272. By resolution [2617 \(2021\)](#), the Security Council renewed the mandate of the Executive Directorate and encouraged it to raise awareness of the threats posed by terrorist use of unmanned aerial systems and the need for Member States to address those threats. More recently, in 2022, in its Delhi Declaration on countering the use of new and emerging technologies for terrorist purposes, the Counter-Terrorism Committee reiterated its call for Member States to address, consistent with international law, the threat posed by the use of unmanned aerial systems for terrorist purposes; acknowledged the need to balance fostering innovation and preventing the use of such systems for terrorist purposes as its applications expanded; and took note of international efforts that contributed to raising awareness of and preparedness for said use as the technology became more accessible and broadly used across the public and private sectors. The Committee tasked the Executive Directorate to develop new requirements for States to implement and for the Executive Directorate to also assess and assist in implementation.
273. In line with the above additional mandated tasks, it is proposed that one position of Legal Officer (P-4) be established in 2024. The proposed position would provide the Executive Directorate with the required technical expertise that it currently does not have, in the areas of developing guiding principles, building on strategic and voluntary public-private partnerships to ensure the timely exchange of information, supporting the conduct of threat analysis and identifying good practices and emerging trends, and integrating them into the Executive Directorate's assessment and analytical work.
274. A vacancy rate of 13.4 per cent has been applied to the estimates for the existing positions, based on the actual average vacancy rate in 2022, and a vacancy rate of 50 per cent has been applied to the estimates for the proposed new position.
275. The increase in the requirements proposed for 2024 compared with the appropriation for 2023 is attributable primarily to higher requirements under civilian personnel costs owing to the application of the latest salary scale and the proposed establishment of a new position, offset in part by reductions due to the application of a higher vacancy rate of 13.4 per cent compared with the rate of 5 per cent applied in 2023. For operational costs, the proposed resources reflect increased requirements for official travel for assessment visits conducted on behalf of the Counter-Terrorism Committee, and increases for communications and information technology equipment related to the one proposed new post, offset by a reduction under facilities and infrastructure due to the application of the latest lower standard rate for the rental of premises.

Extrabudgetary resources

276. In 2023, extrabudgetary resources in the amount of \$744,300 are projected to be used to support the activities and relevant initiatives aimed at promoting the implementation of resolutions [1373 \(2001\)](#), [1624 \(2005\)](#), [2178 \(2014\)](#), [2396 \(2017\)](#), [2462 \(2019\)](#), [2482 \(2019\)](#) and [2617 \(2021\)](#), including (a) projects on accountability for sexual and gender-based violence in terrorist contexts, (b) efforts aimed at strengthening counter-terrorism and forensic science capacities and (c) a global programme on prosecution, rehabilitation and reintegration.
277. In 2024, extrabudgetary resources in the amount of \$395,500 are projected to be used to organize several new and follow-up workshops in various regions of the world in accordance with the programme of work approved by the Committee, to conduct research on strategic, political, legal, institutional and security issues relating to information technology and counter-terrorism and to support international cooperation on counter-terrorism.
278. The decrease in the estimated extrabudgetary resources to be utilized in 2024 as compared with 2023 is due to the anticipated completion of two projects, the sexual and gender-based violence in terrorist contexts project and the strengthening counter-terrorism and forensic science capacities project, both in 2023.

16. United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant

(\$25,694,900)

Foreword

The 2024 budget seeks to augment the next phase of work by the United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant, building on the progress foreseen in 2023 through case-building and enhancing support to domestic authorities in proceedings relating to international crimes committed by ISIL (Da'esh). The focus in 2024 will be on using evidence holdings to ensure that those most responsible for these crimes are held accountable. In this regard, the Investigative Team is directing its support efforts more intensively towards the Iraqi judiciary to practically apply international criminal and humanitarian law in case-building efforts, in particular for persons of interest abroad.

Throughout, the Investigative Team will remain engaged with the Iraqi judiciary and several branches of the Government of Iraq, survivor groups, religious authorities and community leaders, all of which are at the heart of its work. Their message remains clear: accountability for crimes committed by Da'esh is paramount and impunity must not persist.

(Signed) Christian **Ritscher**
Special Adviser and Head of the United Nations Investigative
Team to Promote Accountability for Crimes Committed by
Da'esh/Islamic State in Iraq and the Levant

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

279. The United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant (UNITAD) is responsible for supporting domestic efforts to hold Da'esh accountable for acts that may amount to war crimes, crimes against humanity and genocide by collecting, preserving and storing evidence in Iraq. The mandate is defined in Security Council resolution 2379 (2017), which further provides that the Investigative Team must conduct its investigative activities to the highest possible standards, to ensure the broadest possible use before national courts and in complementing investigations being carried out by the Iraqi authorities, or by authorities in third countries upon their request. The Security Council underlined, in the same resolution, that the Special Adviser and Head of the Investigative Team will also promote, throughout the world, accountability for acts that may amount to war crimes, crimes against humanity or genocide committed by Da'esh, and work with survivors, in a manner consistent with relevant national laws, to ensure that their interests in achieving accountability for Da'esh are fully recognized.
280. In its resolution 2651 (2022), the Security Council, at the request of the Government of Iraq, extended the mandate of the Investigative Team until 17 September 2023.

Programme of work

Objective

281. The objective, to which the Investigative Team contributes, is to hold members of Da'esh accountable for acts that amount to war crimes, crimes against humanity or genocide, as proved in fair and independent criminal proceedings.

Strategy and external factors for 2024

282. To contribute to the objective, the Investigative Team will:
- (a) Continue to collect documentary, forensic and testimonial evidence, in line with its investigative strategy, and in accordance with relevant Security Council resolutions and the terms of reference regarding the activities of the Team in Iraq;
 - (b) Further engage with survivors, affected communities, key Iraqi national authorities and other relevant partners in order to identify evidentiary material relevant to its mandate and ensure its effective incorporation into the central evidence management system of the Team;
 - (c) Further incorporate innovative approaches and the use of technology into the evidence-collection and analysis activities and expand its capacity to digitize, process and analyse large quantities of a wide range of battlefield evidence;
 - (d) Expand the support provided to key national authorities, including the Iraqi judiciary, security services, the Mass Graves Directorate of the Martyrs Foundation and the Medico-Legal Directorate of the Ministry of Health of Iraq. Assistance will also be provided to relevant authorities of the Kurdistan Regional Government;
 - (e) Strengthen its ability to engage with the most vulnerable witnesses and survivors of crimes committed by Da'esh;

- (f) Ensure that evidence-collection activities continue to support three mutually supportive outputs: thematic case assessments; case files supporting individual prosecutions; and the provision of rapid and targeted support to ongoing national proceedings;
 - (g) Utilize capacity to provide analytical and investigative support to third countries that request assistance in their national investigations and prosecutions relating to Da'esh.
283. The above-mentioned work is expected to result in:
- (a) Increased availability of evidence collected by the Investigative Team in line with international standards for use in domestic proceedings brought against Da'esh members for crimes committed in Iraq;
 - (b) Continued expansion of the evidentiary data lake of the Team, which will allow for the further strengthening of cases files in relation to individual members of Da'esh;
 - (c) Enhanced evidence analysis through the creation of an advanced evidence analysis platform that will better facilitate the analysis of large volumes of electronic and multimedia data and enable facial detection across large volumes of image and video data, the detection of similar video and of Da'esh stamps, machine translation, image and video indexing and automatic voice recognition;
 - (d) Increased collection of forensic evidence from mass grave sites in Iraq in accordance with international standards;
 - (e) The collection of further testimonial evidence from those who have not previously come forward with their accounts to any accountability mechanisms.
284. With regard to cooperation with other entities at the global, regional, national and local levels, the Investigative Team will work with international and regional organizations capable of providing support to the implementation of its mandate. Focus will be placed on entities that may serve as an effective entry point for cooperation with relevant national authorities that are in a position to provide information of relevance to its mandate, as well as those that are best placed to provide appropriate legal assistance and capacity-building to the Government of Iraq in order to strengthen its courts and judicial system, pursuant to resolution [2379 \(2017\)](#). Key entities in that regard will include the European Union, the African Union, the League of Arab States, the Organization of Islamic Cooperation, INTERPOL and the International Commission on Missing Persons. In accordance with the terms of reference approved by the Security Council regarding its activities in Iraq, the Team will also continue to strengthen relationships with non-governmental organizations and private sector bodies, with a view to benefiting from their expertise, gaining access to relevant evidentiary material and ensuring that the voices of all relevant parties are heard.
285. With regard to inter-agency coordination and liaison, UNAMI will remain an important operational partner for the Investigative Team. The Team will also continue to expand its cooperation with other key United Nations entities in order to ensure complementarity of effort and coherence of approach. This will include cooperation with United Nations entities in order to obtain information and material relevant to its investigative priorities, such as with the Security Council Committee pursuant to resolutions [1267 \(1999\)](#), [1989 \(2011\)](#) and [2253 \(2015\)](#) concerning ISIL (Da'esh), Al-Qaida and associated individuals, groups, undertakings and entities, OHCHR and the United Nations Institute for Training and Research, in particular the United Nations Satellite Centre. The Team will continue to engage proactively with the Counter-Terrorism Committee and Counter-Terrorism Committee Executive Directorate, the Office of Counter-Terrorism, UNODC, the Office of the Special Adviser to the Secretary-General on the Prevention of Genocide, the Office of the Special Representative of the Secretary-General for Children and Armed Conflict and the Office of the Special Representative of the Secretary-General on Sexual Violence in Conflict. The Team will also continue to draw on the knowledge and expertise of the Mine Action Service.

286. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) The international community continues to support the mandate and activities of the Investigative Team;
 - (b) The Government of Iraq and the Kurdistan Regional Government continue to provide strong cooperation and support with respect to the work of the Team, as facilitated by the national coordinating committee designated by the Government;
 - (c) The Team continues to receive strong support for its work among religious actors, community leaders and survivor groups;
 - (d) Da'esh remains a security threat within Iraq notwithstanding that the security situation remains broadly permissive with respect to the field investigative activities of the Team, allowing access to affected populations, key stakeholders and crime scenes, with appropriate security measures taken;
 - (e) Sociopolitical developments drive planning assumptions and the implementation of activities, as necessary.
287. The Investigative Team integrates a gender perspective in its operational activities, deliverables and results, as appropriate, in two ways:
- (a) Through the gender parity working group, which was established to work on internal issues related to gender parity, from recruitment to a conducive work environment and an empowering work culture. The working group includes members from all sections and levels of UNITAD and meets on a regular basis to update the gender parity strategy as needed and track progress on achieving equal gender representation. The Team will focus on closing the gender parity gap for levels with a high discrepancy, including at senior levels;
 - (b) Through the Sexual and Gender-based Crimes and Crimes against Children Unit, which is part of the Office of Field Investigations and is a thematic team that leads investigations of sexual and gender-based violence and crimes against children. The Unit integrates a gender perspective into the work of every investigation unit, informing analysis, investigations and the drafting of case briefs with a gender perspective. This allows it to engage and cooperate at all stages of the investigation and gain an in-depth understanding of how Da'esh has used gender-based violence and violence against children, as well as how its crimes have affected men, women and children from different communities.
288. In line with the United Nations Disability Inclusion Strategy, the Investigative Team's Disability Inclusion Strategy was revised in March 2023 on the basis of two principles: mainstreaming and intersectionality. Mainstreaming a human rights-based approach in disability inclusion ensures that disability inclusion is embedded within the Team's work, with meaningful participation and assessment of the implications of policies and programmes for persons with disabilities. An intersectional approach addresses the structural and dynamic consequences of the interaction between multiple and intersecting forms of discrimination and considers all conditions that can create a substantively distinct life experience for persons with disabilities. The strategy is reflected in internal workplans, strategic planning documents and strategic planning indicators. Recruitment activities include outreach and consultations with Iraqi disability organizations.

Evaluation activities

289. In February 2023, UNITAD published its evaluation policy, which sets out specific areas for self-evaluation, including its staff offboarding process and the protection of evidentiary data to be conducted by the mission. In addition, UNITAD provides monitoring updates for all of its 2022 results and deliverables. In October 2022, following a thorough consultative exercise, the mission published its mission concept paper, setting out its strategic objectives up to the period ending in September 2024, the progress of which will be evaluated throughout.

290. In June 2023, the Office of Internal Oversight Services is scheduled to conduct an audit of information and communications technology systems supporting the protection of evidentiary data at UNITAD.

Impact of the pandemic and lessons learned

291. The continuation of the COVID-19 pandemic into 2022 had a minimal impact on the implementation of the UNITAD mandate, as the number of field missions conducted and meetings held with national counterparts increased significantly compared with 2021 with the mission's return to pre-pandemic working modalities in June 2022.
292. The mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including the use of online staff meetings and training, as well as online meetings with Government counterparts and civil society organizations. In 2024, these best practices will be continued through virtual meetings with government and other partners, virtual witness interviews in a number of cases, virtual meetings with third States and online training for staff members.

Programme performance in 2022

Strengthened capacity of the Iraqi judiciary to support domestic proceedings with respect to crimes committed by Da'esh

293. In 2022, the Investigative Team arranged training for members of the Iraqi judiciary both in Iraq and overseas. The Team organized an advanced training course on international humanitarian law and criminal law for 19 judges at the International Nuremberg Principles Academy in Nuremberg, Germany. The training was aimed at enhancing the practical investigative and prosecutorial skills of the participants and was tailored to meet the needs of the Iraqi judges who work on Da'esh crimes. The training also provided a forum to discuss the opportunities and limitations around the incorporation of international criminal legislation within the national legal framework. In addition, the Team provided Iraqi judicial investigators with technical training on open-source investigations to enhance their investigative skills for tracing and identifying Da'esh perpetrators, and to disrupt their future operations. This combination of training and advocacy at an international level facilitated by the Team has strengthened the capacity of the Iraqi judiciary to investigate and prosecute cases related to Da'esh crimes committed in Iraq.
294. Progress towards the objective is presented in the performance measure below (see table 73).

Table 73

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	Foundational training provided in the areas of international humanitarian law and international criminal law to members of the Iraqi Judiciary	Advanced training provided in the areas of international humanitarian law and international criminal law by a wide range of renowned international academics, legal experts and practitioners, leading to enhanced practical investigative and prosecutorial skills among members of the Iraqi judiciary

Planned results for 2024

Result 1: finalization of comprehensive thematic case briefs across all investigative priorities

Programme performance in 2022 and target for 2024

295. In 2022, the Investigative Team's work contributed to the development of independent investigative case assessments and met the target of an increased number of proceedings taken forward by domestic authorities. The completed reports have been updated with additional findings, while new lines of inquiry have been developed, leading to the development of two case assessments, on the development and use of chemical weapons by Da'esh in Iraq and the crimes committed by Da'esh against the Christian community in Iraq.
296. In 2024, while the Investigative Team anticipates continuing to update the case assessments produced, it will expand its investigative work to other areas, including the destruction of cultural heritage by Da'esh in Iraq, and the Da'esh leadership and hierarchical structure in Mosul and in Tall Afar. In cooperation with domestic authorities, the Team is providing support to assist such entities in prosecuting members of Da'esh for war crimes, crimes against humanity and genocide. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 74).

Table 74

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Domestic proceedings taken forward in Member States with respect to Da'esh crimes, on the basis of international-standard evidentiary material and comprehensive analyses produced by the Investigative Team	Completion of draft case assessments linked to initial investigative priorities; and initiation of field-based activities for remaining investigative priorities, resulting in the independent collection of additional evidence	Broadened informational scope to support proceedings taken forward by domestic authorities seeking to prosecute acts of Da'esh members in Iraq as war crimes, crimes against humanity and genocide through the development and completion of drafts on new investigative priorities and the continuation of field-based missions, resulting in the independent collection of additional evidence	Finalization of case assessments across all investigative priorities and increased number of proceedings taken forward by domestic authorities Finalization of case files for initial investigative priorities; and case files for remaining investigative priorities are initiated	Continued development and finalization of case assessments across the different investigative priorities, to provide support in proceedings taken forward by domestic authorities Continued building of case files linked to the investigative priorities identified

Result 2: furthering international accountability for members of Da’esh for crimes committed in Iraq through assistance to and information-sharing with third countries and their domestic proceedings

Proposed programme plan for 2024

297. In cooperation with third countries, the Investigative Team is increasingly assisting domestic authorities in their requests for support linked to specific persons of interest or suspects in their investigations and prosecutions. As of the end of February 2023, the Team had processed over 30 requests for assistance or information from 14 Member States.

Lessons learned and planned change

298. The lesson for the mission was that there is high and increasing demand among third States for the Investigative Team, through its evidence holdings, to support global efforts to hold Da’esh accountable for its crimes committed in Iraq. In applying this lesson, the mission will dedicate additional resources towards ensuring that a fully operationalized mechanism is in place to provide timely support to these global efforts. Expected progress towards the objective is presented in the performance measure below (see table 75).

Table 75

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	Support to 14 third countries requesting assistance or information related to evidence of international crimes committed by Da’esh in Iraq	Increased processing of requests for information amounting to 73 unique requests received from 13 third countries, in order to contribute to domestic proceedings to hold members of Da’esh accountable for international crimes committed in Iraq	Fully operationalized mechanism for sharing information and providing assistance to third countries that contribute to domestic proceedings holding members of Da’esh accountable for international crimes committed in Iraq	Increased focus on addressing requests from third countries linked to, or holding the prospect of, an investigation or proceedings linked to international crimes

Deliverables

299. Table 76 lists all deliverables of the mission.

Table 76
Deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Reports of the Special Adviser and Head of the Investigative Team for the Security Council	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	2	2	2	2
2. Meetings of the Security Council	2	2	2	2
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	16	17	20	23
3. Seminars aimed at sharing relevant knowledge and technical assistance with national authorities and enhancing their cooperation with the Investigative Team	16	17	20	23
Technical materials (number of materials)	30	30	35	35
4. Reports outlining detailed evidence-based understanding of potential responsibility of members of Da'esh leadership for atrocity crimes, for potential sharing with national authorities and use in criminal proceedings conducted by competent domestic courts	30	30	35	35
Fact-finding, monitoring and investigation missions (number of missions)	300	391	390	390
5. Investigation missions to collect testimonial, forensic, digital, documentary and other physical evidence; and investigation missions into sexual and gender-based violence	300	391	390	390
C. Substantive deliverables				
Consultation, advice and advocacy: consultation on ensuring complementarity of investigations with those of 7 key judicial criminal courts and 6 national security services; advocacy with 7 primary victims' groups to ensure that the interests of survivors are reflected in accountability efforts; and consultations with witnesses and victims' groups to ensure that they are fully engaged in the work of the Investigative Team.				
Databases and substantive digital materials: centralized evidentiary database.				
D. Communication deliverables				
Outreach programmes, special events and information materials: direct outreach with 12 Member States on Government-provided personnel deployments to support UNITAD in the implementation of its mandate, focusing on the deployment of personnel with specific expertise in forensic genetics, criminal analysis and investigations, with Arabic-speaking professionals as a particular priority.				
External and media relations: comprehensive media strategy aimed at providing a counter-narrative to online messaging by Da'esh.				
Digital platforms and multimedia content: 2 multimedia evidence visualizations and accompanying videos on 2 of the investigative priorities of UNITAD. These will include the Badush prison massacre in Mosul and the crimes committed by Da'esh against Christian communities across the Ninawa plains.				

B. Proposed post and non-post resource requirements for 2024

Resource requirements (regular budget)

Table 77

Financial resources

Change	–	–	–	–	(1)	–	–	2	(2)	–	(1)	2	3	5	–	–	–	4

^a Includes one P-4 general temporary assistance position.

300. The proposed resource requirements for the Investigative Team for 2024 amount to \$25,694,900 (net of staff assessment) and would provide for salaries and common staff costs (\$18,947,100) for 152 positions (1 Assistant Secretary-General, 2 D-1, 4 P-5, 15 P-4, 17 P-3, 6 P-2, 41 Field Service, 27 National Professional Officers, 31 Local level and 8 United Nations Volunteers) and requirements for 25 Government-provided personnel, as well as operational costs (\$6,747,800) comprising costs for consultants and consulting services (\$51,800), official travel (\$540,000), facilities and infrastructure (\$1,719,200), ground transportation (\$246,600), air operations (200,000), communications and information technology services (\$2,534,000), medical services (\$146,500) and other supplies, services and equipment (\$1,309,700).
301. For 2024, the organizational structure and staffing complement reflect the proposed abolishment of one organizational unit, the abolishment of one position, the establishment of five positions, the conversion of two positions and the redeployment of four positions:

Office of the Special Adviser

- (a) Continuation of one general temporary assistance position of Legal Officer (P-4) in Baghdad: This position, in the Office of the Special Adviser, continues to be required to meet the increasing demand for legal advice relating to the development of a legal framework to domesticate international crimes in the current penal code, and to provide legal opinions on the increasing number of third-party requests for information from Member States. This jurisdictional capacity needs to be carried out and developed in Baghdad, where the judicial

cooperation requirements of the mission are located. The core functions that this position undertakes would be required throughout the lifespan of the mission;

Office of Field Investigations

- (b) Abolishment of the Legal Strategy Unit: while, in the earlier phase of the organization, a centralized Legal Strategy Unit was necessary to guide and streamline the then newly initiated various areas of investigations and lines of inquiry, the Investigative Team is now more established, the investigations are more advanced and specific standard operating procedures have been put in place. The abolishment of this Unit would allow the analytical capacity, while still being critical for the advancement of the investigations and fulfilment of the mandate, to be distributed among the investigative units. The Team has been able to collect a vast amount of evidence, specifically from Iraqi authorities, which requires additional review and analysis;
- (c) Abolishment of one position of Senior Information Analyst, Political Affairs (P-5), in the Legal Strategy Unit in Baghdad: the Investigative Team has been able to collect a vast amount of evidence, specifically from Iraqi authorities, which now requires additional review and analysis. Such analytical capacity could be carried out at a lower working level than the current P-5 position. While the analytical capacity is still crucial for the furtherance of the ongoing investigations, creating more positions at a junior level can rejuvenate the workforce while ensuring that the mission can continue to properly analyse the vast amount of evidence already collected and has the right capacity to address the need for increasing support to national jurisdictions;
- (d) Establishment of two positions of Associate Criminal Analyst (P-2) in the Office of Field Investigations: the analysts will be responsible for conducting research and criminal intelligence analysis in support of investigations into alleged serious breaches of international humanitarian and criminal law. They will also collate and manage information and evidentiary material in the various proprietary data systems used by UNITAD and carry out analytical tasks and activities in support of the overall investigative effort. With the establishment of the two positions, the mission will increase the capacity to review the high volume of evidence collected, which will be incorporated into case assessments of Da'esh crimes and respond to the increasing number of requests from national jurisdictions;
- (e) Redeployment of one position of Legal Officer (P-3) from the Legal Strategy Unit in Baghdad to Field Investigation Unit 5 in Erbil: with the establishment and enhancement of investigative capacity in the Erbil office, the highly complex investigations there need to be supported by a Legal Officer to ensure the efficient creation and drafting of case assessments to be used before national courts;
- (f) Redeployment of one position of Legal Officer (international United Nations Volunteer) from the Legal Strategy Unit to the Office of Field Investigations: the Legal Officer will continue to serve as Legal Officer for the Office of Field Investigations in order to provide support with regard to remaining overarching legal issues and review of drafts, while the majority of the analytic and legal capacity in general is moved to the respective investigative units, where it is critical due to the advancement of their respective specific investigations;

Security Section

- (g) Redeployment of two positions of Close Protection Officer (Field Service) from Dahuk to Erbil to meet the additional number of field missions to high-risk areas. The redeployment is required to ensure that the increased field-based work can be conducted in a safe and effective manner;
- (h) Conversion of two positions of Close Protection Officer (Field Service) to National Professional Officer positions of Assistant Security Officer, one in Baghdad and one in Erbil: the conversion will provide support for the management of security transport assets and equipment, and provide dedicated support for security liaison with national security authorities at the local level. This proposal is in line with the mission's nationalization strategy;

- (i) Establishment of three positions of Field Security Assistant (Local level), two in Erbil and one in Dohuk, to support security liaison duties for the safe and secure conduct of witness operations at these locations, as well as to provide support to the increasing number of field missions in which national security liaison with escorting host government forces and other stakeholders is required. The three positions will coordinate security activities related to staff security and witness interviews.
302. Vacancy rates of 11.2 per cent for international staff, 8.1 per cent for National Professional Officers and 2.8 per cent for Local level staff have been applied to the estimates of staff costs, based on the actual average vacancy rates in 2022. A vacancy rate of 25.0 per cent has been applied to the costs of United Nations Volunteers based on the actual average vacancy rate in 2022. A vacancy rate of 60.0 per cent has been applied to the cost of government-provided personnel, based on the actual vacancy rate in March 2023.
303. The increased requirements proposed for 2024 compared with the appropriation for 2023 are attributable mainly to: (a) additional requirements under civilian personnel costs owing to the application of lower vacancy rates for all categories of civilian personnel except United Nations Volunteers and Government-provided personnel, updated higher salary rates for national staff and the proposed establishment of three Local level positions; (b) higher requirements under ground transportation with respect to the planned acquisition of five replacement vehicles that have exceeded their life expectancy, and higher cost of fuel; (c) higher requirements under communications and information technology due to proposed acquisitions to replace five desktop computers, 50 notebook computers and 10 personal communication devices that will reach their useful life by end of 2023, and higher requirements for software, licences and fees; and (d) increased requirements for individual contractors attributable to the higher number of individual contractors operationally required owing to increased transportation and heavy workload in the regions, as well as an increase in standard rates of individual contractors. The increased requirements are offset in part by reduced requirements attributable primarily to (a) lower requirements for mission subsistence allowance for Government-provided personnel; (b) lower requirements for consultants and consulting services owing to the increased in-house capacity resulting from recent recruitments; (c) absence of provision for the construction of overhead protection for prefabricated offices and the installation of solar panels budgeted in 2023, as well as lower cost of rental of premises due to revised cost-sharing arrangements; and (d) reduced requirements for medical supplies owing to existing stock levels of drugs and consumables.

Extrabudgetary resources

304. In 2023, extrabudgetary resources in the amount of \$6,200,000, including the funding of 50 posts (3 P-5, 4 P-4, 7 P-3, 4 P-2, 4 Field Service, 6 National Professional Officer, 11 Local level, 6 international United Nations Volunteer and 5 national United Nations Volunteer), will be utilized to enable the continuation of the Investigative Team's specialized activities in support of the implementation of its mandate. This will include the digitization and digital extraction of evidentiary material held by the Iraqi authorities, comprehensive investigations into mass graves containing the remains of victims of Da'esh, investigations into gender-based crimes and crimes against children committed by the group, capacity development with the Iraqi authorities in case-building and the use of digital forensics and the leveraging of information systems and advanced technology to deliver accountability.
305. In 2024, extrabudgetary resources are projected to amount to \$8,500,000, including the funding of 40 posts (3 P-5, 4 P-4, 7 P-3, 3 P-2, 4 Field Service, 7 National Professional Officer, 9 Local level, 2 international United Nations Volunteer and 1 national United Nations Volunteer), and are expected to support the excavation of mass graves and forensic anthropology activities, capacity-building to deliver accountability collaboratively with the Government of Iraq, and investigations into the financing of the international crimes of Da'esh. Additional funding will also be sought in 2023 to ensure the continuation of investigations into crimes against minority groups and the Investigative Team's witness protection and support services. Fundraising will also be undertaken to allow the

Team to expand into additional areas relevant to its mandate, such as the investigation of cultural heritage crimes and the use of chemical weapons by Da'esh.

306. The increase in the estimated extrabudgetary resources to be utilized in 2024 as compared with 2023 is due to additional donors pledging to contribute to the trust fund to support the implementation of Security Council resolution 2379 (2017).
307. Voluntary contributions remain essential to the Investigative Team's ability to implement its mandate to the fullest extent. Within the Office of Field Investigations, three out of the six field investigation units are funded by extrabudgetary resources. In addition, the thematic investigation into the financing and financial liability of Da'esh for its international crimes is fully funded by voluntary contributions. Similarly, the Sexual and Gender-based Crimes and Crimes against Children Unit has a number of important posts funded through extrabudgetary resources. The Team's Forensic Sciences Unit remains reliant solely on extrabudgetary funding. Key posts within other parts of the Office of Evidence Management are funded through extrabudgetary projects responsible for the majority of the Team's capacity-building activities.
308. Capacity development of the Iraqi criminal justice chain is essential for mandate implementation, in particular as the Investigative Team is obligated to deliver accountability collaboratively with the Government of Iraq. Key aspects of this include joint case-building with the Iraqi judiciary, the digitization of their evidentiary holdings and training on international humanitarian law and international criminal law. All of these endeavours are fully funded through extrabudgetary support.

Annex I

Summary of follow-up action taken to implement the decisions and requests made by the General Assembly, including the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/77/7/Add.3)

The Advisory Committee was further informed that, separately from the UNITAD information technology system and, through a combination of ongoing cross-training in cybersecurity to other members of the Investigative Team and the procurement and implementation of specialized software licences (as approved by the Office of Information and Communications Technology), trained investigators could perform open-source intelligence searches that anonymize and protect the identity of the investigator and protect the user from online malware and malicious attacks. The Advisory Committee trusts that the lessons learned and best practices, including measures to achieve the efficient use of resources, will be shared with other departments, offices and entities, including the Office of the United Nations High Commissioner for Human Rights in the context of its investigative missions (para. 22).

The Advisory Committee trusts that further efforts will be made to achieve equitable geographical representation of Member States amongst the staff in thematic cluster II and that updated information thereon will be included in all future budget submissions (para. 28).

The United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant (UNITAD), on a continuing basis, shares with the Office of the United Nations High Commissioner for Human Rights and other United Nations counterparts the lessons learned and best practices from these open-source intelligence searches (i.e. through the sharing of solutions for the safe and secure exploitation of open-source data, users are provided with an additional layer of obfuscation and security).

Missions continue efforts to achieve equitable geographical representation. For instance, UNITAD is focused on improving geographical distribution by targeted outreach to attract more qualified candidates from a diverse geographical background, reviewing the nationalities of recommended candidates at the selection stage for consideration by the Head of Mission and reporting on key performance indicators to monitor the status and identify opportunities for improvement. In addition, the mission is working on a dashboard on different indicators of staffing strength which includes geographical distribution, and will continue to improve geographical representation through different outreach activities and platforms for all recruitment competitions.

^b Includes National Professional Officers and Local level staff.

^c Includes international and national United Nations Volunteers.

2. The proposed vacancy rates applied in the budget take into account the experience to date. The assumptions considered for the proposed vacancy factors include the 12-month average vacancy rate in 2022, and the actual vacancy rate as at 31 March 2023. The lower of the two was used as the budgeted vacancy rate. This is in line with the policy guidance provided by the Field Operations Finance Division of the Department of Management Strategy, Policy and Compliance, to improve the accuracy and consistency of the vacancy factors applied in the proposed budgets for 2024 and to ensure that proposed vacancy rates are based, as much as possible, on actual rates. A vacancy rate of 50 per cent has been applied in the calculation of costs for the proposed establishment of new posts and positions, or posts and positions proposed for reassignment or conversion.
3. For the sake of brevity, the present document will include a section on extrabudgetary resources only for those missions that have projected extrabudgetary resources in 2023 or 2024.

II. Cross-cutting information

Gender perspective

4. Special political missions are guided by Security Council resolutions [1325 \(2000\)](#), [1820 \(2008\)](#), [1888 \(2009\)](#), [1889 \(2009\)](#), [2122 \(2013\)](#), [2242 \(2015\)](#), [1960 \(2010\)](#), [2106 \(2013\)](#), [2467 \(2019\)](#), and [2493 \(2019\)](#), which, together, constitute the women and peace and security agenda and mandate the incorporation of a gender perspective into the political work of the United Nations, including in special political missions. The missions are also guided by General Assembly resolution [75/100](#) on the comprehensive review of special political missions, in which the Assembly reaffirmed the important role of women in the prevention and resolution of conflicts and in peacebuilding and recognized the importance of the equal and effective participation and the full involvement of women at all levels, at all stages and in all aspects of the peaceful settlement of disputes, conflict prevention and conflict resolution.
5. Specific examples of how special political missions integrate a gender perspective into their operational activities, deliverables and results, are given under the individual missions in the present report.

Disability inclusion

6. In line with the United Nations Disability Inclusion Strategy, special political missions review the Strategy with a view to further advancing disability inclusion through inclusive messaging, awareness-raising and promoting the Strategy through their work, including in political and peace processes. The missions also support mitigating measures to overcome accessibility challenges, in addition to the efforts by relevant United Nations entities to ensure the accessibility of facilities, platforms, security and other infrastructure to facilitate easy access and use by persons with disabilities.

Evaluation activities

7. The Department of Political and Peacebuilding Affairs will support the biennial assessment by the Office of Internal Oversight Services on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives. Mission-specific evaluation activities are described, as applicable, under the specific missions in the present report.

Impact of the pandemic and lessons learned

8. The continuation of the coronavirus disease (COVID-19) pandemic into 2022 impacted the implementation of mandates in the special political missions. Specific examples are provided under the individual missions in the present report.
9. Reflecting the importance of continuous improvement and responding to the needs and requests of Member States, the proposed programme plans for the special political missions for 2024 continue to incorporate lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. At the same time, it is assumed that those operational conditions have improved and allow for mandate implementation through formerly established approaches. Any modifications to planned deliverables would be in pursuance of the objectives, strategies and mandates and would be reported as part of the programme performance information.

III. Special political missions

1. United Nations Office for West Africa and the Sahel

(\$15,347,800)

Foreword

In 2022, inclusive and peaceful elections brought renewed hope for peace consolidation and democratic governance in parts of the region. However, unconstitutional changes of Government in three countries and an attempted military takeover, together with restrictions on political space and civil liberties in some countries, exposed underlying governance fragilities. More promisingly, through effective regional diplomacy, agreement was reached on transition calendars in Burkina Faso and Guinea. On the security front, violent attacks against civilian and military targets continued, with the situation increasingly impacting coastal countries. In central Sahel, many schools and health centres closed owing to persistent insecurity, which also caused high displacement rates. Expectations are high that regional security initiatives, such as the Accra Initiative, will support ongoing efforts to stem the tide of insecurity in the region.

In 2024, the United Nations Office for West Africa and the Sahel will continue its preventive and peace consolidation engagements. Our good offices and political advocacy efforts will focus on building consensus on political and electoral processes and strengthening democratic governance in support of just, peaceful and inclusive societies. We will place emphasis on strengthening capacities and pursuing coordinated and coherent approaches to address conflict drivers. Partnerships across the region and within the United Nations system will be intensified in pursuit of these objectives, with the hope of restoring legitimacy in democratic traditions and accountable governance in the region.

(Signed) Leonardo Santos **Simão**
Special Representative of the Secretary-General for West Africa and the Sahel
Head of the United Nations Office for West Africa and the Sahel

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

10. The United Nations Office for West Africa and the Sahel (UNOWAS) is responsible for conflict prevention and ensuring sustainable peace and security in West Africa and the Sahel. The mandate of UNOWAS derives from the exchanges of letters between the Secretary-General and the President of the Security Council (S/2016/88 and S/2016/89, S/2016/1128 and S/2016/1129, S/2019/1009 and S/2020/85, S/2023/70 and S/2023/71, the latter of which reflected the Council's extension of the mandate of the mission to 31 January 2026), as well as Security Council resolution 2349 (2017).
11. UNOWAS will continue to monitor political developments, identify emerging peace and security threats and conduct good offices activities to prevent conflict, sustain peace and consolidate peacebuilding efforts and political stability in West African and Sahelian countries; enhance regional and subregional partnerships to address cross-border and cross-cutting peace and security threats in West Africa and the Sahel; support, through political advocacy and convening, the implementation of the United Nations integrated strategy for the Sahel; and promote good governance, respect for the rule of law, human rights and the mainstreaming of gender in conflict prevention, management and resolution. In doing so, it will work closely with regional and subregional entities and will enhance its collaboration across the United Nations system.

Programme of work

Objective

12. The objective, to which this mission contributes, is to achieve peace and security in West Africa and the Sahel.

Strategy and external factors for 2024

13. To contribute to the objective, the mission will:
 - (a) Strengthen its early warning and conflict prevention, resolution and management actions in close partnership with national, subregional and regional partners, with a particular focus on countries undergoing political transitions and scheduled to hold elections in 2024, namely Burkina Faso, Cabo Verde, Ghana, Guinea-Bissau, Mali, Mauritania and Senegal, as well as take steps to anticipate and address threats to social cohesion, de-escalate crises surrounding political, constitutional and reform processes, and address governance-related challenges;
 - (b) Further enhance partnerships with regional institutions to address regional peace and security challenges; with civil society organizations, including traditional and religious leaders, youth and women; and with United Nations entities to address the root causes of instability and insecurity in the region and to reinforce the peace-security-development nexus;
 - (c) Accelerate the implementation of the women and peace and security and youth, peace and security agendas, including by ensuring the promotion of gender and meaningful involvement of women and young people in political and decision-making processes and mediation initiatives; and advance the promotion of good governance and respect for human rights and the rule of law.

14. The above-mentioned work is expected to result in:
 - (a) Prevention and mitigation of conflicts, consensual political processes, the consolidation of democracy and political stability; and peaceful and inclusive electoral processes, as well as mechanisms for prevention of conflicts and potential election-related violence;
 - (b) Strengthened subregional cross-border responses to challenges related to climate change, transnational organized crime, illicit trafficking, farmer and herder dynamics, terrorism and violent extremism conducive to terrorism;
 - (c) Coherent, comprehensive and integrated approaches to addressing the root causes of instability, intercommunal violence and conflict in the Sahel;
 - (d) Mainstreaming of gender into conflict prevention, management and resolution activities in West Africa and the Sahel;
 - (e) Improved governance and security structures and mechanisms and enhanced respect for human rights and the rule of law in the region.
15. With regard to cooperation with other entities, UNOWAS partners with the Economic Community of West African States (ECOWAS), the Mano River Union, the Lake Chad Basin Commission, the Liptako-Gourma Authority, the Gulf of Guinea Commission, the Group of Five for the Sahel, the Accra Initiative and the African Union to strengthen and harmonize regional capacities for conflict prevention and resolution, peacebuilding and sustaining peace; advance the promotion of good governance and respect for human rights and the rule of law, and the promotion of gender and the active participation of women and young people in political and decision-making processes; and support regional responses to address cross-border threats to peace and security, including transnational organized crime, illicit trafficking, farmer and herder dynamics, terrorism and violent extremism conducive to terrorism as well as piracy and other forms of maritime crime in the Gulf of Guinea. Collaboration with regional and subregional partners will take place through joint high-level missions, as well as technical assessment and fact-finding missions, based on principles of subsidiarity and complementarity. In addition, UNOWAS will continue to host the secretariat and ensure coordination of the Working Group on Women, Youth, Peace and Security in West Africa and the Sahel.
16. With regard to inter-agency coordination and liaison, UNOWAS will promote synergies with the Regional Collaborative Platform, the Development Coordination Office, as well as resident coordinators, humanitarian coordinators, United Nations country teams and other United Nations agencies, funds and programmes to address the multifaceted challenges facing the region. Coordination with United Nations entities, including with the Office of the Special Coordinator for Development in the Sahel, will continue within the United Nations integrated strategy for the Sahel framework and in line with the mission's convening and political advocacy roles. The engagement of UNOWAS will remain consistent with the priorities of the integrated strategy, with a focus on cross-border threats to peace and security and efforts to counter radicalization. UNOWAS will work closely with the resident coordinators in its mission area on the sustaining peace agenda and other priority issues. In that context, it will continue to coordinate with the United Nations Development Programme (UNDP) and with the Peacebuilding Support Office of the Department of Political and Peacebuilding Affairs in relation to any joint interventions. UNOWAS will deepen its engagement with UNOCA on transregional issues affecting both West and Central Africa, including the threats posed by Boko Haram factions, as well as conflicts related to farmer-herder dynamics, piracy and maritime security in the Gulf of Guinea.
17. In relation to the external factors, the overall plan for 2024 is based on the following planning assumptions:
 - (a) The demand remains high for the good offices of UNOWAS to facilitate political dialogue and ease political tensions, and to support countries undergoing political transitions and elections;

- (b) The Heads of State and Government of West Africa, ECOWAS, the Lake Chad Basin Commission, Mano River Union, the African Union, the Group of Five for the Sahel, the Gulf of Guinea Commission and the Accra Initiative demonstrate commitment to mobilizing resources to address challenges to peace and stability and the political will to sustain regional peace and security mechanisms. The ECOWAS early warning and response mechanism and other regional conflict prevention instruments, including the good governance protocol, are fully operationalized at the regional, national and local levels, in close collaboration with civil society;
 - (c) The international community remains committed to supporting the countries of the region and regional and subregional organizations in addressing governance and security challenges. Peacebuilding and peace consolidation efforts by regional and subregional organizations and other partners, including in post-electoral contexts, continue;
 - (d) There is strong political commitment on the part of Member States, regional organizations and civil society organizations to work with the United Nations in the context of the United Nations integrated strategy for the Sahel. Political and technical level engagements with the United Nations Multidimensional Integrated Stabilization Mission in Mali (MINUSMA) on regional peace and security issues and with UNOCA in support of the Gulf of Guinea Commission and the Interregional Coordination Centre for Maritime Safety and Security in the Gulf of Guinea continue.
18. The mission integrates gender and youth perspectives in its operational activities, deliverables and results, as appropriate. The good offices role of the Special Representative includes consultations with women's groups and young people, and UNOWAS will continue to advocate for the implementation of Security Council resolutions [1325 \(2000\)](#) and [2250 \(2015\)](#), and subsequent resolutions on women and peace and security and on youth, peace and security through the formulation and implementation of national and regional action plans.

Impact of the pandemic and lessons learned

19. The continuation of the COVID-19 pandemic into 2022 had minimal impact on mandate implementation, as most of the restrictive measures enacted to respond to COVID-19 were lifted. As a result, UNOWAS deployments across the region and beyond, as well as in-person activities, resumed to near pre-pandemic levels.
20. The mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic including by conducting hybrid activities, encouraging virtual participation at external partner events and enabling flexible working arrangements, where such approaches do not adversely impact on mandate implementation.

Programme performance in 2022

Reduction in electoral-related tensions throughout West Africa and the Sahel

21. In 2022, the Special Representative for West Africa and the Sahel and his Deputy Special Representative conducted 22 good offices and mediation missions throughout the region, including those conducted jointly with ECOWAS, to facilitate the rapid restoration of constitutional order in Burkina Faso and Guinea, support peaceful elections in the Gambia, Benin and Nigeria, and foster inclusive political reform and dialogue processes across the region. The Special Representative intensified his preventive diplomacy engagements in connection with Burkina Faso to secure the commitment of the transitional authorities to respect agreed transition timetables and to establish a transition monitoring and evaluation mechanism. In support of ECOWAS-led mediation efforts, the Special Representative engaged with Guinean political stakeholders and external partners to facilitate constructive dialogue and ensure an inclusive political transition. In election settings, UNOWAS undertook good offices missions, as well as technical assessments to support peaceful

and inclusive elections in the Gambia in 2022 and a transparent electoral process in the lead-up to elections in Benin scheduled for 2023. In addition, in anticipation of the general elections in Nigeria scheduled for 2023, the Special Representative and his Deputy conducted pre-electoral good offices missions to meet with the presidential candidates, as well as national and international partners, the resident coordinator and representatives of United Nations entities in the country.

22. The above-mentioned work contributed to an overall reduction in violence and increased political stability in countries conducting electoral processes in West Africa and the Sahel.
23. Progress towards the objective is presented in the performance measure below (see figure I).

Figure I

Performance measure: number of high-level good offices and mediation missions carried out to prevent election-related tensions and consolidate political stability

Planned results for 2024

Result 1: reduced tensions related to electoral processes and political reforms throughout West Africa and the Sahel

Programme performance in 2022 and target for 2024

24. The mission's work contributed to a reduction in violence and increase in political stability in countries conducting electoral processes, undergoing political reforms and experiencing unconstitutional changes of government. This met the planned target of enhanced good offices and mediation efforts to address election-related tensions throughout West Africa and the Sahel.
25. In 2022, the high-level political engagement and good offices deployments of the Special Representative in the transition context of Burkina Faso resulted in an agreement by the transition authorities to commit to previously agreed transition timetables and to the establishment of a transition monitoring committee.
26. Also in 2022, in collaboration with United Nations partners, UNOWAS supported authorities of different states in Nigeria in preparing and organizing national stakeholders' forums as a demonstration of their collective resolve to enhance sustainable peace, security and development in Nigeria in the context of the 2023 general elections. The beneficiaries present, which included traditional and religious leaders, the National Peace Committee, security forces, and women and youth groups, considered that the forums contributed positively to the creation of conducive conditions for peaceful and credible elections.
27. In 2024, a series of presidential or legislative elections are scheduled to be held in Burkina Faso, Ghana, Guinea-Bissau, Mali, Mauritania and Senegal in accordance with constitutional and legal time frames and in keeping with agreed transitional calendars. The mission will conduct high-level good offices and mediation missions to contribute to the peaceful holding of credible elections in

those countries. It will also deploy technical assessment missions to work closely with the resident coordinators and United Nations country teams, which will focus on identifying and defusing emerging peace and security threats or pre-electoral tensions.

28. Progress towards the objective and target for 2024 are presented in the performance measure below (see table 3).

Table 3
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
The conduct of generally peaceful, inclusive and credible elections in five countries in West Africa	Increased good offices and mediation efforts to address election related tensions/ disagreements throughout West Africa and the Sahel	Enhanced good offices and mediation efforts to address election related tensions/ disagreements throughout West Africa and the Sahel	Increased good offices and mediation efforts to address election related tensions/ disagreements throughout West Africa and the Sahel	Peaceful electoral processes and political reforms throughout West Africa and the Sahel

Result 2: strengthened regional partnership and leadership role in support of the implementation of the United Nations integrated strategy for the Sahel

Programme performance in 2022 and target for 2024

29. The Special Representative leveraged his political leadership and strategic guidance to intensify implementation of the United Nations integrated strategy for the Sahel. He chaired the thirteenth meeting of the steering committee, held in May 2022 in Chad, and facilitated the activities of the strategy's security pillar. Twelve of his good offices' missions undertaken in 2022 were to Sahel countries in response to the rapidly deteriorating political, security and humanitarian situation in the area. The mission worked closely with the Office of the Special Coordinator for Development in the Sahel, ensuring an integrated and joint approach to implementation of the United Nations integrated strategy for the Sahel. A study on the impact of geopolitics on peace and prosperity in the Sahel was conducted in 2022 and will be finalized in 2023. The mission also worked closely with the Independent High-Level Panel on Security and Development in the Sahel, led by the former President of the Niger, Mahamadou Issoufou, launched in September 2022.
30. For 2024, the mission will continue to strengthen partnerships with regional organizations and other stakeholders on the basis of its comparative advantages in pursuit of peace and security objectives. It will also continue to harness its leadership role to drive implementation of the United Nations integrated strategy for the Sahel, through political advocacy and convening, in line with its mandate.

Lessons learned and planned change

31. A lesson learned for the mission was that, increasingly, the region is taking a lead role on peace and security matters, pursuing homegrown and regional initiatives to mediate political crises and tackle governance deficits and security challenges that draw on lessons learned from various past interventions in the region. In applying the lesson, the mission will continue to strengthen partnerships with regional organizations and other stakeholders on the basis of its comparative advantages in pursuit of peace and security objectives. Emphasis will be placed on strengthened collaboration across the United Nations system and coherent regional and international approaches to avoid overlap and maximize synergies to more effectively address root causes as well as develop responses that are locally driven and people-centred.

32. Expected progress towards the objective is presented in the performance measure below (see figure II).

Figure II

Performance measure: number of briefings, high level meetings and advocacy engagements between leadership of the mission and regional partners in the Sahel

Deliverables

33. Table 4 lists all deliverables of the mission.

Table 4

Deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Reports of the Secretary-General to the Security Council	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	2	2	2	2
2. Meetings of the Security Council	2	2	2	2
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	9	9	15	15
3. Workshops on peace and security, including terrorism, violent extremism conducive to terrorism, transnational organized crime, human rights and the implementation of Security Council resolution 1325 (2000) and subsequent resolutions on women's rights	9	9	15	15
Technical materials (number of materials)	4	4	4	4
4. Issue papers on peace and security, human rights, gender and young people	4	4	4	4
Fact-finding, monitoring and investigation missions (number of missions)	15	15	15	15
5. Advocacy and support for integrated subregional and cross-border responses on cross-cutting threats to peace and security, in particular election-related instability and challenges related to governance deficits, security sector reform, transnational organized crime, illicit trafficking, terrorism and violent extremism conducive to terrorism; consultations on human rights during political and electoral processes; and advocacy for the effective implementation of the United Nations integrated strategy for the Sahel and advocacy for enhanced strategic cooperation and coordination in the Sahel in fulfilment of the objectives of the integrated strategy	15	15	15	15

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
--------------------------	-----------------	----------------	-----------------	-----------------

C. Substantive deliverables

Good offices: provision of good offices, including jointly with ECOWAS and the African Union, on conflict prevention across countries of West Africa and the Sahel in consideration of human rights and gender aspects.

Consultation, advice and advocacy: monitoring missions to countries of West Africa and the Sahel to analyze developments and emerging threats and identify entry points for early warning and conflict prevention activities; monitoring missions to Burkina Faso and the Gambia to support United Nations initiatives to sustain peace; and pre- and post-electoral missions to countries conducting elections in West Africa and the Sahel to monitor tensions related to the electoral process.

D. Communication deliverables

Outreach programmes, special events and information materials: digital and print (quarterly), information campaigns, brochures, flyers, information notes to promote the good offices and the mission's activities while enhancing the visibility of the mission.

External and media relations: media encounters, briefings, press conferences, press releases, statements and op-eds.

Digital platforms and multimedia content: dissemination of information and promotion of the good offices and the activities of the mission through its website and social media.

B. Proposed post and non-post resource requirements for 2024

Resource requirements (regular budget)

Table 5

Financial resources

(Thousands of United States dollars)

Category of expenditure	2022		2023		2024		Variance	
	Appropriation	Expenditure	Appropriation	Requirements	2024 vs. 2023		Increase/(decrease)	
	(1)	(2)	(3)	(4)	(5)=(4)-(3)			
Military and police personnel costs	146.6	87.2	113.5	113.5			–	
Civilian personnel costs	9 371.8	9 497.7	9 292.6	9 755.1			462.5	
Operational costs	5 140.2	4 941.6	5 429.1	5 479.2			50.1	
Total (net of staff assessment)	14 658.6	14 526.5	14 835.2	15 347.8			512.6	

Table 6

	USG	ASG	D-2	D-1	P-5	P-4	P-3	P-2	FS	GS	Subtotal	NPO	LL	Subtotal	International	National	Subtotal	
Approved 2023	1	1	–	2	9	14	10	1	6	–	44	9	22 ^a	31	–	–	–	75
Proposed 2024	1	1	–	2	9	14	10	1	6	–	44	9	22 ^a	31	–	–	–	75
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

^a Includes one general temporary assistance position.

The following abbreviations are used in the tables: ASG, Assistant Secretary-General; FS, Field Service; GS, General Service; NPO, National Professional Officer; USG, Under-Secretary-General.

34. The proposed resource requirements for 2024 for UNOWAS amount to \$15,347,800 (net of staff assessment) and would provide for the deployment of one military adviser and one police adviser (\$113,500), salaries and common staff costs (\$9,755,100) for 44 international positions (1 Under-Secretary-General, 1 Assistant Secretary-General, 2 D-1, 9 P-5, 14 P-4, 10 P-3, 1 P-2 and 6 Field Service) and 31 national positions (9 National Professional Officer and 22 Local level), as well as operational costs (\$5,479,200), comprising the costs for consultants and consulting services (\$172,600), official travel (\$789,300), facilities and infrastructure (\$249,700), ground transportation (\$70,600), air operations (\$2,608,300), communications and information technology (\$710,300), and other supplies, services and equipment (\$878,400).
35. In 2024, no change is proposed to the number and levels of the positions.
36. The mission's approved 2023 staffing table includes one general temporary assistance position. It is proposed that this position, Finance and Budget Assistant (Local level), be continued in 2024, to support and maintain internal control over the financial transactions of the mission.
37. A vacancy rate of 11.4 per cent has been applied to the estimates for international positions based on the actual vacancy rate in March 2023. A vacancy rate of zero per cent has been applied to the estimates for National Professional Officer positions, and 4.5 per cent for Local level positions, based on the actual vacancy rates in March 2023. A vacancy rate of zero per cent has been applied to the estimates for military and police advisers are based on actual vacancy rate in March 2023.
38. The increase in requirements for 2024 compared with the appropriation for 2023 is attributable to the following: (a) an increased requirement for international staff, resulting mainly from the application of the latest salary scales and the lower vacancy rate of 11.4 per cent applied compared with 16 per cent approved in 2023, offset in part by the decrease in national staff costs (National Professional Officer and Local level) resulting from the application of the latest salary scales and common staff costs; (b) additional requirements under consultants and consulting services owing to consultancy work to elaborate an integrated planning and resource mobilization strategy; (c) official travel attributable to public information activities to promote the mandate and activities of UNOWAS and to support the Special Representative's good offices and election-related activities in the subregion; (d) communications and information technology for the acquisition of software, licences and fees; and (e) other supplies, services and equipment for individual contractor to cover the car-log system. The increase is partially offset by decreased requirements under facilities and infrastructure owing to lower costs for utilities, maintenance and security services in the new United Nations House in Dakar based on latest estimates, and decreased requirements under air operations due to lower fuel cost for aircraft and lower aircrew subsistence.

Extrabudgetary resources

39. In 2023, extrabudgetary resources in the amount of \$690,000 are estimated, comprising the following:
 - (a) Voluntary contributions of \$515,000 are projected to be utilized to support activities aimed at building the capacity of women in politics; promoting gender equality and women empowerment in the security sector; fighting hate speech and divisive discourse in the Mano River Basin; convening a regional forum of Peace and Development Advisers of West Africa and the Sahel; strengthening conflict prevention, regional analysis and coordination in the Sahel; addressing various threats to peace and security in the region including climate change, extremism and impunity; and promoting social inclusion and cohesion in West Africa and the Sahel;
 - (b) Cost recovery resources of \$175,000 projected to be utilized would provide for support to the United Nations Educational, Scientific and Cultural Organization in Dakar for utilities and maintenance services, the United Nations Office on Drugs and Crime for office-sharing with the UNOWAS Liaison Cell Office in Mauritania for rental and utilities services, MINUSMA for air transportation and office accommodation in Senegal, and the UNOWAS Liaison Cell Office in Abuja.

40. In 2024, extrabudgetary resources in the amount of \$690,000 (comprising \$515,000 in voluntary contributions and \$175,000 in cost recovery resources) are projected to be utilized, to continue the above-mentioned supporting activities aimed at achieving peace and security in West Africa and the Sahel, as well as activities funded from cost recovery.

2. United Nations Assistance Mission in Somalia

(\$101,275,600)

Foreword

The year 2024 offers an opportunity for the Federal Government of Somalia to advance progress on its key national priorities, with a focus on the constitutional review process, deepening federalism and inclusive politics. Continued efforts to strengthen security, stabilize areas recovered from Al-Shabaab, and advance priority legislation are further expected to be key focus areas. The government is also anticipated to maintain its dialogue with federal member states towards progress on the country's national priorities and the resolution of some contentious issues regarding federalization.

Continued efforts to strengthen federal and state-level institutions in Somalia will also need to extend to local governance structures, particularly in newly recovered areas, and related stabilization support. Several subnational electoral processes are scheduled to take place in 2024, while preparations for national parliamentary and presidential elections planned for 2026 are expected to be advanced. The ongoing security transition will remain a priority for 2024, with the African Union Transition Mission in Somalia (ATMIS) continuing a planned drawdown and Somali security forces and institutions assuming the lead security responsibility by the end of 2024. Al-Shabaab will likely remain a significant threat to security in the country.

Somalia will continue to face recurring and protracted humanitarian challenges, including climatic shocks, insecurity and displacement. The United Nations Assistance Mission in Somalia and the United Nations family overall will maintain their commitment to Somalia and its people, ensuring coherence in their support to peace and reconciliation efforts, as well as humanitarian and development assistance.

(Signed) Anita Kiki **Gbeho**
Officer-in-Charge
United Nations Assistance Mission in Somalia

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

41. The United Nations Assistance Mission in Somalia (UNSOM) is responsible for providing: (a) good offices to support the advancement of Somali Government-led inclusive political processes and reconciliation; (b) technical, operational and logistical support for inclusive universal elections with the representation and participation of women; (c) assistance in security sector reform and improvements in rule of law institutions, as well as support for the comprehensive approach to security and implementation of the Somalia Transition Plan; and (d) promotion and protection of human rights and system-wide support for the implementation of the human rights due diligence policy. The Mission also provides strategic advice and support to bolster the Government's ability to deliver services, attract investment and advance the 2030 Agenda for Sustainable Development, in close collaboration with the United Nations country team and international financial institutions. The mandate is defined in Security Council resolutions [2102 \(2013\)](#), which established the Mission, and renewed in subsequent resolutions [2158 \(2014\)](#), [2221 \(2015\)](#), [2232 \(2015\)](#), [2275 \(2016\)](#), [2358 \(2017\)](#), [2408 \(2018\)](#), [2461 \(2019\)](#), [2516 \(2020\)](#), [2540 \(2020\)](#), [2592 \(2021\)](#), [2632 \(2022\)](#) and [2657 \(2022\)](#), the latter of which reflected the Council's extension of the Mission's mandate until 31 October 2023.
42. In its resolution [2657 \(2022\)](#), the Security Council welcomed the strategic review of UNSOM and endorsed the benchmarks and recommendations outlined therein. The Council also encouraged UNSOM to support Somalia in accelerating implementation of the national stabilization strategy and State-level stabilization plans, and in ensuring timely and balanced support to areas newly or recently recovered from Al-Shabaab. Furthermore, the Council requested the Mission to maintain and strengthen its presence across Somalia, and to continue to strengthen its cooperation with Somalia and the African Union Transition Mission in Somalia (ATMIS).

Programme of work

Objective

43. The objective, to which this Mission contributes, is to achieve peace, security, political stability, and national reconciliation in Somalia through the delivery of the mandate established by the Security Council and in line with the priorities of the Federal Government of Somalia.

Strategy and external factors for 2024

44. To contribute to the objective, the Mission will:
 - (a) Support the Federal Government of Somalia in advancing its national priorities, through outreach, good offices and strategic advice, in coordination with partners, towards the completion of the constitutional review process, and deepening federalism and inclusive politics;
 - (b) Support the Government and its relevant electoral management bodies, at the federal and state level, with strategic advice, technical assistance and the coordination of international technical support to prepare for and implement electoral processes at the subnational and national levels;
 - (c) Provide strategic and technical advice to women leaders, civil society and the Federal Government, as well as federal member states to ensure women's enhanced participation and

representation in government national and subnational electoral processes, reconciliation and mediation processes, public spheres, leadership and decision-making;

- (d) Support the Federal Government of Somalia in the further development of the security sector and implementation of the Somalia Transition Plan, in coordination with ATMIS and partners; and in further enhancing the ability of Somali authorities to mitigate the threat from explosive ordnance, including improvised explosive devices, and effectively managing weapons and ammunition;
 - (e) Support the Federal Government of Somalia in accelerating implementation of the national stabilization strategy, state-level stabilization plans and local reconciliation initiatives through good offices, strategic advice and technical assistance;
 - (f) Provide good offices, strategic advice and technical assistance for the development of a federated justice system, judicial structures and enhanced access to justice, especially in newly or recently recovered areas, including through community dialogue; and support efforts to enhance cooperation and coordination across the justice chain, at different levels of government;
 - (g) Provide technical support to the Federal Government of Somalia to deliver on its commitments made during the universal periodic review process;
 - (h) Continue to support the Federal Government of Somalia in coordinating international partners around the national priorities of Somalia, building consensus and advocating around joint messaging and programmatic approaches. The Mission will integrate cross-cutting themes, such as human rights, gender, youth, inclusivity, climate change and resilience, into its activities;
 - (i) Advance its transition planning efforts, in close coordination with the Federal Government of Somalia, ATMIS, the United Nations Support Office in Somalia (UNSOS) and United Nations agencies, funds and programmes.
45. The above-mentioned work is expected to result in:
- (a) Meeting the Mission's commitments set out in the United Nations Sustainable Development Cooperation Framework for the period 2021–2025, aligned with the national priorities on inclusive politics, security, rule of law, development and economic growth;
 - (b) Support for the Federal Government of Somalia in the implementation of the national development plan (2020–2024); and work towards the priorities reflected in the National Consultative Council communiqué of June 2022;
 - (c) Support for the Federal Government of Somalia in advancing the security transition, in close coordination with ATMIS.
46. With regard to cooperation with other entities, UNSOM will continue to work closely with ATMIS in alignment with strategic and operational priorities, including through the senior leadership coordination forum comprising the Heads of ATMIS, UNSOM, UNSOS and other coordination mechanisms. Human rights due diligence policy coordination and cooperation will also continue to ensure compliance, the promotion of accountability and the implementation of mitigation measures identified in risk assessments. This cooperation will be particularly important in the context of a progressive transfer of security responsibilities to Somali security forces.
47. With regard to inter-agency coordination and liaison, building upon its current integration pilot initiative, UNSOM will continue to further integrate and cooperate with United Nations agencies, funds and programmes, and to advance the priorities outlined in the United Nations Sustainable Development Cooperation Framework (2021–2025) in support of the Government's priorities.

48. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Political dialogue between the Federal Government of Somalia and federal member states continues, with a focus on advancing national priorities;
 - (b) Progress on the constitutional review process continues, with some contentious issues still requiring attention; and the parliamentary joint oversight committee and the Independent Constitutional Review and Implementation Commission are operational;
 - (c) Priority legislation is passed, further advancing state-building;
 - (d) Federal member state elections take place in accordance with a schedule and electoral model agreed to with the Federal Government ahead of planned national elections in 2026. Electoral management bodies are established at the federal member state level and electoral legislation is enacted to conduct local council elections;
 - (e) Somalia will progressively assume responsibility for security matters, with the Federal Government and federal member states making progress towards building security institutions as outlined in the national security architecture and the Somalia Transition Plan;
 - (f) Somali security forces are able to effectively hold territory, rendering ongoing stabilization efforts more sustainable;
 - (g) The Security Council, the African Union Peace and Security Council and the wider international community will continue to support the security transition in Somalia;
 - (h) Efforts to advance the development of the justice system will continue;
 - (i) Human rights violations by parties to the conflict will remain of concern;
 - (j) Al-Shabaab will likely remain the greatest threat to security and stability in Somalia, followed by clan violence and localized disputes;
 - (k) Somali young people will remain vulnerable to radicalization and recruitment by extremist groups, in particular Al-Shabaab;
 - (l) Women and girls will continue to be disproportionately affected by inequality and by violations of international humanitarian law and violations and abuses of human rights;
 - (m) The country will face recurring climate-related shocks, including drought and flooding.
49. The Mission continues to integrate gender perspectives in its activities, deliverables and results, as appropriate, including support for the increased participation and representation of women in the political sphere, economic life and reconciliation and peacebuilding efforts.
50. In line with the United Nations Disability Inclusion Strategy, UNSOM, in partnership with UNSOS, developed a two-year joint action plan (2021–2022), which is due for review and updating in 2023, based on an accessibility audit exercise conducted in 2022.

Impact of the pandemic and lessons learned

51. The continuation of the COVID-19 pandemic into 2022 had a limited impact on the implementation of mandates, including on the Mission's ability to engage with government and civil society counterparts due to their limited access to internet connectivity and conference call technology, especially at the subnational level.
52. The Mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Many meetings, trainings and workshops continue to be conducted online, where conducive, thereby reducing travel costs and related staff time. In addition, monitoring and tracking mechanisms established at the onset of the

pandemic remain in place for continued and potential future use, together with mitigation measures as and when required.

Programme performance in 2022

Institutional empowerment for disability rights and inclusion

53. The continued use of improvised explosive devices by Al-Shabaab constitutes the single largest non-environmental threat to Somalis. In 2022, UNSOM brought together a broad coalition of United Nations agencies and partnered with Trinity College Dublin to provide technical and advocacy support to the national disability agency, resulting in a nationwide disability survey – the first of its kind in Somalia. The survey helped to obtain accurate quantitative and qualitative data regarding persons with disabilities, including those caused by improvised explosive devices, to enable the Federal Government of Somalia to protect their rights and understand their needs. The Mission also supported the national disability agency’s successful application for funding, to renovate its existing offices ensuring accessibility, creating a space where persons with disabilities can engage with their dedicated national institution. These efforts have raised the profile of persons with disabilities and a recognition by the political leadership of their needs. On 4 December 2022 at a celebration of the International Day of Persons with Disabilities, the Prime Minister of Somalia committed to increasing the budget of the national disability agency.
54. Progress towards the objective is presented in the performance measure below (see table 7).

Table 7

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
A disability roadmap was developed by the Ministry of Women and Human Rights Development	The national disability agency was launched in July 2021	The national disability agency conducted the first nationwide disability survey
Partnerships on disability between ministries were strengthened and expanded, resulting for instance in the adoption of a victim assistance strategy by the Ministry of Internal Security and the Ministry of Women and Human Rights	Country-wide mapping of organizations of persons with disabilities and civil society organizations working on disability	Funding for the national disability agency was obtained. The Federal Government of Somalia committed to increasing the budget of the national disability agency

Evaluation activities

55. An internal evaluation on digital transformation, in line with the vision of the Secretary-General for a “United Nations 2.0”, and an internal evaluation on the effectiveness of UNSOM strategic communications in support of mandate implementation, are planned for 2023.

Planned results for 2024

Result 1: engendering public confidence in security and justice institutions during and post-security transition

Programme performance in 2022 and target for 2024

56. In 2022, the Mission supported national rule of law and security priorities through expert advice and coordination support on security transition and related benchmarking. It continued its regular strategic engagement with Somali and international counterparts on the review and the implementation of the national security architecture towards the greater federalization of security. Regarding the rule of law, UNSOM supported progress on the justice and corrections model, enhancing the independence and impartiality of the justice system, and further advancing implementation of the new policing model.
57. In 2024, UNSOM will further enhance its coordination with national and international stakeholders to support the security transition from ATMIS to Somali security forces, scheduled for completion by December 2024, the federalization of security, implementation of the national security architecture, and the development of a federated justice system. Related security initiatives will include: strengthening national weapons and ammunition management and counter-improvised explosive device frameworks; addressing the integration and reintegration of regional forces and other local groups supporting Somali security forces' operations; and efforts to prevent and counter terrorism and violent extremism conducive to terrorism. On rule of law, justice and corrections support will contribute to strengthening good governance. Additional police acts at the federal and state levels are expected to be enacted, contributing to the further development of the legal framework for a federated policing system in Somalia.
58. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8).

Table 8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Revision of the Somalia Transition Plan	Somalia Transition Plan revised and issued, and technical coordination achieved through comprehensive approach to security structures	Capacities of accountable, affordable and able Somali security forces protecting the civilian population strengthened	Additional prioritized locations and tasks are handed over to the Somali security forces and institutions by ATMIS	Phased ATMIS drawdown advanced, based on agreed drawdown plan and degrading of Al-Shabaab
Community dialogue on justice, security and land issues launched in each federal member state capital	Joint rule of law and security governance programmes ensured that the executive and legislative structures of the Federal Government and federal member states support Somalia Transition Plan implementation	Progress made on legislation to improve external civilian oversight over security forces	Ammunition stockpiles control mechanisms at the federal and state levels are strengthened, in accordance with the national weapons and ammunition management strategy	Ammunition stockpiles control mechanisms at the federal and state levels strengthened, in line with the national weapons and ammunition management strategy
Capacity-building and institutional development plan in support of the executive and legislative structures of the Federal Government and federal member		Strategic coordination between national and international stakeholders in the security sector strengthened	Increased coordination among	A counter-improvised explosive device baseline assessment is conducted for the
		Hirshabelle State Police Act enacted,		

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
states to improve civilian oversight of the security sector	Somalia's weapons and ammunition management structures ensured reporting compliance with the Security Council Committee pursuant to 751 (1992) concerning Somalia	and four police bills developed and consulted (one at the federal and three at the state-level) Progress made in the development of a new justice and corrections model Coordination strengthened in support of maritime law enforcement Endorsement of national weapons and ammunition management strategy and enactment of national arms control legislation remained pending due to protracted electoral process	stakeholders in the implementation of the National Programme for the Treatment and Handling of Disengaged Combatants in Somalia Community dialogue on justice ongoing in all federal member state capitals	establishment of a national framework Legal framework for a federated policing system in Somalia is further developed Inclusive dialogue on a legitimate and effective justice system includes stakeholders from all federal member states, taking into account priorities voiced in communities

Result 2: effective and coordinated stabilization and complementary strategies and action plans, including alternative dispute resolution and inclusive community dialogue initiatives, on preventing and countering terrorism and violent extremism conducive to terrorism

Programme performance in 2022 and target for 2024

59. The Mission redoubled its engagement with key ministries and institutions, supporting coordination on stabilization and preventing and countering violent extremism and related matters throughout 2022. Following the onset of military operations against Al-Shabaab led by the Federal Government in Galmudug and Hirshabelle in August 2022, the Government has increased its efforts to link military and counter-terrorism with stabilization initiatives, including justice and reconciliation elements, especially in the newly liberated areas. During this time, the Federal Government finalized the national stabilization strategy, supported by UNSOM with strategic advice and technical assistance, and promulgated a new counter-terrorism strategy focusing on high-level defectors from Al-Shabaab. UNSOM also supported the Federal Government in reviewing and recalibrating the national defector rehabilitation programme, in close coordination with donors.
60. In 2024, the Mission will further strengthen its support to the Federal Government through the provision of strategic advice and technical assistance for the effective implementation of the national stabilization strategy and action plans, preventing and countering violent extremism, and the recalibrated national defector rehabilitation programme. As military and stabilization operations are likely to be extended to other areas of Somalia, the need for increased coordination support is anticipated, to ensure greater unity of effort. As part of strengthening overall coordination, the Mission will also advocate for enhanced cooperation between the Federal Government and federal member states, including in the areas of justice and policing.
61. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9).

Table 9
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Government led a whole-of-government approach to stabilization and preventing and countering violent extremism	Information-sharing and joint planning are established for areas to be recovered under the transition plan, and the national strategy on preventing and countering violent extremism and the plan for implementing the strategy are both revised, ensuring a good combination of military response and a soft power approach	Strategic advice and coordination support provided towards the revision and finalization of the national stabilization strategy, the review and recalibration of the national defector rehabilitation programme, and the finalization of the counter-terrorism strategy, ensuring a coherent approach between security and peacebuilding priorities in alignment with the Somalia Transition Plan	Somali stakeholders are actively engaged in implementing the revised national preventing and countering violent extremism strategy and the recalibrated defectors rehabilitation programme Alternative dispute resolution initiatives are launched in additional locations	Coordination efforts are increased to advance implementation of the national stabilization strategy and action plans, the recalibrated national defector rehabilitation programme, as well as the new approach to preventing and countering violent extremism

Result 3: resolution of outstanding issues of federalization through Federal Government and federal member state dialogue, enabling progress on the constitutional review and other state-building objectives

Programme plan for 2024

62. The Mission supported, through its good offices, the convening of five National Consultative Council meetings, which were instrumental in completing the electoral process and reaching an agreement on national priorities after the new President took office.

Lessons learned and planned change

63. The lesson learned for the Mission was the importance of continued dialogue between the Federal Government and federal member states, as several contentious issues between the Federal Government and federal member states continue to hamper progress on federalization and state-building objectives. In applying the lesson, the Mission will support the Federal Government to regularly convene meetings of the National Consultative Council, or an equivalent mechanism, using its good offices to maximize participation in, and engagement with, the platform. In addition, the Mission will encourage enhanced inclusivity at the technical level to advance progress between meetings.
64. Simultaneously, the Mission will support the Ministry of Justice and Constitutional Affairs, the Joint Oversight Committee of the Federal Parliament, and the Independent Constitutional Review and Implementation Commission to conduct public outreach and translate the agreements reached by the National Consultative Council into proposed constitutional amendments for consideration by parliament, through the provision of good offices, strategic advice and technical assistance.

65. At the federal member states level, the Mission will liaise with state authorities to identify emerging concerns related to strengthening federalism and state-building, and through its good offices, promote constructive engagement between the states and the Federal Government.
66. Expected progress towards the objective is presented in the performance measure below (see table 10).

Table 10
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	–	–	<p>The Federal Government of Somalia convenes the National Consultative Council to hold meetings based on a defined agenda</p> <p>Technical work between the Federal Government of Somalia and federal member states emanating from or in preparation for meetings of the National Consultative Council (or an equivalent platform) progresses</p>	<p>Federal and state level leaders continue to use the National Consultative Council, or an equivalent platform, as a forum for dialogue; and federalization and state building objectives are further advanced</p> <p>National Consultative Council meetings are conducted, based on a defined agenda</p> <p>Preparations for and follow-up after National Consultative Council meetings are supported at the technical level to advance progress between meetings; and enhanced inclusivity at the technical level is encouraged</p> <p>Contentious issues related to federalization and state-building at the federal member state level are identified and resolution is sought at the technical level committee of the National Consultative Council</p>

Deliverables

27. Miscellaneous workshop/seminars/training activities by Rule of Law and Security Institutions Group of UNSOM on implementation of Somalia Transition Plan/new policing model/comprehensive approach to security	6	1	16	16
28. Workshops, seminars or capacity building/training events in support of relevant government institutions at the federal and state level on inclusive politics	6	—	6	5
29. Workshops, seminars or capacity building/training events on peacebuilding, mediation and conflict resolution	5	3	5	5
30. Workshops seminars or capacity building/training events on the constitutional review process	5	4	5	5
31. Technical workshops to assist the Somali National Youth Council/Youth Advisory Board	6	—	6	2
32. Workshops to build the capacity of civil society for monitoring and reporting on the human rights performance of Somali security forces and their ability to foster trust and confidence in communities, including with regard to conflict-related sexual violence	6	6	4	4
33. Consultations with and workshops/working sessions on mediation, reconciliation, negotiation and policy dialogues for women civil society leaders and women members of Parliament and senators	15	18	15	15
Publications (number of publications)	45	50	46	53
34. Human Rights and Protection Group reports on freedom of expression and/or protection of civilians in Somalia and human rights in Somalia's electoral process	2	1	2	1
35. Fragility index and maturity model national summary and district -level reports	32	35	34	35
36. Reports on analysis, procedures, processes and best practices on mitigating the threat from improvised explosive devices	8	14	8	16
37. Factsheets on disarmament, demobilization and reintegration -related interventions in Somalia	2	—	1	1
38. Study report on Somali women's experience and aspiration in peace and politics in the country	1	—	—	—
Fact-finding, monitoring and investigation missions (number of missions)	—	8	—	9
39. Human rights monitoring, reporting and investigations, including conflict-related sexual violence and child protection, monitoring of and follow-up on incidents involving security forces supported by the United Nations, through the human rights due diligence policy	—	8	—	9

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Good offices: provide support to the Federal Government, the federal member states and other stakeholders in advancing the national priorities, in line with the National Consultative Council communiqué of June 2022, including the constitutional review process and implementation of the national security architecture; and provide support to Somali stakeholders in addressing clan and localized conflicts, including in recently recovered areas.

Consultation, advice and advocacy: consultations with civil society on federalization, constitutional review process, local conflict management and resolution, and the national reconciliation process; advice on drafting the revised Constitution; strategic and technical advice to electoral management bodies at the federal and subnational levels, Parliament and other stakeholders on revisions to the electoral legal framework and on electoral processes; advocacy with federal and state authorities, the Somali National Consultative Council and other stakeholders, including clan elders, electoral committees, politicians and the council of presidential candidates for women's enhanced participation and representation in leadership and decision-making political processes in general, in electoral processes, and participation in political leadership roles in governance institutions; advice to the Government on the compliance of national legislation with international human rights law, including policies addressing sexual violence in conflict and children in armed conflict; advice to and advocacy with ministries of women and human rights development, women leaders, human rights defenders, civil society actors, legislators and parliamentary committees to strengthen the national protection framework and institutionalize accountability mechanisms, including through human rights due diligence policy mechanisms, on the implementation of human rights commitments, on recommendations emerging from the human rights universal periodic review process, on human rights due diligence assessments, and on addressing violations committed by international, national and government affiliated forces; advice to Parliament, the Federal Government of Somalia and federal member states on security sector legislation, reforms and budgetary measures, including the sustainable financial management of the security sector; consultations with the Federal Government and federal member states' security institution stakeholders on the legal framework to implement national security architecture, including a recalibrated disarmament, demobilization and reintegration-related programme; coordination mechanisms and the sustainability of stabilizations activities and advocacy joint planning between security forces and stabilization actors in recovered areas; consultations, planning and advocacy with the Federal Government and federal member states justice stakeholders for the establishment of functioning, independent and accountable rule of law institutions, as part of wider reform efforts; advice to the Ministry of Ports and Marine Transport on the maritime economy, enhancement of Somali maritime administration and women in the maritime sector; and policy and technical advice to Federal Government and federal member states counterparts on explosive hazard threat mitigation, and on weapons and ammunitions management, along with weapons and ammunitions management initiatives.

D. Communication deliverables

Outreach: four long-term strategic messaging campaigns targeting Somali audiences communicating on the work of the United Nations in Somalia, including on thematic issues, and through chairing the United Nations Communications Group – Somalia, which involves harmonizing communications and taking the lead or main support role in joint messaging campaigns; collaborate with civil society (e.g., media associations and youth groups) for events to mark official United Nations observances relevant to the Somali context, and amplify United Nations messaging goals; communications support and multimedia coverage on visits of high-level United Nations officials to Somalia, as required; and support and guide targeted outreach activities, as required, on an ad hoc basis.

External and media relations: build working relationships with Somali and international media to help to ensure a better understanding of the work of the United Nations in Somalia and development of the Somali communications sector through capacity-building programmes for the media and government communications offices, both at the national and subnational levels; and organize at least two press conferences for United Nations leadership and arrange for interviews and other media coverage with United Nations officials, as required.

Digital platforms and multimedia content: four digital platforms (social and digital media) that produce multilingual and multimedia content, with at least 250 items (including cards, infographics and videos) for dissemination on social media and online channels; for traditional platforms, produce Somali-language radio programming, with at least 50 episodes of the "Path to peace" programme and the continuation of long-term awareness campaigns centred on radio programming, targeting Somali audiences; produce a series of radio programmes on high-priority topics on an ad hoc basis; production of 12 monthly updates (both English and Somali) highlighting the work of the United Nations system in Somalia; four English-language United Nations quarterly updates, highlighting the work of the United Nations system in Somalia, aimed at Somali government partners, international partners and donors; and design and production support for a range of digital newsletters highlighting work of the United Nations.

B. Proposed post and non-post resource requirements for 2024

Resource requirements (regular budget)

Proposed 2024	1	2 ^a	1	8 ^b	30	51	37	–	57	–	187	87	45	132	18	1	19	338	
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	

^a One position is funded at 50 per cent and cost-shared with the Development Coordination Office.

^b Includes one D-1 and one P-4 general temporary assistance positions.

68. The proposed resource requirements for 2024 for UNSOM amount to \$101,275,600 (net of staff assessment) and would provide for the deployment of 625 United Nations Guard Unit personnel and 14 United Nations police officers (\$16,497,800), salaries and related costs (\$44,833,600) for 187 international positions (1 Under-Secretary-General, 2 Assistant Secretary-General, 1 D-2, 8 D-1, 30 P-5, 51 P-4, 37 P-3 and 57 Field Service), 132 national positions (87 National Professional Officer and 45 Local level), 19 United Nations Volunteers and 23 government-provided personnel, as well as operational costs (\$39,944,200), comprising the costs for consultants and consulting services (\$571,300), official travel (\$1,061,600), facilities and infrastructure (\$20,121,500), ground transportation (\$1,644,900), air operations (\$6,775,300), communications and information technology (\$5,862,900), medical (\$1,333,800), and other supplies, services and equipment (\$2,572,900).
69. A vacancy rate of zero per cent has been applied to the estimates for military contingents, based on the vacancy rate in March 2023. A vacancy rate of 21.4 per cent has been applied to the estimates for United Nations police, based on the vacancy rate in March 2023. A vacancy rate of 13.9 per cent has been applied to the estimates for international positions based on the vacancy rate in March 2023. Vacancy rates of 11.5 and 20.0 per cent have been applied to the estimates for National Professional Officer and Local level positions, respectively, based on vacancy rates in March 2023. A vacancy rate of 22.2 per cent has been applied to the estimate for international United Nations Volunteers, and 21.7 per cent for government-provided personnel, taking into account the actual average vacancy rates in 2022. A vacancy rate of 50.0 per cent has been applied to the estimate for one position of National United Nations Volunteer approved in 2023 which is currently vacant.

70. In 2024, the proposed staffing complement includes the redeployment of one position of Political Affairs Officer (P-4) from the Office of the Chief of Staff to the Political Affairs and Mediation Group, to facilitate additional focus of the Group on the politics of security, while closely coordinating with relevant United Nations internal stakeholders.
71. The Mission's approved 2023 staffing table includes two general temporary assistance positions. It is proposed that the positions be continued in 2024:
 - (a) Chief, Programme Management (D-1), in the Office of the Deputy Special Representative of the Secretary-General/Rule of Law and Security Institutions Group, would continue to be required to oversee UNSOM mine action component, leading strategic and operational planning, advising the UNSOM leadership on mine action issues, supervising the implementation of the workplan, leading engagement with the national authorities, the United Nations country team and other stakeholders involved in mine action;
 - (b) Environmental Affairs Officer (P-4) would continue to be required to focus on delivering the environmental components of the UNSOM mandate in accordance with Security Council resolutions [2592 \(2021\)](#) and [2657 \(2022\)](#), in close collaboration with UNSOS and the United Nations country team. There is a sustained need for environmental and climate change-related advice owing to the increased impact of climate change on Somalia and related requests for support from the Federal Government and the federal member states. The position continues to support the Mission's leadership on all environmental and climate change-related issues, including providing up-to-date analysis of the environmental causes and consequences of conflict and insecurity and providing risk assessments and risk management strategies.
72. The increase in requirements for 2024 compared with the appropriation for 2023 is attributable primarily to: (a) an increase under civilian personnel costs, owing to the application of a lower vacancy rate of 13.9 per cent for international positions, compared with 15.0 per cent in 2023; a lower vacancy rate of 11.5 per cent for National Professional Officer positions, compared with 15.0 per cent in 2023; and a lower vacancy rate of 20.0 per cent for Local level positions, compared with 22.0 per cent in 2023; and (b) an increase under operational costs owing to higher requirements for facilities and infrastructure mainly related to the ongoing construction of facilities for its field office in Dhusamareb.

Extrabudgetary resources

73. In 2023, extrabudgetary resources in the amount of \$100,000 are projected to be utilized to support planned activities related to peace and reconciliation in Somalia.
74. In 2024, extrabudgetary resources in the amount of \$100,000 are projected to be utilized to continue to support peace and reconciliation activities.

3. United Nations Regional Centre for Preventive Diplomacy for Central Asia

(\$3,233,200)

Foreword

The global context marked by polarization, disrupted supply chains, food insecurity and climate change impact the situation in Central Asia. Despite those challenges, relations among the five Central Asian states remain constructive and saw deepening in certain areas. The fourth consultative meeting of the Central Asian Heads of State reaffirmed their commitment to pursue closer cooperation vis-à-vis common challenges, as well as on inclusive dialogue and trust-building on the basis of existing and new initiatives. Such overall developments provided the context for additional engagement by the United Nations Regional Centre for Preventive Diplomacy for Central Asia.

While regional cooperation is growing, some tensions remain, particularly in the Fergana Valley. The United Nations engaged to de-escalate and provide humanitarian assistance in the area.

With the adoption of the updated Joint Plan of Action for the Implementation of the United Nations Global Counter-Terrorism Strategy in Central Asia in 2022, more opportunities arise for the Regional Centre to spearhead initiatives to address radicalization and terrorism in the region. The implementation of the Regional Centre's water and climate strategy for the period 2022–2025 offers a regionally-owned forum for relevant experts. The Regional Centre will galvanize its work on the women and peace and security and youth, peace and security agendas, which are fully embedded into the regional agenda, based on the Central Asian Women Leaders' Caucus flagship initiative and the Preventive Diplomacy Academy project.

The Regional Centre will be convening its regional formats, including meetings of deputy ministers for foreign affairs, closely following potential challenges to peace and security, facilitating cooperation, dialogue and trust among the countries in the region.

(Signed) Miroslav **Jenča**
Assistant Secretary-General, Officer in Charge
United Nations Regional Centre for Preventive Diplomacy for Central Asia

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

75. The United Nations Regional Centre for Preventive Diplomacy for Central Asia is responsible for supporting national authorities in identifying and addressing existing and emerging threats to regional peace and security. The open-ended mandate was defined through an exchange of letters between the Secretary-General and the President of the Security Council ([S/2007/279](#) and [S/2007/280](#)).
76. The Regional Centre plays a central role in preventive diplomacy efforts in Central Asia and provides a platform for regional dialogue on the most pressing challenges to security and stability. The Special Representative of the Secretary-General and Head of the Regional Centre provides good offices in Central Asia to promote regional cooperation through meetings with authorities, civil society and other stakeholders.
77. The main function of the Regional Centre is to strengthen United Nations capacity for conflict prevention in Central Asia through liaising with the Governments of the region and, with their concurrence, engaging with other concerned parties on issues relevant to preventive diplomacy; monitoring and analysing the situation on the ground and providing the Secretary-General with up-to-date information related to conflict prevention efforts; maintaining contact with relevant regional organizations, encouraging their peacemaking efforts and initiatives and facilitating coordination and information exchange, with due regard to their specific mandates; providing a political framework and leadership for the preventive activities of the United Nations country teams in the region and supporting the efforts of the resident coordinators and representatives of the United Nations system, including the Bretton Woods institutions, in promoting an integrated approach to preventive diplomacy and humanitarian assistance; and maintaining close contact with the United Nations Assistance Mission in Afghanistan (UNAMA) to ensure a comprehensive and integrated analysis of the situation in the wider region.
78. The Regional Centre's current work is guided by a five-year programme of action for the period 2021–2025, which was adopted at the annual meeting of deputy ministers for foreign affairs in December 2020.

Programme of work

Objective

79. The objective, to which this mission contributes, is to enhance regional security and stability in Central Asia.

Strategy and external factors for 2024

80. To contribute to the objective, the mission will:
 - (a) Engage regularly with the region's capitals, regional organizations and relevant Member States. The Regional Centre will also carry out good offices functions for preventive diplomacy in Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan, as well as monitor and analyse regional developments, while maintaining contact with regional organizations and other parts of the United Nations system on behalf of the Secretary-General. Using its extrabudgetary funding, the Centre will implement activities such as meetings of senior

officials, expert forums, workshops and training sessions to support cooperation among the countries of the region and increase capacity on issues related to preventive diplomacy;

- (b) Convene preparatory expert forums to inform the annual consultative meetings of the Central Asian Heads of State. It will continue to organize an annual meeting of deputy ministers for foreign affairs of Central Asia. The Regional Centre, in cooperation with UNDP, will also promote the increased political participation of women in the region through the engagement of senior women political leaders on issues relevant to preventive diplomacy through the Central Asia Women Leaders' Caucus regional platform;
 - (c) Promote arrangements on transboundary water management in the region. Specifically, the Regional Centre will focus its work on fostering and supporting initiatives on water, energy and environmental and climate cooperation. The Regional Centre's water and climate strategy for the period 2022–2025 is being implemented with the close involvement of all five States of the region. Through convening a series of seminars and workshops, the Regional Centre will work to increase decision makers' knowledge of international water law, best practices from around the world and possible options for regional arrangements tailored to the specific needs and circumstances of Central Asia;
 - (d) Implement the fourth phase of the joint project with the Office of Counter-Terrorism on the basis of the new Joint Plan of Action for the implementation of the United Nations Global Counter-Terrorism Strategy in Central Asia. In addition, through the preventive diplomacy academy project, the Centre will continue its efforts to engage young people in some of the region's most marginalized areas. The Regional Centre will continue to partner with relevant United Nations entities and regional organizations on the implementation of projects to promote preventive diplomacy in the region. The threats of terrorism and violent extremism, the lack of an agreement on transboundary water management, the developing effects of climate change and a growing youth population seeking new opportunities remain key challenges for stability and security in the region;
 - (e) Support the five countries of Central Asia in addressing emerging threats to security and stability and humanitarian assistance during emergency situations, especially in the context of the consequences of the COVID-19 pandemic and the complex humanitarian situation in Afghanistan. Relevant proposals will be developed and put forward for discussions at the annual meeting of deputy ministers for foreign affairs.
81. The above-mentioned work is expected to result in:
- (a) Improved regional cooperation among the national Governments in addressing transnational threats of terrorism, violent extremism conducive to terrorism, drug trafficking and organized crime, as well as coping with regional challenges concerning the management of water and natural resources;
 - (b) Enhanced preparedness of the Governments of the Central Asian States, through enhanced cooperation and trust-building in the region, for deeper engagements in promoting sustainable peace and stability in the region, including on high-level platforms such as the consultative meeting of Heads of State.
82. With regard to cooperation with other entities, the Regional Centre maintains contacts with the Commonwealth of Independent States, the European Union, the Organization for Security and Cooperation in Europe and the Shanghai Cooperation Organization, as well as other relevant organizations. The Regional Centre will continue exchanges with the Conference on Interaction and Confidence-building Measures in Asia and the Collective Security Treaty Organization on topics of common interest. The Regional Centre will continue the useful practice of convening "troika" coordination meetings among the Regional Centre, the Organization for Security and Cooperation in Europe and the European Union.
83. With regard to inter-agency coordination and liaison, the Regional Centre cooperates closely with the resident coordinators in the five countries, the Development Coordination Office and the entities

represented in the United Nations country teams, including UNDP and the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) on gender issues, the United Nations Office on Drugs and Crime on illicit drug trafficking, the Office of Counter-Terrorism on counterterrorism; the United Nations Educational, Scientific and Cultural Organization on water issues, and the Economic Commission for Europe on water, environment and climate. The Regional Centre provides overall policy guidance to the United Nations country teams in the field of preventive diplomacy to ensure the coherence and complementarity of efforts in conflict prevention and peacebuilding. It will also continue to cooperate with relevant actors, including international financial institutions such as the World Bank. On Afghanistan related issues, the Regional Centre regularly shares information and coordinates activities with UNAMA.

84. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
 - (a) The continued commitment by the five Governments of the region and national stakeholders to preventive diplomacy and regional cooperation;
 - (b) The five countries of the region continue to monitor developments in Afghanistan and enhance preparedness to existing and potential threats and risks of violent extremism and terrorism, drug trafficking, and a refugee crisis. They continue to provide and advocate for humanitarian assistance to Afghanistan.
85. The Regional Centre integrates a gender perspective in its operational activities, deliverables, and results, as appropriate. It encourages participating countries to ensure gender balance in their delegations and include gender-related issues in the agendas of three regional expert-level workshops on issues related to preventive diplomacy and confidence-building for officials from the Central Asian States and Afghanistan. The Regional Centre also pays due attention to incorporating such cross-cutting topics as the youth, peace and security agenda and climate and security into its programmatic activities, as well as continuing to implement the United Nations Disability Inclusion Strategy for the entity.
86. In line with the United Nations Disability Inclusion Strategy, the Regional Centre implemented the Disability Inclusion Strategy Action Plan and promoted disability inclusion both internally and publicly. The Strategy is considered as an inherent part of the Regional Centre's programmatic activities. It continued to liaise and coordinate with the United Nations country teams in five Central Asian states, and actively participated in events on the Strategy organized by the United Nations agencies in the States of Central Asia to promote the topic and highlight the importance of the inclusion of persons with disabilities.

Impact of the pandemic and lessons learned

87. The COVID-19 pandemic continued to impact the implementation of mandates into 2022. In particular, owing to the remaining travel restrictions such as the absence of regular international flights, most of the activities were held in online or hybrid formats. This allowed widening the scope of participants. The majority of the online events were conducted within the Regional Centre's Preventive Diplomacy Academy project and were designed for young people. However, work in preventive diplomacy often requires person-to-person contacts, particularly on sensitive political issues such as high-level bilateral meetings, the annual meeting of deputy ministers for foreign affairs, Women Leaders' Caucus events, and meetings of water and climate experts from Central Asian States. The Regional Centre organized in-person activities in those instances to the extent possible. No events were cancelled due to the pandemic.
88. The mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic including, meetings in a hybrid format, the online attendance of regional conferences and forums and capacity-building events. Flexible working arrangements will be used in the event of pandemics or the spread of communicable diseases.

Programme performance in 2022

Relations among the Central Asian States remained constructive and deepened in certain areas

89. Despite the global context and the challenges to regional peace and security in 2022, the relations among the five Central Asian States have remained constructive and even deepened in certain areas. Many Central Asian countries engaged on the path of domestic political, social and economic reforms.
90. The mission worked on regional security and stability through prevention and helping States address challenges to peace and security, in particular, tensions related to border disputes. For example, in the wake of the border clashes between Kyrgyzstan and Tajikistan in September 2022, the Head of the Regional Centre engaged with the states and partners to de-escalate tensions and offered assistance in finding a long-term sustainable solution for the border issues.
91. One of the key achievements in 2022 was the adoption of an updated Joint Plan of Action for the Implementation of the United Nations Global Counter-Terrorism Strategy in Central Asia. The Regional Centre began the implementation of its new water and climate strategy for the period 2022–2025 providing a unique forum for water experts from the Central Asian States. The Centre strengthened the regional partnership related to women’s empowerment and the women and peace and security agenda through the Regional Centre’s initiative, the Central Asia Women Leaders’ Caucus. The Regional Centre continued to promote the youth, peace and security agenda in the region by training young women and men at its Preventive Diplomacy Academy. Regular consultations and meetings were held with high-level state officials, United Nations entities, resident coordinators and regional organizations, such as the Organization for Security and Cooperation in Europe, the Shanghai Cooperation Organization and the European Union.
92. Progress towards the objective is presented in the performance measure below (see table 14).

Table 14

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Expansion of involvement of additional groups to create more inclusive, structured discussions by key stakeholders in Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan	The Regional Centre ensured further involvement of additional groups to create more inclusive discussions by key stakeholders in Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan on the basis of the new initiatives and entry points of the Centre	The Regional Centre contributed to an enhancement of regional security and stability in Central Asia by supporting actions to promote peace and trust in the region through more inclusive and open discussions and new initiatives of the countries of the region and the Centre

Planned result for 2024

Enhanced regional interaction in Central Asia to address current and emerging risks and threats to peace and security

Programme performance in 2022 and target for 2024

93. The Regional Centre’s work contributed to enhanced regional security and stability in Central Asia through preventive diplomacy, which met the planned target of enhancement of regional security and stability in Central Asia by supporting actions to promote peace and trust in the region through more inclusive and open discussions and new initiatives of the countries of the region and the Centre.

Lessons learned and planned change

94. The lesson for the Regional Centre was that online meetings with authorities resulted in less open and interactive exchanges. In applying the lesson, the Centre will strive to increase the number of meetings held in a hybrid format, as feasible, including participation in different regional events.
95. The Regional Centre will continue to support the countries of the region in taking concrete steps to promote peace and trust, ensuring a more inclusive and open dialogue on the basis of the existing and new initiatives.
96. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 15).

Table 15
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Expansion of involvement of additional groups to create more inclusive, structured discussions by key stakeholders in Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan	The Regional Centre ensures further involvement of additional groups to create more inclusive discussions by key stakeholders in Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan on the basis of the new initiatives of the Centre	The Regional Centre contributes to an enhancement of regional security and stability in Central Asia by supporting actions to promote peace and trust in the region through more inclusive and open discussions and new initiatives of the States of the region and the Centre	The Regional Centre helps to spur regional interaction in Central Asia to address risks and threats to peace and security through expressed commitment by the States of the region to promoting peace and trust and creating inclusive and open discussions	Regional interaction is further spurred, to ensure peace and stability in Central Asia by addressing risks and threats to peace and security through expressed commitments by the States of the region on closer cooperation, an inclusive dialogue and trust building on the basis of existing and new initiatives

Deliverables

97. Table 16 lists all deliverables of the mission.

Table 16
Deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	2	2	2	2
1. Meetings of the Security Council	2	2	2	2
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	3	3	3	3
2. Workshops on preventive diplomacy and confidence-building	3	3	3	3
C. Substantive deliverables				
Good offices: provision of good offices on issues related to preventive diplomacy, such as water, energy, environmental and climate cooperation, drug trafficking and counter-terrorism.				

Category and subcategory	2022	2022	2023	2024
	planned	actual	planned	planned

Consultation, advice and advocacy: consultations on political and security developments in the region and to seek areas for closer cooperation; and consultations and advice on implementing the Joint Plan of Action for the United Nations Global Counter-Terrorism Strategy in Central Asia.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures and information kits on the activities of the Mission; and publication of the *Aral Sea Basin Transboundary Water Early Warning Bulletin*, and other publications as part of the Preventive Diplomacy Academy project.

External and media relations: press conferences and press releases on the activities of the mission.

Digital platforms and multimedia content: dissemination of information through the Mission's website; matrix of activities on counter-terrorism and preventing extremism website (<https://unrcca.unmissions.org/mapping-pvsect-activities-5>); and maintaining and updating the "Water Unites" portal as a source of information for regional water and climate activities.

B. Proposed post and non-post resource requirements for 2024

Resource requirements (regular budget)

Table 17

Financial resources

(Thousands of United States dollars)

Category of expenditure	2022		2023		2024	Variance
	Appropriation	Expenditure	Appropriation	Requirements		2024 vs. 2023
	(1)	(2)	(3)	(4)	(5)=(4)-(3)	Increase/(decrease)
Military and police personnel costs	–	–	–	–	–	–
Civilian personnel costs	2 203.8	2 437.8	2 646.3	2 466.2		(180.1)
Operational costs	690.4	573.3	646.4	767.0		120.6
Total (net of staff assessment)	2 894.2	3 011.1	3 292.7	3 233.2		(59.5)

Table 18

Human resources

	International staff											National staff			United Nations Volunteers			Total
	USG	ASG	D-2	D-1	P-5	P-4	P-3	P-2	FS	GS	Subtotal	NPO	LL	Subtotal	International	National	Subtotal	
	Approved 2023	–	1	–	–	1	2	2	–	2	–	8	4	18	22	–	–	
Proposed 2024	–	1	–	–	1	2	2	–	2	–	8	4	18	22	–	–	–	30
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

98. The proposed resource requirements for 2024 for the Regional Centre amount to \$3,233,200 (net of staff assessment) and would provide for salaries and common staff costs \$2,466,200 for the continuation of 30 positions (1 Assistant Secretary-General, 1 P-5, 2 P-4, 2 P-3, 2 Field Service, 4 National Professional Officer and 18 Local level), as well as operational costs \$767,000, comprising the costs for official travel (\$206,600), facilities and infrastructure (\$117,400), ground transportation (\$32,300), communications and information technology (\$272,700), medical supplies (\$4,800) and other supplies, services and equipment (\$133,200).

99. For 2024, no change is proposed to the number and levels of the positions. A vacancy rate of 12.5 per cent has been applied to the estimates for international staff positions based on vacancy rates in March 2023. A vacancy rate of zero per cent has applied to the estimates for National Professional Officers and Local level positions, taking into account the actual average vacancy rates in 2022.
100. The decrease in requirements for 2024 compared with the appropriation for 2023 is attributable primarily to: (a) the application of a lower percentage of 46.2 per cent for common staff costs for international positions, compared with 55.3 per cent applied in 2023; and (b) the application of a higher vacancy rate of 12.5 per cent for international staff positions, compared with 5.0 per cent in 2023. The decrease is partially offset by an increase in operational costs, mainly owing to: (a) higher requirements for individual contractors to improve information management through digitization and software, licenses and fees; (b) higher requirements for security services; and (c) additional requirements for official travel, to attend high-level conferences, visits and meetings with political counterparts outside Central Asia, which is expected to be more extensive and frequent in 2024.

Extrabudgetary resources

101. In 2023, extrabudgetary resources in the amount of \$110,000 are projected to be utilized to support Central Asia regional cooperation on transboundary water management, and support for the Central Asian Women Leaders' Caucus to provide influential leadership on the issues pertaining to gender equality, women and peace and security and women's empowerment within and among the countries of the region. The annual meeting of Central Asian deputy ministers for foreign affairs, as well as activities under the preventive diplomacy academy project, and the meeting of the Central Asian expert forum were also funded through extrabudgetary resources. Many of the meetings are to be held in a hybrid format.
102. In 2024, extrabudgetary resources in the amount of \$110,000 are projected to be utilized, to continue supporting the Central Asian Women Leaders' Caucus and the annual meeting of Central Asian deputy ministers for foreign affairs, as well as activities under the Preventive Diplomacy Academy project, and the meeting of the Central Asian expert forum.

4. United Nations support for the Cameroon-Nigeria Mixed Commission

(\$3,821,700)

Foreword

Significant progress was made in 2022 in the implementation of the International Court of Justice judgment of 10 October 2002. As Chair of the Cameroon-Nigeria Mixed Commission, the former Special Representative of the Secretary-General, Annadif Khatir Mahamat Saleh, brokered an agreement between the parties around one of the four outstanding areas of disagreement during the Mixed Commission session held in Abuja on 25 and 26 August 2022. Given the goodwill and strong commitment demonstrated by the heads of delegations, in 2024 we intend to continue working with the parties towards the resolution of the remaining areas of disagreement. Further, we will advance efforts towards concluding the demarcation of the land boundary, the pillar emplacements, as well as the final mapping and boundary statement.

The mission will continue to advocate for the implementation of cross-border confidence-building and development projects to assist the populations that have been affected by the demarcation process. We will mobilize support from donors to fund these initiatives. It is my belief that the resources, energies and hopes invested in this process will eventually be secured by a binding agreement and the commitment and support of the populations of the two countries.

The support provided by the Cameroon-Nigeria Mixed Commission to ensure the full implementation of the International Court of Justice judgment of 2002, as well as its efforts in cross-border and confidence-building initiatives, is making a marked contribution to preventing conflict along the border of both countries and to the overall enhancement of stability in the subregion.

(Signed) Leonardo Santos **Simão**
Chair of the Cameroon-Nigeria Mixed Commission

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

103. The Cameroon-Nigeria Mixed Commission is responsible for the implementation of the judgment of the International Court of Justice of 10 October 2002 on the Cameroon-Nigeria boundary and territorial dispute. Its responsibilities include support for the demarcation of the land boundary and the delineation of the maritime boundary; facilitating the withdrawal and transfer of authority in the Lake Chad area, along the boundary and in the Bakassi Peninsula; addressing the situation of affected populations; and making recommendations on confidence-building measures.
104. The current mandate of the United Nations support team to the Cameroon-Nigeria Mixed Commission derives from the following exchanges of letters between the Secretary-General and the President of the Security Council: [S/2017/78](#) and [S/2017/79](#), [S/2018/1130](#) and [S/2018/1131](#), [S/2019/1012](#) and [S/2019/1013](#), [S/2020/1322](#) and [S/2020/1323](#), [S/2021/1069](#) and [S/2021/1070](#), and, most recently, [S/2022/832](#) and [S/2022/833](#). The mandate is open-ended.

Programme of work

Objective

105. The objective, to which this mission contributes, is to achieve an orderly and peaceful implementation of the judgment of 10 October 2002 of the International Court of Justice delineating the course of the land and maritime boundary between Cameroon and Nigeria.

Strategy and external factors for 2024

106. To contribute to the objective, the mission will:
 - (a) Facilitate cooperation between the parties to resolve the remaining three points of disagreement in the demarcation of the land boundary;
 - (b) Support the parties in constructing additional boundary pillars along the land boundary;
 - (c) Produce the draft maps to graphically record the demarcation of the boundary and have them validated by experts from the parties during joint working sessions;
 - (d) Organize and moderate meetings of the drafting committee to finalize a boundary statement at the conclusion of the final mapping;
 - (e) Regularly monitor the situation of populations affected by the demarcation and promote cross-border development projects as confidence-building measures, including livelihood support, access to potable water, capacity-building, green energy and security;
 - (f) Continue fundraising efforts among international donors and multilateral partners to finance the demarcation activities and confidence-building projects for populations affected by the demarcation;
 - (g) Enhance subregional cooperation and good practices in the management of international boundaries by disseminating lessons learned from the Mixed Commission.
107. The above-mentioned work is expected to result in:
 - (a) Consensus on the course of the boundary, as well as how the boundary will be physically demarcated;
 - (b) Physical demarcation of the land boundary shared by Cameroon and Nigeria through the construction and emplacement of boundary pillars;

- (c) Delivery of final geospatial maps of the complete land and maritime boundary;
 - (d) Production of a boundary statement recording the field coordinates of the emplaced pillars;
 - (e) Enhanced support for the demarcation work and improved living conditions of the affected populations;
 - (f) Consensus on best practices with respect to border management.
108. With regard to cooperation with other entities, the mission cooperates with the national authorities of Cameroon and Nigeria towards the resolution of the border dispute between Cameroon and Nigeria through holding meetings, conducting field assessments and constructing boundary pillars along the border.
109. With regard to inter-agency coordination and liaison, the mission cooperates with the United Nations country teams in Cameroon and Nigeria to jointly develop confidence-building measures in accordance with the needs of the populations living along the land boundary, and to ensure the conditions for peace, security and sustainable cross-border development. The secretariat of the Mixed Commission is hosted within the UNOWAS premises in Dakar. UNOWAS provides administrative and logistical support to the Mixed Commission. The Head of UNOWAS serves as Chair of the Cameroon-Nigeria Mixed Commission.
110. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) The two State parties, Cameroon and Nigeria, will continue to adhere to the judgment of the International Court of Justice and the workplan adopted by the Mixed Commission;
 - (b) Safety, security and climate conditions will permit field operations to continue unimpeded;
 - (c) Extrabudgetary resources, including additional voluntary contributions, will continue to be made available for border demarcation, pillar construction and confidence-building initiatives.
111. The Mixed Commission integrates a gender perspective in its operational activities, deliverables, and results, as appropriate. Examples include targeting women's groups for the implementation of community development projects in the areas of potable water, capacity-building for employment and community access to the electricity network. The Mixed Commission will continue regular field visits along the land boundary to assess, monitor and ensure respect for the legal rights and well-being of the affected populations, with a special focus on women, young people and other vulnerable groups.

Impact of the pandemic and lessons learned

112. The continuation of the COVID-19 pandemic into 2022 had minimal impact on the implementation of the mandate as the mission was able to carry out most of its activities, including field assessments, pillar construction work and the convening of a session of the Mixed Commission, with physical attendance, by adhering to COVID-19 protocols.
113. The mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including early and advanced planning and increased field support to complement and strengthen existing approaches and activities.

Programme performance in 2022

Political agreement on border reached

114. During 2022, the Sub-Commission on Demarcation, which is chaired by the mission, undertook a field assessment mission to four disputed areas along the land boundary in an attempt to reconcile divergent positions on specific points of contention. The assessment resulted in an agreement reached on one of the remaining four points of disagreement. The parties agreed to refer the three remaining disagreement areas back to the International Court of Justice for clarification on the interpretation of the text. In this regard, they committed to accepting and fully implementing any ensuing International Court of Justice interpretation.

115. Furthermore, the mission collaborated with the United Nations country teams in Cameroon and Nigeria to identify areas of cooperation for joint initiatives to assist the populations negatively impacted by the demarcation.
116. Progress towards the objective is presented in the performance measure below (see figure III).

Figure III

Performance measure: remaining number of areas of disagreement**Planned result for 2024****Achievement of consensus between Cameroon and Nigeria****Programme performance in 2022 and target for 2024**

117. The mission's work contributed to the resolution of and agreement on 10 of 13 areas of disagreement along the land boundary between Cameroon and Nigeria since inception. In addition, in 2022, an additional 327 pillars were constructed, representing 74 per cent of the total demarcated boundary. This accomplishment met the planned target of 2,000 boundary pillars constructed.

Lessons learned and planned change

118. The lesson learned for the mission is that engaging the leadership of the two delegations in bilateral meetings and holding a Mixed Commission session facilitates the earlier resolution of areas of disagreement between the parties. In applying the lessons, the mission will hold more regular Mixed Commission meetings and continue to intensively engage the leadership and technical experts of the State parties, to make further progress towards settling the three remaining areas of contention. The Mixed Commission will also ensure the continued implementation of security protocols adopted by both parties to allow for enhanced access to work sites for the emplacement of pillars.
119. Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure IV).

Figure IV

Performance measure: number of pillars constructed (cumulative)**Deliverables**

120. Table 19 lists all deliverables of the mission.

Table 19

Deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>

Civilian personnel costs	1 767.7	1 915.0	1 929.2	1 886.1	(43.1)		
Operational costs	1 682.0	1 701.5	1 793.3	1 876.8	83.5		
Total (net of staff assessment)	3 525.0	3 686.8	3 781.3	3 821.7	40.4		

Table 21

Human resources

	International staff											National staff			United Nations Volunteers			Total
	USG	ASG	D-2	D-1	P-5	P-4	P-3	P-2	FS	GS	Subtotal	NPO	LL	Subtotal	International	National	Subtotal	
	Approved 2023	-	-	-	-	2	6	-	-	1	-	9	-	2	2	-	-	
Proposed 2024	-	-	-	-	2	6	-	-	1	-	9	-	2	2	-	-	-	11
Change	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-

121. The proposed resource requirements for 2024 for the Mixed Commission amount to \$3,821,700 (net of staff assessment) and would provide for the deployment of one military observer (\$58,800), salaries and common staff costs (\$1,886,100) for nine international positions (2 P-5, 6 P-4 and 1 Field Service) and two national positions (Local level), as well as operational costs (\$1,876,800), comprising the costs for consultants and consulting services (\$525,700), official travel (\$236,400), facilities and infrastructure (\$149,600), ground transportation (\$53,800), air operations (\$194,100), communications and information technology (\$464,200), and other supplies, services and equipment (\$253,000).
122. In 2024, no change is proposed to the number and levels of the positions.
123. A vacancy rate of 3.7 per cent has been applied to the estimates for international positions based on the actual average vacancy rate in 2022. A vacancy rate of zero per cent has been applied to the estimates for Local level positions based on actual incumbency in March 2023.

124. The increase in requirements for 2024 compared with the appropriation for 2023 is attributable mainly to higher requirements under: (a) communications and information technology, related to the replacement of obsolete equipment; (b) other supplies, services and equipment related to contribution costs towards the UN House in Dakar at full capacity; and (c) official travel due to support to the final mapping and pillars emplacement activities combined with joint technical missions to Yaoundé. The increase is partly offset by decreases in: (a) facilities and infrastructure due to reduce costs for utilities and maintenance services which is factored into the contribution towards the UN House; and (b) civilian personnel costs, owing to a decrease in post adjustment multiplier for Senegal and the application of lower percentages of common staff costs for international and national staff, based on 2022 expenditure patterns.

Extrabudgetary resources

125. In 2023, extrabudgetary resources in the amount of \$1,444,000 are projected to be utilized to support the construction of 221 pillars along the border between Cameroon and Nigeria.
126. In 2024, extrabudgetary resources in the amount of \$2,294,000 are projected to be utilized to continue to support the pillar emplacement project, with a target of 262 pillars to be constructed. The Mixed Commission will continue fundraising activities to implement socioeconomic projects for the benefit of populations in the vicinity of the demarcation exercise.
127. The increase in the extrabudgetary resources projected to be utilized in 2024 compared with 2023 is due to a higher number of pillars anticipated for construction in 2024.

5. Office of the United Nations Special Coordinator for Lebanon

(\$11,308,900)

Foreword

Lebanon remains in the throes of a multidimensional crisis presenting complex political, security, economic and humanitarian challenges. A vacant presidency, a caretaker Government with limited authority and deepened political polarization preclude decisive action on urgent reform imperatives. This imperils the functioning of State institutions, undermines service delivery and compounds the humanitarian conditions for Syrian and Palestine refugees and their Lebanese host communities. The stability of the country is jeopardized at a time when the security establishment and other State institutions face acute resource constraints and devalued staff salaries.

Continuing efforts to encourage and support Lebanon's recovery, including through the advocacy for the election of a president and formation of an empowered Government to implement comprehensive reforms, will by all estimates dictate the priorities of the Office of the United Nations Special Coordinator for Lebanon through 2024.

The Special Coordinator's good offices remain critical in accelerating the political momentum towards stabilizing the economy, promoting good governance, justice, and accountability, extending the authority of the Government of Lebanon, and ensuring the country's disassociation from regional conflicts. The Office of the United Nations Special Coordinator for Lebanon will continue to advocate for comprehensive reforms and work with the United Nations country team and other partners to mobilize assistance for Lebanon's governing institutions to respond to the needs of its citizens.

The Office of the United Nations Special Coordinator for Lebanon, in coordination with the United Nations Interim Force in Lebanon, will continue to support Lebanon in upholding its obligations under Security Council resolution [1701 \(2006\)](#) and promote its full implementation. In this connection, the Office will seek to build on the historic establishment of the maritime boundary between Israel and Lebanon.

(Signed) Joanna **Wronecka**
United Nations Special Coordinator for Lebanon

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

128. The United Nations Special Coordinator for Lebanon is the most senior United Nations official responsible for the implementation of Security Council resolution 1701 (2006) and is the representative of the Secretary-General to the Government of Lebanon, political parties and the diplomatic community based in Lebanon. The mandate of the Special Coordinator stems from resolution 1701 (2006), as well as subsequent decisions of the Council, including S/2007/85 and S/2007/86, S/PRST/2015/7 and S/PRST/2016/10. The Special Coordinator provides political guidance and promotes coherence across the Organization's activities. The Deputy Special Coordinator/Resident Coordinator/Humanitarian Coordinator leads the United Nations country team and humanitarian country team and is responsible for planning and coordinating United Nations humanitarian and development activities in Lebanon.
129. The Security Council, in its resolution 2433 (2018), stressed the need for enhanced cooperation between the Office of the United Nations Special Coordinator for Lebanon and the United Nations Interim Force in Lebanon (UNIFIL), with the goal of improving the effectiveness and efficiency of the missions. The Secretary-General outlined his recommendations in that regard in a letter to the Council (S/2018/1182) and in his report on the assessment of the continued relevance of UNIFIL resources and options for improving the efficiency and effectiveness between UNIFIL and the Office of the United Nations Special Coordinator for Lebanon (S/2020/473). The Council, in its resolutions 2591 (2021) and 2650 (2022), requested the Secretary-General to implement the recommendations of the assessment report according to the Secretary-General's detailed plan and as appropriate. Expressing concern about the strong negative impact of the social, economic and humanitarian crises on the capacities of the Lebanese Armed Forces and security forces, the Council, in its resolutions 2591 (2021) and 2650 (2022), strongly urged further and increased international support for the Lebanese Armed Forces and all State security institutions in areas where they are most critically in need.
130. In line with the priorities adopted by the International Support Group for Lebanon and the Secretary-General's vision on prevention, the Office structures its engagement on the basis of three strategic pillars of intervention: (a) peace and security; (b) stability; and (c) stabilization and development support. This "whole-of-Lebanon" approach is reflected in all United Nations response and cooperation frameworks. In 2022, the United Nations launched the United Nations Sustainable Development Cooperation Framework with the Government of Lebanon, in complementarity to the Lebanon Crisis Response Plan and the joint United Nations-European Union-World Bank Reform, Recovery and Reconstruction Framework and the emergency response plan.
131. Amid a worsening economic and financial crisis, and a prolonged political stalemate that has eroded State institutions and precluded the urgently needed recovery and reform measures, the good offices of the Special Coordinator and United Nations system-wide support remain critical. A continued United Nations political presence remains essential to supporting Lebanese and international efforts to create an enabling environment for the implementation of resolution 1701 (2006). Within the territory of Lebanon, the continued maintenance of armed personnel, assets and weapons other than those of the Government of Lebanon continues to undermine the authority of the Lebanese State and to pose a risk of reigniting conflict. Continued violations by Israel of Lebanon's sovereignty, on land and by air, also impede efforts to work towards a permanent ceasefire between the parties. Those challenges are magnified in a volatile regional context that poses further risks of escalation and spill-over into Lebanon.

Programme of work

Objective

132. The objective, to which this mission contributes, is to prevent and mitigate conflict between Israel and Lebanon in line with the current cessation of hostilities and towards an eventual permanent ceasefire, and to extend and consolidate state authority in support of the territorial integrity, sovereignty and political independence of Lebanon.

Strategy and external factors for 2024

133. To contribute to the objective, the mission will:
- (a) Exercise its good offices between the parties to pursue confidence-building opportunities, defuse tensions through shuttle diplomacy and address violations of resolution 1701 (2006) before they escalate into conflict;
 - (b) Continue efforts, building on the establishment of the maritime boundary between Israel and Lebanon on 27 October 2022, to help resolve outstanding obligations of both parties under resolution 1701 (2006) towards a permanent ceasefire and long-term solution to the conflict. This work will be carried out in coordination with UNIFIL, in cooperation with relevant Lebanese State authorities, including the Lebanese Armed Forces, and in line with relevant Security Council resolutions;
 - (c) Advocate for Lebanon's political leadership to ensure the uninterrupted functioning of State institutions, in particular, effective, transparent and accountable policy and decision-making in the cabinet and the parliament;
 - (d) Urge the Government of Lebanon to adopt an equitable macroeconomic stabilization and reform programme that addresses the ongoing financial and economic crisis, in line with the commitments made under the April 2022 staff-level agreement with the International Monetary Fund (IMF) and any future IMF programme, as well as the Reform, Recovery and Reconstruction Framework of 2021. To complement this, the Special Coordinator will continue to advocate for good governance and anti-corruption measures, the independence of the judicial system, transparency and accountability, and more effective and efficient public service delivery countrywide. The Office will mobilize urgent international support for State security institutions pursuant to resolution 2650 (2022) and more broadly for meeting Lebanon's increasing socioeconomic and humanitarian needs. This interrelated work will be carried out in coordination with UNIFIL and the United Nations country team, in cooperation with relevant Lebanese State authorities and civil society, and in partnership with key donor countries, international financial institutions, and members of the International Support Group for Lebanon.
134. The above-mentioned work is expected to result in:
- (a) The upholding of commitments of the parties to the current cessation of hostilities;
 - (b) The creation of an environment conducive to dialogue to address outstanding obligations under resolution 1701 (2006) towards an eventual permanent ceasefire;
 - (c) The establishment by Lebanon's political leadership of State institutions capable of delivering comprehensive structural reforms to put the country on the path to recovery and exercise effective authority over all Lebanese territory in accordance with the provisions of resolution 1701 (2006).
135. With regard to cooperation with other entities, the mission coordinates with the League of Arab States, the European Union, and international financial institutions such as the World Bank and IMF to mobilize support for Lebanon's stability and sovereignty. The mission convenes with members of the International Support Group for Lebanon for coordinated messaging and advocacy with Lebanon's political leadership. The Special Coordinator will continue to engage regional

stakeholders as part of her good offices mandate, to help build trust and defuse tensions, and mobilize the broadest possible support for Lebanon's stability.

136. With regard to inter-agency coordination and liaison, the mission cooperates closely with UNIFIL in the implementation of resolution 1701 (2006). Both missions continue to deepen collaboration and joint engagement with national and international stakeholders to maintain the cessation of hostilities and to strengthen the security sector and the extension of state authority across all of Lebanon's territory. Under a memorandum of understanding between UNIFIL and the Office, UNIFIL supports the Office in finance, procurement, engineering, communications, medical services, transport and logistics. The Office also leverages the presence of other United Nations entities, bringing all the United Nations political, security and development tools to bear in support of Lebanon's stability.
137. To further integrate United Nations activities in Lebanon, the mission contributes to the elaboration of the common country analysis of the country team on key issues like peace and governance, political instability, regional dynamics, socio-economic implications, increased intra and inter-communal tensions, and reduction in the civic space. The mission contributes to the United Nations Sustainable Development Cooperation Framework components related to the Office's mandate, such as elections, support to law enforcement and security agencies, women and peace and security, human rights, prevention of violent extremism and hate speech. The Office leads the peace and governance results group of the United Nations Sustainable Development Cooperation Framework, and the country team integrated working groups related to human rights, gender and elections. The mission is also a member of the humanitarian-development-peace nexus task force, responsible for enhancing complementarity across all United Nations interventions.
138. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
 - (a) International consensus with regard to Lebanon, while present, will continue to be challenged;
 - (b) Political stalemate may hinder effective decision-making and undermine the implementation of meaningful economic, fiscal and monetary reforms, and prevent the conclusion of an agreement with IMF to the detriment of sustainable and inclusive recovery of the country;
 - (c) The deteriorating socioeconomic situation and its humanitarian repercussions will continue to impact Lebanon and will require a multi-year recovery and reform programme;
 - (d) Lebanon's protracted economic and financial crisis has eroded State institutions, diminishing their ability to provide essential public services and to consolidate State authority across the country. Continuing high inflation, currency depreciation, protracted unemployment, growing poverty and humanitarian challenges will remain sources of instability and social unrest;
 - (e) The tense and volatile regional environment will continue to affect Lebanon's internal stability and security;
 - (f) The continued presence of large numbers of Palestine and Syrian refugees will remain a factor;
 - (g) The cessation of hostilities between Lebanon and Israel will hold, potentially allowing for progress in line with resolution 1701 (2006), and the continuation of confidence-building efforts following the establishment of the maritime boundary;
 - (h) Violations of resolution 1701 (2006) will continue to be perpetrated by the parties and tensions will persist, including over the prevalence and proliferation of weapons in Lebanon outside the authority of the State, as well as violations of Lebanese sovereignty and territorial integrity;
 - (i) Increased extension of State authority south of the Litani river and along the borders will continue to be impacted by the law and order requirements elsewhere in the country, and the budgetary positions of the State security institutions.
139. The mission integrates a gender and women and peace and security perspective in its operational activities, deliverables, and results, as appropriate. As women currently hold only 8 out of 128 parliamentary seats (6.4 per cent) and one ministerial portfolio, the mission is working to enhance

women's participation and representation in political life through a range of initiatives including the development of gender quota proposals, targeted support for female electoral candidates, campaigns around voting practices and coalition building for electoral reform, initiatives that originated in the context of the 2022 parliamentary elections in coordination with UNDP and UN-Women and will continue through the municipal elections in May 2023. The mission has established an active network of women parliamentarians, leading media persons and civil society actors to foster women's empowerment. To advance the youth, peace and security agenda, the Office will work on expanding its engagement with youth groups through various platforms and continue to advocate for the empowerment of youth and their integration in political and decision-making processes.

Impact of the pandemic and lessons learned

140. The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates by constraining the good offices role of the Special Coordinator in furthering the objectives of resolution 1701 (2006). The United Nations system faced challenges in meeting national needs and addressing critical gaps owing to the coronavirus pandemic and its devastating impact on the society, healthcare, and economy. In Israel, strict COVID-19 protocols and related travel restrictions, and within Lebanon the curtailment of in-person meetings with external interlocutors, as well as among the United Nations country team, remained a challenge in particular during the first half of 2022. The mission leadership worked with the United Nations country team to identify opportunities for joint action with special focus on strengthening gender mainstreaming, disability inclusion, human rights, and the principle of leaving no one behind.
141. The mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Strong precautionary measures were taken by the mission to avoid further transmission of COVID-19 among United Nations staff.

Programme performance in 2022

Promoting conditions for the further extension and consolidation of state authority

142. In 2022, the Special Coordinator led a range of initiatives that contributed to the timely conduct of the parliamentary elections in May 2022. These included political advocacy; outreach to civil society, religious leaders and opinion makers; leveraging the International Support Group for Lebanon and the Elections Forum (stakeholders' platform at the ambassadorial level co-chaired with the Minister of Interior); and working with UNDP on technical support for the elections. The mission engaged with political parties and the public to advance women's participation in the elections and representation in decision-making positions, rallied women members of parliament on a platform for women's empowerment, and advocated for implementation of Lebanon's National Action Plan on Security Council resolution 1325 (2000).
143. Progress towards the objective is presented in the performance measure below (see table 22).

Table 22

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Agreement by political parties to the French-led initiative, with implementation pending	Agreement by political parties on a comprehensive reform programme, in order to successfully conclude negotiations with IMF	Parliamentary elections conducted in May
Government delay in preparing the 2021 budget	Adoption of 2022 State budget	
Stalled discussions with IMF owing to Government resignation	Referral of 2022 State budget by Council of Ministers to Parliament	
Beginning of discussions on electoral reform	Successful support to Lebanese authorities in planning and preparing for the 2022 elections	
Adoption of legislation establishing the National Anti-Corruption Institution		

Planned results for 2024**Result 1: support institutional reform and the democratic process post-elections, and implementation of the financial and economic reform agenda****Programme performance in 2022 and target for 2024**

144. In 2022, the mission's work contributed to support for the democratic process, which met the planned target of holding parliamentary elections in May 2022. However, political disagreement prevented the timely election of a new president after the 6-year term of the President, Michel Aoun, concluded on 31 October 2022. With a vacant presidency and a caretaker Government with limited constitutional authority, decisive actions to launch reform imperatives remained stalled.
145. For 2024, the Office will encourage the uninterrupted functioning of State institutions, in particular, effective, transparent and accountable policy and decision-making in the Cabinet and Parliament. The mission, with its partners, will continue to support the recovery of Lebanon through targeted interventions, including to preserve the functioning of state institutions and enable them to deliver on a set of comprehensive reforms, including the implementation of an IMF programme and adoption of financial and macro-economic reforms necessary to stabilize the economy and for Lebanon to regain access to international financing opportunities. These will be critical conditions for Lebanon to meet in full its commitments and obligations under resolution 1701 (2006). The Office will advocate, along with the United Nations country team and the International Support Group for Lebanon, to enhance social protections for vulnerable groups, strengthen the independence and effectiveness of the judiciary; implement the national anti-corruption strategy; operationalize the National Human Rights Commission as well as the National Anti-Corruption Institution; and implement the National Action Plan on Women, Peace and Security.
146. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 23).

Table 23
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Launch of discussions in Parliament regarding a new elections law	Adoption of revised elections law	Parliamentary elections held on time, in line with the new elections law Presidential elections deadlocked due to disagreements among political parties Government and IMF reach Staff-level Agreement towards an IMF programme	Follow-up on implementation of reform agenda, in line with the IMF agreement	Follow-up on the implementation of an IMF programme and promote further international assistance for Lebanon Uninterrupted functioning of effective, transparent, and accountable State institutions Increased engagement of governing institutions with civil society, women and youth groups to restore confidence

Result 2: facilitate increased international support for State security institutions through expedited assistance in the most critically required areas

Programme performance in 2022 and target for 2024

147. In 2022, to mitigate the impact of the economic crisis on the Lebanese Armed Forces and Internal Security Forces, the Office facilitated the establishment of a donor-funded United Nations mechanism for financial transfers to Lebanese Armed Forces and Internal Security Forces personnel as emergency support. The mechanism, operated by UNDP, will facilitate the livelihood support programme for Lebanese Armed Forces and Internal Security Forces personnel in line with paragraph 10 of Security Council resolution [2650 \(2022\)](#) and the United Nations human rights due diligence policy.
148. For 2024, looking beyond the immediate financial assistance to security personnel, and taking into account the economic situation, the Office will direct renewed focus to the overall capability development of the Lebanese Armed Forces as a key element to support progress towards a permanent ceasefire. To this end, the Office will promote additional and expedited international assistance to the Lebanese Armed Forces, including for their daily logistical needs, and maintaining their counterterrorism, border protection, and naval capacities, in line with resolution [2650 \(2022\)](#).

Lessons learned and planned change

149. The lesson for the mission was that an unintended effect of this initiative was a shift away from international support for the Lebanese Armed Forces' larger capabilities development as limited donor funds were focused on immediate financial assistance for security personnel. In applying this lesson, the mission will continue to work in a coordinated manner with the security institutions and donors to anticipate shortfalls and direct international support to the most urgent needs of Lebanon's security institutions with an eye on the larger capabilities development of the Lebanese Armed Forces.
150. Expected progress towards the objective and the target for 2024 are presented in the performance measure below (see table 24).

Table 24
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	The Office of the United Nations Special Coordinator for Lebanon and UNDP developed a cash-transfer mechanism for emergency assistance to Lebanese Armed Forces and Internal Security Forces compliant with the human rights due diligence policy	Continued support to Lebanese Armed Forces and Internal Security Forces in compliance with the human rights due diligence policy	Support to further strengthen State security institution capabilities, beyond emergency assistance

Deliverables

151. Table 25 lists all deliverables of the mission.

Table 25
Deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	3	3
1. Report of the Secretary-General on the implementation of Security Council resolution 1701 (2006)	3	3	3	3
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
2. Meetings of the Security Council	3	3	3	3
C. Substantive deliverables				
Good offices: provision of good offices in support of the prevention of conflict and the extension and consolidation of State authority; good offices on elections, peace and stability, including with respect to economic issues; intensive engagement with the Lebanese Armed Forces and the Internal Security Forces, as well as the donor community, to facilitate continued assistance to the security forces; and confidence-building measures between Israel and Lebanon, including with respect to the maritime boundary.				
Consultation, advice and advocacy: consultations with Lebanese and Israeli interlocutors on the implementation of resolution 1701 (2006) ; consultations with the International Support Group for Lebanon and other regional stakeholders on ensuring Lebanon's stability; consultations on the economic and governance reform agenda and development priorities; advice on government accountability, governance policy formulation and public administration reforms; advocacy with international partners in support of Lebanon's efforts for extension of State authority, including strengthened state security agencies; consultations on integrated border management on the Lebanon-Syrian Arab Republic border; advocacy on key human rights standards and protections that could have an impact on long-term security and stability and the strengthening of human rights institutions in Lebanon; advocacy on the political participation and representation of women and young people; and advocacy with international partners in support of Lebanon for continued donor involvement and resources as Lebanon responds to the presence of Palestine and Syrian refugees, taking into account the needs of refugees and host communities.				

Category and subcategory	2022	2022	2023	2024
	planned	actual	planned	planned

D. Communication deliverables

Outreach programmes, special events and information materials: outreach activities to support the implementation of resolution 1701 (2006) and other key priorities relating to Lebanon's sustainable peace, development and human rights agenda; activities to strengthen the relationship with key Lebanese partners and stakeholders; engaging with young people, including university students, and supporting women's empowerment and representation, in particular in the parliamentary elections; and outreach activities through special events such as United Nations Day and International Women's Day to communicate more effectively with local stakeholders and to spread broader knowledge of the work being undertaken through Office of the United Nations Special Coordinator for Lebanon information materials and joint outreach activities with other United Nations entities on the promotion of United Nations system-wide priorities such as the Sustainable Development Goals.

External and media relations: press conferences, press statements, background briefings, interviews, op-eds and other media engagements to communicate strategically on the implementation of resolution 1701 (2006); and press statements of the International Support Group for Lebanon on safeguarding Lebanon's security, stability and sovereignty and the implementation of resolution 1701 (2006).

Digital platforms and multi-media content: deepen local and national understandings of and support to the Office of the United Nations Special Coordinator for Lebanon and its support for the implementation of resolution 1701 (2006) on website or social media.

B. Proposed post and non-post resource requirements for 2024

Resource requirements (regular budget)

	International staff											National staff			United Nations Volunteers			Total
	USG	ASG	D-2	D-1	P-5	P-4	P-3	P-2	FS	GS	Subtotal	NPO	LL	Subtotal	International	National	Subtotal	
Approved 2023	1	1 ^a	–	1	2	6	1	–	6	–	18	5	60	65	–	–	–	83
Proposed 2024	1	1 ^a	–	1	2	6	1	–	6	–	18	5	60	65	–	–	–	83
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

^a Position is funded at 50 per cent and cost-shared with the Development Coordination Office.

152. The proposed resource requirements for 2024 for the Office amount to \$11,308,900 (net of staff assessment) and would provide for salaries and common staff costs (\$9,992,100) for 18 international positions (1 Under-Secretary-General, 1 Assistant Secretary-General, 1 D-1, 2 P-5, 6 P-4, 1 P-3 and

6 Field Service) and 65 national positions (5 National Professional Officer and 60 Local level), as well as operational costs (\$1,316,800), comprising the costs for consultants and consulting services (\$12,300), official travel (\$164,500), facilities and infrastructure (\$719,500), ground transportation (\$73,900), communications and information technology (\$235,800), and other supplies, services and equipment (\$110,800).

153. In 2024, no change is proposed to the number and levels of positions.
154. A vacancy rate of 5.6 per cent has been applied to the estimates for international positions, a vacancy rate of zero per cent has been applied to the estimates for National Professional Officer positions and a vacancy rate of 6.7 per cent has been applied to the estimates for Local level positions, all based on the actual vacancy rates in March 2023.
155. The increase in requirements for 2024 compared with the appropriation for 2023 is attributable to the increased requirements under civilian personnel costs, resulting from the increase of the post adjustment multiplier in Lebanon and the application of the latest national staff salary scales promulgated in October 2022. The increase is partially offset by a decrease in operational costs under other supplies, services and equipment due to lower requirements for other freight and related costs, and medical services due to adequate stock acquired in previous periods.

6. United Nations Regional Office for Central Africa

(\$8,410,500)

Foreword

In 2024, the United Nations Regional Office for Central Africa (UNOCA) will strengthen its cooperation in peace and security with the Economic Community of Central African States (ECCAS), including through joint early warning and good offices initiatives, and will mobilize the United Nations system to support the capacities of ECCAS and its member States in conflict prevention and resolution and sustaining peace. UNOCA will promote the contribution of civil society to peace and security, including by building the capacities of the regional Coalition of Civil Society Organizations for Peace and Conflict Prevention in Central Africa, the ECCAS network of women mediators and the Coalition for Youth, Peace and Security in Central Africa.

UNOCA will also work with ECCAS and its member States to prevent inter-communal violence and to fight hate speech, including through advocacy and support for the adoption and implementation of regulations and strategies, with a meaningful contribution of civil society and the media and the adequate participation of women and youth.

The mission will continue working with the United Nations Office for West Africa and the Sahel to support joint efforts by ECCAS and the Economic Community of West African States aimed at addressing cross-regional peace and security challenges facing Central and West Africa, especially in the areas of maritime security and the fight against terrorism and violent extremism.

In carrying out its mandate, UNOCA will ensure gender mainstreaming and a human rights-based approach, limit its carbon impact, and contribute to the fight against climate change and its impact on peace and security.

(Signed) **Abdou Abarry**
Special Representative of the Secretary-General for Central Africa
Head of the United Nations Regional Office for Central Africa

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

156. The United Nations Regional Office for Central Africa (UNOCA) is responsible for the prevention of conflicts and the consolidation of peace and security in Central Africa. The mandate was established through an exchange of letters between the Secretary-General and the President of the Security Council (S/2009/697 and S/2010/457). Through another exchange of letters (S/2021/719 and S/2021/720), the mandate was extended until 31 August 2024.
157. The current mandate assigns four objectives to UNOCA, namely: (a) monitor political and security developments in Central Africa and carry out good offices on behalf of the Secretary-General in order to prevent and resolve conflicts, to help to sustain peace and to advise the Secretary-General and United Nations entities in the region on sustaining peace issues in Central Africa; (b) enhance subregional capacities for conflict prevention and mediation in countries of the subregion, with due attention given to the principles of the Charter of the United Nations, including human rights and gender dimensions; (c) support and enhance United Nations efforts in the subregion, as well as regional and subregional initiatives on peace and security, including from human rights and gender perspectives; and, (d) enhance coherence and coordination in the work of the United Nations in the subregion on peace and security. UNOCA will also continue to host the secretariat of the United Nations Standing Advisory Committee on Security Questions in Central Africa, coordinate the implementation of the United Nations regional strategy to address the threat and impact of the Lord's Resistance Army and support the implementation of the regional strategy and plan of action on counter-terrorism and the non-proliferation of small arms and light weapons in Central Africa.

Programme of work

Objective

158. The objective, to which this mission contributes, is to prevent conflict and consolidate peace and security in the Central Africa subregion.

Strategy and external factors for 2024

159. To contribute to the objective, the mission will:
- (a) Engage in good offices activities to help countries to prevent political crises and election-related violence and peacefully resolve conflicts and crises stemming from political and electoral processes, and promote inclusive, peaceful and credible elections;
 - (b) Build regional and national capacities for conflict prevention and sustaining peace, including by providing support to national institutions and platforms for political dialogue where they exist. Where such institutions and platforms are lacking, UNOCA will advocate their establishment and mobilize relevant United Nations entities and other partners to support their operationalization;
 - (c) Leverage its partnership with subregional organizations, especially the Economic Community of Central African States (ECCAS) and the Central African Economic and Monetary Community, in conflict prevention, mediation and early warning, including promoting the participation of women, young people and other actors in peacebuilding and sustaining peace strategies and addressing the adverse effects of climate change on peace and security;

- (d) Address cross-regional peace and security challenges (farmer-herder dynamics), in partnership with United Nations entities in Central and West Africa. Continue to support a cross-regional approach to addressing the crisis in the Lake Chad Basin region and to improve regional coordination on mechanisms on maritime security in the Gulf of Guinea;
 - (e) Continue its partnership with ECCAS on the development and the implementation of regional strategy on hate speech;
 - (f) Carry out regular early warning analysis to inform preventive diplomacy and good offices efforts, to highlight threats to peace and security in Central Africa and mobilize support for preventive diplomacy, in collaboration with ECCAS and United Nations regional offices and regional representations of United Nations entities;
 - (g) Enhance the coherence of the work of the United Nations on peace and security issues in Central Africa through regular consultations with relevant United Nations entities in the subregion, coordinate the efforts of United Nations entities geared towards the implementation of the regional conflict prevention framework and support the United Nations country teams in adopting and/or rolling out national sustaining peace strategies, aligned with the framework;
 - (h) Ensure the regular holding of the ministerial meetings of the United Nations Standing Advisory Committee on Security Questions in Central Africa as a platform for confidence-building between Member States to discuss threats and challenges to regional peace and security, in particular with a view to preventing or addressing conflicts and crises that carry the risk of creating or exacerbating inter-State tensions, or the risk of expanding beyond national borders.
160. The above-mentioned work is expected to result in:
- (a) Peaceful electoral processes in the subregion, with relevant prevention mechanisms in place for potential election-related violence;
 - (b) Prevention or mitigation of election-related violence and the initiation or continuation of political dialogue processes assisted by joint early-warning and good offices missions by UNOCA and ECCAS in countries holding elections or facing a political crisis;
 - (c) Progress made by ECCAS towards the adoption of a regional governance framework in Central Africa;
 - (d) The holding of successful ministerial meetings of the United Nations Standing Advisory Committee on Security Questions in Central Africa and two field visits of the Bureau of the United Nations Standing Advisory Committee on Security Questions in Central Africa to selected countries on topical issues related to regional peace and security in Central Africa;
 - (e) A common understanding of key peace and security challenges and priorities among United Nations entities in Central Africa, integrating emerging drivers of conflicts, including climate change;
 - (f) Enhanced coordination of United Nations efforts in support of regional and subregional initiatives on peace and security and governance;
 - (g) The adoption and/or implementation of national sustaining peace strategies aligned with the regional conflict prevention framework in at least three countries;
 - (h) Improved interregional coordination between Central and West Africa on maritime security in the Gulf of Guinea, farmer-herder dynamics and the crisis in the Lake Chad Basin region.
161. With regard to cooperation with other entities, the mission carries out joint analyses and activities on cross-regional peace and security challenges with other regional and subregional organizations. Early warning analysis and good offices are carried out, to the extent possible, jointly or in consultation with ECCAS.
162. With regard to inter-agency coordination and liaison, the mission continues to convene regular meetings of the United Nations presences in Central Africa to achieve a common understanding of the

key peace and security challenges in Central Africa and to build or reinforce synergies in the action of the United Nations, including through the regional conflict prevention framework. The mission works closely with UNOWAS, the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic, the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo, the Office of the Special Envoy of the Secretary-General for the Great Lakes Region and other relevant United Nations entities, including with respect to cross-border and transregional challenges to peace and security, in order to avoid duplication and ensure coherence in United Nations activities in the subregion. Country-specific early warning and good offices activities are carried out in close coordination with the offices of the resident coordinators concerned.

163. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) ECCAS institutional reform becomes fully operational, with all peace and security institutions and mechanisms established and provided with adequate resources for their functioning. UNOCA and the ECCAS Commission maintain or strengthen their cooperation and regular consultations, and adopt and roll out a joint plan of action, within the framework of a new memorandum of understanding between the Commission and the United Nations on peace and security issues;
 - (b) ECCAS member States remain committed to establishing a regional governance framework, work genuinely towards the adoption and implementation of regional governance standards and mechanisms, and solicit or accept the support of regional and international partners, including UNOCA, to that end;
 - (c) The political landscape remains polarized in several countries of the subregion, against the backdrop of growing demands for the opening of political space and the improvement in electoral frameworks, increasing the risks of political violence or conflict while distrust in public institutions persists, prompting some stakeholders to demand neutral platforms for discussion on key political, electoral and institutional reforms;
 - (d) The elections scheduled in the countries of the region are held according to the constitutional and legal time frames and the countries concerned accept the political engagement of UNOCA to prevent election-related violence and resolve election-related crises;
 - (e) Tensions erupt, persist or heighten between several countries of the subregion over cross-border security issues, warranting an increased role of regional institutions and mechanisms, which is accepted by the States concerned and supported by international partners, to calm tensions, build trust and resolve disputes peacefully;
 - (f) The ECCAS Commission and member States show a genuine commitment to the involvement of civil society actors, including the regional Coalition of Civil Society Organizations for Peace and Conflict Prevention in Central Africa and women and youth organizations, in the activities of ECCAS in the realm of peace and security, including early warning, conflict prevention and peace-making. The Coalition becomes fully operational, with adequate human resources, and is supported by ECCAS member States and partners;
 - (g) ECCAS member States adopt and begin to implement a regional regulation on pastoralism and transhumance in Central Africa, support national and local mechanisms in preventing and peacefully addressing farmer-herder conflicts, and take collective measures to promote peaceful cross-border transhumance.
164. The mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate, including support for the implementation of the regional action plan on Security Council resolution [1325 \(2000\)](#) and the adoption and rolling out of national action plans. The mission continues its advocacy on the reinforcement of the role of women in conflict prevention and sustaining peace, as well as adequate representation of women in decision-making positions at both the national and regional levels. The mission works with other relevant United Nations entities and external partners to reinforce the capacities of women in decision-making and in mediation. UNOCA will support the

operationalization and build the capacity of the ECCAS network of women mediators established in December 2021 and endorsed by the Heads of State in January 2022. In its analysis and reporting, the mission ensures that data and information are disaggregated by gender and that analyses and recommendations give due consideration to the specific situation and needs of women. During fact-finding and good offices visits, the mission ensures adequate consultation and engagement with women and women's groups. Human rights aspects, including the protection of women's rights, are also integrated into conflict analysis and early warning and preventive diplomacy work of the mission.

165. In line with the United Nations Disability Inclusion Strategy, the mission advocates for political and electoral processes in the region to be disability-sensitive, by encouraging Member States to take appropriate measures to facilitate the participation of persons with disabilities. The mission also encourages and supports experience-sharing between the States of the region on disability inclusion, thus facilitating the adoption of measures that take into consideration the specificities of the regional and national contexts. The mission further integrates the situation of persons with disabilities into its analysis and reporting and ensures proper consultation and engagement with organizations representing persons with disabilities during fact-finding, early warning and good offices activities.

Impact of the pandemic and lessons learned

166. In 2022, the COVID-19 pandemic did not impact the UNOCA programme performance. The mission continued to implement its mandate in good offices, preventive diplomacy and mediation; support regional and subregional initiatives on peace and security; and enhance the coherence and coordination of United Nations action in the area of peace and security in the subregion.
167. The mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including strengthening internal and external communication in a hybrid environment (e.g. by providing regular, coordinated and transparent internal communications to engage and inform personnel and promote well-being) and simplifying and streamlining business processes (e.g. events organized in a hybrid format).

Programme performance in 2022

Reduced tensions in electoral contexts

168. In 2022, elections took place in Angola, Gabon, the Congo, Equatorial Guinea and São Tome and Príncipe. While the elections were generally peaceful and orderly, the subregion faced substantial challenges with electoral governance. The revision of electoral lists in some electoral processes was a particular source of tensions. Low voter turnout and boycotts of elections in some countries, as well as demands for independent verification and counting of votes highlighted a general mistrust of electoral systems in the subregion. UNOCA monitored the situation closely in the lead-up to the election, including by deploying fact-finding missions. UNOCA also encouraged political dialogue, including through standing or ad hoc platforms established to that end, with a view to creating conditions for inclusive, peaceful and credible elections.
169. UNOCA carried out joint fact-finding and assessment missions with ECCAS to Angola and São Tome and Príncipe, identifying risks of violence and conflicts and making recommendations for good offices initiatives. In Gabon, Angola and São Tome and Príncipe, UNOCA organized capacity-building workshops for women's and youth organizations to increase their engagement in politics. The mission also worked with the United Nations country teams and civil society organizations in Angola, Gabon and São Tome and Príncipe to promote women's political participation in elections.
170. The recurrence and persistence of hate speech and statements inciting violence emerged as one of the major concerns of member States, particularly in a context already marked by socio-political tensions, disinformation and misinformation. UNOCA continued to advocate with the ECCAS Commission and other regional stakeholders for the development and adoption of a regional strategy to prevent and combat hate speech in Central Africa.

171. Progress towards the objective is presented in the performance measure below (table 28).

Table 28

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Progress ongoing towards the adoption by ECCAS of regional legislation on pastoralism, and by ECCAS and ECOWAS of common policies and joint programmes, which were delayed owing to COVID-19 restrictive measures and the ECCAS institutional reform process	Reduction in election-related incidents and an increase in the number of constructive and inclusive dialogue initiatives in the subregion	Early warning and good offices missions were conducted by UNOCA and ECCAS to States holding elections Elections in Central Africa were generally peaceful, with no or low level of violence

Planned result for 2024**Election-related violence is prevented or mitigated in line with the Malabo Declaration on democratic elections****Programme performance in 2022 and target for 2024**

172. Based on the lessons learned from the electoral processes held recently in the region, including those that took place in Angola, Equatorial Guinea and São Tomé and Príncipe in 2022, and in line with the Malabo Declaration adopted at the fiftieth meeting of the United Nations Standing Advisory Committee on Security Questions in Central Africa, the mission will provide support through early warning and good offices initiatives aimed at contributing to peaceful and inclusive electoral processes in Chad, the Congo and Rwanda where elections will be held in 2024. UNOCA will also encourage the establishment of inclusive political dialogue frameworks and support those already in existence as a tool to defuse tensions, promote inclusive processes and enhance confidence in electoral frameworks and the institutions involved in the organization of elections. In coordination with regional actors, including ECCAS, UNOCA will also deploy technical assessment missions to work closely with the resident coordinators and United Nations country teams, which will focus on identifying and defusing emerging peace and security threats or election-related tensions. UNOCA will also encourage and support a greater role for the media and civil society in promoting inclusive and peaceful elections, including by promoting the participation of women and youth and in the fight against hate speech.

Lessons learned and planned change

173. A lesson for the mission was that early warning, good offices initiatives and facilitating political dialogue frameworks contribute to peaceful and inclusive electoral processes.
174. In applying the lesson, the mission plans to work closely with United Nations country teams and national stakeholders to design and implement activities aimed at ensuring a greater participation of youth and women in elections. UNOCA will also use good offices to promote dialogue among electoral stakeholders to build consensus on the electoral frameworks, processes and outcomes.
175. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 29).

Table 29
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Finalization of ECCAS-wide legislation on pastoralism; progress towards the adoption of common policies and joint programmes ahead of the next ECCAS-ECOWAS summit	Reduction in election-related incidents and increase in the number of constructive and inclusive dialogue initiatives in the subregion	Early warning and good offices missions conducted by UNOCA and ECCAS to States holding elections Peaceful elections took place in Angola, the Congo, Equatorial Guinea and São Tome and Principe, with no or low levels of violence	Six early warning and good offices missions conducted by UNOCA and ECCAS to States of the region contribute to peaceful elections, with no or low level of violence Progress is achieved in the implementation of the United Nations Standing Advisory Committee on Security Questions in Central Africa Malabo Declaration and towards the adoption of a regional protocol on elections	Six early warning and good offices missions conducted by UNOCA and ECCAS to States of the region contribute to peaceful elections, with no or low level of violence Progress is achieved in the implementation of the United Nations Standing Advisory Committee on Security Questions in Central Africa Malabo Declaration and towards the adoption of a regional protocol on elections

Deliverables

176. Table 30 lists all deliverables of the Mission.

Table 30
Deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	3	4
1. Reports of the Secretary-General to the Security Council	2	2	2	2
2. Report of the Secretary-General on the activities of the United Nations Standing Advisory Committee on Security Questions in Central Africa	1	1	1	1

6. Workshop for journalists/media on their role in conflict prevention and protection of civilians	25	3	25	6
Fact-finding, monitoring and investigation missions (number of missions)	–	–	–	30
7. Field visits to Member States to gather information, consult stakeholders and coordinate action on issues related to subregional peace and security, activities monitoring, data collecting	–	–	–	30

Category and subcategory	2022	2022	2023	2024
	planned	actual	planned	planned

C. Substantive deliverables

Good offices: good offices, preventive diplomacy and mediation, high-level diplomatic missions and meetings, including jointly with regional organizations (ECCAS and the African Union), regional and subregional summits, forums and high-level meetings to promote peace and stability, maritime safety and human rights.

Consultation, advice and advocacy: strategic coordination meetings and round tables with regional and subregional organizations on regional integration, peace and security, human rights and counterterrorism (including addressing security threats in the Lake Chad basin).

D. Communication deliverables

Outreach: collaborate with civil society (e.g., media associations, women's and youth groups), ECCAS and other key stakeholders for the holding of events to raise awareness of UNOCA mandate and activities; collaborate with broadcast media to raise the profile of UNOCA and the public's better understanding of its good offices and mediation work; support United Nations Communications Group – Gabon joint activities, harmonizing communications and messaging campaigns (e.g. marking official United Nations observances relevant to UNOCA mandate and Central African region).

External and media relations: capacity-building programmes for the media and communications stakeholders in the subregion, especially in the context of national elections scheduled for 2024 (Chad, the Congo, Rwanda); build and maintain working relationships with media at national, subregional and international level to help to ensure a better understanding of the work of UNOCA; organize at least two press conferences for UNOCA leadership; arrange for interviews and other media coverage with UNOCA political affairs staff.

Digital platforms and multimedia content: three online platforms (social and digital media) to disseminate multilingual content; produce and disseminate various digital materials (cards, infographics, videos, digital newsletters) and multimedia content to reflect UNOCA activities for peace and stability in the subregion; produce a podcast programme on high-priority areas of UNOCA mandate.

B. Proposed post and non-post resource requirements for 2024

Resource requirements (regular budget)

Table 31

Financial resources

(Thousands of United States dollars)

Category of expenditure	2022		2023		2024	Variance
	Appropriation	Expenditure	Appropriation	Requirements		2024 vs. 2023
	(1)	(2)	(3)	(4)	(5)=(4)-(3)	
Military and police personnel costs	–	–	–	–	–	–
Civilian personnel costs	6 894.3	6 569.8	7 238.0	6 610.2		(627.8)
Operational costs	1 635.8	1 474.4	1 836.1	1 800.3		(35.8)
Total (net of staff assessment)	8 530.1	8 044.2	9 074.1	8 410.5		(663.6)

Table 32

Human resources

	International staff											National staff			United Nations Volunteers			Total
	USG	ASG	D-2	D-1	P-5	P-4	P-3	P-2	FS	GS	Subtotal	NPO	LL	Subtotal	International	National	Subtotal	
Approved 2023	1	–	–	2	5	12	6	–	7	–	33	4	12	16	–	1	1	50
Proposed 2024	1	–	–	2	5	12	6	–	7	–	33	4	12	16	–	1	1	50
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

177. The proposed resource requirements for 2024 for UNOCA amount to \$8,410,500 (net of staff assessment) and would provide for salaries and common staff costs (\$6,610,200) for the continuation of 33 international positions (1 Under-Secretary-General, 2 D-1, 5 P-5, 12 P-4, 6 P-3 and 7 Field Service), 16 national positions (4 National Professional Officer and 12 Local level) and 1 national United Nations Volunteer, as well as operational costs (\$1,800,300) comprising the costs for consultants (\$17,800), official travel (\$568,100), facilities and infrastructure (\$283,100), ground transportation (\$60,000), air operations (\$145,800), communications and information technology (\$534,400), and other supplies, services and equipment (\$191,100).
178. In 2024, it is proposed to reassign one position of Military Adviser (P-4) as Legal Officer, under the Office of the Special Representative of the Secretary-General, to provide timely and effective legal expertise and advice on legal issues affecting the mission's mandate and activities, including public, international, private and administrative law matters, as well as issues of constitutional and other national law.
179. A vacancy rate of 18.2 per cent has been applied to the estimates for international positions and 25.0 per cent for National Professional Officer positions based on the actual vacancy rate in March 2023. A vacancy rate of zero per cent has been applied to the estimates for local level positions and national United Nations Volunteers based on the actual vacancy rate in March 2023. A vacancy rate of 50 per cent has been applied for the estimate of one position proposed for reassignment.
180. The decrease in requirements for 2024 compared with the appropriation for 2023 is attributable mainly to (a) decreased requirements for international staff and National Professional Officers, due to the application of higher vacancy rates of 18.2 per cent and 25.0 per cent, based on vacancy rates in March 2023, compared with the rates applied in the 2023 budget; and (b) lower requirements for communications and information technology due lower volume of acquisition of equipment. Those decreases are offset in part by higher requirements for other supplies, services and equipment related to the contribution to common services for compound management and security in Gabon.

Extrabudgetary resources

181. In 2023, extrabudgetary resources in the amount of \$765,000 were projected to be utilized to support regional capacity to prevent, mitigate and resolve election-related crises and violence in the Central Africa subregion, including through the strengthening of electoral governance and support for the adoption of regional norms and mechanisms on democratic elections; support for the effective functioning of a regional women's platform for peace and security in the Central Africa subregion; support for ECCAS in strengthening its conflict prevention and resolution capacities, with a view to enhancing its effectiveness in early warning; and the strengthening of the role of media organs as a catalyst for peace and security, as well as social cohesion. The funding will also provide for one post of Political Affairs Officer (P-4).
182. In 2024, extrabudgetary resources in the amount of \$765,000 are projected to be utilized, to continue supporting regional capacities to prevent, mitigate and resolve election-related crises and violence in the Central Africa subregion, including through the strengthening of electoral governance and support for the adoption of a regional protocol on democratic elections, and the continuation of one post of Political Affairs Officer (P-4).

7. United Nations Support Mission in Libya

(*\$87,903,700*)

Foreword

Since the postponement of elections in December 2021, Libya has faced a protracted political stalemate and a fragile security environment. I have consulted a wide range of Libyan stakeholders to gather views on how to solve the political crisis since arriving in Libya in October 2022. On 27 February 2023, I presented to the Security Council a comprehensive approach to enable elections in 2023.

The United Nations Support Mission in Libya (UNSMIL) will continue to support the establishment of unified and elected institutions and national reconciliation. The Mission and the United Nations country team will support progress on peacebuilding and the development of legal and policy frameworks to promote the rule of law in line with international human rights norms and standards. The United Nations in Libya will improve the capacity of rule of law institutions to address human rights abuses and violations, support a transitional justice process and promote the unification and professionalization of security sector institutions, building on efforts to disarm, demobilize and reintegrate armed groups. UNSMIL will also support efforts to reunify economic institutions, with a focus on the transparent, equitable and accountable management of natural resources and revenues across Libya. Through integrated efforts, the United Nations will seek to advance the women and peace and security agenda and improve coordination, outreach and training with youth towards an inclusive political process, the promotion of national reconciliation and the protection of civic space. The United Nations in Libya will also continue to monitor and address the humanitarian situation of migrants, refugees and asylum-seekers and support durable solutions for people who remain internally displaced in Libya.

Our comprehensive approach will maximize the gains of interventions on these priorities to support stabilization efforts in the transitional political context.

(Signed) Abdoulaye **Bathily**
Special Representative of the Secretary-General for Libya
Head of the United Nations Support Mission in Libya

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

183. The United Nations Support Mission in Libya (UNSMIL) is an integrated special political mission established on 16 September 2011 by the Security Council in its resolution [2009 \(2011\)](#) to support the country's transition and post-conflict efforts, including through an inclusive national dialogue and a constitution-drafting process.
184. Following the signing of a nationwide ceasefire agreement on 23 October 2020 that ended the armed conflict, which had begun in April 2019, the Security Council, in its resolution [2570 \(2021\)](#), mandated UNSMIL to provide support to the 5+5 Joint Military Commission and the Libyan-led and Libyan-owned ceasefire monitoring mechanism, including through the facilitation of confidence-building measures and the scalable and incremental deployment of UNSMIL ceasefire monitors.
185. On 28 October 2022, in its resolution [2656 \(2022\)](#), the Security Council extended the mandate of UNSMIL, as set out in Council resolution [2542 \(2020\)](#) and paragraph 16 of resolution [2570 \(2021\)](#), until 31 October 2023.
186. In the same resolution, the Security Council reiterated its request for UNSMIL to implement the recommendations of the independent strategic review (see [S/2021/716](#)) and its request that UNSMIL explore all avenues to increase efficiency and redeploy existing resources, including through prioritization and the reconfiguration of tasks and resources, as needed and where appropriate.
187. On 27 February 2023, the Special Representative of the Secretary-General for Libya proposed to the Security Council a comprehensive approach for enabling elections in Libya in 2023. The approach includes generating political buy-in from the main Libyan actors for elections, creating a conducive security environment for elections, finalizing the necessary legal framework for holding elections, engaging with a wide spectrum of Libyans to support elections and creating the necessary regional and international buy-in for elections.

Programme of work

Objective

188. The objective, to which this Mission contributes, is to support an inclusive political process leading to credible, transparent and inclusive elections; to support rights-based national reconciliation, peacebuilding and State-building efforts; to advance gender equality; to advance human rights and transitional justice processes; to support the reform of the security sector; to support the 5+5 Joint Military Commission in continuing to implement the October 2020 ceasefire agreement; and to provide support in other areas as mandated in accordance with Security Council resolutions [2542 \(2020\)](#), [2570 \(2021\)](#) and [2656 \(2022\)](#).

Strategy and external factors for 2024

189. To contribute to the objective, the Mission will:
- (a) Provide mediation and good offices, as well as technical assistance, engaging Libyan stakeholders at all levels and leaving no one behind, to contribute to the reunification of the Libyan institutions and promote progress in the Libyan-led and Libyan-owned political process to complement the efforts of the working groups of the International Follow-up Committee on Libya;

- (b) Provide technical assistance to the High National Elections Commission and the Central Committee for Local Elections;
- (c) Support Libyan parties and international actors in continuing to engage in an inclusive, victim-centred and rights-based national reconciliation process, on the basis of the principles of transitional justice and the principles of the 2030 Agenda for Sustainable Development of leaving no one behind, with a view to ensuring a Libyan-led and Libyan-owned inclusive political process and contributing to lasting peace;
- (d) Provide support and good offices within the area of rule of law, to support the judiciary and prosecutorial system, including their critical role in ensuring justice for all;
- (e) Promote and protect human rights, ensure monitoring and reporting of abuses and violations of human rights and international human rights and humanitarian law, including sexual violence in conflict and violations against migrants, and advocate on the humanitarian situation and support the delivery of humanitarian assistance in the country;
- (f) Provide good offices and work with national authorities on reforming the country's security sector, reinforcing the role of civil society organizations in civilian oversight, including support for mine action, support for laying the groundwork for a disarmament, demobilization and reintegration process and facilitating operational planning with national stakeholders on issues of process design, institutional set-up and economic aspects of disarmament, demobilization and reintegration and support for coordinating the provision of technical expertise, training and equipment, and assist the ongoing efforts on the unification of military and security institutions;
- (g) Support the 5+5 Joint Military Commission in continuing to implement the nationwide ceasefire agreement through the work and deployment of the UNSMIL ceasefire monitoring component in support of the Libyan ceasefire monitoring mechanism, including the provision of technical assistance and working towards the withdrawal of foreign fighters, foreign forces and mercenaries, and support the two Chiefs of Staff in their efforts on trust-building and reunification of the military institutions through the establishment of professional, unified and accountable defence and security forces;
- (h) Support economic policy reform, in close cooperation with Member States and international financial institutions, including reunification and reform of the country's banking system, a decentralization policy and the establishment of a revenue management and oversight mechanism;
- (i) Promote the rights of women and support the institutional capacity of governmental and non-governmental organizations to ensure that women's concerns are addressed and that the women and peace and security agenda is incorporated in national planning and national processes;
- (j) Engage with neighbouring countries, including sub-Saharan countries, to ensure that their views and concerns are taken into consideration.

190. The above-mentioned work is expected to result in:

- (a) Unified and functional government institutions, including economic institutions, contributing to political and economic stability and rights-based reconciliation, a functional legislative body and the development of a constitutional framework in accordance with universally recognized democratic principles and human rights standards;
- (b) Enhanced accountability of institutions, the promotion of the rule of law throughout the country, and reconciliation and transitional justice processes;
- (c) Unified security sector institutions operating under civilian oversight, including professional, unified and accountable defence and security forces, as well as a maintained ceasefire

supported through the implementation of the provisions of the ceasefire agreement, including the withdrawal of foreign fighters, foreign forces and mercenaries.

191. With regard to cooperation with other entities, the Mission works with relevant local and international partners, regional organizations and civil society groups, including by conducting briefings with the diplomatic community and coordinating with the African Union, the League of Arab States and the European Union (Libya Quartet) to ensure a unified approach towards supporting the country's political and security processes and resolving the Libyan crisis. Furthermore, the work of the United Nations-African Union-European Union tripartite task force will continue, in particular on stranded migrants and refugees in Libya.
192. With regard to inter-agency coordination and liaison, the Mission and the United Nations country team have taken steps towards enhancing integration and will continue to operationalize the Secretary-General's focus on the humanitarian-development-peace nexus to facilitate long-term peace, security and sustainable development, in order to enhance the impact of United Nations interventions in support of all people in Libya.
193. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
 - (a) The Libyan Political Agreement of December 2015, Security Council resolution [2510 \(2020\)](#), endorsing the conclusions of the Berlin Conference on Libya, the Libyan Political Dialogue Forum Tunis road map and accompanying outputs and resolutions [2542 \(2020\)](#), [2570 \(2021\)](#), [2629 \(2022\)](#) and [2656 \(2022\)](#), as well as the comprehensive approach to enabling elections, will remain the guiding framework for United Nations support in Libya;
 - (b) Libyan political actors and institutions are able to reach consensus on a way out of the political stalemate, leading to the holding of an inclusive and transparent electoral process whose results are accepted, thus establishing new executive and legislative authorities;
 - (c) The Libyan ceasefire agreement of October 2020, including the withdrawal of foreign forces, foreign fighters and mercenaries, will be implemented, and consensus will be reached among relevant security and political actors in Libya to reform and unify security institutions, including the establishment of conditions conducive to the launch of a disarmament, demobilization and reintegration process;
 - (d) The human rights situation in Libya is expected to remain of great concern, especially with respect to enhancing the rule of law and protecting and promoting civic space for all people in Libya to exercise their fundamental rights, in particular civil and political rights. Intentional marginalization and poor representation of women in political and reconciliation processes pose a challenge to peacebuilding;
 - (e) Elements of instability, including proponents of the status quo and other spoilers, will continue attempting to disrupt progress in the political, security and economic processes, requiring continued good offices efforts in parallel with sustained support for reconciliation and support for transitional justice mechanisms;
 - (f) The humanitarian situation will continue to improve, proportional to the stabilization of the security situation, with a steady decrease in the number of people in need of humanitarian assistance and the number of internally displaced persons;
 - (g) The economic sector of Libya will continue to suffer from a lack of oversight and transparent management over the use of public funds, while efforts towards the reunification of the Central Bank will continue as part of the implementation of the road map and independent audit recommendations for reunification;
 - (h) Strategic partnerships will continue between the members of the international community, including regional organizations and the United Nations, in support of a Libyan-led and Libyan-owned political process adhering to the United Nations sanctions regime.

194. The Mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Mission continues to promote women's participation in the political and reconciliation processes and representation in government institutions, including to ensure effective gender mainstreaming into the constitution-making and electoral processes. In order to safeguard equal rights and opportunities for women, the Mission and the country team will jointly promote equal rights and opportunities for women's equal enjoyment of their political, civil, economic and social rights. Such efforts would include the provision of technical assistance to national institutions and civil society members; support for government efforts on legislation and policies that protect women from all forms of violence; efforts to address gaps in service provision, in line with national legislation and in line with applicable international law and relevant Security Council resolutions, while taking the national context into consideration; and efforts to address and prevent violence against women and girls, in particular those in vulnerable situations, including displaced, migrant and refugee women and girls, and to identify the impact of extremism conducive to terrorism on women in Libya. The Mission and the country team will continue to improve prevention and protection efforts to support relevant institutions to deliver their mandate in promoting and protecting women and girls.

Evaluation activities

195. An independent strategic review was carried out in 2021, which provided an assessment and recommendations for improving the efficiency of the overall structure, the prioritization of tasks and the capacity and effectiveness of staffing of UNSMIL, including as it related to mediation and peace process management. The Security Council endorsed the review's recommendations in its resolution [2629 \(2022\)](#) and requested the Mission to explore all avenues to increase efficiency and redeploy existing resources, including through the prioritization and reconfiguration of tasks and resources.
196. In January 2023, a joint assessment mission was conducted by the Department of Political and Peacebuilding Affairs, the Department of Operational Support and the Department of Safety and Security to provide strategic advice and support to the UNSMIL leadership to operationalize the recommendations of the independent strategic review focusing on: (a) the structure of UNSMIL; (b) priorities and capacities of the Mission, including re-evaluating the necessary resources, capacities and support to the Mission's ceasefire monitoring component; and (c) the footprint of the United Nations in Libya. The Mission took the preliminary recommendations into consideration in preparing the proposed programme plan for 2024.
197. Further to this, in 2024, the Mission will continue its efforts to enhance programme planning, monitoring and reporting on programme performance, as an element of self-assessment. As part of these efforts, the implementation of the United Nations Sustainable Development Cooperation Framework for the period 2023–2025 includes a monitoring, evaluation and learning plan and the UN-Info tool, which will be used by UNSMIL to monitor progress in the implementation of its peacebuilding objectives.

Impact of the pandemic and lessons learned

198. Although the continuation of the COVID-19 pandemic into 2022 did not result in the cancellation of Mission activities, it had an impact on the modalities by which UNSMIL delivered its mandate. The Mission was able to continue to deliver by means of face-to-face meetings and virtual means. Face-to-face working sessions were held to continue the delivery of good offices in support of all tracks, such as the plenary of the security working group in Tunis. In-person international visits were key to making progress on the 5+5 Joint Military Commission's action plan for the withdrawal of foreign forces, foreign fighters and mercenaries from Libya.
199. The Mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including innovative digital dialogue and the online delivery of technical assistance and advisory services key to supporting an inclusive political process, such as the 2022 digital dialogue on human rights.

Programme performance in 2022

Effective and inclusive mechanisms established and efforts enhanced for the disarmament, demobilization and reintegration of armed groups

200. The Security Council, in its resolution [2656 \(2022\)](#), underlined the need to plan for the disarmament, demobilization and reintegration of armed groups and all relevant non-State armed actors as part of an approach to improving security and establishing a security architecture for Libya as a whole, including for arms and ammunition management and mine action.
201. In 2022, UNSMIL continued its advocacy for the full implementation of the ceasefire agreement, which included the identification and categorization of armed groups. In 2022, UNSMIL provided technical support to the 5+5 Joint Military Commission for establishing a technical disarmament, demobilization and reintegration committee to undertake a classification of armed groups.
202. In 2022, the Mission's ceasefire monitoring component continued to support efforts to maintain the ceasefire agreement through meetings with the Libyan monitors and the 5+5 Joint Military Commission focal points, advice and technical assistance on the planned withdrawal of mercenaries, foreign fighters and foreign forces, and capacity-building for Libyan and international monitors. Throughout 2022, the component also carried out efforts to build trust between the Libyan monitors and 5+5 Joint Military Commission focal points and monitored triggers for potential violations of the ceasefire agreement.
203. Progress towards the objective is presented in the performance measure below (see table 33).

Table 33

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Ceasefire arrangements agreed and road map adopted for the transitional period until elections are held	An inclusive disarmament, demobilization and reintegration committee was activated with UNSMIL support	Endorsement of the terms of reference for the establishment of a disarmament, demobilization and reintegration committee by the 5+5 Joint Military Commission to categorize armed groups

Planned results for 2024

Result 1: fostering reconciliation and an inclusive democratic process

Programme performance in 2022 and target for 2024

204. In 2022, the Mission contributed to the resumption of the talks between the House of Representatives and the High State Council to reach consensus on a constitutional framework for national elections. The Mission facilitated four rounds of constitutional talks between the two chambers, including a meeting between the heads of the two chambers in June. Through UNSMIL mediation, the two chambers made significant progress, but failed to agree on one contentious issue regarding the eligibility criteria for presidential candidates. These efforts are being carried forward through the good offices of the Special Representative of the Secretary-General in 2023. The Mission, in cooperation with UNDP, continued to provide technical assistance to the High National Elections Commission to prepare for the implementation of the electoral process once the legal framework is finalized. Meanwhile, the two branches of the Central Bank of Libya began to implement the recommendations of the United Nations-sponsored financial audit review aimed at integrating the divided financial sector. The economic working group, co-chaired by UNSMIL, convened five times to discuss the establishment of a Libyan-owned revenue management and oversight mechanism.

205. In 2024, UNSMIL will continue to provide support to national efforts for a peaceful political transition, national reconciliation and, after the holding of elections, the consolidation of democratically elected institutions. Specifically, UNSMIL will support efforts led by the Presidential Council, with support from the African Union, to consolidate and implement a national reconciliation strategy, as well as the adoption and operationalization of a comprehensive law on transitional justice. Capacity-building of the electoral management bodies will continue in 2024 to prepare for future electoral cycles and referendums. The Mission will continue to implement its communication strategy to support the political process and to build capability around preventing hate speech, incitement and disinformation.
206. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 34).

Table 34
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Intra-Libyan economic-financial, military-security and political dialogue tracks launched and supported by respective working groups under the framework of the International Follow-up Committee on the Libya Berlin process	A new temporary executive authority selected by the UNSMIL-facilitated Libyan Political Dialogue Forum and endorsed by the House of Representatives to govern Libya for the period leading up to national elections, and no longer than a total of 18 months	A multifaceted national approach to reconciliation continued with the launch of the Presidential Council's project on a strategic vision for national reconciliation in June 2022	Unified elected parliament and functional Government and its institutions contribute to political stability and reconciliation	Functional parliament, Government and its institutions are in place and contribute to political stability and reconciliation
Ceasefire agreement signed in October 2020 and political road map adopted in November for the transitional period through national elections	Agreement on a constitutional basis for the elections was not reached	Continuation of dialogue process to adopt a constitution that is in line with minimum internationally recognized standards	Constitutional framework is agreed and developed in line with international norms and standards	Upon agreement on a national constitutional framework in line with international norms and standards, and following elections in 2023, a national constitutional referendum to take place in 2024
Board of directors of the Central Bank of Libya reactivated, enabling harmonization of monetary policies	Central Bank of Libya board of directors unified exchange rates, thereby strengthening real currency value and expunging market distortions	Support continued for unification of the Central Bank of Libya, management of national deficits and access to foreign exchange in a manner that maintains currency value and steadies the price of vital commodities	Equitable access to political and democratic processes, including access by women and young people, guaranteed and protected under the Constitution	Equitable access to political and democratic processes, including access by women and young people, guaranteed and protected under the Constitution
Contract with auditing company concluded and parallel audits of both Central Bank of Libya branches launched	Audit report on the Central Bank of Libya published on the basis of the audit initiated to restore national accountability process and move		Economic and financial institutions have increased capacity to provide macroeconomic stability and enact economic reforms, towards a more productive, efficient and	Economic and financial institutions have increased capacity to provide macroeconomic stability and enact economic reforms,
Establishment of the Libyan Expert				

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Economic Commission formalized as an interim consultative body to harmonize economic policy and create the conditions for institutional unification	towards unification of the two branches Economic experts supported the transition process to a new unified national Government by taking continuous steps towards supporting the unification of the national budget and other economic processes	Economic reform efforts in order to make the Libyan economy more productive, efficient and transparent continued	transparent Libyan economy	towards a more productive, efficient and transparent Libyan economy

Result 2: strengthened rule of law institutions and transitional justice process protecting the rights of all people in Libya

Programme performance in 2022 and target for 2024

207. In 2022, UNSMIL, in cooperation with other stakeholders, facilitated the development by Libyan experts of a draft law on combating violence against women. UNSMIL continued to advocate against arbitrary detention and supported a high-level committee representing the public prosecution, the military prosecution, the police, and intelligence and judicial institutions. In 2022, the working group on arbitrary detention was re-established following a hunger strike in Mitiga prison. UNSMIL organized a digital dialogue on human rights reaching 330 people across Libya who expressed their concerns on human rights, which fed into a discussion with over 500 people across Libya, and collected perspectives to inform the good offices of the Special Representative of the Secretary-General on the political process. UNSMIL further increased the capacity of prosecutors and lawyers on international standards on human rights and criminal justice and on migrants' rights through training.
208. In 2024, UNSMIL, together with the country team, will support government institutions in respect of their obligations to protect and promote human rights, transitional justice and the rule of law, with an emphasis on opening civic space, eliminating arbitrary detention, enforced disappearances and torture, addressing the situation of migrants, advancing transitional justice and national reconciliation, guaranteeing women's rights and eliminating sexual- and gender-based violence. The Mission will support African Union efforts aimed at supporting Libyan institutions in implementing an inclusive reconciliation process, based on transitional justice principles and with the rights of victims at the centre of the process. UNSMIL will continue strengthening civil society networks and human rights mechanisms and protecting human rights defenders. The Mission will further deepen its engagement with State entities and armed groups involved in the detention of civilians to address human rights violations and abuses. UNSMIL will further increase its efforts to advocate for the rights and protection of migrants and asylum-seekers and their access to justice, accountability and redress mechanisms, regardless of status. The Mission will use its good offices to advance the recognition and enjoyment of women's rights and the institutionalization of policies and procedures related to the empowerment of women, and protection of women's and children's rights and victims of violence.
209. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 35).

Table 35
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Enhanced capacities of Libyan women municipal councillors on the inclusion of Libyan women in the peace and electoral process, on international human rights, national legislation and recommendations on eliminating violence against women	Strengthened judicial leadership, including of the Supreme Judicial Council, on respect, protection and promotion of human rights, with an emphasis on fact-finding and enhancing the judiciary and prosecutorial systems	UNSMIL and partners supported a group of national experts to draft and submit a draft law on combating violence against women to the legislative bodies Establishment of a joint consultation forum, strengthening civil society monitoring, analysis and reporting of human rights abuses and violations Continuation of a high-level committee on arbitrary detention, representing the Attorney General, the military prosecution, the police, and intelligence and judicial institutions	Legal and policy frameworks enacted and implemented by legitimate authorities to promote the rule of law, including the endorsement of a law on violence against women, the amendment of Transitional Justice Law 29 of 2013 and the drafting of a new national reconciliation law Rule of law institutions strengthened to investigate, prosecute, adjudicate and prevent abuses and violations of human rights, while monitoring and reporting capacities of civil society organizations are enhanced	Authorities implement legal and policy frameworks to promote the rule of law, including the law on violence against women and the amendment of Transitional Justice Law 29 of 2013, and finalize the drafting of a new national reconciliation law Rule of law institutions strengthened to investigate, prosecute, adjudicate and prevent abuses against and violations of human rights of Libyans, migrants and asylum-seekers Civil society networks are facilitated, strengthened and developed, while monitoring and reporting capacities of civil society organizations are enhanced and protection mechanisms for victims of sexual and gender-based violence are established

Result 3: unified security institutions promoting progress on security sector reform and the implementation of the ceasefire agreement, including an effective Libyan ceasefire monitoring mechanism

Programme performance in 2022 and target for 2024

210. In 2022, the Mission facilitated the negotiations with Libyan and regional partners to support the 5+5 Joint Military Commission action plan for the withdrawal of foreign fighters, foreign forces and mercenaries from Libya. This resulted in the activation of liaison and communication committees between Libya, Chad, the Niger and the Sudan in Cairo in November 2022. UNSMIL efforts also contributed to further work towards the unification of security institutions and reform of the security sector, including by supporting negotiations between the two Chiefs of Staff from the east and the west. In 2022, UNSMIL efforts focused on supporting the 5+5 Joint Military Commission to reach an agreement and endorse the terms of reference of the joint military force, as stipulated in the 2020 ceasefire agreement.

Lessons learned and planned change

211. The lesson learned was that despite the protracted political stalemate and lack of trust among Libyan actors, the 5+5 Joint Military Commission can continue to make progress on the security track. In applying the lesson, the Mission will identify areas of agreement and determine activities to be undertaken to lay the foundation for effective security sector reform and disarmament, demobilization and reintegration, including the unification of the security institutions. It will continue to strengthen its support to the Libyan ceasefire monitoring mechanism, build mutual trust between all stakeholders and provide capacity-building on operational planning, monitoring, validation and reporting on ceasefire provisions. To control and/or minimize ceasefire violations, the Mission will continue to monitor the situation, reporting on potential threats, hate speech, major military movement or exercises, and other triggers that could lead to a violation of the ceasefire.
212. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 36).

Table 36
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Ceasefire agreement signed in October 2020	Trust built between the parties to the ceasefire agreement led to the signing by the 5+5 Joint Military Commission on 8 October of an action plan for the withdrawal of mercenaries, foreign fighters and foreign forces from Libya	Maintenance of the ceasefire agreement	Unified security sector institutions, under civilian oversight including functional, professional and accountable military and police forces	Unified security sector institutions, under civilian oversight including functional, professional and accountable military and police forces
Libyan Political Dialogue Forum political road map adopted in November 2020 for the transitional period until national elections are held	5+5 Joint Military Commission signed action plan for the implementation of	Consensus built among stakeholders for the implementation of the action plan for the withdrawal of foreign forces, foreign fighters and mercenaries, including the establishment of a joint operations room and capacity-building programme for the local monitors	Libyan ceasefire monitoring mechanism fully operational and monitors and reports on breaches in the implementation of the ceasefire agreement	Continued implementation of the capacity-building programme for the Libyan monitors
Libyan-owned ceasefire monitoring mechanism signed on 3 November 2020 by the 5+5 Joint Military Commission and UNSMIL				Comprehensive security sector reform initiatives, including disarmament, demobilization and

4. Projects related to arms, ammunition management, counter-proliferation and humanitarian mine action	1	2	1	2
Seminars, workshops and training events (number of days)	138	130	138	130
5. Seminars and workshops on the political process, confidence-building, constitution-making, legislative and economic reform, electoral management and campaigning, mediation and conflict resolution, prevention of and response to incitement to violence and hatred, media, young female social media activists, digital Libyan dialogue, unification of the army, and demobilization of armed groups; technical advice, coordination support and advocacy on unexploded ordnance and ammunition management; 4 mine action-related workshops/training events to build national capacities on weapons and ammunition management and explosive ordnance response management	138	130	138	130
Fact-finding, monitoring and investigation missions (number of missions)	35	35	35	40
6. Monitoring missions of the UNSMIL ceasefire monitoring component in support of the efforts of the Libyan ceasefire monitoring mechanism, to record and report on any alleged violation of the ceasefire, as well as analysis and reporting on the most recent developments in Libya, including periodic threat assessments of the overall situation that could risk and have an impact on the ceasefire monitoring capacity-building programme established for the international monitors, Libyan monitors and the 5+5 Joint Military Commission (3 workshops); missions to support mine action efforts with regard to ammunition management; monitoring missions on the human rights situation, with visits to 6 prisons and detention centres, subject to access guarantees by official counterparts, including makeshift and secret detentions and other types of places where there are deprivations of liberty, such as women's shelters and reformatories; monitoring of and reporting on some 60 cases of abuse and violations of human rights and violations of international humanitarian law, including sexual violence in conflict, and monitoring protection issues, with a focus on women and children; and monitoring of protection issues with a victim-centred approach and focus on women, children and migrants, reaching up to 30 beneficiaries who are referred to embassies concerned and/or legal and psychological aid for smooth integration into society	35	35	35	40
Electoral missions (number of missions)	224	224	224	224
7. Electoral assistance missions to the High National Elections Commission headquarters in Tripoli or its field offices, providing technical advice and capacity-building to the electoral management body and to electoral counterparts	224	224	224	224

C. Substantive deliverables

Good offices: provision of good offices to further an inclusive political, security and economic dialogue through engagement with Libyan institutions and political parties and activities with civil society, women and youth. To ensure a wide participation and buy-in of Libyans, the Mission will simultaneously organize a series of meetings with community leaders, women, youth, security actors and political activists; 1 political, 1 economic and 1 human rights working group meeting per month; good offices on the implementation of the ceasefire agreement, including 1 meeting of the 5+5 Joint Military Commission per month (reaching 12 to 15 key Libyan actors); 1 Co-Chair security working group meeting (reaching 10 to 15 key ambassadorial-level actors) and 1 plenary security working group meeting (reaching 20 to 25 ambassadorial-level actors); 1 security sector working group meeting (reaching 20 beneficiaries, including key defence attachés and police advisers) per month, as well as various subcommittees and liaison committees both inside and outside Libya at least once per month (reaching, on average, 12 beneficiaries), including meetings of the various subcommittees aimed at the unification of the military to address, among other things, disarmament, demobilization and reintegration and strategic security policy and frameworks (reaching some 20 beneficiaries); meetings between the UNSMIL ceasefire monitoring component, Libyan monitors and 5+5 Joint Military Commission focal points (once per month) and implementation of the capacity-building programme for international monitors, Libyan monitors and the 5+5 Joint Military Commission (3 workshops in 2023); monthly coordination meeting co-chaired with the Libyan Mine Action Centre and mine action stakeholders (reaching some 20 people); 1 conference to mark the International Day for Mine Awareness and Assistance in Mine Action organized in collaboration with the Libyan Mine Action Centre (reaching 50 people, including mine action partners, the diplomatic community and Libyan authorities); provision of good offices to support accountability and transitional justice and strengthen national capacities through the provision of direct technical advice and capacity-building programmes to 15 lawyers and 15 prosecutors/judges, and provision of good offices to support the judiciary and prosecutorial system on sustainable rule of law and access to justice and fair trials; provision of good offices to support the judiciary and prosecutorial system; and provision of good offices to advance the recognition and enjoyment of women's rights, in line with the Convention on the Elimination of All Forms of Discrimination against Women, and advocacy on the institutionalization of systems, policies, procedures and mechanisms related to the protection and empowerment of women victims of violence, as well as women's access to equitable justice and the prioritization of the

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

protection of women's and children's rights, including through meetings with women empowerment units at the police force, the High National Elections Commission and the women's unit at the Presidential Council.

Consultation, advice and advocacy: support for subsequent phases of the Libyan political process, electoral assistance, information-sharing and coordination meetings with international electoral assistance partners and embassies, reaching 100 beneficiaries, as well as advice to advance the constitution-making process and referendum; provision of daily advice to the High National Elections Commission and the Central Committee for Municipal Council Elections on electoral matters; assistance in strengthening the electoral management bodies' technical capacities; coordination of international electoral assistance; support for electoral security planning and for the Central Committee for Municipal Council Elections in municipal elections through work with local electoral stakeholders; support to rebuild Libya's national polity by addressing roots of grievances through an inclusive, victim-centred and rights-based national reconciliation process and transitional justice mechanisms, with workshops and seminars reaching 50 beneficiaries; planning and implementation of ceasefire monitoring activities; provision of advice to the 5+5 Joint Military Commission and the Libyan-led and Libyan-owned ceasefire monitoring mechanism, including legal advice, where required, to establish an effective monitoring mechanism that coordinates and assesses progress on the withdrawal of foreign forces and mercenaries; provision of advice on security policy and frameworks, including a capacity-building programme for the international and Libyan monitors and the 5+5 Joint Military Commission implemented by the ceasefire monitoring mechanism; provision of advice and consultations with the Libyan Political Dialogue Forum and House of Representatives women's caucus and civil society and women's groups, reaching approximately 500 women; setting up of advocacy plan for the law on violence against women; support for security sector governance, reform and development, including reintegration of non-State armed groups and supporting the increased presence of women in the police force; provision of advice to the 5+5 Joint Military Commission, the Libyan-led and Libyan-owned ceasefire monitoring mechanism, the Libyan Mine Action Centre, and national and international mine action organizations, entities and stakeholders on the control of heavy weapons, arms and ammunition management, including advice on the survey and clearance of explosive remnants of war, booby traps, improvised explosive devices and mines; conduct of advocacy and provision of advice on international arms control and disarmament instruments; support for mine action coordination and facilitation of capacity-building within available resources; confidence-building sessions with 50 participants from national and local authorities, and civil society organizations in support of reconciliation dialogue initiatives; advocacy on and implementation of the human rights due diligence policy framework, including the monitoring, reporting and communication strategy; advocacy on respect for civic space/freedom of assembly and freedom of expression, involving 30 participants and 4 local institutions, including the Ministry of Justice, the Ministry of Interior, the prosecutor's office and the High Judicial Council, for the release of individuals detained without a legal basis; advocacy on women's rights by facilitating discussions among institutions and actors working on women's rights and advising on laws and policies that promote gender equality; advice on violence against women and gender-based violence linked to the electoral process; and advice and support to reinforce the capacity of 30 human rights defenders and women human rights defenders on the Monitoring, Analysis and Reporting Arrangements Technical Working Group; advocacy for the rights and protection of migrants and asylum-seekers and their access to justice, accountability and redress mechanisms, regardless of status.

D. Communication deliverables

Outreach programmes, special events and information materials: media and communications campaigns and messaging through traditional and social media outlets promoting the peace process, as well as developing content promoting reconciliation, social cohesion and the respect for humanitarian and human rights law, to a range of Libyan audiences (including young people, women, cultural components, social media influencers and the general public) and 20 official media entities and counterparts, including civil society organizations and non-governmental organizations; targeted meetings, events and leadership field visits in the east, south and west, engaging with young people and women activists from all parts of Libya to promote their key role in peacebuilding and the peace process in Libya; development and delivery of the Raydat training programme for 30 young women from across Libya to increase advocacy and communication skills; development of misinformation and disinformation awareness training programme with Libyan universities; promotion of the Mission's outreach activities and engagement with local communities, building trust and support for UNSMIL leadership and high-level officials in their international tours and meetings with Member States and diplomatic corps.

External and media relations: development and delivery of the UNSMIL strategic communication strategy, and advice on and pitching of strategic media interviews, statements and interactions with top-tier international and regional media outlets in Arabic, English and French, as well as select national media; frequent engagement with local media from all parts of Libya, promoting conflict-sensitive reporting; troubleshooting and crisis management pertaining to polarized media campaigns aimed at undermining the implementation of the Mission's mandate; establishment of partnerships with social media platforms to strengthen efforts in countering hate speech, fake news and misinformation; production of daily traditional monitoring reports and quarterly social media monitoring; fostering of professional ties with local, regional and international media outlets; reporting on the human rights situation and acting as a public resource; production of press releases and statements relating to progress in the good offices process; in-house production of multimedia products; holding of a large-scale public perception survey across Libya.

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
--------------------------	-----------------	----------------	-----------------	-----------------

Digital platforms and multimedia content: update of the Mission's website and feed on the Mission's official social media platforms in Arabic and English, highlighting activities, meetings, events, public messaging and the implementation of projects and programmes of UNSMIL and the United Nations country team; development, with the help of the Department of Political and Peacebuilding Affairs Innovation Cell, of a digital public perception survey and holding of digital dialogues, engaging hundreds of Libyans in thematic dialogues, including social groups (youth and women), to seek their views and their recommendations and involve them in the political dialogue.

B. Proposed post and non-post resource requirements for 2024

Resource requirements (regular budget)

Table 38

Financial resources

Proposed 2024	1	2 ^a	–	7	19 ^b	42	46	2	154	1 ^c	274	17	120	137	6	–	6	417
Change	–	–	–	–	1	(1)	–	–	–	–	–	–	2	2	–	–	–	2

^a One position is funded at 50 per cent and cost-shared with the Development Coordination Office.

^b Includes one general temporary assistance position.

^c Other level, unless otherwise stated.

214. The proposed resource requirements for 2024 for UNSMIL amount to \$87,903,700 (net of staff assessment) and would provide for the deployment of 234 United Nations Guard Unit personnel (\$6,673,200), salaries and related costs (\$42,725,800) for the deployment of 274 international positions (1 Under-Secretary-General, 2 Assistant Secretary-General, 7 D-1, 19 P-5, 42 P-4, 46 P-3, 2 P-2, 154 Field Service and 1 General Service) and 137 national positions (17 National Professional Officer and 120 Local level), 6 international United Nations Volunteers and 7 government-provided personnel, and operational costs (\$38,504,700) comprising the costs for consultants and consulting services (\$175,100), official travel (\$1,029,600), facilities and infrastructure (\$22,953,700), ground transportation (\$379,900), air operations (\$6,804,900), communications and information technology (\$3,092,500), medical (\$746,100) and other supplies, services and equipment (\$3,322,900).

215. A vacancy rate of 29.6 per cent has been applied to the estimates for international staff based on the actual vacancy rate in March 2023. The vacancy rates of 52.9 per cent and 35.6 per cent have been applied for National Professional Officers and Local level staff positions, respectively, based on the actual vacancy rates in March 2023. A vacancy rate of 50.0 per cent has been applied for the two positions proposed for establishment. A vacancy rate of 50.0 per cent has been applied to the estimates for United Nations Volunteers and a vacancy rate of 57.1 per cent has been applied to the estimates for government-provided personnel based on the actual vacancy rate as at 31 March 2023. The estimates for United Nations Guard Unit personnel are based on the assumption of full deployment, based on the actual incumbency in March 2023.
216. In 2024, the following changes to the number and levels of positions for a net increase of two positions are proposed, reflecting the establishment of two positions, the reclassification of one position and the redeployment of one position, as detailed below:

Office of the Chief of Staff

- (a) Reclassification of one position of Coordination Officer, Political Affairs (P-4) in Tripoli to Senior Coordination Officer, Political Affairs (P-5) in Tripoli in the Office of the Chief of Staff, to strengthen strategic planning and operational coordination for the expansion of the Mission's footprint in Libya, including closer coordination with field offices;

Mission Support Service

- (b) Establishment of one position of Finance and Budget Assistant (Local level) in the Budget Unit to assist in the review, analysis and preparation of cost estimates and budget proposals;
- (c) Establishment of one position of Human Resources Assistant (Local level) in the Human Resources Unit to support and assist hiring managers in expediting the recruitment of staff;
- (d) Redeployment one position of Contracts Management Assistant (Local level) from the Procurement Unit to the Centralized Warehouse and Acquisition Requisition Unit to support the requisitioning processes for the acquisition of various projects related to the procurement of diverse services and commodities to support the implementation of the Mission's acquisition plan.
217. The Mission's approved 2023 staffing table includes one general temporary assistance position. It is proposed that this position, Chief of Mine Action Section (P-5), be continued in 2024 to lead the UNSMIL mine action component, advise the UNSMIL leadership on mine action issues, supervise the implementation of the workplan and lead engagement with the national authorities, the United Nations country team and other stakeholders involved in mine action activities.
218. The net decrease in requirements for 2024 compared with the approved resources for 2023 is attributable mainly to decreased requirements under operational costs, comprising: (a) decreased requirements under facilities and infrastructure owing to a reduction in the provision for major construction projects, which are expected to be completed in 2023; (b) decreased requirements under air operations owing to lower fleet costs for the fixed-wing aircraft, based on the actual contractual agreement; and (c) reduced requirements for communications and information technology equipment following the acquisitions in previous periods. The decrease is partially offset by increased requirements for civilian staff costs owing to the updated salary scales and the application of a lower budgeted vacancy rate of 29.6 per cent for international staff compared to 32.9 per cent applied in the 2023 budget.

8. United Nations Verification Mission in Colombia

(*\$66,971,700*)

Foreword

The Final Agreement for Ending the Conflict and Building a Stable and Lasting Peace, adopted in 2016, remains the essential road map for Colombia to uphold victims' rights, bring about development opportunities and address the root causes of the armed conflict. It is heartening that its signatories – the Government of Colombia and the former Revolutionary Armed Forces of Colombia – People's Army (FARC-EP) – are fully committed to its implementation.

The Government has pledged to implement the Final Agreement in a comprehensive manner, making it the cornerstone of its peace-related efforts and placing a particular focus on those areas where implementation is lagging. This commitment represents a renewed opportunity to consolidate peace in Colombia.

The United Nations Verification Mission in Colombia is resolved to continue to work alongside Colombians to strengthen peace dividends. Its verification helps support the reintegration of thousands of former combatants and the implementation of much-needed security guarantees across conflict-affected regions. Similarly, as the country's Special Jurisdiction for Peace is making progress to deliver restorative sentences for crimes committed during the conflict and relevant State entities prepare to support their implementation, the Mission stands prepared to verify this crucial stage. In addition, the Security Council, in its resolution [2673 \(2023\)](#), tasked the Mission to monitor the implementation of the comprehensive rural reform and ethnic chapters of the Final Agreement. Those provisions are critical to address deep-rooted patterns of inequality and exclusion of rural regions and ethnic peoples that have perpetuated, and have been exacerbated by, the armed conflict. Across all those mandated tasks, the Mission's verification role remains vital.

(Signed) Carlos **Ruiz Massieu**
Special Representative of the Secretary-General for Colombia
Head of the United Nations Verification Mission in Colombia

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

219. The United Nations Verification Mission in Colombia is mandated by the Security Council, at the request of the Colombian Government and the former Revolutionary Armed Forces of Colombia – People’s Army (FARC-EP), to verify three key aspects of the Final Agreement for Ending the Conflict and Building a Stable and Lasting Peace, adopted in 2016 by the two parties: (a) the reintegration of FARC-EP members into political, economic and social life (section 3.2 of the Agreement); (b) the implementation of personal and collective security and protection measures for ex-combatants, and comprehensive security and protection programmes for the communities and organizations in the territories (section 3.4 of the Agreement); and (c) compliance and implementation of the sentences issued by the Special Jurisdiction for Peace (section 5.1.2 of the Agreement). The mandate is defined in Security Council resolution [2366 \(2017\)](#), was subsequently renewed by the Council in its resolutions [2435 \(2018\)](#), [2487 \(2019\)](#), [2545 \(2020\)](#), [2574 \(2021\)](#), [2603 \(2021\)](#) and [2655 \(2022\)](#) and was expanded by the Council in its resolution [2673 \(2023\)](#) to verify the implementation of section 1 and section 6.2 of the Final Agreement with respect to the implementation of rural reform and the ethnic chapter.
220. The Verification Mission works closely with the two parties, including in the framework of the relevant verification bodies established by the Final Agreement, in particular the Commission for the Follow-up, Promotion and Verification of the Implementation of the Final Agreement, the National Reintegration Council and the National Commission on Security Guarantees, as well as with members of the United Nations country team, local and departmental authorities and civil society. The work of the Verification Mission will remain of vital significance in 2024 with regard to supporting the parties in the implementation of the reintegration process and the extension of security and protection to vulnerable communities, social leaders, human rights defenders and former combatants, and providing support to the transitional justice process through the Mission’s verification of restorative sentences issued by the Special Jurisdiction for Peace. In addition, the Mission will play a significant role through its verification of the comprehensive rural reform and ethnic chapters of the Final Agreement, two components of particular importance to address structural causes of the conflict, integrate rural areas into national development dynamics and tackle poverty and inequality, and whose implementation is lagging. These additional tasks were mandated by the Security Council in its resolution [2673 \(2023\)](#), in response to a request from the parties.

Programme of work

Objective

221. The objective, to which the Mission contributes, is to advance the effective implementation of the provisions of the Final Agreement for Ending the Conflict and Building a Stable and Lasting Peace concerning reintegration, security guarantees, restorative sentences, comprehensive rural reform and the ethnic chapter.

Strategy and external factors for 2024

222. To contribute to the objective, the Mission will:
- (a) Apply a proactive and inclusive approach to verification, which includes advocacy, good offices and close engagement with the parties to the Final Agreement, relevant institutions and authorities at the national, regional and local levels;
 - (b) Conduct independent verification and participate, jointly with the parties, in key forums and institutions created for the implementation of the Final Agreement;
 - (c) Promote constructive dialogue and trust-building between the Government and the Comunes party to address pending issues related to peace implementation, and maintain constant coordination and dialogue with key interlocutors, including actors across the political spectrum, civil society, the private sector and the international community, to foster support for the implementation of the Final Agreement.
223. The above-mentioned work is expected to result in:
- (a) Increased trust between the parties to the Final Agreement; intensified efforts to ensure the sustainability of the reintegration process; sustained progress on tangible issues that impede successful reintegration, including access to land for the consolidation of former territorial areas for training and reintegration for former combatants' productive projects and housing solutions; the promotion of gender-sensitive reintegration and the active participation of women former combatants; the provision by the Government of more sustainable solutions for former combatants residing inside and outside of former territorial areas for training and reintegration; progress in the implementation of key components of the comprehensive rural reform in prioritized areas; increased capacity to prevent and address land-related conflict; progress in the reduction of inequalities in access to land; and progress in the implementation of development plans with a territorial focus in prioritized areas, with the active participation of local communities;
 - (b) Enhanced State capacity and responsiveness to better prevent and investigate attacks against former combatants, social leaders and human rights defenders, as well as increased trust and understanding between the parties regarding security and protection mechanisms, taking into consideration the particular needs of women, children and former combatants of ethnic origin, as well as those of Indigenous Peoples and other communities at risk;
 - (c) Enhanced trust in the transitional justice system; the reinforced ability of the Special Jurisdiction for Peace to ensure compliance with and implementation of its restorative sentences; and contributions to the realization of victims' rights to truth, justice, reparation and non-repetition, and their full inclusion in the reparative system;
 - (d) Strengthened implementation of the ethnic provisions of the Final Agreement; enhanced capacity of the High-level Forum of Ethnic Peoples as a consultative body on ethnic matters to the Commission for the Follow-up, Promotion and Verification of the Implementation of the Final Agreement; and improved functioning of dialogue mechanisms pertaining to ethnic matters.
224. With regard to cooperation with other entities, the Mission will continue to engage extensively with international, national and local actors supporting the implementation of the Final Agreement. At the international level, the Mission's close engagement with the diplomatic community and regional organizations will help identify synergies and areas of mutual interest and support for peace implementation. At the national and local levels, the Mission will continue to strengthen ties with a broad range of political, civil society and private sector actors, including community; religious; youth; women; ethnic; and lesbian, gay, bisexual, transgender and intersex organizations; and the transitional justice institutions. In Colombia, where civil society is vibrant and highly engaged in the peace process, such cooperation remains an essential aspect of the Mission's work. The Mission will also continue to bolster its relationships with departmental and local authorities, particularly as they gain more responsibilities with regard to the reintegration process and ensuring security guarantees for communities.

225. With regard to inter-agency coordination and liaison, the Mission will continue to work closely with the United Nations country team and the Resident Coordinator Office. The work of the country team is guided by the United Nations Sustainable Development Cooperation Framework, which is scheduled to be reviewed in 2023. Through coordination in joint mechanisms at different levels, the Mission is able to share conflict analyses and encourage coherent action and engagement across the peace and security and the development pillars. This close working relationship is not only undertaken at the national level, where the Mission participates in the regular meetings of the United Nations country team, but also at the local level, where Mission staff work closely with the teams deployed by different agencies, funds and programmes. Moreover, in the spirit of sustaining peace and contributing to long-term stability, the Mission and the country team have enhanced synergies in the implementation of productive projects for former FARC-EP members and have worked together on efforts related to security guarantees, as well as on the implementation of projects supported by the Peacebuilding Fund.
226. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Continued international support for the close engagement of the United Nations and the Mission in the peace process;
 - (b) The national Government and legislature will remain focused on the implementation of the Final Agreement;
 - (c) National and local authorities, State entities and mechanisms tasked with preventing, addressing and investigating security incidents in conflict-affected areas, including the Office of the Attorney General, will remain committed to strengthened collaboration with the Verification Mission;
 - (d) Continued progress in the transitional justice system resulting in the issuance of restorative sentences.
227. The Mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Mission will work to ensure the adequate implementation of its gender directive and gender parity strategy and that the specific needs of female former FARC-EP members are fully incorporated into programme design, implementation and monitoring, and give priority to the security guarantees of female leaders, human rights defenders and former combatants. The Mission will also ensure the adequate inclusion of a gender perspective in the verification of restorative sentences, rural reform and ethnic aspects.
228. In line with the United Nations Disability Inclusion Strategy, the Mission will continue to promote inclusion internally by opening employment opportunities for qualified candidates. At the political level, the Mission will continue to advocate for inclusion of the views of people with disabilities in all decision-making platforms, including the National Reintegration Council, so as to ensure that the issue is included as a cross-cutting approach to all reintegration aspects.

Impact of the pandemic and lessons learned

229. The continuation of the COVID-19 pandemic into 2022 had some impact, but despite the challenges, the Mission resumed all activities in 2022 and was able to carry out its verification activities throughout the country.
230. The Mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Teams deployed in the field resumed in-person activities as communities do not always have access to remote modalities. The Mission has supported flexible working arrangements for staff dealing with family challenges, but such arrangements have not affected the footprint of the Mission.

Programme performance in 2022

Strengthening security guarantee efforts for former FARC-EP combatants and civil society organizations

231. The Mission's work on security guarantees includes providing advisory recommendations to the Government on the way forward to comply with the commitments within the Final Agreement. The Mission provided the Government with recommendations to strengthen security guarantees for former FARC-EP combatants and civil society organizations, including through actions in the regions, a review of public policies, and legislation. The Mission supported the construction of an emergency plan for the protection of social leaders, human rights defenders and former combatants, which was presented to the Government on 5 August 2022. The Government later formally adopted the plan as its principal guideline to respond to the security crisis in the regions. The actions implemented included the creation of "unified command posts" in a set of prioritized regions to quickly attend to urgent security situations; the reactivation of key institutions and inter-institutional spaces as provided in the Final Agreement; the amendment of legislation to comply fully with the Agreement; and a restructuring of the National Protection Unit, including a formal audit of the entity against corruption charges, to enhance effective protection arrangements for former combatants and human rights defenders.
232. Progress towards the objective is presented in the performance measure below (see table 40).

Table 40

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Relevant Government and State entities strengthened security guarantees for former FARC-EP combatants and civil society organizations through actions in the regions, a review of public policies, and legislation

Planned results for 2024

Result 1: accelerating efforts towards sustainable reintegration

Programme performance in 2022 and target for 2024

233. The Mission contributed to accelerating the implementation of the reintegration process. By 2022, 75 per cent of former combatants (including 84 per cent of women former combatants) benefited from collective and individual productive initiatives. The parties, with international support, agreed on a sustainability strategy that includes access to markets, land and credit, technical assistance, strengthening of former combatants' cooperatives, security and the participation of women.
234. The Mission will continue working alongside the parties to promote the sustainability of reintegration.
235. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 41).

Table 41
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Significant increase in the number of State-sponsored collective reintegration projects for former combatants, fostering the consolidation of the socioeconomic integration of former combatants throughout Colombia	All State-sponsored collective reintegration projects took into consideration elements to ensure their sustainability, including access to markets, land and credit, technical assistance, strengthening of former combatants' productive associations and ensuring the active participation of women	Significant increase in the number of former combatants and their families benefiting from State-sponsored measures to guarantee sustainable reintegration solutions in and outside former territorial areas for training and reintegration	Sustained increase in the number of former combatants and their families benefiting from State-sponsored measures to guarantee sustainable reintegration solutions in and outside former territorial areas for training and reintegration	Reintegration benefits and State-sponsored opportunities are available to all accredited former combatants, their families and surrounding communities, contributing to the sustainability of the process through a broader focus on community-based initiatives, reconciliation and locally-led efforts

Result 2: timely and effective implementation of the restorative sentences issued by the Special Jurisdiction for Peace

Programme performance in 2022 and target for 2024

236. The Mission's work contributes to verifying that the forthcoming restorative sentences are complied with and that the conditions for their implementation are met, which will help build confidence in the process and support the Special Jurisdiction for Peace in laying the foundations for reconciliation among all Colombians.
237. The Mission will continue to engage with entities responsible for the implementation of the sentences and for their monitoring and verification. The Mission will fine-tune the verification methodology for general trends and patterns and select individual cases for closer monitoring and verification purposes. The Mission will also engage with State institutions to monitor and verify that the conditions for implementing restorative sentences are fulfilled.
238. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 42).

Table 42
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	The Mission contributed to initial efforts to establish the monitoring and verification mechanism composed of the Mission and the	Establishment of the monitoring and verification mechanism composed of the Mission and the Special Jurisdiction for Peace	Compliance with and implementation of a significant number of sentences is verified, including the fulfilment by sentenced persons	Relevant government and State entities ensure the necessary conditions for the effective implementation of restorative

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
	Special Jurisdiction for Peace	Compliance with and implementation of an initial number of sentences was verified, including the fulfilment by sentenced persons of the terms of their sentences as well as the establishment by the Colombian authorities of the conditions necessary for this	of the terms of their sentences as well as the establishment by the Colombian authorities of the conditions necessary for this	sentences issued by the Special Jurisdiction for Peace in its different cases Compliance with restorative sentences by individuals subject to the jurisdiction of the Special Jurisdiction for Peace is verified

Result 3: progress in the effective implementation of comprehensive rural reform and ethnic chapters

Proposed programme plan for 2024

239. The Security Council, in resolution [2673 \(2023\)](#), expanded the Mission's mandate to verify the implementation of the Final Agreement's comprehensive rural reform chapter. The Government has committed to foster access to land and to accelerate the implementation of plans to extend the presence of the State in rural areas.

Lessons learned and planned change

240. The lesson learned for the Mission was the importance of working with the Government and civil society organizations, among other interlocutors, to identify progress and areas of improvement, and of offering support to ensure comprehensive and coordinated implementation. In applying the lesson, and to support the implementation of the expanded areas of work, the Mission will work alongside government and State entities as well as with civil society organizations, notably from Afro-Colombian and Indigenous communities, to foster implementation by identifying possible obstacles and recommending solutions.
241. Expected progress towards the objective is presented in the performance measure below (see table 43).

Table 43

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	–	–	Increase in the number of landless farmers, women and victims who received land (or were granted land titles) through mechanisms provided for in the Final Agreement. An effective, comprehensive and inclusive implementation of the development programmes with a territorial focus and the national plans for rural reform

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
				Establishment of a dedicated coordination mechanism between the Government and State institutions in charge of the implementation of the ethnic chapter Significant progress in the implementation of the ethnic chapter Establishment of a dialogue mechanism between institutions responsible for implementation, ethnic peoples, private sector entities and other relevant stakeholders The High-level Forum of Ethnic Peoples is strengthened

Deliverables

C. Substantive deliverables

Good offices: provision of good offices to implement provisions in sections 1, 3.2, 3.4, 5.1.2 and 6.2 of the Final Agreement, including for the implementation of the respective gender provisions and the chapter on ethnic perspectives within the Final Agreement; good offices to promote problem-solving, confidence-building and unity of effort in response to implementation challenges in the field; good offices and advocacy on the establishment and strengthening of spaces and forums that bring together relevant counterparts and stakeholders for productive dialogue and decision-making; good offices and advocacy on visits from key stakeholders to reintegration areas and other relevant locations where former combatants are developing productive projects and community-based initiatives as part of their reintegration process, including support to reinforce the role of the technical working group on gender within the National Reintegration Council; good offices for the implementation of the women and peace and security agenda as part of the implementation of the Final Agreement, including advancing women's participation; systematic engagement with the different actors and State entities that have responsibilities in the implementation of the restorative sentences and in their monitoring and verification.

Consultation, advice and advocacy: consultations and advice to identify, prevent or resolve challenges in the conditions for increased political participation by the Comunes political party, reintegration of former combatants, improving security and protection measures and conditions, and increased participation in the implementation of the Final Agreement; advocacy for the full implementation of the gender provisions within the Final Agreement, including support to government counterparts and regular consultation with women's organizations and female former combatants; support for the information-management mechanisms of the Special Jurisdiction for Peace to facilitate information-sharing, specifically on the follow-up of restorative sentences.

Databases and substantive digital materials: integrated tools for verification of rural land reform based on geostatistical models and methodologies for prioritization, advances and follow-up; integrated tools for the verification of the ethnic chapter considering a cross-cutting approach (phase 1: integrated database, phase 2: automation); integrated tools for information management on verification of restorative sentences (early warnings and individual cases of special interest); verification reporting system at local, regional and national levels (phase 1: repository, phase 2: forms automation, phase 3: text mining tools); advance of implementation of Final Agreement follow-up tool at local, regional and national levels; databases and information system for indicators related to verification context; database of incidents against former FARC-EP combatants, relatives, political party members, social leaders and communities (phase 1: early warnings, phase 2: incidents, phase 3: other security guarantees issues); information management platform on organizations engaged in economic reintegration projects and productive projects; tripartite database of transit to legality.

D. Communication deliverables

Outreach programmes, special events and information materials: information materials for former FARC-EP combatants and communities explaining the progress of the Mission's mandate and the implementation of the Final Agreement; outreach programmes to increase the visibility of the reintegration process and security guarantees measures, of the implementation of restorative sentences, and of advances in comprehensive rural reform and ethnic aspects; outreach programmes with local communities and former combatants on areas in the Mission's mandate; production and dissemination/broadcasting of thematic videos in support of Mission engagement areas; events to promote reconciliation between ex-combatants and local communities; brochures, flyers, flipcharts, infographics, inserts, profiles and promotional material on the Mission's mandate and developments; outreach programmes through radio and television broadcasting in local, regional and national media; partnership with the United Nations country team and United Nations information centre to share relevant information on the progress of the Mission's mandate and the implementation of the Final Agreement.

External and media relations: conferences with key media partners such as journalists, directors and editors of local, regional and national media; press conferences, press briefings and media field visits; media briefing products; coverage of the quarterly reports of the Secretary-General.

Digital platforms and multimedia content: maintenance of social media channels and United Nations information platforms; animated podcast series showcasing the Mission's mandate and activities; special reports; continuous analysis to help improve dissemination and impact.

B. Proposed post and non-post resource requirements for 2024

Resource requirements (regular budget)

Table 45

Financial resources

(Thousands of United States dollars)

Category of expenditure	2022		2023		2024	Variance

Change	–	–	(1)	1	1	–	4	–	4	–	9	6	1	7	3	1	4	20

^a Other level, unless otherwise stated.

243. The proposed resource requirements for 2024 for the Verification Mission amount to \$66,971,700 (net of staff assessment) and would provide for the deployment of 120 military observers (\$2,972,100); salaries and common staff costs (\$37,035,300) for 180 international positions (1 Under-Secretary-General, 1 Assistant Secretary-General, 6 D-1, 26 P-5, 38 P-4, 58 P-3, 1 P-2, 48 Field Service and 1 General Service), 189 national positions (101 National Professional Officer and 88 Local level) and 145 United Nations Volunteers (121 international and 24 national); and operational costs (\$26,964,300), comprising the costs for consultants and consulting services (\$520,900), official travel (\$1,878,000), facilities and infrastructure (\$6,829,700), ground transportation (\$2,883,500), air operations (\$8,090,000), marine operations (\$111,800), communications and information technology (\$4,834,400), medical (\$417,400) and other supplies, services and equipment (\$1,398,600).
244. A vacancy rate of 23.0 per cent has been applied to the estimates for international positions, taking into account the actual average vacancy rates in 2022; 20.0 per cent for National Professional Officer positions, based on the vacancy rate in March 2023; 11.5 per cent for Local level positions, based on the vacancy rate in March 2023; 5.8 per cent for military observers, based on the vacancy rate in March 2023; 3.4 per cent for international United Nations Volunteers, based on the vacancy rate in March 2023; and 8.7 per cent for national United Nations Volunteers, taking into account the actual average vacancy rates in 2022. A vacancy rate of 50 per cent has been applied to the estimates for the positions proposed for establishment and reassignment.
245. With a view to ensuring the effective delivery of its mandate, including the expanded areas of work mandated by the Security Council in resolution [2673 \(2023\)](#), a number of changes to the

organizational and staffing structure are proposed for 2024, including the establishment of 20 positions, the reclassification of 1 position, the reassignment of 3 positions and the redeployment of 11 positions, as detailed below:

Office of the Special Representative of the Secretary-General

- (a) Redeployment of one position of Head of Office, Political Affairs (P-5) from the Regional Office of Quibdó to strengthen the capacity of the Office of the Special Representative with respect to developments on the ground and to provide planning and strategic leadership to the Mission's headquarters and field offices;

Office of the Deputy Special Representative of the Secretary-General

- (b) Realignment of all regional offices, and by extension the Field Coordination Office and all subregional and local offices, from the Office of the Chief of Staff to the Office of the Deputy Special Representative in an effort to adapt the Mission's structure for the effective implementation of mandates, including the newly mandated areas of work with respect to the rural reform and ethnic chapters;
- (c) Redeployment of one position of Head of Office, Political Affairs (P-5) from the Regional Office of San José del Guaviare to reinforce senior guidance, analysis, management and reporting capacities for the Mission's verification mandate;
- (d) Redeployment of one position of Associate Child Protection Officer (National Professional Officer) from the Cross-cutting Issues Team to ensure that direct advice on child protection issues is provided to the Deputy Special Representative of the Secretary-General, ensuring enhanced communication and reporting;
- (e) Redeployment of two positions, namely one Associate Liaison Officer (National Professional Officer) and one Administrative Assistant (Local level), from the Verification Division to streamline reporting lines and improve business processes;

Political Affairs Office

- (f) Renaming of the Verification Division as the Political Affairs Office to ensure that political and operational issues are considered in a comprehensive and coherent manner and that they are reflected in the activities in the field;
- (g) Reclassification of one position of Director, Political Affairs (D-2) in the Political Affairs Office as Principal Political Affairs Officer (D-1). The change will ensure effective monitoring and evaluation of actions implemented through integrated frameworks, as well as proper coordination of information on cross-cutting issues and more coherent communication between structures and the Mission's headquarters in Bogotá;
- (h) Reassignment of one position of Coordination Officer (National Professional Officer) as Liaison Officer to engage with key stakeholders, including senior government officials, former combatants, civil society representatives and different substantive areas and offices within the Mission, in line with the new and increased political demands at the national level;
- (i) Redeployment of one position of Policy and Best Practices Officer (P-4) from the Office of the Chief of Staff to the Political Affairs Office to ensure best practices and guidance to support the Government of Colombia to attain total peace, including collecting practices in its establishment of political dialogues with other armed groups and sharing knowledge and lessons learned in an effective and efficient manner;

Verification of Reintegration and Rural Reform Office

- (j) Renaming of the Verification of Political, Social and Economic Reincorporation Office as the Verification of Reintegration and Rural Reform Office to reflect the inclusion of section 1 of the Final Agreement as responsibilities conducted in this Office;
- (k) Establishment of three positions, namely one Liaison Officer (P-3) and two Associate Liaison Officers (National Professional Officer), to ensure the Mission's ability to respond to the new mandated areas of work and verify the comprehensive rural reform chapter of the Final Agreement, including responding to requests emerging from regional offices and government institutions, liaising with government and civil society actors and compiling information provided by the Government for its quarterly reports;

Ethnic Affairs Section

- (l) Renaming of the Cross-cutting Issues Team as the Ethnic Affairs Section to provide a dedicated team within the Mission to be in charge of the ethnic affairs chapter, guiding and supporting the field offices to carry out the new verification tasks, while advocating with the institutions in charge of the implementation of this chapter and engaging with ethnic authorities and their representative organizations;
- (m) Establishment of five positions, namely one Senior Liaison Officer (P-5), one Liaison Officer (P-3), two Associate Liaison Officers (National Professional Officer) and one Administrative Assistant (Local level), to verify the implementation of the ethnic chapter (section 6.2) of the Final Agreement. Currently, the Mission only has one staff member at the P-4 level in charge of the ethnic chapter. The expansion of the mandate requires a substantial strengthening of such capacity in the Mission;

Regional offices, sub-offices, hubs and local teams

- (n) Renaming of the Regional Offices of Quibdó and San José del Guaviare as sub-offices to streamline reporting lines; these sub-offices will report to the Regional Offices of Medellín and Villavicencio, respectively;
- (o) Establishment of two positions of Liaison Officer (National Professional Officer) in the Regional Offices of Cúcuta and Florencia, respectively, to reinforce these Offices by liaising with multiple government interlocutors, civil society organizations, academia and the private sector, participate in mechanisms designed to coordinate the implementation of the mandate and ensure coordination and complementary action with the United Nations country team. These positions will provide technical expertise and political analysis on the implementation of the ethnic and rural reform chapters of the Final Agreement;
- (p) Establishment of two positions of Liaison Officer (P-3) in the Regional Offices of Medellín and Valledupar, respectively, to ensure the successful implementation of the Mission's mandate. These positions will constitute the link between senior staff and the teams they lead, as well as the Mission's representatives, and national authorities and counterparts in these duty stations;
- (q) Redeployment of one Liaison Officer (National Professional Officer) from the former Verification Division to the Regional Office of Bogotá, to support the Head of Office's responsibilities in the region;

Office of the Chief of Staff

- (r) Realignment of the Legal Unit, the Gender Team, the Conduct and Discipline Team and the Military Adviser's Office from the Office of the Special Representative of the Secretary-General to streamline reporting lines and improve business processes;

- (s) Establishment of one position of Victims' Rights Officer (international United Nations Volunteer) to strengthen the country's structure and capacity in the prevention of sexual exploitation and abuse, enforce a strong framework, particularly at the community engagement level, and work closely with partners to prioritize the rights and needs of the victims/survivors/affected persons;

Office of the Chief of Mission Support

- (t) Establishment of one position of Administrative Assistant (Field Service) to ensure that a central administrative control function and tracking system is available, strengthening effectiveness and efficiency in the provision of administrative services. This position will ensure a proper and timely response to the increased work of the Office derived from the expansion of the mandate and the increased staffing of the Mission;
- (u) Redeployment of one position of Administrative Officer (National Professional Officer) from the Regional Office of Quibdó in order to strengthen the administrative and coordination capacity of Mission Support;

Mission Support Unit

- (v) Redeployment of one position of Administrative Officer (P-4) from the Office of the Chief of Mission Support to ensure that administrative and logistical support is provided to all components of the Mission. This change will ensure proper coordination with all regional and subregional offices, as well as the United Nations agencies, funds and programmes operating in Colombia;
- (w) Reassignment of one position of Logistics Officer (Field Service) as Administrative Officer to address the additional administrative and logistics workload;

Human Resources Unit

- (x) Establishment of one position of Human Resources Assistant (Field Service) to reinforce the Human Resources Unit to ensure that sound and reliable strategic support and advice are provided to senior managers in the Mission, ensuring a timely and smooth recruitment and onboarding process, especially with the requirement for additional positions and the need to fill them expeditiously for the successful implementation of the expanded mandate;

Movement Control Unit

- (y) Renaming of the Movement Control Team in the Supply Chain Management Section as the Movement Control Unit to reflect the increased responsibilities of the Unit in response to the increased complexity of the required outputs and deliverables, to provide improved client services for both the multimodal transportation of passengers and the handling of cargo in support of the Mission, and to ensure that all activities are carried out in accordance with the applicable United Nations security rules, regulations and procedures;
- (z) Establishment of two positions of Movement Control Officer (1 national United Nations Volunteer and 1 international United Nations Volunteer) to support the daily air operations and guarantee the safe and timely movement of personnel as well as cargo to all regions, further to the Mission's expanded mandate and the additional aircraft (fixed-wing) now deployed in the Mission;

Financial Resourcing, Performance and Risk Management Unit

- (aa) Establishment of one position of Finance and Budget Assistant (international United Nations Volunteer) to provide additional support in a range of different office tasks, such as management of value added tax (VAT) receivables, VAT claims, reconciliation of all accounts receivable balances, liaison with the relevant tax authority, follow-up of outstanding balances, setting up accurate and complete filing and records management, and invoice tracking;

Field Technology Unit

- (bb) Reassignment of one position of Information Systems Assistant (Local level) as Receiving and Inspection Assistant to ensure a cohesive, integrated and effective approach to warehousing activities within the Field Technology Unit, including the receipt, storage, safeguarding and issuance of goods;

Centralized Warehousing Team

- (cc) Redeployment of one position of Property Control and Inventory Assistant (Local level) from the Life Support Unit to ensure that the right goods are delivered at the right time, to the right place and in the right quantity, and to ensure that goods are received in an undamaged condition and recorded on the appropriate platforms to ensure good record-keeping;

Operations and Resource Management Section

- (dd) Redeployment of one position of Administrative Officer (National Professional Officer) from the Regional Office of San José del Guaviare to strengthen the administrative, logistics and coordination capacity of this Section, which now also includes the Training Unit;

Service Delivery Section

- (ee) Redeployment of one position of Administrative Assistant (Local level) from the Operations and Resource Management Section to strengthen administrative support within this Section;

Security Section

- (ff) Establishment of two positions of Close Protection Officer (Field Service) in the Protection Services Unit to ensure the security of the Special Representative of the Secretary-General based on a security risk management assessment from the Department of Safety and Security. The Close Protection Officers will manage close protection operations for the Head of Mission and implement mitigating measures to ensure his security and safety.

246. The decrease in requirements for 2024 compared with the appropriation for 2023 is attributable mainly to: (a) lower military and civilian personnel costs for observers, international and national staff and United Nations Volunteers, owing to the application of higher vacancy rates in 2024 compared with those applied in the approved budget for 2023; and (b) lower requirements for meeting facilitation services. The decrease is partially offset by: (a) the proposed establishment of 14 new positions to implement the expanded mandate; (b) higher costs for national staff owing to the updated salary scales promulgated in 2022; (c) higher requirements for air operations, as a result of the application of the latest contractual prices for helicopters; (d) higher requirements for facilities and infrastructure, as a result of the application of the latest contractual prices for the rental of premises and security services; and (e) higher requirements for official travel to support the implementation of mandates.

Extrabudgetary resources

247. In 2023, extrabudgetary resources in the amount of \$743,000 are projected to be utilized to provide resources for five main initiatives on promoting access to security guarantees, strengthening conditions for reconciliation, dialogue facilitation, restorative sentences, and women and peace and security efforts.
248. In 2024, extrabudgetary resources in the amount of \$743,000 are projected to be utilized to provide resources to further support the continuation of successful projects that have been instrumental in gaining political space for the implementation of the mandates, and new proposals focusing on victims and communities.

9. United Nations Mission to Support the Hudaydah Agreement

(\$34,766,200)

Foreword

In 2024, the United Nations Mission to Support the Hudaydah Agreement will maintain the agility required to deliver on its mandate and respond to the dynamic environment in which it works. The 2024 budget seeks to reflect the next phases of the Mission's work in line with its mandate, responding to the evolving situation in Yemen and supporting the full realization of the Agreement on the City of Hudaydah and the Ports of Hudaydah, Salif and Ra's Isa (Hudaydah Agreement). This includes re-establishing joint forums for de-escalation and collaboration between the parties; the establishment of a UNMHA presence in areas controlled by the Government of Yemen; expanded patrolling to the ports and front lines; oversight of mine action coordination; and community engagement.

Underpinning this, the budget will continue to support the Mission's endeavours to be a data-driven, knowledge-based entity that can serve as an analytical hub for the United Nations system in Hudaydah. The enhancement of the Mission's geospatial capacity, data collection and information management tools and the appropriate structures to improve information management are integral to this effort.

Sustained engagement with the parties, regional actors and the diplomatic community will remain paramount in 2024. Similarly, an increased emphasis on coordination with the United Nations system in Yemen to leverage a collective effort to support nascent stability in Hudaydah will be pursued as a priority. This budget will provide UNMHA with the tools and resources needed to meet these ends.

(Signed) Major General (retired) Michael **Beary**
Head of the United Nations Mission to Support the Hudaydah Agreement
Chair of the Redeployment Coordination Committee

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

249. The United Nations Mission to Support the Hudaydah Agreement (UNMHA) is responsible for supporting the parties to the Stockholm Agreement (S/2018/1134, annex) in implementing the provisions of the Agreement on the City of Hudaydah and the Ports of Hudaydah, Salif and Ra's Isa (Hudaydah Agreement), and their commitments in accordance with the Hudaydah Agreement. The mandate was defined in Security Council resolution 2452 (2019) and extended in resolutions 2481 (2019), 2505 (2020), 2534 (2020), 2586 (2021) and, most recently, in resolution 2643 (2022) until 14 July 2023.
250. The mandate of the Mission, as set out in resolution 2643 (2022), is to: (a) lead, and support the functioning of, the Redeployment Coordination Committee, assisted by a secretariat staffed with United Nations personnel, to oversee the Governorate-wide ceasefire, the redeployment of forces and mine action operations; (b) monitor the compliance of the parties with the ceasefire in Hudaydah Governorate and the mutual redeployment of forces from the city of Hudaydah and the ports of Hudaydah, Salif and Ra's Isa; (c) work with the parties so that local security forces assure the security of the City of Hudaydah and the ports of Hudaydah, Salif and Ra's Isa in accordance with Yemeni law; and (d) facilitate and coordinate United Nations support to assist the parties to fully implement the Hudaydah Agreement.
251. In November 2021, the unilateral withdrawal of the Government of Yemen-aligned joint forces from Hudaydah city to the southern districts of Hudaydah shifted the front line over 100km to the south. Limited hostilities continue in these areas but have remained tactical in nature.
252. The positive impacts of the six-month truce (from 2 April to 2 October 2022) brokered by the United Nations can be seen in Hudaydah. However, the increased freedom of movement enjoyed by the civilian population has led to a major increase in casualties related to landmines as people return to their places of residence.
253. Maintaining the civilian nature of the ports of Hudaydah Governorate is of paramount importance. UNMHA patrols to the ports found no evidence of military objects or manifestations during 2022. Until a durable political settlement is reached, however, armed confrontation for the control of these ports remains a possibility.
254. The period of relative stability that emerged in 2022 enabled UNMHA to act upon new opportunities, including monitoring visits to conflict-affected districts on both sides of the front line. The Mission intends to conduct such activities on a routine basis.

Programme of work

Objective

255. The objective, to which the Mission contributes, is to support the parties in the implementation of the Agreement on the City of Hudaydah and the Ports of Hudaydah, Salif and Ra's Isa, and their commitments in accordance with the Hudaydah Agreement.

Strategy and external factors for 2024

256. To contribute to the objective, the Mission will:
- (a) Adapt to the evolving environment across Hudaydah Governorate to ensure it is best positioned and structured to advance its mandate. The Mission will establish and operate a presence in the territory of the Government of Yemen south of the newly formed front lines, in conjunction with the operation of its base in Hudaydah city, to ensure representation, capacity and activities in the territories of both parties;
 - (b) Lead and support the sustained operation of the Redeployment Coordination Committee as the key oversight body of the Hudaydah Agreement. The Head of Mission, acting as Chair, will lead regular Committee meetings between the parties at a location mutually agreed to by both parties with the intent of reinstating dialogue and liaison mechanisms to oversee and ensure implementation of the redeployment of forces, the Governorate-wide ceasefire and the provision of security by local security forces within Hudaydah city and its ports in accordance with Yemeni law;
 - (c) Strengthen and realign the joint structures previously agreed as part of the framework of the Redeployment Coordination Committee to address shifted realities and conflict-affected areas in the evolved environment, including de-escalation;
 - (d) Maintain increased monitoring capacity within the authorized ceiling to expand and strengthen monitoring of the Hudaydah, Ra's Isa and Salif ports with daily patrols to all port installations, with a view to monitoring the redeployment of all military forces from such locations, and the removal of military manifestations, in accordance with the mandate. On-the-ground patrolling will also be expanded in the territories held by the parties on either side of the front lines, including conflict-affected areas;
 - (e) Provide technical expertise and support to advance mine action efforts in Hudaydah Governorate, in close coordination with partners and in accordance with the priorities identified by both sides, with a focus on locations posing a high risk to civilians;
 - (f) Advance assessment and coordination to implement community-focused projects in key locations on either side of the front lines, with a focus on vulnerable groups, including conflict-affected groups, women and children, and in coordination with and fully complementary to wider development actions that support the local population, de-escalate tensions between communities, strengthen social cohesion and enhance stability.
257. The above-mentioned work is expected to result in:
- (a) Enhanced mutual trust, confidence and dialogue between the parties to strengthen the implementation of the Hudaydah Agreement as a key contribution to the broader peace process;
 - (b) Equal and sustained access and dialogue across both sides in the respective shifted territories of the parties in Hudaydah Governorate;
 - (c) Strengthened ceasefire implementation across the Governorate and improved security of the local population, including a reduction in casualties resulting from ceasefire violations;
 - (d) Maintenance of the security of Hudaydah city and its ports, and assurance that military forces are redeployed from such locations, remaining military manifestations are removed and security responsibilities are assumed by local security forces in accordance with Yemeni law in these locations;
 - (e) Reduced violence in Hudaydah Governorate due to the de-escalation of tensions between the parties, enhanced stability and strengthened measures to protect the local population;
 - (f) Advancement in demining in Hudaydah city, its ports and other priority locations, reducing the risk of civilian casualties caused by improvised explosive devices or other explosive remnants of war;

- (g) An enhanced and inclusive process to ensure implementation of the Agreement on the basis of strengthened community participation.
258. With regard to cooperation with other entities, the Mission will continue to liaise and coordinate with the parties to ensure the safety and security of Mission personnel and premises, and the unhindered and expeditious movement of Mission personnel and equipment, provisions and essential supplies into and within Yemen. The Mission will continue to engage, where possible, with local stakeholders, partners and other bodies within Hudaydah Governorate to ensure a unified approach in supporting the Hudaydah Agreement and its implementation and identifying opportunities to enhance stability and confidence in this process. The Mission will intensify its engagements with regional actors that can positively influence progress towards mandate implementation.
259. With regard to inter-agency coordination and liaison, the Mission closely coordinates with the Office of the Special Envoy of the Secretary-General for Yemen, through which the Mission reports to Headquarters. The two missions share information and analysis, coordinate movements and briefings to the Security Council and align messaging, while sharing a mission support structure. The Mission also facilitates the support provided by United Nations agencies, funds and programmes and other partners to assist the parties in fully implementing the Hudaydah Agreement. The Mission maintains close working relationships with the Resident and Humanitarian Coordinator and members of the United Nations country team, particularly the World Food Programme, UNDP and the United Nations Verification and Inspection Mechanism, as well as other development and humanitarian actors operating in Hudaydah Governorate. The Mission consults and coordinates, as necessary, with the Office for the Coordination of Humanitarian Affairs, the Office of the United Nations High Commissioner for Human Rights and UN-Women to strengthen ceasefire implementation, achieve de-escalation and ensure access to areas of need.
260. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) There is sufficient political will and engagement from domestic, regional and international stakeholders to enable the implementation of the Hudaydah Agreement;
 - (b) Major combat operations between the parties will not recommence in Hudaydah Governorate, nor will there be sustained military impediments that would preclude the use of the main supply routes to and from the Mission's areas of operation;
 - (c) A political environment exists that does not obstruct the work of the Redeployment Coordination Committee and its subsidiary joint mechanisms, enabling the parties to advance full redeployment and activate the local security forces;
 - (d) The parties resume their full participation in the activities of the Redeployment Coordination Committee and commit to a revived dialogue process and participation in subsidiary joint mechanisms to monitor the ceasefire and foster de-escalation, confidence-building and collaborative demining efforts;
 - (e) The Government of Yemen agrees to, and cooperates in, facilitating the establishment of a Mission presence in areas to the south of the new front lines to ensure the Mission's equal access to both parties and enable the full deployment and ongoing unimpeded functioning of the Mission;
 - (f) A suitably safe, secure and permissive operating environment exists, and sufficient confidence is established between the parties and other partners to generate sustained support for and participation in the activities of the Mission;
 - (g) Continued operational cooperation exists with effective command and control structures within both parties to enable engagement at all levels;
 - (h) The parties facilitate the Mission's full access and freedom of movement to all areas required for the effective observation and monitoring of the ports of Hudaydah, Ra's Isa and Salif to

enable daily access to all port installations and to conflict-affected areas across the Governorate, including in the southern districts in the vicinity of the shifted front lines;

- (i) The parties provide needed access and cooperation to advance demining in Hudaydah city, the ports and areas of priority in other districts to enhance the protection of the local population in the Governorate's shifted context.
261. The Mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The implementation of quick-impact community projects in 2023 will include partnering with civil society and groups working to support women and girls in Hudaydah Governorate. This will be supported by continuing broader consultations to promote women's participation in the implementation of the Hudaydah Agreement and related activities and mechanisms. The Mission will work to reduce the disproportionate impact of landmines and explosive remnants of war on women and children throughout the Governorate, supporting risk awareness campaigns tailored for women and children. In addition, the Mission will promote equal rights and opportunities for women by fully and actively considering gender perspectives in planning and implementing Mission activities and those undertaken by the parties. Within the Mission, UNMHA will establish a gender parity working group to progress and monitor the gender parity action plan on internal issues related to gender parity, from recruitment and retention to conducive work environments and an empowering work culture. Particular attention will be given to the needs and concerns of female national staff.
262. In line with the United Nations Disability Inclusion Strategy, a disability inclusion working group in the Mission (made up of members from mission support and the Office of the Chief of Staff) will develop and implement a disability inclusion action plan that addresses barriers, challenges and priorities of persons with disabilities that is specific to the Mission's working environment. Initial focus will be given to recruitment and accessibility concerns. In addition, given the role of UNMHA in mine action coordination and the devastating impact of landmines on the civilian population of Hudaydah, disability inclusion will be mainstreamed into programmatic activities so that landmine victims can take full and active part in the work of the Mission where possible.

Evaluation activities

263. The following evaluations completed in 2022 have guided the proposed programme plan for 2024:
- (a) An internal review process took place between July and October 2022 to ensure that UNMHA was optimally positioned to deliver on the emerging priorities outlined in the renewed mandate of July 2022 and that the Mission would have the agility required to respond to the shifting context in Hudaydah and the trajectories of the broader peace process in Yemen. A strategic-focused retreat was held in August 2022, which was guided by the new Head of Mission's intent, which was drafted in response to the mandate renewal and which outlines the strategic vision to drive the Mission's activities during 2023 and 2024;
 - (b) UNMHA undertakes regular reviews of progress against targets and the impact that the Mission is delivering. Revised strategic planning documents, together with regular results monitoring, provide the framework in which this takes place. The Mission intends to further evaluate aspects of its operational activities in 2023, from which lessons learned can be applied to its work in 2024. This may in turn lead to additional or follow-up evaluation activities in 2024. The exact nature of evaluation efforts will be developed with the support of the Evaluation Section of the Business Transformation and Accountability Division of the Department of Management Strategy, Policy and Compliance, and the Inspection and Evaluation Division of the Office of Internal Oversight Services.
264. The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, the evaluative process highlighted above led to the creation of the patrolling task force and the successful expansion of patrolling and monitoring in

2022. Progress was made towards the establishment by UNMHA of a presence in Government of Yemen-controlled areas of Hudaydah Governorate.

265. A self-evaluation on one aspect of mandate implementation is planned for 2024, with the exact focus of the evaluation yet to be determined.

Impact of the pandemic and lessons learned

266. The continuation of the COVID-19 pandemic into 2022 had a reduced impact on the implementation of the Mission's mandate. Earlier in the year, the biggest challenge that persisted was the impact on staff movements in and out of Yemen, although this was managed in ways that mitigated the worst potential effects on operations. By the latter half of 2022, the bulk of COVID-19-specific restrictions had been eased or lifted to the extent that COVID-19 did not result in any major curtailments to programme delivery.
267. The Mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including measures to ensure that risk assessments are regularly carried out by the Mission in coordination with the United Nations system in Yemen and that COVID-19 protocols are reviewed and updated to address the evolving situation in Yemen. In addition, the Mission's business continuity and criticality plan is continuously reviewed and adjusted to address evolving realities and risks in the Yemen environment.

Programme performance in 2022

Enhanced situational awareness provided stakeholders with strengthened analysis on the situation in Hudaydah Governorate

268. The Mission's operations and expanded presence left it well placed to act as an analytical hub for the United Nations system in Hudaydah. Given the humanitarian, development and economic importance of the ports of Hudaydah, enhanced situational awareness and deepened analysis pertaining to the ports, ceasefire violations and the military situation on the front line, landmine incidents and areas of contamination, and political developments are essential for the Mission and its partners in supporting the implementation of the Hudaydah Agreement and an emergence from conflict. To accomplish this, the Mission significantly improved its geospatial tools and data collection and analysis methods and strengthened its information management structures. When combined with an increase in monitoring visits to conflicted-affected districts that can feed direct observations into analysis, the Mission is well placed to continue such efforts.
269. Progress towards the objective is presented in the performance measure below (see table 47).

Table 47

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	–	Improved situational awareness and analytical products supported partner planning and programming in Hudaydah Governorate

Planned results for 2024

Result 1: monitor the redeployment of military forces and removal of all military manifestations from the ports of Hudaydah, Ra's Isa and Salif and ensure the Mission's equal access to the territories of both parties

Programme performance in 2022 and target for 2024

270. In 2022, the Mission revised its patrol strategy and, despite significant restrictions on its freedom of movement, successfully progressed its unannounced patrolling in line with its mandate and met the target of ensuring the Mission's equal access to the territories of both parties across the Hudaydah front lines. A notable success was the first monitoring visits to the south of Hudaydah Governorate. A subsequent milestone included monitoring visits to conflict-affected districts on both sides of the front line. Patrolling to the ports increased in frequency during 2022, although still subject to freedom of movement restrictions.
271. In 2024, UNMHA will seek to expand and intensify monitoring of front-line areas and conflict-affected districts under Government of Yemen and de facto authority control, and to conduct unannounced visits that encompass all areas of the ports and their surrounding areas.
272. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 48).

Table 48

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	The Mission's equal access to the territories of both parties across the Hudaydah front lines was ensured	Monitor the redeployment of military forces and removal of all military manifestations from the ports of Hudaydah, Ra's Isa and Salif and ensure the Mission's equal access to the territories of both parties	Expand patrolling and monitoring within the ports and their surrounding areas to conflict-affected districts and to both sides of the front line controlled by the parties

Result 2: raised community confidence in the Hudaydah Agreement and related United Nations activities

Proposed programme plan for 2024

273. The conflict in Hudaydah Governorate continues to have a devastating impact on the lives of communities. An active front line in the south of the Governorate means many communities have stayed outside the reach of humanitarian assistance efforts. Consequently, confidence in the Hudaydah Agreement and the broader peace process has remained limited. Outreach work with community groups has been undertaken to gain better access to potential beneficiaries and an informed understanding of their needs. This work was carried out in coordination with the United Nations country team and other actors. The first monitoring visits carried out in conflict-affected districts on both sides of the front line have built a platform for UNMHA to open space for other entities to deliver humanitarian and development programming in areas that had previously been unreachable or underserved. The Mission's community-focused projects will therefore be at the

forefront of a coordinated approach that enables the efforts of the United Nations country team to improve the situation for communities living in the south of Hudaydah Governorate.

Lessons learned and planned change

274. The lesson learned for the Mission was that community-focused projects should focus on revenue generation activities and small-scale infrastructure rehabilitation.
275. In applying the lesson, the Mission will base revenue creation around areas of cultural and economic importance to communities in Hudaydah, primarily within the fishing sector given that Hudaydah is a coastal area. Monitoring visits to conflict-affected areas have shown the need for small-scale infrastructure projects, including solar panels for schools and clinics, as well as the rehabilitation of water points.
276. Expected progress towards the objective is presented in the performance measure below (see table 49).

Table 49

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	–	Increased capacity of women's groups in conflict-affected districts to support initiatives in their community	Improved availability of services and income-generating opportunities for men and women in conflicted-affected districts

Deliverables

277. Table 50 lists all deliverables of the Mission.

Table 50

Deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Letters of the Secretary-General to the Security Council	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	35	32	36	36
2. Meetings of the Security Council, Security Council Informal Expert Group on Women and Peace and Security	7	12	12	12
3. Redeployment Coordination Committee meetings	17	9	9	9
4. Bilateral meetings with regional political stakeholders	11	11	15	15
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	16	1	16	8
5. Workshops with local community representatives on Hudaydah Agreement implementation	8	1	8	4

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
6. Workshops with political/civil stakeholders on Hudaydah Agreement implementation	8	–	8	4
Fact-finding, monitoring and investigation missions (number of missions)	60	63	108	108
7. Monitoring missions and patrols conducted	60	63	108	108

C. Substantive deliverables

Good offices: provision of good offices in the context of the efforts of the parties to fully implement the Hudaydah Agreement, including meetings with local political actors in Hudaydah and from both parties in Aden and Sana'a, as well as regional and international interlocutors.

Consultation, advice and advocacy: consultations with the relevant Yemeni, regional and international stakeholders, with a view to comprehensively understanding the challenges at hand and to providing advice to the parties in their efforts to implement the Hudaydah Agreement; advocacy among Yemeni, regional and international stakeholders in support of the implementation of the Agreement and enhancement of the ceasefire in the Governorate; exploring the possibility of leveraging support from the Department of Political and Peacebuilding Affairs innovation cell to launch a public opinion poll among the public in Hudaydah Governorate, focusing on the impact of the conflict and ceasefire violations on the civilian population, particularly after the shifting of the military landscape in Hudaydah, with 500–600 participants from both sides of the shifted front lines, to better understand the experiences of the civilian population, with particular reference to marginalized groups and women and youth; provision of technical advice to the parties on mine action, oversight and coordination of mine action initiatives among partners in Hudaydah, and advocacy for international mine action non-governmental organizations to operate in the Governorate.

D. Communication deliverables

Outreach programmes, special events and information materials: development and maintenance of strategic relationships with Mission partners, including the United Nations Communications Group, to ensure alignment in United Nations common messaging and cooperation across different levels; development and regular updating of the Mission's key messages transmitted publicly and in response to developments on the ground; outreach events to enable UNMHA to adequately consult different community-level interest groups, prominent religious figures, civil society, youth and women's organizations to broaden participation and ensure an inclusive process on the implementation of the Agreement.

External and media relations: press releases, messages and audiovisual material on the Mission's activities and key messages; relationships developed with media partners to ensure accurate coverage of the Mission's messaging and activities; answers in a timely manner to media inquiries; strengthened informal interaction and relationships with media partners.

Digital platforms and multimedia content: website establishment and frequent updates on the Mission's activities and public statements; regular updates through social media channels on the Mission's activities and public statements; photographs and videos shared promoting the Mission's activities and key messages on all digital platforms.

B. Proposed post and non-post resource requirements for 2024

Resource requirements (regular budget)

Table 51

Financial resources

(Thousands of United States dollars)

Change	–	–	–	–	–	–	1	–	1	–	2	1	–	1	–	–	–	3

^a Includes one P-4 and one P-3 general temporary assistance positions.

278. The proposed resource requirements for 2024 for the Mission amount to \$34,766,200 (net of staff assessment) and would provide for the deployment of 75 United Nations monitors (\$678,500); salaries and common staff costs (\$15,777,800) for 73 international positions (1 Assistant Secretary-General, 1 D-2, 1 D-1, 6 P-5, 11 P-4, 20 P-3, 1 P-2 and 32 Field Service), 92 national positions (12 National Professional Officer and 80 Local level) and 5 government-provided personnel; and operational costs (\$18,309,900), comprising the costs for official travel (\$629,100), facilities and infrastructure (\$4,862,200), ground transportation (\$500,600), air operations (\$9,461,200), communications and information technology (\$1,126,100), medical (\$773,600), other supplies, services and equipment (\$657,100) and quick-impact projects (\$300,000).
279. A vacancy rate of 88.0 per cent has been applied to the estimates for United Nations monitors, 23.9 per cent for international positions, 18.2 per cent for National Professional Officers and 13.8 per cent for Local level positions, on the basis of the vacancy rate in March 2023. A vacancy rate of 90.0 per cent has been applied to the estimates for government-provided personnel. For proposed new and reassigned positions, a vacancy rate of 50.0 per cent has been applied.
280. With a view to ensuring the effective delivery of its mandate, a number of changes to the organizational and staffing structure are proposed for 2024, including the establishment of three positions, the reassignment of one position, and the redeployment of five positions, as detailed below:

Office of the Head of Mission/Chair of the Redeployment Coordination Committee

- (a) Redeployment of One Senior Political Affairs Officer (P-5) position from the Political Affairs Section to provide advice to the Head of Mission in addressing the complex political dynamics in Yemen and the diverse political actors in the peace process;
- (b) Redeployment of one Legal Officer (P-4) position from the Office of the Chief of Staff, owing to the refocusing of the Office of the Chief of Staff (as explained in subparagraph (c) below);

Office of the Chief of Staff

- (c) With a view to optimizing strategic planning and coordination functions in the Mission, the Office of the Chief of Staff will be recalibrated to focus primarily on situational awareness and analysis, information management (including information flows), strategic planning and communications. To this end, the below changes are proposed:
 - (i) Realignment of the Joint Operations Centre from the Office of the Head of Mission to the Office of the Chief of Staff to enhance situational awareness and increase the impact of the work;
 - (ii) Realignment of the Joint Coordination and Communication Centre from the Office of the Head of Mission to the Office of the Chief of Staff, and its renaming as Joint Mission Analysis Centre, to strengthen joint analysis and to transform the Mission into a

knowledge-based entity that can serve as an analytical hub for the United Nations system with respect to the situation in Hudaydah;

- (iii) Redeployment of one Coordination Officer (P-4) position from the Office of the Deputy Head of Mission and Coordination to support strategic planning, foster partnerships and strengthen integrated approaches;
- (iv) Redeployment of one Public Information Officer (P-3) and one Associate Public Information Officer (National Professional Officer) from the Office of Head of Mission to extend the Mission's external communications and public information efforts under the supervision of Chief of Staff;

Political Affairs Section

- (d) Reassignment of one position of Civil Affairs Officer (P-3) as Data Analyst to expedite the efforts towards a data-driven organization by using and managing data to enable informed decision-making and responses;

Military Advisory Unit

- (e) Renaming of the Liaison and Coordination Mechanism Section as the Military Advisory Unit in the light of the situation in Hudaydah and the recalibration of the Office of the Chief of Staff, through which the integrated operational coordination role will now be assumed by the Joint Operations Centre in the Office of the Chief of Staff;

Office of the Chief of Mission Support

- (f) Establishment of one Medical Officer (P-3) in Hudaydah, one Medical Officer (National Professional Officer) and one Paramedic (Field Service) to establish in-house medical capacity as a result of the review of the Mission's medical concept as further elaborated in the paragraphs below.

Review of the Mission's medical concept in Hudaydah

281. UNMHA conducted a review of its medical concept in Hudaydah in December 2022 and February 2023. The review covered the UNMHA medical clinic at the Four Villas compound in Hudaydah, other hospitals and health facilities in Hudaydah, Sana'a and Aden, the medical evacuation (MEDEVAC) standard operating procedures and the implementation of policies and procedures promulgated by the Health-Care Management, Occupational Safety and Health Division of the Department of Operational Support. The review also considered medical statistics provided by the contractor and the United Nations clinic, and a comprehensive health risk assessment was conducted to determine effective health risks and mitigation controls that would eliminate or lower the identified risks to acceptable levels. In addition, the Mission carried out assessment visits to the Sudanese military hospital and the French military hospital in Djibouti, as well as meetings with the aviation team and the Aeromedical Evacuation Team based in Djibouti and meetings and interviews with key UNMHA personnel.
282. The findings and recommendations of the review were as follows:
 - (a) The Al-Amal hospital in Hudaydah is assessed as "level III" and can be used as a referral hospital by UNMHA. A memorandum of understanding should be developed with this hospital to serve UNMHA personnel, including a walk-in blood donor programme;
 - (b) For hospital care, referral and casualty evacuation (CASEVAC)/MEDEVAC services, UNMHA can count on national health facilities rather than Djibouti for urgent and critical medical and surgical cases;
 - (c) Existing contracts for air ambulance MEDEVAC from Sana'a can be used for advanced medical conditions;

- (d) There are possible synergies through the supporting of the country team's clinic in Hudaydah with UNMHA-funded medical personnel, also allowing UNMHA medical personnel access to EarthMed (which is not accessible for contractors);
 - (e) In Sana'a, it is recommended that the University of Science and Technology Hospital, the Yemen German Hospital and the Saudi German Hospital be used as referral hospitals by UNMHA;
 - (f) A temporary mortuary facility should be established in the UNMHA compound.
283. On the basis of these recommendations, the Mission proposed the establishment of an in-house medical capacity consisting of three positions. It has also terminated its aeromedical evacuation services contract in Djibouti. It has also been in liaison with the medical team of the United Nations country team on ways to support the country team's clinic in Hudaydah to extend coverage to UNMHA personnel. In addition, UNMHA started a procurement process to support mortuary facilities in Hudaydah in accordance with the recommendation from the review.
284. The Mission's approved 2023 staffing table includes two general temporary assistance positions. It is proposed that these positions be continued in 2024:
- (a) A Programme Management Officer (P-4) in the Office of the Deputy Head of Mission and Coordination in Hudaydah would be required to continue to provide demining expertise in Hudaydah city, the ports and the wider Governorate, and to lead the mine action programme embedded in the Mission;
 - (b) A Finance and Budget Officer (P-3) in the Field Operations Finance Division of the Department of Management Strategy, Policy and Compliance in New York would perform backstopping support and continues to be essential in ensuring sufficient capacity at Headquarters for the management of financial resources, the preparation of budgets and the provision of services to the legislative bodies during their review of the proposed budgets for special political missions.
285. The decrease in requirements for 2024 compared with the appropriation for 2023 is attributable mainly to: (a) reduced requirements for medical services provided by the contracted surgical and aeromedical evacuation teams; (b) lower requirements for United Nations monitors owing to the application of a higher vacancy rate of 88.0 per cent compared with the rate of 25.0 per cent applied in 2023; and (c) reduced requirements under other supplies, services and equipment owing to a lower provision for Redeployment Coordination Committee and bilateral meetings. The reduced requirements are offset in part by: (a) the proposed establishment of three new positions (1 P-3, 1 National Professional Officer and 1 Field Service); (b) higher requirements for international staff owing to the higher salary rates used in estimates based on actual average salary scales of existing staff, and an increase in the common staff costs for positions in Yemen based on the actual expenditure patterns in 2022; (c) increased requirements for the rental and operation of one rotary-wing aircraft based on higher fleet costs and costs per flight hour; (d) increased requirements for quick-impact projects to engage communities on both sides of the conflict; and (e) operational and security services for one additional land-based premises in Hudaydah city and one additional sub-office in southern districts of Hudaydah Governorate.

10. United Nations Integrated Office in Haiti

(*\$29,975,100*)

Foreword

Haiti continues to face immense challenges related to restoring democratic institutions and the rule of law and protecting human rights. A path for Haitians to engage in dialogue towards restoring democratic institutions in the country has been charted, with the adoption of Security Council resolution [2653 \(2022\)](#) and the signature on 21 December 2022 of the National Consensus for an Inclusive Transition and Transparent Elections. However, gang violence has been expanding at an alarming rate in areas previously considered relatively safe in Port-au-Prince and outside the capital, resulting in one of the worst human rights crises in decades.

The United Nations Integrated Office in Haiti continues to encourage Haitian political, civil society and economic actors to unite to address the country's political and security crises. Efforts are under way to tackle community violence, protect and promote human rights and continue building the Haitian National Police. However, more must be done to address the impunity of armed gangs and their backers, including by countering increasing armed gang violence and supporting the police.

Progress towards a nationally-led solution to the long-standing political impasse is urgently required to restore sustainable and durable security, as well as social and economic stability. Moreover, the rapidly deteriorating security situation demands that the country remain at the centre of international attention and action. In this context, the decisive support of the United Nations will remain crucial in advancing security, the rule of law, stability and peace in Haiti.

(Signed) María Isabel **Salvador**
Special Representative of the Secretary-General for Haiti
Head of the United Nations Integrated Office in Haiti

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

286. The United Nations Integrated Office in Haiti (BINUH) is responsible for advising the Government of Haiti in promoting and strengthening political stability and good governance, including the rule of law; advancing a peaceful and stable environment, including through supporting an inclusive inter-Haitian national dialogue; and protecting and promoting human rights. Its mandate derives from the priorities established in relevant Security Council resolutions and decisions, in particular Security Council resolution [2476 \(2019\)](#). By its resolution [2645 \(2022\)](#), the Council extended the mandate of the mission to 15 July 2023.
287. The signature of the National Consensus for an Inclusive Transition and Transparent Elections on 21 December 2022 by the Prime Minister and a broad range of stakeholders represents an important step towards the implementation of inclusive transitional arrangements to help to create the necessary conditions to restore democratic institutions. In 2023, the Government of Haiti is therefore focused on implementing and broadening consensus around the agreement, including through the establishment of a High Transitional Council and the preparation of multi-stakeholder discussions on security and on developing a more detailed road map for the transition, culminating in the preparation of a constitutional referendum and the holding of elections. In the light of these efforts, in 2024, the strategic priorities for BINUH, in full collaboration with United Nations agencies, funds and programmes, are to advise the national Government on political, good governance, police, rule of law and human rights matters; encourage dialogue and consensus among stakeholders on key constitutional, security and governance reform efforts; enhance the capacity of the Haitian National Police to ensure public safety; and strengthen the justice and corrections sectors to guarantee the rule of law and protect human rights.

Programme of work

Objective

288. The objective, to which the mission contributes, is to strengthen political stability and good governance, including accountability and the rule of law; advance a peaceful and stable environment; protect and promote human rights; and strengthen gender equality, in Haiti.

Strategy and external factors for 2024

289. To contribute to the objective, the mission will:
- (a) Facilitate dialogue and engagement among national stakeholders to further enlarge national consensus and to establish a road map towards elections;
 - (b) Provide strategic advice and technical assistance to the national police, judiciary and corrections systems and to the national human rights institutions in Haiti to promote international norms, human rights and gender parity;
 - (c) Contribute to the reduction of crime and community violence, in partnership with United Nations agencies, funds and programmes, in support of governmental institutions addressing the socioeconomic root causes of insecurity.

290. The above-mentioned work is expected to result in:
- (a) The enhanced capacity of State institutions to lead an effort to address causes of instability and inequality in Haiti;
 - (b) Effective, inclusive and accountable institutions that contribute to consolidating stability, combating impunity and enabling a protective environment;
 - (c) Enhanced support to State institutions with regard to the protection of women and youth, communities and livelihoods through a reduction in gang violence;
 - (d) Enhanced police performance in ensuring public safety through police reform as a result of the implementation of the 2022–2025 national police strategic development plan, supported by adequate government funding and a multi-donor basket fund.
291. With regard to cooperation with other entities, the mission collaborates with regional organizations, including the Organization of American States and the Caribbean Community. The mission also engages closely with the diplomatic community to support coordinated approaches to encouraging political consensus and tackling stalemates, when appropriate.
292. With regard to inter-agency coordination and liaison, BINUH works in an integrated manner with the United Nations country team in mandated areas. The mission and the country team have jointly finalized a United Nations Sustainable Development Cooperation Framework for the period 2023-2027, which lays out four strategic priorities encompassing five planned goals.
293. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Political polarization is likely to continue to undermine the parties' ability to achieve the consensus required to advance tangible initiatives to implement political, legal and economic reforms;
 - (b) The fragile security situation may continue to have a negative impact on both the pace and the sustainability of political, legal and economic reforms. Moreover, as most incidents in the country occur in the Port-au-Prince metropolitan area, the allocation of overstretched State resources is further distorted, exhausting the capacity of security institutions and diminishing the returns on capacity investments in the security infrastructure. These security incidents, however, do not critically affect the ability of the United Nations to carry out its tasks;
 - (c) The Government of Haiti is expected to remain committed to further developing the capacities of the Haitian National Police and its Directorate of Prison Administration, including through the ongoing provision of sufficient budget allocation, complemented by external contributions through a multi-donor basket fund managed by UNDP;
 - (d) The impact of natural hazards on Haiti, including hurricanes and earthquakes, is unpredictable and expected to remain in line with recent years;
 - (e) The international donor community and the national authorities agree on and properly resource key development priorities linked to structural development issues while implementing stronger coordination arrangements to advance the 2030 Agenda for Sustainable Development.
294. The mission integrates a gender perspective in its planning, operations, deliverables and results, and encourages the meaningful participation of women in political processes, dialogues and negotiations, as well as their representation in decision-making positions in institutions, in line with the Constitution's mandated minimum 30 per cent quota for women's participation at all levels. The mission's reporting will include disaggregated data on the impact of human rights violations and abuses on women, as well as on accountability and justice for crimes of violence against women and girls, in coordination with UN-Women. In addition, the mission will work with civil society actors focusing on gender and human rights in the context of the implementation of recommendations issued by the Committee on the Elimination of Discrimination against Women in 2016 and the second universal periodic review cycle for Haiti in 2016 on the human rights situation.

Evaluation activities

295. BINUH is undertaking an evaluation of the mission's response to civil unrest between September and November 2022 to strengthen the mission's approach to responding to and addressing potential future crises.
296. An evaluation of the implementation of support to political and electoral processes contributing to the re-establishment of democratic governance is planned for 2024, assuming the Government of Haiti holds elections by the end of 2023, as proposed.

Impact of the pandemic and lessons learned

297. The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular by forcing the reconfiguration of seminars, workshops and training events to allow for their delivery online, and necessitating the provision of strategic and advisory support through online means.
298. The mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including the incorporation of hybrid and virtual meeting modalities to strengthen existing approaches and activities.

Programme performance in 2022

National police authorities improved police performance and enhanced security in Haiti

299. The year 2022 saw an increase in crimes in Haiti, including homicide, kidnapping and rape, as well as recurring inter-gang turf wars that killed and displaced many civilians, as gang-related violence remained the major threat to public security in Haiti. Despite the very challenging operational environment, the mission continued to support police efforts to dismantle criminal networks and gangs, particularly through the provision of strategic advice through co-location with the police, including the General Inspectorate of the Haitian National Police and the Directorate of Prison Administration, to assist in strengthening their operational and anti-gang capacity while supporting senior police leadership to respond to security challenges, including using anti-kidnapping and police intelligence approaches. BINUH and other partners further supported the police to develop a new, more actionable three-year strategic development plan for 2022–2025 that focuses on strengthening the institutional and operational capacities, promoting the rule of law and improving security governance in Haiti. In addition, momentum to address the security situation in Haiti continued to build through joint efforts by the international community in the fourth quarter of 2022 to support the professionalization of the national police. Advocacy, supported by BINUH, for a UNDP-managed, multi-donor basket fund has so far resulted in pledges of \$17.75 million out of the \$28 million requested for the two-year joint programme. The basket fund's technical working group, consisting of members of the Haitian National Police, the United Nations and funding partners, held its first meeting on 30 November 2022.
300. Progress towards the objective is presented in the performance measure below (see table 53).

Table 53
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Low satisfaction among the population with public services offered by national institutions	Disruptions in governance owing to a political crisis and a lack of responsive, inclusive, participatory and representative decision-making	The basket fund received strong support from donors, and reforms were devised and implemented to strengthen police performance

Planned results for 2024

Result 1: effective, inclusive and accountable institutions contribute to consolidating stability and enabling a protective environment

Programme performance in 2022 and target for 2024

301. The mission's work contributed to efforts by the Government to strengthen institutions and support reforms to contribute to the re-establishment of democratic institutions and effective governance in Haiti. Among the main initiatives were efforts to strengthen the national justice system, including through the revitalization of the Court of Cassation, the continuation of efforts to release detainees from pretrial detention, the establishment of the basket fund for support to the professionalization of the Haitian National Police, and activities to bolster the capacity of the police to address insecurity, which met the planned target of key reforms to Haitian judicial, police, corrections and anti-corruption institutions having been adopted, laying the foundation for enhanced effectiveness, accountability and transparency.
302. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 54).

Table 54
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Improved satisfaction among the population through the alignment of the Penal Code and Criminal Procedural Code with international criminal justice and human rights norms and standards and the adoption by presidential decree; the appointment of female leaders for the Bar Association of Port-au-Prince and the Ministry of Human Rights and Fight against Extreme Poverty	The implementation of key reforms to Haitian judicial, police and corrections institutions began, laying the foundation for enhanced effectiveness, accountability and increasing accessibility for the population A new Government assumed office and training on the national strategy to reduce pretrial detention levels resumed	Key reforms to Haitian judicial, police, corrections and anti-corruption institutions continued The implementation of the basket fund began, laying the foundation for enhanced effectiveness, accountability and transparency	Justice institutions begin to take ownership of key reforms to implement anti-corruption measures, increasing accountability and access to justice, while sustainably reducing the pretrial detention rate The national human rights action plan is endorsed by the Council of Ministers The Haitian National Police strategic plan for 2022–2025 provides effective technical support The basket fund receives strong support from donors, and reforms strengthen police performance	Continued efforts to implement the Haitian National Police strategic development plan for 2022–2025 contribute to enhanced effectiveness and accountability in the police force The implementation of the basket fund contributes to strengthened performance in areas including: (a) police administration and command and control; (b) technical and specialized management and criminal investigation skills; (c) accountability and police oversight, including the General Inspectorate; and (d) strategic planning Judicial institutions perform their duties in accordance with the national legal framework

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
				Justice reforms are implemented amid ongoing efforts to reduce the pretrial detention rate

Result 2: engagement and consensus-building among key stakeholders and State institutions help address the country's institutional vacuum and causes of instability

Programme performance in 2022 and target for 2024

303. The mission's work contributed to the establishment of an environment conducive to consensus-building, which resulted in the signing of a new consensus agreement on 21 December 2022, but which did not meet the planned target of preparing national presidential and legislative elections, establishing a credible national Provisional Electoral Council and organizing a constitutional referendum, owing to deteriorating political divisions and increasing gang violence in Haiti, resulting in government efforts to renew and broaden consensus on the way forward.

Lessons learned and planned change

304. The lesson for the mission was that, in order to address institutional dysfunction in Haiti, a holistic yet flexible approach to building consensus on a political way forward is required to ensure that causes of instability can be addressed. In applying the lesson, the mission will ensure that its good offices and political engagement efforts focus on building consensus about the future direction for Haiti, which will set the country on a path towards peace and sustainable development. Expected progress towards the objective is presented in the performance measure below (see table 55).

Table 55

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
The mandates of all Lower Chamber Parliamentarians and two thirds of the Senate ended The President, acting by decree, prepared for a constitutional referendum and presidential and legislative elections to return the country to a normal status	The assassination of the President, as well as the death of the President of the Cour de cassation, left all three branches of power in the country dysfunctional Haitian stakeholders worked together to agree on a way forward Prime Minister Ariel Henry assumed office with a pledge to organize elections as soon as possible	Significant civil unrest and increased gang violence led to heightened international concern about the situation in Haiti, a recommendation by the Secretary-General for the deployment of a non-United Nations rapid action force in response to a request from the Government of Haiti for assistance through an armed international specialized force, and the imposition of sanctions, contributing to the signing of a consensus agreement on 21 December as a road map to elections in 2023	Following the proposed holding of a constitutional referendum by the Government in 2023, elections take place	Following the proposed holding of a constitutional referendum by the Government in 2023, and under the assumption that general elections take place as foreseen, elected institutions begin functioning, including the executive branch and the Parliament

Deliverables

305. Table 56 lists all deliverables of the mission.

Table 56

Deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies

1. Reports of the Secretary-General to the Security Council	3	3	4	4
Substantive services for meetings (number of three-hour meetings)	3	7	4	4
2. Meetings of the Security Council	3	7	4	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	55	87	40	150
3. Seminars, workshops and training events on four main areas of work: (a) implementation of and resource mobilization for the strategic plan to further develop and equip the Haitian National Police, sustain police service capable of maintaining public security, reduce gang violence, enhance police oversight and protect human rights; (b) implementation by national authorities and the United Nations country team of programmes on disarmament, demobilization and reintegration, community violence reduction and weapons and ammunition management; (c) management and oversight of prisons and detention centres according to international standards; and (d) promotion of human rights and participation of women as decision-makers in State institutions, political parties and initiatives of dialogue and consensus-building	55	87	40	150
Field and technical cooperation projects (number of projects)	–	–	9	9
4. Projects in support of operationalizing the Haitian National Police basket fund, including on strategic planning, vetting, intelligence-led operations, anti-gang activities, efforts against illicit financial flows and support for the development of the national police legal framework	–	–	6	6
5. Projects to support strengthened air, land and sea border controls, including the Container Control Programme, the Airport Communication Programme and the Global Maritime Crime Programme	–	–	3	3
Publications (number of publications)	2	3	2	2
6. Joint thematic public human rights reports	2	3	2	2
Technical materials (number of materials)	11	9	11	10
7. Materials conveying advisory support to national interlocutors	11	9	11	10
Fact-finding, monitoring and investigation missions (number of missions)	–	19	45	50
8. Fact-finding, monitoring and investigation missions to assess prison facilities, the condition of detainees and administration and security arrangements; to conduct police inspections to assess the status of police stations and police services in each department, as well as the internal administration and quality of police services; to conduct an assessment of police stations and police services to assess the implementation of the basket fund in support of the Haitian National Police; to assess human rights and allegations of violations; to assess implementation of the human rights due diligence policy; and to carry out joint monitoring missions to assess gang violence in seven gang-controlled neighbourhoods of Port-au-Prince and other communities across Haiti	–	19	45	50
C. Substantive deliverables				
Good offices: good offices of the Special Representative of the Secretary-General to: (a) foster cooperation and dialogue among the main political and social actors, build consensus and strengthen political stability and good governance; (b) support the efforts of national authorities and international partners to facilitate local peace initiatives, reduce gang and community violence and advance a peaceful and stable environment, including by further developing and equipping the Haitian National Police through a multi-donor basket fund; and (c) raise awareness about human rights abuses and violations, sexual and gender-based violence and gender discrimination, and strengthen institutional accountability to address these problems and end impunity for perpetrators.				

Category and subcategory	2022	2022	2023	2024
	planned	actual	planned	planned

Consultation, advice and advocacy: efforts focus on: developing initiatives that promote dialogue and consensus-building; advising on the development of effective, accountable and transparent institutions and advancing political, legal and economic reforms; developing the institutional framework and the electoral calendar; providing the Haitian National Police and the Directorate of Prison Administration with expert advice to strengthen the capacity and oversight of the police and corrections service; advising State institutions and agencies on the implementation of action plans to promote and protect human rights and gender equality; and advising on the development of a regulatory arms control framework, including the effective implementation of a holistic weapons and ammunition inter-institutional mechanism.

D. Communication deliverables

Outreach programmes, special events and information materials: field outreach and advocacy materials (brochures, flyers, flipcharts, infographics, banners) explaining thematic objectives in the mission's mandate; outreach events on key priorities of the mission in close collaboration with the United Nations Communications Group; traditional and digital media campaigns, inclusive of print, radio and social platforms, to support United Nations electoral, disarmament, demobilization and reintegration/community violence reduction, police, corrections, justice and human rights initiatives and joint programmes.

External and media relations: strategic plan to ensure coverage of key activities of the mission, inclusive of press conferences, editorials on key issues, press briefings, press releases, targeted interviews and publications with target audiences and networks in close coordination with the United Nations Communications Group; daily media and social platform monitoring providing strategic analysis of media and social platform trends, risks and opportunities to provide guidance for crisis communication management.

Digital platforms and multimedia content: creation and management of website and social media; production and dissemination of content for multimedia products and campaigns (with a focus on digital radio) able to engage key actors on mission priorities and promoting transparency and accountability; campaigns and products for social media platforms showing the impact of the mission's work in close collaboration with the United Nations Communications Group, the United Nations country team and United Nations Headquarters.

B. Proposed post and non-post resource requirements for 2024

Resource requirements (regular budget)

Table 57

Financial resources

(Thousands of United States dollars)

Category of expenditure	2022		2023	2024	Variance
	Appropriation	Expenditure	Appropriation	Requirements	2024 vs. 2023 Increase/(decrease)
	(1)	(2)	(3)	(4)	(5)=(4)-(3)
Military and police personnel costs	826.4	609.0	1 226.1	1 056.9	(169.2)
Civilian personnel costs	16 254.3	16 474.8	19 278.1	22 403.4	3 125.3
Operational costs	4 760.6	5 933.5	7 397.9	6 514.8	(883.1)
Total (net of staff assessment)	21 841.3	23 017.3	27 902.1	29 975.1	2 073.0

Proposed 2024 ^b	–	1	1 ^c	5	10	23	14	2	35	2	93	21	37	58	4	–	4	155
Change	–	–	–	–	–	1	–	1	1	–	3	–	–	–	4	–	4	7

^a Other level, unless otherwise stated.

^b Includes one D-1, one P-5, one P-4 and two General Service positions approved as general temporary assistance positions.

^c Position is funded at 50 per cent and cost-shared with the Development Coordination Office.

306. The proposed resources for 2024 for BINUH amount to \$29,975,100 (net of staff assessment) and would provide for the deployment of 21 United Nations police officers (\$1,056,900); salaries, common staff costs and danger pay (\$22,403,400) for 93 international positions (1 Assistant Secretary-General, 1 D-2, 5 D-1, 10 P-5, 23 P-4, 14 P-3, 2 P-2, 35 Field Service and 2 General Service) and 58 national positions (21 National Professional Officer and 37 Local level), including the establishment of 7 new positions (1 P-4, 1 P-2, 1 Field Service and 4 international United Nations Volunteer), as well as 2 government-provided personnel; and operational costs (\$6,514,800), comprising costs for consultants and consulting services (\$224,900), official travel (\$248,300), facilities and infrastructure (\$3,257,200), ground transportation (\$639,900), communications and information technology (\$1,507,800), medical (\$252,000) and other supplies, services and equipment (\$384,700).
307. A vacancy rate of 15.9 per cent has been applied to the estimates for international positions based on the actual average vacancy rate in 2022. Vacancy rates of 14.7 per cent and 15.5 per cent have been applied to the estimates for National Professional Officer and Local level positions, respectively, based on the actual average vacancy rates in 2022. A vacancy rate of 15.4 per cent has been applied to the estimates for United Nations police based on the actual average vacancy rate in 2022. A vacancy rate of 50.0 per cent has been applied to the new positions proposed for establishment, including international civilian staff and United Nations Volunteers. The cost estimates for government-provided personnel for 2024 are based on the assumption of full deployment on the basis of the actual incumbency in March 2023.
308. The Mission conducted a civilian staffing review to enhance its mission support structure and respond to changing contexts on the ground. The proposed establishment of new positions and reporting lines is designed to address the structural gaps and needs of the mission support component and to position it for the more effective delivery of its mandate. To this end, the following is proposed:

Office of the Chief of Mission Support

- (a) Establishment of one position of Programme Management Officer (P-4) to enhance the coordination of the work of the mission support units, serving as an interlocutor between mission support and the Office of the Chief of Staff within the Office of the Special Representative of the Secretary-General and substantive sections. The incumbent would be responsible for developing standard operating procedures and circulars; ensuring compliance with policies and procedures; the delegation of authority and monitoring and implementing the recommendations of auditors and boards of inquiry;

Procurement Unit

- (b) Realignment of the Procurement Unit from the Supply Chain Management and Service Delivery Section to the Operations and Resource Management Section to ensure the adequate segregation of responsibilities and better balance of the workload between the two pillars;
- (c) Establishment of one position of Associate Procurement Officer (P-2) to be responsible for the acquisition and delivery of goods and services, achieving cost efficiency and compliance with United Nations procurement policies and practices. The incumbent will ensure adherence with the mandatory segregation of functions by reviewing and performing roles in Umoja, allowing the focus of the Chief Procurement Officer to be on more strategic activities;

Human Resources Unit

- (d) Establishment of one position of Human Resources Officer (international United Nations Volunteer) to be responsible for the administration of staff benefits and entitlements and the onboarding of national and international staff members. The incumbent would support the Unit with recruitment and placement, including by participating in the selection of candidates for clerical and related categories of positions. The incumbent would also be responsible for managing and coordinating travel requests and training activities;

Finance and Budget Unit

- (e) Establishment of one position of Finance and Budget Officer (international United Nations Volunteer) to provide support to the Finance and Budget Unit to carry out the effective stewardship of resources, including the monitoring of budgetary resources and financial performance;

Supply Chain Management and Service Delivery Section

- (f) Establishment of one position of Property Management Assistant (Field Service) to head the Property Management and Centralized Warehousing Unit, with functions such as: receiving and inspecting goods received; conducting periodic inventory verification of United Nations non-expendable property; and maintaining accurate records in Umoja for transparency and accountability.

Engineering Unit

- (g) Establishment of one position of Engineering Officer (international United Nations Volunteer). The incumbent would be responsible for ensuring that the mission maintains appropriately serviced and sufficient office accommodation, reliable electrical power supply, adequate air conditioning, uninterrupted water provisioning and a sustainable waste management programme. The incumbent would ensure the appropriate segregation of duties in the Unit when processing transactions in the real estate module in Umoja;

Acquisition and Contracts Management Unit

- (h) Establishment of one position of Requisitions Officer (international United Nations Volunteer). The incumbent would be responsible for preparing requisitions for diverse services and commodities in accordance with the mission's acquisition plan. The incumbent would contribute to the development of the source selection plan and maintain relevant internal databases and overviews to keep track of outstanding requisitions.

309. The mission's approved 2023 staffing table includes five general temporary assistance positions. It is proposed that the positions be continued in 2024:

- (a) One Principal Human Rights Officer (D-1) in the Human Rights Service of the mission to respond to and address the human rights requirements set by the Security Council as reflected in the BINUH mandate, adopted in resolution [2476 \(2019\)](#). Such a dedicated position, with specific human rights expertise, is important to facilitate trusted engagement at a high level

with senior Haitian authorities, allowing for the provision of technical assistance and advice to the country's national human rights institutions;

- (b) Three backstopping positions in the Haiti team of the Americas Division of the Department of Political and Peacebuilding Affairs, comprising one Senior Political Affairs Officer (P-5), one Political Affairs Officer (P-4) and one Team Assistant (General Service), who have been providing backstopping support to BINUH since 2019 and will remain critical to ensuring ongoing support and strategic advice and analysis to principals at Headquarters for decision-making with regard to BINUH. The core functions they undertake are not required on a temporary basis but needed throughout the lifespan of the mission, including its start-up, the duration of the implementation of its mandate, and its closing;
 - (c) One Finance and Budget Assistant (General Service) backstopping position in the Department of Management Strategy, Policy and Compliance, where the need remains high for the Field Operations Finance Division to continue delivering high-intensity and high-quality support to legislative bodies in their review of the budgets of special political missions. The continuation of this position will also ensure sufficient capacities for budget preparation, budget administration and performance monitoring of all 39 special political missions.
310. The increase in requirements for 2024 compared with the appropriation for 2023 is attributable mainly to increased requirements under civilian staff costs, as follows: (a) the provision of danger pay which was approved in October 2022 and not provided for in the 2023 budget; (b) the reduction of the rest and recuperation cycle from 8 to 6 weeks, resulting in additional payments; (c) increased international staff salaries and common staff costs; and (d) the establishment of seven positions, including three international staff and four international United Nations Volunteers. The increase is offset in part by the application of a higher vacancy rate of 15.4 per cent to United Nations police personnel costs compared with the assumption of full deployment in 2023; decreased requirements under communications and information technology owing to the acquisition of adequate stock in the previous period; and reduced requirements for outsourced expertise and temporary duty assignments owing to the establishment of positions to perform the required functions.

11. United Nations Integrated Transition Assistance Mission in the Sudan

(\$64,897,500)

Foreword

In 2022, the consequences of the 2021 coup continued to plunge the Sudan into further uncertainty and a multidimensional political, economic and security crisis. Development assistance remained suspended. Security incidents affecting civilians increased across the country and humanitarian needs significantly expanded. Protests against the coup and the socioeconomic situation continued.

On 5 December 2022, the military leadership and a broad range of civilian actors signed a political framework agreement laying the groundwork for a final political accord and the formation of a new civilian-led government, opening the way for the resumption of a transitional period towards democratic governance. In this context, the integrated United Nations presence in the Sudan anticipated to continue working closely with the international community to support the priorities of a new transitional period, in order to provide solid grounding for a new government.

However, on 15 April 2023, large-scale fighting erupted between the Sudanese Armed Forces and the Rapid Support Forces, engulfing the country in conflict with a humanitarian catastrophe in the making. The United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS) remains in the Sudan and has temporarily reconfigured its presence. Its immediate objectives are: (a) achieving a stable ceasefire between the Sudanese Armed Forces and the Rapid Support Forces with a monitoring mechanism; (b) preventing the escalation of the conflict; (c) protection of civilians and provision of humanitarian relief; and (d) preparing, for when the time is ripe, a fresh political process with the participation of a broad array of civil and political actors, including women. UNITAMS is coordinating its efforts with the African Union and the Intergovernmental Authority on Development.

The priorities for UNITAMS in 2024 will necessarily depend on the further evolution of the situation. If the immediate objectives outlined above are met, UNITAMS will renew its efforts to support an inclusive political transition, while strengthening the protection of civilians, support to the Sudan Police Force and the rule of law, and advocacy for resources and support to the humanitarian response. The Mission will continue to support the comprehensive implementation of the Juba Agreement for Peace in the Sudan through its chairing of the Darfur Permanent Ceasefire Committee as well as efforts to bring non-signatory armed movements into the peace process and by coordinating peacebuilding initiatives at the subnational level.

UNITAMS remains committed to supporting a Sudanese-owned and Sudanese-led political transition that offers a path to realizing the aspirations of youth, women and men.

(Signed) Volker **Perthes**
Special Representative of the Secretary-General for the Sudan
Head of the United Nations Integrated Transition Assistance Mission in the Sudan

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

311. The mandate of the United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS) is contained in Security Council resolutions [2524 \(2020\)](#), [2579 \(2021\)](#) and [2636 \(2022\)](#). The mandate defined in paragraph 3 of Security Council resolution [2579 \(2021\)](#) set out the four strategic objectives of the Mission: (a) to assist in the political transition, progress towards democratic governance, the protection and promotion of human rights, and sustainable peace; (b) to support peace processes and the implementation of the Juba Peace Agreement and future peace agreements; (c) to assist peacebuilding, civilian protection and the rule of law, in particular in Darfur and the Two Areas (Blue Nile and South Kordofan); and (d) to support the mobilization of economic and development assistance and the coordination of humanitarian and peacebuilding assistance. The Council further decided that the Mission should prioritize support to six areas, namely: (a) ceasefire monitoring in Darfur; (b) the implementation of the Government's national plan for the protection of civilians (see [S/2020/429](#)); (c) ongoing and future peace negotiations between the Government of the Sudan and Sudanese armed groups; (d) the inclusive implementation of the power-sharing agreements of the Juba Peace Agreement; (e) the constitutional drafting process; and (f) the Sudan Police Force and the justice sector. The mandate also recognized the need for scalable support for the implementation of any future peace agreements if so requested by the parties to the negotiations.
312. The political impasse caused by the 2021 coup continued to have an impact on progress towards the transition and mandate implementation. Significant gaps in the leadership of key government institutions and counterparts were felt throughout 2022. In addition, as the political crisis continued, tensions escalated into violence in areas that had previously experienced calm. The resurgence of large-scale violence demonstrated the increasing fragility at the state level, exacerbated by the continued governance vacuum. Local authorities lacked capacity and resources to protect civilians, while root causes and fundamental grievances remained unaddressed. Furthermore, in the absence of a civilian-led government, there was no progress in the resumption of peace talks with armed movements that were not signatories to the Juba Peace Agreement. Across the Sudan, over 260,000 people were displaced owing to conflict and 349,000 were affected by floods in 2022. Since April 2023, and as at the time of reporting, the Sudan is once again being ravaged by the eruption of conflict between the Sudanese Armed Forces and the Rapid Support Forces, which has forced the United Nations in the Sudan to temporarily reconfigure its presence while staying in the country and delivering support to the Sudanese people, focused on securing humanitarian pauses or ceasefires, de-escalation and a return to political negotiations. Humanitarian partners estimate that 15.8 million people, about a third of the population, are already in need of humanitarian assistance in 2023, the largest number in a decade.
313. As part of the trilateral mechanism with the African Union and the Intergovernmental Authority on Development, UNITAMS had achieved progress in facilitating and supporting Sudanese-led dialogue to reach agreement to resume a civilian-led political transition. In the aftermath of the eruption of conflict between the Sudanese Armed Forces and the Rapid Support Forces in April 2023, UNITAMS, in coordination with its regional partners, is currently prioritizing: (a) achieving a stable ceasefire with a monitoring mechanism; (b) preventing the escalation or ethnicization of the conflict; (c) protection of civilians and provision of humanitarian relief; and (d) preparing, for when the time is ripe, a fresh political process with the participation of a broad array of civil and political actors, including women. Depending on the further evolution of the situation, and once a stable ceasefire is achieved, UNITAMS hopes to be able to continue its work, when possible, on the following: (a) as part of the trilateral mechanism, intensive good offices, including by facilitating dialogue at the request of Sudanese parties to broaden political participation; (b) in collaboration with partners, preparations to support the transitional process once a civilian-led government is

established; (c) human rights and the protection of civilians, including through intensified advocacy efforts in the context of continued reporting on human rights violations, and support to the Sudan Police Force and rule of law institutions in collaboration with the United Nations country team; and (d) support for the implementation of the Juba Peace Agreement, in particular by supporting the Darfur Permanent Ceasefire Committee and other critical mechanisms, securing peace agreements with non-signatory armed movements once a civilian-led government is restored and collaborating with partners to promote peace implementation and peacebuilding based on detailed assessments of local conditions.

Programme of work

Objective

314. The overall objective, to which the Mission contributes, is to support a political transition towards inclusive democratic governance in the Sudan, taking into account the consequences of the eruption of violence in April 2023, in a manner that fosters sustainable peace and development and ensures that civilians are protected, human rights are respected and the rule of law is upheld.

Strategy and external factors for 2024

315. To contribute to the objective, and depending on the further evolution of the situation, the Mission will:
- (a) Provide good offices and technical assistance in support of peace and the political transition in the Sudan, including by facilitating talks and providing assistance towards critical milestones in the transition, such as the constitution-making process and the holding of elections;
 - (b) Facilitate meaningful participation in the political transition and the implementation of peace agreements by a wide and diverse range of Sudanese stakeholders, including civil society, women, youth, refugees, internally displaced persons and members of marginalized groups;
 - (c) Facilitate talks to secure peace agreements with non-signatory parties;
 - (d) Support Sudanese institutions in their efforts to deliver justice and accountability and coordinate the civilian protection and peacebuilding activities of the United Nations, including local-level conflict prevention, mitigation and reconciliation, and community violence reduction, in particular for women, children and vulnerable groups. The Mission will, in particular, continue its support for the full implementation of the national plan for the protection of civilians by the Sudanese authorities, including through support for the Sudan Police Force and rule of law institutions in collaboration with the United Nations country team;
 - (e) Fulfil its obligations as Chair of the Darfur Permanent Ceasefire Committee and support its various structures under the security arrangements of the Juba Peace Agreement;
 - (f) Support international resource mobilization, national socioeconomic reforms and the establishment of a national architecture for development planning and aid effectiveness.
316. The above-mentioned work is expected to result in:
- (a) Inclusive, comprehensive and sustainable peace agreements and a Sudanese-owned and -led path to a democratic and inclusive political transition;
 - (b) Strengthened and accountable human rights and rule of law institutions;
 - (c) An enhanced protective environment and reinforced peaceful coexistence and reconciliation between communities;

- (d) Coherent support by the United Nations and the international community to address socioeconomic challenges.
317. The 2021 coup complicated an already complex political situation in the Sudan, with deepening distrust among the stakeholders, mounting frustrations and grievances, particularly at the subnational level, along with worsening security, economic and social conditions. It also resulted in an operating environment where the Mission was prevented from fully implementing its mandate and had to adapt to respond to changed circumstances. The eruption of renewed conflict in April 2023, with the fighting between the Sudanese Armed Forces and the Rapid Support Forces, dramatically affected the security situation and the operating environment of UNITAMS. It forced the Mission to temporarily reconfigure its presence and reprioritize its immediate actions, focusing on establishing and sustaining a ceasefire, responding to humanitarian needs and fostering a path for the return to political negotiations.
318. In this context, the needs for good offices and political facilitation by UNITAMS will remain high in support of Sudanese efforts to implement existing and future peace or ceasefire agreements and the political transition. Support needs are expected to increase in 2024, as they have done for the past few years, and the recent resurgence of violence has further eroded Sudanese capacities and increased overall fragility throughout the country. Since the Mission was originally designed under significantly different circumstances prior to the 2021 coup, its capacities will be insufficient to meet the new requirements and expectations given the dramatic change in the operating environment.
319. To respond to these increased needs, UNITAMS will realign its structure to establish a political pillar led by an additional Deputy Special Representative, consolidating capacities related to political affairs, constitutional support, electoral assistance, the rule of law, the Darfur Permanent Ceasefire Committee mission component, and the regional offices. Additional senior-level oversight will be dedicated to the complex political engagements required at this critical juncture at the national and subnational levels. UNITAMS will reinforce strategic direction and management in effectively delivering technical advice and assistance in the implementation of the transitional tasks and reforms, as well as in the implementation of the Juba Peace Agreement. It will also enable coordinated efforts to engage with parties outside of existing political and peace agreements to build confidence and encourage them to join the peace process and support the implementation of transition agreements.
320. The continued political partnership of the trilateral mechanism will remain critical. The Mission will also continue to closely coordinate with other partners, including Member States and international financial institutions, to maximize collective impact and avoid a duplication of efforts, on the basis of comparative advantages and a clear division of labour.
321. With regard to inter-agency coordination and liaison, the Mission and the United Nations country team will continue to work as an integrated United Nations presence in the Sudan with joint planning, programming and delivery in support of its mandate. With a view to responding to the changing operational environment and to supporting a new transition process, a new interim cooperation framework was being developed. This was expected to serve as the integrated strategic framework between UNITAMS and the United Nations country team and articulate the integrated support of the United Nations, covering programme areas of both UNITAMS and the United Nations country team. However, owing to the eruption of conflict in April 2023, the draft interim cooperation framework was put on hold and the existing United Nations Development Assistance Framework was extended until 31 December 2024. Despite this setback, UNITAMS will have a critical role to play in rejuvenating donor coordination mechanisms and mobilizing international assistance to catalyse support to the Sudanese population and the aimed resumption of the political transition and a civilian-led government. The Mission will explore partnerships with international financial institutions to ensure a coherent approach to multidimensional risks and conflict and fragility. UNITAMS will work closely with the United Nations country team to support the implementation of human rights, accountability and rule of law provisions of the transition and peace agreements, in particular those provisions that guarantee justice and women's rights. The Mission will also ensure

continued effective inter-mission cooperation on regional issues with relevant United Nations missions and envoys with a focus on regional prevention.

322. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) A sustained ceasefire between the Sudanese Armed Forces and the Rapid Support Forces, with a monitoring mechanism, will be achieved;
 - (b) Following resumed political talks, Sudanese stakeholders agree on a path to political transition, enabling the formation of a credible civilian-led transitional government and other key transitional institutions and the resumption of peace talks with non-signatory parties, and a growing focus on constitutional reforms and preparation for elections;
 - (c) While the Juba Peace Agreement remains not fully comprehensive, its implementation progresses in a sustained manner, with the commitment of the signatories, resulting in tangible benefits for the population;
 - (d) The security situation in parts of the country remains volatile and unpredictable, with the potential for a major escalation of violence should the renewed political transition stall;
 - (e) The economic situation remains dire, with the risk of threatening the political transition; however, international financial technical assistance and financial support slowly resumes on the basis of the resumption of a credible transition;
 - (f) Trust of the population in institutions, in particular those responsible for civilian protection, justice and rule of law, is low; however, the Sudan begins to implement the national plan for the protection of civilians and other reforms, creating opportunities for progress with international support;
 - (g) UNITAMS continues to serve as Chair of the Darfur Permanent Ceasefire Committee, with a role focused mainly on facilitation and advisory functions to the parties;
 - (h) The Sudanese authorities remain supportive of the Mission's mandate and presence in the country, including with regard to honouring the status-of-mission agreement;
 - (i) International partners remain committed to supporting the Sudanese transition and implementation of the Juba Peace Agreement, including by making available assistance for priority peacebuilding and development initiatives.
323. The Mission integrates a gender perspective in its activities, deliverables and results, with a view to supporting the full and effective participation, representation and protection of women in the implementation of peace and political processes and all social and economic aspects of life. This will include support to address and overcome all forms of disparities and discrimination and promoting an inclusive and gender equitable transition by keeping the women and peace and security agenda, as well as youth engagement, at the centre of its efforts, in accordance with relevant Security Council resolutions on women and peace and security and on youth and peace and security. This is reflected in the participation of diverse groups of women from across the Sudan in political negotiations, constitution-drafting, capacity-building and securing a seat in decision-making bodies in the political transition.

Evaluation activities

324. No formal evaluations were completed in 2022. Nonetheless, UNITAMS continues to review internal mechanisms for improved programmatic planning, implementation and monitoring and evaluation to build capacities to better measure progress on impact, efficiency, coherence and sustainability across mission activities. In addition, UNITAMS continues to make use of its best practices and lessons learned along with the United Nations country team, serving as a Co-Chair of the integrated monitoring, evaluation and learning working group.

325. In 2024, when possible, UNITAMS will seek to strengthen the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives that examine the state and utilization of resources and the efficient achievement of results.

Impact of the pandemic and lessons learned

326. COVID-19 was an additional challenge to an already precarious environment in the Sudan marked by socioeconomic and political instability. Delays related to COVID-19 and the October coup in 2021, coupled with interruptions in the issuance of visas in 2022, had a negative impact on mandate implementation, slowing the deployment of staff, especially in new field locations, which further caused delays in programmatic planning and delivery. The impact of the pandemic on mission activities was seen in the postponement or cancellation of in-person meetings, workshops, conferences and engagement both at the national and subnational levels where digital access to stakeholders was limited across different areas in the Sudan.
327. UNITAMS set in place all necessary COVID-19 protocols and recommendations for staff and partners and employed many of the modified ways of working to deliver on its mandate, including online training and onboarding and exceptional telecommuting arrangements while also limiting travel for workshops and conferences. Successful modalities have been mainstreamed into the Mission's plans for 2024. In a fragile political context, often with limited Internet access in field locations, the Mission was confronted with the need to pragmatically balance the risks with the need to deliver.

Programme performance in 2022

Facilitation of women's participation in peace processes

328. UNITAMS engaged with Sudanese women's groups from across the political spectrum to hear their views on the political process, the role of women and their inclusion in decision-making. In UNITAMS-facilitated consultations in early 2022, the Mission successfully secured 33 per cent participation of women. Following those consultations, UNITAMS further supported Sudanese women in the formation of a stand-alone women's rights delegation to participate on an equal footing with other negotiating delegations in the political process facilitated by the trilateral mechanism. This body, the Women's Rights Group, provided gender-specific recommendations and perspectives, and received capacity-building and technical support from UNITAMS on mediation and negotiation.
329. With UN-Women and UNDP, the Mission facilitated dialogues that led to a coalition of women from diverse political parties, armed movements and civil society coming together around a unified platform to advocate for women's participation in political and peace processes and for the mainstreaming of gender equality in constitution-making. These efforts directly ensured the inclusion of gender provisions in the political framework agreement of 5 December 2022. UNITAMS also supported the coalition's high-level advocacy with capacity-building and provided training sessions. In addition, UNITAMS supported further capacity-building for women from areas controlled by the Sudan People's Liberation Movement-North Abdelaziz al-Hilu faction, in particular with respect to the women and peace and security agenda, gender, mediation and ceasefires. Regular engagement with women from political parties, armed movements, civil society and academia continued throughout 2022.
330. Progress towards the objective is presented in the performance measure below (see table 59).

Table 59
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	Progress made in facilitating women's engagement in and influence on political processes	Meaningful participation of women advanced through 33 per cent representation of women in the political process; establishment of a stand-alone women's rights delegation (the Women's Rights Group) as an equal participant in the negotiations; and formation of a coalition of women from across political spectrum on gender mainstreaming, resulting in the inclusion of gender provisions in the political framework agreement

Planned results for 2024

Result 1: political transition and progress towards democratic governance and an inclusive and comprehensive peace in the Sudan

Programme performance in 2022 and target for 2024

331. UNITAMS launched an inclusive intra-Sudanese political process in early 2022. On the basis of its conclusion, the trilateral mechanism developed a framework for engagement for the next phase of the process. This culminated in the signing of the political framework agreement on 5 December 2022 between the military and civilian parties, which met the target of progress towards an inclusive political agreement. Through this process, the Mission, among other things, supported greater inclusion of political parties in the political framework agreement, promoted broad-based consultations throughout the Sudan, empowered women's groups to act as a formal party to the political talks, and brought the agenda of the east to the table at the national level, including through a high-level joint visit by the trilateral mechanism to Kassala. The trilateral mechanism also sought to ensure the inclusion of parties that were not signatories to the Juba Peace Agreement in the peace and political processes through outreach and engagements.
332. In 2024, subject to the securing of a sustained ceasefire with a return to political negotiations and the resumption of a transitional period towards democratic governance, UNITAMS will use its good offices to support a civilian-led political transition with a focus on key priorities identified by Sudanese stakeholders. The Mission will continue to deliver political, technical and advisory support, including to address increasing needs related to constitutional and electoral preparations, to advance critical issues, such as transitional justice and the implementation of the Juba Peace Agreement, and to facilitate peace talks with non-signatories.
333. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 60).

Table 60
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Progress towards political transition and towards a more comprehensive peace agreement with increased participation of women and youth was stalled following the October 2021 coup	Progress was made towards an inclusive political agreement to restore a civilian-led transition with increased participation of women and youth Progress towards securing peace with non-signatories and acceleration of necessary further negotiations was limited following the October 2021 coup	A sustained ceasefire between the Sudanese Armed Forces and the Rapid Support Forces is achieved, paving the way for a return to political negotiations Progress on constitutional arrangements and continued commitment of the parties to peace agreements alongside the conclusion of necessary further negotiations	Progress in the implementation of transition priorities, including on transitional justice, constitutional and electoral arrangements, and commitment of the non-signatory parties to peace agreements following the conclusion of necessary further negotiations

Result 2: increased mobilization of economic and development assistance and coordination of humanitarian and peacebuilding assistance

Programme performance in 2022 and target for 2024

334. The economic situation in the Sudan remained fragile following the coup of October 2021. Meanwhile, development support operations and programmes remained suspended, with profound implications on the country's social, economic, recovery and development situation. UNITAMS and the country team had strengthened internal coordination and developed a United Nations common approach for the period 2022–2023 to set common goals and priorities in this environment. They identified priorities spanning the humanitarian-development-peace nexus, comprising: (a) basic services, community stabilization and resilience; (b) protection of civilians, rule of law and human rights; and (c) democratic transition, peacebuilding and conflict prevention. The multi-partner trust fund promoted integrated support.
335. The target of mobilizing resources for critical peacebuilding in conflict-affected areas was not met. Given the continued suspension of international donor assistance, the Mission's efforts on resource mobilization were severely restrained. At the end of 2022, UNITAMS and the country team started a planning process that would allow for a scaling-up of coordination and resource mobilization should a new civilian-led government be formed.
336. The economic and humanitarian situation deteriorated dramatically with the eruption of the conflict between the Sudanese Armed Forces and the Rapid Support Forces in April 2023, further affecting the Mission's targets for 2023. In 2024, subject to a cessation of current hostilities and the return to a political process that would enable full re-engagement, the Mission will reinvigorate its efforts to support and coordinate economic development undertakings between the transitional Government and the international community, including efforts towards debt relief initiatives, economic assistance and increased foreign direct investment. It will also continue to coordinate humanitarian assistance in a context of increased needs.

337. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 61).

Table 61
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	Increased engagement with international financial institutions, resulting in debt relief and coordination of donor assistance, but progress reversed as a result of the October coup	Progress in mobilizing resources for critical peacebuilding in conflict-affected areas was mostly stalled owing to the suspension of the development assistance following the October 2021 coup	Subject to a cessation of current hostilities and the return to a political process, re-engagement to supporting and coordinating on economic development between the transitional Government and international partners, including in the form of debt relief and increased foreign economic assistance	Progress in coordinating economic development assistance through co-convened structures with international financial institutions and partners, and delivery of socioeconomic support package to hotspot areas

Result 3: improved protective environment and human rights supported by the implementation of the Juba Peace Agreement, including its security arrangements

Programme performance in 2022 and target for 2024

338. In 2022, UNITAMS supported the Government of the Sudan in accelerating the implementation of the National Plan for the Protection of Civilians, including through technical advice to the national mechanism on the National Plan. While progress was limited, UNITAMS and the United Nations country team provided technical assistance to the Joint Security-Keeping Force in line with the National Plan and the Juba Peace Agreement. In this regard, from November to December 2022, UNITAMS and the country team facilitated two workshops for the Joint Security-Keeping Force on compliance with international human rights and international humanitarian law principles. A total of 1,500 Joint Security-Keeping Force members benefited from these trainings with a focus on child protection. The workshops equipped the Joint Security-Keeping Force with essential knowledge and protection principles critical to its functions as detailed in the Juba Peace Agreement. In addition, in May 2022, UNITAMS and the country team implemented a training-of-trainers course for 56 Joint Security-Keeping Force officers to build a pool of competent military structures to ensure a sustainable corps of trainers for new recruits and to strengthen compliance with international human rights and international humanitarian law.
339. In 2024, provided that the operational environment allows (i.e. security conditions permitting, including through a sustained ceasefire), UNITAMS will continue to strengthen its work on human rights, civilian protection, women's protection, the rule of law and child protection. This entails strengthening monitoring and reporting of human rights violations and protection incidents in hotspot and conflict-affected areas. The Mission will integrate human rights in mandated tasks and support justice and legislative reforms, transitional justice, accountability and the rule of law. The implementation of the Juba Peace Agreement will remain a priority, and UNITAMS will provide scalable support to mechanisms outlined in the Juba Peace Agreement, with a focus on the National Peace Commission and the monitoring and evaluation mechanism, and to the implementation of

provisions concerning land ownership and usage. UNITAMS will also provide a platform to discuss peacebuilding issues and will chair and continue to strengthen the Darfur Permanent Ceasefire Committee through training to operationalize the Committee in all sectors. Mine action activities will also continue, focusing on creating a protective environment.

340. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 62).

Table 62
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	National capacity for civilian protection was enhanced and steps were taken to develop key reforms for the protection of human rights and the upholding of the rule of law, but progress stalled or was rolled back after the October coup	Progress in restoring national capacity for civilian protection and the implementation of key provisions of the Juba Peace Agreement stalled following the October 2021 coup	Subject to a cessation of current hostilities, national capacity for civilian protection is enhanced	Progress in reforms for protection of human rights, accountability and the rule of law The Juba Peace Agreement is in the process of implementation, including a permanent ceasefire and final security arrangement protocol for durable peace in Darfur

Deliverables

341. Table 63 lists all deliverables of the Mission.

Table 63
Deliverables for the period 2022–2024, by category and subcategory

Deliverables	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Reports of the Secretary-General to the Security Council	4	4	4	4
Substantive services for meetings (number of three-hour meetings)	4	4	4	4
2. Meetings of the Security Council	4	4	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	2
3. United Nations joint peacebuilding programme launched	2	2	2	2
Seminars, workshops and training events (number of days)	375	190	311	402
4. Workshops and civic consultations on subjects relating to peace negotiations and peace agreements, as well as the political transition, including constitution drafting and population census	61	90	60	90

<i>Deliverables</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
5. Meetings and workshops related to the implementation of the permanent ceasefire and security arrangements	43	9	60	60
6. Seminars and consultations on electoral matters	53	–	14	14
7. Workshops and consultations on disarmament, demobilization and reintegration	28	6	18	18
8. Workshops on community violence reduction	21	7	10	15
9. Workshops and training sessions on human rights and protection	49	16	28	30
10. Workshops on rule of law	23	18	24	25
11. Trainings, workshops and seminars for Sudan Police Force officers on civilian protection, community policing and sexual and gender-based violence and investigation	97	36	91	136
12. Training for the members of the Darfur Permanent Ceasefire Committee, Sectoral Committees and Field Teams to enhance their capabilities to perform their roles in accordance with the mandates of the Permanent Ceasefire Committee	–	8	6	14
Publications (number of materials)	16	27	10	16
13. Newsletters featuring news and human-interest stories on United Nations engagement, achievements and work throughout the Sudan	6	18	4	10
14. Promotional and educational materials, including posters and/or brochures, on thematic issues of sustainable peace and development	10	9	6	6
Technical materials (number of materials)	5	1	3	1
15. Manual on civilian protection for the Sudan Police Force and pocket booklets for commanders on the protection of civilians, based on competent laws	1	–	1	–
16. Manual on community-oriented policing for the Sudan Police Force	1	–	–	–
17. Manual on conflict-related sexual violence and sexual and gender-based violence for the Sudan Police Force	1	–	1	–
18. Material on peacebuilding financing in the Sudan	2	1	1	1
Fact-finding, monitoring and investigation missions (number of missions)	–	31	30	30
19. Human rights and protection of civilian monitoring and investigation missions	–	31	30	30

C. Substantive deliverables

Good offices: good offices to engage with all concerned parties to support the Sudanese transition, including facilitating political talks, peace negotiations and the implementation of peace agreements, as well as technical assistance to the country's political transition; provision of technical assistance for national efforts for an inclusive, participatory and transparent constitution drafting process that provides the basis for consensus-building and dialogue on social cohesion, good governance, protection of civilians, human rights and the rule of law; support for the efforts of national authorities to implement the human rights, equality, accountability and rule of law provisions of the Constitutional Declaration, including the strengthening of independent and representative rule of law institutions; support for the efforts of national and local authorities to provide and ensure security, justice and protection, including to raise awareness about human rights abuses and violations, sexual and gender-based violence and gender discrimination, to strengthen trust and national accountability and to address those abuses and violations and end impunity for the perpetrators.

Consultation, advice and advocacy: consultations, advice and advocacy on the political transition and peace processes with a broad range of Sudanese stakeholders from throughout the Sudan, including civil society, women, youth, refugees, persons with disabilities and internally displaced persons and members of marginalized groups; meetings and consultations with international, regional and subregional organizations, as well as with concerned Member States, on the political and security situation in the Sudan; advice on and advocacy for the establishment and formulation of institutions, legislative and policy frameworks required to implement the human rights, equality, gender mainstreaming, accountability and rule of law provisions of the Constitutional Declaration, including the strengthening of accountable and representative rule of law institutions in conflict-affected areas that foster a protective environment and advance the peace process, in strong partnership with civil society; advocacy for progress towards the effective re-establishment of the criminal justice chain throughout the Sudan; advocacy for resource mobilization, including for the multi-partner trust fund on peacebuilding; provision of technical support and advice to the Sudan National Mine Action Centre pertaining to mine action and compliance with the Anti-Personnel Mine Ban Convention; provision of advocacy and advice in support of development of local mine action initiatives in areas controlled by non-State armed groups.

<i>Deliverables</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: information materials (brochures, flyers, flipcharts, infographics, promotional material, frequently asked questions, messaging) explaining the Mission's mandate and developments; outreach events on key priorities of the Mission in close collaboration with partners and United Nations agencies, funds and programmes in the Mission area and awareness-raising events with national stakeholders; production of content for dissemination through national and local media; outreach activities targeted at hard-to-reach audiences through partners, using alternate means such as telecommunications, theatre and other traditional communication methods; training sessions to build capacity, improve relationships and support media relations and improved reporting on the work of the United Nations; public outreach, sensitization and interaction programmes with local people and stakeholders in five Darfur states about the activities of the Permanent Ceasefire Committee structures; outreach programmes with the Sudan Police Force on civilian protection, community policing and sexual and gender-based violence.

External and media relations: strategic plan to cover key activities of the Mission; press conferences, press briefings, press releases; targeted interviews and publications with media in close coordination with the United Nations Communications Group and with target audiences and networks; videos of Mission activities; weekly media monitoring and analysis of media trends, including misinformation and disinformation, risks and opportunities and crisis communications management.

Digital platforms and multimedia content: digital platforms (web and social media); content for various multimedia products and campaigns that promote transparency and accountability and engage key actors on the priorities of the Mission; campaigns and products for social media platforms to show the impact of the Mission's work in close collaboration with the United Nations Communications Group, the United Nations country team and United Nations Headquarters.

B. Proposed post and non-post resource requirements for 2024

Resource requirements (regular budget)

^a Other level, unless otherwise stated.

^b One Assistant Secretary-General position is funded at 50 per cent and cost-shared with the Development Coordination Office.

^c Includes one P-5 and one P-4 general temporary assistance positions.

342. The eruption of conflict between the Sudanese Armed Forces and the Rapid Support Forces in April 2023 dramatically affected the security situation and the operating environment of UNITAMS. The Mission had to temporarily reconfigure its presence and reprioritize its immediate actions. Currently, the Mission has temporarily relocated the mission support activities from Khartoum and other regions within Sudan to Port Sudan, Kassala and Entebbe, Uganda, leveraging the existing presence of the UNITAMS offices and other United Nations entities located in Port Sudan. The Mission deployed a small team to coordinate the Mission's operations from Port Sudan in support of the good offices functions of the Special Representative of the Secretary-General, who has been relocated to Port Sudan to continue the Mission's mandated activities. Furthermore, a critical mission support team has been retained at the Regional Service Centre in Entebbe to continue to support the Mission's operations ensuring business continuity, with both the Regional Service Centre and the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo providing support to the team in Entebbe in the areas of finance, logistics and communications and information technology.
343. The proposed resource requirements for 2024 for UNITAMS amount to \$64,897,500 (net of staff assessment) and would provide for the deployment of 28 military observers (\$1,322,300); 42 United Nations police officers (\$1,377,000); salaries and common staff costs (\$36,460,600) for 179 international positions (1 Under-Secretary-General, 2 Assistant Secretaries-General, 2 D-2, 5 D-1, 21 P-5, 40 P-4, 37 P-3, 2 P-2, 68 Field Service and 1 General Service), including the establishment of one Assistant Secretary-General position; 166 national positions (57 National Professional Officer and 109 Local level); and 12 United Nations Volunteers (7 international and 5 national United Nations Volunteers); and operational costs (\$25,737,600), comprising costs for consultants and consulting services (\$210,900), official travel (\$876,300), facilities and infrastructure (\$3,279,500), ground transportation (\$1,327,200), air operations (\$10,320,000), communications and information technology (\$3,168,200), medical (\$868,100) and other supplies, services and equipment (\$5,687,400).
344. A vacancy rate of 23.7 per cent has been applied to the estimates for continuing international positions on the basis of the actual vacancy rate in March 2023. Vacancy rates of 43.8 per cent for National Professional Officers, 29.4 per cent for Local level positions and 43.0 per cent and 80.0 per cent for international and national United Nations Volunteers, respectively, have been applied on the basis of the actual vacancy rates in March 2023. A vacancy rate of 50 per cent has been applied for the one new proposed position. The estimates include the application of vacancy rates of 10.7 per cent and 38.0 per cent for the military observers and United Nations police personnel, respectively, on the basis of the actual deployment as of March 2023.
345. In 2024, building on experience and adapting to fast-changing realities on the ground, some key reconfigurations and additions are proposed to the Mission's structure and staffing to further optimize resources and mandate delivery, as follows:

Office of the Deputy Special Representative of the Secretary-General for Political Affairs

- (a) Establishment of the Office of the Deputy Special Representative of the Secretary-General for Political Affairs in Khartoum to be headed by an Assistant Secretary-General to report to the Special Representative of the Secretary-General. The proposed establishment is in response to the increased need for good offices and political facilitation by UNITAMS to implement existing and future peace or ceasefire agreements and the political transition. The proposed establishment of a political pillar will entail a realignment of the substantive sections of the mission, including the Office of Support to the Political Transition, the Integrated Electoral Assistance Division, the Police Advisory Unit, the Rule of Law Unit, Heads of the regional offices and the Darfur Permanent Ceasefire Committee mission component reporting to the Office of the Deputy Special Representative of the Secretary-General for Political Affairs;
- (b) Establishment of one position of Deputy Special Representative of the Secretary-General for Political Affairs at the Assistant Secretary-General level, based in Khartoum, to report to the Special Representative of the Secretary-General and deputize for the Special Representative in political engagement, and enhance the overall management of the Mission's activities related to the political pillar while strengthening the presence of senior management in the field. In a fast-paced, highly volatile political and security context and a challenging operating environment,

the Deputy Special Representative will become key to supporting the Special Representative, providing strategic direction and managing the political component of the mission. These functions will be essential at a time of growing need for the political leadership of the Mission to travel outside of the country to engage with key interlocutors. They would also allow the other Deputy Special Representative of the Secretary-General (who is also Resident Coordinator and Humanitarian Coordinator) to focus on integration within the United Nations country team and wider humanitarian community, especially on the protection of civilians, peacebuilding and human rights. The proposed position would be responsible for: (a) providing substantive and technical advice to the Special Representative on all issues related to good offices and the facilitation of negotiations aimed at fostering peace and confidence-building among parties; (b) leading strategic planning and implementation of programmes under the political pillar of the mission, including through the development of a coherent political vision for the work of all sections and field presences; and (c) establishing close working relationships at senior level with key subnational, national, regional and international interlocutors, in support of the Special Representative's good offices, and guiding the Mission's strategic engagement with relevant stakeholders, with particular attention to the subnational level.

346. The Mission's approved 2023 staffing table includes two general temporary assistance positions. It is proposed that these positions be continued in 2024, as follows:
- (a) One Senior Coordination Officer (P-5) in the Integrated Office of the Deputy Special Representative of the Secretary-General, Resident Coordinator and Humanitarian Coordinator would be required to support the oversight and coordination of the Mission's protection of civilians, peacebuilding and human rights pillars, implement the joint vision and oversee strategic partnerships and engagement with international financial institutions, international donors and the Government, in line with requested prioritization of integration by the Security Council in its resolution [2579 \(2021\)](#);
 - (b) One Programme Management Officer (P-4) in the Mine Action Unit of the Integrated Office of the Deputy Special Representative of the Secretary-General, Resident Coordinator and Humanitarian Coordinator would be required to provide technical assistance on mine action matters and the clearance of explosive ordnance within priority areas in the UNITAMS area of responsibility, with a focus on the Two Areas, and to advocate for mine action initiatives in areas under the control of armed groups.
347. The decrease in requirements for 2024 compared with the appropriation for 2023 is attributable to the decreased requirements under civilian personnel costs, resulting from the application of a lower percentage of common staff costs of 66.8 per cent compared with 77.7 per cent applied in the 2023 budget, as well as the application of a higher vacancy rate of 43.8 per cent for National Professional Officers in 2024 compared with 30.0 per cent applied in 2023. The decrease is partially offset by higher requirements under military and police personnel costs, owing to the application of a lower vacancy rate of 10.7 per cent for military observers compared with 40.0 per cent applied in the 2023 budget, coupled with the application of the latest standard mission subsistence allowance rates, which are higher than those applied in the 2023 budget.
348. With regard to operational costs, given the fluidity and volatility of the security and operational landscapes, the proposed resources for UNITAMS as contained in the present budget have been kept at a maintenance level equal to the appropriation for 2023, in the amount of \$25,737,600, to allow the Mission to continue to execute its mandate, subject to further changes and evolution in the security and operational parameters, which will take time to manifest. The Secretariat will continue to assess the situation and take measures as required to respond adaptively to the needs arising on the ground, including ensuring proper duty of care to Mission staff, to support the continuation of political and other efforts being delivered or facilitated by UNITAMS towards resolving the current crisis and a return to stability and a political process.

Extrabudgetary resources

349. In 2023, extrabudgetary resources in the amount of \$6,025,000 are projected to be utilized, comprising the following funding sources:
- (a) \$5,781,000 under the Mission's trust fund in support of the good offices and political functions of the Mission and to provide for the continuation of six positions (1 P-3, 3 Field Service, 1 National Professional Officer and 1 Local level) and other activities, including support to extend and expand the Mission's support to ongoing peace processes, the good offices of the Special Representative of the Secretary-General, the implementation of the Juba Peace Agreement and local deployments to defuse tensions;
 - (b) \$244,000 under the multi-year appeal trust fund of the Department of Political and Peacebuilding Affairs to provide for the staff costs of two positions (1 P-4 and 1 National Professional Officer) to support Sudanese women to meaningfully participate in future inclusive dialogues for a sustainable political solution to the crisis in the Sudan and ensure that their rights are safeguarded in the democratic transition and to provide an adviser for climate and peace and security.
350. For 2024, extrabudgetary resources in the amount of \$2,744,000 are projected to be utilized as follows:
- (a) \$2,500,000 under the Mission's trust fund in support of the good offices and political functions of the Mission and to provide for the continuation of six positions (1 P-3, 3 Field Service, 1 National Professional Officer and 1 Local level) and other activities, including support to extend and expand the Mission's support to ongoing peace processes, the good offices of the Special Representative of the Secretary-General, the implementation of the Juba Peace Agreement and local deployments to defuse tensions;
 - (b) \$244,000 under the multi-year appeal trust fund of the Department of Political and Peacebuilding Affairs to provide for the continuation of two positions (1 P-4 and 1 National Professional Officer) to support Sudanese women to meaningfully participate in future inclusive dialogues for a sustainable political solution to the crisis in the Sudan and ensure that their rights are safeguarded in the democratic transition and to provide an adviser for climate and peace and security.
351. The decrease in the estimated extrabudgetary resources available for utilization in 2024 compared with 2023 is a consequence of the suspension of aid owing to the 2021 coup. It is hoped that a resumption of the transitional process will facilitate resource mobilization and voluntary contributions. In addition, it is expected that this will result in progress towards a more comprehensive peace agreement and enable a shift towards peace implementation and development.

Annex I

Summary of follow-up action taken to implement decisions and requests made by the General Assembly, including the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7/Add.4](#)

The Advisory Committee notes the existing capacity of the Integrated Office of the Deputy Special Representative of the Secretary-General, Resident Coordinator and Humanitarian Coordinator, which has six positions currently, as well as additional capacity in the component offices working on civilian protection and electoral assistance. Therefore, the Committee is not fully convinced by the proposal and recommends that the proposed Senior Coordination Officer (P-5) be established as a general temporary assistance position at this stage. The Committee trusts that updated information will be provided in the next budget submission (para. 44).

The Advisory Committee notes with concern the number of vacant positions, particularly at the national level, and trusts that the recruitment for all vacant positions will be completed expeditiously and that updated information will be provided to the General Assembly in the next budget submission (para. 48).

The Integrated Office in the United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS) comprises the immediate front office of the Deputy Special Representative of the Secretary-General, Resident Coordinator and Humanitarian Coordinator and the peacebuilding team, and is integrated with the Resident Coordinator's Office, the joint secretariat of the Peacebuilding Fund and the United Nations multi-partner trust fund and the Durable Solutions Unit.

These capacities, managed by the Chief of the Integrated Office, support the Deputy Special Representative, Resident Coordinator and Humanitarian Coordinator in her role to ensure coherence around expected outputs and results for her pillar, encompassing peacebuilding, human rights and protection, mine action, and integration with the United Nations country team across the peace, humanitarian and development nexus.

Special political missions have invested efforts in recruitment to fill vacancies as expeditiously as possible.

For example, the United Nations Verification Mission in Colombia reinforced its Human Resources Unit to cope with the high volume of recruitments (over 90 since June 2022). Furthermore, the Mission plans to migrate the recruitment of national positions to Inspira in the second quarter of 2023, which will also expedite the recruitment process for national positions. This will also ensure a streamlined, fair and transparent process, broader outreach, easier monitoring and proper segregation of responsibilities.

The United Nations Mission to Support the Hudaydah Agreement (UNMHA) ramped up its recruitment campaign throughout 2022 and significantly raised the number of onboarded civilian personnel and observers, from 90 in 2021 to 141 in March 2023.

*Brief description of the recommendation**Action taken to implement the recommendation*

The Advisory Committee notes the significant variances between the appropriations and expenditures since 2020, and trusts that an evaluation of medical resources will be conducted to ensure the efficient and effective use of resources and services, and that an update will be provided in the next budget report (para. 71).

The Advisory Committee notes the continued disparity among regional groups and trusts that more efforts will be made to achieve an equitable geographical representation of Member States among the staff in all the special political missions, and that an update will be provided in all future budget submissions (para. 75).

UNITAMS actively recruited to fill vacant positions, including national positions. In 2022, the Mission faced delays with the issuance of visas to finalize onboarding of internationally recruited staff. Furthermore, national recruitment challenges included the unavailability of profiles, mainly in the regions, where additional outreach activities would be carried out. The Mission strived to reflect the ethnic diversity of the country, especially in the regions, which required additional outreach efforts and re-advertising of vacancies.

The United Nations Integrated Office in Haiti (BINUH) experienced a high turnover of national staff positions (47 per cent during the past three budget years), owing mainly to the deteriorating security situation across the country. Although outreach efforts are being made by the mission to attract interest from the national workforce, the number of qualified applicants remains low owing to a lack of proper professional experience, training and qualifications. The same experience has been shared among agencies, funds and programmes in Haiti.

Detailed information with respect to the latest recruitment status of positions vacant for longer than two years under each mission is provided in the supplementary information.

UNMHA has conducted an independent review of its medical resources to ensure the efficient and effective use of resources and services. The findings are provided in paragraph 281 of the present report. The findings also informed the proposed budget for 2024, which includes the establishment of three medical positions and the reduction in contractual services.

Special political missions have taken measures to strengthen efforts to achieve equitable geographical representation in their workforce. In many missions, hiring managers are required to demonstrate, using the current data on geographical representation, the impact of such recommendations. The revised template of the selection memorandums now allows hiring managers to review, before a candidate is selected, whether the proposed selection improves the geographical representation of the mission. The data are also monitored on a quarterly basis through the management dashboard to guide the course of recruitment actions.

Further efforts include reviewing language requirements with a view to lowering such requirements in order to broaden the pool of applicants. For example, in the United Nations

The Advisory Committee trusts that disaggregated cost recovery data and resources related to cost-sharing will be included as separate tables in future budget submissions (para. 78).

The Advisory Committee trusts that future budget submissions will include more detailed information on the cooperation between special political missions and the resident coordinator system (para. 80).

Verification Mission in Colombia, consideration was given to reduce the requirement for Spanish from “fluency” to “working knowledge”, or to include it as a desirable criterion rather than a mandatory criterion. However, this is not always feasible, as language fluency has proven critical for performing the functions of substantive positions.

The geographical representation, by country, of the international staff positions in all 39 special political missions is provided centrally in annex XIX of document [A/78/6 \(Sect. 3\)/Add.1](#).

The cost recovery and cost-sharing arrangements of all special political missions are centrally presented in annexes VI, VII and VIII of document [A/78/6 \(Sect. 3\)/Add.1](#) to enable a consolidated and holistic view.

In both integrated and non-integrated missions, special political missions continue to maximize cooperation with the resident coordinator system to achieve greater synergy. A few examples are provided below.

The United Nations Regional Office for Central Africa (UNOCA) collaborates with the resident coordinator offices in the region to identify and implement extrabudgetary projects. In 2022, three such projects were implemented in collaboration with the resident coordinator offices. It also monitors the political and security situation in countries of the Economic Community of Central African States in collaboration with the resident coordinator offices. UNOCA also supports resident coordinators and United Nations country teams in helping to address structural conflict prevention efforts at the country level, including through contributions to common country assessments, United Nations Sustainable Development Cooperation Frameworks and relevant sustaining peace strategies.

The United Nations Verification Mission in Colombia worked closely with the Resident Coordinator Office and the country team to promote the comprehensive implementation of the Final Agreement for Ending the Conflict and Building a Stable and Lasting Peace at the national/strategic level and at sectorial/technical levels. The Special Representative of the Secretary-General participates in regular meetings with the Resident Coordinator and agencies, funds and programmes to discuss the status of implementation of the specific elements of the Agreement. These meetings include a meeting every two months with the country team on peace issues, weekly meetings with the Resident Coordinator Office and heads of United

*Brief description of the recommendation**Action taken to implement the recommendation*

Nations agencies, funds and programmes, and quarterly meetings with women's organizations to discuss progress on the implementation of gender provisions of the Agreement. Joint missions to the field with the Resident Coordinator Office and heads of agencies, funds and programmes were also undertaken. At the sectorial/technical level, different verification pillars of the Mission also meet regularly with United Nations agencies, funds and programmes to coordinate activities aimed at advancing the implementation of the Agreement, such as the inter-agency working group on security guarantees, working groups on reintegration, the inter-agency task force on ethnic issues and the gender task force of international cooperation.

UNMHA cooperates with the Resident Coordinator Office and the country team across a range of areas that contribute to the advancement of the UNMHA mandate. Two such examples are the joint work on mine awareness campaigns, carried out with the country team in Yemen, and the coordination and logistical support provided to the salvage operation for the FSO Safer oil tanker.

In BINUH, efforts to strengthen integration include joint participation by the mission and the United Nations country team in the key policymaking and strategy forums. At the technical level, BINUH, the Resident Coordinator Office and the country team collaborate through joint programmes and teams in areas including community violence reduction, justice, elections and police reform.

Advisory Committee on Administrative and Budgetary Questions [A/77/7/Add.19](#)

The Advisory Committee trusts that information on the communications strategy and its impact will be provided in the next programme budget report (para. 13).

BINUH is undertaking a year-long national communications campaign particularly targeting youth, through radio, print, video, social media and outreach activities, to garner support for the mission's advocacy and good offices efforts to advance a peaceful and stable environment, including by fostering cooperation and dialogue among the main political and social actors, building consensus and strengthening political stability and good governance, as well as promoting the participation of women as decision makers in State institutions, political parties and initiatives of dialogue and consensus-building.

As part of this campaign, strategic communications activities using radio broadcasts, print, video and the Internet will seek to promote the implementation of the mission's strategic plan to support the Government to further develop the Haitian National Police, reduce

The Advisory Committee trusts that updated information on the security situation will be provided in the next budget submission (para. 17).

gang violence and enhance police oversight. Other communications activities will seek to inform the Haitian public about the mission's advocacy programmes on disarmament, demobilization and reintegration, community violence reduction and weapons and ammunition management.

To complement communications activities focused on public security and support to the police, a strategic communications campaign will employ mass media, social media and public events, in cooperation with the United Nations Communications Group, to raise awareness about human rights abuses and violations, sexual and gender-based violence and gender discrimination, and to strengthen institutional accountability to address these problems and end impunity for perpetrators.

Finally, the communications strategy also encompasses strategic communications activities through print and broadcast outlets to improve Haitians' understanding of their rights and legal processes and to raise awareness among the population of the efforts made by BINUH and the national institutions towards the improved functioning of judicial and penitentiary institutions.

While implementation of the strategy is still in progress, BINUH has increased the use of social media to better reach key Haitian stakeholders and the population, in addition to disseminating multiple press releases, news articles and items of multimedia content that have focused attention on United Nations activities and statements, as well as increased engagement with national and international news media to increase impact.

Gang-related violence has reached levels not seen in decades and remains the major threat to public security in Haiti. Armed gangs are expanding their influence into neighbourhoods of the Port-au-Prince metropolitan area that were considered relatively safe until recently. Turf battles between gangs have displaced tens of thousands of people in Port-au-Prince, with most of the affected living in spontaneous sites for internally displaced persons. These, too, have become hotspots for violent crime, further challenging the capacity of the already overstretched national police.

Although the Varreux fuel terminal is now partially operational – after a two-month gang blockade in 2022 that left the country almost without fuel – the National Port Authority and other commercial ports remain under constant attack by gangs. Road transportation

*Brief description of the recommendation**Action taken to implement the recommendation*

Noting the need to deploy mission support staff on temporary duty assignments, the Advisory Committee trusts that further information on the efficacy of the mission support business model will be provided in the next budget submission (para. 24).

The Advisory Committee is not fully convinced on the need for outsourced personnel to resolve periodic mission support requirements. The Committee trusts that further information on the efficacy of the support business model in Haiti will be provided in the next budget report (para. 26).

remains at risk, with cargo shipping containers and goods being regularly hijacked and stolen. Police continued to struggle to maintain patrols around the ports, while gangs retained control of most of the main transport thoroughfares linking Port-au-Prince with the northern and southern departments.

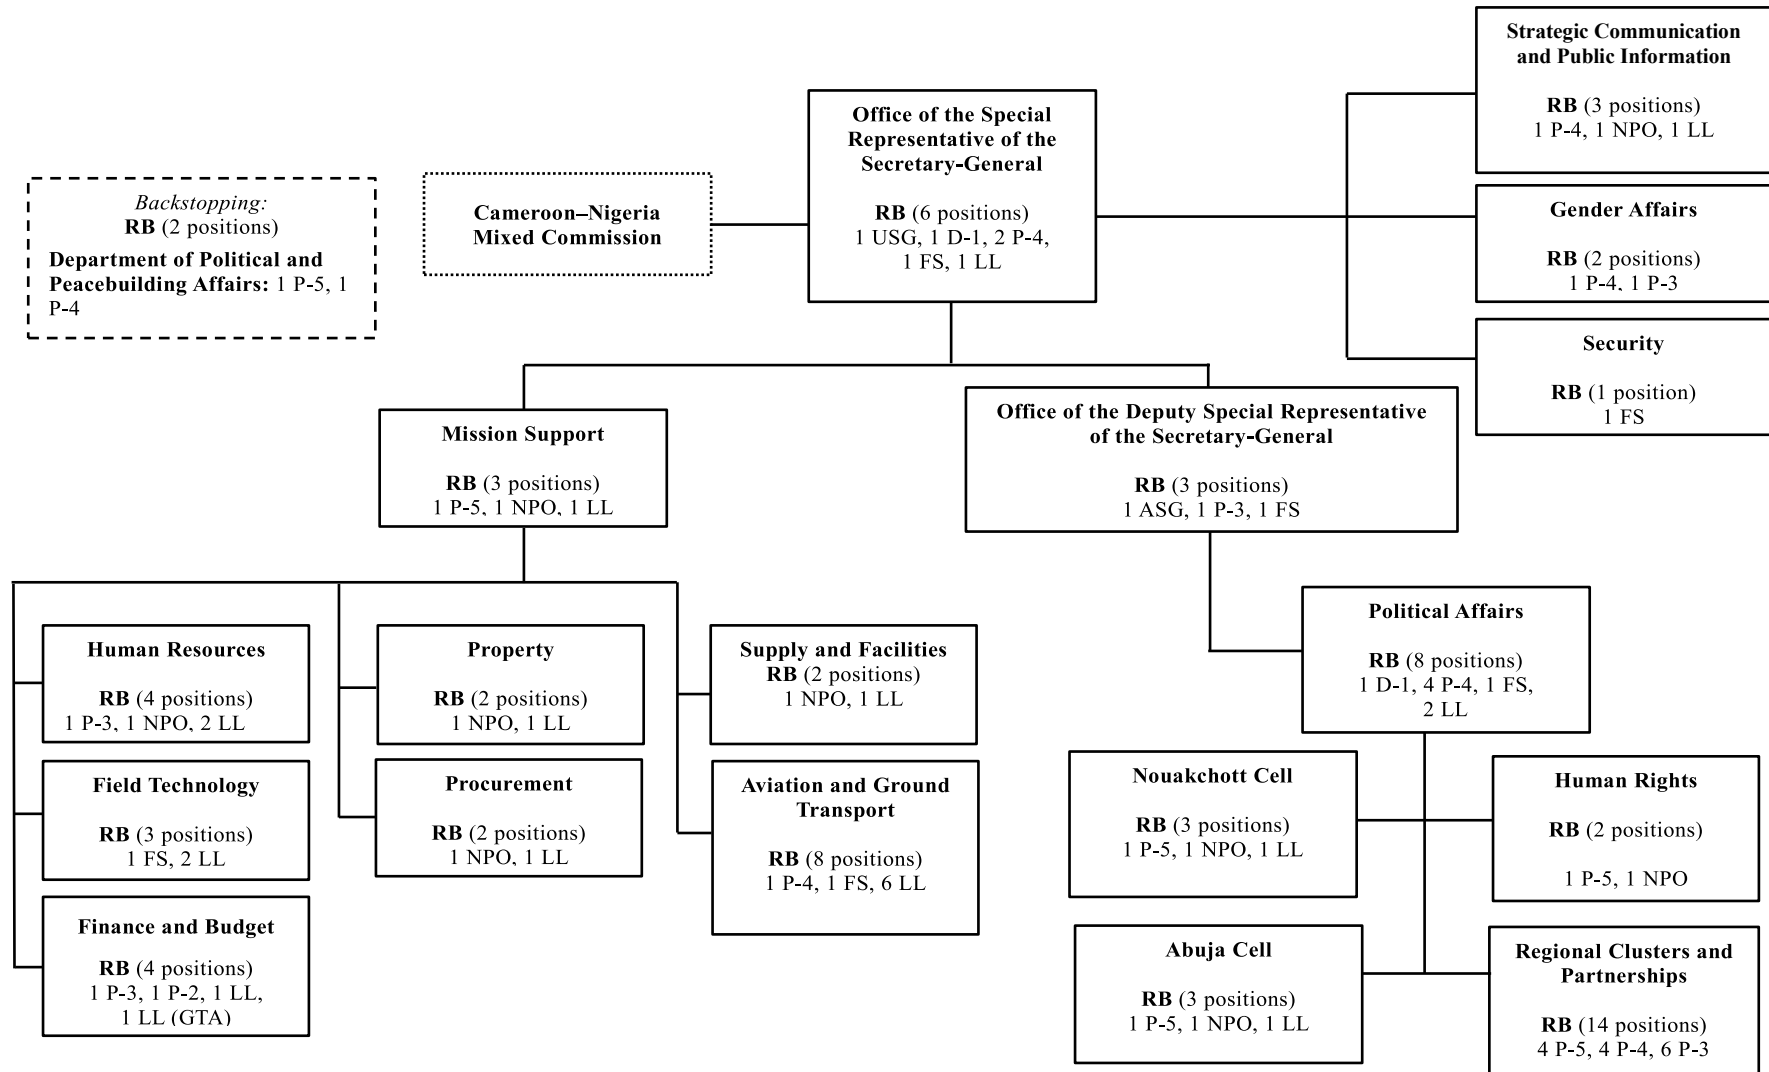

From December 2022 to early 2023, BINUH conducted a civilian staffing review of its mission support structure. The review took into account cost-effectiveness, the complexity of the workload, the volume and number of assets, the number of staff and clients served, and the fast-increasing demands in the area of operational resources and supply chain. The review also considered the reduction of temporary duty assignment requests and the use of regular positions to fulfil roles of a continuing nature. The result of this review has informed the proposal put forward in the proposed budget for 2024.

BINUH plans to streamline and strengthen its mission support structure with a view to enhancing operational efficiency in the provision of enabling services with both the existing and new proposed staffing resources. The proposed establishment of new positions is designed to respond to structural gaps and needs in the mission support architecture and to position the mission for the effective delivery of its mandate.

** The part consisting of the proposed programme plan for 2024 is submitted for the consideration of the General Assembly in accordance with the established budgetary procedures and practices reaffirmed in paragraph 7 of Assembly resolution [77/267](#).

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

Overview of the Mission

(*\$132,479,400*)

Foreword

The Taliban de facto authorities have continued to consolidate their governance across the country. Donor funding for the de facto authorities remains suspended as a result of their tightened controls over the population through the adoption of restrictive measures. Afghanistan is facing unprecedented levels of humanitarian, climate and economic crisis across all 34 provinces. Two thirds of the population of Afghanistan is assessed to be in need of humanitarian assistance in 2023. Restrictions on freedoms and respect for fundamental human rights, especially for women and girls, and an escalation of interference in international humanitarian assistance operations persist.

The United Nations Assistance Mission in Afghanistan (UNAMA) continues to document cases of extrajudicial killings, arbitrary arrests and detentions, torture and ill-treatment against former government officials and security personnel and an increase in the implementation of judicial corporal punishments by the de facto authorities, including the first instance of a judicially sanctioned public execution. At the same time, the overall number of conflict-related security incidents and civilian casualties continue to significantly decline. However, the security situation remains uncertain particularly owing to increased activities by Islamic State in Iraq and Levant-Khorasan, the emergence of new anti-Taliban resistance forces and enduring threats, including other forms of terrorism, especially the operations of Tehrik-e Taliban Pakistan from Afghan territory, and crime.

In 2024, the UNAMA will continue to play an important role in promoting peace and stability in Afghanistan. The Mission will use its good offices to pursue a feasible political path with all relevant Afghan political actors and stakeholders, including the de facto authorities, the region and the wider international community, to promote inclusive, representative, participatory and responsive governance and rule of law; the provision of essential humanitarian assistance and basic human needs; the protection and promotion of human rights; enhanced regional cooperation for political stability and security; and the accountable, safe and transparent delivery of essential services and effectiveness in the use of aid.

(Signed) Roza **Otunbayeva**
Special Representative of the Secretary-General for Afghanistan
Head of the United Nations Assistance Mission in Afghanistan

A. Proposed programme plan for 2024 and programme performance for 2022

Overall orientation

Mandates and background

1. The mandate of the United Nations Assistance Mission in Afghanistan (UNAMA) is defined in Security Council resolutions [1401 \(2002\)](#) and [1662 \(2006\)](#), and renewed by its resolutions [1746 \(2007\)](#), [1806 \(2008\)](#), [1868 \(2009\)](#), [1917 \(2010\)](#), [1974 \(2011\)](#), [2041 \(2012\)](#), [2096 \(2013\)](#), [2145 \(2014\)](#), [2210 \(2015\)](#), [2274 \(2016\)](#), [2344 \(2017\)](#), [2405 \(2018\)](#), [2460 \(2019\)](#), [2489 \(2019\)](#), [2543 \(2020\)](#), [2596 \(2021\)](#), [2626 \(2022\)](#), and [2678 \(2023\)](#) which extended the mandate of the Mission until 17 March 2024.
2. As mandated by the Security Council, UNAMA will continue to play an important role in promoting peace and stability in Afghanistan. To that end, the Mission will coordinate and facilitate strengthened cooperation and coherence in the delivery of humanitarian assistance and the coordination of financial resources for humanitarian activities that support basic human needs and support development, consistent with a United Nations system-wide strategic planning framework; coordinate efforts with donors and other stakeholders to reduce risk and increase accountability, transparency and effectiveness in the use of aid; support efforts, including the provision of essential services, to create the conditions for self-reliance and stability among the Afghan population; provide assessments of the explosive ordnance threat and coordinate mitigation measures to enable humanitarian and development initiatives; provide outreach and good offices to promote dialogue between Afghan stakeholders, the region and the international community to promote inclusive, representative, participatory and responsive governance, including for women and girls, and provide advice on inclusive national and local consultative mechanisms, confidence-building measures and conflict management and reconciliation; promote responsible governance and the rule of law; engage with all stakeholders on the promotion and protection of human rights; support regional cooperation; and support, within the Mission's mandate, existing mechanisms for the benefit of improving the overall security situation in Afghanistan.

Programme of work

Objective

3. The objective, to which the Mission contributes, is to create the conditions for peace and stability, with foundations established for an inclusive, representative, participatory and responsive government and functioning and accountable institutions, as well as a coherent and sustainable path towards the economic and social conditions for self-reliance.

Strategy and external factors for 2024

4. To contribute to the objective, the Mission will:
 - (a) Coordinate with international donors and organizations, as well as development and humanitarian partners, in addressing the humanitarian and basic human needs of vulnerable Afghans. It will support the mobilization of resources to enable humanitarian activities, the delivery of essential services and the preservation of community systems for the restoration of livelihoods and the private sector and for economic recovery. UNAMA will engage with the de facto authorities and other stakeholders to facilitate the support of the United Nations, the World Bank, international financial institutions and other international and national partners on the socioeconomic recovery from the economic crisis;

- (b) Promote inclusive, representative, participatory and responsive governance in Afghanistan, in coordination with the international community and in support of the needs and priorities of the Afghan people. UNAMA will also facilitate cooperation between the de facto authorities, civil society, the media, communities and other stakeholders, including women-led civil society, on governance and policy issues. It will continue to support the participation of women and minorities in the governance, private sector, civil society, media and socioeconomic spheres. In addition, the United Nations and international partners will monitor and report on developments related to the rule of law in alignment with the United Nations system-wide strategic planning framework (as successor of the United Nations Transitional Engagement Framework for Afghanistan), and perform analysis relating to the political economy, including a better understanding of the illicit economy, as well as the Taliban's economic strategies. The Mission will provide technical support to United Nations agencies, funds and programmes, humanitarian partners, civil society, the media, communities and, as authorized, to counterpart institutions of the de facto authorities, in compliance with the sanctions in line with relevant Security Council resolutions covering clauses pertaining to anti-money-laundering and counter-terrorism financing;
- (c) Advise stakeholders and promote respect for human rights, especially pertaining to the protection of civilians and the right to life and physical integrity, as well as civil, political, economic, social and cultural rights. UNAMA will also continue its work with children affected by armed conflict; the rights of women and girls; the treatment of minorities and those deprived of their liberty, including through the prevention of torture and ill-treatment; and the protection of human rights defenders and civic space. In addition, the Mission will integrate gender mainstreaming as a cross-cutting issue throughout mandate implementation. The Mission will support and promote gender equality, women's and girls' empowerment and the participation, engagement and leadership of women in public life and at all levels and stages of decision-making. It will also partner with the United Nations country team to promote the protection and fulfilment of the rights of women and girls and the implementation of Security Council resolution [1325 \(2000\)](#) on women and peace and security;
- (d) Support peace and stability in Afghanistan through consultations and by utilizing its convening power for dialogues with high-level political decision makers, leading societal figures and civil society groupings, including women, at the national, provincial and district levels. It will use existing mechanisms to advance regional cooperation on economic development and security that can, in turn, help to foster a regional environment conducive to peace. In addition, it will propose and support regional approaches to issues, such as the return and reintegration of refugees and internally displaced persons, combating illicit drugs and trafficking and reducing the illegal economy and its impact. It will also coordinate explosive ordnance threat mitigation measures to enable the safe delivery of humanitarian and basic human needs initiatives;
- (e) Intensify its work on the humanitarian-development-peace nexus, engaging with the de facto authorities, civil society and the media to facilitate the transition of society from conflict to peace, and setting the foundations for the localization of the Sustainable Development Goals and the 2030 Agenda for Sustainable Development. The Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator will ensure a coherent approach by the United Nations to humanitarian and basic needs programming and promote its alignment with the needs and priorities of the Afghan people. The Mission will improve mechanisms for the implementation, monitoring and reporting of humanitarian and basic needs assistance provided in Afghanistan through the strategic planning framework, in collaboration with the de facto authorities, civil society, humanitarian partners, the media and international partners. UNAMA will also collaborate with all relevant stakeholders in implementing the new aid architecture for Afghanistan, as well as enhanced risk monitoring and mitigation modalities, while upgrading due diligence approaches in compliance with applicable Security Council resolutions.

5. The above-mentioned work is expected to result in:
 - (a) Improved representativeness of governing entities, in particular through inclusive consultative mechanisms;
 - (b) Progressive compliance by all parties with international humanitarian law and human rights obligations, with accountability for human rights violations and abuses;
 - (c) Pursuit of a feasible political path with the de facto authorities, other national stakeholders and the international community to improve the situation of Afghans throughout the country and build confidence between the international community and the de facto authorities;
 - (d) Ongoing accurate reporting to the international community on the evolving situation in Afghanistan and its implications for international peace and security;
 - (e) Sustained local, regional and international support to meet humanitarian and basic human needs and to create an environment conducive to inclusive, representative, participatory and responsive governance in Afghanistan.
6. With regard to cooperation with other entities, the Mission cooperates with international and regional entities and supports constructive dialogue between the relevant Afghan stakeholders, regional actors and the international community that is focused on the well-being, rights and economic progress of the Afghan people.
7. With regard to inter-agency coordination and liaison, the Mission coordinates with the United Nations Regional Centre for Preventive Diplomacy for Central Asia, to provide good offices and expert advice on confidence-building measures in the region that contribute to stability in Afghanistan. UNAMA engages with agencies, funds and programmes through a “One United Nations” approach to strengthen the humanitarian-development-peace nexus. Close collaboration between UNAMA and the United Nations country team will include areas related to governance, the rule of law, human rights and gender, focusing on policy issues and good offices. With the evolved context in Afghanistan, the Mission’s work will also support the delivery of humanitarian response and meet basic human needs through the restoration of essential services, livelihoods and community systems, in line with Inter-Agency Standing Committee recommendations. The Mission will lead the coordination of an overall risk management approach of the United Nations in Afghanistan, including mitigating the risk of aid diversion, guided by the United Nations system-wide strategic planning framework and in order to set the foundation for the localization of the achievement of the Sustainable Development Goals upon the eventual resumption of development cooperation.
8. With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
 - (a) The situation in Afghanistan will remain precarious, with continued political, security, legal, socioeconomic and humanitarian uncertainties;
 - (b) Lack of international and, to an extent, domestic legitimacy of the de facto authorities, the dissonance between their ideology and international norms and standards, and the lack of national resources and capacity to govern will present a significant challenge in engaging the diverse interests of domestic, regional and international stakeholders, including donors, on the future of Afghanistan;
 - (c) The security situation will remain uncertain, with continued attacks by Islamic State in Iraq and the Levant-Khorasan against the de facto authorities and international presence, activities of anti-Taliban resistance forces and dynamics related to the presence of regional and international foreign terrorist fighters, with an impact on the Mission and development and humanitarian actors in terms of access;
 - (d) Civilians, including those working as humanitarians and supporting basic human needs, will continue to face the threats of explosive ordnance, including those from improvised explosive devices and explosive remnants of war;

- (e) Enduring threats, such as terrorism, organized crime and illicit trafficking, including in narcotics, and resource competition will continue, with threats emerging from issues such as land rights, minority rights, refugee outflow, unemployment and the impact of evolving regional dynamics, as well as the adverse impact of climate change, ecological changes and natural disasters;
 - (f) The economy and human development will remain adversely affected by the impact of the sanctions regime, the ban by the de facto authorities on Afghan females working in the United Nations and non-governmental organizations and the limitations of the de facto authorities to govern and stabilize the economy, with the resumption of development funding depending on the de facto authorities meeting international norms, especially as they relate to the protection of human rights, including for women and girls, justice, access to basic services, media freedom, civic space and inclusive governance;
 - (g) The United Nations is expected to take an increasing role in humanitarian assistance and recovery support, including focusing on meeting basic human needs by sustaining essential services and preserving community systems;
 - (h) The Mission's ability and requirements to operate (e.g., in terms of security, regular movement operations, including airport management arrangements, medical and logistical support in extremis and liquidity requirements) will continue to be affected by the uncertain security situation, as well as the lack of reliable airport facilities.
9. The Mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, in its engagement with the de facto authorities and political stakeholders, UNAMA promotes gender mainstreaming into programmes and structures to strengthen the representation of women. The Mission will support the implementation of Security Council resolutions [1325 \(2000\)](#) and [2493 \(2019\)](#), in particular on gender equality, the empowerment of women and girls and their human rights. UNAMA will continue its advocacy on the full and meaningful participation of women in political processes at the local, national, regional and international levels.
 10. In line with the United Nations Disability Inclusion Strategy, the Mission will revise its the implementation plan with a view to reinforcing an organizational culture that respects the human rights and supports the inclusion of persons with disabilities; further advancing disability inclusion in strategic planning and management, knowledge and information management and staff career development; and addressing the barriers to accessibility in the workplace and in the performance of functions.

Evaluation activities

11. The Office of Internal Oversight Services audit of the effectiveness of emergency response mechanisms by UNAMA was completed in 2022. The results and lessons of the audit have been taken into account for the proposed programme plan for 2024. For example, UNAMA has considered the development and implementation of a process to test and update the plans supporting its organizational resilience management system, to adapt to the current context. This will be undertaken through a regular maintenance programme and after-action reviews following the response to a crisis event.
12. The following evaluations are planned for 2024: audits by the Office of Internal Oversight Services on UNAMA mandate implementation and an Office of Internal Oversight Services advisory on the coordination by UNAMA of the management of common United Nations system risks in Afghanistan.

Impact of the pandemic and lessons learned

13. The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had no impact on the implementation of the mandates. No events or activities were modified to a virtual format.

14. The Mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including the continued use of reverse outreach by field offices, inviting interlocutors from different provinces or districts to attend events at UNAMA compounds or other selected venues, as necessary.

Programme performance in 2022

Enhanced Mission-facilitated dialogue between diverse Afghan constituencies and the de facto authorities

15. UNAMA engaged the de facto authorities on the protection of fundamental rights and freedoms, including for women and girls, and promoting inclusive, representative, participatory and responsive governance. The Mission's field offices conducted over 263 subnational outreach meetings and facilitated 295 community engagement events with the de facto authorities across all 34 provinces. These engagements brought together representatives of the de facto authorities, religious scholars, community elders and youth to discuss good governance principles. UNAMA also reached out to the political opposition and former government officials inside Afghanistan.
16. UNAMA engaged with business actors regarding impediments to economic growth. Although the de facto authorities continued to impose restrictions on women, including limits on freedom of movement and right to work and access to secondary and higher education, UNAMA regularly consulted Afghan women's groups across the country to capture their views and provide space for them to frame their agenda for dialogue with the de facto authorities. UNAMA supported and facilitated dialogue between Afghan women and the de facto authorities aimed at building consensus on the importance of women's political participation and empowerment.
17. UNAMA regularly met with the de facto authorities to discuss challenges within the justice sector, including the lack of clarity regarding the presently applicable legal framework. UNAMA also regularly met with former judges and defence lawyers, in particular female lawyers. At least 28 meetings were convened with defence lawyers and former judges at the national level (12 meetings) and at the subnational level (16 meetings). UNAMA and the United Nations Development Programme concluded a pilot legal aid project in Bamyán and Herat provinces on 22 December 2022, benefiting 612 people (including 220 women).
18. Progress towards the objective is presented in the performance measure below (see table 1 below).

Table 1
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
With the start of the Afghanistan peace negotiations, UNAMA-supported engagement between the parties to the conflict and diverse Afghan constituencies	Following the takeover by the Taliban, UNAMA-piloted dialogue initiatives between select Afghan constituencies and the de facto authorities to raise issues of community concern	Enhanced UNAMA-facilitated dialogues between diverse Afghan constituencies and the de facto authorities to discuss good governance principles and improve community relations, as well as promote international community engagement with the de facto authorities on international norms and principles

Planned results for 2024

Result 1: securing rights for all

Programme performance in 2022 and target for 2024

19. In 2022, the Mission's work contributed to the protection of civilians, including women and children, during armed violence and attacks, and met the target of 3 per cent year-on-year reduction in child casualties from explosive remnants of war. Through technical advice informed by its monitoring work, UNAMA also supported stakeholder efforts aimed at securing of civic space; equitable access to services, including services afforded to victims of the conflict; and protection of vulnerable groups, including women and girls, ethnic groups, persons with disabilities and minorities. The Mission's human rights monitoring and reporting work focused on engagement with the de facto authorities and hold discussions on relevant minimum human rights standards, as they maintained control of the country.
20. In 2024, the Mission will continue its engagement with relevant stakeholders at the national and subnational levels, including de facto authorities, civil society, international non-governmental organizations and the United Nations country team, in the protection and promotion of the human rights of all Afghans. Joint work with the Mine Action Service will continue, including the conduct of explosive ordnance threat assessments, advising and coordinating threat mitigation measures, and supporting the coordination of the humanitarian mine action sector to support humanitarian and basic human needs initiatives. This work is expected to result in increased enjoyment by all Afghans of their human rights; progressive compliance by the de facto authorities with international human rights and humanitarian law obligations; and progressive effort by the de facto authorities to hold perpetrators of human rights violations accountable, especially in relation to women and children.
21. Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure I).

Figure I

Performance measure: year-over-year reduction in child casualties from explosive remnants of war

(Percentage)

Result 2: advancing economic and social self-reliance

Programme performance in 2022 and target for 2024

22. In 2022, the Mission completed the development of a results framework and monitoring system for the United Nations Transitional Engagement Framework for Afghanistan and adopted the new aid architecture for Afghanistan, in line with its planned target. The Mission engaged with financial and banking sector stakeholders, including private sector actors in Afghanistan, to address the urgent needs of the Afghan economy, such as the dysfunction of the payment system and the financial sector. The United Nations also worked closely with private sector organizations on several joint programmes involving cash-for-work, livelihood generation and business and social enterprise recovery and support initiatives, including assistance for women-led and women-focused projects. In parallel, UNAMA continues to support the people of Afghanistan by mobilizing international

assistance and implementing development and accountability frameworks to facilitate continued donor support. The United Nations Transitional Engagement Framework for Afghanistan, which was launched on 26 January 2022, has been extended through 30 June 2023.

23. In 2024, the Mission's work will include engagement with all stakeholders at the national and subnational levels, including the de facto authorities, civil society, international non-governmental organizations and the United Nations country team, in supporting humanitarian assistance and basic human needs service delivery. The decisions of the de facto authorities to ban female Afghan employees from working in the United Nations and national and international non-governmental organizations will negatively affect the delivery of humanitarian assistance to most vulnerable populations across the country.
24. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 2 below).

Table 2
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Development of the Afghanistan National Peace and Development Framework II with five additional priority programmes	Implementation of existing national priority programmes following completion of prioritization, sequencing and beginning of preparation for new programmes	Completion and implementation of a monitoring system and results framework for the United Nations Transitional Engagement Framework for Afghanistan through the new aid architecture for Afghanistan	Implementation of the United Nations system-wide strategic planning framework; and the new aid architecture for Afghanistan, including multilateral financing for United Nations agencies	Continued implementation of the United Nations system-wide strategic planning framework; and the new aid architecture for Afghanistan, including multilateral financing for United Nations agencies, taking into consideration restrictions imposed on the female Afghan work force by the de facto authorities

Result 3: rights-based stability in Afghanistan

Programme performance in 2022 and target for 2024

25. In 2022, the Mission's work contributed to regular engagement with the de facto authorities, other national stakeholders and the international community for sustained support to meet humanitarian needs. The de facto Cabinet and de facto governors appointed across Afghanistan's 34 provinces remained all-male and predominantly Pashtun. The de facto authorities organized two grand ulema (religious scholars) gatherings in June and August 2022, with limited non-Taliban participation. They continued to reject calls by the political opposition and other Afghan stakeholders for a nationwide intra-Afghan dialogue. UNAMA continued engaging other national and subnational stakeholders, including community representatives, religious scholars, political opposition and former government officials, women groups, former justice sector officials, as well as business actors. Meanwhile, the de facto authorities imposed additional restrictions particularly on the civic and media space and women's rights. The latter included announcements on 23 March 2022 of the continued closure of secondary education for girls, on 20 December 2022 of the closure of universities to female students, and on 24 December 2022 the ban on female Afghan employees from working in national and international non-governmental organizations. On 4 April 2023, the de facto

authorities informed UNAMA that the existing order to ban female workers of non-governmental organizations from the workplace – with exceptions in the areas of health and primary education – also applied to female national United Nations staff members.

26. In 2024, the Mission will continue engaging with the de facto authorities on several overarching priorities, particularly on removing restrictions on women’s and girls’ rights and freedoms. The above-mentioned work is expected to impact the level of international assistance to meet humanitarian and basic human needs and efforts towards compliance with international human rights and humanitarian law obligations, as well as a more conducive environment for inclusive governance.

Lessons learned and planned change

27. A key lesson learned was the need for the Mission to continue focusing on coordination of the donor community’s priorities and funding streams across the United Nations country team. In applying the lesson, the Mission will continue to support the United Nations country team and international partners on the institutionalization of verifiable reporting mechanisms for the accountability of the United Nations system-wide strategic planning framework.
28. Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 3 below).

Table 3
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	Ad hoc engagement between de facto authorities and the international community United Nations injection of cash for humanitarian assistance, in coordination with the Central Bank of Afghanistan and other partners Establishment of a special trust fund for Afghanistan to manage donor funds for joint United Nations programmes to meet basic human needs	Regular United Nations engagement with the de facto authorities, other national stakeholders and the international community for sustained support to meet humanitarian and human needs, as well as compliance by relevant de facto authorities with international human rights and humanitarian law obligations Regular United Nations injection of cash for humanitarian assistance, in coordination with the Central Bank and other partners	Efforts towards inclusion of non-Taliban figures and those from different ethnic groups and geographical regions as ministers and deputy ministers and other key positions Establishment of more regular mechanisms at the national and subnational levels advancing inclusive, participatory and responsive governance Initiation of a structured policy dialogue for confidence-building between Afghan stakeholders and the international community Improved functionality of the Central Bank of Afghanistan	Continued efforts towards inclusive, representative, participatory and responsive governance; and pursuit of a political path for confidence-building between Afghan stakeholders and the international community towards peace

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
		Regular subnational outreach meetings and facilitated community relationship-building and engagement with de facto authorities	Adoption of a revised United Nations strategic planning framework (currently the United Nations Transitional Engagement Framework for Afghanistan)	

Deliverables

29. Table 4 below lists all deliverables of the Mission.

Table 4

Deliverables for the period 2022–2024, by category and subcategory

<i>Deliverables</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	4	4	4
1. Reports of the Secretary-General to the Security Council	4	4	4	4
Substantive services for meetings (number of three-hour meetings)	4	4	4	4
2. Meetings of the Security Council	4	4	4	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	48	56	48	42
3. Discussion/awareness-raising/sensitization sessions with human rights stakeholders, including local authorities, civil society organizations and human rights defenders, on human rights standards, where applicable	48	56	48	32
4. Consultations with Afghan women to enable an articulation of their views for engagement with the de facto authorities	–	–	–	10
Technical materials (number of materials)	1	1	1	1
5. Thematic or special human rights-related reports	1	1	1	1
C. Substantive deliverables				
Good offices: good offices with the de facto authorities, political actors, civil society and countries in the region in support of inclusive, representative, participatory and responsive governance processes, peace and stability at the national, subnational and local levels and humanitarian and basic services access; good offices through support for dialogue and confidence-building measures between the de facto authorities and other stakeholders to encourage and build consensus on subnational governance, inclusion, civic space and fundamental rights and freedoms; good offices for enhanced regional cooperation on security-political matters, economic development, disaster management and people-to-people contacts; and good offices for a coordinated international response to Afghanistan.				
D. Communication deliverables				
Outreach programmes, special events and information materials: outreach activities with Afghans, opinion leaders, the media, civil society and other agents of change to support the implementation of the Mission's mandate.				
External and media relations: press conferences, statements, advisories, backgrounders, interviews and other media engagements related to the Mission's objectives.				
Digital platforms and multimedia content: dissemination of the Mission's mandated work through the Mission's website and social media accounts.				

B. Proposed post and non-post resource requirements for 2024

1. Total resource requirements

Resource requirements (regular budget)

Table 5

Financial resources

(Thousands of United States dollars)

Category of expenditure	2022		2023		2024	Variance

^a One position is funded at 50 per cent and cost-shared with the Development Coordination Office.

^b Includes one P-5 position and one P-4 position approved as general temporary assistance.

30. The proposed resource requirements for 2024 for UNAMA amount to \$132,479,400 (net of staff assessment) and would provide for civilian personnel costs (\$93,244,900) consisting of salaries, common staff costs and danger pay for the deployment of 1159 positions (1 Under-Secretary-General, 2 Assistant Secretary-General, 1 D-2, 5 D-1, 28 P-5, 55 P-4, 56 P-3, 5 P-2, 137 Field Service, 1 General Service, 126 National Professional Officer, 647 Local level and 95 United Nations Volunteer), and the cost of 1 military observer (\$28,700), as well as operational costs in the amount of \$39,205,800.
31. The proposed resource requirements for 2024 reflects a marginal increase of \$200, compared with the appropriation of 2023. However, there are changes under the different budget classes, with the combined and net effect being cost-neutral. These changes include the following:
- A decrease of \$1,110,600 for civilian personnel costs, reflecting the net effect of:
 - An increase of \$580,900 for international staff, owing to the application of higher common staff cost percentage of 86 per cent for 2024 based on expenditure trends, compared with the rate of 81 per cent applied in the approved budget for 2023;
 - A decrease of \$807,100 for National Professional Officer positions due to the application of a higher vacancy rate of 10.5 per cent, compared with a vacancy rate of 4.0 per cent

Note: The following abbreviations are used in the tables: ASG, Assistant Secretary-General; FS, Field Service; GS, General Service; LL, Local level; NPO, National Professional Officer; USG, Under-Secretary-General.

applied in the 2023 approved budget, as well as the application of a lower common staff cost percentage of 31 per cent for 2024 based on expenditure trends, compared with the percentage of 34 per cent applied in 2023 approved budget;

- (iii) A decrease of \$759,300 for Local level staff positions due primarily to the application of a higher vacancy rate of 9.5 per cent, compared with 4.0 per cent applied in the 2023 approved budget;
 - (iv) A decrease of \$125,100 for United Nations Volunteers, owing to the application of a higher vacancy rate of 12.0 per cent for international United Nations Volunteers, compared with the vacancy rate of 10.0 per cent for 2023, as well as the application of a higher vacancy rate of 40.0 per cent for national United Nations Volunteers, compared with the approved vacancy rate of 7.0 per cent for 2023.
- (b) An increase of \$1,106,700 for operational costs, reflecting the net effect of:
- (i) An increase of \$974,900 under other supplies services and equipment owing to higher requirements of fees for the shipment of cash into Afghanistan and anticipated increased utilization of internal flights within Afghanistan through the United Nations Humanitarian Air Service;
 - (ii) An increase in \$294,400 under air operations owing mainly to the higher rental and operational cost in connection with the scheduled replacement of a fixed-wing aircraft, based on global market prices, as well as increased fuel requirement owing to higher average unit price;
 - (iii) An increase of \$249,900 under communications and information technology owing to higher requirement for public information services related to the political and local peace initiatives outreach, higher requirements for maintenance of communications and information technology equipment and support services, as well as replacement of critical information equipment;
 - (iv) A decrease of \$325,900 under facilities and infrastructure attributable mainly to lower requirements for rental of premises, security services and construction, alteration and renovation associated with the anticipated costs for the new office location resulting from the closure of the Alpha compound,¹ for which six months requirements was provided for the 2023 approved budget.

Vacancy rates

32. The proposed vacancy rates applied in the budget take into account the experience to date. The assumptions considered for the proposed vacancy rates include the 12-month average vacancy rate in 2022, and the actual vacancy rate as at 31 March 2023. The lower of the two has been used as the 2024 budgeted vacancy rate. This is in line with the policy guidance provided by the Field Operations Finance Division of the Department of Management Strategy, Policy and Compliance, to improve the accuracy and consistency of the vacancy rates applied in the proposed budgets for 2024 and to ensure that proposed vacancy rates are based, as much as possible, on actual rates. A vacancy rate of 50 per cent has been applied in the calculation of costs for the proposed establishment of new posts and positions, or posts and positions proposed for reassignment.

¹ The Alpha compound was a facility used to accommodate senior leadership and substantive personnel of the Mission since 4 October 2010. The Mission vacated the compound at the end of 2022.

Table 7
Vacancy rates

(Percentage)

Category	Actual average in 2022	Approved 2023	Actual as at 31 March 2023	Proposed 2024
Military and police personnel				
Military observer	33.0	17.0	0.0	0.0
Civilian personnel				
International staff	13.0	9.0	9.5	9.5
National staff

Local level	9.5	4.0	11.0	9.5
United Nations Volunteer				
International	15.0	10.0	12.0	12.0
National	40.0	7.0	40.0	40.0

2. Staffing requirements

33. The staffing complement proposed for 2024 for the Mission reflects a net decrease of five positions. The proposed staffing changes include the abolishment of seven positions (2 D-1, 1 P-4, 2 P-3, 1 Field Service and 1 Local level), the establishment of two positions at the P-4 level, reassignment of one position and redeployment of nine positions, as detailed by organizational unit below.
34. Annex II to the present report provides the organizational charts.

Special Representative of the Secretary-General for Afghanistan

35. The Mission is headed by the Special Representative of the Secretary-General for Afghanistan, who provides strategic leadership to the political, human rights and development/humanitarian coordination-related work of the United Nations in the country. The Special Representative also provides overall leadership of the Mission and is responsible for overseeing the work of the Front Office of the Special Representative and the political and development pillars and for ensuring their coherence in fulfilment of the Mission's strategic priorities. The Special Representative also serves as Head of Mission and is responsible for the executive management of the Mission's resources and administration.

Proposed organizational changes

Security Section	+1	P-4	Security Coordination Officer	Redeployment	From Jalalabad field office
Total	(7)				

36. The following changes are proposed for 2024, as reflected in table 9 above:

- (a) **Human Rights Service:** redeployment of one position of Associate Human Rights Officer (P-2) from the Kunduz field office to reinforce the Service in covering the scope of human rights operations regarding the protection of civilians, right to life, liberty and integrity, and the protection of children in situations of armed conflict, ensuring the continued effective implementation of the UNAMA human rights mandate regarding the protection of civilians, including children. It has been assessed that the workload of the position can be distributed effectively among the remaining staffing complement in Kunduz, and as such the proposed redeployment will not affect the human rights mandate delivery in the Kunduz field office.
- (b) **Strategic Communications Section (formerly Strategic Communications Service):**
- (i) Abolishment of three positions: one Chief of Service, Public Information (D-1), one Administrative Assistant (Field Service) and one Driver (Local level). With a decline in outlets and stricter controls by the de facto authorities, direct field level engagement with media, including outreach and field visits, has also changed in nature, necessitating heightened outreach by the Political Affairs Service and less outreach that is purely communications focused. Accordingly, and in view of the reduction in the nature and volume of workload on the Section, it is proposed to abolish the Chief of Service, Public Information (D-1). With regards to the Administrative Assistant (Field Service), it has been assessed that the functions can effectively be covered by other capacity within the Section. In addition, with the consolidation of the Mission's offices into a single compound, there is no further need for a dedicated driver in this Section, and the position of Driver (Local level) is proposed for abolishment;
- (ii) Establishment of one position of Public Information Officer (P-4) to support the Mission's strategic and crisis communications as needed, coordinating closely with communications experts and focal points in the country team to ensure coherence in internal and external communications and messaging. The position will ensure the development and implementation of a United Nations joint communications strategy, including consistent messaging on the continued engagement of the United Nations in Afghanistan;
- (iii) With the proposed abolishment of the Chief of Service, Public Information at the D-1 level, it is proposed that the Strategic Communication Service be renamed the Strategic Communications Section and be headed by a Chief at the P-5 level.
- (c) **Gender Advisory Unit:** establishment of one position of Gender Affairs Officer (P-4) to support the promotion of gender equality and women's empowerment, conduct research in conflict analysis, provide support to the leadership of women civil society and groups, and religious leaders to better define women's priorities for engagement and dialogue with the de facto authorities, support the identification of opportunities to engage with the de facto authorities on women peace and security at the national and sub-national levels, develop a framework for

engagement, as well as establish and strengthen regional coalitions/platforms, and coordinate Afghan women consultations to frame their views for engagement with the de facto authorities.

(d) **Strategic Engagement Advisory Section:**

(i) The Strategic Engagement Advisory Service was established in 2022 as a transitional arrangement in the Office of the Special Representative of the Secretary-General. The current staffing complement of the Service consists of eight positions (1 D-1, 1 P-5, 1 P-4, 2 P-3, 2 National Professional Officer and 1 Local level). In view of the political emphasis of the Mission’s engagement, it is proposed to realign this capacity to the political pillar in order to achieve better synergy. The following staffing changes are proposed:

- a. Abolishment of three positions: one Principal Political Affairs Officer (D-1), one Political Affairs Officer (P-4) and one Political Affairs Officer (P-3). With the movement of the strategic engagement functions to the political pillar, the functions and responsibilities of the Principal Political Affairs Officer (D-1) can be adequately discharged by the existing Senior Political Affairs Officer (P-5), while the functions of the Political Affairs Officers (1 P-4 and 1 P-3) can be covered by existing Political Affairs Officer positions in the Political Affairs Service;
- b. Redeployment of one position of Associate Political Affairs Officer (National Professional Officer) to the Herat field office to strengthen the work with the de facto authorities in the western region, including outreach, good offices and the mapping of key actors and related dynamics. The incumbent will support the analysis of relevant conflict dynamics, the development of specific conflict prevention and resolution projects, as well as preparatory outreach and engagement with external and internal partners to support the successful implementation of this work;
- c. Redeployment of the four remaining positions, comprising one Senior Political Affairs Officer (P-5), one Political Affairs Officer (P-3), one Associate Political Affairs Officer (National Professional Officer), and one Driver (Local level), to the political pillar, reporting to the Deputy Special Representative of the Secretary-General for Political Affairs;
- d. With the above change, it is proposed that the Strategic Engagement Advisory Service be renamed Strategic Engagement Advisory Section and headed by a Chief at the P-5 level.

(e) **Security Section:** redeployment of a Security Coordination Officer (P-4) from the Jalalabad field office as it has become exigent owing to the sensitivity and importance of the multiple units under the Security Section that require efficient management for optional service delivery to the whole Security Section clientele and support operations, mission-wide. The position will function as the deputy Chief Security Officer and would improve management of the increased workload of the Security Section, which lacks proper supervision at the appropriate level.

37. The Afghanistan Team of the Asia and the Pacific Division of the Department of Political and Peacebuilding Affairs (1 D-1, 1 P-5, 1 P-4, 1 P-3 and 1 General Service (Other level)) will continue to provide backstopping to the Mission, including the provision of operational support, assistance in

identifying and prioritizing critical strategic objectives in line with the Mission's mandate and political needs and engagement with Member States and other key regional and international partners.

38. The Deputy Special Representative of the Secretary-General (Political Affairs) advises the Special Representative of the Secretary-General on political issues and the dynamics affecting the implementation of the mandate of the Mission and manages the political pillar. The Deputy Special Representative supports the implementation of the UNAMA mandate through the provision of regular analyses of the political situation in the country and the region; by liaising with the international community, diplomatic community and non-governmental organizations in Afghanistan on political issues; by coordinating of political priorities within the Mission and with United Nations Headquarters; and the implementation of the UNAMA mandate through good offices and outreach, in particular in the areas of political stability and regional cooperation.

Total	4				

39. In 2024, the following changes are proposed for the Strategic Engagement Advisory Section: realignment of the section from the Office of the Special Representative of the Secretary-General, with the consequent redeployment of the four existing positions comprising one Senior Political Affairs Officer (P-5), one Political Affairs Officer (P-3); one Associate Political Affairs Officer (National Professional Officer); and one Driver (Local level), as described in paragraph 36 (d) above.

Office of the Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator

^a Funded at 50 per cent and cost-shared with the Development Coordination Office.

^b Includes one general temporary assistance position each.

40. The Deputy Special Representative of the Secretary-General/Resident Coordinator/Humanitarian Coordinator is responsible for maintaining links with the United Nations country team as part of the role of Resident Coordinator and Humanitarian Coordinator. The Security Council, in paragraph 5 (a), (b), (i) and (j) of its resolution [2626 \(2022\)](#), mandated the Deputy Special Representative to coordinate and facilitate the provision of humanitarian assistance and financial resources to support humanitarian activities; coordinate international donors and organizations in relation to basic human needs; coordinate the overall risk management approach of the United Nations in Afghanistan; and coordinate explosive ordnance threat mitigation measures in support of humanitarian and development initiatives.

Table 14

Aid Coordination Coherence Section	-1	P-4	Judicial Affairs Officer	Reassignment	
	+1	P-4	Coordination Officer	Reassignment	
Total	(1)				

41. The following proposals are made for 2024, as reflected in table 14 above:
- (a) **Front Office of the Deputy Special Representative/Resident Coordinator/Humanitarian Coordinator:**
- (i) Continuation of two general temporary assistance positions, comprising:
- a. One position of Senior Programme Management Officer (P-5), to continue to provide the ongoing functions of leading the implementation of the Mission's mine action programme in line with Security Council resolution 2626 (2022), paragraph 5 (c). The incumbent will continue to report to the Deputy Special Representative/Resident Coordinator/Humanitarian Coordinator and will continue to provide technical and strategic advice to Mission leadership and to relevant stakeholders on mine action and engage with national mine action authorities, the United Nations country team and the humanitarian team to advocate mine action;
- b. One position of Coordination Officer (P-4), to continue to undertake research and analysis, triangulating information on the delivery of assistance in Afghanistan and facilitate engagement and negotiation with the de facto institutions around operational challenges in delivering humanitarian and basic human needs assistance to the people of Afghanistan. The position will continue to focus on developing close working relationships with the Afghan civil society, the private sector and the media for effective advocacy, engagement and participation to better position and deliver aid in Afghanistan, in addition to advocating with the de facto authorities for rights, inclusion, equity, transparency and accountability in aid delivery.
- (b) **Resident Coordinator Office/United Nations Country Team Unit:** abolishment of one position of Coordination Officer (P-3). Owing to the lack of an internationally recognized government and constitutional and legal bodies, direct engagement with the de facto authorities around aid coordination has stopped, and a new aid architecture has been established. Under this new aid architecture, UNAMA has been assigned coordination and secretarial functions that require different expertise, including on coordinating donors and international financing platforms around thematic areas, as well as tracking incoming aid streams through data collection.
- (c) **Aid Coordination Coherence Section:** reassignment of Judicial Affairs Officer (P-4) to Coordination Officer (P-4) to provide coordination support and ensure effective linkages between all nexus stakeholders, including UNAMA components, the United Nations country team and the humanitarian country team members, bilateral and multilateral donors, regional organizations, international financial institutions, the private sector and civil society. Provide secretariat and coordination support to key elements of the new aid architecture, including to the Afghanistan Coordination Group and Strategic Thematic Working Groups.

Mission Support

Change	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-

42. Mission Support is under the overall responsibility of the Chief of Mission Support, who coordinates and supervises the work of four main areas, namely, the Office of the Chief of Mission Support, Operations and Resource Management, Supply Chain Management and Service Delivery Management.

Supply Chain Management

Table 16
Human resources: Supply Chain Management

Office/service/section/unit	Positions			
	Change	Level	Functional title	Action
Acquisition Management Unit	-1	FS	Procurement Assistant	Redeployment
Procurement Unit	+1	FS	Procurement Assistant	Redeployment
Total	-			

43. The following changes are proposed for 2024, as reflected in table 16 above:
- Acquisition Management Unit:** redeployment of one position of Procurement Assistant (Field Service) to the Procurement Unit to enhance the capacity within Unit with respect to the clearance of specifications, identification of vendors, recommendation of best value procurement awards, drafting and issuance of contracts and purchase orders, drafting of procurement cases, and compiling procurement data for presentations and report monitoring;
 - Procurement Unit:** redeployment of one position of Procurement Assistant (Field Service) from the Acquisition Unit as described in paragraph 43 (a) above.

Field offices in regions and provinces

44. The field offices will continue to drive mandate implementation at the subnational level through the building of effective working relationships with the de facto authorities to facilitate an enabling environment for mandate and programme implementation and strengthen coherence of United Nations activities. They will provide: (a) support for the provision of essential services to Afghans; (b) support for dialogue between the de facto authorities and local stakeholders on issues of subnational governance, basic rights and inclusion; (c) outreach and good offices, including the facilitation of dialogue between political stakeholders, focusing on promoting inclusive, representative, participatory and responsive governance and broad participation in public life; and (d) advice on local consultative mechanisms, confidence-building measures, and conflict management and reconciliation. The field offices will also maintain situational awareness, reporting and analysis, and engage with all stakeholders at the subnational level in the protection and promotion of human rights.
45. The Mission currently maintains six regional offices, located in Kabul, Kandahar, Herat, Balkh (Mazar-e Sharif), Nangarhar (Jalalabad) and Paktiya (Gardez), and five provincial offices, in Bamyan, Faryab (Maymana), Badakhshan (Faizabad), Baghlan (Pul-e Khumri) and Kunduz.
46. The Heads of Office have a direct reporting line to the Chief of Staff.

Proposed organizational changes

Regional offices

Table 18

Human resources: regional offices

Office/service/section/unit	Positions				
	Change	Level	Functional title	Action	Description
Herat	+1	NPO	Associate Political Affairs Officer	Redeployment	From Strategic Engagement Advisory Section
Jalalabad	-1	P-4	Security Coordination Officer	Redeployment	To Security Section in Kabul
Mazar-e Sharif	+1	NPO	Associate Information System Officer	Redeployment	From Kunduz Field Office
Total	1				

47. The following changes in the UNAMA regional offices are proposed for 2024, as reflected in table 18 above:

- (a) **Herat:** redeployment of Associate Political Affairs Officer (National Professional Officer) from the Strategic Engagement Advisory Section as described in paragraph 36 (d) above;
- (b) **Jalalabad:** redeployment of a position of Security Coordination Officer (P-4) to the Security Section, as described in paragraph 36 (e) above;
- (c) **Mazar-e Sharif:** redeployment of one position of Associate Information System Officer (National Professional Officer) from Kunduz field office to provide capacity support in the design, development and installation of information systems, develop enhancements and new features to existing systems; design and implement small, stand-alone systems as needed, maintain assigned portions of systems, providing operational support for system's applications, analysing and implementing system changes/upgrades.

Provincial offices

Table 19

Human resources: provincial offices

Office/service/section/unit	Positions				
	Change	Level	Functional title	Action	Description
Kunduz	-1	P-2	Associate Human Rights Officer	Redeployment	To Human Rights Service
	-1	NPO	Associate Information System Officer	Redeployment	To Mazar field office
Total	(2)				

48. The following changes in the UNAMA provincial offices are proposed for 2024, as reflected in table 19 above:

- (a) **Kunduz:**
 - (i) Redeployment of Associate Human Rights Officer (P-2) to Human Rights Service to achieve consistent and guided coverage with regard to the Mission's protection of civilians (including children) mandate. Without such guided coverage, and the consequent ability to provide reliable and credible human rights reporting, the ability of Human Rights Services to advocate effectively with all interlocutors would be reduced;
 - (ii) Redeployment of one position Associate Information System Officer (National Professional Officer) to the Mazar field office as described in paragraph 47 (c) above.

Consolidated Kuwait Office

Table 20

Staffing requirements: Consolidated Kuwait Office

	International staff											National staff			United Nations Volunteers			Total
	USG	ASG	D-2	D-1	P-5	P-4	P-3	P-2	FS	GS	Subtotal	NPO	LL	Subtotal	International	National	Subtotal

Change	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-

49. The Consolidated Kuwait Office comprises two components:

- (a) **UNAMA Support Office in Kuwait**, which includes one mission staff located in Kuwait, undertakes support functions that are not related to the Kuwait Joint Support Office, namely the position of Chief, Integrated Conduct and Discipline Unit (P-5), reporting directly to the Chief of Staff;
- (b) **Kuwait Joint Support Office**,² which provides full services to UNAMA and the United Nations Assistance Mission for Iraq (UNAMI) and other missions. UNAMA contributes 39 positions (1 P-5, 1 P-4, 2 P-3, 1 P-2, 14 Field Service and 20 Local level) funded directly from the Mission's budget.

50. The UNAMA Support Office in Kuwait and the Kuwait Joint Support Office are co-located within the premises occupied by UNAMI in Kuwait City.

51. No changes are proposed to the UNAMA Support Office in Kuwait and the Kuwait Joint Support Office.

Table 21

Staffing requirements: Kuwait Joint Support Office

² The Kuwait Joint Support Office is not a shared service centre approved by the General Assembly and it does not provide the full range of support services that are typically provided by regional service centres. In its resolution 65/259, the General Assembly noted the intention of the Secretary-General to establish a support office in Kuwait for UNAMA and requested him to explore possibilities for cost-sharing between UNAMA and UNAMI. Following a period of assessment, in October 2012 the Secretary-General informed the Assembly that the Kuwait Office would include a Kuwait Joint Support Office, which would integrate UNAMA and UNAMI functions in the areas of finance and human resources.

4. Analysis of resource requirements

Military and police personnel costs

(Thousands of United States dollars)

	Appropriation 2022	Expenditures 2022	Appropriation 2023	Requirement 2024	Variance 2024 vs. 2023
Military observers	24.6	9.8	24.6	28.7	4.1

52. Resources amounting to \$28,700 are proposed to provide for the deployment of one military observer, which includes requirements for: (a) mission subsistence allowance based on the standard daily rate of \$64 for the “first 30 days” and \$42 for “after 30 days”, given that accommodation is provided (\$16,000); (b) travel costs for placement, rotation and repatriation to and/or from the military observer’s country of residence (\$7,500); (c) clothing allowance based on a standard rate of \$100 for every six-month period of service (\$200); and (d) provision for death and disability claims (\$5,000).
53. The increase is attributable to the assumption of full deployment for 2024, based on actual deployment in March 2023, compared with a vacancy rate of 17 per cent applied for 2023.

Civilian personnel costs

(Thousands of United States dollars)

	Appropriation 2022	Expenditures 2022	Appropriation 2023	Requirement 2024	Variance 2024 vs. 2023
International staff	51 822.3	56 389.8	54 831.6	55 303.0	471.4

54. Resources amounting to \$55,303,000 are proposed to provide for salaries (\$28,366,100), common staff costs (\$24,335,100) and danger pay (\$2,601,800) for 289 international positions (1 Under-Secretary-General, 2 Assistant Secretary-General, 1 D-2, 5 D-1, 27 P-5, 54 P-4, 56 P-3, 5 P-2, 137

Field Service and 1 General Service (Other level)), including the establishment of two positions at the P-4 level.

55. A vacancy rate of 9.5 per cent has been applied to the estimates for continuing positions, based on the actual vacancy rate in March 2023, while a vacancy rate of 50 per cent has been applied to the two positions (P-4) proposed for establishment and the one position (P-4) proposed for reassignment.
56. The increase is attributable mainly to the application of higher common staff cost percentage of 86 per cent for 2024 to reflect the latest expenditure trends, compared with 81 per cent applied in the budget for 2023, as well as the proposed establishment of two positions (P-4), offset by: (i) the application of a higher vacancy rate of 9.5 per cent, compared with a vacancy rate of 9.0 per cent applied for 2023; (ii) the proposed abolishment of six positions (2 D-1, 1 P-4, 2 P-3 and 1 Field Service); and (iii) the proposed reassignment of one position to which a 50 per cent vacancy rate has been applied.

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
National Professional Officer	9 689.3	8 797.0	10 311.3	9 504.2	(807.1)

57. Resources amounting to \$9,504,200 are proposed to provide for salaries (\$6,641,200), common staff costs (\$2,081,800) and danger pay (\$768,600) for continuation of 126 National Professional Officer positions.
58. A vacancy rate of 10.5 per cent has been applied to the estimates for continuing positions, based on the actual average vacancy rate in 2022.
59. The decrease is attributable mainly to the application of a higher vacancy rate of 10.5 per cent, compared with 4.0 per cent applied for 2023, as well as the application of a lower common staff cost percentage of 31 per cent for 2024 to reflect the latest expenditure trends, compared with 34 per cent applied in 2023 budget.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
Local level staff	23 763.0	23 816.0	24 150.8	23 391.5	(759.3)

60. Resources amounting to \$23,391,500 are proposed to provide for salaries (\$13,949,800), common staff costs (\$5,650,100) and danger pay (\$3,791,600) for the continuation of 647 national Local level positions.
61. A vacancy rate of 9.5 per cent has been applied to the estimates for continuing positions, based on the actual average vacancy rate in 2022.
62. The decrease is attributable mainly to the application of a higher vacancy rate of 9.5 per cent, compared 4.0 per cent approved for 2023, as well as application of a lower common staff cost percentage of 41 per cent for 2024 to reflect the latest expenditure trends, compared with 42 per cent applied in the 2023 budget.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
United Nations Volunteers	4 017.7	3 498.6	4 692.5	4 567.4	(125.1)

63. Resources amounting to \$4,567,400 are proposed to provide for the deployment of 95 United Nations Volunteer positions (75 international and 20 national).
64. Vacancy rates of 12.0 per cent and 40.0 per cent have been applied to the estimates for international and national United Nations Volunteers, respectively, based on the actual vacancy rates in March 2023.
65. The decrease is attributable mainly to the application of a higher vacancy rate of 12.0 per cent for international United Nations Volunteers, compared with the vacancy rate of 10.0 per cent approved for 2023, and the application of a higher vacancy rate of 40.0 per cent for national United Nations Volunteers, compared with the vacancy rate of 7.0 per cent approved for 2023.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
General temporary assistance	46.0	–	369.3	478.8	109.5

66. Resources amounting to \$478,800 are proposed to provide for the continuation of two general temporary assistance positions, comprising one Senior Programme Management Officer (P-5) and one Coordination Officer (P-4) as explained in paragraph 41 (a) above.
67. A vacancy rate of 9.5 per cent has been applied to the cost estimates, based on the actual average vacancy rate for international staff in March 2023.
68. The increase is attributable mainly to the application of the continuing vacancy rate of 9.5 per cent for the computation of salary costs for the Coordination Officer (P-4) position that was approved for establishment in the 2023 budget to which a vacancy rate of 50.0 per cent was applied, as well as the higher common staff cost percentage of 88 per cent for 2024 to reflect the latest expenditure trends, compared with 83 per cent applied in the budget for 2023.

Operational costs

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
Consultants and consulting services	32.1	13.0	19.6	19.6	–

69. Resources amounting to \$19,600 are proposed to provide for consulting services to train Mission personnel in language skills in Dari, Pashto and English.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
Official travel	1 042.0	1 306.8	1 010.9	994.7	(16.2)

70. Resources amounting to \$994,700 are proposed to provide for official business travel (\$758,700) comprising: within-Mission travel for essential technical support for field offices and to attend various high-level conferences on Afghanistan to ensure that regular programme consultation takes place among the various components of the Mission for the efficient implementation of its mandate; and travel outside the Mission area, which includes the Special Representative of the Secretary-General and senior staff, for the implementation of the Mission's mandate, as well as meetings and

consultations with political counterparts and for briefings to the Security Council; as well as travel for training purposes (\$236,000).

71. The decrease is attributable mainly to increased utilization of videoconferencing services to the extent possible for within-Mission consultations.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
Facilities and infrastructure	21 981.1	21 252.3	20 078.3	19 752.4	(325.9)

72. Resources amounting to \$19,752,400 are proposed to provide for acquisition of engineering supplies (\$195,200); prefabricated facilities, accommodation and refrigeration equipment (\$164,100); generators and electrical equipment (\$300,000); furniture (\$96,600); office and other equipment (\$101,900); and safety and security equipment (\$417,800); rental of premises (\$1,224,000); utilities and waste disposal services (\$130,600); maintenance services (\$3,051,400); security services (\$9,046,400); construction, alteration, renovation and major maintenance (\$376,000); stationery and office supplies (\$39,500); spare parts and supplies (\$151,900); field defence supplies (\$49,200); petrol, oil and lubricants (\$4,396,400); and sanitation and cleaning materials (\$11,400).
73. The decrease is attributable mainly to the lower requirements for rental of premises, security services and construction, alteration and renovation resulting from the closure of the Alpha compound, for which a provision for six months requirements was provided for in the approved budget for 2023. The reduced requirements are offset in part by the higher consumption of 4.3 million litres of diesel fuel at an average cost of \$0.991 per litre, based on projected consumption, compared with 3.8 million litres at an average cost per litre of \$1.010 provided for in the 2023 approved budget, and higher requirements for the acquisition of three power generators to replace aging assets that will be reaching the end of their life expectancy and require replacement.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
Ground transportation	465.6	525.7	481.1	459.5	(21.6)

74. Resources amounting to \$459,500 are proposed to provide for the rental of vehicles (\$17,300); repairs and maintenance (\$12,200); liability insurance (\$6,200); spare parts (\$175,600); and petrol, oil and lubricants (\$248,200).
75. The decrease is attributable mainly to the lower requirements for spare parts owing to stock availability, offset in part by higher anticipated consumption of 199,500 litres of diesel fuel at an average cost of \$0.991 per litre, compared with 182,095 litres at an average cost per litre of \$1.010 provided for in the 2023 approved budget.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
Air operations	9 066.2	6 428.6	8 210.1	8 504.5	294.4

76. Resources amounting to \$8,504,500 are proposed to provide for services (\$152,300); landing fees and ground handling charges (\$442,700); air crew subsistence allowance (\$68,000); petrol, oil and

lubricants (\$1,425,600); rental and operational costs for two fixed-wing aircraft (\$6,392,300); and liability insurance (\$23,600).

77. The increase is attributable mainly to: (i) higher rental and operational costs, in connection with the scheduled replacement of a fixed-wing aircraft, based on global market prices; (ii) the higher average price of \$1.233 per litre of jet fuel, compared with the average price of \$1.120 applied in the approved budget for 2023; (iii) higher requirements for services, landing fee, air crew subsistence allowance owing to an increase in the number of international flights planned based on operational requirements.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
Communications and information technology	5 697.1	7 885.9	5 781.9	6 031.8	249.9

78. Resources amounting to \$6,031,800 are proposed to provide for the acquisition of communications and information technology equipment (\$1,263,700); telecommunications and network services (\$2,695,500); maintenance of communications and information technology support services (\$645,300); spare parts (\$285,500); software, licences and fees (\$511,600); and public information and publication services (\$630,100).

79. The increase is attributable mainly to: (i) higher requirement for public information services owing to higher requirements for the political and local peace initiatives outreach; (ii) higher requirements for maintenance of communications and information technology equipment and support services, as well as telecommunications and network services owing to higher communication carrier costs and maintenance costs; and (iii) replacement of critical information equipment, including computer servers, checkpoint firewall and routers, required to ensure sustainable and secure network connectivity at various locations, to mitigate exposing the Mission’s network to risk of cybersecurity attacks, as well as laptops which have passed their useful life.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
Medical	1 453.8	1 545.2	851.4	802.6	(48.8)

80. Resources amounting to \$802,600 are proposed to provide for the acquisition of equipment (\$50,000); UNAMA apportionment in shared medical services, including aeromedical evacuations, specialist consultations and additional medical capacity comprising a forward surgical team and an aeromedical evacuation team with the assumption that agencies, funds and programmes will contribute the remaining two thirds of the budget to cover the total estimated costs of these services (\$595,300), and medical supplies, including vaccines, pharmaceuticals and consumable items (\$157,300).

81. The decrease is attributable mainly to the non- requirement for COVID-19 polymerase chain reaction (PCR) testing supplies, as a result of the general subsiding of the disease.

(Thousands of United States dollars)

	<i>Appropriation</i> 2022	<i>Expenditures</i> 2022	<i>Appropriation</i> 2023	<i>Requirement</i> 2024	<i>Variance</i> 2024 vs. 2023
Other supplies, services and equipment	2 289.5	2 651.9	1 665.8	2 640.7	974.9

82. Resources amounting to \$2,640,700 are proposed to provide for: (a) welfare (\$61,300); (b) mine detection and mine-clearing services (\$147,600); (c) training fees, supplies and services (\$91,900); (d) official functions (\$19,700); (e) hospitality (\$16,200); (f) general insurance to provide coverage for cash in-transit and for the shipment of equipment and supplies to the mission area (\$24,000); (g) fees associated with the shipment of cash to Afghanistan owing to the restrictions placed on the Central Bank of Afghanistan, and bank charges payable to financial institutions in locations where the Mission maintains bank accounts (\$965,000); (h) miscellaneous claims and adjustments to cover third-party claims for incidents caused by mission staff in the course of the performance of their official duties and claims for the loss of personal effects (\$17,600); (i) other freight and related costs, including mail and pouch services, freight forwarding and related costs to cover the shipment of materials and supplies, customs clearance services, within-mission travel for flights through the United Nations Humanitarian Air Service, demurrage and detention charges and freight-related charges for the acquisition of equipment and supplies (\$1,196,900); (j) rations, including the maintenance of the emergency stock of rations and the supply of filtered water in offices for consumption by staff (\$67,100); and (k) other services related to the Mission's share of the costs of expert panels conducting an assessment and the rostering of candidates for generic job openings used by field missions (\$33,400).
83. The increase is attributable mainly to the higher fees for the shipment of cash into Afghanistan based on 2022 expenditure and increased requirements for other freight and related costs owing to the anticipated increased utilization of internal flights within Afghanistan through the United Nations Humanitarian Air Service.

Extrabudgetary resources

(a) Voluntary contributions

84. In 2023, voluntary contributions amounting to approximately \$192,000 is projected to be utilized under the Department of Political and Peacebuilding Affairs multi-year appeal trust fund to support the national youth United Nations Volunteers programme which supports the hiring of 10 Afghan female university graduates. The programme's objective is in line with the Mission's mandate and contributes to advancing inclusive peacemaking, sustained peace building with reinforced local capacities, learning from past practices and incorporating innovative approaches and resources for peacebuilding.
85. For 2024, voluntary contributions amounting to approximately \$192,000 is projected to be utilized for the continuation of the National Youth United Nations Volunteers programme.

(b) Cost recovery

86. In 2023, resources in the amount of \$22,000,000 are estimated to be received from United Nations agency, funds and programmes and other entities through the cost recovery mechanism, for services provided by the Mission to these entities, including co-location in Mission compounds and medical services throughout Afghanistan. Such services are provided to achieve economies of scale and enable cost effective programme delivery, while promoting higher cooperation as envisaged by the "One UN" principle. These cost recovery resources will be utilized to provide for the staff costs of four positions (1 Field Service and 3 United Nations Volunteers), and for medical related requirements including medical personnel and supplies, as well as the costs associated in maintaining United Nations compounds including security services, rent, utilities and maintenance services, etc. Such resources will complement regular budget resources of the Mission.

87. Similarly, in 2024 resources in the amount of \$22,000,000 are projected to be received from these entities and will continue to be utilized to provide for the staff costs of four positions (1 Field Service and 3 United Nations Volunteers), medical related requirements, including medical personnel and supplies and the costs associated in maintaining United Nations compounds, including security services, rent, utilities and maintenance services, etc.

Annex I

Summary of follow-up action taken to implement the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the General Assembly

Brief description of the recommendation

Action taken to implement recommendation

Advisory Committee on Administrative and Budgetary Questions (A/76/7/Add.41)

The Committee trusts that efforts will continue to be made to obtain additional extrabudgetary funding for United Nations Volunteer positions under the national youth programme and looks forward to an update thereon in the UNAMA proposed budget for 2024 (see also A/76/7/Add.5, paras. 17 and 18).

For 2023 and 2024, voluntary contributions amounting to approximately \$192,000 per year are projected to be utilized to enable the continuation of the national youth United Nations Volunteers programme (see paras. 84–85 above).

Advisory Committee on Administrative and Budgetary Questions (A/77/7/Add.5)

The Advisory Committee notes that the incumbent of the position would perform functions that are related to the provision of humanitarian assistance and is of the view that the funding of the position should be cost-shared with the resident coordinator system. The Committee recommends that the position be established as a general temporary assistance position (P-4) at this stage and trusts that updated information, including on the possible cost-sharing arrangement, will be provided in the next budget submission (para. 18).

The Mission has started discussions with the Development Coordination Office for the possible cost-sharing of the Coordination Officer (P-4) in the Front Office of the Deputy Special Representative/Resident Coordinator/Humanitarian Coordinator. Further progress on this will be reported in future budget proposals.

The Advisory Committee trusts that all vacant positions will be filled expeditiously and that an update on the recruitment status, including on the long-vacant positions, will be provided to the General Assembly at the time of its consideration of the present report and in the next budget submission (para. 22).

The Mission seeks to expeditiously fill vacant positions and continues to make every effort to reduce recruitment lead time through rigorous follow-up with programme managers. Female national United Nations Volunteers, as well as other female national applicants are actively encouraged to apply for vacant positions and are sent details of positions as they become vacant. A list of positions vacant for over two years, including justification and information on the recruitment status is provided in the supplementary information to the present report.

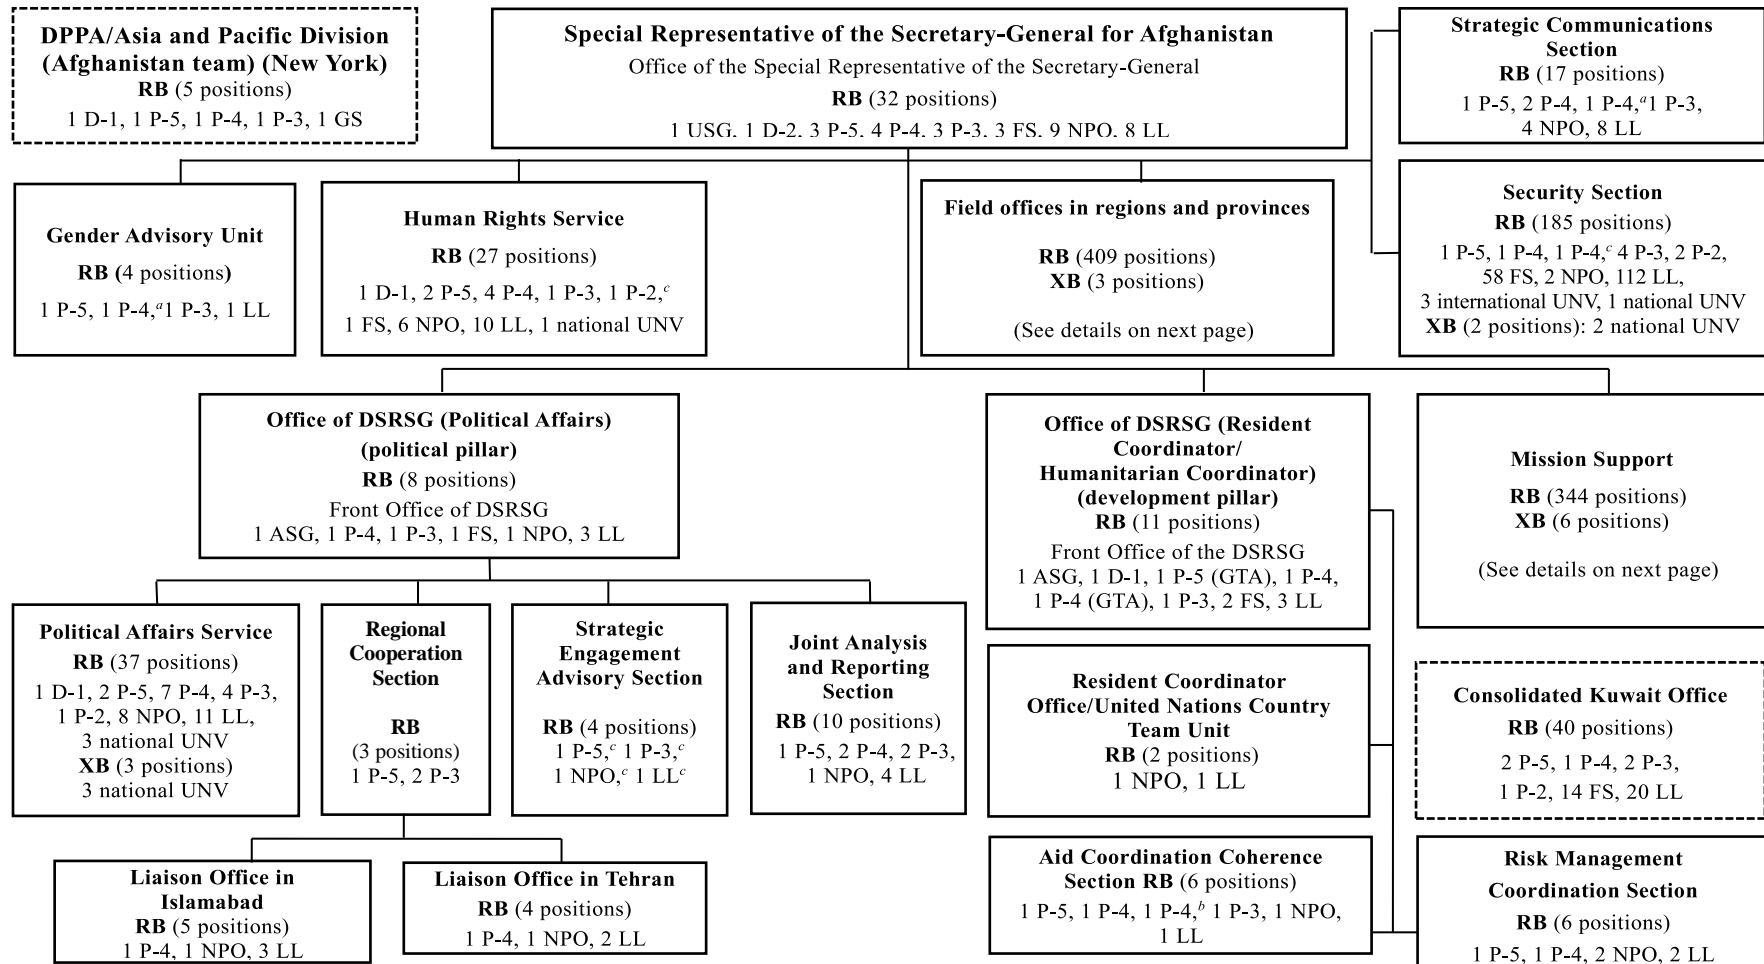

The Advisory Committee trusts that UNAMA will continue its efforts to formalize cost-sharing arrangements of security-related support provided to agencies, funds and programmes, and provide an update thereon in the context of the report on the proposed requirements for 2024 (para. 37).

While significant progress has been made in this respect over the past few years, the Mission will continue to explore the sharing of costs of its support provided by the Mission to agencies, funds and programme, who are incidental beneficiaries of certain security services by virtue of the Mission's deployment.

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the General Assembly.

I. Overview of the Mission

(\$98,462,400)

Foreword

The formation of the new government in Iraq in late 2022, a year after the October 2021 elections, presents an opportunity for the Iraqi authorities to address the pressing issues facing the country and its people, the priorities in the Government's programme of work having been identified as the fight against corruption, high levels of unemployment and poor public service delivery.

The United Nations Assistance Mission for Iraq (UNAMI) will support Iraq's path to peace, security and sustainable development by facilitating ongoing reforms and an institutionalized dialogue between the federal Government and the Kurdistan Regional Government and by lending its good offices in support of a swift implementation of the Sinjar Agreement and the successful conclusion of the Kirkuk negotiations. The Mission will also remain closely engaged in Iraq's efforts to address significant environmental challenges, water scarcity, regional tensions and broader geopolitical dynamics that affect the country's stability.

Respect for international human rights norms and standards is another priority. The Mission will continue to assist in protecting civic space, strengthening institutional human rights capacity, ensuring equality and promoting accountability. Supporting durable solutions and the return of Iraqi citizens from north-eastern Syrian Arab Republic, including the Al-Hol camp, also remains an important endeavour.

In this context, the ongoing support of the United Nations and the wider international community remains essential. We will continue to operate in line with the long-term objectives of UNAMI and to assist Iraq in assuming full ownership of current and future challenges in achieving sustainable peace, security and development.

(Signed) Jeanine **Hennis-Plasschaert**
Special Representative of the Secretary-General for Iraq
Head of the United Nations Assistance Mission for Iraq

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

1. The United Nations Assistance Mission for Iraq (UNAMI) is responsible for the provision of advice, support and assistance to the Government and people of Iraq on advancing inclusive, political dialogue and national and community-level reconciliation. The mandate is defined in Security Council resolutions [1483 \(2003\)](#) and [1500 \(2003\)](#) and expanded by the Council through resolutions [1770 \(2007\)](#) and [2107 \(2013\)](#), and renewed by its resolutions [1830 \(2008\)](#), [1883 \(2009\)](#), [1936 \(2010\)](#), [2001 \(2011\)](#), [2061 \(2012\)](#), [2110 \(2013\)](#), [2169 \(2014\)](#), [2233 \(2015\)](#), [2299 \(2016\)](#), [2367 \(2017\)](#), [2421 \(2018\)](#), [2470 \(2019\)](#), [2522 \(2020\)](#), [2576 \(2021\)](#) and [2631 \(2022\)](#). In its resolution [2631 \(2022\)](#), the Council extended the mandate of the Mission until 31 May 2023.
2. UNAMI will, at the request of the Government of Iraq, continue to provide outreach and good offices for the promotion of an inclusive political system. The Mission will support dialogue on ongoing disputes, including regarding the implementation of the Sinjar Agreement and, in Kirkuk, regarding internal boundaries. It will advise the Government on constitutional review and advise and assist with electoral processes. UNAMI will also encourage regional dialogue and cooperation, including on issues of border security, energy, environment, climate change and refugees. Support will be provided to the Government and people of Iraq in advancing community and national reconciliation, including issues related to minorities; implementing the women and peace and security agenda and gender mainstreaming; promoting accountability, the protection of human rights and the rule of law, in addition to supporting the United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant (UNITAD), pursuant to Security Council resolution [2379 \(2017\)](#); strengthening child protection, including the rehabilitation and reintegration of children; combating terrorism, including by preventing radicalization; and reforming the security sector. Under Council resolution [2107 \(2013\)](#), UNAMI will also promote, support and facilitate efforts regarding the repatriation or return of all Kuwaiti and third-country nationals or their remains and the return of Kuwaiti property, including the national archives.

Programme of work

Objective

3. The objective, to which this Mission contributes, is to achieve sustainable peace, security and development while reaffirming the independence, sovereignty and territorial integrity of Iraq.

Strategy and external factors for 2024

4. To contribute to the objective, the Mission will:
 - (a) Promote inclusive dialogue among political actors, including through broad engagement with institutional stakeholders and the provision of advice and recommendations on key policy issues and their implementation, which is aimed at achieving broad agreement among political actors, enhancing the execution of political and other institutional reforms and strengthening public confidence in the State;
 - (b) Work closely with the legislative and executive institutions of Iraq to support the formulation, adoption and implementation of legislative and constitutional reforms that will underpin longer-term political and rights-based socioeconomic development;

- (c) Promote cross-community dialogue and reconciliation, mitigate local tensions and strengthen social cohesion, in particular with regard to the implementation of the Sinjar Agreement, the conclusion of the Kirkuk negotiations and the resolution of the internally disputed territories;
 - (d) Support institutionalized, structured and time-bound dialogue between the federal Government and the Kurdistan Regional Government on outstanding issues, such as the federal budget, oil and revenue-sharing, border control, security issues and internally disputed boundaries, in order to reach a mutually accepted, sustainable solution in line with article 140 of the Constitution of Iraq;
 - (e) Provide technical advice and capacity-building to the electoral institutions of Iraq as well as support for the planning and preparation of electoral processes;
 - (f) Assist the Government of Iraq in promoting accountability for human rights violations, to build and strengthen trust among the Government, justice institutions, civil society and communities;
 - (g) Monitor and report on human rights developments in order to support government efforts to protect and promote human rights in accordance with the country's Constitution and international obligations;
 - (h) Provide technical support to strengthen institutional capacities, national policies and practices for the protection of civic and democratic space and fundamental rights and freedoms, including the freedom of expression and the right to peaceful assembly, the rights to liberty and protection of all persons from arbitrary arrests, abductions, enforced disappearances and torture;
 - (i) Advocate for the reform of criminal justice law and policy to ensure respect for due process and fair trial standards, and promote accountability for perpetrators and redress for victims, including victims of gender-based and domestic violence and conflict-related sexual violence;
 - (j) Promote sustainable long-term development by coordinating the efforts of national and international stakeholders;
 - (k) Promote stabilization, recovery and peacebuilding initiatives, including security sector reform and countering adverse impacts of climate change, in particular those posing a threat to security and stability, including on water scarcity, desertification and drought, together with the United Nations country team;
 - (l) Advocate for development assistance in line with government priorities and the 2020–2024 United Nations Sustainable Development Cooperation Framework;
 - (m) Promote, support and facilitate efforts regarding the repatriation or return of remains of all Kuwaiti and third-country nationals and the return of Kuwaiti property, including the national archives.
5. The above-mentioned work will result in:
- (a) The implementation of a government programme that takes the necessary steps to meet the Iraqi people's desire for reform, including economic reform and counter-corruption measures;
 - (b) The implementation of consensus-driven constitutional reforms developed in the reviews by the presidential and parliamentary constitutional review committees;
 - (c) The implementation of laws and other political and security mechanisms crucial to the consolidation of the relationship between Baghdad and Erbil;
 - (d) Strengthened and inclusive local governance and community-level reconciliation, notably in the implementation of the Sinjar Agreement and in the Kirkuk negotiations regarding disputed internal boundaries;
 - (e) Increased capacity of Iraqi electoral institutions to execute Iraqi-led, Iraqi-owned free and fair elections, with enhanced public participation and acceptance of election results;
 - (f) Respect for fundamental human rights principles and norms;

- (g) Preservation and expansion of civic and democratic space, including the freedom of expression, the right to peaceful assembly and respect for dissent;
 - (h) Increased accountability for human rights violations and abuses, including in the context of demonstrations, as well as accountability for domestic and gender-based violence, including improved redress for victims;
 - (i) Increased compliance with fair trial standards and procedural guarantees, including the prevention of torture and ill-treatment of detainees;
 - (j) A reduction in protracted internal displacement and coordinated support for durable solutions through the application of an area-based coordination mechanism, including with regard to climate change displacement;
 - (k) Support to returnees and resilience with respect to countering adverse impacts of climate change.
6. With regard to cooperation with other entities, UNAMI collaborates and coordinates its efforts with international donors and 22 resident and 5 non-resident United Nations agencies, funds and programmes. Areas of work include reconstruction, economic reform, capacity development and support for Iraq's electoral institutions, sustainable development and addressing climate change. The Mission also supports coordination with international financial institutions, such as the World Bank, the International Finance Corporation and the International Monetary Fund. In doing so, UNAMI leads or participates in critical national development and humanitarian bodies, such as the Executive Committee for Recovery, Reconstruction and Development, the Development Partners' Forum, the Stabilization Task Force, the Returns Working Group, the non-governmental organization Coordination Committee for Iraq and the Prospects Partnership.
7. With regard to inter-agency coordination and liaison, UNAMI engages with the United Nations country team in a wide range of activities aimed at the promotion and protection of human rights and the rule of law, including on issues relating to women, ethnic and religious minorities and grave violations against children in situations of armed conflict. In particular, it works with the United Nations country team, in support of the national and local government authorities and religious organizations, to raise awareness of the impact of violent extremism on Iraqi society. The Mission also supports the work of UNITAD in the implementation of its mandate. In addition, UNAMI collaborates with the United Nations Development Programme to assist the Government of Iraq on security sector reform and on capacity development of the country's electoral institutions.
8. The overall plan for 2024 is based on the following planning assumptions:
- (a) The Government and Parliament continue to make progress towards the implementation of priorities as identified in the federal Government's programme of work;
 - (b) Elections for the Kurdistan Regional Government take place in 2023 and Iraqi provincial council elections take place in late 2023 or early 2024;
 - (c) The Government of Iraq and other Iraqi stakeholders make progress on the adoption and implementation of political, economic, electoral and constitutional reforms on priority areas, in particular with regard to corruption, unemployment and public service delivery;
 - (d) The federal Government and the Kurdistan Regional Government engage in a structured, regular and genuine political dialogue to fully normalize relations and resolve outstanding issues;
 - (e) The security situation remains sufficiently permissive to gain access to all affected populations and key stakeholders in relation to mandate implementation;
 - (f) The Government of Iraq makes efforts to implement security sector reforms, including bringing all weapons and armed groups under State control, and ensuring the successful integration of the Popular Mobilization Forces into the Iraqi security forces;

- (g) Events unfolding in the wider region do not adversely affect the internal political stability of Iraq;
 - (h) The Government of Iraq engages with the United Nations in Iraq to facilitate the implementation of technical cooperation and monitoring of human rights and remains committed to promoting, respecting and protecting human rights and the rule of law, including through measures to preserve and expand civic and democratic space and the enactment of relevant legislation, policy measures and action plans in accordance with the Constitution of Iraq and its international obligations;
 - (i) The Government of Iraq demonstrates commitment to advancing women's rights and gender equality, submitting relevant draft legislation and creating strong institutional mechanisms to ensure accountability and track and monitor progress on meeting international commitments towards the advancement of women in all spheres of life, including decision-making processes;
 - (j) The Government of Iraq engages with the United Nations in Iraq to develop a common strategy to tackle the adverse impact of climate change, including the reduction of gas flaring, improvement of water management systems, increased investment in renewable energy and the provision of incentives for green economy projects, in alignment with the country's national adaptation plan;
 - (k) The Government of Iraq works to improve service delivery and meet public expectations, alleviating the root causes of social unrest, including by actively promoting full youth participation in society and creating job opportunities for young people.
9. The Mission integrates a gender perspective in its operational activities, deliverables, data collection, and results, as appropriate and in support of the women and peace and security agenda. In its engagement with institutional stakeholders at the federal and regional levels, the Mission promotes gender mainstreaming with a focus on strengthening women's representation and participation in political and electoral processes and in decision-making. The Mission co-chairs the United Nations Gender Task Force for Iraq along with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and supports the Women's Advisory Group, which is composed of Iraqi women, using those platforms to synergize efforts to advance women's empowerment and gender equality in an integrated manner across United Nations entities in Iraq.
10. In line with the United Nations Disability Inclusion Strategy, UNAMI engages with the Government, disability rights organizations and the United Nations country team to support policy measures to promote the human rights of persons with disabilities, with a focus on accessibility, employment opportunities and access to social and public services, and supports the implementation of recommendations of United Nations human rights mechanisms on disability rights. Through its internal working group on the United Nations Disability Inclusion Strategy and the Mission-specific action plan, UNAMI takes actions to develop a disability-friendly environment.

Impact of the pandemic and lessons learned

11. The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had a limited impact on the implementation of the Mission's mandate. National and international movement restrictions eased in 2022, enabling a return to normalized mandate delivery and operational conditions marked by increased travel, in-person engagements with national and civil society counterparts and smoother supply chain management. UNAMI continued its close coordination with the United Nations country team and UNITAD to implement COVID-19 mitigation and prevention measures in its integrated compounds and effectively limit the spread of occasional positive cases of the virus. To respect occupational health and safety concerns and balance continued and effective mandate implementation, the Mission made use of alternate working arrangements and hybrid working modalities in the implementation of its activities by mixing virtual and in-person meetings and events. Activities that could not be replaced by hybrid working modalities had to be cancelled or postponed until 2023, including some human rights monitoring-related reporting in detention

facilities and sensitive investigations, in-person mediation engagements in Sinjar and Kirkuk and a project on national reconciliation and the role of women in peace and security.

12. The Mission continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of its programming owing to the COVID-19 pandemic, including the use of hybrid working modalities, flexible working arrangements and the use of online capacity-building for staff. While the use of digital meetings to complement and replace in-person engagements was found to have the benefits of limiting travel costs and increasing access to greater numbers of beneficiaries, the Mission found that digital and hybrid activities in the areas of facilitating government formation, mediation of reconciliation processes, such as those in Sinjar and Kirkuk, and human rights monitoring needed to be repeated significantly more often than in-person engagements to achieve the same impact.

Programme performance in 2022

De-escalating political tensions and facilitating inclusive government formation

13. Following its support in 2021 to promote an environment conducive to credible and inclusive elections, UNAMI facilitated inclusive dialogue and made use of its good offices to de-escalate political tensions around the long and protracted government formation process. On 13 October 2022, the Council of Representatives elected Abdullatif Jamal Rashid as President of Iraq. The election marked an essential constitutional step towards establishing a new government following the national parliamentary elections held on 10 October 2021. Subsequently, a government was formed under Prime Minister Mohammed Shia' al-Sudani, consisting of 23 ministers, including three women. The Government's programme gave priority to combating corruption, addressing unemployment and creating work opportunities, supporting vulnerable and low-income groups, reforming the economic and financial sectors and enhancing public services.
14. During this period, the Mission continued to advocate for peace and security by promoting women's political participation, including in the government formation process, and remained engaged in national reconciliation and mediation activities, the resolution of the internally disputed territories in Kirkuk and the implementation of the Sinjar Agreement. It also prioritized to enable suitable conditions, and take part in regular engagements with key stakeholders, to advocate for and implement a structured dialogue between Baghdad and Erbil.
15. Progress towards the objective is presented in the performance measure below (see table 1).

Table 1
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
The Independent High Electoral Commission voter registry was improved, as shown by an increase in biometric data collection coverage and cross-checking of voter data; the Commission reviewed and adjusted its regulations and procedures for the timely announcement of election results and the speedy resolution of electoral disputes, for increased representation of women as electoral officials and staff and for countering hate speech in electoral processes	The Government of Iraq fulfilled its commitment to hold early national parliamentary elections. The electoral authorities adopted improved measures for polling and for the counting and publication of results, which, supported by international efforts to monitor the election, helped promote increased transparency of the electoral process. Electoral complaints were addressed through the correct legal channels prior to the ratification of election results on 27 December 2021	A government that included three female ministers was formed, representing an important step towards inclusive government. A programme of work was developed, reflecting the aspirations of the Government and the Iraqi population, with a focus on fighting corruption, unemployment, and improving public service delivery. The federal Government and the Kurdistan Regional Government continued to address outstanding issues and took limited steps towards structured dialogue

Planned results for 2024

Result 1: enhancing trust through reform

Programme performance in 2022 and target for 2024

16. In 2022, the Mission provided good offices to support the resolution of the protracted government formation process, advocating for a de-escalation of tensions and peaceful resolutions. The Mission met the 2022 target, including the peaceful transition of power and the development of a government programme of work reflective of its advocacy and the Iraqi population's calls for reforms. These included a commitment to adopt a hydrocarbon law, establish the federal Federation Council and prioritize counter-corruption measures. At the same time, the Mission advocated for the meaningful political participation of women and provided support to a structured dialogue between Baghdad and Erbil.
17. In 2024, the Mission will encourage continued implementation of the Government programme. It will also support inclusive national dialogue that enhances trust in the political system, delivers on reforms and encourages women's meaningful political participation. It will support and assist engagement between the federal Government and the Kurdistan Regional Government for sustained and structured dialogue and advocate for the full implementation of the Sinjar Agreement and progress on Kirkuk. UNAMI will provide electoral advice and capacity-building to electoral institutions in Baghdad and Erbil. Advocacy for action against climate change-related challenges will be enhanced and advice and technical support to mitigate its adverse impacts will continue, together with the United Nations country team.
18. Progress towards the objective and target for 2024 is presented in the performance measure below (see table 2).

Table 2
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
The Sinjar Agreement between the federal and Kurdistan Regional Governments was a positive step towards resolution of issues in an ethnically diverse area and provides a platform to discuss outstanding issues and overcome political differences	In line with the popular call for reforms, the Government of Iraq fulfilled its commitment to hold early national parliamentary elections. The electoral authorities adopted improved measures for polling and for the counting and publication of results which helped promote wider public acceptance of election results. Electoral complaints were addressed through the correct legal channels prior to the ratification of election results on 27 December 2021	A long-delayed but relatively peaceful transition of power allowed the formation of a new government with a programme that is intended to address long-standing challenges. The Government of Iraq sought to address its priorities and to develop a budget that supported those efforts. Post-election evaluations led to action to improve the conduct and management of future elections and national institutions	The Government of Iraq continues to implement a programme that brings constitutional and economic reform and addresses long-standing domestic issues, such as improving the Baghdad-Erbil relationship	Structured dialogue between Baghdad and Erbil supports the introduction of legal and constitutional reforms, leading to progress in resolving issues currently under dispute. Federal governance becomes more inclusive and accountable, contributing to the development of public trust in Iraq's political leadership and institutions

Result 2: preservation and expansion of civic space and support for accountability**Programme performance in 2022 and target for 2024**

19. UNAMI continued to monitor the human rights situation, highlighting concerns and using its findings for targeted advocacy as a prevention tool and for promoting respect for human rights and the rule of law and accountability for human rights violations and abuses in Iraq. The Mission conducted policy dialogues with and provided technical support to senior officials. It met its target of strengthening national capacities and legal frameworks to promote and protect compliance with human rights obligations. UNAMI continued to advocate for the appointment of a board of commissioners of the Iraqi High Commission for Human Rights to enable a fully functioning national human rights institution and implemented an extensive programme to strengthen capacities, with a focus on digital security for the protection of civic and democratic space, including accountability for enforced disappearances.
20. In 2024, UNAMI will continue to monitor, document and report on human rights violations and abuses as the basis for constructive engagement with authorities, in particular in the context of freedom of expression and the right to peaceful assembly, and will strengthen institutional and civil society capacities to that end. To increase prevention measures and facilitate the development of relevant legal frameworks, the Mission will engage in strategic advocacy and dialogue with the Government. UNAMI will continue to support law enforcement officials, judges, prosecutors and lawyers to promote compliance with international human rights standards, contributing to the adoption of legislation and policies enabling the implementation of Iraq's constitutional and international human rights obligations.
21. Progress towards the objective and target for 2024 is presented in the performance measure below (see table 3).

Table 3
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Adoption of the Anti-Torture Law; the Government of Iraq developed the National Action Plan for the Prevention of Torture in line with its national and international commitments	The Government of Iraq implemented the National Action Plan for the Prevention of Torture and reports to United Nations human rights mechanisms on concrete measures taken to promote due process and fair trial guarantees	The Government compensated the families of the majority of victims killed during the 2019 demonstrations and provided some assistance for those injured. Accountability efforts remained limited and few investigations of alleged human rights violations and abuses progressed to the trial phase	The draft bill on freedom of expression and the draft information technology law are adopted, compliant with international standards, and plans and policies for the protection of human rights are adopted	The Government strengthens impartial, fully functional and effective national mechanisms to promote accountability for human rights violations and abuses and adopts legislation to promote the protection of human rights and civic space and protection from enforced disappearances

Result 3: focus on durable solutions and addressing climate change**Programme performance in 2022 and target for 2024**

22. UNAMI continued to initiate and lead development coordination forums, including international donor coordination, as well as follow-up on international commitments. This work contributed to the identification and effective coordination of durable solutions for displacement and returnees and supported national and international stakeholders in coordinated discussions on addressing the negative impact of climate change. The Mission also advised the Government in its shift of focus from humanitarian needs towards development and advocated for increased national ownership and leadership in addressing those issues.
23. In 2024, the Mission will continue to support the transition from humanitarian efforts towards durable solutions and sustainable development. Given that the number of displaced persons in Iraq is decreasing and is expected to further diminish, UNAMI and the United Nations country team will support the Government of Iraq and the Kurdistan Regional Government in mitigating risks and taking on increased responsibility for establishing conditions for dignified and safe return to communities. The Mission will continue to support national stakeholders in addressing the adverse impacts of climate change, in particular water scarcity, ensuring continued and increased integration with United Nations country team partners.

Lessons learned and planned change

24. The lesson learned for the Mission was that with the shift from humanitarian to development-oriented efforts, and with a view to increasing national ownership on durable solutions, the establishment of a robust coordination architecture led by the Government was essential. The area-based coordination mechanism was an effective tool for addressing and coordinating needs in areas affected by displacement and initiating development-oriented solutions in coordination with national and local government stakeholders. In applying this lesson, UNAMI will increase advocacy for national ownership towards durable solutions and continue its support to national and local authorities in leading and coordinating durable solutions mechanisms across Iraq. The work will contribute to greater coordination and longer-term approaches towards sustainable development and increased government-led initiatives towards durable solutions.
25. Progress towards the objective and target for 2024 is presented in the performance measure below (see table 4).

Table 4

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
A durable solutions task force developed an action plan that promotes area-based coordination, and the Government adopted a national strategy for resolving protracted displacement of internally displaced persons	The United Nations Sustainable Development Cooperation Framework for the period 2020–2024 was effectively implemented, reducing the number of people in need	Eight area-based coordination groups have been established and are in operation. Their use resulted in a more coordinated and tailored approach to durable solutions for returning families in Iraq. First steps were taken to support the transition from	In line with the United Nations Sustainable Development Cooperation Framework for the period 2020–2024, the Government adopts an achievable strategy that invests in Iraq's longer-term development, including climate change mitigation	A durable solution compact is developed and implemented, led by the Government and supported by a robust coordination architecture, linking local coordination mechanisms to federal coordination mechanisms. National ownership of humanitarian and development

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
		humanitarian to development-oriented efforts, including greater national ownership within those processes		activities has increased, with a focus on sustainable development

Deliverables

26. Table 5 lists the deliverables of the Mission.

Table 5
Deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	4	3	4	3
1. Reports of the Secretary-General for the Security Council	4	3 ^a	4	3
Substantive services for meetings (number of three-hour meetings)	4	3	4	3
2. Meetings of the Security Council	4	3	4	3
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	7	7	24	25
3. Projects on national reconciliation and the role of women in peace and security	1	1	–	1
4. Country-wide public outreach events to enhance social cohesion and strengthen the rule of law, socioeconomic and longer-term development, recovery, and reconstruction	6	6	24	24
Seminars, workshops, and training events (number of days)	85	134	86	131
5. Workshops on gender policy, participation of women in electoral and political processes, and the Sustainable Development Goals	14	14	5	5
6. Training events and advocacy initiatives on mediation and negotiation skills, the role of women in peace and security, transparent and inclusive elections, reporting obligations under international treaties, human rights monitoring and reporting and the rights of women and persons with disabilities	56	105	66	116
7. Workshops on political dialogue and participation and political empowerment of young people	15	15	15	10
Publications (number of publications)	1	1	–	1
8. Reports on strengthening women's political participation and the challenges and needs of Iraqi women entering politics	1	1	–	1
Technical materials (number of materials)	157	121	139	119
9. Manual on gender mainstreaming in electoral processes	1	1	1	–
10. Reports on human rights violations and the human rights situation in Iraq, civilian casualties, the Government's adherence to human rights and international humanitarian law, child protection and conflict-related sexual violence, biometric voter registry and enhancements in election results management, and key development, stabilization and reconstruction issues in governorates	146	110	130	110

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
11. Manual on elections for the Independent High Electoral Commission and the Kurdistan Region Independent Electoral Commission	8	8	8	8
12. Handbook on human rights for police personnel	1	1	–	–
13. Planning and technical documents on the United Nations Sustainable Development Cooperation Framework for Iraq and the joint United Nations resource mobilization strategy, and strategic support to and progress of the Government's reconstruction and stabilization programme (recovery and resilience programme)	1	1	–	1
Fact-finding, monitoring and investigation missions (number of missions)	–	319	320	320
14. Monitoring missions on rule of law institutions, including detention monitoring missions and trial monitoring missions in Baghdad and Erbil	–	183	180	180
15. Fact-finding missions on administration of justice within the legal system and with law enforcement officials to follow up on alleged human rights violations	–	82	85	85
16. Monitoring missions related to conflict-related sexual violence and children in armed conflict and the protection of the rights of minorities, internally displaced persons and persons with disabilities, including engagements with approximately four organizations working on disability rights issues	–	54	55	55

C. Substantive deliverables

Good offices: facilitation sessions and round tables on disputed internal boundaries in Kirkuk Governorate to foster national and community reconciliation and enhance cooperation among interlocutors involved; additional support to political and civil Iraqi counterparts to advance the political process and reconciliation, encompassing at least 800 representatives of civil society, young people and communities; support provided on the devolution of powers, federalism, revenue-sharing and international border management; Baghdad-Erbil and regional relations; electoral reforms; countering violent extremism and terrorism in Iraq and the region; and return of missing Kuwaiti and third-country nationals or their remains, Kuwaiti missing property and the national archives. Good offices on the implementation of Security Council resolution [1325 \(2000\)](#), with a focus on advancing the participation, involvement and representation of women and young people in political and electoral processes.

Consultation, advice and advocacy: consultations on humanitarian, stabilization, reconstruction and development issues and coordination and monitoring of recovery and reconstruction activities; advice on revenue-sharing, hydrocarbon management, boundary disputes, federalism, security sector reform, youth and women's participation in politics (reaching out to at least 200 young people across 18 governorates) and decentralization of administrative and fiscal authority; consultation and advice on electoral legislative reform initiatives and parliamentary oversight; advice and engagements to support capacity development and enhance confidence in the electoral institutions of Iraq; consultation and advocacy initiatives on human rights issues, including those related to the protection of the freedoms of assembly and expression, women's and minority rights, protection from enforced disappearance, child protection and administration of justice (engaging with at least 100 youth-led and women-led organizations); collaboration with partner organizations of persons with disabilities; advocacy on the implementation of Security Council resolution [1325 \(2000\)](#), with a focus on the advancement of women's participation, involvement and representation in reconciliation, political and electoral processes through engagement with the Government of Iraq, the Independent High Electoral Commission and civil society, including the Women's Advisory Group; and engagements across all governorates.

Databases and substantive digital materials: database on incidents of violence against women in politics in the context of the 2021 legislative elections; implementing and maintaining the Situational Awareness Geospatial Enterprise system to provide the Mission with a standardized information management system for relevant incidents and events.

D. Communication deliverables

Outreach programmes, special events and information materials: special events that include relevant United Nations Days; organizing awareness-raising events; information materials in support of a common United Nations approach; bimonthly newsletter and annual yearbook highlighting the work of the United Nations in Iraq; United Nations system information material on the Sustainable Development Goals; twice daily media monitoring reports; capacity-building for Iraqi media professionals on combating misinformation and disinformation on social media.

External and media relations: press conferences, press releases and news articles, including op-eds, in three languages, on the work of the Mission and the United Nations country team and UNITAD.

Digital platforms and multimedia content: dissemination of information through the Mission's website and social media accounts, including multimedia products on the Mission, two factsheets and one frequently asked question document on Iraqi elections and United Nations support to the elections, the United Nations in Iraq and events with relevance to Iraq, and participation in United Nations-wide campaigns and dissemination of products from United Nations Headquarters.

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
--------------------------	-----------------	----------------	-----------------	-----------------

E. Enabling deliverables

Safety and security: risk assessments, analysis, briefings, reports, plans, drills and rehearsals, close protection support, staff training and security services in support of UNITAD and the United Nations country team.

Administration: administrative and technical support to UNITAD.

Logistics: provision of transportation, accommodation, utilities and office space for the United Nations country team, procurement services for the United Nations Regional Centre for Preventive Diplomacy for Central Asia and, recently, the United Nations Human Settlements Programme (UN-Habitat), as well as air transportation for the Office of the Special Envoy of the Secretary-General for Yemen.

Information and communications technology: provision of information and communications services, including Internet, data and voice services and maintenance of equipment to UNITAD.

Environment: increase of renewable energy production to achieve self-sufficiency; establishment of a modern system for monitoring, controlling and data analysis of environmental parameters to support the Mission's carbon reduction target; and initiatives oriented to make UNAMI a zero-waste mission.

^a In accordance with Security Council resolution 2631 (2022), the periodicity of reports to the Council was decreased from four to three reports and meetings per year.

B. Proposed post and non-post resource requirements in 2024**1. Total resource requirements****Resource requirements (regular budget)**

Table 6

Financial resources

(Thousands of United States dollars)

^a One position is funded at 50 per cent and cost-shared with the Development Coordination Office.

27. The proposed resource requirements for 2024 for UNAMI amount to \$98,462,400 (net of staff assessment) and would provide for the deployment of 245 military contingent personnel (\$5,099,800), civilian personnel costs (\$76,954,500) consisting of salaries, common staff costs and danger pay for the deployment of 777 positions (1 Under-Secretary-General, 2 Assistant Secretaries-General, 1 D-2, 6 D-1, 16 P-5, 45 P-4, 51 P-3, 5 P-2, 153 Field Service, 123 National Professional Officers, 372 Local level and 2 national United Nations Volunteers), as well as operational costs (\$16,408,100) comprising consultants and consulting services (\$283,700), official travel (\$1,014,600), facilities and infrastructure (\$5,704,900), ground transportation (\$1,196,100), air operations (\$3,850,100), communications and information technology (\$2,927,500), medical (\$345,200) and other supplies, services and equipment (\$1,086,000).
28. The increase in the requirements for 2024 compared with the appropriation of 2023 is attributable to:
- (a) A net increase of \$160,100 in military and police personnel costs, attributable mainly to the higher cost for travel on emplacement, rotation and repatriation based on the latest letter of assist from the Government of Australia for the rotation of the Guard Unit from Fiji, and the higher rate of reimbursement for standard troop costs effective 1 July 2022, approved by the General Assembly in its resolution [76/276](#), offset in part by lower requirements for rations;
 - (b) A net increase of \$989,600 in civilian personnel costs, attributable mainly to the application of a higher average level/step used in the computation of salaries for national staff, offset in part by lower requirements for international staff owing primarily to the application of a higher vacancy rate of 13.3 per cent for 2024, compared with a vacancy rate of 9.0 per cent approved for 2023;
 - (c) A net increase of \$402,100 in operational costs attributable primarily under (i) air operations and ground transport owing to a higher average price of fuel; (ii) communications and information technology owing to the planned replacement of communications and information technology equipment that is past life expectancy as well as the acquisition of electronic countermeasure equipment deployed in United Nations vehicles to ensure the safety of convoys; (iii) other supplies, services and equipment owing to higher requirements for freight based on planned acquisitions. The increased requirements are offset in part by lower requirements under facilities and infrastructure owing to the exclusion of a provision for the renovation of the UNAMI building in Kuwait, as it was assessed that the major cost relating to that project could be adequately covered by the related resources approved in the 2023 budget.

Vacancy rates

29. The proposed vacancy rates applied in the budget take into account the experience to date. The assumptions considered for the proposed vacancy factors include the 12-month average vacancy rate in 2022 and the actual vacancy rate as at 31 March 2023. The lower of the two was used as the budgeted vacancy rate. This is in line with the policy guidance provided by the Field Operations Finance Division of the Department of Management Strategy, Policy and Compliance to improve the accuracy and consistency of the vacancy rate factors applied in the proposed budgets for 2024 and to ensure that proposed vacancy rates are based, as much as possible, on actual rates. A vacancy rate of 50 per cent has been applied in the calculation of costs for the proposed establishment of new posts and positions or posts and positions proposed for reassignment.

Table 8
Vacancy rates
 (Percentage)

Category	Actual average in 2022	Approved 2023	Actual as at 31 March 2023	Proposed 2024
Military and police personnel

32. The Special Representative of the Secretary-General is the Head of Mission, supported by the immediate team in the Office. The Special Representative is also the United Nations designated official for security in Iraq. The following organizational units of the Mission have a direct reporting line to the Special Representative: the Front Office of the Special Representative of the Secretary-General; the Women's Protection Unit; the Gender Unit; the Child Protection Unit; the Office of the Chief of Staff; the Human Rights Office; the Strategic Communications and Public Information Office; and the Security Section.

Table 10

Security Section	-1	FS	Close Protection Officer	Reassignment	Baghdad
	+1	FS	Administrative Assistant	Reassignment	Baghdad
	-1	LL	Security Assistant	Redeployment	From Erbil to Baghdad
Total	(1)				

33. The following changes are proposed for 2024:

- (a) **Front Office of the Special Representative of the Secretary-General.** Abolishment of one position of Administrative Assistant (Local level) given that the position has been vacant for over two years and the functions have been effectively covered by other positions within the Front Office;
- (b) **Public Information Office renamed as Strategic Communications and Public Information Office.** Renaming of the Public Information Office as Strategic Communications and Public Information Office in order to accurately reflect the work of the Office which, in addition to traditional media and public information support, provides strategic communication advice to senior leadership on mandated areas, while supporting outreach and media campaigns, in close coordination with both the Mission's sections and the United Nations country team;
- (c) **Security Section**
- (i) Reassignment of one position of Close Protection Officer (Field Service) as Administrative Assistant (Field Service) in Baghdad in response to the need to strengthen the administrative capacity support of the Section. The incumbent will support the implementation and streamlining of internal administrative processes by implementing known best practices in the system, to include a review of the Section's time management, documentation and approval processes and a review of logistical and budgetary resource monitoring processes, contributing to the timely and more efficient addressing of administrative matters;
- (ii) Redeployment of one position of Field Security Assistant (Local Level) from Erbil to Baghdad to augment the capacity of the Security Investigation Unit in Baghdad, with a view to achieving the requisite operational capacity within the Unit.

34. The Iraq team of the Middle East Division and the Electoral Assistance Division of the Department of Political and Peacebuilding Affairs (2 P-4 and 2 P-3) provide backstopping support to the Mission from United Nations Headquarters in New York. In view of the continued political, economic and security uncertainties in Iraq and the key involvement of the United Nations in national and regional reconciliation, reform and elections, the capacity of the Department to respond to backstopping demands will remain essential, with its functions ranging from providing operational support and assisting in identifying and prioritizing critical strategic objectives in line with the Mission's mandate and political needs to engagement with the Security Council, Member States and other key regional and international partners.

(b) Office of the Deputy Special Representative of the Secretary-General for Political Affairs and Electoral Assistance

35. The Deputy Special Representative of the Secretary-General for Political Affairs and Electoral Assistance leads the political pillar of UNAMI and oversees the work of the Tehran Liaison Office, the Office of Political Affairs and Analysis and the Electoral Assistance Office.

Table 13

Staffing changes: Office of the Deputy Special Representative of the Secretary-General for Political Affairs and Electoral Assistance

Office/service/section/unit	Positions				
	Change	Level	Functional title	Action	Description
Tehran Liaison Office	-1	NPO	Associate Field Translator	Reassignment	Tehran
	+1	NPO	Liaison Officer	Reassignment	Tehran
Office of Political Affairs and Analysis	-	P-5	Senior Information Analyst, Political Affairs	Redeployment	From Baghdad to Basrah
	-	P-4	Political Affairs Officer	Redeployment	From Basrah to Baghdad
Total	-				

36. The following changes are proposed for 2024:

- (a) **Tehran Liaison Office.** Reassignment of one position of Associate Field Translator (National Professional Officer) in the Tehran Office as Liaison Officer (National Professional Officer) to facilitate interactions, meetings and visits, and information exchanges between the UNAMI Tehran Liaison Office and the Iranian authorities. In addition to subsuming the functions of the Field Translator position, the incumbent will support the implementation of the Office's core activities, including supporting officials on in-Mission travel and visits, ensuring liaison and coordination regarding political developments as well as meetings of United Nations staff with local authorities and undertaking relevant administrative and logistical activities. The Liaison Officer will also support the Office on analysis, outreach strategies and liaison with the United Nations country team in the Islamic Republic of Iran, as well as with government interlocutors and the diplomatic community, in line with the mission's mandate;
- (b) **Office of Political Affairs and Analysis**
 - (i) Redeployment of one position of Senior Information Analyst, Political Affairs (P-5) from Baghdad to Basrah to lead the UNAMI Basrah field office. In addition to its responsibilities with regard to reporting and providing analysis on the political economy of Iraq and providing good offices to support national reconciliation processes, the Office's geographic responsibilities have increased to also cover the southern regions of Iraq, which are significantly affected by the adverse impact of climate change on peace, security and sustainable development. The Basrah field office therefore requires more strengthened and senior-level coordination with regional authorities across the region on linkages among political, economic and climate change-related issues, as well as with diplomatic stakeholders and United Nations agencies, funds and programmes on integrated United Nations efforts. A more senior capacity will more effectively undertake a representative role in Basrah and the southern regions of Iraq in order to build, engage and meaningfully coordinate increasingly complex stakeholder alliances and United Nations efforts on those matters;
 - (ii) Redeployment of one position of Political Affairs Officer (P-4) from Basrah to Baghdad in view of the proposed redeployment of the Senior Information Analyst, Political Affairs (P-5) to Basrah described above. The Political Affairs Officer (P-4) will strengthen the reporting and analysis team in Baghdad, in particular with respect to providing expertise on tribal conflict, the informal economy and local political dynamics of the southern regions of Iraq.

(c) **Office of the Deputy Special Representative of the Secretary-General for Development and Humanitarian Affairs**

Change	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-

37. The Deputy Special Representative of the Secretary-General for Development and Humanitarian Affairs leads the Mission's Development Support Office and is responsible for supporting the principal in promoting and facilitating, as well as coordinating with the Government of Iraq and the United Nations country team on, efforts relating to humanitarian assistance and sustainable development. In that role, the Deputy Special Representative also serves as the Resident Coordinator and Humanitarian Coordinator, leading the United Nations country team and coordinating international donor support. The Office also leads on the coordination and monitoring of both short- and long-term development programmes as outlined in the Mission's mandate and the United Nations Sustainable Development Cooperation Framework. The Deputy Special Representative is supported by a Front Office and by the Development Support Office.
38. The Front Office of the Deputy Special Representative is responsible for the administration and management of the Office of the Deputy Special Representative/Resident Coordinator/Humanitarian Coordinator and the coordination, facilitation and planning of the Deputy Special Representative's activities.
39. The Development Support Office supports the Deputy Special Representative in his capacity within the senior management of UNAMI to ensure the delivery of the Mission's mandate as summarized above. It supports the coordination with Government counterparts as well as with United Nations country team counterparts in areas of work relating to development and durable solutions, including climate change. The Office creates essential linkages in the Mission's field locations, in support of the triple-hatted functions of the Deputy Special Representative/Resident Coordinator/Humanitarian Coordinator, with United Nations agencies, funds and programmes, local governments, non-governmental organizations, tribal leaders and other actors to assist the Government of Iraq in meeting its immediate socioeconomic and climate-related challenges to peace and security. The staff facilitates the access of humanitarian and development actors to different regions and provinces by working with local government officials and other key interlocutors.

Table 15

Staffing changes: Deputy Special Representative of the Secretary-General for Development and Humanitarian Affairs

Office/service/section/unit	Positions				
	Change	Level	Functional title	Action	Description

	+1	P-2	Associate Information Management Officer	Reassignment	
	-2	NPO	Assistant Coordination Officer	Reassignment	1 in Diyala and 1 in Anbar
	+2	NPO	Assistant Development Coordination Officer	Reassignment	1 in Diyala and 1 in Anbar
	-1	NPO	Assistant Coordination Officer	Reassignment	}
	+1	NPO	Assistant Public Information Officer	Reassignment	
	-	NPO	Coordination Officer	Redeployment	From Baghdad to Erbil
	-	NPO	Associate Coordination Officer	Redeployment	1 From Wasit and 1 from Najaf to Baghdad
	-	NPO	Assistant Coordination Officer	Redeployment	From Muthanna to Basrah
	-	NPO	Associate Coordination Officer	Redeployment	From Qadisiya to Anbar
	-	NPO	Associate Coordination Officer	Redeployment	From Kirkuk to Dohuk
	Total	-			

40. The following changes are proposed for 2024:

- (a) Reassignment of one position of Associate Coordination Officer (P-2) as Associate Information Management Officer (P-2) in Baghdad to prioritize the digitalization process, practices and protocols regarding information management and provide support on the implementation of the Secretary-General's Road Map for Digital Cooperation. The incumbent will develop entry points for digital transformation in the Office, in support of the Deputy Special Representative/ Resident Coordinator/Humanitarian Coordinator, with a particular focus on accelerating digital information management. The outputs of the function in support of data collection and information management are expected to be utilized by other substantive sections as well, thereby creating entry points for digital collaborations and improved data management across other components, including the United Nations country team data systems. In that context, this reassignment serves as an important first step towards increased use of data, in an integrated manner with the United Nations country team, in particular with regard to mapping, collecting, analysing and visualizing efforts towards durable solutions;
- (b) Reassignment of two positions of Assistant Coordination Officer (National Professional Officer) to Assistant Development Coordination Officer (National Professional Officer), one in Diyala and one in Anbar, to support the implementation of the Mission's durable solution strategy and efforts to address the adverse impact of climate change, in particular with regard to durable solutions, water management, desertification and droughts. The coordination of durable solutions through the area-based coordination groups is being centralized to key governorates in which United Nations entities, donors and relevant national counterparts are most present and required. The Assistant Development Coordination Officers will support the work of the United Nations specifically towards the implementation of durable solutions, manage the transition of the efforts of the United Nations in Iraq from humanitarian to sustainable development efforts, with a localization agenda, and support capacity-building and

other engagement with civil society with regard to development issues, in coordination with the United Nations country team;

- (c) Reassignment of one position of Assistant Coordination Officer (National Professional Officer) as Assistant Public Information Officer (National Professional Officer) in Baghdad to support the Development Support Office and the Office of the Deputy Special Representative/Resident Coordinator/Humanitarian Coordinator in developing and implementing social media guidelines on the management of social media platforms and designing electronic messages in Arabic regarding durable solutions and sustainable development. While the Mission does have a Strategic Communications and Public Information Office (formerly the Public Information Office), it lacks dedicated specialized capacities on durable solutions in communication and social media regarding sustainable development, returnees and the adverse impact of climate change on peace and security. The incumbent will work in close collaboration with the Mission's Strategic Communications and Public Information Office and with the United Nations country team communications group to ensure a coordinated media approach on durable solutions, water management and climate change, while at the same time building national capacities with regard to communications on durable solutions, climate change and sustainable development;
- (d) Redeployment of six positions comprising one Coordination Officer (National Professional Officer), four Associate Coordination Officers (National Professional Officer) and one Assistant Coordination Officer (National Professional Officer) as follows:
 - (i) One Coordination Officer (National Professional Officer) from Baghdad to Erbil to oversee the joint coordination forums in the central and northern areas, including the Kurdistan Region of Iraq, that are expected to be established following the humanitarian transition, as well as to strengthen capacity support with respect to engagement with the Government, in particular regarding the implementation of the compact on durable solutions for internally displaced persons;
 - (ii) Two Associate Coordination Officers (National Professional Officer), one from Wassit and one from Najaf, to Baghdad, to strengthen coordination on durable solutions and support for efforts on the reintegration of returnees from north-eastern Syrian Arab Republic to Iraq. It has been assessed that the needs of the Wassit and Najaf offices can be adequately covered from Baghdad;
 - (iii) One Assistant Coordination Officer (National Professional Officer) from Muthanna to Basrah to enhance the coordination capacity of the team. specifically with respect to water and environment security given the severity of the impact of climate change on the south;
 - (iv) One Associate Coordination Officer (National Professional Officer) from Qadisiya to Anbar to enhance the team's capacity with respect to coordination efforts on returnees from north-eastern Syrian Arab Republic;
 - (v) One Associate Coordination Officer (National Professional Officer) from Kirkuk to Dohuk to enhance the team's capacity with respect to coordination activities with United Nations agencies, taking into account that Dohuk hosts a significant number of internally displaced persons whose return and reintegration to Ninewa governorate has been planned as part of the humanitarian transition and a move to durable solutions.

(d) Mission Support

41. Mission Support functions are under the overall responsibility of the Chief of Mission Support, who coordinates and supervises two main workstreams, namely, operations and resource management and supply chain and service delivery management.
42. The Chief of Mission Support acts as the principal adviser to the Head of Mission on all matters pertaining to administrative and logistical support and is supported by the Chiefs of the Operations and Resource Management and the Supply Chain and Service Delivery Management pillars.
43. The Operations and Resource Management pillar will continue to be responsible for the provision of general support and the management of operations and resources. The Chief of Operations and Resource Management, reporting to the Chief of Mission Support, oversees the Human Resources Section, Financial Resourcing and Performance Unit, Field Technology Section, regional offices in Erbil and Kirkuk, Procurement Section, Contract Management Unit and Training Unit.
44. The Supply Chain and Service Delivery Management pillar is responsible for managing and coordinating the flow of supply chain goods and services and the provision of key logistical support services to all mission components and other clients. The Chief of Supply Chain and Service Delivery Management, reporting to the Chief of Mission Support, oversees the Life Support Unit, Engineering Section, Integrated Facilities Management and Welfare Unit, Surface Transport Section, Medical Services Section, Staff Counselling Unit, Centralized Warehousing Section, Acquisition Planning and Requisitioning Unit, Aviation and Movement Control Section and Property Management Section.

Operations and Resource Management

Table 17
Staffing changes: Operations and Resource Management

<i>Office/service/section/unit</i>	<i>Positions</i>				
	<i>Change</i>	<i>Level</i>	<i>Functional title</i>	<i>Action</i>	<i>Description</i>

	-1	LL	Budget Assistant	Reassignment	}
	+1	LL	Senior Administrative Assistant	Reassignment	
Total	-				

45. The following changes are proposed for 2024:

(a) **Contract Management Unit**

- (i) Reassignment of one position of Assistant Administrative Officer (National Professional Officer) as Associate Contract Management Officer (National Professional Officer) in Baghdad to align with the functions performed by the position;
- (ii) Redeployment of one position of Contract Management Officer (Field Service) in Erbil from the Acquisition Planning and Requisition Unit to consolidate the contract management functions and capacity within one unit, with a view of achieving more streamlined reporting and service delivery;

(b) **Field Technology Section**

- (i) Redeployment of one position of Telecommunications Officer (Field Service) from Erbil to Baghdad to support the planning and implementation of the Mission's telecommunication projects that demand direct interaction with key stakeholders located in Baghdad, including UNITAD and United Nations agencies. The incumbent will have day-to-day interaction with the Department of Safety and Security on telecommunication operational activities across the mission area of operations and will be involved in identifying agile, scalable technological solutions and establishing internal and external partnerships to leverage resources, expertise and networks in order to innovate practices in support of mandate delivery;
- (ii) Reassignment of one position of Budget Assistant (Local level) in Kuwait as Senior Administrative Assistant (Local level) to strengthen the administrative capacity and management of the Mission's support services and operations in the Kuwait office, which includes human resources management, budget and finance, general administration, contract administration, service delivery and supply chain management.

Supply Chain and Service Delivery Management

Acquisition Planning and Requisition Unit	-1	FS	Contract Management Officer	Redeployment	To the Contract Management Unit
Total	+2				

46. The following changes are proposed for 2024:

(a) **Property Management Section**

- (i) Reassignment of one position of Claims Assistant (Field Service) as Data Analyst (Field Service) in Baghdad to promote workforce capabilities in data analytics and management. The incumbent will be responsible for establishing a rigorous quality assurance and performance management framework, which requires the collection, processing and analysis of a large amount of data and information sourced from various sources, including enterprise business systems that are not completely integrated in Umoja modules, with a view to enhancing overall performance monitoring and reporting in support of decision-making processes. In addition, the incumbent will collaborate with cross-functional teams to understand business requirements and implement data-driven solutions;
 - (ii) Establishment of one position of Assistant Data Analyst (National Professional Officer) in Erbil to build national capacities in data analytics and management. The focus of the position is to generate and communicate data-driven facts and analyses as well as insights and recommendations in support of the decision-making process, mission-wide, with a view to achieving greater efficiency in the management of the Mission's property assets, in particular in the Kurdistan region of Iraq;
- (b) **Transport Section.** Redeployment of three positions comprising one Vehicle Technician (Local level) from Kuwait to Baghdad and two Transport Assistants (Local Level), one from Kuwait and one from Erbil to Baghdad, to enhance the fleet and contract management capacity within the Section and support the implementation and expansion of the Mission's car log security system project in line with operational priorities;
 - (c) **Engineering Section.** Redeployment of one position of Engineer (P-3) from Erbil to Baghdad to enhance the supervisory capacity with respect to the maintenance of existing facilities and support the management and oversight of ongoing environmental projects;
 - (d) **Medical Section.** Establishment of one position of Senior Nurse (Field Service) in Baghdad to strengthen the medical capacity of the current medical team in response to the increasing number of medical complications and incidences of non-communicable diseases, taking into

account the operational environment and limited availability of advanced medical care (levels III and IV). The incumbent will contribute to enhancing services, medical-administrative support (day-to-day clinical work and other administrative support) and consultations with staff;

- (e) **Acquisition Planning and Requisition Unit.** Redeployment of one position of Contract Management Officer (Field Service) in Erbil to the Contract Management Unit to consolidate the contract management functions and capacity within one unit, with a view to achieving more streamlined service delivery.

Kuwait Joint Support Office

47. The Kuwait Joint Support Office will continue to support UNAMI, the United Nations Assistance Mission in Afghanistan and other missions. No changes are proposed for 2024.

Subtotal, category III	13 199.4	12 706.6	16 006.0	16 408.1		402.1
Total	97 673.2	98 214.8	96 910.6	98 462.4		1 551.8

4. Analysis of resource requirements

Military and police personnel costs

(Thousands of United States dollars)

	Appropriation 2022	Expenditures 2022	Appropriation 2023	Requirements 2024	Variance 2024 vs. 2023
Military contingents	5 140.3	5 367.3	4 939.7	5 099.8	160.1

48. Resources amounting to \$5,099,800 are proposed to provide for the deployment of 245 military contingent personnel and includes requirements for: (a) standard troop cost reimbursement

(\$2,819,200); (b) travel on emplacement, rotation and repatriation (\$763,200); (c) recreational leave allowance (\$55,800); (d) daily allowance (\$75,800); (e) death and disability compensation (\$64,700); (f) rations (\$1,265,300); (g) major equipment (\$4,800); (h) self-sustainment (\$5,700); and (i) freight and deployment of contingent-owned equipment (\$45,300).

49. A vacancy rate of 0 per cent has been applied based on the planned deployment for 2024.
50. The increase is attributable mainly to: (a) increased requirements for travel on emplacement, rotation and repatriation for the rotation of the Guard Unit from Fiji based on the most recent letter of assist from the Government of Australia; and (b) higher standard troop cost reimbursement owing to: (i) the application of the higher rate of reimbursement of \$1,448 per person per month as from 1 July 2022 approved by the General Assembly in its resolution 76/276, compared with the rate of \$1,428 applied in the approved 2023 budget; and (ii) the application of the new rate of reimbursement of \$4.90 per military personnel for mandatory pre-deployment COVID-19 testing as from 1 July 2022 approved by the General Assembly in the same resolution. The increased requirements are offset in part by lower requirements for rations.

Civilian personnel costs

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirement 2024</i>	<i>Variance 2024 vs. 2023</i>
International staff	53 499.3	53 422.7	51 438.6	50 364.0	(1 074.6)

51. Resources amounting to \$50,364,000 are proposed to provide for salaries (\$24,457,800), common staff costs (\$22,720,300) and danger pay (\$3,185,900) for the deployment of 280 international positions (1 Under-Secretary-General, 2 Assistant Secretaries-General, 1 D-2, 6 D-1, 16 P-5, 45 P-4, 51 P-3, 5 P-2 and 153 Field Service), including the proposed establishment of one position (Field Service).
52. A vacancy rate of 13.3 per cent has been applied to the estimates for continuing positions, based on the actual average vacancy rate in 2022, while a vacancy rate of 50 per cent has been applied to the one position proposed for establishment and the three positions (1 P-2 and 2 Field Service) proposed for reassignment.
53. The decrease is attributable mainly to: (a) the application of a higher vacancy rate of 13.3 per cent for 2024, compared with a vacancy rate of 9 per cent approved for 2023; and (b) the proposed reassignment of three existing positions with the application of a 50 per cent vacancy rate. The reduced requirements are offset by the application of a higher common staff rate of 93 per cent for 2024 based on expenditure trends, compared with the rate of 87 per cent applied in the approved budget for 2023, as well as the proposed establishment of one position at the Field Service level.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirements 2024</i>	<i>Variance 2024 vs. 2023</i>
National Professional Officer	9 382.3	9 897.4	9 631.9	10 359.1	727.2

54. Resources amounting to \$10,359,100 are proposed to provide for salaries (\$7,701,900), common staff costs (\$2,078,800) and danger pay (\$578,400) for the deployment of 123 National Professional Officers, including the proposed establishment of one position.

55. A vacancy rate of 9.8 per cent has been applied to the cost estimates for continuing positions, based on the actual vacancy rate in March 2023, while a vacancy rate of 50 per cent has been applied to the one position proposed for establishment and the five positions proposed for reassignment.
56. The increase is attributable mainly to: (a) the application of the higher average level/step of NO-B/X of the salary scale in the computation of salaries for National Professional Officers, compared with the level/step of NO-B/VIII applied in the approved budget for 2023; (b) the application of the continuing vacancy rate of 9.8 per cent for the computation of salary costs for nine positions that were approved in the 2023 budget with a vacancy rate of 50.0 per cent; and (c) requirements related to the proposed establishment of one position. The increased requirements are offset in part by the application of a higher vacancy rate of 9.8 per cent for 2024, compared with a vacancy rate of 9 per cent approved for 2023, and the proposed reassignment of five positions to which a 50 per cent vacancy rate has been applied.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirements 2024</i>	<i>Variance 2024 vs. 2023</i>
Local level staff	16 390.0	16 772.8	14 829.7	16 168.5	1 338.8

57. Resources amounting to \$16,168,500 are proposed to provide for salaries (\$11,131,600), common staff costs (\$3,467,200) and danger pay (\$1,569,700) for the deployment of 372 Local level positions.
58. A vacancy rate of 8.3 per cent has been applied to the cost estimates for continuing positions based on the actual vacancy rate in March 2023, while a vacancy rate of 50 per cent has been applied to the one position proposed for reassignment.
59. The increase is attributable mainly to: (a) the application of the higher average level/step of GS-5/IX of the salary scale in the computation of salaries for national General Service staff, compared with the level/step of GS-5/IV applied in the approved budget; and (b) higher salary rates for national staff in Kuwait based on the revised salary scale, effective 1 April 2022. The increased requirements are offset in part by the application of a higher vacancy rate of 8.3 per cent for 2024, compared with a vacancy rate of 7 per cent approved for 2023, the proposed reassignment of one position to which a 50 per cent vacancy rate has been applied and the proposed abolishment of one position.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirements 2024</i>	<i>Variance 2024 vs. 2023</i>
United Nations Volunteers	61.9	48.0	64.7	62.9	(1.8)

60. Resources amounting to \$62,900 are proposed to provide for the continued deployment of two national United Nations Volunteers. A vacancy rate of zero per cent has been applied, taking into account the actual vacancy rate in March 2023.
61. The decrease is attributable mainly to the non-requirement for United Nations Development Programme country office support costs based on the most recent standard rates provided by the United Nations Volunteers programme.

Operational costs

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirements 2024</i>	<i>Variance 2024 vs. 2023</i>
Consultants and consulting services	136.8	240.6	287.5	283.7	(3.8)

62. Resources amounting to \$283,700 are proposed to provide for individual consultants and consultant services for the provision of technical and specialized expertise on electoral issues, energy, conflict prevention, human rights and climate change, digital transformation and digitalization, durable solutions, mental health and training for Mission personnel.
63. The decrease is attributable mainly to the engagement of fewer consultants for the training of Mission personnel.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirements 2024</i>	<i>Variance 2024 vs. 2023</i>
Official travel	773.0	714.5	1 079.0	1 014.6	(64.4)

64. Resources amounting to \$1,014,600 are proposed to provide for within-Mission travel for essential engagements, mediation and facilitation with national counterparts and civil society, donors and non-governmental organizations, overseeing regional and field offices, political consultations with local entities and human rights fact-finding, monitoring and investigation missions. Travel outside the Mission area includes that of the Special Representative of the Secretary-General and senior members of her team for high-level political consultations with various entities, meetings with high-level counterparts at United Nations Headquarters and briefings to the Security Council (\$645,000) and training-related travel (\$369,600).
65. The decrease is attributable mainly to increased utilization of videoconferencing services to the extent possible for within-Mission consultations and training activities.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirements 2024</i>	<i>Variance 2024 vs. 2023</i>
Facilities and infrastructure	3 488.2	4 232.4	6 420.6	5 704.9	(715.7)

66. Resources amounting to \$5,704,900 are proposed to provide for the acquisition of: (a) engineering supplies (\$117,800); (b) prefabricated facilities (\$25,100); (c) furniture (\$36,000); (d) office and other equipment (\$48,000); (e) safety and security equipment (\$317,800); (f) rental of premises (\$884,900) (g) utilities and waste disposal services (\$570,600); (h) maintenance services (\$1,697,700); (i) security services (\$355,600); (j) construction, alteration, renovation and major maintenance (\$1,248,000); (k) stationery and office supplies (\$80,100); (l) spare parts and supplies (\$86,900); (m) construction material and field defence supplies (\$41,400); (n) petrol, oil and lubricants (\$140,300); and (o) sanitation and cleaning materials (\$54,700).
67. The decrease is attributable mainly to: (a) lower requirements for construction, alteration, renovation and major maintenance owing to the non-requirement for a provision for the renovation of the UNAMI building in Kuwait, as it was assessed that the major costs relating to that project could be adequately covered by the resources of \$1.6 million approved in the 2023 budget (see paras. 86–89);

(b) non-inclusion of a provision for the acquisition of generators and electrical equipment, for which a provision was included in the approved budget for 2023; (c) lower requirements for utilities and waste disposal services owing to increased utilization of solar and renewable energy and other consumption efficiencies; and (d) lower requirements for the acquisition of safety and security equipment and supplies and prefabricated facilities in line with operational requirements. The reduced requirements are offset in part by: (a) increased requirements for the rental of premises owing to higher costs for office and living accommodation in the Basra International Hotel based on the most recent contractual rates, and new requirements for the Mission's cost-shared portion of accommodation costs in the Mosul compound; (b) higher requirements for the acquisition and replacement of consumable engineering supplies such as batteries, water treatment consumables, electrical wire and cables and harnesses, and paints and primers; and (c) higher requirements for petrol, oil and lubricants owing to the higher average price of \$1.158 per litre of fuel for generators, compared with the average price of \$0.545 per litre applied in the 2023 approved budget.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirements 2024</i>	<i>Variance 2024 vs. 2023</i>
Ground transportation	535.5	731.0	1 056.5	1 196.1	139.6

68. Resources amounting to \$1,196,100 are proposed to provide for: (a) acquisition of vehicles (\$387,400); (b) acquisition of vehicle workshop equipment (\$36,000); (c) rental of vehicles (\$23,200); (d) repairs and maintenance (\$9,000); (e) liability insurance (\$21,400); (f) spare parts (\$337,400); and (g) petrol, oil and lubricants (\$381,700).
69. The increase is attributable mainly to: (a) the higher anticipated consumption of 250,600 litres of diesel fuel at a higher average cost of \$1.086 per litre, compared with 113,000 litres at an average cost per litre of \$0.545 provided for in the 2023 approved budget; and (b) the acquisition of vehicle workshop equipment to support the maintenance work carried out at the transport workshops, offset in part by lower requirements for the replacement of ageing vehicles and spare parts.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirements 2024</i>	<i>Variance 2024 vs. 2023</i>
Air operations	3 226.1	3 381.7	3 150.5	3 850.1	699.6

70. Resources amounting to \$3,850,100 are proposed to provide for the Mission's air transport fleet, which comprises two fixed-wing aircraft, operating an estimated 925 flight-hours, as follows: (a) services (\$8,000); (b) landing fees and ground handling charges (\$218,100); (c) air crew subsistence allowance (\$8,800); (d) petrol, oil and lubricants (\$1,101,500); (e) rental and operation (\$2,507,500); and (f) liability insurance (\$6,200).
71. The increase is attributable mainly to: (a) the higher average cost price of jet fuel of \$2.270 per litre, compared with the average price of \$1.00 per litre applied in the 2023 budget; and (b) higher costs for the rental and operation of fixed-wing aircraft owing to a reduction in the cost-shared contribution from the Office of the Special Envoy of the Secretary-General for Yemen from 25 per cent to 20 per cent for one of the aircraft.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirements 2024</i>	<i>Variance 2024 vs. 2023</i>
Communications and information technology	2 692.4	2 524.4	2 707.0	2 927.5	220.5

72. Resources amounting to \$2,927,500 are proposed to provide for: (a) communications and information technology equipment (\$435,500); (b) telecommunications and network services (\$393,800); (c) maintenance of communications and information technology equipment and support services (\$1,262,100); (d) spare parts (\$227,500); (e) software, licences and fees (\$480,200); and (f) public information and publication services (\$128,400).
73. The increase is attributable mainly to higher requirements for: (a) the acquisition and replacement of communications and information technology equipment that has passed life expectancy, including laptops, and radio repeater equipment required for security radio communications in the Kurdistan region, as well as the acquisition of electronic countermeasure accessories required for the transfer of existing equipment deployed within United Nations vehicles to ensure the safety of convoys; (b) maintenance of communications and information technology equipment and support services owing to additional requirements for the installation of the electronic countermeasure accessories proposed for acquisition. The increased requirements are offset in part by lower costs for centralized transponder service as well as mobile and data communication charges owing to increased utilization of web-based and cloud applications.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirements 2024</i>	<i>Variance 2024 vs. 2023</i>
Medical	324.5	153.9	334.9	345.2	10.3

74. Resources amounting to \$345,200 are proposed to provide for acquisition of equipment (\$4,000), medical services (\$172,500) and supplies (\$168,700).
75. The increase is attributable mainly to higher requirements for consumables, supplies and vaccines, offset by lower requirement for the acquisition of medical equipment.

(Thousands of United States dollars)

	<i>Appropriation 2022</i>	<i>Expenditures 2022</i>	<i>Appropriation 2023</i>	<i>Requirements 2024</i>	<i>Variance 2024 vs. 2023</i>
Other supplies, services and equipment	2 022.9	727.1	970.0	1 086.0	116.0

76. Resources amounting to \$1,086,000 are proposed to provide for: (a) welfare (\$63,900); (b) training fees, supplies and services (\$140,800); (c) official functions (\$25,000); (d) other hospitality (\$25,000); (e) general insurance (\$45,000); (f) bank charges (\$72,200); (g) claims, write-offs and adjustments (\$8,000); (h) other freight and related costs (\$378,500); (i) rations (\$119,100); (j) individual contractual services (\$155,900); and (k) other services (\$52,600).
77. The increase is attributable mainly to higher requirements for freight and related costs owing to a higher increase in the planned level of acquisition, as well as higher requirements for training fees, supplies and services.

Extrabudgetary resources**(a) Voluntary contributions**

78. In 2023, voluntary contributions in the amount of \$437,700 are projected to be utilized, comprising the following funding sources:
- (a) \$114,700 under the Mission's trust fund in support of the construction and renovation of the United Nations Integrated Compound in Baghdad, to be utilized for the completion of the riverbank rehabilitation project, which is the last project to be funded from the trust fund;
 - (b) \$323,000 under the multi-year appeal trust fund of the Department of Political and Peacebuilding Affairs to provide for the staff costs of one position (P-4) and to support activities aimed at strengthening political engagement among Iraqi youth and promoting the political participation of Iraqi women as well as the Mission's engagement on water security and the adverse impacts of climate change.
79. In 2024, voluntary contributions in the estimated amount of \$323,000 are projected to be utilized under the multi-year appeal trust fund for the continuation of one position (P-4) to continue supporting activities aimed at enhancing the Mission's political engagement, supporting the participation of Iraqi women and young people in political dialogue, promoting water security and combating the adverse impacts of climate change in Iraq.
80. The decrease in the estimated voluntary contribution to be utilized in 2024 compared with 2023 is due to the anticipated completion of the riverbank rehabilitation project funded under the Mission's trust fund in support of the construction and renovation of the United Nations Integrated Compound in Baghdad.

(b) Cost recovery

81. In 2023, resources in the amount of \$10,485,700 are estimated to be received from UNITAD and the United Nations country team in Iraq, through the cost recovery mechanism, for services provided by the Mission to those entities in the areas of security, space management, medical services, fuel and other supplies. Such services are provided to achieve economies of scale and enable more effective and efficient delivery of mandates, in accordance with the "One United Nations" initiative. These cost recovery resources will be utilized to provide for six positions (two Field Service and four international United Nations Volunteers) and to continue to support the United Nations Guard Unit, cost-sharing of other security staff costs and services, space management, cleaning services, field technology services, ground transport, medical services, fuel and other supplies and will complement the regular budget resources of the Mission.
82. Similarly, in 2024, resources in the amount of \$10,485,700 are projected to be received from UNITAD and the United Nations country team and will continue to be utilized to provide for the continuation of six positions (two Field Service and four international United Nations Volunteers) and to continue to support the United Nations Guard Unit, cost-sharing of other security staff costs and services, space management, cleaning services, field technology services, ground transport, medical services, fuel and other supplies.

II. Status of the renovation project for an integrated headquarters compound in Baghdad

83. The trust fund in support of the construction and renovation of the United Nations Integrated Compound in Baghdad was established for the construction of an integrated compound in Baghdad that would accommodate all the United Nations agencies, funds and programmes operating in Iraq.
84. On 31 March 2010, the trust fund received \$25,000,000 from the Government of Iraq and \$760,600 from the Governments of the Czech Republic, Greece, Italy, Luxembourg, Poland and Sweden. In

June 2011, a further contribution of \$25,000,000 was received from the Government of Iraq, bringing total contributions received by the trust fund to \$50,760,600.

85. All the trust fund projects have been successfully completed, with the exception of the riverbank rehabilitation project, which will be completed by the end of 2023.

III. Status of the project for the rehabilitation of the United Nations Assistance Mission for Iraq building in Kuwait

86. The Kuwait Joint Support Office premises were provided to the United Nations free of charge by the Government of Kuwait to host its support office for UNAMI and the United Nations Assistance Mission in Afghanistan. The rehabilitation of the Kuwait office buildings and facilities has been pending since 2004 when it was handed over to UNAMI from the United Nations Iraq-Kuwait Observation Mission. The planned rehabilitation of the UNAMI office building and the general compound in Kuwait is aimed at ensuring a safe, secure and conducive working environment for the staff who continue to use the facilities. Efforts to secure funding for the rehabilitation of the building from the Government of Kuwait, although without success to date, are being continued.
87. In the 2023 budget, the General Assembly approved resources of \$1,674,200 for the planned renovation of the building.
88. Based on the most recent assessments and in consultation with an independent construction firm in early 2023, it was determined that in lieu of renovating the existing dilapidated compound, for which renovation costs were estimated at \$2.9 million (reflecting 2023 costing estimates) with an estimated time frame of 19 months, a more cost-effective option could be to construct a new fit-for-purpose building on the compound. Based on internal assessments, it is expected that the estimated construction costs of the new building will not exceed the resources already approved in the 2023 budget, giving rise to potential savings of \$1.2 million compared with the originally estimated renovation costs of the existing building. The construction timeline for the new building is expected to take 12 months. The new fit-for-purpose building will provide adequate, secure and environmentally sustainable workspaces, including an efficient heating and cooling system, the use of renewable energy and water efficiency, and is anticipated to result in lower annual maintenance costs.
89. With regard to cost-sharing arrangements, effective 1 January 2023, a cost-sharing arrangement has been in place whereby the recurring operational costs of the building are borne by all client missions, apportioned at a ratio of 89 per cent to 11 per cent, split between full client missions¹ and education grant and payroll clients² on the basis of the missions' approved personnel strength.

¹ The full client missions comprise the following: Office of the Special Envoy of the Secretary-General for Yemen, Office of the Special Envoy of the Secretary-General for Syria, United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant, United Nations Regional Centre for Preventive Diplomacy for Central Asia, United Nations Mission to Support the Hedaydah Agreement, United Nations Integrated Office in Haiti, United Nations Assistance Mission in Afghanistan and United Nations Assistance Mission for Iraq.

² The payroll and education grant clients comprise the following: United Nations Interim Force in Lebanon, United Nations Verification Mission in Colombia, United Nations Logistics Base at Brindisi, Italy, United Nations Truce Supervision Organization, United Nations Interim Administration Mission in Kosovo, United Nations Peacekeeping Force in Cyprus, United Nations Disengagement Observer Force, United Nations Military Observer Group in India and Pakistan, Office of the United Nations Special Coordinator for Lebanon and Office of the United Nations Special Coordinator for The Middle East Peace Process.

Annex I

Summary of follow-up action taken to implement the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the General Assembly

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/77/7/Add.6)

The Advisory Committee notes that national positions are the most impacted by the proposed restructuring and abolishments. The Committee trusts that the Mission will continue to pursue efforts to promote nationalization and capacity-building, and present related proposals in the context of future budget submissions (para. 15).

The Advisory Committee acknowledges the strategic approach of the Mission to streamline its structures and resources, seek efficiencies in mandate delivery and adapt to evolving circumstances, including through the incorporation of lessons learned and the promotion of nationalization. The Committee trusts that the Secretary-General will provide an update on the restructuring, including related lessons learned, in the context of the next budget proposal (para. 17).

The Advisory Committee notes with concern the number of long-standing vacant positions, particularly in the national categories. The Committee trusts that the vacancies will be filled expeditiously and updated information on their recruitment status will be provided to the General Assembly at the time of its consideration of the present report and in the context of the next budget submission (para. 18).

The Advisory Committee sees merit in the outsourcing of the staff counselling services and trusts that UNAMI will share its cost-benefit analysis and lessons learned with other missions for their consideration, taking into account their specific operating environment and needs (para. 23)

Pending the determination of the contribution of other missions to the costs for the renovation of the premises in Kuwait, the Advisory Committee recommends a reduction of 10 per cent (\$325,800) to the proposed increase under facilities and infrastructure. The Committee trusts that additional information on this project will be provided to the General Assembly at the time of its consideration of the present report and in the next budget submission, including on the envisaged cost-sharing arrangements and on host-country or other extrabudgetary funding (para. 25).

The United Nations Assistance Mission for Iraq (UNAMI) continues to review functions performed by international staff that can be nationalized and will continue efforts towards national capacity-building.

The strategic approach of the Mission to streamline its structures has contributed to improved integration within the teams working on political analysis and reporting, enabling closer collaboration among internal components as well as with the United Nations country team on political matters, including on climate change, and the political participation of women.

The Mission continues to take measures to ensure that vacant positions are filled expeditiously. A proposal to abolish one long-vacant position (Local level) is included in the present budget report. A list of positions vacant for over two years, including justification and information on the recruitment status, is provided in the supplementary information.

Information on the cost-benefit analysis and lessons learned from the outsourcing of the Mission's staff counselling services is being compiled and will be shared with the relevant Headquarters departments for dissemination to other missions.

Information on the status of the project is included in paragraphs 86 to 89 of the present budget report.

*Brief description of the recommendation**Action taken to implement the recommendation*

The Advisory Committee trusts that the Secretary-General will systematically include in future budget proposals disaggregated information on cost recovery, specifying the services provided to different entities and the respective amounts recovered (see also [A/76/7/Add.6](#), para. 29) (para. 29).

The Advisory Committee trusts that greater efforts will be made to address the gender imbalance in UNAMI, and that updated information will be included in all future budget submissions (see also [A/76/7/Add.7](#), para. 31, [A/75/7/Add.7](#), para. 16) (para. 31)

The Advisory Committee acknowledges the geographical distribution of UNAMI personnel and trusts that further efforts will be made to achieve equitable geographical representation of Member States among staff in senior positions at the D-1 level and above and provide an update in all future budget submissions (para. 32)

The Advisory Committee trusts that updated information on the Mosul integrated compound project will be provided in the context of the next budget submission (para. 33)

Information on cost recovery specifying the services provided to different entities is provided in the main report on the estimates in respect of special political missions ([A/78/6 \(Sect. 3\)/Add.1](#)).

The UNAMI gender parity working group, chaired by the Deputy Special Representative of the Secretary-General for Political Affairs and Electoral Assistance with the membership of the Office of the Chief of Staff, Office of the Chief of Mission Support, Human Resources Section and Gender Unit, continues to monitor and report on meeting gender parity goals. The group regularly reviews recruitments and best practices, monitors progress towards the gender parity implementation plan for 2023–2024 and ensures the implementation of increased outreach to female candidates, in particular with regard to field support and security staff recruitments, where gender imbalances have been identified.

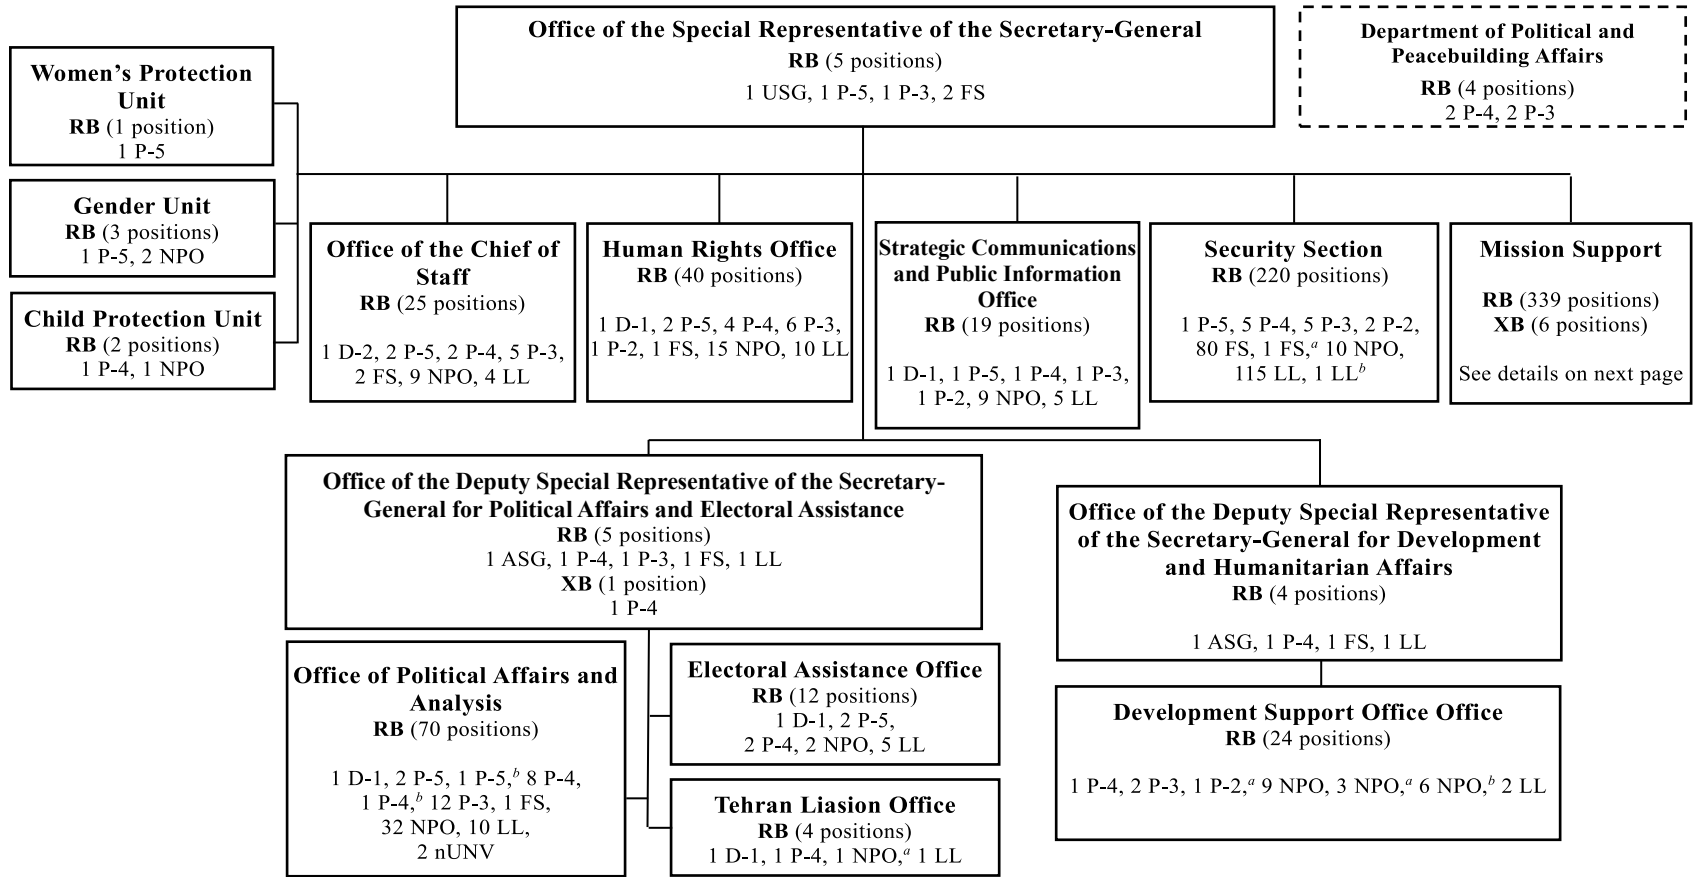

UNAMI has taken measures and critically monitors staff recruitment with regard to achieving equitable geographical representation among staff in senior positions. Recruitment managers have been sensitized on the importance of geographical distribution of UNAMI personnel and the Human Resources Section is providing guidance on the use of the relevant Inspira tools to monitor the current distribution status.

The Mosul integrated compound project is ongoing and is currently approximately 70 per cent completed. For 2022, expenditures totalling \$519,200 were incurred relating to the Mission's portion of the capital investment in the renovation of the compound. For the 2024 budget, a provision of \$337,500 relating to the Mission's cost-shared portion of accommodation costs in the compound has been budgeted.

Foreword

Over the course of 2024, the Office for Disarmament Affairs will ensure that it remains agile and fit for purpose to support disarmament in all its aspects. The Office will continue to support multilateral disarmament efforts, provide impartial and up-to-date information to Member States on disarmament issues and support the development of disarmament measures after armed conflict.

In 2022, several key disarmament meetings that had been postponed owing to the coronavirus disease (COVID-19) pandemic, were held. The ninth Review Conference of the Biological Weapons Convention adopted a substantive final document, as did the Eighth Biennial Meeting of States to Consider the Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects. The tenth Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons was, however, unable to adopt an outcome document. Despite this, the Conference was able to establish a working group to strengthen the review process of the Treaty.

Nonetheless, the disarmament, arms control and non-proliferation regimes remain under significant strain. The continuing threat posed by nuclear weapons and concerns regarding other weapons of mass destruction pose existential risks to humanity. The threats and challenges from emerging technologies with potentially destabilizing applications are increasing the likelihood of armed conflict extending into new domains, such as outer space and cyberspace. The COVID-19 pandemic further highlighted the importance of adequate preparedness to prevent and respond to biological risks.

The Office for Disarmament Affairs will continue to deliver efficiently on its mandates and assist Member States in supporting their disarmament, arms control and non-proliferation efforts.

(Signed) **Nakamitsu Izumi**
Under-Secretary-General and High Representative for Disarmament Affairs

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 4.1 The Office for Disarmament Affairs is responsible for supporting multilateral efforts aimed at achieving the goal of general and complete disarmament under strict and effective international control. Its mandate derives from the priorities established in relevant General Assembly resolutions and decisions in the field of disarmament, including the final document of the tenth special session of the General Assembly, the first special session devoted to disarmament (resolution [S-10/2](#)). Weapons of mass destruction, particularly nuclear weapons, remain a major concern owing to their destructive power and the continuing threat posed to humanity. The deteriorating global strategic environment is also exacerbating such concerns. Global concerns regarding other weapons of mass destruction, including chemical weapons, remained significant, demonstrating the importance of adequate preparedness to prevent and respond to biological risks. The Office also provides support for combating the illicit trade in small arms and light weapons and works on the identification and analysis of emerging issues, including new technologies, and their impact on international security.

Strategy and external factors for 2024

- 4.2 The Office will ensure full implementation of its legislative mandates and compliance with United Nations policies and procedures. It will continue to support multilateral negotiations and deliberations and provide expertise and practical solutions, while building confidence and trust. It will continue to facilitate the reconciliation of disparate positions among Member States resulting from a volatile international security environment. The Office will seek to mitigate the risks that it faces in carrying out its mandate and will continue to implement its strategic plan, first launched in 2021 and scheduled to run through 2025.
- 4.3 The Office will continue to ensure that it has the capacity and capability to deliver its mandate effectively. It will be guided by existing frameworks, including relevant elements of the Sustainable Development Goals and the Secretary-General's peace and security and development reforms, in accordance with relevant General Assembly resolutions. The Office will also be guided by *Securing Our Common Future: An Agenda for Disarmament*, in accordance with the mandates of the Office, and continue to facilitate the internal integration of disarmament issues into the Organization's work, especially in the area of prevention, thereby laying the groundwork for new partnerships and greater collaboration and effectiveness.
- 4.4 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue to enhance cooperation and coordination with other international, regional and subregional organizations in the areas of disarmament, arms control and non-proliferation. Through its three regional centres and the liaison office in Vienna, the Office continues to strengthen global disarmament initiatives by promoting, facilitating and strengthening regional cooperation among States and regional and subregional organizations and arrangements. The Office will further enhance its partnerships with a diverse range of stakeholders in order to achieve the planned results. Through such partnerships, it will be able to effectively meet regional and national disarmament and arms control priorities, while simultaneously building greater local disarmament capacity and enhancing the viability of regional frameworks.
- 4.5 With regard to inter-agency coordination and liaison, the Office will continue to pursue cohesive approaches within the United Nations peace and security pillar, as well as with other specialized United Nations agencies and other entities. Through existing processes and tools, the Office will coordinate with other United Nations entities to enable a holistic approach to addressing risks associated with arms, thereby contributing to conflict prevention, the protection of civilians and

international peace and security. It will also enhance its partnership network within the United Nations system and among Member States to raise awareness of the potential multifaceted linkages between disarmament and development.

- 4.6 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) The political environment is supportive of disarmament efforts;
 - (b) Political developments, in particular those related to international relations in peace and security, are conducive to the facilitation of negotiations on new arms limitation and disarmament agreements;
 - (c) Member States are willing to implement the recommendations, resolutions and decisions of relevant meetings and conferences;
 - (d) International organizations and entities provide cooperation;
 - (e) National institutions support the promotion of equal opportunities for women in all decision-making processes as well as the promotion of meaningful and inclusive participation and engagement of young people in disarmament, non-proliferation and arms control.
- 4.7 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, in line with organizational mandates and policies for mainstreaming a gender perspective into policies and programmes in the United Nations system (see Economic and Social Council resolution 2011/6) and associated departmental action plans. The Office will continue to accord high priority to assisting Member States in the implementation of Security Council resolutions on women and peace and security and to assisting States, upon request, in promoting the role of women in disarmament, non-proliferation and arms control and gender-sensitive policymaking and programming in line with General Assembly resolution 65/69 and subsequent resolutions on women, disarmament, non-proliferation and arms control. The Office will support the collection of data on the representation of women and men in disarmament meetings and education on gender mainstreaming related to disarmament, non-proliferation and arms control to support the activities of its five subprogrammes.
- 4.8 In line with the United Nations Disability Inclusion Strategy and General Assembly resolution 74/144, the Office will continue to implement its departmental action plan and work collaboratively with other United Nations entities to accelerate the full and effective mainstreaming of disability inclusion. This will include the promotion of accessibility and the equal participation of persons with disabilities in disarmament discussions and decision-making processes.
- 4.9 The Office will continue to facilitate youth engagement and promote the meaningful and inclusive participation of young people in discussions in the field of disarmament and non-proliferation, in line with General Assembly resolution 76/45 on youth, disarmament and non-proliferation.

Impact of the pandemic and lessons learned

- 4.10 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular through the number of conferences, events and activities that took place in 2022 after being postponed in prior periods. This resulted in a more comprehensive agenda, including both the tenth Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons, under subprogramme 2, and the ninth Review Conference of the Biological Weapons Convention, under subprogramme 1, which were postponed from 2020 and 2021, respectively. In addition, all three sessions of the Group of Governmental Experts on the United Nations Register of Conventional Arms, under subprogramme 3, were held in 2022, rather than one being held in 2021, as originally envisaged. Furthermore, two planned sessions of the Group of Governmental Experts to further consider nuclear disarmament verification issues, originally planned for 2021, were further delayed until 2023. Under subprogramme 5, the United Nations

Regional Centre for Peace, Disarmament and Development in Latin America and the Caribbean was able to deliver half of its assistance in 2022 in a virtual or hybrid format, having transitioned its assistance delivery modality during the pandemic to include virtual platforms and enhanced its e-learning platforms and tools to ensure uninterrupted support to Member States.

- 4.11 The Office continues to mainstream lessons learned related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including making use of hybrid sessions to facilitate wider participation in meetings and events, as appropriate and in accordance with decisions taken by Member States in the context of General Assembly-mandated meetings. The Office has also made use of virtual or hybrid sessions, such as for training, as appropriate and while maintaining opportunities for intricate and complex negotiations and issues.

Legislative mandates

- 4.12 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

S-10/2	Final Document of the Tenth Special Session of the General Assembly	68/33	Women, disarmament, non-proliferation and arms control
59/95	Improving the effectiveness of the methods of work of the First Committee	76/234	Promoting international cooperation on peaceful uses in the context of international security
62/272	The United Nations Global Counter-Terrorism Strategy		

Security Council resolutions

1325 (2000)	1977 (2011)
1540 (2004)	2055 (2012)
1673 (2006)	2117 (2013)
1810 (2008)	2118 (2013)
1887 (2009)	2475 (2019)

Subprogramme 1

Multilateral negotiations and deliberations on disarmament and arms limitation

General Assembly resolutions and decisions

74/50 ; decisions 75/516 , 76/515 and 77/514	Nuclear disarmament verification	76/64	Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects
75/31	Prohibition of the development and manufacture of new types of weapons of mass destruction and new systems of such weapons: report of the Conference on Disarmament	77/63	Implementation of the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction
76/47	Implementation of the Convention on Cluster Munitions	77/81	United Nations disarmament fellowship, training and advisory services
76/62	Report of the Conference on Disarmament	77/95	Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction

**Subprogramme 2
Weapons of mass destruction**

General Assembly resolutions and decisions

42/37 C	Measures to uphold the authority of the 1925 Geneva Protocol and to support the conclusion of a chemical weapons convention	77/38	Establishment of a nuclear-weapon-free zone in the region of the Middle East
42/38 C	Notification of nuclear tests	77/47	Follow-up to the 2013 high-level meeting of the General Assembly on nuclear disarmament
54/280	Agreement to regulate the relationship between the United Nations and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization	77/50	Measures to uphold the authority of the 1925 Geneva Protocol
		77/54	Treaty of the Prohibition of Nuclear Weapons
55/283	Cooperation between the United Nations and the Organization for the Prohibition of Chemical Weapons	77/56	Mongolia's international security and nuclear-weapon-free status
64/35	International Day against Nuclear Tests	77/57	Follow-up to the advisory opinion of the International Court of Justice on the legality of the threat or use of nuclear weapons
69/44	The Hague Code of Conduct against Ballistic Missile Proliferation	77/65	Nuclear disarmament
72/31	Taking forward multilateral nuclear disarmament negotiations	77/66	Eleventh Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons and its Preparatory Committee
73/71	Fourth Conference of Nuclear-Weapon-Free Zones and Mongolia, 2020		
Decision 73/546	Convening a conference on the establishment of a Middle East zone free of nuclear weapons and other weapons of mass destruction	77/74	Reducing nuclear danger
		77/75	Measures to prevent terrorists from acquiring weapons of mass destruction
76/48	Universal Declaration on the Achievement of a Nuclear-Weapon-Free World	77/91	The risk of nuclear proliferation in the Middle East
76/231	Reducing space threats through norms, rules and principles of responsible behaviours	77/250	Further practical measures for the prevention of an arms race in outer space
		77/251	Transparency and confidence-building measures in outer space activities

**Subprogramme 3
Conventional arms**

General Assembly resolutions and decisions

77/33	Objective information on military matters, including transparency of military expenditures	77/69	Transparency in armaments
77/45	Relationship between disarmament and development	77/71	The illicit trade in small arms and light weapons in all its aspects
77/49	Effects of the use of armaments and ammunitions containing depleted uranium	77/72	Information on confidence-building measures in the field of conventional arms
77/61	Conventional arms control at the regional and subregional levels	77/80	Assistance to States for curbing the illicit traffic in small arms and light weapons and collecting them
77/64	Countering the threat posed by improvised explosive devices	Decision 77/547	Problems arising from the accumulation of conventional ammunition stockpiles in surplus

**Subprogramme 4
Information and outreach**

General Assembly resolutions and decisions

47/53 D	World Disarmament Campaign	77/37	Programme of action to advance responsible State behaviour in the use of information and communications technologies in the context of international security
Decision 54/418	Advisory Board on Disarmament Matters		
57/60	United Nations study on disarmament and non-proliferation education		
75/61	United Nations study on disarmament and non-proliferation education	77/43	
75/80	United Nations Disarmament Information Programme	77/44	
75/240; 77/36	Developments in the field of information and telecommunications in the context of international security	77/48	
76/45	Youth, disarmament and non-proliferation		
		Decision 77/512	Open-ended working group on security of and in the use of information and communications technologies 2021–2025 established pursuant to General Assembly resolution 75/240

**Subprogramme 5
Regional disarmament**

General Assembly resolutions and decisions

Decision 77/511	Maintenance of international security – good neighbourliness, stability and development in South-Eastern Europe	77/84	United Nations Regional Centre for Peace, Disarmament and Development in Latin America and the Caribbean
76/17	Implementation of the Declaration of the Indian Ocean as a Zone of Peace	77/85	United Nations Regional Centre for Peace and Disarmament in Asia and the Pacific
77/59	Regional disarmament	77/88	United Nations regional centres for peace and disarmament
77/60	Confidence-building measures in the regional and subregional context	77/93	Strengthening of security and cooperation in the Mediterranean region
77/83	United Nations Regional Centre for Peace and Disarmament in Africa		

Deliverables

4.13 Table 4.1 lists all cross-cutting deliverables of the programme.

Table 4.1
Cross-cutting deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	3	3	3
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	1	1	1

Evaluation activities

- 4.14 The following evaluations completed in 2022 have guided the proposed programme plan for 2024:
- (a) Office of Internal Oversight Services triennial review in 2021 and 2022 on the implementation of its recommendations made in its report entitled “Evaluation of the United Nations Office for Disarmament Affairs” (IED-18-007);
 - (b) Evaluation of the training on gender mainstreaming of the Office for Disarmament Affairs;
 - (c) Evaluations of projects within the relevant subprogrammes.
- 4.15 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, following the evaluation of the training on gender mainstreaming in 2022, the online training module on gender and disarmament on the Disarmament Education Dashboard was updated and merged with internal training on gender mainstreaming, in order to ensure greater coherence with and links to relevant resources for mainstreaming a gender perspective in disarmament and to explain the role of disarmament in the women and peace and security agenda, as well as relevant gender equality forums and intergovernmental decisions.
- 4.16 An evaluation of the Office’s outreach initiative, Youth for Disarmament, in support of General Assembly resolution [76/45](#) on youth, disarmament and non-proliferation, is planned for 2024.

Programme of work

Subprogramme 1

Multilateral negotiations and deliberations on disarmament and arms limitation

Objective

- 4.17 The objective, to which this subprogramme contributes, is to advance multilateral negotiations and deliberations on agreements on disarmament, arms limitation and non-proliferation in all its aspects, as required by States parties to existing multilateral agreements and the Conference on Disarmament.

Strategy

- 4.18 To contribute to the objective, the subprogramme will:
- (a) Provide support for negotiations in the Conference on Disarmament and in conferences and meetings of States parties to various multilateral agreements on disarmament, arms limitation and non-proliferation in all its aspects at the organizational, procedural and substantive levels;
 - (b) Render assistance and provide support for the follow-up to decisions, recommendations and programmes of action adopted by conferences and meetings of States parties to various multilateral disarmament, arms control and non-proliferation agreements;
 - (c) Implement the United Nations Disarmament Fellowship, Training and Advisory Services Programme.
- 4.19 The above-mentioned work is expected to result in:
- (a) Effective and efficient holding of the meetings of the Conference on Disarmament and of the various treaty bodies falling under the remit of the subprogramme;
 - (b) Strengthened operational viability and compliance with treaty obligations and adherence to and/or implementation of decisions, recommendations and programmes of action, as well as increased reporting by States parties;

- (c) Enhanced expertise of Member States in the field of disarmament and non-proliferation through participation in the United Nations Disarmament Fellowship, Training and Advisory Services Programme.

Programme performance in 2022

Agreement by States parties on an expanded intersessional programme for the Biological Weapons Convention

- 4.20 The postponed ninth Review Conference of the Biological Weapons Convention was held in Geneva from 28 November to 16 December 2022 to review the operation of the Convention in accordance with its article XII and to review progress made by States parties in the implementation of the Convention and progress in the implementation of the decisions and recommendations agreed upon at the eighth Review Conference. The subprogramme provided technical implementation and substantive secretariat support to the President and Vice-Presidents of the Conference and to the Chairs and Vice-Chairs of the established committees. The agreed final document includes decisions on a new intersessional programme for the period from 2023 to 2026 and the establishment of a new working group to identify, examine and develop specific and effective measures, including possible legally binding measures, and to make recommendations to strengthen and institutionalize the Convention in all its aspects. The working group will address measures on: (a) international cooperation and assistance under article X; (b) scientific and technological developments relevant to the Convention; (c) confidence-building and transparency; (d) compliance and verification; (e) national implementation of the Convention; (f) assistance, response and preparedness under article VII; and (g) organizational, institutional and financial arrangements.
- 4.21 Progress towards the objective is presented in the performance measure below (see table 4.2).

Table 4.2

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	The five Meetings of Experts of the Biological Weapons Convention and the Meeting of States Parties to the Convention that had been postponed in 2020 owing to the COVID-19 pandemic were held	The ninth Review Conference agreed upon the establishment of a working group open to all States parties in order to strengthen the effectiveness and improve the implementation of the Convention in all its aspects

Planned results for 2024

Result 1: improved impact and versatility of the United Nations Disarmament Fellowship, Training and Advisory Services Programme

Programme performance in 2022 and target for 2024

- 4.22 The subprogramme's work contributed to participants in the United Nations Disarmament Fellowship, Training and Advisory Services Programme, in particular from the global South, having an enhanced understanding of disarmament, non-proliferation and arms control, as well as access to additional e-training resources, including the Office for Disarmament Affairs-United Nations Institute for Disarmament Research disarmament orientation course, which met the planned target.
- 4.23 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 4.3).

Table 4.3
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	United Nations Disarmament Fellowship Programme participants have an enhanced understanding of disarmament, non-proliferation and arms control through access to increased online resources	United Nations Disarmament Fellowship Programme participants, in particular from developing countries, have an enhanced understanding of disarmament, non-proliferation and arms control, as well as access to additional e-training resources, such as the Office for Disarmament Affairs-United Nations Institute for Disarmament Research disarmament orientation course, including after completion of the Programme	United Nations Disarmament Fellowship Programme participants have access to additional training resources	United Nations Disarmament Fellowship Programme participants have access to expanded training resources, including the mandatory online introductory component to the Programme

Result 2: advanced discussions on the risks and benefits of emerging technologies in biological sciences

Programme performance in 2022 and target for 2024

- 4.24 The subprogramme’s work contributed to the decision of the ninth Review Conference of the Biological Weapons Convention to develop, with a view to its establishment, a mechanism to review and assess scientific and technological developments relevant to the Convention and provide States parties with relevant advice, and to the establishment of a working group on strengthening the Convention to make appropriate recommendations to enable the mechanism to be established, which met the planned target.
- 4.25 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 4.4).

Table 4.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Two informal webinars on topics related to the meeting of experts on science and technology were organized, as well as one webinar on the specific topic of reviewing advances in science and technology	<p>Convergence among States parties on several aspects of a review mechanism for science and technology under the Biological Weapons Convention</p> <p>Development of the Tianjin Biosecurity Guidelines for Codes of Conduct for Scientists by academics from China and the United States of America, supported by the Governments of China and the United States. The Guidelines were subsequently endorsed by the Inter-Academy Partnership Unit</p>	The ninth Review Conference decided to develop, with a view to its establishment, a mechanism to review and assess scientific and technological developments relevant to the Biological Weapons Convention and provide States parties with relevant advice	States parties converge on certain aspects of the risks and benefits of advances in science and technology under the Biological Weapons Convention	The working group on strengthening the Convention develops recommendations on establishing a mechanism to review and assess scientific and technological developments relevant to the Convention

Result 3: increase in deliberations and eventual negotiations in the Conference on Disarmament

Proposed programme plan for 2024

- 4.26 The General Assembly, at its first special session on disarmament, recognized the Conference on Disarmament as the single multilateral disarmament negotiating forum of the international community (see resolution 77/89). The subprogramme has consistently assisted the States members and Presidents of the Conference, as well as the coordinators of the subsidiary bodies, and has provided advice and substantive support, including in the preparation of draft documents, background papers and research. There has been an upsurge in substantive discussions and an increase in the frequency of meetings, in particular with regard to the subsidiary bodies, the coordination meetings between the six Presidents of the year with the last President of the previous year and the first President of the following year, and meetings of the President with the regional coordinators. Requests from States members for substantive support linked to the thematic discussions and events and to the subsidiary bodies (in 2018 and 2022) have also increased. The subprogramme’s work helped to support continuity in the work of the six Presidents of the year through the provision of support in various areas, including research, the drafting of official documents and statements of the Secretary-General of the Conference and the provision of advice and substantive support to successive Presidents. The subprogramme also led the establishment of subsidiary bodies in 2018 and 2022 and organized substantive events on selected topics at the request of successive Presidents.

Lessons learned and planned change

- 4.27 The lesson for the subprogramme was that the secretariat of the Conference can strengthen its institutional capacity for support to better respond to the requests of States members of the Conference. In applying the lesson, the subprogramme will invest more time and resources in developing the research and drafting capacity of junior staff, who will also shadow more experienced staff. The programme expects that the strengthened capacity will offer States members greater continued support for convening thematic debates, drafting documentation and conducting research, as well as greater opportunities to support informal meetings, upon request, and support coordination among States members and successive Presidents of the Conference.
- 4.28 Expected progress towards the objective is presented in the performance measure below (see table 4.5).

Table 4.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Dialogue among the States members of the Conference is maintained despite the COVID-19 pandemic	Increased continuity in the work of the six successive Presidents allows for coordinated thematic discussions States members put forward a proposal to update the rules of procedure to recognize equality between women and men	The Conference on Disarmament adopted two of the five reports of the subsidiary bodies and a procedural report of the Conference to the General Assembly	States members have access to increased support for convening thematic debates, drafting documentation and conducting research, as well as greater opportunities for informal meetings in support of coordination among States members and successive Presidents of the Conference	States members of the Conference reach agreement on a possible way forward, leading to discussions on possible areas of convergence for codes of conduct, confidence-building measures or pre-negotiations

Deliverables

- 4.29 Table 4.6 lists all deliverables of the subprogramme.

Table 4.6
Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	187	479	176	259
1. Documents, verbatim records and reports of the Conference on Disarmament	86	154	86	86
2. Report of the Secretary-General to the General Assembly on the United Nations Disarmament Fellowship, Training and Advisory Services Programme	1	1	–	1
3. Documents of the Group of Governmental Experts to further consider nuclear disarmament verification issues	3	19	3	–

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
4. Documents of the Meeting of States Parties to the Convention on the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction	32	38	32	32
5. Documents of the Meetings of the Working Group, Meetings of States Parties and the ninth Review Conference to the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction	–	216	–	80
6. Documents of the Meeting of the High Contracting Parties to the Convention on Certain Conventional Weapons, of the annual conferences of its Amended Protocol II and Protocol V and of the Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons Systems	45	37	35	40
7. Documents of the Review Conference and Meetings of States Parties to the Convention on Cluster Munitions	20	14	20	20
Substantive services for meetings (number of three-hour meetings)	190	222	171	189
8. Consultations and meetings of the Conference on Disarmament	95	105	95	95
9. Meetings of the Group of Governmental Experts to further consider nuclear disarmament verification issues	22	21	22	–
10. Meetings of the States Parties to the Convention on the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction	10	10	10	14
11. Meetings of the Working Group, Meetings of States Parties and the ninth Review Conference to the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction	–	42	–	36
12. Meetings of the High Contracting Parties to the Convention on Certain Conventional Weapons, the annual conferences of its Amended Protocol II and Protocol V, meetings of the Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons Systems, the Group of Experts of the High Contracting Parties to Amended Protocol II and the Meeting of Experts on Protocol V	55	36	36	36
13. Meetings of States Parties and the Review Conference of the Convention on Cluster Munitions	8	8	8	8
Conference and secretariat services for meetings (number of three-hour meetings)	190	222	171	189
14. Consultations and meetings of the Conference on Disarmament	95	105	95	95
15. Meetings of the Group of Governmental Experts to further consider nuclear disarmament verification issues	22	21	22	–
16. Meetings of the States Parties to the Convention on the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction	10	10	10	14
17. Meetings of the Working Group, Meetings of States Parties and the ninth Review Conference to the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction	–	42	–	36
18. Meetings of the High Contracting Parties to the Convention on Certain Conventional Weapons, the annual conferences of its Amended Protocol II and Protocol V, meetings of the Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons Systems, the Group of Experts of the High Contracting Parties to Amended Protocol II and the Meeting of Experts on Protocol V	55	36	36	36
19. Meetings of States Parties and the Review Conference of the Convention on Cluster Munitions	8	8	8	8
Documentation services for meetings (thousands of pages)	10.6	12.8	10.6	10.6
20. All meetings serviced by the subprogramme	10.6	12.8	10.6	10.6
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	7	7	3	4
21. On the Biological Weapons Convention	7	7	3	4

Section 4 Disarmament

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
Seminars, workshops and training events (number of days)	70	70	70	70
22. United Nations Disarmament Fellowship, Training and Advisory Services Programme	70	70	70	70
Technical materials (number of materials)	–	1	–	–
23. On the submission of confidence-building measures and on national implementation of the Biological Weapons Convention	–	1	–	–

C. Substantive deliverables

Databases and substantive digital materials: databases relating to annual national reports on compliance, Protocol V and Amended Protocol II to the Convention on Certain Conventional Weapons, explosive remnants of war under Protocol V to the Convention, articles 7 and 8 (9) of the Convention on the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction, and article 7 of the Convention on Cluster Munitions; electronic reporting system for the confidence-building measures and the cooperation and assistance database of the Biological Weapons Convention; website relating to the Conference on Disarmament, the Geneva Branch of the Office for Disarmament Affairs, including web pages on financial matters, fissile material, the Biological Weapons Convention, the Convention on Certain Conventional Weapons, the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques, the Convention on Cluster Munitions and the Anti-Personnel Landmines Convention, the United Nations Disarmament Fellowship, Training and Advisory Services Programme and the Group of Governmental Experts to further consider nuclear disarmament verification issues.

D. Communication deliverables

Outreach programmes, special events and information materials: briefings and outreach materials (physical and digital) on disarmament, arms limitation and non-proliferation to the Geneva-based permanent missions and governmental, non-governmental and civil society organizations; digital tools to improve national reporting and compliance (Biological Weapons Convention and Convention on Certain Conventional Weapons).

Digital platforms and multimedia content: web pages on financial issues in support of conventions serviced by the subprogramme; digital tools to improve national reporting and compliance.

Subprogramme 2 Weapons of mass destruction

Objective

- 4.30 The objective, to which this subprogramme contributes, is to advance disarmament and non-proliferation in all aspects of nuclear weapons and all other weapons of mass destruction and their means of delivery.

Strategy

- 4.31 To contribute to the objective, the subprogramme will:
- Facilitate and support the process of negotiations, deliberations and consensus-building in the areas of disarmament and non-proliferation of weapons of mass destruction, in particular nuclear weapons and their means of delivery;
 - Support the full implementation of international instruments dealing with the disarmament and non-proliferation of nuclear weapons, including the Treaty on the Non-Proliferation of Nuclear Weapons and the Treaty on the Prohibition of Nuclear Weapons, and for the entry into force of the Comprehensive Nuclear-Test-Ban Treaty;
 - Support Member States in their negotiations on the establishment of a Middle East zone free of nuclear weapons and all other weapons of mass destruction;
 - Provide substantive and technical support to office bearers of the First Committee and the Disarmament Commission;

- (e) Continue to raise awareness of the dangers posed by nuclear weapons, including through substantive and technical support to the International Day for the Total Elimination of Nuclear Weapons and the International Day against Nuclear Tests;
 - (f) Strengthen cooperation with other relevant intergovernmental organizations, such as the International Atomic Energy Agency, in areas such as nuclear security and non-proliferation, and expand interaction, as appropriate, with civil society, in particular research and academic institutions and non-governmental organizations working in the areas of disarmament and non-proliferation of nuclear weapons and their delivery systems;
 - (g) Continue its close cooperation with the Organisation for the Prohibition of Chemical Weapons (OPCW) to promote the universality and full implementation of the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction;
 - (h) Support efforts to ensure accountability for the use of chemical weapons by, inter alia, supporting OPCW efforts in this regard and by working with members of the Security Council in order to build unity on the issue. The subprogramme will also continue to provide briefings to the Council on the implementation of resolution [2118 \(2013\)](#) on the elimination of the chemical weapons programme of the Syrian Arab Republic;
 - (i) Continue to enhance the operational readiness of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons by organizing, with interested Member States and relevant partners, training and capacity-building activities for experts and analytical laboratories;
 - (j) Facilitate the efforts of Member States to prevent an arms race in outer space.
- 4.32 The above-mentioned work is expected to result in:
- (a) The building of trust and understanding among Member States in order to facilitate consensus on effective measures relating to the total elimination of nuclear weapons and measures to help to reduce the risks of nuclear weapons use;
 - (b) The strengthening and reinforcement of the norm against chemical weapons use;
 - (c) Enhanced ability of Member States to uphold the global norms against the use of weapons of mass destruction;
 - (d) Strengthened coordination capabilities of Member States to respond to incidents involving the use of biological weapons.

Programme performance in 2022

Prevention of an arms race in outer space

- 4.33 In the final document of the first special session of the General Assembly devoted to disarmament, on resolutions and decisions adopted by the Assembly during its tenth special session ([A/S-10/4](#)), it was stated that, in order to prevent an arms race in outer space, further measures should be taken and appropriate international negotiations held. To that end, the subprogramme contributed to the successful outcome of the work of intergovernmental bodies and the processes responsible for various aspects of the prevention of an arms race in outer space. The subprogramme built upon past work and outcomes, including expert groups established under the auspices of the Secretary-General and subsidiary bodies or working groups established by the Conference on Disarmament, the Disarmament Commission and the General Assembly.
- 4.34 Progress towards the objective is presented in the performance measure below (see table 4.7).

Table 4.7
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	Preparation of the substantive report of the Secretary-General on reducing space threats through norms, rules and principles of responsible behaviours (A/76/77), pursuant to General Assembly resolution 75/36, and follow-up by the Assembly on the recommendations of the Secretary-General, including the establishment of an open-ended working group	Two sessions of the open-ended working group on reducing space threats through norms, rules and principles of responsible behaviours were held Preparation of the substantive report of the Secretary-General on further practical measures for the prevention of an arms race in outer space (A/77/80), pursuant to General Assembly resolution 76/230, and follow-up by the Assembly on the recommendations of the Secretary-General, including the establishment of a group of governmental experts

Planned results for 2024

Result 1: establishment of a Middle East zone free of nuclear weapons and other weapons of mass destruction

Programme performance in 2022 and target for 2024

- 4.35 The subprogramme's work contributed to advancing the process to establish a Middle East zone free of nuclear weapons and other weapons of mass destruction, which facilitates the building of common positions towards the elaboration of a legally binding treaty, which met the planned target.
- 4.36 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 4.8).

Table 4.8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Increased knowledge and expertise of Member States, which contributed to the aim of leading to the elaboration of a legally binding treaty	Decisions from the first session of the Conference implemented Outcomes of the second session of the Conference included the establishment of a working committee to undertake substantive intersessional work between annual sessions of the Conference	The Conference continued substantive discussions and decided to engage in further detailed discussions on two of the main topics at the working committee: (a) glossary of terminologies; and (b) general principles and obligations for a Middle East zone free of nuclear weapons and other weapons of mass destruction	The Conference continues to progressively identify areas of convergence, which facilitates continuous progress towards the negotiation of a legally binding treaty	The Conference continues to undertake substantive deliberations, including through its intersessional working committee meetings, to facilitate the preparation of the next session of the Conference and advance towards the negotiation of a legally binding instrument

Result 2: enhanced operational readiness of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons

Programme performance in 2022 and target for 2024

- 4.37 The subprogramme's work contributed to strengthening the operational readiness of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons, with all newly nominated experts onboarded having an increased understanding of the Mechanism, and an increase in the nomination of experts for the roster having been attained, which met the planned target.
- 4.38 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 4.9).

Table 4.9

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Strengthened operational readiness of the Mechanism through enhanced capacity of qualified experts, expert consultants and laboratory focal points on their respective roles and mission planning	Increased understanding of qualified experts and laboratory focal points on the Mechanism and planned strategic missions Access to improved training for qualified experts	All newly nominated experts onboarded have an increased understanding of the Mechanism An increase in the nomination of experts for the roster	All newly nominated experts onboarded have an increased understanding of the Mechanism Enhanced capacity of qualified experts and laboratory focal points on relevant skills based on the Mechanism's training catalogue	All newly nominated experts onboarded have an increased understanding of the Mechanism Increase in the number of experts with specialized skills training relevant to the Mechanism, and a broader geographical and skills base of rostered experts

Result 3: strengthening the multilateral nuclear disarmament and non-proliferation regime

Proposed programme plan for 2024

- 4.39 The elimination of nuclear weapons is the highest disarmament priority of Member States, and the Treaty on the Non-Proliferation of Nuclear Weapons remains the most widely supported multilateral nuclear disarmament- and non-proliferation-related treaty. The Treaty will commence a new review cycle in 2023 (see [NPT/CONF.2020/DEC.2](#)), offering the opportunity to strengthen the implementation of the Treaty, including commitments made under it, at a time of heightened nuclear risk. The subprogramme will support the eleventh Review Conference of the Parties to the Treaty and its Preparatory Committee, in accordance with General Assembly resolution [77/66](#), including through the administration of meetings and the provision of substantive and technical expertise. Review Conferences on the Treaty have in the past adopted forward-looking commitments by States parties aimed at strengthening the implementation of the Treaty.

Lessons learned and planned change

- 4.40 The lesson for the subprogramme was that, despite its past successes, there are opportunities to strengthen the Treaty review process in order to better facilitate successful outcomes, which was also recognized by States parties in their decision to establish a working group on further strengthening the review process of the Treaty (see [NPT/CONF.2020/DEC.2](#)). In applying the lesson, the subprogramme will support States parties in establishing the working group and developing

recommendations that can strengthen the review process to facilitate outcomes that will enhance the implementation of the Treaty.

4.41 Expected progress towards the objective is presented in the performance measure below (see table 4.10).

Table 4.10
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Expanded scope of consultations and reach of webinars that enabled dialogue on innovative ideas in the lead-up to the postponed Review Conference	Enhanced dialogue between Member States on achieving the goals of the Treaty on the Non-Proliferation of Nuclear Weapons	The 2020 Review Conference of the Parties to the Treaty, which was delayed by two years owing to the COVID-19 pandemic, was held States parties established a working group to further strengthen the review process of the Treaty	The first Preparatory Committee meeting for the eleventh Review Conference of the Parties to the Treaty in 2026 is held Development of consensus recommendations by the working group on further strengthening the review process of the Treaty	The second Preparatory Committee meeting for the eleventh Review Conference of the Parties to the Treaty in 2026 is held

Deliverables

4.42 Table 4.11 lists all deliverables of the subprogramme.

Table 4.11
Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	241	252	160	136
1. Reports of and notes by the Secretary-General to the General Assembly on nuclear and chemical weapons	9	10	9	10
2. Reports and documents for the 2020 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	71	115	–	–
3. Reports and documents for the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	20	13	20	16
4. Reports and documents for the Preparatory Committee for the eleventh Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	70	–	70	80
5. Report for the fourth Conference of Nuclear-Weapon-Free Zones and Mongolia	1	–	–	–
6. Reports and documents for the First Meeting of States Parties to the Treaty on the Prohibition of Nuclear Weapons	29	86	–	–

11. Pre-session consultations and meetings of the 2020 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	–	63	–	–
12. Plenary meetings of the high-level plenary meeting to commemorate and promote the International Day for the Total Elimination of Nuclear Weapons	2	2	2	2
13. High-level plenary meetings to commemorate and promote the International Day against Nuclear Tests	2	1	2	2
14. Meetings of the Conference and the Bureau of the Conference on Facilitating the Entry into Force of the Comprehensive Nuclear-Test-Ban Treaty	–	–	2	–
15. Meetings of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	10	10	6	10
16. Pre-session consultations and meetings for the First Meeting of States Parties to the Treaty on the Prohibition of Nuclear Weapons	10	23	–	–
17. Fourth Conference of Nuclear-Weapon-Free Zones and Mongolia	–	–	–	–
18. Pre-session consultations and meetings for the Preparatory Committee for the eleventh Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	30	–	30	30
19. Meetings of the open-ended working group on reducing space threats through norms, rules and principles of responsible behaviours	24	24	20	–
20. Meetings of the Group of Governmental Experts on Further Practical Measures for the Prevention of an Arms Race in Outer Space	–	–	20	24
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	35	35	30	35
21. Intersessional briefings of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	6	3	6	3
22. Training courses for the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons on chemical weapons investigations and updating the roster of experts	29	31	24	32
23. Regional briefing in preparation for the 2020 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	–	1	–	–
C. Substantive deliverables				
Consultation, advice and advocacy: impartial technical, substantive and procedural advice provided to Member States; consultations with civil society, including on participation by civil society in treaty-related conferences; consultations with academia and specialized technical institutions; liaison with relevant intergovernmental organizations (e.g. OPCW, IAEA and Comprehensive Nuclear-Test-Ban Treaty Organization); interdepartmental coordination, including as Vice-Chair of the United Nations Global Counter-Terrorism Coordination Compact Working Group on Emerging Threats and Critical Infrastructure Protection.				
D. Communication deliverables				
Outreach programmes, special events and information materials: fact sheets on weapons of mass destruction disarmament and associated treaties; side events at relevant United Nations and ad hoc conferences; newsletter of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons; outreach and advocacy to the general public and students conducted through events organized by the subprogramme, Member States, civil society, academia and other stakeholders.				
Digital platforms and multimedia content: Office for Disarmament Affairs website and social media platforms related to weapons of mass destruction issues.				

Subprogramme 3 Conventional arms

Objective

- 4.43 The objective, to which this subprogramme contributes, is to advance the regulation and limitation of conventional weapons, taking into account the legitimate needs of States for self-defence.

Strategy

- 4.44 To contribute to the objective, the subprogramme will:
- (a) Provide substantive support, including preparatory activities for intergovernmental processes, to the following:
 - (i) First Committee of the General Assembly and the Security Council;
 - (ii) Fourth United Nations Conference to Review Progress Made in the Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects;
 - (b) Further develop, update, revise and disseminate, as appropriate, the following:
 - (i) International Ammunition Technical Guidelines through the *SaferGuard* programme;
 - (ii) Database on military expenditures;
 - (iii) Register of Conventional Arms;
 - (iv) Modular Small-arms-control Implementation Compendium;
 - (v) Repository of military confidence-building measures;
 - (vi) Database on national reports of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects;
 - (c) Assist States in the implementation of the outcomes of the Seventh and Eighth Biennial Meetings of States, held in 2021 and 2022, respectively, including the design and implementation of a standing dedicated fellowship training programme on small arms and light weapons in accordance with General Assembly resolution [77/71](#);
 - (d) Implement and follow up on the relevant recommendations of the open-ended working group on conventional ammunition, established pursuant to General Assembly resolution [76/233](#), which is expected to complete its work in 2023;
 - (e) Provide capacity-building support for requesting States to collect and consolidate data to support monitoring of indicator 16.4.2 of the Sustainable Development Goals;
 - (f) In partnership with United Nations system entities:
 - (i) Promote safe and secure weapons and ammunition management, in disarmament, demobilization and reintegration processes and in peace operation contexts;
 - (ii) In line with the 2030 Agenda for Sustainable Development, support the integration of small arms control considerations into United Nations country-level system-wide approaches to development;
 - (g) Support, implement and facilitate assistance projects that develop the capacity of national institutions with regard to conventional arms and ammunition control, including through the United Nations Trust Facility Supporting Cooperation on Arms Regulation, the Saving Lives Entity fund, the Ammunition Management Advisory Team and the *SaferGuard* Programme, and support the Silencing the Guns by 2030 initiative of the African Union;

- (h) Implement, as required, relevant recommendations issued in 2022 by the Group of Governmental Experts on the United Nations Register of Conventional Arms and undertake preparations for the meetings of the Group to be held in 2024 and 2025;
 - (i) Manage the transparency instruments on military expenditures and the Register of Conventional Arms and provide support to States for their greater participation;
 - (j) Support initiatives and efforts for fostering military confidence-building measures at the subregional and regional levels.
- 4.45 The above-mentioned work is expected to result in:
- (a) Participation of States in the preparatory processes and review conferences of the Programme of Action on Small Arms and the ability of States to address the outcome commitments;
 - (b) Strengthened legislation, policies and regulations on small arms and light weapons and conventional ammunition at the national, regional and subregional levels;
 - (c) Enhanced effectiveness of existing international assistance frameworks through the implementation of the Programme of Action on Small Arms and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons (the International Tracing Instrument);
 - (d) Improved integration of small arms and light weapons control considerations into development processes and frameworks;
 - (e) Reduced armed violence and risk of armed conflict among States by reducing the destabilizing effect of increasing arms and ammunition transfers and accumulations, as well as fostering confidence-building measures among States;
 - (f) Continued relevance and improved participation of States in the United Nations Report on Military Expenditures and the Register of Conventional Arms.

Programme performance in 2022

Increased participation of Member States in the Register of Conventional Arms

- 4.46 The subprogramme supported the participation of Member States in submitting reports to the Register of Conventional Arms through greater awareness-raising, advocacy and outreach activities, and at the margins of various intergovernmental meetings. Discussions with the secretariat of the Arms Trade Treaty on information-sharing and with States on increasing participation in the Register resulted in an agreement among States parties to the Arms Trade Treaty to simultaneously report, on a voluntary basis, through the reporting systems of the Register and the Treaty. The subprogramme also provided substantive support to the 2022 Group of Governmental Experts on the continuing operation of the Register of Conventional Arms and its further development. The experts issued recommendations to increase the number of submissions, including through the aforementioned simultaneous submission option. The Office for Disarmament Affairs is currently working to implement the recommendations with the assistance of the informal group of friends of the Register, a mechanism established by the 2022 Group of Governmental Experts to support the subprogramme's advocacy and outreach efforts.
- 4.47 Progress towards the objective is presented in the performance measure below (see figure 4.I).

Figure 4.I

Performance measure: number of reports submitted to the Register of Conventional Arms by Member States

Planned results for 2024

Result 1: Silencing the Guns by 2030 through Africa Amnesty Month – reducing illicit arms and ammunition flows through mobilization of broad voluntary handovers by civilians

Programme performance in 2022 and target for 2024

- 4.48 The subprogramme’s work contributed to efforts by Member States to strengthen prevention of the misuse of illicit arms and reduce illicit arms flows, through the further development of small arms and ammunition control by national commissions and focal points in six Member States, as well as the conduct of voluntary handover campaigns and the destruction of weapons, ammunition and explosives, which met the planned target.
- 4.49 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 4.12).

Table 4.12

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Engagement by national commissions and focal points on small arms control, the African Union and the Regional Centre on Small Arms and Light Weapons in the Great Lakes Region, the Horn of Africa and Bordering States in conducting national voluntary surrender of weapons campaigns, including capacity-building in community policing, secure storage and destruction, in seven Member States	National commissions and focal points further develop small arms and ammunition control in six Member States Three additional States conduct voluntary handover campaigns and destroy collected weapons	National commissions and focal points further developed small arms and ammunition control in six Member States Three additional States conducted voluntary handover campaigns and destroyed 262,815 weapons, ammunition and explosives	National commissions and focal points on small arms control have increased capacity to conduct national voluntary surrender of weapons campaigns, including through capacity-building in community policing, secure storage and destruction	National commissions and focal points on small arms control conduct follow-up activities to the Africa Amnesty Month project to further enhance their capacities in preventing the misuse of illicit arms and reducing illicit arms flows, including through regular awareness-raising campaigns and national voluntary surrender of weapons campaigns

Result 2: improved management of safety and security risks of conventional ammunition

Programme performance in 2022 and target for 2024

- 4.50 The subprogramme’s work contributed to the open-ended working group on ammunition holding a series of informal consultations, one organizational session and two substantive sessions on through-life ammunition management, which met the planned target.
- 4.51 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 4.13).

Table 4.13
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
First session of the Group of Governmental Experts held in January. Second and third sessions of the Group postponed to 2021, owing to the COVID-19 pandemic. The Group held virtual informal consultations	Second and third sessions of the Group held in a hybrid format. The Group adopted its final report (A/76/324) by consensus. On the basis of the Group’s recommendations, the General Assembly established an open-ended working group (see resolution 76/233)	The open-ended working group held a series of informal consultations, one organizational session and two substantive sessions on through-life ammunition management	The open-ended working group holds the third and fourth substantive sessions and submits a report on its work to the General Assembly at its seventy-eighth session	Initiation of a follow-up process based on General Assembly guidance related to a global framework on through-life ammunition management

Result 3: strengthened implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons

Proposed programme plan for 2024

- 4.52 The Programme of Action on Small Arms (see A/CONF.192/15) and the International Tracing Instrument (see A/60/88, annex, A/60/88/Corr.1 and A/60/88/Corr.2, and decision 60/519) underpin the global normative framework on illicit small arms and light weapons. Through the Programme of Action, States have agreed to improve, inter alia, national small arms laws, import and export controls, stockpile management and cooperation in weapons tracing. The subprogramme supports States in implementing the Programme of Action, as well as in submitting national reports and facilitating cooperation and assistance, including through ad hoc webinars, workshops and training at the national and regional levels. It also facilitates biennial meetings of States and review conferences.

Lessons learned and planned change

- 4.53 The lesson for the subprogramme was that there was demand for the development of a structured training programme to build capacity at the national level for further implementation of key activities within the framework. In applying the lesson, and in line with General Assembly resolution 77/71, the subprogramme will initiate a standing dedicated fellowship training programme on small arms and light weapons and develop technical training materials and an online course package. The subprogramme will organize a four-week in-person training programme in four regions, preceded by a preparatory self-paced online course, with the participation of 15 fellows per region.

4.54 Expected progress towards the objective is presented in the performance measure below (see figure 4.II).

Figure 4.II

Performance measure: government officials benefiting from a dedicated fellowship training programme on small arms and light weapons to strengthen the implementation of the Programme of Action on Small Arms and the International Tracing Instrument

(Number of fellows)

Deliverables

4.55 Table 4.14 lists all deliverables of the subprogramme.

Table 4.14

Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	14	13	7	6

8. Meetings of the Eighth Biennial Meeting of States to Consider the Implementation of the United Nations Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons under the Programme of Action on Small Arms	10	10	–	–

Part II Political affairs

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
9. Informal consultations among Member States further to the Eighth Biennial Meeting of States under the Programme of Action on Small Arms	4	8	–	–
10. Meetings of the fourth Review Conference of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons under the Programme of Action on Small Arms	–	–	–	20
11. Meetings of the preparatory committee for the fourth Review Conference of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons under the Programme of Action on Small Arms	–	–	–	10
12. Informal consultations among Member States further to the fourth Review Conference of the Programme of Action on Small Arms	–	–	4	6
13. Meetings of the open-ended working group on conventional ammunition	–	22	10	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	2
14. On the implementation of the Programme of Action on Small Arms	2	2	2	2
Seminars, workshops and training events (number of days)	4	8	5	90
15. Competency training and/or test on the International Ammunition Technical Guidelines	4	8	5	10
16. Fellowship programme on the Programme of Action on Small Arms	–	–	–	80
C. Substantive deliverables				
Consultation, advice and advocacy: one briefing to delegates on United Nations transparency instruments (Register of Conventional Arms and United Nations Report on Military Expenditures) and one briefing to the preparatory committee for the fourth Review Conference on the Programme of Action on Small Arms; three regional briefings and consultations on the new global framework on conventional ammunition to support the development of regional and subregional commitments; and one meeting of the SaferGuard Technical Review Board and two briefings to delegations on weapons of mass destruction.				
D. Communication deliverables				
Digital platforms and multimedia content: online reporting systems related to global reported arms trade, military expenditures, military confidence-building measures and implementation of the Programme of Action on Small Arms available for use in voluntary reporting by Member States; and the SaferGuard programme on ammunition.				

**Subprogramme 4
Information and outreach**

Objective

- 4.56 The objective, to which this subprogramme contributes, is to enhance awareness, understanding and knowledge by Member States and the public for advancing disarmament, non-proliferation and arms control.

Strategy

- 4.57 To contribute to the objective, the subprogramme will:
- (a) Carry out outreach and information-sharing activities in cooperation with Member States and other relevant partners and stakeholders by organizing panel discussions, public events, exhibitions, media briefings, book launches, film screenings and other activities;

- (b) Produce publications and implement a comprehensive media strategy. Outreach will reflect and promote diversity through inclusion and the targeting of audiences of different ages, genders, disabilities, geographic locations and perspectives;
 - (c) Support civil society engagement in intergovernmental forums by facilitating access arrangements, organizing consultative meetings and arranging for presentations by invited civil society representatives;
 - (d) Implement the recommendations of the 2002 United Nations study on disarmament and non-proliferation education in cooperation with Member States and other relevant partners, by producing and disseminating educational materials, developing e-modules on substantive topics and organizing peace and disarmament education activities and contests, with particular emphasis on educating young people, including young women and those not traditionally engaged, to champion and promote disarmament efforts;
 - (e) Continue to support the open-ended working group on security of and in the use of information and communications technologies 2021–2025, pursuant to General Assembly resolution 75/240;
 - (f) Seek specific measures to promote the meaningful and inclusive participation and empowerment of young people on disarmament and non-proliferation issues, including through the effective utilization of the dedicated digital platform Youth for Disarmament and through token grants and awards supported by voluntary contributions.
- 4.58 The above-mentioned work is expected to result in:
- (a) Increased interest in and support for multilateral disarmament efforts, enhancement of engagement by the general public and other stakeholders on these issues and the availability of clear, timely and impartial information to Member States;
 - (b) Better informed stakeholders, including government officials, civil society representatives and the general public;
 - (c) Progress in the development of common understandings in multilateral discussions by States on information and communications technology security in the context of international security, as well as improved awareness and knowledge of the subject among States and non-governmental actors.

Programme performance in 2022

Youth Champions in disarmament and non-proliferation: a synergistic approach to youth, leadership, disarmament and education

- 4.59 In 2019, the subprogramme launched its youth outreach initiative, Youth for Disarmament, to engage, educate and empower young people with the aim of facilitating their meaningful and inclusive participation in the field of disarmament and non-proliferation. The subprogramme recognized the importance of young people in bringing about change and called on those between the ages of 18 and 24 across the globe to apply for an innovative learning programme aimed at empowering them to work for disarmament in their communities. A geographically diverse group of 10 Youth Champions from various regions were selected from among 6,515 applicants from 157 countries.
- 4.60 Owing to the COVID-19 pandemic, the travel segment of the programme for 2020 was postponed until it was deemed safe to travel, and the programme's content was adjusted accordingly. An initial six-month training programme was thus transformed into a full two-year programme (2020–2022) that included diverse opportunities and capacity-building programmes, including webinars, self-paced online courses and speaking opportunities for Youth Champions to help them to engage with their communities on issues related to disarmament and non-proliferation. The Youth Champions produced projects to advance the understanding of disarmament and non-proliferation issues, including the development of education guides and research papers to engage with younger generations on the importance of disarmament, such as an illustrated children's book and an arts and

crafts workshop to make symbols of peace. Several Youth Champions also organized peer-to-peer exchanges with young people on specific disarmament topics.

4.61 Progress towards the objective is presented in the performance measure below (see figure 4.III).

Figure 4.III

Performance measure: Youth Champions engaging with, educating and empowering young people to meaningfully contribute to disarmament, non-proliferation and arms control efforts

Planned results for 2024

Result 1: enhanced accessibility and usability of meetings information and data to inform Member States

Programme performance in 2022 and target for 2024

4.62 The subprogramme’s work contributed to the ongoing development of core components of the data portal, which did not meet the planned target of Member States having access to the Office for Disarmament Affairs data portal, and the modernization of the existing databases to enhance the usability of data to inform policymaking. The target was not met owing to a reprioritization of the back-end database development in order to support the planned release of database applications during 2023.

4.63 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 4.15).

Table 4.15
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Member States have improved accessibility to meetings information	Improved ease of access by Member States to all public documents on United Nations disarmament meetings through the Office’s documents portal	Core software components of the planned data portal were completed	Member States have access to additional databases included in the Office’s data portal	Member States have access to additional databases included in the Office’s data portal

Result 2: developments in the field of information and telecommunications in the context of international security, and advancing responsible State behaviour in the use of information and communications technologies

Programme performance in 2022 and target for 2024

- 4.64 The subprogramme’s work contributed to the adoption by the open-ended working group on security of and in the use of information and communications technologies 2021–2025, by consensus, of an annual progress report, which met the planned target.
- 4.65 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 4.16).

Table 4.16
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Adoption by Member States of the consensus final reports of the previous United Nations bodies (A/75/816; A/76/135)	Adoption by the open-ended working group, by consensus, of an annual progress report	Adoption by the open-ended working group, by consensus, of an annual progress report	Adoption by the open-ended working group, by consensus, of an annual progress report

Result 3: *United Nations Disarmament Yearbook* – strengthened engagement and increased reach of topical issues and trends with respect to multilateral disarmament, non-proliferation and arms control

Proposed programme plan for 2024

- 4.66 In 2020, the subprogramme launched an easy-to-use dedicated *United Nations Disarmament Yearbook* website, allowing readers to effortlessly navigate through a comprehensive overview of key developments and trends with respect to multilateral disarmament, non-proliferation and arms control. The publication was further upgraded to include a collection of explanatory graphics and charts.

Lessons learned and planned change

- 4.67 The lesson for the subprogramme, following an online survey in 2022 to identify how the *United Nations Disarmament Yearbook* could be further improved, was that for the *Yearbook* to remain fit for purpose, meet the evolving requirements of its users and increase its reach, additional improvements were needed. In applying the lesson, the subprogramme will update the presentation and design of the *Yearbook*, with a view to improving its accessibility and utility to accommodate a broader range of stakeholders and helping to enhance information on topical issues of arms limitation, disarmament and security. Efforts will also be made to optimize the synergies between the *Yearbook* and new online tools that the programme is developing, including a revamped treaties database and a new resolutions database.
- 4.68 Expected progress towards the objective is presented in the performance measure below (see figure 4.IV).

Figure 4.IV
Performance measure: number of unique visitors to the *United Nations Disarmament Yearbook* website (annual)

Deliverables

4.69 Table 4.17 lists all deliverables of the subprogramme.

Table 4.17

Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	17	17	18	17
1. Reports of the Secretary-General, transmitting views of Member States to the General Assembly on: environmental norms in the context of disarmament and arms control; the promotion of multilateralism; the United Nations study on disarmament and non-proliferation education; the United Nations Disarmament Information Programme; the role of science and technology; and advancing responsible State behaviour in cyberspace	6	6	6	6

7. Training of teachers on disarmament and non-proliferation	1	1	1	1
Publications (number of publications)	8	11	8	8
8. On disarmament, including the <i>United Nations Disarmament Yearbook</i> , Occasional Papers and other serialized and non-serialized publications	8	11	8	8

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
--------------------------	-----------------	----------------	-----------------	-----------------

C. Substantive deliverables

Databases and substantive digital materials: database on the status of disarmament and arms regulation agreements, disarmament reference library and e-documents library.

D. Communication deliverables

Outreach programmes, special events and information materials: pamphlets, brochures, publicity kits, guides, posters, disarmament fact sheets; disarmament activities of the Messenger of Peace, including public service announcements; symposiums, workshops, youth contests and panel discussions on disarmament issues, in particular disarmament and non-proliferation education; briefings for visitors and outside groups on disarmament; disarmament and non-proliferation education and teacher and youth training; and audiovisual resources, including videos, events and exhibits on matters promoting disarmament and non-proliferation.

External and media relations: opinion pieces placed in international, national and thematic journals.

Digital platforms and multimedia content: websites of the Office for Disarmament Affairs, on disarmament education and Securing Our Common Future: An Agenda for Disarmament; online version of the Office for Disarmament Affairs updates; and Youth for Disarmament web platform, the Office’s Meetings Place website and the *United Nations Disarmament Yearbook* website.

Subprogramme 5 Regional disarmament

Objective

- 4.70 The objective, to which this subprogramme contributes, is to advance regional disarmament, non-proliferation and arms control efforts and initiatives, and the effective implementation of global and regional disarmament, non-proliferation and arms control treaties and other instruments, and strengthen partnerships with regional organizations.

Strategy

- 4.71 To contribute to the objective, the subprogramme will:
 - (a) Provide technical and legal training, conduct capacity-building activities and support the implementation by Member States of relevant treaties, international standards and guidelines, including the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects, the Arms Trade Treaty, the Biological Weapons Convention, Security Council resolutions [1325 \(2000\)](#), [1540 \(2004\)](#), [1673 \(2006\)](#), [1810 \(2008\)](#), [1977 \(2011\)](#), [2055 \(2012\)](#), [2325 \(2016\)](#), [2370 \(2017\)](#), [2572 \(2021\)](#), [2622 \(2022\)](#) and [2663 \(2022\)](#) and General Assembly resolutions [77/55](#), [77/83](#), [77/84](#) and [77/85](#);
 - (b) Cooperate with relevant regional, subregional, civil society and other organizations, such as the African Union, the Caribbean Community, the Economic Community of West African States, the Organization of American States, the Association of Southeast Asian Nations, the Organization for Security and Co-operation in Europe and the Pacific Islands Forum, in the field of disarmament, non-proliferation and arms control, building on existing synergies and avoiding duplication with efforts already undertaken by such organizations.
- 4.72 The above-mentioned work is expected to result in:
 - (a) Increased adherence to the disarmament instruments and strengthened small arms, light weapons and ammunition control, thereby curbing illicit trade and the circulation of small arms and light weapons to strengthen regional peace and security;
 - (b) Confidence-building measures among Member States;
 - (c) Closer partnerships with regional and subregional organizations.

Programme performance in 2022

Empowering women to participate in the design and implementation of small arms control efforts

- 4.73 In line with General Assembly resolutions [65/69](#), [73/46](#), [75/48](#) and [77/55](#) on women, disarmament, non-proliferation and arms control, the subprogramme assisted States, upon request, in promoting the role of women in disarmament, non-proliferation and arms control, including in preventing, combating and eradicating the illicit trade in small arms and light weapons.
- 4.74 In 2022, the subprogramme organized or co-organized activities, including workshops and seminars on a gender-sensitive approach in the Asia and Pacific region, the Latin America and the Caribbean region and the Africa region. These capacity-building activities included: a project on small arms that sought to enhance the effectiveness of small arms control through the promotion of a gender-sensitive framework and to promote the equitable and meaningful participation of women in all arms control decision-making processes; in-country training programmes on gender mainstreaming in national policies; a specialized training course on firearms investigations to promote the mainstreaming of a gender perspective; and a series of webinars on the prevention of armed violence against women.
- 4.75 Progress towards the objective is presented in the performance measure below (see table 4.18).

Table 4.18

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Appointment of gender focal points within national coordinating mechanisms on small arms in several countries

Planned results for 2024

Result 1: strengthened regional disarmament through substantive partnerships with regional and subregional organizations

Programme performance in 2022 and target for 2024

- 4.76 The subprogramme's work contributed to the involvement of eight regional and subregional organizations in the development and implementation of projects, which met the planned target.
- 4.77 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 4.V).

Figure 4.V

Performance measure: number of regional and subregional organizations involved in the development and implementation of projects (annual)

Result 2: strengthened implementation of Security Council resolution 1540 (2004)

Programme performance in 2022 and target for 2024

- 4.78 The subprogramme’s work contributed to the provision of support to the Security Council Committee established pursuant to Security Council resolution 1540 (2004) in its efforts to promote the full implementation by all States of the resolution. The support provided to Member States, upon request, contributed to the enhanced capacity of 17 Member States to meet the requirements of resolution 1540 (2004), which exceeded the planned target of 11 Member States.
- 4.79 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 4.VI).

Figure 4.VI

Performance measure: number of Member States with enhanced capacity to strengthen policy on weapons of mass destruction and Security Council resolution 1540 (2004) (annual)

Result 3: disarmament and non-proliferation education and training for all

Proposed programme plan for 2024

- 4.80 In line with General Assembly resolutions 76/45, 77/51, 77/52, 77/83, 77/84 and 77/85, the subprogramme’s work is focused on promoting disarmament and non-proliferation education and strengthening expert networks and partnerships at the regional and subregional levels, including

through the three regional centres of the Office for Disarmament Affairs, by implementing relevant recommendations contained in the 2002 United Nations study on disarmament and non-proliferation education.

Lessons learned and planned change

- 4.81 The lesson for the subprogramme was that there is a need for tailored approaches for disarmament and non-proliferation education at the regional and subregional levels. In applying the lesson, the subprogramme will adopt an incremental approach to address the identified gaps that gradually scales up the Office’s initiatives globally, in conjunction with an expansion of regional partnerships and networks. To ensure that the educational content with regard to disarmament is continually improved and kept up-to-date, geographically and substantively diverse networks will be established and coordinated, in accordance with regional priorities and needs. Opportunities to develop and expand disarmament education partnerships, content and programmes will be pursued, leveraging the Office’s regional centres.
- 4.82 Expected progress towards the objective is presented in the performance measure below (see table 4.19).

Table 4.19
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	<p>The General Assembly adopted resolution 77/51, proclaiming 5 March as the International Day for Disarmament and Non-Proliferation Awareness</p> <p>A common framework for education in disarmament and non-proliferation is available to Member States, regional organizations and other stakeholders to strengthen coherence and coordination of educational initiatives</p>	<p>Greater engagement of educational and training partners in developing disarmament education programmes and non-formal education opportunities</p>	<p>Greater regional spread of educational opportunities through an incremental expansion of partnerships with academia and training partners</p> <p>Educational partners and educators deliver tailored and contextualized education to broaden knowledge and skills on disarmament and non-proliferation</p>

Deliverables

- 4.83 Table 4.20 lists all deliverables of the subprogramme.

Table 4.20

Subprogramme 5: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>

7. Seminars, workshops and training and capacity-building events on the non-proliferation of weapons of mass destruction and the implementation and universalization of non-proliferation instruments and relevant Security Council resolutions	30	17	20	17
8. International conferences on disarmament, non-proliferation and arms control	4	2	2	2
Publications (number of publications)	2	3	5	4
9. On disarmament, non-proliferation and arms control	2	3	5	4
C. Substantive deliverables				
Consultation, advice and advocacy: substantive, technical and legal advice as well as training on the effective implementation of relevant instruments in accordance with Security Council and General Assembly mandates upon request by Member States, regional and subregional organizations and civil society organizations in Africa, Asia and the Pacific, and Latin America and the Caribbean.				
D. Communication deliverables				
Outreach programmes, special events and information materials: fact sheets on the work of the regional centres and liaison office in Vienna; outreach events for young people, women and other stakeholders; websites and other electronic platforms, including e-learning platforms such as the Disarmament Education Dashboard.				
Digital platforms and multimedia content: website and social media accounts.				

B. Proposed post and non-post resource requirements for 2024

Overview

4.84 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 4.21 to 4.23.

Table 4.21

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

4.85 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 4.24 to 4.26 and figure 4.VII.

4.86 As reflected in tables 4.24 (1) and 4.25 (1), the overall net resources proposed for 2024 amount to \$15,232,800 before recosting, reflecting a net increase of \$1,397,000 (or 10.1 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

4.87 As reflected in table 4.24 (1), resource changes reflect a decrease of \$331,100, as follows:

- (a) **Subprogramme 1, Multilateral negotiations and deliberations on disarmament and arms limitation.** The decrease of \$278,200 under experts relates to the removal of the non-recurrent provisions included in the programme budget for 2023 to support the Group of Governmental Experts to further consider nuclear disarmament verification issues, established pursuant to General Assembly resolution 74/50.
- (b) **Subprogramme 2, Weapons of mass destruction.** The decrease of \$52,900 relates to the removal of the non-recurrent provisions included in the programme budget for 2023 for

consultants (\$37,100), travel (\$12,000) and general operating expenses (\$3,800) to support the open-ended working group on reducing space threats, established pursuant to General Assembly resolution [76/231](#).

New and expanded mandates

4.88 As reflected in table 4.24 (1), resource changes reflect an increase of \$1,837,200. The distribution across the subprogrammes is as follows:

- (a) **Subprogramme 2, Weapons of mass destruction.** The increase of \$4,100 under experts reflects the provision to support the Group of Governmental Experts on further practical measures for the prevention of an arms race in outer space, established pursuant to General Assembly resolution [77/250](#);
- (b) **Subprogramme 3, Conventional arms.** The increase of \$1,612,200 reflects:
 - (i) An increase of \$1,491,100 to implement General Assembly resolution [77/71](#), in which the Assembly decided to establish, within the regular budget, a standing dedicated fellowship training programme on small arms and light weapons in order to strengthen the technical and practical knowledge and expertise of government officials directly responsible for the implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons. The fellowship programme will be conducted annually in four regions (15 fellows per region) for a duration of four weeks of in-person training, preceded by a preparatory self-paced online course. Resource estimates include \$119,700 under posts to cover the proposed establishment of one post of Programme Management Officer (P-4) in New York that is subject to a 50 per cent vacancy rate (see annex III); \$356,100 under consultants to assist in the design and development of technical training materials and facilitate the training programme; \$30,500 to cover travel of staff of the Office for Disarmament Affairs to support the training programmes; \$429,900 under contractual services to cover the development of the online course, including translation, printing of training materials and other operational costs for organizing the in-person training programmes in the four regions; \$551,600 under grants and contributions to cover travel costs and subsistence allowances for 60 fellows to attend the programme; and a total of \$3,300 under contractual services, furniture and equipment, and supplies and materials to cover the related non-post costs for the new P-4 post;
 - (ii) An increase of \$121,100 to support the work of the Group of Governmental Experts on the United Nations Register of Conventional Arms on transparency in armaments pursuant to General Assembly resolution [77/69](#). Resource estimates include \$107,000 under experts to cover travel expenses for 20 governmental experts to attend a five-day session on transparency in armaments and \$14,100 under consultants to provide technical and substantive support to the session;
- (c) **Subprogramme 4, Information and outreach.** An increase of \$16,100 under consultants to support the open-ended working group on security of and in the use of information and communications technologies 2021–2025, established pursuant to General Assembly resolution [75/240](#);
- (d) **Subprogramme 5, Regional disarmament.** An increase of \$204,800 to implement General Assembly resolution [77/71](#) as explained in paragraph 4.88 (b) (i) above. Resources include \$176,200 under posts related to the proposed establishment of three posts of Programme Management Officer (NPO), to be based in Lomé, Lima and Kathmandu, and one post of Senior Programme Management Assistant (GS (PL)), to be based in Vienna, that are subject to a 50 per cent vacancy rate (see annex III). The related non-post resources to support the four new posts amount to \$28,600 and fall under contractual services (\$7,400), general operating expenses (\$7,200), supplies and materials (\$4,000) and furniture and equipment (\$10,000).

Other changes

4.89 As reflected in table 4.24 (1), the proposed changes reflect a decrease of \$109,100 under subprogramme 2, Weapons of mass destruction, relating to the removal of the provision for experts

that is used in the event of the activation of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons. The decrease takes into account the limited utilization of this provision in the past and the view of the Advisory Committee on Administrative and Budgetary Questions (see [A/77/7](#), para. II.83), as endorsed by the General Assembly in its resolution [77/262](#), that the established budgetary mechanism to implement unforeseen activities, including for the maintenance of peace and security, is the commitment authority granted to the Secretary-General to meet unforeseen and extraordinary expenses.

Extrabudgetary resources

- 4.90 As reflected in tables 4.24 (2) and 4.25 (2), the Office for Disarmament Affairs expects to continue to receive both cash and in-kind contributions. In 2024, extrabudgetary resources (cash contributions) are estimated at \$21,706,200. The resources would complement regular budget resources and would be used mainly for research and analysis and to support meetings and conventions, raise awareness and build technical and substantive capacity at the national and regional levels and strengthen partnerships and participation aimed at contributing to the advancement of international agreements on disarmament best practices. Anticipated in-kind contributions will provide for rent-free premises with an estimated value of \$86,800.
- 4.91 The authority to oversee the use of extrabudgetary resources rests with the Office for Disarmament Affairs, in accordance with the delegation of authority by the Secretary-General. The extrabudgetary resources under the present section for UNIDIR are subject to the oversight of the Advisory Board on Disarmament Matters.

Policymaking organs

- 4.92 The resources proposed under this component would provide for requirements relating to the Conference on Disarmament. Table 4.27 provides information on the Conference on Disarmament and related resource requirements under the regular budget.

Table 4.27

Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Conference on Disarmament	The Conference on Disarmament is the single multilateral disarmament negotiating forum of the international community. Pursuant to paragraph 120 (c) of the final document of the tenth special session of the General Assembly, the Secretary-General appoints the Secretary-General of the Conference, who also acts as his Personal Representative, to assist the Conference and its Presidents in organizing the Conference. As requested by the Assembly in its resolution 34/83 L , the Secretary-General provides staff, as well as the assistance and services needed by the Conference and any subsidiary bodies that it might establish, in accordance with the arrangements set out in its rules of procedure. The secretariat of the Conference consists of officers of the secretariat and the Geneva Branch of the Office for Disarmament Affairs	Mandate: final document of the tenth special session of the General Assembly, paragraph 120 (resolution S-10/2) Membership: 65 government officials, including of 5 nuclear weapon States and other key militarily significant States Number of sessions in 2024: 1 session of 24 weeks conducted in 3 parts	9.2	9.2
Total			9.2	9.2

Section 4 Disarmament

4.93 The proposed regular budget resources for 2024 amount to \$9,200 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 4.28.

Executive direction and management

4.94 The executive direction and management component comprises the immediate Office of the High Representative for Disarmament Affairs, the Office of the Director and Deputy to the High Representative, the Science, Technology and International Security Unit and the Policy Coordination and Change Management Unit. The High Representative is assisted by a director who serves as Deputy. The component is responsible for the overall direction, supervision and management of the Office for Disarmament Affairs in the implementation of its mandates and its approved programme of work and advises and supports the Secretary-General on all disarmament, non-proliferation, arms control and related security matters and, in that respect, represents the Secretary-General, as required. The component is also responsible for providing authoritative analysis and assessment of developments for policy guidance and decision-making purposes and acts as focal point on these matters between the Secretariat and Member States.

4.95 The overall responsibilities of the executive direction and management component include the following functions:

- (a) The Office of the Director is responsible for supporting the High Representative; preparing and monitoring the implementation of the programme of work of the Office for Disarmament Affairs and ensuring efficient cooperation between the branches and the effective delivery of the programmatic mandates of the Office; preparing reports and notes on political and managerial issues; providing strategic guidance on programme implementation; and providing advice to the High Representative on all substantive, organizational, administrative, personnel and budgetary matters, including the overall coordination in the preparation and revision of the inputs of the Office to the annual programme plan and the programme budget;
- (b) The Science, Technology and International Security Unit provides advice to the Office of the High Representative, the Office of the Director and subprogrammes on scientific and technological issues in the context of international security, other strategic issues, including autonomous weapons, outer space, information and telecommunications technology issues, and normative and analytical research activities, in support of the priorities of the Secretary-General related to disarmament. The Unit is responsible for the preparation of political analyses and substantive background notes on a broad range of initiatives and topics within its area of expertise;
- (c) The Policy Coordination and Change Management Unit provides direct support to the High Representative and the Office for Disarmament Affairs on cross-cutting policy issues, and internal coordination and change management, including coordination of the mainstreaming

and inclusion of gender perspectives in the programmatic work of the Office and oversight of gender parity within the Office;

- (d) In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office for Disarmament Affairs will continue to reduce its carbon footprint by significantly reducing the usage of photocopy paper and the printing of documentation by encouraging staff to work increasingly with only electronic versions of various documents, including mission reports, assessment notes, inter-office memorandums, submissions by Member States, background materials and talking points. Additional efforts will be made to reduce travel and instead optimize participation in meetings through videoconferencing;
- (e) Information on the timely submission of documentation and advance booking for air travel is reflected in table 4.29. The low compliance rate in 2022 is due mainly to the late confirmation of meetings, which is associated with the COVID-19 pandemic. Travel ticket purchases will continue to be monitored closely by the Office, and reports will be shared with all branch chiefs and the High Representative for intervention, as required.

4.96 The proposed regular budget resources for 2024 amount to \$2,467,900 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 4.30 and figure 4.VIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 4.97 Extrabudgetary resources for this component amount to \$35,000. The resources would complement regular budget resources and would be used mainly for ad hoc research and analysis activities related to the overarching goals supported by the various subprogrammes.

Programme of work

Subprogramme 1

Multilateral negotiations and deliberations on disarmament and arms limitation

- 4.98 The proposed regular budget resources for 2024 amount to \$3,059,400 and reflect a decrease of \$278,200 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 4.87 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 4.31 and figure 4.IX.
- 4.99 Pursuant to General Assembly resolution [75/253 A](#), the resources of \$3,059,400 include a provision for a subvention in the amount of \$742,100 to UNIDIR for 2024, reflecting no change compared with the appropriation for 2023. The amount is reflected under grants and contributions and includes a provision of: (a) \$662,100 towards the costs of two posts (1 D-2 and 1 P-5) and general temporary assistance to help to organize quarterly briefings to all regional groupings on research and ideas of relevant disarmament topics to promote disarmament and non-proliferation knowledge, ideas and dialogue to a broader and more diverse community; and (b) \$80,000 to support the conduct of three events in countries that are not members of the Organisation for Economic Co-operation and Development to promote disarmament and non-proliferation knowledge, ideas and dialogue to a broader and more diverse community.

Figure 4.IX
Subprogramme 1: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

4.100 Extrabudgetary resources for this subprogramme amount to \$6,445,000. The resources would complement regular budget resources and would be used mainly for the organization of official meetings relating to the Biological Weapons Convention, the Convention on Certain Conventional Weapons, the Convention on Cluster Munitions and the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction, as well as the functioning of the Biological and Certain Conventional Weapons Conventions Implementation Support Units. The increase of \$551,200 mainly reflects the projected contributions for additional staffing requirements to strengthen the Biological Weapons Convention Implementation Support Unit.

Subprogramme 2 Weapons of mass destruction

4.101 The proposed regular budget resources for 2024 amount to \$1,908,200 and reflect a decrease of \$157,900 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 4.87 (b), 4.88 (a) and 4.89. Additional details on the distribution of the proposed resources for 2024 are reflected in table 4.32 and figure 4.X.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

4.102 Extrabudgetary resources for this subprogramme amount to \$5,648,600. The resources would complement regular budget resources and would mainly be used for activities to advance disarmament and non-proliferation in all aspects of nuclear weapons and all other weapons of mass destruction and their means of delivery. The increase of \$413,300 mainly reflects projected

contributions to support the second session of the Preparatory Committee for the eleventh Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons.

Subprogramme 3 Conventional arms

4.103 The proposed regular budget resources for 2024 amount to \$2,768,900 and reflect an increase of \$1,612,200 compared with the appropriation for 2023. The proposed increase is explained in paragraph 4.88 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 4.33 and figure 4.XI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

4.104 Extrabudgetary resources for this subprogramme amount to \$5,087,300. The resources would complement regular budget resources and would be used mainly to support implementation of gender-mainstreamed policies, programmes and actions in the fight against trafficking in and misuse of small arms, in line with the women and peace and security agenda, and to increase access to technical guidance on small arms control and ammunition management. The resources would also support conventional arms regulation activities and efforts to further the Silencing the Guns campaign in Africa. The increase of \$361,100 reflects projected contributions to support the United Nations Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects.

**Subprogramme 4
Information and outreach**

4.105 The proposed regular budget resources for 2024 amount to \$1,513,600 and reflect an increase of \$16,100 compared with the appropriation for 2023. The proposed increase is explained in paragraph 4.88 (c). Additional details on the distribution of the proposed resources for 2024 are reflected in table 4.34 and figure 4.XII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

4.106 Extrabudgetary resources for this subprogramme amount to \$671,100. The resources would complement regular budget resources and would be used mainly to raise awareness of disarmament issues at the global level and build technical and substantive capacity at the national and regional levels. In support of General Assembly resolution 76/45 on youth, disarmament and non-proliferation, the resources would be used to enhance partnerships and strengthen participation by a broad range of stakeholders in disarmament and the regulation of arms.

**Subprogramme 5
Regional disarmament**

4.107 The proposed regular budget resources for 2024 amount to \$2,814,300 and reflect an increase of \$204,800 compared with the appropriation for 2023. The proposed increase is explained in paragraph 4.88 (d). Additional details on the distribution of the proposed resources for 2024 are reflected in table 4.35 and figure 4.XIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

4.108 Extrabudgetary resources for this subprogramme amount to \$3,504,400. The resources would complement regular budget resources and would be used to support the three regional centres for peace and disarmament and to support Member States in addressing disarmament, non-proliferation and arms control issues. The resources would also contribute to the building of technical and legal capacity at the national and regional levels. The increase of \$879,400 would provide for: (a) additional staffing resources to support the Youth Leader Fund for a World Without Nuclear Weapons; and (b) activities that raise awareness of disarmament issues at the global level, build capacity through disarmament and non-proliferation education interventions and enhance youth engagement with disarmament and non-proliferation.

Programme support

4.109 The Executive Office provides central administrative services related to human resources and financial and general administration, including resource planning and the use of common services, together with administrative support for policymaking organs and meetings, as required.

4.110 The proposed regular budget resources for 2024 amount to \$691,300 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 4.36 and figure 4.XIV.

Annex II

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee reiterates its view that the established budgetary mechanism to implement unforeseen activities, including for the maintenance of peace and security, is the commitment authority granted to the Secretary-General to meet unforeseen and extraordinary expenses. The Committee expects that the Secretary-General will provide detailed justification to the General Assembly regarding the proposed inclusion of this requirement in the programme budget at the time of its consideration of the present report and in the next programme budget submission (see also [A/76/7](#) and [A/76/7/Corr.1](#), para. II.81) (para II.83).

The Advisory Committee trusts that information on the implementation of the United Nations Disarmament Fellowship, Training and Advisory Services Programme will be included in the next budget submission (para. II.91).

In accordance with this recommendation, in the 2024 budget proposal an amount of \$109,100 has been removed under experts.

In the event of an activation of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons, the Secretariat will use the established budgetary mechanism for unforeseen and extraordinary expenses related to the maintenance of peace and security.

The 2022 Programme proceeded in a manner similar to that of pre-pandemic times: 24 fellows participated in the Programme, which took place for 10 weeks (the usual length). This included study visits to Geneva, Vienna, The Hague, New York, Argentina, Germany, Japan, Kazakhstan, Pakistan, the Republic of Korea and the European Union. Travel to China was cancelled owing to COVID-19-related restrictions. The e-learning aspect of the Programme was maintained and enhanced.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 3 Conventional arms	1	P-4	Establishment of Programme Management Officer (New York)	To implement the mandate provided in General Assembly resolution 77/71, whereby the Assembly decided to establish, within the regular budget of the United Nations, a standing dedicated fellowship training programme on small arms and light weapons in order to strengthen the technical and practical knowledge and expertise of government officials directly responsible for the implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons. The incumbent will act as the global programme manager and substantive lead for managing, reporting on and evaluating the fellowship training programme. The incumbent will manage, develop and update the training materials (in-person and online components) and work with the National Professional Officers to ensure the relevance of the materials. The incumbent will also take the lead in organizing and executing the training programme in Europe for beneficiaries from Europe and the Middle East.
Subprogramme 5 Regional disarmament	3	NPO	Establishment of Programme Management Officer (1 each in Lomé, Lima and Kathmandu)	To implement the mandate in General Assembly resolution 77/71, the incumbents will assist the Directors of the Regional Centres in the regional administration of the programme and coordinate with partner training institutions. This includes tailoring the overall course material to regional contexts, identifying key technical expertise to support the training and determining the eligibility of and selecting the fellows. The incumbents will also support programme monitoring, evaluation and reporting through coordination with the Programme Management Officer in New York.
	1	GS (PL)	Establishment of Senior Programme Management Assistant (Vienna)	To implement the mandate in General Assembly resolution 77/71, the incumbent will manage administrative and financial aspects of the execution of the programme, including monitoring budgets and managing all travel logistics for the 60 fellows on an annual basis. The incumbent will prepare printed materials and handle consultant and general contractual services. This position will be located in Vienna to best overlap with time zones across the Regional Centres and serve as the administrative point of contact for all activities.

Abbreviations: NPO, National Professional Officer; GS (PL), General Service (Principal level).

I. Department of Peace Operations

Foreword

The Department of Peace Operations assists Member States and the Secretary-General in their efforts to maintain international peace and security. The Department provides political and executive direction to peacekeeping operations for the effective implementation of their mandates, amid increasingly challenging operational environments.

In 2024, under the umbrella of the Action for Peacekeeping initiative, the Department will continue to implement the reforms necessary to strengthen the efficiency and effectiveness of United Nations peacekeeping operations. Its implementation plan, Action for Peacekeeping Plus, reaffirms the primacy of politics and the importance of developing collective and coherent strategies, based on effective partnerships. It outlines seven priority areas to make our missions stronger, safer and more effective. Peacekeepers protect civilians, actively prevent conflict, reduce violence, strengthen security and support institution-building. The Action for Peacekeeping Plus initiative is intended to strengthen the effectiveness of peacekeeping by improving our ability to measure the results of our action and put in place measures for the safety and security of peacekeeping personnel. Ensuring that all peacekeeping personnel adhere to United Nations standards of conduct and are held accountable is a central element of the initiative.

Advancing the women and peace and security agenda and strengthening the use of innovative data-driven analysis in all aspects of peacekeeping are mainstreamed across all seven Action for Peacekeeping Plus priorities and are key to enhancing operational effectiveness in peacekeeping and sustaining peace.

The Department will continue to work closely with partners to create the enabling conditions for more efficient and effective mandate delivery, making a difference for the communities that we serve.

(Signed) Jean-Pierre **Lacroix**
Under-Secretary-General for Peace Operations

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 5.1 The Department of Peace Operations is responsible for supporting the maintenance of international peace and security by providing political and executive direction to peace operations within its purview in accordance with and by the authority derived from the principles and purposes of the Charter of the United Nations. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution 72/262 C, and the annual comprehensive reviews of the entire question of peacekeeping operations in all their aspects and the annual consideration of cross-cutting issues related to peacekeeping operations. The objectives of the programme are also conceived by taking into account Security Council mandates. The Department provides integrated strategic, political, operational and management advice, direction and support on military, police, mine action and other relevant issues to all operations under its responsibility in order to ensure the effective implementation of their mandates. Through its efforts to improve peacekeeping, enhance its performance and adapt to contemporary risks and challenges, the Department will continue to help conflict-affected countries on their path back to sustainable peace. The work of the Department is critical to continuously ensuring the relevance and effectiveness of United Nations peacekeeping, which remains a unique instrument for global peace and security.

Strategy and external factors for 2024

- 5.2 The strategy of the Department remains guided by all relevant Security Council mandates. The Department will continue to prioritize the full implementation of the peace and security reform objectives. The Action for Peacekeeping initiative and its implementation plan, Action for Peacekeeping Plus, will guide the programme, in line with the commitments set out in the Declaration of Shared Commitments on United Nations Peacekeeping Operations, taking into account the views expressed by Member States. The areas of focus continue to be:
- (a) To enhance political strategies and advance lasting political solutions, including by developing country and regional strategies, through the integrated approach of the peace and security pillar, to develop proposals for the consideration of the Security Council on the sequencing and prioritization of mandates and to reflect Action for Peacekeeping priorities in reporting;
 - (b) To implement the women and peace and security agenda across all peace functions, including by developing a methodology for gender-sensitive conflict analysis, distributing guidance on women's full, equal and meaningful participation in peace processes and systematizing reporting on women and peace and security outcomes;
 - (c) To strengthen the protection provided by peacekeeping operations, including by updating and disseminating the policy on the protection of civilians in United Nations peacekeeping, integrating strategic approaches to protection into the strategic thinking and action of missions and conducting context-specific training on the protection of civilians, the protection of children, and preventing and addressing conflict-related sexual violence;
 - (d) To support effective performance and accountability of all mission components through the implementation of the Comprehensive Planning and Performance Assessment System, as part of the integrated peacekeeping performance and accountability framework, to evaluate mission performance using data and analysis and increase engagement with troop- and police-contributing countries on performance;
 - (e) To strengthen the impact of peacekeeping on sustaining peace, including by implementing joint transition and mobilization strategies and coordinating closely with the Department of Political

- and Peacebuilding Affairs, including the Peacebuilding Support Office, as well as other United Nations entities and external partners;
- (f) To improve the safety and security of peacekeepers, including by implementing the related action and training plans and introducing and using technologies, which should be implemented with transparency and in consultation with Member States, as appropriate;
 - (g) To improve peacekeeping partnerships by strengthening United Nations-African Union cooperation on political efforts, including through joint field visits and briefings, as well as through capacity-building and the light coordination mechanism, which will strengthen efforts to identify training requirements and match capacity-building providers with new and emerging troop-contributing countries in need of support;
 - (h) To strengthen the conduct of peacekeeping operations and personnel and enhance the operationalization of the human rights due diligence policy on United Nations support to non-United Nations security forces.
- 5.3 With regard to cooperation with other entities at the global, regional, national and local levels, partnerships with peace and security actors, in particular regional organizations, and with humanitarian and development actors, including international financial institutions, will remain essential to strengthening the overall impact of international efforts in peacekeeping contexts. The Department will also maintain its strategic and operational partnerships with the African Union and other regional and subregional organizations in Africa, as well as with the European Union. The Department will continue to cooperate closely with other regional organizations, including the League of Arab States, the North Atlantic Treaty Organization, the Collective Security Treaty Organization, the Association of Southeast Asian Nations and the Organization for Security and Cooperation in Europe, on issues related to policy, information-sharing and training, among others.
- 5.4 With regard to inter-agency coordination and liaison, the Department will continue to review and refine the implementation of the reform of the peace and security pillar and ensure coherence, working with the Department of Political and Peacebuilding Affairs with a view to, in particular, strengthening a common organizational culture that fosters inclusion, innovation and professional development. The Department will work closely with the Department of Management Strategy, Policy and Compliance and the Department of Operational Support in assisting peacekeeping operations. The Department will maintain strong coordination with the reformed management and development pillars.
- 5.5 The Department will continue to maintain its strong relations with other United Nations agencies, funds and programmes by chairing or participating in a range of inter-agency groups and processes, including the United Nations-World Bank Working Group, Inter-Agency Working Group on Disarmament, Demobilization and Reintegration, the Inter-Agency Security Sector Reform Task Force, the Inter-Agency Coordination Group on Mine Action and the Inter-Agency Task Force on Policing. Other cross-agency cooperation will be undertaken through the global focal point arrangement for the rule of law and the Peacebuilding Strategy Group.
- 5.6 With regard to the external factors, the Department considered applicable risks and, accordingly, the overall plan for 2024 is based on the following planning assumptions:
- (a) Member States continue to support the advancement of the Action for Peacekeeping initiative and its implementation strategy, Action for Peacekeeping Plus;
 - (b) The Security Council reaches consensus on clear, focused and achievable mandates for peacekeeping operations and Member State support their implementation;
 - (c) Peacekeeping partners and other entities sustain the common political strategies supported by peace operations;
 - (d) Availability of capabilities required for deployment to peacekeeping operations.
- 5.7 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, it implements the women and peace and security agenda through guidance on women's full and meaningful participation in peace and political processes, gender-sensitive

analysis and the mainstreaming of a gender perspective into planning, budgeting, implementation and reporting, and through the promotion of the increased representation of women uniformed personnel.

- 5.8 In line with the United Nations Disability Inclusion Strategy, the Department will support Secretariat-wide efforts on disability inclusion, including through the implementation of a joint Department of Political and Peacebuilding Affairs-Department of Peace Operations disability inclusion action plan.

Impact of the pandemic and lessons learned

- 5.9 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular with missions adjusting to operating with preventive and mitigation measures, as necessary. Quarantine requirements for newly deployed uniformed personnel and other protective measures, including physical distancing, continued to be put in place in the first half of 2022. At Headquarters, the substantive session of the Special Committee on Peacekeeping Operations was fully virtual, and informal briefings from October to December 2022 were conducted in a hybrid format, at the request of Member States, in order to facilitate the attendance of more delegations. The pandemic had a more limited effect on training activities. The Department made vaccination mandatory for all course participants and facilitators, providing a level of protection to countries hosting courses, course participants and United Nations personnel.
- 5.10 The Department of Peace Operations continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. Given the importance of data analytics in the COVID-19 response, the Department will strengthen data capabilities at both Headquarters and in the field, which aligns with the implementation of the Strategy for the Digital Transformation of United Nations Peacekeeping. In addition, challenges surrounding misinformation and disinformation emerged during the pandemic and posed a strategic challenge in several peacekeeping operations. A dedicated workstream has been established to deepen understanding of issues related to misinformation and disinformation and to support peacekeeping operations in addressing the issue.

Legislative mandates

- 5.11 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

49/37 ; 74/277 ; 76/263	Comprehensive review of the whole question of peacekeeping operations in all their aspects	72/199	Restructuring of the United Nations peace and security pillar
58/296	Administrative and budgetary aspects of the financing of the United Nations peacekeeping operations	72/262 C	Special subjects relating to the programme budget for the biennium 2018-2019 (sect. III)
60/180	The Peacebuilding Commission	74/80 ; 76/74	Assistance in mine action
61/279 ; 65/290	Strengthening the capacity of the United Nations to manage and sustain peacekeeping operations	76/84 B ; 77/128 B	United Nations global communications policies and activities
70/262	Review of the peacebuilding architecture	77/64	Countering the threat posed by improvised explosive devices

Security Council resolutions

1325 (2000)	2272 (2016)
1894 (2009)	2282 (2016)
2151 (2014)	2365 (2017)
2185 (2014)	2382 (2017)
2250 (2015)	2436 (2018)

2447 (2018)	2589 (2021)
2518 (2020)	2594 (2021)
2553 (2020)	2668 (2022)

Deliverables

5.12 Table 5.1 lists all cross-cutting deliverables of the programme.

Table 5.1

Cross-cutting deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	12	12	12	12
1. Meetings of the Fifth Committee	1	1	1	1
2. Meetings of the Committee for Programme and Coordination	1	1	1	1
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
4. Formal session of the Special Political and Decolonization Committee	1	1	1	1
5. Formal session of the Special Committee on Peacekeeping Operations	1	1	1	1
6. Meetings of the Security Council on cross-cutting strategic, policy and structural issues related to peacekeeping	3	3	3	3
7. Meetings of the General Assembly and its subsidiary organs on the developments in peacekeeping missions and on cross-cutting strategic, policy and structural issues related to peacekeeping	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: visits to troop- and police-contributing countries and other Member States to develop strategic partnerships and build common approaches to support United Nations peacekeeping; and meetings with or briefings to Member States, regional organizations and groups of friends/contact groups on peacekeeping.				
D. Communication deliverables				
Outreach programmes, special events and information materials: outreach events, including conferences, exhibits and approximately 30 public briefings on United Nations peacekeeping, as well as associated promotional materials.				
External and media relations: media events, including interviews and press briefings on thematic and mission-specific topics; and approximately 25 media engagements of senior leadership.				
Digital platforms and multimedia content: approximately 1,000 items of peacekeeping-themed content on 8 digital and social media platforms.				

Evaluation activities

5.13 The Office of Internal Oversight Services (OIOS) evaluation on women and peace and security in field-based missions: elections and political transitions (see [A/77/83](#)), completed in 2022, has guided the proposed programme plan for 2024.

5.14 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. The Department, further to a recommendation from OIOS and in collaboration with the Department of Political and Peacebuilding Affairs, is enhancing context-specific learning and knowledge exchange on good practices to support the strategic implementation of the women and peace and security agenda in field missions. The Department, jointly with the Department of Political and Peacebuilding Affairs, has launched a community of practice and will conduct quarterly sessions among field missions covering a wide range of themes related to women and peace and security to enable cross-mission learning and the documentation of best practices from the field.

- 5.15 The following OIOS evaluations are planned for 2024:
- (a) Thematic outcome evaluation of strategic communication carried out by peacekeeping operations;
 - (b) Synthesis of outcome evaluation results on the rule of law in peacekeeping operations.

Programme of work

Subprogramme 1 Operations

Objective

- 5.16 The objective, to which this subprogramme contributes, is to ensure the effective and efficient implementation of all Security Council mandates to plan, establish and adjust peace operations within the purview of the Department, as well as the effective implementation of relevant General Assembly resolutions, in order to maintain international peace and security.

Strategy

- 5.17 To contribute to the objective, the subprogramme will:
- (a) Improve mission- and context-specific analysis and reporting on peacekeeping to the Security Council, the General Assembly and other intergovernmental bodies and troop- and police-contributing countries;
 - (b) Ensure that integrated planning processes are completed according to Security Council substantive and time requirements, with an emphasis on supporting transitions between peacekeeping operations and follow-up United Nations presences;
 - (c) Incorporate regional aspects in country- and mission-specific strategies, as part of the emphasis on a regional approach to peace, security and stability further to the reform of the peace and security pillar;
 - (d) Analyse the COVID-19 pandemic's longer-term impact in peacekeeping contexts on key national political processes or operational activities so as to mitigate risks.
- 5.18 The above-mentioned work is expected to result in:
- (a) Better information on peacekeeping operations being available to the General Assembly, the Security Council and other intergovernmental bodies;
 - (b) Better planning for mandate delivery by peacekeeping operations and for transitions;
 - (c) More coherent and impactful United Nations engagement and support in matters of peace and security provided to countries and the regions in which they are situated.

Programme performance in 2022

Planning the transition from peacekeeping to peacebuilding in the Democratic Republic of the Congo

- 5.19 In its resolution [2556 \(2020\)](#), the Security Council approved a joint strategy on the progressive and phased drawdown of the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo (MONUSCO) and requested the development of a transition plan. During 2021, a joint working group, comprising the Government of the Democratic Republic of the Congo and the United Nations system, developed the transition plan on the basis of the joint strategy and

in consultation with civil society. The transition plan recognizes the complexity of stabilization and provides a holistic plan for long-term stability. The transition plan was submitted to the Council, which welcomed it in its resolution 2612 (2021). On that basis, MONUSCO closed its Kalemie field office in Tanganyika Province in June 2022 and provided bridging support for key peacebuilding and stabilization efforts, in line with the priority areas of action in Tanganyika Province. For example, MONUSCO, with the support of the Peacebuilding Fund, contributed to securing peace dividends in conflict management and social cohesion by facilitating the work of 14 local peace and development committees, and 24 local committees that support young people from the Twa and Bantu communities in achieving peaceful cohabitation. At the request of the Government of the Democratic Republic of the Congo, the transition plan will be further reviewed to reflect the evolution of the enabling environment required for the transition towards peacebuilding.

5.20 Progress towards the objective is presented in the performance measure below (see table 5.2).

Table 5.2
Performance measure

Security Council approves the joint strategy on the progressive and phased drawdown of the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo and requests the development of a transition plan	<ul style="list-style-type: none"> • Security Council considers and welcomes the transition plan developed by the Government of the Democratic Republic of the Congo and the United Nations system • Increased United Nations country team presence to support national peacebuilding and stabilization efforts, including the links between humanitarian assistance, development and peace, with a focus on Kasai, Kasai Central and Tanganyika Provinces 	<ul style="list-style-type: none"> • Closure of the MONUSCO Kalemie field office in Tanganyika Province • 24 local committees support young people from the Twa and Bantu communities in achieving peaceful cohabitation, and 14 local peace and development committees foster dialogue and enhance informal conflict resolution mechanisms to support social cohesion among communities in Tanganyika Province

Planned results for 2024

Result 1: progress towards implementation of the peace agreement and return to constitutional order in Mali

Programme performance in 2022 and target for 2024

- 5.21 The subprogramme’s work contributed to continued dialogue between Malian authorities and the Economic Community of West African States following the second coup d’état, in 2021, and agreement on the extension of the transition timeline through March 2024, which met the planned target.
- 5.22 The subprogramme’s work also contributed to leveraging the reform agenda of the political transition to advance the peace process with northern armed groups, which met the planned target.
- 5.23 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 5.3).

Table 5.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
<ul style="list-style-type: none"> • Following a coup d'état, new institutions for an 18-month political transition were established • An agreement was reached to hold the new presidential and legislative elections in 2022 	<ul style="list-style-type: none"> • Dialogue was maintained between Malian transition authorities and regional partners • The signatory parties agreed to proceed with the socioeconomic reinsertion of former combatants 	<ul style="list-style-type: none"> • Following the second coup d'état, in 2021, Malian authorities and the Economic Community of West African States agreed on the extension of the transition timeline through March 2024 • Some of the political and institutional reforms, including development of 6 laws on territorial and administrative reorganization, help to advance the implementation of the peace agreement 	<ul style="list-style-type: none"> • Progress in the political transition and preparations for the holding of parliamentary and presidential elections • Progress in the implementation of the peace agreement, including institutional and security reforms 	<ul style="list-style-type: none"> • Return to constitutional order • Progress in the implementation of the peace agreement, including peace dividends for the population

Result 2: improved intercommunity relations and a secure environment for all communities in Kosovo¹

Programme performance in 2022 and target for 2024

- 5.24 The subprogramme’s work contributed to the organization of 863 activities by municipal institutions, civil society and local organizations promoting intercommunity trust-building and integration, which did not meet the planned target of 880 activities. Notwithstanding the increased efforts of the local stakeholders to advance intercommunity trust-building and integration, the target was not met because some planned activities could not be held.
- 5.25 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 5.I).

Figure 5.I
Performance measure: activities organized by municipal institutions, civil society and local organizations promoting intercommunity trust-building and integration in Kosovo (annual)

(Number of activities)

¹ References to Kosovo shall be understood to be in the context of Security Council resolution 1244 (1999).

Result 3: Progress in the peace process in the Central African Republic is maintained, including through continued preparation for local and general elections

Proposed programme plan for 2024

5.26 The subprogramme provides support to the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic. In 2022, the subprogramme’s work contributed to the revitalization of the peace process, through enhanced strategic and political engagement with national authorities, regional and subregional partners, and through security gains in the country.

Lessons learned and planned change

5.27 The lesson for the subprogramme was the need to foster greater national ownership and dialogue, to ensure sustainable political solutions and create a peaceful environment that fosters an open and inclusive political process. In applying the lesson, the subprogramme will build on gains made in the peace process through the implementation of the Political Agreement for Peace and Reconciliation in the Central African Republic and the Joint Roadmap for Peace in the Central African Republic, with continued dialogue between the Government of the Central African Republic and armed groups, as well as with the political opposition and civil society. It will do so in a political and security context that is anticipated to become increasingly complex as preparations for general elections, scheduled for 2025 and 2026, commence. In addition, the subprogramme will expand engagement with development partners to consolidate political and security gains.

5.28 Expected progress towards the objective is presented in the performance measure below (see table 5.4).

Table 5.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Parliamentary and presidential elections were held on 27 December, within constitutional timelines	<ul style="list-style-type: none"> The President-elect is sworn in within the constitutional timeline Planning and preparations to hold local elections are undertaken, including the development of the electoral calendar and a resource mobilization strategy 	<ul style="list-style-type: none"> Planning and preparations to hold local elections continued; however, local elections were postponed to mid-2023 Dialogue was maintained between Central African authorities and those armed groups that remained committed to the 2019 peace agreement, resulting in the dissolution of four armed groups 	<ul style="list-style-type: none"> Results of the local elections are announced, State authority is extended and decentralization is implemented Commission on Truth, Justice, Reconciliation and Reparation is operationalized 	<ul style="list-style-type: none"> Preparations commence for organization of general presidential and legislative elections Progress in the implementation of the peace agreement, including dialogue between government and armed groups

Deliverables

5.29 Table 5.5 lists all deliverables of the subprogramme.

Table 5.5
Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	54	66	55	55
1. Reports of the Secretary-General to the Security Council on matters related to peacekeeping operations	34	34	35	35
2. Letters from the Secretary-General to the President of the Security Council	20	32	20	20
Substantive services for meetings (number of three-hour meetings)	38	21	35	35
3. Meetings of the Security Council on peacekeeping issues	38	21	35	35
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	13	3	12	13
4. Workshops for heads of political components of peacekeeping operations	5	—	5	5
5. Workshops for regional and subregional political strategies for peacekeeping in the Middle East	3	3	2	3
6. Workshops for regional and subregional political strategies for peacekeeping in Africa	5	—	5	5
C. Substantive deliverables				
Consultation, advice and advocacy: advice and information on relevant aspects of peacekeeping operations to approximately 120 troop- and police-contributing countries; consultations with/among 5 regional organizations to promote regional peacekeeping capacities expanded in the context of specific operations; and advice to at least 120 permanent missions to the United Nations, the Bretton Woods institutions, 13 international and regional governance and security organizations and non-governmental organizations on peacekeeping issues.				

Subprogramme 2 Military

Objective

- 5.30 The objective, to which this subprogramme contributes, is to maintain international peace and security through the effective performance of military components of peace operations.

Strategy

- 5.31 To contribute to the objective, the subprogramme will:
- (a) Provide briefings and analysis to Member States on the military aspects of new or anticipated developments, and crisis and security situations;
 - (b) Strengthen partnerships with regional organizations to develop common standards in planning peacekeeping operations, generate and deploy appropriate military units, conduct operational assessments and advisory visits, and prepare new troop-contributing countries for future participation in peace operations;
 - (c) Train senior military leaders and develop and update military standards for the military component to validate the operational readiness of military units prior to deployment, and conduct in-mission performance evaluations, predeployment/pre-rotation visits and military capability studies;
 - (d) Facilitate the participation of women in peace operations, at all levels, through engagement with troop-contributing countries;
 - (e) Further refine the military performance evaluation system, including implementation of the military performance evaluation tool, further develop an evaluator training mechanism, and initiate and deploy a performance evaluation process for individual uniformed personnel;

- (f) Further refine and develop military doctrine, policies and training materials to support performance evaluation, enhance operational readiness and improve the safety and security of peacekeepers.

5.32 The above-mentioned work is expected to result in:

- (a) Improved reporting to the Security Council, the General Assembly, intergovernmental bodies and troop-contributing countries;
- (b) Rapid deployment and establishment of or adjustments to peace operations in response to Security Council mandates and related decisions;
- (c) Deployment of better-tailored, better-equipped and more relevant military components to peace operations;
- (d) Improved performance and increased safety of military components in peace operations;
- (e) A safe and secure environment in the host country, with a view to enhancing the safety of civilians and the delivery of humanitarian services.

Programme performance in 2022

Increased representation of troop-contributing countries in the United Nations Interim Security Force for Abyei

5.33 Pursuant to Security Council resolution 2575 (2021), the Department conducted a strategic review of the United Nations Interim Security Force for Abyei (UNISFA), which recommended a reconfiguration of UNISFA into a United Nations multinational force. Following the adoption of Security Council resolution 2609 (2021), by which the Council authorized a reduction in the troop ceiling from 3,550 to 3,250 troops, the subprogramme proceeded to reconfigure UNISFA from a single troop-contributing country peacekeeping force to a United Nations multinational force. The short timelines notwithstanding, the subprogramme successfully achieved the restructuring of UNISFA with the deployment of the required capabilities from eight troop-contributing countries, to implement the new mandate. The force generation process resulted in the deployment of military units from seven troop-contributing countries in 2022, and the remaining military units from the eighth troop-contributing country is scheduled to deploy by mid-2023.

5.34 Progress towards the objective is presented in the performance measure below (see figure 5.II).

Figure 5.II
Performance measure: number of troop-contributing countries deployed to the United Nations Interim Security Force for Abyei (annual)

Planned results for 2024

Result 1: enhanced management of the performance of military components in United Nations peacekeeping operations

Programme performance in 2022 and target for 2024

- 5.35 The subprogramme's work contributed to infantry units of all peacekeeping operations using the military unit evaluation tool of the new military performance management system, which met the planned target.
- 5.36 The subprogramme's work also contributed to two peacekeeping operations (United Nations Peacekeeping Force in Cyprus and United Nations Multidimensional Integrated Stabilization Mission in Mali (MINUSMA)) conducting pilot evaluations to validate the deployed military headquarters evaluation framework, which did not meet the planned target of four peacekeeping operations piloting the evaluation tool. The target was not met because further enhancements to the in-mission evaluation process were needed in order to better integrate it with the Department's overarching evaluation framework.
- 5.37 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 5.6).

Table 5.6

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Initial mechanism to assess the performance of military units in place	8 peacekeeping missions pilot the military unit evaluation tool for infantry battalion and quick reaction force units	<ul style="list-style-type: none"> Infantry units of all peacekeeping operations use the military unit evaluation tool of the new military performance management system 2 peacekeeping operations conduct pilot evaluations to validate the deployed military headquarters evaluation framework 	<ul style="list-style-type: none"> All peacekeeping operations use the military unit evaluation tool (for all units for which standards have been promulgated) All peacekeeping operations use the deployed military headquarters evaluation tool Initial mechanism to assess the performance of individually deployed military personnel in place 	<ul style="list-style-type: none"> The military performance evaluation framework, comprising a set of standards, policy documents, data tool and associated evaluator training, in place and used by all troop-contributing countries and peacekeeping operations 2 peacekeeping operations pilot the initial mechanism to assess the performance of individually deployed military personnel

Result 2: enhanced preparedness of military units in the Peacekeeping Capability Readiness System

Programme performance in 2022 and target for 2024

- 5.38 The subprogramme’s work contributed to an increase in military units at the rapid deployment level in the Peacekeeping Capability Readiness System to 12, which exceeded the planned target of 9 military units.
- 5.39 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 5.III).

Figure 5.III
Performance measure: number of military units at the rapid deployment level in the Peacekeeping Capability Readiness System (annual)

Result 3: advanced gender parity for military individual uniformed personnel in United Nations peace operations

Proposed programme plan for 2024

- 5.40 In line with Security Council resolutions [1325 \(2000\)](#) and [2242 \(2015\)](#), targets are set in the uniformed gender parity strategy 2018–2028 for increasing the number of female individual uniformed personnel deployed as military observers and staff officers in United Nations peace operations by 2028. With a baseline of 15 per cent participation in 2018, the subprogramme set a target of an additional 1 per cent increase annually until 2028.

Lessons learned and planned change

- 5.41 The subprogramme observed that the representation of female experts was higher compared with female staff officers. The lesson for the subprogramme was that job descriptions for staff officer posts made it difficult for female officers to meet the requirements owing to national military training regulations. In applying the lesson, the subprogramme will provide guidance and briefings on the force generation process to troop-contributing countries, incorporating training related to various staff officer roles to enable troop-contributing countries to prepare more female staff officers for deployment.
- 5.42 Expected progress towards the objective is presented in the performance measure below (see figure 5.IV).

Figure 5.IV
Performance measure: number of female military individual uniformed personnel in United Nations peace operations (annual)

(Percentage)

Deliverables

5.43 Table 5.7 lists all deliverables of the subprogramme.

Table 5.7
Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	178	236	182	181
Training events:				
1. With senior military personnel for predeployment induction and post-appointment briefings and intensive orientation	44	62	40	44
2. For command-post exercises for force headquarters	25	18	25	25
3. On the development, revision and implementation of new military policies and guidance materials	25	34	25	28
4. To mainstream a gender perspective for military components of peacekeeping operations	25	60	25	28
5. To improve situational awareness and strengthen the performance of uniformed military components, targeting operational and tactical leadership (heads of military components, sector commanders and force chiefs of staff and infantry battalion commanders)	35	24	35	20
6. On peacekeeping intelligence-/information-gathering and analysis	24	38	24	28
7. For evaluators on the operational performance reporting tool	–	–	8	8

11. On threat assessments reports	12	13	12	12
12. On operational requirements and troop-contributing country capabilities and recommendations prepared after predeployment, assessment and operational advisory visits	20	21	20	20
13. On military skills validation training	10	6	10	10
14. On the deployment of military forces, observers and headquarters staff	12	12	12	12
15. On the military components of peacekeeping operations (policies, guidance materials and standard operating procedures)	4	6	4	4
16. On military performance evaluation standards (scoresheets) for infantry units	–	–	6	6
17. On mid- to long-term requirements and on existing capability gaps	–	–	4	4

C. Substantive deliverables

Consultation, advice and advocacy: briefings to approximately 120 troop-contributing countries and the Military Staff Committee on all military aspects of peacekeeping operations; strategic discussion with 10 Member States and 3 regional organizations on military aspects of peace negotiations, agreements, peacekeeping operations, strategic and operational planning, and military performance issues; and maintenance of an organized surge capacity comprising a key nucleus of military staff/support team of up to 14 seconded military officers for possible deployment to new and existing peacekeeping operations for up to 90 days.

Databases and substantive digital materials: information on pledged units registered in the Peacekeeping Capability Readiness System by 60 troop-/police-contributing countries; and a military performance management system.

Subprogramme 3 Rule of law and security institutions

Objective

- 5.44 The objective, to which this subprogramme contributes, is to strengthen the rule of law and security sector governance to contribute to the maintenance of international peace and security in countries where peacekeeping operations and special political missions deploy, or where otherwise authorized, or requested by Member States, in full compliance with the Charter of the United Nations.

Strategy

- 5.45 To contribute to the objective, the subprogramme will provide advisory and operational support to peacekeeping operations and special political missions, as well as resident coordinators, and where otherwise authorized or requested by Member States. Specifically, the subprogramme will:
- Assist host States in the reform, restructuring and development of their police and other law enforcement institutions, provide operational support and, in rare circumstances, assume interim policing functions in line with the Strategic Guidance Framework for International Policing;
 - Support nationally led efforts to ensure accountability for crimes that fuel armed conflict, in particular those perpetrated against civilians, and crimes committed against United Nations personnel in peacekeeping operations and special political missions, strengthen prison security and management, re-establish the host State's justice and corrections institutions and engage in trust-building initiatives;
 - Support the planning, design and evaluation of processes that remove weapons and individuals from armed groups and facilitate the reintegration of ex-combatants and elements associated with armed groups into society as civilians, and identify and formulate relevant lessons learned and guidance;

- (d) Undertake research and develop knowledge and guidance in the area of security sector reform and governance, and provide targeted, strategic country support, upon request;
 - (e) Manage mine action programmes to mitigate explosive threats, train United Nations personnel and enhance national explosive ordnance disposal capacities;
 - (f) Rapidly deploy specialist capacities in all the above-mentioned areas.
- 5.46 The above-mentioned work is expected to result in:
- (a) More effective and accountable security and justice institutions in countries receiving assistance, including increased accountability for crimes that fuel conflict and for crimes committed against United Nations personnel in peacekeeping operations and special political missions;
 - (b) Reduced threats posed by armed groups and explosive hazards;
 - (c) Sustainable peace and the prevention of armed conflict;
 - (d) Mitigation of risks affecting the services of national and local rule of law and security institutions;
 - (e) Continuity of United Nations operations in the areas of policing, justice, corrections, disarmament, demobilization and reintegration, security sector reform and mine action assistance.

Programme performance in 2022

Increased representation of women in United Nations peace operations and host country institutions

- 5.47 The promotion of gender equality in rule of law and security institutions is essential to building more accountable, inclusive and responsive institutions. In 2022, the subprogramme helped countries to increase women's participation in national police, justice, corrections and security sectors. The subprogramme supported the recruitment and training of women police, justice and corrections government-provided personnel in peace operations. The subprogramme also contributed to integrating a gender perspective into police capacity-building and development through the increased number of women United Nations police officers, gender advisers and focal points, who engaged with national counterparts on host-State police reforms, including through stakeholder assessments, training and the development of gender-responsive national police plans. It also supported MONUSCO and MINUSMA in increasing the representation of women in the security sector.
- 5.48 Progress towards the objective is presented in the performance measure below (see table 5.8).

Table 5.8

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
<ul style="list-style-type: none"> • Women represent 8 per cent of the Congolese National Police (12,000 women police officers) 	<ul style="list-style-type: none"> • Women represent 5.7 per cent of the National Security Council of Mali 	<ul style="list-style-type: none"> • Women represent 9.4 per cent of the Congolese National Police (14,000 women police officers)
<ul style="list-style-type: none"> • Women represent 33.7 per cent of justice and corrections government-provided personnel in peace operations 	<ul style="list-style-type: none"> • Women represent 41.8 per cent of justice and corrections government-provided personnel in peace operations 	<ul style="list-style-type: none"> • Women represent 8.9 per cent of the National Security Council of Mali • Women represent 40.5 per cent justice and corrections government-provided personnel in peace operations

Planned results for 2024

Result 1: towards strengthened rule of law and security institutions in States hosting United Nations peace operations

Programme performance in 2022 and target for 2024

- 5.49 The subprogramme’s work contributed to the implementation of the National Congolese Police reform action plan 2020–2024, including on the protection of civilians, improved access to justice and legal protections through prosecution support cells, and the transition of explosive ordnance responsibilities to the national authorities in the Democratic Republic of the Congo, which met the planned target.
- 5.50 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 5.9).

Table 5.9
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
States hosting peacekeeping operations in transition settings receive first whole-of-system programmatic transition support in peacebuilding areas (e.g., State liaison functions in the Darfur)	Finalization of the joint transition plan between MONUSCO and the Government of the Democratic Republic of the Congo, implementation of the National Congolese Police reform action plan 2020–2024 and improved access to justice and legal protections through prosecution support cells	<ul style="list-style-type: none"> • Implementation of the National Congolese Police reform action plan 2020–2024, including on the protection of civilians • 1,056 cases of serious crimes perpetrated against civilians investigated by military justice authorities, with the support of the prosecution support cells in the Democratic Republic of the Congo • Transition of explosive ordnance responsibilities to Democratic Republic of the Congo authorities 	States in transition hosting peacekeeping operations continue to engage in programmatic transition support in the area of rule of law and security institutions	States in transition hosting peacekeeping operations continue to engage in programmatic transition support in the area of rule of law and security institutions

Result 2: enhanced accountability for crimes against United Nations personnel in peacekeeping operations and special political missions

Programme performance in 2022 and target for 2024

- 5.51 The subprogramme's work contributed to 124 confirmed investigative measures by host country authorities of the Central African Republic, the Democratic Republic of the Congo and Mali, which did not meet the planned target of 130 investigative measures. The target was not met because only 124 of the 270 cases of fatalities as a result of malicious acts since 1 January 2013 have been formally referred by the missions concerned to national authorities for investigation and prosecution. The subprogramme will work with missions to ensure greater compliance with the referral procedures to national authorities.
- 5.52 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 5.V).

Figure 5.V

Performance measure: confirmed investigative measures by host country authorities of the Central African Republic, the Democratic Republic of the Congo and Mali as of October of each year (cumulative)

(Number of measures)

Result 3: troop-contributing countries generate well-prepared troops for deployment in high explosive ordnance threat environments

Proposed programme plan for 2024

- 5.53 Explosive ordnance tactics deployed by non-State armed groups in peacekeeping settings continuously evolve, requiring the United Nations to rapidly adapt its response. In 2022 alone, explosive ordnance incidents killed 16 peacekeepers and injured 72. In the light of the importance of training peacekeepers to mitigate this threat, also recognized by the Security Council (see [S/PRST/2021/11](#)), the subprogramme has worked with peacekeeping missions in high explosive ordnance threat environments to provide rotating troops with threat mitigation predeployment and in-mission training.

Lessons learned and planned change

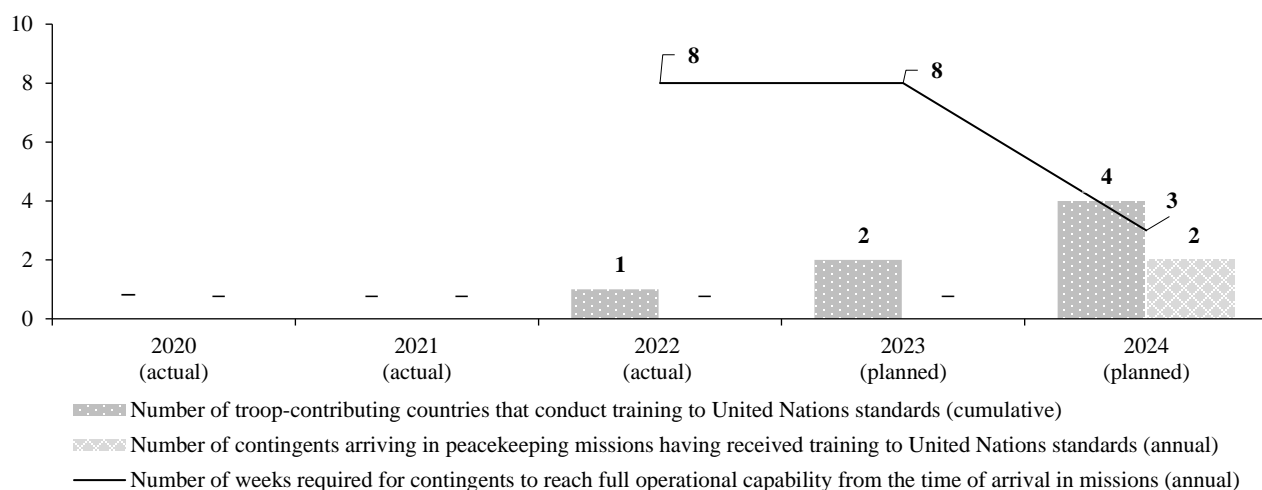

- 5.54 The lesson for the subprogramme, based on the recommendation of the independent strategic review (see [S/2021/1042](#)), was the need to engage prior to deployment with troop-contributing countries to build their capacity to sustain the training of contingents to United Nations standards. Lengthy in-mission training reduces the availability of contingents, affecting the delivery of mission mandates. In applying the lesson, the subprogramme will partner with subprogrammes 2 and 4 to support troop-contributing countries in aligning their explosive ordnance threat mitigation training modules to United Nations standards and deploy peacekeepers who are well prepared to mitigate explosive

ordnance. This will reduce the need for in-mission training and the time required for contingents to achieve full operational capability after deployment.

5.55 Expected progress towards the objective is presented in the performance measure below (see figure 5.VI).

Figure 5.VI

Performance measure: improved explosive ordnance threat mitigation training by troop-contributing countries and reduced time for trained contingents to reach full operational capability

Deliverables

5.56 Table 5.10 lists all deliverables of the subprogramme.

Table 5.10

22. On policing for police-contributing countries, United Nations police and national authorities	4	4	4	4
23. To strengthen assistance in justice and corrections areas	1	2	1	1
24. On security sector reform, including defence sector reform, to strengthen assistance to national security sector reform processes	3	3	2	2
25. On issues related to mine action	2	2	2	2
26. On the prevention, investigation and prosecution of serious crimes against United Nations personnel in peacekeeping operations and special political missions	–	–	2	2

C. Substantive deliverables

Consultation, advice and advocacy: consultations with and advice to 22 Member States to strengthen the capacities of national police services and other law enforcement entities; consultations with 47 Member State groupings, regional organizations and specialized institutions on policing; consultations with 35 Member States on disarmament, demobilization and reintegration and community violence reduction, including with the Group of Friends of Disarmament, Demobilization and Reintegration; policy and technical advice to 20 Member States to build the capacity of national authorities and local partners on mine action, weapons and ammunition management and improvised explosive device threat mitigation; advice to facilitate consensus-building on security sector reform options and modalities in “sustaining peace” contexts; consultations and advice to mobilize coordinated and integrated Member State and related partner support for national justice and corrections efforts; consultations with and advice to 25 Member States on issues related to the implementation of Security Council resolution [2589 \(2021\)](#) on accountability for crimes against peacekeepers, as well as accountability for crimes against United Nations personnel in special political missions; and advice to and advocacy with Member States’ senior police executives and other partners through the Fourth United Nations Chiefs of Police Summit.

Databases and substantive digital materials: pledged formed police units registered in the Peacekeeping Capability Readiness System and other personnel matters in the computerized human resources system; and online database on accountability for crimes against peacekeepers, pursuant to the request of the Security Council in its resolution [2589 \(2021\)](#).

D. Communication deliverables

Digital platforms and multimedia content: digital and social media content on activities of the subprogramme.

Subprogramme 4

Policy, evaluation and training

Objective

- 5.57 The objective, to which this subprogramme contributes, is to enhance the performance and effectiveness of peace operations within the purview of the Department.

Strategy

- 5.58 To contribute to the objective, the subprogramme will:
- (a) Promote and facilitate policy development, evaluation, organizational learning and training on issues relating to peacekeeping, taking into consideration the views and recommendations provided by Member States on the Action for Peacekeeping initiative launched by the Secretary-General in 2018, the subsequent Action for Peacekeeping Plus initiative launched in 2021 and the Strategy for the Digital Transformation of United Nations Peacekeeping, in line with the Data Strategy of the Secretary-General for Action by Everyone, Everywhere;
 - (b) Support peacekeeping operations in the implementation of the Comprehensive Planning and Performance Assessment System, as part of the integrated peacekeeping performance and accountability framework;
 - (c) Formulate, update and disseminate policies and practical guidance and provide support to missions in specific thematic areas, such as protection of civilians, conflict-related sexual violence, civil affairs, child protection, and addressing misinformation and disinformation;
 - (d) Strengthen knowledge-sharing and guidance development for peacekeeping operations and coordinate the development of guidance for the peace and security pillar and for the Department of Operational Support, in close cooperation with the Department of Political and Peacebuilding Affairs and the Department of Operational Support;
 - (e) Build the capacity of policy and best practices officers and focal points in field missions through advice, coordination and training, and continue to strengthen systems and infrastructure for knowledge management by increasing the quality and number of relevant documents available to users in field missions;
 - (f) Support Member States that are contributing uniformed personnel through expanded partnerships with national and regional training institutions and partners for the delivery of predeployment training and train-the-trainer courses and the development and delivery of training materials for predeployment preparations;
 - (g) Provide civilian predeployment training and leadership and management training for all mission components and support the delivery of in-mission training through train-the-trainer courses in operational and support skills for uniformed and civilian personnel;
 - (h) Use a learning management system accessible by Member States to host courses, enable the registration of participants, deliver online elements of programmes and enable testing ahead of face-to-face course sessions.
- 5.59 The above-mentioned work is expected to result in:
- (a) Improved and more responsive decision-making by senior mission management, given that comprehensive planning and performance assessment provides senior leadership with data-based evidence showing how resources in their missions are utilized and whether any reorientation of priorities is needed;
 - (b) Increased use by missions of specialized information, thematic policy support and guidance, reflecting lessons learned and promoting an exchange of good practices between missions;

- (c) Strengthened and sustained mission performance through consistently trained uniformed and civilian leaders, contingents and individuals.

Programme performance in 2022

Peacekeeping operations begin to monitor, analyse and respond to misinformation and disinformation

- 5.60 As noted by the General Assembly in its resolution [76/274](#), misinformation and disinformation directed against United Nations peacekeeping missions can have a negative impact on mandate implementation, imperil the safety and security of mission personnel and erode public trust in United Nations peacekeeping operations. Guided by the relevant resolutions from the Assembly and the Security Council, as well as the Strategy for the Digital Transformation of United Nations Peacekeeping, the subprogramme has been working on establishing a framework to address misinformation and disinformation in peacekeeping missions. The initial focus was on developing a community of practice to share best practices and facilitate knowledge-sharing and enable mission-to-mission learning. A baseline survey was also conducted that demonstrated that 70 per cent of all surveyed civilian and uniformed personnel felt that misinformation and disinformation critically, severely or moderately affected the work of their missions. The subprogramme developed practical guidance to support field staff in identifying and analysing misinformation and disinformation and coordinated training for mission staff on the use of digital tools for that purpose.
- 5.61 Progress towards the objective is presented in the performance measure below (see table 5.11).

Table 5.11
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	–	Civilian and uniformed peacekeeping personnel engage in peer-to-peer learning and share best practice for monitoring, analysing and responding to misinformation and disinformation

Planned results for 2024

Result 1: access to information of the performance of units deployed by troop- and police-contributing countries

Programme performance in 2022 and target for 2024

- 5.62 The subprogramme's work contributed to 20 troop- and police-contributing countries with an understanding of access to information on their performance, which met the planned target.
- 5.63 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 5.VII).

Figure 5.VII
Performance measure: number of troop- and police-contributing countries with access to information on their performance (cumulative)

Result 2: improved access to knowledge and guidance materials by United Nations peacekeeping personnel

Programme performance in 2022 and target for 2024

- 5.64 The subprogramme’s work contributed to improved access to knowledge and guidance materials by United Nations peacekeeping personnel through the launch of the “Policy meets practice” podcast series and six guidance and best practice webinars, which met the planned target.
- 5.65 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 5.12).

Table 5.12
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Peacekeeping personnel have access to guidance webinars	Peacekeeping personnel have access to the multimedia page on the policy and practice database	Improved access to knowledge and guidance materials by United Nations peacekeeping personnel through the launch of the “Policy meets practice” podcast series and 6 guidance and best practice webinars	Improved access to guidance by peacekeeping personnel through multimedia guidance and best practice	Improved access to peacekeeping guidance by peacekeeping personnel through summary guidance materials, multimedia guidance and best practice and improved feedback exchange

Result 3: troop-contributing countries prepare infantry battalions in line with United Nations standards

Proposed programme plan for 2024

- 5.66 The subprogramme supports troop-contributing countries in building self-sustaining capacity to deploy units and personnel trained to United Nations standards across multiple rotations. The subprogramme contributed to the continuous development of tailored training to enable troop-

contributing countries to prepare infantry battalions for United Nations operations. The development and piloting of the training material began in 2020 and was launched in full in 2022.

Lessons learned and planned change

5.67 The lesson for the subprogramme, following internal assessments of battalion performance and the development of new guidance on the use of infantry battalions, was the need for more tailored training to strengthen the preparation by troop-contributing countries of their infantry battalions. In applying the lesson, the subprogramme will roll out a tailored predeployment training course that builds self-sustaining national capacity to prepare infantry battalions to United Nations standards and will develop further training to address force protection requirements in the light of continued attacks on deployed units.

5.68 Expected progress towards the objective is presented in the performance measure below (see figure 5.VIII).

Figure 5.VIII

Performance measure: number of troop-contributing countries deploying infantry battalions prepared in line with United Nations standards (cumulative)

Deliverables

5.69 Table 5.13 lists all deliverables of the subprogramme.

Table 5.13

Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Report of the Secretary-General on the implementation of the recommendations of the Special Committee on Peacekeeping Operations	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	38	38	38	38
2. Meetings of the Special Committee on Peacekeeping Operations	34	34	34	34
3. Meetings of the Fourth Committee	4	4	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	7	7	5	5
4. In the areas of protection of civilians, child protection, civil affairs, conflict-related sexual violence, policy planning, partnerships and force generation	7	7	5	5

Section 5 Peacekeeping operations

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
Seminars, workshops and training events (number of days)	421	425	422	424
5. Workshops for the provision of strategic guidance, training-of-trainers and assistance in curriculum development and delivery, training methodology, materials and training gap identification to Member States, regional peacekeeping training and policy institutions, and field missions	365	368	365	367
6. Training events on leadership, management and administration for senior civilian and uniformed personnel from field missions and supporting offices, Member States and regional organizations	45	47	45	47
7. Workshops for mission thematic advisers and focal points for knowledge-sharing and training on cross-cutting peacekeeping issues	10	10	11	10
8. Workshops for the European Union and its Member States on a rotational system in support of United Nations peacekeeping operations	1	–	1	–
Technical materials (number of materials)	38	38	38	36
9. On all aspects of peacekeeping for Member States and field missions (policy papers, standard operating procedures, technical reports, lessons learned reports, training materials)	34	34	34	32
10. On capability requirements for United Nations peacekeeping operations	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: briefings and presentations to Member States on peacekeeping issues; expert advice to permanent missions to the United Nations, the Bretton Woods institutions, international and regional organizations and non-governmental organizations on peacekeeping issues.				
Databases and substantive digital materials: the Comprehensive Planning and Performance Assessment System, as part of the integrated peacekeeping performance and accountability framework. the Peacekeeping Capability Readiness System, the troop- and police-contributing countries knowledge management system, the policy and practice database and the peacekeeping resource hub accessible to all Member States.				
D. Communication deliverables				
Outreach programmes, special events and information materials: knowledge management newsletter for 15,000 staff; training newsletters for approximately 120 troop- and police-contributing countries and their training institutions.				

B. Proposed post and non-post resource requirements for 2024

Overview

5.70 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 5.14 to 5.16.

Table 5.14

Overall: evolution of financial resources by object of expenditure

5.71 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 5.17 to 5.19 and figure 5.IX.

5.72 As reflected in tables 5.17 (1) and 5.18 (1), the overall resources proposed for 2024 amount to \$5,633,700 before recosting, reflecting no change compared with the appropriation for 2023. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 5.IX
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

5.73 As reflected in tables 5.17 (2) and 5.18 (2), other assessed resources are estimated at \$102,797,000. The resources would provide backstopping support and guidance to 12 peacekeeping operations, many of which are deployed in volatile environments. Other assessed resources reflect an increase of \$10,598,100 (or 11.5 per cent) compared with the estimates for 2023, owing mainly to updated salary costs and common staff costs. Further details on the resource changes are reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).

5.74 As reflected in tables 5.17 (3) and 5.18 (3), extrabudgetary resources amount to \$68,784,000. The resources would complement regular budget resources and would be used mainly to provide for the Mine Action Service, implementation of the Action for Peacekeeping initiative, the strengthening of

peacekeeping strategic partnerships, the implementation of activities related to women and peace and security, and the training-of-trainers programme.

- 5.75 The extrabudgetary resources under this entity are subject to the oversight of the Department of Peace Operations, which has delegated authority from the Secretary-General.

Executive direction and management

- 5.76 The executive direction and management component comprises the Office of the Under-Secretary-General, the Gender Unit, the Integrated Assessment and Planning Unit, the Office of the Director for Peacekeeping Strategic Partnership and the Office of the Director for Coordination and Shared Services.

- 5.77 The overall responsibilities of the executive direction and management component include the following functions:

- (a) Direct, manage and provide political and policy guidance, and strategic direction to the Department-led operations, including in the performance of political, programmatic, managerial and administrative functions;
- (b) Formulate guidelines and policies for peacekeeping operations, based on Security Council mandates;
- (c) Advise the Security Council and the General Assembly on all matters related to peacekeeping activities and the future direction of United Nations peacekeeping, including strategic and policy issues and initiatives, such as peacemaking, peacekeeping, peacebuilding, transitions through partnerships with regional organizations and other peacekeeping partners, and protection of civilians;
- (d) Maintain high-level contact with parties to conflict and Member States, in particular the Security Council, as well as troop-, police- and financially contributing countries, in the implementation of the Security Council mandates;
- (e) Support peacekeeping operations.

- 5.78 The Integrated Assessment and Planning Unit will strengthen analysis and planning at Headquarters and in the missions and provide related guidance, training and support to planning processes in line with the Action for Peacekeeping Plus implementation strategy.

- 5.79 The Gender Unit will facilitate the implementation of commitments on gender equality and women and peace and security by providing strategic and policy guidance, capacity-building and knowledge management, data-driven evidence generation, gender analysis and the mainstreaming of a gender perspective, and the operational and technical backstopping of peacekeeping operations.

- 5.80 The Office of the Director for Peacekeeping Strategic Partnership will undertake General Assembly-mandated reviews of peacekeeping operations and drive implementation of the action plan for improving the safety and security of United Nations peacekeepers with Headquarters and four high-risk missions, namely, the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic, MINUSMA, MONUSCO and the United Nations Mission in South Sudan, and undertake integrated studies and after-action reviews.

- 5.81 The Office of the Director for Coordination and Shared Services, which reports to the Under-Secretaries-General of both the Departments of Peace Operations and Political and Peacebuilding Affairs, includes the joint Executive Office, the Leadership Support Section, the Peacekeeping Situation Centre, the Strategic Communications Section, the Focal Point for Security, the Information Management Unit and the Registry. The Office will continue to provide support to peacekeeping operations for organizational resilience and crisis management, as well as the enhancement of reporting and data analytics capacities and products. The Office will pursue its strategic communication efforts in support of peacekeeping, with an emphasis on social media and

Part II Political affairs

countering misinformation and disinformation. It will coordinate processes for the selection of and support for senior mission leadership and will continue outreach efforts to increase and diversify the pool of candidates.

5.82 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department will continue to rely on electronic record-keeping and communications in order to reduce printing, paper-based filing and photocopy paper. The Department will also continue efforts to enhance telecommunication capabilities and facilitate virtual interaction between Headquarters and field missions.

5.83 Information on the timely submission of documentation and advance booking for air travel is reflected in table 5.20. The Department has continued efforts to raise the awareness of staff through various forms of communication on the importance of early planning for travels and complying with the advance purchase policy. Managers are required to implement preventive and corrective measures.

Table 5.20

Air tickets purchased at least 2 weeks before the commencement of travel	49	40	33	100	100

5.84 The proposed regular budget resources for 2024 amount to \$663,800 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 5.21 and figure 5.X.

Figure 5.X
Executive direction and management: distribution of proposed resources for 2024 (before recosting)
 (Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

- 5.85 Other assessed resources for this component are estimated at \$15,711,500. The resources would be used to support the Office of the Under-Secretary-General in ensuring an integrated approach to planning, directing, managing and supporting peacekeeping operations and would support the Under-Secretary-General in overseeing the strategic direction of the Department and in the performance of political, programmatic, managerial and administrative functions. The estimated increase of \$1,779,800 relates to updated salary and common staff costs and the proposed establishment of a post of Senior Programme Management Officer (P-5) in the Office of the Under Secretary-General. Further details are provided in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).
- 5.86 Extrabudgetary resources for this component amount to \$6,709,600. The resources would complement regular budget resources and would be used mainly to support the Office of the Under-Secretary-General in implementing the Action for Peacekeeping initiative and strengthen the Department’s digital communications, the capacity of the Office of the Director for Peacekeeping Strategic Partnership and the promotion of activities on women and peace and security.

Programme of work

**Subprogramme 1
 Operations**

- 5.87 The proposed regular budget resources for 2024 amount to \$2,905,800 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 5.22 and figure 5.XI.

Figure 5.XI
Subprogramme 1: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed resources

5.88 Other assessed resources for this component is estimated at \$13,341,800. The resources would support the regional political-operational structure to serve as a single point of entry at Headquarters for all peace and security presences in the field, providing them with coordinated and consolidated political and operational guidance and support. The projected increase of \$1,372,300 is attributable mainly to the updated salary costs, including the revised calculation of common staff costs, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).

**Subprogramme 2
Military**

5.89 The proposed regular budget resources for 2024 amount to \$476,500 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 5.23 and figure 5.XII.

Table 5.23

Figure 5.XII
Subprogramme 2: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

5.90 Other assessed resources for the subprogramme are estimated at \$30,236,700. The resources would support the Office of Military Affairs in providing technical advice and oversight to the heads of military components on specific military plans and operations; assess potential threats to military operations; support, monitor and guide all military components in peacekeeping operations; develop relevant military policy and guidance documents; and maximize military capability and its timely deployment to peacekeeping operations. The estimated increase of \$3,129,800 reflects updated salary

and common staff costs, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).

5.91 Extrabudgetary resources for the subprogramme amount to \$1,335,100. The resources would complement regular budget resources and would be used mainly to support the operational advisory performance management system.

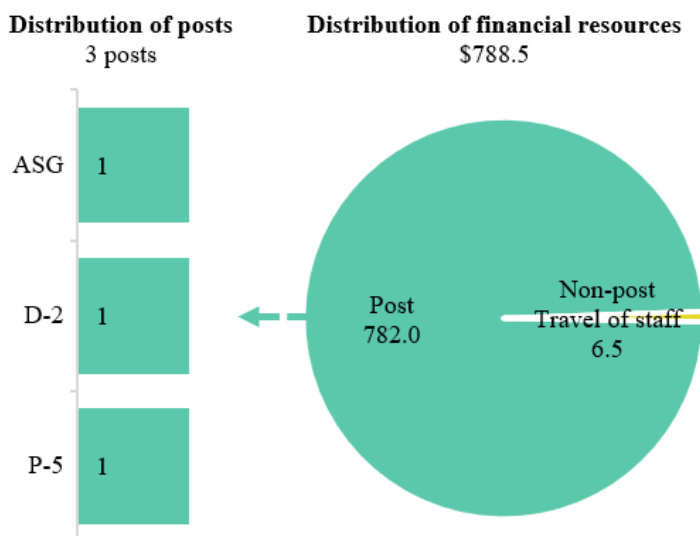

Subprogramme 3 Rule of law and security institutions

5.92 The proposed regular budget resources for 2024 amount to \$788,500 and reflect no change in resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 5.24 and figure 5.XIII.

Table 5.24
Subprogramme 3: evolution of financial and post resources

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

- 5.93 Other assessed resources for the subprogramme are estimated at \$25,296,200. The resources would be used mainly to support rule of law activities undertaken by the Office of the Assistant Secretary-General, the Police Division, the Mine Action Service, the Justice and Corrections Service, the Disarmament, Demobilization and Reintegration Section and the Security Sector Reform Unit. The estimated increase of \$2,763,400 reflects updated salary and common staff costs, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).
- 5.94 Extrabudgetary resources for the subprogramme amount \$52,614,800. The resources would complement regular budget resources and would be used mainly to support the Mine Action Service, the Global Focal Point for the Rule of Law, effective weapons management in disarmament, demobilization and reintegration, the Police Division and security sector reform activities.

**Subprogramme 4
Policy, evaluation and training**

- 5.95 The proposed regular budget resources for 2024 amount to \$368,600 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 5.25 and figure 5.XIV.

Table 5.25

Figure 5.XIV

Subprogramme 4: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

- 5.96 Other assessed resources for the subprogramme are estimated at \$14,823,000. The resources would support the Policy, Evaluation and Training Division in implementing institutional capacity-building activities for strengthening peacekeeping through the formulation of cross-cutting peacekeeping policy and guidance; knowledge management and the sharing of best practices and innovations; the setting of training standards for peacekeeping personnel; the evaluation of programme performance towards more effective mandate implementation; and strategic cooperation within the United Nations and with external partners. The estimated increase of \$1,426,200 reflects the proposed establishment of a post of Data Specialist (P-4) and the updated salary and common staff costs, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).
- 5.97 Extrabudgetary resources for the subprogramme amount to \$7,099,600. The resources would complement regular budget resources and would be used mainly to support the Strategic Force Generation and Capability Planning Cell, the implementation of the Comprehensive Planning and Performance Assessment System as part of the integrated peacekeeping performance and accountability framework, the prevention of conflict-related sexual violence, the training-of-trainers centre and the light coordination mechanism.

Programme support

- 5.98 The proposed regular budget resources for 2024 amount to \$430,500 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 5.26 and figure 5.XV.

Table 5.26
Programme support: evolution of financial and post resources

Figure 5.XV
Programme support: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

5.99 Other assessed resources for the component are estimated at \$3,387,800 and would be used mainly to enable the Executive Office to provide finance and budget, human resources and administrative support for the Department. The estimated increase of \$126,600 reflects updated salary common staff costs, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).

5.100 Extrabudgetary resources for the component amount to \$1,024,900. The resources would complement regular budget resources and would be used mainly to enable the Executive Office to provide finance and budget, human resources and administrative support.

II. United Nations Truce Supervision Organization

Foreword

Over the 75 years of its existence, the United Nations Truce Supervision Organization (UNTSO) has experienced dramatic changes in its area of operations. Through these changes, UNTSO has continued to consistently deliver on its mandate.

The deployment of trained military observers to the United Nations Disengagement Observer Force and the United Nations Interim Force in Lebanon in support of peacekeeping mandates contributes to a stable security environment and builds confidence between the parties. UNTSO continues to seek effective and efficient ways to meet the expectations of Member States while balancing the desires of our host countries. The return to operations at the 11 observation posts on the Golan maximizes the observation of the area of separation and the ceasefire line. Enhancing the technical capabilities of observation posts will further improve the observation of the area.

Military observers are also deployed to the mission's regional liaison offices, an essential component of the regional peacekeeping equation. Strategic and working-level liaison will continue to serve as a critical conduit for impartial regional engagement to uphold mandate requirements.

In 2024, UNTSO will continue to engage with its national and international partners to help to ease tensions between the parties and reinforce the collective United Nations efforts for peaceful resolutions.

(Signed) Patrick **Gaucht**
Head of Mission and Chief of Staff
United Nations Truce Supervision Organization

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 5.101 The United Nations Truce Supervision Organization (UNTSO) is mandated to assist the parties to the 1949 Armistice Agreements in the supervision of the application and observance of the terms of those Agreements. Its mandate derives from Security Council resolutions and decisions, including resolutions [50 \(1948\)](#), [54 \(1948\)](#) and [73 \(1949\)](#). The military observers, assigned to assist the United Nations Mediator in supervising the truce in Palestine pursuant to resolution [50 \(1948\)](#), became UNTSO pursuant to resolution [73 \(1949\)](#) to supervise the Armistice Agreements between the parties to the Arab-Israeli conflict. Following the wars of 1956, 1967 and 1973, the functions of the observers were adapted in response to altered circumstances.
- 5.102 UNTSO activities in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic are aimed at maintaining the regional liaison architecture established under the Armistice Agreements and providing trained military observers to the United Nations Disengagement Observer Force (UNDOF) and the United Nations Interim Force in Lebanon (UNIFIL).

Programme of work

Objective

- 5.103 The objective, to which UNTSO contributes, is to ensure adherence to the General Armistice Agreements of 1949 and related agreements.

Strategy and external factors for 2024

- 5.104 To contribute to the objective, UNTSO will:
- (a) Provide trained military observers to UNDOF and UNIFIL to assist in their mandate implementation by delivering timely and accurate observation reports, as well as assessments and analyses of regional developments and impacts mission-wide, including on the safety and security situation. To that end, the mission provides administrative, logistical, communications and security support to all outstations and liaison offices;
 - (b) Implement regional liaison functions through strategic engagement and regular interaction with the parties, as well as senior representatives of troop-contributing countries and other Member States in the mandate area, and conduct regular liaison functions, through its liaison offices in Egypt, Lebanon and the Syrian Arab Republic, and with Israel and Jordan from its headquarters;
 - (c) Support informed strategic analysis and decision-making within the Organization, with peacekeeping partners and among regional actors through regional assessments, and support peacekeeping partnerships in coordination with other United Nations entities;
 - (d) Conduct seminars, briefings and information exchanges with regional stakeholders, think tanks and senior representatives of troop-contributing countries and other Member States.
- 5.105 The above-mentioned work is expected to result in:
- (a) Reliable communications channels and relations of confidence with the parties, conflict resolution, reduced tensions, avoidance of misunderstandings that could escalate into cross-

- boundary conflict and expanded liaison and information networks with national and local community representatives and with actors with influence in the areas of interest;
- (b) Strengthened situational awareness and decision-making by other United Nations entities, enhancing the impact of regional United Nations presences;
 - (c) Improved cooperation and understanding of cross-cutting regional issues among regional counterparts.
- 5.106 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) All parties to the General Armistice Agreements of 1949 and related agreements will cooperate with UNTSO in the performance of its functions;
 - (b) All parties will remain willing to resolve their disputes and to cooperate with the United Nations in fulfilment of the Security Council mandate.
- 5.107 With regard to cooperation with other entities at the global, regional, national and local levels, UNTSO will engage with relevant national and regional organizations, and cooperate and closely coordinate with its regional peacekeeping partners, special political missions, humanitarian coordinators and relevant agencies. These engagements are intended to share and validate information from the ground, integrate assessments, ensure consistent key messages and capture synergies to enhance the collective value of regional United Nations presences in the Middle East. This strategic cooperation will take place between the heads of missions and agencies and directors through regular consultations and regional inter-mission engagements, as well as at the working level. UNTSO will continue to expand information-sharing and analysis on regional trends affecting the implementation of United Nations mandates, including through consultative inter-mission coordination activities.
- 5.108 With regard to inter-agency coordination and liaison, UNTSO will continue to maintain close liaison with the Chief Security Advisers of the Department of Safety and Security in all five countries of its area of operations. The UNTSO Chief Security Officer provides reports to the Department at Headquarters and incorporates the Department's policies and procedures into security operations and planning. The UNTSO Chief Security Officer represents UNTSO in the inter-agency security cell, while the Head of Mission and Chief of Staff represents UNTSO in the security management teams.
- 5.109 The mission will continue to integrate a gender perspective in its operational activities, deliverables and results, as appropriate. To facilitate access and improve interaction with local communities, the presence of female military observers in operations and female language assistants will continue to constitute a standard feature of UNTSO activities.

Impact of the pandemic and lessons learned

- 5.110 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular on the mission's meetings and operation deliverables, including inspections during the first half of 2022, owing to the curtailment of personnel arriving in the mission and a requirement to isolate. The mission had temporarily changed the modality of mandatory induction training from in-person to virtual since 2020. As COVID-19 restrictions were lifted, induction training was able to return to in-person training. Postponed and cancelled formal military inspections for Observer Group Golan recommenced in the latter half of 2022.
- 5.111 UNTSO continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including select events and outstation meetings remaining virtual, which mitigated increased contamination and risk to health and ensured broader engagement. Procedures implemented at the observer group level in relation to segregation and limiting contacts with other UNTSO personnel proved effective in maintaining operational output throughout 2022.

Evaluation activities

- 5.112 The evaluation conducted by UNTSO of its headquarters evacuation contingency plan was completed in 2022 and guided the proposed programme plan for 2024.
- 5.113 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. For example, the evaluation was conducted to assess the reliability and efficacy of aspects of UNTSO safety and security protocols in place. UNTSO will implement the recommendations made to improve the zone warden system and increase awareness among staff on the relocation protocols, thus ensuring a safer environment for staff to carry out mandate delivery.
- 5.114 The following evaluations, to be conducted by UNTSO, are planned for 2024:
- (a) Evaluation of handover/takeover processes and continuity of functions;
 - (b) Evaluation of benefits and effectiveness of UNTSO contribution to the increased operational requirement on the Bravo side.

Programme performance in 2022

Enhanced operations through improved observation and reporting capability

- 5.115 With observation post 58 rebuilt and reoccupied in 2022, the observation posts on the Bravo side have been fully reopened and functional. Observer Group Golan thereby regained the ability to observe a total of approximately 340 km² in the area of separation and the area of limitation and, with the relocation of four military observers, was able to improve observation and reporting capability. Inspections recommenced on the Bravo side on 8 June 2022. The Alpha (Israeli-occupied Golan) side requested a pause in inspections during the COVID-19 pandemic in 2021, and inspections recommenced on 18 May 2022.
- 5.116 Progress towards the objective is presented in the performance measure below (see table 5.27).

Table 5.27

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
COVID-19 and other challenges affected the pace of rebuilding and reopening observation posts	Increased operational capability on the Golan through the reopening of observation posts 57 and 71	All observation posts on the Bravo side fully reopened and functional

Planned results for 2024

Result 1: diversified engagement through enhanced regional liaison

Programme performance in 2022 and target for 2024

- 5.117 The mission's work contributed to diversified engagement through strategic and regular liaison with various actors with expertise in regional dynamics, including think tanks, senior representatives of troop-contributing countries and Member States, which met the planned target.
- 5.118 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 5.28).

Table 5.28
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Regional liaison with existing parties within the context of COVID-19 restrictions	Diversified regional liaison with additional national and international actors in the security, policy and research fields with regional expertise	Engagement by diverse actors with expertise in regional dynamics, including think tanks, senior representatives of troop-contributing countries and Member States	Deepened and consolidated regional liaison engagement developed through 2019–2022	Regular engagement by diverse actors with expertise on regional dynamics through a comprehensive system of regional liaison

Result 2: improved situational awareness in the Sinai

Programme performance in 2022 and target for 2024

- 5.119 The mission’s work contributed to improved situational awareness in the Sinai, with the resumption of patrolling by the Liaison Office Cairo in May 2022, which met the planned target.
- 5.120 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 5.29).

Table 5.29
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
The Liaison Office Cairo relocated to Cairo from Isma’iliyah	General inspection and administrative move to Cairo completed to support planning for the resumption of patrolling in the Sinai	Patrolling in the Sinai restarted, providing situational awareness in the region	Improved situational awareness through maintained patrolling operations in the Sinai	Improved situational awareness through maintained patrolling operations in the Sinai

Result 3: improved confidence in decision-making by the United Nations Disengagement Observer Force through upgraded observation

Proposed programme plan for 2024

- 5.121 UNTSO conducts observation along the area of separation to ensure supervision of the application of the armistice terms of 1949 and related agreements.

Lessons learned and planned change

- 5.122 The lesson for UNTSO was the need to upgrade the current observation equipment, given an increase in the number of reported incidents at night and the limited ability of current equipment to provide visibility and object identification at night. In applying the lesson, the mission will provide five observation posts with 24-hour observation equipment to report presumed violations and to provide security and early warning to those on the observation posts. This capability will enhance observation, both at day and night, with a capability to record incidents. A comprehensive

observation system, comprising military observers, observation posts and upgraded observation equipment, will allow UNTSO to increase the accuracy and quality of its reporting, and enable improved confidence decision-making by UNDOF.

5.123 Expected progress towards the objective is presented in the performance measure below (see table 5.30).

**Table 5.30
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	–	Limited visibility and object identification at night and lack of recording capability	<ul style="list-style-type: none"> Improved accuracy and quality of reporting through upgraded 24-hour observation equipment with recording capability Increased observation capability through reconstruction and reopening of observation post 52 	Improved confidence in decision-making by UNDOF enabled by improved accuracy and quality of reporting through upgraded 24-hour observation equipment at 5 observation posts

Legislative mandates

5.124 The list below provides all mandates entrusted to UNTSO.

Security Council resolutions

- [50 \(1948\)](#)
- [54 \(1948\)](#)
- [73 \(1949\)](#)

Deliverables

5.125 Table 5.31 lists all deliverables of UNTSO.

Table 5.31
Deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	16	20	16	16
1. Seminars on the implications of regional developments for peacekeeping areas (formerly Seminars Analysis Team)	2	2	2	2
2. Seminars on UNTSO operations (requested by Member States and international organizations)	14	18	14	14
C. Substantive deliverables				
Consultation, advice and advocacy: consultation with national authorities in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic to assess regional stability/security conditions, regional trend effects and potential disturbances among the parties and on peacekeeping areas of operation, and with the 28 troop-contributing countries, other Member State representatives and United Nations operations and organizations in the mission area; and liaison with national officers in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic and with local government officials, community leaders, international interlocutors, United Nations operations and country offices.				
E. Enabling deliverables				
Administration: weekly, monthly, and annual situation reports; analytical assessment and thematic reports and briefings; quarterly update briefs on each mandate country; tactical operational reports, including daily operational reports, incident reports and investigation reports; inter-mission support agreements with the Office of the Special Coordinator for the Middle East Peace Process and Personal Representative of the Secretary-General to the Palestine Liberation Organization and the Palestinian Authority, UNIFIL and UNDOF; and monthly mandatory induction training of incoming military observers prior to deployment in observer groups and liaison offices, and tactical training of military observers on the use of observation equipment.				

B. Proposed post and non-post resource requirements for 2024

Overview

5.126 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 5.32 to 5.34.

Table 5.32

5.127 Additional details on the distribution of the proposed resources for 2024 are reflected in table 5.35 and figure 5.XVI.

5.128 As reflected in table 5.35, the overall net resources proposed for 2024 amount to \$37,722,900 before recosting, reflecting an increase of \$248,200 (or 0.7 per cent) compared with the appropriation for 2023. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Overall resource changes

Other changes

5.129 As reflected in table 5.32 above, the net effect of the proposed changes is a net increase of \$248,200, as follows:

- (a) **Posts.** The increase of \$13,000 relates to the proposed redeployment of one post of Field Security Officer (Field Service) from Damascus to Jerusalem, Israel (see annex III to the present report);
- (b) **Non-posts.** The net increase of \$235,200 reflects:
 - (i) An increase of \$1,374,600 under other staff costs (\$399,600) and furniture and equipment (\$975,000). The increase under other staff costs would provide for 6 additional military observers to supplement the current strength of 153 military observers assigned in the five countries covered under the UNTSO mandate (Egypt, Israel, Jordan, Lebanon and Syrian Arab Republic), and tasked to carry out round-the-clock observation activities on both sides (Alpha and Bravo) of the Golan. The proposal is based on the recommendations by the Office for the Peacekeeping Strategic Partnership and the military capability study team, which assessed the mission’s military capabilities to implement and achieve its mandate. It was noted that UNTSO military observers were deployed under operational control of UNIFIL and UNDOF; therefore, military observers’ deployment in those mission areas should be undertaken in close coordination between UNIFIL/UNDOF and UNTSO. The recommendations included the need for the mission to conduct round-the-clock permanent observation by reoccupying the observation posts and increasing its personnel numbers by six military observes to ensure round-the-clock observation capability in the area of separation and the area of limitation. The increase under furniture and equipment would provide for the purchase of two units of long-range electrical optical system (EOS) cameras, including the operational system for the observation posts

at the Golan. The need to expedite the procurement of observation equipment was also recommended in the military capability study. The acquisition of more advanced observation equipment, capable of operating around the clock, would support UNTSO in recording incidents, improve the accuracy of reporting, facilitate investigations, when required, enhance situational awareness and provide improved safety and security;

- (ii) The increased requirements are offset in part by a decrease of \$1,139,400 in general operating expenses (\$584,900) and in the improvement of premises (\$554,500) relating to reduced requirements for a number of construction projects that have been cancelled or deferred for review as part of the ongoing capital investment planning programme of work and periodic reports to be submitted to the General Assembly in due course. In the interim, for 2024 select capital investment projects for urgent renovations and upgrades will be included under the proposed programme budget for section 33, Construction, alteration, improvement and major maintenance.

5.130 Information on advance booking for air travel is reflected in table 5.36. UNTSO continues to raise awareness among staff and emphasize that it is important and necessary to comply with the advance purchase rule and continues to improve adherence to the policy, reaching nearly 100 per cent compliance in 2022. Managers are asked to implement preventive measures and monitor corrective measures. Statistics on compliance rates and information on trends are distributed to managers on a quarterly basis.

III. United Nations Military Observer Group in India and Pakistan

Foreword

The United Nations Military Observer Group in India and Pakistan (UNMOGIP) is the second oldest United Nations peacekeeping mission, beginning its mandate in 1949. The mission continues to perform its mandate focusing on observing and reporting on the ceasefire between India and Pakistan. It also continues to conduct patrols and investigations into alleged ceasefire violations and incidents at the working boundary through the 44 United Nations military observers who monitor the 770 km-long line of control and the working boundary. This work requires professionalism, competence, impartiality and high precision in reporting. Efforts are continuously undertaken to further enhance information-sharing, with the involvement of the civilian support staff to aid the effective and efficient conduct of field tasks.

The mission has continued to build confidence in the region and will continue to fulfil its mandate with impartiality. This is made possible through the support of the host nations, India and Pakistan, coupled with the welcoming attitude of the local Kashmiri population. The mission has kept the host Governments informed of its activities at the line of control and the working boundary and continues to regularly engage with United Nations Headquarters on its operations and the challenges faced in the implementation of its mandate.

UNMOGIP continues to play a role in working towards bringing more peace and stability in the South Asia region. Diversity and professionalism are the strengths of UNMOGIP. With the support of the international community and all stakeholders, peace will one day be achieved in the region.

(Signed) Rear Admiral Guillermo Pablo **Rios**
Head of Mission and Chief Military Observer
United Nations Military Observer Group in India and Pakistan

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 5.131 The United Nations Military Observer Group in India and Pakistan (UNMOGIP) is responsible for observing and reporting to the Secretary-General any developments pertaining to the observance of the ceasefire, pursuant to Security Council resolution [307 \(1971\)](#). In the resolution, the Council demanded that a durable ceasefire and cessation of all hostilities in all areas of conflict be strictly observed and remain in effect until withdrawals take place, as soon as practicable, of all armed forces to their respective territories and to positions that fully respect the ceasefire line in Jammu and Kashmir supervised by UNMOGIP. To complement its ceasefire monitoring efforts, UNMOGIP conducts balanced investigations on any received complaints of alleged ceasefire violations filed by parties.

Programme of work

Objective

- 5.132 The objective, to which UNMOGIP contributes, is to ensure that developments pertaining to ceasefire violations along the line of control are monitored in accordance with the mandate of UNMOGIP as contained in Security Council resolution [307 \(1971\)](#).

Strategy and external factors for 2024

- 5.133 To contribute to the objective, UNMOGIP will:
- (a) Continue to focus on the core mandated tasks of prevention, early warning, observation and reporting, and confidence-building;
 - (b) Provide timely and detailed reports on relevant developments in its area of operations in accordance with the implementation of its mandate;
 - (c) Continue to employ military observers on both sides of the line of control for the conduct of patrols, inspections; and investigations of alleged violations of the ceasefire and the performance of other tasks in the vicinity of the line of control to the extent permitted by the host countries.
- 5.134 The above-mentioned work is expected to result in adherence to the ceasefire through the presence of United Nations military observers.
- 5.135 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Host countries cooperate with UNMOGIP in observing the ceasefire and refraining from hostilities and any action that may aggravate the situation or endanger international peace as embodied in Security Council resolution [307 \(1971\)](#);
 - (b) India and Pakistan remain willing to support UNMOGIP in the conduct of its activities for the delivery of its mandate.
- 5.136 The mission integrates a gender perspective in its operational activities, deliverables and results, as appropriate, to maximize its impact in the area of operations. This includes ensuring that the United Nations military observers engage in an inclusive and comprehensive manner with local communities, among both men and women, to ensure that the mission has a gender-sensitive understanding of community perspectives of the situation on the ground and to facilitate the conduct and planning of mission operations.

Impact of the pandemic and lessons learned

- 5.137 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular some field visits and field trips, which were suspended. The operational performance of UNMOGIP was also affected by the reduced mobility of mission personnel. The Jammu-Sialkot border crossing point was closed in March 2020 owing to COVID-19 concerns and remains closed. This made it necessary for United Nations personnel and equipment to cross at the Wagah-Attari international border crossing, increasing the time and distance needed for routine movements.
- 5.138 UNMOGIP continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including improvements in its field technology infrastructure to enable remote operations and ensure continued mandate delivery.

Programme performance in 2022

Zero complaints concerning alleged ceasefire violations

5.139 To implement its mandate, UNMOGIP undertakes best efforts to monitor the ceasefire between India and Pakistan at the line of control. During 2022, the mission ensured supervision of the ceasefire through the presence of United Nations military observers at the 10 UNMOGIP field stations on both sides of the line of control, and within the limitations brought about by the COVID-19 pandemic. UNMOGIP continued to implement its mandate by performing core field tasks. The mission did not receive any complaints concerning alleged ceasefire violations in 2022. The mission received 14 petitions from recognized political groups on the situation at and in the vicinity of the line of control in Jammu and Kashmir, expressing concerns over developments affecting Kashmir, in both India and Pakistan. The significant reduction in the number of complaints received since 2021 was likely due to the reaffirmation by India and Pakistan in February 2021 of their commitment to the 2003 ceasefire agreement at the line of control.

5.140 Progress towards the objective is presented in the performance measure below (see figure 5.XVII).

Figure 5.XVII
Performance measure: number of investigated complaints (annual)

Planned results for 2024

Result 1: improved situational awareness through geospatial information systems and high-resolution satellite imagery

Programme performance in 2022 and target for 2024

- 5.141 The mission's work contributed to improved planning of observer missions through the use of a new geospatial information system-based operational map, which met the planned target.
- 5.142 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 5.37).

Table 5.37

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Use of outdated information systems and satellite images	Scoping of the requirements for geospatial information systems and satellite imagery	Improved planning of observer missions through use of a new geospatial information system-based operational map to implement mandate	Improved analysis of planned routes and the nature of identified posts along the line of control	Improved planning of patrols and observer missions through connection of data between UNMOGIP geospatial information system operational maps and Situational Awareness Geospatial Enterprise platform

Result 2: increased presence at the line of control

Programme performance in 2022 and target for 2024

- 5.143 The mission's work contributed to the increased presence of United Nations military observers at UNMOGIP field stations on both sides of the line of control, with 1,423 operational tasks conducted, which exceeded the planned target of 1,350 operational tasks.
- 5.144 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 5.XVIII).

Figure 5.XVIII
Performance measure: presence at the line of control

(Number of operational tasks)

Result 3: enhanced observation along the line of control

Proposed programme plan for 2024

5.145 The mission conducts core field tasks along the line of control using observation equipment. In 2022, the mission acquired modern binoculars for some field stations, conducted training on their use and began using them as a first step to improve observation along the line of control.

Lessons learned and planned change

5.146 The lesson for the mission was the need to optimize activities using the new observation equipment at all field stations to accomplish key field tasks. In applying the lesson, the mission will acquire software to enhance the functionality of the new binoculars to allow for the automated transfer of information into digital format, as well as acquire additional binoculars for remaining field stations. This will enable the mission to store, review and analyse data and thereby increase the accuracy and quality of its reporting.

5.147 Expected progress towards the objective is presented in the performance measure below (see table 5.38).

Table 5.38
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Use of observation equipment with limited capabilities	Use of observation equipment with limited capabilities and scoping of the requirements for new equipment	Enhanced field observation and reporting at field stations with the new observation equipment	Increased accuracy of observation through new software to store, review and analyse data	Enhanced observation and reporting along the line of control with all field stations using the new observation equipment

Legislative mandates

5.148 The list below provides all mandates entrusted to UNMOGIP.

Security Council resolutions

[39 \(1948\)](#)

[47 \(1948\)](#)

Deliverables

5.149 Table 5.39 lists all deliverables of UNMOGIP.

Table 5.39

Deliverables for 2024, by category and subcategory

Category and subcategory

C. Substantive deliverables

Consultation, advice, and advocacy: regular engagement with military personnel of host nations.

D. Communication deliverables

Outreach programmes, special events and information materials: briefings and presentations to troop-contributing countries' ambassadors, military attachés and national universities.

Digital platforms and multimedia content: UNMOGIP website.

E. Enabling deliverables

Administration: investigation reports, field trips reports, incident reports, daily, weekly, monthly and annual situation reports, monthly induction training of incoming military observers, and bimonthly training of officers-in-charge.

B. Proposed post and non-post resource requirements for 2024

Overview

5.150 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 5.40 to 5.42.

Table 5.40

Foreword

In 2024, the Office for Outer Space Affairs will continue to support the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies. With the value of the space sector estimated at more than \$450 billion annually, and after a third consecutive record-breaking year in terms of satellites launched into outer space, the governance and long-term sustainability of outer space activities, space debris mitigation and space resources will remain high on the agenda of Member States' efforts to maintain outer space for peaceful purposes. Space is integral to our daily lives, and with 102 member states actively engaged, the work of this rapidly growing intergovernmental forum will remain at the forefront of space exploration and safe use.

As a capacity-builder, the Office will leverage its comparative advantages and expertise in space law, policy, science and technology. Through unique public-private partnerships, the Office will provide targeted and inclusive opportunities to develop space-capable workforces and space-based solutions for national needs and global challenges, and support the Sustainable Development Goals ("Space4SDGs"). The Office will continue to promote the implementation of the outer space treaties, including the registration of objects launched into space, and advance the preparedness of countries to address disaster risks and improve their climate change mitigation, adaptation and resilience.

The Office will further seek to build transparency and resilience around these core mandates, promoting space in global agendas and summits and advocating for treaty compliance and access to space for all.

(Signed) Niklas **Hedman**
Acting Director, Office for Outer Space Affairs

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 6.1 The Office for Outer Space Affairs is responsible for advancing international cooperation in space activities. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [1472 A \(XIV\)](#), [76/3](#), entitled “The ‘Space2030’ Agenda: space as a driver of sustainable development”, and [77/121](#) on international cooperation in the peaceful uses of outer space and [76/55](#) on transparency and confidence-building measures in outer space activities, as appropriate.
- 6.2 The core functions of the Office are: (a) serving as the secretariat of the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies (resolution [1472 A \(XIV\)](#)), as the executive secretariat of the International Committee on Global Navigation Satellite Systems and its Providers’ Forum (resolutions [61/111](#) and [64/86](#)) and as the secretariat of the Space Mission Planning Advisory Group (resolution [71/90](#)); (b) implementing the United Nations Programme on Space Applications (resolutions [2601 \(XXIV\)](#) and [37/90](#)) and the programme on the United Nations Platform for Space-based Information for Disaster Management and Emergency Response (UN-SPIDER) (resolution [61/110](#)); (c) maintaining the Register of Objects Launched into Outer Space (resolutions [1721 B \(XVI\)](#) and [3235 \(XXIX\)](#)); (d) discharging the responsibilities of the Secretary-General under the United Nations treaties and principles on outer space and related resolutions (resolutions [2222 \(XXI\)](#), [2345 \(XXII\)](#), [2777 \(XXVI\)](#), [3235 \(XXIX\)](#), [34/68](#), [37/92](#), [41/65](#), [47/68](#), [59/115](#) and [62/101](#)); and (e) supporting Member States in fulfilling the “Space2030” Agenda implementation plan (resolution [76/3](#)).

Programme of work

Peaceful uses of outer space

Objective

- 6.3 The objective, to which this programme contributes, is to strengthen international cooperation in the conduct of space activities for peaceful purposes and advance the use of space science and technology and their applications.

Strategy and external factors for 2024

- 6.4 To contribute to the objective, the Office will support the work of the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies and promote international cooperation in the exploration and use of outer space for peaceful purposes. Specifically, the Office will:
 - (a) Provide substantive secretariat services to the Committee, the Scientific and Technical Subcommittee, the Legal Subcommittee, the International Committee on Global Navigation Satellite Systems and its Providers’ Forum and the Space Mission Planning Advisory Group;
 - (b) Provide secretariat services to the working groups of the Committee and its subsidiary bodies, including the Working Group on the Long-term Sustainability of Outer Space Activities, which, under a five-year workplan is: (i) identifying and studying challenges and considering possible new guidelines for the long-term sustainability of outer space activities; (ii) sharing experiences, practices and lessons learned from voluntary national implementation of the adopted guidelines; and (iii) raising awareness and building capacity, in particular among emerging space nations and developing countries;

- (c) Work with Member States, intergovernmental and non-governmental entities and other partners to promote the peaceful use of outer space, including through: (i) the implementation of the international legal framework governing space activities; (ii) the registration of space objects launched into outer space; (iii) space debris mitigation; (iv) transparency and confidence-building measures in outer space activities, as appropriate; (v) civil satellite-based positioning, navigation, timing and value-added services; and (vi) assistance to the Committee on the Peaceful Uses of Outer Space in further developing the governance of outer space activities;
 - (d) Deliver training events and technical advisory support to assist States, upon their request, and institutions to: (i) enhance their capacities in areas such as space law and policy, space sustainability, space economy, climate change, environmental monitoring, natural resources management, precision farming and agriculture, global health, satellite communications, space weather, space exploration, astronomy, search and rescue, disaster risk reduction and emergency response, and global navigation satellite systems (GNSS); and (ii) develop collaborative platforms and promote knowledge-sharing for space-based solutions;
 - (e) Cooperate with the regional centres for space science and technology education affiliated to the United Nations to deliver training in remote sensing and geographic information systems, meteorological satellite applications, satellite communications, space and atmospheric science and GNSS;
 - (f) Raise awareness on the work of the Committee and the Office and how space can be used to support the Sustainable Development Goals, by: (i) outreach activities, including the commemoration of historical milestones and international days; and (ii) issuing publications, information and training materials;
 - (g) Continue to contribute to the achievement of the Sustainable Development Goals.
- 6.5 The above-mentioned work is expected to result in:
- (a) A safer and more sustainable outer space;
 - (b) Greater understanding, acceptance and application of the international legal regime governing outer space activities;
 - (c) An increased number of countries with access to space, in particular developing countries, in using science and technology and related applications, including space-based solutions, to achieve sustainable development, disaster risk reduction and emergency response;
 - (d) Greater compatibility and interoperability of GNSS;
 - (e) Space capabilities being more readily available through strengthened cooperative relationships and new partnerships.
- 6.6 With regard to the external factors, the overall plan for 2024 is based on the planning assumption that governmental, intergovernmental and non-governmental organizations are able and willing to support the Office in implementing the programme.
- 6.7 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will, in line with its mandate, leverage its established partnerships with governmental, intergovernmental and non-governmental organizations, including space agencies, industry, academia, institutions and other space-related entities, to pursue new opportunities to meet the growing demand for support to strengthen the capacity of countries, in particular developing countries, in using space science and technology and their applications. The Office will also pursue cooperative relationships, including with the private sector, to identify new mechanisms for providing access to space. It will enhance transparency in its programme activities and regularly inform the Committee on the Peaceful Uses of Outer Space of the projects being implemented and of its partnerships with space agencies, governmental and non-governmental organizations and the private sector.

- 6.8 With regard to inter-agency coordination and liaison, the Office will lead the Inter-Agency Meeting on Outer Space Activities (UN-Space) to promote coherence in the space-related work of entities of the United Nations system.
- 6.9 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, as demonstrated by the implementation of its Space for Women project to promote the empowerment of women and girls in the areas of space science, technology, innovation and exploration, and to increase awareness of education and career opportunities in science, technology, engineering and mathematics. The Space for Women project will work with partners to strengthen the capacity and skills of individuals and institutions, with an emphasis on enhancing the participation of women and girls in space activities.
- 6.10 In line with the United Nations Disability Inclusion Strategy and through its Space for Persons with Disabilities project, the Office raises awareness and identifies opportunities for disability inclusion in the space sector. The Office will develop partnerships to enhance the prospects of careers in science, technology, engineering and mathematics for people with disabilities and will share good practices for accessibility in scientific research, education and outreach, and publish related information through a dedicated webpage with accessible features.

Impact of the pandemic and lessons learned

- 6.11 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular on holding the annual sessions of intergovernmental bodies and a number of capacity-building, outreach and awareness-raising activities ordinarily held in-person. The Office conducted some activities in a hybrid or fully virtual format, with adjusted delivery schedules, and as necessary, postponed, relocated or cancelled certain activities. For example, the Office facilitated the involvement of participants affected by travel restrictions by organizing meetings and workshops in a hybrid format. Furthermore, a workshop and training course on disaster management and emergency response was relocated, and selected hyper-gravity experiments were postponed.
- 6.12 The Office continues to mainstream the lessons learned and best practices concerning the COVID-19-related adjustments to and adaptation of the programme, including integrating the use of virtual and hybrid mechanisms in the design of capacity-building activities and replicating pragmatic solutions to respond to travel restrictions. This includes embedding locally recruited experts in national disaster management institutions, expanding online courses to other subject areas and organizing demonstrations and simulations guided by experts for smaller groups of targeted practitioners and professionals.

Evaluation activities

- 6.13 The self-evaluation of the information technology and communications needs of the Office completed in 2022 has guided the proposed programme plan for 2024.
- 6.14 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. For example, the evaluation identified compliance gaps and opportunities to rationalize and modernize infrastructure. The Office will strengthen the hosting of its websites, databases and portals, upgrading websites and portals as necessary, to enhance the security and backup of those systems and facilitate their automatic updating to ensure continued compliance with United Nations policies and guidelines. The Office will also modernize its website to streamline content in a user-friendly way and to ensure alignment with United Nations standards.
- 6.15 The evaluation on the activities of the Space4Women platform conducted by the Office is planned for 2024.

Programme performance in 2022

Strengthened partnerships in the use of space applications for agriculture and climate change

- 6.16 The Office established new partnerships with space agencies and other entities offering training in the use of space applications for agriculture and climate change, to extend the courses to participants from developing countries. Adapted training content was developed for government officials, educators and young professionals, including case studies, demonstrations of state-of-the-art applications and hands-on technical training on data platforms to provide an interactive learning experience. The Office facilitated the delivery of the courses online and encouraged the exchange of ideas between global participants, generating connections between user communities and subject matter experts. The courses are accessible on the Office's website.
- 6.17 Progress towards the objective is presented in the performance measure below (see figure 6.I).

Figure 6.I

Performance measure: strengthened partnerships and tailored courses available in the use of space applications for agriculture and climate change

(Number of courses and partnerships)

Planned results for 2024

Result 1: a more secure global navigation satellite systems spectrum

Programme performance in 2022 and target for 2024

- 6.18 The programme's work contributed to 700 specialists receiving access to training in GNSS spectrum protection and interference detection and mitigation, which exceeded the planned target of 124 specialists.
- 6.19 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 6.II).

Figure 6.II
Performance measure: cumulative number of specialists with access to training in global navigation satellite systems spectrum protection and interference detection and mitigation

Result 2: increased understanding and application of the international legal regime governing outer space activities

Programme performance in 2022 and target for 2024

- 6.20 The programme’s work contributed to 39 countries taking action to increase understanding of, adhere to and/or implement the international legal regime governing outer space activities, which exceeded the planned target of 32 countries.
- 6.21 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 6.III).

Figure 6.III
Performance measure: cumulative number of countries taking action to increase understanding, adhere to and/or implement the international legal regime governing outer space activities

Result 3: Direct access to space-based emergency response mechanisms

Proposed programme plan for 2024

- 6.22 The International Charter on Space and Major Disasters is an international initiative among space agencies that provides satellite-derived data to emergency responders in the event of a major disaster. Access to this mechanism requires a national management authority to be an authorized user, thereby

requiring those countries without direct access to request assistance through one of the international organizations that collaborate with the Charter.

Lessons learned and planned change

- 6.23 The lesson for the Office was the demand to scale-up support to national experts in order for them to have quick access to free-of-charge shared satellite imagery in situ in an affected country, instead of having to wait for map and related information products to be provided or facilitated by other authorized users or collaborating organizations.
- 6.24 In applying the lesson, the Office will raise awareness among and provide training to national disaster management focal points and data scientists in national management authorities from developing countries that do not yet have direct access to the mechanism, in order to build their capacity to download and process data and work with satellite imagery for rapid mapping. The programme will support focal points, when requested, in the activation of the International Charter. As authorized users, national management authorities will be able to communicate directly with the Charter, thereby reducing the number of intermediaries in the process and enabling faster delivery of the remote-sensed imagery or derived information products to local authorities responding to an emergency.
- 6.25 Expected progress towards the objective is presented in the performance measure below (see figure 6.IV).

Figure 6.IV

Performance measure: cumulative number of national disaster management agencies becoming authorized users of the International Charter on Space and Major Disasters

Legislative mandates

- 6.26 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

Publications (number of publications)	8	5	6	5
18. Publications on the Office’s activities and the Committee on the Peaceful Uses of Outer Space	8	5	6	5
Technical materials (number of materials)	59	69	75	74
19. Information furnished in accordance with the United Nations treaties and principles on outer space	4	3	5	4
20. Information furnished in accordance with the Convention on Registration of Objects Launched into Outer Space and General Assembly resolution 1721 B (XVI)	55	66	70	70
C. Substantive deliverables				
Consultation, advice and advocacy: normative support to Working Group C of the International Committee on Global Navigation Satellite Systems, the Space for Women network and meetings on the sustainability of space activities; expert advice to Member States, upon request, on: (a) the registration of space objects; (b) space science and technology and their applications; (c) activities of the United Nations-affiliated regional centres for space science and technology education; (d) the use of space-based information in disaster management plans, policies and disaster risk management activities in approximately four Member States; and (e) space-based information to support emergency and humanitarian response in at least five developing countries; and the organization of long-term training opportunities in the field of space science and technology and related applications.				
Databases and substantive digital materials: Register of Objects Launched into Outer Space and Online Index of Objects Launched into Outer Space, UN-SPIDER knowledge portal, International Committee on Global Navigation Satellite Systems portal, Space for Water portal, Space Solutions Compendium (database), e-learning courses including space for climate action and agriculture and national space law collection.				
D. Communication deliverables				
Outreach programmes, special events and information materials: exhibits, promotional and educational materials, and celebrations of achievements and other anniversaries relating to outer space.				
External and media relations: press releases and press conferences on the work of the Office and the Committee on the Peaceful Uses of Outer Space.				
Digital platforms and multi-media content: websites for the Office for Outer Space Affairs, Space for Women, space for climate action and space sustainability.				

B. Proposed post and non-post resource requirements for 2024

Overview

6.28 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 6.2 to 6.4.

Table 6.2

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

6.29 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 6.5 to 6.7 and figure 6.V.

6.30 As reflected in tables 6.5 (1) and 6.6 (1), the overall resources proposed for 2024 amount to \$4,889,400 before recosting, reflecting a net increase of \$131,600 (or 2.8 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 6.V
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor

Overall resource changes

Technical adjustments

- 6.31 As reflected in table 6.7, resource changes reflect an increase of \$131,600 relating to the provision at continuing vacancy rates for two P-3 posts (1 Political Affairs Officer and 1 Programme Officer) with establishment starting in 2023 pursuant to General Assembly resolution [77/262](#), which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts.

Extrabudgetary resources

- 6.32 As reflected in tables 6.5 (2) and 6.6 (2) extrabudgetary resources amounting to \$1,584,800 would provide for \$772,300 under posts or 7 posts (2 P-3, 2 P-2/1 and 3 GS (OL)), and \$812,500 under non-post resources. The resources would complement regular budget resources and would provide for capacity development activities and other services to Member States. The anticipated increase amounting to \$243,000 reflects the planned delivery of additional capacity-building activities and technical advisory assistance to Member States.
- 6.33 Anticipated in-kind contributions with an estimated value of \$1,330,000 reflect staff provided on a non-reimbursable loan basis, expert support and launch services provided under the Access to Space for All initiative and the value of the rental of conference facilities, meeting services, room and board for participants, transport and other contractual services provided on a no-cost basis for training events and other activities organized by the Office.

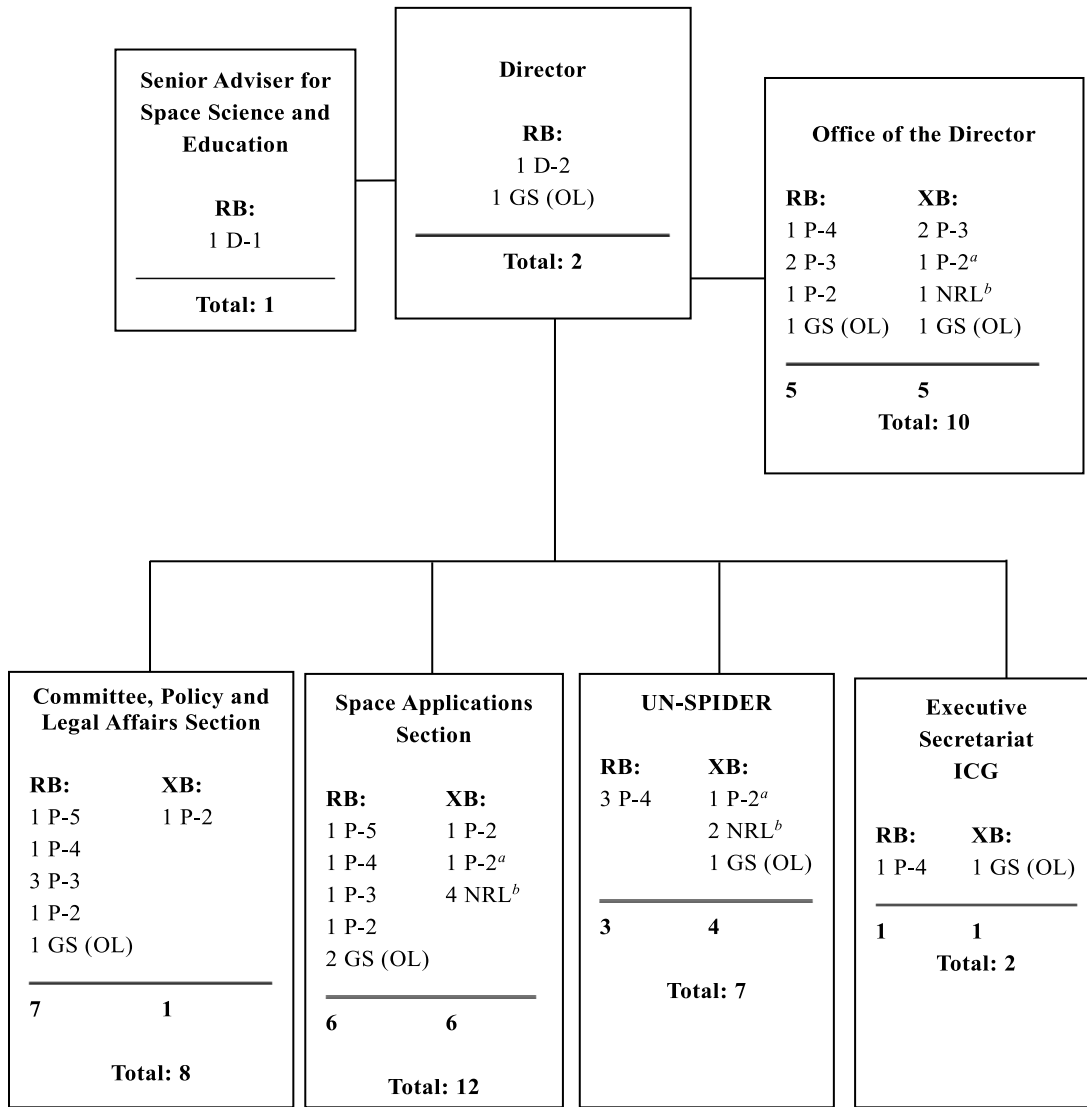

- 6.34 The authority to oversee the use of extrabudgetary resources rests with the Office in accordance with the delegation of authority from the Secretary-General.
- 6.35 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office complies with the policies and procedures rolled out by the United Nations Office at Vienna. The Vienna headquarters is a climate neutral facility, running 100 per cent on renewable energy. Since 2020, the Vienna-based organizations of the common systems started to renew entrances, replaced existing air-curtains and upgraded/refurbished all elevator cabins. While some of those projects have been completed in parts of the compound, they are still ongoing in others, combined with an increased focus on upgrading air conditioning units, replacing pipes and insulation and lightning systems throughout the Vienna International Centre from the 1978 standards. The projects, which will continue through 2024 and beyond, will result in a further reduction of the environmental impact of the Vienna International Centre as they will increase energy efficiency.
- 6.36 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 6.8. Advance purchasing of some tickets was restricted owing to operational constraints arising from the late availability of extrabudgetary funding sources. The Office will review late bookings to mitigate instances that have an impact on compliance.

Table 6.8

^a Junior Professional Officer.

^b Positions on a non-reimbursable loan basis are expected from the Brazilian Air Force, the China National Space Agency, the Government of France, the Japan Aerospace Exploration Agency, the Ministry of Emergency Management of China and the United States Department of State.

Annex II**Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies**

*Brief description of the recommendation**Action taken to implement the recommendation*

Advisory Committee[A/77/7](#)

The Advisory Committee notes with concern the delay in filling the Senior Adviser (D-1) post, which, combined with the current vacancy of the Director (D-2) post, led to a vacuum in the leadership of the Office for Outer Space Affairs. The Committee trusts that updated information on the recruitment status of these two posts will be provided to the General Assembly at the time of its consideration of the present report and at the next programme budget submission (see para. II.144).

In view of the importance of the capacity-building activities related to outer space and the limited expenditures in this area over the past two years, the Advisory Committee encourages the Office for Outer Space Affairs to make full use of the resources allocated under this budget line, in particular the funding for the organization of and participation of individuals and professionals from developing countries in workshops and fellowships and the grants to regional centres. The Committee trusts that information on the use of these resources will be included in the next programme budget submission (see para. II.153).

The recruitment for the D-2 Director and D-1 Senior Adviser posts are in the final stages of selection of candidates, and onboarding is expected in second half of 2023.

Information on the use of resources under grants and contributions is provided as part of the supplementary information to the Advisory Committee.

Foreword

The International Court of Justice is one of the six main organs of the United Nations, and its principal judicial organ. Its mission and activities are governed by the Charter of the United Nations and by its Statute, which forms an integral part of the Charter.

The Court experienced an unprecedented level of judicial activity in 2022, marking one of the most dynamic periods in the institution's recent history. In 2022, the Court held hearings in six cases, delivered four judgments in contentious proceedings and issued two orders relating to the indication or modification of provisional measures, in addition to several procedural orders. Furthermore, in 2022, the Court saw a significant increase in recourse to incidental proceedings, with 32 declarations of interventions filed in one case, and requests to indicate or modify provisional measures submitted in four pending cases.

The coming years promise to be just as busy for the Court. With 17 cases on its General List as at 1 April 2023 – 6 of which were introduced in 2022 and 2023 – the Court has already been seized of two advisory proceedings in 2023 and expects to continue to deliberate on several cases simultaneously, in order to deal with its heavy docket.

To meet the demands of its ever-growing workload, the Court has focused its budgetary proposal for 2024 on the financial resources that are essential for the fulfilment of its core judicial tasks and the efficient functioning of its Registry.

(Signed) Philippe **Gautier**
Registrar

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 7.1 The International Court of Justice is responsible for settling, in accordance with international law, legal disputes that are submitted to it by States and to give advisory opinions on legal questions referred to it by bodies authorized to do so under the terms of the Charter of the United Nations. It is composed of 15 judges elected by the General Assembly and the Security Council and is one of six principal organs of the United Nations and the principal judicial organ of the Organization. It functions in accordance with the Statute of the Court, which is an integral part of the Charter. All 193 States Members of the United Nations are parties to the Statute, and 73 of them have recognized the Court's jurisdiction as compulsory, in line with Article 36, paragraph 2, of its Statute. In addition, more than 300 bilateral and multilateral treaties grant the Court compulsory jurisdiction in the resolution of various types of disputes. States that are not members of the United Nations may become parties to the Statute on conditions to be determined in each case by the Assembly upon the recommendation of the Council. The Court may also be open to States not parties to its Statute, subject to the conditions laid down by the Council and currently set out in its resolution 9 (1946), adopted on 15 October 1946. The Court submits annual reports to the Assembly, the most recent of which is contained in document [A/77/4](#). Under the terms of regulation 2.14 of the Financial Regulations and Rules of the United Nations, the programme budget proposals of the Court are prepared by the Court, in consultation with the Secretary-General, and are submitted to the Assembly by the Secretary-General, together with such observations as the latter may deem desirable.
- 7.2 Although the Court cannot forecast its main workload indicators (e.g. the number of cases that will be pending before the Court in 2024 and the number of new proceedings that will be instituted, including incidental proceedings in pending cases), it has made every effort to assess its requirements for 2024 against the background of its workload for the current and previous budgetary periods.
- 7.3 While the Court has no control over the volume of its activities, which depend in large part on the number of proceedings that will be instituted before it, it must at all times be able to exercise the functions entrusted to it under the Charter. New cases are brought before the Court by States, and advisory opinions are requested of the Court by authorized organs of the United Nations and specialized agencies, all of whom may seize the Court at any time. When a case is pending before the Court, it is not possible to anticipate whether and when recourse will be made to incidental proceedings (e.g. requests for provisional measures). Historically, there have been significant variations in the number of new proceedings commenced in a given year, although in recent times there has been an upward trend in the Court's caseload. In order to meet the demands of its workload, the Court now routinely considers three cases simultaneously. The workload represented by each decision of the Court is high. In principle, the parties to cases brought before the Court each submit one set of written pleadings to the Court: a memorial and a counter-memorial. The Court may authorize them to submit a further set of pleadings, namely, a reply and a rejoinder. In practice, these additional pleadings are almost always submitted. The pleadings are tending to become increasingly voluminous, notwithstanding the Court's appeals to the parties not to repeat arguments already exposed. Hearings can also be long and complex, depending on the nature of the case. In cases involving difficult factual issues (e.g. of a highly technical character), parties may call witnesses and experts to testify. Once it has heard the submissions of the parties, the Court does everything in its power to deliver a judgment within as short a time as possible, allowing for the complexity of the case. The entire proceedings must be conducted simultaneously in both of the Court's official languages, English and French, both at the written and oral stages and during deliberations.
- 7.4 In deciding the cases submitted to it, the Court renders decisions that form a coherent body of jurisprudence and which may assist in preventing disputes that may arise between other States. In addition, in giving advisory opinions in response to the requests of duly authorized organs and

specialized agencies of the United Nations, the Court facilitates the proper functioning of the United Nations system and contributes to preventive diplomacy and the development of international law.

- 7.5 Given that the Court is both a judicial body and an international institution that is administratively independent from the Secretariat, its Registry must take on the dual role of providing assistance to the Court in the exercise of its judicial functions and managing the administrative and budgetary matters of an international secretariat. In carrying out this role, the Registry is guided by the Statute, the Rules of the Court and the Instructions for the Registry. Pursuant to Article 21, paragraph 2, of the Statute and articles 22 and 23 of the Rules of Court, respectively, the Registrar and Deputy-Registrar are elected by the Court for a term of seven years each and may be re-elected. In accordance with Article 21, paragraph 2, of the Statute, the staff of the Registry are appointed by the Court. The Court adopts its own staff regulations.

Programme of work

Registry

Objective

- 7.6 The objective, to which the Registry contributes, is to ensure that the needs of the Court are met in an efficient and effective manner for the sound administration of international justice and the fulfilment by the Court of its mandate under the Charter.

Strategy and external factors for 2024

- 7.7 To contribute to the objective, the Registry will:
- (a) Respond to the needs of the Court in carrying out its judicial activities;
 - (b) Ensure the timely provision of substantive, conference, secretariat and documentation services and legal, diplomatic, linguistic and technical support in cases pending before the Court.
- 7.8 The above-mentioned work is expected to result in the needs of the Court being met in an effective and efficient manner in 2024.
- 7.9 With regard to the external factors, the overall plan for 2024 is based on the planning assumption that the Court's judicial activities in 2024 will involve a similar level of work as in 2022 and 2023.
- 7.10 With regard to cooperation with other entities, the Registry of the Court will continue to cooperate closely with United Nations offices and institutions in 2024.

Impact of the pandemic and lessons learned

- 7.11 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular on the Court's ability to conduct its judicial activities in person in The Hague. For instance, in 2022, the Court held three of its six sets of scheduled hearings in a hybrid format, with some members of the Court and members of the parties' respective delegations present in the Great Hall of Justice and others participating by video link. In the first half of 2022, the Court also continued to hold its internal meetings on budgetary, administrative and judicial matters on a hybrid basis. The organization of those hybrid hearings and meetings entailed a greater reliance on videoconferencing technology, the provision of increased technical support to members of the Court and parties to pending cases and the establishment of specific arrangements for virtual simultaneous interpretation and the electronic distribution of documents. Since June 2022, the Court has transitioned from hybrid to in-person working methods for its public hearings and private meetings, as a result of the progressive lifting of restrictions arising from the pandemic.

- 7.12 The Registry continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including by retaining the possibility of holding its hearings and readings of its judgments by video link in certain circumstances, following the amendment of the Rules of Court and the adoption of guidelines for the parties on the organization of hearings by video link. Through the use of upgraded videoconference technology, and drawing on the experience gained in the past three years, the Registry may also, where appropriate, consider conducting some of its informal meetings and outreach activities in a hybrid or virtual format.

Programme performance in 2022

Enhanced technical support to members of the Court and parties to pending cases with respect to the organization of hybrid hearings

- 7.13 During the COVID-19 pandemic, the Court adapted to the need to work remotely in order to continue to perform its judicial functions. Between 2020 and 2022, the Registry was able to improve and refine the support provided to the Court in organizing planned hearings in a hybrid format. In that context, the Registry provided Members of the Court and parties participating in hybrid hearings with enhanced technical support in the area of information and communications technology to ensure the smooth conduct of the proceedings in the Court’s two official languages, which involved participants joining from different locations around the world.
- 7.14 Progress towards the objective is presented in the performance measure below (see table 7.1).

Table 7.1
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Members of the Court and parties to pending cases received enhanced technical support with respect to hybrid hearings in 3 cases	Members of the Court and parties to pending cases received enhanced technical support with respect to hybrid hearings in 5 cases	Members of the Court and parties to pending cases received enhanced technical support with respect to hybrid hearings in 3 cases

Planned results for 2024

Result 1: improved outreach to promote awareness and understanding of the Court’s role as the principal judicial organ of the United Nations

Programme performance in 2022 and target for 2024

- 7.15 The work of the Registry contributed to the website of the Court receiving 5.07 million unique visitors and to the Court having 127,750 followers on Twitter in 2022, which exceeded the planned target of 3.8 million unique visitors and 100,000 followers, respectively.
- 7.16 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 7.I).

Figure 7.I
Performance measure: number of unique visitors to the Court’s website and number of followers on Twitter

Result 2: improved understanding and awareness of the Court’s proceedings among the diplomatic and legal community

Programme performance in 2022 and target for 2024

- 7.17 The Registry’s work contributed to 570 stakeholders in the diplomatic and legal community having improved understanding and awareness of the Court’s proceedings, which exceeded the planned target of 350 stakeholders.
- 7.18 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 7.II).

Figure 7.II
Performance measure: number of stakeholders in the diplomatic and legal community with improved understanding and awareness of the Court’s proceedings (annual)

Result 3: increased dissemination of the Court’s publications

Proposed programme plan for 2024

- 7.19 The Registry of the Court produces a wide range of information material for different audiences, including publications containing the Court’s decisions, documentation relating to each concluded case and the Court’s basic texts and documents; the *Annuaire/Yearbook* describing the work achieved by the Court during each calendar year; bibliographies listing the works and documents referring to the Court that have come to its attention during the previous year; and a handbook providing the general public with a simple and comprehensible overview of the history, composition, jurisdiction,

procedure and decisions of the Court. Some of these publications are available in electronic format on the website of the Court.

Lessons learned and planned change

- 7.20 The lesson for the Registry was that the publications of the Court could be advertised and distributed through a broader variety of formats and dissemination methods, to ensure greater impact and visibility. In applying the lesson, the Registry will further disseminate the Court’s publications through the following activities: (a) adding titles to the existing collections to enhance the Court’s presence in the United Nations iLibrary, as more publications are digitized; (b) developing the “Publications” page on the Court’s website, including by creating interactive tools and posting news items at regular intervals; (c) increasing efforts to advertise new titles through the Court’s social media accounts and to strengthen collaboration with external social media channels within the United Nations system; and (d) furthering the use of existing mailing lists and targeting new groups of potential readers.
- 7.21 Expected progress towards the objective is presented in the performance measure below (see table 7.2).

Table 7.2

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Access by the general public to the bibliography of works referring to the Court	Increased accessibility of Court publications through access by the general public to digital collections in the United Nations iLibrary; access by the general public to a revised consolidated version of the Court’s basic documents	Access by the general public to the anniversary book and the new catalogue of the Court’s publications since 1946	Visually impaired and people with print-reading disabilities have access to the anniversary book; access by the general public to a catalogue of new publications and the entire set of the reprinted decisions of the Permanent Court of International Justice	Access by the general public to an increased digital collection of publications in the United Nations iLibrary and on the redesigned “Publications” page on the Court’s website

Legislative mandates

- 7.22 The International Court of Justice is the principal judicial organ of the United Nations. Its activities are governed by the Charter of the United Nations and by its Statute, which forms an integral part of the Charter. Pursuant to its Statute, the Court’s role is to settle, in accordance with international law, legal disputes submitted to it by States and to give advisory opinions on legal questions referred to it by authorized United Nations organs and specialized agencies.

Deliverables

- 7.23 Table 7.3 lists all deliverables of the Registry.

Table 7.3
Registry: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>

Substantive services for judicial proceedings (number of documents)	1 685	1 790	1 585	1 585
3. Preparation of documents (minutes of private meetings of the Court, case-related letters and distributions prepared, memorandums, speeches, etc.)	1 685	1 790	1 585	1 585
Conference and secretariat services for judicial proceedings (number of three-hour sittings)	149	178	149	165
4. Interpretation at private meetings and public hearings of the Court	149	178	149	165
Substantive services for meetings (number of three-hour meetings)	2	2	2	2
5. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
6. Meetings of the Fifth Committee	1	1	1	1
Documentation services for judicial proceedings (thousands of words)	27 660	35 965	27 800	32 800
7. Translation of documents related to the Court's judicial activities	7 660	8 438	7 800	7 800
8. Processing (editing and proofreading) of documents related to the Court's judicial activities	20 000	27 527	20 000	25 000
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	4	32	6	30
9. Presentations, briefings, workshops and conferences on proceedings of the Court for the diplomatic and legal community	4	32	6	30
Publications of the Court (number of publications)	26	50	25	39
10. Applications/special agreements (including annexes)	Unforeseeable ^a	4	Unforeseeable ^a	Unforeseeable ^a
11. <i>ICJ Reports</i> : bound volumes of judgments, advisory opinions and orders of the Court	2	1	2	2
12. Relevant chapter in <i>Yearbook of the United Nations</i>	1	1	1	1
13. Pleadings series volumes	20 ^b	32 ^c	19 ^c	31 ^c
14. <i>International Court of Justice Annuaire/Yearbook</i>	1	1	1	1
15. Other publications of the Court (non-recurrent, reprints, publications for special occasions (illustrated books, handbooks, etc.))	2	11	2	4
D. Communication deliverables				
Outreach programmes, special events and information materials : lectures and presentations for legal and academic visitors, the diplomatic community, students and journalists.				
External and media relations : press releases and summaries of decisions.				
Digital platforms and multimedia content : website and social media platforms of the Court.				

^a It is inherently impossible to forecast the number of cases that will be pending before the Court and the number of new proceedings that will be instituted, including incidental proceedings in pending cases.

^b The planned figures for 2022 were based on the number of volumes of written pleadings received from States involved in proceedings before the Court. The approach for 2022 actual and 2023 and 2024 planned reflect the number of volumes printed and issued by the Court in the pleadings series.

^c Includes the annexes to the pleadings, which are contained in USB sticks accompanying the hard copy volumes. These annexes are accounted for at a rate of 1,000 pages per volume.

B. Proposed post and non-post resource requirements for 2024

Overview

7.24 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 7.4 to 7.6.

Table 7.4

7.25 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 7.7 to 7.9 and figure 7.III.

7.26 As reflected in tables 7.7 and 7.8, the overall resources proposed for 2024 amount to \$29,783,100 before recosting, reflecting a net increase of \$672,200 (or 2.3 per cent) compared with the appropriation for 2023. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Overall resource changes

Technical adjustments

7.27 As reflected in table 7.7, resource changes reflect a net decrease of \$101,200, as follows:

- (a) **Registry.** The net decrease of \$43,500 relates to:
 - (i) An increase of \$77,300 under other staff costs, reflecting the provision, at continuing vacancy rates, for the Information Systems Officer (P-3) position that was established in 2023, under general temporary assistance, and subject to a 50 per cent vacancy rate in accordance with the established practice for newly established positions;
 - (ii) A decrease of \$120,800 under other staff costs relating to the removal of non-recurrent resources approved for the advisory opinion on Israeli practices affecting the human rights of the Palestinian people in the Occupied Palestinian Territory, including East Jerusalem, pursuant to General Assembly resolution [77/247](#);
- (b) **Programme support.** The decrease of \$57,700 relates to the removal of non-recurrent resources approved for the advisory opinion in the case concerning the legal consequences arising from the policies and practices of Israel in the Occupied Palestinian Territory, including East Jerusalem, pursuant to General Assembly resolution [77/247](#).

New and expanded mandates

7.28 As reflected in table 7.7, resource changes reflect an increase of \$236,000 to support the request that the Court render an advisory opinion on the obligations of States in respect of climate change, pursuant to General Assembly resolution [77/276](#). The resources would be distributed as follows:

- (a) **Registry.** An increase of \$143,700, under other staff costs, to provide for interpretation and documentation services under other staff costs;
- (b) **Programme support.** An increase of \$92,300, which reflects additional expected costs under:
 - (i) Contractual services (\$59,000);
 - (ii) General operating expenses (\$24,300);
 - (iii) Supplies and materials (\$9,000).

Other changes

7.29 As reflected in table 7.7, resource changes reflect a net increase of \$537,400, as follows:

- (a) **Members of the Court.** The net increase of \$395,200, under non-staff compensation, reflects mainly the estimated repatriation costs for five judges whose terms of office will come to an end in February 2024 and an increase in the number of children of judges entitled to an education grant, partly offset by a decrease under travel of non-resident judges to Court sessions and of resident judges and their dependants to their home countries;
- (b) **Registry.** The increase of \$213,700 reflects:
 - (i) An increase of \$174,600 for the proposed establishment of three new posts: a Reviser (French) (P-4) and a Language Service Assistant (GS (OL)) in the Department of Linguistic Matters and an Editorial Assistant (English) (GS (OL)) in the Publishing Division (see annex III);
 - (ii) An increase of \$39,100 under other staff costs for temporary assistance for meetings, to address the increase in the number of meetings and public sittings of the Court requiring interpretation services;

- (c) **Programme support.** The net decrease of \$71,500 relates to:
- (i) A decrease of \$103,000, under contractual services, due to the planned discontinuation of the use of the existing cloud content services platform and the decrease in costs relating to the Enterprise SharePoint 2016 services provided by the United Nations International Computing Centre, all of which was made possible by leveraging the use of Microsoft cloud services with the added in-house expertise of the Information Systems Officer (P-3) position approved under general temporary assistance for 2023;
 - (ii) An increase in external printing costs (\$31,500), attributable to the need to print, publish and distribute publications containing case-related documentation, which has increased with the Court's growing workload.

Members of the Court

7.30 The International Court of Justice is composed of 15 judges ("members of the Court"), who are elected to nine-year terms of office by the General Assembly and the Security Council. Every three years, one third of the Court is elected, the sitting judges being eligible for re-election. The Court, as the principal judicial organ of the United Nations, is a universal body, within which the principal legal systems of the world and the main forms of civilization have to be represented in a balanced way (Article 9 of the Statute). It is as an institution composed in this broad-based way that the Court settles legal disputes submitted to it by States and gives advisory opinions on legal questions referred to it by authorized United Nations organs and specialized agencies. All the members of the Court are, in principle, required to participate in every case before it (Article 25 of the Statute). In accordance with Article 31 of the Court's Statute, a State party to a case may choose a judge ad hoc if the Court includes upon the Bench no judge of the nationality of the parties or a judge of the nationality of another party. Judges ad hoc take part in the decisions of the Court on terms of complete equality with the members of the Court.

7.31 The proposed regular budget resources for 2024 amount to \$8,299,400 and reflect an increase of \$395,200 compared with the appropriation for 2023. The proposed increase is explained in paragraph 7.29 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 7.10 and figure 7.IV.

Registry

7.32 Given that the Court is both a judicial body and an international institution that is administratively independent from the Secretariat, its Registry must take on the dual role of an *auxiliaire de la justice* and an international secretariat. The Registry provides legal, diplomatic, linguistic and technical support to the Court. It is responsible for administrative, conference, archival, distribution and documentary and library services, including digitization and digitalization, and acts as the regular channel for communications to and from the Court.

7.33 Information on the timely submission of documentation and advance booking for air travel is reflected in table 7.11. The impact of COVID-19 and related restrictions on travel in 2022 limited the ability to comply with the advance booking for air travel.

7.34 The proposed regular budget resources for 2024 amount to \$17,082,200 and reflect a net increase of \$313,900 compared with the appropriation for 2023. The proposed net increase is explained in paragraphs 7.27 (a), 7.28 (a) and 7.29 (b). Additional details are reflected in table 7.12 and figure 7.V.

Programme support

- 7.35 The provisions under programme support relate to the common service requirements of the Court and its Registry, including the contribution of the United Nations to the Carnegie Foundation for the use of the Peace Palace at The Hague.
- 7.36 The proposed regular budget resources for 2024 amount to \$4,401,500 and reflect a net decrease of \$36,900 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 7.27 (b), 7.28 (b) and 7.29 (c). Additional details are reflected in table 7.13 and figure 7.VI.

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions (A/77/7)

The Advisory Committee reiterates its expectation that every effort will be made to ensure the smooth implementation of Umoja in a timely manner with the full realization of the system's benefits and trusts that updated information, including a clear timeline for the deployment of Umoja, will be provided to the General Assembly at the time of its consideration of the present report (see also [A/76/7](#) and [A/76/7/Corr.1](#), para. III.10, [A/75/7](#) and [A/75/7/Corr.1](#), para. III.13, and [A/74/7](#), para. III.10) (para. III.11).

On 1 January 2023, Umoja was successfully implemented at the International Court of Justice, with the support of the Enterprise Resource Planning Solution Division

Annex III

Summary of proposed post changes, by component

<i>Component</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reasons for change</i>
Registry	1	P-4	Establishment of 1 Reviser (French) (Department of Linguistic Matters)	<p>The sustained increase in the workload of the International Court of Justice over the past few years has resulted in a sharp rise in the number of documents translated and revised by the Department of Linguistic Matters, from a total of 7,457,363 words in 2015, to 9,351,000 in 2020, to well over 10,000,000 words each year in 2021 and 2022. These include documents related to the Court's judicial activities, which increased from 5,962,245 words in 2015 to 7,282,000 in 2020, to over 8,000,000 words each year in 2021 and 2022.</p> <p>Current capacities, which include the use of temporary assistance from external translators and revisers and a language service assistant, and the implementation of a computer-assisted translation tool, remain insufficient to meet the needs of the Court and maintain the standards expected of the principal judicial organ of the United Nations. The new reviser will, in particular, assist in the revision of written pleadings (of which there is a growing backlog) and decisions of the Court, thus enabling the Court to deal as efficiently and effectively as possible with its heavy workload and to respond in a timely manner to the requests submitted to it by Member States and organs of the United Nations.</p>
Registry	1	GS (OL)	Establishment of 1 Language Service Assistant (Department of Linguistic Matters)	<p>Since 2018, the Department of Linguistic Matters has benefited from the services of a part-time temporary language service assistant, funded under temporary assistance for meetings, to perform a number of administrative and support tasks, which include maintaining and updating the Department's terminology database and search engine; aligning original and translated texts; monitoring incoming work and assigning tasks within the Department; preparing annotated lists of annexes; collating statistics; liaising with external translators, revisers and interpreters; and providing reference material and technical support.</p> <p>The current arrangement is not sustainable, as the function is required on a longer-term basis. The proposed establishment of a post of Language Service Assistant would provide that support role. In addition, the incumbent would provide essential support services to the linguists and relieve them of general service and administrative tasks that would otherwise fall to them, enabling them to focus on their core tasks of translating, revising and editing.</p>
Registry	1	GS (OL)	Establishment of 1 Editorial Assistant (English) (Publishing Division)	<p>In recent years, the volume of case-related documents processed (edited and proofread) by the Document Production Unit of the Publishing Division has grown from 11,590,000 words in 2016 (28,976 pages) to 27,527,000 of words in 2022 (68,819 pages). As a result of that increase, the Division lacks the human resources necessary to continue to support the Court's core business and concurrently perform additional tasks with a view to overcoming the existing backlog in some of the publication series and preventing future backlogs.</p> <p>Although past peak periods could generally be dealt with by obtaining assistance under temporary contracts, the need to recruit a new editorial assistant has become more frequent, requiring a permanent solution.</p> <p>The functions involved include coordinating, monitoring and correcting the pre-press work done by the Unit's English pre-printing team. This would include preparing the verbatim records produced in connection with the Court's hearings, namely, initial proofreading of texts submitted by counsel before delivery and final proofreading of the English sections following the compilation of the original version of the record.</p>

I. Office of Legal Affairs

Foreword

Over the course of 2024, the Office of Legal Affairs will continue to serve as the unified central legal service for the Organization, with the specialized legal skill set, credibility and neutrality needed to face the challenges to the international legal environment.

The Office of Legal Affairs has responded to the increasing demand for legal services and will continue to advise the Secretary-General, Secretariat departments and offices, and United Nations organs on questions relating to the interpretation and application of the Charter of the United Nations, legal agreements and rules and regulations. It will continue to perform substantive and secretariat functions for organs involved in public international law, including the General Assembly and its Sixth Committee, the International Law Commission and the United Nations Commission on International Trade Law, as well as meetings concerning oceans and the law of the sea. The Office will also continue to represent the Secretary-General in legal conferences and judicial proceedings and perform the depositary functions of the Secretary-General for multilateral treaties and the functions of registration and publication of treaties.

Leveraging its 77 years of experience, the Office of Legal Affairs will continue to improve its support for Member States in the implementation of the 2030 Agenda for Sustainable Development, including through capacity-building programmes and projects in support of ocean affairs and the law of the sea, treaty law, international trade law, and activities carried out under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law for professionals from developing countries and countries with emerging economies.

(Signed) Miguel de Serpa Soares
Under-Secretary-General for Legal Affairs and United Nations Legal Counsel

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 8.1 The Office of Legal Affairs is responsible for providing a unified central legal service for the Organization; represents the Secretary-General in legal conferences and in judicial proceedings; performs substantive and secretariat functions for organs involved in public international law, including the General Assembly and its Sixth Committee (Legal Committee), the International Law Commission and the United Nations Commission on International Trade Law (UNCITRAL), as well as for the General Assembly plenary meetings concerning oceans and the law of the sea; and performs the depositary functions of the Secretary-General for multilateral treaties and the functions of registration and publication of treaties. The structure and main functions of the Office are described in Secretary-General's bulletin [ST/SGB/2021/1](#).
- 8.2 The mandate derives from Articles 13, 102, 104, 105 and other relevant provisions of the Charter of the United Nations, as well as the priorities established in relevant General Assembly resolutions, including resolution [13 \(I\)](#) of 13 February 1946, as the central legal service for the Organization (including funds and programmes and treaty bodies institutionally linked to the Organization). The Office of Legal Affairs discharges mandates from the priorities established in relevant Assembly resolutions and decisions, including resolution [2205 \(XXI\)](#), by which the Assembly established UNCITRAL to further the progressive harmonization and unification of the law of international trade, with the Office's International Trade Law Division acting as its secretariat; the Office's Division for Ocean Affairs and the Law of the Sea acting as the secretariat of the Meeting of the States Parties to the United Nations Convention on the Law of the Sea; and resolution [68/70](#), on oceans and the law of the sea, by which the Assembly established the Office as focal point of UN-Oceans. The Secretary-General of the United Nations has also appointed the Under-Secretary-General for Legal Affairs and United Nations Legal Counsel as Secretary-General of the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction and, pursuant to resolution [73/292](#), as Special Adviser on oceans and legal matters to the Presidents of the United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development.

Strategy and external factors for 2024

- 8.3 The Office of Legal Affairs will continue to support international law as the foundation for Member States to interact and cooperate in achieving their common goals. The Office will continue to respond to the needs of its stakeholders and beneficiaries with a specialized legal skill set, institutional memory, credibility and neutrality, while delivering on a diverse and complex mandate.
- 8.4 The Office of Legal Affairs will continue to respond to the increasing demand for legal services from the Secretariat and other United Nations organs, including through the provision of advice on questions relating to the interpretation and application of international law instruments and on general questions of public international law, to ensure that legal considerations are an integral part of the Organization's operations and the effective functioning of its principal and subsidiary organs. The Office will continue to respond in an agile manner to new types of requests concerning legal and procedural issues to ensure the business continuity of various United Nations intergovernmental bodies.

- 8.5 The Office of Legal Affairs will continue to support Member States in the implementation of the 2030 Agenda for Sustainable Development and be a key partner in the United Nations system efforts to advance the decade of action and delivery for sustainable development. The Office will continue to provide inputs and to support processes related to the Sustainable Development Goals in which it has a specific mandate, such as Goals 8, 14 and 16. It will continue to engage with stakeholders within and outside the United Nations system on ocean-related initiatives, to enhance the coordination and consistency with current processes and mandates, including those related to the protection and governance of the global commons. Similarly, it will support the processes and initiatives that are discussed with Member States related to the implementation of international law and governance.
- 8.6 The Office of Legal Affairs will contribute to international justice and accountability and continue its role in the Organization's action to improve the response to allegations of sexual exploitation and abuse and in efforts to hold accountable personnel who have engaged in such behaviour. Furthermore, the Office will contribute to the efforts to combat sexual exploitation and abuse, whether committed by United Nations personnel or by non-United Nations security forces operating under a United Nations mandate.
- 8.7 The Office of Legal Affairs will also support initiatives of the Secretary-General envisioned to increase the Organization's capacity to deliver. To advance the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, the Office will support the finalization and promulgation of the data protection and privacy policy for the United Nations Secretariat, and provide guidance on the legal aspects related to the implementation of the policy. The Office will also support the legal aspects related to the implementation of the Secretary-General's strategic action plan on addressing racism and promoting dignity for all in the United Nations Secretariat.
- 8.8 On the general legal services provided to United Nations organs and programmes, the Office of Legal Affairs will continue to maximize the protection of the legal interests of the Organization and minimize its legal liabilities. The Office will continue to advise on the legal aspects arising from United Nations institutional and operational activities and provide legal services for resolving disputes of a private law character involving the operations of the Organization, its subsidiary bodies and organs, and its separately administered funds and programmes.
- 8.9 The Office of Legal Affairs will also continue to support the progressive development and codification of international law and the conclusion of legal instruments resulting in the promotion of universal respect for international law, including by continuing to serve as the secretariat of the Sixth Committee and by supporting the International Law Commission, the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization, other special or ad hoc committees and diplomatic conferences in their consideration and formulation of legal instruments. The Office will disseminate materials on international law through the United Nations Audiovisual Library of International Law and major legal publications.
- 8.10 In support of the implementation and promotion of the ocean-related Sustainable Development Goals, the Office of Legal Affairs will engage in processes related to oceans and the law of the sea and the increased participation of States in, and effective implementation and application of, the United Nations Convention on the Law of the Sea and its implementing agreements, including by providing secretariat functions to oceans-related processes of the General Assembly and the Commission on the Limits of the Continental Shelf. The Office will also continue to deliver capacity-building activities on that topic, including for developing countries.
- 8.11 To further the progressive harmonization, modernization and unification of the law of international trade, the Office will continue to ensure the widespread adoption and use of harmonized and modernized substantive private law rules to govern international commercial transactions, strengthen technical cooperation and promote the participation of developing countries in the law-making activities of UNCITRAL. The Office will support Member States in the preparation of universally acceptable legislative and non-legislative texts.

- 8.12 The Office of Legal Affairs will intensify the use of technological tools and other means to enhance the custody, registration and publication of treaties, including the registration of treaties and treaty actions in line with Article 102 of the Charter, and fulfil the depositary functions of the Secretary-General. The Office will continue to provide legal assistance and advice to States, specialized agencies, United Nations programmes and offices, treaty bodies and other entities on the law of treaties. The Office will also continue to promote and ensure wider knowledge of the law of treaties, including through capacity-building activities and workshops, thereby preventing issues of interpretation and implementation of treaty provisions by contracting States.
- 8.13 With regard to cooperation with other entities at the global, regional national and local levels, the Office of Legal Affairs will continue to enable the International Law Commission to exchange knowledge, experience and ideas with the President of the International Court of Justice, the African Union Commission on International Law, the Inter-American Juridical Committee, the Asian-African Legal Consultative Organization and the Committee of Legal Advisers on Public International Law of the Council of Europe. The Office will also continue to cooperate with States and bodies established under the United Nations Convention on the Law of the Sea. In the fields of the law of the sea and ocean governance and of international trade law, the Office will continue to cooperate with international financial institutions, donor agencies, intergovernmental organizations, non-governmental organizations (NGOs) and natural and juridical persons.
- 8.14 With regard to inter-agency coordination and liaison, the Office of Legal Affairs has been appointed by the General Assembly in its resolution 68/70 as focal point of UN-Oceans, the inter-agency coordination mechanism on oceans and coastal issues within the United Nations system. UN-Oceans currently has 29 members, including competent international organizations, specialized agencies, United Nations programmes, regional commissions, the secretariats of conventions and the International Seabed Authority. In addition, in implementing General Assembly resolution 2205 (XXI) on the establishment of UNCITRAL, the Office coordinates the work of organizations dealing with international trade law and encourages cooperation among them. The Office will exchange knowledge with the networks of legal advisers of United Nations agencies and funds and programmes.
- 8.15 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Extrabudgetary resources are available to complement the programme budget, allowing the Office of Legal Affairs to respond to the increased demand for its services;
 - (b) Principal and subsidiary organs of the United Nations continue to request legal advice as a main component of the decision-making process;
 - (c) Specific mandates related to international trade law, oceans and law of the sea and others are renewed or confirmed by the competent intergovernmental bodies.
- 8.16 The Office of Legal Affairs integrates a gender perspective in its operational activities, deliverables and results, as appropriate, including through permanent interaction with the gender focal points in each division. The Office's gender focal point will continue to provide guidance on gender equality and mainstreaming a gender perspective to inform the Office's programmatic and substantive operations. The Office will also continue to promote gender equality and the empowerment of women throughout all of its subprogrammes, notably by continuing to use gender-inclusive language, in the context of the Office's capacity-building programmes and other related aspects.
- 8.17 In line with the United Nations Disability Inclusion Strategy, the Office of Legal Affairs will integrate disability inclusion in its operational activities, deliverables and results, as appropriate. Through the work of its subprogrammes, the Office will continue to implement the directives of the United Nations Disability Inclusion Strategy.

Impact of the pandemic and lessons learned

- 8.18 The continuation of the coronavirus disease (COVID-19) pandemic into 2022 had an impact on the implementation of mandates, in particular under subprogramme 3, as the United Nations Regional Course in International Law for Africa and the United Nations Regional Course in International Law for Latin American and the Caribbean, which were scheduled for the first half of 2022, could not be held as planned. Two interactive online workshops were held for selected applicants in order to continue to provide training opportunities in international law to government officials and legal academics in developing countries and countries with emerging economies. The International Law Fellowship Programme and the United Nations Regional Course in International Law for Asia-Pacific were held fully in person in The Hague and Bangkok, respectively, for the first time since the start of the pandemic. It is expected that in 2023, all the training programmes under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law will be held in person at their usual venues, with the benefits that in-person training entails. Under subprogramme 4, online training activities related to ocean issues of a cross-cutting nature were held, including for developing States, in particular the least developed countries, landlocked developing countries and small island developing States, as well as coastal African States, in the field of ocean affairs and the law of the sea, through training, fellowships and technical assistance.
- 8.19 In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, subprogramme 2 continued its response, with the use of information technology tools at its disposal and with adapted internal working structures, to meet the operational demands of the pandemic, including to support the Organization's system-wide medical evacuation (MEDEVAC) and to provide legal support to the implementation of the United Nations system-wide COVID-19 vaccination programme.
- 8.20 The Office of Legal Affairs continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including the importance of effectively using online modes of working in the provision of legal advice and support (under subprogrammes 1 and 2) and in the conducting of technical cooperation activities to reach a larger number of participants (subprogramme 5). The Office will continue to explore and develop additional virtual means of delivery, while recognizing that in-person activities offer a more effective and impactful mode of delivery for capacity-building.

Legislative mandates

- 8.21 The list below provides all mandates entrusted to the programme.

Charter of the United Nations

Article 13	Article 104
Article 98	Article 105
Article 102	

General Assembly resolutions

13 (I)	Organization of the Secretariat	62/70; 63/128;	The rule of law at the national and
22 (I)	Privileges and immunities of the United Nations	70/118; 75/141; 77/110	international levels
2099 (XX); 36/108; 56/77; 58/73; 60/19; 62/62; 68/110; 75/134; 76/110; 77/102	United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law	63/253; 77/260 77/103	Administration of justice at the United Nations Report of the International Law Commission on the work of its seventy-third session
62/63; 77/98	Criminal accountability of United Nations officials and experts on mission	77/114	Report of the Committee on Relations with the Host Country

Subprogramme 1
Provision of legal services to the United Nations system as a whole

General Assembly resolutions

2819 (XXVI)	Security of missions accredited to the United Nations and safety of their personnel and establishment of the Committee on Relations with the Host Country	75/257 B	Extraordinary Chambers in the Courts of Cambodia – residual functions
-------------	---	----------	---

Subprogramme 3
Progressive development and codification of international law

General Assembly resolutions

174 (II)	Establishment of an International Law Commission	77/106	Consideration of prevention of transboundary harm from hazardous activities and allocation of loss in the case of such harm
487 (V)	Ways and means for making the evidence of customary international law more readily available	77/107	Status of the Protocols Additional to the Geneva Convention of 1949 and relating to the protection of victims of armed conflicts
987 (X)	Publication of the documents of the International Law Commission	77/108	Consideration of effective measures to enhance the protection, security and safety of diplomatic and consular missions and representatives
3006 (XXVII)	<i>United Nations Juridical Yearbook</i>	77/109	Report of the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization
3499 (XXX)	Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization	77/111	The scope and application of the principle of universal jurisdiction
75/137	Expulsion of aliens	77/112	The law of transboundary aquifers
75/143	Responsibility of international organizations	77/113	Measures to eliminate international terrorism
76/119	Protection of persons in the event of disasters	77/249	Crimes against humanity
77/97	Responsibility of States for internationally wrongful acts		
77/105	Diplomatic protection		

Subprogramme 4
Law of the sea and ocean affairs

United Nations Convention on the Law of the Sea

Articles 16 (2), 47 (9), 63 (2), 64, 75 (2), 76 (9), 84 (2), 116–119, 287 (8), 298 (6), 312, 313 (1) and 319 (1) and (2)	Annex VI: articles 4 (2) and (4) and 5 (3)
Annex II: articles 2 (2), (3) and (5) and 6 (3)	Annex VII: article 2 (1)
Annex V: articles 2 and 3 (e)	Annex VIII: article 3 (e)

Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks

Articles 26 and 36

General Assembly resolutions

37/66	Third United Nations Conference on the Law of the Sea	58/14; 71/123; 73/125; 74/18; 75/89; 76/71; 77/118	Sustainable fisheries, including through the 1995 Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments
49/28	Law of the Sea		
52/26; 55/7; 60/30; 63/111; 64/71; 65/37 A and B; 67/78; 68/70; 69/245; 73/124; 74/19; 75/239; 76/72; 77/248	Oceans and the law of the sea	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
52/251	Agreement on Cooperation and Relationship between the United Nations and the International Tribunal for the Law of the Sea	71/312 72/249	Our ocean, our future: call for action International legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction
54/33	Results of the review by the Commission on Sustainable Development of the sectoral theme of "Oceans and seas": international coordination and cooperation	77/242	2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development
56/13;	Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks		

Subprogramme 5
Progressive harmonization, modernization and unification of the law of international trade

General Assembly resolutions

2205 (XXI)	Establishment of the United Nations Commission on International Trade Law	77/99	Report of the United Nations Commission on International Trade Law on the work of its fifty-fifth session
------------	---	-------	---

Subprogramme 6
Custody, registration and publication of treaties

General Assembly resolutions

23 (I)	Registration of treaties and international agreements	364 (IV); 482 (V)	Registration and publication of treaties and international agreements
24 (I)	Transfer of certain functions, activities and assets of the League of Nations	33/141	Registration and publication of treaties and international agreements pursuant to Article 102 of the Charter of the United Nations
97 (I)	Registration and publication of treaties and international agreements: regulations to give effect to Article 102 of the Charter of the United Nations	51/158 52/153; 54/28 73/210; 75/144; 76/120	Electronic treaty database United Nations Decade of International Law Strengthening and promoting the international treaty framework

Deliverables

8.22 Table 8.1 lists all cross-cutting deliverables of the programme.

Table 8.1
Cross-cutting deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	10	39	6	10
1. Report and notes to the General Assembly	6	7	3	6
2. Report of the Committee on Relations with the Host Country	1	1	1	1
3. Letters to the Security Council	3	5	2	3
4. Documents for the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction	–	26	–	–
Substantive services for meetings (number of three-hour meetings)	8	7	8	8
Meetings of the:				
5. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
6. Committee for Programme and Coordination	1	1	1	1
7. Fifth Committee	1	1	1	1
8. Committee on Relations with the Host Country	5	4	5	5
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	4	4	4	5
9. Workshops on international law	4	4	4	5
C. Substantive deliverables				
Consultation, advice and advocacy: advice and legal opinions in the context of the participation of the Legal Counsel in the Senior Management Group, the Executive Committee and other ad hoc groups.				
D. Communication deliverables				
Outreach programmes, special events and information materials: speeches and presentations to Member State representatives, international organizations and academic and civil society organizations regarding the work of the Office of Legal Affairs and issues of public international law, the law of the sea and international trade law; annual treaty event during the opening plenary meeting of the General Assembly session; and events on international law, including those provided at the request of and in coordination with Member States.				
E. Enabling deliverables				
Internal justice and oversight: representation of the Secretary-General before the United Nations Appeals Tribunal and advice on administrative law of the Organization.				
Legal services: legal advice, opinions and services to all principal and subsidiary organs of the United Nations, as detailed in all the subprogrammes, on privileges and immunities, public international law, international humanitarian law, international human rights law and the amicable settlement of disputes; administrative law of the Organization; claims arising from operational activities of the Organization; procurement activities; the Organization’s accountability measures and the areas of oceans and law of the sea, treaty law and international trade law; and legal support for initiatives on data strategy and anti-racism.				

Evaluation activities

- 8.23 The Office of Internal Oversight Services (OIOS) triennial review of the implementation of recommendations on the programme evaluation of the Office of Legal Affairs ([E/AC.51/2022/8](#)), completed in 2022, has guided the proposed programme plan for 2024.
- 8.24 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. For example, in response to the OIOS triennial review, the Office of Legal Affairs developed a technical cooperation strategy and established formal

mechanisms for information-sharing across functional areas, and has been working to improve monitoring and evaluation practices, including through the operationalization of a dedicated evaluation, monitoring and strategic planning function and the establishment of an evaluation working group. In addition, the Office will enhance strategic management and coordination of all capacity-building activities, including those undertaken under the Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law (subprogramme 3). This enhancement will strengthen the capacity of the Office to concentrate the planning, implementation, monitoring and evaluation of those activities. It will facilitate a more strategic and integrated management of capacity-building efforts, as well as the leveraging of partnerships and the replication of good practices regarding legal technical assistance across organizational units, to better assist relevant stakeholders and respond to requests by Member States. Furthermore, the dedicated evaluation, monitoring and strategic planning function will continue to support the subprogrammes to better monitor and track the outcomes of capacity-building efforts, and the evaluation working group will serve as the principal forum for the exchange of best practices, lessons learned and standards on monitoring and evaluation.

- 8.25 An evaluation, to be conducted by the Office of Legal Affairs, of the provision of capacity-building and other assistance under subprogramme 4 to developing States, in particular the least developed countries, landlocked developing countries and small island developing States, as well as coastal African States, in the field of ocean affairs and the law of the sea, is planned for 2024.

Programme of work

Subprogramme 1

Provision of legal services to the United Nations system as a whole

Objective

- 8.26 The objective, to which this subprogramme contributes, is to ensure respect for, and adherence to, public international law, and the development of international justice and accountability.

Strategy

- 8.27 To contribute to the objective, the subprogramme will:
- (a) Provide legal advice on questions relating to the interpretation and application of the Charter, legal agreements and United Nations resolutions, rules and regulations, as well as on general questions of public international law, including international human rights law, international humanitarian law and international criminal law;
 - (b) Advise the United Nations and United Nations-assisted criminal tribunals and their oversight bodies, and other international accountability mechanisms, including on their founding arrangements, statutes, terms of reference and rules of procedure, and on the functions of the Secretary-General thereunder.
- 8.28 The above-mentioned work is expected to result in:
- (a) A uniform and consistent practice of the law and, subsequently, in the effective functioning of the principal and subsidiary organs of the United Nations in accordance with international law;
 - (b) The protection of the privileges and immunities of the United Nations;
 - (c) The effective functioning of the United Nations and entities entrusted with mandates in the areas of international law;

- (d) The appointment and reappointment of the principals of the United Nations and United Nations-assisted international criminal tribunals and other international accountability mechanisms.

Programme performance in 2022

Completion plan for the finalization of work of the Special Tribunal for Lebanon concluded

- 8.29 The Special Tribunal for Lebanon was established in 2007 following the adoption of Security Council resolution [1757 \(2007\)](#) to try those persons responsible for the attack in Beirut of 14 February 2005 that killed 22 people, including the former Prime Minister of Lebanon, Rafiq Hariri, and injured 226 others, and to bring justice to victims. Following a complex investigation and a trial in absentia, the Special Tribunal acquitted one defendant and convicted three for their roles in the attack, sentencing them to five concurrent sentences of life imprisonment.
- 8.30 In June 2022, the subprogramme and the Government of Lebanon agreed on a completion plan for the finalization of work of the Special Tribunal. As outlined in the completion plan, the Special Tribunal entered its residual phase as of 1 July 2022 and is expected to complete its work and close by the end of 2023. To that end, the subprogramme implemented the necessary actions to renew the mandate of the Special Tribunal from 1 March to 31 December 2023. The Special Tribunal will be the first United Nations-assisted tribunal to fully close.
- 8.31 Progress towards the objective is presented in the performance measure below (see table 8.2).

Table 8.2
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	Renewal of the mandate of the Special Tribunal for Lebanon from 1 March 2021 to 28 February 2023 (S/2021/149 and S/2021/150)	Agreement of completion plan between the Government of Lebanon and the United Nations Renewal of the mandate of the Special Tribunal from 1 March to 31 December 2023 for the limited purpose of completion of the non-judicial residual functions of the Tribunal and for its orderly closure (S/2022/972 and S/2022/973)

Planned results for 2024

Result 1: conclusion of a framework for the completion of the work of the Extraordinary Chambers in the Courts of Cambodia, including with regard to the drawdown of activities and the residual functions requiring performance

Programme performance in 2022 and target for 2024

- 8.32 The subprogramme’s work contributed to the implementation of the Addendum on Transitional Arrangements and the Completion of Work of the Extraordinary Chambers, including through the issuance of new terms and conditions of service for the international judges and co-prosecutor during the residual phase of the Extraordinary Chambers and the negotiation of an agreement with the Government of Cambodia for new premises for the Extraordinary Chambers in its residual phase, which met the planned target.

- 8.33 The planned target of the conclusion of supplementary arrangements was not met, as negotiations are ongoing and expected to be completed in 2023.
- 8.34 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.3).

Table 8.3
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
<p>Identification by the Government of Cambodia and the United Nations of possible residual functions and necessary transitional arrangements for the Extraordinary Chambers</p> <p>Adoption of General Assembly resolution 75/257 A of 31 December 2020, in which the Assembly requested the Secretary-General to continue consultations with the Government of Cambodia in order to finalize, for consideration by the Assembly, a proposed framework for the completion of the work of the Extraordinary Chambers</p>	<p>Conclusion of the framework for the completion of the work of the Extraordinary Chambers and on residual functions</p> <p>Adoption of General Assembly resolution 75/257 B, in which the Assembly approved the draft Addendum on Transitional Arrangements and the Completion of Work of the Extraordinary Chambers</p>	<p>Implementation of the Addendum, including the issuance of new terms and conditions of service for the international judges and co-prosecutor during the residual phase of the Extraordinary Chambers, the negotiation of an agreement with the Government of Cambodia for new premises for the Extraordinary Chambers in its residual phase, and commencement of negotiations regarding supplementary arrangements</p>	<p>Implementation by the Extraordinary Chambers of the Addendum and the supplementary arrangements</p>	<p>Implementation of the Addendum, including action related to the long-term preservation of the archives of the Extraordinary Chambers</p>

Result 2: a data protection and privacy framework for the Secretariat

Programme performance in 2022 and target for 2024

- 8.35 The subprogramme’s work contributed to a revised Secretary-General’s bulletin on the data protection and privacy policy of the United Nations Secretariat to adhere to principles of international law, based on broad and comprehensive consultations across the Secretariat prior to the bulletin’s promulgation, which met the planned target.
- 8.36 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.4).

Table 8.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Adoption of the Data Strategy of the Secretary-General for Action by Everyone, Everywhere United Nations Secretariat entities have increased knowledge on international law issues relating to the development of policies for the Secretary-General's bulletin on the data protection and privacy policy	United Nations Secretariat entities provide inputs in accordance with international law principles towards completion of the draft Secretary-General's bulletin on the data protection and privacy policy of the United Nations Secretariat	Revised Secretary-General's bulletin on the data protection and privacy policy of the United Nations Secretariat adhering to principles of international law based on consultations prior to the bulletin's promulgation	The Secretary-General's bulletin on the data protection and privacy policy of the United Nations Secretariat is promulgated and assistance is provided to United Nations Secretariat entities for implementing actions to be taken, including for the benefit of vulnerable or marginalized individuals and groups	United Nations Secretariat entities implement actions on data-protection-related matters in line with the Secretary-General's bulletin

Result 3: Legal and procedural framework for United Nations conferences, including the fourth International Conference on Small Island Developing States

Proposed programme plan for 2024

8.37 The subprogramme is responsible for ensuring that the necessary legal framework is adopted prior to the holding of international United Nations conferences and also assists with preparatory processes and with legal and procedural matters arising during the conferences. The General Assembly, in its resolution [76/203](#), called for the convening, in 2024, of a fourth International Conference on Small Island Developing States, and, in its resolution [77/245](#), welcomed the offer by the Government of Antigua and Barbuda to host the Conference.

Lessons learned and planned change

8.38 The lesson for the subprogramme was to include in the various workstreams possible alternatives to ensure responsiveness to stakeholders in the event of unexpected situations, including unforeseen crises. In applying the lesson, the subprogramme will engage, as appropriate, with relevant stakeholders and adapt templates and tools so that they could be quickly tailored to suit the various situations presented. These efforts will help to ensure that all are able to participate fully; that there is an appropriate framework to ensure security for the Conference; and that any financial liabilities with respect to the Conference are minimized.

8.39 Expected progress towards the objective is presented in the performance measure below (see table 8.5).

Table 8.5
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Call by the General Assembly for the convening of the fourth International Conference on Small Island Developing States	Decision by the General Assembly to convene the fourth International Conference on Small Island Developing States	Signature of the host country agreement allowing for full participation by all participants in the Conference in Antigua and Barbuda, following regional and interregional preparatory meetings and the adoption by the General Assembly at its seventy-eighth session of the resolution on modalities for the Conference	Fourth International Conference on Small Island Developing States is held

Deliverables

8.40 Table 8.6 lists all deliverables of the subprogramme.

Table 8.6
Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

17. Training events on peacekeeping matters	–	2	2	2
18. Annual meeting of the legal advisers and legal liaison officers of the United Nations offices, funds and programmes, specialized agencies and related and other organizations and field legal advisers and officers	7	7	7	8
C. Substantive deliverables				
Consultation, advice and advocacy: legal advice to and consultation with the General Assembly, the Security Council and the Main Committees of the Assembly on constitutional, institutional and procedural questions.				
D. Communication deliverables				
Outreach programmes, special events and information materials: speeches and presentations to Member State representatives, international organizations and academic and civil society organizations regarding the work of the Office of the Legal Counsel and issues of public international law; and events to promote public international law.				
E. Enabling deliverables				
Legal services: legal advice to and support for the Secretariat and the funds and programmes on privileges and immunities, in particular in support of host country agreements entered into by the United Nations, and public international law, including international humanitarian law, international human rights law and the pacific settlement of disputes; legal advice to and support for 1 United Nations criminal tribunal and its oversight body and other international accountability mechanism; legal advice to and support for approximately 12 peacekeeping and 38 special political missions; liaison with the International Court of Justice and fulfilment of the responsibilities of the Secretary-General under the Statute of the Court; legal advice to and support for 4 Secretariat offices and 4 other entities and bodies on disarmament, sanctions and security; legal advice to 18 United Nations entities on the interpretation and implementation of the Relationship Agreement between the United Nations and the International Criminal Court.				

Subprogramme 2 General legal services provided to United Nations organs and programmes

Objective

- 8.41 The objective, to which this subprogramme contributes, is to maximize the protection of the legal interests of the Organization and to minimize its legal liabilities.

Strategy

- 8.42 To contribute to the objective, the subprogramme will:
- (a) Assist in ensuring external accountability of the United Nations and related personnel, including on internal sanctions and external enforcement action and liaison with national authorities;
 - (b) Advise on the legal aspects arising from United Nations institutional and operational activities, including the Organization's development, technical assistance, peacekeeping, humanitarian and other operations;

- (c) Assist the Organization, its organs or its separately administered funds and programmes by providing legal advice on procurement and substantial contracts and on operational and technical assistance activities of those entities;
- (d) Provide legal services for resolving disputes of a private law character involving the operations of the Organization, its organs or its funds and programmes, including representing the Organization in settlement negotiations and in arbitral proceedings;
- (e) Advise on management issues and matters in the system for the administration of justice, including determining whether to appeal against a judgment of the United Nations Dispute Tribunal, and represent the Secretary-General before the United Nations Appeals Tribunal;
- (f) Respond to requests by the Organization for urgent legal advice arising from humanitarian and emergency situations.

8.43 The above-mentioned work is expected to result in:

- (a) The full maintenance of the status, legal rights and privileges and immunities of the Organization arising from United Nations operational activities;
- (b) The reduction of actual legal liabilities of the Organization.

Programme performance in 2022

United Nations entities stayed and delivered during the COVID-19 pandemic

- 8.44 The subprogramme provided legal support to various United Nations entities, including the Department of Operational Support and the Development Coordination Office, on the implementation of the COVID-19 medical evacuation system for United Nations-affiliated personnel, including with regard to its winding down by 31 December 2022. This work included legal support in respect of the operation of the system, legal arrangements with medical facilities, and preparation of various other legal documents, such as consent forms, to ensure maximum protection of the legal interests of the Organization and minimal legal liabilities resulting from such operations.
- 8.45 Progress towards the objective is presented in the performance measure below (see table 8.7).

Table 8.7
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Access by the Department of Operational Support and the Development Coordination Office to timely legal support for the implementation of the COVID-19 medical evacuation system for United Nations-affiliated personnel, including through the conclusion of respective legal instruments for dedicated hubs to receive patients	Receipt by the Department of Operational Support and the Development Coordination Office of timely legal support for the ongoing implementation of the COVID-19 medical evacuation system for United Nations-affiliated personnel, including through the resolution of legal issues arising from the operation of the system	Receipt by the Department of Operational Support and the Development Coordination Office of timely legal support for the ongoing implementation and conclusion of the COVID-19 medical evacuation system for United Nations-affiliated personnel

Planned results for 2024

Result 1: improved efficiency in finalizing partnership agreements

Programme performance in 2022 and target for 2024

- 8.46 The subprogramme’s work contributed to the development of guidance materials on partnerships from a legal perspective, which met the planned target of increased access to guidance materials on legal issues common to partnership agreements.
- 8.47 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.8).

Table 8.8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Progress in the development of pilot guidance materials on select common legal issues	Guidance materials on partnerships from a legal perspective developed and made available	Guidance materials on select common legal issues available to all substantive offices	Comprehensive guidance materials on partnership agreements made available

Result 2: strengthened capacity for the United Nations to stay and deliver through COVID-19 vaccinations

Programme performance in 2022 and target for 2024

- 8.48 The subprogramme’s work contributed to timely legal support to the Department of Operational Support for implementation of the United Nations system-wide COVID-19 vaccination programme, which met the planned target.
- 8.49 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.9).

Table 8.9
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Access by the Department of Operational Support to timely legal support for the establishment and implementation of the United Nations system-wide COVID-19 vaccination programme, including the acquisition and administration of COVID-19 vaccines to eligible personnel	Access by the Department of Operational Support to timely legal support for the implementation of the United Nations system-wide COVID-19 vaccination programme and related arrangements	Access by the Department of Operational Support to timely legal support for the implementation of the United Nations system-wide COVID-19 vaccination programme	Access by the Department of Operational Support to timely legal support for the implementation of the United Nations system-wide COVID-19 vaccination programme and related arrangements, including the administration of booster shots	Subject to continuation of the United Nations system-wide COVID-19 vaccination programme, access by the Department of Operational Support to timely legal support for the implementation of the United Nations system-wide COVID-19 vaccination programme and related arrangements

Result 3: a model contract for global freight-forwarding

Proposed programme plan for 2024

8.50 The Organization moves freight to support its mandated operations worldwide. With a view to minimizing the legal risks of freight movement, the subprogramme has been providing legal support to the Department of Operational Support through ad hoc review of contracts and negotiations, upon request.

Lessons learned and planned change

8.51 The lesson for the subprogramme was that various practices are employed by the Organization with regard to the movement of freight in support of mandated activities. In applying the lesson, the subprogramme will develop a model freight-forwarding contract to maximize the protection of the legal interests and minimize the legal liabilities of the Organization.

8.52 Expected progress towards the objective is presented in the performance measure below (see table 8.10)

Table 8.10
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Receipt by Department of Operational Support of ad hoc legal support on freight-forwarding contracts	Preliminary draft model freight-forwarding contract made available for comments	Revised draft model freight-forwarding contract made available, taking into account comments received

Deliverables

8.53 Table 8.11 lists all deliverables of the subprogramme.

Table 8.11
Subprogramme 2: deliverables for 2024, by category and subcategory

Category and subcategory
E. Enabling deliverables
Internal justice and oversight: legal advice and services to all United Nations offices and departments, all principal and subsidiary organs of the United Nations, all peacekeeping and special political missions, all regional commissions, all funds and programmes, and the resident coordinator system, on administrative law, on criminal accountability for United Nations personnel, on procurement activities and drafting and negotiating contracts and other commercial matters, on commercial claims and representation before arbitral tribunals, on operational and technical assistance activities of the United Nations, including in the economic, social and humanitarian fields, on partnerships with the private sector, on the legislative and operational arrangements governing the staffing, supply and provision of peace operations, and representing the Secretary-General before the United Nations Appeals Tribunal.

Subprogramme 3

Progressive development and codification of international law

Objective

- 8.54 The objective, to which this subprogramme contributes, is to progressively develop, codify and advance knowledge of international law.

Strategy

- 8.55 To contribute to the objective, the subprogramme will:
- (a) Provide substantive support to the Sixth Committee, the International Law Commission, the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization, other special or ad hoc committees and diplomatic conferences in their consideration and formulation of legal instruments by assisting in the conduct of proceedings, rendering legal advice, preparing draft texts of legal instruments, resolutions and decisions and preparing background documents, analytical studies and reports;
 - (b) Provide legal bodies of the General Assembly with assistance when considering the use by States of the procedures envisaged under the relevant resolutions of the Assembly;
 - (c) Implement the mandates of the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law. This includes the planning, organization and conduct of four in-person training programmes, namely, the International Law Fellowship Programme and the United Nations Regional Courses in International Law for Africa, for Latin America and the Caribbean and for Asia-Pacific;
 - (d) Further develop, disseminate and maintain the United Nations Audiovisual Library of International Law and prepare and disseminate major legal publications and information on the legal work of the United Nations;
 - (e) Support Member States by assisting the bureaux of the bodies that the subprogramme services in devising and implementing working methods and work programmes that ensure business continuity.
- 8.56 The above-mentioned work is expected to result in:
- (a) The smooth deliberations of legislative and legal bodies, the conclusion of draft legal instruments and the promotion of universal respect for international law;
 - (b) The wider awareness and appreciation of international law by a wider audience.

Programme performance in 2022

Gender parity achieved among the participants of the in-person training programmes under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law

- 8.57 With the easing of pandemic-related restrictions, the subprogramme resumed in-person training programmes under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law. The subprogramme conducted extensive dissemination activities on the training programmes, including through social media and United Nations information centres, emphasizing that applications from qualified women candidates were encouraged. In the selection of participants, due consideration was given to the candidates' qualifications, the scope of their professional duties and the relevance of the training to their professional duties, as well as geographical representation and gender parity.

8.58 Progress towards the objective is presented in the performance measure below (see figure 8.I).

Figure 8.I
Number of professionals with increased knowledge and skills on various topics related to international law (annual)

Planned results for 2024

Result 1: advancement of the International Law Commission’s study on sea-level rise in relation to international law

Programme performance in 2022 and target for 2024

8.59 The subprogramme’s work contributed to the preparation and subsequent consideration by the International Law Commission of the second issues paper on sea-level rise in relation to international law (concerning statehood and the protection of persons affected by sea-level rise), which met the planned target.

8.60 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.12).

Table 8.12
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Co-Chairs of the International Law Commission Study Group have access to research material for consideration of the possible protection of persons	Consideration by the International Law Commission of the implications of sea-level rise, with a focus on the law of the sea	Consideration by the International Law Commission of the second issues paper on sea-level rise in relation to international law (concerning statehood and the protection of persons affected by sea-level rise)	Provisional conclusion of the study by the International Law Commission of at least 1 of the focus areas of the implications of sea-level rise	Provisional conclusion of the study by the International Law Commission of questions concerning statehood and the protection of persons affected by sea-level rise

Result 2: advancement of the International Law Commission’s consideration of the improvement of its working methods

Programme performance in 2022 and target for 2024

- 8.61 The subprogramme’s work contributed to consideration of the working methods of the International Law Commission by the Working Group on Working Methods, which did not meet the planned target of adopting a report containing recommendations covering the period from 2017 to 2022 at the seventy-third session of the Commission, in 2022. The target was not met owing to time constraints of the seventy-third session, as the time required by the Working Group exceeded the term of office of the then members of the Commission.
- 8.62 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.13).

Table 8.13
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Consideration of working methods in the International Law Commission Working Group on Working Methods	Consideration of working methods in the International Law Commission Working Group on Working Methods	Consideration of working methods in the International Law Commission Working Group on Working Methods	Formulation of recommendations of the International Law Commission Working Group on Working Methods to improve interaction with the Sixth Committee	Adoption of the report of the International Law Commission Working Group on Working Methods (covering 2017–2022)

Result 3: Advancement of the consideration by the International Law Commission of the subsidiary means for the determination of rules of international law

Proposed programme plan for 2024

- 8.63 The consideration of the subsidiary means for the determination of rules of international law, including judicial decisions and academic teachings, will advance the understanding of the sources of international law. The subprogramme commenced the first part of an in-depth Secretariat study on the topic, focusing on the prior work of the International Law Commission.

Lessons learned and planned change

- 8.64 The lesson for the subprogramme was that closer coordination and cooperation with the International Law Commission Special Rapporteur for the topic was important for the successful completion of the in-depth Secretariat study. In applying the lesson, the subprogramme will coordinate with the Special Rapporteur and endeavour to find synergies and align the preparation of the second part of the study with the second report of the Special Rapporteur, as appropriate.
- 8.65 Expected progress towards the objective is presented in the performance measure below (see table 8.14).

Table 8.14
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Inclusion by the International Law Commission of the topic of subsidiary means for the determination of rules of international law in its long-term programme of work	Inclusion by the International Law Commission of the topic of subsidiary means for the determination of rules of international law in its regular programme of work and request by the Commission that the subprogramme prepare an in-depth study of the topic	Consideration by the International Law Commission of the first part of the study on the topic	Consideration by the International Law Commission of the second part of the study on the topic

Deliverables

8.66 Table 8.15 lists all deliverables of the subprogramme.

10. United Nations Regional Course in International Law for Latin America and the Caribbean	19	5	17	17
Publications (number of publications)	8	7	9	8
11. <i>Repertory of Practice of United Nations Organs</i>	1	–	1	1
12. <i>United Nations Legislative Series</i>	–	1	1	–
13. <i>Yearbook of the International Law Commission</i>	5	5	5	5
14. <i>United Nations Juridical Yearbook</i>	1	–	1	1
15. <i>Reports of International Arbitral Awards</i>	1	1	1	1
Technical materials (number of materials)	25	47	25	25
16. Entries in the United Nations Audiovisual Library of International Law, including lectures	25	47	25	25

C. Substantive deliverables

Consultation, advice and advocacy: advice to intergovernmental and expert bodies, including the Sixth Committee and the International Law Commission; and provision of technical expertise to the Special Rapporteurs of the International Law Commission, including in relation to reports to the Commission.

D. Communication deliverables

Outreach programmes, special events and information materials: lectures and briefings, upon request, on public international law.

Digital platforms and multimedia content: Sixth Committee, International Law Commission and Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law websites; and online United Nations Audiovisual Library of International Law, which provides high-quality legal content to an unlimited number of individuals and institutions around the world at no charge.

**Subprogramme 4
Law of the sea and ocean affairs**

Objective

- 8.67 The objective, to which this subprogramme contributes, is to strengthen the law of the sea for the peaceful use of the oceans and for their conservation and sustainable use, and as the basis for national, regional and global action and cooperation in the marine sector.

Strategy

- 8.68 To contribute to the objective, the subprogramme will:
- (a) Provide expert advice to States and international organizations on the law of the sea and ocean affairs, in particular with respect to the United Nations Convention on the Law of the Sea of 1982, the Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks of 1995 and the work of the General Assembly on oceans and the law of the sea and sustainable fisheries;
 - (b) Support the implementation of the Convention and the United Nations Fish Stocks Agreement in respect of sustainable fisheries-related cooperative activities among States and other entities;
 - (c) Provide secretariat services to intergovernmental bodies and the Commission on the Limits of the Continental Shelf;

- (d) Undertake capacity-building activities (fellowships, training courses, workshops) related to oceans and the law of the sea in collaboration with relevant stakeholders.

8.69 The above-mentioned work is expected to result in:

- (a) An increased number of States parties to the Convention and its implementing agreements and their effective implementation by States;
- (b) Enhanced cooperation and coordination among stakeholders on ocean and coastal issues leading to enhanced conservation and sustainable use of the oceans and their resources;
- (c) A better understanding of the legal regime for the oceans and the enhanced human resource capacity of Member States, in particular developing countries, to implement that regime effectively.

Programme performance in 2022

Enhanced commitment to the conservation and sustainable use of oceans and their resources

8.70 The full and effective implementation of the United Nations Convention on the Law of the Sea plays a critical role in, and contributes significantly to, the implementation of the 2030 Agenda, in particular the achievement of Sustainable Development Goal 14. The subprogramme supported the preparations and provided substantive servicing for the 2022 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development, held in Lisbon from 27 June to 1 July. In particular, the subprogramme’s preparation of the background paper and its organization of the corresponding interactive dialogue contributed to the identification by the Conference of synergies in the implementation of international law, including with regard to the science-policy interface, by increasing awareness among Member States and enhancing cross-sectoral capacity-building, in particular by creating multi-stakeholder partnerships. The Conference concluded with Member States adopting the declaration entitled “Our ocean, our future, our responsibility”, which was endorsed by the General Assembly in its resolution [76/296](#).

8.71 Progress towards the objective is presented in the performance measure below (see table 8.16).

Table 8.16
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
Identification by Member States of major gaps and challenges in the effective implementation of international law, as part of the substantive preparations for the 2022 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development	Strengthened capacity of Member States to address major gaps and challenges in the effective implementation of international law	Strengthened commitment of Member States to conserving and sustainably using the ocean, seas and marine resources, in line with the United Nations Convention on the Law of the Sea, with the adoption of the declaration entitled “Our ocean, our future, our responsibility” (General Assembly resolution 76/296)

Planned results for 2024

Result 1: improved capacity for sustainable and integrated ocean governance

Programme performance in 2022 and target for 2024

- 8.72 The subprogramme's work contributed to improved capacity of government officials, international civil servants and other ocean practitioners from 87 developing countries to actively participate in multilateral ocean processes, implement the United Nations Convention on the Law of the Sea regime, and establish and implement ocean governance measures, as well as to the initiation by 11 Member States of national cross-sectoral discussions on ocean governance reform, which met the planned target.
- 8.73 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.17).

Table 8.17

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
States have access to new projects and additional technical assistance and virtual training opportunities to enhance their understanding and mitigation of the implications of the COVID-19 pandemic on oceans and the law of the sea, as well as to increase accessibility and knowledge-sharing by a wider audience	States take action, through ocean-related activities, to reinforce local ownership; and States access new and additional multi-stakeholder training opportunities (both in person and online) and enhance their capacity to respond to emerging issues pertaining to oceans and the law of the sea, including by reinforcing local ownership	Improved capacity of government officials, international civil servants and other ocean practitioners from 87 developing countries to actively participate in multilateral ocean processes, implement the United Nations Convention on the Law of the Sea regime and establish and implement ocean governance measures Initiation by 11 Member States of national cross-sectoral discussions on ocean governance reform	Enhanced understanding by States of their capacity-building and technical cooperation needs in ocean affairs and the law of the sea, including through on-demand assistance at the regional and national levels	Implementation by States of multi-stakeholder initiatives in ocean affairs and the law of the sea

Result 2: enhanced coordination and cooperation on ocean issues, in particular through UN-Oceans

Programme performance in 2022 and target for 2024

- 8.74 The subprogramme's work contributed to increased awareness by Member States of collaborative initiatives and activities related to ocean issues of a cross-cutting nature, such as the ocean-climate nexus (General Assembly resolution [76/72](#), para. 211), marine science and coastal and marine

biodiversity through various thematic events at conferences and other scientific and technical meetings, which met the planned target.

8.75 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.18).

Table 8.18
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Increased awareness by Member States of available initiatives and activities in response and to adapt to the challenges owing to the COVID-19 pandemic following the UN-Oceans virtual high-level event open to States on “Taking stock of ongoing ocean-related initiatives in light of the COVID-19 pandemic: toward enhanced inter-agency coordination and cooperation on ocean and coastal issues beyond 2020”	Increased awareness by Member States of the progress in the implementation of the United Nations Convention on the Law of the Sea and its implementing agreements on the basis of responses by States to a questionnaire on the implementation of Sustainable Development Goal target 14.c	Increased awareness by Member States of collaborative initiatives and activities related to ocean issues of a cross-cutting nature, such as the ocean-climate nexus, ^a marine science and coastal and marine biodiversity	Increased awareness of Member States of the importance of enhanced use by Member States of the UN-Oceans inventory of mandates as a tool for obtaining support from UN-Oceans members	Enhanced national-level coordination by Member States on ocean-related issues, using a multi-sectoral approach, in line with the Convention and other international instruments, rules and standards

^a General Assembly resolution 76/72, para. 211.

Result 3: strengthened role of the Commission on the Limits of the Continental Shelf and its subcommissions in accordance with the United Nations Convention on the Law of the Sea

Proposed programme plan for 2024

8.76 The General Assembly, in its resolution 77/248, recognized that (a) it is in the broader interest of the international community that coastal States with a continental shelf beyond 200 nautical miles submit information on the outer limits of the continental shelf beyond 200 nautical miles to the Commission on the Limits of the Continental Shelf, and (b) the Commission has to continue to fulfil its role, including of making recommendations to coastal States, recognizing its significant workload. To that effect, the Assembly noted the need for enhanced support and assistance to the Commission.

Lessons learned and planned change

8.77 The lesson for the subprogramme was that regular assessment of the specialized services provided to the Commission can help to ensure that the subprogramme addresses the Commission’s evolving needs. In applying the lesson, the subprogramme, in consultation with the Commission and States Parties to the Convention, and on the basis of an assessment of their needs, will improve the

effectiveness of services and assistance by providing enhanced support for geospatial information management.

8.78 Expected progress towards the objective is presented in the performance measure below (see table 8.19)

**Table 8.19
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	–	Progress in the work of the Commission on the Limits of the Continental Shelf noted with satisfaction by the General Assembly in its resolution 77/248	Satisfaction for the Commission's progress expressed by the General Assembly in its annual resolution on oceans and the law of the sea	Satisfaction for the Commission's progress expressed by the General Assembly in its annual resolution on oceans and the law of the sea

Deliverables

8.79 Table 8.20 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: expert advice and programmes of assistance to States, international organizations and judicial bodies on the law of the sea and ocean affairs, in particular the United Nations Convention on the Law of the Sea and the United Nations Fish Stocks Agreement; substantive advice to all Member States in relation to the work of the General Assembly and its subsidiary bodies on oceans, the law of the sea and sustainable fisheries and the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction; advice for the implementation by Member States of the oceans-related Sustainable Development Goals, in particular through UN-Oceans; substantive advice on the preparations for the 2025 United Nations Ocean Conference; substantive advice on the implementation of the United Nations Decade of Ocean Science for Sustainable Development and to the Joint Group of Experts on the Scientific Aspects of Marine Environmental Protection; advisory services to the United Nations Environment Assembly of the United Nations Environment Programme, including on marine litter, microplastics and plastic pollution; advice and support to the Co-Chairs of the United Nations Open-ended Informal Consultative Process on Oceans and the Law of the Sea; advice to the United Nations Framework Convention on Climate Change on oceans and climate and advice to the Inter-agency Consultative Group on Small Island Developing States and the Inter-agency Consultative Group for Landlocked Developing Countries; and advisory services to the inter-agency group on protection of refugees and migrants moving by sea.

Databases and substantive digital materials: geographic information system for the deposit of charts and geographical coordinates; and legal web-based information in relation to maritime zones.

D. Communication deliverables

Outreach programmes, special events and information materials: publicly accessible materials, briefings and events to promote a better understanding of the United Nations Convention on the Law of the Sea and the United Nations Fish Stocks Agreement and the work of the General Assembly on oceans and the law of the sea and sustainable fisheries; events for World Oceans Day; and UN-Oceans side events.

Digital platforms and multimedia content: content on the law of the sea and ocean affairs on web portals, websites and social media.

Library services: specialized reference collection and bibliographic database on the law of the sea and ocean affairs.

E. Enabling deliverables

Information and communications technology: specialized repository of geospatial data and information on outer limits of maritime zones and maritime boundaries.

**Subprogramme 5
Progressive harmonization, modernization and unification of the law
of international trade**

Objective

- 8.80 The objective, to which this subprogramme contributes, is to further the progressive harmonization and unification of the law of international trade.

Strategy

- 8.81 To contribute to the objective, the subprogramme will:

- (a) Serve as the secretariat for UNCITRAL, provide Member States with working papers, draft reports and draft substantive private law rules on international trade, and give advice on and assistance in intergovernmental negotiations and coordinate those activities with equivalent activities of other international organizations in accordance with the UNCITRAL mandate and propose that UNCITRAL recommend the use or adoption of relevant instruments from other organizations;
- (b) Provide technical assistance and capacity-building to Governments, including diagnostic assessments, implementation guidance and interpretative materials, as well as training activities and advice on the enactment of UNCITRAL texts in national law;
- (c) Conduct research and facilitate the exchange of experience amongst Member States on reinforcing the resilience of international trade and global supply chains, with a particular focus on micro-, small and medium-sized enterprises and explore possible future legislative development to meet the challenges identified for consideration by the Member States.

8.82 The above-mentioned work is expected to result in:

- (a) Well-informed, transparent and inclusive deliberations of delegations in working groups and the Commission;
- (b) Governments agreeing on substantive private law rules governing international trade and their reflection in universally acceptable instruments;
- (c) The availability of additional UNCITRAL instruments to harmonize and unify international trade law and to encourage resilience in international trade;
- (d) Increased government use and adoption of UNCITRAL instruments in national law and increased legal decisions on those instruments;
- (e) Increased treaty actions, enactments and legal decisions based on UNCITRAL texts.

Programme performance in 2022

Further engagement of legal practitioners in the Africa region to apply and interpret UNCITRAL texts

8.83 UNCITRAL texts address legal obstacles to international trade and cross-border commercial transactions by providing substantive rules to govern those transactions and for related domestic legal frameworks. The texts are designed to provide legal certainty for all commercial parties, and legal advisers in such commercial relations must be able to apply the rules in practice. Ensuring that the texts are uniformly interpreted worldwide is a key element of the harmonization of these substantive rules. Through a regional programme called “UNCITRAL Day”, the subprogramme is building capacity to apply and interpret UNCITRAL texts among legal thinkers and policymakers. The UNCITRAL Day programme consists of a series of regional capacity-building events with institutions of higher learning. In 2022 the subprogramme launched the UNCITRAL Day in Africa, responding to a call issued by UNCITRAL, in order to equip legal practitioners in the region to interpret and apply UNCITRAL texts, in particular in the areas of arbitration, investor-State dispute settlement reform, and e-commerce. The 15 events highlighted the potential benefits of UNCITRAL texts for promoting the implementation of the Agreement Establishing the African Continental Free Trade Area. The series of events contributed to further interest and engagement among both legal practitioners and industry professionals. For example, for some sessions, held in partnership with universities, although the initial target audience was law students and young lawyers, there was significant interest expressed by industry professionals, such as civil servants and entrepreneurs, who also attended the programme.

8.84 Progress towards the objective is presented in the performance measure below (see figure 8.II).

Figure 8.II
Performance measure: number of countries, institutions and individuals further equipped to apply and interpret UNCITRAL texts in the Africa region through the UNCITRAL Day programme

Planned results for 2024

Result 1: greater legal certainty for the use of artificial intelligence and automation in commercial transactions

Programme performance in 2022 and target for 2024

- 8.85 The subprogramme’s work contributed to UNCITRAL Working Group IV commencing deliberations on priority legal issues related to the digital economy and reaching consensus on the initial elements of a sound and harmonized framework for digital trade and electronic transactions, including working papers identifying: (a) provisions of existing UNCITRAL texts that may apply to such a framework; and (b) legal issues not fully addressed by existing UNCITRAL texts, which met the planned target.
- 8.86 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.21).

Table 8.21
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
UNCITRAL member States have access to a workplan to address legal issues related to the digital economy and a “taxonomy” to guide future work	UNCITRAL member States mandate UNCITRAL Working Group IV to commence work on priority legal issues related to the digital economy and also mandate publication of the “taxonomy” for	UNCITRAL Working Group IV commenced deliberations on priority legal issues related to the digital economy and reached consensus on the initial elements of a sound and harmonized framework for	UNCITRAL member States build consensus on legislative rules and principles that give effect to the elements of a sound and harmonized legal and regulatory framework for digital trade and electronic transactions and	Consensus reached by UNCITRAL member States on legislative rules and principles on automated transactions in digital trade, and continuation of consensus-building on related topics

	broader stakeholder engagement	digital trade and electronic transactions	identify related topics and issues for further consensus-building	and issues (e.g. data contracts)

**Result 2: a multimodal negotiable transport document for harmonized international trade
Programme performance in 2022 and target for 2024**

- 8.87 The subprogramme’s work contributed to UNCITRAL member States mandating an UNCITRAL working group to develop a draft instrument on negotiable multimodal transport documents and to the commencement of deliberations of UNCITRAL Working Group VI on relevant legal and policy issues related to the new draft instrument, which exceeded the planned target of UNCITRAL member States mandating an UNCITRAL working group to develop a draft instrument on negotiable multimodal transport documents.
- 8.88 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.22).

Table 8.22
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
UNCITRAL member States have access to appraisals of legal issues related to the use of consignment notes and similar projects in other organizations	UNCITRAL member States have access to an appraisal of relevant legislation and to expert recommendations, which enables them to develop a draft new instrument on negotiable multimodal transport documents	UNCITRAL working group mandated by UNCITRAL member States to develop a draft instrument on negotiable multimodal transport documents, and commencement of deliberations of UNCITRAL Working Group VI on relevant legal and policy issues related to the new draft instrument	An UNCITRAL working group commences deliberations on a draft instrument on negotiable multimodal transport documents and on the development of consensus among States through that working group on the scope and proposed content of such an instrument	Consensus reached by UNCITRAL Working Group VI on the main features of a draft legislative instrument on negotiable multimodal transport documents

Result 3: reforms to investor-State dispute settlement through development of multiple solutions

Proposed programme plan for 2024

- 8.89 The subprogramme has worked on investor-State dispute settlement since 2017 with a view to restoring confidence in the overall system and addressing issues related to arbitral decisions, the selection of arbitrators and decision makers, and the significant cost and duration of investor-State dispute settlement. The subprogramme continues to provide assistance to Working Group III in

reaching consensus on different reform elements, including draft codes of conduct and texts on mediation in investment disputes.

Lessons learned and planned change

8.90 The lesson for the subprogramme was that there was a need to facilitate additional opportunities for deliberations among member States beyond the working sessions, given the diversity of domestic legal frameworks and policies regarding investment protection and varied approaches to reform. In applying the lesson, the subprogramme, taking advantage of the resumption of in-person meetings, will coordinate drafting groups and informal sessions with member States in order to facilitate intersessional progress. As a result, the Working Group will be able to build consensus on different reform elements, such as dispute prevention, procedural rules, and the establishment of a multilateral advisory centre, an appellate mechanism and a multilateral permanent investment court, and a mechanism to implement reforms, all of which would achieve the comprehensive reform of the existing investor-State dispute settlement system.

8.91 Expected progress towards the objective is presented in the performance measure below (see table 8.23).

Table 8.23
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Consideration by Working Group III of multiple reform elements	Development by Working Group III of a workplan to deliver and adopt all reform elements by 2026	Consensus reached by Working Group III on a code of conduct for adjudicators and on treaty provisions and guidelines on investment mediation	Finalization of the texts previously prepared by Working Group III for the consideration of the United Nations Commission on International Trade Law, and further development of other reform elements	Consensus reached by Working Group III on mechanisms for dispute prevention and an advisory centre, and further development of other reform elements

Deliverables

13. Promotional and technical assistance materials	2	3	3	3
14. Case Law on UNCITRAL Texts (CLOUT) abstracts	10	77	81	81
C. Substantive deliverables				
Consultation, advice and advocacy: expert advice to all Member States, upon request, on international trade law.				
Databases and substantive digital materials: CLOUT (an online public database with 2,250 records on case law on UNCITRAL texts); Transparency Registry (an online public repository with 25 records for the publication of information and documents in treaty-based investor-State arbitration); and online materials, including presentations on UNCITRAL texts.				
D. Communication deliverables				
Outreach programmes, special events and information materials: brochures, flyers and information kits on UNCITRAL; 5 lectures to groups of legal and other practitioners, academics and law students; 1 colloquium on international trade law; 3 international commercial law moot court competitions; and 1 commemoration event.				
External and media relations: press releases related to UNCITRAL meetings, accession by States to UNCITRAL texts and issuance of publications.				
Digital platforms and multimedia content: UNCITRAL website.				
Library services: UNCITRAL Law Library.				

**Subprogramme 6
Custody, registration and publication of treaties**

Objective

- 8.93 The objective, to which this subprogramme contributes, is to ensure the transparency of the international treaty framework, wider knowledge of the law of treaties and broader participation in multilateral treaties concluded under the auspices of the United Nations and deposited with the Secretary-General.

Strategy

- 8.94 To contribute to the objective, the subprogramme will:
- (a) Undertake the registration and publication of treaties and treaty actions submitted under Article 102 of the Charter of the United Nations and provide timely and accurate information relating to deposited treaties, registered treaties and related actions through the electronic dissemination of treaty-related information on the online United Nations Treaty Collection and the publication of the *United Nations Treaty Series*;
 - (b) Provide legal assistance and advice to States, specialized agencies, United Nations programmes and offices, treaty bodies and other entities on the law of treaties, including final clauses of treaties, the depositary practice of the Secretary-General and the registration and publication of treaties. Such assistance would be provided in particular during the negotiation of multilateral treaties and through the holding of capacity-building seminars at Headquarters and at the national and regional levels, as well as through the elaboration of topical reference publications;
 - (c) Fulfil the depositary functions of the Secretary-General in respect of more than 600 multilateral treaties and hold and conduct treaty events, including during the high-level week of the annual session of the General Assembly.
- 8.95 The above-mentioned work is expected to result in:
- (a) Improved access to treaties deposited with the Secretary-General and related treaty actions, including information on their status, and to treaties and related treaty actions submitted for registration and publication with the Secretariat;
 - (b) The prevention of issues of interpretation and implementation of final clauses of multilateral treaties by contracting States and enhanced familiarity and understanding by States of the technical and legal aspects of participating in the multilateral treaty framework and registering treaties;
 - (c) The entry into force of multilateral treaties deposited with the Secretary-General and the universal participation of States in such treaties.

Programme performance in 2022

Member States developed draft final clauses of multilateral treaties

- 8.96 Several United Nations multilateral treaty negotiations took place in 2022. Pursuant to the Secretary-General's bulletin on procedures to be followed by departments, offices and regional commissions of the United Nations with regard to treaties and international agreements ([ST/SGB/2001/7](#)), draft final clauses of treaties to be deposited with the Secretary-General of the United Nations shall be submitted to the subprogramme for review prior to finalization. The subprogramme's work to ensure precise drafting of final clauses in accordance with treaty law and practice is instrumental to the ease of operation of the treaty and to prevent problems in its implementation by contracting States.
- 8.97 In 2022, the subprogramme responded to requests for legal advice on final clauses dealing with, among other matters, treaty participation, entry into force, amendment procedures, territorial application, and reservations. For instance, the subprogramme provided legal advice to the negotiators of the United Nations Convention on the International Effects of Judicial Sales of Ships, which was adopted by the General Assembly in its resolution [77/100](#). Legal advice was also provided during ongoing negotiations concerning, for instance, the elaboration of an international legally binding instrument under the United Nations Convention on the Law of Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction, and of a comprehensive international convention on countering the use of information and communications technologies for criminal purposes.

8.98 Progress towards the objective is presented in the performance measure below (see table 8.25).

Table 8.25
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Development by Member States of draft final clauses of multilateral treaties

Planned results for 2024

Result 1: enhanced access to information available to Member States on the United Nations Treaty Collection website

Programme performance in 2022 and target for 2024

- 8.99 The subprogramme’s work contributed to increased transparency of the international treaty framework and facilitated participation of States in multilateral treaties deposited with the Secretary-General, through access to a data dashboard on participation in multilateral treaties, which met the planned target.
- 8.100 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.26).

Table 8.26
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Member States have access to information regarding participation in each multilateral treaty deposited with the Secretary-General, through the United Nations Treaty Collection website	Increased transparency of the international treaty framework and facilitation of participation of States in multilateral treaties deposited with the Secretary-General through access to a data dashboard on participation in multilateral treaties	Member States have access to consolidated reports regarding their participation in all multilateral treaties deposited with the Secretary-General through the data dashboard on participation in multilateral treaties	Member States have access to consolidated reports regarding their participation in all multilateral treaties deposited with the Secretary-General through the data dashboard on participation in multilateral treaties

Result 2: improved access to procedural information on treaty law and practice

Programme performance in 2022 and target for 2024

- 8.101 The subprogramme’s work contributed to increased knowledge among Member States representatives on treaty law and practice, through the organization of two seminars in English and French, respectively, at United Nations Headquarters, which met the planned target.
- 8.102 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 8.27).

Table 8.27
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Increased knowledge of Member States representatives on treaty law and practice through 2 seminars at United Nations Headquarters	Increased knowledge of Member States representatives on treaty law and practice through 2 seminars at United Nations Headquarters	Increased knowledge of Member States representatives on treaty law and practice through two seminars at United Nations Headquarters	Increased knowledge of Member States representatives on treaty law and practice through 2 seminars at United Nations Headquarters and additional seminars at the national and regional levels	Increased knowledge of Member States representatives on treaty law and practice through 2 seminars at United Nations Headquarters and additional seminars at the national and regional levels

Result 3: action by States on multilateral treaties during the treaty event

Proposed programme plan for 2024

8.103 The treaty event is held annually in conjunction with the general debate of the General Assembly. On this occasion, Heads of State and Government and Ministers for Foreign Affairs take treaty actions under multilateral treaties deposited with the Secretary-General. This initiative has proven successful in the promotion of participation in the multilateral treaty framework. In 2020 and 2021, the treaty event could not be held owing to the COVID-19 pandemic.

Lessons learned and planned change

8.104 The lesson for the subprogramme was that the availability of exhaustive legal and procedural information is instrumental in facilitating Member State participation in the treaty event. In applying the lesson, the subprogramme will provide all necessary information regarding the legal and procedural requirements for joining multilateral treaties deposited with the Secretary-General, including the advance review of instruments of ratification, acceptance, approval or accession, and of full powers. Furthermore, the subprogramme will disseminate legal information and official photographs on treaty actions taken.

8.105 Expected progress towards the objective is presented in the performance measure below (see table 8.28).

Table 8.28
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	States took treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event	States take treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event	States take treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event

Deliverables

8.106 Table 8.29 lists all deliverables of the subprogramme.

Table 8.29

Subprogramme 6: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	–	–	3	–
1. Meetings of the Sixth Committee of the General Assembly (informal consultations and plenary meetings)	–	–	3	–
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	2	2	2	2
2. Seminar on treaty law and practice	2	2	2	2
Publications (number of publications)	38	48	40	40
3. United Nations <i>Treaty Series</i> volumes	38	48	40	40
C. Substantive deliverables				
Consultation, advice and advocacy: advice to intergovernmental bodies on final clauses and the law of treaties during the negotiations of treaties to be deposited with the Secretary-General; consultation and legal advice concerning the law of treaties, depositary practice and registration of treaties to States, international organizations, secretariats and treaty bodies.				
Databases and substantive digital materials: daily online updates of depositary notifications on treaty actions and formalities regarding multilateral treaties deposited with the Secretary-General; original of treaties and certified true copies of treaties deposited with the Secretary-General; certificates of registration and other registration documents regarding treaties and treaty actions registered and filed and recorded by Member States and other entities; and the United Nations Treaty Collection database.				
D. Communication deliverables				
Outreach programmes, special events and information materials: annual treaty event during the opening session of the General Assembly and special treaty events dedicated to a particular treaty deposited with the Secretary-General.				
Digital platforms and multimedia content: up-to-date content for the United Nations Treaty Collection website.				
E. Enabling deliverables				
Legal services: legal advice to and support for United Nations offices, departments and regional commissions on the law of treaties, depositary practice and the registration of treaties.				

B. Proposed post and non-post resource requirements for 2024

Overview

8.107 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 8.30 to 8.32.

Table 8.30

^a Includes six temporary posts (2 P-3, 2 P-2 and 2 General Service (Other level)).

8.108 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 8.33 to 8.35 and figure 8.III.

8.109 As reflected in tables 8.33 (1) and 8.34 (1), the overall resources proposed for 2024 amount to \$30,154,100 before recosting, reflecting a net decrease of \$1,046,300 in comparison with the appropriation for 2023. Resource changes result from three factors, namely: (a) technical adjustments; (b) new and expanded mandates; and (c) other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 8.III
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

8.110 As reflected in table 8.33 (1), resource changes reflect a decrease of \$1,078,300 under subprogramme 4, Law of the sea and ocean affairs. The decrease relates to the removal of non-recurrent requirements under consultants (\$13,000), experts (\$979,400), travel of staff (\$83,800) and general operating expenses (\$2,100) to support the work related to: (a) the Review Conference on the Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and

Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments, pursuant to General Assembly resolution [74/18](#); and (b) the third year of the third cycle of the Regular Process for the period 2021–2025, pursuant to Assembly resolution [75/239](#) on oceans and the law of the sea.

New and expanded mandates

- 8.111 As reflected in table 8.33 (1), resource changes under subprogramme 4, Law of the sea and ocean affairs, reflect an increase of \$32,000 under contractual services to provide for data processing services and operational support for the fourth year of the third cycle of the Regular Process, pursuant to General Assembly resolution [75/239](#).

Other changes

- 8.112 As reflected in table 8.33 (1), cost-neutral resource changes are proposed as follows:
- (a) **Executive direction and management.** The increase of \$7,100 under contractual services reflects additional requirements for service-level agreements with the Office of Information and Communications Technology of the Secretariat for two posts redeployed in 2023;
 - (b) **Subprogramme 1, Provision of legal services to the United Nations system as a whole.** The decrease of \$7,100 under contractual services reflects reduced requirements for the support of the matter management system. The amount is proposed for redeployment to executive direction and management to cover the additional requirements under contractual services (see para. 8.112 (a)).

Other assessed and extrabudgetary resources

- 8.113 As reflected in tables 8.33 (2) and 8.34 (2), projected other assessed resources for 2024 of \$4,925,400 would be utilized to support the activities of the Office of Legal Affairs in relation to peacekeeping activities (\$4,703,500) and the International Residual Mechanism for Criminal Tribunals (\$221,900). The proposal reflects an increase of \$201,100 compared with the estimate for 2023, owing mainly to the updated standard salary costs, as reflected in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).
- 8.114 As reflected in tables 8.33 (3) and 8.34 (3), the Office of Legal Affairs expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2024, extrabudgetary resources are estimated at \$12,580,600. The resources would be used primarily to provide legal advice and assistance to facilitate the implementation of substantive mandates and to protect the legal interests and minimize the legal liabilities of the United Nations, including, but not limited to, with regard to: (a) providing legal support and assistance in response to requests made by principal and subsidiary organs of the United Nations; (b) conducting international law training and dissemination under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law; (c) promoting and strengthening the law of the sea for the peaceful use of the oceans and sustainable development; and (d) providing support for the progressive improvement, harmonization, understanding, knowledge, interpretation and application of international trade law and for the coordination of the work of international organizations active in that field. The expected decrease of \$892,500 reflects mainly the completion of the modernization of the United Nations Audiovisual Library of International Law, the implementation of the United Nations Fish Stocks Agreement and the anticipated conclusion in late 2023 of a programme of assistance to meet the strategic capacity needs of developing States in the field of ocean governance and the law of the sea, and the reduced requirements for travel of experts to attend meetings.
- 8.115 Anticipated in-kind contributions with an estimated value of \$512,300 will provide for: (a) donated right-to-use arrangements under a memorandum of understanding between the United Nations, the

Section 8 **Legal affairs**

Ministry of Justice of the Republic of Korea and the city of Incheon regarding the operation of and financial contributions to the UNCITRAL Regional Centre for Asia and the Pacific (\$41,900); (b) other services, such as expert advice from two legal experts, for the Regional Centre for Asia and the Pacific (\$100,300); and (c) technical assistance, administrative support and other services as a contribution for the World Oceans Day event (\$370,100).

- 8.116 The extrabudgetary resources under the present section are subject to the oversight of the Office of Legal Affairs, which has delegated authority from the Secretary-General.

Policymaking organs

- 8.117 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies. Table 8.36 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 8.36
Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
International Law Commission	Pursuant to Article 13, paragraph 1 (a), of the Charter, the General Assembly, by its resolution 174 (II), established the International Law Commission and approved its statute (see resolution 174 (II), annex, as amended by resolutions 485 (V), 984 (X), 985 (X) and 36/39). The Commission has as its objective the promotion of the progressive development of international law and its codification. The Commission holds an annual session in Geneva of 10 to 12 weeks' duration and reports to the Assembly, which provides guidance to the Commission on its programme of work through annual resolutions on the reports of the Commission. Since 2000, as mandated by the Assembly, the Commission has held split annual sessions up to a total of 12 weeks. The length of the session is recommended by the Commission at its previous session and approved by the Assembly. The Codification Division of the Office of Legal Affairs provides the substantive servicing of the Commission.	Mandate: Article 13 (1) (a) of the Charter Membership: 34 experts in international law Number of sessions in 2024: 1 session	1 990.6	1 990.6
UNCITRAL	UNCITRAL is mandated, pursuant to Assembly resolution 2205 (XXI), to further the progressive harmonization and modernization of the law of international trade, which corresponds to subprogramme 5. The Commission carries out its tasks, with the assistance of the International Trade Law Division as its secretariat, in one annual meeting of up to four weeks' duration and in 6 working group meetings on specialized topics of up to 13 weeks' duration per year.	Mandate: Assembly resolution 2205 (XXI) Membership: 70 Member States Number of sessions in 2024: 1	149.8	149.8
Total			2 140.4	2 140.4

- 8.118 The proposed regular budget resources for 2024 amount to \$2,140,400 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 8.37 and figure 8.IV.

Executive direction and management

8.119 The executive direction and management component comprises the Office of the Under-Secretary-General for Legal Affairs and the Evaluation and Strategic Planning Unit. The component is responsible for the following functions:

- (a) Providing the overall policy direction, supervision, administration and management of the Office of Legal Affairs;
- (b) Representing the Secretary-General at meetings and conferences of a legal nature and in judicial and arbitral proceedings, certifying legal instruments issued on behalf of the United Nations, convening meetings of the legal advisers of the United Nations system and representing the Organization at such meetings;
- (c) Monitoring the resources of the Office of Legal Affairs to address the changing organizational needs and workload and to improve the Office’s management systems;

- (d) Formulating recommendations to the Secretary-General in interdepartmental and inter-agency bodies, supporting the coordination of the United Nations Legal Advisers Network and providing legal advice to high-level inter-agency bodies;
 - (e) Ensuring the consistent monitoring and self-evaluation of subprogrammes and supporting subprogrammes with the identification, development and review of monitoring and self-evaluation methodologies and practices;
 - (f) Coordinating the working groups on monitoring and evaluation and on the Sustainable Development Goals within the Office of Legal Affairs;
 - (g) Acting as the focal point for information on all aspects of the work of the Office of Legal Affairs, including with regard to all capacity-building activities coordinated by the Office, coordinating interdepartmental activities and consulting and negotiating with other departments, offices, subsidiary bodies and related agencies of the United Nations system on matters of mutual concern;
 - (h) Acting as the centre for coordination and supervision of all capacity-building activities, including those undertaken under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law (subprogramme 3), and for the strengthening of the capacity of the Office of Legal Affairs to concentrate the planning, implementation, monitoring and evaluation of those activities to allow for a more strategic and integrated management of capacity-building efforts, the leveraging of partnerships and the replication of good practices regarding legal technical assistance across organizational units to better assist relevant stakeholders and better respond to requests by Member States.
- 8.120 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office integrates environmental management practices into its operations. This includes decreasing its greenhouse gas by: (a) encouraging the use of videoconference facilities for interviews and meetings; (b) reducing print services and ensuring that all printers are set to double-sided printing; and (c) encouraging staff to turn off computers and monitors at the end of the workday.
- 8.121 Information on the timely submission of documentation and advance booking for air travel is reflected in table 8.38. The timeliness of booking compliance was affected by several factors, such as the change in participants for workshops and seminars by sponsoring Member States, delays in participants obtaining entry visas and delayed confirmations of travellers and sponsors regarding their participation in activities.

Table 8.38

- 8.122 The proposed regular budget resources for 2024 amount to \$1,662,000 and reflect an increase of \$7,100 compared with the appropriation for 2023. The proposed increase is explained in paragraph 8.112 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 8.39 and figure 8.V.

Executive direction and management: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

8.123 Other assessed resources for the component are estimated at \$112,800 and would support peacekeeping operations, where the Office provides legal support and assistance to facilitate the implementation of substantive mandates and to protect the legal interests and minimize the legal liabilities of the United Nations. The net decrease of \$300 is due mainly to estimated reduced requirements for other staff costs, as reflected in the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 ([A/77/771](#)).

8.124 Extrabudgetary resources for the component are estimated at \$477,400 and would support the Evaluation and Strategic Planning Unit in its monitoring and evaluation functions. The resources would be used mainly to strengthen the Office’s evaluation efforts and to support the units of the Office in their monitoring and evaluation efforts, including through the systematic review and

assessment of the support for the implementation of the Sustainable Development Goals and the different changes and mandates resulting from United Nations reforms. The projected decrease of \$127,500 is attributable to the completion of the workshop in West Africa for government representatives of West African countries on international law that will take place in 2023 and is not planned for 2024.

Programme of work

Subprogramme 1

Provision of legal services to the United Nations system as a whole

8.125 The proposed regular budget resources for 2024 amount to \$2,118,700 and reflect a decrease of \$7,100 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 8.112 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 8.40 and figure 8.VI.

Table 8.40

Figure 8.VI
Subprogramme 1: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

8.126 Other assessed resources for the subprogramme are estimated at \$1,573,700 and would be used to support peacekeeping operations and the International Residual Mechanism for Criminal Tribunals. The resources would be used mainly to provide legal advice and assistance on a wide range of operational and support matters, including: advice on the interpretation and implementation of mandates, including the application of rules of engagement and other directives on the use of force; legal advice relating to human rights, international humanitarian law and international criminal law; legal arrangements with host Governments and contributing Governments, including privileges and immunities; and legal arrangements with other international organizations and partners. The projected increase of \$60,700 is due mainly to updated standard salary costs, as reflected in the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).

8.127 Extrabudgetary resources for the subprogramme are estimated at \$1,921,600 and would be used mainly to provide centralized legal support and assistance to facilitate the implementation of substantive mandates and to protect the legal interests and minimize the legal liabilities of the United Nations. The resources would also be used to provide legal support to the Development Coordination Office, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and United Nations entities in cooperation with the International Criminal Court, in accordance with the Relationship Agreement between the United Nations and the International Criminal Court.

**Subprogramme 2
 General legal services provided to United Nations organs and programmes**

8.128 The proposed regular budget resources for 2024 amount to \$4,150,900 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 8.41 and figure 8.VII.

Table 8.41

Figure 8.VII
Subprogramme 2: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Other assessed and extrabudgetary resources

8.129 Other assessed resources for the subprogramme are estimated at \$3,238,900 and would be used to support peacekeeping operations. The resources would be used to provide legal advice and assistance on the interpretation and application of United Nations regulations, rules and policies; represent the Secretary-General before the United Nations Appeals Tribunal in cases and provide advice on the administrative law of the Organization; provide advice on procurement activities and on the preparation and negotiation of contracts for the acquisition of goods or services for United Nations operations; assist in the resolution of disputes and claims arising from operational activities of the Organization; provide advice on the Organization’s accountability measures in relation to both internal sanctions and external enforcement actions against United Nations officials, experts on mission and third parties for fraud, corruption and other wrongdoing; and provide advice on

development, technical and humanitarian assistance activities, including partnerships with the private sector. The projected increase of \$140,700 is due mainly to updated standard salary costs and the higher annual subscription cost for legal software licences, offset in part by the updated estimates for the maintenance, support and licensing costs associated with the matter management system, as reflected in the budget for the support account for peacekeeping operations for the period from 1 July 2023 to 30 June 2024 (A/77/771).

- 8.130 Extrabudgetary resources for the subprogramme are estimated at \$4,037,400 and would be used mainly to provide legal assistance in response to requests made by principal and subsidiary organs of the United Nations, including offices and departments at Headquarters, and United Nations funds, programmes and regional commissions.

Subprogramme 3 Progressive development and codification of international law

- 8.131 The proposed regular budget resources for 2024 amount to \$4,636,000 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 8.42 and figure 8.VIII.

Table 8.42

Figure 8.VIII
Subprogramme 3: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

8.132 Extrabudgetary resources for the subprogramme are estimated at \$34,300 and would be used mainly to supplement the efforts of the subprogramme to meet the increasing demand for international law training and dissemination under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law. This would include the conduct of off-site recordings for the United Nations Audiovisual Library of International Law in various regions to expand the geographical representation and multilingualism of the Lecture Series, the provision of additional fellowships to participate in the training programmes, and the update and dissemination of the *International Law Handbook: Collection of Instruments* and the *Recueil de droit international: Collection d'instruments*. The projected decrease of \$209,400 reflects the planned implementation of the main stages of the modernization of the United Nations Audiovisual Library of International Law in 2023.

**Subprogramme 4
 Law of the sea and ocean affairs**

8.133 The proposed regular budget resources for 2024 amount to \$7,133,900 and reflect a decrease of \$1,046,300 compared with the appropriation for 2023. The proposed decrease is explained in paragraphs 8.110 and 8.111. Additional details on the distribution of the proposed resources for 2024 are reflected in table 8.43 and figure 8.IX.

Figure 8.IX
Subprogramme 4: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

8.134 Extrabudgetary resources for the subprogramme are estimated at \$4,183,700 and would be used to support the subprogramme’s capacity-building activities (fellowships and training courses) and technical cooperation programmes to provide assistance to developing States in the implementation of the United Nations Convention on the Law of the Sea and the United Nations Fish Stocks Agreement. The resources would also be used to provide for the participation of developing States in ocean-related work of the General Assembly, related global and regional processes and the work of the Commission on the Limits of the Continental Shelf. The resources would allow the subprogramme to continue to implement a number of capacity-building activities and technical cooperation projects, including the Hamilton Shirley Amerasinghe Memorial Fellowship on the Law of the Sea, the United Nations-Nippon Foundation of Japan Fellowship Programme for Human

Resources Development and Advancement of the Legal Order of the World’s Oceans and the programmes of assistance to meet the strategic capacity needs of developing States in the field of ocean governance and the law of the sea. The estimated decrease of \$566,400 mainly relates to reduced requirements for meetings (travel of experts), owing to the anticipated completion of the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction in 2023, and consultancy costs, owing mainly to the completion of a first phase of a new programme of assistance to strengthen participation in and implementation of the United Nations Fish Stocks Agreement by the end of 2023, and the anticipated conclusion in late 2023 of a programme of assistance to meet the strategic capacity needs of developing States in the field of ocean governance and the law of the sea.

**Subprogramme 5
Progressive harmonization, modernization and unification of the law of international trade**

8.135 The proposed regular budget resources for 2024 amount to \$3,711,200 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 8.44 and figure 8.X.

Figure 8.X
Subprogramme 5: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

8.136 Extrabudgetary resources for the subprogramme are estimated at \$1,346,100 and would be used mainly to support the Office of Legal Affairs in ensuring the participation of developing States in UNCITRAL sessions; to operate the Regional Centre for Asia and the Pacific; to manage the Transparency Registry (an online repository for the publication of information and documents in treaty-based investor-State arbitration); and to complement the regular budget resources on the implementation of various activities under the subprogramme. These activities include raising awareness and promoting the effective understanding, adoption and use of UNCITRAL texts; providing advice and assistance to States on the adoption and use of those texts; and building capacity to support their effective use, implementation and uniform interpretation, including through training activities and e-learning modules on UNCITRAL and its texts. The projected increase of \$10,800 mainly relates to additional requirements for producing capacity-building materials for the UNCITRAL e-learning courses.

**Subprogramme 6
 Custody, registration and publication of treaties**

8.137 The proposed regular budget resources for 2024 amount to \$3,612,400 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 8.45 and figure 8.XI.

Table 8.45

Figure 8.XI
Subprogramme 6: distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

8.138 Extrabudgetary resources for the subprogramme are estimated at \$243,000 and would be used to support the Treaty Section to meet the increasing demand in the electronic management of treaties submitted for custody, registration and publication by States, international organizations and the United Nations, including all agreements concluded by the Organization for the implementation of voluntary funded activities.

Programme support

8.139 The component comprises the Executive Office, which provides administrative services to the Office of Legal Affairs and policymaking organs, including on human resources, budgetary and financial administration and resource planning.

8.140 The proposed regular budget resources for 2024 amount to \$988,600 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 8.46 and figure 8.XII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 8.141 Extrabudgetary resources for the component are estimated at \$337,000 and would support the various administrative functions, including the provision of financial services, human resources management and administrative support related to extrabudgetary activities funded through various trust funds. Associated activities include the administration of personnel and fellowship programmes funded by the Nippon Foundation, travel arrangements, the procurement of goods and services and the review of voluntary contributions in kind.

II. Independent Investigative Mechanism for Myanmar

Foreword

In 2024, the Independent Investigative Mechanism for Myanmar plans to accelerate its collection of evidence of the most serious international crimes committed in Myanmar and intensify its preparation of analytical products to be shared with judicial authorities willing and able to pursue accountability for such crimes.

Tragically, on the basis of reports and evidence collected to date, the number of serious international crimes committed in Myanmar has increased dramatically since the military takeover in 2021, and collecting evidence of such crimes presents a constant challenge. To date, the Mechanism has collected credible evidence documenting the commission of war crimes and crimes against humanity, including evidence of murder, rape, torture, unlawful imprisonment, and deportation or forcible transfer. The Mechanism also continues to collect evidence regarding crimes committed against the Rohingya.

In 2024, the Mechanism will continue to evaluate how it can best collect evidence and produce analytical products that will be useful to judicial authorities that may prosecute such cases. The Mechanism will continue to prioritize gathering evidence regarding sexual and gender-based crimes and crimes against children; preserving detailed testimonies from witnesses with direct knowledge of events, particularly those with inside knowledge of orders given and reports made; ensuring the safety of such witnesses; and adopting cutting-edge tools, including for the analysis of social media and other open-source evidence, as well as financial evidence.

(Signed) Nicholas **Koumjian**
Head of the Independent Investigative Mechanism for Myanmar

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 8.142 The Independent Investigative Mechanism for Myanmar is mandated to collect, consolidate, preserve and analyse evidence of the most serious international crimes and violations of international law committed in Myanmar since 2011 and prepare files that can be shared with national, regional or international courts or tribunals to facilitate fair and independent criminal proceedings. The mandate derives from Human Rights Council resolutions [39/2](#), [42/3](#), [43/26](#), [46/21](#), [47/1](#), [49/23](#) and [50/3](#). In its resolution [43/26](#), the Council called for close and timely cooperation between the Mechanism and any future investigations by the International Criminal Court or the International Court of Justice. The mandate is further elaborated in the Mechanism's terms of reference ([A/73/716](#), annex).
- 8.143 The creation of the Mechanism was welcomed by the General Assembly in its resolution [73/264](#). The Assembly, in its resolutions [75/238](#), [76/180](#) and [77/227](#), called upon the United Nations to ensure that the Mechanism was afforded the flexibility that it needed in terms of staffing, location and operational freedom so that it could deliver as effectively as possible on its mandate.

Programme of work

Objective

- 8.144 The objective, to which the Mechanism contributes, is to ensure accountability of perpetrators and justice for victims of the most serious international crimes and violations of international law committed in Myanmar since 2011.

Strategy and external factors for 2024

- 8.145 To contribute to the objective, the Mechanism will:
- (a) Collect and analyse information and evidence regarding crimes within its mandate, including by undertaking in-person investigative missions;
 - (b) Provide protection and support services to witnesses and information providers, including through cooperation with national authorities and other partners;
 - (c) Develop and maintain a secure electronic information management system that can protect against evolving risks to security in the use of information and communications technologies and facilitate the analysis of vast quantities of information, including social media data and testimonial, photographic and video evidence;
 - (d) Share evidence and analysis with national, regional or international courts or tribunals in accordance with its mandate and cooperate with any ongoing or future proceedings by such courts or tribunals, including the International Criminal Court and the International Court of Justice;
 - (e) Engage in outreach to explain its mandate, strategies and deliverables to relevant stakeholders, in particular to victims and witnesses, using various communication tools and civil society dialogues.
- 8.146 The above-mentioned work is expected to result in:

- (a) The collection and preservation of information and evidence that can be shared with national, regional or international courts or tribunals in relation to the most serious international crimes and violations of international law committed in Myanmar since 2011;
 - (b) The initiation of fair and independent criminal proceedings in national, regional or international courts or tribunals in relation to the aforementioned crimes;
 - (c) Greater understanding of the Mechanism's mandate, work and expected results by all relevant stakeholders, including victims and the general public, in particular inside Myanmar.
- 8.147 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Relevant Member States will permit the Mechanism to access crime sites, conduct evidence collection, including witness interviews, and engage in victim outreach activities within their territories;
 - (b) National, regional or international courts or tribunals will seek to exercise jurisdiction over the crimes within the Mechanism's mandate and the relevant authorities will continue to request the sharing of information from the Mechanism.
- 8.148 With regard to cooperation with other entities at the global, regional, national and local levels, the Mechanism continues to engage with a diverse range of actors, including Member States, individuals, civil society organizations and business entities, to seek relevant information and ensure support for its mandate.
- 8.149 With regard to inter-agency coordination and liaison, the Mechanism continues to consult with international courts and other international accountability mechanisms, in particular in the areas of legal and judicial cooperation, information management systems, witness protection and support, and training. The Mechanism also cooperates with other United Nations entities working on issues relating to Myanmar.
- 8.150 The Mechanism integrates a gender perspective in its operational activities, deliverables and results as appropriate. The Mechanism will continue its focus on sexual and gender-based crimes and crimes against children, including appropriate access to protection and support measures for victims of such crimes.

Impact of the pandemic and lessons learned

- 8.151 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of the Mechanism's mandate, in particular by slowing progress on in-person data collection and witness interviews, outreach events and diplomatic missions. Postponed travel resulted in delays in gathering evidence; knowledge gaps and misconceptions about the work of the Mechanism; and reduced progress on the negotiation and conclusion of cooperation arrangements with Member States. Whenever possible, the Mechanism changed its approach from in-person to virtual.
- 8.152 The Mechanism continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including the extensive use of open-source investigations and the use of secure electronic communications in lieu of travel. However, for certain fundamental investigative steps, virtual meetings are a poor substitute for in-person engagement. Accordingly, the Mechanism reinstated formerly established practices, including travelling to conduct in-person interviews of witnesses in various locations; systematically undertaking more direct outreach with potential witnesses and victims' groups; and engaging with Member States on support and approval for key investigative and outreach activities in their territory.

Evaluation activities

- 8.153 The following evaluations conducted by the Mechanism and completed in 2022 have guided the proposed programme plan for 2024:
- (a) Evaluation on the sharing of information with third parties;
 - (b) Evaluation on the effectiveness of the Mechanism’s communication and public outreach strategy.
- 8.154 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024, as reflected in results 2 and 3. For example, the Mechanism has developed evidence packs and analytical products that better satisfy the requests of its diverse sharing partners. The Mechanism plans to develop impactful visual outreach products in relevant Myanmar languages to better communicate its mandate to stakeholders and dispel misconceptions about its work.
- 8.155 An evaluation to be conducted by the Mechanism to assess the establishment of cooperation arrangements is planned for 2024.

Programme performance in 2022

Increased social media information and data available for sharing

- 8.156 Given the proliferation of information relevant to the Mechanism’s mandate posted on various social media platforms, the Mechanism recognized in the early stages of its operations the need to collect, preserve and analyse such information. In 2022, the Mechanism therefore prioritized the identification and collection of social media information, significantly increasing the volume of such information for analysis and, in turn, being made available for sharing with relevant authorities. Of the total of approximately 20 million information items collected as at the end of 2022, over 16 million items were from social media.
- 8.157 Progress towards the objective is presented in the performance measure below (see figure 8.XIII).

Figure 8.XIII

Performance measure: number of social media information items available for sharing (annual)

Planned results for 2024

Result 1: availability of evidence packs and analytical documents for sharing with relevant entities

Programme performance in 2022 and target for 2024

- 8.158 The Mechanism's work contributed to the availability of 90 evidence packs and analytical documents for sharing with relevant entities, which exceeded the planned target of 15 evidence packs and analytical documents.
- 8.159 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 8.XIV).

Figure 8.XIV

Performance measure: number of evidence packs and analytical documents available for sharing (annual)

Result 2: increased access to evidence with broadest possible admissibility in national, regional and international courts

Programme performance in 2022 and target for 2024

- 8.160 The Mechanism's work contributed to the availability of 220 screening notes and witness statements for sharing, which exceeded the planned target of 105.
- 8.161 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 8.XV).

Figure 8.XV

Performance measure: number of screening notes and witness statements available for sharing (cumulative)

Result 3: domestic and international authorities have access to evidence that assists in establishing specific crimes and identifying perpetrators

Proposed programme plan for 2024

- 8.162 A core aspect of the Mechanism’s mandate is to build case files that can be shared with national or international authorities to facilitate investigations and prosecutions. To date, the Mechanism has shared evidence with two prosecutorial authorities, as well as the parties to proceedings at the International Court of Justice. These three jurisdictions have different rules and procedures regarding the admissibility of evidence, the protection and privacy of witnesses and the language of documents and evidence they can consider, and different focus areas regarding the targets of and the elements of the crimes and violations relating to their respective investigations and proceedings.

Lessons learned and planned change

- 8.163 The lesson for the Mechanism was the importance of regular communication with its sharing partners to better understand the needs of their respective jurisdictions and to tailor its analytical products to fit those needs. Examples include the Mechanism’s efforts in finding the most appropriate machine translation service to translate materials in support of judicial authorities, and the Mechanism’s efforts to analyse millions of information items from social media in order to identify any organized efforts to promote hate speech against Rohingya. In applying the lesson, the Mechanism will adopt new technologies that will leverage existing databases to advance its analytical tools, computer-aided translations and computer vision, to enable the analysis of large quantities of data collected in diverse formats and language scripts in order to provide more tailored, comprehensive and timely analytical products to relevant jurisdictions.
- 8.164 Expected progress towards the objective is presented in the performance measure below (see table 8.47).

Table 8.47
Performance measure: domestic and international authorities have access to:

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Sources of information and evidence	Repository of diverse information and evidence	Repository and analysis of information and evidence regarding priority situations and incidents	Repository of evidence and targeted analysis of hate speech; military structures and chain of command; sexual and gender-based crimes; and crimes against children	Repository of evidence and targeted analysis of financial structures and connections between persons and groups of interest; and digital analysis and geolocation of sites of interest

Legislative mandates

8.165 The list below provides all mandates entrusted to the Mechanism.

General Assembly resolutions

73/264	Situation of human rights in Myanmar	75/287	The situation in Myanmar
74/246 ; 75/238 ; 76/180 ; 77/227	Situation of human rights of Rohingya Muslims and other minorities in Myanmar		

Human Rights Council resolutions

39/2 ; 42/3 ; 47/1 ; 50/3	Situation of human rights of Rohingya Muslims and other minorities in Myanmar	43/26 ; 46/21 ; 49/23	Situation of human rights in Myanmar
--	---	--	--------------------------------------

Deliverables

8.166 Table 8.48 lists all deliverables of the Mechanism.

Table 8.48
Deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	2	2	2	2
1. Reports for the General Assembly	1	1	1	1
2. Reports for the Human Rights Council	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	4	4	5	5
Meetings of:				
3. The Human Rights Council	1	1	1	1

6. The Committee for Programme and Coordination	1	1	1	1

Part III International justice and law

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
7. The Fifth Committee	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	–	7	6	7
8. Workshops for national, regional and international courts or tribunals on the Mechanism’s investigations in order to facilitate proceedings	–	3	4	3
9. Workshop on collaboration between civil society groups working on Myanmar and the Mechanism	–	4	2	4
Technical materials (number of materials)	15	265	90	155
10. Compilation of information and evidence of international crimes	10	48	15	40
11. Compilation of analysis of evidence of international crimes	5	42	15	25
12. Screening notes and witness statements	–	175	60	90
Fact-finding, monitoring and investigation missions (number of missions)	4	6	5	6
13. Investigation missions to identify and meet information providers and witnesses and collect evidence	4	6	5	6
C. Substantive deliverables				
Consultation, advice and advocacy: consultations and cooperation with more than 50 entities, including Member States and civil society organizations, about the Mechanism.				
Databases and substantive digital materials: database and analytical tools to consolidate, organize, preserve, verify and analyse relevant information and evidence.				
Direct service delivery: protection and support measures for Mechanism witnesses, including 150 threat assessments to identify security risks to witnesses, and referrals of witnesses to service providers to facilitate medical and psychosocial support.				
D. Communication deliverables				
Outreach programmes, special events and information materials: 2 conferences with relevant stakeholders and civil society organizations on the Mechanism’s mandate and activities; 2 periodic bulletins and other visual material about the Mechanism’s work, tailored to specific audiences in the languages used in Myanmar.				
External and media relations: 15 press conferences and media interviews; panels and events; and briefings to the diplomatic and academic communities on progress of the Mechanism’s work.				
Digital platforms and multimedia content: simplified and more visual content on the Mechanism’s website and social media.				

B. Proposed post and non-post resource requirements for 2024

Overview

8.167 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 8.49 to 8.51.

Table 8.49

8.168 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 8.52 to 8.54 and figure 8.XVI.

8.169 As reflected in tables 8.52 (1) and 8.53 (1), the overall resources proposed for 2024 amount to \$13,083,100 before recosting, reflecting a net increase of \$492,800 (or 3.9 per cent) compared with the appropriation for 2023. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of the Mechanism's mandate.

Explanation of variances by factor

Overall resource changes

Other changes

8.170 As reflected in table 8.52 (1), resource changes reflect an increase of \$492,800, as follows:

- (a) An increase of \$391,500 under other staff costs, related to the proposed establishment of one Associate Field Security Coordination Officer (P-2), one Associate Witness Protection Officer (P-2) and one Information Management Assistant (General Service (Other level)). Following the military coup in Myanmar in 2021, there has been an increase in reports of serious international crimes committed in Myanmar and of persons coming forward with information about these crimes. The significant and unanticipated increase in the number of events under analysis and the quantity of materials collected has presented a growing challenge to the Mechanism. In the three years since it became operational, the Mechanism has collected and processed over 20 million information items from over 300 sources and is undertaking more investigative missions and interviewing more witnesses amid a worsening security situation where many of the witnesses are located. The Mechanism has also engaged with a growing number of at-risk and vulnerable witnesses in Myanmar and other locations where the Mechanism has no physical access, resulting in an increase in the Mechanism’s activities and assessments related to the safety and security of witnesses. Owing to the fluid and deteriorating security situation in areas where many of the Mechanism’s witnesses reside, the Mechanism is undertaking additional responsibilities in the area of witness protection, as required by its terms of reference. Those responsibilities include monitoring and analysing an increasing number of threat actors and their activities and producing comprehensive and regularly updated country- or area-specific situation threat and risk assessments. The Mechanism’s personnel, premises and assets are also facing greater threats and risks with growing awareness of the potential prosecutions that may result from the Mechanism’s work. To meet these challenges, the establishment of the following new positions is proposed: one Associate Field Security Coordination Officer (P-2), one Associate Witness Protection Officer (P-2) and one Information Management Assistant (General Service (Other level)). The details are provided in annex III;

- (b) An increase of \$69,800 under travel of staff required for the investigators, legal officers, witness protection and support officers and interpreters to carry out investigations (evidence collection and witness interviews);
- (c) An increase of \$31,500 under non-post resources to support the proposed establishment of the three positions, falling under contractual services (\$8,100), general operating expenses (\$16,200), supplies and materials (\$900) and furniture and equipment (\$6,300).

Extrabudgetary resources

- 8.171 As reflected in tables 8.52 (2) and 8.53 (2), the Mechanism expects to continue to receive cash contributions, which would complement regular budget resources. In 2024, extrabudgetary resources are estimated at \$1,244,300 and would be used mainly to enhance the Mechanism’s investigative capacity, including through the recruitment of personnel with highly specialized expertise, the procurement of specialized technology and tools for the preservation of digital information, and the convening of a forum to engage with civil society organizations. The estimated decrease of \$1,965,100 reflects the anticipated income, based on contribution agreements with donors.
- 8.172 The extrabudgetary resources under the present section are subject to the oversight of the Mechanism, which has delegated authority from the Secretary-General.
- 8.173 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Mechanism continues to minimize energy consumption at its facilities, where it installed special external walls with thermal insulation panels to reduce the dispersion of heat, thermal windows with energy-efficient features designed to resist the loss of heat and cold, light emitting diode lights in all office and common areas, and a heating, ventilation and air conditioning system with thermostats in all offices and common areas to enable better control of the system.
- 8.174 Information on the timely submission of documentation and advance booking for air travel is reflected in table 8.55. The Mechanism will continue its efforts to enhance the rate of travel compliance through more frequent monitoring of compliance with advance booking requirements for air travel and by bringing up the issue in the monthly resources updates provided to management.

III. International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011

Foreword

In 2024, the International, Impartial and Independent Mechanism will continue to advance the implementation of its mandate to assist in the investigation and prosecution of the most serious crimes under international law committed in the Syrian Arab Republic since March 2011. The Mechanism will continue to conclude cooperation frameworks with information and evidence providers and increase the size and diversity of its central repository of information and evidence, including through targeted investigative work to advance projects within its structural investigation and respond to requests for assistance from competent jurisdictions. The Mechanism will also continue to optimize its working methods to ensure that it advances its structural investigation while responding to the growing number of requests for assistance.

The Mechanism will continue to refine the process of using digital tools and new approaches to identifying and analysing relevant material within its central repository of information and evidence.

The Mechanism remains committed to a victim- and survivor-centred and inclusive approach to justice, particularly regarding different categories of victims and survivors or historically overlooked and insufficiently documented crimes, such as gender-based violence, including sexual violence, and crimes against children.

(Signed) Catherine **Marchi-Uhel**
Head of the Mechanism

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 8.175 The Mechanism is responsible for assisting in the investigation and prosecution of persons responsible for the most serious international crimes committed in the Syrian Arab Republic since March 2011. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [71/248](#), as further elucidated in the Mechanism's terms of reference ([A/71/755](#), annex). The Mechanism has a responsibility to support criminal accountability and in doing so provides support to ongoing investigations and prosecutions in competent jurisdictions. It also generates analytical products that can be shared with competent jurisdictions that either currently, or may in the future, have jurisdiction over the crimes within the Mechanism's mandate.

Programme of work

Objective

- 8.176 The objective, to which the Mechanism contributes, is to achieve accountability for the most serious international crimes committed in the Syrian Arab Republic since March 2011.

Strategy and external factors for 2024

- 8.177 To contribute to the objective, the Mechanism will:
- (a) Build the central repository through existing or new cooperation agreements and focused investigative work and analysis of evidence within the framework of its structural investigation and in response to requests for assistance from competent jurisdictions;
 - (b) Prepare analytical products in the context of projects within active lines of inquiry in its structural investigation;
 - (c) Share information, evidence, analytical products and expertise with national, regional or international courts and tribunals that have jurisdiction over these alleged crimes;
 - (d) Develop and implement its victim- and survivor-centred approach and integrate a focus on gender-based violence, including sexual violence, and crimes against children throughout its work, as well as addressing broader justice objectives, such as assisting efforts to clarify the fate of missing persons;
 - (e) Promote an integrated approach to justice and accountability through effective dialogue and coordination, including with criminal justice actors, civil society and other United Nations actors.
- 8.178 The above-mentioned work is expected to result in:
- (a) Requesting parties having access to crucial evidence of alleged crimes, stored in a central repository and available for collation and distribution;
 - (b) Strengthened investigations, prosecutions and trials by jurisdictions with competence over the alleged crimes within the Mechanism's mandate;

- (c) Greater accessibility to, and influence over, justice processes for victims and survivors, including those disadvantaged by gender-based and/or age-related discrimination, of crimes in the Syrian Arab Republic;
 - (d) The strengthening of the broadest possible range of justice initiatives compatible with the Mechanism's mandate.
- 8.179 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Entities and individuals will provide and/or facilitate the Mechanism's access to information and evidence in various formats for inclusion in the central repository;
 - (b) Further materials on chemical weapons usage compiled by the Organisation for the Prohibition of Chemical Weapons-United Nations Joint Investigative Mechanism will be made available for collection.
- 8.180 With regard to cooperation with other entities at the global, regional, national and local levels, the Mechanism will continue to request access to a growing number of States for evidence-gathering as well as to cooperate with competent jurisdictions, international organizations, Syrian and international civil society organizations and individuals, utilizing a variety of cooperation frameworks.
- 8.181 With regard to inter-agency coordination and liaison, the Mechanism will continue to cooperate with other United Nations entities working on issues related to the Syrian Arab Republic, including the Independent International Commission of Inquiry on the Syrian Arab Republic, in accordance with its mandate.
- 8.182 The Mechanism integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the Mechanism continues to incorporate a gender perspective into its evidentiary strategies to avoid bias that results in the incomplete or inaccurate recording of harm experienced by females and to ensure that due attention is paid to sexual violence against males.
- 8.183 In line with the United Nations Disability Inclusion Strategy, the Mechanism will integrate throughout its work the experiences and perspectives of persons with disabilities in the Syrian context. This is consistent with its victim- and survivor-centred approach, whereby the Mechanism seeks to bring to light and address the experiences of a broad range of victims and survivors who have been historically overlooked.

Impact of the pandemic and lessons learned

- 8.184 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular investigative missions resulting from the travel restrictions, as well as the cancellation of visits from and to national war crimes units relating to requests for assistance and the collection and sharing of evidence.
- 8.185 The Mechanism continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including the continued refinement of its technical capabilities and the adjustment of analytical workflows, evidence collection and secure processing of evidence to facilitate continued remote working arrangements. However, the COVID-19 pandemic also highlighted that many activities cannot be conducted virtually, including investigative missions, as well as most evidence registration, preservation and processing activities.

Evaluation activities

- 8.186 An evaluation completed in 2022 by the Mechanism of the workflows of all sections in respect of a gender analysis into core activities has guided the proposed programme plan for 2024.

- 8.187 The results and lessons of the evaluation have been taken into account for the proposed programme plan for 2024. For example, the evaluation affirmed the effectiveness of efforts, reflected in results 1 and 2, in developing specialized products to better integrate a gender perspective into the Mechanism’s substantive work and in building trust and credibility with Syrian civil society organizations and victim and survivor associations through sustained engagement. The outcome of these efforts, as reflected in shared analytical products, will be monitored and reported on to ensure meaningful impact and the sustainability of the Mechanism’s victim- and survivor-centred approach.
- 8.188 An evaluation of the Lausanne platform for consultations with Syrian civil society organizations is planned for 2024.

Programme performance in 2022

Expanded and intensified engagement by civil society in the Mechanism’s work

- 8.189 The Mechanism’s multilateral and bilateral outreach activities to civil society actors enable it to deepen trust and cooperation with key sources of information and to enhance the diversity of contributions for inclusive justice efforts regarding core international crimes committed in the Syrian Arab Republic. Starting in 2022, the Mechanism supplemented its annual consultations held under the Lausanne platform by organizing two additional annual meetings in Geneva. One meeting was focused on victim and survivor groups and family associations, creating a space for the Mechanism to seek participants’ perspectives of justice and hear more about the barriers to the participation of some communities in justice processes. The other meeting was conducted in a workshop format, where specialized civil society organizations discussed critical challenges in the documentation of core international crimes and the related analytical work linked to one of the Mechanism’s strategic lines of inquiry.
- 8.190 Progress towards the objective is presented in the performance measure below (see table 8.56).

Table 8.56
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Enhanced trust of civil society organizations in the work of the Mechanism through consultations held under the Lausanne platform	Enlarged civil society participation, including victim and survivor groups and family associations, through virtual engagement under the Lausanne platform	Victim and survivor associations and specialized civil society organizations enabling enhanced input to the Mechanism’s structural investigation through expanded and tailored consultations

Planned results for 2024

Result 1: improved integration of a gender perspective throughout the Mechanism’s substantive work to facilitate inclusive justice

Programme performance in 2022 and target for 2024

- 8.191 The Mechanism’s work contributed to 23 specialized products integrating a gender perspective available to external entities, which exceeded the planned target of 18 specialized products.
- 8.192 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 8.XVII).

Figure 8.XVII
Performance measure: number of specialized products available to external entities integrating a gender perspective (annual)

Result 2: enhanced victim- and survivor-centred approach for inclusive justice

Programme performance in 2022 and target for 2024

- 8.193 The Mechanism’s work contributed to 19 engagements of victims and survivors, which exceeded the planned target of 16 engagements.
- 8.194 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 8.XVIII).

Figure 8.XVIII
Performance measure: number of engagements of victims and survivors (annual)

Result 3: increased availability of information in support of ongoing investigations and prosecutions and the search for missing persons

Proposed programme plan for 2024

- 8.195 The Mechanism’s work contributed to 23 proactive activities for sharing information to support the search for missing persons and information, evidence and analytical products to support investigations, prosecutions and judicial proceedings.

Lessons learned and planned change

- 8.196 The lesson for the Mechanism was that there is a demand from competent jurisdictions and Syrian civil society in relation to missing persons for additional support and that the value and use of the information and evidence collected and the analytical work developed by the Mechanism can be maximized by being offered proactively, without waiting for requests for assistance. In applying the lesson, the Mechanism will increase its proactive engagement by shifting some resources to focus on this goal, prioritizing the sharing of high-impact information, evidence and products.
- 8.197 Expected progress towards the objective is presented in the performance measure below (see figure 8.XIX).

Figure 8.XIX
Performance measure: number of information and evidence packages proactively made available to competent jurisdictions and to assist the search for missing persons (annual)

Legislative mandates

- 8.198 The list below provides all mandates entrusted to the Mechanism.

General Assembly resolutions

71/248	International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011	75/193; 76/228; 77/230	Situation of human rights in the Syrian Arab Republic
--------	---	------------------------	---

Deliverables

- 8.199 Table 8.57 lists all deliverables of the Mechanism.

Table 8.57
Deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	1	1
1. Reports for the General Assembly	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	4	4	4	4
Meetings of:				
2. The General Assembly	1	1	1	1
3. The Fifth Committee	1	1	1	1
4. The Committee for Programme and Coordination	1	1	1	1
5. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	6	6	6	6
6. Workshops on collaboration strategies between NGOs in the Syrian Arab Republic and the Mechanism	2	2	2	2
7. Workshops on accountability for civil society	2	2	2	2
8. Seminar on victim-centred approach	2	2	2	2
Technical materials (number of materials)	87	126	195	193
9. Compilation of information and evidence of international crimes, including in response to requests for assistance by prosecuting authorities	50	50	90	90
10. Compilation of analysis of evidence of international crimes, for sharing with relevant authorities	35	72	100	100
11. Packages of analytical products relevant to individual criminal responsibility for specific international crimes	2	4	5	3
Fact-finding, monitoring and investigation missions (number of missions)	15	13	22	20
12. Investigation-related missions to identify and meet sources and potential witnesses, to interview witnesses and/or to collect evidence for the Mechanism’s repository of information and evidence	15	13	22	20
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with and cooperation in support of national judicial authorities from more than 15 countries; and consultations with civil society, including a broad range of victim and survivor communities.				
Databases and substantive digital materials: central repository of evidence of crimes committed in the Syrian Arab Republic since March 2011.				
Direct service delivery: protection and support measures for Mechanism witnesses, including threat assessments to identify security risks to witnesses and referrals of witnesses to service providers to facilitate medical and psychosocial support.				
D. Communication deliverables				
Outreach programmes, special events and information materials: periodic bulletins for some 200 NGOs and other entities; information and “frequently asked questions” for general dissemination; background papers about the Mechanism; and awareness-raising meetings for United Nations partners of the Mechanism.				
External and media relations: press statements, press conferences and interviews; panels and events; and briefings to the diplomatic and academic communities.				
Digital platforms and multimedia content: the Mechanism’s website.				

B. Proposed post and non-post resource requirements for 2024

Overview

8.200 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 8.58 to 8.60.

Table 8.58

8.201 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 8.61 to 8.63 and figure 8.XX.

8.202 As reflected in tables 8.61 (1) and 8.62 (1), the overall resources proposed for 2024 amount to \$17,167,400 before recosting, reflecting a net increase of \$119,400 (or 0.7 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 8.XX
Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor

Overall resource changes

Technical adjustments

8.203 As reflected in table 8.61 (1), resource changes reflect an increase of \$119,400, which relates to the provision of continuing vacancy rates for two posts of Investigator (P-3) that were reassigned in 2023 and subject to a 50 per cent vacancy rate in accordance with the established practice for reassigned posts.

Other changes

8.204 As reflected in table 8.61 (1), cost-neutral changes are proposed in respect of the redeployment of three posts, namely, Investigator (P-3), Associate Trial Attorney (P-2) and Assistant Investigator (P-1) from the Collection and Analysis Section to the Support and Sharing Section; and the redeployment of one post of Associate Trial Attorney (P-2) from the Collection and Analysis Section to the Information Systems Management Section (see annex III).

Extrabudgetary resources

8.205 As reflected in tables 8.61 (2) and 8.62 (2), extrabudgetary resources are estimated at \$7,414,800. The resources would complement regular budget resources and would be used mainly to address the increase in requests for assistance from competent jurisdictions; to provide for additional lines of inquiry and/or new case files that require additional expertise on specific types of crimes; to address secondary trauma; to support records management; and to strengthen the Mechanism’s translation and interpretation capabilities. The resources would also be used to support external relations and outreach, including for civil society in the Syrian Arab Republic, through virtual and in-person events and consultations. The projected increase of \$1,422,000 mainly reflects the requirements for the additional posts, travel of staff and contractual services.

- 8.206 The extrabudgetary resources under the present section are subject to the oversight of the Mechanism, which has delegated authority from the Secretary-General.
- 8.207 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Mechanism is integrating environmental management practices into its operations. The Mechanism will seek to minimize its environmental footprint by participating in energy conservation efforts led by the United Nations Office at Geneva and, where appropriate and where permitted by the Secretariat, utilizing shared technological services.
- 8.208 Information on the timely submission of documentation and advance booking for air travel is reflected in table 8.64. The nature of the Mechanism’s work means that staff members are often required to travel at short notice, as they need to be reactive to the schedules of the Mechanism’s sources. The low compliance rate in 2022 is due mainly to the changing global travel restrictions resulting from the COVID-19 pandemic, which prevented the Mechanism from complying with the rule to purchase air tickets at least two weeks before the commencement of travel. The Mechanism continues to deploy initiatives that will have a positive impact on advance travel planning, including enhanced centralized monitoring and the dissemination of a guidance document on official travel containing clear procedures with regard to the travel approval process.

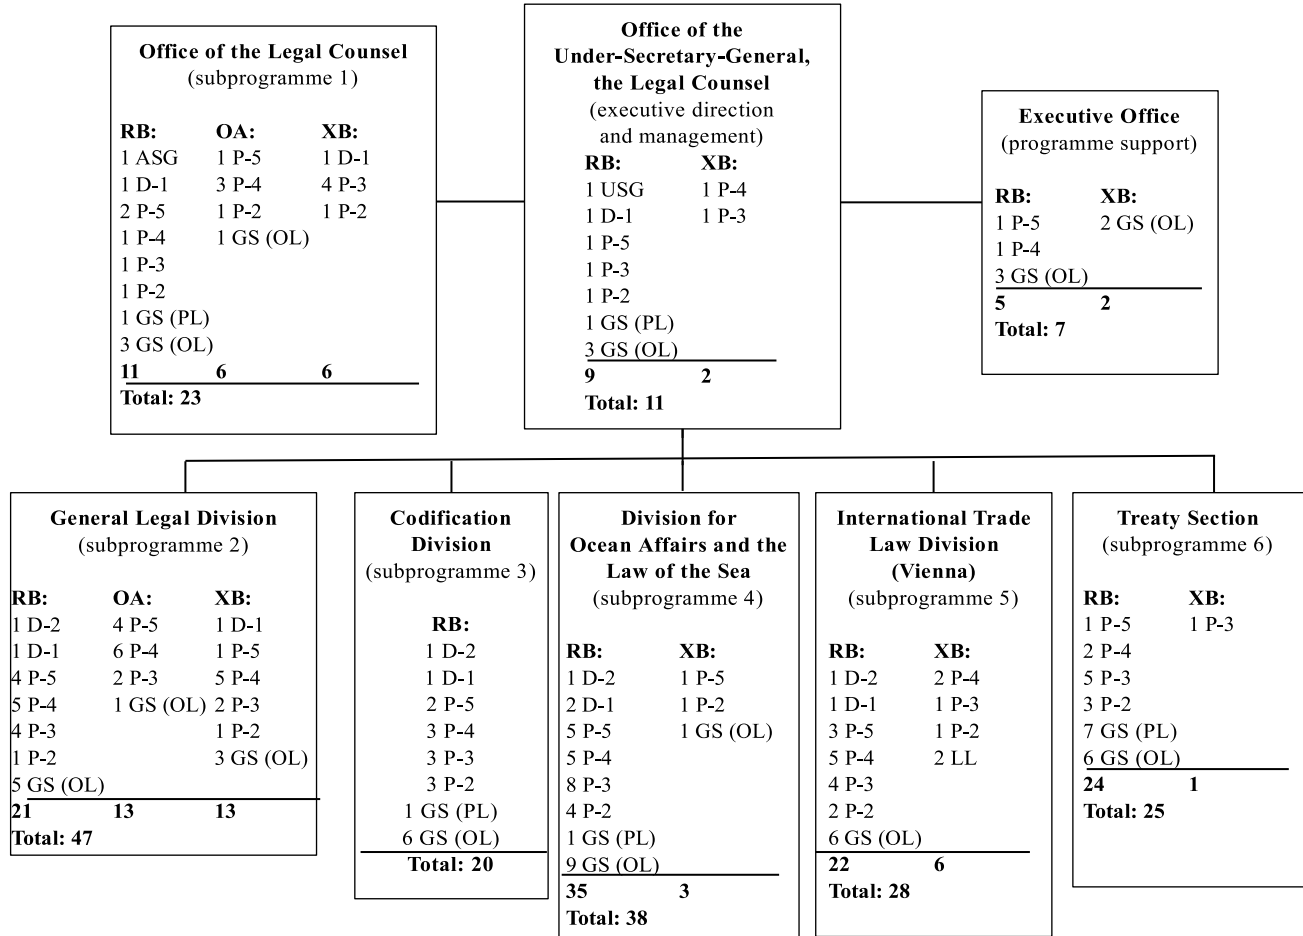

Table 8.64

The Advisory Committee trusts that additional information on the costs recovered by the Office of Legal Affairs will be included in the next programme budget submission (para. III.40).

The financial performance report on the programme budget for 2022 will include consolidated information on the amounts recovered in 2022, by type of service.

Annex III

Summary of proposed post changes, by component and subprogramme

A. Independent Investigative Mechanism for Myanmar

<i>Component</i>	<i>Positions</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Programme of work	1	P-2	Establishment of 1 Associate Field Security Coordination Officer	<p>To support the increase in the Mechanism's activities, including the rise in missions and direct engagements with information providers, particularly with the lifting of coronavirus disease (COVID-19)-related restrictions as well as higher security and safety threats and risks for Mechanism personnel, premises and assets following the military coup in Myanmar in February 2021.</p> <p>The incumbent will, in coordination with the Department of Safety and Security of the Secretariat, assess the security situation in countries where the Mechanism undertakes investigative missions to identify any potential threats and risks and provide input to mission plans outlining the necessary security risk mitigation measures. In countries and areas where the risk is higher, the incumbent will develop a mission-specific security risk management approach, identify comprehensive security risk mitigation measures and coordinate closely with relevant Mechanism personnel on their implementation. The incumbent will maintain regular communication and coordinate with the Department of Safety and Security and host country security counterparts.</p>
	1	P-2	Establishment of 1 Associate Witness Protection Officer	<p>To support the increase in the Mechanism's activities related to the safety and security of at-risk and vulnerable information providers and witnesses located in areas where the Mechanism has no access, including by providing essential additional capacity to support the increase in investigative activities and ensuring that those investigative activities are carried out safely and no witnesses are harmed.</p> <p>The incumbent will carry out protection assessments of witnesses in Myanmar and other locations; implement appropriate procedures and methods of work to ensure the safety and security of witnesses before, during and after their cooperation with the Mechanism; contribute to the development of innovative operating practices and methodologies for the remote and in-depth monitoring of areas where witnesses are located; provide operational support to investigative teams during missions; and provide guidance on secure contact methodologies for witnesses and information providers. The incumbent will also ensure that the Mechanism has adequate capacity to carry out its investigations and outreach efforts while safeguarding the safety and security of high-risk witnesses and information providers.</p>
	1	GS (OL)	Establishment of 1 Information Management Assistant	<p>To support the need to collect and process the expanded volume of information and evidence in the Mechanism's electronic information management system, and the search and organization functions of the system to identify specific information and evidence of relevance, including for sharing with competent authorities.</p>

Part III **International justice and law**

<i>Component</i>	<i>Positions</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
				<p>The incumbent will assist with the preparation, organization and administrative management of the significantly expanded volume of information and evidence collected by the Mechanism. As at 31 December 2022, the Mechanism had collected over 20 million information items in multiple formats and language scripts. The incumbent will also supervise the intake and proper storage of materials collected until they are registered and processed; assist in the coding and categorization of documents and other material entered into the Mechanism’s electronic information management system; review evidentiary materials, including written documents, videos, audio files and any other forms of information; use specialized analysis software to search evidence collections for specified information and create reports; assess evidence for relevance and admissibility in criminal proceedings; and assist in the categorization of evidence collected and with case management tasks more generally.</p>

Abbreviation: GS (OL), General Service (Other level).

B. International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011

<i>Component</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Programme of work	1	P-2	Redeployment of Associate Trial Attorney from Collection and Analysis Section to Information Systems Management Section	To respond to the significantly increased workload in the Information Systems Management Section related to the legal and regulatory aspects of the Mechanism's information governance. The incumbent will handle legal issues around confidentiality and security of information, management of evidence, data transfer and processing, and Internet resource exploitation.
	2	P-2/1	Redeployment of 1 Associate Trial Attorney (P-2) and 1 Assistant Investigator (P-1) from Collection and Analysis Section to Support and Sharing Section	To respond to the significant increase in the number and scope of requests for assistance from competent jurisdictions, the growing volume of records being shared and the augmentation of interactions with information providers regarding cooperation matters and consent issues. The incumbents will enhance the Mechanism's support to ongoing national investigations and prosecutions.
	1	P-3	Redeployment of Investigator from Collection and Analysis Section to Support and Sharing Section	To provide support to the Investigator (P-4) in the Support and Sharing Section in responding to the increasing number of requests for assistance from competent jurisdictions to collect additional evidence relevant to specific ongoing investigations and identify, locate and interview witnesses.

Foreword

In 2024, the Department of Economic and Social Affairs will continue to support Member States in the realization of internationally agreed development goals and shared social, economic and environmental aspirations.

The Department's proposed programme budget for 2024 responds to the priorities of Member States as shaped by current development trends and as guided by legislative mandates and organizational objectives emerging from the various intergovernmental processes that inform the Department's work.

With our development trajectory in protracted crisis, the core mission of the Organization has never been more critical. The Department will continue to champion the 2030 Agenda for Sustainable Development as the blueprint for crisis response and recovery. By actioning the commitments contained in the 2030 Agenda and its 17 Sustainable Development Goals, the Paris Agreement and the Addis Ababa Action Agenda, we can realize a stable and inclusive recovery, build resilience and move the world towards sustainable development for all.

We stand ready with the broader international development community to support Member States in their efforts.

(Signed) **LI Junhua**
Under-Secretary-General for Economic and Social Affairs

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 9.1 The Department of Economic and Social Affairs supports the development pillar of the United Nations Secretariat, including by ensuring international cooperation in the pursuit of sustainable development for all. The Department's responsibilities include: (a) providing substantive support to the bodies established under the Charter of the United Nations that deal with development issues, namely, the General Assembly, the Economic and Social Council and its related functional commissions, and expert bodies; (b) monitoring and analysing development trends, prospects and policy issues globally; and (c) providing assistance in translating policy frameworks developed in United Nations conferences and summits into policies and programmes at the country level and supporting Member States in building national capacities for implementation, with a specific focus on supporting the implementation of the 2030 Agenda for Sustainable Development and the achievement of the Sustainable Development Goals through, among others, the regular programme of technical cooperation and United Nations Development Account projects. The mandate derives from the proposals put forward in the 1997 report of the Secretary-General entitled "Renewing the United Nations: a programme for reform" (A/51/950). In implementing the proposals, the General Assembly, in its resolution 52/220, noted the creation of the new Department of Economic and Social Affairs.
- 9.2 The Department forms the backbone of the normative and analytical support provided by the Secretariat to intergovernmental bodies and the processes that address the economic, social and environmental dimensions of sustainable development, including spearheading numerous initiatives to advance economic and social development issues.

Strategy and external factors for 2024

- 9.3 Concern was expressed at the Sustainable Development Goals Summit, held in New York in September 2019, about the slow progress made in achieving the Goals in many areas. Pledges were made at the Summit to make the coming decade one of action and delivery, in order to realize the Goals by 2030. Accordingly, a coherent and integrated approach to the work of the United Nations to support Member States in the urgent need to accelerate action on all levels and by all stakeholders, to fulfil the vision and Goals of the 2030 Agenda, remains paramount. Throughout 2020 and 2021, the coronavirus disease (COVID-19) pandemic added an urgent context to the critical action areas committed to by Member States in the political declaration adopted at the Summit.
- 9.4 The combined impact of ongoing and interlinked crises has become increasingly challenging for the global community. The evolving global situations have added an urgent dimension to the need for progress within the 10 critical action areas outlined by Member States in the political declaration at the Sustainable Development Goals Summit in September 2019. The most vulnerable countries, including least developed countries, landlocked developing countries and small island developing States, have been particularly challenged. In addition, middle-income countries still face significant challenges in achieving sustainable development. Moreover, women and girls continue to face disproportionate impacts, and the world's poorest and most vulnerable people have been hard hit.
- 9.5 Guided by the outcomes of the Sustainable Development Goals Summit and informed by the report of the Secretary-General on Our Common Agenda (A/75/982), the Department will continue its focus on championing synergistic, future-focused approaches to address multiple, interlinked crises and accelerate a recovery that improves the livelihood and lives of all people, including through its work to promote climate action, sustainable infrastructure investment and risk-informed development cooperation.
- 9.6 The Department supports Member States through major global conferences and summits and regular meetings in the economic, social and environmental fields. As a global thought leader, the

Department forecasts economic, social and population trends and generates, analyses and compiles a wide range of data and statistics to inform and advise Member States and other stakeholders as they take stock of trends and policy options to address common problems. The Department also assists in translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, supports Member States in building national capacities.

- 9.7 With attention given to least developed and landlocked developing countries, small island developing States and countries in Africa, the Department identifies emerging trends and effective policy options for eradicating poverty, addressing inequalities and promoting opportunities and progress towards sustainable development for all. It also undertakes capacity-building activities to support those countries in special situations in achieving the Sustainable Development Goals.
- 9.8 In 2024, the Department will continue to:
- (a) Support Member States in preparing for important intergovernmental processes and milestones, including the fourth International Conference on Small Island Developing States and the Summit of the Future;
 - (b) Strengthen the availability of critical social, demographic and economic data and analysis for guiding transformative policy in the context of crisis recovery, to create more resilient and inclusive societies and accelerate achievement of the Sustainable Development Goals;
 - (c) Strengthen thought leadership by taking a multidimensional and intersectional approach to analysis, in support of intergovernmental processes that account for the differentiated impacts that emerging and ongoing trends, policies and programmes have on the poorest and the most vulnerable, and on women and girls;
 - (d) Leverage workstreams on climate action, financing for sustainable development, digital transformation, data accessibility, projections and frontier issues to move the world closer to achieving sustainable development for all;
 - (e) Enhance national implementation of internationally agreed objectives through its structured strategic and substantive support for the resident coordinator system and United Nations country teams, with a focus on countries in Africa and in special situations.
- 9.9 With regard to cooperation with other entities at the global, regional, national and local levels, the Under-Secretary-General for Economic and Social Affairs will continue to serve as convener of the expanded Executive Committee on Economic and Social Affairs Plus. The Department, through this Committee, will work with United Nations entities to ensure that their intergovernmental bodies contribute to the work of the high-level political forum on sustainable development and enhance common approaches and synergies to support Member States in the implementation of the 2030 Agenda. The Department will contribute to building multi-stakeholder partnerships and capacity development in thematic areas such as natural resources, water, energy, the climate, the ocean, transport, and science and technology, as well as special concerns of small island developing States. The Department will also contribute to the Collaborative Partnership on Forests to enhance collaboration and coordination on the sustainable management of all types of forests, and the full realization of the potential of forests to address global challenges.
- 9.10 With regard to inter-agency coordination and liaison, the Department will continue to support the General Assembly and the Economic and Social Council in the quadrennial comprehensive policy review of operational activities for development of the United Nations system, which helps to advance multilateral guidance for sustainable development, ranging from policy to normative mandates specific to the 2030 Agenda. This work is coordinated with United Nations system entities and the United Nations Sustainable Development Group. Having established an internal coordination capacity to support the resident coordinator system and the United Nations country teams, the Department will continue to facilitate more structured engagement with resident coordinators, through the Development Cooperation Office. This structured engagement further strengthens the Department's delivery of its capacity-building activities, assisting Member States in translating at

the national level global norms and policy frameworks for the achievement of the Sustainable Development Goals and other internationally agreed objectives. The Department will continue to rely on the leadership and coordination role of the resident coordinators and their offices to help to identify effective country-level entry points and partnerships. Furthermore, the Department will continue to work with various agencies and stakeholders to improve its capacities for policy analysis and knowledge production. The Department will continue to chair or co-chair inter-agency mechanisms on disability, Indigenous Peoples, older persons and young people, legal identity, financing for development, statistics, and science, technology and innovation, among others, playing an integral role in ensuring coherence across these topic areas. Moreover, as part of the ongoing effort to strengthen United Nations thought leadership to respond to the demands of the 2030 Agenda, the United Nations Economists' Network will continue to advance thinking and policy research on key current and emerging economic, financial and social development issues, specifically in the context of the 2030 Agenda.

- 9.11 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Continued cooperation with policymakers and relevant national, regional and international stakeholders and entities in the consideration of sustainable development issues in the General Assembly, the Economic and Social Council and the high-level political forum on sustainable development, as well as other intergovernmental processes serviced by the programme;
 - (b) Continued availability of up-to-date and accurate information, data and trends for the Department's analytical products;
 - (c) Governments and other relevant stakeholders continue to collaborate with the Department in undertaking the proposed programme activities with the necessary capacity and resources.
- 9.12 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. In line with the legislative mandates given by Member States, the Department will continue to mainstream a gender perspective into its normative and analytical work and its support for intergovernmental bodies. It will continue to apply gender analysis in its work and will highlight issues related to gender equality in the substantive documentation, programme and deliberations of intergovernmental bodies, as appropriate. Members of the Department's gender focal point network will continue to serve as resource persons on gender equality and mainstreaming and to ensure a gender perspective in the Department's programmatic and substantive operations. The Department's subprogrammes will continue to give due regard to gender equality and the empowerment of women in the implementation of their programme of work for 2024.
- 9.13 In line with the United Nations Disability Inclusion Strategy, the Department will promote inclusive social and economic development for all, including persons with disabilities, and realize the promise of the 2030 Agenda to leave no one behind. As secretariat to the Conference of State Parties to the Convention on the Rights of Persons with Disabilities, the Department will facilitate global dialogue to address existing gaps in translating the international commitments to persons with disabilities into development policies, programming and practices at the national and international levels. The Department will also engage in various joint projects and coordination groups that involve other entities of the United Nations system on disability inclusion, including on the implementation of the Strategy.

Programme performance in 2022

Impact of the pandemic and lessons learned

- 9.14 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular the Department's analytical work, intergovernmental and normative events and capacity-building activities. The continual change in approach, postponement and/or cancellation of planned deliverables and activities also had an impact on planned results under subprogrammes 2, 4 and 5.

- 9.15 In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, the Department responded to requests from Member States for in-depth analysis of the impact of the pandemic on development prospects and the achievement of the Sustainable Development Goals, and sought to address multiple dimensions of poverty and inequality and shape solid recommendations that drive transformative action for inclusive social and economic policy and people-centred development.
- 9.16 The Department continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including enhancing its thought leadership through the provision of scenarios to policymakers on achieving the Sustainable Development Goals in the wake of the pandemic, and illustrating pathways to build resilient societies and modules addressing COVID-19 recovery. Many meetings were held virtually or in hybrid sessions. However, intergovernmental negotiations were more difficult to undertake and required creativity and constant innovation for delivering new tasks. In addition, fully virtual meetings presented challenges in terms of accommodating all time zones. Furthermore, technology and connectivity challenges continue to exist in some countries and regions, which also limited and interrupted participation in virtual events. Within existing capacities, the Department will continue to utilize a combination of meeting formats, where appropriate and at the request of Member States, to facilitate policy dialogues, capacity-building activities, information exchanges and networking. The Department will also continue to deliver capacity development through virtual means to enable broader participation.

Legislative mandates

- 9.17 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

47/190	Report of the United Nations Conference on Environment and Development	59/243	Integration of the economies in transition into the world economy
47/191	Institutional arrangements to follow up the United Nations Conference on Environment and Development	60/1 60/265	2005 World Summit Outcome Follow-up to the development outcome of the 2005 World Summit, including the Millennium Development Goals and the other internationally agreed development goals
50/227	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields		
51/176	Implementation of the Programme of Action of the International Conference on Population and Development	62/208	Triennial comprehensive policy review of operational activities for development of the United Nations system
51/240	Agenda for Development	66/288	The future we want
52/220	Questions relating to the proposed programme budget for the biennium 1998–1999	69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway
55/2	United Nations Millennium Declaration	69/143; 77/188	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
55/279	Programme of Action for the Least Developed Countries for the Decade 2001–2010		
57/144	Follow-up to the outcome of the Millennium Summit	69/151	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
57/253	World Summit on Sustainable Development		
57/270 B	Integrated and coordinated implementation of and follow-up to the outcomes of major United Nations conferences and summits in the economic and social fields	69/214	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
58/220	Economic and technical cooperation among developing countries		
58/269	Strengthening of the United Nations: an agenda for further change		

Part IV International cooperation for development

69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
69/321	Revitalization of the work of the General Assembly	75/290 A	Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		
70/299	Follow-up and review of the 2030 Agenda for Sustainable Development at the global level		
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	75/290 B	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council
73/246; 74/234	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)	76/203; 77/245	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for Sustainable Development of Small Island Developing States
74/4	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly	76/204; 77/164 76/220; 77/184	Disaster risk reduction Operational activities for development of the United Nations system
74/228	Role of the United Nations in promoting development in the context of globalization and interdependence	77/150	Information and communications technologies for sustainable development

Economic and Social Council resolutions

1998/7	Importance of population census activities for evaluation of progress in implementing the Programme of Action of the International Conference on Population and Development	2008/29; 2012/30	Role of the Economic and Social Council in the integrated and coordinated implementation of and follow-up to the outcomes of the major United Nations conferences and summits, in the light of relevant General Assembly resolutions, including resolution 61/16
2007/2	The role of the United Nations system in providing full and productive employment and decent work for all	2019/2 2021/30	Mainstreaming a gender perspective into all policies and programmes in the United Nations system Open-source technologies for sustainable development

Ministerial communiqués of the high-level segment of the substantive session of the Economic and Social Council

2002	The contribution of human resources development, including in the areas of health and education, to the process of development	2007	Strengthening efforts at all levels to promote pro-poor sustained economic growth, including through equitable macroeconomic policies
2003	Promoting an integrated approach to rural development in developing countries for poverty eradication and sustainable development	2007	Annual ministerial review on the theme “Strengthening efforts to eradicate poverty and hunger, including through the global partnership for development”
2004	Resources mobilization and enabling environment for poverty eradication in the context of the implementation of the Programme of Action for the Least Developed Countries for the Decade 2001–2010	2008 2008	Development Cooperation Forum Annual ministerial review on the theme “Implementing the internationally agreed goals and commitments in regard to sustainable development”
2006	Creating an environment at the national and international levels conducive to generating full and productive employment and decent work for all, and its impact on sustainable development		

Subprogramme 1 Intergovernmental support and coordination for sustainable development

General Assembly resolutions and decisions

45/264	Restructuring and revitalization of the United Nations in the economic, social and related fields	70/201	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development

Evaluation activities

- 9.19 The internal evaluation, on the effectiveness of the Department in providing thought leadership on development and supporting analytical work, completed in 2022, has guided the proposed programme plan for 2024.
- 9.20 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. For example, the findings have been considered through: (a) an assessment of the status of the Department’s thought leadership, policy analysis and knowledge production and identification of areas for improvement; (b) an assessment of institutional arrangements that exist and what areas need improvement so that the necessary enhancements in thought leadership and analytical work can be achieved; and (c) evaluative evidence to more precisely and effectively define the Department’s vision of thought leadership.
- 9.21 The following evaluations are planned for 2024:
 - (a) Internal evaluations on cross-cutting or thematic topics across subprogrammes;
 - (b) Evaluations on capacity-building activities.

Programme of work

Subprogramme 1

Intergovernmental support and coordination for sustainable development

Objective

- 9.22 The objective, to which this subprogramme contributes, is to advance the roles of the General Assembly, the Economic and Social Council and the high-level political forum on sustainable development in the integrated implementation of and follow-up to the 2030 Agenda and the outcomes of other United Nations conferences and summits in the economic, social, environmental and related fields.

Strategy

- 9.23 To contribute to the objective, the subprogramme will continue to provide substantive support to the Economic and Social Council and the high-level political forum on sustainable development in the promotion and review of the integrated implementation of the 2030 Agenda and related international commitments within the context of the decade of action and delivery for sustainable development. Specifically, the subprogramme will:
- (a) Provide evidence-based analysis and advice to support the Council by: (i) engaging in policy dialogue and formulating policy recommendations; (ii) coordinating the work of its subsidiary bodies and United Nations system entities; (iii) identifying and taking on new and emerging issues affecting the achievement of the Sustainable Development Goals; and (iv) reinforcing the linkages between policy discussions and review and national sustainable development efforts;
 - (b) Support the high-level political forum on sustainable development in the follow-up to and implementation of the 2030 Agenda by: (i) facilitating the progress review, policy dialogue and the development of policy recommendations for the accelerated achievement of the Sustainable Development Goals and the implementation of the 2030 Agenda; (ii) assisting countries in preparing evidence-based, inclusive and analytical voluntary national reviews of their implementation of the 2030 Agenda; and (iii) engaging United Nations country teams, other subprogrammes of the Department and United Nations system entities in supporting the review process;
 - (c) Provide substantive and secretarial support, upon request, to policy discussions and negotiations of the General Assembly, notably its Second Committee (economic and financial issues);
 - (d) Provide Member States with the evidence and analysis necessary for reviewing and guiding the operational activities of the United Nations development system based on mandates from the Assembly's 2020 quadrennial comprehensive policy review of the operational activities for development of the United Nations system and other resolutions;
 - (e) Provide support to the resident coordinator system through webinars and other activities to guide the support of United Nations country teams for countries conducting voluntary national reviews, as well as to enable United Nations country teams to provide their coordinated assessment of the implementation of the quadrennial comprehensive policy review, in coordination with the Development Coordination Office;
 - (f) Facilitate dialogue on policies and recommendations on effective, people-centred and gender-sensitive response measures to address the impact of the COVID-19 pandemic and the multiple and interlinked global food, energy, financial and climate crises in a way that accelerates the implementation of the 2030 Agenda, by providing analysis, country-level evidence and recommendations, including addressing the impacts on poverty, inequality and hunger, and on women and people in vulnerable situations;
 - (g) Support the engagement of non-governmental organizations (NGOs) in the work of the Economic and Social Council¹ and the participation of major groups and other stakeholders in the high-level political forum on sustainable development;²

¹ Economic and Social Council resolution 1996/31 provides the legislative mandate and outlines the modalities that govern the consultative relationship with non-governmental organizations and the Council.

² Nine major groups were first identified in Agenda 21 at the United Nations Conference on Environment and Development in Rio de Janeiro, Brazil. Those major groups and some additional stakeholder groups were identified in General Assembly resolution 66/288, entitled "The future we want", as well as in some of the subsequent resolutions of the Assembly, namely, 67/290, 70/1, 70/299 and 72/305. The Assembly, in its resolution 67/290 on the format and organizational aspects of the high-level political forum on sustainable development, stressed the need for the forum to promote transparency and implementation by further enhancing the consultative role and participation of the major groups and other relevant stakeholders at the international level and decided that the forum should be open to the major groups and other relevant stakeholders.

- (h) Strengthen the meaningful engagement of young people in the work of the United Nations by improving the annual Economic and Social Council Youth Forum, in cooperation with the United Nations Youth Office and subprogramme 2, and by facilitating the enhanced participation of youth speakers in other Council segments, forums and special meetings, as well as in the high-level political forum on sustainable development.

9.24 The above-mentioned work is expected to result in:

- (a) Enhanced policy and operational guidance by the General Assembly and the Economic and Social Council on the implementation of the 2030 Agenda at the global, regional and country levels;
- (b) Improved understanding by the high-level political forum on sustainable development of progress towards achieving the Sustainable Development Goals, the policies that have worked, levers and entry points, as well as gaps, challenges and new and emerging issues;
- (c) Better understanding among Members States, United Nations system organizations and other stakeholders of the effects of the COVID-19 pandemic and the multiple and interlinked global crises on the implementation of the 2030 Agenda, as well as of policy options and practical measures for addressing the impact of the COVID-19 pandemic and the global food, energy, financial and climate crises, while accelerating progress towards achieving the Sustainable Development Goals within the decade of action and delivery for sustainable development;
- (d) Progress at the country level towards realizing the Sustainable Development Goals, including in countries presenting voluntary national reviews at the high-level political forum on sustainable development;
- (e) More effective, efficient and coordinated United Nations development system support towards implementing the 2030 Agenda and responding to COVID-19 and other crises, including support to voluntary national reviews, as well as improved and clearer guidance from Member States to the United Nations development system;
- (f) The voice of young people being heard at United Nations deliberations through the Economic and Social Council Youth Forum;
- (g) Improved engagement of NGOs in the work of the United Nations through support for the Economic and Social Council Committee on Non-Governmental Organizations;
- (h) Increased participation of major groups and other stakeholders in the work of the high-level political forum on sustainable development, as mandated in General Assembly resolution [67/290](#);
- (i) Better coordination and coherence in the global response to ongoing crises.

Programme performance in 2022

Advanced gender equality through the work of the Economic and Social Council and the high-level political forum on sustainable development

- 9.25 The General Assembly, in its resolution [75/290](#) A, called upon the Economic and Social Council to “strengthen its efforts to mainstream a gender perspective across its agenda, work programme, meetings and documentation” and, in its resolution [75/290](#) B, ensure that the 2030 Agenda review was gender-sensitive and focused on the furthest behind. The subprogramme developed a checklist to help to mainstream a gender perspective into the work of the Council and the high-level political forum on sustainable development, including applying gender analysis and highlighting relevant issues related to gender equality in the programme, substantive documentation and deliberations of the Council and the high-level political forum. The subprogramme increased its efforts to systematically integrate a gender perspective into reports, background notes and other material prepared for these bodies and ensure gender parity and geographical diversity among invited speakers. It also improved understanding among delegations and key stakeholders of a gender perspective, guided by the 2030 Agenda.

9.26 Progress towards the objective is presented in the performance measure below (see table 9.2).

Table 9.2
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
<ul style="list-style-type: none"> • Gender parity among speakers invited to address the high-level political forum on sustainable development • 58 per cent of invited speakers were women 	<ul style="list-style-type: none"> • Member States agreed that national responses to the COVID-19 pandemic must be gender-responsive • 49 per cent of invited speakers were women 	<ul style="list-style-type: none"> • Member States reaffirm their commitment to gender equality and the empowerment of women in the 2022 ministerial declaration of the Economic and Social Council and the high-level political forum • 49 per cent of invited speakers were women

Planned results for 2024

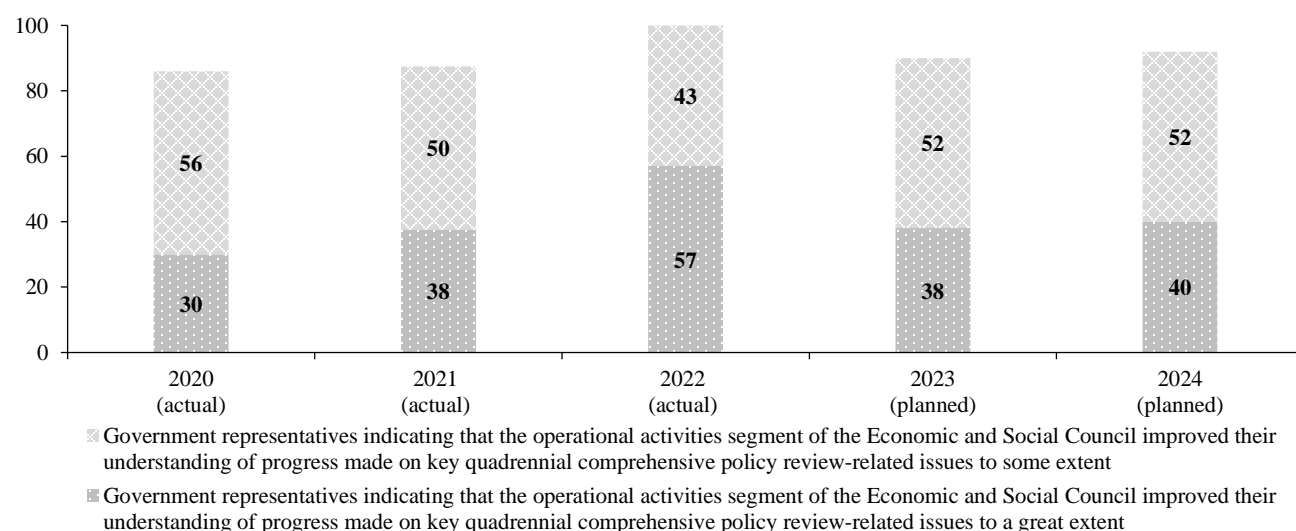

Result 1: General Assembly and the Economic and Social Council mainstream COVID-19 into their guidance to and review of United Nations operational activities for development

Programme performance in 2022 and target for 2024

9.27 The subprogramme’s work contributed to 57 per cent of government representatives indicating that their understanding of progress made on key issues related to the quadrennial comprehensive policy review improved to a great extent, and an additional 43 per cent indicating that their understanding improved to some extent, which exceeded the planned target of 55 and 35 per cent, respectively.

9.28 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 9.I).

Figure 9.I
Performance measure: government representatives indicating that the operational activities segment of the Economic and Social Council improved their understanding of progress made on key quadrennial comprehensive policy review-related issues, including the United Nations COVID-19 response (Percentage)

Result 2: accelerated implementation of Sustainable Development Goals through effective preparatory process for voluntary national reviews

Programme performance in 2022 and target for 2024

- 9.29 The subprogramme's work contributed to 73 per cent of countries engaging more than one national entity in the preparation of their voluntary national reviews, which exceeded the planned target of 55 per cent.
- 9.30 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 9.II).

Figure 9.II

Performance measure: countries that engaged more than one national entity in the preparation of their voluntary national reviews

(Percentage)

Result 3: strengthened coordinated global response to multiple interlinked crises

Proposed programme plan for 2024

- 9.31 In 2022, Member States recognized that multiple and interlinked global crises were putting the Sustainable Development Goals at great risk, jeopardizing the implementation of the 2030 Agenda (see [E/HLS/2022/1](#)). The Economic and Social Council and the high-level political forum on sustainable development serve as inclusive platforms for integrated policy dialogue on new and emerging global challenges in sustainable development. Building on work started in 2020 to provide support to Member States on COVID-19 response and recovery, the subprogramme enhanced its support to the Council and the high-level political forum beyond the COVID-19 pandemic in addressing the impact of the multiple interlinked global crises, including the food, energy and financial crises and climate change, on the achievement of the Goals, finding policy solutions and enhancing policy coordination and coherence in response to the crises.

Lessons learned and planned change

- 9.32 The lesson for the subprogramme was the importance of providing adequate support to the Economic and Social Council and the high-level political forum on sustainable development to develop multilateral solutions to the multiple crises, while keeping the focus on the Sustainable Development Goals. In applying the lesson, the subprogramme will support the Council Bureau in organizing special meetings and briefings of the Council to address crisis responses that build on the interlinkages between health, financial, food security, energy and environmental aspects, accelerate progress towards the implementation of the 2030 Agenda and strengthen international solidarity. It will seize the opportunity of the scheduled review of the work of the Council and the high-level political forum in 2024 to help Member States to maximize their impact on achieving the Goals.

Part IV International cooperation for development

This will include developing concrete proposals to help to transform the 2023 high-level political forum’s declaration into policy recommendations for consideration by Member States.

9.33 Expected progress towards the objective is presented in the performance measure below (see table 9.3).

**Table 9.3
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Enhanced understanding among Member States of the impact of the COVID-19 pandemic and ways to address them	Strengthened international collaboration and solidarity and improved policies in the global response to the COVID-19 pandemic	Member States pursue coordinated response to interlinked global crises through policy dialogue and intergovernmental cooperation	Enhanced international coordination and cooperation among Member States and other stakeholders in response to multiple, interlinked crises and for putting the Sustainable Development Goals back on track, by adopting an ambitious and forward-looking declaration at the high-level political forum on sustainable development under the auspices of the General Assembly	Accelerated efforts among Member States to achieve the Sustainable Development Goals by 2030, including by addressing ongoing and emerging global challenges in sustainable development, within the context of the 2024 high-level political forum on sustainable development and the Summit of the Future and its outcomes

Deliverables

9.34 Table 9.4 lists all deliverables of the subprogramme.

13. High-level political forum on sustainable development: workshops (global) on the preparation for voluntary national reviews and sharing of experiences in implementing the Sustainable Development Goals in the context of the high-level political forum	3	3	3	3
14. High-level political forum on sustainable development: workshops (regional) on the preparation of voluntary national reviews in the context of the high-level political forum	5	5	5	5
15. High-level political forum on sustainable development: seminars, workshops and other events related to the preparation of the high-level political forum	4	3	4	4
Technical materials (number of materials)	12	11	13	11
16. Studies on the implementation of the quadrennial comprehensive policy review	6	6	7	6
17. Studies and materials on issues related to the Economic and Social Council	1	1	1	1
18. Studies and materials on issues related to the high-level political forum, including on the voluntary national reviews	4	4	4	4
19. Studies and materials on issues related to the Committee on Non-Governmental Organizations	1	–	1	–

C. Substantive deliverables

Consultation, advice and advocacy: informal consultations on resolutions of the General Assembly and the Economic and Social Council, including the follow-up resolutions on the implementation of the Assembly resolution on the quadrennial comprehensive policy review of United Nations system operational activities for development; informal consultations on the ministerial declarations of the Council and the high-level political forum on sustainable development, as well as informal consultations on the reports of the Committee on Non-Governmental Organizations; support for the President and the Bureau of the Economic and Social Council, the Bureau of the Second Committee and joint Bureaux meetings; briefings to all Member States on sustainable development issues and processes; expert advice to United Nations intergovernmental bodies, notably the Assembly, the Council and the high-level political forum, and advocacy for accelerated implementation of the funding compact; the mandated informal note by the Secretariat for the Council coordination segment; outreach and briefings to NGOs and major groups and other stakeholders on the work of the Assembly, the Council and the high-level political forum; consultations and meetings to mobilize contribution of the United Nations system to the work of the Council, the Assembly and the high-level political forum; consultations with the secretariats of the Council subsidiary bodies to support the Council's coordination role; strategic contributions of the Department's senior officials to inter-agency coordination mechanisms, such as the United Nations System Chief Executives Board for Coordination, the High-level Committee on Programmes, the United Nations Sustainable Development Group, the Secretary-General's Executive Committee and the Deputies Committee and the Executive Committee on Economic and Social Affairs Plus; and analysis and advice to senior United Nations officials on sustainable development issues.

Databases and substantive digital materials: database on voluntary national reviews (339 entries); database on input to the high-level political forum (1,400 entries); paperless committee for official documentation of the Committee on Non-Governmental Organizations (38 sessions); integrated information and communications technology platforms for some 6,000 NGOs in consultative status with the Council; an indicator framework to monitor the implementation of the quadrennial comprehensive policy review for all Member States (400 new entries); a database on the funding of United Nations operational activities for development (25,000 new entries); and a database on the funding compact agreed to by Member States and the United Nations development system in 2019 (60 new entries).

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: information materials on the work of the Council, the Assembly and the high-level political forum on sustainable development for all Member States and the general public; content for social media platforms, in collaboration with the Department of Global Communications; and webinars for some 6,000 NGOs in consultative status with the Council on participation in the activities of the Council and the United Nations.

Digital platforms and multimedia content: web pages and multimedia content for the Council and the high-level political forum on sustainable development, and the website of the Integrated Civil Society Organizations System.

**Subprogramme 2
Inclusive social development**

Objective

- 9.35 The objective, to which this subprogramme contributes, is to advance policies for the eradication of poverty, the reduction of inequality and the achievement of greater social inclusion and well-being for all.

Strategy

- 9.36 To contribute to the objective, the subprogramme will:
- (a) Conduct evidence-based research and analysis, including on Indigenous Peoples, persons with disabilities, older persons and young people;
 - (b) Monitor national and global socioeconomic trends to identify emerging issues and assess their implications for social policy at the national and international levels, which will help Member States to make progress towards achieving Sustainable Development Goals 1 to 11 and 16;
 - (c) Provide substantive support for intergovernmental dialogue and processes, including the sessions of the Commission for Social Development, the Permanent Forum on Indigenous Issues, the Conference of States Parties to the Convention on the Rights of Persons with Disabilities, the Open-ended Working Group on Ageing, the Economic and Social Council and the General Assembly;
 - (d) Engage in analytical work and provide intergovernmental support, technical advice and capacity development to requesting countries in partnership with resident coordinators and United Nations entities, including through the use of sport as an enabler of development and peace, as foreseen in the preamble of the 2030 Agenda;
 - (e) Support Member States on issues related to shocks and recovery, such as COVID-19, by promoting socially inclusive policy responses designed to eradicate poverty, reduce inequalities and protect the most vulnerable populations;
 - (f) Focus its analytical work on reducing inequality and strengthening social protection systems in the post-COVID-19 context, continue to focus on the situation of vulnerable segments of the population and engage more closely with United Nations country teams to enhance action at the national level in addressing the impact of COVID-19.
- 9.37 The above-mentioned work is expected to result in:
- (a) Enhanced knowledge and awareness of Member States to ensure that no one is left behind;
 - (b) Recognition by Member States of specific social development issues as a basis for action at the national level;

- (c) Increased capacity of Member States to effectively implement the social dimension of the 2030 Agenda and its Sustainable Development Goals;
- (d) Recovery of Member States from the COVID-19 pandemic with more resilient and inclusive societies, placing the world back on track to implementing the 2030 Agenda.

Programme performance in 2022

Streamlined database on national policies and measures to combat hunger and poverty during the COVID-19 pandemic and beyond

- 9.38 The COVID-19 pandemic has exposed and exacerbated pre-existing inequalities and vulnerabilities worldwide, in particular on the social and economic risks of insufficient investment in social protection systems and public services. Governments have taken responsive measures to limit the socioeconomic impact of the crisis by investing in people’s resilience and promoting equal opportunities and equal access to basic services, including social protection, education, and health care. In 2021, Member States expressed the need for a searchable repository of measures taken by countries during the pandemic and recovery phase. The subprogramme, in cooperation with the Office of Information and Communications Technology, developed an online interactive and searchable database of Member States’ policies and measures for combating poverty and hunger, drawing from information provided from voluntary national reviews presented since 2020 and the sessions of the Commission for Social Development, and containing approximately 330 policies and measures.
- 9.39 Progress towards the objective is presented in the performance measure below (see table 9.5).

Table 9.5
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	Member States expressed the need for a searchable repository of measures to combat hunger and poverty during the COVID-19 pandemic and recovery phase	Member States and the wider United Nations system have access to a database on policies and measures to combat hunger and poverty during the COVID-19 pandemic and recovery phase

Planned results for 2024

Result 1: promotion of the rights and well-being of older persons

Programme performance in 2022 and target for 2024

- 9.40 The subprogramme’s work contributed to 109 Member States participating in the review and appraisal of the Madrid International Plan of Action on Ageing, which did not meet the planned target of an increased number of Member States contributing to the fourth review and appraisal of the International Plan of Action. The target was not met because the cycle was affected by the COVID-19 pandemic, which redirected resources towards the pandemic response. The challenging context notwithstanding, four of every seven Member States participated in the cycle, representing 84 per cent of older persons worldwide.
- 9.41 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.6).

Table 9.6
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Countries endorsed the timeline for carrying out the fourth review and appraisal of the Madrid International Plan of Action	Strengthened national capacity of 13 countries to contribute to the implementation and review of the Madrid International Plan of Action on Ageing	109 Member States contributed to the fourth review and appraisal of the Madrid International Plan of Action on Ageing	At least 13 countries consider the successes and good practices, shortcomings and future priorities identified in their national and regional levels of review and appraisal in furthering implementation of the Madrid International Plan of Action on Ageing	Countries integrate their lessons learned towards the continued review and appraisal of the Madrid Plan of Action on Ageing

Result 2: strengthened cooperatives for inclusive development

Programme performance in 2022 and target for 2024

- 9.42 The subprogramme’s work contributed to increased engagement, knowledge and capacity of regional and national stakeholders towards strengthened cooperatives for the realization of the Sustainable Development Goals, which met the planned target.
- 9.43 Progress towards the objective and the target for 2024 are presented in the performance measure below (table 9.7).

Table 9.7
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Social and solidarity economy actors committed to join with the United Nations in the decade of action to deliver the Sustainable Development Goals	Member States adopted General Assembly resolution 76/135, including a call on the United Nations system to support Governments in strengthening cooperatives	Regional and national stakeholders engaged towards strengthened cooperatives for the realization of the Sustainable Development Goals	Countries and resident coordinators promote and support cooperatives for the realization of the Sustainable Development Goals	Countries and resident coordinators advocate for an enabling environment for cooperatives

Result 3: improved accessibility for the full and inclusive participation of persons with disabilities at the Conference of State Parties of the Convention on the Rights of Persons with Disabilities

Proposed programme plan for 2024

- 9.44 As recognized in the Convention on the Rights of Persons with Disabilities, accessibility is a precondition for an inclusive society for all. This includes information and communication accessibility, which can disproportionately affect persons with intellectual disabilities, including

those with visual, hearing, speech and mobility disabilities. The subprogramme, in close collaboration with the United Nations system and other stakeholders, promoted increased accessibility at the Conference of States Parties to the Convention on the Rights of Persons with Disabilities through user-friendly, virtual meeting platforms and the provision of real-time closed captions, sign language interpretation and official documentation in accessible formats.

Lessons learned and planned change

9.45 The lesson for the subprogramme, based on evaluations and consultations, was that there was a need for improved understanding of the various accessibility needs of participants and their incorporation into the early stages of planning, in order to create enabling conditions to promote greater inclusion of all groups of persons with disabilities. In applying the lesson, the subprogramme will consult with persons with disabilities and relevant stakeholders in the initial phases of planning and explore specific modalities for persons with disabilities to participate at the Conference of States Parties to the Convention on the Rights of Persons with Disabilities.

9.46 Expected progress towards the objective is presented in the performance measure below (see table 9.8).

Table 9.8
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Countries provided feedback on enhancing accessibility of the Conference of States Parties to the Convention on the Rights of Persons with Disabilities	First-ever accessible virtual sessions of the Conference allowed for broader engagement of the disability community	Greater inclusion through introduction of official documents in easy-to-read format	Persons with disabilities and relevant stakeholders provide guidance and feedback on specific modalities promoting accessibility	Member States and other stakeholders exchange good practices on the use of specific modalities promoting accessibility

Deliverables

9.47 Table 9.9 lists all deliverables of the subprogramme.

Table 9.9
Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	28	26	27	23
Documentation for:				
1. The General Assembly on ageing, cooperatives in development, persons with disabilities, policies and programmes concerning young people, follow-up to the International Year of the Family, follow-up to the World Summit for Social Development, social inclusion and other social development issues, the Third United Nations Decade for the Eradication of Poverty and sport for development and peace	9	7	10	7
2. The Commission for Social Development	5	5	6	5
3. The Permanent Forum on Indigenous Issues	10	10	7	7

9. The high-level political forum on sustainable development	1	1	1	1
10. The Commission for Social Development	20	20	20	20
11. The Permanent Forum on Indigenous Issues	24	22	24	24
12. The Conference of States Parties to the Convention on the Rights of Persons with Disabilities	16	16	16	16
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	2	2	2	2
13. Projects on social policy formulation	2	2	2	2
Seminars, workshops and training events (number of days)	10	10	10	10
14. Training events on social issues for Member States and other stakeholders, including lectures and multi-stakeholder panels	10	10	10	10
Publications (number of publications)	–	–	1	1
15. <i>World Youth Report</i>	–	–	–	1
16. Publication on indigenous peoples	–	–	1	–
Technical materials (number of materials)	7	6	9	7
17. Outcome documents of expert groups on various social issues	7	6	7	7
18. Update on the Disability and Development Report	–	–	1	–
19. Segments of the report of the Secretary-General on homelessness (joint report with UN-Habitat)	–	–	1	–
C. Substantive deliverables				
Consultation, advice and advocacy: advice to requesting Member States on their socioeconomic situations and normative, policy and administrative frameworks in relation to the social dimensions of sustainable development and the Sustainable Development Goals; and briefings/expert advice to more than 40 Member States on sustainable development issues, including on high-level bilateral consultations and intergovernmental meetings.				
Databases and substantive digital materials: database on policies and measures to combat hunger and poverty.				
D. Communication deliverables				
Outreach programmes, special events and information materials: special events, including commemorations of international days on various social issues; and policy briefs and communication activities to promote advancement of social development with a global reach.				
External and media relations: briefings, press conferences and press releases on various social issues.				
Digital platforms and multimedia content: electronic, audio and video messaging on ageing, cooperatives, disability, family, issues concerning Indigenous Peoples, young people, and sport for development and peace.				

Subprogramme 3 Sustainable development

Objective

- 9.48 The objective, to which this subprogramme contributes, is to accelerate the implementation of the 2030 Agenda, including the Sustainable Development Goals and their targets and commitments, through increased engagement of Member States and other stakeholders.

Strategy

- 9.49 To contribute to the objective, the subprogramme will:
- (a) Prepare analytical reports and assessments, maintain online databases and organize thematic expert meetings and conferences on specific Sustainable Development Goals and their interlinkages;
 - (b) Organize, in the months leading up to the high-level political forum on sustainable development, expert group meetings and conferences, accessible to Member States, on the themes of the forum and the Sustainable Development Goals that are under review;
 - (c) Play a central role in inter-agency coordination mechanisms on water, energy, small island developing States, oceans and transport and in the area of science, technology and innovation, and through its long-standing cooperation with specific agencies on issues such as climate change and partnership-building for sustainable development;
 - (d) Coordinate the work of the Technology Facilitation Mechanism, including the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals and the online platform on existing science, technology and innovation initiatives (2030 Connect);
 - (e) Convene special events in connection with the high-level political forum on sustainable development, including the Sustainable Development Goals business forum and the local and regional governments forum, to allow the sharing of lessons learned and good practices related to the Goals by key stakeholder sectors and exchanges among Member States and all other stakeholders in the development arena;
 - (f) Organize, in coordination with the regional commissions, resident coordinator offices and United Nations country teams, as applicable, capacity-building activities at the global, regional and national levels on the above topics.
- 9.50 The above-mentioned work is expected to result in:
- (a) Increased knowledge of Member States and other key stakeholders of the 2030 Agenda and the Sustainable Development Goals, including for their deliberations during the high-level political forum on sustainable development and other related forums, and for the development of related national policies and programmes;
 - (b) Increased use of science and technology to leverage their full potential in the achievement of the Sustainable Development Goals by Member States and other stakeholders;
 - (c) Increased integration of the Sustainable Development Goals into inclusive national planning processes, policies and strategies, and increased action and initiatives taken by Member States and other stakeholders to accelerate the implementation of the 2030 Agenda.

Programme performance in 2022

New commitments and pledges for scaled-up ocean action

- 9.51 Member States and other stakeholders agreed that greater ambition was required at all levels to address the dire state of the ocean. The subprogramme, in response to General Assembly resolution [73/292](#) and decision [75/578](#), facilitated the convening by Member States of the 2022 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development in Lisbon from 27 June to 1 July 2022. The Conference mobilized the global ocean community, with more than 6,000 individuals participating, including more than 2,000 representatives of civil society, representing the highest level of civil society participation in global conferences since the onset of the COVID-19 pandemic. The Conference successfully scaled up ocean action based on science and innovation and facilitated new

partnerships and solutions for the achievement of Goal 14. More than 700 voluntary commitments were registered, and several pledges were announced. A declaration titled “Our ocean, our future, our responsibility” was adopted at the Conference, which recognized the devastating impacts of the COVID-19 pandemic, climate change and plastic waste on ocean health, the ocean-based economy and coastal communities and charted the way forward to achieve Goal 14 by 2030.

9.52 Progress towards the objective is presented in the performance measure below (see table 9.10).

**Table 9.10
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
2020 Ocean Conference postponed owing to COVID-19 pandemic	General Assembly decided to hold the Ocean Conference in July 2022	Strengthened commitment to scale up ocean action, with 700 voluntary commitments and several pledges by Member States, including commitments of billions of dollars, to halt and reverse the decline in the health of the ocean’s ecosystems and biodiversity

Planned results for 2024

Result 1: accelerated progress towards ensuring the availability and sustainable management of water and sanitation for all by 2030

Programme performance in 2022 and target for 2024

9.53 The subprogramme’s work contributed to the registration of 140 Sustainable Development Goal 6 acceleration actions and 42 Water Action Agenda commitments, which exceeded the planned target of 150 Sustainable Development Goal 6 acceleration actions registered. The subprogramme also supported the convening by the President of the General Assembly of the preparatory meeting for the 2023 Water Conference.

9.54 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.11).

**Table 9.11
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
The Sustainable Development Goal 6 global acceleration framework is launched during high-level political forum on sustainable development in order to mobilize United Nations agencies, governments, civil society, private sector and other	<ul style="list-style-type: none"> The high-level meeting on the implementation of the water-related Sustainable Development Goals and targets of the 2030 Agenda was convened. In total, 7 Heads of State and Government, 48 ministers and more than 100 	The combined number of Sustainable Development Goal 6 acceleration actions and Water Action Agenda commitments reached 182	<ul style="list-style-type: none"> 200 Sustainable Development Goal 6 acceleration actions registered Additional target countries for the Goal 6 capacity development initiative 	Member States monitor and report on progress made in the implementation of the Water Action Agenda through a dedicated platform

stakeholders to drive progress on water and sanitation issues, and therefore on the 2030 Agenda as a whole	<p>representatives from intergovernmental organizations, the United Nations system and other stakeholders attended</p> <ul style="list-style-type: none"> • The number of acceleration actions related to Goal 6 reached 116 by the end of 2021 			

Result 2: an interdisciplinary look at implementation of the Sustainable Development Goals – the *Global Sustainable Development Report*

Programme performance in 2022 and target for 2024

- 9.55 The subprogramme’s work contributed to Member States receiving a briefing from the independent group of scientists during the 2022 high-level political forum on sustainable development and participating in regional consultations, providing context-specific insights to inform the *Global Sustainable Development Report*, which met the planned target.
- 9.56 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.12).

Table 9.12
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
<ul style="list-style-type: none"> • Member States decide to use the levers and entry points of the 2019 report as the framework for the thematic review of the Sustainable Development Goals during the 2020 high-level political forum on sustainable development • The Secretary-General appoints a new group of 15 scientists for the preparation of the 2023 <i>Global Sustainable Development Report</i> 	<ul style="list-style-type: none"> • The new independent group of scientists gave a briefing to Member States during the 2021 high-level political forum on sustainable development with the outline of the report finalized • A call for inputs is widely circulated to secure evidence from stakeholders, including underrepresented communities 	<p>Member States received a briefing by the independent group of scientists during the 2022 high-level political forum and participated in regional consultations, providing context-specific insights to inform the <i>Global Sustainable Development Report</i></p>	<ul style="list-style-type: none"> • The 2023 <i>Global Sustainable Development Report</i> is formally launched in September • A first series of global and regional briefings will start immediately after the launch, with a focus on localizing the global calls for action to support implementation in different contexts 	<ul style="list-style-type: none"> • Member States integrate the findings of the report into their national development strategies and policies • Appointment of a new group of 15 scientists for the preparation of the 2027 <i>Global Sustainable Development Report</i>

Result 3: strengthened commitment and action to address the unique needs of small island developing States

Proposed programme plan for 2024

- 9.57 Small island developing States are a special case for sustainable development because they continue to face combined challenges arising in particular from their geographical remoteness, the small scale of their economies, high costs and the adverse effects of climate change and natural disasters. The subprogramme is mandated to provide intergovernmental support to small island developing States, including serving as secretariat for the third International Conference on Small Island Developing States, held in Samoa in 2014. It supports the formulation of small island developing States-related policies on sustainable development, publishes analytical reports on small island developing State issues, co-organizes inter-agency work and provides capacity-building support. It has also collected examples of successful partnerships for advancing sustainable development in small island developing States and continues to support the development of a multidimensional vulnerability index by a high-level panel of experts.

Lessons learned and planned change

- 9.58 The lesson for the subprogramme was that monitoring progress on the implementation of the outcome of the third International Conference on Small Island Developing States, the SIDS Accelerated Modalities of Action (SAMOA) Pathway, was a complex undertaking, given that there was no concrete monitoring framework developed immediately after the Conference. In applying the lesson, the subprogramme will work with Member States to develop such a monitoring mechanism as part of the outcome of the 2024 Conference. This will enable Member States and other stakeholders to better assess global progress made in addressing the unique needs of small island developing States and further follow-up action required.
- 9.59 Expected progress towards the objective is presented in the performance measure below (see table 9.13).

Table 9.13

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Implementation of the outcome of the midterm review of the SIDS Accelerated Modalities of Action (SAMOA) Pathway, pursuant to General Assembly resolution A/74/3	The General Assembly, in its resolution A/76/203 , calls for the convening, in 2024, of a fourth International Conference on Small Island Developing States	A first set of modalities of the 2024 Conference is defined by Member States	<ul style="list-style-type: none"> Member States participate in the preparatory process for the Conference, comprising 3 regional meetings and 1 interregional meeting The preparatory committee for the Conference starts its work 	<ul style="list-style-type: none"> The Conference is held in Antigua and Barbuda An internationally agreed, focused, forward-looking and action-oriented outcome document is adopted by Member States and a monitoring framework is developed and agreed upon

Deliverables

9.60 Table 9.14 lists all deliverables of the subprogramme.

Table 9.14

Subprogramme 3: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	12	26	12	12
Documentation for:				
1. The General Assembly	8	18	6	6
2. The high-level political forum on sustainable development	3	7	5	5
3. The multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	92	120	90	88
Meetings of:				
4. The General Assembly	42	63	42	42
5. The Economic and Social Council	4	2	4	2
6. The high-level political forum on sustainable development	32	31	30	30
7. The multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	4	4	4	4
8. The independent group of scientists for the <i>Global Sustainable Development Report</i>	10	20	10	10
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	5	9	5	7
9. Projects on sustainable development (water, energy, sustainable transport, sustainable consumption and production, stakeholder engagement, small island developing states, partnerships, micro-, small and medium-sized enterprises, etc.)	5	9	5	7
Seminars, workshops and training events (number of days)	100	108	100	100
10. Training events on strengthening national capacities in all areas of sustainable development for and with national policymakers in developing countries and small island developing States with economies in transition	100	108	100	100
Publications (number of publications)	–	–	1	–
11. <i>Global Sustainable Development Report</i>	–	–	1	–
Technical materials (number of materials)	8	15	15	15
12. Publications on the 2030 Agenda for Sustainable Development	8	15	15	15

C. Substantive deliverables

Consultation, advice and advocacy: briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings, and materials related to stakeholder engagement in the 2030 Agenda follow-up and review and on multi-stakeholder partnerships in support of the Sustainable Development Goals.

Databases and substantive digital materials: public databases on voluntary initiatives, small island developing States, partnerships (7,000 registered), voluntary commitments made during the United Nations Conference to Support the Implementation of Sustainable Development Goal 14, Sustainable Development Goal good practices (500 registered), the United Nations system achievement of the Goals, Sustainable Development Goal acceleration actions (450 registered), the Technology Facilitation Mechanism, UN-Energy (200 commitments registered), harmony with nature and other topics of sustainable development.

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: special meetings and side events on sustainable development issues during major United Nations conferences at Headquarters or elsewhere; and the issuance of the *Natural Resources Forum*.

Digital platforms and multimedia content: Sustainable Development Knowledge Platform.

**Subprogramme 4
Statistics**

Objective

- 9.61 The objective, to which this subprogramme contributes, is to strengthen the capacity of Member States with regard to the production and use of high-quality, timely, disaggregated, open data and national statistics and geospatial information as a basis on which to inform policy and decision-making for the 2030 Agenda and for other United Nations policy agendas and to review progress at the national and international levels.

Strategy

- 9.62 To contribute to the objective, the subprogramme will:
- (a) Develop, disseminate and support the implementation by Member States of statistical and geospatial information frameworks, standards and methods, especially those related to the Sustainable Development Goals, the Integrated Geospatial Information Framework and other new emerging policy issues;
 - (b) Provide technical assistance and advice to Member States through in-person and online training on topics, including modernization of statistical information systems and integrated geospatial information management, the use of big data, environmental-economic accounting, geospatial information management, quality assurance and survey instruments, to fill data gaps and leave no one excluded from decision-making and policies that affect them;
 - (c) Facilitate and expand the coordination and coherence of international statistical and geospatial information programmes and activities by promoting the availability, accessibility and application of geospatial information, including the standardization of geographical names, and work towards a better integration of statistical and geospatial information;
 - (d) Cooperate with the resident coordinator system and United Nations country teams in data and statistical activities and their interaction with the global statistical community, including through the Global Network of Data Officers and Statisticians, cooperate closely with other international organizations and establish partnerships with civil society organizations, academia and private sector data providers;
 - (e) Collect, compile and disseminate global statistical information and data in the areas of economic, social, demographic and environmental statistics, including the Sustainable Development Goal indicators, through the use of technology, such as the Statistical Data and Metadata Exchange;
 - (f) Issue flagship data publications, maintain databases and data platforms and continue to modernize UNdata as a United Nations system-wide portal, and support the development of open data hubs and labs to showcase innovative uses of data and explore the visualization of data and metadata;

- (g) Collect information from Member States on the implementation of the Cape Town Global Action Plan for Sustainable Development Data for data relating to the 2030 Agenda, including on financing needs in the specific areas included in the Plan and on the impact of the COVID-19 pandemic on national statistical offices' operations, in collaboration with the World Bank's Development Data Group, the Partnership in Statistics for Development in the 21st Century and the United Nations regional commissions;
 - (h) Develop and share guidance and information on initiatives, tools and best practices to help national statistics systems to continue to operate efficiently in the aftermath of the COVID-19 pandemic and respond to the new specific data needs to address and mitigate the impact of the pandemic on societies, and to address issues of open and timely access to critical data needed by Governments and all sectors of society to recover from the COVID-19 pandemic.
- 9.63 The above-mentioned work is expected to result in:
- (a) The enhanced quality, availability and access to policy-relevant statistical and geospatial information;
 - (b) Increased production and dissemination by Member States of better data and national statistics and geospatial information that are comparable and in line with the adopted international frameworks and standards, and provision of enhanced and open access to them;
 - (c) Enhanced coherence and more effective functioning and transformation of the global statistical and geospatial systems;
 - (d) Increased statistical and geospatial information capacity of Member States and the United Nations system.

Programme performance in 2022

Towards implementation of the Integrated Geospatial Information Framework

- 9.64 The Integrated Geospatial Information Framework is crucial in providing a basis and modality for developing, integrating, strengthening and maximizing geospatial information management and related resources in all countries, bridging the geospatial digital divide, securing socioeconomic prosperity, and leaving no one behind. The subprogramme contributed to multiple work streams, expanding the engagement with Member States through in-person regional committee plenary meetings and workshops that have had positive impacts on both the global geospatial landscape and national development programmes. The importance of collaboration and the commitment to the Framework to achieve the Sustainable Development Goals, address climate-related challenges and leave no one behind was emphasized at the second United Nations World Geospatial Information Congress, held in Hyderabad, India, from 10 to 14 October 2022.
- 9.65 Progress towards the objective is presented in the performance measure below (see figure 9.III).

Figure 9.III
Performance measure: number of countries and individuals that engage in the Integrated Geospatial Information Framework

Planned results for 2024

Result 1: integrated approach to environmental and economic policies through the use of the System of Environmental-Economic Accounting

Programme performance in 2022 and target for 2024

9.66 The subprogramme’s work contributed to 92 countries implementing the System of Environmental-Economic Accounting, which did not meet the planned target of 95 countries. The target was not met owing to the negative residual effects of the COVID-19 pandemic on countries’ implementation timelines.

9.67 Progress towards the objective and the target for 2024 are presented in the performance measure (see figure 9.IV)

Figure 9.IV
Performance measure: number of countries implementing the System of Environmental-Economic Accounting (cumulative)

Result 2: increased engagement with trade statistics

Programme performance in 2022 and target for 2024

- 9.68 The subprogramme's work contributed to 71 countries submitting timely trade data annually and 44 countries submitting timely trade data monthly, which did not meet the planned target of 75 countries annually and exceeded the target of 42 countries monthly. The annual target was not met owing to some delays experienced by countries in submitting by the cut-off point of 31 March 2022. Those challenges notwithstanding, an additional 10 countries submitted annual trade data after the cut-off point.
- 9.69 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 9.V).

Figure 9.V

Performance measure: number of countries that submitted timely trade data

Result 3: accelerated implementation of the Integrated Geospatial Information Framework

Proposed programme plan for 2024

- 9.70 The Economic and Social Council, in its resolution [2022/24](#), reiterated the importance of strengthening and enhancing the effectiveness of the Committee of Experts on Global Geospatial Information Management, especially its operations focused on the Sustainable Development Goals and the Integrated Geospatial Information Framework, to strengthen and ensure its continued effectiveness and benefits to all Member States.

Lessons learned and planned change

- 9.71 The lesson for the subprogramme was that having an integrated whole-of-government approach was a valuable means to unlocking and sharing geospatial information capabilities. Moreover, multi-stakeholder partnerships could be established, focusing on creating an enabling environment to bridge the geospatial digital divide and reduce inequalities in gaining access to geospatial technologies, processes and data, which are fundamental to achieving the Sustainable Development Goals. In applying the lesson, the subprogramme will leverage the global and regional meetings of the Committee of Experts to enhance the institutional arrangements of national geospatial information agencies and foster a comprehensive approach to the implementation of consensus-based global geospatial frameworks, guides and methods, in particular the Integrated Geospatial Information Framework, thereby strengthening Member States' national geospatial capacities.

9.72 Expected progress towards the objective is presented in the performance measure below (see figure 9.VI).

Figure 9.VI

Performance measure: number of countries that developed action plans based on the Integrated Geospatial Information Framework

Deliverables

9.73 Table 9.15 lists all deliverables of the subprogramme.

---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

C. Substantive deliverables

Consultation, advice and advocacy: consultation and advice on economic, demographic and social and environmental statistics and geospatial information, Sustainable Development Goal indicators and cross-cutting statistical areas; and briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

Databases and substantive digital materials: UN Comtrade Database, containing 90 billion records on trade in goods and services, with 10 million users; UNdata platform, containing 60 million records, with 1 million users; Global SDG Indicators Database, containing 2.3 million data records, with 100,000 users; and databases on cross-cutting statistical areas, with data for more than 200 statistical territories (includes countries and areas).

D. Communication deliverables

Outreach programmes, special events and information materials: outreach, events and information materials on economic, demographic and social, and environmental statistics and geospatial information, Sustainable Development Goal indicators and cross-cutting statistical areas.

Subprogramme 5 Population

Objective

- 9.74 The objective, to which this subprogramme contributes, is to improve knowledge of global population trends, advance an evidence-based understanding of interactions between population change and sustainable development among policymakers and the public, and strengthen the international community’s capacity to effectively address current and emerging population issues and integrate the population dimension into the international development agenda.

Strategy

- 9.75 To contribute to the objective, the subprogramme will:
- (a) Prepare studies on issues related to population growth, population ageing, migration, urbanization, fertility, family planning, mortality and other aspects of population in relation to sustainable development using population estimates and projections, the analysis of demographic trends and the evaluation of population policies;
 - (b) Produce comprehensive global data sets on selected topics, as well as brief reports to highlight these topics and related data, and an annual report on a selected major demographic topic. Data sets will include aggregated results for groups of countries in special situations;
 - (c) Provide capacity development on population data and analysis to requesting countries and to United Nations country teams;
 - (d) Provide substantive support to United Nations intergovernmental bodies, in particular the Commission on Population and Development, including by preparing reports and convening expert meetings and panels;
 - (e) Assist Governments in assessing progress made in implementing the Programme of Action of the International Conference on Population and Development held in 1994, with a focus on the global monitoring of Sustainable Development Goal indicators on reproductive health, international migration and child and maternal mortality, often in partnership with other entities of the United Nations system;
 - (f) Improve the United Nations estimates and projections of the global population and study the interaction of COVID-19 with demographic phenomena, including mortality, population

ageing, fertility and family planning and international migration, and including these analyses, as appropriate, in publications and technical materials.

- 9.76 The above-mentioned work is expected to result in:
- (a) Improved access to data and reports on population matters for Governments and other users and increased use of the subprogramme’s data and findings in the work of stakeholders;
 - (b) Increased awareness of population trends and their relationship to sustainable development through accurate data and policy-relevant reports, benefiting Member States and other stakeholders in policy and development planning;
 - (c) Advancement in the international community’s usage of scientifically grounded information about the demographic impacts of the COVID-19 pandemic, in particular on mortality.

Programme performance in 2022

Eight billion global population milestone heightened global attention to links between population and sustainable development

- 9.77 The updated United Nations population projections in *World Population Prospects 2022*, released in July 2022, indicated that the global population would reach 8 billion in mid-November 2022. That milestone provided an opportunity to increase public knowledge of population trends and the interaction between population change and sustainable development, including social, economic and environmental aspects. The subprogramme capitalized on the “Day of 8 Billion” (15 November) to bring increased attention of stakeholders to the challenges and opportunities of the continued, albeit decelerating, growth of the human population. Materials, which included a press release, a policy brief, an op-ed by the Secretary-General and informational videos, stressed the diverse demographic circumstances of countries around the world and the shared responsibility to protect both people and planet. The campaign, developed in collaboration with the Department of Global Communications and the United Nations Population Fund, drew extensive media coverage.
- 9.78 Progress towards the objective is presented in the performance measure below (see table 9.16).

Table 9.16
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Governments, the general public and other stakeholders benefited from access to new population estimates and to information on links between population and sustainable development, evidenced by 4,600 media articles covering <i>World Population Prospects 2022</i>

Planned results for 2024

Result 1: improved estimates of the number of international migrants

Programme performance in 2022 and target for 2024

- 9.79 The subprogramme’s work contributed to the systematic and in-depth review of empirical data on international migrants by age, sex and origin. Estimates did not meet the planned target of member

States, policymakers and the public gaining knowledge and having access to updated and improved data on the stock of international migrants. The target was not met because many censuses, which are the main source of data used to estimate the number of international migrants, were postponed in 2020 and 2021 owing to the COVID-19 pandemic.

9.80 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.17).

**Table 9.17
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Member States benefited from access to an update of the stock of international migrants, produced using pre-existing methods, including an adjustment for the impact of COVID-19	Data reviewed for 183 countries or areas and piloted improvements in the estimation of the stock of international migrants, which would further benefit stakeholders, including Member States	Systematic and in-depth review of empirical data on international migrants by age, sex and origin	Stakeholders, including Member States, have access to additional data for the remainder of the 235 geographical units in the migrant stock database; improvements implemented in the estimation of numbers of international migrants	Increased use of the estimates by stakeholders, as reflected in a 10 per cent increase in citations between 2023 and 2024

Result 2: strengthened evidence on population-related data and policies for the further implementation of the Programme of Action of the International Conference on Population and Development

Programme performance in 2022 and target for 2024

9.81 The subprogramme’s work contributed to the participation of Member States and NGOs in briefings, expert group meetings and consultations on topics related to the Programme of Action of the International Conference on Population and Development, which met the planned target.

9.82 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.18).

**Table 9.18
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Shift to virtual events enables broader engagement	Expert panel stresses the need for strengthened integration of country inputs and outreach to countries	Participation of Member State delegates and civil society representatives in events on topics related to the Programme of Action of the	Countries benefit from strengthened integration of evidence in their preparations for the 2024 review of the Programme of Action	Review of the implementation of the Programme of Action by the Commission on Population and Development leads to renewed commitment by

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
		International Conference on Population and Development		Member States to its further implementation

Result 3: enhanced integration of the population dimension into implementation of the 2030 Agenda by Member States

Proposed programme plan for 2024

9.83 Data users and stakeholders at all levels need timely access to data on demographic topics, including on population size and age structure, fertility, family planning, household size and composition, mortality, international migration, and urbanization. In order to improve public access to the information, the subprogramme developed a new web platform: the Data Portal. The initial focus was on incorporating reproductive health indicators into the Data Portal, giving priority to a subset of countries with high levels of unmet need for family planning. Results from the *World Population Prospects 2022* were successfully incorporated into the Data Portal, but other subprogramme data sets have not yet been integrated.

Lessons learned and planned change

9.84 The lesson for the subprogramme was that the fragmented data infrastructure for the various data sets had been challenging to maintain and was inadequate to query indicators from multiple data sets, enable innovative data visualizations or provide advanced users access to the data using an industry-standard open application programming interface. In applying the lesson, the subprogramme will expand and upgrade both the content and functionalities of the Data Portal to provide the unified dissemination of a growing number of global data sets, along with increased data visualization and query options, to enhance Member States’ and other stakeholders’ analytical capacities to integrate the population dimension into implementation of the 2030 Agenda.

9.85 Expected progress towards the objective is presented in the performance measure below (see figure 9.VII)

Figure 9.VII
Performance measure: number of users of the Data Portal (annual) and number of data sets contained in the Data Portal (cumulative)

Deliverables

9.86 Table 9.19 lists all deliverables of the subprogramme.

Table 9.19

15. Sustainable Development Goal indicator data sets	3	3	1	1
16. Reports of expert group meetings on population topics	3	3	3	2
17. Technical papers on population topics	4	4	4	3
C. Substantive deliverables				
Consultation, advice and advocacy: briefings for and consultations with Member States concerning the annual session of the Commission on Population and Development; and briefings/expert advice to Member States on population and sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.				
Databases and substantive digital materials: databases and data sets on population topics, including documentation.				
D. Communication deliverables				
Outreach programmes, special events and information materials: policy briefs, key messages and information kits on population topics; and special events on population topics.				
External and media relations: press conferences and press releases related to the Commission on Population and Development; press releases to support the launch of major publications or data sets; and responses to requests from Member States, the media, United Nations entities and other stakeholders.				
Digital platforms and multimedia content: interactive data visualizations and social media and multimedia content on population topics.				

Subprogramme 6

Economic analysis and policy

Objective

- 9.87 The objective, to which this subprogramme contributes, is to strengthen national capacities and international policy coordination for identifying and managing short-term macroeconomic risks, to shape medium- and long-term socioeconomic policies for development, and to accelerate sustainable development, especially of least developed countries, small island developing States and other countries in special situations.

Strategy

- 9.88 To contribute to the objective, the subprogramme will:
- (a) Monitor and forecast the macroeconomic situation at the national, regional and global levels, with a focus on countries in special situations, including the least developed countries;
 - (b) Broaden the scope of economic forecasting and simulation tools to assess policy trade-offs in promoting economic growth, while reducing poverty, inequality and enhancing environmental sustainability, in line with the 2030 Agenda;
 - (c) Support the Committee for Development Policy and provide analytical input to the intergovernmental processes related to the least developed countries, as well as to the annual themes of meetings of the Economic and Social Council and of the high-level political forum on sustainable development;
 - (d) Design and implement capacity development activities for a range of countries, including for graduating and recently graduated least developed countries, that improve capacity for economic planning monitoring and policymaking;
 - (e) Examine rapid technological change, noting both its constructive and disruptive potential and identifying the strategies and policies necessary to harness its positive potential for achieving sustainable development and to mitigate its possible negative effects;
 - (f) Provide policy guidance and recommendations on selected topics to Member States for the recovery from recurrent crises, including the COVID-19 pandemic, building on the subprogramme's analytical work;
 - (g) Provide support to the resident coordinator system for the provision of technical support to Member States and for the preparation of common country analyses and United Nations Sustainable Development Cooperation Frameworks, as well as for COVID-19 recovery and other pertinent topics, through analytical input and customized online resources;
 - (h) Deliver the substantive leadership and coordination of the United Nations Economists' Network, which provides a platform that brings together United Nations system economists to share perspectives from the local, national, regional and global levels;
 - (i) Maintain the global economic outlook database, the least developed country criteria database, the Support Measures Portal for Least Developed Countries on international support measures and other online resources available to policymakers and other national and international stakeholders;
 - (j) Provide Member States with solid information for the formulation of global, regional and national policies, by gathering country-level empirical evidence, organizing expert group meetings and preparing background studies on short- and long-term economic development thematic issues.

- 9.89 The above-mentioned work is expected to result in:
- (a) Greater articulation of short-term macroeconomic stability with long-term development goals, while advancing the achievement of the Sustainable Development Goals, through the improved integration of economic, social and environmental priorities into national development plans and strategies;
 - (b) Improved awareness among Member States of the multilateral efforts and economic policy options necessary for a sustainable recovery from recurrent crises, including the COVID-19 pandemic, consistent with the 2030 Agenda;
 - (c) Improved information basis for the Committee for Development Policy and the Economic and Social Council when assessing and recommending least developed countries for graduation;
 - (d) Enhanced awareness and knowledge of Member States and the international community of the development trajectory of the least developed countries, their risks and challenges and the specific support options;
 - (e) Increased capacity of Member States to effectively use international support measures, prepare for graduation from the least developed country category and ensure the stability of their development progress and the realization of the 2030 Agenda;
 - (f) Enhanced collaboration, coordination and efficacy of the United Nations development system, which will provide a more coherent cooperation framework towards the implementation of the 2030 Agenda and bolster sustainable development at the country level.

Programme performance in 2022

Access to an analysis of the impact of multiple crises on development prospects

9.90 Global developments in 2022 had a significant impact on the development prospects of many countries, through, for example, inflation, interest rates and food systems. In addition, these have exacerbated the recovery from the COVID-19 pandemic and threatened progress towards achieving the Sustainable Development Goals. In response, the subprogramme monitored the vulnerability of developing countries closely, emphasizing the least developed countries, and developed a weekly updated heat map to visualize changes in key indicators. The subprogramme prepared weekly briefings, in collaboration with other relevant United Nations entities, containing situational analyses and indicative projections that illustrated the socioeconomic and financial implications of multiple crises on the global economy. In addition, the “World economic situation and prospects as of mid-2022” focused on the effects of those multiple crises on energy and commodity prices and the implications for climate action. The various outputs contributed to Member States and a wider global audience having access to analysis on current global growth and development prospects.

9.91 Progress towards the objective is presented in the performance measure below (see table 9.20).

Table 9.20
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Member States and the wider global audience have access to timely analysis of the impact of multiple crises on the global and regional economic outlook, potential impacts on climate action, and macroeconomic policy advice to address global, regional and national challenges

Planned results for 2024

Result 1: strengthened economic analysis and knowledge of development policy options for accelerating progress towards achieving the Sustainable Development Goals, including through the recovery from the pandemic and the leveraging of megatrends

Programme performance in 2022 and target for 2024

- 9.92 The subprogramme's work contributed to Member States having access to policy recommendations on two new thematic issues: the influence of new technologies on the structure of the economy and the impact of ongoing population ageing, which met the planned target.
- 9.93 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.21).

Table 9.21

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Member States have access to policy recommendations on addressing the short- and long-term impacts of COVID-19 on sustainable development	Member States benefited from increased knowledge and analysis on the economic and social benefits and challenges posed by new technologies	Member States have access to policy recommendations on two new thematic issues: the influence of new technologies on the structure of the economy and the impact of ongoing population ageing	Member States will have access to an up-to-date analysis on inequalities, as well as on other major socioeconomic challenges, and sustainable development policy recommendations to resolve them	Member States will have access to up-to-date analysis of major challenges in sustainable development stemming from the recurrent crises, and policy recommendations to resolve them

Result 2: enhanced monitoring mechanism for graduating and recently graduated least developed countries, improved responsiveness to crisis and strengthened international support

Programme performance in 2022 and target for 2024

- 9.94 The subprogramme's work contributed to eight least developed countries (Angola, Bangladesh, Bhutan, Lao People's Democratic Republic, Nepal, Sao Tome and Principe, Solomon Islands and Vanuatu) participating in the enhanced monitoring mechanism, which met the planned target.
- 9.95 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 9.VIII).

Figure 9.VIII
Performance measure: number of least developed countries participating in the enhanced monitoring mechanism

Result 3: enhanced policy coherence in the implementation of the 2030 Agenda through a revitalized United Nations Economists' Network

Proposed programme plan for 2024

- 9.96 Given the new challenges in the implementation of the 2030 Agenda following the high-level political forum on sustainable development, and in the context of recurrent crises, it is critical that synergies be built to strengthen United Nations thought leadership, especially in shaping policies most relevant for the Sustainable Development Goals. The subprogramme provides the substantive leadership of and coordinates the United Nations Economists' Network, which was established in 2019 to facilitate collaboration and joint work among United Nations system experts on issues of relevance to the sustainable development agenda.

Lessons learned and planned change

- 9.97 The lesson for the subprogramme was that greater understanding of country priorities and concerns was needed for effective support at the country level and for informing discussions at the global level. At the same time, discussions at the global level can highlight important policy perspectives that national economists could bring to their work. In applying the lesson, the subprogramme will work to enhance the participation of economists from the resident coordinator offices to more effectively enable country perspectives, in order to inform global deliberations on the 2030 Agenda. This will advance coherent policy approaches on key issues and provide guidance and policy advice from an economics perspective to support United Nations country teams and Member States.
- 9.98 Expected progress towards the objective is presented in the performance measure below (see figure 9.IX).

Figure 9.IX

Performance measure: number of entities in the United Nations system with members in the United Nations Economists' Network (cumulative)

Deliverables

9.99 Table 9.22 lists all deliverables of the subprogramme.

Table 9.22

Subprogramme 6: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	4	3
1. Reports to the General Assembly	1	1	2	1
2. Reports to the Economic and Social Council	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	22	23	22	22
Meetings of:				
3. The General Assembly	6	7	6	6
4. The Economic and Social Council	6	6	6	6
5. The Committee for Development Policy	10	10	10	10
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	45	47	45	45
6. Training events on sustainable development	45	47	45	45
Publications (number of publications)	2	2	2	2
7. Publications on the world economy	1	1	1	1
8. Committee for Development Policy note	1	1	1	1
Technical materials (number of materials)	65	57	50	46
9. Background studies on development and frontier issues and the world economy	11	8	7	7
10. Presentations on the global economy	4	4	2	2
11. Monthly briefing notes on the world economic situation	12	11	12	11
12. Reports from meetings on the world economy, development and frontier issues	3	3	2	2
13. Committee for Development Policy background studies	11	11	10	10

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
14. Technical input for common country analyses/United Nations Sustainable Development Cooperation Frameworks	22	18	15	12
15. Policy briefs	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: policy advice on various economic thematic issues and/or economic national situations to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

Databases and substantive digital materials: ePing, an online platform providing information on agreements on technical barriers to trade and the application of sanitary and phytosanitary measures, with approximately 20,000 registered users, covering 189 countries; Support Measures Portal for Least Developed Countries on international support measures (100,000 page views and 393 updated entries); least developed country data and impact assessments (3 online databases, covering 143 countries and 22 years of data); modelling tools for sustainable development policies; and global economic outlook database.

D. Communication deliverables

External and media relations: 2 global and 5 regional press releases on the world economic situation.

**Subprogramme 7
Public institutions and digital government**

Objective

- 9.100 The objective, to which this subprogramme contributes, is to advance effective, accountable and inclusive governance and public institutions for sustainable development, including through innovation, digital government and digital transformation.

Strategy

- 9.101 To contribute to the objective, the subprogramme will:
- (a) Service the Committee of Experts on Public Administration by organizing expert meetings and preparing analytical papers and technical guidelines to operationalize the principles of effective governance for sustainable development, developed by the Committee and endorsed by the Economic and Social Council in 2018, together with all relevant stakeholders;
 - (b) Promote policy guidance on innovation, digital government and digital transformation for the Sustainable Development Goals through the United Nations E-Government Survey, monitor global developments on institutional dimensions covered by Sustainable Development Goal 16 and review national institutional arrangements for the achievement of the Goals, with a specific focus on countries in special situations, and in direct support of the follow-up on and review of the 2030 Agenda at the global level;
 - (c) Foster policy dialogue and advocacy for the implementation of the outcomes of the World Summit on the Information Society and facilitate the implementation of and follow-up on its action lines, namely, C1 (the role of Governments and all stakeholders in the promotion of information and communications technology (ICT) for development), C7 (ICT applications: benefits in all aspects of life (e-government)) and C11 (international and regional cooperation);
 - (d) Facilitate multi-stakeholder policy dialogue on Internet governance, including discussion of public policy issues related to key elements of Internet governance, such as data governance, digital inclusion and data protection (A/75/16, para. 204), and shape policy decisions at the global, national and local levels by supporting the Secretary-General in convening the annual meeting of the Internet Governance Forum and intersessional activities;

- (e) Expand capacity development support to respond to Member States' requests for technical cooperation with regard to strengthening their governance and public institutions and their human resources capacities in support for the decade of action, including through partnerships with regional commissions and the resident coordinator system;
- (f) Expand work on equipping public servants with the capacities to realize the 2030 Agenda by providing advisory support and developing and piloting new methodologies on leadership, institutional arrangements for policy coherence, transparency and integrity in the public service, digital government, digital transformation and innovations in public service delivery, with an emphasis on countries in special situations, in collaboration with its project office on governance and the resident coordinator system;
- (g) Strengthen the capacity of Member States to promote innovation in public governance through follow-up mechanisms to the United Nations Public Service Day Awards Ceremony and Forum, such as peer-to-peer learning for the transfer and adaptation of innovative practices, including on gender-sensitive analysis, and through the United Nations Public Administration Network;
- (h) Support supreme audit institutions on auditing the achievement of the Sustainable Development Goals by providing analytical work, expert advice, technical assistance and capacity-building, on the basis of existing demand for support by groups of the International Organization of Supreme Audit Institutions;
- (i) Promote and leverage public governance innovative practices and digital government strategies.

9.102 The above-mentioned work is expected to result in:

- (a) Enhanced awareness of emerging governance and public administration issues at the national and subnational levels and countries contextualizing institutional aspects of their voluntary national reviews so that Member States can develop their capacities to promote effective governance for sustainable development;
- (b) Increased capacities of Member States to build effective, accountable and inclusive institutions to deliver the Sustainable Development Goals;
- (c) Increased capacity of Member States in designing and implementing effective and inclusive digital government policies, strategies and services to improve people's lives;
- (d) Improved capacities of public servants to deliver services in areas such as health and education, justice, social protection and employment, with a focus on the improved professionalization of the public sector workforce and gender equality;
- (e) Adjustments by Member States at the structural, organizational and programme levels to accelerate delivery of the Sustainable Development Goals;
- (f) Adoption of digital government strategies to build resilient societies and close the digital divide.

Programme performance in 2022

National School of Public Policy in Pakistan trains future public servants on innovation and the 2030 Agenda

9.103 The National School of Public Policy in Pakistan requested support to deliver training activities to raise awareness and promote mindsets and behavioural change for the achievement of the Sustainable Development Goals. The training was crucial, especially given that the COVID-19 pandemic caused disruption to progress on the 2030 Agenda, disproportionately affecting the world's poorest and most vulnerable and women and girls. A transformative public service is critical to overcoming the crisis and delivering on the Goals. The subprogramme, in collaboration with the resident coordinator, delivered a capacity development workshop and train-the-trainers programme

to 85 senior civil servants and 5 trainers of the National School of Public Policy, on the Department toolkit on innovative mindsets, which had been embedded into the school’s courses – an important achievement, given that the National School is the apex for in-service training of civil servants in Pakistan.

9.104 Progress towards the objective is presented in the performance measure below (see table 9.23).

Table 9.23
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Increased awareness of innovative mindsets among schools of public administration on the Sustainable Development Goals and curriculum on governance for the Goals	National School of Public Policy adapted the Department toolkit on innovative mindsets and behavioural change for achievement of the Sustainable Development Goals to the Pakistani context	National School of Public Policy in Pakistan integrates the adapted toolkit into its courses to train future public servants on how to develop an innovative mindset to implement the 2030 Agenda

Planned results for 2024

Result 1: digital inclusion of those who are vulnerable in countries in special situations

Programme performance in 2022 and target for 2024

9.105 The subprogramme’s work contributed to an average of 154 Member States providing online services to people in vulnerable situations (i.e., people living in poverty, immigrants, older persons, persons with disabilities, women and young people), in particular in countries in special situations, which exceeded the planned target of 143 Member States.

9.106 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 9.X).

Figure 9.X
Performance measure: number of Member States providing online services to those who are vulnerable, disaggregated by group (annual)

Result 2: public institutions empowered to spearhead climate action

Programme performance in 2022 and target for 2024

- 9.107 The subprogramme’s work contributed to the adoption of a national road map by Namibia for the institutionalization of evidence-based decision-making related to climate, land use, energy and water systems, which met the planned target.
- 9.108 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.24).

Table 9.24
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Enhanced institutional arrangements to facilitate coordination among ministries in the integrated assessment and evaluation of climate action policies in support of national development plans and the Sustainable Development Goals	Enhanced capacities for integrated planning towards achieving the Sustainable Development Goals, linking post-COVID-19 recovery needs to long-term sustainable development objectives	National road map for the institutionalization of evidence-based decision-making related to climate, land use, energy and water systems adopted by Namibia	Member States have developed organizational and individual capacities to promote systems thinking and strategic planning, as well as experimental, foresight, digital and evidence-based mindsets and competencies among public servants in support of climate action	Member States have institutionalized organizational capacities for systems thinking and strategic planning in support of climate action

Result 3: enhanced innovation and digital government transformation for effective and inclusive public service delivery

Proposed programme plan for 2024

- 9.109 The COVID-19 pandemic forced Governments around the world to accelerate their digital transformation to provide access to services efficiently and effectively to all. As countries struggle to recover, Governments’ digitalization continued to be an important tool to accelerate innovation and the provision of public services. The subprogramme contributed to raising awareness of the importance of innovation in public service delivery. Through the digital government capacity assessment tool, the subprogramme helped representatives of government agencies to identify the challenges and enablers for digital government transformation, in support of the preparation of action plans and road maps.

Lessons learned and planned change

- 9.110 The lesson for the subprogramme was that a train-the-trainers approach, based on the curriculum on governance for the Sustainable Development Goals, proved to be successful in supporting knowledge dissemination, especially as it relates to peer-to-peer learning on issues of innovation and best practices in digital government transformation for public service delivery. In applying the lesson, the subprogramme will organize more train-the-trainers sessions to reach a larger audience to support civil servants in developing capacities for innovation and digital government transformation.

9.111 Expected progress towards the objective is presented in the performance measure below (see figure 9.XI).

Figure 9.XI

Performance measure: number of civil servants supporting the preparation of action plans and road maps on innovation and digital government (annual)

Deliverables

9.112 Table 9.25 lists all deliverables of the subprogramme.

Table 9.25

Subprogramme 7: deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>

15. Online training courses on matters related to public administration	2	2	2	2
16. Technical materials on issues related to governance and public institutions for sustainable development	3	4	3	3
17. Compendium of best practices and innovation in public service delivery	1	1	1	1
18. Compendium of best practices on public institutions and digital government for sustainable development	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings; and knowledge-sharing and networks, including the United Nations Public Administration Network, a global network (more than 30 members and 5,000 users) that connects relevant international, regional, subregional and national institutions and experts worldwide working on effective governance and public administration for sustainable development in line with Sustainable Development Goal 16.

Databases and substantive digital materials: databases with more than 350 applications from countries on issues related to public administration such as the United Nations Public Service Awards hub and e-Government knowledge base (covers 193 Member States and the most populous cities in each Member State).

D. Communication deliverables

Outreach programmes, special events and information materials: United Nations Public Administration Network newsletter.

Digital platforms and multimedia content: web pages of the subprogramme, including the United Nations Project Office on Governance, the Internet Governance Forum, the United Nations Public Administration Network and the Division for Public Institutions and Digital Government websites.

Subprogramme 8 Sustainable forest management

Objective

- 9.113 The objective, to which this subprogramme contributes, is to ensure the effective implementation of sustainable management of all types of forests at all levels in accordance with the United Nations strategic plan for forests 2017–2030.

Strategy

- 9.114 To contribute to the objective, the subprogramme will:
- Support the intergovernmental forest policy dialogue through the United Nations Forum on Forests in accordance with the strategic plan and the quadrennial programme of work (2021-2024), undertake preparations for the midterm review in 2024 of the effectiveness of the international arrangement on forests and coordinate the Forum's input to the high-level political forum on sustainable development;

- (b) Advance coordination and cooperation with relevant United Nations entities, member organizations of the Collaborative Partnership on Forests and other forest stakeholders;
- (c) Develop the online clearing house of the Global Forest Financing Facilitation Network and assist countries and partners in designing forest financing strategies, in facilitating access to financing and assisting Member States in mobilizing resources for sustainable forest management;
- (d) Place an emphasis on the special needs and circumstances of Africa, the least developed countries, countries with low forest cover, countries with high forest cover, countries with medium forest cover and low deforestation and small island developing States, as well as countries with economies in transition (Economic and Social Council resolution 2017/4, para. 63);
- (e) Advance the implementation of the United Nations strategic plan for forests 2017–2030, including through implementation of its communications and outreach strategy, and assist countries in developing robust national reporting frameworks;
- (f) Support common country analyses through the United Nations Sustainable Development Cooperation Framework in order to provide resident coordinators with the tools to tailor their responses to countries' specific needs and realities and to effectively support national implementation of sustainable forest management;
- (g) Support Member States, as appropriate, on issues related to sustainable forest management, including on COVID-19, by further deepening its normative work, technical assistance and capacity-building activities and international policy dialogue on the integration of sustainable forest management into pandemic recovery measures and strategies, in line with the resolutions adopted by the United Nations Forum on Forests at its fifteenth and seventeenth sessions, and outcome of the sixteenth and eighteenth sessions.

9.115 The above-mentioned work is expected to result in:

- (a) Strengthened political commitment and action for sustainable forest management, leading to increased contributions by forests to the achievement of the Sustainable Development Goals, including on climate change and biodiversity loss, and greater integration of forests into national sustainable development plans, COVID-19 stimulus packages and recovery plans, and poverty reduction strategies;
- (b) Improved capacity of eligible countries to mobilize and gain access to financing for sustainable forest management from all sources, and improved information on and access to existing and emerging multilateral and other funding sources and data;
- (c) Member States' progress towards achieving the global forest goals and the forest-related Sustainable Development Goals;
- (d) Increased awareness among Member States of the multiple benefits of forests based on the 2024 theme of the International Day of Forests, and on highlighting the interdependent role of forests in enabling the world to meet the Sustainable Development Goals that will be reviewed during the high-level political forum on sustainable development in 2024.

Programme performance in 2022

Improved data for tracking progress made in achieving the global forest goals

- 9.116 Voluntary national reports from Member States provide the main source of information to assess progress in implementation of the United Nations strategic plan for forests and achievement of its global forest goals and targets. The subprogramme supported Member States in the development of an efficient reporting format for monitoring and assessing progress made in achieving sustainable forest management and evidence-based decision-making. In response to Economic and Social Council resolution 2022/17, the format was amended and a pilot phase was conducted with interested countries.
- 9.117 Progress towards the objective is presented in the performance measure below (see table 9.26).

Table 9.26
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Analysis of data and information from 52 voluntary national reports on implementation of the United Nations strategic plan for forests and achievement of its global forest goals were submitted by Member States to the United Nations Forum on Forests in 2019	Member States were able to assess progress through the <i>Global Forest Goals Report 2021</i>	12 Member States participated and provided feedback in the pilot phase on the amended format for national reporting on implementation of the United Nations strategic plan for forests and achievement of its global forest goals

Planned results for 2024

Result 1: strengthened access by Member States to data on financing sustainable forest management

Programme performance in 2022 and target for 2024

- 9.118 The subprogramme’s work contributed to Member States having access to a new quarterly newsletter on forest financing and access to an additional 228 entries in the clearing house on financing opportunities for forests, learning materials and lessons learned and best practices, and contributed to 180 Member States using the data in the clearing house, which met the planned targets.
- 9.119 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.27).

Table 9.27
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Member States’ data needs are incorporated into the finalization of the design of the clearing house website	Member States have access to the clearing house phase 1, including 130 data entries on financing opportunities for forests, learning materials and lessons learned and best practices	<ul style="list-style-type: none"> • Member States have access to a new quarterly newsletter on forest financing and to the clearing house, now including 228 data entries on financing opportunities for forests, learning materials and lessons learned and best practices • 180 Member States use the data in the clearing house 	Member States have access to 1 additional database on forest financial flows and use the data in the clearing house to make progress towards achieving global forest goal 4 and target 15.b of Sustainable Development Goal 15, including in the context of COVID-19 recovery plans	Member States have access to the clearing house, including 80 additional data entries in the databases on financing opportunities for forests, forest financial flows, learning materials and lessons learned and best practices

Result 2: strengthened effectiveness of the international arrangement on forests, including the United Nations forest instrument, to contribute to the achievement of the Sustainable Development Goals, including on climate change and biodiversity loss

Programme performance in 2022 and target for 2024

- 9.120 The subprogramme's work contributed to preparations for the 2024 midterm review of the effectiveness of the international arrangement on forests, which included assessing progress made in: (a) achieving the objectives of the arrangement, including by the United Nations Forum on Forests and its members, the Forum secretariat, the Collaborative Partnership on Forests, the Global Forest Financing Facilitation Network and the Forum trust fund; (b) implementing the United Nations strategic plan for forests and its communication and outreach strategy; (c) contributing to the implementation of the 2030 Agenda; and (d) involving regional and subregional partners, major groups and other relevant stakeholders in the arrangement, which met the planned target.
- 9.121 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.28).

Table 9.28

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	–	Preparations for the 2024 midterm review of the effectiveness of the international arrangement on forests with involvement of Member States, regional and subregional partners, major groups and other relevant stakeholders	Member States develop proposals to strengthen the international arrangement on forests that also include national actions to enhance the contributions of forests to other global forest-related goals and commitments, including climate change and biodiversity	Member States decide on actions to strengthen the international arrangement on forests that also include national actions to enhance the contributions of forests to the achievement of the Sustainable Development Goals, including on climate change and biodiversity loss, and other global forest-related goals and commitments

Result 3: accelerating progress towards implementing the United Nations strategic plan for forests and achieving the global forest goals, including through partnerships

Proposed programme plan for 2024

- 9.122 Implementing the United Nations strategic plan for forests depends on accelerating the contributions of all stakeholders, which, in line with Economic and Social Council resolution [2022/17](#), requires coordinating, mainstreaming and upscaling forest-related action and supporting partnerships. The subprogramme will enhance coordination and cooperation with relevant actors to make progress in 2024.

Lessons learned and planned change

- 9.123 The lesson for the subprogramme was that strengthening collaboration with global actors was critical to achieving the global forest goals by 2030. In applying the lesson, the subprogramme will strengthen existing collaboration with members of the Collaborative Partnership on Forests; build new collaborations with key stakeholders, including the private sector, scientific, academic and philanthropic organizations, and regional and subregional entities, and increase their contributions.
- 9.124 Expected progress towards the objective is presented in the performance measure below (see table 9.29).

Table 9.29
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Member organizations of the Collaborative Partnership on Forests developed the Partnership’s workplan for the period 2021–2024, which is aligned with the United Nations strategic plan for forests 2017–2030	Business and industry major group designated a new focal point to help to facilitate coordination and discussion on United Nations Forum on Forests-related issues with the private sector	2 member organizations of the Collaborative Partnership on Forests, 2 regional and subregional entities and 2 stakeholders integrate the United Nations Strategic Plan for Forests into their workplans	2 joint initiatives among member organizations of the Collaborative Partnership on Forests, regional and subregional entities and stakeholders to accelerate implementation of the United Nations strategic plan for forests

Deliverables

- 9.125 Table 9.30 lists all deliverables of the subprogramme.

Table 9.30
Subprogramme 8: deliverables for the period 2022–2024, by category and subcategory

Consultation, advice and advocacy: advice on various issues related to forests.				
Databases and substantive digital materials: database on clearing house mechanism.				
D. Communication deliverables				
Outreach programmes, special events and information materials: special events, including the International Day of Forests and events of the Collaborative Partnership on Forests; and factsheets and policy briefs on sustainable forest management, forest financing and various other issues related to forests.				
External and media relations: press releases and articles on the United Nations Forum on Forests and the International Day of Forests.				

Subprogramme 9 Financing for sustainable development

Objective

- 9.126 The objective, to which this subprogramme contributes, is to advance the follow-up on and review of the implementation of the outcomes of the International Conferences on Financing for Development, including the Addis Ababa Action Agenda, and the delivery of the means of implementation of the 2030 Agenda.

Strategy

- 9.127 To contribute to the objective, the subprogramme will:
- (a) Build on continuing analytical work in collaboration with partners in the Inter-Agency Task Force on Financing for Development and prepare the annual *Financing for Sustainable Development Report* and other reports to support Member State negotiations at the Economic and Social Council forum on financing for development follow-up, Second Committee deliberations and others;
 - (b) Scale up investment for the Sustainable Development Goals, provide concrete solutions to continue to scale up investment in sustainable development by building on the work of the Global Investors for Sustainable Development Alliance, and facilitate the dialogue on sustainable investment, including through the Sustainable Development Goals Investment Fair, which provides a platform for direct engagement between Member States and investors;
 - (c) Provide policy support to intergovernmental and expert processes and capacity-building to foster more inclusive and effective international tax cooperation and support Member States in enhancing their tax policies and administration, improve their domestic resource mobilization,

address tax evasion, aggressive tax avoidance and illicit financial flows, and advance progress toward achieving the Sustainable Development Goals and climate action, with specific attention given to the least developed countries, landlocked developing countries and small island developing States;

- (d) Enhance its support for the Development Cooperation Forum in its action-oriented and results-focused reviews of trends, progress and emerging issues in international development cooperation, with an emphasis on policies and practices in support of those with the fewest resources and the weakest capacities;
- (e) Support countries in their design and implementation of integrated national financing frameworks, through the Integrated National Financing Framework Facility. The Facility, launched by the Department jointly with the United Nations Development Programme and the Organisation for Economic Co-operation and Development in April 2022, brokers technical assistance, facilitates knowledge exchange and provides access to technical guidance on integrated national financing frameworks to implementing countries.

9.128 The above-mentioned work is expected to result in:

- (a) Policy and action on financing for sustainable development through strengthened analytical foundations for the outcomes of the Economic and Social Council forum on financing for development follow-up and Second Committee deliberations;
- (b) Countries designing and using integrated national financing frameworks, including actionable policy options, to mobilize financing for sustainable development;
- (c) The acceleration of the mobilization of resources for the Sustainable Development Goals, leading to greater investment opportunities with positive impacts, including in countries in special situations;
- (d) Improved solutions at the global, regional, national and local levels for strengthening tax cooperation and domestic resource mobilization and more effective implementation by Governments and other stakeholders of United Nations policy and practical guidance on tax matters;
- (e) Utilization by Governments and other stakeholders of policy guidance to enhance international development cooperation, for the effective implementation of the 2030 Agenda, the Addis Ababa Action Agenda, the Paris Agreement and the Sendai Framework for Disaster Risk Reduction 2015–2030.

Programme performance in 2022

Increased implementation by local governments of asset management action plans for sustainable development through multilingual online learning resources

9.129 Effective infrastructure asset management helps governments to improve essential service delivery, as well as mobilize resources needed for sustainable development. As part of its capacity development initiative on infrastructure asset management, in collaboration with the United Nations Capital Development Fund and the United Nations Office for Project Services, the subprogramme encouraged local governments, as well as agencies engaged in infrastructure asset management, to design and implement multi-year asset management action plans focused on critical priority assets, with an emphasis on climate resilience and data and statistical capacity. By sharing action plan templates and writing guides in multiple languages online and by introducing additional hybrid and online learning modalities, uptake of these action plans increased significantly over the past three years. As a result, and in addition to the 65 local governments that received direct action plan design and implementation as part of the subprogramme's workshop training, more than 84 new local governments have designed and committed themselves to implementing the action plans. To encourage peer learning among governments, all 149 action plans can be accessed online.

9.130 Progress towards the objective is presented in the performance measure below (see figure 9.XII).

Figure 9.XII

Performance measure: number of asset management action plans designed and implemented by local governments

Planned results for 2024

Result 1: towards the design and implementation by developing countries of fiscal, financial and related policies that reduce risks and build resilience

Programme performance in 2022 and target for 2024

9.131 The subprogramme’s work contributed to the strengthened capacity of national ministries of finance and tax administrations and other ministries, departments and offices at the regional, national and local levels in the areas of fiscal policies and practices, infrastructure asset management and effective development cooperation to reduce risk and build resilience, with 95.2 per cent of trained governmental officials having reported increased awareness and understanding in those areas, which exceeded the planned target of 75 per cent.

9.132 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 9.XIII).

Figure 9.XIII

Performance measure: national ministry of finance and tax administration staff reporting increased awareness and understanding of fiscal policies and practices to reduce risk and build resilience (annual)

(Percentage)

Result 2: towards attracting sustainable investment by developing countries for the Sustainable Development Goals

Programme performance in 2022 and target for 2024

- 9.133 The subprogramme’s work contributed to 10 developing countries participating in the Sustainable Development Goals Investment Fair and interacting with prospective investors on sustainable development investment opportunities, which met the planned target.
- 9.134 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.31).

Table 9.31
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Sustainable Development Goals Investment Fair cancelled due to the pandemic	<ul style="list-style-type: none"> • 8 developing countries participated in the Sustainable Development Goals Investment Fair • Private investors, such as the members of the Global Investors for Sustainable Development Alliance, welcomed the Fair as an opportunity to engage with Governments • Investors followed up with some countries on specific projects 	10 developing countries participated in the Sustainable Development Goals Investment Fair	12 developing countries participate in the Sustainable Development Goals Investment Fair and interact with prospective investors	13 developing countries participate in the Sustainable Development Goals Investment Fair and interact with prospective investors

Result 3: creditors and debtor countries agree on global challenges and policy solutions on debt, liquidity and fiscal space for investment in the Sustainable Development Goals

Proposed programme plan for 2024

- 9.135 Debt vulnerabilities of many developing countries have increased in the aftermath of COVID-19, which poses financial challenges and reduces investment in the Sustainable Development Goals. The risk of debt crises and default is rising, which can have significant macroeconomic and socioeconomic impacts, including a reduction in economic growth and an increase in poverty. The subprogramme has published policy recommendations on challenges related to debt, liquidity and fiscal space for investment in the Goals. While these recommendations have contributed to advancing global understanding of the challenge and the range of policy options available, they have not been able to facilitate agreement on the possible landing space for resolution of these global challenges.

Part IV International cooperation for development

Lessons learned and planned change

- 9.136 The lesson for the subprogramme was that there was a need to create a neutral space for dialogue on debt issues that was inclusive of both creditors and debtors. In applying the lesson, the subprogramme will organize a series of dialogues to bring together relevant actors in an inclusive manner to identify feasible solutions that can achieve global consensus.
- 9.137 Expected progress towards the objective is presented in the performance measure below (see table 9.32).

Table 9.32
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	–	Member States and relevant partners in the United Nations system provide feedback and guidance on priority issues related to debt, liquidity and fiscal to inform the development of policy dialogues	Policy solutions on debt, liquidity and fiscal space for investment in the Sustainable Development Goals discussed and/or agreed

Deliverables

- 9.138 Table 9.33 lists all deliverables of the subprogramme.

- 9.140 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 9.37 to 9.39 and figure 9.XIV.
- 9.141 As reflected in tables 9.37 (1) and 9.38 (1), the overall resources proposed for 2024 amount to \$87,593,400 before recosting, reflecting a net increase of \$464,600 (or 0.5 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

9.142 As reflected in table 9.37 (1), resource changes reflect a net decrease of \$369,700, as follows:

- Executive direction and management.** The increase of \$60,200 relates to the higher provision of continuing vacancy rates for an Associate Public Information Officer (P-2) established pursuant to General Assembly resolution [77/262](#), which was approved for 2023 at a 50 per cent vacancy rate, in line with established practice;
- Subprogramme 2, Inclusive social development.** The decrease of \$64,700 relates to the removal of non-recurrent provisions (general temporary assistance) approved for 2023, pursuant to General Assembly resolution [76/133](#) on inclusive policies and programmes to address homelessness, including in the aftermath of the coronavirus disease (COVID-19);
- Subprogramme 9, Financing for sustainable development.** The decrease of \$397,000 relates to the removal of non-recurrent provisions (general temporary assistance and consultants) approved for 2023, pursuant to General Assembly resolution [77/244](#) on the promotion of inclusive and effective international tax cooperation at the United Nations;
- Programme support.** The increase of \$31,800 relates to the higher provision of continuing vacancy rates for a Programme Management Assistant (General Service (Other level)) established pursuant to General Assembly resolution [77/262](#), which was approved for 2023 at a 50 per cent vacancy rate, in line with established practice.

New and expanded mandates

9.143 As reflected in table 9.37 (1), resource changes reflect an increase of \$702,000, as follows:

- Subprogramme 4, Statistics.** The increase of \$689,600 relates to the resource requirements pursuant to Economic and Social Council resolution [2022/24](#), on enhancing global geospatial information management arrangements, whereby the Council decided to strengthen the work of the Committee of Experts on Global Geospatial Information Management and called for the

establishment of a secretariat for the Committee, composed of seven posts (1 P-5, 1 P-4, 2 P-3, 2 P-2 and 1 General Service (Other level)), as well as related office supplies. The proposed new posts are described in annex III to the present report;

- (b) **Programme support.** The increase of \$12,400 relates to the provision of standard common services costs (ICT/maintenance of office automation equipment) associated with the proposed seven new posts indicated above.

Other changes

9.144 As reflected in table 9.37 (1), resource changes reflect a net increase of \$132,300, as follows:

- (a) **Policymaking organs.** The decrease of \$20,300 under travel of representatives relates to the proposed outward redeployment of resources to subprogramme 1 to accommodate the travel of seven additional members of the Ad Hoc Advisory Group on Haiti for 2024, taking into account General Assembly resolution [76/246 A](#);
- (b) **Subprogramme 1, Intergovernmental support and coordination for sustainable development.** The increase of \$20,300 under travel of representatives relates to the proposed inward redeployment of resources from policymaking organs to cover the travel of additional members of the Ad Hoc Advisory Group on Haiti, taking into account General Assembly resolution [76/246 A](#);
- (c) **Subprogramme 5, Population.** The decrease of \$72,300 relates to the net effect of the proposed abolishment of two General Service (Other level) posts (Information Systems Assistant and Editorial Assistant) and the proposed establishment of one post of Data Engineer (P-3), as described in annex III, as well as a reduction under other staff costs;
- (d) **Programme support.** The increase of \$204,600 relates to the proposed conversion of an Evaluation Officer (P-4) from general temporary assistance under section 35, Development Account, as described in annex III. The establishment of this post would enable greater stability and continuity in the work of the management team for the Development Account. Moreover, the redeployment from section 35 would ensure that the Evaluation Officer forms an integral part of the management team (1 P-5, 1 P-4 and 1 P-2) funded under section 9. While the general temporary assistance position under section 35 has helped to lay the groundwork for evaluation as an essential component of the programme management function, the conversion and redeployment of this post would ensure that the evaluation function is given a continuing role as a strategic pillar of Development Account programme management.

Extrabudgetary resources

9.145 As reflected in tables 9.37 (2) and 9.38 (2), extrabudgetary resources amount to \$90,931,300. The resources would complement regular budget resources and would be used mainly to provide for various substantive and capacity development activities, as described under each subprogramme. Extrabudgetary estimates also include resources in the amount of \$55,378,200 for the trust funds for the Junior Professional Officers Programme and the United Nations Assistance to the Khmer Rouge Trials, which the Department administers (both reflected under programme support). The expected net decrease of \$5,820,900 is attributable mainly to the anticipated completion of various projects in 2023, a projected reduction in the number of projects in 2024 and reduced contributions for the United Nations Assistance to the Khmer Rouge Trials, offset in part by an anticipated increase in contributions to the Junior Professional Officers Programme.

9.146 Anticipated in-kind contributions will provide for donated right of use of premises for project offices with an estimated value of \$273,000 (\$231,000 under subprogramme 3 and \$42,000 under subprogramme 7), and other services such as expert advice, use of training facilities and provision of equipment, with an estimated value of \$390,000 (\$136,000 under subprogramme 3 and \$254,000 under subprogramme 7).

9.147 The extrabudgetary resources under this section are subject to the oversight of the Department, which has delegated authority from the Secretary-General.

Policymaking organs

9.148 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies, special sessions of the General Assembly and intergovernmental processes serviced by the Department. The provisions for experts serving on committees in their individual capacity are in accordance with Assembly resolution 2491 (XXIII), as amended by resolutions 41/176, 42/25 (sect. VI) and 43/217 (sect. IX), while the provisions for members of the functional commissions are in accordance with Assembly resolutions 1798 (XVII), 2128 (XX) and 2245 (XXI). Table 9.40 provides information on the standing intergovernmental organs and expert bodies and related resource requirements under the regular budget.

Table 9.40
Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
High-level political forum on sustainable development	The forum provides political leadership, guidance and recommendations for sustainable development, follows up on and reviews progress in the implementation of sustainable development commitments, enhances the integration of the 3 dimensions of sustainable development and has a focused, dynamic and action-oriented agenda, ensuring the appropriate consideration of new and emerging sustainable development challenges. The forum also reviews progress in the implementation of the 2030 Agenda and the achievement of the Sustainable Development Goals and oversees a network of follow-up and review processes at the global level. In addition, the forum conducts voluntary national reviews and thematic reviews every year under the auspices of the Economic and Social Council. The travel of representatives from the least developed countries to the meetings is funded from the regular budget. The outcome of the meetings of the forum under the auspices of the Council is a negotiated ministerial declaration.	Mandate: General Assembly resolutions 66/288, 67/290 and 70/299 Membership: All States Members of the United Nations and States members of the specialized agencies Number of sessions in 2024: 1 (annual session under the auspices of the Economic and Social Council)	436.2	436.2
Commission for Social Development	The Social Commission was established in 1946 as a functional commission of the Economic and Social Council. In 1966, the Council renamed it the Commission for Social Development to clarify its role as a preparatory body of the Council for the entire range of social development policy issues. In 1996, the Council decided that the Commission would have the primary responsibility for follow-up to the World Summit for Social Development and review of the implementation of the Copenhagen Declaration on Social Development and the Programme of Action of the World Summit for Social Development. In 2016, the Council affirmed that the Commission would contribute to the follow-up on the 2030 Agenda, within its existing mandate, by supporting	Mandate: Economic and Social Council resolutions 10 (II), 1139 (XLI), 1996/7 and 2016/6 Membership: 46 government officials Number of sessions in 2024: 1	132.5	132.5

Part IV International cooperation for development

	the thematic reviews of the high-level political forum on sustainable development on progress on the achievement of the Sustainable Development Goals.			
Permanent Forum on Indigenous Issues	The Permanent Forum is a subsidiary organ of the Economic and Social Council. Its members serve in their personal capacity as independent experts on indigenous issues. The Permanent Forum serves as an advisory body to the Council with a mandate to discuss Indigenous issues within the mandate of the Council relating to economic and social development, culture, the environment, education, health and human rights.	Mandate: Economic and Social Council resolution 2000/22 Membership: 16 experts Number of sessions in 2024: 1	229.4	229.4
Statistical Commission	The Commission is a functional commission of the Economic and Social Council. It assists the Council in promoting the development of national statistics and the improvement in their comparability, coordinating the statistical work of the specialized agencies, developing the central statistical services of the Secretariat, advising the organs of the United Nations on questions relating to the collection, analysis and dissemination of statistical information and promoting the improvement in statistics and statistical methods in general.	Mandate: Economic and Social Council resolution 1566 (L), reaffirming its resolution 8 (I), as amended by 8 (II) of 1946; and resolutions 2006/6 and 2020/5 Membership: 24 government officials Number of sessions in 2024: 1	68.8	68.8
Committee of Experts on Global Geospatial Information Management	The Committee is a subsidiary body of the Economic and Social Council. The Committee makes joint decisions and sets directions on the production, availability and application of geospatial information within national and global policy frameworks, promotes common principles, policies, methods, mechanisms and standards for the interoperability of geospatial data and services, and provides a platform for the development of effective strategies on how to build and strengthen national capacity concerning geospatial information, especially in developing countries. The Committee is administered within existing resources and is organized accordingly.	Mandate: Economic and Social Council resolutions 2011/24, 2016/27 and 2022/24 Membership: experts from all Member States and experts from international organizations who participate as observers Number of sessions in 2024: 1	–	–
Commission on Population and Development	The Commission on Population and Development is a functional commission of the Economic and Social Council. The Commission assists the Council by: (a) arranging for studies and advising the Council on population issues and trends, the integration of population and development strategies, population and related development policies and programmes and the provision of population assistance, as well as addressing population and development questions on which either the principal or the subsidiary organs of the United Nations or the specialized agencies may seek advice; (b) monitoring, reviewing and assessing the implementation of the Programme of Action of the International Conference on Population and Development at the national, regional and global levels and, within its mandate, contributing to the follow-up on and review of the 2030 Agenda; and (c) reviewing the findings of research and analysis pertaining to the interrelationships between	Mandate: Economic and Social Council resolutions 3 (III), 150 (VII) and 2016/25 and decision 1995/320, and General Assembly resolution 49/128 Membership: 47 government officials Number of sessions in 2024: 1	79.4	79.4

Committee for Development Policy	<p>population and development at the national, regional and international levels and advising the Council thereon.</p> <p>The Committee is a subsidiary body of the Economic and Social Council. It considers the annual theme of the Council and is called upon to undertake a triennial review of the status of least developed countries and to meet on that issue once every 3 years. The Committee also monitors the development progress of graduated countries on annual basis for a period of 3 years after graduation became effective, and triennially thereafter, as a complement to the 2 triennial reviews of the list of least developed countries carried out by the Committee. It briefs the Council every 4 years, in the year preceding the quadrennial comprehensive policy review, on how the United Nations development system is applying the least developed country category.</p>	<p>Mandate: Economic and Social Council resolutions 1998/46 and 2017/29 and General Assembly resolution 67/221</p> <p>Membership: 24 experts serving in their personal capacity from the fields of economic development, social development and environmental protection</p> <p>Number of sessions in 2024: 1</p>	224.0	224.0
Committee of Experts on Public Administration	<p>The Committee is a subsidiary body of the Economic and Social Council. It supports intergovernmental deliberations by providing policy advice and programmatic guidance to improve governance and public administration structures and processes for development. It also assists the Council by reviewing trends, issues and priorities in public administration and institution-building, notably in relation to the 2030 Agenda and in support of the achievement and progress reviews of the Sustainable Development Goals.</p>	<p>Mandate: Economic and Social Council resolutions 2001/45 and 2003/60</p> <p>Membership: 24 experts serving in their personal capacity from the interrelated fields of public economics, public administration and public finance</p> <p>Number of sessions in 2024: 1</p>	216.7	216.7
United Nations Forum on Forests	<p>The Forum is an intergovernmental subsidiary body of the Economic and Social Council. The core functions of the Forum are to: (a) provide a coherent, open, transparent and participatory global platform for policy development, dialogue, cooperation and coordination on issues related to the sustainable management of all types of forests, including emerging issues, in an integrated and holistic manner, including through cross-sectoral approaches; (b) promote, monitor and assess the implementation of sustainable forest management, in particular the United Nations strategic plan for forests and the achievement of its global forest goals and associated targets and the United Nations forest instrument, and mobilize, catalyse and facilitate access to financial, technical and scientific resources to that end; (c) promote governance frameworks and enabling conditions at all levels to achieve sustainable forest management; (d) promote coherent and collaborative international policy development on issues related to all types of forests; and (e) strengthen high-level political engagement, with the participation of major groups and other stakeholders, in support of sustainable forest management.</p>	<p>Mandate: Economic and Social Council resolutions 2000/35 and 2015/33 and General Assembly resolution 71/285</p> <p>Membership: 197 government officials</p> <p>Number of sessions in 2024: 1</p>	65.5	65.5

Part IV International cooperation for development

<i>Policy-making organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Committee of Experts on International Cooperation in Tax Matters	The Committee is a subsidiary body of the Economic and Social Council. It is recognized for its work in shaping international tax norms and providing policy and practical guidance to assist countries in mobilizing domestic resources for sustainable development and aligning their fiscal policies with sustainable development priorities. The Committee engages with the Council through the Council's annual special meeting on international cooperation in tax matters, with a view to enhancing intergovernmental consideration of tax issues. The Committee is mandated to: (a) keep under review and update as necessary the United Nations Model Double Taxation Convention between Developed and Developing Countries and the Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries; (b) provide a framework for dialogue with a view to enhancing and promoting international tax cooperation among national tax authorities; (c) consider how new and emerging issues could affect international cooperation in tax matters and develop assessments, commentaries and appropriate recommendations; (d) make recommendations on capacity-building and the provision of technical assistance to developing countries and countries with economies in transition; and (e) give special attention to developing countries and countries with economies in transition in dealing with all the above issues.	Mandate: Economic and Social Council resolutions 1273 (XLIII), 2004/69 and 2017/2 and General Assembly resolution 69/313 Membership: 25 experts nominated by Governments and acting in their expert capacity Number of sessions in 2024: 2	532.0	511.7
Total			1 984.5	1 964.2

9.149 The proposed regular budget resources for 2024 amount to \$1,964,200 and reflect a decrease of \$20,300 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 9.144 (a) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.41.

Executive direction and management

- 9.150 The Under-Secretary-General for Economic and Social Affairs is responsible for the overall management, supervision and administration of the Department in the implementation of its mandates and its approved programme of work. As head of the Department, he is delegated managerial authority over human, financial and physical resources to allow for the effective delivery of the Department's mandates. He serves as the convener of the Executive Committee on Economic and Social Affairs, as well as the Programme Manager of the United Nations Development Account, including management of capacity development activities. He is also a member of the United Nations Sustainable Development Group. The Under-Secretary-General is assisted by the Assistant Secretary-General for Policy Coordination and Inter-Agency Affairs and the Assistant Secretary-General for Economic Development.
- 9.151 The Assistant Secretary-General for Policy Coordination and Inter-Agency Affairs supports the Under-Secretary-General by providing substantive support and policy advice on departmental support to intergovernmental processes, including the General Assembly, the Economic and Social Council and its subsidiary bodies, and the high-level political forum on sustainable development. The Assistant Secretary-General is also responsible for inter-agency coordination, including support to the Under-Secretary-General in the work of the United Nations Sustainable Development Group and the United Nations System Chief Executives Board for Coordination.
- 9.152 The Assistant Secretary-General for Economic Development serves as the principal economic adviser to the Under-Secretary-General and assists in providing thought leadership and guidance on the policy research and analysis work of the Department, including on frontier and emerging issues. The Assistant Secretary-General is also responsible for the coordination and review of the publications of the Department, reports of the Secretary-General and other technical products that provide a platform for amplifying and delivering the work of the Department on global development policy.
- 9.153 The Office of the Under-Secretary-General supports the senior leadership of the Department in the overall coordination and management of its programmes and resources, as well as the implementation of Department-wide initiatives. It assists the Under-Secretary-General in implementing the Department's overall programming, monitoring and evaluation activities. The Office coordinates the Department's support for the resident coordinator system, in collaboration with the Development Coordination Office. It also facilitates the work of the Department's gender and disability inclusion focal points and is responsible for the review of legislative reports and flagship publications of the Department.
- 9.154 The Strategic Planning and Communications Service supports the Under-Secretary-General in advancing the Department's strategic direction, integration and policy coherence, including its collaborative work with other Secretariat entities in the areas of knowledge management, communications, websites, social and multimedia outreach, publishing and information technology. It supports the Department's engagement in the Secretary-General's Executive Committee and coordinating mechanisms or bodies and represents the Department in relevant Secretariat policy and normative bodies, including the Publications Board, the Information and Communications Technology Board and the United Nations Communications Group. The Service plays a central role in the programme delivery of the Department through its support for information systems and enterprise applications. It also supports the Department's editorial board and departmental strategic planning and communications networks, and is responsible for the Department's strategic communications framework, including its implementation.
- 9.155 The Programme, Monitoring and Evaluation Unit coordinates the preparation of the Department's annual programme plan and is responsible for the internal monitoring and evaluation of the Department's work. The Unit serves as the focal point for evaluations by oversight bodies and provides support for audits of the Department. It is also responsible for producing monitoring reports for senior management decision-making. The Unit reports to the Under-Secretary-General through

the Chief of Office of the Under-Secretary-General. The Unit operates independently from other operational and management functions within the Department.

- 9.156 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. Drawing on its experience in 2020, 2021 and 2022, the Department uses online platform tools and organizes meetings and workshops in a virtual or hybrid format, whenever possible. In 2024, the Department will continue to increase the provision of the electronic distribution of documents and materials and to increase the paperless conduct of meetings, thereby reducing paper use and waste. The Department will also increase its focus and efforts on the online readability of publications to encourage online viewing and discourage the printing of physical copies. Whenever supported by donors, the Department will offset the greenhouse gas emissions generated by air travel in connection with large-scale conferences. Furthermore, the Organization’s policy on avoiding single-use plastics at Department-organized events is strictly observed. The Department is committed to contributing to the implementation of the Secretariat’s climate neutrality plan.
- 9.157 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 9.42. Although the travel restrictions improved slightly in 2022 since the outbreak of the COVID-19 pandemic, advance planning has remained challenging. The Department has provided internal guidance on the advance booking policy, especially related to intergovernmental meetings, workshops and events organized by the Department. The late receipt of voluntary contributions and late nominations of non-staff travellers also contributed to a lower rate of compliance. The Department will continue to make efforts to improve the compliance rate by, among other things, promoting advance planning for all Department events and working more closely with Governments on the nominations of representatives.

Table 9.42

- 9.158 The proposed regular budget resources for 2024 amount to \$4,999,800 and reflect an increase of \$60,200 compared with the appropriation for 2023. The proposed increase is explained in paragraph 9.142 (a) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.43 and figure 9.XV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.159 Extrabudgetary resources for the component amount to \$352,600. The resources would complement regular budget resources and would be used mainly to support activities aimed at increasing understanding and awareness of the 2030 Agenda and expanding partnerships for implementation through global policy dialogues. The expected decrease of \$306,400 is due mainly to the scheduled completion of the project related to the strengthening of United Nations thought leadership on sustainable and inclusive development.

Programme of work

Subprogramme 1

Intergovernmental support and coordination for sustainable development

9.160 The proposed regular budget resources for 2024 amount to \$7,838,700 and reflect an increase of \$20,300 compared with the appropriation for 2023. The proposed increase is explained in paragraph 9.144 (b) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.44 and figure 9.XVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.161 Extrabudgetary resources for the subprogramme amount to \$490,000. The resources would complement regular budget resources and would be used mainly to provide for: (a) the improvement in analytical work for the quadrennial comprehensive policy review of operational activities for development of the United Nations system, including the follow-up on and monitoring of the implementation of General Assembly resolution 75/233 on the implementation of the 2020 quadrennial comprehensive policy through more frequent surveys of resident coordinators, United Nations country teams and Governments; and (b) the participation of government experts of developing countries in presenting their countries' voluntary national reviews at the high-level political forum on sustainable development. The expected decrease of \$108,500 is due mainly to the completion of projects related to voluntary national reviews.

**Subprogramme 2
Inclusive social development**

9.162 The proposed regular budget resources for 2024 amount to \$9,694,500 and reflect a decrease of \$64,700 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 9.142 (b) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.45 and figure 9.XVII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.163 Extrabudgetary resources for the subprogramme amount to \$894,600. The resources would complement regular budget resources and would be used mainly to support: (a) activities related to persons with disabilities, young people, older persons, families and Indigenous Peoples; and (b) capacity development projects and activities related to government initiatives to develop national action plans and policies on Indigenous Peoples and to enhance the social inclusion of children and young people with autism through sport. The expected increase of \$418,300 is due mainly to anticipated additional projects, including capacity development activities, to respond to requests from the several Governments to support their work on Indigenous Peoples.

**Subprogramme 3
 Sustainable development**

9.164 The proposed regular budget resources for 2024 amount to \$9,383,700 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.46 and figure 9.XVIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.165 Extrabudgetary resources for the subprogramme amount to \$9,549,400. The resources would complement regular budget resources and would be used mainly to support analytical work and the implementation of capacity-building projects on cross-cutting topics, such as partnerships for sustainable development, the localization of the Sustainable Development Goals, the strengthening of the role of micro-, small and medium-sized enterprises for the implementation of the 2030 Agenda, and the integration of the Goals into national sustainable development strategies. They would also cover sectoral topics such as water, energy, climate change, the ocean, sustainable transport, smart cities, sustainable production and consumption and agriculture, and their interlinkages. The work of the subprogramme will remain focused on countries in special situations, such as least developed countries, landlocked developing countries, countries in Africa and small island developing States, as well as middle-income countries upon request. The expected decrease of \$2,824,400 is due mainly to some capacity-building projects reaching the end of their implementation period in 2023 and 2024.

**Subprogramme 4
Statistics**

9.166 The proposed regular budget resources for 2024 amount to \$19,415,200 and reflect an increase of \$689,600 compared with the appropriation for 2023. The proposed increase is explained in paragraph 9.143 (a) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.47 and figure 9.XIX.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.167 Extrabudgetary resources for the subprogramme amount to \$6,021,000. The resources would complement regular budget resources and would be used mainly to support: (a) the modernization and transformation of the national statistical and geospatial information systems of developing countries to meet the increased demand for data for the implementation of the 2030 Agenda; and (b) capacity development projects and activities for strengthening the ability of developing countries to produce better and more timely data to inform policies and monitor progress towards achieving the Sustainable Development Goals, and for strengthening geospatial information management systems, including for the United Nations Global Geospatial Knowledge and Innovation Centre. The expected decrease of \$1,050,400 is due mainly to the completion in 2023 of some of the subprogramme’s capacity-building projects.

Subprogramme 5 Population

9.168 The proposed regular budget resources for 2024 amount to \$7,070,800 and reflect a decrease of \$72,300 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 9.144 (c) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.48 and figure 9.XX.

Extrabudgetary resources

9.169 Extrabudgetary resources for the subprogramme amount to \$239,400. The resources would complement regular budget resources and would be used to support the project on addressing the gaps in comparable and transparent global information on family planning indicators and underlying

population data to expand knowledge on family planning. The expected decrease of \$763,800 is due to the scheduled completion of the project during the course of 2024.

Subprogramme 6 Economic analysis and policy

9.170 The proposed regular budget resources for 2024 amount to \$6,918,100 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.49 and figure 9.XXI.

Extrabudgetary resources

9.171 Extrabudgetary resources for the subprogramme amount to \$600,000. The resources would complement regular budget resources and would be used mainly to support capacity development projects and activities to strengthen the capacity of developing countries to implement the 2030 Agenda. The expected increase of \$310,000 is due mainly to the inception and implementation of project on rebuilding better and more sustainably from the COVID-19 pandemic through the enhanced design and implementation of sustainable national recovery strategies based on policy simulations.

**Subprogramme 7
Public institutions and digital government**

9.172 The proposed regular budget resources for 2024 amount to \$6,650,000 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.50 and figure 9.XXII.

Extrabudgetary resources

9.173 Extrabudgetary resources for the subprogramme amount to \$3,154,300. The resources would complement regular budget resources and would be used mainly to support capacity development projects and activities for developing countries to strengthen coherent and integrated approaches to the implementation of the 2030 Agenda at the local, national and regional levels, as well as to enhance the presence and leadership of women in public institutions at the local and national levels. The expected decrease of \$1,539,600 is due mainly to the scheduled completion of a large-scale fellowship project and other capacity development activities in 2023.

Subprogramme 8 Sustainable forest management

9.174 The proposed regular budget resources for 2024 amount to \$2,384,200 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.51 and figure 9.XXIII.

Extrabudgetary resources

9.175 Extrabudgetary resources for the subprogramme amount to \$1,121,400. The resources would complement regular budget resources and would be used mainly to support activities related to the preparations for the midterm review of the international arrangement on forests, the Global Forest Financing Facilitation Network and the work of the secretariat of the United Nations Forum on Forests on communications and outreach in connection with the implementation of the United Nations strategic plan for forests 2017–2030. The expected decrease of \$42,100 is due mainly to the scheduled completion of some capacity development projects related to the Global Forest Financing Facilitation Network.

**Subprogramme 9
 Financing for sustainable development**

9.176 The proposed regular budget resources for 2024 amount to \$6,154,500 and reflect a decrease of \$397,000 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 9.142 (c) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.52 and figure 9.XXIV.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

9.177 Extrabudgetary resources for the subprogramme amount to \$3,005,900. The resources would complement regular budget resources and would be used mainly to provide intergovernmental support, analytical products and capacity development support to Member States to implement the outcomes of International Conferences on Financing for Development, in particular the Addis Ababa Action Agenda. Activities would include: (a) the preparation of policy papers; (b) the provision of options for countries to respond to ongoing global challenges; (c) the provision of strategic advice and support for capacity development in key areas, such as international cooperation in tax matters; (d) the strengthening of dialogue with international financial institutions and organizations to address global challenges; (e) multi-stakeholder engagement, in particular with the private sector; and (f) support for development cooperation. The expected decrease of \$1,265,300 is due mainly to the scheduled completion of some projects related to the implementation of the Global Investors for

Sustainable Development Alliance and the Joint Programme on Financing a Green, Inclusive and Sustainable Recovery.

Programme support

- 9.178 Programme support comprises the Executive Office and the Capacity Development Programme Management Office.
- 9.179 The Executive Office supports the Under-Secretary-General, as follows: (a) in his exercise of the delegation of authority to manage the human, financial and physical resources of the Department; (b) in the context of the monitoring and accountability framework; and (c) as his main interlocutor with the Department of Management Strategy, Policy and Compliance and the Department of Operational Support, including in relation to participation in focal point networks or committees in support of various management-related reform initiatives. The Executive Office also provides administrative support to the Office of the Special Adviser on Africa, the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States, the New York office of the secretariat of the United Nations System Chief Executives Board for Coordination and the Regional Commissions New York Office.
- 9.180 The Capacity Development Programme Management Office manages and coordinates the capacity development function of the Department through the formulation, coordination and implementation of the Department’s capacity development activities for the coherent and integrated delivery of capacity development programmes, projects and other activities and the promotion of direct and effective translation of intergovernmental outcomes into the operational programmes. The Office supports the Under-Secretary-General in his role as Programme Manager of the United Nations Development Account, and in promoting strategic cooperation and partnerships within the Secretariat and with the United Nations development system at large, including the resident coordinator system, to promote more coherent, coordinated and cross-sectoral support for the implementation of the 2030 Agenda and the Addis Ababa Action Agenda. The Office also manages the Junior Professional Officers Programme for the Secretariat and for the resident coordinator system.
- 9.181 The proposed regular budget resources for 2024 amount to \$5,119,700 and reflect an increase of \$248,800 compared with the appropriation for 2023. The proposed changes are explained in paragraphs 9.142 (d), 9.143 (b) and 9.144 (d) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 9.53 and figure 9.XXV.

Extrabudgetary resources

9.182 Extrabudgetary resources for the component amount to \$65,502,700. The resources would complement regular budget resources and would be used mainly to provide programmatic and administrative support in delivery of substantive and capacity development activities of the Department. Extrabudgetary resources include an estimated amount of \$55,378,200 for the trust funds for the Junior Professional Officer Programme and the United Nations Assistance to the Khmer Rouge Trials, which the Department administers. The expected net increase of \$1,351,300 is due mainly to the increased estimates for the Junior Professional Officer Programme, offset in part by the decreased contributions for the United Nations Assistance to the Khmer Rouge Trials and the scheduled completion of capacity development activities.

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee trusts that the Department of Economic and Social Affairs will strengthen its efforts to achieve equitable geographical representation of Member States among its staff and provide an update in all future programme budget submissions (para. IV.16).

The Advisory Committee trusts that the Department of Economic and Social Affairs will continue to further its reform agenda with a view to effectively and efficiently supporting the priorities defined by Member States in the implementation of the 2030 Agenda and provide an update thereon in the next budget submission (para. IV.18).

The Advisory Committee notes the activities undertaken by the Department of Economic and Social Affairs in coordination with the United Nations entities and trusts that the Department, in close cooperation with the resident coordinator system, will further improve coordination for the delivery of United Nations system

As at 31 December 2022, women represented 57.4 per cent of the overall staff in the Department of Economic and Social Affairs. As at 31 December 2022, incumbents in the 257 posts in the Professional and higher categories came from a total of 80 Member States, of which Western European and other States were represented by 124, Asia and the Pacific by 61, Latin American and Caribbean by 28, Africa by 22 and Eastern Europe by 22.

The Department's efforts to achieve greater geographical representation of Member States are guided by the Secretariat's geographical diversity strategy of 2020. Outreach efforts are undertaken to broaden the pool of applicants from various regions to the Department's job openings. Such efforts include outreach to permanent missions of Member States, United Nations information centres, resident coordinator offices, focal points in United Nations system organizations and professional networks of the hiring division/office.

The programme plan reflects the Secretary-General's continued effort since 2017 to enhance the effectiveness, efficiency, accountability and internal coordination of the Department to provide support to the follow-up on and review of the 2030 Agenda at the global level. As progressively reported to Member States since its 2018–2019 programme budget, the Department's structure, programme of work and activities are aligned with the 2030 Agenda and designed to support Member States in its implementation. This current proposal responds to the priorities of Member States, guided by recent development trends, legislative mandates and organizational initiatives emerging from the various intergovernmental processes that inform the Department's work.

The Department's 2024 proposed programme budget responds to the priorities of Member States as shaped by current development trends and as guided by legislative mandates and organizational objectives emerging from the various intergovernmental processes that inform the work of the Department. The

Brief description of the recommendation

support for the implementation of the Sustainable Development Goals, in particular for the groups of the most vulnerable countries. The Committee trusts that an update will be provided in the context of the next budget proposal (para. IV.21).

The Advisory Committee trusts that comprehensive information on the positions of the Department of Economic and Social Affairs funded under the Development Account and the regular programme of technical cooperation will be provided in the context of future budget submissions (para. IV.22).

Action taken to implement the recommendation

Department continues to champion the 2030 Agenda as the blueprint for crisis response and recovery. By actioning the commitments contained in the 2030 Agenda and its 17 Sustainable Development Goals, the Paris Agreement and the Addis Ababa Action Agenda, Member States, the United Nations system and all stakeholders can realize a stable and inclusive recovery, build resilience and move the world towards sustainable development for all.

The Department, in close cooperation with the resident coordinator system, continues to strengthen coordination of United Nations system support for the achievement of the Sustainable Development Goals, in particular for countries in special situations, including least developed and landlocked developing countries and small island developing States. The Department continues to facilitate more structured engagement between the Department and resident coordinators through the Development Coordination Office. This structured engagement further strengthens the Department's delivery of its capacity-building activities, assisting Member States in translating at the national level global norms and policy frameworks for the achievement of the Goals and other internationally agreed objectives, including for least developed and landlocked developing countries, small island developing States and countries in Africa. The Department continues to rely on the resident coordinators and their offices to help to identify effective country-level entry points and partnerships.

The programme plan provides highlights and updates the ongoing activities and programme of work undertaken in collaboration with United Nations system entities to support countries in their achievement of the Sustainable Development Goals, in particular those countries in special situations.

As of March 2023, the Department had, for its subprogrammes, 29 general temporary positions (3 D-1, 18 P-5, 2 P-4, 1 General Service (Principal level) and 5 General Service (Other level)) funded under the regular programme of technical cooperation and 1 general temporary position (Evaluation Officer (P-4)) under the Development Account.

It is proposed that the Evaluation Officer (P-4) position under the Development Account be converted to an established post under section 9, as explained in annex III to the present report.

Part IV International cooperation for development

Brief description of the recommendation

Action taken to implement the recommendation

The Advisory Committee trusts that more detailed information on extrabudgetary-funded activities implemented under the subprogrammes, including information on programme support costs and cost recovery if any, will be provided in the context of the next budget submission (para. IV.23).

In 2024, extrabudgetary resources amount to \$90,931,300, which provide for various substantive and capacity development activities (as described under each subprogramme) and include \$55,378,200 for the Junior Professional Officers Programme and the United Nations Assistance to the Khmer Rouge Trials.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-5	Reassignment of 1 Senior Public Information Officer as Senior Programme Management Officer	<p>The proposed reassignment is to address the growing demands on the Under-Secretary-General, as head of entity, for leadership on an increasing range of substantive and management issues. The Senior Programme Management Officer would bring a required range of skills to assist the Under-Secretary-General in providing the strategic guidance, responses and policy recommendations needed to enhance the coherence and internal coordination of the work of the Department.</p> <p>The proposed reassignment would combine functions needed to enhance the coherence and internal coordination of the Department's work. This would address the growing demands on the Under-Secretary-General for leadership on an increasing range of substantive and management issues. With amalgamated functions, the senior Programme Management Officer would assist in providing strategic guidance, responses and policy recommendations and lend support to other substantive and management issues.</p>
Subprogramme 4, Statistics	1	P-5	Establishment of 1 Chief of Section, Geospatial Information	<p>The Economic and Social Council decided, in its resolution 2022/24, to strengthen the work of the Committee of Experts on Global Geospatial Information Management. In order to support the Committee's encompassing architecture on global geospatial information management, including implementing the recommendations of the report of the Committee of Experts to the Council (E/2022/68), the 2030 Agenda and the Integrated Geospatial Information Framework, the Council also called for the establishment of a secretariat comprising seven posts (1 P-5, 1 P-4, 2 P-3, 2 P-2 and 1 GS (OL)).</p>
	1	P-4	Establishment of 1 Geospatial Information Officer	<p>The secretariat would also be responsible for the following:</p>
	2	P-3	Establishment of 2 Geospatial Information Officers	<p>(a) Service/support the Committee's high-level group, subcommittee, experts and working groups;</p> <p>(b) Manage/support the global Committee architecture, including its five regional committees and four thematic groups;</p>
	2	P-2	Establishment of 2 Associate Geospatial Information Officers	<p>(c) Support the implementation of the Committee's global geospatial strategic frameworks, guides, methods, standards and norms;</p>
	1	GS (OL)	Establishment of 1 Programme Management Assistant	<p>(d) Implement and monitor extrabudgetary capacity and capability development projects under the Committee;</p> <p>(e) Coordinate/implement external technical cooperation and capacity development partnerships, including the SDG Data Alliance, the Group on Earth Observations, the World Geospatial Industry Council, Geospatial World and Geospatial Knowledge Infrastructure;</p> <p>(f) Promote coherence, coordination and cooperation on global geospatial information management-related issues;</p>

Part IV International cooperation for development

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 5, Population	1	P-3	Establishment of 1 Data Engineer	<p>(g) Support the establishment and oversight of the United Nations Global Geospatial Knowledge and Innovation Centre and the United Nations Global Geodetic Centre of Excellence.</p> <p>The abolishment of a post of Information Systems Assistant (GS (OL)) in the Demographic Data Systems Unit and a post of Editorial Assistant (GS (OL)) in the Publications, Outreach and Support Unit, for the establishment of a post of Data Engineer (P-3) in the Demographic Data Systems Unit is required owing to the level of professional skill needed to integrate heterogeneous data sources, improve data interoperability, and support high-performance cloud-based computing, database infrastructure and web-based front-ends to disseminate results in a user-friendly way. The subprogramme faces increasing requests for more detailed statistics, greater transparency in its methods and improved access to data. To meet these challenges, the subprogramme has been incrementally upgrading its analytical workflow and information technology infrastructure and employing more advanced statistical methods to more effectively manipulate and compile heterogeneous data from Member States, regional and international organizations, and research and academic groups so that the Department can provide the highest quality outputs possible.</p>
	(1)	GS (OL)	Abolishment of 1 Information Systems Assistant	
	(1)	GS (OL)	Abolishment of 1 Editorial Assistant	
Subprogramme 6, Economic analysis and policy	1	GS (OL)	Reassignment of 1 Library Assistant as Research Assistant	This proposed reassignment reflects the change in needs, from organizing references and maintaining physical reference collections to supporting the research and acquisition of digitalized and electronic information and disseminating information, to enable policy analysis throughout the subprogramme.
Programme support	1	P-4	Conversion of 1 Evaluation Officer (from general temporary assistance under section 35, Development Account)	<p>The proposed conversion, under the Capacity Development Programme Management Office, would improve the stability and continuity of the evaluation function. The Evaluation Officer will design and manage programme-level evaluations and provide guidance and support for project evaluations conducted by the Development Account implementing entities.</p> <p>The conversion of this post would make evaluation a more integrated part of the management team for the Development Account. The proposed consolidation of resources under section 9 would support all project phases and cement the role of evaluation as a strategic pillar of the overall programme management of the Development Account.</p>

Abbreviation: GS (OL), General Service (Other level).

Foreword

In 2024, the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States will continue to advocate strongly on behalf of the 91 most vulnerable Member States to ensure that the international system is attuned to their needs and to finding solutions to the challenges they face. One such solution can be found in the Doha Programme of Action for the Least Developed Countries, the implementation of which, following the Fifth United Nations Conference on the Least Developed Countries, held in 2023, will be critical at a time of deepening inequality and crisis.

In 2024, two major compacts will be introduced among Member States on the special situations of landlocked developing countries and small island developing States.

The Office will lead preparations for the third United Nations Conference on Landlocked Developing Countries, during which the United Nations development system will join forces to ensure that lessons from the coronavirus disease (COVID-19) pandemic are learned and implemented by all, especially with regard to connectivity and cross-border trade.

For small island developing States, it is expected that the multidimensional vulnerability index will prove to be a crucial tool in efforts to deepen understanding of the vulnerabilities of small island developing States and to direct development financing to them more effectively. In addition, the fourth International Conference on Small Island Developing States will be a major opportunity to focus the minds of the international community on the next decade of action for small island nations and their peoples.

Although COVID-19 is being seen less frequently in the headlines, it remains a daily disaster for the most vulnerable Member States. Climate change also affects them disproportionately. The Office remains committed to supporting them through the tough times ahead, as they also grapple with the ongoing challenges of increasing food and energy prices and unsustainable debt levels.

(Signed) Rabab **Fatima**
Under-Secretary-General and High Representative
Office of the High Representative for the Least Developed Countries,
Landlocked Developing Countries and Small Island Developing States

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 10.1 The Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States is responsible for advocating, supporting, mobilizing, coordinating and reporting on the implementation of the programmes of action for the least developed countries, landlocked developing countries and small island developing States, as well as the achievement of other internationally agreed goals, including the Sustainable Development Goals. The mandate of the Office derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [56/227](#), whereby the Assembly decided to establish the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States. The Office's work is grounded in the three programmes of action, namely resolution [69/15](#), whereby the General Assembly endorsed the small island developing States Accelerated Modalities of Action (SAMOA) Pathway; resolution [69/137](#), whereby the Assembly endorsed the Vienna Declaration and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024; and resolution [76/258](#), whereby the Assembly endorsed the Programme of Action for the Least Developed Countries for the Decade 2022–2031.
- 10.2 The 2030 Agenda for Sustainable Development, including its global follow-up and review processes, is integral and complementary to the three programmes of action. The least developed countries, landlocked developing countries and small island developing States experienced a disproportionate social and economic fallout from the coronavirus disease (COVID-19) pandemic, owing in large part to limited capacities and financial resources.

Strategy and external factors for 2024

- 10.3 Following the adoption of the Doha Programme of Action for the Least Developed Countries, the central task ahead for the least developed countries and the international community is to enable its effective implementation in support of the 2030 Agenda. Mainstreaming the provisions of the Doha Programme of Action into national strategic planning of the least developed countries and the mobilization of commensurate resources and knowledge in support of the recovery of the least developed countries from the COVID-19 pandemic and their sustainable development will be prioritized.
- 10.4 In 2024, landlocked developing countries and small island developing States and their development partners will embark on comprehensive reviews of the implementation of their respective programmes of action. The outcomes of these reviews will inform the next generation of global compacts that are aimed at addressing the special needs of these groups of countries.
- 10.5 In pursuit of these priorities, the Office will raise awareness, mobilize support and build consensus. It will strengthen engagement both in the most vulnerable countries, as well as in partner countries and in regional and global organizations and forums. Policy recommendations on how to overcome the specific challenges of the most vulnerable countries, for example in the areas of access to sustainable energy and broadband, will be provided on the basis of cross-cutting research carried out by the Office. Linkages will be promoted in follow-up and review arrangements of all relevant United Nations conferences and processes, in particular the 2030 Agenda. The Office will also mobilize resources to ensure that the least developed countries, landlocked developing countries and small island developing States have their voices heard in global deliberations. Furthermore, representatives of the most vulnerable countries will benefit from capacity-building activities, peer learning and the exchange of best practices, all on thematic areas relevant to the Goals and to building resilience to future crises.

- 10.6 With regard to cooperation with other entities at the global and regional levels, the Office will convene the inter-agency consultative groups for least developed countries, landlocked developing countries and small island developing States. These groups will enable United Nations entities and other international organizations to exchange information on their work, strengthen coordination of their activities and mount joint inter-agency activities. At the national level, the Office will cooperate with the networks of national focal points that act as an interface between the global, regional and national processes. The national focal points will promote coherence and coordination on issues relevant to the three groups of countries and policy formulation, implementation, and follow-up and review of their programmes of action, the 2030 Agenda and other global frameworks.
- 10.7 With regard to inter-agency coordination and liaison, the Office will work closely with resident coordinators to promote integration of the programmes of action into the United Nations strategic plans and the United Nations Sustainable Development Cooperation Frameworks and to act as an interface with Member States on the ground on specific issues.
- 10.8 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) The security and political situation in the least developed countries, landlocked developing countries and small island developing States and in their surrounding regions is conducive to the implementation of the three programmes of actions;
 - (b) Continued international support measures in the areas of development finance, market access, technology and technical assistance are made available by development partners in favour of these countries.
- 10.9 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the Office will develop an updated gender equality strategy to further integrate gender equality and the empowerment of women into its work, including through additional training and capacity-building. In addition, as part of its monitoring and reporting work, the Office will include sex-disaggregated data and analysis across its reports.
- 10.10 In line with the United Nations Disability Inclusion Strategy, the Office will continue to mainstream the rights of persons with disabilities and disability inclusion into its programme of work through the implementation of its disability inclusion strategy and action plan. This will promote disability inclusion in the Office's monitoring, reporting and advocacy work, in accordance with its mandates.
- 10.11 The Office will also enhance cooperation with the Office of the Envoy of the Secretary-General on Youth to foster the involvement, participation and input of young people in intergovernmental negotiations and United Nations processes.

Impact of the pandemic and lessons learned

- 10.12 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular the Fifth United Nations Conference on the Least Developed Countries had to be postponed from January 2022 to March 2023, as described in result 1 of subprogramme 1. For several other intergovernmental meetings and events, under all subprogrammes, the Office adjusted from in-person to virtual formats and, in some cases, postponed or cancelled events. The Small Island Developing States Global Business Network forum and meetings of national focal points were held in hybrid format to accommodate the participation of representatives of Member States in the face of ongoing travel restrictions.
- 10.13 In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, the Office strengthened its work on analysing the vulnerabilities of the three groups of countries and providing policy recommendations on building resilience to various shocks.

- 10.14 The Office continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including through the use of virtual platforms for advocacy upon request and when appropriate.

Legislative mandates

- 10.15 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

56/227	Third United Nations Conference on the Least Developed Countries	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		

Subprogramme 1 Least developed countries

General Assembly resolutions

56/227	Third United Nations Conference on the Least Developed Countries	74/232 ; 74/232 B ; 75/227 , 76/216	Follow-up to the Fourth United Nations Conference on the Least Developed Countries
65/280	Programme of Action for the Least Developed Countries for the Decade 2011–2020	76/251	Further modalities of the Fifth United Nations Conference on the Least Developed Countries
70/294	Political Declaration of the Comprehensive High-level Midterm Review of the Implementation of the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011–2020	76/258	Doha Programme of Action for the Least Developed Countries
		77/177	Follow-up to the Fifth United Nations Conference on the Least Developed Countries

Economic and Social Council resolutions

2021/19	Programme of Action for the Least Developed Countries for the Decade 2011–2020	2022/19	Programme of action for the least developed countries for the decade 2022–2031
-------------------------	--	-------------------------	--

Subprogramme 2 Landlocked developing countries

69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
73/243 ; 74/233 ; 75/228 ; 76/217 ; 77/246	Follow-up to the second United Nations Conference on Landlocked Developing Countries		

Subprogramme 3 Small island developing States

General Assembly resolutions

59/311	International Meeting to Review the Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway	72/307	Modalities for the high-level review of the SIDS Accelerated Modalities of Action (SAMOA) Pathway

Section 10 **Least developed countries, landlocked developing countries and small island developing States**

73/228; 74/217; 75/215; 76/203; 77/245	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
--	---	------	--

Deliverables

10.16 Table 10.1 lists all cross-cutting deliverables of the programme.

Table 10.1
Cross-cutting deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	7	6	7	3
Meetings of:				
1. The Groups of least developed countries, landlocked developing countries and small island developing States	4	3	4	–
2. The Fifth Committee	1	1	1	1
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
B. Generation and transfer of knowledge				
Publications (number of publications)	1	1	1	3
5. Thematic reports of the Office on challenges facing the least developed countries, landlocked developing countries and small island developing States, including vulnerabilities to external shocks, access to sustainable energy and access to broadband services.	1	1	1	3
C. Substantive deliverables				
Databases and substantive digital materials: databases, including on monitoring the delivery of the three programmes of action.				
D. Communication deliverables				
Outreach programmes, special events and information materials: strategic communications materials supporting global outreach campaigns and other materials supporting common agendas, especially the programmes of action and the Goals.				
External and media relations: press releases, media briefings and targeted interviews with select media.				
Digital platforms and multimedia content: website of the Office, reflecting thematic priorities and events and showcasing research and analysis; websites for the conferences and preparatory processes concerning landlocked developing countries and small island developing States.				

Evaluation activities

10.17 An evaluation of a project entitled “Strengthening the capacity of landlocked developing countries under the Belt and Road Initiative to design and implement policies that promote transport connectivity for the achievement of the Sustainable Development Goals” was completed in 2022 and has guided the programme plan for 2024.

10.18 The results and lessons of the evaluation referenced above have been taken into account for the proposed programme plan for 2024. For example, under subprogramme 2, in the evaluation report it was highlighted that there was a need for more strategic engagement by the Office with resident coordinators and regional training centres, including by creating opportunities to better contribute

to the sustainability of prioritized interventions with regard to transportation infrastructure and connectivity in landlocked developing countries. In 2024, subprogramme 2, result 3, is aimed at enhancing outreach to and partnerships with resident coordinators and United Nations country teams as well as other national-level stakeholders including national focal points. In addition, the Office will continue to make efforts to enhance closer collaboration with the regional commissions and other regional organizations in their efforts to provide technical assistance and capacity-building.

- 10.19 An evaluation of the effectiveness of the Office's support to the network of the national focal points for the least developed countries is planned for 2024.

Programme of work

Subprogramme 1 Least developed countries

Objective

- 10.20 The objective, to which this subprogramme contributes, is to strengthen policies to eradicate poverty in the least developed countries and accelerate structural transformation of their economies; and to ensure effective graduation from the least developed country category.

Strategy

- 10.21 To contribute to the objective, the subprogramme will:
- (a) Provide support to Member States in their intergovernmental processes related to the priorities of the least developed countries, including by supporting the implementation of the Doha Programme of Action, including its deliverables, namely the establishment of an online university to support online graduate and postgraduate university-level education in science, technology, engineering and mathematics, a food stockholding mechanism, an investment support centre, a resilience-building mechanism and a Sustainable Graduation Support Facility;
 - (b) Prepare research and analytical materials related to the focus areas of the Doha Programme of Action and facilitate knowledge exchange and peer learning on critical enablers to poverty eradication and structural transformation, including through mainstreaming a gender perspective;
 - (c) Strengthen its awareness-raising and advocacy work in favour of the least developed countries, in partnership with the United Nations system, parliaments, civil society, the media, academia and foundations in focus areas of the Doha Programme of Action;
 - (d) Conduct advocacy activities to promote resource mobilization in the least developed countries, especially public and private financing, including innovative finance, for resilience-building;
 - (e) Lead the inter-agency task force on least developed country graduation, organize workshops and technical support on establishing consultative mechanisms with development partners and preparing smooth transition strategies, and facilitate peer learning between graduated and graduating countries;
 - (f) Monitor sectoral policy developments of the intergovernmental processes of relevant international and regional organizations;
 - (g) Strengthen the network of national focal points of the least developed countries through annual meetings to share experiences and best practices on mainstreaming the Doha Programme of Action and the Goals into national development processes, as well as on their implementation and follow-up.

- 10.22 The above-mentioned work is expected to result in:
- (a) Least developed countries accelerating progress towards achieving the Goals and achieving the focus areas of the Doha Programme of Action and other internationally agreed development goals;
 - (b) Graduating countries transitioning smoothly out of the least developed country category.

Programme performance in 2022

National focal points in least developed countries engage with partners to enhance broadband connectivity

- 10.23 The Doha Programme of Action, which was adopted in March 2022, contains a broad range of actions under six focus areas. The subprogramme provided support to the national focal points of the least developed countries, through a meeting held in Rwanda in June 2022, during which information on available support in implementing the Doha Programme of Action was provided and peer learning about mainstreaming the Doha Programme of Action into national development plans was facilitated. Furthermore, the Office organized dedicated virtual meetings for national focal points related to support for investment promotion and access to different financing options that could support the implementation of the Doha Programme of Action.
- 10.24 Progress towards the objective is presented in the performance measure below (see table 10.2).

Table 10.2
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
National focal points were involved in the preparation of reports on the implementation of the Istanbul Programme of Action, providing information on lessons learned, which was fed into the preparatory process for the negotiation of the Doha Programme of Action	National focal points participated in a regional review meeting on the implementation of the Istanbul Programme of Action, including discussions on emerging challenges and how to address them through a new programme of action	National focal points engaged with partners to enhance broadband connectivity The results of a survey indicated a high likelihood (8.3 on average, on a scale ranging from 0 (worst) to 10 (best)) that national focal points would use available support to mainstream the Doha Programme of Action into national development plans

Planned results for 2024

Result 1: accelerated progress towards sustainable development through the implementation of a new programme of action for least developed countries

Programme performance in 2022 and target for 2024

- 10.25 The subprogramme’s work contributed to two least developed countries mainstreaming the Doha Programme of Action into their development plans with support from the United Nations system, which did not meet the planned target of 10 least developed countries. The target was not met owing to the delayed adoption of the Programme of Action, which occurred in March 2022 instead of January 2021 owing to the COVID-19 pandemic.
- 10.26 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 10.3).

Table 10.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Report on United Nations support to least developed countries published, recommending mainstreaming and prioritization of such support	United Nations agencies and resident coordinators in least developed countries mobilized in support of the preparatory process for the Fifth United Nations Conference on the Least Developed Countries	Two least developed countries mainstreamed the Doha Programme of Action into their development plans with support from the United Nations system	Ten additional least developed countries mainstreaming the new programme of action into their development plans with support from the United Nations system	Five additional least developed countries mainstreaming the Doha Programme of Action into their development plans with support from the United Nations system

Result 2: private sector plays an enhanced role in addressing vulnerabilities of least developed countries

Programme performance in 2022 and target for 2024

- 10.27 The subprogramme’s work contributed to the engagement of various private sector actors – through an advisory group – in the preparations for the Private Sector Forum, to be held at the Fifth United Nations Conference on the Least Developed Countries, with private sector actors announcing the commitments to be made at the Conference to support the least developed countries through specific partnerships in several priority areas, including digital skills and connectivity, capacity-building and access to finance for micro-entrepreneurs, sustainable tourism and local infrastructure, which met the planned target.
- 10.28 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 10.4).

Table 10.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Private sector actors involved in selected meetings	Investment promotion agencies strengthen capacity on foreign direct investment attraction and facilitation	Private sector entities participated in the Fifth United Nations Conference on the Least Developed Countries private sector advisory group, engaging in dialogue and announcing commitments to be made at the Conference in support of the implementation of the Doha Programme of Action	Five partnerships related to the objectives of the Doha Programme of Action launched at the Private Sector Forum in areas such as leveraging innovation and creating productive employment and decent work	Five partnerships related to the objectives of the Doha Programme of Action implemented in least developed countries, including increased access by small and medium-sized enterprises to sustainable energy and broadband connectivity to create employment opportunities

Result 3: improved tertiary education options in least developed countries through an online university for science, technology, engineering and mathematics education

Proposed programme plan for 2024

- 10.29 Facilitating access to tertiary education can support the creation of a skilled workforce and support higher and more inclusive growth. On average, in 2020, enrolment in tertiary education was only 13 per cent for male persons and 10 per cent for female persons in the least developed countries, up from 10 per cent and 6 per cent, respectively, in 2010.¹ The subprogramme supported the negotiation of the Doha Programme of Action, which includes a target to undertake feasibility studies to explore the possibility of establishing an online university or other equivalent platforms focused on science, technology, engineering and mathematics education in the least developed countries.

Lessons learned and planned change

- 10.30 The lesson for the subprogramme was the need to leverage the knowledge and skills of other organizations in order to support processes aimed at the establishment of an online university addressing the specific needs of the least developed countries. In applying the lesson, the subprogramme will reach out to suitable partners to take stock of existing initiatives providing access to higher education in science, technology, engineering and mathematics fields and will develop an implementation plan based on a feasibility study for an online university. The subprogramme will support the creation of a virtual network of educational institutions to share experiences of and collaborate on curriculum development and will promote gender equality and a gender balance in access to online learning, while enabling free or low-cost access for the poorest and the most vulnerable.
- 10.31 Expected progress towards the objective is presented in the performance measure below (see table 10.5).

Table 10.5

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Member States agree to include in the Doha Programme of Action a target to undertake feasibility studies to explore the possibility of establishing an online university or other equivalent platforms for least developed countries	Member States consider options for establishing an online university to support online graduate and postgraduate university-level science, technology, engineering and mathematics education	Member States agree to a proposal to establish an online university dedicated to students from least developed countries in collaboration with partner organizations

Deliverables

- 10.32 Table 10.6 lists all deliverables of the subprogramme.

¹ United Nations Educational, Scientific and Cultural Organization (UNESCO) Institute for Statistics, UIS.Stat Bulk Data Download Service. Available at <http://data.uis.unesco.org/> (accessed on 24 October 2022).

Table 10.6
Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	7	7	7	3
1. Reports to the General Assembly and the Economic and Social Council, including on the implementation of the Programme of Action for the Least Developed Countries	1	1	3	3
2. Official documents of the Fifth United Nations Conference on the Least Developed Countries	6	6	4	–
Substantive services for meetings (number of three-hour meetings)	59	43	59	46
3. Meetings of the General Assembly	13	13	13	13
4. Meetings of the Economic and Social Council, including on the implementation of the Programme of Action for the Least Developed Countries and the high-level political forum on sustainable development	10	8	10	10
5. Regional review meetings on the Programme of Action for the Least Developed Countries	–	–	–	2
6. Ministerial meetings of the least developed countries and related consultations	5	5	5	5
7. Meetings of ad hoc expert groups on the implementation of the Programme of Action for the Least Developed Countries and related priority topics thereof	3	5	3	6
8. Meetings of the Group of Least Developed Countries	10	10	10	10
9. Meetings of the Fifth United Nations Conference on the Least Developed Countries	18	2	18	–
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	8	8	8	13
10. Workshops for national focal points of the least developed countries and round-table discussions on the implementation of the Programme of Action for the Least Developed Countries	6	6	6	10
11. Seminars on partnerships for the least developed countries	2	2	2	3
Technical materials (number of materials)	14	14	14	16
12. On the state of the least developed countries	1	–	1	1
13. On the implementation of the Programme of Action for the Least Developed Countries and synergies with the Goals and the Addis Ababa Action Agenda of the Third International Conference on Financing for Development	–	–	–	1
14. On progress towards the graduation of the least developed countries	1	1	1	1
15. On the implementation of specific areas of the Doha Programme of Action for the Least Developed Countries, including the establishment of an online university for science, technology, engineering and mathematics education	4	4	4	5
16. On issues relating to the least developed countries	8	9	8	8
C. Substantive deliverables				
Consultation, advice and advocacy: substantive advice to the group of 46 least developed countries on the implementation of the Doha Programme of Action; briefing to Member States on the work of the Office; advice and substantive support to the work of the Broadband Commission and advocacy for support for the least developed countries, including through the Inter-Agency Consultative Group and participation in high-level meetings, as well for enhanced smooth transition measures.				
D. Communication deliverables				
Outreach programmes, special events and information materials: promotional materials on the global outreach campaign for the Doha Programme of Action; communications campaigns on upcoming graduations.				
External and media relations: press releases, press conferences and op-eds on issues relating to the least developed countries; information campaign (including videos, infographics and other social media material) on progress achieved in the Programme of Action for the Least Developed Countries.				
Digital platforms and multimedia content: website of the Fifth United Nations Conference on the Least Developed Countries.				

Subprogramme 2 Landlocked developing countries

Objective

- 10.33 The objective, to which this subprogramme contributes, is to strengthen policies and capacities to improve the connectivity of landlocked developing countries, with the aim of supporting their sustainable development, reduce their trade transaction costs, enhance their regional cooperation and increase their regional, subregional and global trade, and strengthen their institutions and social and environmental protection; and to increase structural transformation in landlocked developing countries for sustainable development.

Strategy

- 10.34 To contribute to the objective, the subprogramme will:
- (a) Provide support to Member States in their intergovernmental processes related to the priorities of landlocked developing countries, in line with relevant agendas and agreements;
 - (b) Undertake research and analytical assessments to assist landlocked developing countries to enact policies conducive to their developmental priorities, including evidence-based information for the preparations for the third United Nations Conference on Landlocked Developing Countries;
 - (c) Lead the preparations for the third United Nations Conference on Landlocked Developing Countries, organize pre-conference events and capacity-building activities and facilitate knowledge exchange and peer learning among landlocked developing countries and transit countries on priority areas;
 - (d) Carry out advocacy activities to mobilize international support for the convening of the third United Nations Conference on Landlocked Developing Countries and its expected outcome, as well as the implementation of the Vienna Programme of Action and other relevant agendas;
 - (e) Coordinate, monitor and assess progress made in relation to the Vienna Programme of Action, including the effective implementation of the road map for accelerated implementation, and develop a new road map for implementation of the expected outcome of the third United Nations Conference on Landlocked Developing Countries.
- 10.35 The above-mentioned work is expected to result in:
- (a) Increased support towards landlocked developing countries from the international community to address the needs and challenges arising from their landlockedness;
 - (b) Increased adoption and implementation by landlocked developing countries of initiatives to enhance transit, connectivity and trade facilitation;
 - (c) Enhanced capacity of landlocked developing countries to devise and formulate policies that promote economic diversification, integration into global and regional value chains and structural economic transformation.

Programme performance in 2022

Representatives from landlocked developing countries actively engage on transit, transport and trade facilitation for integration into the global market

- 10.36 The COVID-19 pandemic and logistics and supply chain disruptions, including rising transport and shipping costs and non-tariff barriers, such as additional border controls and documentation requirements, undermined export competitiveness and limited progress on sustainable development in landlocked developing countries. The subprogramme raised awareness and conducted capacity-

building activities for government officials from landlocked developing countries to address these issues. The subprogramme organized the Ministerial Transport Conference of Landlocked Developing Countries, which had dedicated sessions on the importance of enhancing the transport and information and communications technology (ICT) connectivity of landlocked developing countries to aid recovery from the pandemic, leveraging digital technologies to enhance structural transformation and integration of landlocked developing countries into global trade and promoting the resilience and sustainability of transport systems.

10.37 Progress towards the objective is presented in the performance measure below (see table 10.7).

**Table 10.7
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>
–	The Ministerial Declaration adopted at the 2021 edition of the annual Ministerial Meeting of Landlocked Developing Countries indicated an interest in capacity-building on policies that promote transport connectivity, transit and trade facilitation	Sixty-one government officials from landlocked developing countries and transit countries actively engaged on how to promote transport connectivity, transit and trade facilitation, in particular digital connectivity for integration into the global market

Planned results for 2024

Result 1: better coordinated United Nations support to landlocked developing countries

Programme performance in 2022 and target for 2024

- 10.38 The subprogramme’s work contributed to the implementation of 10 initiatives contained in the road map on transit, transport, trade facilitation, energy and ICT development, and structural economic transformation, and more than 100 newly reported initiatives in a road map by the Inter-Agency Consultative Group for Landlocked Developing Countries, which exceeded the planned target of at least five new initiatives being implemented.
- 10.39 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 10.8).

**Table 10.8
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Member States request the Secretary-General to prepare a road map on coordinated United Nations support to the implementation of the Vienna Programme of Action. The road map was coordinated, prepared and adopted in the same year	Member States implemented 10 megaprojects in renewable sources of energy and 18 transport infrastructure projects	Member States, implemented 10 new initiatives contained in the road map, including on transit, transport, trade facilitation, energy and ICT development, and structural economic transformation	Member States implement eight new initiatives contained in the road map, including on transit, transport, energy and ICT development, and structural economic transformation	A revised road map aligned with the next programme of action for landlocked developing countries is prepared and implemented following the third United Nations Conference on Landlocked Developing Countries

Result 2: strengthened capacities of landlocked developing countries to achieve climate action and sustainable recovery from the COVID-19 pandemic

Programme performance in 2022 and target for 2024

- 10.40 The subprogramme's work contributed to thematic events, research and dedicated sessions on transit and transport and environmentally sustainable and resilient transport systems at the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, which led to landlocked developing countries Member States outlining priorities and recommendations with a view to taking common positions on climate action and sustainable recovery from the COVID-19 pandemic that contribute to preparations for the third United Nations Conference on Landlocked Developing Countries, which met the planned target.
- 10.41 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 10.9).

Table 10.9

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
–	The General Assembly adopted resolution 76/217 , in which it called for a third United Nations Conference on Landlocked Developing Countries, which would comprehensively review the Vienna Programme of Action	Member States called for the establishment of transport systems that were sustainable and resilient to the impacts of climate change and the COVID-19 pandemic, accelerated the energy transition and enabled climate-smart trade facilitation solutions (General Assembly resolution 77/246)	Member States identify and agree on regional focused action and commitments to support the landlocked developing countries in achieving climate action and sustainable recovery from the COVID-19 pandemic	Implementation of climate action activities to build climate-resilient transport systems

Result 3: Accelerated progress towards sustainable development in landlocked developing countries

Proposed programme plan for 2024

- 10.42 In 2022, the subprogramme started preparations for the third United Nations Conference on Landlocked Developing Countries by organizing events and preparing substantive reports on issues of importance to sustainable development in landlocked developing countries (see General Assembly resolution [76/217](#)). The subprogramme organized an expert group meeting on enhancing the role of foreign investment for structural economic transformation in landlocked developing countries and prepared reports on scaling up renewables in landlocked developing countries, foreign direct investment for structural transformation in landlocked developing countries and improving transport connectivity in landlocked developing countries. The subprogramme also contributed to the re-establishment and revitalization of the Group of Friends of Landlocked Developing Countries to strengthen support and attention for these countries.

Lessons learned and planned change

- 10.43 The lesson for the subprogramme was that, on the basis of the experience of previous programmes of action, any successor programme to the Vienna Programme of Action would be best supported through intensive engagement at the national level with focal points for all areas identified so as to broaden awareness and build mutual interest and collaboration within the overarching developmental framework for landlocked developing countries. In applying the lesson, the subprogramme will enhance outreach to and partnerships with all national-level stakeholders, including national focal points, resident coordinators, United Nations country teams and officials from relevant government ministries, in order to raise awareness of the Vienna Programme of Action and the successor programme of action. This will be achieved through training workshops, regular briefings, thematic meetings and an intensive advocacy campaign. It will also build momentum towards the third United Nations Conference on Landlocked Developing Countries.
- 10.44 Expected progress towards the objective is presented in the performance measure below (see table 10.10).

Table 10.10
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	–	Landlocked developing countries were engaged to provide input into the preparations for the third United Nations Conference on Landlocked Developing Countries through meetings, events and reports	Landlocked developing countries formulate common positions and priorities linked to the preparatory process for the third United Nations Conference on Landlocked Developing Countries	At least two landlocked developing countries initiate action to mainstream the new programme of action

Deliverables

- 10.45 Table 10.11 lists all deliverables of the subprogramme.

Table 10.11
Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	9	15

Field and technical cooperation projects (number of projects)	3	4	3	4
11. On the enhancement of the analytical capacity of the International Think Tank for Landlocked Developing Countries	1	1	1	1
12. On the enhancement of the role of the private sector in trade facilitation and structural transformation	1	1	1	1
13. On strengthening of the participation of landlocked developing countries in relevant regional and bilateral cooperation frameworks and their accession to international conventions, and corridor development	1	2	–	1
14. On coordination of the enhanced implementation of the road map for accelerated implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	–	–	1	1
Seminars, workshops and training events (number of days)	5	8	9	12
15. Round-table discussion on capacity-building	1	1	1	2
16. Workshop for national focal points of landlocked developing countries	1	1	1	2
17. Panel discussion on best practices and solutions to specific needs of landlocked developing countries	1	1	1	1
18. Training events covering the COVID-19 pandemic, energy, ICT, infrastructure, Sustainable Development Goal 14, climate change and desertification	2	5	2	2
19. Events in preparation for the third United Nations Conference on Landlocked Developing Countries on thematic areas, including transit, trade facilitation, corridor development, connectivity, global value chains, climate change, water, desertification and road safety	–	–	4	3
20. Workshops on mainstreaming the new programme of action and developing the road map and monitoring framework	–	–	–	2
Technical materials (number of materials)	4	4	4	5
21. On thematic issues and indicators of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the 2030 Agenda	2	2	2	2
22. On thematic development issues in landlocked developing countries	2	2	2	2
23. Guide on mainstreaming the new programme of action	–	–	–	1

C. Substantive deliverables

Consultation, advice and advocacy: substantive advice to the Group of Landlocked Developing Countries; briefings to 32 landlocked developing countries, 34 transit countries and 28 development partners on the work of the Office; side events promoting the implementation of the 2030 Agenda and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024.

Databases and substantive digital materials: database of indicators for landlocked developing countries for the six priority areas of the Vienna Programme of Action.

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

D. Communication deliverables

Outreach programmes, special events and information materials: promotional materials and global outreach campaign to raise awareness of the third United Nations Conference on Landlocked Developing Countries.

External and media relations: press releases and press conferences on development issues relating to landlocked developing countries.

Digital platforms and multimedia content: web pages relating to landlocked developing countries, including on the third United Nations Conference on Landlocked Developing Countries.

**Subprogramme 3
Small island developing States**

Objective

- 10.46 The objective, to which this subprogramme contributes, is to increase sustainable development and economic, social and environmental resilience in small island developing States.

Strategy

- 10.47 To contribute to the objective, the subprogramme will:
- (a) Advocate for the special case of small island developing States in achieving sustainable development by engaging with development partners, international financial institutions and the private sector;
 - (b) Mobilize resources for small island developing States in priority areas, including through a targeted resource mobilization strategy and by developing tailored policy tools;
 - (c) Provide structured support through the Small Island Developing States Partnership Framework for the facilitation of collaborative partnerships, especially between small island developing States and the private sector;
 - (d) Strengthen coherence and coordination at the national, regional and global levels, including by providing more structured support to the small island developing States national focal points network and increasing coordination between United Nations entities supporting those States;
 - (e) Integrate recovery from the COVID-19 pandemic into the work on the implementation of the Samoa Pathway, including by advocating enhanced support and increased resources in addressing the impact of the pandemic, strengthening coherence in the support provided at the national, regional and global levels and facilitating the sharing of experiences between small island developing States;
 - (f) Lead the preparations for the fourth International Conference on Small Island Developing States.
- 10.48 The above-mentioned work is expected to result in:
- (a) Strengthened international support measures aimed at enabling small island developing States to implement the Samoa Pathway, the Paris Agreement and other priorities of those States for sustainable development;
 - (b) Enhanced access to finance for small island developing States;
 - (c) Enhanced capacity of small island developing States to devise, formulate and implement policies that promote sustainable development and make progress towards the achievement of internationally agreed development goals.

Programme performance in 2022

Progress on funding arrangements for responding to loss and damage associated with the adverse effects of climate change, including a focus on addressing loss and damage

- 10.49 According to the World Meteorological Organization report entitled *2020 State of Climate Services: Risk Information and Early Warning Systems*, it is estimated that over the past 50 years, small island developing States have lost \$153 billion owing to weather-, climate- and water-related hazards. The subprogramme, in the context of the United Nations Framework Convention on Climate Change and beyond, has been advocating the establishment of new funding arrangements to assist developing countries that are particularly vulnerable to the adverse effects of climate change, including small island developing States, in responding to loss and damage. This work included providing substantive and organizational support to small island developing States in the context of high-level dialogues on climate finance, which informed negotiations at the twenty-sixth and twenty-seventh sessions of the Conference of the Parties to the Framework Convention, held in 2021 and 2022, respectively, as well as convening leaders of small island developing States, development partners and international financial institutions to drive outcomes on loss and damage at those same Conferences of the Parties.
- 10.50 Progress towards the objective is presented in the performance measure below (see table 10.12).

Table 10.12

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	At its twenty-sixth session, the Conference of the Parties decided that the Santiago network would be provided with funds to support technical assistance for the implementation of relevant approaches to avert, minimize and address loss and damage associated with the adverse effects of climate change in developing countries and decided to establish the Glasgow Dialogue between States parties, relevant organizations and stakeholders to discuss the arrangements for the funding of activities to avert, minimize and address loss and damage associated with the adverse impacts of climate change	At its twenty-seventh session, the Conference of the Parties decided to establish new funding arrangements for assisting developing countries that are particularly vulnerable to the adverse effects of climate change, in responding to loss and damage, including with a focus on addressing loss and damage by providing and assisting in mobilizing new and additional resources, and that those new arrangements complement and include sources, funds, processes and initiatives under and outside the Framework Convention and the Paris Agreement. It also outlined institutional arrangements to operationalize the Santiago network

Planned results for 2024

Result 1: enhanced access to finance for small island developing States through the strengthening and development of policy tools

Programme performance in 2022 and target for 2024

- 10.51 The subprogramme's work contributed to the work of the High-level Panel on the Development of a Multidimensional Vulnerability Index for Small Island Developing States with outreach to

stakeholders, including development partners and international financial institutions, which did not meet the planned target of strengthened international support measures to enable small island developing States to better withstand extreme shocks and build sustainable economic, social and environmental resilience. The planned target was not met owing to the extension of time for the Panel to complete its work to 30 June 2023.

10.52 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 10.13).

**Table 10.13
Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
The General Assembly adopted resolution 75/215 , in which it called upon the Secretary-General to provide recommendations on the development of a multidimensional vulnerability index for small island developing States, including on its potential finalization and use	The General Assembly adopted resolution 76/203 , in which it welcomed the Secretary-General’s recommendations on the potential development and coordination of work within the United Nations system on a multidimensional vulnerability index for small island developing States, including on its potential finalization and use	The General Assembly adopted resolution 77/156 , in which it welcomed the progress of the High-level Panel on the Development of a Multidimensional Vulnerability Index for Small Island Developing States	Increased awareness and recognition of the need for the multidimensional vulnerability index, which can inform the delivery of targeted development finance	The outcome of the 2024 fourth International Conference on Small Island Developing States includes an internationally endorsed multidimensional vulnerability index that can be used to enhance support measures for small island developing States

Result 2: data leveraged for a new global framework for the sustainable development of small island developing States

Programme performance in 2022 and target for 2024

10.53 The subprogramme’s work contributed to enhanced reporting by small island developing States on the implementation of the Samoa Pathway by using a monitoring and reporting framework, which allowed them to better assess and address gaps and progress in implementation, which met the planned target.

10.54 Progress towards the objective and target for 2024 are presented in the performance measure below (see table 10.14).

Table 10.14
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
The General Assembly adopted resolution 75/215 , in which it called for immediate and substantial actions to facilitate the COVID-19 responses by small island developing States, while preserving their sustainable development achievements and commitments, and reinforce their resilience in line with the Samoa Pathway and the political declaration of the midterm review of the Samoa Pathway	The General Assembly adopted resolution 76/203 , in which it called for the convening in 2024 of a fourth International Conference on Small Island Developing States, which would be aimed at assessing the ability of small island developing States to meet the 2030 Agenda and the Sustainable Development Goals	Small island developing States enhanced reporting on the implementation of the Samoa Pathway by using a monitoring and reporting framework, which allowed them to better assess and address gaps and progress in implementation	Small island developing States use timely data and analysis on vulnerabilities to determine the global actions and commitments needed to implement the 2030 Agenda	Small island developing States develop evidence-based policy recommendations and a set of concrete deliverables emanating from data and analysis from the monitoring and reporting framework to be included in a new programme of action and agenda on small island developing States

Result 3: strengthened private sector partnerships to build resilience in small island developing States

Proposed programme plan for 2024

10.55 Innovative solutions and partnerships with the private sector can help to build resilience to future economic, environmental and social shocks to which Small island developing States are often most exposed. For example, the Floating Solar Energy Partnership in Maldives increased the economic benefits from the sustainable use of marine resources, while also contributing to the development of more reliable and affordable sources of renewable energy. The subprogramme established the Small Island Developing States Global Business Network, which convenes small island developing States and the private sector to share best practices and lessons learned with regard to forging private sector partnerships. The Network facilitates collaboration among small island developing States and regional private sector organizations with a view to strengthening interregional business alliances, and encourages international businesses to focus on small island developing States as potential market opportunities and vice versa.

Lessons learned and planned change

10.56 The lesson for the subprogramme was the need to leverage the work already being done by members of the Network and incorporate it regularly into the Network’s activities and member relations, including by holding discussions and events. In applying the lesson, the subprogramme will design and implement a communications strategy to increase engagement and knowledge-sharing within the Network so as to enable multidirectional communication and community-building and strengthen private sector engagement in building resilience in small island developing States. The subprogramme will also make relevant information on engagement opportunities more accessible and digestible to the business and investment community.

10.57 Expected progress towards the objective is presented in the performance measure below (see table 10.15).

Table 10.15
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Increased private sector engagement in a Small Island Developing States Global Business Network virtual forum on leveraging partnerships for the sustainable development of ocean energy in small island developing States	Strengthened private sector engagement at the Small Island Developing States Global Business Network forum, held in April 2022, with increased private sector participation, including the creation of a partnership to connect supply and demand of fish and prevent overfishing and waste through big data, thereby contributing towards the achievement of Sustainable Development Goal 14	Five partnerships between small island developing States and the private sector developed in priority areas in preparation for launch at the Small Island Developing States Global Business Network forum to be held in 2024	Small island developing States and private sector partnerships utilize a strengthened private sector engagement framework, agreed in the context of the new programme of action and agenda on small island developing States agenda, to maximize impact and align initiatives in priority areas and reduce implementation barriers for small island developing States using a simplified, robust and consistent approach to private sector engagement

Deliverables

10.58 Table 10.16 lists all deliverables of the subprogramme.

10.60 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 10.20 to 10.22 and figure 10.I.

10.61 As reflected in tables 10.20 (1) and 10.22, the overall resources proposed for 2024 amount to \$9,577,900 before recosting, reflecting a net increase of \$944,100 (or 10.9 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Figure 10.1

Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

**Explanation of variances by factor, component and subprogramme****Overall resource changes****Technical adjustments**

10.62 As reflected in table 10.17, resource changes reflect a decrease of \$132,200, as follows:

- (a) **Subprogramme 2, Landlocked developing countries.** The decrease of \$115,200 relates to the removal of non-recurrent provisions in support of new and expanded mandates approved for 2023 pursuant to General Assembly resolution [77/246](#) on follow-up to the second United Nations Conference on Landlocked Developing Countries;
- (b) **Subprogramme 3, Small island developing States.** The decrease of \$17,000 relates to the removal of non-recurrent provisions in support of new and expanded mandates approved for 2023 pursuant to General Assembly resolution [77/245](#) on follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States.

New and expanded mandates

10.63 As reflected in table 10.17, resource changes reflect an increase of \$40,000, as follows:

- (a) **Subprogramme 2, Landlocked developing countries.** The increase of \$25,000 relates to the resource requirements in support of new and expanded mandates pursuant to General Assembly resolution [77/246](#) on follow-up to the second United Nations Conference on Landlocked Developing Countries;
- (b) **Subprogramme 3, Small island developing States.** The increase of \$15,000 relates to the resource requirements in support of new and expanded mandates pursuant to General Assembly resolution [77/245](#) on follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States.

Other changes

10.64 As reflected in table 10.17, the net effect of the proposed changes is a net increase of \$1,036,300. The breakdown of changes is as follows:

- (a) **Executive direction and management.** The increase of \$130,800 reflects the net effect of:
- (i) Additional requirements under posts (\$49,800) for the proposed establishment of one new post of Programme Management Assistant (General Service (Other level)), for which additional information is provided in annex III;
 - (ii) Additional non-post requirements (\$81,000) mainly for travel of the Under-Secretary-General and High Representative and senior management to attend a higher number of meetings at which issues of relevance to the least developed countries, landlocked developing countries and small island developing States will be discussed (\$110,000) and for hospitality to cover official functions for representatives of Member States and experts (\$2,000), offset in part by reduced requirements under contractual services for external printing, as the Office will print less and will publish its publications online (\$14,000), and under general operating expenses for communications costs related to the planned termination of the majority of desktop phones and the anticipated reduction in long-distance charges owing to the increased use of virtual means of communication (\$17,000).
- (b) **Subprogramme 1, Least developed countries.** The increase of \$509,200 reflects the net effect of:
- (i) Additional requirements under posts (\$500,000) for the proposed establishment of five new posts (1 P-5, 1 P-4, 1 P-3, 1 P-2 and 1 General Service (Principal level)), for which additional information is provided in annex III;
 - (ii) Additional non-post requirements (\$9,200) under experts for the meetings of the national focal points of the least developed countries on the follow-up to the Fifth United Nations Conference on the Least Developed Countries and on the mainstreaming of the Doha Programme of Action into national sustainable development plans (\$30,500); consultants to prepare a background paper for the report on the implementation of an investment promotion regime for the least developed countries (\$35,300); travel of staff to provide substantive support for the meetings of the national focal points of the least developed countries and to conduct various advocacy activities (\$80,000); and contractual services to further develop the Office's data journalism capacity and to deliver a more analytical approach to advocacy centred on statistical analyses of Doha Programme of Action delivery in the least developed countries (\$40,000). These additional resource requirements are offset in part by reduced requirements under other staff costs owing to the establishment of two posts at the P-2 and General Service (Principal level) levels (\$142,700), as well as the fact that the Office will reduce reliance on temporary assistance upon completion of the Fifth United Nations Conference on the Least Developed Countries in 2023 (\$30,000); and under travel of staff, as the Office plans to attend the meeting of the Inter-Agency Consultative Group for Least Developed Countries virtually (\$3,900).
- (c) **Subprogramme 2, Landlocked developing countries.** The increase of \$201,600 reflects the net effect of:
- (i) Additional requirements under posts (\$119,700) for the proposed establishment of one new post of Economic Affairs Officer (P-4), for which additional information is provided in annex III;
 - (ii) Additional non-post requirements (\$81,900) under experts to support the participation of government representatives in capacity-building workshops on mainstreaming the new programme of action into national sustainable development plans (\$31,000); consultants to prepare a substantive guide on the priorities of landlocked developing countries and on how to further mainstream and operationalize the new programme of action into national sustainable development plans (\$10,000); travel of staff to support the capacity-

building workshops and to develop and discuss the road map of the new programme of action (\$10,900); and contractual services to engage an individual contractor to develop an online transport and trade costs tracker that will be used to monitor the transport and trade costs of landlocked developing countries (\$30,000).

- (d) **Subprogramme 3, Small island developing States.** The increase of \$194,700 reflects the net effect of:
- (i) Additional requirements under posts (\$119,700) for the proposed establishment of one new post of Economic Affairs Officer (P-4), for which additional information is provided in annex III;
 - (ii) Additional non-post requirements (\$75,000) under experts for expert group meetings on sectoral issues and on a road map for the implementation of the programme of action on small island developing States (\$80,000) and the related travel of staff to support those expert group meetings (\$20,000); consultants to prepare a report on thematic and sectoral issues for the implementation of the programme of action on small island developing States (\$20,000), offset in part by reduced requirements for travel of staff, as the subprogramme would no longer need to attend the regional and interregional meetings in preparation for the fourth International Conference on Small Island Developing States (although resources would be needed for additional expert group meetings planned for 2024) (\$20,000), and contractual services, as the subprogramme would require fewer resources to update the portal for implementation of the new programme of action on small island developing States (\$25,000).

Extrabudgetary resources

- 10.65 As reflected in table 10.20 (2), the Office expects to receive cash contributions, which would complement regular budget resources. In 2024, extrabudgetary resources are estimated at \$3,078,500 and would be used mainly to carry out activities related to follow-up to the Fifth United Nations Conference on the Least Developed Countries and preparations for the third United Nations Conference on Landlocked Developing Countries and the fourth International Conference on Small Island Developing States. The expected decrease of \$1,852,300 compared with the estimate for 2023 is due primarily to the completion of the Fifth United Nations Conference on the Least Developed Countries.
- 10.66 The extrabudgetary resources under the present section are subject to the oversight of the Office of the High Representative, which has delegated authority from the Secretary-General.

Executive direction and management

- 10.67 The Under-Secretary-General and High Representative is responsible for the overall leadership and direction of the Office in the implementation of its mandates and approved programme of work. The High Representative engages in high-level consultations with Member States, organizations of the United Nations system, multilateral and regional financial institutions, the private sector, and civil society groups and academia, and supports the Economic and Social Council and the General Assembly in their reviews and assessments of progress achieved in the implementation of the programmes of action for the three groups of countries and the 2030 Agenda, as it relates to these countries.
- 10.68 The Office advises the Under-Secretary-General and High Representative on issues of policy and management; acts as a focal point for information on all aspects of the work of the Office and ensures that such information is disseminated internally and projected externally, as appropriate; and consults, negotiates and coordinates with other departments, offices, funds and programmes, as well as with non-United Nations entities, on matters of common concern. The Office is headed by a Director (D-2), who deputizes for and is accountable to the Under-Secretary-General and High Representative.

- 10.69 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and, in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations. The Office began a dialogue with staff, in 2019, on environmental sustainability in the workplace, including through implementation of an in-house guide entitled “Things to Know, Things to Do – Reducing Environmental Impacts in the Workplace”. At the same time, an annual environmental sustainability strategy was adopted to assess progress and ensure that commitments were implemented in the subsequent year. To ensure continued engagement on sustainability with staff, a dialogue on the Office’s 2023 environmental sustainability strategy was held on 13 December 2022. A new staff survey on daily sustainability commitments will be carried out in the first half of 2023 and a dialogue will be held on lessons learned from the sustainability practices utilized at the Fifth United Nations Conference on the Least Developed Countries, which will then be applied to conferences on landlocked developing countries and small island developing States in 2024.

- 10.70 Information on the timely submission of documentation and advance booking for air travel is reflected in table 10.23. The Office is committed to achieving further improvements through enhanced advance planning. For the Office, international travel increased in 2022, with major preparatory meetings for the Fifth United Nations Conference on the Least Developed Countries and expert group meetings on the Vienna Programme of Action for the Landlocked Developing Countries for the Decade 2014–2024 and the Samoa Pathway. The lower compliance rate was due mainly to delays in nominations and putting together the documentation required for travel approval, including new COVID-19-related documents, and delays in receiving the programmes of and background documents for events to which the Office is invited, something over which the Office has little control.

- 10.71 Going forward, the Office will continue to raise awareness among staff and managers of the need to comply with the policy on the advance booking of air travel, including through quarterly travel plans and regular monitoring of progress. With regard to partners, the Office will engage with both meeting organizers and participants sponsored by the Office with a view to improving the timeliness of submission of their documentation. The Office will also continue to work closely with the Executive Office to streamline the requirements for the issuance of travel authorizations, within the existing rules and regulations guiding official travel.

- 10.72 The proposed regular budget resources for 2024 amount to \$1,811,800 and reflect a net increase of \$130,800 compared with the appropriation for 2023. The proposed increase is explained in paragraph 10.64 (a) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 10.24 and figure 10.II.

Extrabudgetary resources

10.74 Extrabudgetary resources for this subprogramme are estimated at \$1,843,500 and would enable representatives of the least developed countries to attend meetings pertaining to the implementation of the Doha Programme of Action. The expected decrease of \$1,896,700 is due mainly to the completion of the Fifth United Nations Conference on the Least Developed Countries.

Subprogramme 2 Landlocked developing countries

10.75 The proposed regular budget resources for 2024 amount to \$1,808,900 and reflect a net increase of \$111,400 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 10.62 (a), 10.63 (a) and 10.64 (c) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 10.26 and figure 10.IV.

Extrabudgetary resources

10.76 Extrabudgetary resources for this subprogramme are estimated at \$791,500 and would enable representatives of landlocked developing countries and staff to take part in activities pertaining to

the preparatory process of the third United Nations Conference on Landlocked Developing Countries. The expected increase of \$80,500 is due mainly to the preparations for the Conference.

Subprogramme 3 Small island developing States

10.77 The proposed regular budget resources for 2024 amount to \$1,511,500 and reflect a net increase of \$192,700 compared with the appropriation for 2023. The proposed increase is explained in paragraphs 10.62 (b), 10.63 (b) and 10.64 (d) above. Additional details on the distribution of the proposed resources for 2024 are reflected in table 10.27 and figure 10.V.

(Number of posts/thousands of United States dollars)

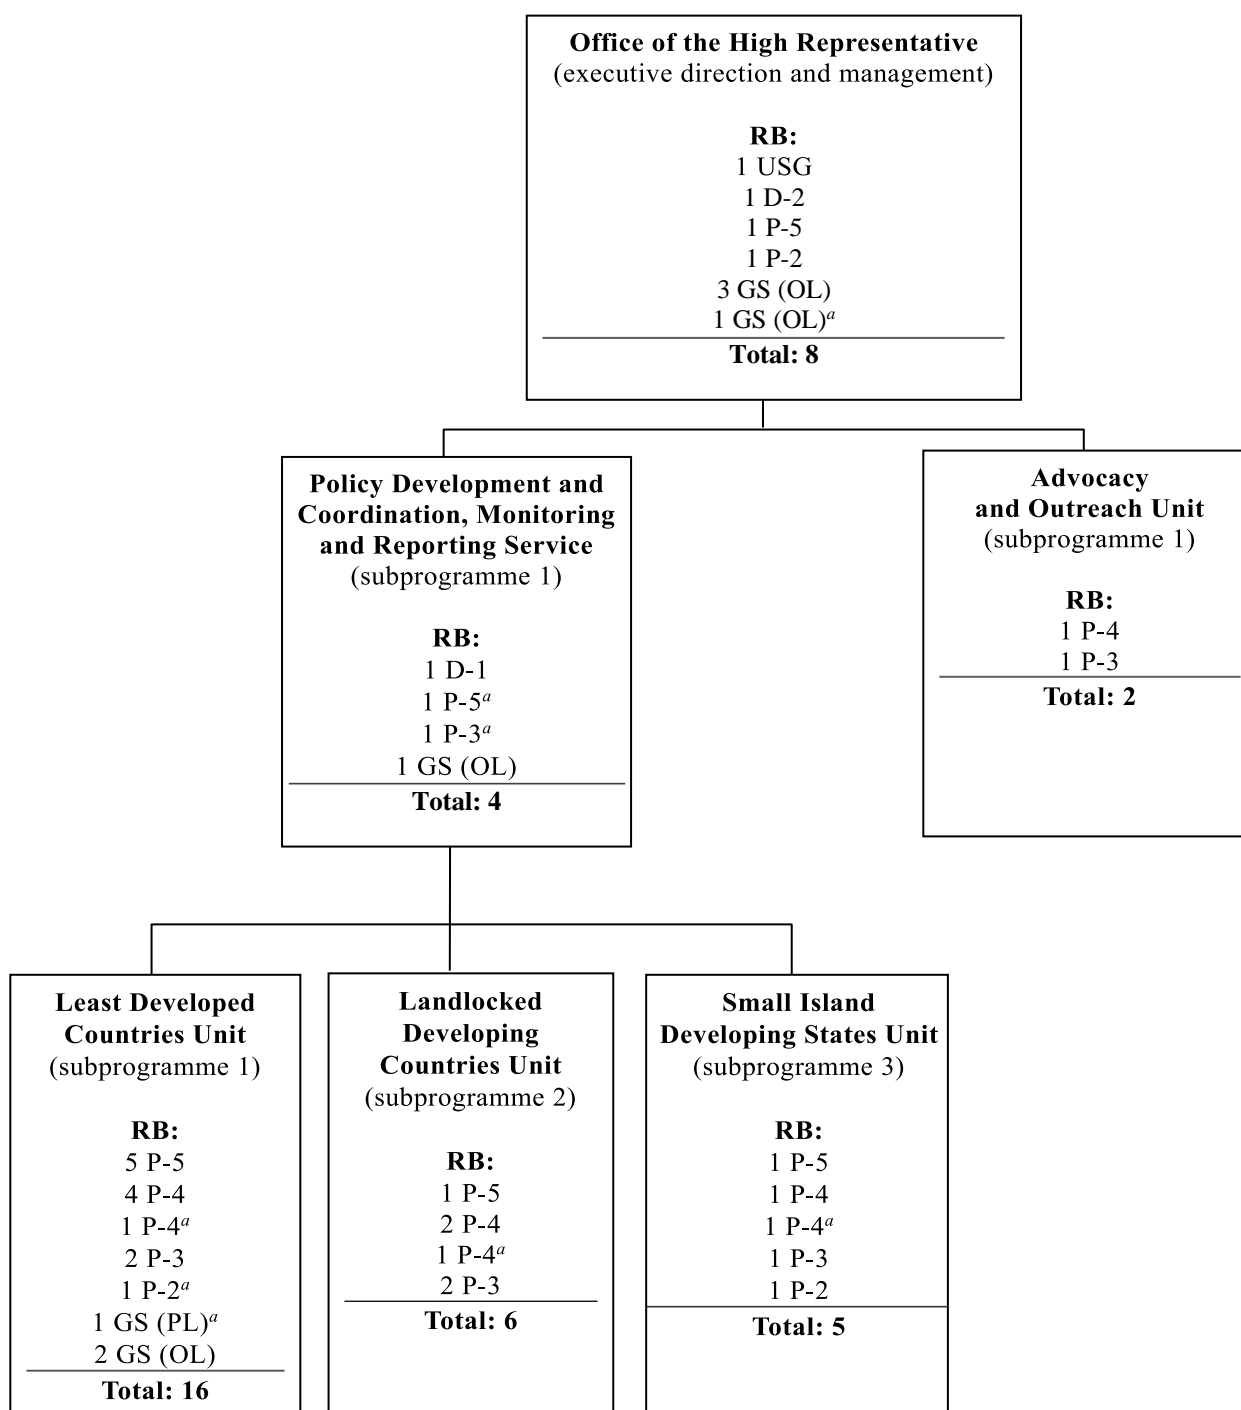

Extrabudgetary resources

- 10.78 Extrabudgetary resources for this subprogramme are estimated at \$443,500 and would provide for activities and the development of knowledge products to support representatives of small island developing States in preparations for the fourth International Conference on Small Island Developing States. The expected decrease of \$36,100 is due mainly to the completion of activities in 2023 in preparation for the International Conference, including the Small Island Developing States Global Business Network and the second United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development.

Summary of follow-up action taken to implement relevant recommendations of advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee notes that, while the two positions (1 P-3 and 1 General Service (Other level)) were established for the Fourth United Nations Conference on the Least Developed Countries, they are required for the increased demand relating to activities for the least developed countries, including the preparation of the Fifth United Nations Conference on the Least Developed Countries, to be held in Doha in 2023, as well as for the monitoring of and follow-up to commitments in the Doha Programme of Action. The Committee therefore considers that the long-term needs of the two positions (1 P-3 and 1 General Service (Other level)) in the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States should be reviewed and that the outcome of the review be provided in the next budget submission (para. IV.33).

Upon enquiry, the Advisory Committee was informed that, while a significant amount of extrabudgetary resources was related to the organization of major conferences and their mid-term reviews, the Office had also been able to mobilize resources for other purposes, including the Least Developed Countries Future Forum and support for the graduation of the least developed countries, as well as support for the national focal points networks, trade ministers meeting for landlocked developing countries and thematic meetings, and the Small Island Developing States Global Business Network. The Advisory Committee trusts that the Office of the High Representative will continue with its efforts to mobilize extrabudgetary resources and provide disaggregated information on extrabudgetary contributions in the context of the next budget proposal (para. IV.35).

The Advisory Committee trusts that the Office of the High Representative will further strengthen coordination and collaboration with entities of the United Nations development pillar. Furthermore, the Committee reiterates its view that information on all sources of funding and the cooperation among all relevant entities, including with the resident coordinator system, towards achieving the programmes of actions for the least developed countries, landlocked developing

Upon further review of the long-term needs of the two positions and the current organizational structure, the Office concluded that continued support related to the implementation of the Doha Programme of Action would be required. It is therefore proposed to establish a post of Associate Programme Management Officer (P-2) and a post of Senior Finance and Budget Assistant (General Service (Principal level)) in the Least Developed Countries Unit. The two temporary positions (1 P-3 and 1 General Service (Other level)) would be maintained for a period of six months while recruitment for the two posts was ongoing, as the Office would still need the functions of the two temporary positions. The functions of the incumbents of the two posts are described in annex III.

Information on extrabudgetary contributions has been provided in paragraph 10.66 above, with further details provided under each of the subprogrammes.

The Office works in collaboration and coordination with the United Nations development system entities and other multilateral international organizations under the umbrella of four well-established mechanisms with very broad memberships: the Inter-Agency Consultative Group for Landlocked Developing Countries, the Inter-Agency Consultative Group for Least Developed Countries, the Inter-agency Consultative Group on Small Island

Part IV International cooperation for development

Brief description of the recommendation

countries and small island developing States, should be provided in a comprehensive manner in the context of the next budget proposal (para. IV.41).

Action taken to implement the recommendation

Developing States (jointly chaired by the Office and the Department of Economic and Social Affairs) and the inter-agency task force on least developed country graduation. With regard to specific programmes and partnerships with various United Nations entities, the Office engages in wide-ranging cooperation on various thematic areas.

The Office also collaborates with relevant entities of the United Nations development pillar, including with the resident coordinator system, in all project proposals for all sources of funding, where appropriate. It relies on the expertise of relevant entities of the United Nations development pillar in the implementation of its activities.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	GS (OL)	Establishment of 1 Programme Management Assistant in the Office of the High Representative	The incumbent would provide assistance in support of planning and implementation activities for the programme of work, assist in programme planning and preparation, including assistance in the interpretation of budget guidelines, and collect and analyse quantitative and qualitative data as inputs for the reporting obligations of the Office, including the strategic management application module, senior managers' compacts, the United Nations System-wide Action Plan on Gender Equality and the Empowerment of Women, the United Nations Disability Inclusion Strategy and the Data Strategy of the Secretary-General for Action by Everyone, Everywhere.
Subprogramme 1, Least developed countries	1	P-5	Establishment of 1 Senior Economic Affairs Officer in the Policy Development and Coordination, Monitoring and Reporting Service	The incumbent would lead the preparation of an annual flagship report on LDCs, LLDCs and SIDS and occasional papers and think pieces on challenges faced by those three groups of countries and related policy recommendations. The incumbent would lead the economic analysis, modelling and formulation of possible economic strategies, policies and actions for adoption by the international community on key priority areas for LDCs, LLDCs and SIDS; lead the preparation of substantive reports and policy briefs on new or emerging development issues of potential concern to the international community, especially LDCs, LLDCs and SIDS, in particular those of a regional or global nature; and make projections and policy recommendations for the consideration of the international community. The incumbent would also conceive, plan and manage expert group meetings, seminars and similar consultations that contribute to the substantive elements of the flagship report and other outputs.
Subprogramme 1, Least developed countries	1	P-3	Establishment of 1 Statistician in the Policy Development and Coordination, Monitoring and Reporting Service	The incumbent would oversee the collection and processing of statistical data related to the priorities of LDCs, LLDCs and SIDS and the creation and maintenance of a statistical database for the Office. The incumbent would also contribute to the monitoring of the implementation of the Doha Programme of Action through the collection, evaluation, analysis, compilation and dissemination of statistical data; the development, implementation and management of statistical databases; and the collection and analysis of data to identify trends or patterns and provide insights through graphs, charts, tables and reports using data visualization methods so as to enable data-driven planning, decision-making, presentation and reporting.
Subprogramme 1, Least developed countries	1	P-4	Establishment of 1 Economic Affairs Officer in the Least Developed Countries Unit	The incumbent would lead the work of the subprogramme related to enhancing access to STEM education in LDCs – one of the priorities of the Doha Programme of Action. This will include follow-up to a report of the Secretary-General on creating an online university, outlining, inter alia, the mapping of existing initiatives, possible new modalities, resource requirements, accreditation and sustainable funding sources, for submission to the General Assembly at its seventy-eighth session. The incumbent would collaborate with suitable partners, including Member States and international organizations, to build on existing initiatives providing access to higher education in STEM subjects and to develop an implementation plan based on a feasibility study for an online university, as well as provide support for the creation of a virtual network of educational institutions. The incumbent would also conceive, plan and manage related expert group meetings, seminars and similar consultations and prepare background reports.

Part IV International cooperation for development

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Subprogramme 1, Least developed countries	1	P-2	Establishment of 1 Associate Programme Management Officer in the Least Developed Countries Unit	The incumbent would strengthen the network of national focal points of LDCs established by the Office by convening meetings of the national focal points on a regular basis to share experiences and best practices on mainstreaming the Doha Programme of Action and the Sustainable Development Goals into national development processes, as well as on implementation and follow-up; networking among peers; and better understanding existing means of implementation, including viable financing and business models. The incumbent would also strengthen collaboration with the United Nations system through the Inter-Agency Consultative Group and the network of resident coordinators in support of LDCs, including in the area of conflict.
Subprogramme 1, Least developed countries	1	GS (PL)	Establishment of 1 Senior Finance and Budget Assistant in the Least Developed Countries Unit	The incumbent would provide support on the financial aspects of the implementation of the Doha Programme of Action, management of financial resources, preparation of project proposals, and planning and reporting activities.
Subprogramme 2, Landlocked developing countries	1	P-4	Establishment of 1 Economic Affairs Officer in the Landlocked Developing Countries Unit	The incumbent would provide substantive support to advance the development issues of LLDCs in intergovernmental processes (such as the General Assembly; the ECOSOC forum on financing for development follow-up; the high-level political forum on sustainable development; and the intergovernmental processes of UNCCD, UNCLOS, UNCTAD, UNFCCC and WTO) by offering strategic advice and giving technical guidance. The incumbent would also substantively assist the Group of Landlocked Developing Countries in building consensus at ministerial and thematic meetings; undertake a variety of studies and analyses to provide evidence-based information to support LLDCs in intergovernmental processes; contribute to the preparation of reports, papers, concept notes and background notes on the development issues of LLDCs; prepare speeches and talking points for senior staff, United Nations officials and the Bureau of the Group of Landlocked Developing Countries; and represent the Unit at international, regional and national meetings on the development issues of LLDCs.
Subprogramme 3, Small island developing States	1	P-4	Establishment of 1 Economic Affairs Officer in the Small Island Developing States Unit.	The incumbent would provide substantive support to advance the development issues of SIDS in intergovernmental processes (such as the General Assembly, the Economic and Social Council, the high-level political forum on sustainable development and regional commissions) by offering strategic advice and giving technical guidance. The incumbent would also substantively assist SIDS in developing their positions and build consensus in the context of key intergovernmental processes; undertake studies and analysis to provide evidence-based information to support SIDS in intergovernmental process; contribute to the preparation of reports, papers, concept notes and background notes on the sustainable development issues of SIDS; prepare speeches and talking points for senior staff and United Nations officials; represent the Unit at international, regional and national meetings on the sustainable development issues of SIDS.

Abbreviations: ECOSOC, Economic and Social Council; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); LDCs, least developed countries; LLDCs, landlocked developing countries; SIDS, small island developing States; STEM, science, technology, engineering and mathematics; UNCCD, United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa; UNCLOS, United Nations Convention on the Law of the Sea; UNCTAD, United Nations Conference on Trade and Development; UNFCCC, United Nations Framework Convention on Climate Change; WTO, World Trade Organization.

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

Foreword

The year 2023 will mark the end of the first decade of implementation of Agenda 2063: The Africa We Want. At the same time, the General Assembly will hold the Sustainable Development Goals Summit and will advance the preparations for the Summit of the Future. We are thus presented with a once-in-a-generation chance to shape the international dialogue towards fast-tracking the progress of both the 2030 Agenda for Sustainable Development and Agenda 2063. Given Africa's pivotal role in consolidating and accelerating development gains globally, a clear message will need to arise in 2024: that the continent's development needs and priorities should be central to global deliberations if meaningful progress is to be made.

Bearing this in mind, the new narrative on Africa and from Africa will continue to inform the programme's activities in 2024. In particular, the programme entities will work with partners to position Sustainable Development Goal 16 as a key enabler for the attainment of the 2030 Agenda and a driver of development in Africa, by promoting technology and digitalization as a means to build strong institutions and country systems for social cohesion, peace, stability and domestic resource mobilization. Key investments in the digitalization of public services, if targeted correctly, can act as a lever for increasing vertical policy coherence and accelerating development gains, which are pivotal considerations for the implementation of both Agendas. In addition, the programme will consolidate work done over the past few years on the themes of energy, climate, finance and food systems as an essential focus for building increased resilience in Africa. The prioritization of these issues will contribute to bringing an African narrative to the New York stage.

(Signed) **Cristina Duarte**
Under-Secretary-General and Special Adviser on Africa

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 11.1 The Office of the Special Adviser on Africa supports the Secretary-General in ensuring a coherent and integrated approach for United Nations support for Africa and addressing gaps; following up on the implementation of all relevant global summit and conference outcomes of the United Nations related to Africa; coordinating and guiding the preparation of Africa-related reports and inputs; initiating reports on critical issues affecting Africa; monitoring the implementation of Sustainable Development Goal commitments made towards Africa's development; and coordinating global advocacy in support of the African Union's Agenda 2063: The Africa We Want. The Economic Commission for Africa (ECA) is responsible for promoting the economic and social development of its member States, fostering intraregional integration and promoting international cooperation for the development of Africa. ECA is mandated to operate at the regional and subregional levels to harness United Nations assets and bring them to bear on Africa's priorities. To enhance its impact, ECA places a special focus on collecting up-to-date and original regional statistics in order to ground its policy research and advocacy in clear objective evidence; promoting policy consensus; providing meaningful capacity development; and providing advisory services in key thematic fields. The Department of Global Communications of the Secretariat raises international awareness of the economic, political and social situation in Africa, as well as of the efforts made by Africa, the United Nations and the international community to promote the economic recovery and sustainable development of the region in pursuit of the goals of the New Partnership for Africa's Development (NEPAD) and the achievement of the Sustainable Development Goals. The mandates of the Office, ECA and the Department derive from the priorities established in relevant resolutions and decisions, including General Assembly resolutions [32/197](#), [57/7](#), [57/300](#), [61/296](#), [66/293](#) and [76/236](#) and Economic and Social Council resolutions [671 \(XXV\) A](#) and [1998/46](#).
- 11.2 In view of the impact of the coronavirus disease (COVID-19) pandemic on health systems, social protection structures, employment, education and other areas critical for Africa's development, enhanced coordination and advocacy efforts are critically needed to ensure that the planning and implementation of programmes and projects to address the impact of COVID-19 are aligned with the 2030 Agenda for Sustainable Development, Agenda 2063 and the priorities established by the African Union, the African Union Development Agency-NEPAD, regional economic communities and African countries for a strong recovery. Despite the challenges, the COVID-19 pandemic provides an opportunity to build forward, build better and accelerate the implementation of the 2030 Agenda during the decade of action for the Sustainable Development Goals.

Strategy and external factors for 2024

- 11.3 In 2022, the COVID-19 pandemic continued to prove that no country was ready to overcome the challenges of the future on its own. According to the World Health Organization, 4.8 billion people have received at least one COVID-19 vaccine dose globally. In Africa, this figure stands at around 342 million, out of a total population of around 1.2 billion. The lingering COVID-19 divide reaffirms the need for a change of paradigm in the international multilateral system, one that is particularly relevant for Africa. To this end, the programme has engaged with partners and stakeholders to form a new narrative on Africa: one that reflects and strengthens Africa's role as a key stakeholder and a vital player in the global arena, with its success stories and best practices to share; one that brings to the global debate issues that are key for Africa's development, such as domestic resource mobilization, the energy mix and the role of digitization in underpinning institution-building, innovation and economic growth; and one that is of Africa and from Africa, to be fully embraced within the United Nations and beyond.

- 11.4 The implementation of the programme's strategy will be guided by the vision of an empowered Africa that drives its own development to progressively fulfil its potential as a continent of hope, opportunities and prosperity with the coherent support of the international system. To transform the vision into a reality, the programme has a strategic mission: to leverage data and knowledge to feed advisory services, awareness-raising, communications and advocacy that mobilize the United Nations system, African Member States, international partners, civil society and the private sector at the global and regional levels around the transformative vision of the African Union and in support of the joint implementation of the 2030 Agenda and Agenda 2063 on the continent, building on synergies, complementarities, strong partnerships, innovation and strategic foresight.
- 11.5 To fulfil that mission, the Office of the Special Adviser on Africa, ECA and the Department of Global Communications will promote the new narrative through coordinated and complementary action in policy analysis, research and development, advocacy, communications, global and regional coordination, monitoring and evaluation and support for Member States. The strategic agenda, developed in consultation with the Group of African States and other stakeholders, guides the programme activities around six cluster areas identified as key for Africa's development because of their multiplying impact: financing for development; achieving sustainable development to deliver durable peace; governance, resilience and human capital; science, technology and innovation; industrialization, the demographic dividend and trade, with a focus on the African Continental Free Trade Area; and a balanced energy mix and climate adaptation. Taking into account the crucial role of young people in Africa in the continent's development, special attention will be given to promoting youth-focused policies and proposals under each cluster area, in particular when addressing human capital and the demographic dividend.
- 11.6 With regard to cooperation with other entities at the global, regional, national and local levels, the programme will continue to work closely with African Member States and African Union institutions as its main partners, in particular with the African Union Commission, the secretariat of the African Union Development Agency-NEPAD, the regional economic communities, the African Peer Review Mechanism and the African Capacity-Building Foundation, among others. In addition, the programme will continue to promote partnerships with an array of Member States, international organizations, civil society, the private sector, academia, think tanks, the African diaspora and other external stakeholders to enhance common approaches and synergies in their efforts to support Africa's development in the key areas identified in the programme's strategy. The Office of the Special Adviser on Africa will lead coordination efforts at the global level under subprogramme 1, while ECA will lead coordination at the regional, national and local levels under subprogramme 2.
- 11.7 With regard to inter-agency coordination and liaison, the programme will ensure strategic-level coordination among United Nations entities through the interdepartmental task force on African affairs by identifying priorities for building forward and building better, promoting results-based planning to develop the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development and monitoring the implementation of the agreed plans and priorities. The Regional Collaborative Platform for Africa will ensure operational-level coordination among United Nations entities in the field and with the resident coordinator system, bringing to the attention of the interdepartmental task force the areas of work where strategic guidance is needed or gaps are identified and providing the data and information necessary for the identification of priorities and the monitoring of the work of the United Nations.
- 11.8 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) African countries significantly realign their priorities towards building forward and building better;
 - (b) International partners continue to support Africa's sustainable development through financial contributions, technical support and the adoption of policy frameworks that support African ownership and empowerment;
 - (c) The partnership between the United Nations and the African Union is further strengthened through the continued implementation of the Joint United Nations-African Union Framework

- for Enhanced Partnership in Peace and Security, the renewed approach to the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development, and the adoption of the African Union-United Nations Framework on Human Rights;
- (d) International organizations and partners are committed to the implementation of multi-stakeholder projects and programmes in support of the implementation of the 2030 Agenda, Agenda 2063, NEPAD and the priorities of the African Union and African countries;
 - (e) United Nations entities actively engage in the interdepartmental task force on African affairs;
 - (f) United Nations entities working in Africa participate in the Regional Collaborative Platform for Africa and its opportunity and issue-based coalitions with the regional Development Coordination Office, the Regional Bureau for Africa of the United Nations Development Programme and ECA as the joint secretariat;
 - (g) External stakeholders and potential partners, including media organizations, academic institutions, civil society organizations and creative communities, continue to engage with the programme's priorities;
 - (h) Member States and partners continue to advocate for and find joint solutions to mitigate the impacts of external shocks on Africa.
- 11.9 The programme integrates a gender perspective in its operational activities, deliverables and results, as appropriate. Subprogramme 1 incorporates a gender perspective into its analytical and policy documents as well as its advocacy activities, with a particular focus on the relevance of issues relating to peace, security and development for the empowerment of women and girls. It actively participates in and co-organizes side events on gender equality and issues relating to the empowerment of women during the annual sessions of the Commission on the Status of Women. A gender perspective will continue to be mainstreamed across the activities of subprogramme 2 with respect to the development and delivery of United Nations support for the implementation of the priorities of the African Union and the African Union Development Agency, including the use of sex-disaggregated statistics, the effects of COVID-19 on the employment of women and the increase in domestic violence owing to COVID-19, as well as work towards mainstreaming a gender perspective into all the opportunity and issue-based coalitions. Lastly, subprogramme 3 promotes gender equality and the empowerment of women by producing and disseminating communications products, through *Africa Renewal* platforms, that counter stereotypes and discrimination against women, and by promoting a balanced presence of women and men in all its multimedia products, promotional campaigns and events.
- 11.10 In line with the United Nations Disability Inclusion Strategy, the programme will promote, through its activities and policy recommendations, proposals that specifically foster the inclusion of persons with disabilities and will take measures necessary to increase the accessibility of its products and events.

Impact of the pandemic and lessons learned

- 11.11 The continuation of the COVID-19 pandemic into 2022 had an impact on the implementation of mandates, in particular by leading to changes in the delivery approach of activities under all subprogrammes. For example, with the resumption of some high-level events, select in-person representational duties were resumed, while in other cases, the digital divide continued to have an impact on the delivery of online events, limiting broad-based engagement. Nevertheless, all programme entities continued to make use of digital technologies to facilitate online engagement and maintained a flexible approach to implementing deliverables.
- 11.12 In addition, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, subprogramme 1 has included domestic resource mobilization as a key consideration in its programming towards promoting strong country systems as part of its narrative to support African States in their post-COVID-19 recovery efforts.

11.13 The programme continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic, including adapting and tailoring outputs for online delivery and increasing opportunities for online engagement, where appropriate.

Legislative mandates

11.14 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

32/197	Restructuring of the economic and social sectors of the United Nations system	69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)
54/232	Implementation of the first United Nations Decade for the Eradication of Poverty	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
57/2	United Nations Declaration on the New Partnership for Africa’s Development	71/254	Framework for a Renewed United Nations-African Union Partnership on Africa’s Integration and Development Agenda 2017–2027
57/7	Final review and appraisal of the United Nations New Agenda for the Development of Africa in the 1990s and support for the New Partnership for Africa’s Development	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
57/300	Strengthening of the United Nations: an agenda for further change	76/236	Programme planning
61/296	Cooperation between the United Nations and the African Union	77/170	Ensuring access to affordable, reliable, sustainable and modern energy for all
63/1	Political declaration on Africa’s development needs	77/271	Promotion of durable peace through sustainable development in Africa

Security Council resolutions

1197 (1998)	2282 (2016)
2033 (2012)	2457 (2019)

Economic and Social Council resolutions

1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2022/25	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
2022/6	Social dimensions of the New Partnership for Africa’s Development		

Subprogramme 1 Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063

General Assembly resolutions

53/92 ; 54/234 ; 57/296	The causes of conflict and the promotion of durable peace and sustainable development in Africa	74/302 ; 76/298	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
58/233 ; 76/297 ; 77/270	New Partnership for Africa’s Development: progress in implementation and international support	75/327	Implementation of the recommendations contained in the report of the Secretary-General on the promotion of durable peace and sustainable development in Africa
66/293	A monitoring mechanism to review commitments made towards Africa’s development		

Statements by the President of the Security Council

S/PRST/1997/46

Subprogramme 2
Regional coordination of United Nations support for the integrated implementation of the 2030 Agenda for Sustainable Development and Agenda 2063

Economic and Social Council resolutions

671 (XXV) A Establishment of an Economic Commission for Africa

Subprogramme 3
Public information and awareness activities in support of Agenda 2063

General Assembly resolutions

60/109 B Questions relating to information: United Nations public information policies and activities

Deliverables

11.15 Table 11.1 lists all cross-cutting deliverables of the programme.

Table 11.1

Cross-cutting deliverables for the period 2022–2024, by category and subcategory

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	4	4	4	4
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	1	1	1
4. The Economic and Social Council on items related to Africa's development	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	1	6	6	6
5. Africa Dialogue Series	–	5	5	5
6. Africa Day at the high-level political forum on sustainable development	1	1	1	1
Publications (number of publications)	1	1	1	1
7. Outcome document of the Africa Dialogue Series	1	1	1	1
Technical materials (number of materials)	1	1	1	3
8. Fact sheets and other technical materials informing discussions for the Africa Dialogue Series	1	1	1	3
D. Communication deliverables				
Digital platforms and multimedia content: one quarterly joint audio product on issues related to Africa's sustainable development.				

Evaluation activities

- 11.16 The following evaluations to be conducted by the programme are planned for 2024:
- (a) Evaluation of the strategic agenda of the Office of the Special Adviser on Africa for the period 2021–2023;
 - (b) Midterm assessment of the Office's capacity-building project for Member States on the design and implementation of policies for the promotion of durable peace through sustainable development.

Programme of work

Subprogramme 1

Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063

Objective

- 11.17 The objective, to which this subprogramme contributes, is to advance effective implementation of the 2030 Agenda and Agenda 2063 through coherent, integrated and effective United Nations system engagement, global advocacy and strategic partnership with African Member States and the African Union.

Strategy

- 11.18 To contribute to the objective, the subprogramme will:
- (a) Act as the focal point for the African Union Development Agency-NEPAD and Agenda 2063 at Headquarters; support enhanced collaboration between the United Nations system and the African Union Commission, regional economic communities, the Agency-NEPAD, the African Peer Review Mechanism and other African Union communities; and contribute to strengthening the implementation of the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development;
 - (b) Coordinate the interdepartmental task force on African affairs and monitor United Nations system support for Africa's sustainable development in order to promote strategic planning and programming in the United Nations system in Africa in accordance with the priorities of the African Union and African Member States as enshrined in Agenda 2063 and its first 10-year implementation plan;
 - (c) Perform horizon scanning and analyse emerging trends, challenges and opportunities in the areas of strategic focus of the programme, as well as developing policy proposals to maximize opportunities and minimize and mitigate identified risks, in particular through the management of data and knowledge;
 - (d) Track and monitor the implementation of commitments to Africa's development with clear benchmarks and indicators aimed at assessing their contribution to the implementation of the 2030 Agenda and Agenda 2063 and, when appropriate, propose corrective measures;
 - (e) Facilitate intergovernmental deliberations on issues related to Africa's sustainable development and support African Member States in their participation in intergovernmental processes;
 - (f) Develop and implement communication and global advocacy strategies in coordination with subprogrammes 2 and 3 in support of Agenda 2063;

- (g) Promote strategic partnerships with African Member States and African Union institutions, as well as leveraging United Nations knowledge and capacities through technical cooperation with United Nations agencies, funds and programmes around flagship initiatives and projects.

11.19 The above-mentioned work is expected to result in:

- (a) Enhanced empowerment of African Member States to mobilize increased resources for Africa's development and maximize their impact through targeted data and evidence-based policies;
- (b) Strengthened cooperation between the United Nations system and the African Union and other African institutions, as well as increased complementarity of their activities in support of the implementation of the 2030 Agenda and Agenda 2063;
- (c) A more coherent and integrated approach by the United Nations system support for Africa to challenges affecting Africa's development that includes and addresses existing gaps and leverages opportunities through impact-focused priorities with a multiplying impact;
- (d) Stronger alignment of intergovernmental discussions with the priorities of African countries and the African Union, as well as increased integration of African perspectives into global debates and decisions;
- (e) Greater accountability of stakeholders in the implementation of commitments to Agenda 2063 and the 2030 Agenda;
- (f) Increased awareness and understanding of the international community of the perspective of the African Union and the realities and priorities of African countries.

Programme performance in 2022

School feeding as an accelerator for peace and development in Africa

- 11.20 With 38 per cent of persons in Africa aged 15 years old or below in 2022 according to the United Nations Population Fund, Africa has one of the youngest demographic profiles of any continent. As a result, schools play a crucial role in maximizing Africa's demographic dividend and contributing to socioeconomic development. However, 150 million children on the continent do not attend primary school, and for those who do, educational attainment is below the global average. Furthermore, enrolment and completion rates drop dramatically during secondary education, affecting mostly girls. In 2021, the Office of the Special Adviser on Africa joined the School Meals Coalition, which brings together Member States, United Nations entities and other stakeholders to identify best practices and develop policy proposals to enhance the outreach and impact of school-feeding programmes. The objective was to leverage the knowledge and expertise of the Coalition to support African countries in addressing the challenge caused by non-attainment of educational potential. Within that framework, in 2022, the subprogramme launched the initiative "A pen for a gun", with a double aim: to encourage African countries to join the Coalition so they can benefit from the knowledge-sharing, and to develop a multi-pronged approach that promotes schools as hubs for development, social cohesion and peace. It builds on the multiplying impact that school-feeding programmes have by: (a) increasing school enrolment, attendance and finalization rates; (b) boosting nutrition, improving children's overall health and strengthening their learning capacities; (c) promoting gender equality and social inclusion; and (d) enhancing local economic growth. It is founded on the understanding that, as the most basic public service, schools can help to increase the presence of State institutions across the territory of African countries, strengthening social cohesion and mitigating the potential influence of non-State actors in remote and marginalized areas.
- 11.21 Progress towards the objective is presented in the performance measure below (see figure 11.I).

Figure 11.I

Performance measure: number of African States engaged in the School Meals Coalition (cumulative)

Planned results for 2024

Result 1: technology and digitization for a sustainable, inclusive and resilient recovery from the COVID-19 pandemic

Programme performance in 2022 and target for 2024

- 11.22 The subprogramme's work contributed to 4,598 patent applications in Africa by African residents, which exceeded the planned target of 3,600 patent applications.
- 11.23 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 11.II).

Figure 11.II

Performance measure: number of patent applications in Africa by African residents (annual)¹

¹ World Intellectual Property Organization, *World Intellectual Property Indicators 2022* (Geneva, 2022).

Result 2: action for a balanced energy mix in Africa to achieve the Sustainable Development Goals

Programme performance in 2022 and target for 2024

- 11.24 The subprogramme’s work contributed to the adoption by African Union member States of the African Common Position on Energy Access and Just Energy Transition, which specifically acknowledged the trade-offs between energy and climate change as a challenge for Africa’s sustainable development, which met the planned target.
- 11.25 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 11.2).

Table 11.2
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Industrialized Member States promoted a commitment to net zero emissions	Member States adopted a global road map to achieve energy access for all by 2030	African Union member States adopted the African Common Position on Energy Access and Just Energy Transition	Member States endorse specific proposals for the implementation of an energy mix to achieve energy access for all in Africa	Member States make progress in identifying and accessing financing options for a balanced energy mix and climate adaptation priorities as outlined in their national development and universal energy access plan

Result 3: strong country systems for development, social cohesion, and peace and stability in Africa

Proposed programme plan for 2024

- 11.26 The weak presence or absence of the State, particularly in peripheral regions of countries, has an impact on socioeconomic development, which in turn can contribute to instability. The digitalization of State service delivery can play a significant positive role in fostering effective and resilient State institutions, enabling development and economic growth and supporting the expansion of State presence in remote and hard-to-reach areas. The subprogramme has been working with African countries to advocate for public sector capacity-building, addressing a range of issues from domestic resource mobilization to education and other e-government services, such as e-tax services and digital health. As of 2022, only 14 African countries had institutionalized whole-of-government approaches to public sector digital transformation, while 12 had a plan or draft to do so.²

Lessons learned and planned change

- 11.27 The lesson for the subprogramme was the need to enhance its advocacy and capacity-building to better highlight the benefits of targeted investment in technology to digitalize State services. Such benefits include citizen-centric public services that are universally accessible, a whole-of-government approach to digital government transformation, and simple, efficient and transparent government systems. In applying the lesson, the subprogramme will work with the International Telecommunication Union, the World Bank, the African Union Commission and other stakeholders

² World Bank, *GovTech Maturity Index 2022 Update: Trends in Public Sector Digital Transformation* (Washington, D.C., 2022).

to identify areas for strengthening regulatory frameworks around e-government in African countries, develop tailored policy guidance and provide capacity-building to African civil servants. These efforts are expected to result in an increase in the overall number of African States that have a whole-of-government approach to public sector digital transformation.

11.28 Expected progress towards the objective is presented in the performance measure below (see figure 11.III).

Figure 11.III

Performance measure: number of African States that have a whole-of-government approach to public sector digital transformation (cumulative)

Deliverables

11.29 Table 11.3 lists all deliverables of the subprogramme.

Table 11.3

Subprogramme 1: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	4	3

11. On key issues for Africa’s peace and development	6	6	12	4
12. Online training course on linkages between peace and development	–	–	–	1

C. Substantive deliverables

Consultation, advice and advocacy: consultations and strategic-level coordination with African Union institutions; consultations on an annual results-oriented workplan for the interdepartmental task force on African affairs; evidence-based and data-driven advice and policy proposals provided to United Nations leadership and African Member States, including monthly briefings focused on trends, foresight and policy analysis, as well as quarterly briefings and materials in support of the participation of African Member States in intergovernmental processes; advocacy products focused on the prioritization of policy proposals aimed at supporting Africa’s transformational agenda, including panels, round tables and side events during the Economic and Social Council youth forum, the high-level political forum on sustainable development and other major United Nations conferences aimed at an audience of approximately 200 participants (government and academia) for each advocacy event, and at least four advocacy videos.

Databases and substantive digital materials: online knowledge repository with digital copies of the work of the Office of the Special Adviser on Africa in at least four official languages of the United Nations; United Nations monitoring mechanism database; data on United Nations action in Africa made available to complement the Office’s reporting mandate; database of African think tanks and non-governmental organizations; online country dashboards for African members of the Security Council and the Peacebuilding Commission.

D. Communication deliverables

Outreach programmes, special events and information materials: awareness-raising events, toolkits and pamphlets on key issues affecting Africa’s sustainable development.

External and media relations: press releases, press conferences and media dialogues on issues related to Africa’s sustainable development, peace and security and human rights in Africa.

Digital platforms and multimedia content: Office of the Special Adviser on Africa website and social media with updated content in at least four official languages of the United Nations; multimedia documents in all United Nations official languages; communication and multimedia content that meet the full accessibility standards issued by the Office.

**Subprogramme 2
Regional coordination of United Nations support for the integrated
implementation of the 2030 Agenda for Sustainable Development and
Agenda 2063**

Objective

- 11.30 The objective, to which this subprogramme contributes, is to accelerate the integrated implementation of Agenda 2063 and the 2030 Agenda through United Nations system-wide coherence and collaboration and to enhance capacities of African Union organs and agencies, in particular the African Union Commission, the African Union Development Agency-NEPAD and the regional economic communities, at the regional and subregional levels.

Strategy

- 11.31 To contribute to the objective, the subprogramme will:
 - (a) Enhance United Nations system-wide collaboration at the regional level towards the realization of the 2030 Agenda and promote and strengthen joint planning and implementation of actions

of United Nations entities working on development in relation to the 2030 Agenda through the vehicles of the Regional Collaborative Platform for Africa;

- (b) Conduct policy research and analysis on key African Union priorities and targeted studies on transboundary issues relevant to Africa's regional transformation and integration drive, as well as disseminating the findings at regional and subregional intergovernmental and high-level stakeholder platforms across the five subregions of Africa;
- (c) Provide technical assistance and advisory services within the framework of Agenda 2063 and the 2030 Agenda, taking into account the United Nations-African Union cooperation frameworks and the African Union strategic priorities;
- (d) Build the capacity of subregional entities to formulate coherent strategies for the integrated implementation of development priorities of regional economic communities and intergovernmental organizations in collaboration with the subregional offices and subprogrammes of ECA;
- (e) Work under the architecture of the Regional Collaborative Platform for Africa, with the opportunity and issue-based coalitions as its vehicles in the promotion of coherence in United Nations system-wide support for the African Union and support for resident coordinators and United Nations country teams in the implementation of activities towards the realization of Agenda 2063 and the 2030 Agenda;
- (f) Support the African Union Development Agency-NEPAD in the context of continental priorities and Africa's development agenda in collaboration with subprogrammes 1 and 2.

11.32 The above-mentioned work is expected to result in:

- (a) Increased and more effective United Nations support for the African Union and its development priorities as reflected in Agenda 2063;
- (b) Development and implementation by Member States of their national development priorities.

Programme performance in 2022

Strengthened African Union and United Nations collaboration on Agenda 2063 and 2030 Agenda priorities through a new mechanism

11.33 In 2022, building on the momentum achieved by the internal Regional Collaborative Platform for Africa and the tangible results achieved by its opportunity- and issue-based coalitions, and leveraging newly reinvigorated dialogue with the African Union Commission regarding a common platform for collaboration, the subprogramme supported the establishment of a new coordination structure, the African Union-United Nations Regional Collaborative Platform. The Platform agreed to eight key joint priority areas (data and statistics; macroeconomic management; demographic dividend; new technologies and digital transitions; climate action and resilience; peace, security and human rights; forced displacement and migration; and regional initiatives and strategies). Through this platform, the subprogramme coordinated meetings between opportunity- and issue-based coalitions "1" and "5" and relevant African Union technical focal points, which led to the identification and co-creation of policies and action plans for joint implementation to address issues related to legal identity and civil registration, harmonization of data and statistics across Africa and monitoring of progress towards the 2030 Agenda and Agenda 2063, including through the Africa United Nations Data for Development Platform. In addition, the subprogramme facilitated cooperation between the African Union Institute for Statistics and the African Centre for Statistics of ECA to produce climate data and statistics.

11.34 Progress towards the objective is presented in the performance measure below (see table 11.4).

Table 11.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	<p>The African Union-United Nations Regional Collaborative Platform identified key priority areas and developed joint policies and action plans to address them</p> <p>The evidence base for decision-making was improved through the joint production of climate data and statistics by the African Union and the United Nations</p>

Planned results for 2024

Result 1: the role of digitization and the African Continental Free Trade Area for a sustainable, inclusive and resilient recovery from the COVID-19 pandemic

Programme performance in 2022 and target for 2024

- 11.35 The subprogramme’s work contributed to strengthened capacities of Botswana, the Central African Republic, the Comoros, Sao Tome and Principe and South Sudan, as well as the Economic Community of West African States, in formulating and validating their strategies in relation to the African Continental Free Trade Area, which did not meet the planned target of 18.5 per cent of intra-African trade as a percentage of total trade in Africa. The target could not be met owing to a lack of available data in 2022. The performance measure for 2022 therefore reflects the latest available data.
- 11.36 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 11.IV).

Figure 11.IV
Performance measure: share of intra-African trade in the total trade of Africa
(Percentage)

^a Based on latest available data from 2021.

Result 2: enhanced action by African countries on energy access and climate adaptation**Programme performance in 2022 and target for 2024**

- 11.37 The subprogramme's work contributed to five additional national and regional strategies developed to promote energy access and climate adaptation, for a cumulative total of seven strategies, which exceeded the planned target of four strategies.
- 11.38 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 11.V).

Figure 11.V

Performance measure: number of national and regional strategies developed to promote energy access and climate adaptation (cumulative)**Result 3: accelerated progress towards the 2030 Agenda and Agenda 2063 at the regional, subregional and national levels through an integrated approach****Proposed programme plan for 2024**

- 11.39 The 2030 Agenda and Agenda 2063 recognize that peace and security are prerequisites for achieving sustainable development and that sustainable development provides pathways to peaceful societies. In 2022, the African Union adopted the Tangier Declaration, which reaffirmed the need to promote peace, security and stability as a prerequisite for the implementation of Africa's development and integration agenda and specifically acknowledged "the inter-connectedness between inclusive growth, sustainable development, and implication for peace". The subprogramme, in coordination with subprogramme 1, supported the African Union and its member States through regional and subregional studies that examined these interconnections in the four African subregions to inform policymaking and action towards the realization of the 2030 Agenda and Agenda 2063.

Lessons learned and planned change

- 11.40 The lesson for the subprogramme was that an effective uptake of such analysis at the national and subregional levels requires targeted support through the production of context-specific briefs, increased advocacy and the provision of tailored capacity-building. In applying the lesson, the subprogramme will develop actionable policy recommendations for an integrated approach to achieving the 2030 Agenda and Agenda 2063. These recommendations will be based on context-specific research that examines the potential for development gains, such as industrialization, economic diversification and regional integration, to contribute to peace and security and vice versa, and will be complemented by validation and dissemination workshops, capacity-building activities and targeted advocacy at the regional, subregional and national levels, in collaboration with subprogrammes 1 and 3, to promote the further uptake of research findings and policy recommendations.

11.41 Expected progress towards the objective is presented in the performance measure below (see figure 11.VI).

Figure 11.VI

Performance measure: number of integrated initiatives adopted by national or subnational authorities or at the regional level to accelerate progress towards the 2030 Agenda and Agenda 2063 (cumulative)

Deliverables

11.42 Table 11.5 lists all deliverables of the subprogramme.

Table 11.5

Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	3	3	4	4
Reports on:				
1. United Nations support for the African Union and its NEPAD programme to the Conference of African Ministers of Finance, Planning and Economic Development	1	1	1	1
2. The African Union-United Nations Regional Collaborative Platform for Africa annual meeting	–	–	1	1
3. The annual session of the Regional Collaborative Platform for Africa (expert body)	1	1	1	1
4. The retreat of the opportunity and issue-based coalitions of the Regional Collaborative Platform for Africa (expert body)	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	18	23	19	25
5. Meeting of the Conference of Ministers	–	–	1	1
6. Annual session of the Regional Collaborative Platform for Africa	2	1	2	1
7. Africa Regional Forum on Sustainable Development	–	1	1	1
8. African Union-United Nations meetings	4	4	6	6
9. Retreat of the Regional Collaborative Platform for Africa	8	12	1	8
10. Meetings on capacity development and partnerships related to Agenda 2063 and the 2030 Agenda	4	5	8	8
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	2	1	2
11. On the African Union Development Agency-NEPAD partnership	1	2	1	2

12. Workshop on collaboration on the Regional Collaborative Platform for Africa	2	2	4	2
13. Workshops on capacity development and partnerships related to Agenda 2063 and the 2030 Agenda	4	–	8	4
Publications (number of publications)	5	1	5	4
14. Progress report of the Regional Collaborative Platform for Africa opportunity and issue-based coalitions	1	1	1	1
15. Progress report of the Regional Collaborative Platform for Africa on the implementation of African Union-United Nations frameworks and initiatives	1	–	1	1
16. On topics specific to the work of the Regional Collaborative Platform for Africa	1	–	1	–
17. On Agenda 2063 and the 2030 Agenda	1	–	1	1
18. On topics related to African Union organs and agencies	1	–	1	1
Technical materials (number of materials)	3	1	3	2
19. On progress on decisions of the Regional Collaborative Platform for Africa	1	–	1	1
20. On implementation of integrated approaches towards Agenda 2063 and the 2030 Agenda	2	1	2	1

C. Substantive deliverables

Consultation, advice and advocacy: advisory services, upon request, relating to integrated implementation of Agenda 2063 and the 2030 Agenda for ECA member States, the African Union Commission, the African Union Development Agency -NEPAD and the six regional economic communities; advocacy relating to capacity-building support for the African Union in the context of United Nations-African Union frameworks.

D. Communication deliverables

Outreach programmes, special events and information materials: pamphlets, booklets and celebrations and commemorations of special events and exhibits.

Digital platforms and multimedia content: website with up-to-date content on the work of the subprogramme.

**Subprogramme 3
Public information and awareness activities in support of Agenda 2063**

Objective

- 11.43 The objective, to which this subprogramme contributes, is to achieve the informed understanding and engagement of a global audience in support of the economic, political and social development of Africa.

Strategy

- 11.44 To contribute to the objective, the subprogramme will:
- (a) Develop global comprehensive editorial plans on priority issues affecting Africa, including generating support in Africa and beyond for the African Union Development Agency -NEPAD, and the achievement of the African Union’s Agenda 2063 and the 2030 Agenda, as well as in support of the work of subprogrammes 1 and 2 and their advocacy strategies. This is under the umbrella of the strategy of the Africa Section of the Department of Global Communications and in line with the global communications strategy;
 - (b) Produce external communications content, including through the *Africa Renewal* digital platforms, media advisories and other public information, for use by external media, both African and international, and provide external communications support to the Office of the Special Adviser on Africa;

(c) Produce or translate select content into languages including French and Kiswahili.

- 11.45 The above-mentioned work is expected to result in enhanced awareness of key thematic issues of the African Union Development Agency-NEPAD and other issues related to economic recovery and sustainable development in Africa.

Programme performance in 2022

Increased awareness of the general public through *Africa Renewal* podcast

- 11.46 As part of its digital strategy to reach online audiences in a new way with a solutions-oriented narrative of Africa, the subprogramme introduced audio options for its content in 2021. In 2022, in addition to audio formats of its articles, the subprogramme produced and launched a three-episode pilot of the *Africa Renewal* podcast, working together with the Africa Podcast Festival, which at the time was the convener of the only existing Africa-wide podcast festival. The three episodes were interviews with African experts, respectively, a Ugandan trade law and policy specialist and one of the architects of the African Continental Free Trade Area, a Kenyan scientist who leads global clinical trial research and worked on the ground-breaking malaria vaccine for children announced by the World Health Organization in 2021, and a Nigerian climate change activist on her expectations for the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, which was held in Egypt later in 2022. The three episodes were played 1,006 times.
- 11.47 Progress towards the objective is presented in the performance measure below (see figure 11.VII).

Figure 11.VII
Performance measure: number of plays of the *Africa Renewal* podcast

Planned results for 2024

Result 1: the role of digitalization for sustainable recovery from the COVID-19 pandemic

Programme performance in 2022 and target for 2024

- 11.48 The subprogramme’s work contributed to 22 *Africa Renewal* articles with a focus on digitalization, covering topics including digital platforms to facilitate the implementation of the African Continental Free Trade Area, profiles of young people who have established digital-based companies, such as for telehealth services in the Gambia and virtual payments in the Democratic Republic of the Congo, and the rise of crowdfunding online as a source of financing for entrepreneurs, which exceeded the planned target of 20 articles.

11.49 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 11.VIII).

Figure 11.VIII
Performance measure: number of *Africa Renewal* articles published with a focus on digitalization (annual)

Result 2: amplified African voices in the public sphere on issues related to climate change and energy

Programme performance in 2022 and target for 2024

11.50 The subprogramme’s work contributed to 14 African women experts on climate and energy being cited or interviewed or their work being published in *Africa Renewal*, including eight scientists who wrote op-eds in *Africa Renewal* related to climate issues in the run-up to the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, held in Egypt, which exceeded the planned target of 12 African women experts.

11.51 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 11.IX).

Figure 11.IX
Performance measure: number of African women experts on climate and energy cited, published or interviewed in *Africa Renewal* (annual)

Result 3: increased awareness of the general public on peace and security issues in Africa

Proposed programme plan for 2024

11.52 Technological advancements, including increased mobile penetration and Internet access, have resulted in audiences being able to access digital content in different formats and at their own convenience. In 2022, apart from its podcast pilot, the subprogramme produced 386 audio format stories that were played 19,000 times. The majority of the downloads were in Africa (32.3 per cent), followed by the Americas (31.7 per cent).

Lessons learned and planned change

11.53 The lesson for the subprogramme was that audio format stories are an effective way to reach *Africa Renewal* audiences directly, with the potential to increase as mobile penetration and Internet access continue to grow in Africa, with an estimated 613 million unique mobile subscribers by 2025.³ In applying the lesson, the subprogramme will focus on producing audio format content on topics related to peace and security in Africa, including on the development of a New Agenda for Peace as part of the preparations for the Summit of the Future.

11.54 Expected progress towards the objective is presented in the performance measure below (see figure 11.X).

Figure 11.X
Performance measure: number of plays of *Africa Renewal* audio stories on peace and security issues (annual)

Deliverables

11.55 Table 11.6 lists all deliverables of the subprogramme.

³ Global System for Mobile Communications Association, “The mobile economy sub-Saharan Africa 2022”, 2022.

Table 11.6

Subprogramme 3: deliverables for 2024, by category and subcategory

Category and subcategory

D. Communication deliverables

Outreach programmes, special events and information materials: partnerships with approximately 25 editors and writers at major media houses in Africa and other countries, education institutions, civil society organizations and creative communities to amplify *Africa Renewal* content for wider distribution and dissemination; four webinars with youth organizations; external communications products, including relating to the annual Africa Dialogue Series, the Commission on the Status of Women, the Economic and Social Council youth forum, the General Assembly and African Union flagship events; contributions to the work of the Regional Collaborative Platform for Africa and the interdepartmental task force on African affairs; publicity in support of international, regional and local initiatives and campaigns that foster or have an impact on Africa’s economic and social development.

External and media relations: media round tables; content tailored to specific media outlets interested in Africa’s development for syndication or citation and in including relevant information on United Nations support for Africa in their own materials; international, regional and local initiatives and campaigns that foster or affect Africa’s economic and social development; public information material, including media advisories.

Digital platforms and multimedia content: digital products and written and audio content for *Africa Renewal* digital platforms, including the *Africa Renewal* website, *Africa Renewal* social media accounts, 24 curated newsletters and a mobile phone application.

B. Proposed post and non-post resource requirements for 2024

Overview

11.56 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 11.7 to 11.9.

Table 11.7

Overall: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2022 expenditure ^a	2023 appropriation	Changes					2024 estimate (before recosting)
			Technical adjustments	New/ expanded mandates	Other	Total	Percentage

11.57 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 11.10 to 11.12 and figure 11.XI.

11.58 As reflected in tables 11.10 (1) and 11.11, the overall resources proposed for 2024 amount to \$8,695,200 before recosting, reflecting no change compared with the appropriation for 2023. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

11.59 As reflected in table 11.10 (1), the net effect of the proposed changes is cost-neutral and is related to the operational requirements projected for 2024. The breakdown of changes is as follows:

- (a) **Executive direction and management.** The increase of \$198,100 reflects the net effect of:
 - (i) An increase of \$165,500 under posts, resulting from the proposed inward redeployment of one post of Data Analyst (P-3) from subprogramme 1, as described in annex III;
 - (ii) A net increase of \$32,600 under non-post resources, mainly for consultancy services to undertake an impact evaluation of the programme's strategic agenda for the period 2021-2023;
- (b) **Subprogramme 1, Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063.** The decrease of \$198,100 reflects the net effect of:
 - (i) A decrease of \$165,500 under posts, resulting from the proposed outward redeployment of one post of Data Analyst (P-3) to executive direction and management, as described in annex III;
 - (ii) A net decrease of \$32,600 under non-post resources, resulting mainly from reduced resource requirements for travel of experts given the adoption of a hybrid delivery model for the subprogramme's expert meetings.

Extrabudgetary resources

- 11.60 As reflected in table 11.10 (2), extrabudgetary resources amounting to \$632,500 would provide for non-post resources for the Office of the Special Adviser on Africa under executive direction and management and subprogramme 1. The resources would complement regular budget resources and would be used mainly to develop the strategy on the promotion of durable peace through sustainable development interventions, in particular by building strong domestic resource mobilization systems that curb illicit financial flows and provide policy space to Member States and by generating and disseminating new knowledge on the role of public service delivery in strengthening trust in public institutions and promoting social cohesion.
- 11.61 The extrabudgetary resources under the present section are subject to the oversight of the Special Adviser on Africa based on delegated authority from the Secretary-General.

Executive direction and management

- 11.62 The executive direction and management component comprises the Office of the Under-Secretary-General and the Strategic Management Unit.
- 11.63 The overall responsibilities of the executive direction and management component include the following functions:
- (a) To represent the programme and facilitate the interaction of the three subprogrammes with other entities and stakeholders;
 - (b) To contribute to and facilitate debate among Member States, in particular those in the Group of African States, on the strategic direction of programme 9;
 - (c) To develop a forward-looking strategy for the activities of programme 9 to respond to emerging and foreseeable priorities of African Member States and the African Union;
 - (d) To coordinate the joint planning and performance monitoring of programme 9 and to provide strategic guidance for the prioritization of issues within the programme;
 - (e) To provide strategic guidance for the development of policy for, and to provide direction for and ensure the implementation of, the programme of work of the Office of the Special Adviser on Africa, through continuous planning, monitoring and evaluation of subprogrammes performance;
 - (f) To promote transparency, cooperation, synergies and coherence among the three subprogrammes;
 - (g) To provide guidance for the mainstreaming of data analysis and management in the programme's activities;
 - (h) To manage all administrative issues regarding the functioning of the Office of the Special Adviser and to provide logistical and administrative support for the implementation of subprogramme 1;
 - (i) To contribute to United Nations reform discussions and implementation, in particular in relation to improving system-wide coherence in United Nations development work in Africa.
- 11.64 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the programme is integrating environmental management practices into its operations. In 2022, it continued to reduce its carbon footprint through the mainstreaming of virtual platforms for internal and external communications, which resulted in a reduction in travel and in the use of documentation, and by consolidating the premises of the Office of the Special Adviser on Africa in one location as they had previously been spread across two of

Part IV International cooperation for development

the United Nations office buildings in New York. These measures contributed to reducing the Organization’s carbon footprint. The programme will continue to reduce its carbon footprint, including by further operationalizing virtual platforms for strategic engagement and interaction with its stakeholders and by implementing measures to limit energy waste, adopting environmentally friendly procurement processes, recycling obsolete information technology equipment and raising staff awareness.

- 11.65 Information on the timely submission of documentation and advance booking for air travel is reflected in table 11.13. Cases of non-compliance with regard to the submission of documentation are due to punctuality shortcomings in the production process linked to temporary staff shortages. Non-compliance with regard to advance booking for air travel is due mostly to the late receipt of documentation needed for travel requests or participation as part of delegations of other senior officials. To improve future compliance, the Office will continue to take every measure needed to enable the timely submission of travel requests.

Table 11.13
Compliance rate
(Percentage)

	<i>Actual 2020</i>	<i>Actual 2021</i>	<i>Actual 2022</i>	<i>Planned 2023</i>	<i>Planned 2024</i>
Timely submission of documentation	100	100	–	100	100
Air tickets purchased at least 2 weeks before the commencement of travel	25	50	47	100	100

- 11.66 The proposed regular budget resources for 2024 amount to \$1,726,000 and reflect an increase of \$198,100 compared with the appropriation for 2023. The proposed increase is explained in paragraph 11.59 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 11.14 and figure 11.XII.

Extrabudgetary resources

- 11.67 Extrabudgetary resources for this component amounting to \$208,000 under non-post resources would complement regular budget resources and would be used mainly to strengthen the data function of the Strategic Management Unit.
- 11.68 The expected increase of \$16,900 is attributable mainly to increased mobilization of support from partners following the finalization of the resource mobilization strategy of the Office of the Special Adviser on Africa and the operationalization of the data function.

Programme of work

**Subprogramme 1
 Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063**

- 11.69 The proposed regular budget resources for 2024 amount to \$4,522,500 and reflect a decrease of \$198,100 compared with the appropriation for 2023. The proposed decrease is explained in paragraph 11.59 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 11.15 and figure 11.XIII.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

11.70 Extrabudgetary resources for this subprogramme amounting to \$424,500 under non-post resources would complement regular budget resources and would be used mainly to generate and disseminate knowledge, deliver capacity-building and undertake advocacy campaigns on the promotion of durable peace through sustainable development. In particular, the resources will support the efforts of the Office of the Special Adviser on Africa to promote school feeding as an entry point for increasing public service delivery across the continent and to strengthen domestic resource mobilization as a critical tool to increase African countries’ fiscal and policy space.

Section 11 **United Nations system support for the African Union’s Agenda 2063: The Africa We Want**

11.71 The expected increase of \$60,900 is attributable mainly to increased capacity by the subprogramme to attract resources following the launch of the Office’s resource mobilization strategy and the increase in quality of the Office’s products as a result of the reform process on the programme’s organizational and business structure in response to an evaluation by the Office of Internal Oversight Services.

Subprogramme 2
Regional coordination of United Nations support for the integrated implementation of the 2030 Agenda for Sustainable Development and Agenda 2063

11.72 The proposed regular budget resources for 2024 amount to \$975,000 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 11.16 and figure 11.XIV.

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee stresses that, in the selection of candidates for the posts of the Office of the Special Adviser on Africa, in particular those at the senior levels, every effort should be made to ensure that potential incumbents possess the requisite knowledge, experience and skills required for the implementation of the mandates of the Office. In particular, account should be taken of the recent reorientation and reorganization of the Office, including the new narrative, and the approval by the General Assembly of the new title of programme 9: the United Nations system support for the African Union's Agenda 2063: The Africa We Want – strategic partnership for progress towards implementation (see [A/77/7](#), paras. IV.58 and IV.59). The Committee trusts that an update on the recruitment status will be provided to the General Assembly during its consideration of the present report and in the context of the next budget proposal (para IV.47).

In addition, the Committee trusts that the Office of the Special Adviser on Africa will continue to apply lessons learned from the pandemic by maximizing virtual meetings and online platforms (para IV.52).

The Advisory Committee trusts that the Office of the Special Adviser on Africa will ensure a coordinated approach in the utilization of resources for consultants and avoid duplications among the three entities in the implementation of its mandates (para IV.53).

Noting the progress achieved so far and the ongoing process of the reorganization of the Office to lead subprogramme 9 in a coordinated manner, the Committee encourages the Office, under the leadership of the Special Adviser on Africa, to continue to improve collaboration and coordination among the three entities in the implementation of the mandates to support Agenda 2063 (para IV.57).

In order to ensure that the prospective candidates have the necessary specialization in using data and knowledge to promote and implement policies that support progress towards sustainable development in Africa and have extensive managerial experience, in line with the reorientation and reorganization of the Office and the new narrative, a thorough review of the job descriptions of the D-2 post and the two D-1 posts was conducted, submitted for classification and approved by the Office of Human Resources of the Secretariat.

The job openings were issued and widely circulated with a view to encouraging applications from candidates from unrepresented and underrepresented Member States as well as female candidates. The recruitment of the D-2 post is in the onboarding phase, while the process for the D-1 posts is currently in the selection stage.

The Office has continued to apply lessons learned from the pandemic, as shown by the redistribution of funds within subprogramme 1 to increase resources available for virtual meetings and reduce travel of experts.

The three entities continue to increase coordination of their workplans with a view to promoting complementarities and reducing duplications. Furthermore, the Office is changing its business model to prioritize contractual arrangements with think tanks, universities and research centres instead of individual consultancies. This change of business model is expected to bring more coherence and consistency to service delivery and contribute to the institutionalization of knowledge generation on the continent.

Coordination and collaboration among the three entities has continued, as shown by the fact that all three expected results of all three subprogrammes have a coordinated approach. Furthermore, the three implementing entities have agreed on terms of reference for the implementation of the programme that will institutionalize joint planning, monitoring and evaluation exercises.

Annex III

Summary of proposed post changes, by component and subprogramme

<i>Component/subprogramme</i>	<i>Posts</i>	<i>Grade</i>	<i>Description</i>	<i>Reason for change</i>
Executive direction and management	1	P-3	Redeployment of Data Analyst	Within the context of the implementation of the Data Strategy of the Secretary-General for Action by Everyone, Everywhere and taking into account the current stage of data literacy in the Office of the Special Adviser on Africa and the need to mainstream data management into all the activities of the Office, centralizing data-specialized capacities within the Strategic Management Unit would increase the effectiveness of the data function and facilitate the optimal utilization of the existing capacities to support both the executive direction and management component and subprogramme 1.

Foreword

2024 will be a special year for the United Nations Conference on Trade and Development (UNCTAD), as it will mark the sixtieth anniversary of its foundational conference. Beyond that, it is hard to predict what the future holds. We live in uncertain times, in a context of reinforcing and cascading crises – the pandemic, armed conflict, inflation, geopolitics and climate change. Our proposed programme plan, enriched by the wisdom of the Bridgetown Covenant, will nonetheless ready our institution for the year 2024 and the challenges ahead.

In Barbados, we received a mandate to build resilience, and this resilience was already tested in 2022. UNCTAD, through its three pillars of work, its involvement in the coordination of the task team of the Global Crisis Response Group on Food, Energy and Finance and its participation in the negotiations on the memorandum of understanding between the Russian Federation and the Secretariat of the United Nations on promoting Russian food products and fertilizers to the world markets, has shown that it can rise to the challenge. Our process to build a more agile, impactful and engaged UNCTAD is under way with momentum – though we are still not where we want to be.

In 2024, UNCTAD will support member States in achieving the four transformations of the Bridgetown Covenant by continuing to improve its capacity for consensus-building, research and analysis, and technical cooperation, as well as for influencing the global discussion with the development perspective and moving the needle where it matters. In 2022, we showed that UNCTAD can impact the lives of millions, and, in 2024, our mission is to build on that impact to be worthy of the celebration of our sixtieth anniversary.

(Signed) Rebeca **Grynspan**
Secretary-General
United Nations Conference on Trade and Development

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 12.1 The United Nations Conference on Trade and Development (UNCTAD) is responsible for assisting developing countries in integrating beneficially into the global economy in support of inclusive, resilient and sustainable growth and development. This task is now more critical than ever, in the light of the highly regressive impact of the coronavirus disease (COVID-19) pandemic crisis both within and among countries, as highlighted by the Bridgetown Covenant – the outcome document of the fifteenth quadrennial session of UNCTAD. The Covenant contains calls for UNCTAD to contribute to the coordinated international dialogue on COVID-19 response and recovery measures to counter the negative impact of the pandemic on the global economy and trade, to help developing countries to transform their economies through diversification, sustainability and resilience, to transform how development is financed, and to strengthen multilateralism. Special attention is called for the least developed countries, landlocked developing countries, small island developing States, African countries, other structurally weak, vulnerable and small economies, and countries in conflict and post-conflict situations, while also taking account of the challenges of middle-income countries and countries with economies in transition. The Covenant also contains a reaffirmation of the UNCTAD role as the focal point within the United Nations system for the integrated treatment of trade and development and interrelated issues in the areas of finance, technology, investment and sustainable development. It will also give account to a number of essential underlying issues for sustainable, inclusive and equitable growth and development, as mandated in the Bridgetown Covenant.

Strategy and external factors for 2024

- 12.2 The COVID-19 pandemic has left behind more inequalities across and within countries, which have witnessed diverging recovery paths. Therefore, fostering a more inclusive and sustainable recovery from the pandemic and enhancing resilience to crises will continue to guide the work of UNCTAD, in accordance with the particular needs and challenges of the member States and the Bridgetown Covenant. In line with the Covenant, UNCTAD will continue to rely on its three interrelated pillars of work: (a) conducting high-quality and evidence-based research and policy analysis that contribute to national, regional and international policies, with the aim of generating inclusive and sustainable development under the principle of leaving no one behind; (b) providing technical cooperation to developing countries on the basis of such analysis; and (c) bringing member States together through its intergovernmental machinery to build consensus on policies that allow developing countries to maximize the opportunities of globalization and economic integration, as well as to address cross-cutting economic, social and environmental challenges.
- 12.3 The challenges that countries face, however, are now multiple and interrelated. While countries are still recovering from the health and socioeconomic wounds of the COVID-19 pandemic, the armed conflict in Ukraine has fuelled a further cost-of-living increase across the globe. Food, energy and fertilizer prices have increased dramatically, feeding inflation and, in return, resulting in rising interest rates. In parallel, the world is struggling to deal with the threat of climate change. The global economy is thus marked by an extremely complex and challenging environment. UNCTAD will continue to address interrelated issues essential to all countries in attaining sustainable and equitable growth and development, while being particularly mindful of the needs and priorities of developing countries. This requires extensive cross-fertilization and cooperation across the UNCTAD subprogrammes. UNCTAD will also address such interrelated issues through its work on issues related to South-South and triangular cooperation and regional integration.

- 12.4 In accordance with its mandate in the interrelated areas of trade and development, UNCTAD will support the implementation, monitoring and review of the 2030 Agenda for Sustainable Development and the relevant targets of the Sustainable Development Goals. UNCTAD is the custodian of eight Goal indicators at the global level. These indicators fall under Goals 10, 12, 16 and 17 and cover topics related to trade, tariffs, development finance, debt, investment, illicit finance and enterprise sustainability. Through its work and results, UNCTAD will continue to support member States to make progress not only towards the achievement of Goals 8, 9, 10 and 17, but also towards Goals 2, 5, 12, 14, 15 and 16.
- 12.5 Along with the global agendas, UNCTAD will strive, in particular, to ensure the implementation of mandates reconfirmed and reinforced at its fifteenth session, held in 2021, and which are outlined in the Bridgetown Covenant. UNCTAD will be guided by four major transformations, outlined in the document, to move to a more resilient, inclusive and sustainable world: transforming economies through diversification; transforming to a more sustainable and more resilient economy; transforming how development is financed; and transforming multilateralism.
- 12.6 The Bridgetown Covenant emphasized the threat of climate change and the need to decouple economic growth from environmental degradation and enhance climate resilience. UNCTAD will support the building of a new methodology for the treatment of development economics, one that more fully integrates inclusiveness, climate change and the environment into a new global trade, financial and policy framework, as also highlighted in the Bridgetown Covenant. This work will focus on scaling up climate finance, decarbonizing the logistics of trade and global value chains, boosting sustainable investments and supporting a transition to a low-emission, competitive and climate-resilient and sustainable economy. UNCTAD will continue to promote and advance the issue of the integrated treatment of development economics in international forums, such as the annual sessions of the Conference of the Parties to the United Nations Framework Convention on Climate Change. UNCTAD will ensure organizational coherence and synergies on climate and the environment across subprogrammes through an established cross-divisional environment and climate change working group.
- 12.7 To support its member States and to promote structural transformation, as requested pursuant to the Bridgetown Covenant, UNCTAD will continue to provide reliable statistical information and indicators in the interrelated areas of trade and development. UNCTAD will ensure greater coordinated statistical capacity development at the organizational level, support the implementation of the four transformations outlined in the Bridgetown Covenant and catalyse the support provided to member States in achieving the Sustainable Development Goals, through a newly established cross-cutting stand-alone Statistics Service that ensures synergies and quality controls.
- 12.8 The UNCTAD Statistics Service will provide timely and high-quality statistics and support developing countries in building their capacity to collect and compile data and measure progress in sustainable, inclusive and equitable trade, growth and development. The Service will strive to further develop its databases and make use of novel methods as appropriate and requested, such as measuring illicit financial flows or measuring South-South cooperation using data collected and reported by the South within their own framework to inform global debates on development support. The Service will continue to report on developments relating to the Goals by providing an update on the evolution of a selection of official indicators and complementary data and statistics and an update on progress in the development of new concepts and methodologies for indicators for which UNCTAD is a global custodian agency.
- 12.9 As requested in the Bridgetown Covenant, UNCTAD will continue to support countries, through technical cooperation, in addressing the challenges exacerbated or exposed by the pandemic and in building their resilience to future economic shocks by building productive capacities, develop the capacity of Governments to formulate and implement policies on financing for development, investment, international trade, science and technology and logistics, and support sustainable development in line with an updated technical cooperation strategy and toolkit.

- 12.10 With regard to cooperation with other entities at the global, regional, national and local levels, UNCTAD will continue to combine its expertise with the reach and in-country presence of partners. At the regional level, UNCTAD will continue to work closely with partner organizations, such as the secretariat of the African Continental Free Trade Area through its Regional Office for Africa, as well as regional economic communities, business communities and strategic development partners to foster regional economic integration and growth. In addition, UNCTAD will continue to foster cooperation with international financial institutions, the Organisation for Economic Co-operation and Development and the Group of 20 to contribute to international policy debates on trade, investment and finance.
- 12.11 With regard to inter-agency coordination and liaison, UNCTAD will remain engaged with the United Nations development system reform process by collaborating with resident coordinator offices, and will continue to be involved in the preparation of common country assessments and United Nations Sustainable Development Cooperation Frameworks. UNCTAD will continue to work with the World Trade Organization (WTO) and the International Trade Centre (ITC) in a complementary manner to support developing countries in their efforts to be integrated into the multilateral trading system. UNCTAD participates in the United Nations System Chief Executives Board for Coordination and its subsidiary bodies. As one of the five major institutional stakeholders of the financing for development follow-up process, UNCTAD is leading the inter-agency dialogue on monitoring and accountability of the means for the implementation of targets through the dedicated follow-up to the Addis Ababa Action Agenda commitments, and participates in the Inter-Agency Task Force on Financing for Development. UNCTAD will continue to support the Inter-Agency and Expert Group on Sustainable Development Goal Indicators and lead the United Nations Inter-Agency Cluster on Trade and Productive Capacity in “delivering as one” operational activities at the country level. As a member of the United Nations inter-agency task team on science, technology and innovation for the Sustainable Development Goals and as secretariat to the Commission on Science and Technology for Development, UNCTAD will continue to support the implementation of outcomes related to science, technology and innovation of the 2030 Agenda, including the Technology Facilitation Mechanism and the Technology Bank for the Least Developed Countries. As part of the Global Crisis Response Group on Food, Energy and Finance, UNCTAD will continue to provide critical data and analysis for fostering understanding of the economic consequences of the armed conflict in Ukraine and will help decision makers to develop strategies and mobilize solutions by working closely with United Nations Secretariat entities, the Office of the United Nations High Commissioner for Refugees, the Food and Agriculture Organization of the United Nations, the World Food Programme, the regional economic commissions, United Nations country teams, the United Nations Environment Programme, the International Labour Organization (ILO) and the United Nations Development Programme.
- 12.12 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Up-to-date and accurate economic and financial information and data at the country and regional levels continue to be available and cooperation continues with relevant entities on the production of statistics;
 - (b) Extrabudgetary funding continues to be available for technical cooperation programmes, and conditions and capacities exist in member States to adopt and implement policies and strategies;
 - (c) There is political will to achieve consensus in intergovernmental meetings;
 - (d) New waves of COVID-19 lead to less significant disruptions of trade.
- 12.13 UNCTAD integrates a gender perspective in its operational activities, deliverables and results, as appropriate, and in line with the Bridgetown Covenant. UNCTAD is committed to the integrated and cross-cutting treatment of a gender perspective in trade and development. It will continue to strengthen the capacity of member States to design and implement policies and establish institutions, frameworks and/or mechanisms that support women’s economic empowerment, economic security

and rights, and enhance their economic and digital skills and opportunities. UNCTAD will continue to analyse the gender impact of armed conflict, the COVID-19 pandemic and other phenomena, and advocate for policy responses that are gender-sensitive. UNCTAD will expand its work on trade and sex-disaggregated statistics and on measuring the ways in which women and men participate in and benefit from trade. Through the establishment of a gender committee, organizational coherence and synergies across divisions will be increased.

- 12.14 In line with the United Nations Disability Inclusion Strategy, UNCTAD will continue to support the advancement of disability inclusion in both its programmatic work and its operational activities, in close collaboration with the United Nations Office at Geneva. Access by delegates of member States and participants to UNCTAD meetings organized at the headquarters facilities is managed and ensured by the Office, in line with the existing United Nations Secretariat policy and guidance on disability. For meetings serviced outside the duty station, such as the quadrennial ministerial conference, UNCTAD ensures, through its host country agreements, that all venues and conference facilities are accessible to persons with disabilities. The same applies to venues used by UNCTAD for events and capacity-building activities at the national level.

Impact of the pandemic and lessons learned

- 12.15 The continuation of the COVID-19 pandemic into 2022 had a moderate impact on the implementation of mandates, as the restrictions related to working arrangements and travel eased and UNCTAD continued to make use of digital tools in the implementation of technical cooperation activities. While more meetings and capacity-building activities took place in person, UNCTAD continued to allow for hybrid elements when requested by member States or to accommodate any country-specific restrictions.
- 12.16 UNCTAD continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. At the programme level, extensive analysis has been undertaken on lessons learned and how they can inform the recovery and resilience to future crises, especially in developing countries. For that purpose, UNCTAD produced a special report entitled *Impact of the COVID-19 Pandemic on Trade and Development: Lessons Learned*, drawing on the analysis and data produced by the institution since the beginning of the pandemic.

Legislative mandates

- 12.17 The list below provides all mandates entrusted to the programme.

General Assembly resolutions

1995 (XIX)	Establishment of the United Nations Conference on Trade and Development as an organ of the General Assembly	69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)
63/204	Report of the twelfth session of the United Nations Conference on Trade and Development	70/1	Transforming our world: the 2030 Agenda for Sustainable Development

B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	1	1	1	–
13. Measuring illicit capital flows in sub-Saharan Africa (jointly with the United Nations Office on Drugs and Crime and the Economic Commission for Africa)	1	1	1	–
Seminars, workshops and training events (number of days)	24	23	24	24
14. Seminars on topics to be determined by the Secretary-General of UNCTAD, in consultation with member States (e.g., ad hoc expert discussions)	3	3	3	3
15. Seminars, including public symposium, with civil society and member States to generate and transfer knowledge in connection with the work programme of UNCTAD, subject to further consideration and decision by the Trade and Development Board	2	2	2	2
16. Seminar on topical trade and development issues (Raúl Prebisch lecture)	1	–	1	1
17. Seminar on topical international trade and development issues, such as multi-stakeholder dialogues	1	1	1	1
18. Seminars with UNCTAD special advisers and advocates	2	2	2	2
19. Seminar on the coordination of national development strategies oriented towards sustainable development (Cabinet meeting)	1	1	1	1
20. Workshops with civil society and youth, including networking events and online networking discussions	14	14	14	14
Publications (number of publications)	3	2	3	3
21. <i>UNCTAD Handbook of Statistics</i> ^a	1	1	1	1
22. <i>SDG Pulse</i> ^a	1	1	1	1
23. UNCTAD annual report ^a	1	–	1	1
Technical materials (number of materials)	11	13	10	12
24. Policy briefs on trade and development issues	1	4	1	3
25. Reports on evaluations of United Nations Development Account projects and of external evaluations required by contribution agreements	8	5	7	5
26. Economic and maritime statistical country profiles ^a	2	2	2	2
27. Statistical papers, including on illicit financial flows and international trade ^a	–	2	–	2
C. Substantive deliverables				
Databases and substantive digital materials: UNCTAD civil society database and civil society electronic alerts and UNCTAD Youth Network; UNCTAD statistical data centre for approximately 250,000 users; ^a UNCTAD trade in services statistics production system. ^a				
Consultation, advice and advocacy: policy advice to policymakers for statistical capacity in the area of trade and development. ^a				
D. Communication deliverables				
Outreach programmes, special events and information materials: “UNCTAD at a Glance”; outreach programmes; special events; regional outreach materials; press kits, media briefs and flyers for flagship publications; news briefs and opinion pieces; public information materials on UNCTAD, including brochures and posters; and at least 10 specialized information sessions for students, delegates, academics and youth visiting UNCTAD and, upon request, in other locations, including online outreach.				
External and media relations: Around 10 press conferences, 25 press releases, 20 media alerts and information notes.				
Digital platforms and multimedia content: UNCTAD website (more than 4.2 million sessions in 2022) and social media content (more than 500,000 followers, including 85,000 new followers in 2022), including podcasts and blogs about UNCTAD meetings, events and publications, including policy briefs.				

^a Deliverables of the Statistics Service, which were previously presented under the deliverables of subprogramme 1, Globalization, interdependence and development.

Evaluation activities

- 12.19 The following evaluations completed by UNCTAD in 2022 have guided the proposed programme plan for 2024:
- (a) Subprogramme 1, Globalization, interdependence and development;
 - (b) E-commerce and the digital economy programme;
 - (c) 2030 Agenda for Sustainable Development Sub-Fund project on integrating landlocked commodity-dependent developing countries into regional and global value chains;
 - (d) 2030 Agenda for Sustainable Development Sub-Fund project on South-South integration and the Sustainable Development Goals: enhancing structural transformation in key partner countries of the Belt and Road Initiative;
 - (e) United Nations Development Account project 1819N on leapfrogging skills development in e-commerce in South-East Asia within the framework of the 2030 Agenda for Sustainable Development;
 - (f) Midterm review of the strategic plan for the period 2020–2023 of the Debt Management and Financial Analysis System Programme.
- 12.20 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, from the aforementioned evaluation of the e-commerce and the digital economy programme, as well as that of a Development Account project, there were calls for the consolidation and refinement of existing activities. The e-commerce and the digital economy programme has reflected this recommendation by concentrating its programming efforts towards its existing activities and exploring options for new activities prior to launching its new workplan in 2024. Likewise, for the Development Account project, which concerned the delivery of training in e-commerce and related courses in South-East Asia, the responsible UNCTAD team is assessing the current language options of training delivery as well as the option to offer more specialized or advanced courses in this field. Evaluation recommendations concerning results-based management practices were contained in various evaluations. In the case of the evaluation of subprogramme 1, it was recommended that UNCTAD develop standard indicators to assess the performance of research products. In a similar vein, the importance of communication and stakeholder outreach practices was highlighted across most of the evaluations conducted in 2022. For both the performance and outreach aspects of the work of UNCTAD, these evaluations have fed into current processes under way in UNCTAD and are expected to be implemented in 2023 and 2024.
- 12.21 The following evaluations are planned for 2024:
- (a) Independent evaluation of subprogramme 3, International trade and commodities;
 - (b) Independent evaluation of subprogramme 4, Technology and logistics (to be submitted in 2025);
 - (c) Five independent evaluations of completed projects covering various subprogrammes.

Programme of work

Subprogramme 1

Globalization, interdependence and development

Objective

- 12.22 The objective, to which this subprogramme contributes, is to advance inclusive and sustainable development, sustained growth, full employment and decent work for all through evidence-based economic policies and strategies at the national, regional and international levels and to achieve

progress towards a durable solution to the debt problems of developing countries, as well as poverty eradication in developing countries, especially the least developed countries, including through North-South cooperation, complemented but not substituted by South-South and triangular cooperation.

Strategy

12.23 To contribute to the objective, the subprogramme will:

- (a) Identify specific needs and measures arising from the interdependence of trade, finance, investment, technology and macroeconomic policies, from the point of view of their effects on development through the three pillars of work of UNCTAD referred to in paragraph 12.2 above;
- (b) Support developing countries in their efforts to formulate development strategies and practical policy options and recommendations at all levels, including through technical cooperation, training and the dissemination of best practices;
- (c) Promote cooperation at all levels of the interplay between successful development finance strategies, debt sustainability and effective debt management, in accordance with its mandate and complementing the work done by other relevant stakeholders;
- (d) Focus on the challenges in short- and long-term debt sustainability in developing countries and sustainable domestic and international financial resource mobilization for development, which will help member States to make progress towards the achievement of Sustainable Development Goals 16 and 17;
- (e) Undertake research and analysis on trends and prospects for closer cooperation and integration among developing countries;
- (f) Provide technical assistance and research and analysis to support the Palestinian people, in line with paragraph 127 (bb) of the Bridgetown Covenant and responding to the request of the General Assembly in its resolutions [77/22](#), on the Committee on the Exercise of the Inalienable Rights of the Palestinian People, and [77/30](#), on assistance to the Palestinian people;
- (g) Analyse specific ways in which South-South cooperation can enhance development effectiveness, contribute to recovery from the COVID-19 pandemic and build resilience in developing countries;
- (h) Analyse the relation between trade and development and the environment and propose sustainable development policies, in line with paragraph 75 of the Bridgetown Covenant, given that transforming to a more sustainable economy under the current climate trends requires enhancing the ability of countries and economies to adapt to higher temperatures, thus necessitating a better understanding of how trade and development will be affected by a warmer world.

12.24 The above-mentioned work is expected to result in:

- (a) Increased understanding of the coherence between international economic rules, practices and processes and national policies and development strategies;
- (b) Strengthened linkages between economic and development policies and decision-making and improvements in the compilation and dissemination of the official statistics of member States;
- (c) Strengthened national capacities for effective debt management;
- (d) Increased understanding by developing countries of the global economic environment and of policy choices for inclusive and sustained development;
- (e) Contributions to an increase in understanding at the international level of debt issues and debt sustainability;

- (f) Increased understanding, at all levels, of the challenges from a trade and development perspective posed by climate change and the type of support and action needed.

Programme performance in 2022

Enhanced economic diversification and resilience of Barbados for a sustained recovery from the COVID-19 pandemic

- 12.25 Barbados, one of the small island developing States, has experienced a series of exogenous shocks, reflecting multiple structural challenges facing the country, such as a high debt to gross domestic product ratio, narrow production structures and trade linkages, and climate adaptation challenges. The Barbadian economy remained highly exposed, very concentrated and increasingly vulnerable to external economic shocks, including the COVID-19 pandemic, causing its economic output to decline by nearly 18 per cent in 2020, with many jobs lost. In response, the subprogramme designed a comprehensive set of activities aimed at assisting Barbados to promote economic diversification, regional integration and sustained recovery, through the provision and formulation of targeted policy and strategy recommendations and through the building of its institutional capacity to strengthen formulation capabilities. The activities also included harnessing the opportunities arising from regional and broader South-South cooperation, including the sharing of project experiences and outcomes during the Global South-South Development Expo and at a side event of the Group of 20 Development Working Group.
- 12.26 Progress towards the objective is presented in the performance measure below (see table 12.2).

Table 12.2

Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
A comprehensive set of activities based on the assessment of needs and challenges made available to Barbados	Three draft policy papers made available to Barbados as inputs for a comprehensive project strategies report	Draft policy strategy report made available for the consideration of Barbados, with a view to promoting its economic diversification Best practices and knowledge from the project shared between small island developing States

Planned results for 2024

Result 1: advancement of analysis and policy proposals for monitoring the debt situation of developing countries

Programme performance in 2022 and target for 2024

- 12.27 The subprogramme's work contributed to the diminishment of risk and severity of debt issues in 30 developing countries through the strengthening of their debt management capacity, and by providing technical assistance to debt offices, increasing the transparency of debt records and providing analysis of debt issues and necessary policies to improve their external sustainability, which met the planned target.
- 12.28 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 12.3).

Table 12.3
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Debt issues and policy measures are advanced through proposals and initiatives by representatives of developing countries, including through a global initiative on debt relief for developing countries proposed by the Prime Minister of Pakistan based on the subprogramme's work as presented in the <i>Trade and Development Report 2020</i>	Debt issues are further advanced in the Second Committee through the analysis of current debt positions of developing countries and the formulations of proposals for improving their debt sustainability	Diminished risk and severity of debt issues in 30 developing countries through strengthened debt management capacity Debt issues advanced at the thirteenth session of the International Debt Management Conference, with the participation of 472 representatives from over 85 countries Policy proposals for advancing debt issues (see A/77/206) are considered by the General Assembly	Thirty developing countries benefit from assessment of their debt management capacity	Debt issues and policy measures are advanced through proposals and initiatives by representatives of developing countries, and 30 developing countries continue to build their debt management capacity

Result 2: increased agility in providing evidence-based and data-driven analysis to implement the 2030 Agenda for all, reflecting the challenges of member States

Programme performance in 2022 and target for 2024

- 12.29 The subprogramme's work contributed to 188 member States benefiting from access to data through *SDG Pulse* and 63 per cent of the content in *SDG Pulse* being dynamic content with changing focus, which exceeded the planned target of 185 member States and 62 per cent.
- 12.30 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 12.I).

Figure 12.I
Performance measure: number of member States benefiting from the agile *SDG Pulse* with dynamic content, including on new data on Sustainable Development Goal indicators

Result 3: developing countries are equipped with policy proposals and measures to develop sustainable industrialization strategies to establish more resilient economies

Proposed programme plan for 2024

- 12.31 The majority of low- and middle-income economies still display undiversified economies and are specialized in relatively low value-added tasks along global value chains, and many among them have embarked on premature deindustrialization. These economies are also particularly exposed to the hazards of global warming. Reconciling industrialization and development objectives with the imperative of sustainable production is therefore inextricable, as recognized in the framework of the Sustainable Development Goals. The subprogramme aims to assist developing countries in their efforts towards sustainable energy and industrial production, focusing, inter alia, on how value chains and biodiversity can be turned into a lever of economic diversification and industrialization.

Lessons learned and planned change

- 12.32 The lessons for the subprogramme from analogous activities on regional economic integration and industrial policy coordination deployed in several developing economies are that: (a) capacity-building activities on the design of industrial policy should be preceded by consensus generation and full ownership of the beneficiary countries at the domestic and regional levels; and (b) it is important to foster the dialogue between the private and the public sector and not only among different governments, starting from the early stages of the project. The timeline and the design of the activities planned for the coming years have fully taken these lessons into consideration. On the basis of the experience gained through the activities deployed in Southern Africa to foster diversification and structural transformation, the subprogramme will: (a) assist governments in designing and implementing a wide range of sustainable industrial policies, including research and development support, skills development programmes and the promotion of low-carbon and low-emission industrial clusters; and (b) adopt a regional perspective and favour the development of regional industrial ecosystems and regional value chains around low-carbon technologies in the various developing areas of the world. The subprogramme will start its activities in Latin America in the second half of 2023 but aims to extend its operations to other developing regions.
- 12.33 Expected progress towards the objective is presented in the performance measure below (see table 12.4).

Table 12.4
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Consultations with an array of stakeholders on launching UNCTAD work on sustainable industrialization	Member States have access to a vast array of sustainable industrial policy options and ideas to mobilize resources to finance sustainable industrialization through the UNCTAD Division on Globalization and Development Strategies publication entitled “South-South cooperation for climate adaptation and sustainable development”	Identification of priority sustainable value chains in at least three countries in Latin America	Consensus reached by a subgroup of Latin American countries on priority industrial policy measures to deploy at the regional level and at the domestic level to favour the development of sustainable regional value chains

Deliverables

18. On macroeconomic, development, financing and debt, structural transformation and South-South cooperation issues	5	4	5	4
19. Debt Management and Financial Analysis System documentation and software	3	3	4	3
C. Substantive deliverables				
Consultation, advice and advocacy: policy advice to policymakers, including on domestic resource mobilization, structural transformation, growth policy (Group of 20), debt renegotiation at the Paris Club, financial instability and debt sustainability.				
Databases and substantive digital materials: UNCTAD financial database; world economic macro-level modellers database; financial stress and debt sustainability indicators.				
D. Communication deliverables				
Outreach programmes, special events and information materials: lectures and presentations on external debt, development finance and macroeconomic and development policy issues; newsletters and brochures on the Debt Management and Financial Analysis System and the Virtual Institute.				
External and media relations: press releases, press conferences and interviews, including on developing country debt and external financing, South-South cooperation and regional integration and assistance to the Palestinian people.				
Digital platforms and multimedia content: Debt Management and Financial Analysis System; Virtual Institute.				

Subprogramme 2 Investment and enterprise

Objective

- 12.35 The objective, to which this subprogramme contributes, is to advance inclusive growth and sustainable development through investment and enterprise development for productive capacity-building, economic diversification and job creation.

Strategy

- 12.36 To contribute to the objective, the subprogramme will:
- (a) Assist member States through research, policy analysis and technical assistance in designing and implementing policies to scale up mobilization of public and private finance and enhanced investment and entrepreneurship for sustainable development;
 - (b) Monitor, assess and analyse regional and global trends and prospects in international investment and prepare the annual *World Investment Report* and other analytical publications on international investment for development;
 - (c) Conduct reviews of national investment policies and backstop policy dialogue on the international investment agreement regime and support and design new international investment agreements that are better aligned with nationally and internationally agreed development objectives;
 - (d) Provide policy advice to Governments on investment promotion, business facilitation and innovative financing for the Sustainable Development Goals, including through stock exchanges and institutional funds, as well as on incentives in the context of the global tax reform implications for developing countries;
 - (e) Contribute to the enhancement of the international competitiveness of member States' enterprises through advice on policies aimed at stimulating enterprise development, including mobilizing global efforts in financing and investment in micro-, small and medium-sized enterprises to support their sustainable development transformation, as well as by promoting best practices in corporate social responsibility, accounting and sustainability reporting;
 - (f) Foster dialogue and an exchange of best practices related to investment and enterprise development issues through consensus-building mechanisms and the World Investment Forum;
 - (g) Provide an assessment of the cascading impact of the armed conflict in Ukraine, the COVID-19 pandemic, climate change and cost-of-living increases on investment, global value chains and enterprise development, as well as policy advice, frameworks and tools for recovery;
 - (h) Through the above-mentioned work, help member States to make progress towards achieving Goals 1, 4, 5, 8, 9, 10, 12, 13, 16 and 17.
- 12.37 The above-mentioned work is expected to result in:
- (a) Increased capacity of developing countries to close the gaps related to Sustainable Development Goal investment, especially with regard to climate change mitigation and adaptation, in particular for countries that are most vulnerable to the adverse impact of climate change;
 - (b) Improved ability of countries to address key and emerging issues related to investment and investment policies that promote development, including on international investment agreements and their development dimension;
 - (c) Increased capacity of member States to collect, analyse and report on foreign direct investment and multinational enterprise data and formulate development-oriented investment policies;
 - (d) Additional resources leveraged and channelled towards global investment development objectives and addressing concerns pertaining to entities using the Goals to market their positive contribution to some Goals without making a meaningful contribution to sustainable development, including to the achievement of the Goals, or having a negative impact on others, also referred to as "SDG washing";
 - (e) Enhanced understanding by member States and other development stakeholders of enterprise development issues and ability to boost productive capacity, including through assistance to

attract investment capital, grow business linkages with multinational enterprises and participate in global and regional value chains;

- (f) Increased awareness of member States of policies, innovations and tools aimed at gaining traction and driving investment for sustainable development;
- (g) Mitigation of the effect of the COVID-19 pandemic on the ability of member States to attract and benefit from investment for development and in fostering private sector recovery.

Programme performance in 2022

Strengthened sustainability reporting to enable responsible and sustainable investment

12.38 The private sector plays a critical role in the implementation of the 2030 Agenda and there is a need to be able to assess these efforts in a consistent manner through high-quality, comparable and reliable sustainability disclosures. The subprogramme supports member States, in particular developing countries, to fully implement international sustainability reporting requirements in order to be able to promote sustainable finance and attract investment. Moreover, the Intergovernmental Working Group of Experts on International Standards of Accounting and Reporting, which reports to the UNCTAD Commission on Investment, Technology and Related Financial Issues, is committed to working with member States to strengthen sustainability reporting. To do this, the subprogramme created regional partnerships in Africa and in Latin America to guarantee long-lasting support to countries and provide a communication channel among peers, for sharing experience and good practices, to support member States to develop national strategies and policies for the reinforcement of the national infrastructure for high-quality sustainability reporting and to facilitate the measurement of the contribution of the private sector to the Sustainable Development Goals. The partnerships brought together stakeholders in the field of sustainability reporting, including government entities, regulators, national financial reporting standard setters, professional accounting and auditing organizations, stock exchanges and academia. Countries shared tools, experiences and best practices and discussed the latest trends and knowledge on sustainability reporting, facilitating consistency and harmonization across the regions.

12.39 Progress towards the objective is presented in the performance measure below (see figure 12.II).

Figure 12.II
Performance measure: number of member States upgrading their national sustainability reporting infrastructure (cumulative)

Planned results for 2024

Result 1: investment and enterprise development for recovery and resilience

Programme performance in 2022 and target for 2024

- 12.40 The subprogramme’s work contributed to 401 stakeholders integrating UNCTAD tools related to investment for sustainable development into their activities, which exceeded the planned target of 392 stakeholders.
- 12.41 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 12.III).

Figure 12.III

Performance measure: number of stakeholders integrating United Nations Conference on Trade and Development tools related to investment for sustainable development developed by the subprogramme into their activities (cumulative)

Result 2: reignited investment policies in support of member States’ COVID-19 recovery and sustainable development

Programme performance in 2022 and target for 2024

- 12.42 The subprogramme’s work contributed to 81 per cent of recommendations emanating from the UNCTAD investment policy framework in support to COVID-19 recovery and sustainable development implemented by member States (including pertaining to national and international investment policies and enterprise development policies stemming from the micro-, small and medium-sized enterprises surge project), which exceeded the planned target of 80 per cent.
- 12.43 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 12.IV).

Figure 12.IV

Performance measure: percentage of beneficiaries that have implemented recommendations emanating from the United Nations Conference on Trade and Development investment policy framework in support to COVID-19 recovery and sustainable development (cumulative)

Result 3: investment financing strategies and tools to decouple economic growth from environmental degradation

Proposed programme plan for 2024

- 12.44 There remains a significant financing gap in climate change mitigation and adaptation. Investments in adaptation to climate change continue to lag behind mitigation measures, with the renewable and low-emission energy and electricity sectors alone accounting for 60 per cent of climate change investment measures adopted worldwide in the past decade. However, the rate of investment growth remains insufficient to bridge the financing gap and is unevenly distributed among developed and developing countries. The subprogramme has been supporting member States to identify best practices in investment policies for climate change mitigation and adaptation and monitors related progress.

Lessons learned and planned change

- 12.45 The lesson for the subprogramme was that targeted strategies for attracting investment in sectors other than renewable energy and electricity are equally important, and financing strategies towards climate change adaptation and mitigation need to be developed, particularly in developing countries. In applying the lesson, the subprogramme will develop and promote new strategies and tools, such as enabling policy frameworks, public-private partnerships, pipelines of bankable and impactful projects, and initiatives to de-risk foreign direct investment in climate change adaptation and mitigation.
- 12.46 Expected progress towards the objective is presented in the performance measure below (see figure 12.V).

Figure 12.V

Performance measure: number of member States adopting United Nations Conference on Trade and Development investment financing strategies and tools in support of the attainment of the climate and environmental goals of the 2030 Agenda (cumulative)

Deliverables

12.47 Table 12.6 lists all deliverables of the subprogramme.

Table 12.6

Subprogramme 2: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	8	14	8	9
Reports of:				
1. The Secretary-General to the General Assembly on investment and entrepreneurship for sustainable development	1	2	1	2
2. The Trade and Development Board on investment for development	1	2	1	1
3. The Investment, Enterprise and Development Commission and related expert meetings	4	6	4	4
4. The Intergovernmental Working Group of Experts on International Standards of Accounting and Reporting	2	4	2	2
Substantive services for meetings (number of three-hour meetings)	24	27	42	22
Meetings of:				
5. The Trade and Development Board	2	4	2	2
6. The Working Party on the Programme Plan and Programme Performance	2	3	2	2
7. The Investment, Enterprise and Development Commission and related expert meetings	14	14	12	12
8. The Intergovernmental Working Group of Experts on International Standards of Accounting and Reporting	6	6	6	6
9. The World Investment Forum	–	–	20	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	60	78	68	72
10. On regional investment issues analysis	3	4	3	3

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
11. On investment policy reviews	8	8	8	8
12. On policy options in investment for development	–	–	5	5
13. On special economic zones, including piloting Sustainable Development Goals model zones	2	2	2	2
14. On international investment regimes	8	8	10	10
15. On investment promotion and facilitation, including strengthening investment promotion agencies	3	3	3	3
16. On intellectual property rights for development	1	1	1	1
17. On investment guides	2	4	3	3
18. On business facilitation initiatives	10	12	10	10
19. On enterprise development initiatives, including micro-, small and medium-sized enterprise financing and business linkages	3	4	3	3
20. On the Entrepreneurship Development Programme (EMPRETEC)	6	18	6	10
21. On accounting and reporting	3	4	3	3
22. On the contribution of foreign direct investment to inclusive growth and the Sustainable Development Goals, including on climate change mitigation and adaptation for least developed countries, landlocked developing countries and small island developing States	5	6	5	5
23. On institutional investors	2	1	2	2
24. On family businesses	2	1	2	2
25. On responsible investment	2	2	2	2
Seminars, workshops and training events (number of days)	107	308	136	200
26. Seminars on foreign direct investment, its development dimension and the themes of the <i>World Investment Report</i>	6	14	12	12
27. Training events on best practices in national and international policies related to investment, including on taxation related to investment policy	4	4	4	5
28. Training events on investment policy reviews, follow-up and investment facilitation enhancement (national)	14	17	14	14
29. Training events on international investment statistics and survey methodologies	5	5	5	6
30. Ad hoc expert discussions on key issues in investment for development, including concerns of “greenwashing” and “SDG-washing” ^a	3	3	3	3
31. Training events on investment promotion and facilitation for policymakers, investment promotion officials and diplomats	10	45	10	30
32. Training events on the negotiation, implementation and reform of international investment agreements	15	22	15	15
33. Ad hoc expert discussions on investment policies for sustainable development	4	6	4	4
34. Training workshops on intellectual property for development	10	10	10	10
35. Training workshops on enterprise development policies	16	79	15	46
36. Training seminars on accounting and sustainability reporting	6	19	12	12
37. Workshops and seminars on responsible investment issues	4	68	20	30
38. Ad hoc expert discussions on the development of small and medium-sized enterprises and start-ups	6	11	6	6
39. Seminars on institutional investors and sustainable development	2	3	3	4
40. Ad hoc expert discussions on family businesses	2	2	3	3

53. On enterprise development and entrepreneurship policy support	1	2	1	2
54. On ambassadors round table	1	–	–	–

C. Substantive deliverables

Consultation, advice and advocacy: policy advice to developing countries, including on policies to attract foreign direct investment; advice on statistics and international investment, including responsible investment; advice to all member States, upon request, on national policies and international investment agreements and sustainable development, as well as investment promotion and facilitation, intellectual property rights, entrepreneurship and enterprise development and business facilitation, with a focus on those in the most vulnerable situation, and on accounting and reporting standards; and advocacy and advisory services to some 200 investment promotion agencies, over 5,000 special economic zones and other stakeholders in the global investment chain and some 50 EMPRETEC centres.

Databases and substantive digital materials: databases on foreign direct investment, national policies, international investment agreements and related databases; and sustainable finance and gender equality databases.

D. Communication deliverables

External and media relations: International Standards of Accounting and Reporting updates, electronic EMPRETEC newsletters for more than 2,000 subscribers and newsletters, booklets and newsflashes on responsible investment; World Investment Forum report for more than 8,000 recipients.

Digital platforms and multimedia content: Global Enterprise Registration portal; Investment Policy Hub; other digital platforms pertaining to investment and enterprise for development.

^a The terms “green-washing” and “SDG-washing” refer to products and strategies presented as sustainable without making a meaningful contribution to sustainable development, including the achievement of the Sustainable Development Goals.

Subprogramme 3 International trade and commodities

Objective

- 12.48 The objective, to which this subprogramme contributes, is to ensure that international trade and commodities enable the economic diversification, sustainable and resilient economy and multilateralism transformations needed to create a more inclusive, resilient, sustainable and prosperous world through the participation of all member States.

Strategy

- 12.49 To contribute to the objective, the subprogramme will:
- (a) Support developing countries in fostering structural transformation through economic diversification;
 - (b) Promote and support developing countries' transformation towards a more sustainable and more resilient economy;
 - (c) Work to enhance the participation of developing countries in the multilateral and regional trading systems, ensuring that developing countries' participation in trade in goods and services works as a driver for inclusive and sustainable development;
 - (d) Support the adoption of, improvement in and enforcement of national and regional competition and consumer protection legislation, through best practices, guidelines and peer reviews;
 - (e) Strengthen the capacity of trade policymakers to make well-informed policy decisions through improved understanding of and transparency in international trade and trade policy trends and trade-related regulations, and build private sector capacities to cope with policy and market requirements;
 - (f) Foster the mainstreaming of gender equality into trade policies, strengthening the capacity of member States to design and implement trade policies that allow women to benefit more from the opportunities arising from international trade;
 - (g) Contribute to research on international trade as an engine for development in the report of the Inter-Agency Task Force on Financing for Development, *The Sustainable Development Goals Report*, *World Tariff Profiles* and *World Economic Situation and Prospects*;
 - (h) Monitor and report on current trade trends and policies, including the recovery from the COVID-19 pandemic, and their impact on competition, consumer protection and the creative economy to provide policy recommendations to member States;
 - (i) Examine the effects of climate change in terms of trade on developing countries, and how environmental sustainability can promote global trade and inclusive development, including how international trade and trade policy can facilitate the global energy transition and can support the competitiveness of developing countries in the production and trade of renewable and low-emission energy;
 - (j) Through the above-mentioned work, help member States to make progress towards achieving Sustainable Development Goals 1, 2, 3, 5, 7, 8, 9, 12, 13, 14 and 17.
- 12.50 The above-mentioned work is expected to result in:
- (a) Mitigation of the effects of the COVID-19 pandemic, the cost-of-living increase and ongoing environmental degradation on the ability of member States to benefit from international trade and foster the recovery of the trade sectors;
 - (b) Improved capacity of member States to design and implement trade-policy responses to the climate change threat from a development perspective;
 - (c) Improved capacity of member States to identify and address the trade barriers and supply-side obstacles that disproportionately affect women and girls;
 - (d) Continued work on the impact of non-tariff measures on trade relations, market access, investment and transit, and thus their development implications and impact on the well-being of the population of affected countries, including through the strengthening of its cooperation on the topic with other relevant partners, as well as through participation in the Multi-Agency Support Team on the non-tariff measures database;

- (e) Member States achieving positive development outcomes in relation to increased trade integration and activity;
- (f) Improved capacity of member States to seize opportunities emerging from commodity trade and enhanced international and regional cooperation;
- (g) Member States’ increased adoption, revision and/or effective implementation of competition and consumer protection legislation and institutional frameworks;
- (h) Member States harnessing opportunities related to trade in environmentally sustainable products, and increasing capacities to assess the economic potential of ocean-based sectors and devise integrated sustainable use and trade action plans;
- (i) Member States creating an enabling environment for the promotion of services and the creative economy to leapfrog into new, high-growth sectors of the world economy;
- (j) Member States being well informed about recent trends in trade through regular publications, including the “Global trade update” and those on trends in international trade and trade policy, as well as relevant research topics, such as global value chain development.

Programme performance in 2022

Enhanced integration of landlocked commodity-dependent developing countries into regional and global value chains

12.51 Integration into regional trade areas and active use of trade policy by the authorities of landlocked developing countries is a tool that could help to reduce the negative effect of geography in those countries. The subprogramme has been implementing a range of activities to improve agricultural value chains of beneficiary countries, namely, meat for Mongolia, maize for the Lao People’s Democratic Republic, roasted coffee for Ethiopia and dried fruits for Uzbekistan: all agricultural products with current or potential linkages to regional and global value chains that could be fostered. In the context of those efforts, the subprogramme conducted targeted overseas market analysis and research, facilitated discussions on commercial quality standards that apply in different overseas markets and policy implications with stakeholders, and implemented support and capacity-building activities.

12.52 Progress towards the objective is presented in the performance measure below (see table 12.7).

Table 12.7
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Four landlocked developing countries (Ethiopia, the Lao People’s Democratic Republic, Mongolia and Uzbekistan) identified relevant agricultural sectors for value chain analysis	Ethiopia, the Lao People’s Democratic Republic, Mongolia and Uzbekistan increased their capacity to systematically collect data for quantitative and qualitative analysis based on national surveys of agricultural value chains for export	The Lao People’s Democratic Republic integrated recommendations on the maize value chain into its agriculture development strategy and Mongolia adopted a meat road map aimed at increasing the share of higher quality meat products in its traditional exports to boost value-added exports

Planned results for 2024

Result 1: tearing down trade barriers – transparent and streamlined regulations for sustainable development

Programme performance in 2022 and target for 2024

- 12.53 The subprogramme’s work contributed to increased use of the information published on non-tariff measures on trade portals, including through the newly-launched dissemination tool “TRAINS Online”, with a total of 23,784 users registered, which exceeded the planned target of increased information use, with at least 2,000 additional users registered (16,500 in total).
- 12.54 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 12.8).

Table 12.8

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Increased use of the information published on non-tariff measures on trade portals, with 13,000 total users registered	Increased use of the information published on non-tariff measures on trade portals, with 17,530 total users registered	Increased use of the information published on non-tariff measures on trade portals, with 23,784 total users registered	Increased use of the information published on non-tariff measures on trade portals, with at least 22,000 users registered	Increased use of the information published on non-tariff measures on trade portals, with at least 26,000 users registered

Result 2: integrated climate change dimension into the implementation of the African Continental Free Trade Area agreement at the national level

Programme performance in 2022 and target for 2024

- 12.55 The subprogramme’s work contributed to detailed value chain analysis being made available to member States, with 10 African countries selecting competitive intraregional and continental sustainable value chains to be developed, which exceeded the planned target of detailed value chain analysis made available to member States.
- 12.56 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 12.9).

Table 12.9

Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Twelve African countries supported by the subprogramme in the implementation of African Continental Free Trade Area annex on non-tariff barriers, and increase in regulatory transparency	The subprogramme identified several opportunities in the Agreement Establishing the African Continental Free Trade Area and relevant implementing protocols that have the potential to add the sustainability	Detailed value chain analysis made available to member States, with 10 African countries selecting priority sectors for the development of competitive intraregional and continental	Ten African countries develop sustainable African Continental Free Trade Area implementation strategies and at least two regional sustainable value chains through collaboration with other countries in	Ten African countries adopt sustainable value chain development plans as part of their African Continental Free Trade Area implementation strategies

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
	perspective of the African Continental Free Trade Area and boost BioTrade, and presented the African countries with options on how they can enhance the resilience of their trade to climate change through economic diversification and adaptation actions	sustainable value chains	their respective regions	

Result 3: enhanced policymaking to facilitate economic diversification through increased data capacities in services trade

Proposed programme plan for 2024

12.57 Services accounted for 68 per cent of global output in 2020 and represented 62 per cent of all jobs.¹ Importantly, services improve value addition in other economic sectors, promote employment and facilitate trade in manufacturing and agriculture. However, there are challenges in identifying and addressing the services-related needs of the domestic economy and translating them into policies, as well as benefiting from the liberalization of trade in services in both home and foreign markets. The subprogramme has been supporting member States to address these challenges and build up their supply and export capacity through evidence-based policymaking, particularly policy-oriented research and services policy reviews, as well as facilitating global dialogues through the Multi-year Expert Meeting on Trade, Services and Development and the Global Services Forum.

Lessons learned and planned change

12.58 The lesson for the subprogramme was that there was a need to strengthen coordination and capacity development for closing the gaps in data collection and use, with data gaps having an impact on policymaking across all sectors of services trade, especially in developing countries. In applying the lesson, and building on the establishment of a working group on data for services trade and development policies, the subprogramme will identify data gaps and strengthen mechanisms for sharing information on tools and resources. Furthermore, the subprogramme will focus on enhancing the capacity of services trade policymakers to improve regulatory and institutional frameworks, and in particular to improve their capacity to collect and use data in support of policymaking, including disaggregated data.

12.59 Expected progress towards the objective is presented in the performance measure below (see table 12.10).

¹ UNCTAD, “Output and income”, UNCTADstat database. Available at <https://unctadstat.unctad.org/wds/ReportFolders/reportFolders.aspx>; and ILO, “Employment by sex and economic activity” data set, ILO modelled estimates, ILOSTAT database. Available at <https://ilostat.ilo.org/>.

Table 12.10
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Policymakers from the Economic Community of West African States (ECOWAS) region have increased capacities to formulate national services trade policies in, inter alia, tourism and energy services	Policymakers from Morocco and Paraguay have increased capacities to formulate national services trade policies in, inter alia, transport and logistics services	Member States benefit from the establishment an open-ended and time-bound working group on data for services trade and development policies	At least two additional countries adopt, revise or implement services trade-related policies informed by better data collection and use	At least three additional countries adopt, revise or implement services trade-related policies informed by better data collection and use

Deliverables

12.60 Table 12.11 lists all deliverables of the subprogramme.

Table 12.11

40. United Nations Forum on Sustainability Standards	1	1	–	1
41. On topics in international trade negotiations	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: advice on trade-related decision-making to five member States and two regional South-South economic integration groupings; advice on integration into the global economy and participation in regional and multilateral trade agreements; advice on integration of trade concerns into national trade and services policies; consultation on cooperation and partnerships for inclusive growth and sustainable development; advice on trade and a gender perspective; advice on developing competition and consumer protection frameworks; consultation on trade and environment issues and creative economy potential for sustainable development.

Databases and substantive digital materials: World Integrated Trade Solution and Trade Analysis and Information System; online training courses on non-tariff measures for approximately 300 people and on negotiating regional trade agreements for trade in times of crisis and pandemic; a teaching package on trade and a gender perspective.

D. Communication deliverables

Outreach programmes, special events and information materials: multi-stakeholder meeting on commodities and development; BioTrade Congress; event on trade and a gender perspective; event on illicit trade for more than 100 people; event on the creative economy; lectures and exhibits on issues related to the work of the subprogramme; newsletters on the Generalized System of Preferences and on UNCTAD work on competition and consumer protection; brochures and flyers on trade and a gender perspective and on commodity policy research and implementation and projects; booklets and fact sheets related to the work of the subprogramme.

External and media relations: press releases and op-ed pieces.

Digital platforms and multimedia content: interactive tools related to national competition and consumer protection laws, commercial diplomacy and dispute settlement; UNCTAD, WTO and ITC website on trade-related Sustainable Development Goals and indicators; electronic version of the model law on competition.

Subprogramme 4 Technology and logistics

Objective

- 12.61 The objective, to which this subprogramme contributes, is to harness innovation and technology, including e-commerce and the digital economy, improve trade logistics and increase human capacities for inclusive and sustainable trade and development in developing countries and economies in transition.

Strategy

- 12.62 To contribute to the objective, the subprogramme will:
- (a) Identify and disseminate policy options, good practices and lessons learned in the areas of technology and logistics to accelerate the recovery from the COVID-19 pandemic and promote resilient and sustainable development;
 - (b) Provide research and analysis and policy recommendations for capturing value in the digital economy and generating more inclusive outcomes, including through the flagship publication *Digital Economy Report*, and support developing countries in measuring e-commerce and the digital economy;

- (c) Ensure that the interests of developing countries are identified and integrated into international policy dialogues on e-commerce and the digital economy, including through the Intergovernmental Group of Experts on E-commerce and the Digital Economy and the annual E-commerce Week;
- (d) Assist developing countries in systematically assessing the state of play and readiness to engage and integrate into the digital economy, through eTrade Readiness Assessments and implementation support, e-commerce strategies and action plans, as well as by supporting the improvement of legal frameworks and helping women's participation in e-commerce and the digital economy;
- (e) Ensure that international debates on science, technology and innovation incorporate the perspectives and priorities of developing countries through the Commission on Science and Technology for Development and the Technology Facilitation Mechanism, among others;
- (f) Inform policies and deliberations on science, technology and innovation for development, especially on frontier technologies, through research and analysis, such as the flagship publication *Technology and Innovation Report* and other reports analysing policy options, including for the Inter-Agency Task Force on Financing for Development;
- (g) Develop knowledge of policymakers on various aspects of trade policies and interrelated issues of finance, investment and technology and sustainable development, and build capacities of member States in science, technology and innovation for development, including through science, technology and innovation policy reviews, technology assessment and foresight exercises and specific contributions to the work of the United Nations inter-agency task team on science, technology and innovation for the Sustainable Development Goals;
- (h) Support implementation of trade facilitation reforms, in particular the WTO Agreement on Trade Facilitation, and enhance its support for the development and the implementation of appropriate legal and regulatory frameworks that reduce trade transaction costs, as well as supporting trade facilitation reforms and automation through the Automated System for Customs Data;
- (i) Provide technical assistance, data and policy recommendations and promote the sharing of best practices on the integration of developing countries into regional and global supply chains and transport networks, through the flagship publication *Review of Maritime Transport* and other research products, legislative frameworks and capacity-building, including the Training Development in the Field of International Trade (TrainForTrade) programme on port management;
- (j) Foster international policy dialogue on trade logistics issues, ensuring that the interests and specific challenges facing developing countries are addressed in relevant regional and international forums, and in this context continue to address specific trade logistics challenges affecting small island developing States and landlocked developing countries;
- (k) Mainstream the cross-cutting issue of gender equality and the empowerment of women and girls across the three pillars of the subprogramme, with a special focus on enhancing their economic and digital skills and opportunities.

12.63 The above-mentioned work is expected to result in:

- (a) Increased understanding by member States of policy options to accelerate the recovery from the COVID-19 pandemic and other shocks, in the areas of technology and trade logistics;
- (b) Improved capacity and policy formulation at the national, regional and global levels on e-commerce and digital economy for sustainable and inclusive development;
- (c) Improved coordination among Governments, together with development partners, civil society and the private sector, to implement policies on e-commerce and the digital economy that work for sustainable and inclusive development;

- (d) Improved knowledge and understanding of policy options by policymakers and international consensus on emerging challenges and opportunities in science, technology and innovation for sustainable and inclusive development, as well as increased capacity of policymakers to assess, analyse and formulate policies on key issues on the international economic agenda;
- (e) Implementation of the outcomes of the World Summit on the Information Society and of the Technology Facilitation Mechanism;
- (f) Increased capacities of member States to harness science, technology and innovation for their national development strategies;
- (g) Improved ability of countries to address key and emerging issues in trade logistics, including maritime transport policies and port management;
- (h) Improved knowledge and capacity of member States to implement trade facilitation reforms, including the WTO Agreement on Trade Facilitation;
- (i) Enhanced capacity of member States to design and implement policies and action aimed at improving the efficiency of trade transactions, as well as the management of transport operations, including through the Automated System for Customs Data programme.

Programme performance in 2022

Enhanced sustainability of trade facilitation initiatives through digital solutions

- 12.64 Through its Empowerment Programme for National Trade Facilitation Committees, the subprogramme supports developing countries' trade facilitation reforms and their implementation of the WTO Agreement on Trade Facilitation to simplify and expedite procedures for cross-border trade, including through the establishment of national trade facilitation committees to improve domestic coordination and monitor the implementation of trade facilitation measures. In response to travel restrictions and exacerbated needs to facilitate the rapid movement of essential goods owing to the pandemic, the subprogramme digitalized its Empowerment Programme, rolling out an e-learning course on trade facilitation, which benefited 45 countries, and developed the "reform tracker", a web-based platform designed to manage and monitor reforms and ease the coordination between stakeholders of national trade facilitation committees that has been adopted by 19 countries across Africa, Asia and Latin America, empowering them to better track, monitor and manage their trade facilitation initiatives. Finally, the subprogramme's digitalization efforts also included trade information portals, which are websites that provide easy access to information about a country's regulations and procedures to traders, thus supporting them with completing trade-related requirements and formalities.
- 12.65 Progress towards the objective is presented in the performance measure below (see figure 12.VI).

Figure 12.VI
Performance measure: implementation rates of commitments under the Agreement on Trade Facilitation across beneficiary countries that adopted the United Nations Conference on Trade and Development reform tracker

(Average percentage)

Planned results for 2024

Result 1: women digital entrepreneurs empowered to build a more inclusive digital economy

Programme performance in 2022 and target for 2024

12.66 The subprogramme’s work contributed to the improved business and leadership skills of a cumulative total of 240 women digital entrepreneurs participating in eTrade for Women activities throughout six active eTrade for Women communities, which exceeded the planned target of 200 women digital entrepreneurs.

12.67 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 12.12).

Table 12.12
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Improved business and leadership skills of 50 women digital entrepreneurs participating in eTrade for Women activities	Improved business and leadership skills of a cumulative total of 200 women digital entrepreneurs participating in eTrade for Women activities and three new communities established, in South-East Asia, East Africa and the Western Balkans	Improved business and leadership skills of a cumulative total of 240 women digital entrepreneurs participating in eTrade for Women activities throughout six active eTrade for Women communities	Improved business and leadership skills of a cumulative total of 300 women digital entrepreneurs participating in eTrade for Women activities At least four eTrade for Women communities active across regions	Improved business and leadership skills of a cumulative total of 400 women digital entrepreneurs participating in eTrade for Women activities At least six eTrade for Women communities active across regions

Result 2: simplified trade procedures through the Automated System for Customs Data Single Window

Programme performance in 2022 and target for 2024

- 12.68 The subprogramme’s work contributed to six new border regulatory agencies and partner governmental agencies participating in and benefiting from the Automated System for Customs Data Single Window system, which met the planned target.
- 12.69 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 12.VII).

Figure 12.VII
Performance measure: number of new border regulatory agencies and partner governmental agencies participating in and benefiting from the Automated System for Customs Data Single Window system (cumulative)

Result 3: efficient and resilient port management in developing countries for their integration into regional and global supply chains

Proposed programme plan for 2024

- 12.70 Given that over 80 per cent of the volume of international trade is carried by ships, ports play a vital role in trade logistics. The TrainForTrade Port Management Programme supports port communities in developing countries in delivering more efficient and resilient port management in order to increase trade flows and foster economic development, by creating port networks and bringing together public, private and international entities. The pandemic exposed the need to enhance port resilience to such shocks. In responding to the needs of the member States, the subprogramme designed a new course on building port resilience against pandemics in 2020, as part of its wider Port Management Programme. The course focuses on building essential skills for port community managers to help to protect people and secure vital trade during pandemic situations and other disruptions that extend beyond pandemics. The course helped port practitioners to identify a number of concrete policy measures to implement in their ports for them to remain operational during the pandemic.²

Lessons learned and planned change

- 12.71 The lesson for the subprogramme was that while the priority measures to build port resilience were identified with the training participants, there was no mechanism in place to track the actual implementation and improvement in beneficiary ports. In applying the lesson, the subprogramme will conduct a survey that will monitor the adoption of the course’s policy recommendations and other actions related to resilience in participants’ port communities.

² See UNCTAD, “Emerging strategies for ports during the pandemic”, policy brief No. 93, February 2022.

12.72 Expected progress towards the objective is presented in the performance measure below (see table 12.13).

Table 12.13
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Member States have access to a new course on building port resilience against pandemics	Increased essential skills and capacities of 809 port practitioners from 96 port communities related to ports management during pandemics and disruptions	Increased essential skills and capacities of 1,000 port practitioners from 112 port communities related to ports management during pandemics and disruptions	At least five port entities adopt policy measures to improve resilience resulting from increased essential skills and capacities of 1,100 port practitioners from 120 port communities related to ports management during pandemics and disruptions	At least five additional port entities adopt policy measures to improve resilience resulting from increased essential skills and capacities of 1,200 port practitioners from 130 port communities related to ports management during pandemics and disruptions

Deliverables

12.73 Table 12.14 lists all deliverables of the subprogramme.

Table 12.14
Subprogramme 4: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	21	19	20	18
1. Reports to the General Assembly on the outcomes of the World Summit on the Information Society, and on science and technology for development	1	1	2	1
2. Reports to the Commission on Science and Technology for Development and its intersessional panels	6	6	6	5
3. Background notes and reports for the Trade and Development Board	2	2	2	2
4. Note by the UNCTAD secretariat and reports for the Investment, Enterprise and Development Commission and related expert meetings on issues related to science, technology and innovation	4	2	2	2
5. Note by the UNCTAD secretariat and reports for the Trade and Development Commission and related expert meetings	4	4	4	4
6. Note by the UNCTAD secretariat and reports for the Intergovernmental Group of Experts on E-commerce and the Digital Economy	2	2	2	2
7. Note by the UNCTAD secretariat and reports for the Working Group on Measuring E-commerce and the Digital Economy	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	49	51	55	47
8. Meetings of the General Assembly (Second Committee) and the Economic and Social Council on the follow-up to the World Summit on the Information Society	2	2	3	2

Part IV International cooperation for development

<i>Category and subcategory</i>	<i>2022 planned</i>	<i>2022 actual</i>	<i>2023 planned</i>	<i>2024 planned</i>
9. Annual session and intersessional expert panels of the Commission on Science and Technology for Development	16	14	16	16
10. Annual and executive sessions of the Trade and Development Board	3	3	3	3
11. Meetings of the Working Party on the Programme Plan and Programme Performance	2	2	2	2
12. Annual sessions of the Investment, Enterprise and Development Commission and related expert meetings	7	3	5	3
13. Annual sessions of the Trade and Development Commission and related expert meetings on transport, trade logistics and trade facilitation	7	7	7	7
14. Meetings of the Intergovernmental Group of Experts on E-commerce and the Digital Economy	6	6	6	6
15. Meetings of the Working Group on Measuring E-commerce and the Digital Economy	4	4	4	4
16. Multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals of the Technology Facilitation Mechanism (with the Department of Economic and Social Affairs of the Secretariat)	2	2	2	2
17. Meetings for E-commerce Week	–	8	6	1
18. Meetings of the global trade and transport facilitation forum	–	–	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	32	32	32	26
19. Training Development in the Field of International Trade (TrainForTrade) capacity-building programme: port management; issues related to trade, including e-commerce and statistics; and pedagogical methodology	7	7	7	1
20. National, regional and interregional projects on transport and related services, including the Automated System for Customs Data	22	22	22	22
21. Transport, trade facilitation and trade logistics	2	2	2	2
22. E-commerce and the digital economy programme	1	1	1	1
Seminars, workshops and training events (number of days)	404	464	406	398
23. Training events for trainers: TrainForTrade national delivery workshops	300	332	300	300
24. Seminars, workshops, fellowships and training events on transport, trade logistics and trade facilitation	52	52	52	33
25. Seminar on transport, trade logistics and trade facilitation, including ad hoc expert discussions	1	1	1	1
26. Seminar on the role of technology (including information and communications technology) and innovation in development, including for the operationalization of technology transfer, including ad hoc expert discussions	1	1	1	1
27. Seminars, workshops and training events on e-commerce and the digital economy for development, including on information economy statistics, economic, technical, legal and regulatory aspects of e-commerce and the digital economy for development and e-commerce, and measuring the digital economy and eTrade for Women	10	12	12	12
28. Training courses on key issues on the international economic agenda (paragraph 166 of the Bangkok Plan of Action), regional and short courses	25	51	25	36
29. Seminars, workshops and training events on science, technology and innovation and development	15	15	15	15

38. TrainForTrade <i>Port Management</i> series	1	1	1	1
39. eTrade Readiness Assessments	7	4	5	3
Technical materials (number of materials)	12	14	12	13
40. Policy briefs on the following topics: science, technology and innovation; e-commerce and the digital economy; and trade logistics	4	5	4	4
41. Automated System for Customs Data annual report	1	1	1	1
42. <i>Year in Review</i> of the e-commerce and the digital economy programme	1	1	1	1
43. Technical notes on information and communications technology (including e-commerce and the digital economy) for development	2	1	2	2
44. Technical notes on trade facilitation	1	1	1	1
45. Background notes for the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	1	1	1	1
46. Economic and maritime country profiles	1	1	1	1
47. Report of the UNCTAD Advisory Group on Strengthening Training Capacity and Human Resource Development	1	1	–	1
48. Technical note on science, technology and innovation for development	–	2	1	1

C. Substantive deliverables

Consultation, advice and advocacy: E-commerce Week; advisory services in the area of e-commerce and the digital economy; multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals; sessions of the UNCTAD Advisory Group on Strengthening Training Capacity and Human Resource Development; policy advice on science, technology and innovation policies for development and consultations on policy and practical aspects of e-commerce and the digital economy, transport policies and international legal instrument standards and rules related to the facilitation of international trade, transport and transport security for port operators and the eTrade for All initiative.

Databases and substantive digital materials: UNCTAD platform for learning and capacity-building managed by the TrainForTrade programme, which trains approximately 1,500 beneficiaries per year; port performance statistics platform; online repository on national trade facilitation committees; Global Cyberlaw Tracker; online e-learning modules for the courses on key issues on the international economic agenda, for 200 users annually; online platform for sustainable freight transport; eTrade for All online platform; digital economy statistics in the UNCTADstat database.

D. Communication deliverables

Outreach programmes, special events and information materials: newsletters on the Automated System for Customs Data and eTrade for All for more than 2,000 subscribers; transport and trade facilitation newsletter for more than 5,000 recipients; newsletter on science, technology and innovation; brochures, flyers and information kits on the work of the subprogramme.

External and media relations: press releases, press briefings, interviews, press conferences and news items related to the issuance of major publications under the subprogramme and the organization of important events.

Digital platforms and multimedia content: TrainForTrade; Commission on Science and Technology for Development; Automated System for Customs Data and paragraph 166 of the Bangkok Plan of Action website; eTrade for All platform; online platforms for innovation policy learning.

Subprogramme 5 Africa, least developed countries and special programmes

Objective

- 12.74 The objective, to which this subprogramme contributes, is to enhance the effective integration of Africa, the least developed countries and other groups of countries in special situations (landlocked

developing countries, small island developing States and other structurally weak, vulnerable and small economies) into the global economy through fostering sustainable structural transformation, reducing vulnerabilities and developing domestic productive capacities in the targeted groups.

Strategy

12.75 To contribute to the objective, the subprogramme will:

- (a) Carry out research and technical cooperation activities to diversify the export, productive and financing structures of the above-mentioned countries, including through contributions to reports of the Secretary-General to the General Assembly and the reports on the implementation and follow-up of relevant agendas and programmes of action;
- (b) Implement technical cooperation programmes to promote sustainable structural economic transformation through productive capacity-building, diversification and support aimed at addressing vulnerability and building resilience;
- (c) Advocate consensus in the international development community regarding the policy measures that best address the sustainable development problems of least developed countries, small island developing States and landlocked developing countries, including at the multilateral level, through the identification of new approaches and methodologies, training and capacity-building workshops, as well as greater interaction with research institutes in least developed countries and with development partners;
- (d) Strengthen efforts to provide domestic policy support and capacity-building to the targeted groups derived from its innovative research and analysis, development of analytical tools and technical support;
- (e) Increase the availability of strategic, evidence-based policy-based options aimed at enhancing domestic productive capacities and structural economic transformation for sustainable development in developing countries and facilitate their implementation through the development of demand-driven technical cooperation and programmatic support within its areas of expertise;
- (f) Provide support to the least developed countries, which are either in the process of graduation or recently graduated from the least developed country category, to ensure their graduation with momentum and a smooth transition towards their new status;
- (g) Broaden its country-based technical support to include aspects such as national strategies for the development of productive capacities and structural economic transformation, regional trade integration, rules of origin, inequality, poverty and vulnerability, enhanced market access and preference utilization, value addition in strategic products and geographical indications;
- (h) Support member States in addressing the socioeconomic impact of COVID-19 and future shocks on economies in target countries, through research work and technical cooperation, in order to facilitate specific, data-driven policy design and implementation aimed at building resilience;
- (i) Support African countries in addressing their special concerns and needs, including as articulated in the New Partnership for Africa's Development and in Agenda 2063: The Africa We Want;
- (j) Support implementation by UNCTAD of the signed memorandum of understanding with the African Continental Free Trade Area secretariat, most notably through research, technical cooperation and targeted policy advice in the targeted areas;
- (k) Complete the UNCTAD General Assembly-mandated vulnerability profiles for those least developed countries found pre-eligible for graduation;

- (l) Deliver training, capacity-building activities and ad hoc research on market access, trade preferences and rules of origin to support the WTO least developed countries group to identify and negotiate a common position for the relevant WTO committee meetings;
- (m) Through the above-mentioned work, help member States, in particular least developed countries and other groups of countries in special situations, to make progress towards the achievement of Sustainable Development Goals 9 and 17.

12.76 The above-mentioned work is expected to result in:

- (a) Greater understanding of the role of productive capacities in fostering structural transformation for inclusive growth and development in beneficiary countries;
- (b) Improved development policy formulation, implementation and monitoring capacities of member States, including capacities to account for current and future shocks, reduce exposure to external shocks and build resilience;
- (c) Improved development policy formulation and implementation capacities in countries with specific needs for more effective technical cooperation strategies;
- (d) Strengthened capacity of member States to implement the African Continental Free Trade Area;
- (e) Strengthened capacity of member States to participate in multilateral forums dedicated to enhanced trade through transparent, predictable and simple rules of origin;
- (f) Enhanced capacity of member States to develop and implement policies and programmes to deepen domestic and regional markets and accelerate industrialization and socioeconomic transformation.

Programme performance in 2022

Improved understanding of least developed countries on market access preferences and rules of origin

- 12.77 The subprogramme's work has been focused on increasing value added and enhancing market access opportunities for least developed countries through the development of innovative tools to track and measure trade preference utilization rates, rules of origin and related tariff schedules, including under the African Continental Free Trade Area. In this regard, UNCTAD has developed two public, user-friendly databases to provide detailed data (product-specific data up to six digits under the Harmonized Commodity Description and Coding System) on interrelated trade statistics, tariff offers and rules of origin under the Area³ as well as product-specific utilization rates for the Quad countries (Canada, the European Union, Japan and the United States of America) under the Generalized System of Preferences.⁴ Comprehensive technical assistance in the negotiation and drafting of the Area's rules of origin was provided to member States at the request of the African Union Commission. Trainings and research on market access, trade preferences and rules of origin were provided in support of least developed country group negotiations at WTO.
- 12.78 Progress towards the objective is presented in the performance measure below (see table 12.15).

³ See <https://afcfta.unctad.org>.

⁴ See <https://gsp.unctad.org>.

Table 12.15
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
Least developed countries have access to resource materials and handbooks on rules of origin and duty-free, quota-free market access	Enhanced capacity of representatives of least developed countries to understand the concepts and consequences of rules of origin for their trade potential through UNCTAD trainings Member State representatives are prepared to identify their trade priorities and articulate them in multilateral negotiating forums	Policymakers, researchers and trade negotiators in least developed countries, as well as a broader public, have access to detailed data on interrelated trade statistics, tariff offers and rules of origin under the African Continental Free Trade Area, as well as product-specific utilization rates under the Generalized System of Preferences, necessary to inform national evidence-based policymaking

Planned results for 2024

Result 1: improved participation of African countries in regional and global value chains

Programme performance in 2022 and target for 2024

- 12.79 The subprogramme’s work contributed to an estimated average annual increase of 7 per cent in exports between the three beneficiary countries (Benin, Burkina Faso and the Niger) from 2019 to 2021,⁵ which met the planned target.
- 12.80 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 12.16).

Table 12.16
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
Raising awareness among the beneficiary countries through the established interministerial working group to the benefits arising from implementation of the regional convention on transit (ECOWAS Convention relating to Inter-States Road Transit of Goods) and the WTO Agreement on Trade Facilitation	Assessment of the regional customs network for transit trade (SIGMAT) in Burkina Faso and the Niger and evaluation of cross-border performance in Malanville border post (between Benin and the Niger), and the subprogramme supported activities related to the road map for a functional inter-State transit	Estimated increase in the bilateral exports between the three beneficiary countries	Enhanced management of a joint border post among the three beneficiary countries (Benin, Burkina Faso and the Niger) and an enhanced understanding of the domestic reforms necessary for implementation of the regional convention on transit (ECOWAS Convention relating	From the experiences and lessons learned in the beneficiary countries, at least three additional African countries review their industrial policies and competitiveness strategies to diversify or improve their manufacturing and supply patterns

⁵ Data on exports between the three beneficiary countries for 2022 will be available after submission of the present report.

Section 12 Trade and development

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
	programme in the region		to Inter-States Road Transit of Goods and the WTO Agreement on Trade Facilitation	

Result 2: enhanced understanding of the challenges and opportunities to foster productive capacities and structural transformation in countries with special needs

Programme performance in 2022 and target for 2024

- 12.81 The subprogramme’s work contributed to the undertaking of national productive capacities gap assessments in six countries (Angola, Ethiopia, Haiti, Kenya, Nigeria and Zambia) and facilitated the design of policies aimed at closing the gaps in Angola and the United Republic of Tanzania, which exceeded the planned target of national productive capacities gap assessments undertaken for at least five countries and countries designing and validating policies and programmes to address the identified gaps and limitations to the building and use of the productive capacities index.
- 12.82 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 12.17).

Table 12.17
Performance measure

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Enhanced awareness by national and regional policymakers of the challenges and areas where productive capacities are lagging, with the support of the UNCTAD productive capacities index	The UNCTAD productive capacities index made available for all countries on a dedicated web portal, and the subprogramme developed a coherent structure for national and regional productive capacities gap assessments	National productive capacities gap assessments undertaken in six countries (Angola, Ethiopia, Haiti, Kenya, Nigeria and Zambia) Angola and the United Republic of Tanzania designed policies aimed at closing the productive capacity gaps at the domestic level, as indicated in their Common Country Assessments	National and regional productive capacities gap assessments are used as input to the General Assembly-mandated vulnerability profiles of those countries found eligible to leave the least developed country category for the first time	At least three countries have access to comprehensive and holistic multi-year support programmes to address productive capacity gaps and domestic priorities Improvement of the productive capacities of Angola and the United Republic of Tanzania in areas targeted by the designed policies

Result 3: least developed countries are able to graduate through the development of comprehensive strategies and policies for a graduation with momentum and beyond

Proposed programme plan for 2024

- 12.83 The development path followed by a country prior to graduation from the least developed country category can affect the challenges faced after graduation. Graduating countries can benefit from a new strategy, one that prepares them for the challenges ahead by linking the graduation process with

the development of productive capacities and sustainable development. UNCTAD has developed an alternative policy framework, in the form of a “strategy for graduation with momentum”, to help to refocus the objectives and strategic direction of graduation strategies, as well as a new time frame for implementation. The strategy relies on the need for countries to adequately build new and strengthen existing productive capacities, the extent to which can be monitored through the UNCTAD productive capacities index as well as other national and international socioeconomic and environmental indicators.

Lessons learned and planned change

- 12.84 The lesson for the subprogramme was that there was demand for continued support during pre- and post-graduation for least developed countries as well as for policies to strengthen the productive foundations built in the run-up to graduation. In applying the lesson, the subprogramme will support selected graduating countries to design their strategies for graduation with momentum. The subprogramme will work with graduating countries to identify their long-term development needs and objectives, rather than focusing exclusively on their performance based on the graduation criteria. The reconfigured approach and strategy for graduation with momentum will be used as a long-term development strategy for building the productive capacities of graduating countries.
- 12.85 Expected progress towards the objective is presented in the performance measure below (see table 12.18).

Table 12.18
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
–	Least developed countries have access to analytical research on how to achieve “graduation with momentum” and fundamental concepts, including the identification of a quantitative evidence base and data sources	Least developed countries have access to policy guidance on the development of a strategy for “graduation with momentum”	At least two least developed countries that have qualified for graduation take steps towards the drafting of a strategy for “graduation with momentum”	At least two least developed countries use industrial policy more effectively to graduate with momentum

Deliverables

- 12.86 Table 12.19 lists all deliverables of the subprogramme.

Table 12.19
Subprogramme 5: deliverables for the period 2022–2024, by category and subcategory

Category and subcategory	2022 planned	2022 actual	2023 planned	2024 planned
A. Facilitation of the intergovernmental process and expert bodies

C. Substantive deliverables

Consultation, advice and advocacy: policy advice to ministries of trade, transport and planning on the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and to national statistical offices on measuring productive capacities for targeted groups of countries; advice on strategies for graduation with momentum for graduating and graduated least developed countries; advice on trade and development issues for small island developing States, landlocked developing countries and African countries; advice for least developed countries on trade issues relevant to them, including duty-free and quota-free market access and on the Enhanced Integrated Framework; consultations on UNCTAD activities related to the New Partnership for Africa’s Development; and consultations with United Nations partner agencies and African countries for the implementation of the Third Industrial Development Decade for Africa.

D. Communication deliverables

Outreach programmes, special events and information materials: lectures on issues related to least developed countries and African development, globalization, trade development strategies and policy coherence for the benefit of member States, for a minimum of 100 participants; and policy briefs related to *The Least Developed Countries Report* and the *Economic Development in Africa Report*.

External and media relations: press releases, press conferences and interviews and opinion pieces on flagship reports (*The Least Developed Countries Report* and the *Economic Development in Africa Report*) and other topical research, including policy recommendations.

B. Proposed post and non-post resource requirements for 2024

Overview

12.87 The proposed regular budget resources for 2024, including the breakdown of resource changes, as applicable, are reflected in tables 12.20 to 12.22.

Table 12.20

^a Includes four temporary posts (1 Senior Economic Affairs Officer (P-5), 2 Economic Affairs Officers (P-4) and 1 Economic Affairs Officer (P-3)).

- 12.88 Additional details on the distribution of the proposed resources for 2024 are reflected in tables 12.23 to 12.25 and figure 12.VIII.
- 12.89 As reflected in tables 12.23 (1) and 12.24 (1), the overall resources proposed for 2024 amount to \$80,475,300 before recosting, reflecting an increase of \$1,103,000 (or 1.4 per cent) compared with the appropriation for 2023. Resource changes result from technical adjustments. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Distribution of proposed resources for 2024 (before recosting)

(Number of posts/thousands of United States dollars)

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

12.90 As reflected in table 12.23 (1), resource changes reflect an increase of \$1,103,000, related to the delayed impact of the establishment of nine posts and two general temporary assistance positions and the reassignment of two posts in 2023, which were subject to a 50 per cent vacancy rate in accordance with the established practice for new or reassigned posts, as follows:

- (a) **Executive direction and management (increase of \$189,700).** Two posts of Statistician (1 P-4 and 1 P-3) were established;
- (b) **Executive direction and management: memorandum of understanding on trade facilitation (increase of \$239,000).** One position of Director, Economic Affairs (D-2) and one position of Liaison Management Officer (P-4) were established;
- (c) **Subprogramme 1, Globalization, interdependence and development (increase of \$143,000).** Two posts of Associate Economic Affairs Officer (P-2) were established;
- (d) **Subprogramme 2, Investment and enterprise (increase of \$66,800).** One post of Programme Management Assistant (General Service (Other level)) was reassigned as a Graphic Design Assistant;
- (e) **Subprogramme 4, Technology and logistics (increase of \$189,700).** Two posts of Economic Affairs Officer (1 P-4 and 1 P-3) were established;
- (f) **Subprogramme 5, Africa, least developed countries and special programmes (increase of \$274,800).** One post of Senior Economic Affairs Officer (P-5), one post of Economic Affairs Officer (P-3) and one post of Economic Affairs Officer (P-2) were established.

Extrabudgetary resources

- 12.91 As reflected in tables 12.23 (2) and 12.24 (2), extrabudgetary resources amount to \$54,041,500. The resources would complement regular budget resources and would be used mainly to finance various technical cooperation activities, such as technical advisory services, training, workshops, seminars and field projects.
- 12.92 The extrabudgetary resources under the present section are subject to the oversight of UNCTAD, which has delegated authority from the Secretary-General of the United Nations.

Policymaking organs

- 12.93 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies, special sessions of the General Assembly and intergovernmental processes, the servicing of which is the responsibility of UNCTAD. The provisions for experts serving on committees in their individual capacity are in accordance with Assembly resolution [46/235](#), while the provisions for members of the functional commissions are in accordance with Assembly resolution [49/130](#). Table 12.26 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 12.26
Policymaking organs

(Thousands of United States dollars)

<i>Policymaking organ</i>	<i>Description</i>	<i>Additional information</i>	<i>2023 appropriation</i>	<i>2024 estimate (before recosting)</i>
Commission on Science and Technology for Development	The Commission meets annually and provides overall direction to the related programme of work. It receives specialized and technical advice from ad hoc panels and workshops that meet between sessions of the Commission to examine specific issues on science and technology for development. The UNCTAD secretariat provides substantive support to the Commission.	Mandate: General Assembly resolution 46/235 Membership: 43 government experts One session per year One intersessional panel per year	166.0	166.0
Investment, Enterprise and Development Commission	The Commission deals with issues related to investment, technology and related financial issues, as well as enterprise and information and communications technology issues. It is assisted by 16 expert advisers, serving in their individual capacity and selected from both developed and developing countries. It is open to all States members of UNCTAD and has a standing subsidiary expert body, namely, the Intergovernmental Working Group of Experts on International Standards of Accounting and Reporting.	Mandate: General Assembly resolution 49/130 TD/442 , TD/442/Corr.1 and TD/442/Corr.2 (Accra Accord), para. 202 Membership: 16 experts One session per year	35.3	35.3
Quadrennial session of UNCTAD	The General Assembly determines the dates and the location of the sessions of UNCTAD, taking into account the recommendations of the Conference or the Trade and Development Board. The fifteenth session of the Conference was held in 2021. Consultations with member States on issues and mandates will continue.	Mandate: General Assembly resolution 1995 (XIX) , para. 2 Held every four years	17.1	17.1
Total			218.4	218.4

12.94 The proposed regular budget resources for 2024 amount to \$218,400 and reflect no change in the resource level compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 12.27 and figure 12.IX.

Table 12.27

Executive direction and management

1. Executive direction and management

12.95 The Office of the Secretary-General of UNCTAD coordinates cross-cutting institutional processes, such as the systematic inclusion of gender equality aspects in all areas of the work of UNCTAD and reaching gender parity in staff. To that end, the Office of the Secretary-General is coordinating the Gender Task Force, which is chaired by the Deputy Secretary-General of UNCTAD and is mandated to improve and better coordinate gender mainstreaming activities, including by appointing, for each UNCTAD subprogramme, gender focal points whose responsibilities include reviewing and clearing trust fund project documents from a gender mainstreaming perspective. The Statistics Coordination Task Force, chaired by the Deputy Secretary-General of UNCTAD, which has the mandate to improve the coordination of statistical activities in UNCTAD and to exploit synergies, sets strategic priorities for UNCTAD statistics and coordinates statistical activities, including production, dissemination and capacity development.

- 12.96 The Communications and External Relations Section is charged with the planning and delivery of UNCTAD media outreach and external relations activities, web content management, civil society liaison and implementation of the communications strategy, including the production and dissemination of information and media products targeted to specific audiences. The Section is responsible for the effective and timely maintenance and operational monitoring of the content on the UNCTAD multilingual website and the implementation of the UNCTAD web strategy. It also promotes cooperation and working relationships with civil society organizations, including non-governmental organizations (NGOs), trade unions, academia and intergovernmental organizations, and carries out fundraising and intergovernmental liaison activities in respect of civil society work.
- 12.97 The Evaluation Unit coordinates and conducts activities that serve to ensure and enhance the quality and resonance of UNCTAD programmes and projects, by providing internal oversight, including oversight and management of external evaluations mandated by the Trade and Development Board, oversight and management of project evaluations funded by the United Nations Development Account and external evaluations required by contribution agreements. The Unit provides strategic support and advice to the management on oversight, self-assessments and self-evaluations.
- 12.98 The Statistics Service is responsible for supporting the coordination, standardization and coherence of statistical activities throughout the organization, and conducting independent quality assurance on UNCTAD statistics. The cross-organizational Service will provide relevant and timely statistics on trade and development areas and, by implementing the UNCTAD Statistics Quality Assurance Framework, will align the organization's overall statistical requirements to enable better planning, more synergies and quality controls.
- 12.99 The UNCTAD Statistics Service provides official statistics and other indicators, cutting across the areas of work of UNCTAD, for enhanced research, analysis and policy action on trade and development, including the interrelated issues of finance, technology, transport, investment and sustainable development.
- 12.100 Furthermore, the Statistics Service coordinates data and statistical activities in UNCTAD, including by developing methods, standards and tools for the collection, compilation, dissemination and use of high-quality statistics adhering to international standards. The Service provides data-driven analysis of global trade and development issues with innovative techniques and methodologies to derive new insights from statistics.
- 12.101 The UNCTAD Statistics Service contributes to the development of national statistical capacity and global statistics, supports countries' efforts to strengthen their national statistical capacity and develops statistics with international collaboration on topics related to the UNCTAD mandate.
- 12.102 The UNCTAD New York Office works on enhancing outreach and promotes UNCTAD objectives at United Nations Headquarters and with relevant actors based in New York and Washington, D.C., including enhancing coordination with all United Nations system entities, funds and specialized programmes, diplomatic missions, the press corps, research institutions, NGOs and technical assistance agencies in the areas of trade, investment, technology and development.
- 12.103 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), UNCTAD is integrating environmental management practices into its operations. As part of its commitment, UNCTAD will continue to reduce its carbon footprint by substituting air travel through the use of information and communications tools whenever possible. As a non-resident entity housed within the premises of the United Nations Office at Geneva, the UNCTAD carbon footprint comprises exclusively air travel-related emissions.
- 12.104 Information on the timely submission of documentation and advance booking for air travel is reflected in table 12.28. While an improvement is noted in comparison to the previous year, UNCTAD continues to make efforts to increase the compliance rate, including by monitoring

Part IV International cooperation for development

advance ticket purchase compliance in the Management Information System (UNCTAD management dashboard) and reporting to senior management once a month. The Mission Travel Portal is used by staff members to clear their travel requests with senior management before initiating travel requests in Umoja. The portal identifies requests that are not compliant with the advance air ticket purchase policy and sends automated warnings to senior managers. In addition, UNCTAD continues to make efforts to raise awareness among staff members and to encourage early planning of meetings and conferences, whenever possible.

Table 12.28
Compliance rate

Air tickets purchased at least 2 weeks before the commencement of travel	44	37	52	100	100

12.105 The proposed regular budget resources for 2024 amount to \$8,867,600 and reflect an increase of \$189,700 compared with the appropriation for 2023. The proposed increase is explained in paragraph 12.90 (a). Additional details on the distribution of the proposed resources for 2024 are reflected in table 12.29 and figure 12.X.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

- 12.106 Extrabudgetary resources for this component amount to \$546,700. The resources would be used mainly for substantive and policy coherence throughout the organization and to ensure that UNCTAD efforts and delivery of mandates are coherent, timely, effective and targeted to the needs of developing countries. The estimated resource level for 2024 reflects no change compared with the estimate for 2023.

2. Memorandum of understanding on trade facilitation

- 12.107 On 22 July 2022, the Secretary-General, as part of his efforts to address the recent increase in global food insecurity, signed a memorandum of understanding with the Russian Federation on promoting Russian food products and fertilizers to the world markets to facilitate the unimpeded access to the global markets of Russian food products and fertilizers, which are not subject to sanctions. This initiative, known as the memorandum of understanding on trade facilitation, is aimed at bringing stability to global food markets by facilitating global access to agricultural products, including fertilizers and raw materials required to produce fertilizers.

- 12.108 The memorandum of understanding on trade facilitation is aimed at the following:

- Continuation of commercial supplies of food and fertilizers from the Russian Federation to the countries in need of such products;
- Continuation of efforts by the Secretariat of the United Nations to facilitate the transparent unimpeded access of food and fertilizers, including raw materials required to produce fertilizers (including ammonia), originating from the Russian Federation to the world market; under the initiative, the Russian Federation informs the Secretariat of any potential or existing impediments to such access that may arise in the sectors of finance, insurance and logistics;
- Facilitation by the Russian Federation of the unimpeded export of food, sunflower oil and fertilizers from the Ukrainian ports.

- 12.109 To support the memorandum of understanding on trade facilitation, UNCTAD leads the endeavour to engage with relevant authorities and the private sector to effectively exempt food products and fertilizers, including raw materials required to produce fertilizers (including ammonia), originating

in the Russian Federation from measures imposed on the Russian Federation, based on the principle that those measures do not apply to food products and fertilizers.

12.110 UNCTAD undertakes in-scope requests from the Russian Federation and provides technical guidance to the Russian Federation and to Russian companies relating to trade facilitation in the context of the memorandum of understanding.

12.111 In this context, UNCTAD has established a task team to support the memorandum of understanding on trade facilitation. Its activities include the following:

- (a) Establishment of channels for the mutual exchange of information between the Russian Federation and the Secretariat of the United Nations for the purposes of implementing the memorandum of understanding and informing the Secretariat on any impediments to the access of food and fertilizers originating from the Russian Federation to global markets;
- (b) Facilitation of and support for the efforts of bilateral and multilateral sectoral working groups, involving relevant actors from the government and private sectors;
- (c) On the basis of in-scope requests received from the Russian Federation, liaison with the private sector, including business associations, industry groups and companies, to address issues arising from non-sanctioned trade related to the memorandum of understanding between the Russian Federation and the Secretariat of the United Nations.

12.112 The proposed regular budget resources for 2024 amount to \$2,559,900 and reflect an increase of \$239,000 compared with the appropriation for 2023. The proposed increase is explained in paragraph 12.90 (b). Additional details on the distribution of the proposed resources for 2024 are reflected in table 12.30 and figure 12.XI.

Programme of work

Subprogramme 1

Globalization, interdependence and development

12.113 The proposed regular budget resources for 2024 amount to \$9,272,900 and reflect an increase of \$143,000 compared with the appropriation for 2023. The proposed increase is explained in paragraph 12.90 (c). Additional details on the distribution of the proposed resources for 2024 are reflected in table 12.31 and figure 12.XII.

Extrabudgetary resources

12.114 Extrabudgetary resources for this subprogramme amount to \$7,015,500. The resources would complement regular budget resources and would be used mainly to help the subprogramme to disseminate its research findings to policymakers and enable them to benefit from its analysis and policy recommendations in areas such as resource mobilization to increase national and regional capacities in Asia; support for Asian countries in adopting integrated policy strategies and regional policy coordination for resilient, sustainable and transformative development; economic diversification and resilience in Barbados; and the economic development prospects of the Occupied Palestinian Territory and the examination of obstacles to trade and development. The resources would also enable the provision of technical assistance to developing countries for the strengthening of the capacity of Governments to manage their debt effectively and sustainably in support of poverty eradication, development, transparency and good governance. The estimated resource level for 2024 reflects no change compared with the estimate for 2023.

**Subprogramme 2
 Investment and enterprise**

12.115 The proposed regular budget resources for 2024 amount to \$14,333,300 and reflect an increase of \$66,800 compared with the appropriation for 2023. The proposed increase is explained in paragraph 12.90 (d). Additional details on the distribution of the proposed resources for 2024 are reflected in table 12.32 and figure 12.XIII.

Extrabudgetary resources

12.116 Extrabudgetary resources for this subprogramme amount to \$4,573,500. The resources would complement regular budget resources and would be used mainly to provide technical cooperation projects to build and strengthen the human and institutional capacity of developing countries, in particular those with the most vulnerable economies, to formulate policies conducive to promoting investment in sustainable development, as well as to fostering the development of the private sector, in line with national development strategies that stimulate progress towards the achievement of the Sustainable Development Goals. The estimated resource level for 2024 reflects no change compared with the estimate for 2023.

Subprogramme 3 International trade and commodities

12.117 The proposed regular budget resources for 2024 amount to \$15,825,200 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 12.33 and figure 12.XIV.

Extrabudgetary resources

12.118 Extrabudgetary resources for this subprogramme amount to \$2,985,100. The resources would complement regular budget resources and would be used mainly to provide technical cooperation and capacity-building projects to requesting countries in the areas of trade in goods, services and commodities, the creative economy, environmental degradation, climate change and sustainable development, competition and consumer policies, trade and gender, and trade analysis. The estimated resource level for 2024 reflects no change compared with the estimate for 2023.

Subprogramme 4 Technology and logistics

12.119 The proposed regular budget resources for 2024 amount to \$10,010,600 and reflect an increase of \$189,700 compared with the appropriation for 2023. The proposed increase is explained in paragraph 12.90 (e). Additional details on the distribution of the proposed resources for 2024 are reflected in table 12.34 and figure 12.XV.

Extrabudgetary resources

12.120 Extrabudgetary resources for this subprogramme amount to \$31,505,800. The resources would complement regular budget resources and would be used mainly to provide capacity-building to enable beneficiary countries to better harness technology and logistics for trade and development. Technical assistance services provided by the subprogramme include the automation of customs and

other trade-related processes through the Automated System for Customs Data, capacity-building in e-commerce, science, technology and innovation policies, trade facilitation, transport, port management and other training courses for experts on issues related to the international economic agenda. The estimated resource level for 2024 reflects no change compared with the estimate for 2023.

Subprogramme 5 Africa, least developed countries and special programmes

12.121 The proposed regular budget resources for 2024 amount to \$5,945,000 and reflect an increase of \$274,800 compared with the appropriation for 2023. The proposed increase is explained in paragraph 12.90 (f). Additional details on the distribution of the proposed resources for 2024 are reflected in table 12.35 and figure 12.XVI.

(Number of posts/thousands of United States dollars)

Extrabudgetary resources

12.122 Extrabudgetary resources for this subprogramme amount to \$2,646,800. The resources would complement regular budget resources and would be used mainly to support the 2030 Agenda for Sustainable Development Sub-Fund project on developing integrated programmes to alleviate binding constraints to development by fostering structural transformation, building productive capacities and enhancing investment opportunities. The resources would also enable the continuation of technical assistance and capacity-building activities to help build productive capacities to diversify the developing countries’ economies and exports in a sustainable manner. The resources would enable the subprogramme to build and strengthen the human and institutional capacity of least developed countries and African countries in designing and implementing national and international policies that enable them to effectively utilize trade preferences and rules of origin contained in unilateral and reciprocal trade arrangements. The estimated resource level for 2024 reflects no change compared with the estimate for 2023.

Programme support

12.123 Programme support is organized through two services: first, the Programme Support and Management Service, which integrates the former Technical Cooperation Section and the Resources Management Service, and second, the Intergovernmental Outreach and Support Service.

12.124 The proposed regular budget resources for 2024 amount to \$13,442,400 and reflect no change compared with the appropriation for 2023. Additional details on the distribution of the proposed resources for 2024 are reflected in table 12.36 and figure 12.XVII.

Table 12.36

(Number of posts/thousands of United States dollars)

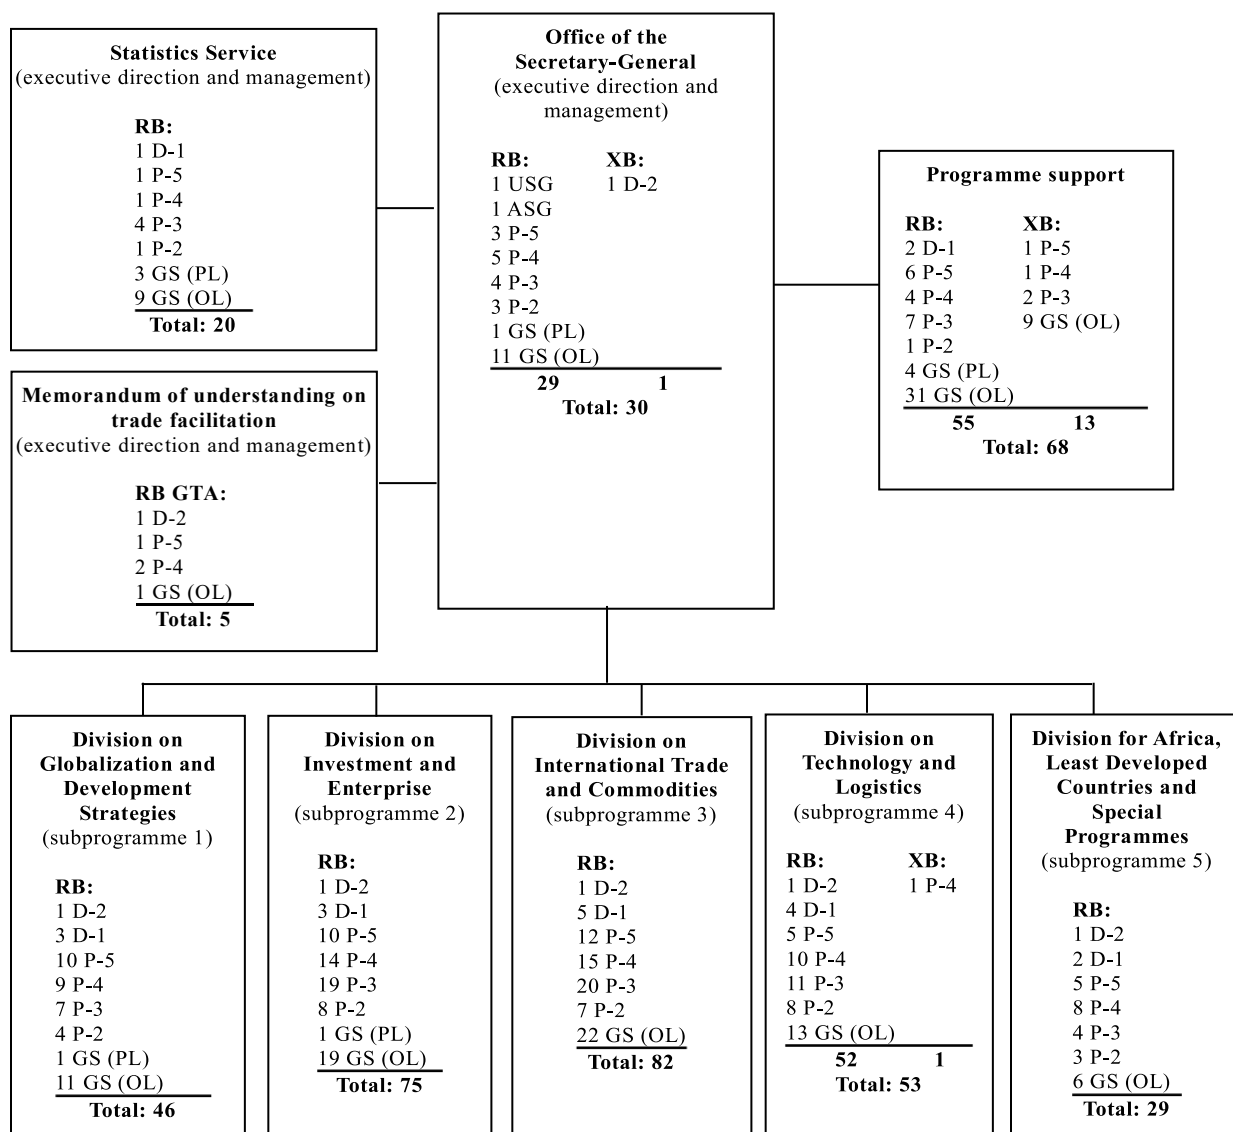

Extrabudgetary resources

12.125 Extrabudgetary resources for programme support amount to \$4,768,100. The resources would complement regular budget resources and would be used mainly to support subprogrammes in implementing technical cooperation activities, research and analysis and administrative support related to extrabudgetary activities. The resources would also enable the participation of UNCTAD in a number of United Nations Sustainable Development Cooperation Frameworks, through the development of relevant joint country-level programmes in UNCTAD areas of expertise, as laid out in the UNCTAD Toolbox, following United Nations Development Coordination Office guidelines. The estimated resource level for 2024 reflects no change compared with the estimate for 2023.

Foreword

In 2024, the International Trade Centre (ITC) will keep delivering transformative and sustainable trade that helps to put the Sustainable Development Goals back on track and to build inclusive and prosperous economies.

The Centre's strategic vision for the third year of implementation of its strategic plan for the period 2022–2025 remains firmly grounded in the 2030 Agenda for Sustainable Development.

The Centre's interventions to accelerate progress towards the Goals will be further integrated and scaled up through the implementation of specific sub-strategies, aimed at accelerating digital trade, environmentally sustainable trade, and trade for women and youth. Increased attention will be placed on the needs of the most vulnerable.

At least 80 per cent of the Centre's country-level assistance will be provided to the least developed countries, landlocked developing countries, small island developing States, small and vulnerable economies, countries in armed conflict or at risk of lapsing or relapsing into conflict, and sub-Saharan Africa.

To improve efficiency in line with its commitment to deliver value for money, ITC will continue to improve its data management, risk management, monitoring and evaluation practices. ITC will further engage in purposeful partnerships and expand its participation in United Nations system-wide activities.

ITC is thankful to the Member States, its partners and beneficiaries, for their continuous confidence and support. ITC looks forward to tackling trade challenges together for building resilient and sustainable economies.

(Signed) Pamela **Coke-Hamilton**
Executive Director, International Trade Centre

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 13.1 The International Trade Centre (ITC) is responsible for the business aspects of trade development, as the joint technical cooperation agency of the United Nations and the World Trade Organization (WTO). The mandate derives from the priorities established by the contracting parties to the General Agreement on Tariffs and Trade (GATT) on 19 March 1964 and the General Assembly on 12 December 1967 (Assembly resolution [2297 \(XXII\)](#)). Since 1 January 1968, ITC has operated under the joint auspices of GATT/WTO and the United Nations. In its resolution [1819/LV](#) of 9 August 1973, the Economic and Social Council reaffirmed the Centre's mandate as the focal point for technical assistance and cooperation activities for trade promotion within the United Nations system of assistance for developing countries.
- 13.2 In the context of the 2030 Agenda for Sustainable Development, Member States explicitly recognized trade as a key engine for sustainable and inclusive economic growth and poverty eradication, specifically through target 8.a of the Sustainable Development Goals, to increase Aid for Trade support, and targets 17.10 and 17.11 of the Goals, for an open, rules-based, transparent and fair trading system and a significant increase in exports from developing countries.
- 13.3 Against the backdrop of trade tensions and the severe negative impact on trade and development caused by the coronavirus disease (COVID-19) pandemic, the General Assembly, in its resolutions [77/151](#) and [77/160](#), reiterated this position for the target beneficiaries of ITC – micro-, small and medium-sized enterprises – which make up over 90 per cent of the world's businesses, account for over two thirds of employment and form the economic backbone of every community.

Programme of work

Subprogramme 6

Operational aspects of trade promotion and export development

Objective

- 13.4 The objective, to which ITC contributes, is to enhance inclusive and sustainable growth and development through trade and international business development for micro-, small and medium-sized enterprises in developing countries, especially the least developed countries, and countries with economies in transition, through increased business capacities of those enterprises to trade and through a conducive business environment and strengthened institutional ecosystems for those enterprises.

Strategy and external factors for 2024

- 13.5 To contribute to the objective, ITC will provide advisory services, training and awareness-building to enterprises, business support institutions and government agencies in areas that are key to the international competitiveness of micro-, small and medium-sized enterprises. In particular, ITC will:
- (a) Build enterprise-level capacities in the areas of market analysis, value addition, quality, e-commerce, marketing, access to finance and investment, climate resilience and environmental risk mitigation, including on how to sustain the resilience of micro-, small and medium-sized enterprises in the recovery from the pandemic;

- (b) Provide micro-, small and medium-sized enterprises with market knowledge and new market linkage opportunities, including through initiatives such as the Switch ON e-commerce initiative and #FastTrackTech, which digitally connect enterprises to foreign markets, and the “Alliances for Action” initiative, which matches businesses and develops public-private partnerships in targeted value chains and helps micro-, small and medium-sized enterprises to strengthen existing and open new trade channels;
- (c) Enable business transactions and investment for micro-, small and medium-sized enterprises, with a focus on growing local, regional, South-South and global value chains for women-owned businesses, youth entrepreneurs, refugees, internally displaced persons and artisan and farmer communities, including through the ITC SheTrades, Ye! (young entrepreneurs) and Responsible Sustainable Ethical Trade initiatives;
- (d) Work to strengthen the governance, performance, advocacy capacities, quality and scope of services and interconnectedness of national, subnational and regional business support institutions and ecosystems, including trade and investment promotion agencies, chambers of commerce, sector associations, youth and women’s business groups, cooperatives, incubators and technical and vocational training providers, including through tailored advisory services, assessments and workshops;
- (e) Support policymakers in leading public-private dialogues and consensus-building and decision-making processes that foster the growth and internationalization of micro-, small and medium-sized enterprises, including through the promotion of the benefits of a universal, rules-based, open, predictable, inclusive, non-discriminatory and equitable multilateral trading system under WTO;
- (f) Scale up its comprehensive and globally accessible trade intelligence that addresses information gaps, including analytical tools such as the ITC Sustainability Map, which houses information on voluntary sustainability standards and compliance requirements.

13.6 The above-mentioned work is expected to result in:

- (a) Increased resilience of micro-, small and medium-sized enterprises to external shocks and their enhanced competitiveness, sustainable business practices and integration into regional and international value chains that generate business transactions, investments, sustainable jobs and higher incomes, especially for women, youth and people in vulnerable situations;
- (b) Improved usefulness of services provided by business support institutions to micro-, small and medium-sized enterprises, including enhanced management and operational functioning of the service providers;
- (c) Better-informed government decision makers, with options for new or improved inclusive trade-related policies, strategies and regulatory frameworks that contribute to an enabling environment for micro-, small and medium-sized enterprises to participate in international trade;
- (d) Increased awareness among policymakers, business support organizations and businesses related to trade opportunities and challenges for micro-, small and medium-sized enterprises, market access conditions and sustainable business practices.

13.7 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:

- (a) Extrabudgetary resources will remain stable;
- (b) Programming countries will maintain political, economic and social conditions that allow for the implementation of development interventions;
- (c) International trade and investment conditions do not deteriorate significantly compared with 2023.

13.8 With regard to cooperation with other entities at the global, regional, national and local levels, ITC will maintain and develop partnerships with the private sector, civil society, academia and trade and development organizations to advance the 2030 Agenda. ITC will continue to develop partnerships

that contribute to the operationalization of the African Continental Free Trade Area, to scalable initiatives, especially for the least developed countries, and to the implementation of WTO ministerial discussions and outcomes, including on e-commerce, investment facilitation, women and trade, and micro-, small and medium-sized enterprises and trade. ITC will continue to work with the private sector to support market access and provide supplier programmes for micro-, small and medium-sized enterprises, especially women-owned enterprises.

- 13.9 With regard to inter-agency coordination and liaison, ITC will continue to coordinate with United Nations agencies, including through membership in the United Nations Sustainable Development Group and United Nations regional and country teams. ITC will collaborate with the United Nations Conference on Trade and Development and WTO, and with other agencies and initiatives, such as the United Nations Global Compact, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), the United Nations Capital Development Fund, the United Nations Development Programme, the Food and Agriculture Organization of the United Nations and the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States.
- 13.10 ITC integrates a gender perspective in its operational activities, deliverables and results, as appropriate. ITC will mainstream gender equality and women's empowerment through an approach designed to address specific barriers for women in trade, for example, by supporting a network of women's business associations that will advocate for the mainstreaming of a gender perspective in policies. ITC will improve ecosystems for women's entrepreneurship, working with local institutions as "SheTrades hubs". ITC will advance its SheTrades Outlook tool to include an expanded repository of country-specific information on including a gender perspective in trade policies and practices.
- 13.11 In line with the United Nations Disability Inclusion Strategy, ITC will address disability inclusion in its operational planning process and will focus on disability inclusion in the monitoring of its projects.

Impact of the pandemic and lessons learned

- 13.12 The continuation of the COVID-19 pandemic into 2022 did not have a significant impact on the implementation of mandates. However, in order to support Member States on issues related to the COVID-19 pandemic, within the overall scope of the objectives, a new programmatic initiative, the Vaccine Investments and Trade Ecosystems in Africa project, was initiated. The initiative aimed to strengthen the African value chains of vaccines and related supplies. A pilot project, focused on Nigeria, engaged with the vaccine industry cluster and with regional and international public and private actors and coordination mechanisms, including the Partnerships for African Vaccine Manufacturing, and facilitated agreement on a strategic road map for the vaccine industry cluster, contributing to the country's economic recovery efforts, by building a diversified industrial base in the aftermath of the pandemic.
- 13.13 ITC continues to mainstream lessons learned and best practices related to the adjustments to and adaptation of the programme owing to the COVID-19 pandemic. In a fast-paced and uncertain business environment, there is an increased demand for easily accessible and timely trade intelligence. ITC had integrated into its Market Access Map a COVID-19 trade measures dashboard in 2021. On the basis of these lessons learned, in 2022, ITC integrated another real-time dashboard, providing data on temporary trade measures related to armed conflict, and will continue to leverage this approach to provide timely trade intelligence for new and emerging situations, including future crises that may arise.

Evaluation activities

- 13.14 The following evaluations completed in 2022 have guided the proposed programme plan for 2024:
- (a) 2022 annual evaluation synthesis report (meta-evaluation of the 2021 evaluation findings);

- (b) Evaluation of the project “Colombia PUEDE: peace and unity through productive development and commercialization”;
 - (c) Evaluation of the Centre’s work in the impact area “sustainable and resilient value chains” through the final evaluation of the “Netherlands trust fund IV – export sector competitiveness programme”;
 - (d) Evaluation of the Centre’s work in the impact area “sustainable and resilient value chains” through the midterm evaluation of the textiles and clothing programme for the Middle East and North Africa (MENATEX).
- 13.15 The results and lessons of the evaluations referenced above have been taken into account for the proposed programme plan for 2024. For example, the 2022 annual evaluation synthesis report revealed evidence of “expertise” and “agility” in relation to the Centre’s organizational strengths outlined in the strategic plan. These aspects will serve as the foundation of the Centre’s value proposition. Many reviewed initiatives made effective use of synergies and made encouraging advancements in providing value for money. While the Centre’s initiatives effectively supported women’s participation in trade, environmental concerns received less attention. In response, ITC is advancing an approach for mainstreaming the environmental dimension of sustainable development into all its projects.
- 13.16 The following evaluations are planned for 2024:
- (a) Annual evaluation synthesis report (meta-evaluation of the previous year’s evaluation findings);
 - (b) One evaluation at the corporate level;
 - (c) One evaluation of an ITC programmatic approach;
 - (d) One large project evaluation.

Programme performance in 2022

Enhanced commitment for accelerating industrialization and value creation through increased focus on four strategic sectors in Africa

- 13.17 Africa accounts for just 2.3 per cent of global exports, and only 14 per cent of the continent’s exports are destined for other African countries. ITC identified and subsequently examined 94 high-potential value chains in Africa for sustainable development and reduction of import dependency, in support of the continental strategies for integration and industrialization. The findings were published in the report *Made by Africa: Creating Value through Integration*, which informed a dedicated workshop during Africa Industrialization Week in November 2022, contributing to the sub-theme of “regional industrial value chains” of the African Union Extraordinary Summit on Industrialization and Economic Diversification. Among the identified value chains, and following a collective consultative process, the stakeholders identified four strategic sectors: automotive, pharmaceuticals, cotton clothing and baby food. Each sector links at least five African countries from different regions and has substantial value addition and job creation potential for women and youth.
- 13.18 Progress towards the objective is presented in the performance measure below (see table 13.1).

Table 13.1
Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	<p>At the conclusion of the Extraordinary Summit on Industrialization and Economic Diversification, African Union leaders committed to 10 key action points, one of which was to accelerate commodity-based industrialization through regional value chains, prioritizing the health and pharmaceutical, automotive, food and nutrition, cotton and mineral beneficiation industries.</p> <p>The African Union Commission issued a report informed by the Centre’s work with recommendations on strengthening the selected strategic regional value chains.</p>

Planned results for 2024

Result 1: increased demand for trade intelligence as a global public good, enabling decisions for global trade recovery

Programme performance in 2022 and target for 2024

- 13.19 The Centre’s work contributed to 1,404,456 users increasing their trade and market knowledge and facilitated \$1,279 million worth of transactions, which exceeded the planned target of 1,225,000 users and \$1,093 million of transactions.
- 13.20 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 13.I).

Figure 13.I
Performance measure: number of users of and total volume of transactions facilitated by the International Trade Centre’s global public goods offering (cumulative)

Result 2: partnerships for enhanced trade and more resilient micro-, small and medium-sized enterprises in countries in conflict and post-conflict situations

Programme performance in 2022 and target for 2024

- 13.21 The Centre’s work contributed to 502 micro-, small and medium-sized enterprises that improved their business practices or transacted trade, and 24 partners that were engaged in hard-to-reach areas in Iraq, which exceeded the planned target of 150 micro-, small and medium-sized enterprises and 18 partners.
- 13.22 Progress towards the objective and the target for 2024 are presented in the performance measure below (see figure 13.II).

Figure 13.II

Performance measure: number of micro-, small and medium-sized enterprises that improved business or transacted trade, and partnerships for trade in conflict and post-conflict situations (cumulative)

Result 3: strengthened digital trade capacity of micro-, small and medium-sized enterprises

Proposed programme plan for 2024

- 13.23 Research on global connectivity shows that 96 per cent of the 2.9 billion people who are still offline live in the developing world.¹ The programme, through data contained in the report *SME Competitiveness Outlook 2022: Connected Services, Competitive Businesses*, showed that when companies have access to high-quality information and communications technology, transport, finance and business services, they perform better in many aspects critical to their competitiveness. ITC has mainly focused on the direct mobilization of micro-, small and medium-sized enterprises, including through its ecomConnect platform and capacity-building on the use of digital tools for e-trade.

Lessons learned and planned change

- 13.24 The lesson for ITC was that, complementary to its existing focus on e-commerce and digital entrepreneurship, it needed to coordinate and scale up activities at the level of policymaking, partnerships and thought leadership. In applying the lesson, ITC will increase its partnership-building, policy advisory, advocacy and capacity-building efforts in the area of digital trade and connectivity, including through the use of research and membership in global forums. ITC will empower business support organizations to promote connectivity in digital trade and increase its outreach towards micro-, small and medium-sized enterprises, and will use partnerships and networks to make market connections.
- 13.25 Expected progress towards the objective is presented in the performance measure below (see figure 13.III).

¹ International Telecommunication Union, *Measuring Digital Development: Facts and Figures 2021* (Geneva, 2021).

Figure 13.III
Performance measure: micro-, small and medium-sized enterprises enabled to digitally compete and business support organizations empowered to advocate for connectivity

Legislative mandates

13.26 The list below provides all mandates entrusted to ITC.

General Assembly resolutions

2297 (XXII)	International Trade Centre	73/195	Global Compact for Safe, Orderly and Regular Migration
66/288	The future we want		
67/213	Report of the Governing Council of the United Nations Environment Programme on its twelfth special session and the implementation of section IV.C, entitled “Environmental pillar in the context of sustainable development”, of the outcome document of the United Nations Conference on Sustainable Development	73/291 74/228	Buenos Aires outcome document of the second High-level United Nations Conference on South-South Cooperation Role of the United Nations in promoting development in the context of globalization and interdependence
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway	74/231 74/235; 77/181	Development cooperation with middle-income countries Women in development
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	75/202; 77/150	Information and communications technologies for sustainable development
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	75/203; 76/190; 77/151	International trade and development
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	75/211; 77/160 75/225; 77/174	Entrepreneurship for sustainable development Towards a New International Economic Order
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	75/231 76/198; 77/156	Industrial development cooperation Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
71/243; 75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	76/202	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
71/279	Micro-, Small and Medium-sized Enterprises Day	76/203; 77/245	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system		

Section 13 International Trade Centre

76/204; 77/164	Disaster risk reduction	76/220; 77/184	Operational activities for development of the United Nations system
76/205	Protection of global climate for present and future generations of humankind	76/221; 77/185	South-South cooperation
76/207	Implementation of the Convention on Biological Diversity and its contribution to sustainable development	76/224	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
76/213	Science, technology and innovation for sustainable development	76/258	Doha Programme of Action for the Least Developed Countries
76/217; 77/246	Follow-up to the second United Nations Conference on Landlocked Developing Countries	77/177	Follow-up to the Fifth United Nations Conference on the Least Developed Countries
76/218; 77/179	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)	77/178	Promotion of sustainable and resilient tourism, including ecotourism, for poverty eradication and environmental protection

12. <i>SME Competitiveness Outlook</i> flagship report	1	1	1	1
13. Books on trade-related subjects	4	4	4	4
14. Papers on trade-related subjects, such as inclusive and sustainable trade, trade and market intelligence, competitiveness of micro-, small and medium-sized enterprises and competitiveness of women-owned micro-, small and medium-sized enterprises	25	26	25	25

C. Substantive deliverables

Consultation, advice and advocacy: advice to policymakers, trade support institutions and enterprises to address the international competitiveness challenges for micro-, small and medium-sized enterprises in developing countries and countries with economies in transition, to facilitate public-private dialogue on improvements to the business environment and to ensure that trade supports inclusive and sustainable development; advisory services to disadvantaged groups among micro-, small and medium-sized enterprises, such as women and youth-owned enterprises, on improving their productive capacity and market access; advisory and advocacy services for policymakers and business support institutions on how to consider the needs of micro-, small and medium-sized enterprises and disadvantaged groups in their service offer; and advocacy that allows for the systematic inclusion of such enterprises and disadvantaged groups in policy and strategy processes.

Databases and substantive digital materials: databases and other online tools to make global trade more transparent and facilitate market access and business and policy decisions. Databases cover trade flows, tariffs and non-tariff measures, export potential, procurement opportunities, rules of origin, private standards and knowledge on sustainable trade and youth and women entrepreneurship. They include the SheTrades database for over 48,000 active women entrepreneurs, “SheTrades Outlook”, the ITC “SME trade academy”, the Ye! community and platform for over 40,000 young entrepreneurs, the Benchmarking for Trade platform, the African Trade Observatory, the Quality for Trade platform, ecomConnect and the suite of trade intelligence tools (Market Access Map, Trade Map, Standards Map, Investment Map, Global Trade Helpdesk, Export Potential Map, Procurement Map, Trade Strategy Map, Sustainability Map and ePing).

D. Communication deliverables

Outreach programmes, special events and information materials: special events, including the World Export Development Forum, the Trade for Sustainable Development Forum, the world trade promotion organizations network conference and awards; the *International Trade Forum* magazine; Micro-, Small and Medium-sized Enterprises Day; newsletters on trade-related subjects for over 16,000 recipients; and information materials and outreach, including on export strategy, trade support networks and capacities, entrepreneurship, skills and export development opportunities, world trade trends, the multilateral trading system, regional integration, technical regulations and standards for export, and trade and the Sustainable Development Goals.

Digital platforms and multimedia content: ITC website and social media accounts, engaging sustainable micro-, small and medium-sized enterprises, women entrepreneurs and youth.

Library services: on-demand services for ITC clients related to trade information.

B. Proposed post and non-post resource requirements for 2024

Overview

13.28 The proposed regular budget resources for 2024 are reflected in table 13.3.

Table 13.3

Overall United Nations grant to ITC: evolution of financial resources by object of expenditure

(Thousands of United States dollars)

Object of expenditure	2022 expenditure ^a	2023 appropriation	Changes			Total	Percentage	2024 estimate (before recosting)
			Technical adjustments	New/expanded mandates	Other			
Grants and contributions ^b	19 073.4	20 457.6	–	–	–	–	–	20 457.6
Total	19 073.4	20 457.6	–	–	–	–	–	20 457.6

^a At the time of reporting, the expenditures presented in this table and subsequent tables are not final and may be subject to adjustments that could result in minor differences between the information contained in the present report and the financial statements to be finalized by 31 March 2023.

^b Represents the United Nations share of the ITC full regular budget disbursed as a grant.

- 13.29 The General Assembly, in section I of its resolution [59/276](#), endorsed the revised administrative arrangements for ITC as set out in the report of the Secretary-General ([A/59/405](#)). In conformity with those administrative arrangements, the regular budget of ITC is denominated in Swiss francs and is funded equally by the United Nations and WTO. The United Nations share of the ITC full regular budget is disbursed as a grant.
- 13.30 The grant proposed for 2024 amounts to \$20,457,600, before recosting, reflecting no change in the resource level compared with the appropriation for 2023. The full regular budget requirements of ITC amount to SwF 37,936,500 (before recosting), net of projected miscellaneous income of SwF 200,000. The United Nations grant remains at 50 per cent of the ITC full regular budget, or SwF 18,968,300. After applying an exchange rate of SwF 0.9272 to \$1.00, the United States dollar equivalent is \$20,457,600. The proposed level of resources provides for the full, efficient and effective implementation of mandates.
- 13.31 The General Assembly, in its resolution [77/267](#), decided to lift the trial period on the annual budget cycle and requested the Secretary-General to continue with the submission of the annual programme budget for the United Nations. WTO, however, maintains its biennial budget cycle. As in previous years, the present budget proposal for 2024 is put forward under an interim arrangement agreed with the WTO secretariat.² The difference in the budget cycles of the two parent organizations has implications on the administrative arrangements relating to the ITC budget. The United Nations Secretariat and the WTO secretariat will conduct a joint review of the administrative arrangements, which will be suitably updated and presented to the General Assembly and the WTO General Council for consideration in 2024.
- 13.32 The total resource requirements for 2024 for ITC, comprising its full regular budget in Swiss francs and projected extrabudgetary resources in Swiss francs, are reflected in tables 13.4 and 13.5 and figure 13.IV. For increased clarity and transparency, details of ITC post resources to be provided for by the proposed grants from the United Nations and WTO are presented in tables 13.6 and 13.7 and annex I, notwithstanding that these posts are not part of the approved or proposed staffing table of the United Nations regular budget.

Note: The following abbreviations are used in tables and figures: ASG, Assistant Secretary-General; GS (OL), General Service (Other level).

² The WTO General Council will consider the budget proposal of ITC for the biennium 2024–2025 in the WTO format in December 2023. The proposed amount will be based on twice the amount of the present proposal for 2024, i.e., the same amount for 2024 and for 2025.

Part IV International cooperation for development

Figure 13.IV
Distribution of proposed resources for 2024 (before recosting): ITC full regular budget

(Number of posts/thousands of Swiss francs)

Extrabudgetary resources

- 13.33 As reflected in table 13.4 (2), extrabudgetary resources amount to SwF 97,356,000.
- 13.34 The extrabudgetary resources would complement regular budget resources and would be used mainly to implement technical cooperation projects, complementing and leveraging the core expertise and global offering of ITC provided through regular budget resources, at the request of Member States. Initiatives aim to accelerate digital trade, environmentally sustainable trade and trade for women and youth and are committed to economically empowering women, youth and people in vulnerable situations, including people in poverty, refugees, internally displaced persons, persons with disabilities and other marginalized groups. ITC continues to negotiate with donors for the funding of large-scale integrated projects.
- 13.35 The extrabudgetary resources under the present section are subject to the oversight of ITC, in accordance with the delegation of authority by the Secretary-General, and their use is guided by the Financial Regulations and Rules of the United Nations.

Other information

- 13.36 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Centre will continue to integrate environmental management practices into its operations. Lowering its greenhouse gas emissions has been a priority for ITC for a number of years, and recent initiatives include improving the awareness of staff on plastic use and providing guidance on sustainable alternatives to plastic. In addition, ITC automated its lighting system to further reduce its carbon footprint.
- 13.37 Information on the timely submission of documentation and advance booking for air travel is reflected in table 13.8. ITC continued to disseminate a monthly newsletter addressed to all ITC personnel that provides the actual compliance rates and the category of non-compliance justifications

Section 13 **International Trade Centre**

broken down by division. Additionally, divisional directors and section chiefs are provided with details of individual staff compliance rates on a weekly basis. Furthermore, the enterprise resource planning system has been used to document the reasons for non-compliance, including factors that are beyond the control of ITC.

Annex I

Organizational structure and post distribution for 2024

Two charts showing the organizational structure of the International Trade Centre (ITC) are presented below. Chart A reproduces the organizational structure for 2023, as contained in document [A/77/6 \(Sect. 13\)](#). Chart B presents the organizational structure for 2024. The total number of posts for 2024 remains unchanged compared with 2023: 160 funded from the ITC full regular budget (World Trade Organization and United Nations) and 20 from extrabudgetary sources.

Justification for the planned changes

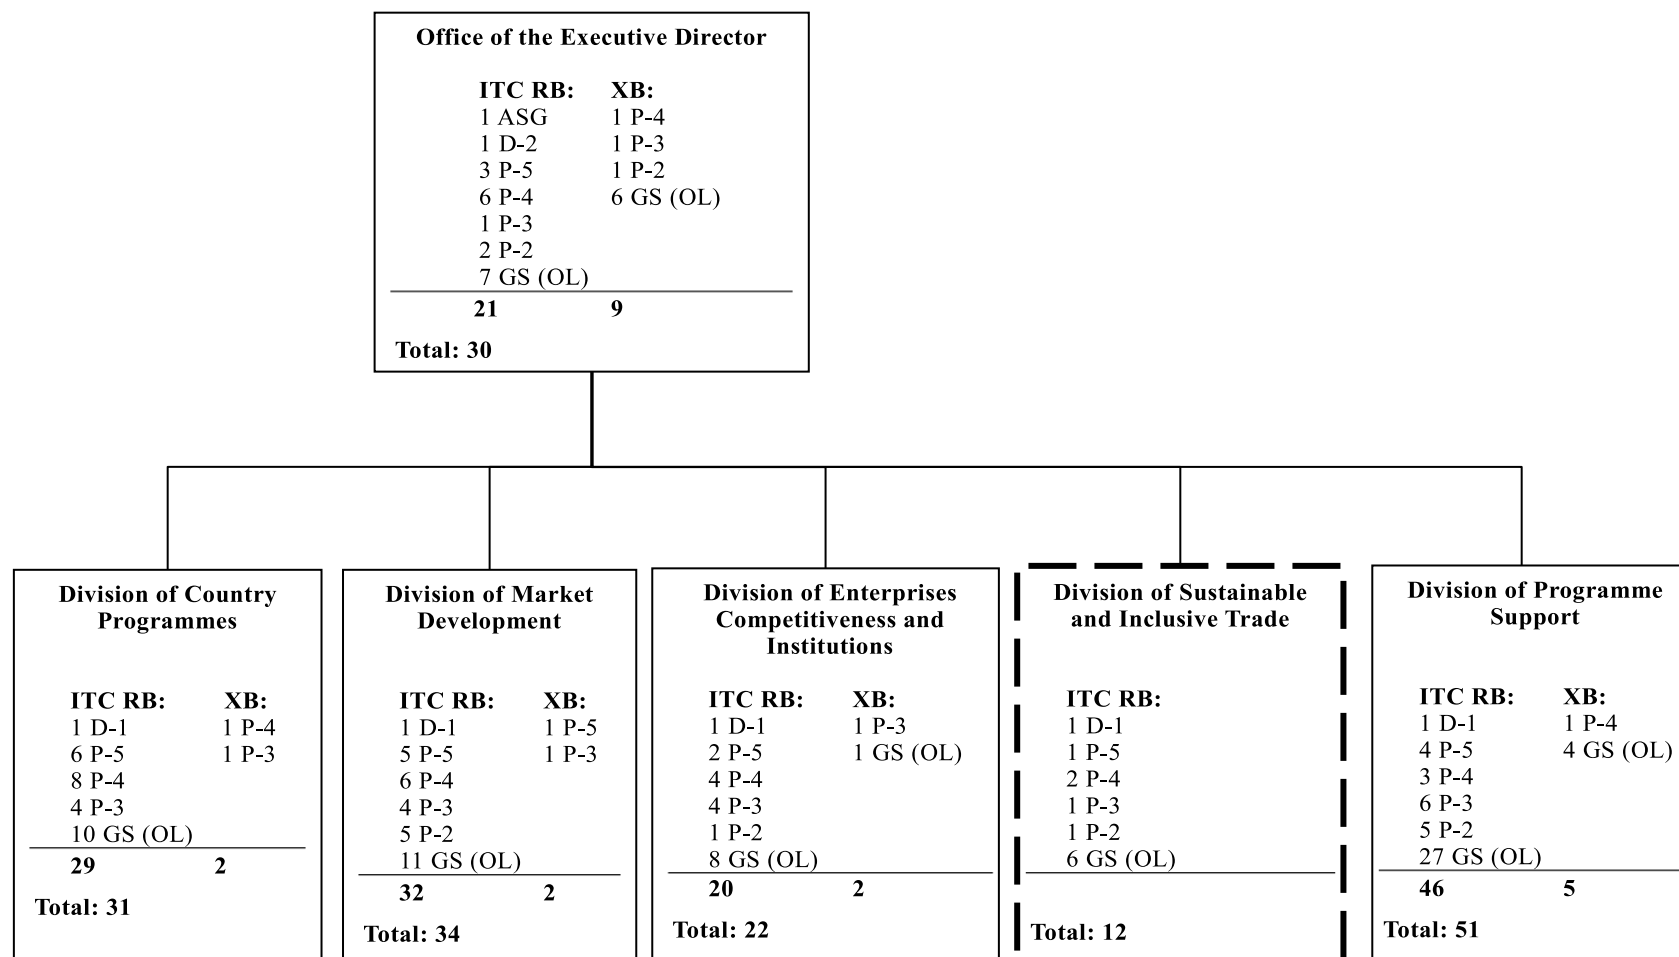

ITC has aligned its structure and delivery requirements to enable the implementation of its strategic plan for the period 2022–2025. The newly created Division of Sustainable and Inclusive Trade works to advance the Centre’s strategic vision to support sustainable and inclusive livelihoods through trade. The Division will shape policy, practice and new thinking on how to make trade more inclusive and to enable micro-, small and medium-sized enterprises to benefit from sustainable trade. It will scale up existing successful initiatives such as SheTrades and develop new approaches to ensure that women, youth and vulnerable groups benefit from growth and trade. Under the new structure, the Division of Enterprises Competitiveness and Institutions works to connect micro-, small and medium-sized enterprises to international value chains, strengthen business support organizations and related ecosystems, increase the compliance of micro-, small and medium-sized enterprises with quality standards and promote digital trade and entrepreneurship. The Division focuses on innovative and inclusive market-driven approaches to strengthen the international competitiveness of micro-, small and medium-sized enterprises from developing countries.

A. Organizational structure and post distribution for 2023

Note: ITC RB posts refer to ITC full regular budget posts, which are not part of the proposed United Nations regular budget staffing table. XB posts are funded through the special account for programme support costs.

B. Organizational structure and post distribution for 2024

Note: ITC RB posts refer to ITC full regular budget posts, which are not part of the proposed United Nations regular budget staffing table. XB posts are funded through the special account for programme support costs. The total number of posts remains unchanged compared with 2023: 160 funded from the ITC full regular budget and 20 from extrabudgetary sources.

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); ITC RB, International Trade Centre full regular budget; XB, extrabudgetary.

Annex II

Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies

Brief description of the recommendation

Action taken to implement the recommendation

Advisory Committee on Administrative and Budgetary Questions

[A/77/7](#)

The Advisory Committee notes with concern that the D-1 post of Director of the ITC liaison office in Addis Ababa has been vacant since its establishment in January 2016. Recalling that the original rationale for the establishment of the D-1 post was based on the need to provide direct support to African institutions and organizations on trade issues, the Committee does not see merit in the proposed redeployment to Geneva and recommends against it. In order to fulfil the intended purposes of the post, the Committee recommends that the General Assembly request ITC to consider alternative locations in Africa, including the secretariat of the African Continental Free Trade Area, located in Accra, where ITC has established a hub. The Committee once again trusts that updated information on the recruitment status of the D-1 post of Director of the ITC liaison office will be provided to the Assembly during its consideration of the present report and in the context of the next budget submission (see also [A/76/7](#) and [A/76/7/Corr.1](#), para. IV.86) (para. IV.101).

The original rationale for the post was to establish the ITC liaison office in Addis Ababa. In 2016, under the leadership of the previous Executive Director, a request was made to redeploy the D-1 post from the ITC headquarters in Geneva for that purpose. The post was not filled owing to the complexity of negotiations and delays in finalizing the host country agreement with Ethiopia. ITC was therefore never able to attempt recruitment for the post in Addis Ababa.

ITC adopted a new strategic plan for the period 2022–2025 in December 2021, on the basis of extensive consultations with Member States while ensuring alignment with the 2030 Agenda for Sustainable Development. The D-1 post was reassessed on the basis of the new strategy, and was re-advertised as Director, Sustainable and Inclusive Trade, in Geneva. The recruitment process was completed in November 2022. The Director, Sustainable and Inclusive Trade (D-1) leads the portfolio of initiatives with direct impact on inclusiveness and environmental sustainability, gender, youth and vulnerable communities to strengthen the role of micro-, small and medium-sized enterprises and related trade in addressing the rapidly evolving social and environmental challenges facing the planet.

ITC is a non-resident agency with no permanent offices in programme countries. Some large initiatives warrant project offices that are limited to the duration of the project. ITC does not have a hub in Accra, as stated in the report of the Advisory Committee on Administrative and Budgetary Questions. Rather, ITC leverages the physical presence of fellow United Nations development system entities, the resident coordinator system and the United Nations country team for greater integration and efficiency.

I. Organizational structure and post distribution for 2024	68
II. Summary of follow-up action taken to implement relevant recommendations of the advisory and oversight bodies	69
III. Summary of proposed post changes, by component and subprogramme.	70

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

Foreword

The three planetary crises of climate change, biodiversity and nature loss, and pollution and waste continue to disproportionately affect the world's most vulnerable communities. We urgently need to advance the realization of the right to a clean, healthy and sustainable environment, given that it is imperative to achieving the 2030 Agenda for Sustainable Development.

Throughout 2022, the United Nations Environment Programme (UNEP) focused on supporting Member States in advancing implementation of the 14 resolutions adopted at the fifth United Nations Environment Assembly. UNEP also lent its full support to the parties to the Convention on Biological Diversity as they sought to agree on the historic Kunming-Montreal Global Biodiversity Framework. Furthermore, UNEP continued to enhance its approach to programme delivery to ensure greater coherence, efficiency and clearer accountability for the delivery of results addressing the environmental dimension of the 2030 Agenda.

For 2024, UNEP looks forward to delivering a successful United Nations Environment Assembly, playing its part in helping the international community to complete the negotiations on a legally binding instrument on plastic pollution and supporting countries in establishing early warning systems to save lives and avert loss and damage.

Having passed the halfway mark to achieve the 2030 Agenda, our continued commitment is crucial. UNEP will support Member States in advancing the sustainable development agenda with a sharp focus on delivering solutions to ensure that a sustainable environment becomes a reality for all.

(Signed) Inger **Andersen**
Executive Director, United Nations Environment Programme

A. Proposed programme plan for 2024 and programme performance in 2022

Overall orientation

Mandates and background

- 14.1 The United Nations Environment Programme (UNEP) is responsible for leading and coordinating action on environmental matters within the United Nations system. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [2997 \(XXVII\)](#), and by the Governing Council of UNEP in its decision 19/1. That decision set out the Nairobi Declaration on the Role and Mandate of the United Nations Environment Programme, which the Assembly subsequently endorsed in 1997 in the annex to its resolution [S-19/2](#) and further reaffirmed in its resolutions [53/242](#), in 1999, and [66/288](#) and [67/213](#), in 2012. Member States recognize the importance of the environmental dimension to the successful implementation of the 2030 Agenda for Sustainable Development. Within its mandate, UNEP will support Member States by providing strategic direction towards the achievement of environmental sustainability, while contributing to a balanced integration of the economic, social and environmental dimensions of sustainable development. Acknowledging the integrated nature of the challenges that countries face, UNEP will play a critical role in catalysing the fulfilment of the commitments and action that drive transformational change for sustainable development.

Strategy and external factors for 2024

- 14.2 The medium-term strategy for the period 2022–2025 contains a vision of UNEP as supporting Member States in developing and implementing policies, strategies and programmes to strengthen the environmental dimension of the 2030 Agenda, but with a forward-looking 2050 perspective on planetary sustainability (see United Nations Environment Assembly decision 5/2). The strategy depends on recognition of the existence of the three planetary crises of climate change, biodiversity and nature loss, and pollution and waste, and outlines a set of transformative shifts to target the drivers of those crises. The strategy also maps out the actions needed to reshape consumption and production patterns towards more sustainable and equitable models that contribute to the UNEP vision for planetary sustainability, human health and well-being. The aim of the programme for 2024 is to focus on how UNEP can meet current and future expectations, while continuing to deliver on the promises made to Member States in 2012 through the United Nations Conference on Sustainable Development and its outcome document, entitled “The future we want” (General Assembly resolution [66/288](#)). It demonstrates the role of UNEP in supporting countries’ efforts to build their capacity to deliver on their environmental goals and commitments under international agreements.
- 14.3 Through the strategy, UNEP will address the three planetary crises of climate change, biodiversity and nature loss, and pollution and waste through transformative multi-stakeholder action that targets the root causes and drivers of the crises. The aims of the strategy are to enable the Programme to make a deeper and broader impact that can underpin positive social and economic outcomes, while reducing vulnerabilities in support of sustainable development. UNEP will continue to advocate for science to remain at the centre of all decision-making processes, including on emerging issues, and for improved global environmental governance, aligned closely with the multilateral environmental agreements for which it provides the secretariats and the direction set by the 2030 Agenda.
- 14.4 With regard to cooperation with other entities at the global, regional, subregional, national and local levels, UNEP will continue to raise ambitions and promote leadership through advocacy and a normative and standard-setting approach. It will support Member States through transformative strategic partnerships that deliver sustainable solutions, integrating health, education, poverty reduction, and economic and social well-being. Its partnerships with the secretariats of multilateral environmental agreements will remain pivotal to securing stronger synergies and enhancing the impact

of the work of the relevant parties. UNEP will encourage non-governmental stakeholders, including the private sector and the finance community, to increase investment in new and renewable sources of energy and improve environmental sustainability. Within the context of those partnerships, action will be aimed at making a broader impact in support of sustainable development, while strengthening the ability of countries to rapidly respond to the environmental impacts of disasters and conflicts.

- 14.5 With regard to inter-agency coordination and liaison, UNEP has the overall responsibility for leading and coordinating the response on environmental issues within the United Nations system. Through the United Nations Environment Management Group, UNEP will catalyse international action to enhance the coherence of environmental sustainability strategies and provide more visibility on partnership initiatives. UNEP will leverage the United Nations development system reform to continue to address the three planetary crises of climate change, biodiversity and nature loss, and pollution and waste, and enhance its guiding role, raise ambitions and accelerate and scale up progress during the decade of action to deliver the Sustainable Development Goals. It will continue to focus on ensuring that its work is reflected and embedded in the new generation of United Nations country teams and the reinvigorated resident coordinator system through engagement with the Development Coordination Office and to leverage its work and expertise at the regional, subregional and country levels. UNEP will also integrate the priorities of the multilateral environmental agreements into global follow-up and review processes, in particular the 2030 Agenda.
- 14.6 With regard to the external factors, the overall plan for 2024 is based on the following planning assumptions:
- (a) Member States and partners remain committed to the development and implementation of science-based environmental policies;
 - (b) The continued availability of extrabudgetary funding for the implementation of UNEP planned activities.
- 14.7 UNEP integrates a gender perspective into its operational activities, deliverables and results, as appropriate. It will work to fully implement Environment Assembly resolution 4/17 on promoting gender equality and the human rights and empowerment of women and girls in environmental governance and will continue to operationalize it in programme and project design and delivery. UNEP will support Member States in their achievement of Sustainable Development Goal 5 in the context of the environment, calling for women's full and effective participation and equal opportunities for leadership at all levels of environmental decision-making.
