UNITED NATIONS, NEW YORK, SEPTEMBER 2021

ENERGY COMPACT PREVIEW

Renewable Energy for Latin America and the Caribbean Initiative (RELAC) Chile, Colombia, Dominican Republic, IDB

Achieve a regional target of at least 70% participation of renewable energy (RE) sources in the power matrix of Latin America and the Caribbean (LAC) by 2030.

The share of renewables of the member countries will be measured and reported every year through RELAC's website (to be launched in Q3 2021), as well as the total aggregate for the region.

Member countries will increase in 70% renewable energy installed capacity and electricity generation compared to the 2019 baseline, 59.3% and 58.5% consecutively.
