the prevention of an arms race in outer space (\$4,700; resolution [77/250](#)); crimes against humanity (\$9,400; resolution [77/249](#)); the Summit of the Future (\$27,800; resolution [76/307](#)); and transparency in armaments (\$7,900; resolution [77/69](#)).

Other changes

29C.64 As reflected in table 29C.16 (1), the net effect of the proposed changes is an increase of \$590,900. The breakdown of changes is as follows:

- (a) **Executive direction and management.** The increase of \$16,900 reflects the net effect of:
- (i) A reduction in the provision for other staff costs (\$10,900) owing to measures taken to reduce overtime and night differential by containing meetings within official working hours;
 - (ii) An increase in the provision for travel (\$27,800) owing to increased travel requirements related to the assessment of the ICT services model and capacities at offices away from Headquarters and regional commissions;
- (b) **Subprogramme 1, Strategy and technology innovation.** The increase of \$861,100 reflects the net effect of:
- (i) An increase in the provision for other staff costs (\$945,900) for six general temporary assistance positions to strengthen information and communications technology security, as explained in the report of the Secretary-General on capital investment planning ([A/77/519](#));
 - (ii) A reduction in the provision for travel (\$18,300) through greater use of videoconferencing when possible;
 - (iii) A reduction related to the optimization of contractual services (\$66,500);
- (c) **Subprogramme 2, Operations support.** The decrease of \$180,000 reflects the net effect of:
- (i) A reduction in the provision for travel (\$6,600) through greater use of videoconferencing when possible;
 - (ii) A reduction in the provision for general operating expenses (\$218,400) owing to anticipated lower expenditure resulting from the implementation of operational efficiencies, offset in part by an increase under contractual services for conference services that are anticipated to be proposed in the context of future statements of programme budget implications, based on recent historical trends (\$45,000);
- (d) **Subprogramme 3, Enterprise solutions.** The decrease of \$107,100 reflects:
- (i) A reduction in the provision for travel (\$2,900) through greater use of videoconferencing when possible;
 - (ii) A reduction related to the optimization of contractual services (\$104,200).

Other assessed resources

29C.65 As reflected in tables 29C.16 (2) and 29C.17 (2), other assessed resources amount to \$37,223,200. The resources would complement regular budget resources and would be used mainly to provide for ICT support services to peacekeeping operations. With these resources, the Office continues to carry

out important initiatives that have a direct impact on the effectiveness and efficiency of peacekeeping operations.

- 29C.66 The expected increase of \$1,424,600 is attributable mainly to the planned purchase of software licences related primarily to the move of the Umoja database from a virtualized to a non-virtualized environment, the reduction of data loss risk and the cloud-based SAP solution for supply chain activities, offset in part by a decrease under posts due mainly to higher vacancy rates.

Extrabudgetary resources

- 29C.67 As reflected in tables 29C.16 (3) and 29C.17 (3), extrabudgetary resources amount to \$64,326,800. The resources, which include funds from United Nations Headquarters client entities, peacekeeping operations and special political missions, together with voluntary contributions, would complement regular budget resources and would be used mainly to provide for ICT services such as a personal computing core package that includes email, collaboration and communication tools, network access, a telephone system, service desk support for computers, and desktop and enterprise applications. Services provided include the development and deployment of tailored technology solutions to support mandate delivery by substantive departments and offices, such as solutions that help to ensure the safety and security of United Nations system personnel, the training of uniformed personnel, rapid deployment, and public broadcasting and data analysis capabilities.
- 29C.68 The expected decrease of \$2,526,200 is attributable mainly to the expiration of three grants which support telemedicine, data mining and radio analysis projects, the completion of the mission start-up project funded by a grant ending at the end of 2023 and the finalization of the peace and security data exchange project ending in July 2023 and projects with the United Nations Children's Fund (UNICEF) and the United Nations Industrial Development Organization (UNIDO) ending in June 2024.
- 29C.69 The extrabudgetary resources are subject to the oversight of the Office of Information and Communications Technology, which has delegated authority from the Secretary-General.

Executive direction and management

- 29C.70 The executive direction and management component comprises the Office of the Assistant Secretary-General for Information and Communications Technology and the Enterprise Programme Management Section. In General Assembly resolutions [69/262](#), [70/248](#) and [71/272 B](#), the central authority of the Chief Information Technology Officer was reaffirmed and strengthened with regard to information security and the overall direction and performance of ICT activities within the Organization.
- 29C.71 The overall responsibilities of the executive direction and management component include the following functions:
- (a) To provide overall strategic direction and central leadership for the establishment and implementation of Organization-wide ICT;
 - (b) To plan and coordinate ICT activities Secretariat-wide, including infrastructure and enterprise systems, with a view to achieving coherence and coordination in the area of ICT within the work of the United Nations and between the Secretariat and funds, programmes and specialized agencies of the Organization;
 - (c) To provide overall strategic planning and management and coordinate the work of the internal organizational units.
- 29C.72 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in

paragraph 19 of General Assembly resolution 72/219, the Office of Information and Communications Technology is integrating environmental management practices into its operations. For 2024, the Office will continue to provide departments and offices with solutions to support the achievement of the Goals and will continue to reduce its infrastructure footprint in data centres by moving to the cloud, thus reducing its environmental impact.

29C.73 Information on the timely submission of documentation and advance booking for air travel is reflected in table 29C.19. The Office continues to make efforts to fully comply with the advance purchase policy directive and has taken a number of steps to ensure that air travel is booked as early as possible. Travel requests that do not meet the two-week timeline are directed to the Head of Office for validation of mitigating circumstances before final review and approval. Owing, in part to the implementation of such measures, the rate of compliance has more than doubled since 2020.

Table 29C.19
Compliance rate
 (Percentage)

	Actual 2020	Actual 2021	Actual 2022	Planned 2023	Planned 2024
Timely submission of documentation	n/a	n/a	n/a	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	33	63	72	100	100

29C.74 The proposed regular budget resources for 2024 amount to \$3,109,500 and reflect an increase of \$16,900 compared with the appropriation for 2023. The proposed increase is explained in paragraph 29C.64. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29C.20 and figure 29C.VI.

Table 29C.20

(Number of posts/thousands of United States dollars)

Other assessed resources

29C.75 Other assessed resources for this component amount to \$47,300. The resources would complement regular budget resources and would be used mainly to provide for travel related to peacekeeping missions and activities.

Extrabudgetary resources

29C.76 Extrabudgetary resources for this component amount to \$2,383,800. The resources would complement regular budget resources and would be used mainly to support the Project Management Office as well as activities that may be reprioritized by the Office of the Chief Information Technology Officer.

Programme of work

**Subprogramme 1
 Strategy and technology innovation**

29C.77 The proposed regular budget resources for 2024 amount to \$11,468,500 and reflect a net increase of \$861,100 compared with the appropriation for 2023. The proposed increase is explained in paragraph 29C.64. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29C.21 and figure 29C.VII.

Table 29C.21
Subprogramme 1: evolution of financial and post resources

(Thousands of United States dollars/number of posts)

	2022 expenditure	2023 appropriation	Changes				2024 estimate (before recosting)

Total		36	–	–	–	–	–	36

Figure 29C.VII
Subprogramme 1: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

29C.78 Other assessed resources for this subprogramme amount to \$2,352,500. The resources would complement regular budget resources and would be used mainly to support the protection of ICT assets from cyberthreats through the strengthening of ICT security, as well as to continue to support the development of an integrated data architecture framework that supports field missions’ activities through technology and data. The expected decrease of \$64,000 is due mainly to higher vacancy rates.

Extrabudgetary resources

29C.79 Extrabudgetary resources for this subprogramme amount to \$2,842,200. The resources would complement regular budget resources and would be used mainly to enable the provision of integrated

services to allow data to be transferred effectively and securely between systems in alignment with data governance processes that are being instituted as part of the Data Strategy of the Secretary-General. In addition, funding will be used to expand existing technology implementation to support the core work of the Secretariat through the integration of the emerging technology solutions with systems that make the greatest use of structured and unstructured data and information, and to ensure compliance with ICT standards, architecture and security. The United Nations conversational artificial intelligence platform is in the process of being implemented, and its integration with a wide variety of systems and data sources, as well as its expansion to address requirements related to multilingualism and accessibility, will be addressed. The resources would enable the Office to meet the growing demand for conversational artificial intelligence and related innovation technology (Alba chatbot).

29C.80 The expected decrease of \$552,700 is attributable mainly to the finalization of the peace and security data exchange project, ending in July 2023, and projects with UNICEF and UNIDO ending in June 2024.

Subprogramme 2 Operations support

29C.81 The proposed regular budget resources for 2024 amount to \$23,948,500 and reflect a decrease of \$215,900 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 29C.62 to 29C.64. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29C.22 and figure 29C.VIII.

Figure 29C.VIII

Subprogramme 2: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

**Other assessed resources**

29C.82 Other assessed resources for this subprogramme amount to \$19,627,100. The resources would complement regular budget resources and would be used mainly to continue to facilitate and coordinate the provision of infrastructure and operations services for peacekeeping operations and the Department of Peace Operations, provide support for videoconferencing and virtual meetings by leveraging hybrid cloud-based technologies and provide support to peacekeeping operations applications. The expected increase of \$995,700 is attributable mainly to an increase in Umoja maintenance resources, offset in part by a reduction under posts, as described in paragraph 29C.66 above.

Extrabudgetary resources

29C.83 Extrabudgetary resources for this subprogramme amount to \$43,355,600. The resources would complement regular budget resources and would be used mainly to provide ICT services, such as a personal computing core package that includes collaboration tools and applications, connectivity, network access and service desk support for enterprise applications. These funds also include hosting costs for departmental systems hosted at the United Nations Headquarters data centre in New York. The extrabudgetary resources would: (a) support the rapid deployment of communications during crises; (b) provide end user support for peacekeeping missions specific to email and collaboration tools and applications; (c) assist in the creation of a United Nations-owned secure data network; and (d) serve to optimize the core ICT infrastructure hosting critical systems in Brindisi, Italy, in Valencia, Spain, and in New York, in order to provide efficient support to field operations.

29C.84 The expected decrease of \$1,973,500 is attributable mainly to the expiration of three grants which support telemedicine, data mining and radio analysis projects and the completion of the mission start-up project funded by a grant ending at the end of 2023.

Subprogramme 3 Enterprise solutions

29C.85 The proposed regular budget resources for 2024 amount to \$15,454,400 and reflect a decrease of \$107,100 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 29C.64. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29C.23 and figure 29C.IX.

Total		54	–	–	–	–	54

Figure 29C.IX
Subprogramme 3: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

- 29C.86 Other assessed resources for this subprogramme amount to \$15,196,300. The resources would complement regular budget resources and would be used mainly to enable the development and support of information technology applications to support peacekeeping operations from Headquarters. The expected increase of \$445,600 is due mainly to planned purchases of software licences related primarily to the move of the Umoja database from a virtualized to a non-virtualized environment, the mitigation of data loss and the cloud-based SAP solution for supply chain activities.

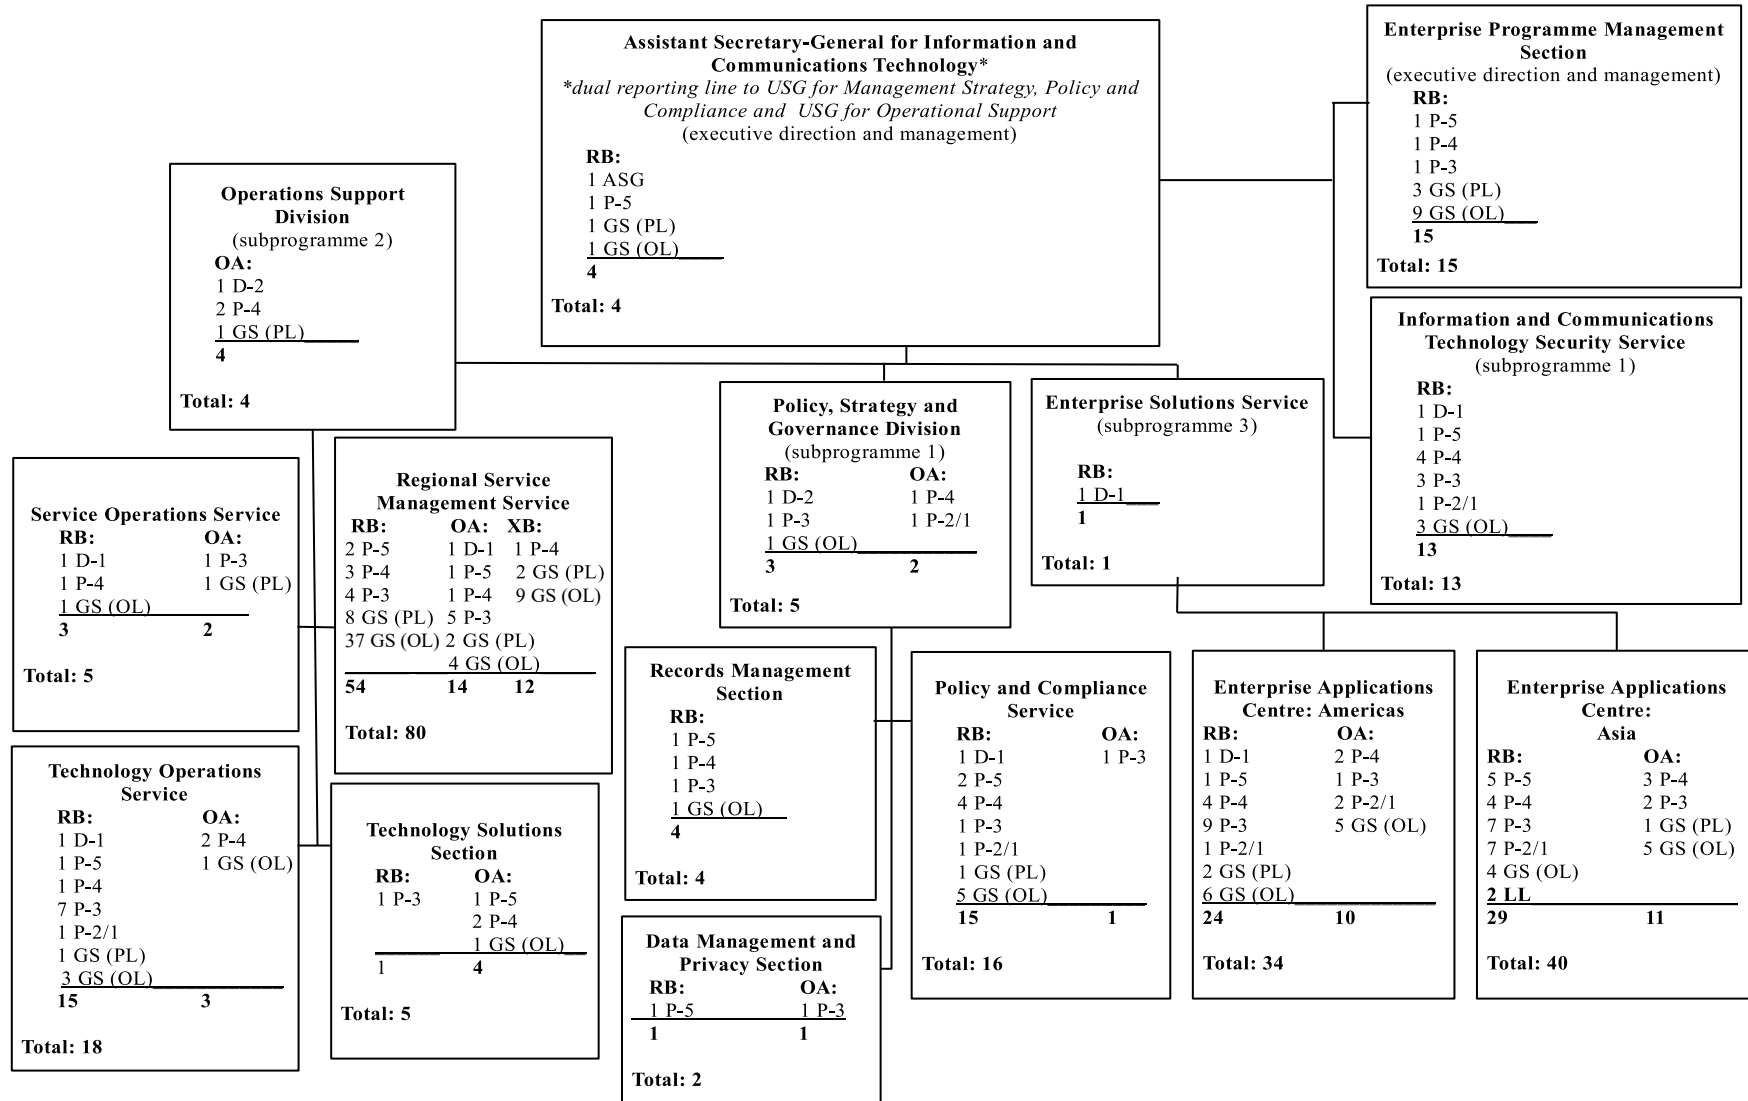

Extrabudgetary resources

- 29C.87 Extrabudgetary resources for this subprogramme amount to \$15,745,200. The resources would complement regular budget resources and would be used mainly to enable the development and support of information technology solutions for peacekeeping in the field, for the safety and security of United Nations system personnel and for the substantive departments in the delivery of their mandates.

Annex II

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee reiterates that the Secretary-General should continue his efforts to rationalize websites, with a view to reducing costs and minimizing exposure to security risks, and trusts that detailed information on the impact of such efforts will be provided in the context of the next budget submission (see also [A/76/7](#) and [A/76/7/Corr.1](#), para. VIII.65). The Committee also trusts that the forthcoming ICT strategy will include comprehensive information on future plans for website rationalization and institutional social media accounts, in particular with regard to compliance with requirements in the areas of budgeting, security, accessibility and multilingualism (para. VIII.75).

The Advisory Committee is of the view that the information regarding extrabudgetary resources lacks clarity and sufficient detail and recommends that the General Assembly request the Secretary-General to systematically include in future budget proposals a more detailed breakdown of extrabudgetary resources and clear data on cost recovery, including with regard to the ICT services provided to client entities along with the respective amounts (para. VIII.79).

The Office of Information and Communications Technology continues to support web rationalization efforts by making available the enterprise web content management platform, which covers all of the five areas of: accessibility for persons with disabilities, multilingualism, technology standards, security and United Nations branding.

The main websites of www.un.org will be migrated on the platform from disparate legacy technologies. In addition, the platform is available to all authoring entities in the Secretariat, simplifying the building and maintenance of future websites without the need for local/departamental technical web development skills.

Details are provided in the financial performance report for 2022.

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 29D.1 The United Nations Office at Nairobi was established by the Secretary-General on 1 January 1996 as a successor to the United Nations Common Services Unit at Nairobi and the two separate divisions of administration of the United Nations Environment Programme (UNEP) and the United Nations Human Settlements Programme (UN-Habitat). In its resolution [53/242](#), the General Assembly requested the Secretary-General to strengthen the Office and encouraged the Director-General of the United Nations Office at Nairobi to take steps to increase the level of utilization of the Office. The Office was established to strengthen the United Nations presence in Nairobi and to achieve economies of scale. Under a memorandum of understanding and specific service arrangements, the Office provides the Nairobi-based headquarters and globally dispersed offices of UNEP and UN-Habitat with a full range of administrative and other support services. The Office also administers the provision of common services to more than 60 offices of United Nations agencies, funds and programmes operating in or from Kenya and other United Nations system entities, including special political missions and peacekeeping support operations operating from Kenya. As a designated global and regional service provider, the Office provides human resources administration, payroll and finance services, international travel, recruitment of consultants and procurement services to the global resident coordinator system.

Strategy and external factors for 2024

- 29D.2 In 2024, the Office will continue to support its clients within the existing inter-agency and governance frameworks, strive to increase its client portfolio and forge stronger partnerships in the region. It will further advance its engagement in the efficiency agenda of the reform of the United Nations development system, including in common premises, common back office and global shared services architecture, working closely with the Department of Operational Support and the resident coordinator system to extend the support services that it provides. The Office will also increase its level of utilization through partnerships with other United Nations entities, including the Office of the United Nations High Commissioner for Refugees, the United Nations Children's Fund, the Office of the United Nations High Commissioner for Human Rights and the Office for the Coordination of Humanitarian Affairs, as well as the International Court of Justice.
- 29D.3 For 2024, the Office remains committed to maintaining optimal levels of service delivery and will continue to strengthen monitoring of the key performance indicators of all services. To increase the efficiency and effectiveness of its services, the Office will continue to strengthen its financial management and internal control systems and its risk framework. As part of the reform of the United Nations development system, it will leverage best practices, eliminate overlaps and generate synergies and coherence with a view to expanding the service base. It will maintain operational agility and adapt to the environment following the coronavirus disease (COVID-19) pandemic and encourage and support its clients to do the same. A communications strategy, including regular surveys and a client relations management platform, will also be implemented, facilitating feedback from current and potential clients in order to refine the services provided.
- 29D.4 Since Nairobi is a main destination in the region for medical evacuations, the Office will continue to provide medical and logistical support to United Nations system entities in the region. The United Nations treatment facility will continue to serve United Nations personnel and other patients.
- 29D.5 Major infrastructure projects, namely the renovation of blocks A to J and the conference facilities, will also remain high on the agenda of the programme. The Office will make greater use of the 142 acres that comprise the Gigiri compound, including through increased use of outdoor spaces and meeting pods.

- 29D.6 The Office will also continue to deepen its engagement with the host country Government in support of its mandate and the clients that it serves. As the main interlocutor with the Government of Kenya, it will play a key coordination role in the establishment of humanitarian hubs for United Nations entities in the region.
- 29D.7 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Nairobi-based organizations of the United Nations common system maintain a commitment to collaborate with the United Nations Secretariat on ongoing activities;
 - (b) The extrabudgetary funding situation of client offices continues to allow for planning and implementation of the Office's activities.
- 29D.8 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. It will support the Secretary-General's system-wide strategy on gender parity by keeping hiring managers and human resources focal points in client entities informed of the impact of selection decisions. The Office will continue to provide guidance to clients on how to integrate gender parity throughout the recruitment process.
- 29D.9 In line with the United Nations Disability Inclusion Strategy, the Office will ensure that all major repairs and replacements at the United Nations complex in Nairobi consider and address accessibility concerns. Moreover, the Office will strengthen an inclusive organizational culture that is supportive of staff members with disabilities and staff who have dependants with disabilities, offering regular training opportunities on disability inclusion, organizing awareness-raising events and providing clear communication of available benefits and entitlements with regard to disabilities for all staff. These activities will be pursued with the active involvement of persons with disabilities and their representative organizations through the common services governance framework.

Impact of the pandemic and lessons learned

- 29D.10 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular the servicing of large meetings that thousands of participants, including representatives of Member States, were expected to attend in person, such as the resumed fifth session of the United Nations Environment Assembly and UNEP@50. Considerations were made regarding the capacity of conference rooms, the size of delegations and the access procedures, which included the incorporation of participants' vaccination status and daily testing. This approach informed the handling of subsequent meetings and events.
- 29D.11 The Office continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including a continued emphasis on the importance of COVID-19 preventive measures, vaccination and reporting while applying a scientific and epidemiologic approach to the support provided. It also includes a significant focus on supporting the mental health and well-being of staff members and their families. Changes in ways of working during the pandemic resulted in efficiencies but also led to a compounding of the significant impact on mental health and occupational health issues caused by the pandemic. The Office will improve access to medical services, increase capacity for mental health preventive services and employ a proactive approach to the mental health needs of staff. In doing so, it will increase its focus on inter-agency collaboration in the provision of medical services for United Nations agencies, funds and programmes not only in Nairobi but also in the region.

Legislative mandates

29D.12 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

53/242	Report of the Secretary-General on environment and human settlements	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
70/255; 72/303	Progress towards an accountability system in the United Nations Secretariat	77/263	Special subjects relating to the proposed programme budget for 2023

Subprogramme 1 Programme planning, finance and budget

General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	42/211	Implementation of General Assembly resolution 41/213
--------	--	--------	--

Subprogramme 2 Human resources management

General Assembly resolutions

58/144	Improvement of the status of women in the United Nations system	73/281	Shifting the management paradigm in the United Nations
63/271	Amendments to the Staff Regulations	77/256	United Nations common system
72/254	Human resources management	77/260	Administration of justice at the United Nations

Subprogramme 3 Support services

General Assembly resolution

69/273	Procurement
--------	-------------

Subprogramme 4 Information and communications technology operations

General Assembly resolutions

57/304	Information and communication technology strategy	69/262	Questions relating to the programme budget for the biennium 2014–2015 (sect. II, Information and communications technology in the United Nations)
63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity	70/238 B	Financial reports and audited financial statements, and reports of the Board of Auditors (sect. II, Report of the Board of Auditors on progress in the handling of information and communications technology affairs in the Secretariat)
63/269	Information and communications technology, disaster recovery and business continuity for the United Nations: arrangements for the secondary data centre at Headquarters		

Deliverables

29D.13 Table 29D.1 lists all cross-cutting deliverables of the programme.

Table 29D.1
Cross-cutting deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	7	7	7
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	3	3	3
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	3	3	3

Evaluation activities

- 29D.14 The evaluation of the Joint Inspection Unit on business continuity management in United Nations system organizations, completed in 2022, has guided the proposed programme plan for 2024.
- 29D.15 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. For example, the Office will review its business continuity performance during the pandemic and identify gaps for corrective measures in 2024. It will also continue to streamline its business continuity management plans, ensure appropriate ownership of all organizational resilience management system components and comply with the system’s monitoring and evaluation regimen and key performance indicators during 2024.
- 29D.16 The Office has made progress in establishing its evaluation functions, and an evaluation by the Office of one of its subprogrammes is planned for 2024.

Programme of work

Subprogramme 1

Programme planning, finance and budget

Objective

- 29D.17 The objective, to which this subprogramme contributes, is to ensure the sound, effective and efficient financial management and reporting by client offices.

Strategy

- 29D.18 To contribute to the objective, the subprogramme will:
- (a) Oversee the financial management and internal control of the regular budget and extrabudgetary funds of the programme and that of its clients;
 - (b) Streamline the financial procedures and workflows of client offices and ensure strict adherence to the Financial Regulations and Rules of the United Nations, including through assurance and visibility of United Nations resources management, monitored by improved financial dashboards for the programme and client entities;
 - (c) Maintain the financial accounts of its clients, improve the financial integrity of data, prepare the financial statements in compliance with International Public Sector Accounting Standards, support the internal and external audit processes, produce accurate and timely financial reports for donors and manage funding arrangements with implementing partners;

- (d) Assist client offices to implement the enhanced delegation of authority framework through training;
- (e) Support client offices in embedding results-based management principles into their operations and by providing financial operation and accounting services for clients;
- (f) Establish appropriate service rates and service requirements and monitor service statistics and client satisfaction.

29D.19 The above-mentioned work is expected to result in:

- (a) Operational efficiency and improved stewardship of donor funds and other resources, through increased transparency and accountability, in accordance with the enhanced delegation of authority framework;
- (b) An unqualified audit opinion of the Board of Auditors for UNEP and UN-Habitat;
- (c) Enhanced visibility for Member States on the impact of their contributions to the programme and the project implementation of client entities.

Programme performance in 2022

Improved use of delegated authority by a global client base

29D.20 The subprogramme, during the 2021–2022 period, provided critical capacity-building support to clients, especially the resident coordinator system, through training on financial processes for staff of the system in the 16 in situ pilot countries (in 2021), in the Africa region (in 53 countries in 2021–2022) and globally (in 2022) during their phased transition to the United Nations Secretariat. The training covered issues related to the source-to-acquire process, travel, requisitioning, certification, the iNeed process and petty cash and provided an overview of the Secretariat’s finance-related standard operating procedures, policies and related Umoja processes. The training provided the knowledge necessary for certifying officers and administrative and executive assistants of the resident coordinator system to perform their roles and delegation of authority in the areas of finance, travel and requisitioning. The subprogramme offered additional ad hoc question-and-answer sessions at the regional and country levels.

29D.21 Progress towards the objective is presented in the performance measure below (see figure 29D.I).

Figure 29D.I

Performance measure: number of staff of the resident coordinator system enabled to better perform their roles using delegation of authority in the areas of finance, travel and requisitioning (annual)

Planned results for 2024

Result 1: improved client relationship management and services to clients

Programme performance in 2022 and target for 2024

29D.22 The subprogramme’s work contributed to the processing and resolving of 27,263 iNeed ticket requests with 98 per cent client satisfaction, which exceeded the planned target of 96 per cent.

29D.23 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29D.II).

Figure 29D.II

Performance measure: number of iNeed tickets and percentage of client satisfaction (annual)

Result 2: improved client experience with fewer payroll corrections

Programme performance in 2022 and target for 2024

29D.24 The subprogramme’s work contributed to 3,925 staff members payrolled, with the number of payroll corrections at 0.7 per cent, which did not meet the planned target of 0.5 per cent. The target was not met owing to gaps in coordination with client offices to ensure that all positions were correctly funded before payroll runs.

29D.25 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29D.III).

Figure 29D.III
Performance measure: percentage of payroll corrections

Result 3: improved management of resources and operational efficiency of clients through the provision of dashboards

Proposed programme plan for 2024

29D.26 The subprogramme has been developing and providing clients with dashboards for substantive process monitoring as well as monitoring of key performance indicators. The dashboards help clients to manage their resources and improve their operational efficiency and allow the subprogramme to monitor quality and improve its service provision.

Lessons learned and planned change

29D.27 The lesson for the subprogramme was the need to expand the management of key performance indicators through the use of dashboards and other analytics to enable continuous improvement and data-driven decision-making for clients and service providers. In applying the lesson, the subprogramme will increase the scope of data available on the dashboards and expand its use to other clients, mainly UNEP, UN-Habitat and the resident coordinator system. The subprogramme will also produce more frequent business intelligence reports to assist clients in monitoring financial transactions and implementation status.

29D.28 Expected progress towards the objective is presented in the performance measure below (see table 29D.2).

Table 29D.2
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Clients use the grants monitoring and grants executive dashboards	Clients use implementing partner monitoring and implementing partner advance details	Clients use the status of position funding dashboard	Clients use the grants and accounts payable key performance indicator dashboards	Clients use improved dashboards integrated with Umoja Analytics and additional key performance indicators on payroll and separation payments

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
				Increased transparency and accuracy through automation in the billing statistics collection and processes

Deliverables

29D.29 Table 29D.3 lists all deliverables of the subprogramme.

Table 29D.3

Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	20	15	30	30
1. Training events on financial topics	20	15	30	30
Publications (number of publications)	2	2	2	2
2. Publications on financial statement volumes for UNEP and UN-Habitat	2	2	2	2
D. Communication deliverables				
Digital platforms and multimedia content: Quarterly Programme Planning, Finance and Budget Section newsletter for client offices.				
E. Enabling deliverables				
Administration: financial management, including risk management and internal control, preparation and implementation of budgets and other resource proposals; management of posts (creation, extension, abolishment and funding); management of 20,000 grants; financial reporting and accounting, including 1,400 donor reports; cash and revenue management; accounting services, including processing for cost recovery; payment and payroll services, disbursements for 4,100 staff/personnel; guidance and advice on all financial matters; management of after-service health insurance claims for approximately 400 staff and their dependants and beneficiaries.				

Subprogramme 2 Human resources management

Objective

29D.30 The objective, to which this subprogramme contributes, is to ensure the acquisition, development and retention of a competent, diverse, adaptable and healthy workforce with the highest standards of efficiency and integrity.

Strategy

29D.31 To contribute to the objective, the subprogramme will:

- (a) Facilitate the recruitment process of personnel for its clients, ensuring fair and competitive recruitment processes;

- (b) Develop and refine tools to streamline the recruitment process, with a focus on process efficiency, and assist hiring managers in their evaluation of candidates, in collaboration with United Nations Headquarters and other offices away from Headquarters;
- (c) Communicate strategically to foster greater interest from women and applicants from underrepresented countries, including through guidance to hiring managers and entities to promote the selection of qualified candidates from these categories;
- (d) Develop and implement diverse training programmes for staff skills and competencies (i.e. language programmes, leadership development, coaching, mentoring and skill- and/or career-specific training), in collaboration with other United Nations entities as well as external partners through jointly held training sessions;
- (e) Develop internal knowledge platforms as a service for human resources and administrative focal points in Nairobi and in client entities at outposted duty stations to facilitate monitoring, reporting and benchmarking of key performance indicators;
- (f) Implement outreach programmes for all staff members, through briefings and intranet platforms, on benefits and entitlements and the related authorization processes;
- (g) Deliver a comprehensive health and well-being programme, including through promotion and awareness-raising on staff mental health and physical well-being, health assessments and advice, and leveraging available knowledge resources at other duty stations, including New York, Vienna and Geneva;
- (h) Provide support to staff from its dedicated United Nations COVID-19 medical facility, both within and outside the duty station, through the provision of medical surge capacity to support medical evacuations.

29D.32 The above-mentioned work is expected to result in:

- (a) Increased knowledge and skills of staff members;
- (b) Standardized services for clients across geographically dispersed locations;
- (c) Improved ability of client entities to respond to their shifting operational requirements;
- (d) Increased staff productivity.

Programme performance in 2022

Successful transition to in-person meetings while ensuring the health of staff and visitors

29D.33 In February 2022, 97 per cent of United Nations personnel had received their primary series of COVID-19 vaccinations, and the roll-out of booster vaccinations commenced. The period also coincided with the resumed fifth session of the United Nations Environment Assembly and the UNEP@50 event between 28 February to 4 March, attracting thousands of delegates. Through the implementation of lessons learned during the pandemic, both events proceeded with no negative impact on health or well-being. In addition, a strategy was developed under the leadership of the COVID-19 Crisis Management Team to support the transition to in-person meetings and events while ensuring the health and safety of staff and visitors to the United Nations premises. The framework was based on the guidelines issued by United Nations Headquarters, and the efforts culminated in the lifting of COVID-19 public health restrictions at the Gigiri compound in September 2022, allowing for unrestricted in-person meetings and access to the compound for all staff and visitors.

29D.34 Progress towards the objective is presented in the performance measure below (see figure 29D.IV).

Figure 29D.IV
Performance measure: transition to in-person meetings while ensuring the health of staff and visitors

Planned results for 2024

Result 1: portfolio of online learning expanded to global clients

Programme performance in 2022 and target for 2024

29D.35 The subprogramme’s work contributed to 3,877 participants in virtual classrooms, which exceeded the planned target of 1,000, and 3,552 participants in self-paced online learning, which did not meet the planned target of 4,500. The target was not met owing to the increased uptake of virtual classroom activities and the high level of compliance with mandatory self-paced training in 2021.

29D.36 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29D.V).

Figure 29D.V
Performance measure: number of participants in self-paced online learning and virtual classroom activities (annual)

Result 2: improved human resources services for a global client base

Programme performance in 2022 and target for 2024

- 29D.37 The subprogramme’s work contributed to 4,300 staff members receiving comprehensive human resources services and to services being delivered in 159 countries, which did not meet the planned target of 4,500 staff members and 160 countries. The target was not met because some potential clients deferred the starting date from 2022 to 2023.
- 29D.38 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29D.VI).

Figure 29D.VI
Performance measure: number of staff members receiving comprehensive human resources services and countries in which services are delivered (annual)

Result 3: increased effectiveness and efficiency of the staff recruitment process

Proposed programme plan for 2024

- 29D.39 The subprogramme has been expanding its recruitment services, focusing on increasing the effectiveness of service delivery to clients. It has continued to expand its use of technology and data analysis to ensure informed decision-making by clients. One critical step was the development of a new dashboard with key performance indicators, which has been made available to clients to monitor service quality.

Lessons learned and planned change

- 29D.40 The lesson for the subprogramme was the need to strengthen its capacity to adapt and provide a rapid response to the varied demands of clients that operate within tight deadlines because of the specificity of their programmatic mandates. In applying the lesson, the subprogramme will expand the capacities of its talent acquisition team in order to better understand and respond to the specific needs of clients and will improve the effectiveness and efficiency of recruitment processes through capacity-building for all stakeholders, including hiring managers and central review bodies, to ensure the adoption of the various innovations in the recruitment platform.
- 29D.41 Expected progress towards the objective is presented in the performance measure below (see figure 29D.VII).

Figure 29D.VII
Performance measure: percentage of recruitment processes completed within established timelines

Deliverables

29D.42 Table 29D.4 lists all deliverables of the subprogramme.

Table 29D.4
Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: first-level review in administration of justice process; newsletters on human resources matters, training on competencies, substantive and technical skills, languages and communications programmes and career development for 5,300 participants; performance management; inter-agency coordination on learning in support of Nairobi-based United Nations entities; administration of 80 tests; 25 health campaigns, including in relation to the mental health strategy; talent acquisition (approximately 600 recruitment actions for staff); classification of approximately 300 positions within client programmes and advertisement of job openings; expert advice and guidance on staff selection processes, staff and non-staff hiring; offer management; annual staff survey on cost of living, maximum rent levels and local salary surveys; staff pay and benefit services; expert advice and guidance on human resources policies to all clients, including on the administration and implementation of the Staff Rules and Regulations, entitlements and benefits; administration of workforce, from onboarding to separation of appointment, contracts, benefits and entitlements; medical consultations, advice and awareness programmes; staff counselling services.

Subprogramme 3 Support services

Objective

29D.43 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally sound and effective functioning of client offices with regard to conference and facilities management, host country services, asset management, travel and transportation, mail and pouch services, commercial activities and procurement services, as well as archives and records management.

Strategy

29D.44 To contribute to the objective, the subprogramme will:

- (a) Provide sustainable and efficient solutions with a specific focus on the management of waste, energy, water and wastewater, including through implementation, monitoring and audit of the environmental management system and through training on environmental sustainability and best practices to improve staff awareness;
- (b) Manage clients' changing workspace needs by maximizing usage and optimizing working conditions in the available office space, including through redesign, in consultation with client entities, and through revisions of office space standards, to support the operational requirements of each tenant as the Office continues to roll out flexible workplace strategies;
- (c) Assist clients with the migration from traditional archiving to more efficient filing and technology-based solutions;
- (d) Expand digital transport solutions through an integrated platform for better transport resources utilization and an efficient distribution between internal and external transport service providers, and assist, advise and provide regular training to end users and client approvers of these transport services;
- (e) Provide immediate and effective travel services, especially leading up to major scheduled meetings, by relocating travel personnel to the client offices to establish on-site travel hubs;
- (f) Provide client-centric and solution-oriented procurement services to client entities and continuously strive to maximize value for money with due consideration to whole-life costs and effective international competition, enhanced through extensive geographical outreach and minimized transactional costs;
- (g) Maintain the Office's environmental management system, including requisite International Organization for Standardization (ISO) 14001:2015 pre-certification external audit and post-certification annual surveillance activities, training and awareness.

29D.45 The above mentioned work is expected to result in:

- (a) Improved physical infrastructure, optimized use of space and enhanced environmental management to support a sustainable, safe and flexible working environment;
- (b) Efficient and convenient host country services for all clients, including remote service options to keep clients and staff safe;
- (c) Efficient and convenient digitally enabled transport solutions in use by all clients;
- (d) Efficient and convenient procurement services available virtually to all global clients.

Programme performance in 2022

Client offices' operations enabled across six continents

29D.46 In 2022, the subprogramme strengthened its support to client offices to provide improved procurement solutions, including by applying innovative approaches, best practices and acquisition strategies. For instance, the subprogramme simplified its processes, leveraged digital technology and applied a personalized approach to enhance client outreach and clients' ability to track and monitor their cases. As a result, the number of competitive solicitations increased by almost 70 per cent from the previous year, which in turn contributed to an increased number of contracts successfully established, including those issued to vendors from developing countries.

29D.47 Progress towards the objective is presented in the performance measure below (see figure 29D.VIII).

Figure 29D.VIII
Performance measure: number of competitive solicitations, number of contracts established and percentage of vendors from developing countries (annual)

Planned results for 2024

Result 1: integrated digital transport solution

Programme performance in 2022 and target for 2024

29D.48 The subprogramme’s work contributed to the availability of more business-appropriate flexible digital staff transport services for clients at the United Nations complex, including a new on-demand digital bus and shuttle services model, as well as more environmentally sustainable transport services with the introduction of electric vehicles to the subprogramme’s fleet through UN Fleet, which did not meet the planned target of transportation services available to clients through a single and intuitive platform. The target was not met owing to the change in workplace arrangements brought about by the pandemic, which necessitated addressing a more immediate client need for transition to flexible on-demand transport solutions for staff.

29D.49 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29D.5).

Table 29D.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Significantly reduced need for staff or official transportation owing to the COVID-19 pandemic in 2020	Clients received continued access to digital taxi services during the COVID-19 pandemic	New on-demand digital bus and shuttle services model available to clients	Sustained client satisfaction and engagement through the introduction and operation of appropriate flexible digital transport services	Availability of an integrated digital transport solution, including phased transition of the fleet to electric vehicles
Roll-out of digital taxi and shuttle services delayed to 2021		Three electric vehicles introduced to the subprogramme’s fleet	Launch of electric vehicle fleet services pilot	

Result 2: improved stewardship of physical assets and equipment

Programme performance in 2022 and target for 2024

29D.50 The subprogramme’s work contributed to 67 per cent of serialized items physically verified as at 31 December 2022, which exceeded the planned target of 50 per cent.

29D.51 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29D.IX).

Figure 29D.IX

Performance measure: percentage of serialized items physically verified (annual)

Result 3: improved energy efficiency of the United Nations premises in Nairobi

Proposed programme plan for 2024

29D.52 The subprogramme has been working to make its facilities and operations more environmentally sustainable. In August 2022, the first energy-neutral building, the annex (logistics building), was completed and will have a full year of operation as an energy-neutral building by the end of 2024. In the longer term, it is the aim of the subprogramme that the United Nations premises in Nairobi will be energy-neutral in terms of energy needs, producing as much as is consumed.

Lessons learned and planned change

29D.53 The lesson for the subprogramme was that, in order to achieve energy neutrality, there was a need to focus on incremental improvements by upgrading electrical infrastructure across the complex as part of annual maintenance, such as the replacement of traditional lighting systems to light-emitting diode systems, the introduction of motion sensors and the installation of outdoor solar lighting when completing road and walkway upgrades. In applying the lesson, the subprogramme will ensure that all major approved capital improvement projects, including the replacement of office blocks A to J and the conference facilities upgrade project, are focused on sustainable energy solutions and contribute to the ultimate aim of energy neutrality for the complex.

29D.54 Expected progress towards the objective is presented in the performance measure below (see table 29D.6).

Table 29D.6
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Solar photovoltaic installation completed on the new annex (logistics building)	Annex (logistics building) and solar photovoltaic systems in operation, but used temporarily as swing space	Complete construction/installation of solar photovoltaic systems as part of the new office blocks comprising six office blocks and four logistics blocks Two blocks in the annex (logistics building) to be confirmed as energy-neutral following a full year of operation

Deliverables

29D.55 Table 29D.7 lists all deliverables of the subprogramme.

Table 29D.7

Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: management and maintenance of United Nations-owned land/premises/buildings (140 acres), including its 8 office blocks A–J, 11 office blocks M–X, 8 office blocks for new facilities, for a total of 73 office floors, 14 conference rooms, grounds and other buildings and infrastructure; management of office space, redesign of office layouts and configurations to serve the needs of the United Nations offices, other Secretariat departments and offices of other United Nations entities in Nairobi.

Logistics: receipt and inspection; issuance on average of over 400 laissez-passer and over 16,000 travel requests and other travel documents, travel arrangements for staff and meeting participants; handling of all privileges and immunities for approximately 2,000 entitled staff for 53 United Nations entities subscribed to the host country services provided by the Office on behalf of the Government of Kenya; procurement and sourcing support for the acquisition of goods and services; issuance of over 5,000 purchase orders per year for goods and services; advice on verification of financial and non-financial inventories, warehousing and disposal; shipment of official property, bulk consignments for conferences, and the removal of personal effects and related insurance requirements; mail, pouch, distribution, registry and archiving services.

Subprogramme 4 Information and communications technology operations

Objective

29D.56 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities’ substantive programmes through innovative technology solutions, while maintaining secure, coherent and resilient technology services and infrastructure backbone.

Strategy

29D.57 To contribute to the objective, the subprogramme will:

- (a) Develop proposals for end-to-end software and hardware solutions in consultation with client entities and provide advice and technical support on the implementation of new technologies;
- (b) Establish and maintain business relationships with clients with a focus on the management of clients’ needs and requests;
- (c) Develop and enhance existing innovative processes to enable testing and adoption of new technologies and solutions while supporting the accessibility, reliability, consistency and sustainability of those solutions;
- (d) Collaborate closely with the Department for General Assembly and Conference Management in Nairobi, and with other subprogrammes to align and centralize under this subprogramme the end-to-end responsibilities of technical audiovisual services, engineering support and information and communications technology (ICT) infrastructure services for conference services at the Office.

29D.58 The above-mentioned work is expected to result in:

- (a) Fulfilment of client entities’ business needs through the agile implementation of new and innovative technologies;
- (b) Empowerment of client entities to make effective decisions through access to more timely and responsive services;
- (c) Effective and efficient implementation of client entities’ substantive programmes.

Programme performance in 2022

Enhanced information security through enterprise directory services

29D.59 Users at the Office were using a local directory for authentication for systems and applications with a username and password, which were vulnerable to threats. In 2022, the subprogramme supported client offices in migrating to enterprise directory services, which contributed to enhancing the information security posture of the Office and its major clients. The added advances provided single sign-on, multi-factor authentication and centralized risk vulnerability management, made remote working more secure and centralized end-point management with a global configuration.

29D.60 Progress towards the objective is presented in the performance measure below (see figure 29D.X).

Figure 29D.X

Performance measure: number of devices migrated to enterprise directory services (cumulative)

Planned results for 2024

Result 1: access to information and communications technology services by a larger client base

Programme performance in 2022 and target for 2024

- 29D.61 The subprogramme's work contributed to 52 United Nations entities with access to ICT services provided by the subprogramme, which exceeded the planned target of 50 entities.
- 29D.62 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29D.XI).

Figure 29D.XI

Performance measure: number of United Nations entities with access to information and communications technology services (cumulative)

Result 2: intuitive service experience and assured service availability for clients

Programme performance in 2022 and target for 2024

- 29D.63 The subprogramme's work contributed to the integration of clients' needs into a Secretariat-wide service catalogue and expanded use of the current client relationship management platform through a pilot for the resident coordinator system, which met the planned target.
- 29D.64 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29D.8).

Table 29D.8

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Clients used digital forms in the client relationship management software to capture data and create reports in a fragmented manner	Clients have access to digital forms and added workflow applications, with basic reporting on data captured A client survey on the effectiveness of the catalogue informs the selection of a new	Clients' needs are fully integrated into a Secretariat-wide catalogue ready for migration to new client relationship management software	Business agility, better innovation and increased security for clients through a unified client relationship management platform	Business agility and increased visibility for clients through streamlined processes for the submission and monitoring of requests, and enhanced service management reporting

Section 29D Administration, Nairobi

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
	client relationship management software			

Result 3: strengthened security of information and communications technology for the Office and its clients

Proposed programme plan for 2024

29D.65 The subprogramme provides the tools necessary to align information technology governance with the enterprise risk management system and organizational goals, following best practices and auditors’ advice, to ensure that clients can embrace new technologies while mitigating potential risks.

Lessons learned and planned change

29D.66 The lesson for the subprogramme, based on security assessments conducted in 2022, was the need to better align information technology governance, information security and enterprise risk management throughout the entity with Secretariat policies, procedures and guidelines. In applying the lesson, the subprogramme will develop and implement a mechanism to consolidate and track the implementation of actions to address vulnerabilities. It will identify a baseline of the common information security maturity level across the entity and build upon it iteratively following established maturity models to reach the goal of compliance with the reference information security standard set by the Secretariat. The subprogramme will also conduct training and awareness-raising campaigns on ICT security to equip managers to make risk-informed decisions and have a better understanding of the risks posed by the adoption of new technologies.

29D.67 Expected progress towards the objective is presented in the performance measure below (see table 29D.9).

**Table 29D.9
Performance measure**

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Security was operational following Secretariat-wide policies with a focus on increased remote working	Integration of vulnerability management and vulnerability assessments in compliance with Office of Information and Communications Technology policies	Nairobi-based ICT systems’ security maturity strengthened by several security maturity level assessments and addressing the related critical recommendations	Nairobi-based ICT systems further strengthened by implementing the remaining recommendations and findings from 2022	Clients adopt best practices to improve ICT security, leading to a 10 per cent reduction in the risk of information security breaches

Deliverables

29D.68 Table 29D.10 lists all deliverables of the subprogramme.

Table 29D.10

Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: security for information technology systems and data for 52 United Nations entities; technical support to 2,600 end users; personal computing, voice, video and data communication services with 3,700 virtual phone extensions; information security compliance, software distribution and printing services for 2,300 users; network connectivity services to 26 clients, with an average of 1,000 network ports connected; cloud and data centre hosting services covering 318 physical server units and 148 virtual machines; operation and maintenance of 15 application systems in a secure environment; maintenance of 3,000 information technology equipment items; 2 outreach campaigns for staff.

B. Proposed post and non-post resource requirements for 2024

Overview

29D.69 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 29D.11 to 29D.13.

Table 29D.11

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2022 expenditure	2023 appropriation	Changes				2024 estimate (before recosting)

29D.70 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 29D.14 to 29D.16 and figure 29D.XII.

29D.71 As reflected in tables 29D.14 (1) and 29D.15 (1), the overall resources proposed for 2024 amount to \$15,279,300 before recosting, reflecting a net decrease of \$3,735,300 (or 19.6 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29D.72 As reflected in table 29D.14 (1), resource changes reflect a decrease of \$3,513,200, as follows:

Subprogramme 3, Support services. The decrease relates to the removal of non-recurrent requirements approved in 2023 by the General Assembly in its resolution [77/263](#) relating to the provision for project management costs of the major construction projects for: (a) the replacement of office blocks A to J at the Office (\$1,214,800); and (b) addressing the deteriorating conditions and limited capacity of the conference services facilities at the Office (\$2,298,400). The related resource requirements for 2024 will be presented later in the year as part of the progress reports on the construction projects.

Other changes

29D.73 As reflected in table 29D.14 (1), the net effect of the proposed changes is a reduction of \$222,100. The breakdown of changes is as follows:

Executive direction and management. The cost-neutral changes reflect the proposed conversion of two temporary positions (one Programme Management Officer (P-4) and one Administrative Assistant (LL)) to established posts. Additional information is provided in annex III;

Subprogramme 3, Support services. The decrease of \$222,100 relates mainly to reduced requirements under general operating expenses as a result of temporary premises closures due to planned construction work (\$122,100), and the phased completion of fully refurbished premises and facilities (\$100,000).

Extrabudgetary resources

29D.74 As reflected in table 29D.14 (2) and 29D.15 (2), extrabudgetary resources amount to \$25,615,500. The resources would complement regular budget resources and would be used mainly to support various activities in relation to administrative support, common services and commercial operations provided to UNEP, UN-Habitat and the resident coordinator system, as well as to all United Nations agencies, funds and programmes located in Nairobi.

29D.75 The extrabudgetary resources under the present section are subject to the oversight of the Director-General of the Office, who has delegated authority from the Secretary-General.

Executive direction and management

29D.76 The executive direction and management component comprises the Office of the Director of Administration and the Organizational Resilience Management Unit.

29D.77 The overall responsibilities of the executive direction and management component include the overall direction, supervision and management of administrative and related support services provided by the Office to its client organizations.

29D.78 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office is integrating environmental management practices into its operations. The Office broadened its waste management and recycling initiatives by obtaining the ISO 14001:2015 certification in environmental management systems in

Part VIII Common support services

January 2023. The certification is focused on operations such as energy, water, wastewater and waste management in relation to facilities, safety, catering, medical, conferencing, printing and publication services on which the Office will continue to focus from an environmental sustainability perspective.

29D.79 Information on the timely submission of documentation and advance booking for air travel is reflected in table 29D.17. In 2022, the travel compliance rate was affected by factors including urgent requests or requests requiring coordination with multiple stakeholders, and emergencies such as medical evacuation and escort. The Office will continue to improve the planning and monitoring of its travel, combined with communications for awareness-raising and regular review of the operational processes, including certification and approval, to fully comply with the advance booking policy for air travel. The Office did not submit parliamentary documents to the Department for General Assembly and Conference Management and does not plan to submit any such reports in 2024.

29D.80 The proposed regular budget resources for 2024 amount to \$861,300 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29D.18 and figure 29D.XIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29D.81 Extrabudgetary resources for this component amount to \$208,500. The resources would complement regular budget resources and would be used mainly to enable cross-cutting coordination activities related to the administrative, common services and commercial operations support provided to UNEP, UN-Habitat and the resident coordinator system, as well as common services administration to all United Nations agencies, funds and programmes located in Nairobi.

Programme of work

Subprogramme 1

Programme planning, finance and budget

29D.82 The proposed regular budget resources for 2024 amount to \$2,764,000 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29D.19 and figure 29D.XIV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29D.83 Extrabudgetary resources for this subprogramme amount to \$6,150,300. The resources would complement regular budget resources and would be used mainly to support financial management and internal control of the financial resources of the Office and that of its clients, as well as budgetary and financial administration of the common services provided to all United Nations agencies, funds and programmes located in Nairobi.

**Subprogramme 2
Human resources management**

29D.84 The proposed regular budget resources for 2024 amount to \$2,471,600 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29D.20 and figure 29D.XV.

Extrabudgetary resources

29D.85 Extrabudgetary resources for this subprogramme amount to \$7,103,700. The resources would complement regular budget resources and would be used mainly to support human resources management for the Office’s core clients and to provide other common services (medical services, staff training and language programmes) to all United Nations agencies, funds and programmes located in Nairobi.

Subprogramme 3 Support services

29D.86 The proposed regular budget resources for 2024 amount to \$7,658,800 and reflect a decrease of \$3,735,300 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 29D.72 and 29D.73. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29D.21 and figure 29D.XVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29D.87 Extrabudgetary resources for this subprogramme amount to \$8,164,700. The resources would complement regular budget resources and would be used mainly to provide support services (supply

chain, procurement and property management) for the Office’s core clients and various common services (including facility management, transportation and host country services) to all United Nations agencies, funds and programmes located in Nairobi.

Subprogramme 4 Information and communications technology operations

29D.88 The proposed regular budget resources for 2024 amount to \$1,523,600 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29D.22 and figure 29D.XVII.

(Number of posts/thousands of United States dollars)

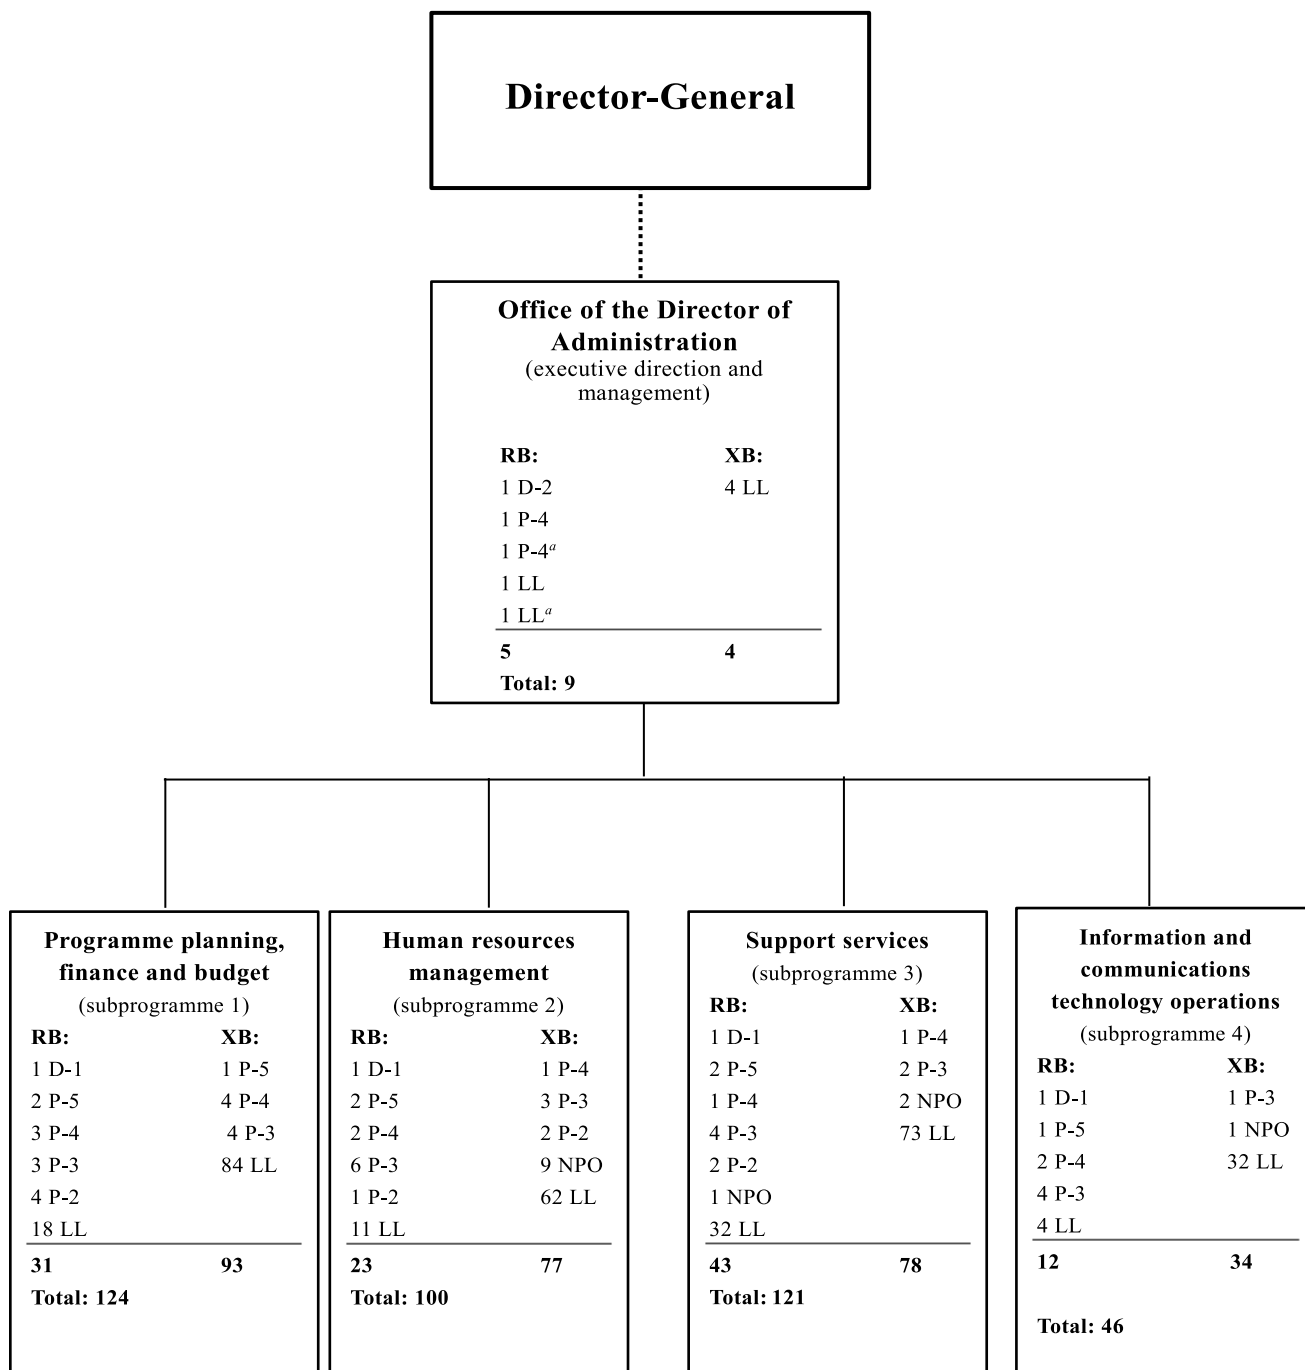

Extrabudgetary resources

- 29D.89 Extrabudgetary resources for this subprogramme amount to \$3,988,400. The resources would complement regular budget resources and would support various ICT activities (technology and information technology infrastructure solutions) to all United Nations agencies, funds and programmes located in Nairobi.
- 29D.90 The expected increase of \$254,800 is attributable to additional 6 Local level positions and related non-post resources that were previously reported under section 2, General Assembly and Economic and Social Council Affairs and conference management, in order to centralize under the Information and Communications Technology Services at the Office the end-to-end responsibilities for technical audiovisual services, engineering support and ICT infrastructure for conference services at the Office.

Annex I

Organizational structure and post distribution for 2024

^a Conversion from general temporary assistance positions.

Abbreviations: LL, Local level; NPO, National Professional Officer; RB, regular budget; XB, extrabudgetary.

Annex II

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Board of Auditors

A/77/5 (Vol. 1), chap. II

The Board recommends that the Administration conduct a comprehensive analysis of the root causes of the significant amount of accumulated surplus and take appropriate action to ensure that the overall fund balance is maintained at an appropriate level in accordance with the relevant policy and guidelines. The Board also recommends that the Administration review and clear old or non-functioning fund centres and attribute the unassigned accumulated surpluses to the relevant departments (paras. 36 and 37).

The Board recommends that the Administration comply with relevant cost-recovery policies and guidelines to charge for necessary and reasonable costs only (para. 41).

The Board recommends that the Administration request entities to monitor consultant expenditure funded through all resources, including the regular budget, other assessed and extrabudgetary resources, strengthen long-term capability-building of internal staff and gradually reduce the reliance on consultants (para. 114).

Advisory Committee of Administrative and Budgetary Questions

A/77/7

The Advisory Committee trusts that a more detailed breakdown of services provided to entities along with the recording of these resources will be included in the next budget submission (para. VIII.141)

The Advisory Committee trusts that updated information on expenditures incurred and the future use of the United Nations coronavirus disease (COVID-19) hospital will be provided to the General Assembly at the time of its consideration of the report and in the next budget submission (para. VIII.144).

The United Nations Office at Nairobi continues to undertake analysis for the accumulated surplus as it serves as a critical reserve to ensure the sustainability of services (including working capital requirements), provide for future end-of-service liabilities and supplement the multi-year capital expenditure for the Office's buildings and facilities.

The Office continues to comply with the relevant cost-recovery policies and guidelines and to strengthen its quality assurance capacity to ensure compliance.

The Office continues to monitor consultant expenditure funded through all sources of funding with the aim of gradually reducing the reliance on consultants.

This is addressed in the context of the financial performance report for 2022.

Some \$7 million in expenditure was incurred for the purposes of hospitalization and care for staff and dependants infected by COVID-19 during the review period. Following the diminished COVID-19 case load, the Office discussed the repurposing of the facility with the Nairobi Hospital. The proposal envisages the facility providing for infectious disease response and as a level 3 trauma referral centre of excellence with critical care surge capacity. The proposed expanded functionality is being reviewed by the Kenyan Medical and Dental Practitioners Council, the government entity responsible for the certification of all medical facilities in Kenya.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-4	Conversion of Programme Management Officer from temporary position to post	These two temporary positions, funded under general temporary assistance, were established in the Organizational Resilience Management Unit in June 2013 pursuant to General Assembly resolution 67/254 . The establishment of the two positions was an essential ongoing requirement for the United Nations Office at Nairobi to ensure resilience, business continuity and risk mitigation. The criticality of the functions has been proven, especially during critical security threats and health emergencies. Taking into account the proven need for the functions undertaken under the temporary positions for a long period of time, it is proposed that they be established as posts.
Executive direction and management	1	LL	Conversion of Administrative Assistant from temporary position to post	

Abbreviation: LL, Local level.

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 29E.1 The United Nations Office at Geneva was established in 1947 pursuant to General Assembly resolution 24 (I) and successive resolutions of the Assembly. The Office is responsible for providing administrative and support services to entities in Geneva and their field offices, and to other organizations of the United Nations common system, in accordance with policies, procedures and practices established by the Under-Secretary-General for Management Strategy, Policy and Compliance, the Under-Secretary-General for Operational Support and the Assistant Secretary-General/Chief Information Technology Officer. The Office is also responsible for providing support services to the intergovernmental processes of the Organization in line with its role as a major conference centre for international diplomacy. This includes providing technical conference support services as part of the conferencing ecosystem, which enables the work of Member States and client entities.

Strategy and external factors for 2024

- 29E.2 The Office will continue to provide administrative and support services, including direction, management and coordination in the areas of human resources, financial and budgetary resources, information and communications technology (ICT), central support services and library services at the United Nations Office at Geneva. This includes the management and utilization of United Nations premises and the coordination of human resources, finance and administrative policies with other Geneva-based organizations. The Office will carry out and monitor the implementation of policy and other functions related to the above-mentioned areas, as determined by the Under-Secretaries-General referred to in paragraph 29E.1 above. It will provide financial, budgetary and accounting services, as well as guidance and advice, in accordance with the Financial Regulations and Rules of the United Nations and relevant standards. In addition, the Office will provide staff development and learning services, career support and counselling, staff welfare activities, medico-administrative services, and human resources legal advisory services.
- 29E.3 The Office will continue to play a critical role in supporting United Nations meetings. From providing audiovisual support and maintaining conference rooms and equipment to providing services to the Division of Conference Management in the areas of human resources, information technology and financial management, the Office is an essential component of the conferencing ecosystem in Geneva.
- 29E.4 The Office will also continue to provide administrative and support services for specialized agencies and provide procurement, commercial activities, transportation, travel and other central support services. It will also provide travel, procurement support and assistance in the hiring of consultants to 17 resident coordinator offices in Europe in support of the development pillar. In addition, the Office will provide regional ICT services and library, records, archives and knowledge services in support of the implementation of the mandated programmes and activities of the Secretariat. The Office will further ensure proper coordination and implementation of the recommendations of oversight bodies at the Office, as well as the business continuity of administrative support for other entities in Geneva in emergency cases.
- 29E.5 The Office will continue to implement activities across all subprogrammes to support the Secretary-General's reform initiatives. Examples of initiatives supported include implementing statements of internal control; mainstreaming risk management; harmonizing global operational processes; providing training and support to foster a work environment of civility and respect; supporting digital transformation, the Secretary-General's strategy on new technologies and the Data Strategy of the

- Secretary-General for Action by Everyone, Everywhere; and providing training to support the resident coordinator system. Further details are included under each subprogramme.
- 29E.6 Physical renovation works at the historic buildings of the Palais des Nations under the strategic heritage plan are projected to continue into 2025. These works will strive for the highest standards of accessibility and the elimination of barriers, while preserving the principles of the original design and historical features of existing buildings.
- 29E.7 The Office will proactively optimize space utilization to create opportunities to accommodate additional entities at the Palais des Nations. The Office will also analyse operation and maintenance requirements of the buildings post-strategic heritage plan to ensure the best mix of internal and contractual resources to efficiently manage these buildings and their technologically advanced components. Lastly, the Office will also move forward with introducing modern preventive and regular building maintenance regimes to properly safeguard Member States' significant investment in the context of the strategic heritage plan.
- 29E.8 For 2024, the Office's planned deliverables will further ensure business continuity for client entities and Member States in preparation for possible crises and to support "next normal" planning efforts, incorporating lessons learned from the coronavirus disease (COVID-19) pandemic. Such planned deliverables and activities include leadership, in coordination with the host country, the French authorities, Member States and international organizations in Geneva, of the management of and response to any new crisis issues; human resources, medical and mental health support to staff and clients through the staff counsellor and online client services; protective measures to ensure a safe environment for personnel and clients and the safe servicing of meetings and conferences; communication to staff, clients and stakeholders informing them of the most recent developments; and the provision of online service offerings, where feasible.
- 29E.9 With regard to inter-agency coordination and liaison, the Office will collaborate with other Geneva-based United Nations system organizations and international governmental organizations, coordinating the Common Procurement Activities Group and the work related to the common system. As the provider of secretariat services to the Group, the Office will coordinate and expand the Group's undertakings, combining major procurement activities of its 20 Geneva-based members. The Office will also contribute to the Department of Operational Support-led global operational support architecture initiative, established to help to streamline global administrative service provision and strengthen its delivery. The Office will work closely with other facilities managers of international organizations in Geneva to enhance inter-agency coordination on relevant policies and procedures. The Office will further collaborate with other United Nations libraries to digitize the official documents of the United Nations and will advance the streamlining of library activities, which will benefit from a common library management system used by the libraries at the Office, United Nations Headquarters, the Economic Commission for Latin America and the Caribbean and the Economic and Social Commission for Asia and the Pacific.
- 29E.10 With regard to the external factors, the overall plan for 2024 is based on the planning assumption that client offices will have sufficient extrabudgetary resources for services provided by the United Nations Office at Geneva.
- 29E.11 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. It will contribute to improving gender equality in 2024, in line with the Secretary-General's system-wide strategy on gender parity (see General Assembly resolution [76/142](#)), through consultations and briefings to hiring managers and human resources focal points in client entities regarding the impact of selection decisions, including advice on targeted outreach on job openings through established human resources networks and the targeted promotion of career opportunities in the United Nations, to improve equitable geographical representation and gender equality in the Organization.
- 29E.12 In line with the United Nations Disability Inclusion Strategy, in 2024 the Office will continue its signage and disability access works throughout the grounds and buildings of the Palais des Nations to eliminate physical, communication and technical barriers and to enable the reasonable accommodation of persons with disabilities. The Office will also carry out an initiative to assess the level of disability inclusion for ICT solutions available to Geneva client entities.

Programme performance in 2022

Impact of the pandemic and lessons learned

- 29E.13 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular under subprogrammes 2 and 5. Many in-person training sessions were cancelled and many activities were delivered virtually or in a hybrid format, and the Client Support Centre operated virtually until May 2022. Supply chain disruptions affected both subprogramme 3, delaying deliveries for construction projects, and subprogramme 4, delaying the delivery of equipment for regular work. In addition, in order to support clients and Member States on issues related to the pandemic, within the overall scope of the objectives the programme provided staff and clients with human resources, medical and mental health support and the servicing of safe meetings and conferences, as described in paragraph 29E.8 above.
- 29E.14 The Office continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including noting the lessons learned regarding the importance of ensuring readiness and business continuity preparedness for other foreseeable, high-impact eventualities, and preparing a response plan at an early stage to address a potential energy crisis over the winter of 2022–2023 on the basis of the host country's strategy. In addition, the Office incorporated online training and servicing modalities into all service offerings, where feasible, and responded to the requests of Member States for the provision of support for virtual and hybrid modalities for meetings with interpretation, subject to resources made available. In 2024, the Office will continue to incorporate these lessons learned and best practices.

Legislative mandates

- 29E.15 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

24 (I)	Transfer of certain functions, activities and assets of the League of Nations	77/263	Special subjects relating to the proposed programme budget for 2023
70/255; 72/303	Progress towards an accountability system in the United Nations Secretariat		

Subprogramme 1 Programme planning, finance and budget

General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	77/267	Shifting the management paradigm in the United Nations: review of changes to the budgetary cycle
42/211	Implementation of General Assembly resolution 41/213		

Subprogramme 2 Human resources management

General Assembly resolutions

58/144	Improvement of the status of women in the United Nations system	73/281	Shifting the management paradigm in the United Nations
63/271	Amendments to the Staff Regulations	77/256	United Nations common system
72/254	Human resources management	77/260	Administration of justice at the United Nations

**Subprogramme 3
Support services**

General Assembly resolutions

58/263	Report of the Joint Inspection Unit on the revenue-producing activities of the United Nations system	58/277	Report of the Joint Inspection Unit on the management audit review of outsourcing in the United Nations and the United Nations funds and programmes
58/276	Outsourcing practices	69/273	Procurement

**Subprogramme 4
Information and communications technology operations**

General Assembly resolutions

57/304	Information and communication technology strategy	63/269	Information and communications technology, disaster recovery and business continuity for the United Nations: arrangements for the secondary data centre at Headquarters
63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity	69/262	Questions relating to the programme budget for the biennium 2014–2015 (Sect. II, Information and communications technology in the United Nations)

**Subprogramme 5
Library services**

General Assembly resolution

356 (IV)	Budget appropriations for the financial year 1950
----------	---

Deliverables

29E.16 Table 29E.1 lists all cross-cutting deliverables of the programme.

Table 29E.1

Cross-cutting deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	5	5	5
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	2	2	2
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	2	2	2

Evaluation activities

29E.17 The evaluation of the United Nations Office at Geneva Client Support Centre, completed in 2022, has guided the proposed programme plan for 2024. The objective of the evaluation was to determine whether the Centre remained relevant and effective in the post-COVID environment, in which many staff avail themselves of flexible working arrangements.

29E.18 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. For example, in 2024 the Office will work towards achieving the optimal

balance between remote work and remote servicing. To that end, the Office will implement the lessons learned and recommendations from the 2022 evaluation and subprogramme 1 will coordinate their implementation for the period 2023–2025. (See subprogramme 1, result 3, below, for further details.)

- 29E.19 An evaluation on the activities supporting mental health at the United Nations Office at Geneva is planned for 2024.

Programme of work

Subprogramme 1

Programme planning, finance and budget

Objective

- 29E.20 The objective, to which this subprogramme contributes, is to ensure sound, effective and efficient financial management by client offices.

Strategy

- 29E.21 To contribute to the objective, the subprogramme will:
- (a) Monitor budget implementation, report budget and financial information and conduct financial management and accounts control by coordinating with Headquarters and providing timely advice to client entities regarding a broad range of financial services, spanning from payments and disbursements services to payroll, accounting, medical insurance, and trust funds and budget management;
 - (b) Provide assistance, guidance and training to programme managers and administrative units of client organizations on financial management and budgetary matters;
 - (c) Perform financial and administrative procedures, including internal financial controls and monitoring strict compliance with the Financial Regulations and Rules of the United Nations and the financial policies of the United Nations;
 - (d) Identify ways to achieve a faster and more efficient client response, including through digital transformation and innovative tools in line with the Secretary-General's strategy on new technologies;
 - (e) Monitor the implementation of oversight bodies' recommendations.
- 29E.22 The above-mentioned work is expected to result in improved integrity of financial data and enhanced overall management of programme budget and extrabudgetary resources.

Programme performance in 2022

States parties receive credits facilitated through revised financial rules for disarmament conventions

- 29E.23 The subprogramme supports the Office for Disarmament Affairs in preparing assessed contributions and final billings on the basis of actual expenditure for activities of the Geneva-based disarmament conventions. Although the conventions are funded outside the regular budget through contributions from States parties and observer States, some of the financial rules of the conventions were incompatible with the Financial Regulations and Rules of the United Nations, which prevented the closure of projects and the processing of refunds to States.
- 29E.24 The subprogramme worked with the Office for Disarmament Affairs to raise the awareness of States of the issue, giving regular briefings and presentations with options available to address the problem. Together with the Office for Disarmament Affairs and interested States, the subprogramme

developed language for amendments to the financial rules of the conventions that could be adopted by States parties. The amendments, which allow States to be refunded on the basis of cash available, were gradually adopted.

29E.25 Progress towards the objective is presented in the performance measure below (see table 29E.2).

Table 29E.2
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Member States have their awareness raised regarding the issue	Discussions with Member States on the topic continued	<ul style="list-style-type: none"> • States parties amended the financial rules of the conventions • States parties that had paid their assessment for projects from 2018 to 2021 received refunds to the extent that cash was available for those projects

Planned results for 2024

Result 1: improved oversight and visibility of risk management practices through monitoring of the implementation of the statement of internal controls and risk treatments

Programme performance in 2022 and target for 2024

29E.26 The subprogramme’s work contributed to the consolidation of all identified risks from both internal and external audits, as well as the risk control matrices and the enterprise risk management risk registers, leading to improved oversight and visibility of risk management through unified monitoring of risks and treatments, which met the planned target.

29E.27 The subprogramme’s work also contributed to providing managers with a more Organization-centric risk management perspective thanks to the consolidation of and follow-up on all risks within the United Nations Office at Geneva in one report that is regularly shared with all managers, which met the planned target.

29E.28 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29E.3).

Table 29E.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Risk control matrices inform a uniform approach to treating risks	Strengthening of the Organization-wide risk management system and updating of the risk management dashboard to capture a wider array of risks and treatments	<ul style="list-style-type: none"> • Improved oversight and visibility of risk management through the unified monitoring of risks and treatments • Managers have a more Organization-centric risk management perspective 	<ul style="list-style-type: none"> • Enhancements are available on a new risk management tool and dashboard, based on management feedback • Managers use a corporate enterprise risk management system to manage risks 	Managers have access to upgraded risk management dashboard following implementation of new corporate enterprise risk management system

Result 2: tailored and targeted operational monitoring through customized financial dashboards
Programme performance in 2022 and target for 2024

- 29E.29 The subprogramme’s work contributed to the development of customized dashboards for four United Nations Office at Geneva clients to facilitate their ability to monitor accounts and operations through specific financial indicators and the provision to clients of demonstrations of their new dashboards so that they could be further tailored to their needs, which met the planned target.
- 29E.30 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29E.4).

Table 29E.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Clients access additional standardized financial reports	Clients access additional standardized financial reports	Four clients with access to customized dashboards to facilitate their ability to monitor accounts and operations through specific financial indicators	Five additional clients access customized dashboards to facilitate their ability to monitor accounts and operations through specific financial indicators	Clients have access to customized dashboards with amendments to ensure continued relevance of financial indicators

Result 3: improved client service at Client Support Centre
Proposed programme plan for 2024

- 29E.31 In 2018, the United Nations Office at Geneva launched the Client Support Centre to consolidate service offerings of subprogrammes 1, 2, 3 and 4 in a single location. The Centre reopened in May 2022, following its closure due to the COVID-19 pandemic, at its new, temporary location in building H. In mid-2022, the subprogramme conducted an evaluation of the Centre and concluded that the provision of in-person service remained relevant in a post-COVID environment and provided recommendations on how to improve effectiveness. The subprogramme shared preliminary findings with the Centre’s service providers.

Lessons learned and planned change

- 29E.32 The lesson for the subprogramme informed by the evaluation recommendations was that many recommendations applied to all service providers and that, without a centralized mechanism to coordinate implementation, progress would stall. In applying the lesson, the subprogramme will act as coordinator for implementing recommendations relevant to all service providers. This will include assisting in the implementation of an improved telephone solution and equipping service providers with the data and tools required to optimize their offerings.
- 29E.33 Expected progress towards the objective is presented in the performance measure below (see table 29E.5).

Table 29E.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Clients are serviced remotely	Clients are serviced remotely	Clients have access to both in-person and remote services	Clients have access to improved telephone support	Clients have more optimized service offerings

Deliverables

29E.34 Table 29E.6 lists all deliverables of the subprogramme.

Table 29E.6

Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: financial management, risk management and internal control, and preparation and implementation of resource proposals; management of more than 700 posts across all funding sources (creation, extension, abolition and funding); financial reporting and accounting; cash and revenue management; management of service arrangements with almost 50 client entities, including quarterly cost-recovery billing across more than 120 service lines; processing of payroll for some 7,500 staff members across the globe per month and more than 300,000 payments and disbursements annually; provision of guidance and advice on all budgetary and financial matters; provision of medical insurance to more than 35,000 staff, retirees and dependents; processing of more than 455,000 medical invoices annually; administration of compensation claims; and organization of quarterly client board meetings.

Subprogramme 2 Human resources management

Objective

29E.35 The objective, to which this subprogramme contributes, is to ensure a competent, diverse, adaptable and healthy workforce, to advance the highest standards of efficiency, competence and integrity and to ensure resilient organizational change.

Strategy

29E.36 To contribute to the objective, the subprogramme will:

- (a) Support clients in talent acquisition and development by creating an enabling work environment, providing advisory services to clients, developing internal human resources analytics capabilities aligned to the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, and paying special attention to staff welfare and mental health;
- (b) Promote multilingualism and provide learning and development activities such as training sessions and briefings on performance management, innovation and flexibility, navigation of workplace changes and the creation of a harmonious workplace;
- (c) Generate new opportunities for learning and knowledge exchange through the Knowledge and Learning Commons by partnering with the Library at the United Nations Office at Geneva;
- (d) Work with the human resources subnetwork of the Security Management Team to ensure a coherent approach to common human resources issues and challenges.

29E.37 The above-mentioned work is expected to result in:

- (a) Empowered decision-making based on enhanced business insight;
- (b) Improved capacity of staff to successfully navigate workplace changes, embrace innovation and adopt new ways of working;
- (c) Improved capacity of teams to work in a more agile and flexible manner;
- (d) Increased awareness of the existing mechanisms to address improper conduct and of the individual responsibility of staff to foster a harmonious work environment.

Programme performance in 2022

Strengthened performance management culture and greater accountability for staff and managers

29E.38 A new upward feedback system was implemented globally for all directors, and staff were evaluated against workplans with a revised format to improve team interaction and adaptability. To ensure a smooth transition, the subprogramme strengthened its support to staff, managers and teams by delivering briefings on performance management (23 in 2022), facilitating discussions between managers and teams on effective feedback (7 in 2022) and training teams to be more agile and adaptive (12 in 2022), and by strengthening support to panels reviewing rebuttal requests. The transition to the new performance management system has been well accepted by staff and managers.

29E.39 Progress towards the objective is presented in the performance measure below (see table 29E.7).

Table 29E.7

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Managers and staff receive targeted support on performance management, upon request	Managers and staff receive targeted support on upcoming new performance management approaches	Strengthened performance management culture and greater accountability for staff and managers through the establishment of a new upward feedback system

Planned results for 2024

Result 1: increased civility and respect in the workplace

Programme performance in 2022 and target for 2024

29E.40 The subprogramme’s work contributed to closer collaboration with all relevant United Nations Office at Geneva stakeholders responsible for conflict resolution, which did not meet the planned target of the establishment of an informal network for conflict resolution on a pilot basis. The target was not met owing to a change in approach following insight provided by the Office of the United Nations Ombudsman and Mediation Services that conflict situations were better prevented and addressed through closer collaboration with all stakeholders involved in resolving the conflict than through the creation of a new informal network.

29E.41 The subprogramme’s work also contributed to the conduct of the United to Respect dialogues with 570 staff; the regular communication of the available mechanisms on conflict resolution to all staff through articles, briefings and videos; and additional briefings and training on sexual harassment, racism and related issues, which met the planned target.

29E.42 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29E.8).

Table 29E.8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
<ul style="list-style-type: none"> • Launch of “United to Respect” dialogues • Designation of 2 conduct and discipline focal points • Implementation of the misconduct tracking system 	<p>229 staff attended the “United to Respect” training session and increased their awareness of resources available to find support</p>	<ul style="list-style-type: none"> • Conflict situations addressed through closer collaboration with United Nations Office at Geneva conflict resolution stakeholders • Increased staff awareness of the number of reported cases and measures taken to combat harassment and other prohibited conduct 	<p>Reduction in conflict escalation and in the risk of dysfunctional relationships</p>	<p>Staff made aware of the role of conduct and discipline focal point(s), leading to better use of all internal mechanisms to report incidents of prohibited behaviour at the United Nations Office at Geneva</p>

Result 2: better service and support for clients through new human resources capacity and tools for data analytics

Programme performance in 2022 and target for 2024

29E.43 The subprogramme’s work contributed to automated reports for data analysis and Microsoft Power BI reports for review of recruitment timelines, gender equality and workforce planning, to support data-driven strategic decision-making, a visualization tool to monitor central review bodies’ timeline compliance, and the conduct of a statistical analysis and validation of the data from training needs analysis surveys, which met the planned target.

29E.44 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29E.9).

Table 29E.9
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
<p>Human rights staff received training in human resources data analytics</p>	<p>18 staff members increased their knowledge of and received certification in human resources data analytics</p>	<ul style="list-style-type: none"> • Automated reports for data analysis and Microsoft Power BI reports improve client services related to review of recruitment timelines, gender equality and workforce planning • Visualization tool and several data simulation tools 	<p>Clients have access to:</p> <ul style="list-style-type: none"> • Tools to simulate the effect of gender equality on recruitment • Tools to evaluate team well-being and performance 	<p>Clients have access to and utilize real-time human resources data analysis and forecasting for several human resources variables to support clients’ recruitment plans and decision-making</p>

Result 3: a more inclusive and supportive work environment

Proposed programme plan for 2024

29E.45 Significant efforts have been deployed since 2018 to raise the awareness of United Nations Office at Geneva staff and managers of the United Nations System Mental Health and Well-Being Strategy and the Secretary-General’s Disability Inclusion Strategy through information sessions and training on general principles. Efforts included numerous iSeek articles and “What’s New” broadcasts; stress management training and workshops; training to help staff to build resilience; and participation in the United Nations Office at Geneva Working Group on Staff Well-being.

Lessons learned and planned change

29E.46 The lesson for the subprogramme was informed by the results of the 2021 United Nations Staff Engagement Survey, which revealed that staff and managers required more support in learning how to manage increased stress levels, maintain safe and good working conditions within their teams, and raise awareness of and deal with mental health issues. In applying the lesson, the subprogramme will expand programmes and initiatives that address stress management and increased resilience and provide a deeper understanding of the causes of burnout and protection from its impact, as well as roll out reasonable accommodation guidelines that will establish mechanisms for providing assistance to staff with disabilities or staff needing appropriate workplace adjustments.

29E.47 Expected progress towards the objective is presented in the performance measure below (see table 29E.10).

Table 29E.10
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Staff received briefing sessions on the United Nations System Mental Health and Well-Being Strategy and the Secretary-General’s Disability Inclusion Strategy	Staff received briefing sessions on the United Nations System Mental Health and Well-Being Strategy and the Secretary-General’s Disability Inclusion Strategy	Staff have access to reasonable accommodation guidelines	Staff have an increased awareness of signs of burnout and have access to resources to help to prevent it	Staff have increased access to mental health and well-being support

Deliverables

29E.48 Table 29E.11 lists all deliverables of the subprogramme.

Table 29E.11
Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: job fairs and career presentations to identify prospective candidates, including female candidates, from unrepresented and underrepresented Member States; and knowledge-sharing in the area of human resources and staff health and well-being.

E. Enabling deliverables

Administration: talent management and job classification; administration of approximately 2,700 staff contracts; advice and guidance on human resources policies, including on the Staff Regulations and Staff Rules of the United Nations and the staff selection system; training on organizational and managerial competencies, substantive and technical skills, language and communications, and career development for more than 9,000 staff members and other participants per year; administration of tests; staff counselling services and psychological support; conduct of staff surveys, including on cost of living and daily subsistence allowance; obtention of 8,400 host country residence permits in liaison with local authorities; occupational health and medico-administrative services for 15,000 client staff in Geneva and field offices, medical consultations and advice, medical emergency preparedness, health and well-being campaigns; and learning, career development and performance management.

Internal justice and oversight: legal advice in relation to cases of alleged misconduct; act as legal counsel for the Organization before the United Nations Dispute Tribunal; act as respondent on behalf of the Organization in cases brought by staff to the Management Evaluation Unit and the Office of the United Nations Ombudsman and Mediation Services; and legal and policy advisory services to more than 20 client entities, including through briefings and ad hoc information sessions for managers on best practices and lessons learned with regard to administration of justice.

Subprogramme 3 Support services

Objective

- 29E.49 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally responsible and effective functioning of the United Nations Office at Geneva with regard to premises, office and conference facilities management; asset management; travel and transportation; mail and pouch services; procurement; and commercial activities.

Strategy

- 29E.50 To contribute to the objective, the subprogramme will:
- (a) Provide services in the areas of facilities management, assistance with conference activities, special events, project management, and property and space management;
 - (b) Equip meeting and conference rooms with advanced technologies, infrastructure and equipment to support virtual and hybrid meetings, in accordance with available funding;
 - (c) Provide procurement services, including collaborative procurement activities with other United Nations organizations and agencies based in Geneva through the Common Procurement Activities Group;
 - (d) Provide services in the areas of contract management, travel, administration of diplomatic privileges, visas, United Nations travel documents, transportation, mail and pouch services, warehousing and sustainable environmental management;
 - (e) Support the implementation of the strategic heritage plan, ensuring that solutions are in place to minimize the impact of any potential disruptions during renovation of the historic buildings of the Palais des Nations and operation of the new building H.
- 29E.51 The above-mentioned work is expected to result in:
- (a) An optimized use of space and the provision of high-quality logistical services and support to client entities;
 - (b) Modern, high-quality conference support services, including the availability of conference rooms equipped for multilingualism;
 - (c) Clients' procurement needs being met;
 - (d) Improved workplace safety and conditions in the Palais des Nations and its annexes.

Programme performance in 2022

Inventory management in spite of ongoing renovation activities

- 29E.52 Owing to COVID-19 pandemic-related restrictions and increased teleworking, the subprogramme faced challenges in implementing physical verification for the United Nations Office at Geneva and its clients in 2020 and 2021. The subprogramme ensured accurate physical verification by asking staff to submit pictures of serial numbers from United Nations property held in their homes. In 2022, the subprogramme faced new challenges with physical verification owing to strategic heritage plan renovations. Non-staff related audio and information technology equipment had to be removed and stored in areas controlled by the renovation's contractor. Equipment that could not be removed remained on site and protected.
- 29E.53 The subprogramme resolved this new challenge by collaborating with the strategic heritage plan team to perform physical verification checks in ongoing renovation areas under control of the renovation's contractor. This included ensuring that subprogramme staff involved in physical verification underwent safety and security training and were properly equipped. All physical verification visits to storage points were pre-coordinated. In addition, the subprogramme confirmed the network signal of information technology devices located in areas that were difficult to gain access to.
- 29E.54 Progress towards the objective is presented in the performance measure below (see table 29E.12).

Table 29E.12

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Assets of the United Nations Office at Geneva and client entities accounted for during the COVID-19 pandemic through physical verification checks	Assets of the United Nations Office at Geneva and client entities accounted for during the COVID-19 pandemic through physical verification checks	Assets of the United Nations Office at Geneva and client entities accounted for during strategic heritage plan renovations through physical verification checks

Planned results for 2024

Result 1: a sustainable infrastructure to support and moderate hybrid meetings

Programme performance in 2022 and target for 2024

- 29E.55 The subprogramme's work contributed to 14 conference rooms being available to service hybrid meetings with remote simultaneous interpretation, which exceeded the planned target of 13 conference rooms.
- 29E.56 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29E.I).

Figure 29E.I

Performance measure: number of conference rooms available to service hybrid meetings with remote simultaneous interpretation (cumulative)

Result 2: optimized warehouse storage space for clients

Programme performance in 2022 and target for 2024

- 29E.57 The subprogramme’s work contributed to positive client feedback on the warehouse space management tool being piloted with the Office of the United Nations High Commissioner for Refugees, which met the planned target.
- 29E.58 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29E.13).

Table 29E.13

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Significant warehouse storage space available but managed manually with limited client access	<ul style="list-style-type: none"> • Development and launch of warehouse space management application • Identification of pilot client 	Positive client feedback on the space management application piloted with the Office of the United Nations High Commissioner for Refugees	Access to efficiently managed warehouse storage made available to all clients via the space management application	Clients have access to additional storage space following further optimization of warehouse storage capacity

Result 3: United Nations Office at Geneva campus preserved for future generations

Proposed programme plan for 2024

- 29E.59 In 2022, the subprogramme conducted an assessment of the capital investment needs of its buildings and facilities for 2024–2034 to inform the Secretary-General’s report on capital investment planning. The subprogramme considered aspects of the Palais des Nations that should be analysed following completion of the strategic heritage plan in 2025 and reflected on requirements to protect investment made as part of the strategic heritage plan.

Lessons learned and planned change

- 29E.60 The lesson for the subprogramme was that, given the complexity, scope and scale of the United Nations Office at Geneva’s buildings and facilities, an in-depth multi-year study was needed.
- 29E.61 In applying the lesson, the subprogramme will conduct a phased holistic study of the United Nations Office at Geneva campus in alignment with the strategic heritage plan’s implementation timeline to

assess ongoing and preventive maintenance and operational costs for the Palais des Nation after the strategic heritage plan. The results of this study will provide the basis for a comprehensive strategy and plan to help to safeguard Member States’ investment in the strategic heritage plan and create infrastructure resilience of the facilities.

29E.62 The subprogramme will conduct a study to assess the ongoing and long-term preventive maintenance and operational resource requirements for building H and, in 2024, will conduct a similar assessment study for buildings A, C and D.

29E.63 Expected progress towards the objective is presented in the performance measure below (see table 29E.14).

Table 29E.14
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	–	Long-term maintenance strategy of building H ready to be implemented to protect Member States’ investment	Protection of Member States’ investment through an assessment study of the renovated areas of the Palais des Nations delivered by the strategic heritage plan that identifies long-term preventive maintenance requirements

Deliverables

29E.64 Table 29E.15 lists all deliverables of the subprogramme.

Table 29E.15
Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: travel arrangements (approximately 27,600), visas and laissez-passer for staff and meeting participants for Geneva-based United Nations Secretariat entities and other entities based at the United Nations Office at Geneva; and management and maintenance, including office space and furniture of the United Nations Office at Geneva (215,381 m² containing 2,871 offices, including 49 conference rooms, 85 meeting rooms, annexes and parks).

Logistics: full procurement services, including some 2,990 items such as office furniture and equipment, computers and software; physical verification of approximately 36,000 serialized equipment items and fixed assets for the United Nations Office at Geneva, other Secretariat departments and offices and other entities located on the United Nations Office at Geneva campus; shipment of official property, bulk consignments for conferences and removal of personal effects and related insurance requirement for staff members; and mail (some 155,250 items), pouch and distribution services of approximately 103,500 kg for United Nations offices and other United Nations entities.

Subprogramme 4 Information and communications technology operations

Objective

29E.65 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities’ substantive programmes through technologies, including a coherent

enterprise ICT system and enterprise architecture; access to ICT-related technological innovations; and a secure, coherent and resilient technology application hosting and infrastructure landscape.

Strategy

29E.66 To contribute to the objective, the subprogramme will:

- (a) Manage a portfolio of end-to-end hardware and software solutions and implement new technologies for clients on the basis of their business objectives;
- (b) Build resilient technological capacity to meet client objectives by acquiring knowledge and expertise on relevant solutions, migrating to the most cost-effective sourcing options, exploiting economies of scale, adopting innovative technologies and discontinuing legacy systems;
- (c) Manage the use of ICT resources by engaging and leading the ICT community at entities of the United Nations system in Geneva and elsewhere in Europe in the definition, adoption and deployment of ICT governance policies and procedures, as well as oversee and support ICT strategy implementation and provide security in the use of ICT services.

29E.67 The above-mentioned work is expected to result in:

- (a) Clients whose administrative and management decision-making processes are facilitated and empowered by new and innovative information technology solutions;
- (b) Client entities gaining access to cost-effective services and solutions that optimize the use of resources to achieve business goals;
- (c) A safe and reliable ICT environment for all United Nations Secretariat entities in Geneva.

Programme performance in 2022

Improved information and communications technology security resilience

29E.68 In 2022, the subprogramme further strengthened its ICT security posture for the United Nations Office at Geneva and its clients by building on implementation undertaken and lessons learned from previous years. Specific focus was given to tightening access to electronic resources through the roll-out of multi-factor authentication for server administrators on both Linux and Windows platforms. The subprogramme also deployed industry-standard capability for identifying and resolving networking vulnerabilities for servers and updated endpoint detection and response infrastructure, and completed the deployment and configuration of segmentation for the data centre in Geneva using United Nations-standard technology, to complement the segmentation of the network.

29E.69 Progress towards the objective is presented in the performance measure below (see table 29E.16).

Table 29E.16

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Security risks reduced for the United Nations Office at Geneva and clients through security patch management	Clients' ICT assets protected from hacking and malware attacks through endpoint detection and response software deployed on critical servers	Risk of identity theft and data breaches for the United Nations Office at Geneva and clients limited through multi-factor authentication for administrators and segmentation of data centre

Planned results for 2024

Result 1: standardized, cost-effective information and communications technology services on the Geneva campus

Programme performance in 2022 and target for 2024

- 29E.70 The subprogramme’s work contributed to new clients having access to a bundled service package offering a fast, cost-effective out-of-the-box solution, including a managed desktop environment service package combining computer leasing, standard software, user support, enterprise systems (e.g., email, Microsoft Teams and SharePoint), a fixed phone line, network and Internet access, and printing services, which met the planned target.
- 29E.71 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29E.17).

Table 29E.17
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
<ul style="list-style-type: none"> • 48 à la carte ICT service offerings available • No bundled service offerings 	Complete and easy-to-understand service package option available to clients	1 bundled service package offering a fast, cost-effective out-of-the-box solution available for the immediate needs of new clients in Geneva	2 bundled service packages offering a fast, cost-effective out-of-the-box solution available for the immediate needs of clients	Clients have access to additional service packages to meet their diverse needs

Result 2: incorporation of the needs of persons with disabilities into information and communications technology solution offerings

Programme performance in 2022 and target for 2024

- 29E.72 The subprogramme’s work contributed to the definition and design of the United Nations Office at Geneva ICT digital accessibility framework and started but could not complete the development of processes, tools and procedures to assess the level of disability inclusion of ICT solutions, which did not meet the planned target of processes, tools and procedures to assess the level of disability inclusion in ICT solutions available to clients. The target was not met in full in 2022 owing to the late availability of skilled technical expertise.
- 29E.73 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29E.18).

Table 29E.18
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	ICT systems disability inclusion requirements are addressed on an ad hoc or on-demand basis	Digital accessibility framework definition and design created, and development of related processes, tools and procedures started	Integration of the systematic assessment of the level of disability inclusion into the approval process for new ICT solutions	Clients have access to new ICT accessibility services to evaluate and upgrade existing or new solutions to the required level of disability inclusion

Result 3: experience of conference participants and organizers improved through technology**Proposed programme plan for 2024**

29E.74 Conference participants, organizers and service providers have been identifying the technological features required to ensure the United Nations Office at Geneva's relevancy as a modern multilateral United Nations conferencing provider. Examples of these features include centrally managing and monitoring conferences, the virtual coupling of rooms to expand capacity, configuring interpreter booths into a virtual hub to increase available interpreted languages and support for accessibility features that build upon the infrastructure delivered through the strategic heritage plan. The key enabling technology for these features is the use of Internet protocol for transmitting audio and video signals, which is being provided as part of the strategic heritage plan renovations. The subprogramme has recently completed a successful mock-up using Internet protocol to demonstrate these features in two rooms.

Lessons learned and planned change

29E.75 The lesson for the subprogramme was that the ongoing renovations offered an opportunity to leverage new technology to improve the experience of conference participants by making these new features accessible in all conference rooms. In applying the lesson, the subprogramme will create a standard architecture based on Internet protocol to interconnect audiovisual systems, conference room interpretation, meeting management systems, and audio and video production systems (UN Radio, UN Web TV and United Nations webcasts) to other resources and systems already on the current digital infrastructure. The subprogramme will deploy the new architecture in an approved, compliant, consistent and sustainable manner aligned with the schedule of the strategic heritage plan for ongoing and future renovations of conference rooms in buildings A, AB, C and E.

29E.76 Expected progress towards the objective is presented in the performance measure below (see table 29E.19).

Table 29E.19

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Conference participants able to gain access to standard configuration for hybrid meetings	Conference stakeholders identify technological requirements for modern multilateral conferencing centre	Design and conduct of a mock-up for simulation of new features for conference participants and validation of the new architecture	Phased deployment of new features for conference participants in buildings A, AB and C, in conjunction with strategic heritage plan renovations	<ul style="list-style-type: none"> • Conference participants have access to the new features in conference rooms for buildings A, AB and C, and new architecture integrated in the design • New functionality for conference participants integrated into design of building E

Deliverables

29E.77 Table 29E.20 lists all deliverables of the subprogramme.

Table 29E.20

Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: provision of security for information technology systems and data; connectivity services; hosting services; voice, video and data communications services; operation and maintenance of application systems in a secure environment; technical support for approximately 5,000 end users; and advisory services on business solutions.

**Subprogramme 5
Library services**

Objective

29E.78 The objective, to which this subprogramme contributes, is to ensure the preservation of and enhanced access to past, present and future knowledge of the United Nations, to mobilize this knowledge, and to increase knowledge-sharing, education and dialogue among Member States and between Member States and the international community.

Strategy

29E.79 To contribute to the objective, the subprogramme will:

- (a) Provide access to United Nations documents and publications both online and paper-based resources and to external knowledge resources that provide information about the Organization's areas of work; guarantee access to paper-based resources stored in the building; and focus on online and virtual client services, owing to the planned closure of the Library building and other records storage areas in the Palais des Nations during the strategic heritage plan renovation works;
- (b) Provide knowledge tools that bring together key information resources on United Nations issues and global agendas, manage the United Nations Office at Geneva art collection and digitize and preserve archives and official documents, in collaboration with other United Nations libraries and archives;
- (c) Provide guidance on records management standards and best practices across the United Nations Office at Geneva and at other Secretariat entities in Geneva through the provision of staff training, advisory services and records management services;
- (d) Transfer official records of the United Nations, both physical and digital, to the Records Management Unit for long-term preservation;
- (e) Provide support for cultural diplomacy, connect diplomats with United Nations staff, experts and global citizens through discussion and learning events, and organize learning events and cultural activities as online and hybrid events.

29E.80 The above-mentioned work is expected to result in:

- (a) More informed participation and subsequent decision-making by diplomats and staff;
- (b) Improved transparency and accountability for the Organization;
- (c) Preservation of institutional and historical memory;
- (d) A vibrant online and on-site cultural activities programme that enables Member States to showcase their art and culture through exhibitions, film screenings and other events;

- (e) Alternative learning opportunities for United Nations staff and diplomats on topics that support career development and the implementation of United Nations policies and agendas.

Programme performance in 2022

Improved art collection management

- 29E.81 In 2021, the Board of Auditors examined the management of the United Nations Office at Geneva artwork collection in the context of the strategic heritage plan and recommended that the subprogramme improve its inventory process and undertake a systematic and professional reinstallation and relocation of artwork upon completion of the strategic heritage plan.
- 29E.82 To implement the Board's recommendations, in 2022 the subprogramme acquired a special module of the inventory database to aid and improve the physical check process and introduced systematic annual physical checks of all works of art in storage and on display at the Palais des Nations compound and at Palais Wilson. The list of heritage assets is now transmitted annually to United Nations Headquarters and data discrepancies are investigated and resolved.
- 29E.83 Progress towards the objective is presented in the performance measure below (see figure 29E.II).

Figure 29E.II

Performance measure: number of works of art physically checked to ensure preservation for future generations

Planned results for 2024

Result 1: increased access to knowledge on multilateralism

Programme performance in 2022 and target for 2024

- 29E.84 The subprogramme's work contributed to access to new online tools such as the UN Archives Geneva platform, Conference Primers and Conference Primers Pro; a remote access tool for library resources; and outreach activities and events such as 18 new podcasts, a video series, a hybrid round table and a conference based on archives, which met the planned target.
- 29E.85 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29E.21).

Table 29E.21
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Recognition of need to more formally manage and coordinate partnerships to create larger events and activities for clients with more impact	More targeted and impactful opportunities to share knowledge on multilateralism, as advanced in the partnership strategy	Improved access to information, activities and events that increase knowledge of multilateralism	Increase in the number of clients with knowledge of multilateralism through a network of institutions, including the United Nations Office at Geneva	Increase in the number of clients with knowledge of multilateralism through digital tools and services

Result 2: increased accessibility by clients to a wealth of digital information

29E.86 The subprogramme’s work contributed to 24 new products and services that facilitate client information access and navigation, which exceeded the planned target of 15 new products and services.

29E.87 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29E.III).

Figure 29E.III
Performance measure: number of new products and services developed that facilitate client information access and navigation (annual)

Result 3: improved access to information for achieving the Sustainable Development Goals
Proposed programme plan for 2024

29E.88 Libraries and archives support Sustainable Development Goals 4 (quality education) and 16 (peace, justice and strong institutions). To this end, the subprogramme has published an online research guide on the Goals and digitized and published the League of Nations archives online. This made more than 14 million pages of primary resources accessible to academics around the world, expanding global research output on the history of international collaboration in economic and social development.

Lessons learned and planned change

29E.89 The lesson for the subprogramme, following a decreased use of the online research guide due to physical and digital access problems, was that a multifaceted approach was required to improve existing products and services and to foster opportunities to increase access to and share information

on the Sustainable Development Goals. In applying the lesson, the subprogramme will close information access gaps by improving products and services, promote information literacy through events at the Knowledge and Learning Commons, enhance access to digitized archives and United Nations Conference on Trade and Development paper archives, and leverage partnerships with academic institutions and other international organizations to provide greater access to digital collections and expand the user community.

29E.90 Expected progress towards the objective is presented in the performance measure below (see table 29E.22).

Table 29E.22
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
<ul style="list-style-type: none"> • Online Sustainable Development Goals research guide available • Digitization of League of Nations archives 	<ul style="list-style-type: none"> • Sustainable Development Goals research guide with updated content • Ongoing digitization and online publishing of League of Nations archives 	<ul style="list-style-type: none"> • Online availability of a further enhanced Sustainable Development Goals research guide • Digitization of League of Nations archives finalized with 14 million pages 	Information literacy for users through newly accessible Sustainable Development Goals research guide, library collections mapped to the Goals and enhanced digital archives access	Enhanced access to digital collections and United Nations Conference on Trade and Development paper archives through partnerships

Deliverables

29E.91 Table 29E.23 lists all deliverables of the subprogramme.

Table 29E.23
Subprogramme 5: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	40	35	40	40
Events for diplomats and United Nations staff and interns on the processes, working mechanisms and rules of the Secretariat and for career development.	40	35	40	40
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services on records management for 400 clients.				
Outreach programmes, special events and information materials: cultural activities, including exhibitions, concerts and films; guided tours of the Library, archives and exhibitions of the United Nations Museum Geneva; discussion panels and conferences for cultural exchange, education and dialogue on key United Nations issues; and exhibitions in the Library and at the United Nations Museum Geneva.				
Library services: knowledge services, such as virtual and on-site reference services, search platform design and selected information packages, to enable evidence-based policymaking and research for 12,000 diplomats, delegates, United Nations staff and academics worldwide; creation and maintenance of web pages of official records and documents; unified resource management system for the United Nations Office at Geneva and three United Nations Secretariat libraries; print and electronic information resources; management of 15,000 linear metres of United Nations and League of Nations archives and records in paper form; and access to on-site and online archives and records.				

B. Proposed post and non-post resource requirements for 2024

Overview

29E.92 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 29E.24 to 29E.26.

Table 29E.24

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2022 expenditure ^a	2023 appropriation	Changes				2024 estimate (before recosting)	
			Technical adjustments	New/expanded mandates	Other	Total		Percentage
Posts	46 872.5	46 117.6	83.3	–	376.8	460.1	1.0	46 577.7
Other staff costs	4 770.8	4 809.7	(42.1)	0.5	(376.8)	(418.4)	(8.7)	4 391.3
Hospitality	0.4	0.6	–	–	–	–	–	0.6

Total	298	–	–	2	2	–	300

29E.93 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 29E.27 to 29E.29 and figure 29E.IV.

29E.94 As reflected in tables 29E.27 (1) and 29E.28 (1), the overall resources proposed for 2024 amount to \$77,423,200 before recosting, reflecting a net decrease of \$283,200 (or 0.4 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

29E.95 As reflected in table 29E.27 (1), resource changes reflect a net decrease of \$4,300. The distribution across the subprogrammes is as follows:

- Subprogramme 3, Support services** (increase of \$14,800). This net increase relates to the provision at continuing vacancy rates for one post of Mechanical Engineer (P-4), with establishment starting in 2023 pursuant to General Assembly resolution [77/262](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts (\$83,300), offset in part by the removal of non-recurrent provisions for 2023 in support of new and expanded mandates from the Assembly and resolutions and decisions adopted by the Human Rights Council (\$68,500);
- Subprogramme 4, Information and communications technology operations** (decrease of \$19,100). This decrease relates to the removal of non-recurrent provisions for 2023 in support of new and expanded mandates from the General Assembly and resolutions and decisions adopted by the Human Rights Council.

New and expanded mandates

29E.96 As reflected in table 29E.27 (1), resource changes reflect an increase of \$111,100. The distribution across the subprogrammes is as follows:

- Subprogramme 3, Support services** (increase of \$65,200). This increase relates to:
 - Additional even-year requirements under general operating expenses (\$4,200) pursuant to Human Rights Council resolution [28/14](#) and General Assembly resolution [75/314](#);
 - Additional requirements under general operating expenses (\$700) pursuant to Human Rights Council resolution [51/33](#);
 - Additional requirements under general operating expenses in support of the human rights treaty bodies system in accordance with General Assembly resolution [68/268](#), to service

an additional five weeks of meetings per year. The additional meetings require provisions for sound technician and sound recording services (\$17,500), as well as operating costs for 22 additional staff in the Department for General Assembly and Conference Management and the Office of the United Nations High Commissioner for Human Rights, as reflected under sections 2 and 24 of the proposed programme budget, to which section 29E provides central support services, including utilities and maintenance costs (\$42,800).

- (b) **Subprogramme 4, Information and communications technology operations** (increase of \$45,900). This increase relates to:
- (i) Additional requirements under other staff costs (\$500) pursuant to Human Rights Council resolution [50/13](#);
 - (ii) Additional requirements under contractual services in support of the human rights treaty bodies system in accordance with General Assembly resolution [68/268](#), as indicated in paragraph 29E.96 (a) (iii) above. The additional meetings require provisions for operating costs for additional staff in offices to which section 29E provides ICT services (\$40,500). In addition, within the additional five weeks of meetings, seven days of meetings require ICT technical support for persons with disabilities, in accordance with article 34, paragraph 11 of the Convention on the Rights of Persons with Disabilities, adopted by the Assembly in its resolution [61/106](#) (\$4,900).

Other changes

29E.97 As reflected in table 29E.27 (1), the net effect of the proposed changes is a reduction of \$390,000, which affects mainly the operational requirements projected for 2024. The breakdown of changes is as follows:

- (a) **Executive direction and management.** No change in requirements as a result of:
- (i) A decrease under other staff costs (\$188,400) relating to provisions for general temporary assistance for the position of a Programme Management Officer (Business Continuity Coordinator) (P-4), which is proposed to be converted to a post;
 - (ii) An increase under posts (\$188,400) relating to the proposed conversion of the temporary position of a Programme Management Officer (Business Continuity Coordinator) (P-4) to a post. Details are provided in annex II to the present report;
- (b) **Subprogramme 2, Human resources management.** No change in requirements as a result of:
- (i) A decrease under other staff costs (\$188,400) relating to provisions for general temporary assistance for the position of a Legal Officer (P-4), which is proposed to be converted to a post;
 - (ii) An increase under posts (\$188,400) relating to the proposed conversion of the temporary position of a Legal Officer (P-4) to a post. Details are provided in annex II;
- (c) **Subprogramme 3, Support services** (decrease of \$390,000). This net decrease relates to reduced requirements under general operating expenses for provisions for cleaning and gardening made possible by a reduction in the frequency of these services throughout the Palais des Nations (\$400,000), offset in part by provisions for sound technician and recording services that are anticipated to be proposed in the context of future statements of programme budget implications, based on recent historical trends (\$10,000).

Extrabudgetary resources

29E.98 As reflected in tables 29E.27 (2) and 29E.28 (2), extrabudgetary resources amount to \$42,507,700. The resources would complement regular budget resources and would be used mainly to support extrabudgetary entities on a reimbursable basis. Activities include the provision of: (a) executive direction and management assistance; (b) budget, finance and treasury services; (c) human resources, including staff development and learning, and medico-administrative and human resources legal

advisory services; (d) central support services (e.g., mail, pouch, buildings, purchasing and transportation); (e) ICT services; and (f) record-keeping and library advisory services.

29E.99 The extrabudgetary resources under this section are subject to the oversight of the United Nations Office at Geneva, which has delegated authority from the Secretary-General.

29E.100 In-kind contributions would provide for government-provided rent-free premises with an estimated value of \$4,010,100.

Executive direction and management

29E.101 The United Nations Office at Geneva, in particular the Division of Administration, is responsible for the implementation of the programme of work under section 29E. The core functions of the Division include providing direction and coordination in human resources management, financial resources management, ICT, central support services and library services at the United Nations Office at Geneva, including the management and utilization of United Nations premises and the coordination of human resources, finance and administrative policies with other Geneva-based organizations.

29E.102 The Division of Administration continues to provide administrative and other support services to Secretariat departments and offices and other entities of the United Nations system. Such services are provided to the United Nations funds and programmes, specialized agencies and other organizations of the United Nations system on a reimbursable basis, and a number of Geneva-based operations rely on the aforementioned services, in particular in the context of expanding humanitarian and human rights activities.

29E.103 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office has an environmental sustainability steering group and an environmental management system in line with the guidelines and best practices of the United Nations system. In 2022, 90 recycling stations were in place within the Palais des Nations and its annexes, and the Office recycled 95 per cent of its waste. The Office’s cleaning contract fully incorporates all environmental requirements, including waste recycling, energy and water savings, and the use of environmentally friendly detergents. The Office benefited from energy recovery systems in 2022, resulting in reduced CO₂ emissions of approximately 500 tons during the period 2020–2022 and a reduction in use of potable water by approximately 13,500 m³ over the same period. In 2021, the Office signed a contract with the Lake Geneva water supplier to allow the heating of the Palais des Nations using lake water energy, and the first phase of implementation will be completed in the coming years. In 2022, the Office continued to electrify its vehicles fleet with the purchase of two fully electric vehicles.

29E.104 Information on the timely submission of documentation and advance booking for air travel is reflected in table 29E.30. The reasons for the lower rate in compliance in 2022 include the continued impact of the COVID-19 pandemic in the earlier part of the year, resulting in short notice changes in travel options, as well as travel restrictions that were imposed and subsequently lifted during the year. The Office continues to make every effort to comply in full with the advance purchase policy directive and has undertaken a number of steps to ensure that air travel is booked as early as possible. Travel requests that do not meet the 16-day deadline are routed to the Director of Administration for validation of mitigating circumstances before final review and approval.

Table 29E.30
Compliance rate
 (Percentage)

	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Actual 2022</i>	<i>Planned 2023</i>	<i>Planned 2024</i>
Air tickets purchased at least 2 weeks before the commencement of travel	100	100	68	100	100

29E.105 The proposed regular budget resources for 2024 amount to \$983,000 and reflect no change in the resource level compared with the appropriation for 2023. The proposed cost-neutral change is explained in paragraph 29E.97 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29E.31 and figure 29E.V.

Extrabudgetary resources

29E.106 Extrabudgetary resources for this component amount to \$1,150,800. The resources would complement regular budget resources and would be used mainly to support extrabudgetary activities on a reimbursable basis. The level of extrabudgetary resources is expected to remain unchanged.

Programme of work

Subprogramme 1 Programme planning, finance and budget

29E.107 The proposed regular budget resources for 2024 amount to \$5,145,400 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29E.32 and figure 29E.VI.

Extrabudgetary resources

29E.108 Extrabudgetary resources for this subprogramme amount to \$12,812,100. The resources would complement the regular budget resources and would be used mainly to enable the provision of finance and budget services (i.e., accounting services, grant support, and payroll processing and disbursement) to extrabudgetary substantive activities on a reimbursable basis (\$6,150,900), as well as support the Medical Insurance Section (\$6,661,200). The Section is funded exclusively from

extrabudgetary resources and provides services to the United Nations Office at Geneva, other Secretariat departments and offices and other United Nations common system entities. The Section is responsible mainly for providing advice and managing the claims submission process. The overall level of extrabudgetary resources is expected to remain unchanged.

Subprogramme 2 Human resources management

29E.109 The proposed regular budget resources for 2024 amount to \$9,599,900 and reflect no change in the resource level compared with the appropriation for 2023. The proposed cost-neutral change is explained in paragraph 29E.97 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29E.33 and figure 29E.VII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29E.110 Extrabudgetary resources for this subprogramme amount to \$8,255,000. The resources would complement regular budget resources and would be used mainly to support service delivery to extrabudgetary entities on a reimbursable basis across the various service streams (i.e., staff and recruitment administration, staff development and learning, medico-administrative services and human resources legal and policy advisory services). The level of extrabudgetary resources is expected to remain unchanged.

**Subprogramme 3
Support services**

29E.111 The proposed regular budget resources for 2024 amount to \$41,993,200 and reflect a net decrease of \$310,000 in the resource level compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 29E.95 (a), 29E.96 (a) and 29E.97 (c). Additional details on the distribution of proposed resources for 2024 are reflected in table 29E.34 and figure 29E.VIII.

Table 29E.34

Subprogramme 3: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29E.112 Extrabudgetary resources for this subprogramme amount to \$8,080,600. The resources would complement regular budget resources and would be used mainly to provide support services to extrabudgetary entities on a reimbursable basis, in areas such as travel processing, mail and pouch handling, procurement, ground transportation and facilities management. The expected decrease of \$300,000 is attributed mainly to an anticipated reduction in demand for processing of laissez-passer from extrabudgetary entities as the surge in demand coinciding with the return of international air travel post-COVID-19 abates.

**Subprogramme 4
Information and communications technology operations**

29E.113 The proposed regular budget resources for 2024 amount to \$11,721,400 and reflect an increase of \$26,800 in the resource level compared with the appropriation for 2023. The proposed increase is explained in paragraphs 29E.95 (b) and 29E.96 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 29E.35 and figure 29E.IX.

Extrabudgetary resources

29E.114 Extrabudgetary resources for this subprogramme amount to \$12,037,100. The resources would complement regular budget resources and would be used mainly to support client entities' extrabudgetary activities on a reimbursable basis, in areas including personal computing, communications, hosting and storage. The level of extrabudgetary resources is expected to remain unchanged.

**Subprogramme 5
Library services**

29E.115 The proposed regular budget resources for 2024 amount to \$7,980,300 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29E.36 and figure 29E.X.

Extrabudgetary resources

- 29E.116 Extrabudgetary resources for this subprogramme amount to \$172,100. The resources would complement regular budget resources and would be used mainly to support service delivery in the areas of record-keeping and library advisory services to extrabudgetary entities on a reimbursable basis. The level of extrabudgetary resources is expected to remain unchanged.

Annex II

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-4	Conversion of Programme Management Officer	<p>The temporary position of Programme Management Officer (Business Continuity Coordinator) (P-4) was originally approved for the 2012–2013 biennium (General Assembly resolution 66/246) and has since been a recurring requirement. The Business Continuity Coordinator is responsible for implementing the organizational resilience management framework, including crisis management, business continuity and crisis communications for the United Nations Office at Geneva, and assisting the framework's implementation in the wider European region (United Nations Office at Vienna, Economic Commission for Europe, United Nations Conference on Trade and Development, Office for the Coordination of Humanitarian Affairs and Office of the United Nations High Commissioner for Human Rights). The Business Continuity Coordinator further ensures that effective crisis management teams are established, that annual crisis management exercises are conducted and that the emergency notification system is effectively implemented. The position is critical to ensuring business continuity for the United Nations Office at Geneva and the other Secretariat offices in the region. Ongoing effective management and organization of the business continuity structures is essential to ensure that the Organization is adequately positioned to respond in the event of a crisis. The value of this position was made clear when the Business Continuity Coordinator coordinated the COVID-19 response of the United Nations Office at Geneva on behalf of the Director-General, activating the various structures that had been established, under the business continuity plan for the Office. The main lesson learned from the response is the importance of conducting regular crisis management simulation exercises with the crisis management teams and the importance of training all personnel on the use of available information technology tools, which facilitated the switch to a virtual office. Consequently, the position is considered permanent in nature, and it is therefore proposed that it be converted from general temporary assistance to a post.</p>

Section 29E Administration, Geneva

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 2	1	P-4	Conversion of Legal Affairs Officer	<p>The temporary position of Legal Officer (P-4), originally proposed as an established post, was approved by the General Assembly in its resolution 66/237 in 2012 as a general temporary assistance position on the recommendation of the Advisory Committee on Administrative and Budgetary Questions. A recent review of the long-term needs of the United Nations Office at Geneva, as requested by the Advisory Committee in its report on the 2023 proposed programme budget (A/77/7, para. VIII.96), confirmed the permanent nature of the position. The Legal Officer plays a critical role in ensuring the Office's capacity to represent and defend the Organization in the internal justice system, and this need is expected to continue. It is therefore proposed that it be converted from general temporary assistance to a post.</p> <p>With regard to the Advisory Committee's request to explore cost-sharing, the Office notes that, while legal services are also provided to entities funded primarily or wholly from extrabudgetary resources such as the Office for the Coordination of Humanitarian Affairs and the secretariat of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa, in Bonn, these services are provided on a cost-recovery basis by another P-4 Legal Officer on an extrabudgetary post. Therefore, cost recovery for legal support is already in place for extrabudgetary entities. The review also found that it would be inappropriate to implement a cost-sharing process for this position because Administration, Geneva (Sect. 29E) would simply be collecting regular budget funds from other budget sections, adding to the administrative overhead and overall cost of providing this representational service.</p>
Subprogramme 2	1	GS (PL)	Reassignment of Senior Human Resources Assistant to Senior Data Analysis Assistant	<p>The automation of human resources processes and the implementation of various information technology tools require data analysis functions embedded in the Human Resources Management Service. The post of Senior Data Analysis Assistant is required to provide human resources analytical services to Service staff and clients. The post will contribute to capacity-building in human resources analytics and generate data-driven analysis and insights in support of decision-making processes on human resources matters.</p>

Abbreviation: GS (PL), General Service (Principal level).

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 29F.1 The United Nations Office at Vienna was established in 1979 pursuant to General Assembly resolution [31/194](#) with the objective of providing administrative support to the United Nations Secretariat units located in Vienna. Under the terms of the tripartite memorandum of understanding of 1977 and subsequent amendments to it, the Office also provides administrative support on a common services basis to other international organizations based in the Vienna International Centre namely, the International Atomic Energy Agency (IAEA), the United Nations Industrial Development Organization (UNIDO) and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization.

Strategy and external factors for 2024

- 29F.2 The Office will leverage the various enterprise systems in the delivery of efficient and effective administrative services, supported by an enabling policy framework and enhanced decision-making through monitoring, data analysis and reporting. The strategy for 2024 will continue to include: (a) coordinating with Headquarters and providing timely advice to the entities serviced on all administrative matters; (b) strengthening internal financial controls and streamlining financial procedures and guidelines to ensure effective financial management; (c) playing a central support role in shaping an enabling organizational culture through targeted enhancement of leadership, learning and career support activities and a more robust performance management system that supports increased accountability, staff engagement, workplace flexibility and empowerment while ensuring a diverse and inclusive workplace; (d) maintaining efficient and cost-effective travel and transportation services through best practices, as well as through close cooperation and benchmarking with other United Nations system organizations; (e) promoting environmental sustainability in coordination with all departments and offices; (f) strengthening the capacity of procurement staff through the management and delivery of online procurement training courses and certification programmes to ensure the consistent application of and full compliance with established policy, procedures and best practices across the Organization; (g) monitoring the progress and impact of significant future accounting pronouncements of the International Public Sector Accounting Standards Board and implementing measures to improve the integrity of financial data, including areas such as assets accounting and revenue recognition; (h) improving outreach to clients, especially through the use of electronic resources; (i) supporting enterprise application deployments and integrating new technologies into the organizational business toolkit; and (j) increasing compliance with technology standards, guidelines and methodologies, as well as with information and communications technology policies and enterprise architecture.
- 29F.3 The United Nations Secretariat units located in Vienna to which the Office provides administrative support are the United Nations Office on Drugs and Crime (UNODC), the Office for Outer Space Affairs, the International Trade Law Division of the Office of Legal Affairs, the secretariat of the United Nations Scientific Committee on the Effects of Atomic Radiation, the United Nations Information Service, the Office of Internal Oversight Services, the Office for Disarmament Affairs, the regional office of the Office of the United Nations Ombudsman and Mediation Services and the United Nations Register of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory. The Office provides support services, garage operations, language training and communication services on a common services basis to IAEA, UNIDO and the Comprehensive Nuclear-Test-Ban Treaty Organization.

- 29F.4 With regard to the external factors, the overall plan for 2024 is based on the planning assumption that the extrabudgetary funding available to client offices and the support requirements for services provided by the Office remain stable.
- 29F.5 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, including through the implementation of the strategy for gender equality and the empowerment of women (2022–2026) of the United Nations Office at Vienna (UNOV) and the United Nations Office on Drugs and Crime (UNODC). It will also contribute to maintaining gender equality targets and support clients in this regard, in line with the Secretary-General's goals for gender parity, and will track and report on its progress and that of its clients in promoting gender equality and the empowerment of women, in line with the Secretary-General's system-wide strategy on gender parity.
- 29F.6 In line with the United Nations Disability Inclusion Strategy, the Office and other organizations based in Vienna, as members of the joint committee responsible for managing the Common Fund for Financing Major Repairs and Replacements at the Vienna International Centre, will ensure that the accessibility report commissioned by the host country is used to prioritize the necessary renovations, updates and repairs within the Common Fund. The Office will create a more inclusive and supportive culture for staff members who have disabilities and staff who have dependents with disabilities. This will involve offering training on disability inclusion, providing clear information about benefits and entitlements related to disabilities and organizing events to raise awareness about disability inclusion. The Office will engage with and involve persons with disabilities and their representative organizations in these efforts.

Impact of the pandemic and lessons learned

- 29F.7 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular the need for enhanced support for telecommuting, adapting the learning and organizational development curricula, delivering virtual training, supporting remote and hybrid meetings, as requested and subject to available capacity, and providing increased client support in all administrative processes.
- 29F.8 The Office continues to mainstream the lessons learned and best practices concerning the COVID-19-related adjustments to and adaptation of the programme, including the importance of resilient and sustainable network connectivity and of integrating more potential future scenarios in the business continuity plan; the use of online testing platforms for administering hiring exams; the provision of remote access to library resources of UNOV/UNODC clients; the automation of services through an enhanced client support portal utilizing cloud-based technology; and the integration of accessibility considerations for persons with disabilities in information and communications technology solutions.

Legislative mandates

- 29F.9 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

31/194	Utilization of office accommodation and conference facilities at the Donaupark Centre in Vienna	70/255 ; 72/303	Progress towards an accountability system in the United Nations Secretariat
58/278	Report of the Joint Inspection Unit on common and joint services of United Nations system organizations at Vienna		

**Subprogramme 1
Programme planning, finance and budget**

General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	77/267	Shifting the management paradigm in the United Nations: review of changes to the budgetary cycle
42/211	Implementation of General Assembly resolution 41/213		

**Subprogramme 2
Human resources management**

General Assembly resolutions

58/144	Improvement of the status of women in the United Nations system	73/281	Shifting the management paradigm in the United Nations
63/271	Amendments to the Staff Regulations	77/256	United Nations common system
72/254	Human resources management	77/260	Administration of justice at the United Nations

**Subprogramme 3
Support services**

General Assembly resolutions

58/276; 58/277	Report of the Joint Inspection Unit on the management audit review of outsourcing in the United Nations	58/278	Report of the Joint Inspection Unit on common and joint services of United Nations system organizations at Vienna
		69/273	Procurement

**Subprogramme 4
Information and communications technology operations**

General Assembly resolutions

57/304	Information and communication technology strategy	63/269	Information and communications technology, disaster recovery and business continuity for the United Nations: arrangements for the secondary data centre at Headquarters
63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity	69/262	Questions relating to the programme budget for the biennium 2014–2015 (sect. II, Information and communications technology in the United Nations)

Deliverables

29F.10 Table 29F.1 lists all cross-cutting deliverables of the programme.

Table 29F.1

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
1. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. Meetings of the Committee for Programme and Coordination	1	1	1	1
3. Meetings of the Fifth Committee	1	1	1	1

Evaluation activities

- 29F.11 The following evaluations conducted by UNOV and completed in 2022 have guided the proposed programme plan for 2024:
- (a) Evaluation of the implementation of infrastructure and technical improvements;
 - (b) Evaluation of activities in employment and capacity development to meet the requirements of the United Nations Disability Inclusion Strategy.
- 29F.12 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, the evaluation on the implementation of infrastructure and technical improvements highlighted the importance of network redundancy, segmentation and information and communications technology (ICT) security management systems for business continuity to ensure disruptions are handled in a timely manner. To address this, subprogramme 4 will deliver cost-effective network infrastructure solutions in UNODC field offices to create a resilient and sustainable office network with wired and wireless networking. Based on the results of the evaluation on disability inclusion, the Office will consult with organizations of persons with disabilities to expand training and awareness-raising initiatives, provide reasonable accommodation for candidates and personnel with disabilities and conduct dedicated outreach to attract applications from candidates with disabilities.
- 29F.13 An evaluation by UNOV of the client support portal for finance and budget transactions is planned for 2024.

Programme of work

Subprogramme 1

Programme planning, finance and budget

Objective

- 29F.14 The objective, to which this subprogramme contributes, is to ensure sound, effective and efficient financial management by client offices.

Strategy

- 29F.15 To contribute to the objective, the subprogramme will:
- (a) Continue to strengthen the monitoring of budget performance, financial management and control, and improve reporting;
 - (b) Provide advice, assistance, guidance and training to programme managers and administrative units of client offices on financial management and budgetary matters;
 - (c) Streamline financial processes and guidelines and regularly review workflow procedures to identify ways to achieve a more efficient and faster client response;
 - (d) Strengthen internal financial controls, monitor financial performance and risks and ensure integrity of organizational financial data;
 - (e) Monitor the implementation of recommendations from oversight bodies and ensure strict compliance with the Financial Regulations and Rules of the United Nations and the financial policies of the United Nations.
- 29F.16 The above-mentioned work is expected to result in:
- (a) Improved accessibility and understanding of financial information by client offices;
 - (b) Increased accountability by client offices;

- (c) Improved integrity of financial data;
- (d) Enhanced overall management of programme budget and extrabudgetary financial resources.

Programme performance in 2022

Reduction of the backlog of banking details maintenance requests for the United Nations Office at Vienna and its clients

- 29F.17 The subprogramme maintains the banking details of all business partners for UNOV and its clients. In 2022, a record high number of requests on banking details maintenance were received, following the easing of COVID-19 restrictions globally. The volume received was well beyond the initial processing capacity and caused long delays and complaints. In the middle of 2022, there was a backlog of more than 800 requests.
- 29F.18 In response, the subprogramme decentralized the data maintenance work to some of the regional offices of UNODC after providing appropriate training. Ongoing training and support continued to be offered to reduce the number of requests received with errors. Furthermore, the banking details application was also enhanced to include more validation at the time of raising requests. These measures contributed to a significant reduction in the backlog by the end of 2022.
- 29F.19 Progress towards the objective is presented in the performance measure below (see figure 29F.I).

Figure 29F.I
Performance measure: banking details maintenance requests and pending requests to process at the end of year for the United Nations Office at Vienna and its clients (annual)

(Number and percentage)

Planned results for 2024

Result 1: timely closure and reporting of grants

Programme performance in 2022 and target for 2024

- 29F.20 The subprogramme’s work contributed to 40 per cent of final financial reports issued in the year they are due, which did not meet the planned target of 60 per cent. Despite an increased number of financial reports issued in 2022 (28 per cent increase compared with 2021), the target was not met as the number of donor agreements subject to the issuance of final financial reports increased significantly (447 agreements in 2022, compared with 284 agreements in 2021), which posed challenges for substantive offices to complete all financial closing tasks within the prescribed

timelines. This is estimated to increase at the same pace, with 667 agreements estimated in 2023, leading to a commensurate downward adjustment to the 2024 planned target.

29F.21 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29F.II).

Figure 29F.II

Performance measure: percentage of final financial reports issued in the year they are due (annual)

Result 2: improved asset management through re-engineered business processes

Programme performance in 2022 and target for 2024

29F.22 The subprogramme’s work, including an expanded review of the assets register and review of relevant grant agreements in line with IPSAS requirements, contributed to client field offices benefitting from improved accuracy of the assets register and strengthened understanding of the status of assets and IPSAS requirements, which met the planned target.

29F.23 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29F.2).

Table 29F.2

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Client field offices benefit from joint review of asset register, and correction of errors in accounting and in asset records, with parallel delivery of training and ongoing guidance	Client field offices benefit from improved accuracy of the assets register, better understanding on the status of assets and IPSAS requirements	Client field offices become increasingly compliant with IPSAS requirements on project assets accounting, through implementation of the change in scope of assets under their control	Client field offices are fully compliant with IPSAS requirements on project assets accounting

Result 3: improved stewardship of resources

Proposed programme plan for 2024

29F.24 The subprogramme provides administrative support to the United Nations Secretariat units located in Vienna. These administrative support tasks are provided to project and programme managers

whose training, knowledge and tasks are mainly substantive in nature. At the same time, the client units that UNOV services see a continuous turnover of new substantive staff members.

Lessons learned and planned change

29F.25 The lesson for the subprogramme was the need to provide continuous support and training to a targeted number of substantive staff identified as focal points to serve as an interface with the staff of the subprogramme and provide project and programme managers with the support they require in budgetary and accounting matters. In addition, the processes of training and certification provide an assurance of appropriate standards of conduct and compliance with the regulations and rules of the Organization. In applying the lesson, the subprogramme will coordinate, develop and implement learning initiatives to train identified project and programme managers in this area and certify them to act as focal points in budgetary and accounting matters, enabling improved stewardship of resources and effective and efficient financial management by client offices.

29F.26 Expected progress towards the objective is presented in the performance measure below (see figure 29F.III).

Figure 29F.III

Performance measure: number of substantive staff certified as focal points in budgetary and accounting matters and the financial regulations and rules of the organization (cumulative)

Deliverables

29F.27 Table 29F.3 lists all deliverables of the subprogramme.

Table 29F.3

Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Consolidated budget for UNODC for the biennium	–	–	1	–
2. Performance report for UNODC for the biennium	1	1	–	1
3. Annual financial report and audited financial statements for UNODC	1	1	1	1

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

E. Enabling deliverables

Administration: financial management, including risk management and internal control, preparation and implementation of budgets and other resource proposals; management of approximately 2,700 posts (creation, extension, abolishment and funding); financial reporting and accounting, including 1,700 donor reports; cash and revenue management; accounting services, including processing for cost recovery; issuance of 18,000 United Nations Development Programme-related financial authorizations, payments, payroll and disbursements for 1,700 staff members; creation/maintenance of more than 10,000 banking details for business partners; guidance and advice on all financial matters; management of after-service health insurance claims for an estimated 700 beneficiaries; and management of over 7,800 grants.

**Subprogramme 2
Human resources management**

Objective

29F.28 The objective, to which this subprogramme contributes, is to ensure the attraction, development and retention of a competent, diverse, adaptable and healthy workforce with the highest standards of efficiency, competence and integrity, giving due regard to geographical representation, inclusivity and gender balance.

Strategy

- 29F.29 To contribute to the objective, the subprogramme will:
- (a) Foster and reinforce an enabling working environment for its clients with regard to service delivery, talent management and organizational culture, through human resources services to clients in Vienna and in UNODC field offices;
 - (b) Implement talent outreach and attraction initiatives to enhance gender equality, geographical representation and disability inclusion;
 - (c) Support personnel through talent development initiatives and promoting workplace flexibility;
 - (d) Reinforce a culture of zero-tolerance against prohibited conduct, including through the implementation of multiple initiatives of the United Nations System Chief Executives Board for Coordination.
- 29F.30 The above-mentioned work is expected to result in improved staff engagement, motivation, productivity and well-being, thereby contributing to the delivery of the Organization’s mandates.

Programme performance in 2022

A more inclusive, respectful, and supportive work environment through the dignity and inclusion learning initiative

29F.31 The subprogramme actively contributed to the dignity and inclusion learning initiative, which aims at putting into practice the United Nations values through a set of interactive e-learning modules and face-to-face trainings for personnel of the Vienna-based United Nations organizations (Comprehensive Nuclear-Test-Ban Treaty Organization, UNIDO, IAEA, UNOV/UNODC). Jointly launched in November 2021, the initiative provides awareness-raising and training on fostering a more inclusive, respectful and supportive work environment. The themes covered under the initiative included empowering active bystanders, addressing sexual harassment and addressing racism, as well as promoting the inclusion of people who are marginalized. In 2022, the initiative won two awards from the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) for outstanding achievement for implementing the field-specific enabling environment guidelines and inter-agency collaboration.

29F.32 Progress towards the objective is presented in the performance measure below (see figure 29F.IV).

Figure 29F.IV
Performance measure: number of staff at the United Nations Office at Vienna and the United Nations Office on Drugs and Crime equipped to foster a more inclusive, respectful and enabling working environment (annual)

Planned results for 2024

Result 1: A respectful and civil workplace fostered

Programme performance in 2022 and target for 2024

29F.33 The subprogramme’s work contributed to 54 per cent of staff having completed the mandatory online training on the prevention of sexual harassment in the work environment, which did not meet the planned target of 95 per cent. The target was not met as, in July 2022, the course was replaced by a new mandatory course, entitled “United to respect: preventing sexual harassment and other prohibited conduct”. The performance measure has therefore been updated to reflect the completion rate for the new course.

29F.34 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29.V).

Figure 29F.V
Performance measure: percentage of staff having completed the mandatory online training on the prevention of sexual harassment in the work environment (cumulative)

Result 2: career and professional development supported by increased number of certified coaches

Programme performance in 2022 and target for 2024

- 29F.35 The subprogramme's work contributed to 44 certified coaches to ensure sustainability of the organizational culture change, which did not meet the planned target of 45 certified coaches. The target was not met because of non-completion of the certification by five staff members owing to exigencies of service.
- 29F.36 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29F.VI).

Figure 29F.VI

Performance measure: number of certified coaches to ensure sustainability of the organizational culture change (cumulative)

Result 3: an agile organization with a culture of learning and innovation

Proposed programme plan for 2024

- 29F.37 UNOV is committed to supporting and enabling organizational change and transforming its culture to become an agile, diverse and inclusive organization, promoting a culture of learning and innovation. The subprogramme developed an innovation strategy, launched in March 2021, providing a flexible framework to guide current and future innovation. To further mainstream the topic and promote positive cultural change, the subprogramme coordinated a series of webinars on design thinking and agile methodology related to innovation and new ways of working.

Lessons learned and planned change

- 29F.38 The lesson for the subprogramme was that further capacity-building related to the process of innovation, including the design thinking approach and agile methodology, would be helpful to take new ideas forward, further enhance collaboration and scale successful projects. In applying the lesson, the subprogramme will coordinate, develop and implement learning and development initiatives and leverage existing United Nations resources, such as the United Nations innovation toolkit, to further enhance staff capacity related to innovation.
- 29F.39 Expected progress towards the objective is presented in the performance measure below (see figure 29F.VII).

Figure 29F.VII
Performance measure: number of clients reporting improved confidence in applying innovative approaches to their work (annual)

Deliverables

29F.40 Table 29F.4 lists all deliverables of the subprogramme.

Table 29F.4
Subprogramme 2: deliverables 2024, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: 25 targeted outreach programmes, including special events aligned with the system-wide strategy, information and broadcast materials, job fairs and career presentations for approximately 2,500 potential candidates.

E. Enabling deliverables

Administration: human resources services to 3,500 personnel; succession planning, organizational design, classification and reclassification of over 400 posts, outreach and full recruitment for 380 staff posts, 2,300 non-staff engagement processes, expert advice on the conduct of staff and non-staff selection processes to all hiring managers, human resources policies and legal advice; counselling of staff on personal, family and work-related concerns; talent management; issuance and renewal of appointments and contracts, administration of staff movements and separation/terminations; time and attendance, including flexible working arrangements, training on organizational and managerial competencies on a biannual basis, substantive and technical skills, and career development; 3 orientation programmes for new personnel; medical services in collaboration with other Vienna-based entities; health- and wellness-promotion programmes and awareness-raising programmes on prohibited conduct and the Enabling Environment Guidelines for the United Nations System for all staff.

Internal justice and oversight: over 1,000 requests for legal and policy advice to line managers, senior officials and colleagues in the discharge of their official functions, and to senior officials and staff on the application of the Staff Regulations and Rules of the United Nations and other administrative issuances; conducting internal justice-related activities on behalf of the Administration, including legal positions for administrative reviews and cases brought by staff to the Management Evaluation Unit and the Office of the United Nations Ombudsman and Mediation Services; assistance to the responsible official in receiving and assessing complaints and reports of alleged misconduct and processing such complaints in accordance with established policies and procedures, including liaising with the Office of Internal Oversight Services and other investigative bodies, and the Administrative Law Division; discharging the role of the conduct and discipline focal point; awareness-raising on matters related to the administration of justice at the United Nations, including relevant training materials; and initiatives for organizational culture change.

Subprogramme 3 Support services

Objective

- 29F.41 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally sound and effective functioning of client offices with regard to conference and facilities management, property management, travel and transportation, mail and pouch services, procurement, commercial activities, records management and library services.

Strategy

- 29F.42 To contribute to the objective, the subprogramme will:
- (a) Implement and manage an effective supply chain by building on the related Umoja functionality;
 - (b) Implement an environmental management system in line with the United Nations Secretariat environmental policy;
 - (c) Improve the business continuity approach through further integration with other parts of the organizational resilience management system;
 - (d) Provide property management services, diplomatic pouch and mail services and manage records;
 - (e) Provide various travel-related services, including advice, training and policy guidance;
 - (f) Provide regular support to clients on changing workspace needs within the constraints of limited office space;
 - (g) Engage in outreach on library services.
- 29F.43 The above-mentioned work is expected to result in:
- (a) Effective and sustainable use of United Nations property, including office space;
 - (b) Effective management of clients' travel resources;
 - (c) Coordinated approach with other Vienna-based organizations for an effective environmental management system;
 - (d) Increased use of information resources contained in the library for informed decision-making by clients and Member States;
 - (e) Improved planning and sourcing of all goods and services;
 - (f) A robust business continuity plan;
 - (g) Timely and accurate management of documents and mail.

Programme performance in 2022

Increased use of eBook collections

- 29F.44 With access to remote resources and communications platforms being fully utilized in 2022, there were greater opportunities to reach out to a broader audience at UNOV/UNODC. In 2021, a new virtual "author talks" series was launched, whereby authors of commercial books held in the library eBook collections were invited to present and discuss their work, enabling greater participation for staff and members of the permanent missions. In 2022, eight events were held, which raised the profile of library services both internally and with Member States, with delegates from over 40 permanent missions having participated. This led to a 160 per cent increase in the views of the eBooks collection in 2022, including books not highlighted by the series.
- 29F.45 Progress towards the objective is presented in the performance measure below (see figure VIII).

Figure 29F.VIII
Performance measure: number of views of the eBooks collection (cumulative)

Planned results for 2024

Result 1: improved Organization business continuity response

Programme performance in 2022 and target for 2024

- 29F.46 The subprogramme’s work contributed to the alignment of individual business continuity requirements with the UNOV/UNODC business continuity plan, which did not meet the planned target of increased preparedness of the Organization for future crises. The target was not met as a recent OIOS audit on ICT security confirmed that further adjustments would be needed in 2023.
- 29F.47 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29F.5).

Table 29F.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Gaps in business continuity plan identified during COVID-19 crisis	Analysed the business continuity plan vis-à-vis the other components of the organizational resilience management system	Alignment of individual business continuity requirements with the UNOV/UNODC continuity plan	Improved linkages of business continuity with other components of the organizational resilience management system	Increased preparedness of the Organization for future crises, with business continuity fully integrated with other components of the organizational resilience management system

Result 2: improved environmental sustainability through the establishment of an environmental management system

Programme performance in 2022 and target for 2024

- 29F.48 The subprogramme’s work contributed to measuring the environmental impact of the United Nations Office at Vienna and its clients, which did not meet the planned target of a baseline assessment of entity operations’ environmental impact and the development of an action plan. The target was not met since the discussions between the Vienna-based organizations on the common management system are ongoing.

29F.49 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29F.6).

Table 29F.6
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Review of the environmental impact of the United Nations Office at Vienna and its clients	Improved environmental sustainability through the development of an initial version of the local environmental management system	More harmonized and consistent environmental management practices by client offices through the operationalization of the local environmental management system

Result 3: improved supply chain management

Proposed programme plan for 2024

29F.50 The subprogramme is responsible for the planning, sourcing and delivery of all goods and services required by UNOV and its clients. The work is supported through ad hoc tools and approaches, which limit clients’ ability to have updated information pertaining to their programmes.

Lessons learned and planned change

29F.51 The lesson for the subprogramme, based on previous Umoja module roll-outs, was that the expected Headquarters-led deployments of information technology systems for planning, tendering and contract management will require significant mainstreaming and training work by the subprogramme in all client entities and divisions. The roll-out will also need to be linked with currently deployed Umoja functionality and supported by adequate human resource capabilities. In applying the lesson, the subprogramme will develop and deliver training to gradually transition clients, who will be required to complete the training in order to have access to Umoja. The subprogramme will also incrementally phase down ad hoc tools.

29F.52 Expected progress towards the objective is presented in the performance measure below (see table 29F.7).

Table 29F.7
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	–	Clients have access to and the required capabilities to utilize information technology systems for supply chain planning, e-tendering and contract management	Clients have increased and up-to-date visibility of the status and costs of their procurement requirements

Deliverables

29F.53 Table 29F.8 lists all deliverables of the subprogramme.

Table 29F.8

Subprogramme 3: deliverables for 2024, by category and subcategory

Category and subcategory

D. Communication deliverables

Library services: knowledge services for 3,000 library clients; digitized official documents available online; print and electronic information resources with on-site and online access.

E. Enabling deliverables

Administration: travel arrangements (around 16,600 trips), visas (400) and laissez-passer (300) for staff and meeting participants for Vienna-based United Nations Secretariat entities and more than 130 UNODC field office locations; management and maintenance, including office space and furniture, of the United Nations Office at Vienna (total footprint of approximately 16,500 square metres).

Logistics: full procurement services for around 2,400 items, such as office furniture, equipment and software; physical verification of approximately 8,600 assets and equipment; monitoring of United Nations property records at the Vienna International Centre and at the more than 130 UNODC field office locations; shipment of official property, bulk consignments for conferences and removal of personal effects and related insurance requirement for staff; and mail, pouch and distribution services of around 90,000 items (or 114 tonnes) to and from more than 200 United Nations offices and 15 other United Nations entities in Vienna.

Subprogramme 4 Information and communications technology operations

Objective

29F.54 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities' substantive programmes through technologies, including a coherent enterprise information and communications technology system and enterprise architecture, access to ICT-related technological innovations and a secure, coherent and resilient technology application hosting and infrastructure landscape.

Strategy

29F.55 To contribute to the objective, the subprogramme will:

- (a) Place client offices' programme objectives and business needs at the centre of decisions involving ICT service offerings and the implementation of new technologies;
- (b) Support enterprise application deployments and integrate local service delivery mechanisms to avoid replication of globally available services;
- (c) Strengthen security in the use of ICT and data protection through the implementation of vulnerability management, continuous monitoring, the protection of classified information and related policies and procedures;
- (d) Promote cloud computing through using Secretariat-wide systems contracts and increase compliance with technology standards, guidelines and methodologies by cooperating with the regional technology centres and the Office of Information and Communications Technology.

29F.56 The above-mentioned work is expected to result in:

- (a) Clients having improved user experience in ICT service delivery;

- (b) Conformance with global United Nations Secretariat standards and technical procedures;
- (c) Clients who are empowered during the decision-making process and whose administrative and management tasks are facilitated through access to appropriate information technology tools;
- (d) Reduced fragmentation of digital tools and services, with staff incorporating tools and services seamlessly into their daily business workflows with increased effectiveness, efficiency and satisfaction;
- (e) Greater scalability, with systems that are more adaptable to changing needs.

Programme performance in 2022

Strengthened information technology infrastructure to allow greater visibility of the work of the United Nations in Vienna through United Nations Web TV

- 29F.57 United Nations Web TV¹ is the Organization's official streaming video platform for live and on-demand coverage of United Nations meetings and events for a global audience.
- 29F.58 The subprogramme, in cooperation with the United Nations Information Service in Vienna, the Department of Global Communications and the Conference Management Service in Vienna, launched a pilot phase in November 2022 of the United Nations Web TV service for meetings in Vienna, with a view to raising the visibility of the work of the United Nations in Vienna, contributing to the Organization's multilingualism objectives and promoting the Organization's core value of transparency. The subprogramme was able to make rapid adjustments to the network infrastructure to stream two meetings via Web TV in 2022.
- 29F.59 Progress towards the objective is presented in the performance measure below (see table 29F.9).

Table 29F.9

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	United Nations meetings and conferences that were held in Vienna could be watched live on Web TV and on-demand streaming coverage from anywhere and at any time, in multiple languages and on multiple devices, including mobile phones

Planned results for 2024

Result 1: strengthened connectivity resiliency

Programme performance in 2022 and target for 2024

- 29F.60 The subprogramme's work contributed to the implementation of cost-effective network infrastructure solutions in all UNODC field offices to create a resilient and sustainable office network with wired and wireless networking, as demonstrated by 12 UNODC field offices using the network solution, which met the planned target.
- 29F.61 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 29F.IX).

¹ <https://media.un.org/en/webtv>.

Figure 29F.IX

Performance measure: number of UNODC field offices using the network solution (cumulative)

Result 2: integration of needs of persons with disabilities in information and communications technology solutions

Programme performance in 2022 and target for 2024

29F.62 The subprogramme’s work contributed to an improved accessibility of UNODC websites for users with disabilities, with unodc.org achieving a 97/100 score in online site accessibility based on web content accessibility guidelines success criteria developed by the World Wide Web Consortium; and to the enhanced understanding of content managers on disability inclusion and the importance of descriptive content design, which met the planned target.

29F.63 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29F.10).

Table 29F.10

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Disability inclusion actions regarding ICT systems taken on an ad hoc or on-demand basis	Disability inclusion actions regarding ICT systems taken on an ad hoc or on-demand basis and websites improved through accessibility guidelines	Improved accessibility of UNODC websites for users with disabilities, with a 97/100 score for unodc.org in online site accessibility scans Enhanced understanding of content managers on disability inclusion and the importance of descriptive content design	Persons with disabilities benefit from integration of the systematic assessment of the levels of disability inclusion in the approval process for ICT solutions and websites	Content managers create accessible websites and ICT systems using new website development tools

Result 3: improved information and communications technology security of UNOV and its clients

Proposed programme plan for 2024

29F.64 The subprogramme provides the tools to align information technology governance with the enterprise risk management system and the organizational goals following best practices and auditors' advice, to ensure the entity is well placed to embrace new technologies while mitigating potential risks.

Lessons learned and planned change

29F.65 The lesson learned for the subprogramme, based on several information security assessments conducted in 2022, was the need to better align information technology governance, information security and enterprise risk management with Secretariat policies, procedures and guidelines. In applying the lesson, the subprogramme will identify a baseline of the common information security maturity level across the entity and build upon it iteratively following established maturity models, with the goal of reaching compliance towards the reference information security standard set by the Secretariat. In the longer term, UNOV and its clients will be able to secure their information assets according to risk levels, and managers will be better equipped to make risk-informed decisions and will have a better understanding of the risks posed by the adoption of new technologies.

29F.66 Expected progress towards the objective is presented in the performance measure below (see table 29F.11).

Table 29F.11

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Security was operational following Secretariat-wide policies with a focus on increased remote working	Integration of vulnerability management and vulnerability assessments in compliance with OICT policies	Vienna-based ICT systems security maturity strengthened by several security maturity level assessments and addressing critical recommendations	Vienna-based ICT systems further strengthened by implementation of remaining recommendations from 2022	Strengthened security maturity of field office ICT systems by dedicated security assessments

Deliverables

29F.67 Table 29F.12 lists all deliverables of the subprogramme.

Table 29F.12

Subprogramme 4: deliverables for 2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Information and communications technology: information security for information technology systems and data; connectivity services for remote devices; hosting services; voice, video and data communications services; operation and maintenance of existing and new application systems in a secure environment; technical support for approximately 3,000 end users; and advisory services on business solutions.

B. Proposed post and non-post resource requirements for 2024

Overview

29F.68 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 29F.13 to 29F.15.

Table 29F.13

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2022 expenditure ^a	2023 appropriation	Changes					2024 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other	Total	Percentage	
Post	11 393.5	9 787.4	–	–	–	–	–	9 787.4
Other staff costs	801.8	751.8	–	–	–	–	–	751.8
Hospitality	–	0.2	–	–	–	–	–	0.2
Consultants	0.3	–	–	–	6.6	6.6	–	6.6

29F.69 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 29F.16 to 29F.18 and figure 29F.X.

29F.70 As reflected in tables 29F.16 (1) and 29F.17 (1), the overall resources proposed for 2024 amount to \$19,840,600 before recosting, reflecting a net decrease of \$100,000 compared with the appropriation for 2023. Resource changes result from one factor – other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

29F.71 As reflected in table 29F.16 (1), resource changes reflect a decrease of \$100,000 as follows:

- (a) **Subprogramme 1, Programme planning, finance and budget.** The decrease of \$3,000 under general operating expenses reflects a reduction in bank fees costs due to new limitations on the number of bank accounts allowed for salary payments, as well as a reduction in the use of off-cycle payments for staff entitlements;
- (b) **Subprogramme 3, Support services.** The decrease of \$57,000 under general operating expenses reflects the reduced requirements for photocopying due a gradual shift towards a paperless office supported by electronic workflows, as well as a reduced volume in bulk mail and pouch services;
- (c) **Subprogramme 4, Information and communications technology operations.** The decrease of \$40,000 under general operating expenses results from a lower and more flexible mobile plans allowing a gradual shift towards the use of internet communications by staff (\$15,000) and a reduced footprint in the data centre and reduction of the related maintenance costs (\$25,000).

Extrabudgetary resources

29F.72 As reflected in tables 29F.16 (2) and 29F.17 (2), the Office expects to receive extrabudgetary contributions that complement regular budget resources and support the delivery of its mandates. The resources will be used mainly for delivering administrative services. In 2024, extrabudgetary resources are estimated at \$19,265,300 and would provide for 76 posts, as presented in table 29F.16 (2).

29F.73 The extrabudgetary resources for this section are subject to the oversight of the United Nations Office at Vienna, as per the delegated authority from the Secretary-General.

Executive direction and management

29F.74 The executive direction and management is headed by the Director of the Division for Management, who is responsible for providing leadership and direction regarding the management of administrative, conference and related support services for United Nations entities located in Vienna.

29F.75 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office and UNODC are integrating environmental management practices into their operations. The Vienna headquarters is a climate neutral facility, running 100 per cent on renewable energy. Since 2020, the Vienna-based organizations of the common systems have started to renew entrances, replaced existing air-curtains and upgraded/refurbished all elevator cabins. While some of those projects have been completed in parts of the compound, they are still ongoing in others, combined with an increased focus on upgrading air conditioning units, replacing pipes and insulation and lightning systems throughout the Vienna International Centre from the 1978 standards. The projects, which will continue through 2024 and beyond, will result in a further reduction in the environmental impact of the Vienna International Centre as they will increase energy efficiency.

29F.76 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 29F.19. The travel compliance rate in 2022 (71.0%) was lower owing to continued global uncertainty caused by the COVID-19 pandemic, which also affected event planning resulting from late nomination of travellers, as well as late booking of travel. Compliance rates continue to be monitored and further awareness-raising sessions will be held with staff at large.

Table 29F.19
Compliance rate
 (Percentage)

	Actual 2020	Actual 2021	Actual 2022	Planned 2023	Planned 2024
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	–	43	71	100	100

29F.77 The proposed regular budget resources for 2024 amount to \$394,500 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 29F.20 and figure 29F.XI.

Extrabudgetary resources

29F.78 Extrabudgetary resources for the subprogramme are estimated at \$817,800 and would provide for 2 posts (1 P-4 and P-2) as well as non-post resources. The resources would be used in implementing activities related to business transformation.

Programme of work

Subprogramme 1

Programme planning, finance and budget

29F.79 The proposed regular budget resources for 2024 amount to \$2,356,400, reflecting a net decrease of \$3,000 compared with the appropriation for 2023. Additional details on the distribution of resources in 2024 are reflected in table 29F.21 and figure 29F.XII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29F.80 Extrabudgetary resources for the subprogramme are estimated at \$5,028,900 and would provide for 32 posts (1 D-1, 2 P-4, 7 P-3, 1 P-2, 3 General Service (Principal level) and 18 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support financial policy development and financial management reform initiatives, audit liaison and coordination and the capacity of the Financial Resources Management Service to support client offices' activities, including financial accounting operations for UNODC and its field offices and donor financial reporting.

**Subprogramme 2
Human resources management**

29F.81 The proposed regular budget resources for 2024 amount to \$3,023,700 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of resources in 2024 are reflected in table 29F.22 and figure 29F.XIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

29F.82 Extrabudgetary resources for the subprogramme are estimated at \$2,744,100 and would provide for 17 posts (2 P-4, 2 P-3 and 13 General Service (Other level)), as well as non-post resources. The resources would be used mainly to support learning and development and the design and implementation of training programmes and provide the Human Resources Management Service with the capacity to support client offices’ activities, including recruitment and management of staff for UNODC and its field offices.

**Subprogramme 3
Support services**

29F.83 The proposed regular budget resources for 2024 amount to \$10,954,900 reflecting a decrease of \$57,000 compared with the appropriation for 2023. Additional details on the distribution of resources in 2024 are reflected in table 29F.23 and figure 29F.XIV.

Extrabudgetary resources

29F.84 Extrabudgetary resources for the subprogramme are estimated at \$3,868,800 and would provide for the continuation of 14 posts (1 P-4, 5 P-3 and 8 General Service (Other level)), as well as non-post resources. The resources would support procurement services, property management, including for UNODC and its field offices, shipment and registry services, as well as the garage operations at the Vienna International Centre.

**Subprogramme 4
Information and communications technology operations**

29F.85 The proposed regular budget resources for 2024 amount to \$3,111,100 reflecting a decrease of \$40,000 compared with the appropriation for 2023. Additional details on the distribution of resources in 2024 are reflected in table 29F.24 and figure 29F.XV.

Organizational structure and post distribution for 2024

Abbreviations: GS (OL), General Service (Other level); GS (PL), General Service (Principal level); RB, regular budget; XB, extrabudgetary.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee trusts that the vacant posts will be filled expeditiously and that an update thereon will be provided to the General Assembly at the time of the consideration of the present report and in the next budget submission (para. VIII.112).

The Advisory Committee trusts that the Secretary-General will provide comprehensive information on all aspects of the cost-sharing arrangements (para. VIII.123).

The Advisory Committee trusts that the United Nations Office at Vienna will make efforts to achieve equitable geographical representation of Member States among its staff and provide an update in all future programme budget submissions (para. VIII.124).

Of the 4 posts referred to in the recommendation, 3 were filled in 2022 and 1 was filled in March 2023.

The present document outlines cost-sharing arrangements for administrative support on a common services basis to and from other international organizations based in the Vienna International Centre. The Office provides support services as described under paragraph 29F.3. UNIDO provides buildings management services and IAEA provides medical services.

The United Nations Office at Vienna has implemented outreach activities to diversify the pool of applicants, including widely advertised career webinars to external applicants delivered several times per year, participation in careers fairs and presentations on the United Nations employment process, including to United Nations field offices. Outreach for Inspira job openings includes advertising through social media channels, via permanent missions and via the United Nations network.

Board of Auditors

[A/77/5 \(Vol. I\)](#)

The Board recommends that the Administration improve its controls in order to ensure that services provided to entities are recognized in the accounts in a timely manner (para. 52).

The Board also recommends that the Administration conduct an accurate review aimed at detecting services that have been provided to entities but that have not been properly identified (para. 53).

Implementation is in progress. As part of the mid-year review, in July 2022, UNOV reviewed the income received and its allocation and recognition, and found no unrecognized or wrongly recognized income at that stage, and has thus ensured timely recognition in line with the recommendation. As part of the year-end review, in December 2022, the same exercise was repeated to fully address the recommendation.

Implementation is in progress. UNOV submitted to all service providers the cost plans for cost recovery, with the purpose of obtaining confirmation from them, regarding the inclusion and recognition of the services.

Foreword

The purpose of the Office of Internal Oversight Services is to assist the Secretary-General in fulfilling his internal oversight responsibilities in respect of the resources and staff of the Organization through the exercise of internal audit, inspection and evaluation, and investigation functions.

The programme plan for 2024 is aimed at further improving accountability and transparency in the achievement of mandated results and impacts by the Organization and will continue to provide, for use by Member States, the Secretary-General and senior management in decision-making, assurance and advice to strengthen results-based management of the Organization.

(Signed) **Fatoumata Ndiaye**
Under-Secretary-General for Internal Oversight Services

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 30.1 The Office of Internal Oversight Services (OIOS) is responsible for assisting the Secretary-General in fulfilling his internal oversight responsibilities in respect of the resources and staff of the Organization through the provision of internal audit, inspection and evaluation, and investigation services. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [48/218 B](#), [54/244](#), [59/272](#), [64/263](#), [69/253](#) and [74/257](#). The Office will continue to maintain its operational independence in carrying out its objectives. The Independent Audit Advisory Committee provides the Office with advice to strengthen the programme's risk-based planning and budgeting.

Strategy and external factors for 2024

- 30.2 In support of the Secretary-General's focus on building a more sustainable and inclusive future and on reforming the Organization to better deliver against this vision, the strategy for 2024 prioritizes internal oversight coverage of the work of the Organization in the following management areas: (a) implementation of the reforms of the management, peace and security, and development pillars; (b) strengthening of organizational culture; (c) procurement and supply chain management, including management of fraud and corruption risks; (d) management of mission drawdown or transition; and (e) strengthening of the whistle-blower protection system. The Office will also continue to cover the programmes and strategies of the Organization, including cross-cutting areas such as the provision of support to Member States on the implementation of the Sustainable Development Goals and the implementation of the Secretary-General's strategies on gender equality, racial equality, environmental sustainability and data.
- 30.3 Effective engagement with the senior leadership of the Organization will help the programme to identify risks to the Organization and provide timely assurance and advice on issues related to the efficient, economical, effective and ethical management of the Organization's resources.
- 30.4 The Office will strive to maintain a working environment that emphasizes responsibility for results and fosters harmony and learning. The Office will focus on ensuring that staff are equipped with the knowledge and skills necessary to deliver expected results. This will translate into: (a) strengthening of the use of enterprise risk management in planning internal audit and evaluation and inspection activities (subprogrammes 1 and 2); (b) enhanced guidance on conducting performance audit of the delegation of authority system, the management of disability considerations and environmental sustainability in programmes, and the management of fraud risks (subprogramme 1); (c) enhanced guidance for thematic and outcome evaluations of programmes (including for peacekeeping components) and for incorporating the coronavirus disease (COVID-19) response and lessons learned into evaluation designs (subprogramme 2); and (d) guidance on using data analytics to improve investigation planning and therefore the timeliness of investigations (subprogramme 3). In addition, the programme will strengthen its communication and reporting capacity regarding following up on recommendations.
- 30.5 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will coordinate its work with the Board of Auditors and the Joint Inspection Unit and liaise as appropriate with relevant offices involved in the internal justice system of the Organization.
- 30.6 With regard to inter-agency coordination and liaison, the Office will participate as a member of the Representatives of Internal Audit Services of the United Nations Organizations, the United Nations Representatives of Investigative Services and the United Nations Evaluation Group. The programme

will cooperate closely with academic institutions through the United Nations System Staff College and the “evaluation practitioners exchange” seminars of the United Nations Evaluation Group, which also involve members of the international and national evaluation communities.

- 30.7 With regard to the external factors, the overall plan for 2024 is based on the planning assumption that the Office will have unimpeded access to the staff and records of the Organization and other required information.
- 30.8 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. Subprogrammes 1 and 2 will cover the management of risks related to gender equality and mainstreaming a gender perspective. Subprogramme 3 will continue to implement a gender perspective in its victim-centred methodology for investigations of sexual exploitation and abuse and workplace sexual harassment.
- 30.9 In line with the United Nations Disability Inclusion Strategy, the Office will integrate considerations related to disability inclusion in its work processes, including implementing guidance on integrating disability inclusion into oversight activities. In addition, in 2024, subprogrammes 1 and 2 will cover the Organization’s activities to implement the Strategy.

Impact of the pandemic and lessons learned

- 30.10 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, with longer timelines and reduced quality in some activities owing to limitations in: (a) access to people; (b) direct observation of operations; and (c) access to physical assets and software. Access to staff through videoconferencing is not of the same quality as in-person interaction, and remote assessment of conditions of assets, including information and communications technology (ICT) infrastructure, and of behavioural controls, is difficult to implement. However, there continued to be an overall improvement compared with recent years following the resumption of travel. Internal audit teams were able to travel to conduct audits such as of uncrewed aerial vehicle systems at the United Nations Multidimensional Integrated Stabilization Mission in Mali (MINUSMA), and of Umoja employee self-service/manager self-service and related processes for uniformed personnel and national staff at the United Nations Interim Force in Lebanon (UNIFIL), country operations of the Office of the United Nations High Commissioner for Refugees (UNHCR) in Bangladesh, Türkiye, the United Republic of Tanzania and Zambia, and the United Nations Office on Drugs and Crime (UNODC) Regional Office for Southern Africa. Evaluation teams also conducted field missions, such as for the evaluation of the women and peace and security agenda in field-based missions, regarding elections and political transitions, and the evaluation of the Economic and Social Commission for Asia and the Pacific (ESCAP) relating to subprogramme 4: Environment and development.
- 30.11 The Office continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including the use of remote techniques to facilitate some assignments, in particular during the planning phases. For example, subprogramme 1 will continue to remotely access and analyze information that is readily available in online systems, such as Umoja and Inspira, and conduct in-person audit tests and procedures only where physical presence is necessary. Online training tools are also being utilized for workshops, conferences and meetings, thus limiting the number of travellers when such events take place. Subprogrammes 2 and 3 also continue to utilize, where possible, remote techniques for the gathering of information and interviewing of witnesses. For subprogramme 2, the use of online interviews and focus groups contributed to greater efficiencies.

Legislative mandates

- 30.12 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

<p>48/218 B; 60/254</p> <p>60/1</p> <p>61/245</p>	<p>Review of the efficiency of the administrative and financial functioning of the United Nations</p> <p>2005 World Summit Outcome</p> <p>Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies</p>	<p>61/275</p> <p>72/266 A and B</p> <p>74/257</p> <p>77/259</p>	<p>Terms of reference for the Independent Audit Advisory Committee and strengthening the Office of Internal Oversight Services</p> <p>Shifting the management paradigm in the United Nations</p> <p>Review of the implementation of General Assembly resolutions 48/218 B, 54/244, 59/272, 64/263 and 69/253</p> <p>Report on the activities of the Office of Internal Oversight Services</p>
---	---	---	---

**Subprogramme 1
Internal audit**

General Assembly resolutions

<p>67/244 B</p>	<p>Financing of the International Residual Mechanism for Criminal Tribunals</p>

Deliverables

30.13 Table 30.1 lists all cross-cutting deliverables of the programme.

Table 30.1
Cross-cutting deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Report on the activities of the Office of Internal Oversight Services (Parts I and II)	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	31	32	28	26
Meetings of:				
2. The Fifth Committee	8	9	8	8
3. The Committee for Programme and Coordination	17	17	14	12
4. The Advisory Committee on Administrative and Budgetary Questions	2	2	2	2
5. The Independent Audit Advisory Committee	4	4	4	4

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Databases and substantive digital materials: comprehensive database and dashboard for monitoring the status of implementation of the approximately 1,000 open recommendations of the Office.

E. Enabling deliverables

Content on communications platforms, briefings and presentations on oversight activities; refresher training to programme managers on the Office’s recommendation monitoring system.

Evaluation activities

- 30.14 The external quality assessment of the Investigations Division conducted by an independent panel of experts commissioned by OIOS, and completed in 2022, has guided the proposed programme plan for 2024.
- 30.15 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. Although concluding that the OIOS investigations function was working well, the independent panel recommended improvements to areas such as work planning, tracking of case progression and prioritization of cases. OIOS has developed an action plan to implement the panel’s recommendations, including by strengthening forensic investigation capacities, quality assurance practices and the approach to protection against retaliation investigations.
- 30.16 The following evaluations, to be conducted by an independent panel of experts to be commissioned by OIOS, are planned for 2024:
 - (a) External quality assessment of the Inspection and Evaluation Division;
 - (b) Comprehensive evaluation of OIOS.

Programme of work

**Subprogramme 1
Internal audit**

Objective

- 30.17 The objective, to which this subprogramme contributes, is to improve the efficiency, economy, effectiveness and impact of the Organization’s programmes, in keeping with best management practices.

Strategy

- 30.18 To contribute to the objective, the subprogramme will:
 - (a) Conduct internal audit activities to recommend improvements to key controls and processes and identify accountability issues, with a strengthened focus on providing assurances as to whether Secretariat entities have adequately and effectively implemented the new delegation of authority; as well as on the effectiveness and efficiency of programme performance monitoring and reporting and service delivery;
 - (b) Support the efforts by the Department of Management Strategy, Policy and Compliance to strengthen the United Nations Secretariat accountability system, through assurance and advice to the Department;
 - (c) Focus on data governance and data security in the use of ICT in the Organization and strengthen its own capacity to use ICT systems and data, including through a new web-based audit planning and monitoring system and performance monitoring dashboards;

- (d) Strengthen annual work planning processes by identifying and monitoring audit assignments that systematically cover United Nations cross-cutting priorities in the management, programme and strategy areas, (including reforms, organization culture, procurement and supply chain, mission drawdown or transition and Sustainable Development Goal support) and take into consideration gender, disability, racial, human rights and environmental perspectives, as appropriate;
 - (e) Implement recommendations resulting from the external quality assessment of the internal audit function.
- 30.19 The above-mentioned work is expected to result in:
- (a) Strengthened accountability and transparency in the use of resources by United Nations organizations and entities;
 - (b) Improved risk identification and remediation and increased management, strategic and programme results by United Nations organizations and entities;
 - (c) High quality of internal audit assurance provided to the Secretary-General, heads of organizations and entities and Member States on the adequacy and effectiveness of risk management and internal control systems.

Programme performance in 2022

Strengthened coherence and business continuity in the United Nations Secretariat from the pandemic response

- 30.20 In response to the COVID-19 pandemic, the subprogramme conducted thematic audit and advisory engagements covering the United Nations response to the pandemic, the pandemic’s impact on operations, business continuity and lessons learned on coherence.
- 30.21 The audits and advisories resulted in 58 recommendations and advice aimed at strengthening governance mechanisms, mandate delivery, work processes and COVID-19 infection control procedures. This work contributed to the implementation of measures to address gaps in work-from-home guidance, work planning and risk assessment and the handling of staff mental health issues.
- 30.22 Progress towards the objective is presented in the performance measure below (see table 30.2).

Table 30.2
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Strengthened pandemic response, coherence and business continuity measures, informed by 2 COVID-19 themed reviews on the governance of business continuity and crisis management and mitigation measures to protect mission personnel during the COVID-19 pandemic period	Strengthened pandemic response, coherence and business continuity measures, informed by 18 COVID-19-themed audits, advisories and reviews on operational response to the pandemic; business continuity and crisis management; measures to protect and promote the well-being of personnel during the pandemic; arrangements for the effective use of vendors and logistics partners for critical supply chain activities and to support the effective use of cash-based interventions and core relief item distributions to beneficiaries during the COVID-19 emergency	Strengthened pandemic response, coherence and business continuity measures, informed by 2 COVID-19 themed audits on the response to the pandemic; and 1 review on recurrent issues on the United Nations response to the pandemic

Planned results for 2024

Result 1: strengthened data governance for enhanced performance and accountability of the Secretariat

Programme performance in 2022 and target for 2024

- 30.23 The subprogramme’s work contributed to the acceptance of 142 audit recommendations, related to strengthening data governance in the Organization, representing 21 per cent of the total recommendations accepted in 2022, which exceeded the planned target of 10 per cent.
- 30.24 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 30.I).

Figure 30.I
Performance measure: audit recommendations accepted that strengthen data governance in the Organization (annual)

Result 2: strengthened accountability system in the United Nations Secretariat

Programme performance in 2022 and target for 2024

- 30.25 The subprogramme’s work contributed to strengthened organizational accountability, as informed by two thematic assessments included in the evaluation of the accountability system, as well as the availability of 28 action points and advice to strengthen the accountability system and the development of action plans by the management of the Department of Management Strategy, Policy and Compliance, where relevant, to address areas of improvement, which met the planned targets.
- 30.26 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 30.3).

Table 30.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Departments institute internal controls, in alignment with the advisory on the statement of internal control	Strengthened organizational accountability through advice on the extent to which the accountability system is relevant, efficient and effective, as informed by eight thematic assessments in the evaluation of the accountability system: enterprise resource management; planning and budgeting; delegation of authority; budget implementation and financial management; internal control system; information systems; ethics and integrity; human resources management, learning and development strategies MINUSMA, MINUSCA, UNMISS, UNIFIL, and UNSOM/ UNSOS receive advisories on the performance of delegation of authority for human resources, financial, procurement and property	Strengthened organizational accountability, informed by two thematic assessments included in the evaluation of the accountability system: programme delivery and organizational performance; the Business Transformation and Accountability Division within the Department of Management Strategy, Policy and Compliance as enabler of the accountability system Availability of 28 action points and advice to strengthen the accountability system, and development of action plans by Department management, where relevant	Strengthened organizational accountability informed by three thematic assignments on aspects of the accountability system, including the flexible workspace project (mandated by the General Assembly)	Implementation of recommendations and associated management plans of action to strengthen the accountability system, informed by three audits, including programme performance monitoring and reporting and service delivery

Abbreviations: MINUSCA, United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic; MINUSMA, United Nations Multidimensional Integrated Stabilization Mission in Mali; UNIFIL, United Nations Interim Force in Lebanon; UNMISS, United Nations Mission in South Sudan; UNSOM, United Nations Assistance Mission in Somalia; UNSOS, United Nations Support Office in Somalia.

Result 3: increased accountability through transparent exercise of the delegation of authority

Proposed programme plan for 2024

30.27 Since the launch in 2019 of the Secretary-General’s framework for delegating increased authority directly to heads of entities in the areas of human resources, budget and finance, procurement and property management,¹ the subprogramme has conducted six advisory engagements focused on various aspects of its implementation in the Secretariat. The subprogramme identified areas of improvement and provided advice on strengthening the effectiveness and efficiency of the delegation of authority system, including enhanced accountability and transparency in the exercise of authorities delegated to heads of entities.

Lessons learned and planned change

30.28 The lesson for the subprogramme was the need to shift its approach, from providing entities with advice on the implementation of the framework, to assessing the effectiveness of its implementation. In applying the lesson, the subprogramme will conduct thematic audits to assess the adequacy and effectiveness of the implementation of the delegation of authority system in the Secretariat. The subprogramme will focus its efforts to address identified areas of higher risk and provide recommendations to further enhance transparency and accountability on the use of delegated authority for more effective decision-making by managers.

30.29 Expected progress towards the objective is presented in the performance measure below (see figure 30.II).

Figure 30.II

Performance measure: audit recommendations accepted that strengthen the implementation of the delegation of authority framework in the Organization

Deliverables

30.30 Table 30.4 lists all deliverables of the subprogramme.

¹ [ST/SGB/2019/2](#).

**Subprogramme 2
Inspection and evaluation**

Objective

- 30.31 The objective, to which this subprogramme contributes, is to strengthen relevance, efficiency, effectiveness and impact in the implementation of programmes and legislative mandates of the Organization and improve decision-making, accountability and learning.

Strategy

- 30.32 To contribute to the objective, the subprogramme will:
- (a) Focus, in conducting evaluations, on subprogramme-level outcomes achieved by Secretariat entities under the peace and security, sustainable development, human rights and humanitarian work pillars;
 - (b) Integrate the Secretary-General’s cross-cutting strategies in evaluation design and implementation and take into consideration the impact of COVID-19 on programme performance;
 - (c) Refine its inspection and evaluation methodology and develop appropriate evaluation design and data collection techniques;
 - (d) Provide evaluation methodological guidance and quality assurance support to Secretariat entities and to the wider Organization, including through collaboration with the Department of Management Strategy, Policy and Compliance, and by developing and implementing community of practice workshops, methodology seminars and other capacity-building measures;
 - (e) Enhance evaluation knowledge-sharing through the production of evaluation newsletters and evaluation synthesis reports;
 - (f) Support system-wide evaluation through collaboration with the Executive Office of the Secretary-General.
- 30.33 The above-mentioned work is expected to result in:
- (a) Increased learning and accountability of Secretariat entities towards achieving the planned outcomes of programmes and subprogrammes and drawing upon lessons learned;

- (b) Strengthened evaluation capacity and performance, and greater use of evaluation results to inform programme planning and achievement of results within the Organization.

Programme performance in 2022

Strengthened culture of learning and accountability

30.34 In order to strengthen the capacity of Secretariat entities to implement the Secretariat administrative instruction on evaluation (ST/AI/2021/3) and conduct their own internal evaluations, the subprogramme, in partnership with the Department of Management Strategy, Policy and Compliance, undertook four Secretariat workshops in 2022 covering the topics of developing evaluation policies, structures and plans, and terms of reference, as well as membership in the United Nations Evaluation Group. A total of 164 individuals representing 70 different entities participated in one or more of these workshops. Furthermore, the subprogramme worked with the United Nations System Staff College to develop an evaluation training course that was conducted twice in 2022, for a total of 45 individuals representing 23 different entities.

30.35 Progress towards the objective is presented in the performance measure below (see figure 30.III).

Figure 30.III

Performance measure: number of entities with evaluation policies (cumulative)

Planned results for 2024

Result 1: strengthened evaluation function in the Secretariat for a more relevant, efficient, and effective United Nations

Programme performance in 2022 and target for 2024

- 30.36 The subprogramme’s work contributed to 20 per cent of entities meeting at least 80 per cent of the performance criteria assessed in the biennial report on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives, which did not meet the planned target of 50 per cent. The target was not met owing to the continued challenge of embedding a strong evaluation culture and practice in the Secretariat. Nevertheless, improvements were made in 2022 with regard to the number of evaluation policies and overall evaluation quality.
- 30.37 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 30.IV).

Figure 30.IV

Performance measure: percentage of entities meeting at least 80 per cent of the performance criteria assessed in the biennial report on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives^a

^a Secretariat evaluation performance is assessed biennially. The number of entities assessed increased from 74 in 2021 to 76 in 2022.

Result 2: more specific and results-oriented evidence of the outcomes of United Nations support to Member States for the 2030 Agenda for Sustainable Development

Programme performance in 2022 and target for 2024

- 30.38 The subprogramme’s work contributed to improved efficiency and effectiveness of mandate delivery through eight evaluations, identifying good practices to be replicated and opportunities for strengthening programme mandate delivery to facilitate host Governments in meeting the Sustainable Development Goals, which met the planned target.
- 30.39 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 30.5).

Table 30.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
A new structured approach to evaluating outcomes at the subprogramme level is adopted	Strengthened programme coherence at the country level through an evaluation of the resident coordinator system Strengthened political affairs components in peacekeeping missions through an evaluation covering five missions: MINUSCA, MINUSMA, MONUSCO,	Improved efficiency and effectiveness of mandate delivery through eight evaluations: ECA, macroeconomic policy and governance; ECLAC, macroeconomic policies and growth; ESCWA, shared economic prosperity; ESCAP, environment and development; ECE, economic cooperation and	Improved efficiency and effectiveness of mandate delivery through eight subprogramme outcome evaluations: UN-Habitat, shared prosperity; OCHA, coordination of humanitarian action and emergency response; OHCHR, human rights mainstreaming (to be determined); DPPA, cluster 3 special political	Improved efficiency and effectiveness of mandate delivery through twelve outcome evaluations and outcome synthesis reports: Secretariat contribution to the Sustainable Development Goals; OCT; OCHA; DCO, resident coordinator system; thematic outcome evaluation of children and armed conflict mandates; synthesis of outcome

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
	UNMIK and UNMISS	integration; DCO, regional offices; MINUSMA, rule of law; and MONUSCO, rule of law	missions; UNMISS, rule of law; MINUSCA, rule of law; UNMIK, rule of law; and DCO, resident coordinator system	evaluation results on rule of law in peacekeeping operations; synthesis of outcome evaluation results on regional economic commissions

Abbreviations: DCO, Development Coordination Office; DPPA, Department of Political and Peacebuilding Affairs; ECA, Economic Commission for Africa; ECE, Economic Commission for Europe; ECLAC, Economic Commission for Latin America and the Caribbean; ESCAP, Economic and Social Commission for Asia and the Pacific; ESCWA, Economic and Social Commission for Western Asia; MINUSCA, United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic; MINUSMA, United Nations Multidimensional Integrated Stabilization Mission in Mali; MONUSCO, United Nations Organization Stabilization Mission in the Democratic Republic of the Congo; OCHA, Office for the Coordination of Humanitarian Affairs; OHCHR, Office of the United Nations High Commissioner for Human Rights; UN-Habitat, United Nations Human Settlements Programme; UNMIK, United Nations Interim Administration Mission in Kosovo; UNMISS, United Nations Mission in South Sudan.

Result 3: strengthened programmatic performance and achievement of results

Proposed programme plan for 2024

30.40 The subprogramme contributes to more effective programmes through the issuance of recommendations intended to strengthen performance and achievement of results. Follow-up triennial reviews of the implementation by programmes of OIOS recommendations have shown the positive impact, including more strategic programme orientation, more effective programme activities and products, and strengthened partnerships.

Lessons learned and planned change

30.41 The lesson for the subprogramme was that a greater focus on evaluating outcomes and impacts – although methodologically more complex than the previous focus on internal processes, activities, and outputs – would ensure that the eventual evaluation reports could better contribute to improved decision-making, accountability and learning. In applying the lesson, the subprogramme will strengthen its outcome focus by providing more relevant information on programme performance and results, and recommendations that are more tailored towards enhancing programme effectiveness. The subprogramme will ensure a consultative process to formulate recommendations that are timely, relevant, targeted and aimed at specific programme performance gains.

30.42 Expected progress towards the objective is presented in the performance measure below (see figure 30.V).

Figure 30.V
Performance measure: percentage of recommendations implemented within 24 months of issuance

Deliverables

30.43 Table 30.6 lists all deliverables of the subprogramme.

Table 30.6

Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Subprogramme 3 Investigations

Objective

30.44 The objective, to which this subprogramme contributes, is to enhance accountability and ethical behaviour within the Organization.

Strategy

30.45 To contribute to the objective, the subprogramme will:

- (a) Investigate reports of possible violations of United Nations regulations, rules and pertinent administrative policies;
- (b) Enable prevention of and response to (i) sexual misconduct, including sexual exploitation and abuse, as well as sexual harassment, and (ii) fraud and corruption, including procurement fraud and medical insurance fraud;
- (c) Develop the investigative capacity and capability of (i) members of troop contingents who are responsible for undertaking investigations into misconduct, and (ii) officials who are responsible for the appointment of investigative panels or entities into misconduct.

30.46 The above-mentioned work is expected to result in:

- (a) Improved ability of the Secretary-General and his delegates to make appropriate decisions on jurisdictional or disciplinary actions or corrective measures;
- (b) Improved ability of United Nations entities to identify and address misconduct;

- (c) Improved detection of issues and better control of risks resulting in zero tolerance by the Organization, especially related to sexual exploitation and abuse, sexual harassment, racial discrimination, fraud and corruption.

Programme performance in 2022

Increased trust in the investigations function resulting in higher levels of reporting and addressing of possible unsatisfactory conduct

30.47 The subprogramme has consistently recorded a year-on-year increase in the reporting of unsatisfactory conduct since 2015 (briefly interrupted by the lockdowns associated with the start of the COVID-19 pandemic). In 2022, reporting increased by 4 per cent over 2021 levels (an increase of 10 per cent compared with 2020 and 156 per cent compared with 2015). This increase in reporting is indicative of increasing trust in the capacity of the Organization’s investigations function to contribute effectively to responding to misconduct. In 2022, the Investigations Division initiated 366 new investigations, an increase of 19 per cent compared with 2021. A strong and effective response to reports of misconduct by the subprogramme supports the Organization in its deterrence activities and maintains internal and external stakeholders’ trust in the Organization.

30.48 Progress towards the objective is presented in the performance measure below (see figure 30.VI).

Figure 30.VI
Performance measure: increased reporting of possible unsatisfactory conduct and investigations initiated (annual)

(Number of reports received and investigations initiated)

Planned results for 2024

Result 1: increased trust in investigation outcomes

Programme performance in 2022 and target for 2024

30.49 The subprogramme’s work contributed to an aggregate score of 84 per cent on questions rating the findings and recommendations of investigation reports and whether they enabled relevant decisions, which did not meet the planned target of 90 per cent. The target was not met owing to the need to further strengthen the quality and the presentation of supporting documentation and evidence included in investigation reports.

30.50 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 30.VII).

Figure 30.VII
Performance measure: percentage of survey respondents that are confident that the investigation reports enabled relevant decisions (annual)

Result 2: strengthened accountability and transparency in addressing reports of retaliation

Programme performance in 2022 and target for 2024

- 30.51 The subprogramme’s work contributed to an average completion of time of 9.8 months for protection against retaliation investigations, which did not meet the planned target of 9 months. The target was not met since retaliation investigations are often reliant on the completion of a parallel fact-finding investigation to confirm whether the protected act led to a detrimental action.
- 30.52 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 30.VIII).

Figure 30.VIII
Performance measure: protection against retaliation investigations available to enhance protection for those who report misconduct or wrongdoing (annual)

(Average completion time, in months)

^a No protection against retaliation investigations were closed in 2021.

Result 3: strengthened response to misconduct through improved investigations timelines

Proposed programme plan for 2024

- 30.53 Timely investigations are critical to the people and programmes affected by alleged misconduct, and to meet the Organization’s standards of integrity. To address its increasing caseload, in 2022 the subprogramme focused on streamlining its processes and improving its case management. With the

resumption of recruitment and the return to pre-pandemic modes of operations, investigation completion time decreased to an average of 10.2 months in 2022.

Lessons learned and planned change

- 30.54 The lesson for the subprogramme, based on the final report of the independent panel on the external quality assurance review of the investigations function, was that a strengthened quality assurance process has the potential to significantly reduce overall completion times, given that the review of investigation reports accounts for 28 per cent of the average investigation’s life cycle. In applying the lesson, the subprogramme will focus on implementing the recommendations contained in the external quality assurance report, including improving the quality assurance process to facilitate timely investigations and enable a strengthened response to misconduct.
- 30.55 Expected progress towards the objective is presented in the performance measure below (see figure 30.IX).

Figure 30.IX
Performance measure: strengthened response to misconduct (annual)

(Percentage of all investigations completed in less than 12 months)

Deliverables

- 30.56 Table 30.7 lists all deliverables of the subprogramme.

Table 30.7
Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge				
Publications (number of publications)	275	217	275	275
Investigation and closure reports	275	217	275	275
E. Enabling deliverables				
Internal justice and oversight: capacity-building related to combating fraud and corruption, especially medical insurance fraud, focusing on peace operations.				

B. Proposed post and non-post resource requirements for 2024

Overview

30.57 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 30.8 to 30.10.

Table 30.8

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2022 expenditure ^a	2023 appropriation	Changes					2024 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other	Total	Percentage	
Posts	18 375.0	19 022.2	–	–	–	–	–	19 022.2
Other staff costs	1 330.8	1 658.8	–	–	–	–	–	1 658.8

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

30.60 As reflected in table 30.4 (1), resource changes reflect the cost-neutral redeployment of resources between components and subprogrammes as follows:

- (a) **Executive direction and management.** The net increase of \$23,900 reflects increased requirements for travel (\$34,100) for the Under-Secretary-General to conduct risk-based strategic planning, monitoring and assurance of mandated activities within the key locations of OIOS staff and activities, as well as to engage in consultations and risk discussions with senior leadership of United Nations entities in these areas. The increase is offset in part mainly by the

outward redeployment of the resources for communication services and rental of the printer (\$8,500), under general operating expenses, to Programme support;

- (b) **Subprogramme 1, Internal audit.** The net increase of \$63,200 reflects mainly increased requirements for consultancy services (\$48,800) to supplement in-house capacity and expertise for the internal audit of the SharePoint security, Citrix security, data management and data governance, and environmental sustainability at the United Nations Secretariat, increased requirements under furniture and equipment (\$10,400) for the replacement of laptops, as well as the inward redeployment from Programme support, under contractual services, of the resources for support and maintenance of the audit software application (\$26,500). The increase is offset in part mainly by the outward redeployment of the resources for communication services and rental of the printer (\$17,500), under general operating expenses, and the resources for the business intelligence software (\$8,900), under contractual services, to Programme support;
- (c) **Subprogramme 2, Inspection and evaluation.** The net decrease of \$33,600 is mainly due to reduced requirements for contractual services, as a provision was included in 2023 for the external quality assessment (\$50,000) of the Division, and the outward redeployment of the resources for communication services and rental of the printer (\$6,800), under general operating expenses, to Programme support. The decrease is offset in part mainly by increased requirements for interpretation and translation services required for local population interviews during the conduct of evaluations (\$19,300), under contractual services, and additional requirements under furniture and equipment (\$4,000) for the purchase of laptops;
- (d) **Subprogramme 3, Investigations.** The net decrease of \$27,000 reflects mainly the outward redeployment to Programme support of the resources for communication services and rental of the printer (\$19,500), under general operating expenses, as well as reduced requirements for mandatory training of staff of the Division, based on anticipated number of staff needs, under contractual services (\$10,200);
- (e) **Programme support.** The net decrease of \$26,500 reflects mainly the outward redeployment of the resources for support and maintenance of the audit software application (\$26,500), under contractual services, to Subprogramme 1, and lower requirements for desktop and hosting services (\$29,200) based on past actual expenditure patterns, offset in part by the inward redeployment of the resources for communication services and rental of the printer from Executive direction and management and the three subprogrammes, under general operating expenses, which have further been adjusted downward based on past actual expenditure patterns (\$24,000).

Other assessed and extrabudgetary resources

- 30.61 As reflected in tables 30.4 (2) and 30.5 (2), the Office is also supported by other assessed resources, estimated at \$32,302,700, which would provide for 136 posts as well as non-post resources. The resources would be used for audit, inspection and evaluation, and investigation activities related to peacekeeping operations and to the International Residual Mechanism for Criminal Tribunals. The decrease of \$1,487,500 is due to the application of higher vacancy rates for professional and general service staff.
- 30.62 As reflected in tables 30.4 (3) and 30.5 (3), the Office receives extrabudgetary contributions, which complement regular budget resources for the delivery of its mandates. In 2024, extrabudgetary resources of \$13,963,900 are estimated, as described under the respective subprogrammes.
- 30.63 The authority to oversee the use of extrabudgetary resources rests with OIOS, in accordance with the delegation of authority by the Secretary-General.

Executive direction and management

- 30.64 The Office of the Under-Secretary-General provides overall strategic planning and monitoring and ensures effective coordination of the workplan for the Office of Internal Oversight Services. The Office of the Under-Secretary-General coordinates the work of the three subprogrammes, undertakes

Part IX Internal oversight

liaison with the Board of Auditors and the Joint Inspection Unit and maintains a close working relationship with the oversight functions of the other United Nations system organizations. Furthermore, it provides quality control for the reports of the Office of Internal Oversight Services to the General Assembly, oversees resource utilization and serves as the focal point on performance management and for compliance monitoring of recommendations of the Office.

- 30.65 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office will continue to take steps to implement the environmental policy of the United Nations Secretariat, including by continuing to reduce its carbon footprint through the use of videoconference facilities for interviews and meetings, ensuring that all printers are set to double-sided printing and encouraging staff to turn off computers and monitors at the end of the workday.
- 30.66 Information on the timely submission of documentation and advance booking for air travel is reflected in table 30.14.
- 30.67 In order to comply with the advance purchase policy directive, the Office continues its efforts by implementing an internal standard operating procedure to ensure that staff schedule flights at least two weeks in advance of planned audits, inspections and investigations. OIOS continues to ensure that videoconferencing or teleconferencing facilities are utilized, if possible, for oversight assignments.

Compliance rate

(Percentage)

	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Actual 2022</i>	<i>Planned 2023</i>	<i>Planned 2024</i>
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	88	62	88	100	100

- 30.68 The proposed regular budget resources for 2024 amount to \$1,539,800 and reflect a net increase of \$23,900 compared with the appropriation for 2023. The net increase is explained in paragraph 30.60 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 30.15 and figure 30.XI.

**Subprogramme 1
 Internal audit**

30.69 The proposed regular budget resources for 2024 amount to \$8,797,500 and reflect a net increase of \$63,200 compared with the appropriation for 2023. The net increase is explained in paragraph 30.60 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 30.16 and figure 30.XII.

 (Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

- 30.70 Other assessed resources for the subprogramme are estimated at \$17,098,000 and would provide for 73 posts as well as non-post resources. The resources would provide support to audit activities related to peacekeeping operations and to the International Residual Mechanism for Criminal Tribunals. The estimated decrease of \$808,500 is mainly due to the application of higher vacancy rates for professional and general service staff.
- 30.71 Extrabudgetary resources for the subprogramme are estimated at \$10,991,100 and would provide for 45 posts as well as non-post resources. The resources would provide audit coverage in support of UNHCR, DCO, the International Trade Centre (ITC), the United Nations Joint Staff Pension Fund, UNODC, the OHCHR, the United Nations Framework Convention on Climate Change, the United Nations University, the World Tourism Organization, the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa, the United Nations Environment Programme and UN-Habitat. The expected increase of \$218,100 is anticipated from UN-Habitat, from which extrabudgetary resources were not received in 2023.

**Subprogramme 2
 Inspection and evaluation**

- 30.72 The proposed regular budget resources for 2024 amount to \$4,373,000 and reflect a net decrease of \$33,600 compared with the appropriation for 2023. The net decrease is explained in paragraph 30.60 (c). Additional details on the distribution of the proposed resources for 2024 are reflected in table 30.17 and figure 30.XIII.

(Number of posts/thousands of United States dollars)

Other assessed resources and extrabudgetary resources

- 30.73 Other assessed resources for the subprogramme are estimated at \$2,493,400 and would provide for 11 posts as well as non-post resources. The resources would provide support to evaluation activities related to peacekeeping operations. The estimated decrease of \$106,000 is mainly due to the application of higher vacancy rates for professional and general service staff.
- 30.74 Extrabudgetary resources for the subprogramme are estimated at \$545,500 and would provide for non-post resources to support evaluation activities relating to the Development Coordination Office.

**Subprogramme 3
 Investigations**

- 30.75 The proposed regular budget resources for 2024 amount to \$6,018,600 and reflect a net decrease of \$27,000 compared with the appropriation for 2023. The net decrease is explained in paragraph

30.4 (d). Additional details on the distribution of the proposed resources for 2024 are reflected in table 30.18 and figure 30.XIV.

(Number of posts/thousands of United States dollars)

Other assessed resources and extrabudgetary resources

30.76 Other assessed resources for the subprogramme are estimated at \$11,988,000 and would provide for 48 posts as well as non-post resources. The resources would provide support to investigations activities related to peacekeeping operations. The estimated decrease of \$579,900 is mainly due to the application of higher vacancy rates for professional and general service staff.

30.77 Extrabudgetary resources for the subprogramme are estimated at \$2,427,400 and would provide for non-post resources. The resources would support investigation activities relating to the Development Coordination Office, the United Nations Joint Staff Pension Fund, OCHA, the International Civil Aviation Organization, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) ITC, and UNODC.

Programme support

- 30.78 The Executive Office provides central administrative services to the Office in the areas of human resources management and financial and general administration, including the provision of advice to senior managers of the Office on administrative, financial, personnel and budgetary matters. In addition, it administers the staff, as well as the financial resources of the Office, at Headquarters, Geneva, Vienna, Nairobi and other duty stations, including the various peacekeeping missions and the International Residual Mechanism for Criminal Tribunals, under the delegation of authority granted by the Secretary-General and in accordance with the regulations and rules of the United Nations.
- 30.79 The proposed regular budget resources for 2024 amount to \$1,405,700 and reflect a net decrease of \$26,500 compared with the appropriation for 2023. The net decrease is explained in paragraph 30.60 (e). Additional details on the distribution of the proposed resources for 2024 are reflected in table 30.19 and figure 30.XV.

Figure 30.XV
Programme support: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

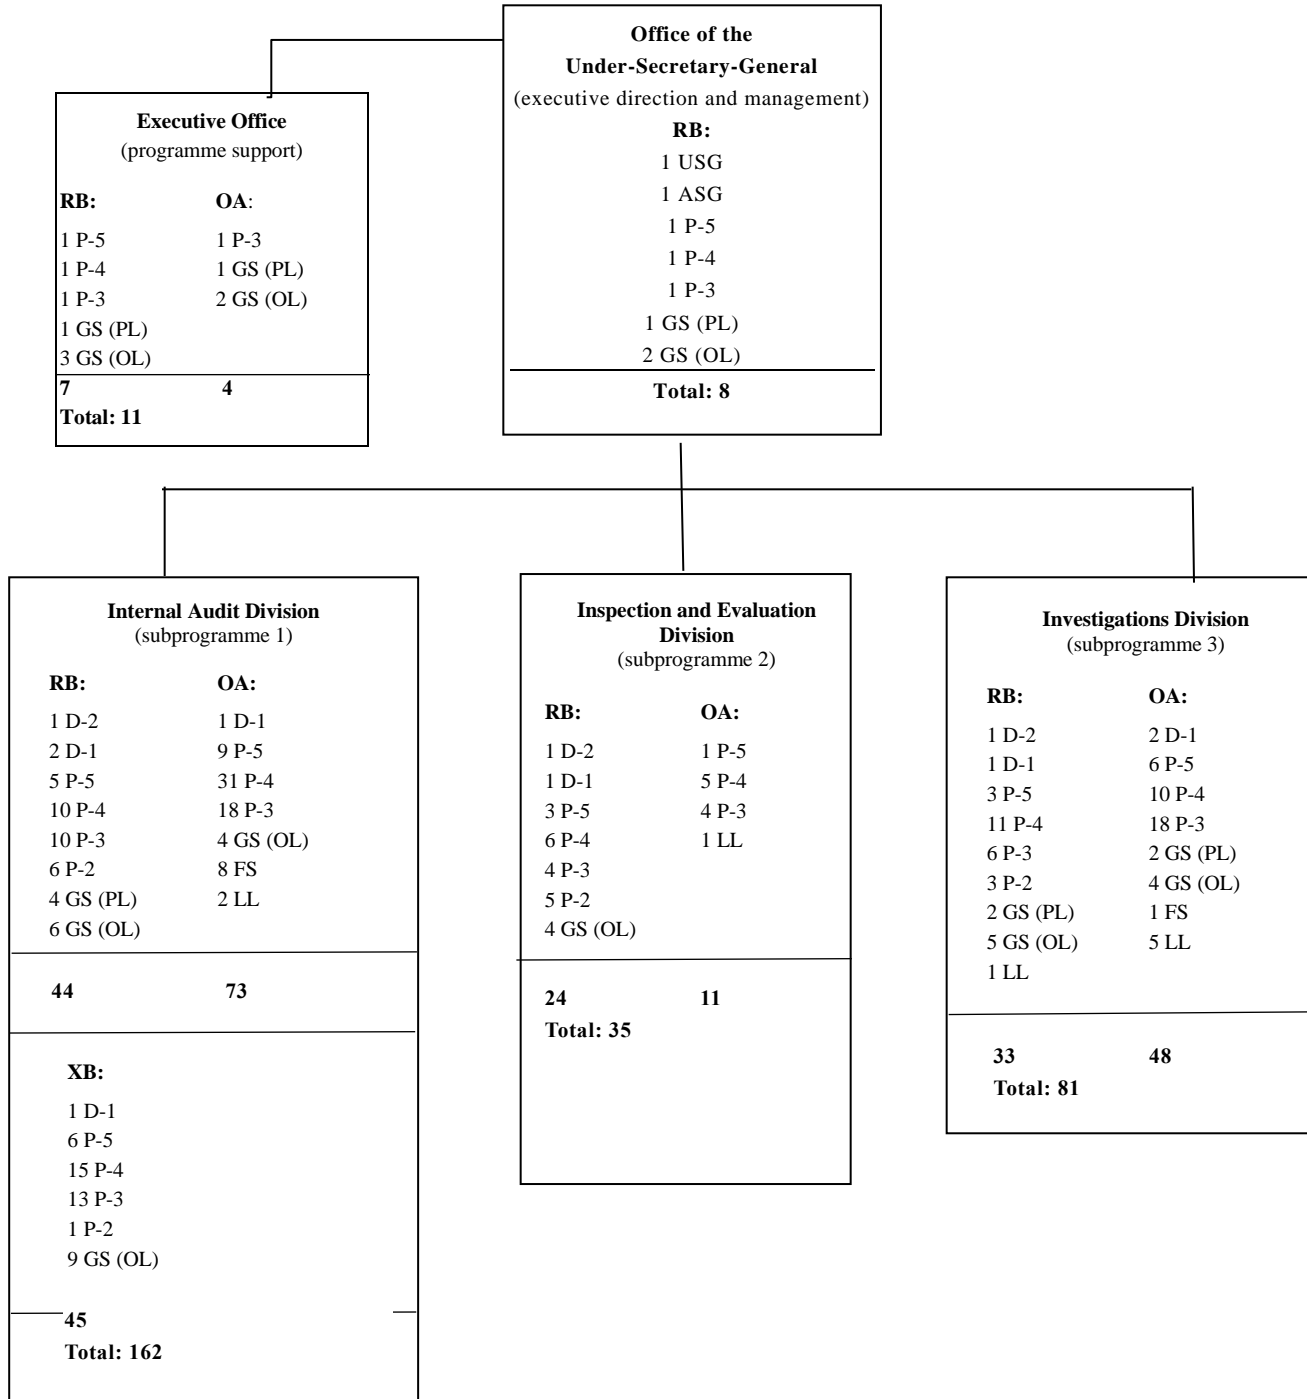

Other assessed resources

- 30.80 Other assessed resources for programme support are estimated at \$723,300 and would provide for 4 posts, as well as non-post resources. The resources would provide support to activities related to peacekeeping operations. The estimated increase of \$6,900 is mainly due to the redeployment of the resources for desk-phone and printers charges from the divisions to the executive office.

Annex I

Organizational structure and post distribution for 2024

Annex II

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/77/7)

Para. IX.14 The Advisory Committee concurs with the Independent Audit Advisory Committee regarding the high level of organizational risk associated with information and communications technology. The Committee trusts that updates on the management of such risk and the preparedness of the Internal Audit Division to conduct related reviews and expand its risk coverage through the utilization of digital information, data collection and analysis will be provided in future proposed programme budgets.

Para. IX.15 The Advisory Committee trusts that an update on the Inspection and Evaluation Division's plans to address its capacity gap in the long term, taking into consideration increased entity self-evaluation activities across the Organization, will be included in the next proposed programme budget.

The level of resources required to ensure the preparedness of the Internal Audit Division to conduct related reviews and expand its risk coverage is currently being assessed.

Furthermore, temporary job openings are being used to bring in additional resources to conduct ICT audits, and subject matter consultants are being recruited to cover internal skills gaps associated with highly technical risk areas, such as uncrewed aerial vehicle system.

In addition, OIOS is enhancing the capacity of existing ICT auditors to audit emerging technologies and the fast-evolving cybersecurity threat landscape.

The Division's annual risk-based evaluation work plan is the primary means through which the Office identifies and prioritizes those assignments required to implement its overall evaluation strategy. The work plan takes into account the existing capacity of the Division, as well as the impact of the Division's efforts aimed at strengthening evaluation across the Organization (including capacity-building workshops and training, promulgation of evaluation guidance material, and methodological advice and guidance on entity evaluation policies and projects), and these determine the nature, scope and timing of planned assignments, as well as the cycle over which the evaluation assurance strategy can be implemented. The Office will use information from the recently completed biennial report, which assessed the Secretariat-wide evaluation capacity, together with the latest data available from the Division's Secretariat Evaluation Support unit on progress in the strengthening of Secretariat entity-level evaluation, in the next work planning and associated capacity gap analyses.

Brief description of the recommendation

Para. IX.21 The Committee recalls that, in view of some of the Investigations Division’s long-standing unresolved issues, including the length of time that it takes to complete an investigation, as well as investigators’ caseloads, it had recommended that OIOS conduct an external assessment of the Investigations Division in 2021, with the results and the related action plan to be presented in the context of the proposed programme budget for 2022. The Committee trusts that the findings of the assessment, which commenced in January 2022, including the long-awaited remedial action plan, will be provided to the General Assembly at the time of its consideration of the proposed programme budget for 2023 and in the next proposed programme budget.

Action taken to implement the recommendation

The final report of the independent panel on the external quality assurance review of the investigations function (completed in 2022) identified possible improvements to the quality assurance processes of investigation reports. An analysis of investigation timelines revealed that the review of investigation reports accounts for 28 per cent of the average investigation’s life cycle. As such, an investment in the subprogramme’s quality assurance process has the potential to significantly reduce overall completion times, as presented above under planned result 3 of the programme plan of subprogramme 3.

Moreover, the report concluded that improvements to work planning, tracking of case progression and prioritization of cases according to predicted completion timelines would have a positive impact on timeliness. The subprogramme is embarking on a project with the Office of Information and Communications Technology to deliver a bespoke case management system to support these processes.

In addition, the subprogramme is conducting further analysis to identify resource gaps, with a view to improving caseload distribution and reducing completion times.

I. International Civil Service Commission

Foreword

Since its establishment in 1974, the International Civil Service Commission (ICSC) has focused its efforts on strengthening and maintaining high standards in the international civil service while balancing the needs and concerns of its major stakeholders.

ICSC stands committed to safeguarding and improving the conditions of service of staff of the United Nations common system as it faces system-wide challenges brought about by an ever-changing global employment market. In that regard, there have been some notable achievements, in particular the new parental leave framework proposed by ICSC and welcomed by the General Assembly. The framework provides extended paid leave to parents, regardless of gender, as they welcome a child into their lives.

In the broader context of the Sustainable Development Goals, an enhanced leave framework would allow women to have greater equality with men in terms of career opportunities and to make provision for more flexibility in a rapidly changing work environment.

Guided by the ICSC statute, the Commission is focused on ensuring that the entities of the United Nations common system continue to be employers of choice. With proper strategic and budgetary planning at the entity level, there is no doubt that the Commission will continue to achieve and appreciate that success within the common system.

(Signed) Larbi **Djacta**
Chair of the International Civil Service Commission

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 31.1 The International Civil Service Commission (ICSC) was established pursuant to General Assembly resolution 3357 (XXIX) and is responsible for the regulation and coordination of the conditions of service for the United Nations common system. Under its statute, the Commission is a subsidiary organ of the Assembly. In the exercise of its functions, the Commission is guided by the principles set out in the agreements between the United Nations and other organizations aimed at the development of a single unified international civil service through the application of common personnel standards, methods and arrangements.

Programme of work

Objective

- 31.2 The objective, to which ICSC contributes, is to ensure fair and harmonized conditions of service for staff in the United Nations common system.

Strategy and external factors for 2024

- 31.3 To contribute to the objective, the Commission will:
- (a) Continue to develop and strengthen a common system of salaries, allowances and benefits under the Noblemaire and Flemming principles;
 - (b) Apply the methodologies for determining salaries and post adjustment classifications;
 - (c) Provide guidance and advice on the administration of human resources management policies and systems, including job evaluation standards and tools, and substantive support for all stakeholders;
 - (d) Lend its expertise to stakeholders and work closely with the Human Resources Network of the United Nations System Chief Executives Board for Coordination (CEB);
 - (e) Seek feedback from organizations on the conditions of service of staff;
 - (f) Conduct workshops to educate staff on the work of the Commission and on the benefits and entitlements available to staff of the United Nations common system;
 - (g) Carry out periodic global surveys to solicit information from the staff at large, all in an effort to determine the most appropriate conditions of service;
 - (h) Analyse the conditions of service of staff in difficult duty stations.
- 31.4 In an effort to increase diversity and rejuvenate the workforce within the common system, the Commission will collect information from common system organizations in order to conduct its review and propose relevant updates to the General Assembly on any new developments and improvements as they relate to geographical diversity and the rejuvenation of the workforce.
- 31.5 The above-mentioned work is expected to result in:
- (a) The promotion of geographical diversity and rejuvenation of the workforce;

- (b) A coherent and effective human resources management system that is aligned closely with the achievement of organizational goals and objectives.
- 31.6 With regard to the external factors, the overall plan for 2024 is based on the planning assumption that organizations of the United Nations common system provide timely information, as requested by Commission, and that they fully implement the Commission’s decisions and recommendations.
- 31.7 The Commission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. In 2024, the Commission will update the General Assembly on the implementation of existing gender policies in the United Nations common system and report on the implementation of the Commission’s recommendations on the issue.

Impact of the pandemic and lessons learned

- 31.8 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 did not affect the Commission’s ability to carry out its mandate. While spending patterns and the ability to collect price data for determining the cost of living were affected, the Commission sought alternate reliable sources of data, such as the use of an automated online price collection method called “web scraping”, an efficient source proven to yield accurate results.
- 31.9 The Commission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the pandemic, including conducting some working group meetings virtually, and will continue to do so as necessary.

Programme performance in 2022

Strengthened recognition of staff with children with disabilities

- 31.10 Since 2012, every two years, the Commission has considered several variations to the methodology for calculating and adjusting the dependent child allowance and made proposals to the General Assembly. Following the Commission’s new proposal in the 2022 annual report, the Assembly decided to approve an increase in the allowance for children with disabilities and asked the Commission to further refine the structure of the children’s and secondary dependants’ allowances.
- 31.11 Progress towards the objective is presented in the performance measure below (see table 31.1).

Table 31.1
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	–	An increase in the allowance for the dependent child benefit in respect of a child with a disability, effective 1 January 2023

Planned results for 2024

Result 1: improved conditions of service, retention and attraction of staff in duty stations with extreme hardship

Programme performance in 2022 and target for 2024

- 31.12 The programme’s work contributed to preliminary findings indicating an increase in the number of staff opting for the grant instead of installing eligible dependants at hardship duty stations, as well as to the General Assembly, in its resolution [76/240](#), further extending the pilot to D duty stations,

in which case staff would be granted an amount of \$14,000 annually in lieu of the installation of eligible dependants, which met the planned target.

- 31.13 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 31.2).

**Table 31.2
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Staff given choices in deciding whether or not to install their families in duty stations with extreme hardship conditions	Positive indications from interim data of staff satisfaction with the option to decide on whether to install their families at extreme hardship duty stations, as shown by a positive upward increase in staff opting to accept a grant in the amount of \$15,000 annually at category E hardship duty stations in lieu of installation of eligible dependants	<p>Preliminary figures indicate an increase in the number of staff opting for the grant</p> <p>The General Assembly, in its resolution 76/240, asked that the pilot study be continued at E duty stations and that the pilot be further extended to D duty stations, in which case staff would be granted an amount of \$14,000 annually in lieu of installation of eligible dependants</p>	Positive indications and preliminary data suggest improvements in the attraction and retention of staff, especially women, in duty stations classified as undergoing extreme hardship	Positive indications with regard to the attraction and retention of staff, in particular women at hardship duty stations classified as D and E

Result 2: strengthened incentives to promote multilingualism of the workforce in the common system

Programme performance in 2022 and target for 2024

- 31.14 The programme’s work contributed to the Commission’s study on workforce diversity in which Commission members provided perspectives and recommendations on multilingualism in the workforce in their relevant contexts, as well as to the General Assembly recognizing that multilingualism strengthens workforce diversity and welcoming the inclusion of multilingualism of the workforce in the programme of work of the Commission, which met the planned target.

Table 31.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	<p>Commission members provide perspectives and recommendations on multilingualism in the workforce in their relevant contexts</p> <p>The General Assembly, in its resolution 77/256 A–B, recognizes that multilingualism strengthens the workforce diversity and welcomes the inclusion of multilingualism of the workforce in the programme of work of the Commission</p>	<p>The General Assembly considers policy options to support the adoption of more coherent and focused incentives to promote multilingualism in the context of the review of the Framework for Human Resources Management</p>	<p>On the basis of recommendations of ICSC at the conclusion of its review, the General Assembly provides common system organizations with guidance to promote multilingualism and an increasingly diverse workforce</p>

Result 3: a common system compensation package that is fit for purpose, competitive and cost-efficient

Proposed programme plan for 2024

31.15 Following its holistic review of the common system compensation package from 2013 to 2015, the newly approved package was rolled out from 2016 among organizations of the common system. In its resolution [76/240](#), the Assembly invited the Commission to undertake a comprehensive assessment and review of the compensation package for the United Nations common system on a five-year cycle, taking into due consideration the previously agreed objectives of the exercise, as well as the context both in Member States and in the United Nations common system.

Lesson learned and planned change

31.16 The lesson learned by the Commission was to ensure that feedback from all stakeholders is solicited and to encourage staff to respond to the survey, as that would enable a more accurate assessment of the compensation package. In applying the lesson, the Commission will focus on its communication strategy while reaching out to common system organizations. Consultations will be held with senior managers, directors and staff federations as well as staff. The importance of the input of staff and their responses to the survey will be made clear. The upcoming review will be focused on assessing whether the compensation package is fit for purpose, competitive, cost-efficient and free of overlaps and meets the other agreed review objectives. As part of the review, consultations will be held with executive heads, directors and staff representatives. Compensation data will be collected, and a global staff survey will be conducted to collect feedback directly. In 2023, the Commission will provide an outline of the review, and in 2024 and 2025, there will be working group meetings and the roll-out of the global staff survey. In 2026, the publication of a comprehensive outcome of the review is expected, followed by the implementation of any new changes to the package.

31.17 Expected progress towards the objective is presented in the performance measure below (see table 31.4)

Table 31.4
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	Preliminary review of the compensation package was considered by the General Assembly	General Assembly requested a detailed outline of the Commission’s approach for the next review of the common system compensation package, including the structure, parameters and timelines	The General Assembly considers a detailed outline of the review of the common system compensation package, which is expected to commence in 2024	Organizations, staff representatives and staff members indicate their satisfaction with the common system compensation package with a higher response rate than usual

Legislative mandates

31.18 The list below provides all mandates entrusted to the Commission.

General Assembly resolutions

[3357 \(XXIX\)](#) Statute of the International Civil Service Commission [76/240](#) and [77/256 \(A–B\)](#) United Nations common system

Deliverables

31.19 Table 31.5 lists all deliverables of the Commission.

15. Rest and recuperation framework	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to the United Nations Appeals Tribunal and the International Labour Organization Administrative Tribunal on specific areas relating to human resources management; research papers on specific issues raised by Member States, organizations and staff representatives (restricted documents of the Commission); and information meetings with Member States and organizations outside the United Nations common system.				
E. Enabling deliverables				
Administration: International Civil Service Commission website; substantive documents for the Commission and the Advisory Committee on Post Adjustment Questions reports; and salary surveys and cost-of-living surveys for more than 60 field duty stations.				

B. Proposed post and non-post resource requirements for 2024

Overview

31.20 The proposed jointly financed resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 31.6 to 31.8.

Table 31.6

Overall: evolution of financial resources by object of expenditure (jointly financed)

(Thousands of United States dollars)

31.21 Additional details on the distribution of the proposed resources for 2024 are reflected in table 31.10 and figure 31.I.

31.22 As reflected in table 31.10, the overall resources proposed for 2024 amount to \$11,129,100, reflecting a net decrease of \$1,115,400 (or 9.1 per cent) compared with the amount approved for 2023. Resource changes result from other changes. In accordance with article 21 of the statute of the Commission, the budget estimates have been established after consultation with the Finance and Budget Network of the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination. The budget level agreed by the Network was based on the principle that budgets were expected to reflect the new ways of working and the commitment of the United Nations system to the Greening the Blue initiative and to the Sustainable Development Goals, resulting in a tangible impact on proposed travel and other relevant costs compared with pre-pandemic baselines. The fact that the vast majority of the United Nations system entities are subject to declining budgets and that their budget methodology does not accommodate further increases due to recosting was also taken into account by the Network. The level of resources agreed by the Network therefore already takes into account increases due to anticipated inflation, as determined by the Network. The proposed resources will therefore not be subject to further recosting. The overall resources presented by the Commission for 2024 amount to \$12,380,000 before recosting, including one additional post of Legal Officer (P-4). The Network did not support the establishment of the new P-4 post and recommended an overall resource level of \$11,129,100 after recosting.

31.23 The proposed changes reflect decreases under other staff costs (\$137,800), non-staff compensation (\$10,800), hospitality (\$1,800), consultants (\$513,900), travel of representatives (\$177,500), travel of staff (\$28,300), general operating expenses (\$513,900), supplies and materials (\$30,400) and furniture and equipment (\$45,500), offset in part by increases under posts owing to anticipated inflation, as explained above (\$302,200), and contractual services (\$42,300).

31.24 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability

information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, ICSC is integrating environmental management practices into its operations. For 2024, the Commission will continue its online repository where more of its survey materials are deposited, thus reducing the amount of survey data received by regular email. In addition, the Secretariat has encouraged meeting participants to gain access to documents online, and in cases in which this is not possible, documents have been emailed to meeting participants. This has significantly reduced the number of documents printed and mailed.

- 31.25 Information on the timely submission of documentation and advance booking for air travel is reflected in table 31.9. The lower compliance rate for document submission in 2022 was due to the late submission of a conference room or working group document. In an effort to be fully compliant with the advance purchase policy for air travel, ICSC monitors all necessary planned travel, ensuring that such travel is cleared and approved well in advance of the two weeks. However, in most cases, the Commission is faced with difficulty when staff and members of the Commission are invited to meetings on very short notice to discuss issues affecting staff on the United Nations common system. In 2022, the lower travel compliance rate was influenced by last-minute requests from organizations to participate in meetings and training as well as the COVID-19 pandemic during the first part of the year, resulting in changes in travel options at short notice, as well as travel restrictions that were imposed and lifted.

Table 31.9
Compliance rate

(Percentage)

	Actual 2020	Actual 2021	Actual 2022	Planned 2023	Planned 2024
Timely submission of documentation	100	100	97	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	72	71	73	100	100

Table 31.10

Total	4 329.7	4 591.7	88.0	-	(418.3)	(330.3)	(7.2)	4 261.4	

31.26 The proposed regular budget requirements for 2024, in the amount of \$4,261,400, reflect a net decrease of \$330,300 (or 7.2 per cent) compared with the appropriation for 2023.

31.27 As reflected in table 31.11, resource changes result from technical adjustments and other changes, as follows:

Technical adjustments: An increase of \$88,000 based on the United Nations Secretariat share of the budget of ICSC of 38.3 per cent for 2024, as compared to 37.5 per cent for 2023, as determined by CEB in accordance with the established methodology.

Other changes: A decrease of \$418,300, reflecting the United Nations Secretariat share for 2024 of the proposed decrease in jointly funded resources of \$1,115,400 resulting from the agreement by the Finance and Budget Network on the resource level for the Commission in 2024 (see para. 31.20 above).

II. Joint Inspection Unit

Foreword

Over the course of 2024, the Joint Inspection Unit will implement the prioritized recommendations of the self-assessment of the Unit's work and operations, which is expected to feature in the programme plan for 2025 and beyond, as well as the Unit's long-term strategic framework. Another key area of focus in 2024 is the Unit's capability to effectively monitor the acceptance and implementation of its recommendations. It is planned, pending the receipt of extrabudgetary funds, that the development of the replacement of this critical application will take place in 2023, and training and implementation will follow during 2024.

Regarding the effective execution of the Unit's work, in 2022 the Unit restored many of the working methods and activities that had been disrupted during the coronavirus disease (COVID-19) pandemic, including essential on-site data collection and interviews, and inspection missions. However, the resource capacity to continue the application of the Unit's established methodology in this same manner, which is required in order to produce high-quality reviews, was restricted in 2023.

The Unit expects that the process for establishing the level of resources required by the Unit to implement its programme of work will adhere to the provisions of its statute, and that the applicability of the resolution of the General Assembly in this regard will be accepted by all participating organizations.

(Signed) Eileen **Cronin**
Chair of the Joint Inspection Unit

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 31.28 The Joint Inspection Unit is mandated, through its statute, as contained in General Assembly resolution 31/192, to review matters bearing on the efficiency of services and the proper use of funds and to provide an independent view aimed at improving management and methods and at achieving greater coordination among the organizations of the United Nations system. The Unit performs inspections and evaluations and issues reports, notes and management letters in which it identifies best practices, proposes benchmarks and facilitates information-sharing among all the organizations of the United Nations system that have adopted its statute.

Programme of work

Objective

- 31.29 The objective, to which the Joint Inspection Unit contributes, is to improve the efficiency, effectiveness and coordination of the United Nations system.

Strategy and external factors for 2024

- 31.30 To contribute to the objective, the Joint Inspection Unit will:
- (a) Ensure that its programme of work includes system-wide reviews in the identified main thematic areas: accountability and oversight functions and systems; management and administration practices; the implementation of policies, strategies and programmes, as well as coordination and collaboration on the realization of internationally agreed development goals, such as the Sustainable Development Goals; and governance arrangements and mechanisms, as well as inter-agency coordination;
 - (b) Undertake system-wide reviews of the management and administration practices and methods of the organizations of the United Nations system in the areas of human and financial resources, administration, results-based management, strategic planning and management, change management, risk management, security and safety, and information technology;
 - (c) Focus on system-wide issues that can be assessed across all or multiple organizations in conducting its reviews;
 - (d) Develop and implement effective platforms for the sharing of good practices and knowledge in the various thematic areas of the work of the Unit, including the innovative practices and institutional knowledge originating from the COVID-19 pandemic;
 - (e) Analyse the acceptance and implementation of the Unit's recommendations to establish how rates of acceptance and implementation can be improved and how consideration of the Unit's reports by legislative organs can be more effective.
- 31.31 The above-mentioned work is expected to result in:
- (a) Better information for legislative body decision-making;
 - (b) Improved efficiency and effectiveness of the organizations of the United Nations system;
 - (c) Improved coordination and collaboration of the organizations of the United Nations system.

- 31.32 With regard to the external factors, the overall plan for 2024 is based on the planning assumption that participating organizations fully cooperate with the reviews of the Joint Inspection Unit and that recommendations are accepted and implemented.
- 31.33 With regard to coordination and cooperation within the United Nations system, the Unit will continue its engagement in various forums, including with the Board of Auditors, the Office of Internal Oversight Services and the audit and oversight committees of participating organizations. The engagement of a broad range of actors, including those beyond the traditional inspection sphere, is critical to mobilizing effective responses and pursuing solutions to improve business processes. This means the continued strengthening of existing partnerships with independent internal oversight entities and oversight committees in participating organizations, but also pursuing new ones that can help to foster innovative approaches. The Unit will pursue measures to continue to promote an integrated approach to support the implementation of the recommendations included in its reports.
- 31.34 The Joint Inspection Unit integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Unit will continue to examine and report on the gender policies and practices of organizations that it has identified for its management and administration reviews.
- 31.35 In line with the United Nations Disability Inclusion Strategy, the Joint Inspection Unit will also continue to accelerate the effective mainstreaming of disability inclusion, including mitigating measures to overcome any challenges while operationalizing disability inclusion.

Impact of the pandemic and lessons learned

- 31.36 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular the international travel restrictions still in place during the first months of 2022, which contributed to delays in the timelines of several reviews included in the programme of work for 2022. Data collection, through direct observation and in-person interviews, had to employ alternate and virtual methods which, in the view of the Unit, has an impact on the depth and quality of the data collected, and on-site observations and informal discussions were restricted and limited this important aspect of independent oversight work. While the reviews could be completed by mainly working remotely, the depth and quality of the final reports were severely affected. Furthermore, in 2022, the cumulative effect of delays in data collection and analysis by alternate methods and the extended time requested by participating organizations to respond to questions or review draft documents, resulted in reviews taking much longer to complete. The Unit attributes the completion of only two reports in 2022 and the carry-over of seven reviews for which the reports will be issued in 2023, to this factor.
- 31.37 The Joint Inspection Unit continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including increased used of alternate methods for data collection, such as electronic surveys and remote interviews to collect data; this has translated into a reduction of travel resources used in 2022 compared with pre-pandemic periods. These lessons learned have been incorporated into programme practices as appropriate.

Programme performance in 2022

Aligning the programme of work with priorities of the United Nations system for more effective contribution to legislative bodies and organizations

- 31.38 The Joint Inspection Unit prepared its programme of work after a consultative process that took into consideration proposals for reviews submitted by its participating organizations as well as by oversight bodies and the inspectors themselves. The Unit revised its mechanisms for requesting proposals from participating organizations, oversight bodies and coordinating bodies and provided additional guidance to executive heads and entities to ensure that proposals are made regarding subjects that are relevant, important, of high priority and appropriate for the mandate of the Unit. The Unit also consulted with all participating organizations before confirming the programme of work as a validation check.

31.39 Progress towards the objective is presented in the performance measure below (see figure 31.II).

Figure 31.II
Performance measure: number of proposals provided by participating organizations that were adopted in the Unit’s programme of work (annual)

Planned results for 2024

Result 1: governing bodies regularize their consideration of Joint Inspection Unit reports

Programme performance in 2022 and target for 2024

31.40 The programme’s work contributed to 15 Joint Inspection Unit participating organizations confirming that their legislative organs and/or governing bodies have regularized the consideration of the report of the Unit, which exceeded the planned target of 14 governing bodies.

31.41 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 31.III).

Figure 31.III
Performance measure: number of governing bodies that regularize their consideration of Joint Inspection Unit reports (cumulative)

Result 2: increased acceptance of Joint Inspection Unit recommendations

Programme performance in 2022 and target for 2024

31.42 The programme’s work contributed to 74 per cent of Joint Inspection Unit recommendations being accepted by participating organizations, which met the planned target.

31.43 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 31.IV).

Figure 31.IV
Performance measure: rate of acceptance of Joint Inspection Unit recommendations by participating organizations
 (Percentage)

Result 3: timely availability of reviews to enable appropriate action by participating organizations to implement recommendations

Proposed programme plan for 2024

31.44 To keep its reports on track, the Unit has instituted a monthly report that gives the participating organizations a view of the actions the Unit will be requesting of them in the following two-month period. The participating organizations have reported that this activity forecast has improved their visibility of requests from the Unit and their ability to plan a timely response.

Lesson learned and planned change

31.45 The lesson for the Unit was that, in addition to better planning, reviews can benefit from an increased focus on scoping reviews to be completed within a reasonable time frame, thereby making more effective use of questionnaires and surveys, and maximizing on-site opportunities. In applying the lesson, the Unit will regularly monitor the progress of reviews to ensure that they remain on track for completion according to the plan.

31.46 Expected progress towards the objective is presented in the performance measure below (see figure 31.V).

Figure 31.V
Performance measure: availability of reviews carried over from the previous year (annual)
 (Percentage)

Legislative mandates

GS (OL)	8	–	–	–	–	8
Subtotal	9	–	–	–	–	–
Total	31	–	–	–	–	31

^a Includes 11 temporary posts for inspectors at the D-2 level.

31.50 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 31.16 to 31.18 and figure 31.VI.

31.51 As reflected in table 31.17, the overall net resources proposed for 2024 amount to \$8,623,500 reflecting a net increase of \$244,800 (or 2.9 per cent) compared with the amount approved for 2023. Resource changes result from other changes. In accordance with article 20 of the statute of the Joint Inspection Unit, the budget estimates have been established after consultation with the Finance and Budget Network of the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination (CEB). The budget level agreed by the Network was based on the principle that budgets were expected to reflect the new ways of working and the commitment of the United Nations system to the Greening the Blue initiative and to the Sustainable Development Goals, resulting in a tangible impact on proposed travel and other relevant costs compared with pre-pandemic baselines. The fact that the vast majority of the United Nations system entities are subject to declining budgets, and that their budget methodology does not accommodate further increases due to recosting, was also taken into account by the Network. The level of resources agreed by the Network therefore already takes into account increases due to anticipated inflation, as determined by the Network. These proposed resources will therefore not be subject to further recosting. The overall resources presented by the Unit for 2024 amounted to \$8,333,100, including one additional post of Evaluation and Inspection Officer (P-3). The Finance and Budget Network did not support the establishment of the new P-3 post and recommended an overall resources level of \$8,623,500 after recosting.

31.52 As reflected in table 31.17, resource changes reflect a net increase of \$244,800, resulting from adjustments made to reflect the agreement by the Finance and Budget Network on the overall resources for 2024 for the Unit. Adjustments reflect an increase under posts (\$408,600) due to anticipated inflation, as explained above, offset in part by decreases under other staff costs (\$3,400), consultants (\$4,400), travel of staff (\$147,100), contractual services (\$2,600), general operating expenses (\$4,000), supplies and materials (\$600) and furniture and equipment (\$1,700).

Section 31 **Jointly financed administrative activities**

- 31.53 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Joint Inspection Unit will continue to reduce its carbon footprint by reducing the amount of photocopy paper used and the quantity of documentation printed, as well as by limiting travel and utilizing alternatives to face-to-face meetings, where possible.
- 31.54 Information on the timely submission of documentation and advance booking for air travel is reflected in table 31.16. The Joint Inspection Unit requires that, for each of its review projects, a travel plan be submitted to facilitate the advance purchase of the related air tickets. However, the advance purchase compliance rate was affected during the first part of 2022 by the COVID-19 pandemic and its impact on international travel.

Table 31.16
Compliance rate
(Percentage)

	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Actual 2022</i>	<i>Planned 2023</i>	<i>Planned 2024</i>
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	52	55	81	100	100

Distribution of proposed resources for 2024 (jointly financed)

(Number of posts/thousands of United States dollars)

Table 31.18
Evolution of financial resources (United Nations share)

(Thousands of United States dollars)

	2022 expenditure	2023 appropriation	Changes			Total	Percentage	2024 estimate
			Technical adjustments	New/expanded mandates	Other			
Financial resources by main category of expenditure								
Non-post	-	-	-	-	-	-	-	-
Grants and contributions	2 395.6	2 379.9	(79.1)	-	69.5	(9.6)	(0.4)	2 370.3
Total	2 395.6	2 379.9	(79.1)	-	69.5	(9.6)	(0.4)	2 370.3

31.55 The proposed regular budget requirements for 2024, in the amount of \$2,370,300, reflect a net decrease of \$9,600 (or 0.4 per cent) compared with the appropriation for 2023.

31.56 As reflected in table 31.18, resource changes result from technical adjustments and other changes, as follows:

Technical adjustments: A decrease of \$79,100 based on the United Nations Secretariat share of the budget of the Unit of 27.5 per cent for 2024, as compared to 28.4 per cent for 2023, as determined by CEB in accordance with the established methodology;

Other changes: An increase of \$69,500, reflecting the United Nations Secretariat share for 2024 of the proposed increase in jointly funded resources of \$244,800 resulting from the agreement by the Finance and Budget Network on the resource level for the Unit in 2024 (see para. 31.50 above).

III. United Nations System Chief Executives Board for Coordination

Foreword

Over the course of 2024, the United Nations System Chief Executives Board for Coordination (CEB) will continue to strengthen and amplify the capacity of the multilateral system to deliver on all aspects of its sustainable development, human rights, humanitarian and peace actions around the world. Under my leadership as Chair, the Board will persist in intensifying support to the integrated implementation of the 2030 Agenda for Sustainable Development, working in support of Member States' efforts to rescue the Sustainable Development Goals. I will rally the organizations of the United Nations system to leverage the potential of Our Common Agenda towards that aim and to collectively and individually contribute to supporting a strong, concise and action-oriented outcome of the 2024 Summit of the Future.

The High-level Committee on Programmes will do its part by continuing to advance workstreams grounded in the objectives of the 2030 Agenda and with strong connections to key themes in Our Common Agenda, with a view to fostering coherence and cooperation on the policy dimensions of those strategic areas.

The High-level Committee on Management will continue to drive integration and coherence in support of Member States, with an emphasis on fostering the following: systemic change through a focus on providing better data, analysis and communications; innovation and digital transformation; strategic foresight; stronger results orientation; and a work culture that simplifies and encourages collaboration.

Unified through CEB and its committees, the United Nations system will work tirelessly to support the new global consensus on what our collective future should be.

(Signed) António **Guterres**
Secretary-General of the United Nations

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 31.57 CEB, composed of the Secretary-General and the executive heads of the organizations of the United Nations system, is responsible for promoting coherence, cooperation and coordination in the policies, programmes and activities of the organizations of the United Nations system in accordance with their mandates and in response to the decisions of intergovernmental bodies. The mandate of CEB derives from the priorities established in relevant General Assembly and Economic and Social Council resolutions and decisions, including Council resolution 13 (III) and decision 2001/321.

Programme of work

Objective

- 31.58 The objective, to which CEB contributes, is to leverage the collective capacity of the organizations of the United Nations system for the effective delivery of mandates.

Strategy and external factors for 2024

- 31.59 To contribute to the objective, CEB will:
- (a) Provide the means for senior leaders of the United Nations system to establish a shared vision, agree on strategic action, pursue policy coherence in both programmatic and administrative areas, and coordinate the use of resources, capacities and knowledge;
 - (b) Provide vision and leadership to guide the effective and coherent implementation of mandates by United Nations system organizations;
 - (c) Through its High-level Committee on Programmes:
 - (i) Foster system-wide policy coherence and programme coordination in response to intergovernmental mandates and in support of internationally agreed development goals;
 - (ii) Develop shared strategies, approaches and frameworks to address emerging policy and programme issues requiring system-wide action;
 - (d) Through its High-level Committee on Management:
 - (i) Foster the development of innovative approaches to improve efficiency and simplify business practices, and accelerate the harmonization, mutual recognition and integration of business operations;
 - (ii) Utilize its functional networks on finance and budget, human resources, digitization and technology, procurement, and safety and security to disseminate and, where applicable, mutually recognize best practices, innovative management approaches and partnerships in all areas of management.
- 31.60 The above-mentioned work is expected to result in:
- (a) Accelerated progress towards the broad and integrated implementation of the 2030 Agenda for Sustainable Development by Member States and the full range of mandates entrusted to United Nations system entities;
 - (b) A more coherent and coordinated United Nations system response to global challenges;

- (c) Greater capacity of United Nations system organizations to provide effective management responses that support the delivery of mandates.
- 31.61 With regard to the external factors, the overall plan for 2024 is based on the planning assumption that member organizations commit themselves and make timely contributions to the issues addressed by CEB.
- 31.62 CEB integrates a gender perspective in its activities, deliverables and results, as appropriate, including in the products of its high-level committees, such as system-wide strategies, shared approaches and frameworks that maximize leadership and coordination opportunities across the United Nations system. The CEB annual human resources statistics will continue to present data on personnel of the United Nations system by category, grade and gender, helping to systematically track gender representation across the United Nations system. The CEB secretariat will continue to collaborate with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) on the implementation of a common methodology for tracking the financial contribution of United Nations activities to gender equality and the empowerment of women and women's rights. In addition, the High-level Committee on Programmes will continue its focus on inequalities, including gender equality and women's empowerment, and efforts to strengthen the United Nations system's impact and visibility on Sustainable Development Goals 5 and 10 in a coordinated, coherent and complementary manner.
- 31.63 In line with the United Nations Disability Inclusion Strategy, the CEB High-level Committee on Management will continue to advance disability inclusion through the activities of its working group on diversity, equity and inclusion.

Impact of the pandemic and lessons learned

- 31.64 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the activities of the CEB secretariat, in particular reflected in the use of a virtual or hybrid modality to advance some individual workstreams under the CEB high-level committees.
- 31.65 In addition, in order to support coordination within the United Nations system on issues related to the COVID-19 pandemic, within the overall scope of the objectives, CEB dedicated most of its first regular session of 2022 to the global economic recovery from the pandemic and other crises and to accelerating action on the Sustainable Development Goals. The CEB High-level Committee on Management supported United Nations system organizations on issues related to COVID-19 through its organizational health and safety forum, which advances the implementation of the United Nations System Workplace Mental Health and Well-being Strategy to assist in managing the impact of COVID-19 on the mental health of United Nations personnel. The CEB High-level Committee on Programmes continued to integrate recovery from the pandemic as relevant in its various thematic work streams, such as in strengthening the United Nations system's impact and visibility on reducing inequalities.
- 31.66 The CEB secretariat continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including through the use of a virtual or hybrid modality for collaborative inter-agency processes to advance individual workstreams under the CEB high-level committees, as noted above. This approach complements and effectively establishes a foundation upon which to maximize the value of the in-person meeting modality used by the Board and its high-level committees to fulfil their system-wide coordination function.

Programme performance in 2022

Improved ethical guidance for the use of artificial intelligence in the United Nations system

- 31.67 As frontier technologies become more mature, they are increasingly being used by Governments, businesses and United Nations entities around the world. Significant ethical and human rights concerns can accompany the use of these technologies, including artificial intelligence. In 2020, the

High-level Committee on Programmes developed a United Nations system-wide contribution to the ad hoc expert group convened by the United Nations Educational, Scientific and Cultural Organization (UNESCO) to elaborate a draft recommendation on the ethics of artificial intelligence, improving the understanding by United Nations system organizations of the interlinkages between ethics, human rights and sustainable development and artificial intelligence. The recommendation, adopted by UNESCO at the forty-first session of its General Conference, in 2021, clarified the international norms on the ethics of artificial intelligence. In 2022, CEB endorsed a set of principles, based on the recommendation, developed by the Inter-Agency Working Group on Artificial Intelligence of the High-level Committee on Programmes, to guide the use of artificial intelligence across its life cycle within United Nations system organizations.

31.68 Progress towards the objective is presented in the performance measure below (see table 31.19).

Table 31.19

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Improved understanding within the United Nations system of the ethical, human rights and sustainable development impacts of artificial intelligence	Clarification of international norms on the ethical use of artificial intelligence with the adoption of the recommendation on the ethics of artificial intelligence by UNESCO at the forty-first session of its General Conference	Strengthened ethical artificial intelligence norms grounded in the Charter of the United Nations and international law, including human rights law, through the CEB-endorsed principles for the ethical use of artificial intelligence in the United Nations system

Planned results for 2024**Result 1: United Nations system-wide financial statistics for better decision-making, greater transparency and enhanced accountability****Programme performance in 2022 and target for 2024**

- 31.69 The CEB secretariat's work contributed to the improved analytical quality of United Nations system-wide comprehensive, comparable financial data, including through the development of a common methodology for tracking the financial contribution of United Nations activities to gender equality and the empowerment of women; enhanced transparency and accountability on system-wide financial flows; and alignment of select data reporting elements with international standards, which met the planned target.
- 31.70 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 31.20).

Table 31.20
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Greater harmonization of reporting; availability of an updated road map for implementation of the financial data standards and improved guidance for reporting entities	<ul style="list-style-type: none"> Improved availability of system-wide financial data disaggregated by function, donor, country and Sustainable Development Goal Enhanced data-driven coordination through the integration of the inter-agency pooled funds into the CEB financial statistics Streamlined reporting requirements through the CEB minimum data set for reporting to CEB, the International Aid Transparency Initiative and the Organisation for Economic Co-operation and Development 	<ul style="list-style-type: none"> Established the United Nations data cube strategy for 2022–2025 Increased comprehensiveness and analytical quality of United Nations system-wide financial data on the CEB secretariat website; Developed a common methodology for tracking the financial contribution of United Nations activities to Gender Equality and the Empowerment of Women 	Continuous improvements, enhancements and data analytics enabling access to United Nations system-wide financial data for better-informed decisions in support of the 2030 Agenda	Improved accessibility for United Nations organizations and Member States to a larger volume of United Nations system-wide financial data, with enhanced functionality for interactive data analysis and effective, evidence-based decision-making

Result 2: a more coherent and modern United Nations system approach for timely, relevant and open data

Programme performance in 2022 and target for 2024

- 31.71 The CEB secretariat’s work contributed to an expanded number of United Nations system policy initiatives leveraging United Nations statistical community expertise, including the technical and analytical support for efforts to advance beyond gross domestic product (GDP), and the analysis of international data governance approaches and platforms to enable the use of data for public good, which met the planned target.
- 31.72 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 31.21).

Table 31.21
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
CEB endorsed the System-wide Road Map for Innovating United Nations Data and Statistics	A few significant United Nations system policy initiatives, such as the predictive analytics pilot in the Sahel and the United Nations system contribution on “Beyond GDP”, leverage United Nations statistical community expertise	Additional United Nations system policy initiatives leverage United Nations statistical community expertise, such as the technical and analytical support for efforts to advance beyond GDP, and analysis of international data governance approaches and platforms to enable the use of global public good data	Strengthened coherence and integration in the production of data and statistics that respond to United Nations system policy and operational needs	United Nations statistical community becomes increasingly proactive and takes a leadership role in select United Nations system policy initiatives

Result 3: mutual recognition as an enabler of management reform across the United Nations system

Proposed programme plan for 2024

31.73 In 2018, the CEB High-level Committee on Management and the United Nations Sustainable Development Group developed the Mutual Recognition Statement, since adopted and signed by the executive heads of 23 organizations. The Statement formalizes the joint commitment to apply the principle of mutual recognition, allowing an entity to use or rely on another entity’s policies, procedures, system contracts and related operational mechanisms for the implementation of activities, to the greatest extent practicable.

Lessons learned and planned change

31.74 The lesson for the CEB secretariat, based on the experiences of entities across the United Nations system implementing mutual recognition, was that obstacles to the full adoption of mutual recognition exist in varying degrees across the system. In applying the lesson, the CEB secretariat will work with the United Nations Sustainable Development Group to strengthen coordination between the different strands of operationalization of mutual recognition, and will increase collaboration with audit and legal offices to raise awareness of, and remove obstacles to, opportunities for mutual recognition. The functional networks of the CEB High-level Committee on Management will also develop management guidance to facilitate increased application of the mutual recognition principle and execute a mutual recognition awareness campaign.

31.75 Expected progress towards the objective is presented in the performance measure below (see table 31.22).

Table 31.22
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Principle of mutual recognition mainstreamed, with additional signatories to the mutual recognition statement	Several inter-agency initiatives that leverage mutual recognition of best practices established or scaled up	<ul style="list-style-type: none"> • Successful cases of and best practices on mutual recognition identified • Strategy established to address obstacles to the operationalization of mutual recognition 	Bottlenecks in the application of mutual recognition principles addressed through improved awareness and operationalization of management guidance	Additional inter-agency initiatives that employ mutual recognition

Legislative mandates

31.76 The list below provides all mandates entrusted to CEB.

General Assembly resolutions

64/289	System-wide coherence	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	77/254	Programme planning

Economic and Social Council resolutions and decisions

13 (III)	Coordination Committee	2001/321	Further consideration of the annual overview review report of the Administrative Committee on Coordination
----------	------------------------	----------	--

Deliverables

31.77 Table 31.23 lists all deliverables of CEB.

Table 31.23
Deliverables for the period 2022–2024, by category and subcategory

31.79 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 31.28 to 31.29 and figure 31.VII.

31.80 As reflected in table 31.24, the overall resources proposed for 2024 amount to \$4,362,400, reflecting a net increase of \$314,900 (or 7.8 per cent) compared with the amount approved for 2023. Resource changes result from technical adjustments and other changes. As the activities of the CEB secretariat are jointly funded by agencies, funds and programmes of the United Nations common system, the budget estimates have been established after consultation with the Finance and Budget Network of the CEB High-level Committee on Management. The budget level agreed by the Network was based on the principle that budgets were expected to reflect the new ways of working and the commitment of the of the United Nations system to the Greening the Blue initiative and to the Sustainable Development Goals, resulting in a tangible impact on proposed travel and other relevant costs compared with pre-pandemic baselines. The fact that the vast majority of the United Nations system entities are subject to declining budgets, and that their budget methodology does not accommodate further increases due to recosting, was also taken into account by the Network. The level of resources agreed by the Network therefore already takes into account increases due to anticipated inflation, as determined by the Network. These proposed resources will therefore not be subject to further recosting. The overall resources presented by CEB for 2024 amounted to \$4,236,800 before recosting. The Finance and Budget Network recommended an overall resources level of \$4,362,400 after recosting.

31.81 As reflected in table 31.28, resource changes result from technical adjustments and other changes, as follows:

Technical adjustments: The increase of \$89,300 reflects the higher provision for one post of Coordination Officer (P-3) established in 2023, pursuant to General Assembly resolution [77/262](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts;

Other changes: The net increase of \$225,600 results from adjustments made to reflect the agreement by the Finance and Budget Network on the overall resources for 2024 for the CEB secretariat. Adjustments reflect decreases under other staff costs (\$14,200), consultants (\$1,600), travel of staff (\$37,900), contractual services (\$9,500), general operating expenses

Section 31 **Jointly financed administrative activities**

(\$6,200), supplies and materials (\$600) and furniture and equipment (\$1,500), offset in part by an increase under posts (\$297,100) due to anticipated inflation, as explained above. As the level of resources recommended by the Finance and Budget Network takes into account increases due to anticipated inflation, as determined by the Network, these resources will not be subject to further recosting.

- 31.82 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, CEB is integrating environmental management practices into its operations. In 2024, in line with the Strategy for Sustainability Management in the United Nations System, 2020–2030, CEB will continue to ensure all meetings it supports are single-use-plastic-free and paper-free to reduce waste and cut carbon emissions, as well as continue to promote an eco-friendly culture.
- 31.83 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 31.27. The CEB secretariat will continue to track compliance, including through the use of the travel compliance dashboard. The CEB secretariat has made efforts to raise awareness of the staff and managers of the requirement and has encouraged advance planning and the nomination of travelling staff to meetings and conferences, whenever possible.

Total	1 232.2	1 242.7	15.0	–	69.3	84.3	6.8	1 327.0

31.84 The proposed regular budget resources for 2024 amount to \$1,327,000 and reflect an increase of \$84,300 (or 6.8 per cent) compared with the appropriation for 2023.

31.85 As reflected in table 31.29, resource changes result from technical adjustments and other changes, as follows:

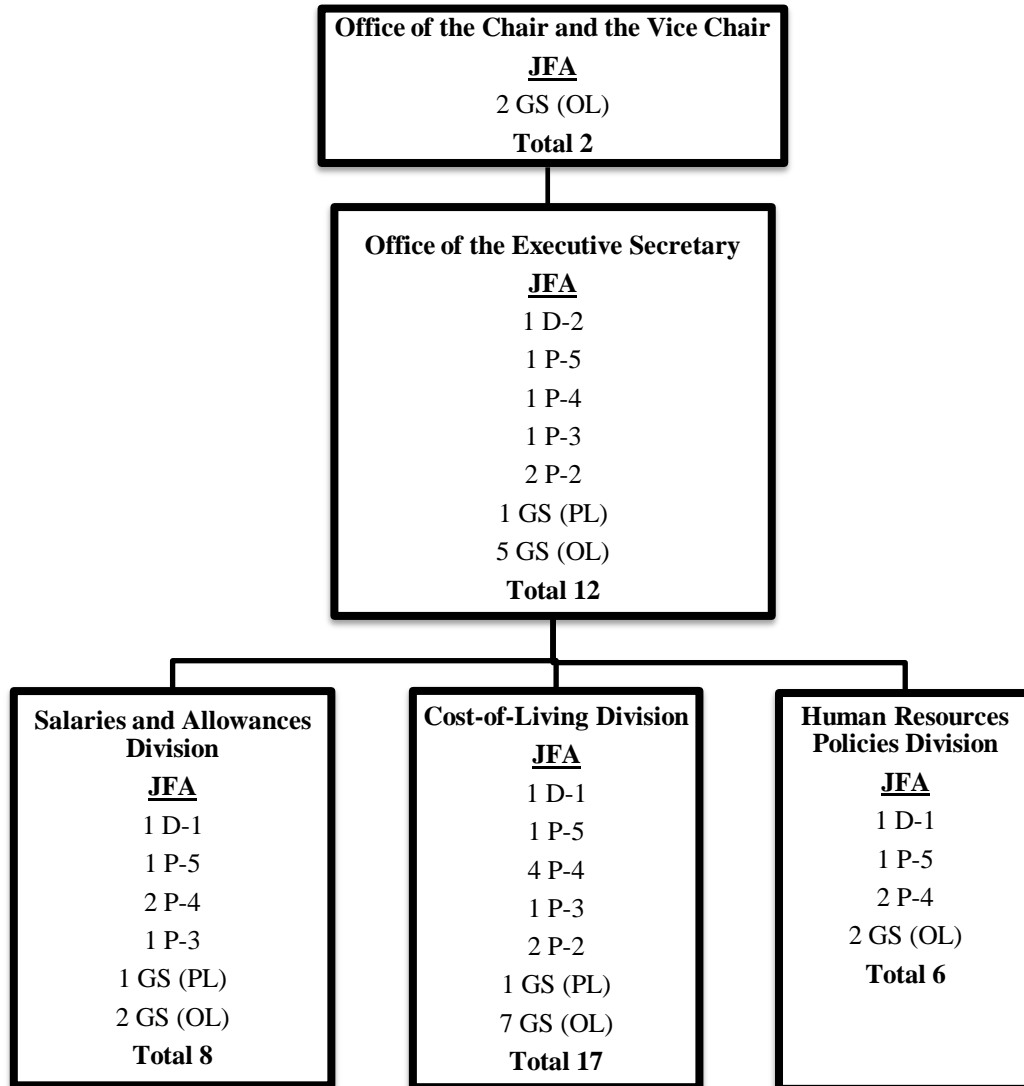

Technical adjustments: An increase of \$15,000 reflecting: (a) the United Nations Secretariat share, amounting to \$27,400, of the technical adjustments under jointly funded resources (\$89,300); offset in part by (b) a decrease of \$12,400 based on the United Nations Secretariat share of the budget of the CEB secretariat of 30.4 per cent for 2024, as compared with 30.7 per cent for 2023, as determined by CEB in accordance with the established methodology;

Other changes: An increase of \$69,300, reflecting the United Nations Secretariat share for 2024 of the proposed increase in jointly funded resources of \$225,600 resulting from the agreement by the Finance and Budget Network on the resource level for the CEB secretariat in 2024 (see para. 31.78 above).

Annex II**Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies**

*Brief description of the recommendation**Action taken to implement the recommendation*

Advisory Committee on Administrative and Budgetary Questions[A/77/7](#)

The Advisory Committee trusts that the discrepancy in the actual expenditure with the budgeted provisions for 2021 will be addressed for future budget periods by applying the same shares assumed for the Secretariat in the payments of the jointly financed activities (para. X.8).

The CEB secretariat will apply the same shares used in apportioning the jointly financed budgets to the apportionment of the billing of actual expenditures, in order to eliminate variances arising from changes in the share of the cost for the jointly financed activities.

Annex III**Summary of information on the cost-sharing methodology applied in establishing the United Nations share of jointly financed activities**

1. The methodology applied since 1974 in respect of the cost-sharing of the International Civil Service Commission (ICSC) budget is based on the “Consultative Committee on Administrative Questions formula”, which apportions the ICSC costs on the basis of the number of staff, as contained in the personnel statistics published by the United Nations System Chief Executives Board for Coordination (CEB) secretariat. The United Nations share of the costs also includes the shares for the United Nations Relief and Works Agency for Palestine Refugees in the Near East and the Office of the United Nations High Commissioner for Refugees, on the basis of the decision by the General Assembly that the costs relating to these two entities are funded from the regular budget of the United Nations.
2. The methodology applied since 1996–1997 for the cost-sharing of the Joint Inspection Unit budget is derived from the expenditure reported in the audited accounts of the participating organizations, excluding:
 - (a) Expenditure relating to peacekeeping;
 - (b) Expenditure in kind, including the value of donated commodities;
 - (c) A total of 50 per cent of the expenditure of the International Trade Centre corresponding to the share of the World Trade Organization, on the principle that the regular budget of the Centre is funded in equal parts by the United Nations and the World Trade Organization, which does not participate in the work of the Joint Inspection Unit.
3. The methodology applied since 2006 for the cost-sharing of the CEB secretariat’s budget is based on 50 per cent of staff, in accordance with the most recently available personnel statistics, and 50 per cent of total expenditure, in accordance with the most recently available audited financial statements, minus expenditure in kind, excluding expenditure relating to peacekeeping operations.
4. The methodology applied for the cost-sharing of the system-wide International Public Sector Accounting Standards budget is based on the same cost-sharing formula used to apportion the budget of the CEB secretariat, with the exclusion of the International Fund for Agricultural Development, which is not an active member in the International Public Sector Accounting Standards project.

Annex IV

Overview of financial and post resources

The jointly financed budgets of the International Civil Service Commission and the Joint Inspection Unit, as presented in the present fascicle, are for General Assembly consideration and approval, including the United Nations share. The jointly financed budget of United Nations System Chief Executives Board for Coordination is presented for information purposes, while its United Nations share is presented for approval.

Proposed post and non-post resource requirements for 2024

Overview

- 32.1 Under section 32, Special expenses, resources are provided to cover specific expenditure requirements for: (a) contributions to after-service health insurance; (b) compensatory payments; (c) general insurance charges; (d) bank charges; and (e) pension payments to former Secretaries-General. The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in table 32.1.

Explanation of variances by factor and component

Overall resource changes

Other changes

- 32.4 As reflected in table 32.2 (1), the net effect of the proposed changes is a decrease of \$1,028,400. The breakdown of changes is as follows:
- (a) Contributions to after-service health insurance. The net decrease of \$1,000,000 relates to:
 - (i) reduced requirements at Headquarters that are expected to be achieved through continuous implementation of the mandatory enrolments in Medicare part B by eligible plan participants. This will be carried out as a means of streamlining operations and reducing costs, without compromising the quality of service provided to plan participants. The goal is to contain costs in the delivery of health-care services under the after-service health insurance programme, while ensuring that eligible participants continue to receive the medical care they need (\$1,096,800);
 - (ii) reduced requirements at Geneva, which reflect actual expenditure experience (\$42,800);
 - (iii) increased requirements at Vienna resulting from the projected increase in the number of participants in 2024 (\$139,600);
 - (b) Compensatory payments. The decrease of \$28,400 falls under Geneva and reflects actual expenditure experience.

Other assessed and extrabudgetary resources

- 32.5 As reflected in table 32.2 (2), the estimated other assessed resources for contributions to after-service health insurance for 2024 amount to \$12,855,200, reflecting an increase of \$1,025,200 compared with the estimate for 2023. The expected increase reflects payment trends and medical inflation adjustments, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).
- 32.6 As reflected in table 32.2 (3), the estimated extrabudgetary resources for contributions to after-service health insurance are estimated at \$6,665,900, reflecting an increase of \$240,900 compared with the estimate for 2023.

A. Contributions to after-service health insurance

- 32.7 The after-service health insurance programme extends health-care benefits under the United Nations insurance schemes to eligible retirees and their eligible dependants. Coverage is provided on a shared-contribution basis in accordance with a decision taken by the General Assembly at its twenty-first session. Coverage is also provided to staff members whose appointments are terminated as a result of disability. In all cases, coverage is available only to those who are eligible to receive a periodic benefit from the United Nations Joint Staff Pension Fund or under the rules governing compensation for service-incurred death, injury or illness. In accordance with Assembly resolution [38/235](#), the maximum cost-sharing ratio is 2 to 1 between the Organization and the participant.
- 32.8 By its resolution [40/258 A](#), the General Assembly decided to extend after-service health insurance coverage to former locally recruited staff who had participated in the medical expense assistance plan under appendix E to the Staff Rules of the United Nations.
- 32.9 By its resolution [61/264](#), the General Assembly approved changes to the after-service health insurance provisions for new staff members recruited on or after 1 July 2007. Under the terms of that resolution, following retirement, staff members are eligible for cost-sharing of after-service coverage if they have participated in a United Nations-system contributory health insurance plan for a minimum of 10 years at the time of retirement. Staff members recruited before 1 July 2007 who have participated in a United Nations contributory plan for at least five years are also eligible,

provided that they pay the full premium for the period for which their participation falls short of the 10-year requirement for cost-shared participation.

- 32.10 The General Assembly, in its resolution [64/241](#), requested the Secretary-General to submit to it at its sixty-seventh session a report on managing after-service health insurance liabilities, bearing in mind that the pay-as-you-go principle was one of the viable options. The Assembly also requested the Secretary-General to continue to validate the accrued liabilities with the figures audited by the Board of Auditors and to include that information and the outcome of the validation in the requested report. The report of the Secretary-General on managing after-service health insurance liabilities ([A/68/353](#)) was submitted to the Assembly at its sixty-eighth session. The Assembly, in its resolution [68/244](#), endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions on the continuation of the pay-as-you-go approach to the funding of the after-service health insurance liabilities. It also requested the Secretary-General to examine the option of broadening the mandate of the United Nations Joint Staff Pension Fund, to include the cost-effective, efficient and sustainable administration of after-service health insurance benefits, taking into account the advantages and disadvantages of that option, including its financial and legal implications, and to report thereon at the seventieth session of the Assembly, as well as to undertake a survey of current health-care plans for active and retired staff within the United Nations system, to explore options to increase efficiency and contain costs and to report thereon at its seventieth session. In his report on managing after-service health insurance ([A/73/662](#)), largely informed by the work of the inter-agency Working Group on After-Service Health Insurance, the Secretary-General continued to apprise the Assembly of the work undertaken in response to its request. In its resolution on managing after-service health insurance (resolution [73/279 B](#)), the Assembly endorsed the recommendations contained in the report of the Advisory Committee ([A/73/792](#)), including that the Secretary-General further explore options for the improvement of efficiency and the containment of costs, including liabilities associated with current and future staff, with a view to reducing the Organization's expenditure on health insurance plans and its after-service health insurance obligations.
- 32.11 The report of the Secretary-General on managing after-service health insurance liabilities ([A/76/373](#)) was submitted to the General Assembly at its seventy-sixth session. In the report, the Secretary-General responded to the Assembly's request and set out a comprehensive proposal on after-service health insurance funding.
- 32.12 The proposed regular budget resources for 2024 amount to \$80,512,200, reflecting a decrease of \$1,000,000 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 32.4 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 32.4 and figure 32.II.

B. Compensatory payments

- 32.13 The requirements under compensatory payments provide for compensation to members of commissions, committees or similar United Nations bodies in the event of death, injury or illness attributable to service with the United Nations. The responsibilities of the United Nations in this area, as well as the rules governing compensatory payments, are detailed in Secretary-General’s bulletin [ST/SGB/103/Rev.1](#).
- 32.14 Compensation is also provided to staff members or their dependants in the event of death, injury or illness attributable to the performance by the staff member of official duties on behalf of the United Nations. The compensation is governed by the specific rules under appendix D to the Staff Regulations and Rules of the United Nations ([ST/SGB/2023/1](#)).
- 32.15 The costs incurred on both those accounts may include monthly survivor benefits for life, monthly disability benefits for life, lump-sum indemnities for permanent disabilities, funeral expenses, sick leave credit and medical expenses.
- 32.16 The proposed regular budget resources for 2024 amount to \$1,798,100, reflecting a decrease of \$28,400 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 32.4 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 32.5 and figure 32.III.

 (Thousands of United States dollars)

C. General insurance

- 32.17 The provisions under general insurance relate mainly to insurance on the buildings and property at Headquarters, as well as in Addis Ababa (the Economic Commission for Africa), Santiago (the Economic Commission for Latin America and the Caribbean) and Beirut (the Economic and Social Commission for Western Asia). The United Nations Offices at Geneva, Vienna and Nairobi, as well as the Economic and Social Commission for Asia and the Pacific in Bangkok, separately maintain property and liability coverage for their offices locally. General insurance also covers automobile liability insurance at Headquarters, liability insurance for aircraft used for travel by the Secretary-General but not owned by the United Nations, and insurance for other air travel of staff. In addition, in accordance with General Assembly resolution 41/210, the United Nations has established a self-insurance plan for general liability risk in respect of acts occurring in the Headquarters district in New York. The provisions also cover a stand-alone insurance policy for acts of terrorism, which, following the events of 11 September 2001, was established effective 2003 as a result of limitations in the scope of insurance coverage for risks, such as acts of terrorism that would normally have been covered under the general policies.

- 32.18 The outreach initiatives continued to encourage additional markets to bid for coverage of risks to the United Nations. Some limitations in the scope of insurance coverage, however, continue to be prevalent. Two such examples are the flood coverage restrictions introduced in the wake of storm Sandy in New York and the continued requirement for specific insurance for acts of terrorism that were covered under the general policies before the events of 11 September 2001. Actual premiums will be driven by the United Nations claims experience for previous years, and by the general state of insurance markets at the time of the renewal of the policy. It should be noted that the damages sustained by the Economic and Social Commission for Western Asia (currently estimated at \$6 million) to its building and the contents thereof as a result of the explosion in Beirut on 4 August 2020 and other property losses continue to have an impact on the property insurance renewal premium. In addition to loss history, insurance premiums are also affected by market conditions and capacity, that is, the number of underwriters in the marketplace willing to insure the risk at the time of renewal, inflation and reinsurance costs. The insurance marketplace is constantly evolving on the basis of global economic conditions, natural and human-made disasters, regulatory requirements and insurers' perception of specific risks related to the United Nations.

- 32.19 The proposed regular budget resources for 2024 amount to \$3,670,100 and reflect no change in the resource level compared with the appropriation for 2023, as reflected in table 32.6 and figure 32.IV.

(Thousands of United States dollars)

D. Bank charges

32.20 The bank charges include fees for account maintenance, electronic fund transfers and other banking services used by the United Nations.

32.21 The proposed regular budget resources under general operating expenses for 2024 amount to \$248,900 and reflect no change in the resource level compared with the appropriation for 2023, as reflected in table 32.7.

Table 32.7

E. Pension payments to former Secretaries-General

- 32.22 This component covers the retirement allowances for a former Secretary-General and for the widows of two former Secretaries-General at the half rate on the basis of the maximum retirement benefit payable as from 1 February 2023.
- 32.23 The proposed regular budget resources for 2024 amount to \$430,300 and reflect no change in the resource level compared with the appropriation for 2023, as reflected in table 32.8.

Annex I**Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies**

*Brief description of the recommendation**Action taken to implement the recommendation*

Advisory Committee on Administrative and Budgetary Questions[A/77/7](#)*After-service health insurance*

The Advisory Committee trusts that more information on the reasons for the deferral of and the impact of the implementation of General Assembly resolution [61/264](#) will be provided to the General Assembly during the consideration of the present report and in the next budget submission (para. X.52).

The Advisory Committee trusts that more detailed information on cost containment initiatives and cost savings will be included in future budget submissions (para. X.53).

The Advisory Committee trusts that the next budget submission will include detailed information on the exercise and its results (para. X.54).

The implementation of General Assembly resolution [61/264](#) has been postponed to 2024 owing to technical complexities.

The Secretariat will continue to execute the established initiatives, including increasing awareness through different communication channels to ensure that all plan participants continue to receive adequate insurance coverage while simultaneously containing costs.

The implementation of the apportionment ratios will require more time, and the Secretariat will report on implementation in the context of the proposed programme budget for 2025.

^a Monthly expenditure for after-service health insurance is charged on a pay-as-you-go basis to the regular budget and adjusted periodically at Headquarters on the basis of the actual expenditure for the corresponding months, with approximately 15 per cent apportioned to peacekeeping operations and 8 per cent to extrabudgetary resources.

Annex	
Indicative estimates for the major construction projects in 2024	15

* [A/78/50](#).

** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the programme plan and programme performance information (part II) is submitted through the Committee for Programme and Coordination for the consideration of the Assembly.

Overview

- 33.1 The present section covers the resources to fund capital investment requirements for the construction, alteration, periodic maintenance and improvement of, and upgrades to, facilities, buildings and general infrastructure across the global United Nations Secretariat, including for safety and security as well as for information and communications technology (ICT). To ensure a coherent and systematic approach to capital expenditure requirements across the Organization, such resources are requested under the present section. Section 33 does not include requirements related to posts or staffing costs in connection with the administration and management of the activities proposed in the present section; those costs are included under the respective sections of the proposed programme budget for 2024 for United Nations Headquarters, the United Nations Office at Geneva, the United Nations Office at Vienna, the United Nations Office at Nairobi, the Economic Commission for Latin America and the Caribbean (ECLAC), the Economic and Social Commission for Asia and the Pacific (ESCAP), the Economic Commission for Africa (ECA), the Economic and Social Commission for Western Asia (ESCWA), the United Nations Truce Supervision Organization (UNTSO) and the Office of the United Nations Special Coordinator for the Middle East Peace Process (UNSCO).
- 33.2 The resources proposed are in line with the International Public Sector Accounting Standards and encompass requirements for projects that result in an increase of the value of the asset and/or extend its useful life, including: (a) projects of a capital-intensive and of a structural nature that would substantially improve facilities or infrastructure; and (b) projects to repair or replace existing installations (e.g., heating, ventilation and air conditioning) along with the underlying infrastructure, hardware and related systems required for their operation (e.g., electrical and information technology networks, security systems). The proposed projects comprise both one-time projects and new and continuing multi-year projects. In addition, pursuant to the decision of the General Assembly in its resolution [77/263 A](#) and previous resolutions, the proposals under the present section include a provision for the annual repayments to the host country (Switzerland) for the loans related to the strategic heritage plan of the United Nations Office at Geneva until the General Assembly decides otherwise.
- 33.3 In accordance with General Assembly resolution [77/263 A](#) and previous resolutions, the Global Asset Management Policy Service (in the Field Operations Finance Division of the Office of Programme Planning, Finance and Budget in the Department of Management Strategy, Policy and Compliance) is responsible for the provision of guidance, support and technical advice to offices away from Headquarters and the regional commissions with regard to the planning, management and monitoring of capital investment projects related to facilities.
- 33.4 At Headquarters, the projects proposed to be funded under section 33 fall under the responsibility of the Department of Operational Support in respect of facilities, the Department of Safety and Security in respect of safety and security, and the Office of Information and Communications Technology in respect of enterprise networks. The administrative services in Geneva, Vienna and Nairobi and at the regional commissions are responsible for the implementation of the projects at their respective duty stations.
- 33.5 With regard to safety and security, projects to enhance capabilities for the protection of United Nations staff and premises globally are evaluated by, and subsequently implemented in close coordination with, the Department of Safety and Security to ensure standardization, such as the ongoing implementation of the multi-year standardized access control project across the Secretariat.
- 33.6 With regard to information and telecommunications technology, the Office of Information and Communications Technology provides central leadership in the establishment and implementation of Organization-wide ICT strategy and standards and ensures the efficient use of resources in the modernization of information systems and the improvement of information and communications services. The Office directs and oversees the operation and upgrade of the global infrastructure at Headquarters, offices away from Headquarters and the regional commissions. In addition, the Office operates and maintains the infrastructure and equipment for conferencing services at Headquarters. Upgrades are implemented through annual projects to upgrade the enterprise networks. Such projects

also serve to standardize the related infrastructure and equipment to ensure comparable standards of functionality, quality and reliability of the related services across the Organization, including in respect of telecommunications.

- 33.7 Pursuant to the submission of its report on capital investment planning ([A/77/519](#)), the Secretariat is currently working on a revised comprehensive plan for major capital investments that will be required across the Organization in the years beyond 2024, to be submitted to the General Assembly at the main part of its seventy-eighth session. The report will include information on the Organization's phased plans, with medium- and long-term perspectives on capital investments needs. The related resource proposals will subsequently be made in the context of future relevant budget submissions, taking into account any guidance that will be received from the Assembly. The resources proposed for 2024 under this section, as detailed below, are required for the continuation of existing multi-year projects and for urgent new projects to be implemented in 2024, and, accordingly, are not in the longer-term scope of the capital investment planning report.
- 33.8 In line with the request from the General Assembly, in its resolution [75/252](#), to include indicative estimates for the major construction projects in the proposed programme budget under section 33 for information purposes only, a table with the requested information related to those capital projects is provided in the annex. Such estimates may be revised in the progress reports for each project to reflect the evolving situations. As the estimates are provided for information purposes only, the resources for those projects, including for the corresponding project management teams under the respective budget sections other than section 33, are not proposed as part of the resources submitted herewith for section 33; in continuation of past practice, these resources will be requested in the context of the forthcoming annual progress reports of the Secretary-General to be submitted at the main part of the seventy-eighth session of the Assembly.

Proposed resource requirements for 2024

Overview of resources

- 33.9 The overall resources proposed for 2024 amount to \$29,985,800 before recosting, reflecting a net decrease of \$55,485,200 (or 64.9 per cent) compared with the appropriation for 2023. Resource changes result from two factors, as explained in paragraphs 33.10 and 33.11 below, namely: (a) technical adjustments (a decrease of \$55,758,000); and (b) other changes (an increase of \$272,800). The distribution of the proposed resources is reflected in table 33.1.

Abbreviations: DSS, Department of Safety and Security; UNOG, United Nations Office at Geneva; UNON, United Nations Office at Nairobi; UNOV, United Nations Office at Vienna.

^a Includes an amount of \$2,698,500 for the annual repayment in 2024 of the loan related to the strategic heritage plan.

^b Indicative estimates for 2024 for the major construction projects are provided in the annex for information purposes only.

Technical adjustments

- 33.10 Resource changes reflecting a decrease of \$55,758,000 are due to the removal of non-recurrent requirements relating to the projects approved for 2023 by the General Assembly in its resolution [77/263](#) A, namely: (a) the strategic heritage plan of the United Nations Office at Geneva (\$26,347,900); (b) the replacement of office blocks A to J at the United Nations Office at Nairobi (\$11,748,100); (c) the renovation of the conference service facilities at the United Nations Office at Nairobi (\$3,889,300); (d) the seismic mitigation retrofit and life-cycle replacements project at ESCAP premises, in Bangkok (\$10,345,900); and (e) the renovation of the North Building at ECLAC, in Santiago (\$615,600). The resources for those projects for 2024 will be requested in the forthcoming related progress reports of the Secretary-General, which will be submitted for consideration during the main part of the seventy-eighth session of the Assembly.

Other changes

- 33.11 Resource changes reflect an increase of \$1,272,800, as follows: an increase under information and communications technology (\$4,341,000), offset in part by a decrease under: (a) the alteration, upgrades and major maintenance programmes (\$1,282,200); and (b) the standardized access control project and other related security system upgrades (\$1,786,000).
- 33.12 The resources under section 33 undergo reprogramming, including redistribution for each budget period, because they cover a portfolio of activities of which only a portion is a recurrent requirement, the remainder being either one-time or multi-year projects. Each proposed programme budget for a new budget period reflects the completion of non-recurrent activities and the introduction of newly programmed, non-recurrent investment requirements.
- 33.13 With regard to alteration, upgrades and major maintenance programmes related to facilities, resources reflect a net decrease amounting to \$1,982,200 for Headquarters in New York, the offices away from Headquarters and the regional commissions, offset in part by an increase of \$500,000 for capital investment requirements in UNTSO, which was previously budgeted under section 5, Peacekeeping operations, of the programme budget, as well as new requirements in the amount of \$200,000 for the office of UNSCO in Gaza City, as further detailed in paragraphs 33.41 and 33.43.
- 33.14 With regard to information and communications technology, resource changes reflect an increase of \$4,341,000, resulting mainly from: (a) additional resources proposed to start with a phased, multi-year upgrade of the aged conferencing infrastructure and equipment at Headquarters (\$3,500,000); (b) the replacement of virtual servers, network systems and the acquisition of additional Wi-Fi access points at the United Nations Office at Nairobi (\$459,600); and (c) the upgrade of ICT infrastructure and digital architecture at ECLAC (\$518,300), offset in part by decreased requirements both at the United Nations Office at Geneva (\$52,800) and at ESCWA (\$109,000).
- 33.15 With regard to capital requirements for safety and security, resource changes reflect a decrease of \$1,786,000, given the progress of implementation of the standardized access control project during the period 2022–2023 across the various offices of the Secretariat.

Nature of proposed activities

- 33.16 Table 33.2 breaks down the resource requirements into: (a) one-time projects; and (b) new and continuing multi-year phased projects. The breakdown by subcategory allows the aggregate portfolio of activities proposed under section 33 to be viewed in terms of nature and duration by location.

A. Resource requirements by duty station

1. Headquarters (including global implementation projects)

Resource requirements (before recosting): \$13,505,200

- 33.17 As summarized in table 33.3, the total provision of \$13,505,200 would provide for: (a) one-time projects (\$950,000); and (b) new and continuing multi-year projects (\$12,555,200).
- 33.18 The provision of \$950,000 is required to fund the initial construction of a parking area for bicycles within the Headquarters campus.
- 33.19 The provision of \$12,555,200 is required to fund the continuation of multi-year projects at Headquarters, including: (a) the replacement of the river water piping network and upgrade of the river water intake (\$779,000); (b) the replacement of the security booth located at the delegates' entrance (\$1,980,000); (c) the upgrades of video surveillance systems and x-ray machines (\$711,000); (d) the global upgrade and standardization of the access control systems and related hardware and infrastructure requirements (\$1,221,000); (e) the recurring upgrade and maintenance requirements for the enterprise network infrastructure in the United Nations Headquarters technology rooms supporting the Secretariat, General Assembly and conference buildings (\$2,140,500); (f) the maintenance and renewal of the Check Point firewall software at Headquarters, which is critically needed to safeguard the Organization's global information and communications technology network of the entire Secretariat from ICT attacks – specifically, these resources would fund the required licensing to keep the Organization's firewalls updated (\$452,200); (g) the consolidated maintenance contract for network and telephone equipment at Headquarters, offices away from Headquarters and the regional commissions, to guarantee the same level of service across duty stations, noting the increased volume and value of the equipment and systems covered by this global contract (\$1,771,500); and (h) a provision of \$3,500,000 to begin the phased upgrade of the underlying infrastructure, hardware and equipment for conferencing services at Headquarters.

Table 33.3

<i>Description</i>	<i>Amount</i>
A. One-time projects (new)	
Improvement of facilities and general infrastructure	950.0
B. New and continuing multi-year projects	
1. Continuation of multi-year projects	
Improvement of facilities and general infrastructure	779.0
Improvement of ICT infrastructure (Headquarters)	2 592.7
Improvement of ICT infrastructure (global)	1 771.5
Major maintenance of facilities and general infrastructure	2 691.0
Improvement of safety and security infrastructure (global)	1 221.0
Subtotal, B.1	10 005.2
2. New multi-year projects	
Conferencing hardware infrastructure and equipment (Headquarters)	3 500.0
Subtotal, B.2	3 500.0
Total	13 505.2

2. United Nations Office at Geneva

Resource requirements (before recosting): \$4,058,500

- 33.20 The total provision of \$4,058,500 for the United Nations Office at Geneva is required to fund the continuation of multi-year projects being implemented, as detailed below.
- 33.21 The provision would finance the continuation of: (a) the emergency response lockdown infrastructure project (\$900,000); (b) window protection across the campus, with new shatter-resistance film (\$120,000); (c) the integrated system for ICT vulnerability and threat management (\$180,000); (d) the implementation of various disability inclusion features across the ICT portfolio of systems and applications in Geneva (\$60,000); and (e) the collection and disposal of hazardous materials (\$100,000). The provision also includes an amount of \$2,698,500 (2,502,000 Swiss francs) for the annual repayments to the host country of the loan related to the strategic heritage plan, in line with General Assembly resolutions [77/263](#) A and previous resolutions.
- 33.22 The projects for 2024 have been assessed in close consultation with the team at the United Nations Office at Geneva managing the strategic heritage plan project to ensure that the works would not need to be redone in the future and that only essential needs and urgent repairs, in particular at the Palais des Nations, are considered while the overall renovation project is under way. The resource requirements are summarized in table 33.4.

Table 33.4

Resource requirements by nature of project, United Nations Office at Geneva

(Thousands of United States dollars)

<i>Description</i>	<i>Amount</i>
A. New and continuing multi-year projects	
1. Continuation of multi-year projects	
Improvement of ICT infrastructure	240.0
Safety and security improvements	1 020.0
Repayment of the loan for the strategic heritage plan	2 798.5
Total	4 058.5

3. United Nations Office at Vienna

Resource requirements (before recosting): \$1,505,900

- 33.23 The total provision of \$1,505,900 would continue to cover both the share of the United Nations Office at Vienna to finance the maintenance and repairs of the Vienna International Centre, which is managed by the United Nations Industrial Development Organization on a cost-shared basis through an agreement among the organizations based at the Centre and the host Government (with regard to major maintenance projects), as well as the share in respect of the safety and security installations at the Centre, together with the associated ICT hardware infrastructure components. The requested amount is calculated on the basis of the current share of the Office, which is 23.2 per cent in respect of alteration and improvement requirements and 11.6 per cent in respect of major maintenance requirements. This share is based on a composite of the space, staff and workload of the four organizations in determining the respective share of costs.
- 33.24 For 2024, the contribution of the United Nations Office at Vienna to the Common Buildings Management Fund for the periodic repairs, upgrades and maintenance at the Vienna International Centre amounts to \$1,337,700. In addition, a provision of \$23,200 will cover the upgrade and acquisition of various hardware components for access security at the Office. A provision of \$145,000 is also included to cover the requirements to fund the Check Point firewall software against security attacks. The resource requirements are summarized in table 33.5.

Table 33.5

Resource requirements by nature of project, United Nations Office at Vienna

(Thousands of United States dollars)

<i>Description</i>	<i>Amount</i>
A. New and continuing multi-year projects	
1. Continuation of multi-year projects	
Improvement of facilities and general infrastructure	1 337.7
Improvement of ICT infrastructure	145.0
Safety and security improvements	23.2
Total	1 505.9

4. United Nations Office at Nairobi**Resource requirements (before recosting): \$2,452,500**

- 33.25 The total provision of \$2,452,500 would fund: (a) one-time projects (\$100,000); and (b) new and continuing multi-year projects (\$2,352,500).
- 33.26 The provision of \$100,000 would cover the one-time refitting of the radio room and communication equipment within the premises of the United Nations Office at Nairobi.
- 33.27 The provision of \$2,352,500 would provide for: (a) the adjustment of the United Nations complex perimeter required as a result of the widening of the adjacent United Nations Avenue (\$400,000); (b) the upgrade of virtual servers and of the network, and the acquisition of additional Wi-Fi access points (\$435,000); and (c) the enhancement of security systems infrastructure, including the provision of closed-circuit television cameras, and of explosive bomb detection, the extension of an anti-climb fence, the enhancement of vehicular traffic control and the replacement of existing doors controllers (\$512,500). In addition, the provision would cover for the continuation of: (a) various accessibility upgrades (\$300,000); (b) the implementation of active shooter mitigation measures through high-security ballistic doors, the replacement of window protection shatter resistance film and the acquisition of dual-view x-ray machines (\$635,000); and (c) the annual renewal of the Check Point firewall software for ICT security (\$70,000). The resource requirements are summarized in table 33.6.

5. Economic and Social Commission for Asia and the Pacific

Resource requirements (before recosting): \$1,505,400

- 33.28 The total provision of \$1,505,400 would provide for: (a) one-time projects (\$70,000); and (b) the continuation of multi-year projects (\$1,435,400).
- 33.29 The provision of \$70,000 would finance the required upgrade of the Commission’s fire safety capacity for emergency response, to comply with updated host country codes.
- 33.30 The provision of \$1,435,400 would finance the continuation of the following investment upgrades: (a) the enhancement of the security entrance and screening at the perimeter of the ESCAP compound (\$549,400); (b) the removal of asbestos across ESCAP premises (\$146,000); (c) continuation of the multi-year renovation upgrade to the ESCAP Conference Centre, in particular conference room 1, including facilities, underlying ICT systems and equipment (\$550,000); and (d) the upgrade of access control systems at ESCAP block A (\$190,000). The resource requirements are summarized in table 33.7.

6. Economic Commission for Latin America and the Caribbean

Resource requirements (before recosting): \$1,563,700

- 33.31 The total provision of \$1,563,700 would provide for: (a) one-time projects (\$469,400); and (b) for new and continuing multi-year projects (\$1,094,300).

- 33.32 The provision of \$469,400 would finance the necessary upgrade of the Commission’s digital architecture and infrastructure, to enhance performance, sustainability and resilience, including to support the expansion of and access to the Commission’s digital repository of its intellectual acumen since 1948 through enhanced hosting services.
- 33.33 The provision of \$1,094,300 would cover: (a) upgrades to the software support agreement and server renewal for the access control and closed-circuit television systems (\$120,000); (b) ongoing projects to improve water management and water sustainability (\$370,600); (c) the ongoing improvement of accessibility for persons with disabilities (\$134,700); (c) the annual requirement for the Check Point firewall software for ICT security (\$214,000); (d) the continuation of the upgrades to physical security and safety, hardware and related equipment (\$190,000); and (e) the continuation of the improvements to access control facilities in the South Pavilion (\$65,000). The resource requirements are summarized in table 33.8.

7. Economic Commission for Africa

Resource requirements (before recosting): \$3,727,600

- 33.34 The provision of \$3,727,600 would provide for new and continuing multi-year upgrade projects, as follows.
- 33.35 The provision of \$1,218,600 would finance the continuation of the multi-year reconstruction of the old Yaoundé building, constructed in 1934, which houses the Commission’s regional office in West Africa.
- 33.36 The provision of \$2,509,000 would finance the following new multi-year upgrade projects: (a) the design stage to upgrade the security control access points for vehicles, pedestrian and deliveries (\$260,000); (b) the engagement of a specialized architectural and engineering firm to help ECA produce a technical assessment and outcome report to structure a proposal for the holistic renovation of the aged Addis Ababa campus (\$464,000); and (c) the initial phase to strengthen the 1.6 km perimeter wall and gates of the ECA campus (\$1,785,000). The resource requirements are summarized in table 33.9.

9. United Nations Truce Supervision Organization

Resource requirements (before recosting): \$500,000

- 33.41 The total provision of \$500,000 would finance new multi-year repair and upgrade projects across the aged compound located in Jerusalem, including: (a) the periodic maintenance and repairs across the complex, previously budgeted under section 5, Peacekeeping operations, of the programme budget (\$300,000); and (b) to engage a specialized architectural engineering survey to assess the structural conditions of the compound, including in respect of seismic risks, in order to help UNTSO complete a proposal to undertake a holistic modernization and renovation upgrade of the 75-year-old compound (\$200,000).
- 33.42 The resource requirement is summarized in table 33.11.

10. United Nations Special Coordinator for the Middle East Peace Process

Resource requirements (before recosting): \$200,000

- 33.43 The provision of \$200,000 would finance the completion of the renovation and upgrades of the new office of UNSCO in Gaza. Following a blast and risk assessment completed by the Department of Safety and Security in the fourth quarter of 2022, it was recommended that UNSCO urgently move out of its current location. Early in 2023, UNSCO identified a villa compound in Gaza City where it could relocate, and signed a five-year lease. During 2023, UNSCO will renovate the compound, including by establishing security and safety reinforcement measures for minimum operation security standards compliance, in addition to structural upgrades of the villa and the required network and equipment installations. UNSCO intends to move into the new location by the end of 2023. In 2024, the new premises will require additional investments in furniture and office equipment, including to finish the parking area and access and perimeter reinforcements.
- 33.44 The resource requirement is summarized in table 33.12.

Foreword

The Department of Safety and Security has been on a journey of reform. It has reoriented security as a centrepiece in United Nations effectiveness. By embracing agility, collaboration, partnerships and a solutions orientation and refocusing its toolkit and mindset towards its contribution to United Nations results, the Department has demonstrated that security can and must be configured as an enabler for its partners.

Over the course of 2024, the Department intends to continue down this path, embedding tools and mechanisms that are proving essential for the Department's ability to respond quickly during crises. Its operations will include newly strengthened capabilities that support resilience, while security decisions will be supported by nuanced analysis that is grounded in political, social and economic realities. The Department's physical security expertise will reach maturity, capable of meeting the demands of a system with an increasing presence in areas in which the United Nations is vulnerable and in which staff and representatives of Member States deserve to work from accessible and secure premises. Partners will be better supported through innovative, data-driven security advice based on improved knowledge and information management systems. Capitalizing on recent progress, the Department will deploy gender-sensitive security operations and make progress towards gender parity.

There is no indication that the risks that pose a challenge to the Department's work will decrease in 2024. Political unrest, economic uncertainty, disinformation, a growing disregard for international humanitarian law and the compounding effects of climate change will continue to drive instability. The Department can no longer afford security approaches that function on the basis of "business as usual".

(Signed) Gilles **Michaud**
Under-Secretary-General for Safety and Security

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 34.1 The Department of Safety and Security is responsible for providing leadership, operational support and oversight of the United Nations security management system. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [59/276](#), by which the Department was established. The Department enables the United Nations to carry out its operations and programmes globally and provides support to approximately 180,000 personnel and 400,000 of their dependants in more than 125 States.
- 34.2 The security environment in which the United Nations operates remains highly complex and unpredictable, owing to multiple factors including the expansion by non-State armed groups of their scope and capabilities by exploiting unaddressed grievances, unprecedented levels of climate change-induced migration and the indifference to international humanitarian law of some actors in places where the United Nations is called to deliver its mandates.

Strategy and external factors for 2024

- 34.3 The Department will continue to align its activities and capabilities with United Nations mandates and objectives, with a focus on enabling United Nations system entities to carry out their programmes while keeping their personnel safe in often complex and challenging operating environments.
- 34.4 The unpredictable global security environment is expected to continue in 2024, with the potential for political, economic or social unrest across many locations where the United Nations delivers programmes. The negative and widespread impacts of numerous armed conflicts as well as rising inflation globally are expected to continue to add political and economic stressors to the security environment in which the United Nations delivers its programmes. As a result, the need for security support will remain high in 2024 if the United Nations is to maintain its ability to stay and deliver.
- 34.5 The Department will further strengthen its planning approaches and systems by increasing its engagement in broader United Nations planning processes, including those led by humanitarian actors, development entities and peace operations, and by gradually developing country plans that articulate the Department's contributions to United Nations results as presented in the United Nations Sustainable Development Cooperation Framework and in humanitarian response plans. An enhanced emphasis on results-based management and substantive engagement with United Nations programmes, supported by increased training and capacity-building opportunities, will inform continuing efforts to update the Department's security management tools, improve its business processes and monitor its performance. The Department completed the review of its internal structures with a focus on service delivery and the grouping of complementary roles and functions. As a result, to increase coherence between a range of services and the policies that underpin them and to leverage partnerships that can make such services more effective, the Department proposes that the partnerships and policy functions be consolidated in the Department and that it be renamed the Division of Partnerships and Specialized Support.
- 34.6 The Department will implement this shift towards a United Nations results focus by enhancing support capabilities and systems at Headquarters, designed and implemented with a view to enabling and empowering leadership in delivering adequate security support in the field. Areas of dedicated attention for increased Headquarters support will include preparedness analysis and planning, emergency responses, crisis-related psychosocial resilience, information management, digital transformation and resource mobilization. The Department will also continue to reorient other

Headquarters functions as enablers of effective in-country security operations, such as strategic communications, compliance, evaluation and lessons learned, physical security expertise and risk management. To sustain support for the alignment of the Department's activities with the work of United Nations country teams and United Nations peace operations, the Department will maintain regular communication with the leadership of all relevant United Nations entities, as well as with Member States, providing updates and seeking engagement with the Department's enabling mission. The Department will implement the multi-year standardized access control project to upgrade the United Nations security infrastructure, as presented in the report of the Secretary-General on capital investment planning ([A/77/519](#)).

- 34.7 The Department will continue to update and enhance its training programme in support of integrated security workforce performance and the cultivation of relevant security competencies, skills and expertise, supported by human resources strategies designed to equip the Department with a diverse workforce that is fit for purpose and empowered to provide trusted security leadership at all levels.
- 34.8 With regard to cooperation with other entities at the global, regional, national and local levels, the Department will maintain its close collaboration with implementing partners of the United Nations, including non-governmental organizations, notably through the Saving Lives Together framework, which promotes security-related information-sharing and best practice exchanges between the United Nations and international non-government organizations. These partners remain essential to United Nations operations and, through continuous exchanges of information and knowledge-sharing on security approaches, are expected to continue to contribute to a shared understanding of security issues and effective security solutions.
- 34.9 With regard to inter-agency coordination and liaison, the Department will continue to play a leadership role in the development, updating and implementation of system-wide policies and measures aimed at improving personnel security training and awareness. It will do so through the Inter-Agency Security Management Network, its steering group and its working groups, thus ensuring effective cooperation and collaboration among United Nations departments, organizations, funds, programmes and affiliated international organizations that are part of the United Nations security management system. The Department will intensify its efforts to enable and monitor compliance with policies and to strengthen its evaluative functions in support of strategic decision-making and policy development. Moreover, to ensure system-wide policy coherence, the Department will maintain its engagement in the development of policy by Secretariat entities and provide guidance on strategic issues that have security implications. Furthermore, the Department will continue to participate in inter-agency coordination mechanisms, including the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination (CEB) and its networks, and the Secretary-General's Executive Committee and Deputies Committee.
- 34.10 With regard to the external factors, the Department considered applicable risks identified in its risk register and, accordingly, the overall plan for 2024 is based on the following planning assumptions:
 - (a) Security needs in environments experiencing war, armed conflict, civil unrest, crime and natural hazards will intensify, with a high degree of volatility in the high-threat locations where United Nations assistance is required;
 - (b) Crises and security environments will evolve quickly and unpredictably, leading to large-scale and complex emergencies, necessitating agility, flexibility and rapid security responses to support the scale-up and reorientation of the United Nations presence and humanitarian programmes;
 - (c) The ability of the United Nations to gain safe access to areas and communities for programme delivery will continue to be challenged, and a range of obstacles to access will require robust planning, preparedness and adaptability in operational modalities;
 - (d) Personnel of the United Nations and its premises will continue to face direct and indirect threats;

- (e) Threat actors will continue to develop innovative and advanced techniques that will require new and specialized responses from the United Nations security management system;
 - (f) Host Governments will continue to provide security support to the United Nations; in some cases, this support may need to be supplemented depending on the security context and capacities;
 - (g) Demand for enhanced levels of security risk analysis, training, advice, responses and solutions to support the security needs and obligations of United Nations Designated Security Officials and of members of the Security Management Team will continue.
- 34.11 The Department integrates a gender perspective in its operational activities, deliverables and results. It aims to produce results in support of a gender-sensitive approach to security management and security operations through the creation of an inclusive and enabling culture. In 2024, the Department expects to have in place an updated women's empowerment strategy, which is currently under development, for the next five-year period. The strategy will be a reflection of and supports the mandate of the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), tailored to enabling security services that mainstream a gender perspective. For example, the needs of recipients will be taken into account in the delivery of the Department's services. The strategy will also further strengthen and refine the Department's approach to creating a safe working environment for United Nations staff and operations and increasing awareness of and taking action to prevent sexual exploitation and abuse, among other matters.
- 34.12 In line with the United Nations Disability Inclusion Strategy, the Department will continue to build a supportive environment for persons with disabilities. It will continue to incorporate disability inclusion into its risk management process and engage with organizations of persons with disabilities when developing plans and strategies. It will work on developing its own internal guidelines on areas such as reasonable accommodation and accessibility for staff and delegates, and will consider ways to address staff satisfaction with the level of support received. The Department will also continue to operationalize the disability-related guidelines that have been developed and will implement any additional guidance provided for Secretariat entities on related matters.

Impact of the pandemic and lessons learned

- 34.13 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates under all subprogrammes, in particular with regard to field missions, some of which had to be curtailed, postponed or cancelled. For example, the pandemic limited the ability to develop situational awareness from field locations and reduced leadership visits, which had an impact on compliance, oversight and consistency in safety and security. There was reduced flexibility to deploy staff to some locations as surge capacity, putting additional pressure on existing staff, coupled with the impact on operational activities and mandate delivery. The reduced flexibility hampered the capacity to conduct security assessments and workforce training, provide hands-on support to designated officials and liaise with local authorities. The impact also prevented the implementation of the critical incident stress management certification programme for United Nations counsellors and external mental health professionals under subprogramme 3.
- 34.14 The Department continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including with regard to the relevance and cost-effectiveness of hybrid and blended training formats. These lessons learned and best practices inform the development of country plans and operational modalities across field locations. For example, in the Syrian Arab Republic, a local training application and e-learning platform was developed to reduce the number of face-to-face days of training and contact among staff.

Legislative mandates

34.15 The list below provides all mandates entrusted to the programme.

General Assembly resolutions and decisions

54/192 , 55/175 , 77/31	Safety and security of humanitarian personnel and protection of United Nations personnel	Decision 57/567	Inter-organizational security measures: framework for accountability for the United Nations field security management system
56/255 , sect. VIII	Special subjects relating to the proposed programme budget for the biennium 2002–2003: safety and security of United Nations personnel	59/276 , sect. XI	Questions relating to the programme budget for the biennium 2004–2005: strengthened and unified security management system for the United Nations
56/286	Strengthening the security and safety of United Nations premises	61/263	Strengthened and unified security management system

Security Council resolution

Deliverables

34.16 Table 34.1 lists all cross-cutting deliverables of the programme.

Table 34.1

Cross-cutting deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report on the safety and security of humanitarian personnel and protection of United Nations personnel	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
2. The Fifth Committee	1	1	1	1
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
B. Generation and transfer of knowledge				
Technical materials	2	2	2	2
5. Security Policy Manual	1	1	1	1
6. Designated Official and Security Management Team Handbook	1	1	1	1
E. Enabling deliverables				
Safety and security: internal United Nations security management system policies, procedures and guidelines, technical support briefings on security policies, procedures and guidelines of the United Nations security management system for more than 150 designated officials for security and security decision makers and for 4,000 security professionals and United Nations personnel in the field and at Headquarters; and security-related platforms, including the United Nations Security Managers Information Network and the programme criticality database used in all high- and very high-risk areas of operations.				

Evaluation activities

- 34.17 The evaluation of the Department's gender strategy, completed in 2022, has guided the proposed programme plan for 2024.
- 34.18 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. For example, the evaluation of the gender strategy will inform adjustments to security policies, security risk management and training for personnel on the ground as well as the implementation of related United Nations commitments in the areas of prevention of sexual exploitation and abuse and anti-discrimination.
- 34.19 Two evaluations are planned for 2024, the subjects of which are to be determined.

Programme of work

Subprogramme 1 Security and safety services

Objective

- 34.20 The objective, to which this subprogramme contributes, is to ensure a safe and secure environment for all United Nations personnel, delegates, dignitaries and other visitors while conducting activities at United Nations Headquarters, offices away from Headquarters and regional commissions and while attending special events hosted by the United Nations at external locations.

Strategy

- 34.21 To contribute to the objective, the subprogramme will continue to provide strategic coordination and management of the security and safety services, as well as operational guidance and technical supervision with regard to security risk management, physical security, close protection, crisis management, fire safety, recruitment, training and oversight of security and safety projects, at the locations mentioned in paragraph 34.20.
- 34.22 The above-mentioned work is expected to result in:
- (a) Safe and secure access of delegates, staff and visitors to United Nations premises and external special events;
 - (b) Smooth delivery of United Nations mandates and programmes at United Nations premises and external special events.

Programme performance in 2022

Safety of delegates and personnel safeguarded at United Nations premises and external United Nations conferences

- 34.23 The United Nations returned to normal operations in 2022. The subprogramme responded to the latest phase of the return to the office by re-establishing all its operational posts at United Nations Headquarters, offices away from Headquarters and regional commissions in order to meet the requirements of providing secure access and a safe working environment for staff and delegates to perform their functions. The subprogramme also supported security operations for external United Nations conferences.
- 34.24 Progress towards the objective is presented in the performance measure below (see table 34.2).

Table 34.2
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Critical staff and delegates safely and securely accessed the eight United Nations premises during the COVID-19 pandemic	United Nations staff and delegates were able to access the eight United Nations premises safely and securely during the COVID-19 pandemic Access to in-person events was limited, on an as-required basis	United Nations staff and delegates safely resumed full activities at all eight United Nations premises External United Nations conferences resumed without any significant security incidents while allowing for higher participation than pre-pandemic levels. The largest external conference, the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, held in Egypt, recorded significant increases in participation of 32 per cent and 77 per cent, respectively, compared with the previous two events, namely the twenty-sixth and twenty-fifth sessions

Planned results for 2024

Result 1: improved security and safety support to persons with disabilities attending United Nations events

Programme performance in 2022 and target for 2024

- 34.25 The subprogramme’s work, in coordination with organizations of persons with disabilities and host countries, contributed to improved access conditions for persons with disabilities to conferences and events at duty stations, which met the planned target.
- 34.26 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 34.3).

Table 34.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Limited special procedures and access points for persons with disabilities in place	Improved access control arrangements and reasonable accommodations for persons with disabilities for conferences at all duty stations	Improved access conditions for persons with disabilities for conferences and events at duty stations	Access and accommodation of persons with disabilities are improved at all duty stations through the implementation of new access control design, technologies and procedures	Peer review assessment indicates an improvement in access conditions for persons with disabilities at all duty stations and for all external conferences and special events held at venues outside the duty stations

Result 2: safety and security of United Nations staff, delegates and premises during critical incidents

Programme performance in 2022 and target for 2024

- 34.27 The subprogramme’s work contributed to increased preparedness for an adequate and effective response to critical incidents, which met the planned target.
- 34.28 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 34.4).

Table 34.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	United Nations first responders have access to improved and updated training, with practical exercises and a victim-centred approach	Increased preparedness for an adequate and effective response to critical incidents	Enhanced knowledge and skills of security staff and improved coordination with host countries in the response to critical incidents	All partners participate in joint security operation exercises with host country law enforcement and emergency services agencies in real-life scenarios A peer evaluation assesses joint security operations as having an adequate level of preparedness and effectiveness to respond to critical incidents, including initial response time and incident resolution timelines

Result 3: delegates and participants experience a uniform and consistent approach to security- and safety-related matters for conferences and special events held at external venues

Proposed programme plan for 2024

- 34.29 The subprogramme is responsible for providing security and safety services for conferences and special events held at external venues. The subprogramme works with host countries to advise them of requirements and undertake risk assessments, including capability requirements, for conferences and special events.

Lessons learned and planned change

- 34.30 The lesson for the subprogramme was that, while the security and safety services have provided security support to external conferences and special events, there has often been an inconsistency in the approach to the joint security operation with the host country law enforcement and emergency services, which has resulted in an inconsistent standard of service. In applying the lesson, the subprogramme will, regardless of the hosting venue, develop systems to create a uniform and consistent approach to security- and safety-related matters for United Nations conferences or special

events. The subprogramme plans to review the minimum operating standards for the provision of security and safety services at external venues and develop a training programme and operations manual for all event security coordinators to ensure consistency in the approach across all events and venues.

34.31 Expected progress towards the objective is presented in the performance measure below (see table 34.5).

Table 34.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Delegates receive security and safety services, including collection of credentials and physical security screening, according to the expertise and experience of the event security coordinator and interaction with the host country security counterpart	Review and establishment of minimum operating security and safety standards to ensure consistency in the approach to services provided for physical security screening and the collection of credentials in line with the benchmarks established at Headquarters	The length of time for the collection of credentials and for security screening at all conferences and special events held at external venues does not exceed the benchmarks established at Headquarters

Deliverables

34.32 Table 34.6 lists all deliverables of the subprogramme.

Table 34.6
Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Safety and security: security and access control for approximately 6 million people per year at United Nations Headquarters, offices away from Headquarters and regional economic and social commissions; security for approximately 74 United Nations special events and conferences held away from United Nations premises; approximately 9,000 close protection operations for senior United Nations officials and visiting dignitaries; 2,600 security incident investigations; 2,400 fire safety checks.

Subprogramme 2 Field operations

Objective

34.33 The objective, to which this subprogramme contributes, is to ensure the safety and security of personnel and the security of United Nations premises and assets in the United Nations field duty stations to enable the implementation of United Nations mandates, programmes and activities worldwide.

Strategy

- 34.34 To contribute to the objective, the subprogramme will:
- (a) Provide operational security support for United Nations field programme delivery and field programme personnel through effective and timely security coordination and advice;
 - (b) Provide consistent operational guidance for field operations in the preparation for and management of security crises;
 - (c) Deploy security professionals in a rapid and timely fashion to countries, missions and areas affected by crisis situations and security contingencies;
 - (d) Conduct security assessment missions to field locations for the purpose of reviewing and assessing local security management processes and procedures;
 - (e) Conduct regional workshops and global conferences for all the Department's senior field security professionals for the purpose of sharing operational best practices and lessons learned and ensuring consistent security management practices and procedures;
 - (f) Develop its capacity to capture and analyse data and deliver analytical products that are useful for security decision makers when evaluating courses of action.
- 34.35 The above-mentioned work is expected to result in:
- (a) Improved effectiveness and relevance of security risk management processes;
 - (b) Enhanced capacity to enable humanitarian programmes to be carried out in high-risk environments, in line with the United Nations goal to stay and deliver;
 - (c) Enhanced security risk management capacity of security decision makers;
 - (d) Enhanced and streamlined security management measures in the field.

Programme performance in 2022

United Nations response and programme delivery maintained during crises

- 34.36 The subprogramme enabled the United Nations to continue to deliver its critical mandates, programmes and activities across the globe, including in areas characterized as being at high and very high levels of risk. The trajectory of global trends over 2022 highlighted multiple crises across different regions that had to be managed simultaneously, with increasing momentum and complexity. The subprogramme deployed its crisis management expertise and surge support in response to such crises, where the capacity was unavailable or insufficient, to enable the continued delivery of United Nations programmes. The crises were of varying natures, including hostage incident management, election security, security analysis, response to natural disasters and the conduct of humanitarian operations. For example, through the deployment of surge officers, the subprogramme provided increased security management support based on changing and increased requirements for Afghanistan, Ethiopia, the Niger, Ukraine and Yemen.
- 34.37 Progress towards the objective is presented in the performance measure below (see table 34.7).

Table 34.7
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
United Nations programme delivery remained in place through timely support during crisis situations, with 47 surge deployments to 18 countries	United Nations personnel worldwide had access to COVID-19 vaccinations and Member States had access to vaccinations facilitated by the United Nations, as requested United Nations programme delivery remained in place through the understanding of specific risks, the identification of threats and the provision of support during crisis situations, with 55 surge deployments to 15 countries	United Nations programme delivery remained in place through greater agility and a targeted response to crises by managing operational risks, with 90 surge deployments to 26 States

Result 1: a more responsive security risk management for the United Nations

Programme performance in 2022 and target for 2024

- 34.38 The subprogramme’s work contributed to enhanced security risk management, with 86 per cent of security risk management reviews approved, which did not meet the planned target of 90 per cent. The target was not met owing to the unforeseen increased complexity of the review process.
- 34.39 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 34.I).

Figure 34.I
Performance measure: percentage of approved security risk management reviews (annual)

Result 2: enhanced security decision-making through timely and relevant data and analytical information

Programme performance in 2022 and target for 2024

- 34.40 The subprogramme’s work contributed to enhanced security decision-making by security personnel through access to structured information, segregating facts from analytical judgments, with clear meaning and significance for programme delivery, including in high-risk and kinetic environments such as in Haiti, where analytical products provided a detailed assessment of kidnapping risks and allowed for a focused response, which met the planned target.

34.41 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 34.8).

Table 34.8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	A total of 317 security personnel (120 from the Department of Safety and Security and 197 from the United Nations security management system) enhanced their knowledge and skills in the use of security threat information	Enhanced security decision-making by security personnel through access to structured data and analytical information, segregating facts from analytical judgments, with clear meaning and significance for programme delivery, including in high-risk and kinetic environments, such as in Haiti, where analytical products provided a detailed assessment of kidnapping risks and allowed for a focused response	Decision makers have timely and relevant security data and analytical information	Decision makers have access to a more rapid and agile security threat information cycle for analysis and dissemination through targeted data access and streaming technology, tailored for regional differences

Result 3: improved coherence and consistency of security management processes and procedures to better enable United Nations operations across field operations globally

Proposed programme plan for 2024

34.42 Through its regional desks, the subprogramme is responsible for: (a) the daily coordination of security operations conducted by the Department’s field offices and staff in more than 125 States; and (b) preparing for, preventing and responding to all security incidents in the field. The subprogramme has established several ways to provide security-related assistance, including security assessment visits and workshops that impart knowledge and guidance while ensuring leadership and oversight over the full range of security areas. However, during the pandemic there were limited security assistance visits to duty stations. The subprogramme also provides daily security coordination with the field and operational guidance and security advisories to all United Nations personnel deployed to field duty stations.

Lessons learned and planned change

34.43 The lesson for the subprogramme was that remote assistance provided to designated security areas during the pandemic, though important, did not adequately meet the diverse and specific needs at the level previously provided. For example, the added value of security assistance visits to duty stations as well as of in-person workshops for security professionals was recognized and demonstrated in 2022. In applying the lesson, the subprogramme will focus on in-person security assistance visits and assessments and similar activities to heighten targeted assistance to enhance security risk management. The subprogramme will roll out regional workshops and security

assistance visits with a focus on security planning, gender-sensitive approaches to security operations and mainstreaming best practices.

34.44 Expected progress towards the objective is presented in the performance measure below (see table 34.9).

Table 34.9
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Field operations adopted recommendations related to risk mitigation measures, such as in Somalia, where United Nations operations mainstreamed security analysis and operational responses into programming and budgeting, as well as the availability of timely and up-to-date information to Member States	Strengthened local security management processes and procedures Local security decision makers use improved tools to forecast emerging trends, which inform security management processes and procedures in order to maintain programme delivery	Improved coherence and consistency of security management processes and procedures deployed by field operations globally Field operations more readily identify indications of possible emerging security threats to United Nations programme delivery through heightened and targeted assistance

Deliverables

34.45 Table 34.10 lists all deliverables of the subprogramme.

Table 34.10
Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Safety and security: approximately 15 security assessment visits as well as security services and surge deployments in response to emergencies; approximately 600 security risk management reviews; approximately 360 records per month entered into the Safety and Security Incident Recording System; approximately 5,000 premises records maintained in the premises database; workshops and training on crisis management/preparedness, analysis, security management, leadership and best practices for key security personnel of United Nations security management systems.

Subprogramme 3 Partnerships and specialized support

Objective

34.46 The objective, to which this subprogramme contributes, is to ensure the safety and security of United Nations operations, premises and personnel and to improve the efficiency and effectiveness of the security operations and security management system of the United Nations.

Strategy

34.47 To contribute to the objective, the subprogramme will:

- (a) Implement an information management strategy to provide the United Nations security management system with the operational backbone required for efficient, data-driven approaches and to build and manage business processes and technology, including such solutions as a protective services management tool, electronic travel advisory, staff list management, learning management system, critical incident stress data management system and road safety management system;
- (b) Provide leadership, coordination and oversight for safety and security training, including analysis, design, development, implementation, monitoring, evaluation and validation, on physical security, close protection, resilience-building, operational safeguarding training, and policies and procedures of the United Nations security management system, among other topics;
- (c) Increase and diversify strategic partnerships with regional and global networks in the field of close protection expertise with the intention of benchmarking and aligning United Nations protective services to international best practices;
- (d) Provide leadership and coordination for a rapid psychosocial support response in the aftermath of critical incidents and collaborate with the United Nations system and external partners to build the psychological resilience of United Nations security management system personnel;
- (e) Develop physical security guidelines, standards and technical specifications and undertake physical security assessments of United Nations system premises worldwide, in order to identify vulnerabilities and recommend solutions.

34.48 The above-mentioned work is expected to result in:

- (a) Effective prevention of and response to security incidents by United Nations security management system actors;
- (b) Effective management of risks for the movement of senior United Nations officials;
- (c) Mitigation of the short- and long-term psychological impact of exposure to critical incidents on United Nations security management system personnel;
- (d) Reduction of physical security risks to United Nations premises and personnel;
- (e) Reduction of road crash fatalities for United Nations security management system personnel.

Programme performance in 2022

United Nations security management system personnel have access to psychosocial support and resilience training throughout the pandemic despite operating challenges

34.49 The subprogramme provides critical incident stress management support and resilience-building for United Nations security management system personnel. In the 2020–2021 period, there was a 50 per cent increase in demand for psychosocial support services driven by the COVID-19 pandemic and multiple complex emergencies that had an impact on security management system personnel and their dependants. The challenges and demand continued in 2022, including field-based capacity constraints. Throughout the pandemic, information technology was used for psychosocial support services in the preparation for and response to critical incident stress, which allowed for ease of outreach in difficult locations, including those affected by pandemic-related restrictions, and increased outputs in terms of training and stress counselling. The resilience of security managers was enhanced by providing training to 189 security managers on stress prevention and management. In addition, the subprogramme supported the capacity development of 103 United Nations Secretariat field counsellors through technical supervision and coaching, and 1,405 managerial

consultations were carried out to support United Nations managers dealing with critical incidents affecting their teams.

34.50 Progress towards the objective is presented in the performance measure below (see figure 34.II).

Figure 34.II

Performance measure: access of United Nations security management system personnel to stress counselling and resilience training

Planned results for 2024

Result 1: improved physical security awareness through the United Nations security management system

Programme performance in 2022 and target for 2024

- 34.51 The subprogramme’s work contributed to physical security awareness by reaching 791 personnel of agencies, funds and programmes through nine physical security webinars on specific security topics, and 35 personnel of agencies, funds and programmes through four physical security training courses. The planned target of eight webinars with 560 participants was exceeded, and the planned participation of 70 personnel of agencies, funds and programmes in five physical security training courses was not achieved because of the subprogramme’s contributions to operational field requirements.
- 34.52 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 34.III).

Figure 34.III
Performance measure: number of physical security training courses and webinars, and trainees and attendees completing the courses (annual)

Result 2: improved management and strategic use of information and data to inform security services across the United Nations security management system

Programme performance in 2022 and target for 2024

- 34.53 The subprogramme’s work contributed to improved data accessibility and enhanced information-sharing across the United Nations security management system by consistently implementing cloud-based solutions that enable centralized storage of data and files, facilitate collaboration across teams and provide data visualization capabilities (e.g. PowerBI and an enhanced United Nations Security Managers Information Network), which met the planned target.
- 34.54 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 34.11).

Table 34.11
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
-	-	Improved data accessibility and enhanced information-sharing across the United Nations security management system through technological solutions	Security professionals have access to relevant data and information for decision-making	Security professionals have access to new information management tools, enabling decision-making informed by up-to-date and tailored data

Result 3: security personnel certified to enable programme delivery with an acceptable level of risk

Proposed programme plan for 2024

- 34.55 To enable safe operations in the United Nations system, the subprogramme provides safety and security training programmes to all security personnel, managers with security responsibilities and United Nations system personnel at large. The subprogramme implemented the Department’s

learning strategy to upgrade courses to online and blended delivery formats, allowing for an increase in reach and more flexible delivery modes.

Lessons learned and planned change

- 34.56 The lesson for the subprogramme was that blended learning, which includes both a trainer and online components as well as multiple language options, can improve the effectiveness of security training outcomes. In response, all courses will be redesigned to enable blended learning, and translation into other languages will be prioritized along with the enhancement of local trainers’ skills and knowledge. The subprogramme is planning to launch the refocused security certification programme, targeting up to 3,000 professionals. The refocused programme will update the skills and knowledge of security personnel, including those in leadership positions, to ensure the consistency of security management advisories to decision makers and direct security support to United Nations personnel. It will be focused on applying technical knowledge in the areas of Security Coordination Officer roles and responsibilities, writing of security-related reports and communications, security risk management, physical security, security planning and crisis/critical incident management. Additional courses focusing on multiple target audiences will be developed to support security management.
- 34.57 Expected progress towards the objective is presented in the performance measure below (see figure 34.IV).

Figure 34.IV

Performance measure: number of security personnel certified to provide precise and effective security management advice, enabling programme delivery with an acceptable level of risk (cumulative)

Deliverables

- 34.58 Table 34.12 lists all deliverables of the subprogramme.

Table 34.12

Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory

E. Enabling deliverables

Safety and security: emotional first aid and psychosocial support for United Nations security management system personnel; stress management training for personnel in field duty stations; technical supervision sessions for United Nations field counsellors; expert advice and consultations on psychosocial well-being for managers in the field and at Headquarters; briefings on the management of stress and critical incident stress for security managers; dedicated assessments of the physical security of United Nations premises globally; topical guidance, physical security training and analysis of data provided by the physical security assessment application; security training throughout the United Nations security management system; travel tracking and coordination of the movement of senior United Nations officials; planning and coordination with respective Missions; mandatory certification training for close protection officers.

B. Proposed post and non-post resource requirements for 2024

Overview

- 34.59 Given the dual responsibility of the Department of Safety and Security to provide for both the safety and security of staff, delegates and visitors at the main locations of the United Nations, as well as at their premises, and the safety and security of the United Nations system field operations, the activities of the Department are financed both from the regular budget and on a cost-sharing basis with other organizations covered by the security management system in the field.
- 34.60 The functions and activities of the Department that are jointly financed with other organizations of the security management system are those under:
- (a) Security and safety services (subprogramme 1);
 - (b) Field operations (subprogramme 2);
 - (c) Partnerships and specialized support (subprogramme 3);
 - (d) Programme support.
- 34.61 With regard to the jointly financed activities of the United Nations security management system, the financial responsibility of each participating organization is based on its proportional share of the personnel operating in the field. The principles of the cost-sharing arrangement were adopted by the General Assembly in its resolution [56/255](#). Following the recommendation of the Assembly, in its resolution [61/263](#), on achieving a workable cost-sharing arrangement, the High-level Committee on Management of CEB agreed that field-related security costs would be apportioned on the basis of actual percentages of staff according to data provided by CEB. Subsequently, the Secretary-General outlined revised cost-sharing arrangements for the cost of the United Nations security management system (see [A/62/641](#)). In October 2021, the High-level Committee on Management endorsed a revision of the cost-sharing arrangement (see CEB/2021/HLCM/FB/5), effective from 2023, which, while preserving the principles adopted by the Assembly in its resolution [56/255](#), updated the membership fee, which had not been changed since its establishment; addressed the principle of equitability by having all organizations pay a membership fee and reinforced the notion of shared ownership for the system; and ensured that organizations in countries of the Organisation for Economic Co-operation and Development pay their fair share of the security costs.
- 34.62 Based on the cost-sharing arrangement, the Secretariat share for security and safety services is 17.0 per cent for 2024, which is based on the CEB field staff census as at 31 December 2022, compared with 16.8 per cent for 2023, which was based on the census as at 31 December 2021. The level of resources proposed for 2024 for the jointly financed activities of the United Nations security management system presented in this budget fascicle reflects the recommendations of the Finance and Budget Network of the High-level Committee on Management. As the budget methodology of the vast majority of United Nations system entities does not accommodate further increases due to recosting, the level of resources recommended by the Network already takes into account increases due to anticipated inflation, as determined by the Network. These proposed resources will therefore not be subject to further recosting.
- 34.63 In addition to the jointly financed field activities described above, separate local cost-sharing arrangements govern the provision of security and safety services at the United Nations Office at Vienna, as well as other duty stations. The cost-sharing arrangements in Vienna are based on a formula agreed upon by the four organizations located at the Vienna International Centre; similarly, the cost-sharing arrangements at the other duty stations are agreed upon locally by the participating organizations. The Secretariat share for security and safety services at the United Nations Office at Vienna is 23.2 per cent for 2024, compared with 23.0 per cent for 2023. Those security and safety services relate to subprogramme 1.

Note: The following abbreviations are used in tables and figures: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); LL, Local level; NPO, National Professional Officer; SS, Security Service; USG, Under-Secretary-General.

Section 34 Safety and security

34.64 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 34.13 to 34.15. Similarly, the proposed gross budget for jointly financed activities is reflected in tables 34.16 to 34.20. The gross jointly financed budget of the Department is also presented to the General Assembly for its consideration and approval in accordance with established practice.

Resource requirements for regular budget activities

34.65 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 34.21 to 34.23 and figure 34.V.

34.66 As reflected in tables 34.21 (1) and 34.22 (1), the overall resources proposed for 2024 amount to \$127,237,300 before recosting, reflecting a net increase of \$284,600 (or 0.2 per cent) compared with the appropriation for 2023. Resource changes result from three factors, namely: (a) technical adjustments; (b) new mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

 (Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes (regular budget)

Technical adjustments

34.67 As reflected in table 34.21 (1), resource changes reflect a net increase of \$197,000, as follows:

- (a) **Executive direction and management.** The increase of \$97,800 reflects the higher provision for one post of Programme Management Officer (P-4) established in 2023 pursuant to General Assembly resolution [77/262](#), which was subject to a 50 per cent vacancy rate in accordance with the established practice for the costing of new posts;
- (b) **Subprogramme 1, Security and safety services.** The net decrease of \$554,900 includes:
 - (i) A decrease of \$587,400 under other staff costs (\$22,200) and grants and contributions (\$565,200), relating to the removal of non recurrent provisions in 2023 in support of:
 - a. Security personnel requirements for the renovation of the Africa Hall at the Economic Commission for Africa in Addis Ababa (\$331,900) and the replacement of blocks A to J at the United Nations Office at Nairobi (\$233,300), pursuant to Assembly resolution [77/263](#) (parts IX and XII) (the related resource requirements for 2024 will be presented later in the year as part of the progress reports on the construction projects);
 - b. Overtime for security personnel for the resumed fifth session of the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction, pursuant to Assembly resolution [77/248](#) (\$22,200);
 - (ii) An increase of \$32,500 under grants and contributions, due to a higher Secretariat percentage share (23.2 per cent for 2024 compared with 23.0 per cent for 2023) in the cost of the jointly financed activities at the United Nations Office at Vienna;
- (c) **Subprogramme 2, Field operations.** An increase of \$335,600 under grants and contributions, relating to a higher Secretariat percentage share (17.0 per cent for 2024 compared with 16.8 per cent for 2023) in the cost of the jointly financed field security operations, based on the CEB field staff census as at 31 December 2022;
- (d) **Subprogramme 3, Partnerships and specialized support.** The increase of \$318,500 includes:
 - (i) An increase of \$296,800 under posts, relating to the higher provision for three posts (one Director (D-2), one Programme Officer for road safety (P-4) and one Associate Information Management Officer (P-2)) established in 2023 pursuant to Assembly resolution [77/262](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for new posts;
 - (ii) An increase of \$21,700 under grants and contributions, relating to a higher Secretariat percentage share (17.0 per cent for 2024, compared with 16.8 per cent for 2023) in the cost of the jointly financed field security operations, based on the CEB field staff census as at 31 December 2022.

New mandates

34.68 As reflected in table 34.21 (1), resource changes reflect an increase of \$37,300 under subprogramme 1. The increase of \$37,300 under other staff costs reflects overtime costs for security personnel in support of the Summit of the Future, on the theme “Multilateral solutions for a better tomorrow”, to be held in New York in 2024, pursuant to General Assembly resolution [76/307](#).

Other changes

- 34.69 As reflected in table 34.21 (1), resource changes reflect a net increase of \$50,300, which reflects the regular budget share of 17 per cent of an increase of \$295,500 of the overall budget for jointly financed activities, as follows:
- (a) **Executive direction and management.** The decrease of \$517,500 is attributable to the cost-neutral outward redeployment of resources to subprogramme 3, as follows:
 - (i) A decrease of \$498,900 under posts, relating to the proposed outward redeployment of four posts (1 P-5, 1 P-3, 1 P-2 and 1 (General Service (Other level))) from the Strategic Planning Service to the Strategic Partnerships and Policy Section under subprogramme 3, offset partially by the inward redeployment of one P-3 post from subprogramme 3 to the Strategic Planning Service, as explained in annex III;
 - (ii) A decrease of \$18,600 under travel of staff, relating to the associated travel requirements in respect of the proposed outward redeployment of the four posts mentioned in paragraph 34.69 (a) (i) above;
 - (b) **Subprogramme 1, Security and safety services.** The cost-neutral redeployment of \$818,700 from other staff costs to posts, reflecting the proposed conversion of 12 general temporary assistance positions (5 General Service (Other level)) and 7 Local level) to established posts, as explained in annex III;
 - (c) **Subprogramme 2, Field operations.** The decrease of \$187,100 under grants and contributions corresponds to the Secretariat share of the proposed decrease in resources for jointly financed field operations under subprogramme 2, as explained in paragraph 34.70 (a) below;
 - (d) **Subprogramme 3, Partnerships and specialized support.** The increase of \$517,500 is attributable to the cost-neutral inward redeployment of resources from executive direction and management, as explained in paragraph 34.69 (a) above;
 - (e) **Programme support.** The increase of \$237,400 reflects the Secretariat share of the proposed increase in resources for jointly financed field security operations, as explained in paragraph 34.70 (b) below.

Overall resource changes (jointly financed activities)**Other changes**

- 34.70 As reflected in table 34.17, resource changes reflect a net increase of \$295,500. This increase reflects: (a) a net decrease of \$370,200 resulting from the abolishment of five Local level posts and the establishment of five National Professional Officer posts, the reduction of the level of programme support costs paid to the United Nations Development Programme (UNDP) made possible by the enhancement of the support architecture in the Executive Office of the Department of Safety and Security, and the establishment of six temporary positions in support of security risk management; and (b) an increase of \$665,700 for adjustments in line with the level of resources recommended by the Finance and Budget Network for 2024, as further explained below:
- (a) Subprogramme 2, Field operations. The decrease of \$1,097,100 includes:
 - (i) A net increase of \$450,200 under posts, as follows:
 - a. A net decrease of \$215,500 reflects the planned abolishment of five Local level posts, offset partially by the planned establishment of five new National Professional Officer posts at a vacancy rate of 50 per cent, as explained in annex III;
 - b. An increase of \$665,700 reflects adjustments taking into account higher salary costs due to anticipated inflation, as determined by the Finance and Budget Network. As a result, these resources will no longer be subject to recosting;

- (ii) An increase of \$1,005,400 under other staff costs to provide for six temporary positions (4 P-4 and 2 P-3) in the Threat and Risk Assessment Service and in support of security risk management in Vienna, Bangkok, Kampala, Amman and New York, to strengthen the capacity to capture and analyse data and deliver analytical products for security decision makers, for emergency responses and crisis situations in high-risk environments, and to improve the effectiveness and relevance of security risk management processes;
 - (iii) A decrease of \$2,552,700 under grants and contributions reflects the reduced level of programme support costs paid to UNDP as a result of a reduced scope of services rendered, which are now limited to location-dependent general administrative services in the Department's field-based offices, following the enhancement of the support architecture in the Executive Office referred to in para 34.70 (b) below and the transition of the administration of all field staff from UNDP to the United Nations Secretariat;
- (b) **Programme support.** An increase of \$1,392,600 under other staff costs would provide for nine general temporary assistance positions (1 P-4, 4 P-3, 1 General Service (Principal level) and 3 General Service (Other level)) in the Executive Office for all location-independent services related to human resources administration, the managed reassignment programme for Professional and higher categories and the Field Service category, finance and budget, and general administration services in 128 countries with 241 duty stations.

Other assessed and extrabudgetary resources

- 34.71 As reflected in tables 34.21 (2) and 34.22 (2), other assessed resources under the support account for peacekeeping operations amount to \$3,850,400. The resources would enable the Department to provide backstopping security support to peacekeeping missions. The expected decrease is attributable to updated salary costs, in particular higher vacancy rates, offset in part by the proposed establishment of one Programme Management Officer (P-4) post for psychosocial support.
- 34.72 As reflected in tables 34.21 (3) and 34.22 (3), extrabudgetary resources amount to \$15,199,400. The resources would complement regular budget resources and would be used mainly to provide security services to other agencies and organizations in various locations and special events within and surrounding the premises.
- 34.73 The extrabudgetary resources under the present section are subject to the oversight of the Department, which has delegated authority from the Secretary-General.

Executive direction and management

- 34.74 The Under-Secretary-General for Safety and Security is responsible for the overall direction, supervision and management of the Department in the implementation of its mandates and its approved programme of work. The Under-Secretary-General is the Chair of the United Nations security management system and is assisted in the internal functioning and day-to-day management of the Department by the Assistant Secretary-General.
- 34.75 In managing the Department, the Under-Secretary-General is supported by the Strategic Planning Service, which is responsible for strategic planning and risk management, strategic communications, gender and inclusivity, corporate governance, evaluation, compliance monitoring, lessons learned, best practices and innovation. Together, these areas enable the dissemination and implementation of a results-based focus across the Department, in line with United Nations mandates, objectives and values at the global and country levels.
- 34.76 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Department is integrating environmental management practices into its operations. In 2024, the Department will continue to enhance the

electronic security risk management tools to facilitate the electronic review and approval of security plans and documents.

34.77 Information on the timely submission of documentation and advance booking for air travel is reflected in table 34.24.

34.78 The Department will continue to make efforts to implement advance travel planning and the early nomination of travellers. In the event of rapid security surge redeployment and close protection-related travel, the Department will work more closely with the travel unit and the agent to reserve tickets in advance on the basis of a preliminary itinerary. Despite an improvement in compliance in 2022 compared with 2020 and 2021, the low compliance rate in 2022 was attributable primarily to rapid security surges in volatile security environments, which made advance planning challenging.

Table 34.24
Compliance rate
(Percentage)

	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Actual 2022</i>	<i>Planned 2023</i>	<i>Planned 2024</i>

Air tickets purchased at least 2 weeks before the commencement of travel	36	31	44	100	100

34.79 The proposed regular budget resources for 2024 amount to \$2,866,000 and reflect a decrease of \$419,700 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 34.67 (a) and 34.69 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 34.25 and figure 34.VI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

34.82 Extrabudgetary resources for this subprogramme amount to \$14,554,600. The resources would complement regular budget resources and would be used mainly to provide security services to other agencies and organizations in various locations and special events within and surrounding the premises.

**Subprogramme 2
 Field operations**

Regular budget resource requirements

34.83 The proposed regular budget resources for 2024 amount to \$23,537,800 and reflect an increase of \$148,500 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 34.67 (c) and 34.69 (c). Additional details on the distribution of the proposed resources for 2024 are reflected in table 34.28.

Table 34.28

Total	22 650.9	23 389.3	335.6	–	(187.1)	148.5	0.6	23 537.8	

Note: Resources include the Secretariat share for 2024 of jointly financed activities relating to regional field security operations, amounting to \$23,040,600, and the United Nations share of the malicious acts insurance policy, amounting to \$497,200.

Resource requirements for jointly financed activities

34.84 The proposed jointly financed resources for 2024 amount to \$138,960,800 and reflect a decrease of \$1,097,100 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 34.70 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 34.29 and figure 34.IX.

Note: Non-post resources include a provision for the malicious acts insurance policy in the amount of \$3,795,400 for 2024. The Secretariat share of jointly financed activities and the malicious acts insurance policy amounts to \$23,537,800 for 2024.

Figure 34.IX

Subprogramme 2: distribution of proposed resources for 2024 (jointly financed activities)

(Number of posts/thousands of United States dollars)

Other assessed resources

34.85 Other assessed resources for the subprogramme are estimated at \$3,850,400 and would enable the Department to provide backstopping security support to peacekeeping missions.

Subprogramme 3 Partnerships and specialized support

Regular budget resource requirements

34.86 The proposed regular budget resources for 2024 amount to \$4,334,500 and reflect an increase of \$836,000 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 34.67 (d) and 34.69 (d). Additional details on the distribution of the proposed resources for 2024 are reflected in table 34.30 and figure 34.X.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

34.88 Extrabudgetary resources for the subprogramme are estimated at \$644,800. These resources would complement regular budget resources and would be used mainly for the close protection officer certification programme and the Safe and Secure Approaches in Field Environments training.

Programme support

Regular budget resource requirements

- 34.89 The Executive Office provides central administrative services to the Department in the areas of human resources, financial management and general administration.
- 34.90 The proposed regular budget resources for 2024 amount to \$3,512,900 and reflect an increase of \$237,400 compared with the appropriation for 2023. The proposed increase is explained in paragraph 34.69 (e). Additional details on the distribution of the proposed resources for 2024 are reflected in table 34.32 and figure 34.XII.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/77/7)

The Advisory Committee therefore recommends that the General Assembly request the Secretary-General to update his bulletin on the organization of the Department of Safety and Security so as to bring it into line with existing mandates and to provide clarification to the Assembly on the related roles and responsibilities of the Department of Safety and Security, the Department of Operational Support and other relevant entities at the time of its consideration of the report and in the context of the next budget submission (para. XII.9).

The Department of Safety and Security is working internally to update the Secretary-General's bulletin on the organization of the Department. The bulletin will be finalized following consideration by the General Assembly of the Department's reorganization and the consolidation of the partnerships and policy functions in the Division of Specialized Operational Support, presented in the proposed programme budget for 2024.

Regarding the division of labour related to road and aviation safety, as well as on staff counselling, the Department of Safety and Security has been actively engaging with the Department of Operational Support to that ensure there is no overlap and to promote synergy.

It should be noted that the Department of Safety and Security is not the lead United Nations entity on occupational safety and health issues, as this is a system-wide effort under the High-Level Committee on Management's occupational safety and health mechanism, comprising all United Nations entities, including Secretariat departments such as the Department of Safety and Security, the Department of Operational Support and the Department of Management Strategy, Policy and Compliance, as well as United Nations agencies, funds and programmes. The Division of Health-Care Management and Occupational Safety and Health is the Secretariat's lead entity for health-related services in New York and in over 100 locations worldwide.

The role of the Department of Safety and Security on aviation and road safety is focused on the development and review of policy guidance and on supporting the entities in the United Nations Secretariat and, broadly, the United Nations security management system and system-wide efforts. On aviation safety, the Department's functions are performed in close collaboration with aviation safety work in the Department of Operational Support.

Section 34 **Safety and security**

Brief description of the recommendation

Action taken to implement the recommendation

Given the prolonged period of the general temporary assistance positions in question, the Advisory Committee trusts that the Department will address the related requirements in a sustainable way and will provide an update in the context of the next budget submission (para. XII.16).

The Advisory Committee trusts that an updated breakdown of cost-recovery income will be routinely provided in all future programme budget submissions (para. XII.28).

The roles and responsibilities of the Department of Safety and Security on road safety are in line with relevant General Assembly resolutions on road safety, including resolution [74/299](#).

The Department has initiated a detailed review of all temporary positions. As a result, those functions identified as providing long-term critical functions and of a continuing nature are initially being proposed for conversion to established posts while the review continues in 2024.

Information on actual cost-recovery income will be provided in the context of the financial performance report on the programme budget for 2022.

Annex III

Summary of post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Regular budget				
Executive direction and management	(1)	P-5	Redeployment of 1 Chief Security Officer	<p>The Department of Safety and Security completed the review of its internal structures, with a focus on service delivery and harnessing synergies, including grouping complementary roles and functions. The Department proposes that the partnerships and policy functions be consolidated in the Division of Specialized Operational Support and rename it the Division of Partnerships and Specialized Support.</p> <p>The proposed redeployments are associated with the leadership role that the Department plays with regard to inter-agency coordination and liaison, in developing, updating and implementing system-wide security management policies and measures aimed at improving personnel security training and awareness. It will do so through the Inter-Agency Security Management Network, its steering group and its working groups, thus ensuring effective cooperation and collaboration among United Nations departments, organizations, funds, programmes and affiliated international organizations that are part of the United Nations security management system. With the redeployed posts, the Strategic Partnerships and Policy Section of the Division of Partnerships and Specialized Support would carry out various tasks such as focusing on issues related to policies and guidance for the United Nations security management system, striving to enhance collaboration and support for field security professionals, focusing on policy coordination on security and other related strategic issues in various United Nations inter-agency and interdepartment mechanisms and promoting and coordinating strategic partnerships within the United Nations Secretariat and with other entities in the United Nations system, regional organizations, other multilateral institutions and Member States.</p> <p>Together with other functions under executive direction and management, the inward redeployment of 1 post of Programme Management Officer for evaluation and compliance monitoring would provide support to the management to enable the dissemination and implementation of a results-based focus across the Department.</p>
	(1)	P-3	Redeployment of 1 Security Coordination Officer	
	(1)	P-2	Redeployment of 1 Associate Security Officer	
	(1)	GS (OL)	Redeployment of 1 Staff Assistant	
	1	P-3	Redeployment of 1 Programme Management Officer	
Subprogramme 1 Security and safety services	7	LL	Conversion of 7 temporary positions (1 Sergeant and 4 Security Officers in Bangkok; and 1 Team Assistant and 1 Electronic Engineering Technician in Santiago) to established posts	<p>The proposed conversion of 12 temporary positions to posts in the Security and Safety Services in Bangkok, New York and Santiago would provide long-term stability in the execution of essential functions in support of 24/7 security and safety operations in the respective duty stations. The proposed conversion is also consistent with the recommendation contained in para. XII.16 of the report of the Advisory Committee on Administrative and Budgetary Questions (A/77/7), given the long-term nature of the functions performed by the incumbents of these positions as follows.</p>
	5	GS (OL)	Conversion of 5 temporary positions of Team Assistant to established posts in New York	

Section 34 Safety and security

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
				<p>The security-related positions (6 Local level) in Bangkok (1 Sergeant and 4 Security Officers) and in Santiago (1 Electronic Engineer Technician) are critical to monitoring and overseeing all elements of the physical and technical security systems in place. Personnel assigned to these functions at the Security Control Centre provide first-hand command and control support to security officers on the ground and are the point of contact with host country law enforcement and emergency response agencies for all security incidents and engagements at the United Nations premises.</p> <p>The 6 Team Assistant positions in the Pass and Identification Offices in New York (5 General Service (Other level)) and Santiago (1 Local level) perform functions that are required on a full-time basis to provide the minimum coverage at the Offices on regular operations. The incumbents provide badging services to all clients at United Nations Headquarters and the Economic Commission for Latin America and the Caribbean, including for all meetings, conferences and events. They work in a sensitive environment and are entrusted with handling confidential information, having access to data, equipment and supplies required for the issuance of passes.</p>
Subprogramme 3 Partnerships and specialized support	1	P-5	Redeployment of 1 Chief Security Officer	An explanation is provided under executive direction and management.
	1	P-3	Redeployment of 1 Security Coordination Officer	
	1	P-2	Redeployment of 1 Associate Security Officer	
	1	GS (OL)	Redeployment of 1 Staff Assistant	
	(1)	P-3	Redeployment of 1 Programme Management Officer	
Jointly financed activities				
Subprogramme 2 Field Operations	5	NPO	Establishment of 5 Security Coordination Officer posts	<p>The planned establishment of 5 National Professional Officer posts will strengthen national capacity-building and national execution of United Nations programmes and help to support greater self-reliance, together with the empowerment and promotion of the local labour force.</p> <p>In countries in which national security institutions are present, where threats to United Nations personnel are related mainly to criminality, security support for the United Nations security management system can be provided by National Professional Officers. These posts will enable the Department to utilize professionals from the country with the right level of education, expertise and access to the host country authorities at the appropriate level. The use of staff in National Professional Officer posts will be limited to functions that have a national content and would allow the Department to gain specialized knowledge of the security environment, host country methods, technologies and systems as well as the national language(s), culture and institutions, thereby positively transforming and strengthening the Department's capacity to perform liaison and coordination functions with officials of the Government as well as national political actors and interlocutors.</p>

Part XII **Safety and security**

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
	(5)	LL	Abolishment of 5 Field Security Assistant posts	The planned abolishment of 5 Local level posts is due mainly to the suitable level of security experience required in countries with a predominant threat profile that requires extensive work with local authorities and representation at the National Professional Officer level to liaise with host country government officials as well as national political actors and interlocutors.

Abbreviations: GS (OL), General Service (Other level); LL, Local level; NPO, National Professional Officer.

* [A/78/50](#).

** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

Foreword

The 28 Development Account projects proposed in the present fascicle are guided by the overall theme of “Supporting Member States in developing and implementing policies for accelerating the Sustainable Development Goals for transformational change, resilience and just transitions addressing the economic and social aftermath of ongoing crises and shocks while ensuring that no one is left behind”.

Since mid-2022, the world has been facing several simultaneously ongoing crises, including a triple crisis on food, energy and finance that threatens the economies of many developing countries and is posing challenges to Member States and affecting their ability to make progress on the 2030 Agenda for Sustainable Development, the Sustainable Development Goals and the promise of leaving no one behind. By the end of 2022, the Development Account Steering Committee had decided that the Development Account should also support Member States in addressing the economic and social aftermath of this crisis. Therefore, seven projects have been developed on this aspect. These projects are longer-term in nature, build on the comparative advantages of the entities and are executed jointly by several entities.

Partnerships are essential for the implementation of the Development Account, and all projects include partnerships between the Account’s 10 implementing entities, as well as with other partners both within and outside the United Nations system, including resident coordinator offices and United Nations country teams.

The present fascicle reflects the mandates entrusted to the Secretariat and recommendations received from intergovernmental processes.

(Signed) Li Junhua
Under-Secretary-General for Economic and Social Affairs

A. Overall orientation

Mandates and background

- 35.1 The Development Account was established in 1997 by the General Assembly in its resolution [52/12 B](#) as a mechanism to fund capacity development projects of the economic and social entities of the United Nations, namely, the Department of Economic and Social Affairs of the Secretariat, the Economic Commission for Africa (ECA), the Economic Commission for Europe (ECE), the Economic and Social Commission for Asia and the Pacific (ESCAP), the Economic and Social Commission for Western Asia (ESCWA), the Economic Commission for Latin America and the Caribbean (ECLAC), the United Nations Conference on Trade and Development (UNCTAD), the United Nations Environment Programme (UNEP), the United Nations Human Settlements Programme (UN-Habitat) and the United Nations Office on Drugs and Crime (UNODC). All projects funded through the Account build on the mandates and the comparative advantages of the 10 implementing entities.
- 35.2 The Development Account supports developing countries in their implementation of the 2030 Agenda for Sustainable Development in response to expressed needs and demands from Member States, and supports the recommendations and decisions made during intergovernmental processes and by the relevant governing bodies of the implementing entities.
- 35.3 The General Assembly, in its resolution [77/262](#), endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions, in paragraph XIII.12 of its first report on the proposed programme budget for 2023 ([A/77/7](#)), to request the Secretary-General to present in the next budget submission options for the funding modalities for the Development Account for future budget submissions, aimed at reaching a resource level not less than 0.5 per cent of the overall budget proposal, taking into account the evolution of the resources of the Account since its inception, and to ensure that the Account meets its purpose and objectives, as well as the needs of the Member States. These options are presented in annex IV.

Strategy

- 35.4 The Development Account provides its 10 mostly non-resident implementing entities with the ability to operationalize their vast knowledge and expertise to deliver capacity development support to selected countries, providing a bridge between the normative and analytical expertise of Headquarters and the development of sustainable capacities in developing countries. With the support of the Account, the implementing entities can follow up on intergovernmental processes and their analytical work with concrete projects at the country, subregional, regional and global levels. Under the overarching theme of the sixteenth tranche, “Supporting Member States in developing and implementing policies for accelerating the Sustainable Development Goals for transformational change, resilience and just transitions addressing the economic and social aftermath of ongoing crises and shocks while ensuring that no one is left behind”, 28 proposed projects (see annex I) are spread across all regions (see figure 35.II), supporting all the Sustainable Development Goals (see figure 35.III) and often supporting countries with special needs (see figure 35.I). Seven of the projects under the sixteenth tranche aim at jointly addressing issues stemming from the crises in food, energy and finance. In total, the sixteenth tranche includes 14 projects that will be jointly executed by Development Account entities. Furthermore, partnerships continue to be essential to all projects, including collaboration within and outside of the United Nations system, and critical cross-cutting issues such as gender and disability will be included throughout the projects.
- 35.5 As noted above, most of the proposed projects of the sixteenth tranche support countries with special needs, namely, least developed countries, landlocked developing countries and small island developing States. Figure 35.I shows the number of projects supporting countries with special needs. These numbers are likely to increase as implementing entities finalize the beneficiary countries of their projects. Some projects are focused specifically on these groups of countries, such as the project

on innovation and digital government transformation in the Caribbean small island developing States (project J), which focuses specifically on small island developing States, and the project on finance and investments for climate action while ensuring debt sustainability in Asia-Pacific countries in special situations (project Y), which focuses on all three categories of countries with special needs.

Figure 35.I
Projects supporting countries with special needs^a

^a Projects can have beneficiary countries from multiple groups, and some countries with special needs can belong to two groups.

35.6 Figure 35.II illustrates how the proposed projects of the sixteenth tranche are spread across different regions. While projects are proposed for all regions of the world, Africa continues to have the highest number of proposed projects, as in previous tranches.

Figure 35.II
Number of projects by geographical area^a

^a One project can contribute to more than one region.

- 35.7 Since mid-2022, the world has been facing several simultaneously ongoing crises, including those on food, energy and finance, which threaten the economies of many developing countries. Rising food and energy prices and tightened financial conditions have significant effects on their own, but the crises in these three areas also feed into each other with devastating effects. The economic and social implementing entities of the Development Account have expertise, mandates and comparative advantages in many of these areas and have, therefore, come together to develop seven joint project proposals in response to this triple crisis. The proposals have been developed through the joint efforts of several implementing entities and will focus on one or more regions of the world. The seven projects include capacity development for sustainable and resilient food supply chains (project C), energy security and resilience (project D), sustainable production and the use of the critical raw materials for low-carbon transitions (project E), finance and investment for energy transition (project B), innovative financing instruments for climate action and sustainable development (project G), urban economic resilience-building for responses and recovery from disasters (project F) and strengthening social protection policies to advance socioeconomic recovery from the triple crisis (project A). In addition to these seven projects, several of the other proposed projects of the sixteenth tranche also focus on issues related to the triple crisis, for example, resilience to food and energy crises (project Z), sustainable and inclusive energy transition (project X), tax-avoidance (project H), sustainable finance and investment (project L) and finance and investments for climate action while ensuring debt sustainability (project Y).
- 35.8 In line with the theme of the tranche, several of the proposed projects focus on innovation and transformational change, for example, innovation and digital government transformation (project J), industrial policy for transformational change (project M), innovative digital trade (project T), transformational change through global services trade (project K) and innovative circular economy approaches to agricultural and municipal waste management for better air quality (project N). Several projects also directly focus on issues related to vulnerable groups, such as advancing care policies (project W), bridging social protection gaps (project AB), overcoming barriers to adequate housing for marginalized groups (project P), preparing urban areas for protracted displacement (project Q), strengthening the migration-development nexus (project S), promoting equality and creating opportunities for future generations (project AA) and identifying and mitigating corruption risks (project R). In addition, several of the proposed projects focus on issues related to the climate, including green jobs for youth (project O), green, circular, resilient and high-quality public private partnerships in support of the Sustainable Development Goals (project U) and subregional cooperation to accelerate clean air policies (project V).
- 35.9 The proposed projects also contribute to all of the Sustainable Development Goals, as outlined in figure 35.III, with a notable number of projects contributing to Goal 17, on partnerships for the Goals, as well as Goal 10, on reducing inequalities, Goal 8, on decent work and economic growth, and Goal 1, on poverty.

Figure 35.III
Contribution of projects of the sixteenth tranche to the Sustainable Development Goals^a

^a One project can contribute to more than one goal.

35.10 Whenever relevant, all projects of the sixteenth tranche will integrate cross-cutting issues, such as gender, disability, human rights and the environment, throughout their planning and implementation, from the analysis of the issues being addressed by the projects to the contexts in which the projects will be implemented and the design of project activities and monitoring plans. In addition to all projects being designed and implemented with these issues in mind, several projects in the tranche focus on these topics more specifically. For example, project W focuses on strengthening capacities to design and implement care policies that recognize, reduce and redistribute unpaid care work while rewarding and representing paid care work, thus facilitating women’s economic inclusion. Project A focuses on building capacity to establish gender-sensitive, crisis-responsive social protection policies and programmes. Other projects, including projects Q, J and AB, pay particular attention to women and girls or vulnerable groups more broadly, including households headed by women. Projects AA and J focus on equality and inclusion across multiple groups, including persons with disabilities. Several projects have a focus on the environment, including projects V and N, which focus on clean air policies and their related effects on ecosystems and human health, as well as circular economy approaches to agricultural and municipal waste management for better air quality. In addition, projects Y, U and O aim at addressing climate change by catalysing finance and investments for climate action, developing public-private partnerships that guarantee respect for human rights and protect the planet, and strengthening policies for green jobs for youth in Africa and Latin America and the Caribbean.

35.11 Partnerships are essential to the implementation of Development Account projects. All proposed projects will be implemented with partners from the United Nations Secretariat and the wider United Nations system, including resident coordinator offices and United Nations country teams, as well as governments and national, regional and international organizations. This helps to ensure that Development Account projects leverage the comparative strengths of both national and international partners to better achieve transformational change, respond to identified national needs while avoiding duplication of work, and work alongside national and local governments and organizations to strengthen their capacity throughout project implementation.

35.12 As illustrated in figure 35.IV, all projects will be implemented in partnership with other entities within the United Nations system, including the resident coordinator offices. The number of partnerships is likely to further increase as projects are finalized following the General Assembly's consideration and approval of the present budget fascicle and the projects proposed therein.

Figure 35.IV
Partnerships in Development Account projects^a

^a One project can partner with multiple partners.

35.13 In addition to the partnership arrangements described above, 14 of the proposed projects of the sixteenth tranche will be led jointly by multiple Development Account entities, including all 7 of the triple crisis projects. Joint projects build on natural areas of synergy and cooperation between Development Account entities and involve a more extensive partnership between entities, whereby each of the joint implementing entities is responsible for the delivery of specific deliverables and receives a part of the total project budget. Entities work jointly throughout the project cycle, from the design of the project to its implementation, as well as throughout the reporting, monitoring and evaluation phases. These projects also include the formation of a steering committee comprising representatives from all entities that meets throughout the project life cycle to facilitate dialogue and cooperation, resolve any issues that arise, facilitate the monitoring of project performance and ensure that the projects are efficient and effective in achieving results at the country level. Since joint projects require a more work-intensive governance structure and coordination, they are only undertaken in areas where there is a clear advantage to doing so and where the combined efforts of the entities will equal more than the sum of their parts. The table in annex I provides further details on which projects will be jointly implemented.

Evaluation activities

35.14 Evaluation has become an increasingly essential component of the Development Account programme management function. The findings and recommendations of the evaluation of the tenth tranche Programme on Statistics and Data, the first programme-level evaluation of the Development Account, have aided in strengthening the processes and procedures in place to support the effective planning, monitoring and evaluation of projects, particularly with regard to joint projects with a large budget.

- 35.15 The application of the Development Account project evaluation guidelines has been promoted through the issuance of supplementary guidance notes, tools and analyses. The Development Account evaluation focal points network, consisting of the evaluation units of the 10 implementing entities, has maintained regular communication through virtual meetings and email, discussing critical issues pertaining to the evaluation function and exchanging lessons learned and good practices. The project evaluation template developed in consultation with the network in late 2021 and piloted with the evaluations of the projects of the eleventh tranche has been revised for use with the evaluation of the projects of twelfth tranche, incorporating feedback from network members.
- 35.16 Starting with the fourteenth tranche, half of the projects from each tranche will be selected for evaluation at their midpoints (after two years of implementation) on the basis of the strategic importance and relevance to the entities' mandates, pressing knowledge gaps and/or potential for replication or scaling up. Guidance will be issued in late 2023 to guide the selection process. An amount of \$636,700, representing approximately 4 per cent of the overall value of the proposed projects, would provide for external project- and programme-level evaluations and relevant activities. A synthesis of the tenth and eleventh tranche project evaluation findings related to the response to the coronavirus disease (COVID-19) pandemic is planned for mid-2023. Along with the results of the five joint COVID-19 projects, one of which was completed in 2022, while the remaining four are still under implementation, the findings of the synthesis will inform the Development Account's response to future global crises.
- 35.17 Considering the criticality and long-term nature of the evaluation function in supporting the continuous improvements to the management of the Development Account and the implementation of projects, the general temporary assistance position of Evaluation Officer (P-4), currently funded under the Development Account, is proposed to be converted to an established post under section 9, Economic and social affairs, of the proposed programme budget for 2024. All current Development Account-related management posts are funded under section 9 (1 P-5, 1 P-4 and 1 P-2). The conversion of the temporary position of Evaluation Officer (P-4) to an established post under section 9 would ensure the continuity and sustainability of functions, including: (a) the development of guidelines and tools, and the provision of support for project evaluations; and (b) the conduct of programme-level evaluations and the syntheses of project evaluation results.

B. Proposed resource requirements for 2024

35.18 As reflected in table 35.1, the overall resources proposed for 2024 amount to \$16,286,700 before recosting, taking into account the conversion and redeployment of an Evaluation Officer (P-4) to section 9, Economic and Social Affairs, as described in paragraph 35.17. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor

Other changes

35.19 As reflected in table 35.1, resource changes reflect a decrease of \$204,600 resulting from the proposed conversion of the general temporary assistance position of Evaluation Officer (P-4) to an established post under section 9, Economic and social affairs, of the proposed programme budget for 2024, as explained in paragraph 35.17 above and further explained in the budget fascicle for section 9.

Multi-year account

35.20 The General Assembly, in its resolution [54/15](#), decided to establish a multi-year account for the Development Account. The resources proposed for the Account for 2024 are for the implementation of the projects over a four-year period (2024–2027). Within the multi-year account, the breakdown of resource requirements by object of expenditure for the sixteenth tranche of projects is presented in table 35.2.

Table 35.2
Summary of resource requirements by object of expenditure (before recosting)

(Thousands of United States dollars)

Object of expenditure	Amount
Other staff costs	670.4
Consultants	6 167.2
Travel of staff	2 280.4
Contractual services	2 171.9
General operating expenses	1 386.6
Grants and contributions	3 610.2
Total	16 286.7

- 35.21 Development Account projects are designed to provide the efficient and effective use of resources. The resource requirements are based on concept notes, which provide project descriptions and initial plans for project implementation. After the General Assembly’s review of the proposed budget by the end of 2023, the implementing entities will launch projects based on project documents that include detailed analyses, deliverables, timelines and budgets and will complete the identification of beneficiary countries.
- 35.22 Other staff costs (general temporary assistance) represent approximately 4 per cent of the total budget and are used for short-term needs to carry out the activities of the projects, such as organizing workshops and data collection.
- 35.23 Given that the implementing entities are mostly non-resident in the project beneficiary countries and that all projects have country-level activities, travel of staff is required for projects, representing an average of 14 per cent of the total resources. While all projects are required to include an e-learning component, and incorporating such elements is useful for maximizing efficiencies and broadening outreach, these tools cannot replace all face to-face delivery modalities in their effectiveness.
- 35.24 The projects typically utilize national consultants to support project implementation at the national level, as well as for collating and exchanging national and regional best practices. International consultants are often required for projects involved in new subject areas, which require expertise that may not be available within the country or the implementing entity. As shown in table 35.3, the proposed resources for the sixteenth tranche include 114 international consultants for a total of 429 work-months, at an estimated cost of \$3.2 million, and 125 national consultants for a total of 459 work-months, at an estimated cost of \$2.2 million.

Table 35.3
Summary of consultancy requirements^a

<i>Type of consultant</i>	<i>Number of consultants</i>	<i>Number of work-months</i>	<i>Cost (thousands of United States dollars)</i>
International	114	429	3 244.4
National	125	459	2 215.2
Total	239	888	5 459.6

^a This figure does not include the cost of consultant travel.

- 35.25 Contractual services are used to engage national and local institutions or organizations to assist with the implementation of national components of the projects, including studies, local pilots, consultations and workshops. They also often include elements of capacity development for the institutions and organizations themselves. Venue rentals, conference service costs and communications costs associated with workshops, training events, seminars or expert group meetings typically fall under the general operating expenses category.
- 35.26 The costs of workshop participants (travel and allowances), under grants and contributions, represent on average 22 per cent of the project budgets. Projects typically use national workshops for training, coordination and consensus-building. Most projects also include a smaller number of regional workshops, which are typically used for South-South cooperation and the sharing of lessons learned between the project beneficiary countries. Regional and interregional workshops are often used to share the findings with larger audiences and are often organized in connection with other intergovernmental meetings or events to reduce costs.
- 35.27 Project deliverables fall under four general categories, as detailed in table 35.4. These deliverables are expected to have a strong focus on the national level, to help to ensure national ownership and prioritization of national processes and institutions. They are also expected to focus on different capacity development aspects (e.g. skills, institutions and an enabling environment) for increased and sustainable impact.

Table 35.4
Summary of deliverables (2024–2027 plan)

<i>Quantified deliverables: B. Generation and transfer of knowledge</i>		<i>Non-quantified deliverables: C. Substantive deliverables</i>	
<i>Seminars, workshops and training events (number of days for all projects)</i>	<i>Technical materials (number of materials for all projects)</i>	<i>Consultation, advice and advocacy (number of projects including these deliverables)</i>	<i>Databases and substantive digital materials (number of projects including these deliverables)</i>

Annex I

Projects proposed for funding from the Development Account (for the period 2024–2027)

Proposed projects and objectives

Implementing entities, partnerships and budgets

Triple crisis projects

- | | |
|---|--|
| <p>A. National social protection policies and capacities to respond to the triple crisis in Africa and Asia and the Pacific</p> <p><i>Objective:</i> To build national capacities for establishing sustainable, effective social protection systems and measures, and to build robust, gender-sensitive and crisis-responsive social protection policies and programmes that advance socioeconomic recovery from the triple crisis in Africa and Asia and the Pacific</p> | <p>The Department of Economic and Social Affairs, ECA and ESCAP jointly and in collaboration with resident coordinator offices (\$500,000)</p> |
| <p>B. Attracting finance and investment for the energy transition in Africa</p> <p><i>Objective:</i> To strengthen the capacities of the beneficiary countries in Africa to design and implement strategies to increase international private financing and investment in renewable energy in support of energy transition</p> | <p>UNCTAD and the Department of Economic and Social Affairs jointly and in collaboration with resident coordinator offices (\$500,000)</p> |
| <p>C. Harnessing trade policy and transport and logistics to build sustainable and resilient food supply chains in the Caribbean and the Middle East and North African regions</p> <p><i>Objective:</i> To strengthen the capacities of countries in the Caribbean and the Middle East and North African regions to leverage trade policy measures and harness transport and logistics to be better prepared for and respond to supply chain disruptions and build sustainable and resilient food supply chains</p> | <p>UNCTAD, ECLAC and ESCWA jointly and in collaboration with resident coordinator offices (\$500,000)</p> |
| <p>D. Energy security and resilience through energy transition</p> <p><i>Objective:</i> To strengthen the capacity of selected countries to build resilient and sustainable energy systems and enhance their energy security</p> | <p>ECE, ESCAP and ECLAC jointly and in collaboration with ESCWA, ECA and UNCTAD and resident coordinator offices (\$375,000)</p> |
| <p>E. Sustainable production, use and reuse of critical raw materials for low-carbon transitions</p> <p><i>Objective:</i> To enhance the capacity of selected countries to achieve sustainable and circular low-carbon transitions in producing, using and reusing critical raw materials</p> | <p>ECE and ESCAP jointly and in collaboration with ESCWA, ECLAC and ECA and resident coordinator offices (\$375,000)</p> |
| <p>F. Urban economic resilience for inclusive response and recovery from crises</p> <p><i>Objective:</i> To strengthen the capacity of local governments in selected countries to design, implement and monitor sustainable, resilient and inclusive economic and financial responses to crises</p> | <p>ECE, ECA, ESCWA, ESCAP and ECLAC jointly and in collaboration with UN-Habitat, the Department of Economic and Social Affairs and resident coordinator offices (\$375,000)</p> |

G. Innovative financing instruments for sustainable development in Arab States, Africa and Latin America and the Caribbean

Objective: To enhance the capacity of policymakers in selected Member States towards strengthening their access to innovative financing instruments for sustainable development in response to the triple crisis of food, energy and climate in Arab States, Africa and Latin America and the Caribbean

ESCWA, ECA and ECLAC jointly and in collaboration with resident coordinator offices (\$375,000)

Projects led by the Department of Economic and Social Affairs

H. Identifying and addressing vulnerabilities to aggressive tax-avoidance in developing countries

Objective: Strengthening capacity of developing countries to identify and address vulnerabilities to aggressive tax-avoidance

The Department of Economic and Social Affairs, ECA, ECLAC and ESCAP jointly and in collaboration with UNCTAD and resident coordinator offices (\$750,000)

I. Strengthening capacity for evidence-based policymaking: using innovative data sources and methods to formulate policies for responding to global crises in fuel, food and finance

Objective: To increase the capacity of selected least developed countries, landlocked developing countries and small island developing States in Africa, Asia and the Pacific and Latin America and the Caribbean to produce and use non-traditional data to formulate and implement evidence-based policies to mitigate the impacts of the food, fuel and finance crises and achieve the Sustainable Development Goals

The Department of Economic and Social Affairs in collaboration with ESCAP, ECA and resident coordinator offices (\$650,000)

J. Innovation and digital government transformation in the Caribbean small island developing States

Objective: To enhance the capacities of government officials in selected Caribbean small island developing States to promote digital transformation and innovation for better public service delivery leaving no one behind

The Department of Economic and Social Affairs and ECLAC jointly and in collaboration with resident coordinator offices (\$500,000)

Project led by the United Nations Conference on Trade and Development

K. Strengthening capacity for evidence-based policymaking and the economic resilience of CARICOM

Objective: To strengthen the capacity and data infrastructure of selected CARICOM member States to improve their evidence-based policymaking for increased resilience and transformational change via global services

UNCTAD in collaboration with ECLAC and resident coordinator offices (\$600,000)

L. Strengthening sustainability reporting to foster sustainable finance and investment in selected developing countries in Asia and Latin America

Objective: To strengthen the capacity of selected developing countries in Asia and Latin America to reinforce their sustainability reporting infrastructure to promote sustainable finance and attract investment geared towards the Sustainable Development Goals

UNCTAD in collaboration with UNEP, ESCAP, ECLAC and resident coordinator offices (\$600,000)

M. Regional integration and industrial policy for transformational change and resilience in Latin America

UNCTAD in collaboration with ECLAC and resident coordinator offices (\$600,000)

Objective: To strengthen the design of industrial policy and economic and productive integration between selected economies in Latin America, improve coordination on industrial and trade policy, and ultimately contribute to structural transformation, economic recovery and inequality reduction in the continent

Projects led by the United Nations Environment Programme

N. Innovative circular economy approaches to agricultural and municipal waste management for better air quality in Asia and the Pacific and the Western Balkans

UNEP in collaboration with ECE, ESCAP and resident coordinator offices (\$560,000)

Objective: To promote policy solutions for circularity and sound agricultural and municipal waste management for improved urban air quality and resilience to health, economic and social shocks in selected beneficiary countries in Asia and the Pacific and the Western Balkans

O. Strengthening policies and capacities for green jobs for youth in Africa and Latin America and the Caribbean

UNEP in collaboration with ECA, ECLAC and resident coordinator offices (\$560,000)

Objective: To enhance capacities of governments to develop and implement just transition policies and initiatives supporting green job creation and skills development for youth, especially women, in selected countries in Africa and Latin America and the Caribbean

Projects led by the United Nations Human Settlements Programme

P. Overcoming barriers to adequate housing for marginalized groups in cities in Eastern Europe and Central Asia with evidence-based approaches to housing policy

UN-Habitat and ECE jointly and in collaboration with resident coordinator offices (\$560,000)

Objective: To enhance the municipal capacities of selected countries in Central Asia and Eastern Europe to improve access to adequate housing for marginalized groups, including refugees, migrants, internally displaced persons, returnee and host-community households.

Q. Promoting a multi-scaled territorial approach to better prepare urban areas in the Sahel for protracted displacement

UN-Habitat in collaboration with UNODC and resident coordinator offices (\$560,000)

Objective: To strengthen regional, national and local capacities for strategic urban/spatial planning in selected countries in the Sahel to better prepare urban areas for protracted displacement

Projects led by the United Nations Office on Drugs and Crime

R. Identifying and mitigating corruption risks to strengthen peacebuilding efforts in Africa

UNODC in collaboration with resident coordinator offices (\$560,000)

Objective: To strengthen the capacity of three countries in Africa to assess and manage corruption risks

Projects led by the Economic Commission for Africa

S. Strengthening the migration-development nexus in Africa
Objective: To enhance national capacities of selected countries to develop evidence-based policies and actions that mainstream migration’s contribution to sustainable development
 ECA in collaboration with the Department of Economic and Social Affairs and resident coordinator offices (\$750,000)

T. Innovative digital trade under the African Continental Free Trade Area for promoting food security and agricultural value chains in Africa
Objective: To strengthen the capacity of selected African countries to use digital trade innovations to improve food security and agricultural value chains under the African Continental Free Trade Area
 ECA in collaboration with UNCTAD and resident coordinator offices (\$600,000)

Projects led by the Economic Commission for Europe

U. Green, circular and resilient public-private partnerships in support of the Sustainable Development Goals for transformational change in Africa, Central Asia, Europe and Latin America and the Caribbean
Objective: To strengthen the capacity of public officials in selected Member States to develop and implement green, circular, resilient and high-quality public-private partnership projects in line with the Sustainable Development Goals
 ECE, ECLAC and ECA jointly and in collaboration with resident coordinator offices (\$750,000)

V. Accelerated clean air policies in Eastern Europe and the Caucasus
Objective: To strengthen the capacities of selected countries in Eastern Europe and the Caucasus to accelerate clean air policies for positive impacts on climate, biodiversity, public health and the economy
 ECE and UNEP jointly and in collaboration with resident coordinator offices (\$500,000)

Projects led by the Economic Commission for Latin America and the Caribbean

W. Advancing care policies for transformative recovery in Latin America and the Caribbean, Asia and the Pacific and the Arab States
Objective: To strengthen capacities of governments in Latin America and the Caribbean, Asia and the Pacific and the Arab States to develop and implement comprehensive care policies that recognize, reduce and redistribute unpaid care work
 ECLAC, ESCAP and ESCWA jointly and in collaboration with resident coordinator offices (\$750,000)

X. Sustainable and inclusive energy transition in Latin America and the Caribbean
Objective: To strengthen national capacities of selected developing countries of Latin America and the Caribbean to elaborate policies, strategies and plans to accelerate energy transition in support of affordable, reliable, sustainable and modern energy for all (Sustainable Development Goal 7)
 ECLAC in collaboration with resident coordinator offices (\$600,000)

Projects led by the Economic and Social Commission for Asia and the Pacific

Y. Catalysing finance and investments for climate action while ensuring debt sustainability in Asia-Pacific countries in special situations

ESCAP in collaboration with the Department of Economic and Social Affairs and resident coordinator offices (\$600,000)

Objective: To enhance the capacity of selected countries in the Asia-Pacific region to mobilize climate finance and foreign direct investment from public and private sources to meet nationally determined contributions, while ensuring debt sustainability

Z. Building disaster and climate resilience to food and energy crises in Asia and the Pacific

ESCAP in collaboration with resident coordinator offices (\$600,000)

Objective: To build capacity of selected countries in the Asia-Pacific region to better manage the increasing and shifting variability of climate and disaster risks in food and energy systems to build long-term resilience

Projects led by the Economic and Social Commission for Western Asia

AA. Promoting equality through youth inclusion and development of small and medium-sized enterprises in Arab and African States

ESCWA in collaboration with ECA, UNCTAD and resident coordinator offices (\$500,000)

Objective: To promote equality through youth inclusion and small and medium-sized enterprise development in Arab and African States

AB. Bridging the social protection gaps in the Arab and African regions

ESCWA and ECA jointly and in collaboration with resident coordinator offices (\$500,000)

Objective: To strengthen the capacity of countries in the Arab and African regions to identify social protection needs and gaps, and to design, adapt and implement policies and programmes to close these gaps

Abbreviations: CARICOM, Caribbean Community; ECA, Economic Commission for Africa; ECE, Economic Commission for Europe; ECLAC, Economic Commission for Latin America and the Caribbean; ESCAP, Economic and Social Commission for Asia and the Pacific; ESCWA, Economic and Social Commission for Western Asia; UNCTAD, United Nations Conference on Trade and Development; UNEP, United Nations Environment Programme; UN-Habitat, United Nations Human Settlements Programme; UNODC, United Nations Office on Drugs and Crime.

Annex II

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee recommends that the General Assembly request the Secretary-General to present in the next budget submission options for the funding modalities for the Development Account for future budget submissions, aiming to reach a resource level not less than 0.5 per cent of the overall budget proposal, taking into account the evolution of the resources of the Account since its inception, and to ensure that the Account meets its purpose and objectives, as well as the needs of the Member States. The Committee also notes that, when the level of resources of the Account compared with the overall budget is assessed to be reducing, the Assembly may consider maintaining or increasing the resources up to the appropriate level, on the basis of previous trends (para. XIII.12).

The Advisory Committee notes the capacity-building benefits of the use of national consultants and trusts that more efforts will be made to increase such use compared with international consultants. The Committee trusts that updated information on the use of national and international consultants will continue to be included in future budget submissions (para XIII.21).

The Advisory Committee, once again, considers that there is a need to rationalize the resources requirements for travel through efficiencies and more reliance on online tools and local experts, with a view to dedicating more of these resources to the funding of the Development Account's sustainable projects (para. XIII.23).

The Advisory Committee trusts, once again, that the Secretary-General will ensure transparency in the selection of countries and projects and will develop an outreach programme, including the dissemination of information on projects to countries with special needs in line with the Sustainable Development Goals, and including close coordination with, among others, the United Nations Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and the Small Island Developing States, the Office of the Special Adviser on Africa and the resident coordinator system, to allow for the formulation of demands by the Member States. The Committee recommends that the General Assembly request the

These options are presented in annex IV.

Information on the use of national and international consultants is provided in paragraph 35.24 of the present report.

Information on the resources requirements for travel is provided in paragraph 35.23 of the present report.

The Development Account is a funding mechanism for capacity development of 10 entities of the United Nations Secretariat. Projects are implemented in areas where the entities have clear mandates, comparative advantages and demand from Member States. In the different thematic areas, the entities normally have close contact with Member States and are aware of their needs and demands and have mechanisms for outreach.

As presented in figure 35.I of the present report, countries with special needs are a strong focus of all projects, and the selection of those countries will continue to be emphasized when project documents are prepared and during the actual implementation.

Brief description of the recommendation

Secretary-General to undertake an assessment of the areas of possible cooperation and coordination with those entities to identify where more efforts need to be made, and to provide an update in his next budget submission (para. XIII.30).

Action taken to implement the recommendation

An assessment was conducted through a detailed survey with the relevant entities, the outcome of which is as follows.

In accordance with existing guidance, implementing entities are expected to work in close coordination with the resident coordinator system on all Development Account projects. Projects are formulated in response to requests from Governments or resident coordinators on behalf of the Government. In line with United Nations reform and its focus on country- and regional-level delivery of joint United Nations system assistance, some implementing entities have increased consultation with the resident coordinator system as part of project concept design and work with the system from the inception phase (e.g. during the formulation of the common country analysis and the related formulation of the United Nations Sustainable Development Cooperation Framework). These procedures are aimed at ensuring that resident coordinator offices are fully informed of the activities and projects funded under the Development Account taking place in their countries. Collaboration with the resident coordinator system on projects, however, differs slightly between Development Account implementing entities, as each entity has different coordination mechanisms in place, and is also dependent on whether or not the Development Account cycle coincides with the Cooperation Framework cycle.

Typically, throughout project implementation, country-level activities are coordinated with the help of resident coordinator offices, often with their active participation. In the early design stage of projects, project managers contact the resident coordinator offices to reaffirm demand, understand country-level needs and the capacities that already exist to address them, and inform the relevant resident coordinator of the project implementation plans and the planned national-level activities. During that process, the project manager may also consult the resident coordinator on potential partners (e.g. relevant ministries, other United Nations entities, civil society organizations, and initiatives) and identify synergies with other ongoing activities. Resident coordinator collaboration is also valuable in terms of coordinating meetings with resident United Nations entities to explore synergies in target countries and advise on the selection of United Nations country team partners for the project, as well as to coordinate the project's planned activities, such as the preparation of country-level inception workshops. Collaboration with resident coordinators is also sought to discover their views on the topics to be addressed by the project and insights

The Advisory Committee notes the distribution of resources among implementing entities of the Development Account and trusts that more information on the criteria applied to ensure a more equitable sharing of resources, including information on joint initiatives, will be provided in the next budget submission (para. XIII.31).

from target countries. Project managers may be required to make presentations to relevant resident coordinator offices and United Nations country teams on the project. After the approval of a Development Account project, the resident coordinator offices are informed about the roll out of its implementation.

Based on Development Account guidelines, implementing entities are requested to consult with the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States and the Office of the Special Adviser on Africa and review possible collaboration, if relevant, when preparing the project documents and implementing projects. Given the Office of the High Representative's mandate to advocate for, support, mobilize, coordinate and report on the implementation of the Doha Programme of Action for the Least Developed Countries, the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the SIDS Accelerated Modalities of Action (SAMOA) Pathway, entities are requested to review projects for possible cooperation and collaboration with the Office of the High Representative. The four key functional roles of the Office of the Special Adviser on Africa are to advise, advocate, coordinate and monitor, and, to a lesser extent, develop economic and social capacity. Given this, there are fewer areas where there is a close interlinkage. The Economic Commission for Africa has a close mandated relationship with the Office of the Special Adviser on Africa.

The funds available under each tranche of the Development Account are allocated to the 10 implementing entities, building on past practice, but also take several criteria into consideration. The implementing entities can broadly be categorized into two different groups: five regional entities and five global entities, with funds equally distributed between these two groups. While the distribution of projects remains relatively stable from tranche to tranche (with three Department of Economic and Social Affairs and United Nations Conference on Trade and Development projects each and two projects for all other implementing entities, except for the United Nations Office on Drugs and Crime, which usually has one project), key aspects – such as the priorities of Member States expressed in the intergovernmental negotiations, the strength of the individual project proposals put forward, the capacity of the implementing entities to deliver projects and the past performance of projects – are taken into account when deciding which projects to select. In the spirit of

The Advisory Committee recalls the need for further complementarity between the regular programme of technical cooperation and the United Nations Development Account and recommends that the General Assembly request the Secretary-General to conduct an assessment of the two mechanisms in order to maximize complementarity and impact of the projects, in particular at the local level, and ensure the efficient use of resources, in cooperation with the resident coordinator system (para. XIII.35).

delivering as one, around a quarter of the available funds each year are used for joint projects that are led by different entities. For the sixteenth tranche, as many as 14 of the 28 proposed projects are joint projects. This includes seven joint triple crisis project proposals. The lead entity for each project is indicated in annex I.

The Development Account and the regular programme of technical cooperation share the objective of providing coherent and focused capacity development support to Member States and advancing the implementation of the 2030 Agenda for Sustainable Development. Their programming and implementation approaches are, however, distinctly different. The Development Account funds medium-term interventions executed over a period of up to four years in response to requests from countries for specific development assistance. The regular programme of technical cooperation, on the other hand, funds specific short-term and small-scale interventions in response to requests from countries for urgent, and not easily predictable, national development assistance.

An assessment was conducted through a detailed survey with the relevant entities. It can be stated that, although approaches to safeguarding the linkages between the Development Account and the regular programme of technical cooperation differ between implementing entities, there is an integrated approach at the management level in all implementing entities to consider coherence. Implementing entities use the Development Account and regular programme funding complementarily to maximize impact in several different ways. Through the identification of synergies and areas of cooperation, coordination between the two programmes is ensured.

First, many Development Account projects are formulated based on earlier regular programme of technical cooperation interventions. Thus, the long-term impact and sustainability of initial intervention through the regular programme is ensured by longer-term project activities. Regular programme initiatives can lead to the formulation of Development Account projects when regular programme funding is used as seed funding for the development of Development Account projects. In other instances, requests from Member States for regular programme of technical cooperation projects are scaled up and transformed into Development Account projects. Second, the regular programme is sometimes used to implement project activities in additional countries after the

Brief description of the recommendation

Action taken to implement the recommendation

The Advisory Committee notes that the next two progress reports on the activities of the Development Account will be submitted biennially in 2023 and 2025, respectively, and that starting from 2026 the report will be submitted on an annual basis. The Committee trusts that the Secretary-General will include, in future budget submissions, information on guidelines and evaluation standards, progress of the evaluation activities and the status of implementation and impact of projects, including pilots (para. XIII.39).

closure of a Development Account project. At other times, Development Account projects give rise to additional country requests during the implementation of the project, which are responded to using funding from the regular programme.

Third, where Development Account project activities are successful and could be expanded but funds are a constraint, implementing entities have successfully mobilized regular programme of technical cooperation funds, and vice versa. This has allowed for results to be scaled up and interventions to be intensified through the provision of further capacity development support.

As a biennial progress report will be submitted for the seventy-eighth session of the General Assembly, the information on guidelines and evaluation standards, the progress of the evaluation activities and the status of implementation and impact of projects, including pilots, will be included in the progress report, complemented by information on the Development Account website.

Annex III

Mandates of the Development Account

The programme of work will continue to be guided by all mandates entrusted to it as detailed in the list below.

List of mandates

General Assembly resolutions

52/12 B	Renewing the United Nations: a programme for reform	74/270	Global solidarity to fight the coronavirus disease 2019 (COVID-19)
52/235 ; 53/220 A and B; 54/15 ; 56/237	Development Account		

Annex IV

Options for the funding modalities for the Development Account for future budget submissions

1. The General Assembly, in its resolution [77/262](#), endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions, in paragraph XIII.12 of its first report on the proposed programme budget for 2023 ([A/77/7](#)), to request the Secretary-General to present in the next budget submission options for the funding modalities for the Development Account for future budget submissions, aimed at reaching a resource level not less than 0.5 per cent of the overall budget proposal, taking into account the evolution of the resources of the Account since its inception, and to ensure that the Account meets its purpose and objectives, as well as the needs of the Member States. The Advisory Committee also noted that when the level of resources of the Account compared with the overall budget was assessed to be decreasing, the Assembly may consider maintaining or increasing the resources up to the appropriate level, on the basis of previous trends.

Background

2. In its resolution [52/12 B](#), the General Assembly decided to establish a Development Account to be funded from savings from possible reductions in administration and other overhead costs, without affecting the full implementation of mandated programmes and activities, and requested the Secretary-General to submit a detailed report by the end of March 1998 identifying the sustainability of this initiative, as well as the modalities of implementation, the specific purposes and the associated performance criteria for the use of such resource.
3. Subsequently, in its resolution [54/15](#), the General Assembly decided that savings to be achieved as a result of the efficiency measures could be identified in the context of budget performance reports and should be transferred to the Development Account section with the prior approval of the Assembly.
4. In this regard, realized savings, or underexpenditures, have been tracked and reported in the context of the performance reports on the programme budget. However, the Secretariat has not been in a position over the years to attribute such savings to “efficiency measures”, since multiple factors play a role when final expenditures are below the appropriation level, and each performance report justifies such variances by referring to the respective relevant factors. Ultimately, the decision on the transfer of savings to the Development Account has rested with the General Assembly, which, at its discretion, has provided additional resources for the Development Account, on both a recurrent and non-recurrent (one-time) basis, following its consideration of the second performance reports of past bienniums. The Assembly did so for the bienniums 2006–2007 and 2008–2009, although these amounts were not identified as efficiency gains. The Assembly has also provided additional resources for the Development Account in the context of its consideration of the Secretary-General’s proposed programme budgets, as it did for the budget years 2021 and 2022.
5. As a result, and as illustrated in the figure below, the level of the Development Account has shown a fluctuating and unpredictable pattern both as an absolute value and as a percentage of the overall programme budget.

Resources provided to the Development Account by budget period

Notes: For the biennium 2006–2007, the General Assembly, in its resolution 61/252, decided to appropriate for the Development Account an additional amount of \$2.5 million as an immediate exceptional measure towards addressing the lack of transfer of resources to the Account since its inception, and in its resolution 62/235 A, taking note of the second performance report of the Secretary-General on the programme budget for the biennium 2006–2007, decided to increase the appropriation for the Account by \$5 million (non-recurrent). The Assembly also decided in its resolution 60/246 that the Development Account should be recosted for the biennium 2006–2007.

For the biennium 2008–2009, the General Assembly, in its resolution 62/238, decided to appropriate for the Development Account an additional amount of \$2.5 million, and in its resolution 64/242 A, taking note of the second performance report of the Secretary-General on the programme budget for the biennium 2008–2009 (A/64/545), decided to increase the appropriation for the Account by \$7.5 million (non-recurrent).

For the biennium 2010–2011, the General Assembly, in its resolution 64/243, decided to appropriate an additional amount of \$5 million for the Account (the net reduction compared with 2008–2009 was due to the fact that the increase of \$7.5 million for 2006–2007 stemming from resolution 64/242 A was non-recurrent).

For the biennium 2012–2013, the General Assembly, in its resolution 66/246, decided to appropriate an additional amount of \$6 million for the Development Account.

In line with resolution 67/248 on the proposed programme budget outline for the biennium 2014–2015, the level of the Development Account proposed by the Secretary-General for 2014–2015 was reduced by \$844,400 and approved by the General Assembly in its resolution 68/248 A-C.

In its resolution 75/252, the General Assembly endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions, in its first report on the proposed programme budget for 2021 (A/75/7 and A/75/7/Corr.1), to increase the baseline of the Development Account by \$1 million, starting from the proposed programme budget for 2021, pending more sustainable funding.

In its resolution 76/245, the General Assembly decided to increase, on a non-recurrent basis, the Development Account for 2022 by \$1 million.

In its resolution 76/245, the General Assembly also endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions, in its first report on the proposed programme budget for 2022 (A/76/7 and A/76/7/Corr.1), to request the Secretary-General to recast the Development Account for the Assembly’s consideration in his next budget submission, pursuant to which, in its resolution 77/264 A-C, the Assembly appropriated an amount after the recosting of the Account and endorsed, in its resolution 77/262, the Advisory Committee’s conclusions and recommendations welcoming the recosting of the Development Account.

Assessment

- The Secretariat explored two approaches. The first was approach A, whereby the annual proposed amount for the Development Account under section 35 of the proposed programme budget would be equivalent to 0.5 per cent of the total proposed programme budget before recosting for the same

annual budget year, and would be reflected in the introduction to the respective report of the proposed programme budget (e.g. [A/77/6 \(Introduction\)](#)).

7. The amount indicated for the total proposed programme budget in the introduction to that report, which is submitted in May, would not take into account supplementary budget proposals in relation to new or expanded mandates that would be prepared later in the year, for example from the Main Committees or plenary sessions of the General Assembly, the Economic and Social Council or the Human Rights Council. These supplementary proposals are submitted by the Secretariat for consideration by the Fifth Committee, through the Advisory Committee on Administrative and Budgetary Questions, in the fall of each year in the form of reports on programme budget implications or revised estimates. As the respective new or revised mandates are issued and their related budgetary proposals are submitted until late November, there would not be enough time for the Secretariat to submit, and for the Committees to consider, a revised proposed budget level for the Development Account, including planned additional projects, as a percentage against the overall budget proposals including all add-on budget proposals.
8. This approach, however, would create a challenge for the preparation process of the Development Account budget proposal, as the Secretariat would not be able to determine the proposed level for the Development Account until all budget sections of the proposed programme budget were finalized, by mid-May. This would not allow for sufficient time to prepare and finalize the Development Account budget proposal, which includes a list of projects to be funded from the Account that are selected through a consultative process with all the implementing entities based on requests for assistance from Member States, taking into account the proposed level of the Account. This process takes between two and three months, from the start of the budget preparation process to the finalization of the budget fascicle for section 35.
9. The Secretariat therefore explored a second approach (approach B), whereby the annual proposed amount for the Development Account under section 35 of the proposed programme budget would be the equivalent of 0.5 per cent of the total approved regular budget of the preceding annual budget year, as contained in the resolution on budget appropriations of the respective main session (e.g. 0.5 per cent of the appropriations for 2023 contained in General Assembly resolution [77/264 A–C](#), less the appropriations for major construction projects, for the Development Account proposed for 2024). This approved overall budget amount would include the supplementary budgets approved by the General Assembly for new or expanded mandates at the end of the previous year. The amounts approved for the ongoing major construction projects would, however, be excluded, as these projects and related resources are by nature exceptional and limited in time (they are also not included under approach A, as the proposed budgets for major construction projects are supplementary budget proposals that are not part of the total proposed programme budget presented in the introduction to the report). This approach would allow the planning and budgeting process for the Development Account to start in January.
10. The Secretary-General also considered proposing a higher percentage for the Development Account than 0.5 per cent of the overall programme budget. However, in the absence of objective criteria for proposing another particular percentage, the Secretary-General considered that any such different percentage would have to be decided upon by the General Assembly.

Recommendation

11. The Secretariat recommends the second approach (approach B) outlined above for future budget submissions for the Development Account, by which its proposed level would be 0.5 per cent of the programme budget approved for the previous budget period, excluding resources appropriated for major construction projects, as outlined above. This approach would ensure that the level of the Account is based on an overall comprehensive programme budget, taking into account all approved supplementary budget proposals. The recommended approach would also provide for a more stable and predictable funding compared to the current situation, and would allow for more and adequate time to plan the projects to be funded by the Account, compared with approach A.

12. The amount proposed for the Development Account would be recosted, as is the practice for all other budget sections, in line with resolution [77/262](#), in which the General Assembly endorsed the Advisory Committee's conclusions and recommendations welcoming the recosting of the Development Account, the final impact of which would be reflected in the report of the Secretary-General entitled "Revised estimates: effect of changes in rates of exchange and inflation", for the consideration of the Assembly, in accordance with the established practice.
13. The table below shows what the level of the Development Account would have been each year since 1998 for the recommended approach B. For comparison purposes, the table also shows what the level of the Account would have been based on approach A. As shown in the table, over the past 12 years, including 2023, the amounts resulting from the approach recommended by the Secretariat (approach B) would have been slightly higher than the amounts under approach A. The exception would be 2022, when the General Assembly exceptionally approved significant resources as commitment authorities rather than appropriations, which would have had an impact on the level of the Account as calculated for 2023.

Item 139 of the preliminary list*

Proposed programme budget for 2024

Proposed programme budget for 2024

Part XIV Staff assessment

Section 36 Staff assessment

* [A/78/50](#).

Proposed post and non-post resource requirements for 2024

Overview

- 36.1 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in the table below.

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2022 expenditure	2023 appropriation	Changes				Total	Percentage	2024 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other				
Other	284 937.0	289 318.5	(6 477.5)	3 580.9	3 574.9	678.3	0.2	289 996.8	

- 36.2 In accordance with the established budgetary practice, provisions for staff assessment are made by applying the rates contained in regulation 3.3 of the Staff Regulations and Rules of the United Nations to the assessable emoluments of staff. The staff assessment amounts resulting from the application of such rates are consolidated under the present section, while the provisions for salaries are presented under other budget sections. The provisions for salaries represent the net amounts, while the gross amounts include the addition of staff assessment to the net salary provisions. The gross and net amounts related to each budget section are presented in the annex to the present document.
- 36.3 Amounts from staff assessment are credited up front to Member States to offset assessments for the budget period, with the exception of staff assessment credits withheld and credited to the Tax Equalization Fund for the reimbursement of taxes on emoluments of staff members, as envisaged in General Assembly resolution [973 \(X\) A](#). The amount proposed under the present section is also reflected under income section 1, Income from staff assessment ([A/78/6 \(Income sect.1\)](#)).
- 36.4 The overall resources proposed for 2024 amount to \$289,996,800 before recosting, reflecting a net increase of \$678,300 (or 0.2 per cent) compared with the appropriation for 2023. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes.

Explanation of variances by factor

Technical adjustments

- 36.5 As reflected in the table above, resource changes reflect a net decrease of \$6,477,500, resulting from the discontinuation of the non-recurrent resources under general temporary assistance, mainly related to Human Rights Council mandates and provisions in support of new and expanded mandates from the General Assembly, offset in part by the increase in staff assessment related to the 108 new and reassigned posts and positions approved pursuant to General Assembly resolutions [77/262](#) and [77/263 A](#), which were subject to a 50 per cent vacancy rate in 2023, and are now budgeted at continuing rates in accordance with the established practice for the costing of these posts and positions.

New and expanded mandates

- 36.6 As reflected in the table above, resource changes reflect an increase of \$3,580,900, which is attributable mainly to: (a) the proposed net increase of 121 posts and additional general temporary assistance provisions under various sections of the proposed programme budget for 2024; and (b) the

proposed net increase of 16 positions in special political missions, as explained in the respective budget reports.

Other changes

- 36.7 As reflected in the table above, resource changes reflect an increase of \$3,574,900, attributable mainly to: (a) the proposed net increase of 78 posts and additional general temporary assistance provisions under various sections of the proposed programme budget for 2024; and (b) the proposed application of updated salary scales for special political missions, as explained in the respective budget reports.

A. Income from rental of premises

- IS2.1 The expected income under this heading, in the amount of \$10,835,600, the details of which are shown in table IS2.2, relate to the payment of rent by a number of specialized agencies and other entities connected with the activities of the Organization for the occupancy of United Nations premises in New York, Geneva, Nairobi, Addis Ababa, Bangkok and Santiago. Under the terms of the agreement with the Government of Austria, the United Nations does not charge rent for the space provided for other tenants on its premises in Vienna, and rental income generated in Vienna would devolve to the Government of Austria.
- IS2.2 The estimated net decrease of \$658,000 in rental income is due mainly to: (a) a lower rental rate for office space in Nairobi as a result of the outcome of independent market studies commissioned by the United Nations Office at Nairobi (\$790,900); and (b) a reduced number of specialized agencies renting office space from the Secretariat at United Nations Headquarters in New York as a result of the termination of the lease for the DC1 Building (\$528,700). The decrease was offset in part by an increase in income due mainly to: (a) an increase in rental rates at the Palais des Nations in Geneva, in line with the recommendations of the working group on global rental practices at United Nations premises (\$267,000); (b) an anticipated new United Nations tenant within the premises of the Economic Commission for Africa (ECA) (\$217,900); and (c) additional office rental space being available at the Economic and Social Commission for Asia and the Pacific (ESCAP) as a result of a more efficient use of office space following implementation of the seismic mitigation project (\$175,000).

Economic and Social Commission for Asia and the Pacific, Bangkok	698.0	873.0	175.0
Total	11 493.6	10 835.6	(658.0)

B. Reimbursement for services provided to specialized agencies and others

IS2.3 The expected income under this heading is set out in table IS2.3. The total estimated income of \$239,800 reflects a decrease of \$100,000, which is attributable to: (a) a reduction of mail and pouch services requested by clients at the United Nations Office at Vienna (\$69,600); and (b) a decrease in income from catering services at ECA, as estimates for 2023 included the late billing of services provided in 2022 (\$30,400).

Table IS2.3
Reimbursement for services provided to specialized agencies and others

(Thousands of United States dollars)

<i>Source</i>	<i>2023 approved estimates</i>	<i>2024 proposed estimates</i>	<i>Increase (decrease)</i>
United Nations Office at Vienna	217.0	147.4	(69.6)
Economic Commission for Africa	122.8	92.4	(30.4)
Total	339.8	239.8	(100.0)

C. Interest income

IS2.4 It is projected that interest income in the amount of \$8 million would be earned on general fund balances held in the cash pool during 2024. The decrease of \$2.6 million, compared with the approved estimates for 2023, reflects an expected lower estimated average cash balance for 2024 (an average positive cash balance of \$400 million is projected for 2024, compared with an estimate of \$422 million for 2023) and an anticipated lower interest rate environment based on the market outlook for United States interest rates (a 2 per cent interest rate is estimated for 2024, compared with 2.5 per cent for 2023).

D. Sale of used equipment

IS2.5 The expected income under this heading is set out in table IS2.4. Sale of used equipment is estimated at \$124,100 for 2024, reflecting a net decrease of \$31,600 compared to the estimates approved for 2023. The estimates under this heading vary from year to year on the basis of the equipment that has been identified for sale at the time of preparation of the report. The net reduction of \$31,600 in 2024 reflects mainly lower estimated proceeds from the planned sale of equipment and furniture at ESCAP (\$75,000), partly offset by higher estimated proceeds from the planned sale of five vehicles and equipment and furniture at ECA (\$43,100).

Table IS2.4

Sale of used equipment

(Thousands of United States dollars)

<i>Source</i>	<i>2023 approved estimates</i>	<i>2024 proposed estimates</i>	<i>Increase (decrease)</i>
Headquarters, New York	42.2	42.5	0.3
Economic Commission for Africa, Addis Ababa	26.5	69.6	43.1
Economic and Social Commission for Asia and the Pacific, Bangkok	87.0	12.0	(75.0)
Total	155.7	124.1	(31.6)

E. Refund of previous years' expenditures

IS2.6 An estimated amount of \$1,252,500 in 2024, reflecting no change compared with the estimate for 2023, is anticipated to be refunded from prior years' expenditures. The level of refunds is influenced by external factors and is therefore difficult to predict with accuracy.

F. Contributions of non-member States

IS2.7 Under the terms of rule 160 of the rules of procedure of the General Assembly and regulation 3.9 of the Financial Regulations and Rules of the United Nations, States that are not members of the United Nations but participate in certain activities of the Organization contribute towards the expenses of such activities at rates to be determined by the Assembly. By its resolution [44/197 B](#), the Assembly endorsed the revised assessment procedures for non-member States contained in paragraphs 50 to 52 of the report of the Committee on Contributions ([A/44/11](#), [A/44/11/Add.1](#) and [A/44/11/Add.1/Corr.1](#)). These procedures provide for assessment of contributions on the basis of a flat annual fee at the beginning of each year. That fee was calculated for each non-member State on the basis of a varying proportion of the applicable rate of assessment, which was applied to the applicable assessment base. The assessment base equals the total net assessment for the United Nations regular budget for the year, adjusted for tax refunds. By its resolution [58/1 B](#), the Assembly endorsed the recommendation of the Committee that the flat annual fee percentage of the Holy See should be fixed at 50 per cent of the notional rate of assessment and that further periodic review of the percentage should be suspended. By its decision [68/548](#), the Assembly decided that the State of Palestine was to be called upon to contribute towards the expenses of the Organization on the basis of the same procedure. The total contribution from these non-member States is projected to be \$172,300 for 2024, reflecting no change compared with the estimates for 2023.

G. Television and similar services

IS2.8 Income from television and similar services, such as publication fees charged when the images within the United Nations Photo Library are used in commercially published print monographs and service fees and royalty fees charged for the research, screening and duplication of the United Nations video and film collection, is estimated at \$80,000 for 2024, reflecting no change compared with the estimate for 2023.

H. Miscellaneous income

IS2.9 Various receipts that cannot properly be classified under any of the preceding subheadings, such as contributions from agencies, funds and programmes for their prorated share of the costs of the administration of justice, are included under this heading. The expected income under this heading is set out in table IS2.5. Given its nature, miscellaneous income is, for the most part, difficult to predict with accuracy. The estimate of \$5,970,900 for 2024 reflects a conservative amount that is lower, by \$132,200, than the approved estimate of \$6,103,100 for 2023, owing mainly to a lower share for agencies, funds and programmes of the costs of the administration of justice, based on headcount statistics.

Table IS2.5

Miscellaneous income

(Thousands of United States dollars)

<i>Source</i>	<i>2023 approved estimates</i>	<i>2024 estimates</i>	<i>Increase (decrease)</i>

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

Pending conclusion on the negotiation of the new memorandum of understanding with UNOPS, the Advisory Committee trusts that comprehensive information on the amounts refunded by UNOPS and its final destination will be provided to the General Assembly at the time of its consideration of the present report, as well as future budget submissions (para. IS2.2).

Negotiations on the new memorandum of understanding with the United Nations Office for Project Services (UNOPS) are at an advanced stage and it is anticipated that the new memorandum of understanding would be finalized by the second quarter of 2023.

With regard to the amounts refunded by UNOPS, a total of \$2,125,055.60 for the year of 2021 was received and recorded in 2022, of which \$24,302.96 pertained to the regular budget, which will be reported in the context of the financial performance report for 2022.

Refunds for 2022, if any, are pending the receipt of the UNOPS consolidated financial report and would be reported in the context of the financial performance report for 2023.

Table IS3.1
Estimates of income and expenditure

(Thousands of United States dollars)

2024 proposal submitted by the Secretary-General	
Gross revenue	19 570 300
Gross expenditure (before recosting)	20 377 500
Net revenue (deficit)	(807 200)
2023 approved estimates	
Gross revenue	21 041 100
Gross expenditure (including recosting)	20 643 400
Net revenue	397 700

Table IS3.2
Overall: proposed posts and post changes for 2024

	Number	Details
Approved for 2023	64	2 P-5, 4 P-4, 4 P-3, 3 P-2/1, 7 GS (PL), 42 GS (OL), 2 SS
Proposed for 2024	64	2 P-5, 4 P-4, 4 P-3, 3 P-2/1, 7 GS (PL), 42 GS (OL), 2 SS

- IS3.1 The activities and operations under this section, which are carried out at Headquarters, Geneva, Vienna, Nairobi, Addis Ababa and Bangkok, are coordinated and managed by the following organizational units: (a) the Department of Global Communications; (b) the Department of Economic and Social Affairs; (c) the Department of Management Strategy, Policy and Compliance; (d) the Department of Operational Support; (e) the United Nations Office at Geneva; (f) the United Nations Office at Vienna; (g) the United Nations Office at Nairobi; (h) the Economic Commission for Africa (ECA); and (i) the Economic and Social Commission for Asia and the Pacific (ESCAP).
- IS3.2 The revenue projection for 2023 included in the report of the Secretary-General ([A/77/6 \(Income sect. 3\)](#)) reflected a net deficit of \$3.2 million. In its resolution [77/262](#), the General Assembly decided to increase the income expected under income section 3 by \$3.2 million, resulting in an estimated net revenue of \$397,700 (covering the recosting adjustment) for 2023, as approved by the Assembly in its resolution [77/264 B](#).
- IS3.3 The projected aggregate net deficit in respect of all services to the public for 2024 (\$807,200) reflects a decrease in the net revenue by \$1,204,900, compared with the estimated net revenue of \$397,700 approved by the Assembly for 2023, as shown in table IS3.4. The decrease in the net revenue for 2024 is based on best estimates of realistic income to be achieved in 2024 and it is affected mainly by catering services at United Nations Headquarters in New York, based on the assumption that the subsidy model would continue to be required in 2024 pending any new catering contract terms. Nevertheless, the projected net deficit for 2024 (\$0.8 million), compared with the actual net deficit of \$4.6 million for 2022 and the Secretary-General's projected net deficit of \$3.2 million for 2023 (as reflected in [A/77/6 \(Income sect. 3\)](#)), shows an improving trend, owing mainly to the easing of restrictions created by the coronavirus disease (COVID-19) pandemic.
- IS3.4 The percentage distribution of the total gross revenue and expenditure for services to the public for 2024 is shown in table IS3.3.

Note: The following abbreviations are used in the tables: GS (OL), General Service (Other level); GS (PL), General Service (Principal level); SS, Security Service.

- IS3.5 The Facilities and Commercial Activities Service of the Division of Administration in the Department of Operational Support provides the management and coordination of the activities of the United Nations Postal Administration, which will continue to publicize the work and achievements of the United Nations and its specialized agencies through philatelic sales.
- IS3.6 Operations are consolidated into two entities: (a) the United Nations Postal Administration, New York office; and (b) the United Nations Postal Administration, European office, in Vienna. Each entity reports to the Chief of the United Nations Postal Administration and the Chief of the Facilities and Commercial Activities Service in New York. In addition, the United Nations Postal Administration maintains a retail counter at the Palais des Nations in Geneva and a sales office in Beijing.
- IS3.7 The United Nations Postal Administration continues to face challenges in relation to declining philatelic markets and ageing of its core customer group, particularly in Europe, but has been successful at expanding sales in China. In a further effort to adjust its operation to market changes, the Postal Administration has procured specialized expertise to review its revenue generating capability. A vendor was selected at the end of 2022 and the assessment will be concluded in 2023. Based on the recommendations of the assessment, it is expected that new marketing initiatives will be launched with the aim of reaching new groups of customers and to improve the financial situation of the operation.
- IS3.8 The market in China, which the United Nations Postal Administration has cultivated in the past few years through a local individual contractor, has continued to expand and now represents approximately one quarter of total stamp revenue.
- IS3.9 In 2024, the United Nations Postal Administration will continue to innovate and improve upon the new types of postage stamps introduced in recent years, including United Nations crypto stamps, stamps linked to multimedia content and specialized “made to order” stamp sheets. In addition, the popular “Lunar New Year”, “Sport for Peace”, “Endangered Species” and “World Heritage” stamp series will continue to be featured in the annual programme of issuances.
- IS3.10 The United Nations Postal Administration will also continue its efforts to contain operating costs and improve customer services and delivery times, including through the implementation of its new sales platform. The application is currently being tested and is expected to be implemented by September 2023, following some delays in ensuring that all United Nations information and communications technology security requirements were met. The operation will continue to enhance its multilingual website to attract more customers, increase its social media presence by promoting its stamps through multimedia channels and develop new initiatives based on the outcome of the assessment.
- IS3.11 The United Nations Postal Administration works closely with other postal administrations, dealers and philatelic agents to promote and distribute United Nations stamps around the world. It regularly works with governmental organizations and permanent missions to the United Nations to issue stamps to commemorate world events, prominent people and international days and anniversaries. It also proposes and jointly issues stamps with other postal administrations yearly and will continue to do so in 2024.
- IS3.12 The United Nations Postal Administration has and will continue to represent the Organization at international stamp shows throughout the world to increase public awareness of United Nations philatelic products and contribute to the outreach objectives of the Organization. It is an active member of the Universal Postal Union and participates in its conferences and meetings.
- IS3.13 The overall revenue for 2024 is projected to be \$3,943,600. The downward projection compared with 2023 is attributable mainly to the declining philatelic market and the ageing of its core customer group, particularly in Europe, partly offset by increased sales in China.
- IS3.14 Table IS3.11 lists all deliverables, by category and subcategory, for 2024.

Table IS3.11
Deliverables for 2024, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: philatelic bulletins and materials in English, French, German and Italian; and United Nations postage stamps and postal stationery, including the subject, design and quantity, for an average of 7 stamp issues per year.

Resource requirements (before recosting)

- IS3.15 The amount of \$3,858,200, reflecting no change in the resources level, would provide for the financing of 18 posts, as shown in table IS3.10, of which 11 posts (1 P-5, 3 General Service (Principal level) and 7 General Service (Other level)) would be located in New York and 7 posts (1 General Service (Principal level) and 6 General Service (Other level)) would be located in Vienna, as well as non-post requirements. United Nations Postal Administration operations retain a core of General Service staff to fulfil key operational functions, such as graphic design, marketing, sales, order processing, invoicing, customer service, inventory control and accounting, and rely on a team of contracted personnel to meet the Postal Administration's production and order fulfilment workloads.
- IS3.16 Non-post resources in the amount of \$1,581,400 would provide for other staff costs, hospitality, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment.

IS3.17 The activities programmed for 2024 are aimed at enhancing understanding of the role, work and concerns of the United Nations and to encourage the exchange of ideas, information and knowledge in support of the goals of the Organization. The objective is to improve the visibility of United Nations publications and increase their readership in all formats through the targeted acquisition, marketing, sale, distribution, licensing and publishing of reports, books, periodicals, selected documents, databases, e-books, mobile applications and other electronic products. These activities, including the operation of the United Nations Bookshop at Headquarters, are carried out by the Sales and Marketing Section in the Outreach Division of the Department of Global Communications at Headquarters. A related aim is to generate revenues for the Organization while supporting the widest possible dissemination of United Nations information to the public. The Publications Board, under the chairmanship of the Director of the Outreach Division, has overall oversight of the publications programme.

IS3.18 The proposed plan for 2024 continues to emphasize the consolidation of the electronic publishing programme accompanied by the creation and sale of a wider selection of publications for the general public, as follows:

- (a) The electronic publishing programme is based on adding value to publications through aggregation and services. Two main platforms constitute the foundation of the programme:
 - (i) The United Nations iLibrary continues to increase in scope. This subscription-based platform provides access to over 10,000 United Nations publications and other substantial

digital content such as data and working papers, allowing the publication of more multilingual content and searches by Sustainable Development Goal;

- (ii) The e-commerce website (<https://shop.un.org>) promotes the work of the Organization and provides direct access to United Nations publications in print and digital formats for purchase by the general public around the world. The launch of additional functionality and an updated interface as well as the ability to sell merchandise online, anticipated in 2023, will increase usage and sales;
 - (b) A wider distribution of electronic products, such as e-books and data products through new channels will continue to be a priority;
 - (c) A larger, geographically diverse network of print-on-demand capability will support the print programme and e-commerce sales, reducing the time needed for production in an environmentally sustainable manner;
 - (d) The development of attractive print publications for the general public, focusing on the youth and younger children markets, is a key component of the programme;
 - (e) In addition, the plan includes the strengthening of the rights and licensing activities relating to the commercial use of the Sustainable Development Goals logo and icons as well as digital content for institutional customers worldwide, including data aggregators, for further redistribution.
- IS3.19 The publishing industry continues to change significantly, with electronic publications and aggregated platforms progressively becoming mainstream reading and research choices. At the same time, global book sales across all publishers are stagnating. United Nations publications are no exception to this global trend. In the light of the scaling back of physical book acquisitions by academic libraries and other principal institutional customers, electronic publishing continues to play an increasing role, not only as a way to deliver multilingual content to the customer but also, most importantly, to reach audiences and stimulate thought-provoking discussions and debate on the most critical issues of world affairs. The faster, mobile-responsive United Nations iLibrary platform improves usability and discoverability, which are necessary for the future success of United Nations publications in the current market environment.
- IS3.20 In this context, electronic publishing becomes essential, not only as a way to deliver content, but also to enhance the visibility of United Nations knowledge. The Sales and Marketing Section will continue to leverage existing and new opportunities. These include: (a) business and revenue opportunities primarily related to new distribution channels in print and digital content, including licensing digital and other content to third parties and aggregators for further redistribution, which the Section will diligently pursue; and (b) visibility opportunities that require continued development of back-office systems, specifically with regard to the way in which the Section assigns metadata, bibliographic information, keywords and other tags to the content published by the Organization so that it can be found on the web more easily by researchers, scholars and students.
- IS3.21 The Sales and Marketing Section will continue to focus on important supporting and auxiliary activities such as title management for cataloguing of bibliographic and marketing metadata and on the continuing management of the e-commerce website for the execution of orders for publications and merchandise. Other activities include the optimization and expanded use of third-party digital asset management and distribution systems and management of file processing for print, web and accessible e-book products and its integration into print-on-demand facilities at various geographic locations. In the promotional sphere, the Section will continue to effectively deploy new technologies, including social media tools, to execute cutting-edge marketing campaigns to expand the reach of United Nations publications.
- IS3.22 Table IS3.15 lists all deliverables, by category and subcategory, for 2024.

Table IS3.15
Deliverables for 2024, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: United Nations publications, periodicals, data and subscription products, and other print and digital published materials in all official languages, for sale and dissemination; United Nations Bookshops in New York and Geneva; and organization of “meet the author” events.

External and media relations: advertising, publicity, social media campaigns, newsletters and participation in the principal international publishing industry events, directly or through authorized representatives; and collaboration with the publishing industry on the promotion of the Sustainable Development Goals and other United Nations priorities.

Digital platforms and multimedia content: management of the United Nations iLibrary and the e-commerce platform (<https://shop.un.org>) to efficiently aggregate and disseminate United Nations publications in all six official languages.

Resource requirements (before recosting)

- IS3.23 The amount of \$5,549,400, reflecting no change in the resource level, would provide for the financing of 21 posts, as shown in table IS3.14, as well as non-post requirements.
- IS3.24 Non-post resources in the amount of \$2,729,100 would provide for other staff costs, hospitality, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment.

IS3.25 The activities related to services for visitors, including guided tour operations and briefing programmes, are the responsibility of the Department of Global Communications, which oversees the Visitors Section at Headquarters and the Visitors Services at the United Nations Offices at Geneva, Vienna and Nairobi. The objective is to promote an informed understanding of the purpose, role and work of the United Nations to the widest possible audience and to promote United Nations premises as an attraction for the general public and for specialized groups, including school groups and university students from all Member States. In line with the Department's global communications strategy, there is a strong emphasis on inspiring visitors' actions and engagement in pursuing and promoting the Organization's aims, in particular the achievement of the Sustainable Development Goals.

IS3.26 In all four Visitors Section/Services (New York, Geneva, Vienna and Nairobi), in-person and online activities continue to generate revenue while fulfilling their outreach mandates. All four duty stations are prioritizing proactive marketing campaigns, updates and improvements to the tour route and further expansion of partnerships with civil society, academia, municipalities and the tourism

industry. The Department plans to continue offering both in-person and online tours and briefings to the general public and other groups in all four duty stations and in several languages, upon request.

^a In-person and online visitors.

^b Amended to reflect changes in line with paragraph 63 of General Assembly resolution [77/262](#).

Headquarters

IS3.27 The Visitors Section at Headquarters organizes guided tours, as well as briefing programmes and outside speaking engagements, in which United Nations officials address groups of students, representatives of non-governmental organizations (NGOs) and other audiences on a range of issues related to the work

of the United Nations. Since the reopening of operations at Headquarters in April 2022, all activities continue to be offered both online and in person, with the aim of reaching a wider global audience.

- IS3.28 A special outreach effort has been undertaken to provide curated United Nations resources to educators who teach students in elementary school through high school, to encourage them to teach about the United Nations in their classrooms. In this regard, a hybrid operation, combining online and in-person tours and briefings, was foreseen from 2023 onwards, underlining different areas of the work of the United Nations. Some of the hybrid activities include the online and in-person Black history-themed tour, which highlights the contribution of people of African descent to the work of the United Nations in peace and security and human rights, with a special emphasis on decolonization; the “focus on women” tour, covering topics such as women and peace and security (based on Security Council resolution [1325 \(2000\)](#)), the unique and growing contribution of female peacekeepers and Goal 5 of the Sustainable Development Goals, covering gender equality and the Generation Equality campaign; the architecture tour, which connects the vision and purpose of the United Nations to its architectural elements and appearance while walking visitors through the design process (known as a “workshop for peace”) and exploring how the Organization came to be headquartered in New York City; and an art tour, introducing the gifts donated by Member States and foundations located in the United Nations Plaza, the Visitors Lobby and along the 3rd floor tour route. For 2024, the Visitors Section plans to continue offering in-person tours that were introduced in previous years, such as the United Nations garden tour in the summer months, the kids’ tour for children aged 5 to 12 years old, as well as special tours for high-level officials, celebrities, VIP guests, educators and concierges from leading New York City hotels.
- IS3.29 During the second half of 2023, the guided tours operation launched several promotional campaigns in New York, including digital advertising in centrally located bus shelters and newsstands, over 100,000 email blasts, targeting the tourism and hospitality industry in the tri-State area and a wide distribution of maps in leading hotels in New York City advertising all the services available to United Nations visitors. Building on the promotional campaigns of 2023, the Visitors Section plans to continue such marketing avenues in 2024 to further promote existing products and position the United Nations as a prime tourist and educational destination, not only in New York but also globally, taking into consideration the reach of the online offerings. In 2024, the Section will also continue to make use of digital technologies, online platforms and interactive displays to illustrate the work of the United Nations in a visually appealing manner.
- IS3.30 In 2022, the Visitors Section could generate only 53 per cent of the revenue that had been projected for that year. This was due to several reasons: (a) the in-person operation remained closed in the first quarter of the year and upon reopening in April 2022, COVID-19 mitigation measures to ensure physical distancing and reduce foot traffic in the building imposed a 25 per cent reduction in the maximum number of people per tour (from 20 to 15 visitors); and (b) a reduction in the total number of tours per hour (from 10 to 4 tours), causing the average total number of tours per day to drop from 60 to 25.
- IS3.31 It was not until October 2022, when these restrictions were lifted and the Section was once more fully staffed with tour guides, that it started to generate a substantial and steady stream of revenue, gradually returning to a normal operation. In this regard, the revenue projected for 2024 is based on the revenue generated during the period from October to December 2022.
- IS3.32 The Visitors Section relies on a core staff of fixed-term, full-time tour guides who conduct tours in person and online in more than a dozen languages, as well as specialized tours on a range of subjects relevant to the work of the United Nations. To maintain a flexible operation, the Section will continue to rely on additional temporary staff hired as individual contractors for peak seasons.

Geneva

- IS3.33 At the United Nations Office at Geneva, the Visitors Service continues to deliver tours in 12 languages for groups, individual visitors and dignitaries. Youth groups continue to represent about 80 per cent of planned groups. The guided tour operation in Geneva is experiencing quantitative limitations to its operation owing to the closing down of half of the Geneva compound since mid-2022 because of the work to refurbish the Palais des Nations under the strategic heritage plan. Owing

to safety considerations vis-à-vis the construction site, which is adjacent to the tour itinerary, several measures were taken, such as: (a) a reduction in the size of the tours to smaller groups, which reduced the ratio of visitors per guide; (b) restrictions imposed by security considerations on the number of groups permitted on the compound at any given time; and (c) the closure of the tours during weekends and United Nations holidays as the construction site is closed on those days. These measures have therefore led to a reduction in the number of visitors and the revenue generated, while leading to increased costs to operate the tours. While the refurbishment work at the Palais des Nations will continue in 2024, it is hoped that some stability will be regained, including opening on weekends from April to September after the planned relocation of the Visitors Service to the new facility, which is expected to take place in January 2024.

- IS3.34 Despite these challenges, the Geneva Visitors Service continues to offer a high-quality alternative tour route, which has received positive feedback and continues to generate increasing demand. The alternative tour route is offered to groups and individual visitors and for private tours. Despite adverse logistical conditions, visitor numbers are increasing. The average increase of visitors between the first two calendar months of operation in 2022 and 2023 amounts to 58.5 per cent. Between 2021 and 2022, the increase in visitors amounted to 188 per cent. A measured further increase of visitors and intake, within the scope of the limitations imposed by the continuing refurbishment work, is reflected in the figures provided for 2024.
- IS3.35 In addition to onsite tours of the Palais des Nations, online tours developed in 2021 are also expected to be offered in 2024. The Visitors Service will continue to offer tours adapted to the renovation work linked to the strategic heritage plan, modifying routes with new elements and including information products in various formats. Adaptations of public information support material for visitors who are visually and audibly impaired are also proposed. The move of the Visitors Service's sales operation online in 2021 continues to improve customer service.
- IS3.36 Owing to a combined effect of upward cost pressures and restrictions on the number of visitors, such as a smaller volume of visitors on the premises and a lower number of visitors per guide, which increase the operating costs, the Geneva Visitors Service proposes to offset these factors by increasing the pricing of the guided tours for 2024. Following a market survey of comparable Geneva attractions, price increases are recommended as follows: from SwF 16 to SwF 22 for adults, from SwF 13 to SwF 18 for university students and senior citizens, and from SwF 10 to SwF 12 for visitors under the age of 18. The cost of tours for VIPs and online groups will remain at SwF 280 and SwF 170, respectively.

Vienna

- IS3.37 At the United Nations Office at Vienna, the Visitors Service continues to deliver guided tours and lectures in person and online in more than a dozen languages, with a special focus on children and young people. Visitor surveys have shown both on-site and virtual tours to be highly effective in raising visitors' knowledge and opinion of the work of the United Nations.
- IS3.38 During the COVID-19 pandemic, the Visitors Service continued to generate some modest revenue during an 18-month period of conducting tours only online through a new offer which the Service developed and launched within weeks of the first lockdown in the host country in March 2020. In-person tours of the United Nations in Vienna gradually resumed in September 2021. Over a period of evolving pandemic conditions, intermittent lockdowns and other pandemic mitigation measures that continued to limit the scope of operations and suppress demand for guided tours, the Service was still able to steadily increase visitor numbers and income throughout 2021 and 2022. By the last quarter of 2022, visitor volume had reached 74 per cent of the 2019 numbers for the same period and income stood at 93 per cent of 2019 income for that quarter.
- IS3.39 As of March 2023, the Visitors Service in Vienna remained on track to resume a prior upward trend on its net revenue that had been disrupted by the COVID-19 pandemic. With most COVID-19 prevention measures no longer in effect in 2023, the Service has been able to reintroduce the full range of its tour formats, including its popular interactive children's and thematic tours, and to replenish its extensive line-up of tour languages to meet recovering demand from the educational and tourism sector, while also retaining its multilingual virtual tour offer. The Service now has an attractive range of United Nations-branded auxiliary sales items for purchase with a tour, more

comfortable facilities and continuous staffing in the Visitors Centre, and lecture rooms equipped with state-of-the art projection equipment together with an audiovisual studio set-up to facilitate high-quality virtual tours and lectures. These recent investments in visitor infrastructure and service in order to justify robust pricing and attract a larger share of high-income visitors, such as tourists and professional groups, will further contribute to progress towards reaching the Service's goal of breaking even. Standard ticket prices in 2024 are €15 (\$15.80) for adults, €13 (\$13.70) for students/retirees and €7 (\$7.38) for schoolchildren.

Nairobi

- IS3.40 The pandemic has been particularly difficult for the Visitors Service in Nairobi, which remained closed to the public during most of 2022. The United Nations compound in Nairobi was reopened to the public by the Director-General of the United Nations Office at Nairobi in September 2022, and in-person tours were resumed in October 2022. Following a reduction in COVID-19 restrictions, with the reopening of schools and with the return of international tourists, these factors contributed to a return of visitors for the physical tours in larger numbers during October and November 2022 and it is expected that the number of visitors will gradually resume to pre-pandemic levels during 2024. The Service also offered online tours and briefings for 136 online visitors in 2022 and will continue to do so for the future, while charging a modest fee where possible to offset operating costs.
- IS3.41 For 2024, the Service will continue to offer physical tours through the United Nations complex and deliver virtual briefings, which can reach an additional audience who are not able to visit physically. To revive demand, and with a focus on the physical tours through the complex, the Service will invest in marketing and outreach campaigns to known and new target groups.
- IS3.42 Table IS3.20 lists all deliverables, by category and subcategory, for 2024.

Table IS3.20

Deliverables for 2024, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: guided tours, including the development of different tour concepts for general audiences, including young people and children, as well as VIP tours for high-level officials and goodwill ambassadors in approximately 20 languages, offered at Headquarters and the United Nations Offices at Geneva, Vienna and Nairobi; design and production of exhibits and interactive tour materials for visitors to all four duty stations in multiple languages; briefing programmes at Headquarters and United Nations Offices, as well as outside speaking engagements, on various United Nations issues presented by Secretariat officials in response to requests from academic institutions, NGOs and other groups; videoconferences linking groups away from Headquarters and United Nations Offices with Secretariat and/or mission officials; and engagement with visitors for promotional purposes and as multipliers of United Nations communications priorities, including on social media and through partnerships with local actors in the educational and tourism sectors in New York, Geneva, Vienna and Nairobi.

Resource requirements (before recosting)

- IS3.43 The amount of \$6,191,500, reflecting a decrease of \$8,800, would provide for the financing of 15 posts, as shown in table IS3.18, for the public services of the Department of Global Communications (Headquarters: 2 P-3, 1 General Service (Principal level) and 7 General Service (Other level); Geneva: 1 P-3 and 2 General Service (Other level); Vienna: 1 P-2; and Nairobi: 1 P-2), as well as non-post requirements.
- IS3.44 Non-post resources in the amount of \$4,027,300, reflecting a decrease of \$8,800, would provide for other staff costs, hospitality, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment. The decrease is mainly attributable to reduced requirements under other staff costs and contractual services, owing to: (a) a decrease in the average

seniority of tour guides; and (b) reduced communication costs owing to an increased use of Microsoft Teams in lieu of desktop telephones for business communications.

4. Revenue services of the Department of Economic and Social Affairs

Table IS3.21

Estimates of gross and net revenue (before recosting)

(Thousands of United States dollars)

	2023 approved estimate	2024 estimate	2024 increase (decrease)
Statistics			
Gross revenue	765.9	1 267.0	501.1
Less expenses against revenue	796.5	796.5	–
Total net revenue	(30.6)	470.5	501.1

Table IS3.22

Summary of requirements by category of expenditure

(Thousands of United States dollars)

	2022 expenditure	2023 appropriation	Changes		2024 estimate (before recosting)
			Amount	Percentage	
Non-post	762.6	796.5	–	–	796.5
Total	762.6	796.5	–	–	796.5

IS3.45 In 2024, the sales activities of the Department of Economic and Social Affairs under the present section will complement the work of the Statistics Division. The general objective of the activities is to ensure a high-level quality of the databases of the Division, including their metadata. These databases cover the international trade in goods and services statistics (UN Comtrade database), the database on business statistics, the database on national accounts statistics, the classifications registry, the global enterprise group registers and other databases of the Division. The activities also include the facilitation of data exchange between international agencies and countries and the training on and use of the Statistical Data and Metadata Exchange. Within this general objective, the activities are also intended to assist developing countries to improve the quality, availability and dissemination of their official statistics for inclusion in the databases of the Division, thereby ensuring the continued value of such data for the customer base.

IS3.46 A significant increase in the gross revenue for 2024 is estimated based on the new average revenue per transaction from October 2022 to February 2023 and on projections of historical monthly transactions. In September 2022, the new UN Comtrade database was launched with new data items and more powerful data services. This has led to an increase in monthly revenues, based on new data services, the more intensive marketing activities and the adjustment of subscription prices. It is expected that the UN Comtrade database will continue to attract a wide and expanding audience of large data users with added services and products such as the trade data lake and access to an extended scope of data items. Free access to the database can fulfil the needs of occasional users owing to the commitment to making data more accessible.

Resource requirements (before recosting)

- IS3.47 The amount of \$796,500 for non-post resources, reflecting no change in the level of resources, would provide for other staff costs, travel of staff, contractual services, general operating expenses, supplies and materials, furniture and equipment, and grants and contributions.

5. Sale of gift items

Table IS3.23

Estimates of gross and net revenue (before recosting)

(Thousands of United States dollars)

Headquarters gift shop			
Gross revenue	302.7	400.0	97.3
Less expenses against revenue	–	–	–
Total net revenue	302.7	400.0	97.3

- IS3.48 The gift shop at Headquarters provides staff, members of delegations and visitors with United Nations mementos and souvenirs, as well as handicrafts and other souvenirs from around the world. The gift shop at Headquarters is operated by a contractor that is required to provide the United Nations with a percentage of gross sales and a utilities fee.
- IS3.49 The gift shop reopened on 1 June 2022 after being closed since March 2020 owing to the COVID-19 pandemic. Since its reopening, sales have remained significantly lower than 2019 levels, but it is expected that the commissions will gradually increase as the number of visitors and events at United Nations Headquarters stabilize in 2024.

6. Garage operations

IS3.50 The garage operations at Headquarters, Geneva and Bangkok provide parking facilities for delegates and staff under conditions and at rates established by the United Nations.

IS3.51 At Headquarters, the revenue projections for 2024 are informed by actual revenues in 2022, which were affected by the increased use of flexible working arrangements by staff compared to the levels prior to the pandemic. It is assumed that this trend will continue and that external market conditions, including fuel prices, will lead to reduced utilization of the garage despite the issuance of additional permits.

IS3.52 The garage rates were last revised effective September 2022 and pursuant to paragraph 63 of General Assembly resolution [77/262](#), no adjustment in garage rates will be made in 2023.

IS3.53 However, as inflationary pressures are expected to further increase the cost of living, the General Assembly may wish to consider adjusting the garage fees applicable to staff to ensure the self-sufficiency of the garage administration office at Headquarters. It should also be noted that the fees applicable to delegates have not been adjusted since 1984. In order to realign the revenue potential of the garage operation, the Assembly may also wish to consider adjusting the fees applicable to delegates in line with the cost-of-living index.

IS3.54 The Administration is required to issue guidance and make operational policy changes from time to time to ensure the safe and effective management of parking facilities for delegates and staff at United Nations garages in Headquarters, Geneva and Bangkok. These changes may involve, for

example, adjusting permit types, volume and application criteria as well as procedures for payments and recovery of fees.

Resource requirements (before recosting)

- IS3.55 The amount of \$1,196,300, reflecting a decrease of \$64,500, would provide for the financing of six posts, as shown in table IS3.26 (Headquarters: 2 General Service (Other level) and 2 Security Service; and Geneva: 2 General Service (Other level)), as well as non-post requirements.
- IS3.56 Non-post resources in the amount of \$354,700, reflecting a decrease of \$64,500, would provide for other staff costs, contractual services, general operating expenses, and supplies and materials. The decrease under contractual services, general operating expenses, supplies and materials, and furniture and equipment is attributable mainly to: (a) reduced requirements for the garage administration office at Headquarters due to the discontinuation of support for a project in which parking would have been managed on the Unite platform, reduced maintenance and repairs services, based on repair work being undertaken, and the reduced need for additional back-up overhead scanners (\$58,500); and (b) reduced requirements for office supplies in the garage administration office in Bangkok due to the planned automation of the parking administration (\$6,000).

7. Catering operations

- IS3.57 The United Nations catering contract at Headquarters, signed on 31 December 2015, was due to expire on 31 December 2022. In view of the gradual return to normalcy from the COVID-19 pandemic, the new solicitation exercise was postponed to early 2023 to ensure that the proposed new contracting modality would be consistent with General Assembly resolution 39/67 and that any necessary approvals would be satisfied prior to the issuance of the proposed request for proposals for the services. The current contract, amended to a subsidy model during the pandemic to mitigate the vendor's losses, was, as a result, extended to allow sufficient time to complete the new solicitation. Five of the seven dining locations were operating as at 1 March 2023 to meet current demand and manage the subsidies, which remain necessary, within approved levels. Historically, food operations at Headquarters have relied on external catering events for profitability, because the cafeterias have typically generated losses owing to narrow margins. To mitigate losses, the availability of the various dining facilities will continue to be evaluated on an ongoing basis and adjusted as required, as sales patterns stabilize.
- IS3.58 The solicitation for the new catering contract, which was launched in February 2023 and is open to all vendors, in full compliance with United Nations regulations, takes into account the recommendations resulting from the independent assessment conducted in 2021, as well as improvements in market conditions. It is offering bidders the option to propose a “profit and loss” model, whereby they would be responsible for the financial result of the operation at the onset of the contract, or start with a “subsidy” model first and transition to a “profit and loss” model once specific targets are met. The procurement exercise is expected to conclude by the end of 2023 and arrangements to extend the contract with the existing provider will be made as necessary to ensure continuity of services.
- IS3.59 Pending the new contract terms, 2024 estimates are projected using the current situation whereby a subsidy would continue to be required. Based on the assumption that catering revenue would increase but be partly offset by higher costs for the gradual opening of the cafes and from inflationary impact, continued losses are expected at a reduced level from 2022. No gross revenue is projected as any profit generated by the vendor over the course of the year would serve to reduce the subsidy paid.
- IS3.60 The catering service at ESCAP is provided for the benefit of staff, delegates and participants in non-United Nations meetings and conferences held on the premises. The catering operation in Bangkok generates incidental revenue, estimated at \$73,100 for 2024.

Resource requirements (before recosting)

- IS3.61 The amount of \$2,009,200, reflecting a decrease of \$192,600, would provide for the financing of one post (P-4) in the Division of Administration at Headquarters, as well as non-post requirements for Headquarters and Bangkok.
- IS3.62 Non-post resources in the amount of \$1,748,400, reflecting a decrease of \$192,600, would provide for other staff costs, contractual services, general operating expenses, and furniture and equipment. The decrease relates mainly to reduced requirements under contractual services owing to a decreased level of subsidy anticipated for 2024 as a result of more catering events returning and the managed gradual reopening of cafeterias using current contract model assumptions at catering facilities at Headquarters.

8. Other commercial operations

Table IS3.30

Estimates of gross and net revenue (before recosting)

(Thousands of United States dollars)

	2023 approved estimate	2024 estimate	2024 increase (decrease)
Vienna commercial activities	–	–	–
Gross revenue	–	–	–
Less expenses against revenue	–	–	–
Net revenue	–	–	–
ESCAP Conference Centre			
Gross revenue	304.0	350.0	46.0

Less total expenses against revenue	300.2	300.2	–
Total net revenue	20.2	85.8	65.6

Table IS3.31

Summary of requirements by category of expenditure

(Thousands of United States dollars)

	2022 expenditure	2023 appropriation	Changes		2024 estimate (before recosting)
			Amount	Percentage	
Post	6.2	–	–	–	–
Non-post	244.5	300.2	–	–	300.2
Total	250.7	300.2	–	–	300.2

- IS3.63 The main entrance to the Visitor Centre of the Vienna International Centre is expected to continue to be undergoing refurbishment, which will not allow for commercial activities to take place. Therefore, no income or expenditure are expected for 2024.
- IS3.64 The total gross revenue of the United Nations Conference Centre at ESCAP is estimated at \$350,000. With the lifting of COVID-19 restrictions, the number of requests to organize conferences and meetings at the Conference Centre is increasing, which is a positive signal for revenue generation in 2024.
- IS3.65 The United Nations Conference Centre at ECA provides conference halls and exhibition facilities to other United Nations agencies, NGOs, intergovernmental organizations, government offices and others, for a fee. However, owing to the COVID-19 pandemic, face-to-face meetings were curtailed drastically and more meetings took place via a hybrid format. In addition, local conditions also

resulted in a slow market and consequently the income from the rental of the Conference Centre dropped significantly. Furthermore, the two main conference rooms are currently closed for major maintenance from 1 January 2023 for a period of one year. Based on the assumption that the two main conference rooms would be reopened in 2024 after the scheduled maintenance, the rental of the Conference Centre is estimated at \$36,000 for 2024. The ongoing maintenance costs of the Conference Centre are budgeted under section 18, Economic and social development in Africa.

Resource requirements (before recosting)

- IS3.66 The amount of \$300,200 for non-post resources, reflecting no change in the level of resources, would provide for other staff costs, travel of staff, contractual services, general operating expenses, supplies and materials, and furniture and equipment.

B. Programme support

Revenue Accounts Unit

Table IS3.32

Summary of requirements by category of expenditure

(Thousands of United States dollars)

	2022 expenditure	2023 appropriation	Changes		2024 estimate (before recosting)

Resource requirements (before recosting)

IS3.67 The amount of \$476,200 would be required to provide for the continuation of three posts (1 P-4 and 2 General Service (Other level)) in the Finance Division of the Office of Programme Planning, Finance and Budget that are responsible for revenue accounting and reporting.

Annex

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

Nevertheless, the Advisory Committee notes the efforts to incorporate the lessons learned during the pandemic into the operations and business strategies of services provided to the public under Income section 3, and trusts that the Secretary-General will continue to enhance the management of services provided to the public, including, as appropriate, the income-generating capacity, and provide comprehensive information on actual revenue data in the context of the next budget submission (para. IS3.4).

The Advisory Committee trusts that updated information on the new sale system and its projected impact on United Nations Postal Administration operations will be provided in the context of the next budget submission (para. IS3.12).

The Advisory Committee trusts that the Secretary-General will include in his next budget submission further information on progress made in the above-mentioned areas (para. IS3.14).

The Advisory Committee trusts that information on the solicitation process will be included in the next budget submission. The Committee reiterates that the new contract awards to replace the contract at Headquarters, which is due to expire on 31 December 2022, must be open for all vendors in full compliance with United Nations procurement policies, guidelines and procedures and that fair and transparent competition among all prospective vendors must be ensured (para. IS3.28).

Information on the actual revenue data will be provided in the context of the financial performance report on the programme budget for 2022.

The updated information is provided in paragraph IS3.10 of the present report.

The requested information is provided in paragraph IS3.18 of the present report.

An update on the solicitation process is provided in paragraph IS3.58 of the present report.
